

Page from 1941 Forest Conservation Act

Transcript

A BILL

For an act regulating the cutting of timber for commercial purposes, and providing penalties.

Be It Enacted by the People of the State of Oregon:

Section 1. This act shall be known as the "Oregon Forest Conservation Act."

Section 2. The preservation of the forest and the conservation of forest resources for the equal and guaranteed use of future generations, and the protection of forest and water resources and the continuous growth of timber on lands suitable therefore hereby are declared to be the public policy of the state of Oregon. Further, it is recognized that the forested areas situated east of the summit of the Cascade mountains within the state of Oregon predominate in Ponderosa pine trees, and that the forested areas situated west of the summit of the Cascade mountains within the state of Oregon predominate in Douglas fir and related species. Different logging conditions and circumstances in each area necessitate varied forest practices. Therefore, in order to accomplish the foregoing purposes

A BILL

~~For an act~~ Regulating the cutting of timber for
commercial purposes, and providing penalties.

Be It Enacted by the People of the State of Oregon:

Section 1. This act shall be known as the
"Oregon Forest Conservation Act."

Section 2. The preservation of the forest and
the conservation of forest resources for the equal
and guaranteed use of future generations, and the
protection of forest and water resources and the
continuous growth of timber on lands suitable there-
for hereby are declared to be the public policy of
the state of Oregon. Further, it is recognized that
the forested areas situated east of the summit of
the Cascade mountains within the state of Oregon
predominate in Ponderosa pine trees, and that the
forested areas situated west of the summit of the
Cascade mountains within the state of Oregon pre-
dominate in Douglas fir and related species. Dif-
ferent logging conditions and circumstances in each
area necessitate varied forest practices. There-
fore, in order to accomplish the foregoing purposes
