State of Oregon

STATEWIDE SINGLE AUDIT REPORT

For the Year Ended June 30, 2004

Audits Division

Auditing for a Better Oregon

The Honorable Theodore R. Kulongoski
Governor of Oregon

We have conducted a statewide audit in accordance with the Single Audit Act Amendments of 1996, Government Auditing Standards, and U. S. Office of Management and Budget (OMB) Circular A-133, Audits of States, Local Governments, and Non-Profit Organizations. This report encompasses the year ended June 30, 2004 and is required for the State to continue receiving federal financial assistance which, as shown in this report, totals approximately \$6.2 billion.

As required by the Single Audit Act, we issued a report dated December 28, 2004, on the State of Oregon's financial statements. That report was included in the State of Oregon's *Comprehensive Annual Financial Report* for the year ended June 30, 2004.

This report contains the remaining components required by the Single Audit Act:

- *Report on Internal Control over Financial Reporting and on Compliance and Other Matters.* This component contains our report on the State of Oregon's internal control over financial reporting and compliance with laws, regulations, contracts and grant agreements that affect the financial statements. Part of the schedule of findings and questioned costs relates to this report.

Report on Compliance with Requirements Applicable to each Major Program and on Internal Control Over Compliance in Accordance with OMB Circular A-133. This component contains our report on the State of Oregon's compliance with the requirements applicable to each of its major federal programs described in OMB Circular A-133 and internal controls over compliance. Part of the schedule of findings and questioned costs relates to this report. This component also contains our report on the State of Oregon's schedule of expenditures of federal awards for the year ended June 30, 2004.

Schedule of Expenditures of Federal Awards. This schedule is not a required part of the State of Oregon's financial statements, but is required by OMB Circular A-133. The schedule shows State expenditures of federal awards, for the fiscal year ending June 30, 2004, excluding Oregon Health and Science University. The notes, which accompany the schedule, are considered an integral part of the schedule. They provide disclosures regarding the reporting entity, the significant accounting policies used in preparing the schedule, the value of federal awards expended in the form of non-cash assistance, the value of loans outstanding at year end, and the value of pass-through awards received by the State from non-federal entities.

Schedule of Findings and Questioned Costs. This schedule lists 15 current audit findings regarding compliance and internal control related to financial reporting. It also lists 18 current audit findings regarding compliance with the requirements of major federal programs and related internal controls. Further, it lists the status of findings regarding compliance and internal control related to financial reporting and compliance with the requirements of major federal programs and related internal controls which were included in our report for the fiscal year ended June 30, 2003. In addition, it lists the status of prior year audit findings for the fiscal year ended June 30, 2002, which were not previously corrected.

OMB Circular A-133 requires management to provide a plan of corrective action on the findings and recommendations for the fiscal year ended June 30, 2004. Management's responses and planned corrective actions are included in this schedule.

Auditing for a Better Oregon

The Honorable Theodore R. Kulongoski
Governor of Oregon

**INDEPENDENT AUDITOR'S REPORT ON INTERNAL CONTROL OVER
FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS
BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN
ACCORDANCE WITH *GOVERNMENT AUDITING STANDARDS***

We have audited the financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the State of Oregon, as of and for the year ended June 30, 2004, which collectively comprise the State of Oregon's basic financial statements, and have issued our report thereon dated December 28, 2004. We did not audit the financial statements of the discretely presented component units or the University System. Those financial statements were audited by other auditors whose reports thereon have been furnished to us, and our opinion, insofar as it relates to the amounts included for the discretely presented component units and the University System, is based on the reports of the other auditors. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States.

Internal Control Over Financial Reporting

In planning and performing our audit, we considered the State of Oregon's internal control over financial reporting in order to determine our auditing procedures for the purpose of expressing our opinion on the financial statements and not to provide an opinion on the internal control over financial reporting. However, we noted certain matters involving the internal control over financial reporting and its operation that we consider to be reportable conditions. Reportable conditions involve matters coming to our attention relating to significant deficiencies in the design or operation of the internal control over financial reporting that, in our judgment, could adversely affect the State of Oregon's ability to record, process, summarize, and report financial data consistent with the assertions of management in the financial statements. Reportable conditions are described in the accompanying schedule of findings and questioned costs as items 04-1 through 04-15.

A material weakness is a reportable condition in which the design or operation of one or more of the internal control components does not reduce to a relatively low level the risk that misstatements caused by error or fraud in amounts that would be material in relation to the financial statements being audited may occur and not be detected within a timely period by employees in the normal course of performing their assigned functions. Our

consideration of the internal control over financial reporting would not necessarily disclose all matters in the internal control that might be reportable conditions and, accordingly, would not necessarily disclose all reportable conditions that are also considered to be material weaknesses. However, of the reportable conditions described above, we consider items 04-1 through 04-3 to be material weaknesses.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the State of Oregon's financial statements are free of material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

We noted certain matters that we or other auditors reported to management of the State of Oregon in separate letters.

This report is intended solely for the information and use of the management of the State of Oregon, the governor of the State of Oregon, the Oregon Legislative Assembly and is not intended to be and should not be used by anyone other than these specified parties.

Bill Bradbury
Secretary of State

December 28, 2004

Auditing for a Better Oregon

The Honorable Theodore R. Kulongoski
Governor of Oregon

**INDEPENDENT AUDITOR'S REPORT ON COMPLIANCE WITH REQUIREMENTS
APPLICABLE TO EACH MAJOR PROGRAM AND ON INTERNAL CONTROL
OVER COMPLIANCE IN ACCORDANCE WITH OMB CIRCULAR A-133**

Compliance

We have audited the compliance of the State of Oregon with the types of compliance requirements described in the U.S. Office of Management and Budget (OMB) *Circular A-133 Compliance Supplement* that are applicable to each of its major federal programs for the year ended June 30, 2004. The State of Oregon's major federal programs are identified in the summary of auditor's results section of the accompanying schedule of findings and questioned costs. Compliance with the requirements of laws, regulations, contracts, and grants applicable to each of its major federal programs is the responsibility of the State of Oregon's management. Our responsibility is to express an opinion on the State of Oregon's compliance based on our audit. We did not audit the State of Oregon's compliance with the following major federal programs:

39.011	Election Reform Payments
84.032	Federal Family Education Loans
84.126	Rehabilitation Services – Vocational Rehabilitation Grants to States
93.283	Centers for Disease Control and Prevention- Investigations and Technical Assistance
93.658	Foster Care – Title IV-E
N/A	Student Financial Assistance Cluster
N/A	Child Care and Development Fund Cluster
N/A	Special Education Cluster

Other auditors audited the State of Oregon's compliance with these programs' requirements and their report thereon has been furnished to us. Our opinion, insofar as it relates to these programs, is based solely on the reports of the other auditors.

The State of Oregon's basic financial statements include the operations of the Oregon Health and Science University, which received approximately \$245 million in federal awards which is not included in the State of Oregon's schedule of expenditures of federal awards for the year ended June 30, 2004. Our audit, described below, did not include the operations of the Oregon Health and Science University because the component unit engaged other auditors to perform an audit in accordance with OMB Circular A-133.

We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained

in *Government Auditing Standards*, issued by the Comptroller General of the United States; and OMB Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*. Those standards and OMB Circular A-133 require that we plan and perform the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements referred to above that could have a direct and material effect on a major federal program occurred. An audit includes examining, on a test basis, evidence about the State of Oregon's compliance with those requirements and performing such other procedures as we considered necessary in the circumstances. We believe that our audit and the reports of the auditors provide a reasonable basis for our opinion. Our audit does not provide a legal determination on the State of Oregon's compliance with those requirements.

As described in items 04-16 and 04-17 in the accompanying schedule of findings and questioned costs, the State of Oregon did not comply with requirements regarding Allowable Costs/Cost Principles and Subrecipient Monitoring that are applicable to its Centers for Disease Control and Prevention-Investigations and Technical Assistance program. Compliance with such requirements is necessary, in our opinion, based on the work of other auditors, for the State of Oregon to comply with requirements applicable to that program.

In our opinion, based on our audit and the work of the other auditors, except for the noncompliance described in the preceding paragraph, the State of Oregon complied, in all material respects, with the requirements referred to above that are applicable to each of its major federal programs for the year ended June 30, 2004. The results of our auditing procedures also disclosed other instances of noncompliance with those requirements, which are required to be reported in accordance with OMB Circular A-133 and which are described in the accompanying schedule of findings and questioned costs as items 04-22 through 04-31.

