The Honorable Theodore R. Kulongoski
Governor of Oregon

We have conducted a statewide audit in accordance with the Single Audit Act Amendments of 1996, Government Auditing Standards, and U. S. Office of Management and Budget (OMB) Circular A-133, Audits of States, Local Governments, and Non-Profit Organizations. This report encompasses the year ended June 30, 2008, and is required for the State to continue receiving federal financial assistance, which, as shown in this report, totals approximately \$6.4 billion.

As required by the Single Audit Act, we issued a report dated January 12, 2009, on the State of Oregon's financial statements. That report was included in the State of Oregon's *Comprehensive Annual Financial Report* for the year ended June 30, 2008.

This report contains the remaining components required by the Single Audit Act:

- *Report on Internal Control over Financial Reporting and on Compliance and Other Matters.* This component contains our report on the State of Oregon's internal control over financial reporting and compliance with laws, regulations, contracts and grant agreements that affect the financial statements. Part of the schedule of findings and questioned costs relates to this report.
- *Report on Compliance with Requirements Applicable to each Major Program and on Internal Control Over Compliance in Accordance with OMB Circular A-133.* This component contains our report on the State of Oregon's compliance with the requirements applicable to each of its major federal programs described in OMB Circular A-133 and internal controls over compliance. Part of the schedule of findings and questioned costs relates to this report. This component also contains our report on the State of Oregon's schedule of expenditures of federal awards for the year ended June 30, 2008.
- *Schedule of Expenditures of Federal Awards.* This schedule is not a required part of the State of Oregon's financial statements, but is required by OMB Circular A-133. The schedule shows State expenditures of federal awards, for the fiscal year ended June 30, 2008, excluding Oregon Health and Science University. The notes, which accompany the schedule, are considered an integral part of the schedule. They provide disclosures regarding the reporting entity, the significant accounting policies used in preparing the schedule, the value of federal awards expended in the form of non-cash assistance, the value of loans outstanding at year end, unemployment insurance and the value of pass-through awards received by the State from non-federal entities.
- *Schedule of Findings and Questioned Costs.* This schedule lists 20 current audit findings regarding compliance and internal control related to financial reporting.

It also lists 17 current audit findings regarding compliance with the requirements of major federal programs and related internal controls. Further, it lists the status of findings regarding compliance and internal control related to financial reporting and compliance with the requirements of major federal programs and related internal controls, which were included in our report for the fiscal year ended June 30, 2007. In addition, it lists the status of prior year audit findings for the fiscal year ended June 30, 2006, which were not previously corrected.

OMB Circular A-133 requires management to provide a plan of corrective action on the findings and recommendations for the fiscal year ended June 30, 2008. Management's responses and planned corrective actions are included in this schedule.

The Honorable Theodore R. Kulongoski
Governor of Oregon

**REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON
COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL
STATEMENTS PERFORMED IN ACCORDANCE WITH
GOVERNMENT AUDITING STANDARDS**

We have audited the financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the State of Oregon, as of and for the year ended June 30, 2008, which collectively comprise the State of Oregon's basic financial statements and have issued our report thereon dated January 12, 2009. Our report was modified to include a reference to other auditors. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Other auditors audited the financial statements of the following discretely presented component units: State Accident Insurance Fund Corporation, Oregon Health and Science University, and Oregon University System Foundations. The financial statements of the Oregon University System and the Veterans' Loan Fund, as described in our report on the State of Oregon's financial statements, were also audited by other auditors. This report includes our consideration of the results of the other auditors' testing of internal control over financial reporting and compliance and other matters that are reported on separately by those other auditors. However, this report, insofar as it relates to the results of the other auditors, is based solely on the reports of the other auditors. The financial statements of the Oregon University System Foundations, a discretely presented component unit, were not audited in accordance with *Government Auditing Standards*.

Internal Control Over Financial Reporting

In planning and performing our audit, we considered the State of Oregon's internal control over financial reporting as a basis for designing our auditing procedures for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the State of Oregon's internal control over financial reporting. Accordingly, we do not express an opinion on the effectiveness of the State of Oregon's internal control over financial reporting.

Our consideration of internal control over financial reporting was for the limited purpose described in the preceding paragraph and would not necessarily identify all deficiencies in internal control over financial reporting that might be significant deficiencies or material weaknesses. However, as discussed below, we and the other auditors identified certain deficiencies in internal control over financial reporting that we consider to be significant deficiencies.

A *control deficiency* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect misstatements on a timely basis. A significant deficiency is a control deficiency, or combination of control deficiencies, that adversely affects the entity's ability to initiate, authorize, record,

process, or report financial data reliably in accordance with generally accepted accounting principles such that there is more than a remote likelihood that a misstatement of the entity's financial statements that is more than inconsequential will not be prevented or detected by the entity's internal control. We consider items 08-1 through 08-20 to be significant deficiencies in internal control over financial reporting, as described in the accompanying schedule of findings and questioned costs.

A *material weakness* is a significant deficiency, or combination of significant deficiencies, that results in more than a remote likelihood that a material misstatement of the financial statements will not be prevented or detected by the entity's internal control.

Our consideration of the internal control over financial reporting was for the limited purpose described in the first paragraph of this section and would not necessarily identify all deficiencies in the internal control that might be significant deficiencies and, accordingly, would not necessarily disclose all significant deficiencies that are also considered to be material weaknesses. However, of the significant deficiencies described above, we consider items 08-1 through 08-3 to be material weaknesses.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the State of Oregon's financial statements are free of material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

We noted certain matters that we reported to management of the State of Oregon in separate letters.

The State of Oregon's response to the findings identified in our audit are described in the accompanying schedule of findings and questioned costs. We did not audit the State of Oregon's response and, accordingly, we express no opinion on it.

This report is intended solely for the information and use of the management of the State of Oregon, the Governor of the State of Oregon, others within the entity, the Oregon Legislative Assembly, and federal awarding agencies and pass-through entities and is not intended to be and should not be used by anyone other than these specified parties.

The Honorable Theodore R. Kulongoski
Governor of Oregon

**REPORT ON COMPLIANCE WITH REQUIREMENTS APPLICABLE TO EACH
MAJOR PROGRAM AND ON INTERNAL CONTROL OVER COMPLIANCE IN
ACCORDANCE WITH OMB CIRCULAR A-133**

Compliance

We have audited the compliance of the State of Oregon with the types of compliance requirements described in the OMB *Circular A-133 Compliance Supplement* that are applicable to each of its major federal programs for the year ended June 30, 2008. The State of Oregon's major federal programs are identified in the summary of auditor's results section of the accompanying schedule of findings and questioned costs. Compliance with the requirements of laws, regulations, contracts, and grants applicable to each of its major federal programs is the responsibility of the State of Oregon's management. Our responsibility is to express an opinion on the State of Oregon's compliance based on our audit. We did not audit the State of Oregon's compliance with the following major federal programs:

- 10.558 Child and Adult Care Food Program
- 12.401 National Guard Military Operations & Maintenance (O&M) Projects
- 93.268 Immunization Grants
- N/A Food Stamp Cluster
- N/A Disability Insurance/SSI Cluster
- N/A Special Education Cluster (IDEA)
- N/A Research and Development Cluster (5000)

Other auditors audited the State of Oregon's compliance with these programs' requirements and their reports thereon have been furnished to us. Our opinion, insofar as it relates to these programs, is based solely on the reports of the other auditors.

The State of Oregon's basic financial statements include the operations of the Oregon Health and Science University, which received approximately \$280 million in federal awards, which is not included in the State of Oregon's schedule of expenditures of federal awards for the year ended June 30, 2007. Our audit, described below, did not include the operations of the Oregon Health and Science University because the component unit engaged other auditors to perform an audit in accordance with OMB Circular A-133. To obtain a copy of that report, please refer to note disclosure 2 of the schedule of expenditures of federal awards.

We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and OMB Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*. Those standards and OMB Circular A-133 require that we plan and perform the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements referred to above that could have a direct and material effect on a major federal program occurred. An audit includes examining, on a test basis, evidence about the State of Oregon's compliance with those

requirements and performing such other procedures as we considered necessary in the circumstances. We believe that our audit and the reports of the other auditors provide a reasonable basis for our opinion. Our audit does not provide a legal determination of the State of Oregon's compliance with those requirements.

As described in items 08-21 through 08-27, 07-35 through 07-39 in the accompanying schedule of findings and questioned costs, the State of Oregon did not comply with requirements regarding Allowable Costs and Eligibility that are applicable to its Temporary Assistance for Needy Families; Activities Allowed or Unallowed, Eligibility, and Maintenance of Effort that are applicable to the State Children's Insurance Program. Compliance with such requirements is necessary, in our opinion, for the State of Oregon to comply with requirements applicable to those programs.

In our opinion, based on our audit and the reports of the other auditors, except for the noncompliance described in the preceding paragraph, the State of Oregon complied, in all material respects, with the requirements referred to above that are applicable to each of its major federal programs for the year ended June 30, 2008. The results of our auditing procedures also disclosed other instances of noncompliance with those requirements, which are required to be reported in accordance with OMB Circular A-133 and which are described in the accompanying schedule of findings and questioned costs as items 08-28 through 08-31, and 08-37.

Internal Control Over Compliance

The management of the State of Oregon is responsible for establishing and maintaining effective internal control over compliance with the requirements of laws, regulations, contracts, and grants applicable to federal programs. In planning and performing our audit, we considered the State of Oregon's internal control over compliance with requirements that could have a direct and material effect on a major federal program in order to determine our auditing procedures for the purpose of expressing our opinion on compliance, but not for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly, we do not express an opinion on the effectiveness of the State of Oregon's internal control over compliance.

Our consideration of internal control over compliance was for the limited purpose described in the preceding paragraph and would not necessarily identify all deficiencies in the entity's internal control that might be significant deficiencies or material weaknesses as defined below. However, as discussed below, we identified certain deficiencies in internal control over compliance that we consider to be significant deficiencies and others that we consider to be material weaknesses.

A *control deficiency* in an entity's internal control over compliance exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect noncompliance with a type of compliance requirement of a federal program on a timely basis. A *significant deficiency* is a control deficiency, or combination of control deficiencies, that adversely affects the entity's ability to administer a federal program such that there is more than a remote likelihood that noncompliance with a type of compliance requirement of a federal program that is more than inconsequential will not be prevented or detected by the entity's internal control. We consider the deficiencies in internal control over compliance described in the accompanying schedule of findings and questioned costs as items 08-21, 08-22, 08-27, 08-28, 08-32 through 08-36, and 07-35 through 07-39.

A *material weakness* is a significant deficiency, or combination of significant deficiencies, that results in more than a remote likelihood that material noncompliance with a type of compliance requirement of a federal program will not be prevented or detected by the entity's internal control. Of the significant deficiencies in internal control over compliance described in the accompanying

schedule of findings and questioned costs, we consider items 08-21, 08-22, 08-28, 07-35, 07-36, and 07-39 to be material weaknesses.

Schedule of Expenditures of Federal Awards

We have audited the financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the State of Oregon, as of and for the year ended June 30, 2008, and have issued our report thereon dated January 12, 2009. Our audit was performed for the purpose of forming our opinions on the financial statements that collectively comprise the State of Oregon's basic financial statements. Other auditors audited the financial statements of the following discretely presented component units: State Accident Insurance Fund Corporation, Oregon Health and Science University, and Oregon University System Foundations. The financial statements of the Oregon University System and the Veterans' Loan Fund, as described in our report on the State of Oregon's financial statements, were also audited by other auditors. This report includes our consideration of the results of the other auditors' testing of internal control over financial reporting and compliance and other matters that are reported on separately by those other auditors. However, this report, insofar as it relates to the results of the other auditors, is based solely on the reports of the other auditors. The schedule of expenditures of federal awards has been subjected to the auditing procedures applied by us and the other auditors in the audit of the basic financial statements and, in our opinion, based on our audit and the report of other auditors, are fairly stated in all material respects in relation to the basic financial statements taken as a whole.

The State of Oregon's response to the findings identified in our audit are described in the accompanying schedule of findings and questioned costs. We did not audit the State of Oregon's response and, accordingly, we express no opinion on it.

This report is intended solely for the information and use of the management of the State of Oregon, the Governor of the State of Oregon, others within the entity, the Oregon Legislative Assembly, and federal awarding agencies and pass-through entities and is not intended to be and should not be used by anyone other than these specified parties.

The accompanying notes are an integral part of this schedule.

Notes to the Schedule of Expenditures of Federal Awards For the Year Ended June 30, 2008

Note 1. Basis of Presentation

The accompanying schedule of expenditures of federal awards includes the federal grant activity of the State of Oregon and is presented using the bases of accounting of the originating funds. These include both the modified accrual and accrual basis of accounting. The information in the schedules is presented in accordance with the requirements of OMB Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*. Therefore, some amounts presented in the schedule may differ from the amounts presented in, or used in the preparation of, the basic financial statements.

Note 2. Reporting Entity

The financial statements of the State of Oregon include all fund types for all agencies, boards, commissions, authorities, courts, and colleges and universities that are legally part of the State's primary government and its component units. The Oregon Health and Science University (OHSU) is a legally separate component unit. For the year ended June 30, 2008, OHSU has issued separate financial statements and has obtained a separate single audit as outlined in Subpart E.500 of OMB Circular A-133. Therefore, the accompanying schedule does not include the federal grant activity of OHSU. A copy of these reports can be obtained from OHSU, 2525 SW First Avenue, Suite 201, Portland, Oregon 97201.

Note 3. Programs Involving Non-Cash Assistance

Federal expenditures reported in the schedule include the following non-cash assistance programs. All values are either fair market value at the time of receipt or assessed value provided by the federal agency.

CFDA

Number	Title	Type of Assistance	Value
10.550	Food Donation	Commodities	\$ 11,100,029
10.565	Commodity Supplemental Food Program	Commodities	86,366
10.567	Food Distribution Program on Indian Reservations	Commodities	40,584
10.569	Emergency Food Assistance Program (Food Commodities)	Commodities	2,731,450
39.003	Donation of Federal Surplus Personal Property	Donated surplus property	586,572
93.268	Immunization Grants	Vaccines	<u>25,255,677</u>
	Total		<u>\$ 39,800,678</u>

Note 4. Loans and Loan Guarantees

Loans outstanding and new loans made during the year ended June 30, 2008 are as follows:

CFDA		Outstanding Balance as of	New Loans Made During the Year Ended
Number	Title	June 30, 2008	June 30, 2008
11.307	Economic Adjustment Assistance	\$ 6,202,839	\$ 630,000
14.239	HOME Investment Partnerships Program	6,872,426	1,183,823
66.458	Capitalization Grants for Clean Water State Revolving Funds	1,849,500	0
84.038	Federal Perkins Loan Program_Federal Capital Contributions	<u>79,171,196</u>	<u>18,397,506</u>
	Total	<u>\$ 94,095,961</u>	<u>\$ 20,211,329</u>

State of Oregon
Notes to the Schedule of Expenditures of Federal Awards
For the Year Ended June 30, 2008

Note 5. Unemployment Insurance

State unemployment tax revenues and the government contributions in lieu of State taxes are deposited to the Unemployment Trust Fund in the U.S. Treasury. These funds may only be used to pay benefits under the federally approved State unemployment law. Of the \$686,647,167 reported as expenditures for the Unemployment Insurance program (CFDA 17.225), \$641,249,455 represented expenditures of State funds held in the Unemployment Trust Fund.

Note 6. Pass-Through Awards

The State of Oregon received the following amounts as a subrecipient of non-federal entities:

<u>CFDA</u>			
<u>Number</u>	<u>Organization</u>	<u>Amount</u>	<u>ID Number</u>
10.001	University of Nebraska	90	25-6235-0145-006

08-1

Office of the State Treasurer

Inaccurate Financial Reporting of Investment Balances

Material Weakness

The Office of the State Treasurer (OST) plays an important role in the state's reporting entity and is responsible for managing the state's investments and for maintaining accurate accounting records in accordance with generally accepted accounting principles (GAAP). OST is responsible for providing investment balances in accordance with GAAP for state agencies that have investments held at OST such as the Public Employees Retirement System (PERS) and the Department of State Lands.

The accuracy of reported investments depends on the accuracy and completeness of the OST's investment accounting activities. OST management is responsible for establishing and maintaining internal controls that provide reasonable assurance of the reliability of the financial reporting of investments. These controls include ensuring that information provided to agencies is sufficient to allow agencies to adhere to accounting and reporting policies and procedures included in the Oregon Accounting Manual and governmental accounting and financial reporting standards issued by the Governmental Accounting Standards Board.

During our review of investment balances for state fiscal year 2008, we noted that OST's controls over its financial reporting of fiscal year 2008 investment balances related to derivatives, short sales, and reverse repurchase agreements were not sufficient to ensure balances were adequately supported and appropriately reported in accordance with GAAP. As a result, OST reported fiscal year 2008 investment related balances that were materially misstated and not in accordance with GAAP to PERS and the Department of State Lands. For PERS, OST reported investment, investment receivable, and investment payable balances that were overstated by \$1.2 billion, \$14.2 billion, and \$15.4 billion, respectively. After adjustment, the account balances were \$60.6 billion, \$3.4 billion and \$3.8 billion, respectively. For the Department of State Lands, OST reported investment, investment receivable, and investment payable balances that were overstated by \$34.6 million, \$101.8 million and \$136.5 million, respectively. After adjustment, the account balances were \$1.01 billion, \$9.5 million and \$8.0 million, respectively. Specifically, we noted misstatements due to the following:

- Forward positions, including To-Be Announced and foreign exchange positions, were reported at notional value instead of fair market value.
- Short sale positions were incorrectly classified as a reduction of investments instead of as liabilities.
- The assets and liabilities of reverse repurchase agreements were netted instead of separately disclosed.

We communicated these errors to OST investment accounting, who took the time to research the issues and ensure their revised fiscal year 2008 investment balances were appropriately reported in

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2008

accordance with GAAP. Consequently, OST was not able to provide timely investment balance information to state agencies due to the nature of the misstatements and the research involved.

We recommend OST management establish and maintain internal controls over financial reporting of investments to ensure OST provides state agencies investment balances that are fairly stated in accordance with GAAP. Further, OST management should ensure that sufficient investment accounting resources are allocated to timely provide investment information to state agencies.

AGENCY'S RESPONSE:

The Office of the State Treasurer (OST) agrees that additional accounting resources are needed to ensure that investment information can be provided to state agencies in a timely manner. OST has requested two additional investment accounting positions within our 2009-2011 budget that will be tasked with supporting financial reporting, investment monitoring and compliance initiatives.

OST is also in the process of developing formal procedures to address the control structure in place over financial reporting for investments. The goal of these procedures will be to ensure that investment information provided to state agencies and Statewide Accounting & Reporting Services supports the preparation of financial statements in accordance with generally accepted accounting principles. Procedures will include specific direction regarding derivatives, short sales, and repurchase agreements to ensure proper reporting of these investment activities.

OST plans to complete financial reporting procedures by June 30, 2009. If additional resources are obtained, OST expects to completely resolve this audit finding by December 31, 2009. If resources do not become available, OST will develop an alternative plan to resolve this concern and will provide the Oregon Audits Division with a revised corrective action plan and resolution date.

08-2

Office of the State Treasurer

Lack of Internal Controls Over Financial Reporting

Material Weakness

The Office of the State Treasurer (OST) management is responsible for establishing and maintaining internal controls that provide reasonable assurance of the reliability of financial reporting for the Oregon Short-Term Fund. Financial reporting relates to the preparation of financial statements that are fairly presented in conformity with generally accepted accounting principles.

OST's controls over its financial reporting process for the Oregon Short-Term Fund were not sufficient to prevent or detect a significant error in the compilation of the financial statements. This error resulted in material understatements of Participants' Contributions and Participants' Withdrawals in the Statement of Changes in Net Assets on the 2007 Oregon Short-Term Fund financial statements, but had no effect on the net assets of that statement. The error is a financial reporting error and had no effect upon the individual participants' accounts.

The underlying cause of this error would have materially understated Participants' Contributions and Participants' Withdrawals in the current-year Statement of Changes in Net Assets if it was not corrected. However, once we brought this error to management's attention, OST made adjustments to ensure its current-year financial statements were appropriately prepared.

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2008

We recommend that OST management establish and maintain a documented internal control structure over financial reporting for the Oregon Short-Term Fund to prevent errors in the financial statement, and detect and correct errors in a timely manner.

AGENCY'S RESPONSE:

The Office of the State Treasurer agrees that there was an equal and offsetting misclassification in the compilation of participants' contributions and withdrawals. OST corrected this for the current year statements as noted in the finding and will review, and revise as necessary, our policies and procedures relating to controls over financial reporting for the OSTF.

08-3

Oregon Department of Revenue

Taxes Receivable Misstatement During Year End Financial Reporting

Material Weakness

State policy for year-end closing processes indicates that accounting estimates used for accruals should be fundamentally sound, sufficiently documented, able to be audited, and conform with generally accepted accounting principles. The quality of the state's Comprehensive Annual Financial Report depends on the accuracy and completeness of year-end closing activities, including the preparation of accruals. Agency management is responsible for ensuring the accuracy and completeness of the information that supports its year-end adjustments.

Each year, as part of its annual financial reporting process, the Oregon Department of Revenue (department) prepares estimates as of June 30 of the taxes receivable accrual for tax programs under its purview. The estimates involve many separate calculations and are based on several sources of data, including historical trends, uncollectible taxes, estimated refunds payable, and other information contained in the department's subsidiary accounting system.

In reviewing the estimates prepared for state fiscal year 2008, we found multiple errors and methodology issues in the department's calculation, such as double counting and incorrect and omitted amounts. As a result of these errors, the taxes receivable amount for the government wide statements was misstated by approximately \$32 million and required an audit adjustment to be fairly stated in accordance with generally accepted accounting principles.

We recommend department management ensure the year-end calculations of the taxes receivable estimate are adequately reviewed to ensure errors are identified and corrected in a timely manner. Furthermore, the methodology used to calculate the estimate should be reviewed annually to ensure all relevant information is included.

AGENCY'S RESPONSE:

Management agrees with the recommendation. The department recognizes the importance of accurate receivable data and will continue to look for means and methods of minimizing mathematical and procedural errors. We have also inserted an annual review of the receivable methodology into the year-end timeline.

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2008

08-4

Oregon Department of Revenue

Cash Reconciliations Not Reviewed Timely

During state fiscal year 2008, the Oregon Department of Revenue (department) received, processed and deposited over \$6 billion in revenues from various tax programs. To facilitate more efficient accounting, the department has set up specific cash accounts for these tax programs. Much of the cash received is processed through the Revenue Suspense Account at the Oregon State Treasury before being transferred to the general fund or other funds, as appropriate. State policy recommends agencies reconcile cash accounts on a regular basis and, if an agency uses a subsidiary accounting system, reconcile the subsidiary system to the state accounting system. Cash reconciliations are an important internal control that provides assurance that account balances are accurate and agree to the actual assets in the custody of the state.

The department's typical process is, on a monthly basis, to reconcile cash accounts in its subsidiary system to related accounts at the Oregon State Treasury and then reconcile the department's subsidiary system to the state accounting system. During the audit, however, we found that the department did not routinely reconcile its subsidiary system's cash accounts to the state accounting system. Instead, the department prepared one reconciliation in April 2008 to cover the eight months from July 2007 through February 2008. Furthermore, the department did not prepare the June 2008 reconciliation until October 2008. In bypassing the control of a monthly reconciliation, the department was not in compliance with state policy and had less assurance that errors would be detected and corrected in a timely manner.

We recommend department management comply with state policy and ensure the cash accounts in its subsidiary system are routinely reconciled to the state accounting system.

AGENCY'S RESPONSE:

Management agrees with the recommendation. Management has implemented a revised tracking system to monitor the status of reconciliations and determine the reason for missed deadlines. Corrective actions (including additional training) will be implemented to address any issues.

08-5

Oregon Department of Administrative Services

Self Insurance Plan Note Disclosures Not Adequately Reported

Starting in fiscal year 2007 the Oregon Department of Administrative Services (department) operated a medical self insurance plan for current and former employees. The department did not make the required financial statement note disclosures for this plan for fiscal years 2007 and 2008. In addition, in each of the two fiscal years, the department incorrectly reported the plan's current activity in an agency fund. Further, 2007 fiscal year transactions were incorrectly reported as fiscal year 2008 transactions.

This condition resulted from misunderstandings between the department's various divisions responsible for performing, recording, and reporting financial activity associated with this plan. There were misunderstandings about the underlying nature of the transactions, and the correct method of reporting and disclosing plan activity in the financial statements.

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2008

We recommend the department improve its communications between divisions related to year-end financial reporting. The department should ensure that activities are identified and discussed, prior to fiscal year-end, to ensure proper classification and disclosure of plan activities in the financial statements.

AGENCY'S RESPONSE:

The Department agrees with the finding and recommended action. Management plans to schedule several meetings prior to 2009's fiscal year end to ensure personnel from the State Controller's Division, Operations Accounting Services Unit and the Public Employees Benefit Board identify and discuss the accounting and disclosure requirements for reporting the activities of the self-insured medical plan. Specifically, these meetings will be used to identify (1) the proper fund and general ledger accounts for recording the related claim liabilities, (2) whether classification between a current and long-term liability is appropriate, and (3) the data sources and timelines for obtaining the information required for the risk financing note disclosure.

Determination of the proper accounting and identification of the data sources should be completed no later than June 30, 2009. The disclosure information, itself, should be obtained no later than the August 31, 2009.

08-6

Oregon Employment Department

Cash Reconciliations Not Performed Timely

The Oregon Accounting Manual states that departments should regularly perform reconciliations of cash recorded in agency records to amounts reported on Treasury statements. Those reconciliations should be performed by persons not otherwise responsible for handling or recording cash and should be independently reviewed by management.

The Oregon Employment Department (department) did not perform timely reconciliations of its cash accounts. We requested the department's cash reconciliations for two accounts and noted that the reconciliations from July 2007 to June 2008 were not performed until August 2008. Based on the year-end reconciliation, the department made an adjustment to reduce cash by \$2.5 million in order to agree the accounting system balance to the balance per the year end reconciliation.

Reconciling bank statements to amounts recorded in agency accounting records is an essential internal control. Timely and effective reconciliations can help identify errors or other problems that may have occurred, and provide additional assurance that reported cash balances are accurate. In bypassing the control of performing regular reconciliations, the department was not in compliance with state policy and had less assurance that errors would be detected and corrected in a timely manner.

We recommend department management make cash reconciliations a priority and ensure reconciliations are performed timely.

AGENCY'S RESPONSE:

We concur with the auditors that cash reconciliations have not been performed timely. To rectify this situation the Oregon Employment Department has added temporary staffing to bring the cash reconciliations current. We have already made significant progress over fiscal year ended June 30,

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2008

2008. As of the date of this response, we have completed the Trust Clearing suspense account reconciliation through December 2008 and the Benefit suspense reconciliation through November 2008. Further, we are changing our Suspense account monthly entries into daily Statewide Financial Management System Suspense account entries for our Trust Clearing Account, Benefit Suspense Account, Federal Trust fund, and the Manpower (Trade Act) Suspense Checking Account. We will have completed four months of daily entries by the end of fiscal year 2009. Finally, we are documenting sources of cash differences to aid us in the future. We anticipate improved and timely suspense cash account reconciliations for review by auditors in July and August 2009.

08-7

Oregon Employment Department

Controls Over Year End Closing Activities Could Be Improved

The accuracy of the state's Comprehensive Annual Financial Report depends on the accuracy and completeness of agency year end closing activities. Department management is responsible for implementing controls that ensure fiscal year end closing procedures result in reporting department financial information in conformity with generally accepted accounting principles. These controls include adherence to accounting and reporting policies and procedures included in the Oregon Accounting Manual.

During our review of year end closing activities, we noted that the Oregon Employment Department (department) did not have sufficient controls in place to ensure adjusting entries were appropriate and adequately supported. Specifically, we noted the following:

- The department made a year end adjustment to reduce employment taxes revenue. The department was not able to explain nor provide supporting documentation for the reduction to employment taxes revenue.
- The department accrued expenditures for benefit payments that had been distributed to individuals but not yet redeemed. These expenditures had previously been recorded as an expenditure when the benefit payment was distributed. As a result, the current year accrual and the reversal of the prior year accrual understated expenditures at June 30, 2008 by \$6.7 million and were not in accordance with generally accepted accounting principles.
- The department inappropriately recorded an adjustment to taxes receivable, resulting in a misclassification between current and noncurrent taxes receivable of \$1 million.
- The department made an adjustment to transfer expenditures from the employment services fund to the unemployment fund. Upon inquiry, it was determined these expenditures should not have been transferred to the unemployment fund, resulting in a \$6.3 million overstatement of expenditures at June 30, 2008.

We recommend department management implement controls to ensure year end adjustments are appropriate and adequately supported.

AGENCY'S RESPONSE:

We concur with the auditors that controls over year-end closing activities could be improved. We will review our accrual methodology for benefit payments during this upcoming fiscal year end. We anticipate that the errors and misclassifications identified in this management letter will not be repeated in July and August 2009.

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2008

08-8

Oregon Department of Education
Employee Fraud

Audit standards require that we communicate any instances of fraud on the part of senior management to those charged with governance. Between June 2007 and June 2008, the Oregon Department of Education's (department) former accounting director misappropriated approximately \$925,000 in federal funds. In perpetrating the fraud, the former accounting director was able to use knowledge of the department's internal controls and accounting structure to override the existing internal controls of the department. Following a guilty plea in April 2008, the former accounting director was sentenced to two years in prison and is required to repay the department for the total amount of funds misappropriated.

Following the identification and investigation of the theft, department management reviewed and made changes to controls as determined appropriate.

We recommend department management minimize the opportunity for fraud to occur by maintaining internal controls that are adequate to ensure all accounting transactions are appropriately authorized, justified, documented and reviewed for accuracy. Additionally, we recommend that management provide training to department staff to identify symptoms of fraud and inform staff of how to respond when a potential fraud is identified.

AGENCY RESPONSE:

The department agrees that the fraud occurred. As acknowledged in your letter, management has already reviewed and made changes to controls as appropriate. For example, the department hired an additional accountant so that there is proper separation of duties when requesting federal funds. Also, the Director of Financial Services is creating a fraud policy that will include identifying symptoms of fraud and informs staff how to respond when a potential fraud is identified. The policy will be in place by June 30, 2009.

08-9

Oregon Department of Education
Weaknesses Identified In Year End Accrual Process

Generally accepted accounting principles require that revenues be recognized when the underlying expenditures have occurred. The Oregon Accounting Manual clarifies that revenues received within 90 days of fiscal year end for expenditures that occurred during the year should be recognized in the year in which the expenditures occurred.

Through our testing we found weaknesses in the Oregon Department of Education's (department) process for accruing expenditures and the related revenue. The department did not accrue all expenditures and revenue known or estimated through the 90 day period after June 30, 2008. As a result, expenditures and revenue for fiscal year 2008 were misstated by approximately \$19.2 million in the Educational Support Fund and \$1.8 million in the Nutritional Support Fund. See *Prior Year Finding 07-20*.

We recommend the department review and update their policies and procedures to ensure year end accruals are made in conformity with generally accepted accounting principles. The procedures

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2008

should include steps to identify all expenditures and revenue known at the time of preparing the year-end closing adjustments and an estimate of the revenue likely to occur after year-end close and prior to the 90 day recognition period.

AGENCY'S RESPONSE:

The department agrees with the finding that there are weaknesses in the process for accruing expenditures and the related revenue. The department did not accrue all expenditures and revenue known or estimated through the 90 day period after June 30, 2008. The department is continuously improving the way it records accruals to ensure year-end transactions (Month 13) are made in conformity with generally accepted accounting principles.

During fiscal year 2008, the Director of Financial Services established an accrual procedure and instructed staff to use the Service Date field in the accounting system so that payments are identified to the month goods were received, services performed or when the subrecipient incurred the costs.