Internal Control Over Compliance

The management of the State of Oregon is responsible for establishing and maintaining effective internal control over compliance with requirements of laws, regulations, contracts, and grants applicable to federal programs. In planning and performing our audit, we considered the State of Oregon's internal control over compliance with requirements that could have a direct and material effect on a major federal program in order to determine our auditing procedures for the purpose of expressing our opinion on compliance and to test and report on internal control over compliance in accordance with OMB Circular A-133.

We noted certain matters involving the internal control over compliance and its operation that we consider to be reportable conditions. Reportable conditions involve matters coming to our attention relating to significant deficiencies in the design or operation of the internal control over compliance that, in our judgment, could adversely affect the State of Oregon's ability to administer a major federal program in accordance with the applicable requirements of laws, regulations, contracts, and grants. Reportable conditions are described in the accompanying schedule of findings and questioned costs as items 04-16 through 04-21, 04-32 and 04-33.

A material weakness is a reportable condition in which the design or operation of one or more of the internal control components does not reduce to a relatively low level the risk that noncompliance with the applicable requirements of laws, regulations, contracts, and grants caused by error or fraud that would be material in relation to a major federal program being audited may occur and not be detected within a timely period by employees in the normal

course of performing their assigned functions. Our consideration of the internal control over compliance would not necessarily disclose all matters in the internal control that might be reportable conditions and, accordingly, would not necessarily disclose all reportable conditions that are also considered to be material weaknesses. However, of the reportable conditions described above, we consider items 04-16 and 04-17 to be material weaknesses.

Schedule of Expenditures of Federal Awards

We have audited the financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the State of Oregon, as of and for the year ended June 30, 2004, and have issued our report thereon dated December 28, 2004. Our audit was performed for the purpose of forming opinions on the financial statements that collectively comprise the State of Oregon's basic financial statements. We did not audit the financial statements of the discretely presented component units or the University System. Those financial statements were audited by other auditors whose reports thereon have been furnished to us, and our opinion, insofar as it relates to the amounts included for the discretely presented component units and the University System, is based on the reports of the other auditors. The accompanying schedule of expenditures of federal awards is presented for purposes of additional analysis as required by OMB Circular A-133 and is not a required part of the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, based on our audit and the work of the other auditors, is fairly stated, in all material respects, in relation to the basic financial statements taken as a whole.

We did not audit the schedule of expenditures of federal awards of the Oregon Health and Science University. That schedule is audited by other auditors who will issue a separate report on compliance and internal control and on compliance with OMB Circular A-133 over major federal programs. To obtain a copy of this report, please refer to note disclosure 2 of the schedule of expenditure of federal awards.

This report is intended solely for the information and use of the management of the State of Oregon, the governor of the State of Oregon, the Oregon Legislative Assembly, and federal awarding agencies and pass-through entities and is not intended to be and should not be used by anyone other than these specified parties.

The accompanying notes are an integral part of this schedule.

Notes to the Schedule of Expenditures of Federal Awards For the Year Ended June 30, 2004

Note 1. Basis of Presentation

The accompanying schedule of expenditures of federal awards includes the federal grant activity of the State of Oregon and is presented using the bases of accounting of the originating funds. These include both the modified accrual and accrual basis of accounting. The information in the schedule is presented in accordance with the requirements of OMB Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*. Therefore, some amounts presented in the schedule may differ from the amounts presented in, or used in the preparation of, the basic financial statements.

Note 2. Reporting Entity

The financial statements of the State of Oregon include all fund types for all agencies, boards, commissions, authorities, courts, and colleges and universities that are legally part of the State's primary government and its component units. The Oregon Health and Science University (OHSU) is a legally separate component unit. For the year ended June 30, 2004, OHSU has issued separate financial statements and has obtained a separate single audit as outlined in Subpart E.500 of OMB Circular A-133. Therefore, the accompanying schedule does not include the federal grant activity of OHSU. A copy of these reports can be obtained from OHSU, 2525 SW First Avenue, Suite 201, Portland, Oregon 97201.

Note 3. Programs Involving Non-Cash Assistance

Federal expenditures reported in the schedule include the following non-cash assistance programs. All values are the fair market value at the time of receipt.

CFDA		Type of Assistance	Value
Number	Title		
10.550	Food Donation	Commodities	\$ 7,357,785
10.565	Commodity Supplemental Food Program	Commodities	173,503
10.567	Food Distribution Program on Indian Reservations	Commodities	34,063
10.569	Emergency Food Assistance Program	Commodities	6,407,381
39.003	Donation of Federal Surplus Personal Property	Donated surplus property	4,334,578
93.268	Immunization Grants	Vaccines	5,369,440
	Total		<u>\$ 23,676,750</u>

State of Oregon
Notes to the Schedule of Expenditures of Federal Awards
For the Year Ended June 30, 2004

Note 4. Loans and Loan Guarantees

Loans outstanding and new loans made during the year ended June 30, 2004 are as follows:

CFDA Number Title	Outstanding Balance as of June 30, 2004	New Loans Made During the Year Ended June 30, 2004
11.307 Economic Adjustment Assistance	\$ 5,655,661	\$ 758,210
14.239 HOME Investment Partnerships Program	2,404,642	939,988
66.458 Capitalization Grants for State Revolving Funds	76,185,481	17,210,895
84.032 Federal Family Education Loans	805,832,534	181,909,157
84.038 Federal Perkins Loan Program-Federal Capital Contributions	69,815,857	15,496,877
Total	<u>\$ 959,894,175</u>	<u>\$ 216,315,127</u>

Note 5. Unemployment Insurance

State unemployment tax revenues and the government contributions in lieu of State taxes are deposited to the Unemployment Trust Fund in the U.S. Treasury. These funds may only be used to pay benefits under the federally approved State unemployment law. Of the \$1,172,573,474 reported as expenditures for the Unemployment Insurance program (CFDA 17.225), \$851,912,665 represented expenditures of state funds held in the Unemployment Trust Fund.

Note 6. Pass-Through Awards

The State of Oregon received the following amounts as a subrecipient of non-federal entities:

CFDA Number	Organization	Amount	ID Number
10.001	University of California	\$18,000	93-004-ETX

Auditee qualified as low-risk auditee? ☐ yes ☒ no

Section II – Financial Statement Findings

04-1

SAIF Corporation

Ceded Premiums, Losses and Reserves

(Material Weakness)

The SAIF Corporation (SAIF) participates in the National Workers' Compensation Reinsurance Pool, administered by the National Council on Compensation Insurance (NCCI). As part of that program, SAIF cedes and assumes a material amount of premiums, losses, and reserves to and from the NCCI. Information to record these amounts are provided by the NCCI on a quarterly basis. Due to the timing of the receipt of this information, necessary accounting entries have been recorded on a one quarter delayed basis. Management's process to record and review these transactions, including comparing the preliminary estimates to actual amounts that were later communicated, was not sufficient to detect the material differences that occurred as of December 31, 2002, that resulted in a restatement adjustment to SAIF's 2002 Fund Equity.

AGENCY'S RESPONSE:

We agree with this finding. In recent years, the size of the reinsurance pool administered by the NCCI has grown significantly. In prior years, we sought to estimate and accrue premium and losses for the current reporting period as the amounts had become material. During 2003, we discovered our estimated accrual for ceded premium and losses was not adequate and recorded an adjustment to properly reflect accrued ceded premium. This adjustment was material and should have been recorded in 2002. During the course of the audit, it was also determined that other estimates related to the reinsurance pool should be refined. We have revised our estimates by incorporating trend and correlation analysis and those refinements have been implemented. Additionally, provided the actual results are available prior to the release of future financial statements, we will compare actual results with our estimate and adjust accordingly if the differences are material.

04-2

SAIF Corporation

Loss Reserve Calculation

(Material Weakness)

The SAIF Corporation (SAIF) recorded approximately \$2.4 billion in insurance loss reserve liabilities at December 31, 2003. The calculation of loss reserve amounts requires significant analysis, and use of underwriting and operational data, complex processing of such data, and significant estimates and assumptions performed by management in determining the appropriate level of reserves. Subsequent to the December 31, 2003 year-end close, a third-party review of SAIF's reserving methodology identified a mathematical error in the reserve computation, resulting in a \$13 million audit adjustment in the loss reserve balance at December 31, 2003.