Even though improvements were made, there is still one item that needs to be addressed, which is the estimating of expenditures after Month 13 closes. The department isn't able to accurately estimate post-Month 13 expenditures due to a lack of historical data. However, the Director of Financial Services will update the accrual procedure by June 30, 2009, to include a methodology to estimate expenditures and the Service Date will be used as the basis of the estimation. As historical information becomes available over time, we expect these data to contribute to our ability to more accurately estimate amounts to be accrued.

08-10

Oregon Department of Forestry

Inconsistency in Accounting for State Forest Lands Revenue Results in Misstatement

To communicate effective information, financial reporting must be consistent, including the use of the same reporting method for all similar transactions. The Oregon Department of Forestry (department) accounted for State Forest Lands revenue inconsistently during fiscal year 2008.

The timber sales contract amounts are based on the net of gross timber sale value less estimated project work costs. Project work is work needed to be done by the contractor to access the timber for harvesting; this work mostly consists of road construction and road improvements. Historically, the department has reported State Forest Lands revenue from these contracts on a net basis. In June 2007, a legislative bill required transfers to counties during the 2007-09 biennium of additional revenue to offset a portion of project work costs on timber sales. In association with the required transfers, the department recognized the revenue on a gross basis by recognizing the associated project work costs. Consequently, department management reported a portion of the State Forest Lands revenue on a gross basis (total forest sales value), but reported the remaining portion on a net basis (total forest sales value less project work costs). This resulted in total revenue being understated by approximately \$3.1 million.

We recommend department management ensure State Forest Lands revenue is reported consistently for financial statement purposes.

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2008

AGENCY'S RESPONSE:

In regards to the finding of inconsistency in accounting for State Forest land revenues, as we discussed with your staff during the audit process, we were aware that in order to meet the legislative mandate from the 2007 Oregon legislative session, we would have to report our revenues and expenditures for project work done on timber sales inconsistently. We were required to share additional revenue with the counties based on a limited number of projects done around the state. That required us to recognize both the revenue and the expenditure related to these projects while netting the expenditures against the revenues for projects not on the list, as was our practice in the past. To accomplish this task we were given budget limitation and legal authority only for the exact amount of the projects that we would be recognizing. This restricted our ability to be consistent and recognize all the project work that was done in a like manner. To this extent, we agree with the finding and recommendation. To correct this in the future and to be transparent in how we account for the revenues and expenditures of the State Forest Land revenues, we have included in our 2009-11 Agency Request Budget the necessary budget limitation to allow us to account for these transactions on a consistent and transparent basis. This was completed on September 1, 2008. This request has now also been included in the Governor's Recommended Budget that was released December 1, 2008. These corrective actions will be completed with the beginning of the 2009-11 biennium.

08-11

Oregon Parks and Recreation Department

Lack of Segregation of Duties and Logical Access to Accounting Systems

During our audit of the Oregon Parks and Recreation Department (department), we noted a weakness in the segregation of duties related to cash. One employee reconciled the cash accounts, had access to the safe and had entry capability to the department's automated financial accounting system (FMS), which interfaces with the state's centralized accounting system (Statewide Financial Management Application). Additionally, the employee was appointed as the administrator for the FMS. As administrator for this system, the employee had the ability to assign her own system access level. Duties for authorization, recordkeeping, and custody of the related assets should be segregated to reduce the opportunities for any individual to be in the position to both perpetrate and conceal errors or fraud in the normal course of duties. Additionally, appropriate logical access controls for financial accounting systems support and enforce segregation of duties by limiting the ability of any one individual to view, alter and control resources.

We recommend department management ensure responsibilities for cash are segregated. Specifically, management should ensure adequate separation of authorization for the execution of transactions, recording of transactions, custody of assets, and periodic reconciliation of existing assets to recorded amounts. In addition, management should ensure that individuals performing financial system security functions do not have conflicting accounting duties or responsibilities for monitoring and validating logical access, to ensure those functions are independently performed.

AGENCY'S RESPONSE:

The Oregon Parks and Recreation Department agrees with the recommendations, and completed all corrective actions in November 2008. We changed the combination of the safe and removed access of the noted employee. We worked with our Information Technology division to remove her

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2008

capability to change her own system access levels. In the future, as we have changes in staff, we will continue to ensure that their duties are appropriately segregated.

08-12

Oregon Department of Fish and Wildlife

Lack of Reconciliation of Point of Sale System

The Oregon Department of Fish and Wildlife (department) receives fax/mail orders for licenses and tags at its Salem headquarters. The department accounts for these sales by generating the license or tag with its Point of Sale Licensing System (POS) and records cash received using a cash register system. The department does not reconcile its Point of Sale system and its cash register system for these sales. Regular reconciliations between these two systems is an important internal control that provides assurance that the licenses generated in the POS system agree to the cash register receipts for fax/mail order license sales. Although the department has taken steps to address this issue by reviewing a sample of POS transactions against cash register transactions, without a complete reconciliation between the two systems, there is an increased risk that misappropriation of assets could occur and not be detected in a timely manner. See *Prior Year Finding 07-17*

We recommend department management strengthen its controls over license sales by regularly reconciling the POS system and the cash register system to ensure accountability for all licenses, tags and cash receipts.

AGENCY'S RESPONSE:

Initially, during the 2005 financial audit, the department thought this issue would be resolved with the new POS system. However, the new system will not resolve the reconciliation issue. Even without a system process in place, the transactions input into the register and the POS licensing system can be reconciled. Both transactions are tracked with a corresponding identification number. The department has implemented a sampling review of POS transactions against register transactions. This review will continue in lieu of reconciliation until such time resources are available or system capabilities enable a full and complete reconciliation.

Until a full and complete reconciliation is implemented, risks are decreased as more transactions are moving to the internet channel.

08-13

Oregon Department of Fish and Wildlife

Procedures for Accruing Federal Revenue Need Improvement

The Oregon Department of Fish and Wildlife (department) created a methodology for accruing federal revenue and classifying receivables as current and non-current to help address a recurring prior year finding. Generally Accepted Accounting Principles require current receivables and revenue only be reported if payment is expected to be received within 90 days of fiscal year end and that receivables expected to be collected after the 90-day period be reported as non-current. The department's methodology requires the evaluation of transactions that occurred during the fiscal year for the purpose of estimating the balance and collection of receivables at fiscal year end. During our audit, we tested the department's methodology and found that it did not capture all applicable transactions that occurred during the fiscal year. In addition, the methodology did not

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2008

correctly classify all receivables as current and non-current. As a result, federal revenue and the related accounts receivable were misstated at June 30, 2008. See *Prior Year Finding 07-18*

We recommend department management review and modify its methodology for accruing federal revenue to capture all applicable transactions and to correctly classify receivables as current and non-current at fiscal year end.

AGENCY'S RESPONSE:

The department reviews the methodology annually and adjusts the methodology based on current findings. The department will update documentation of the methodology in a policy and/or procedure format by June 30, 2009 to ensure that all applicable transactions are reviewed.

08-14

Oregon Department of Fish and Wildlife
Duplicate Federal Revenue Transactions

The Oregon Department of Fish and Wildlife (department) prepares monthly reconciliations to ensure the accurate recording of federal expenditures and associated federal revenues. Management review is an important internal control that helps to ensure amounts are accurate and properly recorded. Department management did not review the monthly federal revenue reconciliations during fiscal year 2008. We found the department recorded a total of 30 duplicate transactions during the year, resulting in an overstatement of \$303,738 in federal revenue and receivable account balances as of and for the year ended June 30, 2008. As a result of our audit, management took action to correct these errors in the financial system and, as of March 6, 2009, only \$2,820 remained uncorrected related to these errors.

We recommend department management perform timely and adequate review of monthly reconciliations of federal expenditures and associated federal revenues to ensure all transactions are accurately recorded. In addition, we recommend the department resolve all duplicate transactions and repay any cash received inappropriately due to the errors.

AGENCY'S RESPONSE:

The department generally agrees with the recommendation. The department has brought current the review of monthly reconciliations of federal expenditures and associated federal revenue. From this point forward, the Fiscal Services Manager will review these reconciliations within 21 days of preparation. The department will resolve the remaining \$2,820 errors by April 30, 2009.

08-15

Oregon Department of Transportation
Inadequate Controls over Financial Reporting

According to the Oregon Accounting Manual, a department's internal controls must be adequate to provide reasonable assurance that transactions are accurate and properly recorded. The Oregon Department of Transportation (department) did not have sufficient internal controls in place to prevent or detect the following June 30, 2008, financial reporting misstatements:

- A portion of Noncurrent Bonds Payable was not reclassified to Current Bonds Payable, resulting in each account being misstated by \$9 million.

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2008

- Fiscal year 2007 accruals were not reversed in fiscal year 2008 as required by department policy, causing misstatements to Accounts Payable and Accounts Receivable in the amounts of \$2.9 million and \$1.1 million, respectively.
Further, these accruals affected the Increase in the Fair Value of Investments account in fiscal year 2008 and, as a result, it was misstated by \$1.7 million.
- A fiscal year 2009 transaction was inappropriately recorded in fiscal year 2008, resulting in a misstatement to Transfers to Counties of \$750,000.
- A \$1million investment purchase and the associated \$16,260 investment discount were recorded in the opposite accounts, misstating each account by \$1,016,260.

During fiscal year 2008, the department had fewer staff available for preparing year-end transactions and conducting independent reviews, which may have contributed to the number of errors we identified.

We recommend department management ensure adequate controls are in place to prevent and/or detect financial reporting errors.

AGENCY'S RESPONSE:

The department will ensure adequate staff resources are available to complete midyear and year-end detailed work within required deadlines. The department plans to work with Department of Administrative Services, Statewide Accounting and Reporting Services staff to clarify and address the broker payable, broker receivable and reversing entries for the investment program. In addition, the department will update its Financial Administration and Standards Manual regarding the review and approval of transactions for year-end reporting to ensure better controls exist for coding and changes after documents have been submitted.

08-16

Oregon Department of Transportation
Jurisdictional Transfers Not Adequately Supported

The Oregon Accounting Manual states that all transactions must be supported by appropriate documentation. We noted the Oregon Department of Transportation (department) did not obtain the necessary documentation to ensure jurisdictional transfers were properly recorded.

A jurisdictional transfer occurs when the department transfers the jurisdiction of a segment of the state highway system from the state to a city or county.¹ The transfer requires a formal agreement between the state and all affected local governments. The department is then responsible for calculating the value of the transfer and removing it from the accounting records. While preparing year-end accounting transactions for jurisdictional transfers, the department did not obtain adequate supporting documentation. As a result, the department removed the value for a jurisdictional transfer that was not yet complete. In another instance, a jurisdictional transfer had occurred; however, the department did not record the transfer. As a result of these two errors, the state highway system account was understated by \$25 million.

¹ Jurisdiction refers to the territory over which authority is exercised.

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2008

We recommend department management ensure transactions relating to the state highway system are adequately supported.

AGENCY'S RESPONSE:

The department's Financial Services staff will work with the Right of Way Section to have a manager review and approve the jurisdictional transfer report prior to year-end transactions being prepared to ensure jurisdictional transfers are accurately and correctly reported.

08-17

SAIF Corporation

Reinsurance Recoverable Not Accurately Calculated

We noted that the SAIF Corporation's (SAIF) Actuarial Department maintains a spreadsheet to track reported claims that are covered under SAIF's various reinsurance contracts. This spreadsheet is used to calculate reinsurance recoverable on paid and unpaid losses for purposes of SAIF's in-house actuarial study and to record reinsurance activity to the general ledger via manual journal entries. In performing testwork over reinsurance recoverable, we noted an error in the spreadsheet calculation related to accident year 1995 under the first (\$3 million excess \$2 million) and second (\$5 million excess \$5 million) excess of loss reinsurance contracts. Based on the spreadsheet calculation, SAIF had recorded a recoverable in excess of the maximum amount recoverable under the related contracts. This error resulted in SAIF recording an adjustment to reduce reinsurance recoverable on unpaid losses by \$1,348,550.

We recommend that SAIF implement a formal review procedure over the spreadsheet in order to ensure that reinsurance recoverable is accurately calculated and recorded in accordance with the terms of the corresponding reinsurance contracts.

AGENCY'S RESPONSE:

SAIF agrees with this recommendation. The spreadsheet has been reviewed and a column was added that caps the expected recovery for each reinsurance treaty. This will prevent the described error from being repeated. SAIF's Actuarial Division has a formal review process in which each actuary reviews the data and calculations in the spreadsheet every quarter. By year-end 2008, each SAIF actuary will separately read each reinsurance contract to ensure that the spreadsheet properly reflects the language of each contract.

08-18

SAIF Corporation

Information Technology – Administrator and Superuser Access Not Reviewed

The Workers' Compensation Insurance System (WCIS) application maintains the majority of the SAIF Corporation's (SAIF) policy data. In performing testwork, we noted that a Generic Administrator account, Helpdesk, exists in the WCIS application. Per inquiry with SAIF personnel, KPMG determined that the password to this account is not controlled. Generic and uncontrolled users with the ability to add, modify, and remove user accounts increases the risk of unauthorized or inappropriate access to programs and data. This provides a significant risk to the reliance which can be placed on application data and business processes.

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2008

We recommend that SAIF perform detailed reviews of all system accounts including those with access to user administration functionality. The review should address those accounts that are determined to be generic in nature and assign individuals to those accounts or remove them completely from the active user environment.

AGENCY'S RESPONSE:

Information systems agree that generic user accounts should not be used. The generic administrator account, Helpdesk, identified in the finding was an unused account that has been deleted. This account was in fact the residue of creating individual accounts for the two individuals who administer security from the Helpdesk team. Information Systems has completed a detailed review of administrator accounts and validated that all are assigned to authorized individual accounts.

08-19

SAIF Corporation

Information Technology – Administrator Access and User Provisioning Not Appropriate

As noted above, the Workers' Compensation Insurance System (WCIS) application maintains the majority of the SAIF Corporation's (SAIF) policy data. The Legacy Mainframe application maintains certain policy data and all claims data. In performing testwork, we noted that for both the WCIS application and the Legacy Mainframe environments, administrators with developer rights and abilities have access to modify code and promote their own changes to the production environment. Additionally, changes to the production environment that were tested were found to be lacking proper evidence of testing and approval.

With this level of access, we noted that these individuals have the ability to bypass established change management controls undetected. This could lead to applications and data being inappropriately modified. It also increases the risk of inappropriate code being introduced into the production environment which could cause key system functionality, processes, and calculations to produce erroneous data.

We recommend that SAIF develop a solution that would either limit the level of access these developers have or implement a detective control that would provide assurance to the integrity of the change management process. In addition, we recommend that SAIF maintain records of testing and approval for all application changes.

AGENCY'S RESPONSE:

Information Systems has change management controls in place that prevents developers from promoting their own code. The finding identifies an exception where two individuals, due to staff efficiencies, are responsible for administration duties as well as code development. This does create a situation where these two individuals could promote their own code to production. For those two individuals, an additional detective control will be put in place to allow efficient use of staff, while providing assurance to the change management process.

08-20

SAIF Corporation

Information Technology – Lack of User Access Review

We noted that the SAIF Corporation (SAIF) did not conduct a user review for the Workers' Compensation Insurance System (WCIS) application users or Oracle database users in 2007.

Failure to perform an adequate review of users with access to key financial systems and databases increases the risk of unauthorized or inappropriate access. When there is a breakdown in preventative controls, this detective control can be helpful in mitigating the risks associated with unauthorized or inappropriate access.

We recommend that SAIF perform a periodic review of user access to all of the financially relevant applications, databases, and operating systems to ensure:

- Terminated users are identified and removed
- Segregation of duties conflicts do not exist
- Each user's access is appropriate to their job function
- Generic accounts do not exist or are limited to service level accounts
- Each user has been appropriately authorized and approved for their level of access.

AGENCY'S RESPONSE:

Although not in place for the time period under review, a manual review of WCIS and Oracle database users was completed in September 2008. In addition, an automated process is under development which will allow more efficient and timely access reviews for all WCIS and Oracle users starting in 2009 and yearly thereafter.

Section III – Federal Awards Findings and Questioned Costs

U.S. DEPARTMENT OF HEALTH AND HUMAN SERVICES

08-21

Oregon Office of Private Health Partnerships

State Children's Insurance Program, CFDA 93.767

Activities Allowed or Unallowed – Federal Benchmarks Not Met

Material Weakness

The Office of Private Health Partnerships (department) operates under a waiver that requires health coverage plans to meet federal benchmarks. The department uses a benchmark worksheet to ensure benchmarks are included in the coverage; however, this worksheet has not been updated to include all the requirements outlined in the waiver such as mental health services. As a result, the department approved health coverage that did not include mental health services and, therefore, did not meet the federal benchmark.

We tested a sample of 60 subsidy payments issued during fiscal year 2008 and found that 24 of the payments were for coverage that did not meet the benchmark requiring mental health services. We also found that seven of the nine health insurance plans represented in the sample did not include mental health services.

We recommend department management implement procedures to ensure the benchmark worksheets include all the required federal benchmarks. We further recommend department management ensure all approved health insurance plans are in compliance with current benchmark requirements.

AGENCY'S RESPONSE:

The agency partially agrees with this finding and is taking corrective action. As a result of the Benchmark Specialist marking "no coverage" in error on the benchmark worksheets, the Secretary of State's office determined that 24 of 60 subsidy payments they tested were made for coverage not meeting the benchmark requiring mental health. Program management has confirmed that all but two of these payments were made for plans containing mental health coverage. The associated benefit plan for the other two payments is still being reviewed and we are waiting for additional information from the carrier.

- 1 The Secretary of State's office is recommending that agency benchmark worksheets be updated to insure all required federal benchmarks are included.*

FHIAP management has already started corrective action. Full implementation is anticipated by April 15, 2009.

- 2 The Secretary of State's office is also recommending the agency ensure that all approved health insurance plans comply with current benchmark requirements.*

FHIAP management will take the following corrective action: a. Review all plans for compliance and determine a corrective course of action by May 30, 2009; and b. Correct any compliance issues by October 31, 2009.

08-22

Oregon Office of Private Health Partnerships
State Children's Insurance Program, CFDA 93.767
Eligibility – Untimely Eligibility Redeterminations
Questioned Costs \$2,990
Material Weakness

The Office of Private Health Partnerships (department) administers a program to subsidize eligible Oregonian's private health insurance premiums. Eligibility is established based on criteria outlined in a federal waiver. One specific requirement is that eligibility redeterminations be performed at least once every 12 months. We tested 60 case files and found that during fiscal year 2008 the department did not perform timely eligibility redeterminations for 29 of those cases. We also noted one income calculation error and two instances where the department did not pursue proof of citizenship as required by federal regulation. The known questioned costs total \$2,990.

We have reported eligibility internal control issues in the past two fiscal years. The department has made progress in identifying and correcting errors. For the current year, we identified fewer calculation and input errors than in prior years; however, we identified more cases in which eligibility redeterminations were not made timely. According to the department, the increase is a result of prior fiscal years caseload issues and redirected work assignments as the department focused on meeting its federal requirement related to maintenance of effort. *See Finding 07-40.*

We recommend department management continue to improve their eligibility review process. We also recommend the department determine the amount of State Children's Insurance Program funds that should be refunded to the federal agency.

AGENCY'S RESPONSE:

The agency agrees with this finding and has already taken some corrective action. Further corrective action is planned. The Secretary of State's office is reporting that eligibility determinations were not made timely in 29 of the 60 case files reviewed. As reported last year, these errors were made as a direct result of caseload issues and redirected work assignments resulting from Maintenance of Effort (MOE) challenges. Program management staff has since identified and implemented process changes enabling the agency to mitigate the risk of subsidies being paid beyond the 12-month eligibility period. Files identified in this year's audit were processed prior to implementation of these process changes.

The agency has already implemented a short-term (manual) solution. In the short term, eligibility staff work redetermination applications based on the subsidy eligibility date. FHIAP management assesses upcoming redeterminations weekly. Applications closest to the end of their 12-month eligibility period are worked first.

Last year's audit response indicated that program management would submit a request for a database change. The database enhancement would enable creation of a script identifying accounts approaching the end of the subsidy eligibility period, thus moving to an automated versus manual review process. This database change was put on hold as a result of a decision to restructure the entire database. Once the new database is implemented, it will automatically generate reports identifying accounts nearing the 12-month eligibility maximum. Similar to the manual process, staff will then work the files closest to the end of the eligibility period.

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2008

The office will determine the amount of SCHIP funds that should be refunded to the federal agency and will do so by June 30, 2009.

08-23

Oregon Office of Private Health Partnerships

State Children's Insurance Program, CFDA 93.767

Activities Allowed or Unallowed – Potentially Unallowable Health Coverage

Questioned Costs \$9.4 Million

The Office of Private Health Partnerships (department) administers a program to subsidize eligible Oregonian's private health insurance premiums. The department uses State Children's Insurance Program (SCHIP) funds to pay the insurance premium subsidies under a waiver approved by the Centers for Medicare and Medicaid Services.

Federal regulations specifically address an exclusion for the use of SCHIP funds; SCHIP funds may not be expended to assist in the purchase, in whole or in part, of health coverage that includes coverage of abortion, except under specific circumstances outlined in CFR Title 42. Based on discussions with the department, as the department subsidizes a person's private health insurance, the department does not have the ability to require this exclusion in the plans. Therefore, the department does not ensure the health insurance plans subsidized with SCHIP funds exclude abortion coverage except as allowable per federal regulations.

We reviewed one of the nine health coverage plans present in our sample. We found that the plan did not specifically exclude coverage for abortion services. Total payments to this health coverage plan during fiscal year 2008 totaled \$9.4 million (more than 60 percent of SCHIP funds expended by the department).

We recommend department management work with the federal government to determine whether it is allowable for the program to pay insurance premiums for private health insurance plans that do not specifically exclude abortion coverage.

AGENCY'S RESPONSE:

The agency disagrees with this finding. The Secretary of State's office is recommending that the agency work with the federal government to determine whether it is allowable for the program to pay insurance premiums for private health insurance plans that do not specifically exclude abortion coverage.

This issue was discussed during the initial 2002 waiver negotiations with the Department of Human Services (DHS), Office of Private Health Partnerships (OPHP), and Centers for Medicare and Medicaid Services (CMS). At that time, all parties agreed that because the Family Health Insurance Assistance Program (FHIAP) does not subsidize medical services, but provides a subsidy for private insurance premiums, this requirement does not apply. Further, because the program does not pay for claims or receive encounter data, the requirement would be impossible to monitor. This is consistent with some other states' premium assistance programs. Notwithstanding our disagreement with this finding, the agency agrees to consult with the Department of Human Services (DHS) to raise the issue with CMS.

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2008

08-24

Oregon Office of Private Health Partnerships

State Children's Insurance Program, CFDA 93.767

Maintenance of Effort & Eligibility – Advanced Subsidy Payments

Questioned Costs \$4.6 Million

In 2002 the Centers for Medicare and Medicaid Services (CMS) authorized a five-year waiver, expiring October 31, 2007, that allowed eligible uninsured children and adults to receive insurance premium subsidies for the purchase of private health insurance. The waiver also included a maintenance of effort requirement that the amount of state funds expended for the program be maintained or increased above the state fiscal year 2002 level.

To meet the maintenance of effort requirement as of October 31, 2007, the Office of Private Health Partnerships (department) made advanced subsidy payments to three private insurance carriers for the periods of December 2007 through February 2008. The department had not incurred an obligation to pay the insurance premium subsidies. If the department had not paid the insurance premium subsidy payments in advance, it would not have met the required maintenance of effort by approximately \$2 million.

In addition, effective November 1, 2007, adults became ineligible for State Children's Insurance Program (SCHIP) funding as the waiver that allowed it had expired. The department used \$4.6 million of SCHIP funding to prepay for insurance premium subsidies for adults from November 2007 through February 2008. If the prepayment had not occurred, the department would have paid the subsidies with either Medicaid funds, if eligible, or state funds.

Noncompliance with the maintenance of effort requirement specified in the waiver could result in disallowed costs. Further, if prepayment for adults using SCHIP funding is determined to be non-compliant, the federal agency could require the department repay the disallowed costs of \$4.6 million.

We recommend department management consult with CMS to determine whether subsidy prepayments are allowed to be counted toward maintenance of effort, and whether prepayments made for adults were allowable since the adults were ineligible for SCHIP funding for the time period prepaid. *See Finding 07-41.*

AGENCY'S RESPONSE:

The agency disagrees with this finding. The agency believes it operated within its contractual obligation with the Centers for Medicare and Medicaid Services (CMS). Prior to making advance subsidy payments, the agency worked with the Department of Human Services (DHS) and the Department of Administrative Services (DAS) to discuss the appropriateness of the payment. Notwithstanding our disagreement with this finding, the agency agrees to consult with the Department of Human Services (DHS) to raise the issue with CMS.

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2008

08-25

Oregon Office of Private Health Partnerships
State Children's Insurance Program, CFDA 93.767
Eligibility – Ineligible Clients Funded
Questioned Costs \$55,000

During fiscal year 2008, the Office of Private Health Partnerships (department) administered a program that allowed eligible Oregonians to receive insurance premium subsidies for the purchase of private health insurance. Effective November 1, 2007, adults were no longer eligible for State Children's Insurance Program (SCHIP) funding as the federal waiver allowing it expired.

The department made a coding error when recording a subsidy payment in the State's accounting system and the error was not discovered by the department during its transaction review process. As a result, \$55,000 of SCHIP funds were used to subsidize insurance premiums for adults when the premiums should have been subsidized with Medicaid or state funds.

We recommend department management correct the accounting transaction and determine the amount of SCHIP funds that should be refunded to the federal agency. We also recommend department management ensure the transaction approval process is adequate to ensure coding is entered accurately.

AGENCY'S RESPONSE:

The agency agrees with this finding and has already taken corrective action. Effective March 19, 2009, the program added a third level of review for carrier payments. Accounting staff now audit the transition between the funding report to the accounting input document line by line prior to final approval by the fiscal manager. The new database will automatically create SFMA input documents, eliminating the possibility of manual transposition and coding errors. The new database is scheduled to be fully implemented by January 2010. The office will determine the amount of SCHIP funds that should be refunded to the federal agency and will do so by June 30, 2009.

08-26

Oregon Department of Human Services
Temporary Assistance for Needy Families, CFDA 93.558
Allowable Costs – Expenditures Not Allowable or Unsupported
Questioned Costs \$1,564

Federal requirements state that the department may use TANF funds for expenditures that are not in violation of the Office of Management and Budget (OMB) Circular A-87. The OMB Circular A-87 states that allowable costs must meet the following general criteria: (1) be necessary and reasonable for proper and efficient performance and administration of federal awards, and (2) be adequately documented.

We identified one transaction that included payment for repairs to a state-owned vehicle damaged while a department employee was attending allowable TANF training. The department used federal TANF monies to pay \$317 of the total repair costs of \$634.

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2008

For another transaction, we were unable to determine the allowability of the expenditures because the department was unable to provide documentation to support a \$1,247 charge to the federal program.

We recommend department management ensure that funding transactions are allowable for federal programs and documented in accordance with OMB Circular A-87.

AGENCY'S RESPONSE:

The department agrees with this recommendation. The department will increase training for program staff to ensure that expenditures are coded in accordance with Office and Management and Budget (OMB) Circular A-87. Program staff is reviewing all Fiscal Year 2009 motor-pool transactions to make certain that they are allowable for federal programs.

08-27

Oregon Department of Human Services
Temporary Assistance for Needy Families, CFDA 93.558
Eligibility – Client Maintenance System Coding Errors
Questioned Costs \$254

Upon determination of eligibility, monthly benefits under Temporary Assistance for Needy Families (TANF) are calculated using information such as number in household and earned or unearned income received based on policies and procedures outlined in the Department of Human Services' (department) Self-Sufficiency Family Services Manual.

In testing 36 self-sufficiency payments, we found five instances where caseworker input errors resulted in either underpayments or overpayments to clients. In four cases, the department's documentation of the client's household composition did not agree to the data entered into the Client Maintenance System (CMS). In two cases, changes occurred upon redetermination, but the coding in CMS was not updated. For one case, the client's unemployment benefits were coded incorrectly when the case was opened and the coding was not updated when unemployment benefits ended.

These errors resulted in \$376 in underpayments and \$254 in overpayments for the fiscal year.

We recommend department management implement procedures to ensure coding and client data are accurately entered and appropriately updated in CMS and correct the identified errors.

AGENCY'S RESPONSE:

The department agrees with this recommendation. The Client Maintenance System (CMS) calculates benefits for No-Adult cases based on the number in the household, the number in the need group, and the countable income. Examples of No-Adult cases are: households where the adult is a non-citizen, SSI recipient, or non-needy caretaker relative. Most errors were related to improper coding of the number in the household. Currently, there are no edits in CMS that require this data field be updated whenever the caseworker makes changes to the case.

The department will evaluate current policy and procedures related to ensuring coding and client data are accurately entered and appropriately updated in the Client Maintenance System (CMS). This assessment will also look at edits in CMS.

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2008

In addition to follow-up and correction of the five cases with identified errors, the department will implement the following:

- *Assess the feasibility of computer system edits to reduce the potential of inaccurate benefit issuance.*
- *Send a Policy Transmittal to SSP field staff regarding data entry requirements for No-Adult cases and emphasizing case reviews at re-determination of TANF eligibility to ensure benefit level is accurate.*
- *Review and update training materials related to TANF eligibility groups, income coding and computer data elements.*

08-28

Oregon Department of Human Services

Adoption Assistance, CFDA 93.659

Allowable Costs – Payments Do Not Match Adoption Agreement

Material Weakness

Questioned Costs \$735,000

Each state having a Federal Title IV-E Adoption Assistance program is required to enter into adoption assistance agreements with the adoptive parents of children with special needs. In addition, an adoption assistance agreement must be in place prior to the payment of monthly benefits and a new agreement must be signed prior to any change in payment amounts.

In 2007, we identified an overpayment resulting from errors that occurred when the department restored adoption assistance payments after a budget reduction in 2003. During the 2008 audit, we identified additional overpayments caused by those errors.

In February 2003, the department reduced adoption assistance payments by 7.5 percent as a result of a budget reduction. The reduction period lasted through October 2003. Payments on adoption cases opened during this nine-month period did not appear to be treated consistently. For example, payments were entered into the department's system at either the signed agreement rate or at the 7.5 percent reduced rate. For more than 500 cases entered at the signed agreement rate, the department could not support that all of the agreements had been negotiated at the 7.5 percent reduced rate. When the budget reduction was cancelled, the department restored the assistance payments to the signed agreement rate. The department, however, also adjusted assistance payments on new adoption agreements entered at the signed agreement rate as well as agreements impacted by the budget reduction, resulting in overpayments. For new cases entered at the signed agreement rate, the restored rate exceeded the rate in the adoption agreement. We estimated the potential overpayments as of January 2009 to be more than \$1.2 million of which more than \$735,000 was federal funds.

The department did not detect the overpayments because the department did not have a procedure in place to detect whether the signed agreement rate agreed to the adoption assistance payment. As a result of prior year finding, the department has recently developed a report that will identify these discrepancies. See *Prior Year Finding 07-42*.

We recommend department management implement a procedure to detect whether assistance payments agree with the signed adoption agreements. We further recommend that department

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2008

management work with the designated federal agency to determine the appropriate way to resolve any potential overpayments

AGENCY'S RESPONSE:

The department partially agrees with this finding. Effective February 1, 2003, the department implemented an across-the-board 7.5 percent reduction in foster care payments and a 10 percent across the board reduction in personal care/special rates that was concomitantly applied to all previously negotiated adoption assistance payments. The change became the foundation for a subsequent law suit. Payment changes were compounded by a reduction to the hourly cost of supervision and recalculation of the number of hours of supervision available to some children through personal care/special rates.