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2004

AGENCY'S RESPONSE:

We agree with the finding of the mathematical error. The error was corrected immediately when we became aware of it. While the amount of the error is considered material as it relates to net income and fund equity, we note that the error was approximately one-half of one percent of SAIF's total loss reserve liabilities. As you have correctly noted, the estimate of workers' compensation loss reserves involves complex analysis, estimates, and assumptions. The output of this work is subject to multiple peer reviews, including review by an external actuary, which should detect material errors. However, SAIF's Actuarial Department will strengthen its peer review process. In addition to reviewing every exhibit in the reserve documentation, we will also perform control total checks for selected accident years to ensure that the numbers add up to the correct totals. Even if the total of all accident years balance, we will spot check various accident year totals to confirm that the numbers have been assigned to the correct accident years. This peer review and checking process will be fully implemented with the year-end 2004 annual statement preparation process.

04-3

Oregon Department of Human Services
Cash Reconciliations
(Material Weakness)

The *Oregon Accounting Manual* indicates that departments should regularly perform reconciliations of cash recorded in agency records to amounts reported on Treasury statements. Those reconciliations should be performed by persons not otherwise responsible for handling or recording cash and should be reviewed by management.

During state fiscal year 2004, the Oregon Department of Human Services (department) did not properly perform reconciliations for 90 percent of cash recorded in account 0075 – Cash on Deposit Suspense Account at Treasury, for Health and Human Services Fund, 1108. After this condition was detected during the audit, department staff completed reconciliations for the majority of amounts reported in the above suspense account. As a result of those reconciliations, errors totaling approximately \$4.4 million were identified and corrected.

Reconciling bank statements to amounts recorded in agency accounting records is an essential internal control. Timely and effective reconciliations can help identify errors or other problems that may have occurred, and provide additional assurance that reported cash balances are valid. By not performing reconciliations, the department's ability to timely detect and correct potential problems was unacceptably limited.

We recommend department management ensure suspense account reconciliations are regularly and accurately performed. In addition, they should ensure that those reconciliations are reviewed and adjusting entries made to correct errors identified during reconciliation.

AGENCY'S RESPONSE:

The department agrees with this finding. Most of the reconciliations are maintained in a timely manner. We have developed a tracking system to facilitate monitoring of these

reconciliations. Our biggest challenge is the reconciliations for the child welfare accounts and system.

Expectations have been developed for managers and shared with staff. The expectations include closely monitoring each reconciliation for timeliness and the correction of reconciling items. Weekly meetings are scheduled to track the progress on reconciliations and to develop timelines for meeting the expectations. Training sessions for the reconciliation staff and managers will also be developed.

04-4
Oregon Department of Human Services
Segregation of Duties

As instructed by the *Oregon Accounting Manual*, the Oregon Department of Human Services (department) should ensure cash and cash related transactions are properly accounted for and safeguarded by providing controls to:

- Ensure mail containing remittances is opened by two people.
- Restrictively endorse all checks as they are received.
- Record all cash received using pre-numbered documents, cash register tapes, mail- room listings or similar documents.
- Daily reconcile all cash received with the above reports.
- Separate cash handling from record keeping duties.
- Ensure that no one person handles cash transactions from beginning to end.

The department has not established adequate controls over cash receipts. Although it indicated that checks were restrictively endorsed when received, mail containing remittances were routinely opened by one person who often had complete control over cash transactions. Checks also were not logged when received; thus, they could not be reconciled as required.

As a result, cash receipts have not been adequately safeguarded and the risk of fraud or misuse of state funds has not been sufficiently reduced. In addition, the above issues limited the department's ability to detect potential problems.

We recommend the department develop and implement policies and procedures to provide for segregation of duties over cash receipts, ensure adequate documentation of cash receipts is created, and ensure that cash is reconciled to that documentation.

AGENCY'S RESPONSE:

The department agrees with this finding. The department has established procedures that require the restrictive endorsement of all negotiable instruments as the mail is opened. While it is true that there may not be adequate separation of cash receipting duties, compensating controls are in place.

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2004

The department currently has a staff of seven employees who receipt all negotiable instruments received by the department. With the volume of instruments received, it is not physically possible for these staff to log all of them. The department does not have a common system where all receipts are entered, but currently has six different systems. These systems are specialized to account for receipts for specific needs of distinct populations of clients within the department. This requires the staff who record receipts to specialize in the different systems, and hampers the ability to appropriately segregate receipting duties.

The department will immediately implement the requirement that two staff open the mail together. The department will also pursue a compensating control for verification of all deposits by one staff who works with trust accounts, and has no recordkeeping duties for cash receipts.

In addition, the department is in the very early stage of designing a common database in which to record all receipts so it can eventually serve as a log of all receipts that can be reconciled to deposits. We will implement the procedure requiring two staff to open the mail immediately. The design and implementation of the database may take up to a year, depending upon available resources.

04-5
Oregon Public Employees Retirement System
Reconciling Items Not Cleared Timely

We found that the Oregon Public Employees Retirement System (department) is not promptly clearing reconciling items from three clearing accounts. The total unreconciled balance of these accounts exceeded \$285 million as of June 30, 2004. Of this amount, reconciling items totaling \$140 million (49 percent) have remained in the clearing accounts for more than one year.

Items are placed in the clearing accounts when there is a disagreement between amounts reported in the Membership and Benefit Reserve Subsystems of the Retirement Information Management System (RIMS). Each item remains in the clearing accounts until department staff can review and resolve the discrepancies. Uncorrected reconciling items may result in the over or under payment of refunds or benefits. Failure to correct reconciling items promptly may increase the magnitude of errors.

We recommend department management prioritize the correction of the RIMS clearing account reconciling items.

AGENCY'S RESPONSE:

The department agrees with the reportable condition and recommendation. Two primary drivers causing the clearing account balances to grow in the past year are the record number of member retirements processed by the Oregon Public Employees Retirement System and 2003 legislative changes that impacted the pension benefit calculations. Reconciling items often result when the Retirement Information Management System does not have the

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2004

necessary functionality to process benefit calculations, requiring staff to process system workarounds. Management has increased the priority given these accounts and added resources to correct reconciling items. Management anticipates having outstanding items older than six months cleared from the reconciling accounts no later than June 30, 2009.

04-6

Oregon Department of Corrections

Capital Asset Controls Need to be Strengthened

The Oregon Department of Corrections (department) needs to improve controls over capital assets to ensure they are properly recorded and accounted for. According to *Oregon Accounting Manual* (OAM) Policy 15.60.10, state agencies are responsible for ensuring capital assets are accounted for and classified properly and accurately in the accounting records. Management is responsible for ensuring that sufficient internal controls are in place to accurately record capital assets. During the fiscal year 2004 audit, we tested a sample of capital asset transactions recorded in the building and building improvements account and found the department inaccurately recorded capital assets in the accounting system.

We found 13 assets that were not properly capitalized when the assets came into service. Most of these assets were placed into service between one and two years prior to being capitalized and included in the financial statements. Of these 13 assets, seven had not been capitalized by June 30, 2004, which required a financial statement adjustment of over \$3.8 million to increase the capital asset building account. Another adjustment of approximately \$100,000 was required to reduce the building account because the department incorrectly classified an item as a building instead of equipment. One control weakness that may have contributed to the misreporting is an improper segregation of duties as required by OAM 10.50.00. The department's accounting staff create and release their own accounting batches in the Statewide Financial Management Application (SFMA) without supervisory review.

We also found the department did not reconcile amounts recorded in the state accounting system (SFMA) to amounts recorded in the department's Automated Financial Accounting Manufacturing Inventory System (AFAMIS) and physical inventory systems. According to OAM 15.60.10, property ledgers used to control capital assets are to be periodically reconciled to general ledger control accounts. Additionally, the department did not conduct an annual physical inventory of capital assets as required.

The department's internal policy regarding inventory and property control is outdated as it references an OAM policy that does not exist. It also contradicts the current OAM policy regarding physical inventory. The OAM requires physical inventory to be conducted annually, while the department's policy indicates a physical inventory should occur every two years.

We recommend the department update its policy to agree with the OAM. The department should take physical inventories annually, and reconcile it to both SFMA and AFAMIS to ensure the accuracy of amounts reported in the financial records. The department should

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2004

capitalize assets when they come into service. We also recommend the department review its capitalized asset and construction projects listing to ensure all completed projects have been properly capitalized.

AGENCY'S RESPONSE:

The department agrees with the recommendation.

- a. Department policy will be changed effective within fiscal year 2005 to require physical inventories to be conducted on an annual basis. Such inventories will be performed department wide during the last half of the fiscal year.*
- b. An Accountant 2 was hired effective June 21, 2004, as a dedicated resource to accounting for fixed assets. This resource has been reviewing and reconciling accounts and booking fixed assets monthly as acquired during fiscal year 2005. This accountant continues work on prior years' reconciliations as well as reconciling current year acquisitions timely.*
- c. An Accountant 3 was hired effective February 1, 2005, as a dedicated resource for Certificates of Participation-funded capital projects accounting. This accountant will track projects in process and provide work in process and completed project data to the Accountant 2 responsible for fixed assets. These two resources will address prior years' issues with Work in Process.*

04-7

Oregon Department of Corrections

Mail Opening Procedures Need to be Strengthened

In reviewing the Oregon Department of Corrections' (department) procedures, we found that an inmate is currently opening the department's mail without a second person observing. Additionally, checks are not restrictively endorsed upon receipt. This practice puts checks and cash received through the mail at risk of loss or theft without the department's knowledge.

Oregon Accounting Manual (OAM) Policy 10.20.00 requires controls and safeguards to be adequate to provide management with a reasonable degree of assurance that cash and cash related transactions will be properly accounted for and controlled. Specifically, receipts received by mail should be opened by two designated persons. In cases where the volume of receipts is light and/or the cash received is in small amounts and risk evaluation indicates low risk levels, one person may open the mail. If only one person opens the mail, additional control procedures may be required, such as adequate supervision, test checks of receipts and deposits and periodic reassignment of duties. The OAM also states that checks are to be restrictively endorsed at the time of collection.

We recommend the department use two permanent employees for mail opening. Additionally, checks received should be restrictively endorsed immediately upon receipt.

AGENCY'S RESPONSE:

The department agrees with this recommendation.

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2004

- a. *The department agrees it needs to improve the mail handling procedures in Central Accounting. The department has implemented the recommendation to have all checks restrictively endorsed immediately upon receipt.*
- b. *The department will conduct a 30-day evaluation of the incoming mail and the associated number of checks to assess the level of risk associated with incoming checks. Once that level of risk is determined, the department will work with its Internal Audit staff to review compensating controls that could include establishing a mail log process, rotation of the mail opening duty, and additional supervision of the mail opening process.*

04-8

Oregon Department of Corrections
Independent Review Needs to be Strengthened

During our testing of payments made to counties, we identified a \$100,000 overpayment that was sent to a county. The county identified the error and returned the check to the Oregon Department of Corrections (department). *Oregon Accounting Manual* (OAM) Policy 10.40.00 requires payments to be reviewed internally for accuracy and appropriateness. Further, an employee independent of the claims and payable process should conduct this review.

We recommend that department management ensure independent reviews are conducted on all payments and other critical accounting processes. These reviews should examine transactions for accuracy and appropriateness.

AGENCY'S RESPONSE:

The department agrees with the recommendation. The department agrees that while Independent Review has been addressed as a result of findings from the 2003 statewide financial audit, there is still some room to improve and strengthen independent reviews.

An Accountant I was hired effective January 10, 2005, for the position of Payment Approver. This accountant has been trained in payment approval for all types of payments processed by the department. This accountant is supported by oversight from the Accounting Manager and Controller for all aspects of the payment approver role. Prior to submitting the payment interface file for processing, the Accounting Manager or Controller will randomly select and review batches. This corrective action is substantially implemented as of this writing.

04-9

Oregon Department of Forestry
Controls Over Financial Accounting

During our audit, we found that the Oregon Department of Forestry (department) has not established adequate controls over key financial accounting functions. Without an adequate system of controls, the department is less able to effectively meet its business purpose.

For example, the department did not timely comply with *Oregon Revised Statute* (ORS) 530.115, which states that a portion of timber revenues will be paid to counties on or before

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2004

the last day of each month following the end of the calendar quarter. During fiscal year 2004, approximately \$48 million in timber revenues were owed to counties. Of this amount, the department did not transfer approximately \$5.9 million to nine of 12 counties timely. This situation existed because the department experienced a cash flow shortage and was forced to temporarily delay payments until the department was approved to take out a line of credit.

Significant weaknesses also exist in the department's cash handling, payroll, and accounts receivable processes. Details can be seen at: 04-10, 04-11, and 04-12.

We recommend the State Forester make it a priority to establish a complete system of controls over the financial accounting functions by assigning the authority and responsibility to an individual or unit whose mission it is to align the department's financial activities. Those activities should include establishing and implementing policies and procedures department wide, and reporting and verification mechanisms to ensure policies and procedures are adhered to.

AGENCY'S RESPONSE:

We disagree in part with this finding. We believe we have established adequate controls over most functions, and we continue to make improvements on controls to make them the best they can be for the risk being managed. We are in the process of adding to and fine-tuning the controls.

As to the specific example cited of our not complying with ORS 530.115, we believe it is important to emphasize that this was a one-time event in the history of the agency, and occurred once at the conclusion of the first fiscal year 2004 quarter. The agency was three business days late in making the transfer, and all county treasurer office contacts were notified personally prior to the original due date that the transfer would be late. In every other quarter of this year and the preceding years, these transfers have occurred timely as required by statute. In addition, we have implemented policies and procedures that allow us to track and manage our cash flows more effectively so that we will not experience the cash shortage that forced us to delay the payment to the counties.

We also disagree in part with the recommendations. The recommendation states that the State Forester should assign an individual whose mission it is to align the department's financial activities. This recommendation is currently achieved in our assignment of duties to our Fiscal Services Manager, and then through the agency chain of command. Our Fiscal Services Manager has the responsibility to establish and implement policies and procedures over the financial accounting functions of the agency. The chain of command for the Fiscal Services Manager is through the Business Services Director, charged with overseeing the business functions for the department including Fiscal Services, Support Services, Budget Management, Equipment Pool and Facilities/Procurement. The Business Services Director reports to the Associate State Forester who oversees the Administrative Services Division for the department including the Business Services, Information Technology and Quality Assurance Programs. The Director of Quality Assurance also serves as a consultant to the Fiscal Services Manager, especially concerning internal controls and directives related to implementing and enforcing those controls.

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2004

In addition, we have a Directive and Administrative Manual system in place that serves as the vehicle for communicating and instituting policy and procedures agency-wide. As discussed in our previous year's audit with the Audits Division, we are in the process of completing a comprehensive update of all those Directives and processes that will reflect the internal controls standard contained in OAM chapter 10. On November 1, 2004 we published two Directives, Internal Controls – General Overview and Internal Controls over Cash, and have drafted four additional Directives dealing with internal control issues.

We also have Directives in place, which we are updating, and others that we are in the process of writing that cover chapters 15, 20, 25, 30, 35, 40 and 45 of the Oregon Accounting Manual. These Directives will be updated or completed by December 2005.

In July 2004 we implemented the department's Quality Assurance Program and hired an Internal Auditor as the Director. The Fiscal Services Manager along with the Support Services Manager and the Purchasing Manager, work with the Quality Assurance Director to assure internal controls are in place and functional for fiscal activities.

Along with the Directive update effort, we have instituted a new system for on-site field reviews around the state at our field districts and units, and Salem program units. These "self-audits" work to ensure Directives and processes are being carried out appropriately. The Director of Quality Assurance serves in a consulting role for these reviews. To date, we have conducted payroll reviews of 13 offices and have issued a summary memorandum to personnel responsible for payroll duties to point out opportunities for internal control improvements. We have conducted six reviews of offices for key fiscal procedures. In the Spring of 2005 we will begin conducting reviews covering the purchasing activities of our field units. We anticipate having all three forms of reviews (payroll, fiscal, and purchasing) completed by the end of 2005.