The reduction period lasted through October 2003. Rates were restored pursuant to a court order and direction from legal counsel in November 2003. The increase was determined through a complex calculation agreed to by all parties to the legal proceeding.

During the nine months (February 2003 to October 2003) that adoption assistance was subject to an across the board reduction, new cases opened during this period of time were negotiated in accordance with lower foster care rates established in February. Children who were receiving personal care/special rates also had that part of their adoption assistance payment calculated using the lower hourly rate for supervision. Pursuant to the legal case involving adoption assistance cases subject to the original across-the-board rate reduction, these cases were treated equally for the purpose of rate restoration since they would also have been established at a higher rate in the absence of the original reduction.

The department believes that it was the clear intent that all new cases opened during the rate reduction period were to be established using the newly reduced, across-the-board foster care rates and to be restored summarily with all other open assistance cases. The department does not believe that the restoration of all adoption assistance rates to pre-reduction numbers resulted in an ensuing overpayment for every new case established during the reduction period since the basis for the rate was restored to a higher amount.

More than 7,000 adoptive parents with open adoption assistance cases were mailed an "Amendment to State of Oregon Adoption Assistance Agreement" dated November 1, 2003, stating that the purpose of the amendment was to revise the current agreement to restore adoption assistance benefit payments that were previously reduced due to budgetary reductions and to clarify the manner in which future adjustments to adoption assistance benefits may occur. The agreements were to be signed and returned to the department. It is clear that the amended agreements spoke to – and raised – all adoption assistance agreements in effect on October 31, 2003, to include new cases open during the reduction period. Parents were advised of the following changes in the amended agreements:

- Monthly payments were increased by 8.108 percent.*
- A special payment was increased by 8.108 percent if it was payable under an adoption assistance agreement that was in effect on January 31, 2003, reduced on February 1, 2003, and restored in November, 2003.*
- Special payments were not increased if it was payable under an adoption assistance agreement in effect after February 1, 2003.*
- Nonrecurring payments were not impacted.*

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2008

Some of the cases established during the reduction period were established at a rate less than the reduced foster care rate through negotiation with the family, some had an added amount for personal care/special rates, and some directly align with the foster care rate by age group. Upon initial review, it does appear that some of the cases established during this period may have been treated inconsistently after the initial rate was established and prior to the rate restoration. These cases appear to warrant a more rigorous re-review to confirm that rates were correctly managed.

As a result of a prior audit finding, the department recently implemented an automated system to detect over – and under – payments. An electronic report is generated by the Integrated Information System (IIS) that identifies discrepancies. A process is in place that includes staff review of the report and correction of any payment discrepancies, as necessary.

The department's Adoption Program will conduct a review of all of the cases identified in the audit to confirm the following:

- Payments opened during the reduction period of February through October, 2003, were established in line with the reduced foster care rate and pursuant to a properly negotiated adoption assistance agreement;*
- There was equitable management of payments for new cases opened during the reduction period;*
- All payments for new cases opened during the reduction period were increased at the same time as longer-standing adoption assistance cases.*

The department may find, as a result of a review of the questioned cases, that there may be specific cases with incorrect payments. The department will work with the Administration for Children and Families Children's Bureau, Region X Child Welfare Program Office, to determine the proper way to handle any identified overpayments of Title IV-E adoption assistance funds.

The Adoption Unit is currently utilizing the electronic payment review report referenced above and payment inaccuracies are being identified and corrected. It has been determined that the additional step involving staff verification that ensures payment corrections have been entered and accepted by the payment system (Integrated Information System) will be added to this review process.

08-29

Oregon Department of Human Services

Adoption Assistance, CFDA 93.659

Eligibility – Incorrect Eligibility Determination

Questioned Costs \$19,175

For a child to receive Federal Title IV-E Adoption Assistance, the child must meet the eligibility requirements of the Social Security Act. In part, eligibility is based upon whether the child resides with a relative intending to adopt the child and that relative meets the definition of a blood relative or half-blood relative.

We examined 40 transactions and the related adoption case files and identified one instance where a child was incorrectly identified as Title IV-E eligible. The adoption application indicated the child was being adopted by a relative; however, we found evidence in the file that indicated the adoptive parents did not meet the definition of a blood relative or half-blood relative.

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2008

The department has received federal reimbursement for this case since November 2001. The total questioned costs from that date through December 2008 is \$19,175.

We recommend department management correct this case in its system so that the appropriate funding source is used for assistance payments and return any disallowed costs to the appropriate federal agency.

AGENCY'S RESPONSE:

The department agrees with this finding. The department agrees that this case was inappropriately determined to be Title IV-E eligible for the purposes of drawing federal funding for the adoption assistance payment and that the case needs to be recoded on the payment system and in the case record as non-IV-E eligible. Eligibility will be corrected for this case, as discussed. Furthermore, the department will work with the Administration for Children Youth and Families, Children's Bureau, Region X Child Welfare Program Office, to determine the actual disallowance and effect return of those costs.

08-30

Oregon Department of Human Services
Medicaid Cluster

Allowable Costs – Private Health Insurance Not Billed

Questioned Costs \$11,206

Federal regulations require the department take all reasonable measures to ascertain the legal liability of third parties (private health insurance) for Medicaid claims. To meet this requirement, the department requires its clients to provide information about private health insurance on their Medicaid application. If clients indicate they have other insurance, this information is entered into the department's Medicaid Management Information System (MMIS). If providers are aware a client has private health insurance, they are required to bill the private health insurance first, prior to billing the department.

During our testing, we found controls were not sufficient to ensure that each private health insurer listed on one client's application was entered into MMIS. As a result, claims for the client were not first billed to the private health insurance as required by federal regulations. The client's Medicaid claims totaled \$11,206 for the fiscal year, a portion of which may be recoverable from the private health insurer.

We recommend department management implement controls to ensure all private health insurance listed on client applications is entered into MMIS and seek recovery from the private health insurer for the appropriate portion of the client's claims.

AGENCY'S RESPONSE:

The department agrees with this recommendation. The department's Health Insurance Group (HIG) is responsible for verifying and coding the client's private health insurance information onto the Medicaid Management Information System (MMIS) from the Medicaid application. When Medicaid pays a claim that could be paid by the private insurer, it is automatically billed by the MMIS system and referred to the Medical Payment Recovery (MPR) unit for follow up and collection. MPR attempts to recover on claims going back up to six years for some coverage plans. Unfortunately, HIG currently has a back-log of applications that have not been entered.

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2008

The private insurance information for the client identified during the audit has been entered into Medicaid Management Information System and the Medical Payment Recovery unit will pursue recovery on the claims already paid by Medicaid.

In addition to hiring two (2) new staff, the Health Insurance Group (HIG) will utilize staff from other units to deal with the backlog and workload issues. Members from other units within the Office of Payment Accuracy and Recovery have been, or will be, cross-trained to help with this effort. HIG has also modified its work processes in order to help streamline referral processing.

08-31

Oregon Department of Human Services

Medicaid Cluster

Special Tests and Provisions

Required Provider Agreements Missing Required Disclosures

Federal regulations require Medicaid providers enter into an agreement with the department to provide Medicaid eligible services. As part of the agreement, federal regulations require providers to disclose ownership interests and criminal history as well as agree to maintain pertinent records and provide them for audit. We performed tests of 60 provider files and found the department did not comply with this federal requirement as 19 agreements lacked one or more of the required disclosures.

We recommend department management comply with federal regulations and ensure provider agreements contain the required disclosures.

AGENCY'S RESPONSE:

The department agrees with this finding. We believe the department currently meets the disclosure requirements addressed in the finding for Home Care Workers enrolled after December 2007, when the enrollment form was last revised. It is the department's position that control and ownership disclosures do not apply to Home Care Workers due to the nature of their relationship with the clients, nor do the requirements related to advanced directives. Home Care Workers are employed by the client, the relationship is one of employee and employer. As employees of the client, they work as directed verbally and from a task list. Home Care Workers are encouraged to talk with their employer about emergency action plans.

Changes to the Seniors and People with Disabilities (SPD) Adult Foster Home Provider Enrollment Agreement form are needed to address the ownership and control disclosure requirements.

The Addictions and Mental Health (AMH) Adult Foster Home Medicaid Provider Agreement does not currently contain the required assurances or require providers to provide residents the opportunity to complete an advance directive. AMH Adult Foster Homes now receive payment through the new Medicaid Management Information System (MMIS). MMIS Provider Enrollment Unit currently requires these Medicaid providers to sign the Medicaid agreement.

Administrative rules related to Assisted Living Facilities and Residential Care Facilities currently require providers to have policies and procedures on medical emergency response, but do not address advance directives specifically, since this is considered a personal client choice.

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2008

The department will provide all current Home Care Workers with information regarding record keeping and disclosure requirements. Information regarding these requirements will be included on the remittance advice that each active Home Care Worker receives with payment.

Seniors and People with Disabilities will add ownership and control disclosure requirements to the Adult Foster Home provider enrollment agreement, form #SDS 738.

Addictions and Mental Health (AMH) will coordinate with Division of Medical Assistance Programs Provider Enrollment Unit to review and revise as necessary the Adult Foster Home Medicaid agreement to include the federally required assurances; this includes assuring that current Adult Foster Homes have signed Medicaid agreements that include the required assurances. AMH will amend Adult Foster Home rules to include a requirement that all residents be provided the opportunity to complete an advance directive.

Administrative rules regarding Assisted Living Facilities and Residential Care Facilities will be revised to clarify the provider's role regarding advanced directives.

08-32

Oregon Department of Human Services

Medicaid Cluster

Allowable Costs – Lack of Documentation

State policy requires controls be implemented to ensure that all transactions are accurate, authorized and adequately supported. We tested seven payments made for clients in residential treatment facilities. The signed monthly rate for three of these clients did not agree to the rate paid to the provider. After research, the department provided additional information regarding the rate differences. The information, however, did not clearly document whether the payment rates were correct or appropriately authorized. Without a clearly defined process for documenting approved rates and ensuring that the documentation is readily available, the department is less able to identify potential errors.

We recommend department management implement procedures to ensure that adequate supporting documentation is maintained for all payments, specifically provider payment rates and any authorized changes to each rate.

AGENCY'S RESPONSE:

The department agrees with this recommendation. While the department feels the reviewed rates were correct, the supporting documentation could be improved. Addictions and Mental Health (AMH) will implement policies and procedures to ensure all requested rates are reviewed prior to entry in the Medicaid Management Information System interface and adequate supporting documentation is maintained for all provider payment rates and authorized rate changes. AMH will develop and implement a procedure regarding notification of any authorized rate changes.

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2008

08-33

Oregon Department of Human Services

Immunization Grants, CFDA 93.268

Subrecipient Monitoring – Lack of Policies and Procedures for Site Visit Protocol

The Oregon Department of Human Services (department) did not have written policies and procedures for site visit protocol during the fiscal year. Subsequent to June 30, 2008, written policies and procedures were adopted. According to the 2007 Vaccines For Children Operations Guide, Immunization Grants Programs must develop written procedures for site visit protocol. The Program should document its guidance for completing site visits and the site visit questionnaire. Lack of written guidance leaves the details of some of the work that is performed when completing the site visit questionnaire unclear and possibly inconsistently followed.

We recommend the department continue to use the site visit protocol adopted August 1, 2008. This protocol should be available for review by program employees so that proper monitoring procedures are performed.

AGENCY'S RESPONSE:

The department agrees with the recommendation. To address this finding, the program will take the following steps:

- 1 The site visit protocol (VFC010, "ABCs of a VFC Site Visit") was crafted in early 2008, and then piloted through the training of new health education staff. The policy was formalized and signed in August 2008. It remains in effect as one piece of a nationally recognized comprehensive VFC staff training program.*
- 2 All staff who conduct VFC site visits will receive training on the policy at hire, and with every publication update.*

08-34

Oregon Department of Human Services

Immunization Grants, CFDA 93.268

Subrecipient Monitoring – Subrecipients Allowed to Select Samples for Testing

The Oregon Department of Human Services (department) program staff notify providers of site visits with a template which requests, among other items, that providers provide a "sample of five patient charts where immunizations are documented." Effective monitoring procedures should be that the program staff selects monitoring samples to prevent providers from manipulating monitoring samples. An element of surprise is necessary to appropriately monitor providers.

We recommend the department implement procedures to ensure that samples are selected by the program staff such as selecting from databases of vaccinated children or other records.

AGENCY'S RESPONSE:

The department agrees with the recommendation. To address the audit finding, Oregon Vaccines for Children will take the following steps:

For providers that report data to the ALERT IIS:

- 1 The pre-visit template will no longer ask provider to have a sample of five charts available for review during the site visit. Instead, the template will state that during the site visit, the reviewer*

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2008

- will select five to ten charts to review (depending on size of clinic population). The pre-visit fax will also state that clinic staff will need to be available to pull charts at the time of the site visit.*
- 2 The reviewer will get a sample of patients from the ALERT IIS, including patient first and last name, chart or medical id number, immunization date, immunizations administered, and eligibility code.*
 - 3 The reviewer will pull an ALERT participation report and evaluate it for coding errors (for example, doses coming into ALERT as “not specified.”)*
 - 4 At the site visit, the reviewer will select ten patients, both VFC-eligible and privately insured, from the list provided by ALERT to review.*
 - 5 The reviewer will evaluate the charts for compliance with VFC eligibility screening and documentation requirements.*

For providers that do not submit data to the ALERT IIS:

- 1 The pre-visit template will state that the reviewer will pull a random sample of 30 charts at the time of the site visit. The pre-visit fax will also state that clinic staff will need to be available to pull charts at the time of the site visit.*
- 2 At the site visit, the reviewer will select 30 charts representing children immunized. The reviewer will do this by selecting patients from the appointment book or by pulling hard copy charts from the shelves.*
- 3 When the reviewer has 30 charts, the reviewer will complete the Protocol for Assessing VFC Eligibility Screening spreadsheet to determine eligibility screening.*

These processes will be in place by January 1, 2009. Steps that need to be taken before implementation include developing a workflow process with ALERT staff to request patient lists prior to site visits and updating the VFC Site Visit Policy and Procedure and the VFC Site Visit Workflow.

U. S. DEPARTMENT OF DEFENSE

08-35

Oregon Military Department

National Guard Military Operations and Maintenance (O&M), CFDA 12.401

Matching – Lack of Controls Over the Allocation of Funds

National Guard Regulation 5-1, National Guard Grants and Cooperative Agreements, provides regulatory guidance on the execution of Master Cooperative Agreements for Operation and Maintenance Projects. Specifically, Chapter 13 provides guidance for the operation and maintenance of Army National Guard facilities. The Facilities Inventory and Support Plan (FISP) outlines percentages of federal and state support by type of facility and/or function, to include multi-use functions. Expenditures charged to a given facility are to be allocated across federal and state projects/support levels on a transaction by transaction basis. Testing of transactions at Camp Withycombe revealed a lack of control over application of the required percentage allocations among the various federal and state support codes for that installation. Additionally, the review of those allocations at the transaction level at the Oregon Military Department (department) level was general in nature, and not detailed enough to catch allocation errors.

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2008

The percentages of federal and state allocations for the various projects and facilities at Camp Withycombe were erroneous on one of our test transactions, resulting in an undercharge to CFDA 12.401. Further inquiry and analysis disclosed 41 instances of misallocation; however the net effect was an undercharge of approximately \$550, which is not considered a material instance of noncompliance. However, the number of allocation errors that were identified in the analysis indicates a more than remote likelihood of the potential of material noncompliance over federal and state match accounts occurring, constituting an internal control significant deficiency. Forty one instances of allocation errors related to the CFDA resulted, which demonstrates a lack of internal controls over allocation of funds over federal and state match accounts that could have resulted in an overcharge to the federal program that was a material instance of noncompliance.

The misallocation of funds over federal and state match accounts appears to be due to a lack of training, attention to detail, and/or awareness by site personnel responsible for applying the percentage allocations. Another contributing factor appears to be that the department did not have an effective mechanism in place to thoroughly review federal and state allocations at the departmental level before payments were made.