04-10

Oregon Department of Forestry
Internal Controls over Cash Handling

The Oregon Department of Forestry (department) could improve its internal controls over cash. Specifically, we noted that some policies and procedures over cash and check stock were not implemented and desk manuals were limited in detail. The department did not have a process in place to replenish its petty cash or for making change. Furthermore, some assets were not protected (for example, checks were not restrictively endorsed and one check sent to the mailroom in the amount of \$2,103 was lost), and checks were prepared without supporting documentation. We also noted inadequate segregation of duties over the request, approval and signing of checks. Finally, the department was unable to account for some missing cash receipts (A-receipts) and deposit slips used by the field offices.

The *Oregon Accounting Manual* (OAM 10.20.00.PR.101) states departments that collect state moneys should design and document internal controls for cash and the OAM (10.20.00.PR.123) states the department should have in place controls over cash receipts that include restrictively endorsing checks immediately upon receipt. Without an adequate system

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2004

of controls over cash, the department is less able to meet its business objectives and is less able to identify and correct errors and omissions.

We recommend that department management:

1. Further develop, finalize, and implement policies and procedures over cash handling (i.e., check stock, petty cash, and change funds).
2. Update desk manuals on a regular basis and ensure they contain complete information.
3. Ensure checks are secured at all times.
4. Provide adequate segregation over the request, approval and signing of checks.
5. Ensure adequate supporting documentation is provided with each check preparation request.
6. Maintain a complete inventory on controlled items such as A-receipts and deposit slips.

AGENCY'S RESPONSE:

We disagree in part with this finding and in particular with the tone of the finding. We agree that there is room for improvement with the internal controls over cash for the department, but we do have policies and procedures in place covering cash handling. These are updated on an ongoing basis and additional policies in the form of Directives and administrative manual updates are being written.

As to the specific assertions in the finding:

- *The Fiscal Services desk manuals document duties, the processes associated with the duties, and steps necessary to get the duties done. The new Internal Controls – Cash Directive requires that all units that have cash handling responsibilities have the specific procedures outlined in a desk manual.*
- *We have procedures in place identifying how to replenish petty cash and how to use change funds. We will include policy statements and procedures for both of these processes in the Administrative Manual update.*
- *We have added the requirement for restrictively endorsing checks as they are received, and will include this requirement in our Administrative Manual update. This should be a sufficient mitigating control in the unfortunate event a check is lost.*
- *We have the supporting documentation for the revolving fund checks that were mentioned in this finding. This documentation was available at the time of the audit and we told the auditors about the documentation during the audit exit conference. The request for these checks was made by the Support Services Manager; the checks were prepared by a member of Fiscal Services and approved by the Fiscal Manager.*
- *We have Directives in place covering segregation of duties, but we will make sure that this topic is covered in more depth. We will be writing Directives and procedures for compensating controls in the case of offices that have a lack of segregation of duties due to size or composition of staff.*
- *We agree that we have not been able to account for all controlled documents used by field units. We are continuing to research this and we have put controls in place to account for all controlled documents sent out to field offices at present.*

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2004

Our response to each recommendation follows:

We agree in part with this recommendation. We have policies and procedures in place, but some of these documents are out of date. We are in the process of updating these Directives and procedures. To assure that these Directives are followed, we have implemented a review process, as discussed above. This review process will assess the controls and adherence to Directives and procedure at each office on a regular basis.

We agree with this recommendation, but disagree with the finding related to it. The department recognizes the agency's Administrative Manual as the desk manual for fiscal procedures. In addition to the Administrative Manual, desk manuals for all fiscal services employees are, and have been, in place for some time. We have a review process in place within Fiscal Services that is tied to each employee's yearly Performance Appraisal. For those units outside of Fiscal Services that handle cash, we are now requiring them to have the specific procedures for their unit outlined in a desk manual. This standard is spelled out in the new Directive titled Internal Controls over Cash that was published in November 2004. The assurance of the completeness and accuracy of the information is included in the yearly review of fiscal processes. We will continue to communicate to employees the importance of maintaining current desk manuals and procedures.

We agree with this recommendation. We have procedures for cash handling in place and we are in the process of updating these procedures. We are reviewing the cash handling processes in our reviews of the units. We will increase the security of checks by the addition of the restrictive endorsement of checks. This is being addressed in the updates of the cash handling procedures.

We agree with this recommendation, but as stated above, we disagree with the finding. The checks that are referred to were requested by the Support Services Supervisor to replace some payroll checks that did not get issued in time. The request was approved by the Fiscal Services Manager, the checks were prepared by another Fiscal Services employee, and then the checks were signed by the Fiscal Services Manager. We are in the process of updating the Revolving Fund Directive and we will assure that there is an adequate segregation of duties outlined. We will also document the process for preparation of Revolving Fund checks in a procedures manual.

We agree with this recommendation, but as stated above, we disagree with the finding. We believe the appropriate documentation for the questioned example was available at the time of the audit. Again, we are in the process of updating the Revolving Fund Directive and we will assure that there is an adequate segregation of duties outlined. We will also document the process for preparation of Revolving Fund checks in a procedures manual.

We agree with this recommendation. We are continuing to research the controlled documents that are missing. We have developed a database that allows us to inventory all these types of controlled documents as they are requested and sent out to the field or program units. We are studying a process that will allow us to imbed these document numbers in our accounting records to make it easier to track these documents. We are also working on a Directive on the handling and disposition of controlled documents.

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2004

04-11

Oregon Department of Forestry
Internal Controls over the Payroll Process

The Oregon Department of Forestry (department) has significant weaknesses in its payroll processes. The *Oregon Accounting Manual* (45.07.00.PO.102) states that agencies must ensure the review and approval of the data that becomes the basis for and the documentation of payroll expenditures. Agency administration is responsible for ensuring that the policy is followed throughout the agency and alternate reviewers are designated for when supervisors are absent from work.

We reviewed internal controls over payroll and tested payroll transactions for regular and seasonal employees, as well as overtime payments, and identified the following:

- a. Life insurance codes for 99 employees did not correspond to the employees' correct age range. Per discussion with an Oregon Public Employees Benefit Board representative, since the correct premium was not deducted, in the event of a loss of life, the employees would not be insured.
- b. Oregon Public Employees Retirement System (PERS) contributions were made to employees that were ineligible as PERS members. Some of these employees were eligible for a six percent differential in lieu of the PERS contribution; however, the department paid both the differential and the contribution to 37 of these employees.
- c. Timesheets contained numerous manual corrections that were not supported.
- d. The department did not adequately document its reasons for providing additional compensation for employees who did not take the allowed 15-minute breaks.
- e. Units utilize different payroll timesheet formats.
- f. The department overpaid seasonal employees a total of \$291 due to various errors.
- g. Some timesheets were not approved by a supervisor.
- h. The department did not pay a total of \$354 in overtime payments due to various errors.
- i. One employee with unlimited payroll system update access also receives and distributes payroll checks to field office employees. This situation increases the opportunity for misappropriation of assets.
- j. One employee enters his own payroll data into the system without supervisory review.
- k. The department units were unable to demonstrate review of some system generated overtime exception reports.

As a result, the department is less able to ensure that payroll is complete, accurate and supported. As such, the department runs the risk that errors could go undetected and uncorrected in a timely manner resulting in a loss of state funds.

We recommend the department immediately correct:

1. Life insurance codes to ensure they correspond to the correct age range.
2. Payroll errors to ensure employees do not receive both the PERS contribution and a 6 percent differential.
3. Overpayments and underpayments identified during the audit.

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2004

We also recommend the department modify its payroll processes to ensure:

1. Codes for payroll deductions and contributions are correct and updated on a routine basis.
2. Management review and approval of timesheets.
3. Adequate documentation exists to substantiate the expenditure.
4. Adequate segregation of duties over payroll responsibilities.
5. Unit managers review exception reports in a timely manner.

The department should also consider using standardized timesheets in all payroll units to help reduce errors.

AGENCY'S RESPONSE:

In general, we disagree in part with this finding. As stated previously, prior to the beginning of this audit, the department instituted a self-review of many of its internal business practices, and in particular its payroll processes and Directives. This review was conducted in cooperation and coordination with the State Controller's Division central payroll staff. This included on-site visits to each of our district offices, and discussions of corrective action with staff and management at each location. Prior to this audit, the department shared its internal review process as well as many of the weaknesses found in that internal review. Each of the conditions identified in the audit findings were conditions already identified by the department, shared with the auditors, and on which corrective action was either planned or already under way. We feel it is appropriate that the audit report state this fact as part of its findings. Following is our response to each issue identified.