We recommend the department initiate training for Camp Withycombe personnel in the required procedures for correct allocation of funds per the FISP and other governing documents. We also recommend the department develop and implement a more thorough review process of federal and state match allocations at the departmental level before requests for payment from the United States Property and Fiscal Office are made.

AGENCY'S RESPONSE:

The agency agrees with the audit finding. The finding indicates a need for improved oversight over federal/state expenditure allocation requests from Camp Withycombe before submission to the accounting office for payment. The agency will require all Camp Withycombe payment requests be personally validated by the responsible manager as having been computed for proper allocation of federal state splits. Estimated implementation date for this procedure is Monday, December 8, 2008.

U. S. DEPARTMENT OF AGRICULTURE

08-36

Oregon Department of Education

Child and Adult Care Food Program, CFDA 10.558

Subrecipient Monitoring – Failure to Check the National Disqualified List

Federal regulations require that key individuals be checked against the National Disqualified List upon the occurrence of key events such as initial application, and during renewals. Program staff does not have a process in place to check key individuals against the list when mid-year personnel changes occur, or at renewal time. The failure to check key individuals against the list could result in persons working for the Program who are not allowed to do so for a variety of reasons including previous fraud or abuse. Program management developed procedures to check new entities and individuals against the list upon initial application, but did not set up a procedure for key individuals when mid-year personnel changes occur, or at renewal time.

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2008

We recommend the Oregon Department of Education check the National Disqualified List both at the time of mid-year personnel changes and at annual renewal for all key individuals in order to ensure that those present on the list are disqualified from Program enrollment.

AGENCY'S RESPONSE:

The US Department of Agriculture (USDA) Food and Nutrition Service federal regulations require state agencies to check the National Disqualified List upon initial application, and as responsible individuals and responsible principles change. This requirement was included in the federal regulations in 2002 but USDA did not make regular access and instructions available to state agencies until October 2007.

The Oregon Department of Education Child Nutrition Program responded swiftly to the 2002 regulatory change by implementing the collection of required birthdates and maintaining an Oregon list of disqualified sponsors and individuals. We also incorporated checking the list upon initial application. Since the national list was not yet available we did not check the list for changes in responsible individuals and principals. USDA knew it was impossible for states to be in compliance with this requirement due to unavailability of the lists.

When USDA made the list available to state agencies on in late 2007, and provided instructions for access in April 2008, ODE Child Nutrition Staff did not incorporate checking the National Disqualified List for mid-year changes. ODE has developed the enclosed procedure to ensure compliance with requirements to check the National Disqualified list.

08-37

Oregon Department of Human Services

Food Stamp Cluster

Allowable Costs/Cost Principles – Reported Expenditures Exceeded Actual
Questioned Costs \$20,401

Expenditures reported exceeded actual expenditures by \$20,401.33 for CFDA10.561 for the year ended June 30, 2008. Known questioned costs of \$10,000 or more are required to be reported on the Schedule of Findings and Questioned Costs. As a result, these costs are questioned. The Oregon Department of Human Services (department) has a federally-approved cost allocation plan which specifies the methods of cost identification and allocation. The department uses an Excel spreadsheet to calculate a monthly rate for certain costs to be allocated using random moment sampling results of the prior month's personal service expenditures. The amounts are entered into the spreadsheet manually. A variance test is applied to the rate to determine that it is reasonable. We noted that for the September 2007 month, the rate was carried forward from the prior month instead of being calculated on the random moment sampling results. The variance test failed to identify the error since there was no variance from the prior month. Under the allowable costs/cost principles requirements of the Office of Management and Budget Circular A-133 Compliance Supplement dated March 2008 indirect costs are limited to those charged under a cost allocation plan. The department did not follow its federally-approved cost allocation plan methodology.

We recommend that the department consider reducing the chance of errors in manual entries by using a system other than Excel-type spreadsheets for compiling and calculating monthly cost allocation rates. The department is in the process of moving its cost allocation statistics preparation from Excel to Access, to reduce the chance of human error in data entry.

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2008

AGENCY'S RESPONSE:

The department agrees with the recommendation. Financial Services hired a contractor June 1, 2008 to start the development of an integrated database to manage the cost allocation process. That contract runs through December 31st, 2008. The goal of the project is to create a tool that's data is reconcilable to the Statewide Financial Management Application and reduces or eliminates the use of imported spreadsheets that are not verifiable. In addition the project's goal is to create a consistent process that agrees with the approved cost allocation plan, and creates a log to document when and if changes or deviations should occur in the process so that management, if needed, can take action to rectify. We agree that the questioned cost is not a material instance of noncompliance. As such, the department believes no retroactive adjustment to the allocation is warranted.

Section IV – Schedule of Prior Financial Statement Findings for the Years Ended June 30, 2007 and 2006

This section includes the current status reported by the department of all financial audit findings from fiscal year ended June 30, 2007. It also includes the current status reported by the department of all financial audit findings from fiscal year ended June 30, 2006 that were uncorrected at June 30, 2007.

Finding 07-1: Expenditure Accrual (Material Weakness)

Recommendation: The Oregon Department of Human Services (department) management should review their accrual methodology, and compare estimated accruals with actual accrual period results. This will allow management to make any necessary adjustment to their methodology to ensure it is fundamentally sound and results in accruals that are reasonably accurate.

Status: Partial corrective action was taken.

The department pursued changes to Medicaid accruals and revised financial statement procedures for estimated expenditures to account for the differences between financial statement and budgetary accruals and to produce better accruals. The department has tested and made adjustments to our accrual methodology. DHS is implementing new procedures for the 2007-2008 financial statement accruals. Other fund revenue accruals were part of the revisions made to the procedures. In our new accrual methodology, we have included extensive review of the process in part and as a whole. The written procedures are being finalized.

Finding 07-2: Other Revenue – Drug Rebate (Material Weakness)

Recommendation: The Oregon Department of Human Services (department) management should ensure future contracts with service providers require the service providers to have periodic independent internal control reviews performed. Further, we recommend department management ensure adequate supporting documentation is obtained for all transactions posted to the accounting system. Management should provide training as necessary to help ensure staff and supervisors post all transactions in accordance with the revenue recognitions principles identified by GAAP.

Status: Partial corrective action was taken.

The department will revise its training plan to further emphasize proper documentation. In addition, the deputy director and controller will put special emphasis on helping managers understand their role in

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2008

reviewing transactions for proper documentation as part of their approval process. The department has implemented new contract language in light of this recommendation and made appropriate changes to standard contract template language. In addition, the department is developing specific contract language for selected private industry service provider contractors who also act as fiscal agents.

As part of the department's Transformation Initiative, the department has designated initiative #OX7 (program integrity) as its highest priority cross organizational initiative. In addition, individual divisions are conducting events that will focus on improving documentation to support eligibility determination and supporting financial transactions. This will be an on-going process improvement effort.

Finding 07-3: Other Revenue Accrual

Recommendation: The Oregon Department of Human Services management should ensure appropriate query limits are used and communicate the importance of management reviews to ensure other revenue is properly accrued at fiscal year end.

Status: Corrective action was taken.

Finding 07-4: Financial Reporting Accuracy (Material Weakness)

Recommendation: The Oregon State Police management should ensure that it properly accrues amounts at fiscal year end so that accounts are accurately stated for financial reporting purposes.

Status: Partial corrective action was taken.

As per the Corrective Action referenced in the Statewide Single Audit Report, I drafted an internal control policy and procedure and provided fiscal year end training to technician and professional level accounting staff. The internal control policy and procedure was drafted, tested and modified as needed throughout the fiscal year end 2008 close process. The internal control policy and procedure is currently in draft form and will be finalized by January 31, 2009.

Finding 07-5: Services and Supplies Expenditures Not Recorded in Compliance with Generally Accepted Accounting Principles

Recommendation: The Oregon Department of Forestry should ensure all expenditures are accurately recorded when goods or services are received in accordance with GAAP.

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2008

Status: No corrective action was taken.

The correction for this finding must occur in the biennial budget process. As part of the 2009-11 budget development, the agency proposed, and the Department of Administrative Services, Budget and Management Division approved the necessary change at the Essential Budget Level. However, to be complete, the 2009 Legislative Assembly must still make final approval. This final action by the Assembly will allow us to move these from an expenditure/revenue process to a transfer of revenue process. This will allow us to have one expenditure at the time of the transaction. For the current biennium we must continue to process the transactions as they are budgeted.

Finding 07-6: **Incomplete Risk Assessment Process**

Recommendation: The Oregon Department of Forestry should develop and implement a plan to manage risks identified for financial reporting.

Status: No corrective action was taken.

We began a process of reviewing and documenting our internal controls and processes to give us the basis for making the risk assessment in the last biennium, but have not gotten back to the process. When we continue with this process, it will give us the basis for making the risk assessment. Due to changes in staffing we did not get this completed during the previous fiscal year. Work will continue on this during the current fiscal year, including the hiring of a contractor who will help with the internal control documentation and the framework for the risk assessment.

Finding 07-7: **Classification of Building Costs**

Recommendation: The Oregon Military Department management should revise its procedures for reclassifying capitalized construction costs to conform with generally accepted accounting principles and the Oregon Accounting Manual.

Status: Corrective action was taken.

Finding 07-8: **Incomplete Services and Supplies Expenditure Accrual Process**

Recommendation: The Oregon Parks and Recreation Department management should evaluate its expenditure accrual process and develop a more effective methodology to ensure expenditures are appropriately accrued to the proper period.

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2008

Status: Corrective action was taken.

Finding 07-9: **Inadequate Segregation of Duties Over Contracting Retainage Account**

Recommendation: The Oregon Parks and Recreation Department management should ensure appropriate segregation of duties for accounts established at banking institutions outside of Treasury. Management should require a minimum of two authorized signers be present when a withdrawal is made and that payments from the account are authorized by both signers.

Status: Corrective action was taken.

Finding 07-10: **Inadequate Support for Service and Supply Expenditures**

Recommendation: The Oregon Parks and Recreation Department (department) management should ensure adequate supporting documentation is received and reviewed for accuracy and appropriateness before the department releases payment to a vendor.

Status: Corrective action was taken.

Finding 07-11: **Reconciling Items Not Cleared Timely**

Recommendation: The Oregon Public Employees Retirement System management should take steps to resolve items in the clearing accounts in a timely manner.

Status: Corrective action was taken.

Finding 07-12: **Weakness in Cash Controls**

Recommendation: The Oregon Public Employees Retirement System (system) management should ensure cash reconciliations are completed in a timely manner and reviewed by a member of management in accordance with policy established in the Oregon Accounting Manual. Evidence of management's review should be documented. We also recommend system management take steps to clear the \$1.4 million of reconciling items.

Status: Corrective action was taken.

Finding 07-13: **Incorrect Financial Statement Disclosure Amounts**

Recommendation: The Oregon Employment Department management should perform a thorough review of all disclosures and related spreadsheets before they

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2008

are submitted for inclusion in the notes to the state's financial statements.

Status: Corrective action was taken.

Finding 07-14: Taxes Receivable – Year End Financial Reporting

Recommendation: The Oregon Department of Revenue management should reconsider its methodology for accruing taxes receivable at fiscal year end and consider whether modifications are indicated. In addition, management should implement a procedure to compare prior accruals with subsequent collections and use the results to assess the reliability of the accrual and to make further modifications to the methodology as needed.

Status: Partial corrective action was taken.

We reviewed methodologies and considered modification. We maintain that our current methodology provides reasonable estimates of future revenues. Other methodologies we analyzed did not provide any more reasonable figures. We used the same methodology for the current year-end. We intend to provide a disclosing statement that there could be additional revenue, but due to the unique nature of the receivable, we are unable to reasonably estimate the amount with enough surety to formally present in the financial statement. We have developed a worksheet for comparative purposes to implement as part of our year-end analysis.

Finding 07-15: Controls Over Reasonableness of Alternative Equity Valuations in Accordance with GAAP

Recommendation: The Office of the State Treasurer (OST) management should document an understanding of the valuation process used by the partnerships and State Street Bank and establish controls sufficient to evaluate and challenge the valuations on a periodic basis, and provide assurance that the investment information provided by Treasury to state agencies will enable the agencies to report investments in accordance with generally accepted accounting principles (GAAP).

Status: Partial corrective action was taken.

The Office of the State Treasurer (OST) has developed several new procedures and controls designed to ensure that we comply with GAAP regarding valuation and financial reporting for alternative equity investment. OST's Internal Audit Services section is currently wrapping up an audit addressing controls over valuation and financial reporting for all portfolios overseen by OST. The results of this audit

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2008

will be used to further strengthen the control structure over alternative equity.

OST will enhance the current control structure over alternative equity based on recommendations and best practices identified within the Internal Audit Services report, and formally document the new structure within OST policies and procedures.

Finding 07-16: Timeliness of Identifying Construction Projects as Completed

Recommendation: The Department of Administrative Services management should ensure that the Facilities Division communicates in a timely manner the completion of construction projects with the accounting staff in the Operations Division to assure proper financial reporting for capital assets. To facilitate this communication, the Facilities Division should periodically review the projects identified in SFMA as construction in progress and determine if that classification remains appropriate.

Status: Corrective action was taken.

Finding 07-17: Lack of Reconciliation for Hunter and Angler Licenses

Recommendation: The Oregon Department of Fish and Wildlife (department) management should strengthen its controls over license sales by reconciling cash register sales to the Point of Sale (POS) licensing system to ensure that revenues have been received for all sales.

Status: Partial corrective action was taken.

With an investment of staff resources that are not available, the transactions input into the register and the POS licensing system could be reconciled. Both are tracked with a corresponding transaction identification number. Last year, the department responded that it would document and implement a sampling review of POS transactions against register transactions on a regular basis. This review would continue in lieu of reconciliation until such time resources are available or system capabilities enable a full and complete reconciliation.

Currently, the POS Accountant randomly checks reports showing cash register receipt number and the corresponding documents issued against that cash register number for both POS and non-POS transactions. The department is evaluating the number of items and how often to review.

See current year finding 08-12.

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2008

Finding 07-18:	Inadequate Procedures for Estimating Federal Revenue and Accounts Receivable
Recommendation:	The Oregon Department of Fish and Wildlife (department) management should develop and implement policies and procedures for its federal receivables to ensure the proper reporting of current and non-current receivables and revenues in accordance with generally accepted accounting principles.
Status:	<p>Partial corrective action was taken.</p> <p>The department reviewed the methodology used for fiscal year 2008 with the auditors before making the adjusting entries. This methodology will be reviewed based on actuals reported at September month close. Based on the results of that review, the methodology will be documented in a procedure format.</p> <p>See current year finding 08-13.</p>
Finding 07-19:	Lack of a Risk Assessment
Recommendation:	The Oregon Department of Fish and Wildlife management should perform an annual risk assessment to help ensure risks related to financial reporting are identified and evaluated.
Status:	Corrective action was taken.
Finding 07-20:	Inaccurate Expenditure Accruals
Recommendation:	The Oregon Department of Education (department) management should establish and implement controls to ensure expenditures are reported to the proper period in conformity with generally accepted accounting principles.
Status:	<p>Partial corrective action was taken.</p> <p>The department understands the importance of recording expenditures and accruals properly. The department made the following three changes:</p> <ul style="list-style-type: none">• Created a written accrual procedure that was implemented by June 30th.• Used the Service Date field in the accounting system so that payments are identified to the month goods were received, services performed or when the subrecipient incurred the costs.

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2008

- The new procedure was discussed at weekly Accounting Staff meetings.

Even though improvements were made, there is still one item that needs to be addressed, which is the estimating of expenditures after Month 13 closes. The department isn't able to accurately estimate post-Month 13 expenditures due to a lack of historical data. However, the department will update its accrual procedure to include a methodology to estimate expenditures and the Service Date will be used as the basis of the estimation. As historical information becomes available over time, we expect these data to contribute to our ability to more accurately estimate amounts to be accrued.

See current year finding 08-9.

Finding 06-2: Lack of Documentation (Material Weakness)

Recommendation: The Oregon Department of Human Services (department) management should ensure adequate supporting documentation is maintained for all recorded transactions.