- a. We disagree in part with this finding. Although it is correct that there were several incorrect premiums listed, it was by no means the entire list. In 60 percent of the listings, the query had listed the employee's birthday on the spouse's/domestic partner's premium. This gave a skewed result. All of the birth date ranges have been checked and corrected for all employee and/or dependents that have optional life insurance policies. There is now a process in place to ensure that this information is updated annually.*
- b. We agree. There was a lack of coordination between the Payroll Unit and the Human Resources Program with regard to status changes for employees. This has been corrected. We now produce a report that is run at the close of each month that is reviewed to verify that all eligible employees have been placed on PERS, and that any existing six percent payments have been removed.*
- c. We agree with this finding. There has been a problem in the past regarding the appropriate documentation needed for corrections and/or adjustments to timesheets. To correct documentation problems, personnel performing payroll functions have been instructed to document any and all changes made to the timesheet after approved by the employee and manager. Screen prints of entry to the computerized payroll system are now being attached to provide documentation, as well as written explanation. We have communicated to payroll personnel that all corrections made to timesheets are to be initialed and dated. Procedures will be updated to reflect this information. There have been mathematical errors in the past, due to the excessive level of manual work involved in the current timesheets. The agency is in the process of developing a*

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2004

computerized timekeeping database that will eliminate the manual calculations and standardize time reporting for the whole agency. This should significantly reduce the errors.

- d. We agree with this finding regarding documentation. There are only two locations in the state that regularly use this form of compensation, and both are units that work directly with Oregon Department of Corrections inmates as field work crews. According to the state statute, inmates are not to be left unattended. Therefore, department employees must work through scheduled breaks when there is no one to relieve them, which is usually the case in field operations. The use of this compensation code is watched closely. This will be documented in the form of a Directive.*
- e. We agree with this finding. In the recent past, there has not been a standard timesheet utilized by the whole agency. The agency is aware that this is not a best practice, and is in the process of determining the various needs of the agency at all levels and units, and determining the most appropriate format. As mentioned previously, the agency is developing a timekeeping database that will be implemented this spring. This will become the agency standard.*
- f. We agree with this finding. All of the time sheets reviewed by the auditors are from calendar year 2003, before most of the current changes went into affect. In several instances, seasonal employees were not available for documenting changes. Relative to the overall seasonal payroll total of greater than \$4,700,000, we view this (less than .007 percent error) as an improvement over past years, and a guide for continued changes.*
- g. We agree with this finding. In the past there have been problems ensuring that all timesheets are signed before filed. This is due to the nature of the work the agency does, and the number of times supervisors are out in the field and not available. The department has undergone a review that includes designating an alternate signor, or a tracking system to guarantee that timesheets are not filed until all necessary signatures are recorded.*
- h. We disagree with this finding. In reviewing the documents provided for the overtime test, we found only \$32.00 of shift differential missing from employee's pay. The agency is implementing guidelines as part of the administrative manual to ensure that shift differential is paid appropriately in the future.*

We also note that the original draft management letter provided to the department by the auditors at the exit conference contained the figure \$345.25. However, even the stated amount above, a \$354 underpayment, we feel, is relatively minor in comparison with our audited payroll to Regular Employees for the fiscal year totaling over \$20,000,000 (less than .002 percent). We will make the adjustment to the affected employee(s) pay.
- i. We agree with this finding. Payroll personnel in program, district and unit offices are currently working on evaluating their current processes to ensure that there is more than one person involved in the process, as well as documenting the information for future reference.*
- j. We agree with this finding. There are a few department offices in outlying locations with small numbers of permanent staff where this has been a past practice. The agency has already identified this as a concern and taken steps to correct it. We will continue to work with these offices to identify and implement mitigating controls in these situations.*

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2004

- k. *We agree with this finding. In the past, the department had no established process that required this review as part of supervisory/managerial oversight. That has changed. Not only are the managers required to review, they are required to return the cover memo, signed, to the Salem payroll office. This has been corrected and is being tracked more closely.*

04-12

Oregon Department of Forestry

Internal Controls over Accounts Receivable

During the audit, we noted that the Oregon Department of Forestry (department) did not collect its accounts receivable in a timely manner nor did it charge interest on past-due accounts. The amount of interest that could have been collected for past-due accounts was approximately \$67,000 as of June 30, 2004. We also identified one invoice in the amount of \$5,810 that was approximately two years past due that agency staff were not seeking payment. Furthermore, many invoices reviewed required corrections and adjustments due to preparation errors, some of which were several months past due and have yet to be rebilled. Of \$6.8 million in receivables for firefighting costs owed by individuals and owner-operators, the department collected less than \$300,000 (less than five percent of the total due). The majority of these receivables have been outstanding between 2000 and 2004.

The *Oregon Accounting Manual* (OAM 35.20.20.PO.102) states that it is state policy to collect all receivables due to state agencies and to establish procedures to effect the timely collection of all amounts owed. The OAM (35.20.20.PR.102) states that the first step an agency must take to effectively collect its receivables is to have clear, written, top management supported internal procedures that will be used to bill and collect accounts receivable.

We recommend the department:

1. Develop and implement clear, written, top management supported internal procedures governing accounts receivable that include:
 - a. Management review of invoice preparation to better identify and correct errors timely.
 - b. Follow up procedures when revenue is not received timely or when adjustments are needed to invoices.
 - c. Ensure outstanding receivables are reviewed for uncollectibility and are written off, if applicable.
2. Provide training for personnel for the timely collection of past due amounts.

AGENCY'S RESPONSE:

In general, we disagree in part with this finding. General agency receivables are an area we identified as a weakness in our own internal reviews, and shared that information with the auditors in the entrance meeting. We are in the process of reviewing portions of this within the department's Fire Protection Review as well as a review of our overall controls and procedures over revenues. We will also be reviewing this in our department's business process review, which is beginning this winter. As part of our review of controls and

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2004

procedures over revenue we are developing Directives on internal controls and accounting for revenues, receivables and collections as discussed previously in this response.

We agree that we have not charged interest on past due invoices. At the present time we do not have the ability to accomplish this in a cost effective or efficient manner without an increase in staffing or without an automated process in place, either of which would involve the use of budget resources we do not have. This will be looked at as a piece of our business process review as well as our internal control Directives.

We also agree that the invoice for \$5,810 was not followed up on in a timely manner. As part of our review of our controls and procedures over revenues we will be building a more complete review and follow-up procedure into the process for receivables maintained and managed by our programs. This particular invoice has been taken care of and paid as of October, 2004.

We disagree with the tone of the statement that “many invoices reviewed required corrections and adjustments due to preparation errors, some of which were several months past due and have yet to be re-billed”. We agree that there may be errors in preparation, and corrections are made to the bills, but we believe to make a blanket statement when we are talking about any number of different types of invoices that we process, some of which are subject to other methods of review as stated in the paragraph below, is incorrect. If we have an invoice that is billed in error, our procedure is to correct the error and re-bill in a timely manner. There have been exceptions to this process as evidenced by the invoice for \$5,810, but the rule is that these have been corrected in a timely manner and re-billed accordingly.

We also disagree with other specifics of this finding. The \$6.8 million detailed in this finding relates to the collection of fire suppression costs from parties responsible for such costs under Oregon law. Fire cost recovery claims are unique in their application of collection processes, and are based, in part, on effective fire investigation and cause determination. The uniqueness of fire cost recovery claims under Oregon law includes: (1) these are unliquidated accounts that cannot be immediately collected through forcible means such as garnishments or referral to collection agencies; (2) the department has a collection process that includes investigating fires to determine if a statutory basis for liability exists, utilizing a 90-day billing process as required by Oregon Revised Statute (ORS) 477.068, and referral of liability cases over \$100 to the Oregon Department of Justice (DOJ) to be reviewed for recovery including potential and possible litigation; (3) some of these claims end up being uncollectible because there is not a sufficient statutory basis for recovery; and (4) many responsible parties lack sufficient assets to enable the department to collect its costs, either due to minor total assets or incarceration for crimes. A fair way to characterize these numbers would be to state that out of a total of \$6,790,956.54 in outstanding fire cost billings as of September 30, 2004, this represents approximately 100 open collection cases. One single fire, the East Antelope fire of 2002 was alone \$3,755,561.86 or 55 percent of the total, and that fire is in the civil collection process at the current time. The agency has over \$1.5 million worth of claims in the initial stages of cost collection, and \$4,251,776.90 has been turned over to the Oregon DOJ to pursue collection after agency demand letters have not been paid (including the East Antelope case). The department has written off approximately

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2004

\$630,000 in debts in the past year only after Oregon DOJ collection efforts were unsuccessful and \$294,796.94 has been collected in the past year by settling cases. This does not mean, however, that only \$294,796.94 has been collected on these open cases total. This figure only includes amounts collected between October 1, 2003 and September 30, 2004.

We also do not agree with the finding that we do not have established procedures to effect the timely collection of amounts owed. The agency has significant policy established in two Directives, Investigation Directive 1-1-3-101, and Fire Cost Recovery Directive 1-1-3-203. In addition, the agency has in place a very complete and comprehensive Investigation Procedures Manual and Cost Recovery Procedures Manual. We do have the processes in place to collect all that is owed to the state, outside of the interest from past due accounts. We also have the support of top management and the Oregon DOJ in our internal procedures used to bill and collect accounts receivable.

Our response to the individual recommendations follows:

- 1. We agree with the recommendations, and as stated above, these general receivables Directives and procedures are being developed.*
- 2. We agree with the recommendation. As described in our responses above, the department is currently in the process of updating its accounts receivable and revenue Directives and procedures. As part of the implementation of these Directives and procedures, we will be training personnel involved in these functions. We are also using our review of fiscal processes at the field units as a teaching opportunity to reinforce the procedures for preparing and processing invoices.*

04-13

Oregon Department of Forestry
Next Day Deposit Testing

Oregon Department of Forestry (department) management should improve controls over miscellaneous deposits to ensure compliance with the next day deposit exemption or state statute. During the fiscal year 2002 and 2003 audits, the department was out of compliance with the statute or exemption in 50 percent of sample items tested. During the fiscal year 2004 audit, the department was out of compliance with the statute or exemption in 40 percent of the sample items tested. We identified one field office that did not collect or deposit money for campground fees for a two-week period and also found that the Salem central office did not make timely deposits.

Oregon Revised Statute 293.265 states that funds are to be deposited within one business day of receipt, although provisions exist to authorize exceptions for legitimate business reasons. The department requested an exemption to the next day deposit requirement for multiple district and field offices, which allows them to deposit funds within the time frame or dollar amount documented in the request. Districts that have not requested an exemption are required to follow the next business day timeline.

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2004

We recommend that department management ensure all department offices are in compliance with the state statute and any exemption filed.

AGENCY'S RESPONSE:

We agree with the finding and recommendation. Compliance with this requirement is included as part of the reviews we are performing at the field units, and we will continue to educate and test as a part of these reviews into the future, and on an on-going basis.

04-14

Oregon Department of Forestry
Inappropriate Use of State Funds

The Oregon Department of Forestry (department) inappropriately used state funds when paying for moving expenses and for employee recognition or retirement parties.

According to state policy, Oregon Department of Administrative Services Human Resource Services Division (HRSD) 40.055.10 when the department relocates an employee to a new official workstation, the department will reimburse the employee for normal, reasonable moving and related expenses. In addition, the policy states that the new workstation must be at least 50 miles farther from the employee's former residence than the old workstation was from the same residence. For example, if the old workstation was three miles from the former residence, the new workstation must be at least 53 miles from the former residence in order for the employee to be reimbursed for moving and related expenses. The department's policy mirrors the state policy except for reimbursement rates.

According to the department's bargaining agreement, the department will reimburse for expenses related to packing, crating, and unpacking not to exceed \$1,000 per move and will reimburse miscellaneous relocation expenses up to \$5,000 whereas state policy only allows for reimbursement of \$750 and \$1,110, respectively.

During fiscal year 2004, the department paid \$79,405 in moving expenses to 25 employees. Of those 25 employees, seven received more than \$5,000, two of which received more than \$10,000.

For example, we reviewed moving expenses for the following employees and question why the reimbursements described below were normal and reasonable:

- One employee was paid moving expenses totaling \$6,872 to move three times during a three-year period. In the first move, the employee was paid \$1,130. Reimbursement included a washer, dryer and curtains and moved the individual approximately 23 miles closer to the new workstation. Five months later, although the employee did not qualify for moving expenses, the department paid this employee \$742 in order to move an additional 21 miles closer to the same workstation. This amount included a new stove. Approximately 32 months later, the employee received moving expenses in the amount of \$5,000 for realtor fees in order to move back near the original workstation. In each instance, the move did not meet the 50-mile distance requirement.

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2004

- A second employee was paid \$7,232 to move to a new workstation. Included in this amount was \$3,166 for closing costs.

We also identified numerous instances in which state funds were used to purchase items such as cakes, refreshments, decorations, and gift certificates for retirement parties. During the audit we noted at least two instances in which employee recognition or retirement parties were held during work hours and scheduled to last two or more hours. During fiscal year 2004, the department spent at least \$5,428 that it recognized as employee recognition that included retirement gift certificates, decorations, and refreshments.

According to the *Oregon Accounting Manual* (10.40.10.PO.109), state funds must not be used to provide refreshments for voluntary social events such as agency sponsored retirement celebrations. The policy further restricts state funds from being used to provide retirement invitations, cards, gifts, and party favors. However, department policy states, for retirements the department will pay up to \$200 for food and supplies for the function such as non-alcoholic beverages, cookies, cakes, hors d'oeuvres, invitations, decorations, plates, cups, and utensils. For a resignation the department will pay up to \$100.

We recommend the department ensure state funds are spent for appropriate uses by:

1. Aligning the department relocation policy with the dollar amounts allowed in state policy.
2. Documenting how employees' moving expenses paid by the department are normal and reasonable.
3. Considering voluntary employee contributions for retirement parties, decorations, and gifts.

AGENCY'S RESPONSE:

In general, we disagree in part with this finding for both the use of state funds for relocation and the use of state funds for employee recognition. In general, the recommendation is to align the department's policy with the state policy and to better document how such expenses are necessary to further the business purpose of the state. We agree with the spirit of the recommendations, but do not agree with the specific statements.

Relocation

The agency is decentralized with many offices located throughout the state. The department places a high premium on employees who, through their tenure, have gained a broad spectrum of experiences. Often, the best way to gain that experience in the field of forestry is through relocation to offices in different geographic areas. The department believes employees with broader experience will best be suited to further the agency's business, and also help alleviate oncoming succession management pressures due to generational changeover.

The department developed its current Employee Relocation Policy in 1999, and is codified in both policy as Employee Relocation Policy Directive 0-3-3-500 and in Human Resource Program procedure documents. In 1998 and 1999 the current Oregon Department of Administrative Services (DAS) HRSD policy 40.055.10 was reviewed and finalized. The

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2004

department participated in the review process and submitted several concepts for consideration based on our own review of employee moves and expenses, an employee survey, and a review of various employer moving policies. The changes made to the DAS 1999 policy did not address the issues our department was facing in regards to moving expenses being a barrier to relocation, which in turn resulted in a barrier to implementing our succession management efforts. Per HRSD policy 40.055.10 1(a) each agency could develop a relocation plan that was specific to their agency. The department did just that and developed a moving Directive for management and executive service employees along the lines of the recommendations that had been submitted to DAS during their policy review. DAS also assisted the department with the development of the tax gross-up procedure contained in our Directive. The department's policy was subsequently bargained with the unions, which resulted in our current Directive 0-3-3-500 dated 10/01. The DAS State Controller's Division policy on moving expenses found in the Oregon Accounting Manual (OAM) 50.20.00 and accompanying procedures only addresses the tax treatment of moving expense reimbursements to employees, and offers no further direction or guidance on relocation expenses.

Historically, the OAM had a list of permissible relocation expenditure items which were considered reimbursable as miscellaneous expenses. This list included real estate transaction costs such as home closing costs. When these items were no longer included as part of DAS's Manual, they were incorporated into department procedures as a guide for allowable reimbursable miscellaneous expenses. Also, as the state negotiated with the unions, these lists were used as a basis of understanding and in one contract that the department administers for engineering employees (AEE), the list is incorporated in a Letter of Agreement.

Employee Recognition

The OAM policy regarding Non-travel Meals and Refreshments, 10.40.10, allows the use of state funds for refreshments and "related items" for certain events or functions. Section .113(f) allows the use of state funds to provide refreshments for agency-sponsored employee recognition or volunteer recognition programs. However, importantly, the OAM policy does not provide an upper limit on the use these funds per function.

The department has a long history of recognizing employees' contributions and service to the citizens of the state, and we believe that this recognition is both appropriate and an important component of the department's human resource management efforts. Our service awards and recognition policies and programs are codified in two department directives, Service Awards Program directive 0-3-4-710, and Recognition of Retiring and Resigning Employees, Directive 0-3-2-420. These Directives were created, in part, due to the lack of policy at the state level regarding service recognition, and in the case of the OAM 10.40.10, to set an upper limit of expenditure per function in the absence of such in state policy.

When an employee retires or resigns from the department, the employee is recognized for their years of service and contributions to the agency and the citizens of the state. This recognition function is held consistent with the department's Directives, and includes the presentation of a service award and plaque. If an employee wishes to have a retirement

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2004

party, it is held away from the office during non-working hours, with all costs supported by personal registration/meal fees and/or donations (consistent with the OAM policy). In neither case, are gifts purchased with state funds.

Our response to the individual recommendations follows:

- 1. We disagree in part with this recommendation. The department will review the current Employee Relocation Policy and its supporting systems to ensure they are aligned with the department's Directive, collective bargaining agreements, state policy and the OAM. As noted in the management letter, the department's Relocation Policy Directive is incorporated in the two collective bargaining agreements (SEIU and AEE). In the AEE agreement, payment of closing costs is specifically identified. Any modifications to the collective bargaining agreements would require negotiations with the respective unions. Following the audit exit conference, department management met with representatives from DAS to review the current Employee Relocation Policy Directive. They affirm that the agency's policy is in compliance with existing State policy and the OAM. However, if agency management reconsiders the terms of the relocation policy based on business needs, the department will work with the unions regarding possible modifications to the Relocation Letters of Agreement.*
- 2. We agree with this recommendation. The department acknowledges processing errors were made in the first cited example. We will review and reevaluate the current authorization system and procedures and where appropriate, make necessary changes to build better consistency in the application of the Relocation Policy. In addition, employees will be required to provide estimates of costs and provide receipts in all cases to better document expenses. Where expenses appear to exceed the established limits, the manager and employee will be required to more completely document the requests for exceptions to be authorized by the agency Appointing Authority.*
- 3. We disagree in part with this recommendation. As stated above and to the auditors, the department does not use state funds for retirement parties, decorations, or gifts. However, we will review our current recognition policies and ensure that they are consistent with state policy, and in the meantime, have suspended the provision for the use of state funds for refreshments. In addition, during the audit process, the department committed to meeting with representatives from DAS to review state policy and our Directives. Following the Audit exit conference, department management met with representatives from DAS to review the current Non-Travel Meals and Refreshment Policy. Based upon this meeting, and subsequent written guidance to be delivered to the department by the State Controller's Division, the department will review its policies and if there is conflict with the OAM, the department will make necessary adjustments.*

04-15
Oregon Department of Transportation
Improve Infrastructure Valuation

The Oregon Department of Transportation (department) needs to document its methodology for valuing highways and bridges, reevaluate which project codes should be capitalized,

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2004

ensure projects are actually complete, ensure historical cost associated with capitalized projects is appropriately removed, and reevaluate its methodology based on estimated prospective valuation to ensure book value is appropriately reported.

Bridges and Highway Methodology

The department has not documented a detailed methodology of the process it used to derive the costs to be removed from the value of highways and bridges. The process to calculate infrastructure costs is complex and difficult to remember and re-create. This situation was evident during our audit when we asked department personnel for a particular piece of data and they determined the original number was incorrect.

We recommend the department document a detailed methodology for both bridges and highways and maintain original data and spreadsheets used to derive costs of highways and bridges. The detailed methodology should identify the data fields, the specific computer systems they were obtained from, how they were calculated, and any limitations applied.

Capitalization of Highway Costs

The department is not accounting for the highway system in accordance with governmental accounting standards. Under the department's current methodology, the department only removes the cost of the replaced roadway surface and its associated accumulated depreciation for projects classified under the code for "Reconstruction on Existing Route". However, the department capitalizes the costs of all projects whether they are classified as for reconstruction, resurfacing, etc. According to the Governmental Accounting Standards Board (GASB), if a project is considered maintenance—a recurring cost that does not extend the road's original useful life or expand its capacity—the cost of the project should be expensed. If the project increases the serviceability (e.g. increases load capacity) or extends the original useful life of the road, the project should be capitalized. If a project is capitalized, the cost of the replaced roadway surface and its associated accumulated depreciation should be removed.

We recommend the department financial Services and Highway Finance Office work together to reevaluate and document which project codes should be capitalized and which should be expensed. In addition, the department should account for the highway system in accordance with GASB.

The department determines when a project should be capitalized based on whether the project status is "complete." During our review of data, we found that a project is usually broken into the preliminary engineering phase or construction phase as each new phase begins. Given the two phases, it is possible for the engineering phase to be completed and be capitalized even though construction has not begun. According to GASB, projects should be capitalized after the construction phase. Thus, the department may be capitalizing projects too soon and may not be capitalizing the entire cost of the project. Once a project has been determined to be "complete" and is a "reconstruction" project as described above, the department will remove the historical cost and associated accumulated depreciation of the mileage associated with the project. During this fiscal year, we found that the department removed historical costs from some projects that were also removed in the prior fiscal year. As a result, the project was removed twice. We also found instances where, based on the data, the reconstruction project

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2004

was complete but the historical cost related to the reconstructed mileage had not been removed.

We recommend the department review the projects identified as “complete” to ensure construction has actually been completed before the project is capitalized and ensure the associated historical cost for capitalized reconstruction projects is appropriately removed.

Book Value of Highway System

When the department began reporting the highway system in fiscal year 2002, they estimated the system only had a remaining useful life of approximately 10 years. The department monitors the condition of its pavement by conducting the pavement condition surveys on a biennial basis. The information obtained from the condition surveys provides department with a measure of the current health of the state highway system. Based on the Pavement Condition Report, in 2001 81 percent of all highways were in fair-or-better condition and in 2003 84 percent of all highways were in fair-or-better condition. In fiscal year 2004, the reported cost of the highway system was \$10.8 billion and accumulated depreciation was \$5.9 billion. Thus, the accounting records report that the department’s highway system is 55 percent depreciated. Based on the department’s current methodology and data to date, it is estimated that by 2011 the highway system will be almost fully depreciated and have a book value of approximately \$2 billion. According to GASB, if assets are significant and still in use, the asset should not be reported as fully depreciated and periodic reassessment of the estimated useful life may be appropriate.

We recommend that the department develop a workgroup to reevaluate the accumulated depreciation value now that actual data is being gathered to ensure the accumulated depreciation amount recorded in the accounting records is reasonable and develop a methodology for reassessing the useful life in future years.

AGENCY’S RESPONSE:

Bridges and Highway Methodology

The department concurs with Audits Division’s recommendation. The department plans to improve the existing documentation and the methodology to include the elements identified in the audit recommendation. Initial changes to documentation are expected to be completed by July 1, 2005, however, additional changes will need to occur after a work group reviews the capitalization of highway costs process.

Capitalization of Highway Costs

The department concurs with Audits Division’s recommendation. The department intends to establish a work group to review the entire process of how highway and bridge capital expenditures are recorded in the Transportation Environment Accounting Management System. Included in that review will be an analysis of what data elements should be used to consistently capture the financial information necessary to accurately account for the highway system.

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2004

The work group will be comprised of staff from Financial Services, Highway Division management, Highway Finance Office, and Department of Administrative Services to ensure a comprehensive analysis is performed and that the resulting data element structure is established to continue to provide the department with accurate financial information and provide all capital expenditure information for financial reporting required by GASB Statement 34 and the State Controller's Division.

The work group will develop a project plan and timeline for completion and implementation. The plan and timeline may not be completed prior to