Status: Partial corrective action was taken.

The department continues to work with the Oregon Department of Administrative Services regarding the state policy requirement for Personnel Action Forms to be filed in personnel files even those auto generated by DAS for cost of living increases.

As part of the department's Transformation Initiative, the department has designated initiative #OX7 (program integrity) as its highest priority cross organizational initiative. In addition, individual divisions are conducting events that will focus on improving documentation to support eligibility determination and supporting financial transactions. This will be an on-going process improvement effort.

Finding 06-3: Weakness in Cash Controls (Material Weakness)

Recommendation: The Oregon Department of Human Services (department) management should continue taking steps to ensure all cash account reconciliations are performed regularly and timely. We recommend management perform timely reviews of the reconciliations and ensure reconciling items are appropriate. Further, we recommend department management ensure that all suspense account balances are included in the cash balance at June 30.

Status: Partial corrective action was taken.

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2008

The department sees this as an on-going process improvement effort. We continue to improve the training provided to new reconciliation staff and are working with the Office of Information Services to develop improved reports to aid the reconciliation process. The timeliness and accuracy of the reconciliation reports continues to improve as reflected in our performance metrics. Reconciliation timeliness increased from 81 percent in May 2007 to 97 percent in May 2008. During that same period there was continued staff turnover and increased reconciliation activity (three additional active treasury accounts.)

Finding 06-4: Lack of Knowledge, Skills and Abilities (Material Weakness)

Recommendation: The Oregon Department of Human Services (department) management should ensure personnel have the requisite knowledge, skills, and abilities to accurately perform their assigned duties.

Status: Partial corrective action was taken.

The department considers this an on-going process as new employees are hired and existing employees transition into new positions. With the implementation of the Lean Daily Management System we continue to assess staff skills and knowledge base and provide a training development plan to support the employee assessment. The department has also created a baseline assessment and benchmarking of our current financial organization.

Finding 06-6: Unclaimed Property System Not Reconciled to SFMA

Recommendation: The Oregon Department of State Lands (department) management should research and correct errors within the Unclaimed Property System (UPS) so the underlying detailed data fully support the financial accounting information reported by the department. Once this recommendation is implemented, we recommend the department proceed by performing regular reconciliations between UPS and the Statewide Financial Management Application (SFMA) to identify and correct errors in a timely manner.

Status: Partial corrective action was taken.

The agency has completed reconciliations of receipts and disbursements for fiscal year 2007 and fiscal year 2008. Fiscal year 2008 adjustments were made during year-end closing. Fiscal year 2007 adjustments will be made in the current fiscal year.

The reconciliation of receipts and disbursements is now completed regularly and adjusting entries are made as needed to ensure that

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2008

underlying detail records balance to the department's financial records going forward.

The agency has not reconciled the overall system balances. The two systems have been out of balance for over 15 years and through four UPS program conversions. The department will make an adjustment to UPS to balance the difference between SFMA and UPS.

Finding 06-7: Infrastructure Accounting

Recommendation: The Oregon Department of Transportation (department):

- Develop a methodology to remove the cost and associated mileage of the replaced roadway surface and its associated accumulated depreciation for all project types;
- Develop a methodology to update the useful life of the highway system as a result of ongoing road construction;
- Re-evaluate the appropriateness of the depreciation percentage originally recorded for infrastructure in 2002 and
- Determine if a prior period adjustment is appropriate, and develop a methodology to monitor the depreciation rate of the highway system to ensure it does not become fully depreciated and more appropriately reflects the value of the asset.

Status: Partial corrective action was taken.

The department has evaluated some project types and documented the methodology. Some adjustments have been made. The department will be completing a review/analysis for the remaining project types.

The department has reviewed the original entry and subsequent entries associated with depreciation and accumulated depreciation to determine the best way to address the rapid rate of depreciation to ensure the highway system does not become fully depreciated. The department determined previous entries for construction in progress were incorrect. Prior period entries were made in FY08 to correct those previous errors and the methodology has been changed to rectify the situation. We believe this should help to resolve the issue of rapid depreciation.

Section V – Schedule of Prior Federal Awards Findings and Questioned Costs for the Years Ended June 30, 2007 and 2006

This section includes the current status reported by the department of all federal audit findings from fiscal year ended June 30, 2007. It also includes the current status reported by the department of all federal audit findings from fiscal year ended June 30, 2006 that were uncorrected at June 30, 2007.

Finding 07-21: **Capitalization Grants for Clean Water State Revolving Funds, CFDA 66.458
Environmental Review, Material Weakness**

Recommendation: The Oregon Department of Environmental Quality (department) management should design and implement effective controls to ensure environmental reviews are completed and that public notice of projects is provided. We also recommend department management ensure department procedures established for proper administration of Clean Water State Revolving Fund monies are followed.

Status: Partial corrective action was taken.

Controls (Stated Environmental Review Procedures and associated internal checklists) are now in place that require documentation of approved environmental reviews. The department will now incorporate into those controls assurances that approved planning documents are maintained in project files.

Finding 07-22: **Capitalization Grants for Clean Water State Revolving Funds, CFDA 66.458
Matching**

Recommendation: The Oregon Department of Environmental Quality management should design and implement effective controls to ensure matching funds of at least 20 percent are consistently provided by the date federal grant payments are received.

Status: Corrective action was taken.

Finding 07-23: **Special Education Cluster, IDEA Part B, CFDA 84.027
Period of Availability**

Recommendation: The Oregon Department of Education should implement the procedures as outlined in the Department's "Grant Closure Procedures during Annual Federal Grant Closure" to ensure that additional activity cannot be charged to closed grants.

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2008

Status: Corrective action was taken.

Finding 07-24: **Vocational Rehabilitation, CFDA 84.126**
Allowable Costs, Material Weakness, Questioned Costs \$84,349

Recommendation: The Oregon Department of Human Services (department) management should ensure all costs incurred for vocational rehabilitation services are reasonable, necessary and adequately supported. Further, department management should ensure client files include adequate documentation of decisions made regarding the allowability of expenditures.

Status: Partial corrective action was taken.

The Office of Vocational Rehabilitation Services is currently providing staff training as a part of the Oregon Rehabilitation Case Automation (ORCA) 5 system roll out. Every staff person in the state is being trained and provided a new ORCA users manual which includes clarified instructions regarding vehicle modification documentation and purchase documentation. Training began in June and will be completed in September. Subsequent to this training, when District Field Technicians and District Business Managers provide annual branch reviews, they will be reviewing to determine if these standards are being followed.

Finding 07-25: **Vocational Rehabilitation, CFDA 84.126**
Equipment, Material Weakness

Recommendation: The Oregon Department of Human Services (department) management should ensure the equipment tracking database includes adequate information to comply with OMB Circular A-133 requirements. At a minimum, the department should ensure the database includes all qualifying equipment, purchase and disposal dates, temporary or permanent assignments to clients, and whether equipment is for client or department use. We also recommend department management perform a periodic inventory of vocational rehabilitation equipment.

Status: Partial corrective action was taken.

The Office of Vocational Rehabilitation Services (OVRs) has completed its analysis of its current tracking system and determined that it will need to be modified to comply with A-133. OVRs is currently examining the Oregon Rehabilitation Case Automation case management application to determine what modifications will be needed to automate tracking to meet the requirements.

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2008

Finding 07-26: **Vocational Rehabilitation, CFDA 84.126**
Allowable Costs

Recommendation: Department management should ensure employees are aware of the policy related to transportation provisions and that adequate documentation is maintained, including mileage logs.

Status: Partial corrective action was taken.

The Office of Vocational Rehabilitation Services is currently providing staff training as a part of the Oregon Rehabilitation Case Automation 5 (ORCA) system roll out. Every staff person in the state is being trained and provided a new ORCA users manual which includes clarified instructions regarding vehicle modification documentation and purchase documentation. Training began in June and will be completed in September 2008. Subsequent to this training, when District Field Technicians and District Business Managers provide annual branch reviews, they will be reviewing to determine if these standards are being followed.

Finding 07-27: **Vocational Rehabilitation, CFDA 84.126**
Eligibility

Recommendation: The Oregon Department of Human Services management ensure eligibility is determined or eligibility extensions are filed within 60 days of a client's application. We also recommend the department retain sufficient documentation to support eligibility determinations.

Status: Corrective action was taken.

Finding 07-28: **Vocational Rehabilitation, CFDA 84.126**
Eligibility, Material Weakness, Questioned Costs \$18,320

Recommendation: The Oregon Commission for the Blind (commission) management should rely on the medical reports and commission's medical consultant in determining whether a client's condition meets the definition of legal blindness or has a condition that will likely lead to legal blindness. Furthermore, we recommend commission management review their current practice and ensure that it is consistent with their state plan, administrative rules and policy manuals.

Status: Corrective action was taken.

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2008

Finding 07-29: Vocational Rehabilitation, CFDA 84.126
Cash Management, Material Weakness

Recommendation: The Oregon Commission for the Blind (commission) management should ensure federal vocational rehabilitation funds are expended within three business days of receipt. If necessary, the commission should consider drawing more frequently than once a month in order to comply with the federal requirement.

Status: Partial corrective action was taken.

The agency adjusted the days that it draws cash for payroll from the 16th of every month to the 22nd. However, the federal draw system changed during this time and processed payments quicker than the prior one. Therefore, the agency adjusted its method to drawing on the 24th or later of every month. Additionally, the agency has changed its procedures for drawing federal funds to cover other monthly expenditures and now draws funds twice per month rather than once per month to ensure federal compliance.

Finding 07-30: Vocational Rehabilitation, CFDA 84.126
Equipment, Material Weakness

Recommendation: The Oregon Commission for the Blind (commission) management should ensure qualifying equipment is adequately tracked to comply with federal requirements. We also recommend the commission perform an annual inventory of vocational rehabilitation equipment.

Status: Partial corrective action was taken.

New equipment and inventory policies were developed and an updated inventory was developed for Federal Fiscal Year 2009.

Finding 07-31: Vocational Rehabilitation, CFDA 84.126
Allowable Costs – Payroll, Material Weakness,
Questioned Costs \$1,756

Recommendation: The Oregon Commission for the Blind (commission) management should implement a process for administrative employees to track actual time spent on each grant so time can be properly recorded and allocated between federal programs. We also recommend that commission management develop and implement policies and procedures to ensure that amounts charged to each grant agree with commission methodologies for allocating time.

Status: Partial corrective action was taken.

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2008

A Cost Allocation Plan was developed and sent to the Oregon Department of Education, per a request from the Rehabilitation Services Administration. The agency recently heard back from the Oregon Department of Education in regards to the submitted Cost Allocation Plan and a revision, primarily consisting of the development of an Indirect Cost Rate, was determined. The agency is now working on establishing and implementing an Indirect Cost Rate along with its Cost Allocation Plan. A revised timeline of December 31, 2008 is being requested in order for the agency to be able to finalize the establishment of its Cost Allocation Plan and Indirect Cost Rate.

Finding 07-32: **Vocational Rehabilitation, CFDA 84.126**
 Allowable Costs, Questioned Costs \$1,995

Recommendation: The Oregon Commission for the Blind management should ensure that controls are designed, implemented and operating effectively to ensure that all payments are allowable, reasonable, and adequately supported to comply with federal and state guidelines.

Status: Corrective action was taken.

Finding 07-33: **Vocational Rehabilitation, CFDA 84.126**
 Eligibility Determination

Recommendation: The Oregon Commission for the Blind management should ensure eligibility is determined or eligibility extensions are filed within 60 days of the client's application.

Status: Partial corrective action was taken.

We have a mechanism in place to monitor this issue and a performance management system to evaluate staff performance in meeting the requirement.

Finding 07-34: **Vocational Rehabilitation, CFDA 84.126**
 Reporting

Recommendation: The Oregon Commission for the Blind (commission) management should ensure documentation is sufficient to support the categorization of expenditures on the report. Furthermore, we recommend the commission develop written procedures governing reporting.

Status: Partial corrective action was taken.

The Director of Administrative Services participated in a training of the Rehabilitation Services Administration (RSA)-2 at the 2008 RSA Fiscal

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2008

and Data Management Conference. Trainers went over exactly how the report should be filled out and even stated that it is a troublesome report with much room for discrepancies. They will be changing the form in 2010. Meanwhile, during its submission in 2008, management will ensure sufficient documentation to support the categorization of expenditures on the report. Additionally, written procedures will be developed that govern the reporting. The timeline for this finding remains December 31, 2008.

Finding 07-35: **Temporary Assistance for Needy Families, CFDA 93.558 Eligibility, Material Weakness, Questioned Costs \$169,739**

Recommendation: The Oregon Department of Human Services (department) management should work with the designated federal agency to determine, the allowability of providing emergency assistance after the 365 day period, whether adoption assistance subsidy payments are allowable under the state's plan, and if the department can determine eligibility based on when the client was initially removed from the home rather than six months from determining emergency assistance. We also recommend department management implement controls to ensure assistance payments are only made to clients who meet the age requirement and are within the yearly assistance limit of \$25,350.

Status: Partial corrective action was taken.

The department management will implement the following:

- Develop a report to track children who are over the age of 18 to ensure their Child Welfare Temporary Assistance for Needy Families-Emergency Assistance (TANF-EA) eligibility is closed appropriately. This report will be available October 1, 2008, for use by department staff.
- Research the current report being used to track cases that have exceeded the \$25,350 assistance limit within 365 day period to determine why all the cases meeting this definition are not being reported. The report will be corrected by October 1, 2008, to ensure the assistance payments do not exceed the \$25,350 limit. Based on the conclusion of our ongoing discussion with our designated federal agency the department management will implement any further changes required to meet our approved State Plan. Effective September 1, 2008, the department will have system modifications implemented to require staff to re-determine Child Welfare TANF-EA eligibility annually. The department will retroactively re-determine Child Welfare TANF-EA eligibility effective February 1, 2008.

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2008

Finding 07-36:	Temporary Assistance for Needy Families, CFDA 93.558 Eligibility, Material Weakness, Questioned Costs \$1,171,469
Recommendation:	The Oregon Department of Human Services (department) management should consult with the designated federal agency to ensure the department's method for allocating these costs to Temporary Assistance for Needy Families (TANF) is allowable or whether the department is required to identify the specific client whose services are charged to TANF and maintain adequate eligibility documentation.
Status:	<p>Partial corrective action was taken.</p> <p>The department has begun consultation with our designated federal agency. Based on the conclusion of this discussion, department management will implement changes to ensure funds are accurately claimed to TANF. The department has also included requirements to eliminate the coding limitations in the new child welfare system (OR-Kids, previously the Statewide Automated Child Welfare Information Systems (SACWIS)). The OR-Kids system has a planned implementation date in 2010. Effective September 1, 2008, system modifications will allow Child Welfare eligibility staff to determine a child is eligible for both Title IV-E Foster Care and Child Welfare Temporary Assistance for Needy Families-Emergency Assistance (TANF-EA). This will allow the financial system to claim appropriately based on the child's eligibility.</p>
Finding 07-37:	Temporary Assistance for Needy Families, CFDA 93.558 Eligibility, Questioned Costs \$2,069
Recommendation:	The Oregon Department of Human Services (department) management should take steps to ensure employees are adequately trained to understand the coding that needs to be entered in the child welfare system.
Status:	<p>Partial corrective action was taken.</p> <p>The department provided all eligibility specialists training on the new eligibility requirements to be implemented 9/1/2008 (retroactive to 2/1/2008). The eligibility specialists also received refresher training in September 2008 as a reminder of the new requirements, as well as additional training in October 2008 regarding the revised procedures related to 18 year olds addressed above.</p>

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2008

Finding 07-38: Temporary Assistance for Needy Families, CFDA 93.558 Eligibility

Recommendation: The Oregon Department of Human Services (department) management should ensure income verification used for eligibility determinations is retained in accordance with department and federal requirements.

Status: Partial corrective action was taken.

The department provided refresher training to Child Welfare eligibility specialists reminding them of the requirement to document income verification in the narrative section of the eligibility form. The department will implement an internal quality assurance process including a monthly report indicating when a Child Welfare TANF-EA eligibility determination has been completed without the required narrative effective March 2009. In addition, this eligibility criteria has been added as a required field on the new OR-Kids system.

Finding 07-39: State Children's Health Insurance Program, CFDA 93.767 Eligibility, Material Weakness

Recommendation: The Oregon Department of Human Services (department) management should strengthen controls over the eligibility process to ensure that applications are complete and that income determinations are accurate and adequately supported. Further, department management should periodically remind staff of the importance of obtaining independent third party information, or questioning the applicant to verify information reported on client applications.

Status: Partial corrective action was taken.

The department implemented a significantly shorter version of the OHP 7210 Oregon Health Plan Application for April, 2008. The revision is several pages shorter than the prior version and emphasizes income and resource related questions by removing many other questions to separate forms. The revision further emphasizes self-employment income by specifically asking if an applicant is self-employed rather than relying on completion of a companion form to indicate self-employment. Training for the new OHP 7210 reminded eligibility workers to review for the applicant's signature. It also reminded eligibility workers to compare the information on the form to the prior application (if available) and to compare it against any other available income resources, including the Employment Department and Work Number screens.

Signature requirements were included in the March Skill Maintenance Challenge. Skill Maintenance Challenges are written by Self

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2008

Sufficiency Program medical policy trainers to address identified training needs. In May a Skill Maintenance Challenge specific to income and resource verification was distributed.

In April, an Application Exercise was distributed that addressed earned income issues. Application Exercise documents are developed by the Self Sufficiency Program Accuracy Team based on issues identified through their medical case reviews. Application Exercises include a scenario pre-printed on a sample page from a DHS 415F Application for Services. Eligibility workers are guided through a review of the application scenario and are reminded how to address missing or incomplete information and narrate their actions.

Eight 2008 Accuracy Summits were conducted across the state this summer. The 2008 Accuracy Summits address program accuracy needs identified from field staff and managers, as well as program and program integrity staff. The sessions include eligibility reminders, including income and resource verification requirements.

The 'Medical Decision' training tool is currently used to assist staff in determining medical program eligibility. The department plans to automate the medical program eligibility decision process using a web-based computer system application version of the training tool.

The new application will act as a medical benefit calculator for eligibility workers. Eligibility workers will enter client information for each applicant, including income, household composition and other eligibility factors. The new application will review the eligibility factors for each medical category, including countable income, and present an eligibility decision. The first phase of the new web-based application is scheduled for implementation in June 2009. Additional application enhancements are planned for late 2009 and early 2010.

The Children, Adults & Families Self-Sufficiency Programs (CAF SSP) program staff are working in partnership with the Office of Information Systems to modernize CAF SSP eligibility systems. In addition to updating some legacy computer systems, a more intuitive user interface will be implemented. Applicant information will be entered on a common data interface screen and the data will be used to populate other screens or systems, reducing data entry errors and improving the accuracy of the client data.

Income calculations will be automated. For example, workers will enter basic wage information and the system will perform a variety of calculations and present eligibility decisions for a number of programs. The new income calculation functionality will improve the accuracy of earned income calculations.

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2008

New imaging technology will streamline the eligibility determination process and allow workers instant access to documents, including income documentation. Use of imaging technology will reduce the amount of paper documents that can potentially be misplaced or misfiled and increase the accuracy of the information used to determine eligibility.

The modernization efforts will be implemented in phases, beginning in late 2008 and continuing throughout 2009.

Finding 07-40: **State Children's Health Insurance Program, CFDA 93.767**
Eligibility and Allowable Costs, Material Weakness,
Questioned Costs \$4,290

Recommendation: The Oregon Office of Private Health Partnerships (department) should evaluate their review process over eligibility determinations and subsidy payment calculations to ensure the process is working as intended and payments are made only for eligible individuals. We also recommend the department strengthen its payment review process to ensure all coding changes have documented support and are appropriately approved. Further, we recommend the department recover overpayments made.

Status: Corrective action was taken.

Auditor Comment:
The auditee reported corrective taken was taken.
See current year finding 08-22.

Finding 07-41: **State Children's Health Insurance Program, CFDA 93.767**
Maintenance of Effort – Advance Subsidy Payments

Recommendation: The Oregon Office of Private Health Partnerships (department) should consult with the Center for Medicare and Medicaid Services (CMS) to determine whether it was appropriate to prepay subsidy payments to meet the maintenance of effort requirements and regarding the allowability of advance insurance premium subsidies funded with the State Children's Health Insurance Program for ineligible adults.

Status: No corrective action will be taken.

The agency operated within its contractual obligation with the Centers for Medicare and Medicaid Services (CMS). Prior to making advance subsidy payments, Family Health Insurance Assistance Program coordinated with the Department of Human Services and the Department of Administrative Services in making this decision. The agency had multiple discussions with CMS following their receipt of

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2008

the audit report as part of the November 1, 2007, waiver renewal. Agency staff reviewed the waiver document line by line with CMS staff. This decision was never raised as an issue. With implementation of the waiver renewal on November 1, 2007, Maintenance of Effort is no longer required and is no longer a consideration.

See current year finding 08-24.

Finding 07-42: **Adoption Assistance, CFDA 93.659**
 Allowable Costs, Questioned Costs \$15,440

Recommendation: The Oregon Department of Human Services (department) should create and implement policies and procedures for the timely and adequate review of adoption assistance entries into the child welfare information system. We further recommend that department management consider reviewing adoption assistance cases entered into the child welfare information system, during the budget reduction period, to ensure payment amounts were entered correctly. Finally, we recommend the department ensure all overpayments are collected.

Status: Partial corrective action was taken.

The department is in the process of verifying the crosscheck database report for accuracy. The department is also in the process of identifying remaining cases with possible overpayments.

See current year finding 08-28.

Finding 07-43: **Child Care Development Fund Cluster**
 Allowable Costs, Questioned Costs \$13,396

Recommendation: The Oregon Department of Human Services (department) should ensure child care expenditures, submitted to the Oregon Employment Department for reimbursement, are allowable under the interagency agreement and are supported in the accounting records. Furthermore, if indirect costs are allocated to this federal program, department management should ensure the allocation is done in accordance with OMB Circular A-87.

Status: Corrective action was taken.

Finding 07-44: **Immunization Grants, CFDA 93.268**
 Subrecipient Monitoring – Site Visit Protocol

Recommendation: The Oregon Department of Human Services should document the approved site visit protocol. This protocol should be available for

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2008

review by program employees so that proper monitoring procedures are performed.

Status: Partial corrective action was taken.

A Site Visit Protocol, Site Visit Guide “High Risk Questions” Answer Key, and Vaccines For Children Health Educator Training Manual have all been developed. The Protocol was implemented as a pilot in February and officially implemented in final form August 1, 2008. The Training Manual is in pilot form.

Finding 07-45: **Immunization Grants, CFDA 93.268**
Reporting – Cash Transaction Report Not Reviewed

Recommendation: The Oregon Department of Human Services should implement procedures to ensure all reports that are submitted to regulatory agencies are reviewed and approved by applicable supervisors prior to submission

Status: Corrective action was taken.

Finding 07-46: **Medicaid Cluster**
Special Tests and Provisions – Automated Data Process

Recommendation: The Oregon Department of Human Services (department) management should ensure that the Automatic Data Process risk analysis and system security reviews are conducted at least every two years, as required.

Status: Partial corrective action was taken.

The implementation date of the Replacement Medicaid Management Information System has been extended until the fourth quarter of 2008. A system certification is required and should include a security assessment. If not, the department will schedule a security assessment immediately, followed by an additional security assessment every two years.

Finding 07-47: **Medicaid Cluster**
Cash Management

Recommendation: The Oregon Department of Human Services (department) management should apply the check clearance pattern to all applicable Medicaid expenditures. Additionally, the department should work with the federal government to determine the amount of interest owed for state fiscal year 2007.

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2008

Status: Corrective action was taken.

Finding 07-48: **Medicaid Cluster**
Special Tests and Provisions – Provider Eligibility

Recommendation: The Oregon Department of Human Services (department) management should implement procedures to ensure current licenses are maintained for all providers receiving Medicaid payments.

Status: Partial corrective action was taken.

The situation has been corrected. Beginning in November 2007, the department manually sent letters to new providers whose licenses would expire within 60 days. New providers who did not respond by sending a copy of their renewed license were business terminated as an Oregon Department of Human Services (DHS) provider. These providers could be reactivated back to their license renewal effective date once a copy of the renewed license is received.

Beginning December 2008, the department's replacement Medicaid Management Information System (MMIS) tracks current license expiration dates and automatically generates demand letters to providers 90 days (and 30 days if necessary) in advance of the expiration date. Providers who do not maintain a required license and/or provide a copy of their renewed license are business terminated as a DHS provider.

For providers licensed by the Oregon Medical Board, the Oregon Board of Nursing, and the Oregon Board of Pharmacy, the new MMIS also has a direct interface with databases maintained by those boards. The Oregon Board of Pharmacy interface runs monthly, while the Oregon Medical Board and Oregon Board of Nursing interfaces run weekly. These interfaces are ran to match the boards' license expiration date information with the provider enrollment files in MMIS. If the board has updated a license, the provider's file will be revised to reflect the new expiration date. If a board interface returns an expired license date, the system will automatically business terminate the provider.

Finding 07-49: **Medicaid Cluster**
Child Care Development Fund Cluster
State Children's Health Insurance Program, CFDA 93.767
Temporary Assistance for Needy Families, CFDA 93.558
Vocational Rehabilitation, CFDA 84.126
Procurement, Suspension, and Debarment

Recommendation: The Oregon Department of Human Services (department) management should ensure that contracting procedures are adhered to and the review

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2008

for suspension and debarment is documented in accordance with department policy.

Status: Partial corrective action was taken.

The Office of Contracts and Procurement (OCP) manager facilitated a workgroup regarding these issues. The work group recommended updates to Procedure 31 Federal Debarment and Suspension, and recommended a contract check list not be created.

The debarment procedure was updated August 1, 2008 to include printing the debarment check and placing this documentation in the contract file. An email was sent to all OCP staff explaining the change required for debarment checking with the updated procedure attached. It was determined the contract checklist would create additional, unnecessary work.

Allowable Costs – Cost Allocation

Recommendation: The Oregon Department of Human Services (department) management should design and implement internal control procedures over the cost allocation process to ensure that indirect costs are allocated in accordance with the department's federally approved cost allocation plan. We recommend department management determine the effect of the errors identified above and make appropriate corrections to the cost allocation plan.

Status: Partial corrective action was taken.

Financial Services has hired a contractor to start the development of an integrated database to manage the cost allocation process. That contract runs through year-end 2008. The goal of the project is to create a tool that has data that is reconcilable to the Statewide Financial Management Application, reduces or eliminates the use of imported spreadsheets, provides a consistent process that agrees with the approved cost allocation plan, and generates a log to document when and if changes or deviations should occur in the process so that management can take action if needed to rectify.

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2008

Finding 06-12: **State Children's Health Insurance Program (SCHIP) CFDA 93.767 Eligibility and Allowable Activities (Material Weakness)**

Recommendation: The Oregon Office of Private Health Partnerships (department) management should implement a quality control or monitoring process over eligibility processes and subsidy payment calculations. We also recommend the department ensure all changes made are clearly documented. Finally, we recommend the department work with the federal government to resolve and correct the errors identified.

Status: Corrective action was taken.

Finding 06-16: **Adoption Assistance, CFDA 93.659 Eligibility (Material Weakness)**

Recommendation: The Oregon Department of Human Services (department) management should correct 24 cases and work with the federal government to resolve the financial ramifications of these errors. In addition, we recommend the department review coding entries in the Integrated Information System to verify the correct code is entered and ensure the department is not inappropriately billing the Federal government for ineligible clients.

Status: Corrective action was taken.

Finding 06-21: **Workforce Investment Act Cluster Cash Management**

Recommendation: The Oregon Department of Community Colleges and Workforce Development should thoroughly review the requests for federal funds and ensure that requests for federal funds are adequately supported, and the requests agree to expenditures already made.

Status: Corrective Action was taken.

Finding 06-23: **Capitalization Grants for Clean Water State Revolving Funds, CFDA 66.458 Lack of Public Notice Documentation**

Recommendation: The Oregon Department of Environmental Quality management should ensure required environmental review procedures, including notice to the public of proposed projects, are followed. Additionally, management should ensure that all necessary documentation is retained in project files for the duration of the loan process.

Status: Partial corrective action was taken.

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2008

The documentation of the public notice of the availability of the environmental review is being emphasized within the program and the internal checklist is being revised to highlight this requirement.

**SUMMARIES OF SIGNIFICANT AUDIT REPORTS ISSUED BY THE
OREGON SECRETARY OF STATE AUDITS DIVISION**

REPORT TITLE AND NUMBER	Department of Administrative Services: State Data Center Review; Report No. 2008-21
REPORT DATE	July 15, 2008
RESULTS IN BRIEF	<p>Based on our audit work we found:</p> <ul style="list-style-type: none">• Important data center consolidation objectives have not yet been achieved. As a result, it is unlikely that the anticipated savings or operational benefits associated with the CNIC project, such as enhanced enterprise disaster recovery and security solutions, will occur.• Operational controls did not sufficiently address service level agreements with customers, performance and capacity management, standard operating procedures, configuration management, or software licensing requirements.• The department was ill-prepared to timely resume data center operations or assist agencies in their efforts to restore critical computer applications after a major disruption.• The department had not provided a secure computing environment for SDC clients.
REPORT TITLE AND NUMBER	Oregon Department of Human Services: Integrated Information System Application Controls Review; Report No. 2008-24
REPORT DATE	August 8, 2008
RESULTS IN BRIEF	<p>Automated and manual application controls did not reasonably ensure all transaction data would be complete, accurate, or valid. Specific control weaknesses included:</p>

- Adoption Assistance payment parameters were not independently validated after staff manually entered them into the system.
- Staff did not perform timely or effective reconciliations of system payments.
- Replacement checks for lost or stolen checks were not properly recorded in the system.
- The department did not adequately separate duties for entering Adoption Assistance clients and initiating the associated automatic payments.
- Department staff did not document adjustments they made to correct system transactions that did not properly post to the state's financial application.

It is also unlikely that the department could timely restore the system in the event of a disaster or major disruption because it did not have a defined backup strategy, system restoration plan, or service level agreement with the State Data Center.

Department staff did not always follow appropriate program change management procedures or ensure that important quality assurance steps occurred.

Logical access controls did not adequately protect the system and its data from unauthorized use, disclosure, modification, damage, or loss

REPORT TITLE AND NUMBER

**Oregon Department of Administrative Services:
Statewide Financial Management Application
Computer Controls Review; Report No. 2008-29**

REPORT DATE

September 29, 2008

RESULTS IN BRIEF

Based on our audit work, we found that:

- Application controls provided reasonable assurance that system data input by agencies' staff would remain complete, accurate and valid. Those controls also reasonably assured that the Data Mart would accurately represent information contained in R*STARS transaction files.
- Department procedures ensured that system modification requests were appropriately prioritized, authorized, assigned, documented, tracked and tested.
- System managers did not have assurance that backup tapes were viable or were stored off-site. In addition, the department did not have adequate procedures for restoring the system in the event of a disaster or major disruption.
- Logical access controls provided a vital layer of security to reasonably protect the system. However, the system was at increased risk of compromise due to security weaknesses at the State Data Center.

ABOUT THE SECRETARY OF STATE AUDITS DIVISION

The Oregon Constitution provides that the Secretary of State shall be, by virtue of his office, Auditor of Public Accounts. The Audits Division exists to carry out this duty. The division reports to the elected Secretary of State and is independent of the Executive, Legislative, and Judicial branches of Oregon government. The division audits all state officers, agencies, boards, and commissions and oversees audits and financial reporting for local governments.

Directory of Key Officials

Interim Director	Drummond Kahn, MS, CIA, CGFM, CGAP
Deputy Director	William K. Garber, MPA, CGFM
Deputy Director	Mary E. Wenger, CPA

This report, a public record, is intended to promote the best possible management of public resources. Copies may be obtained from:
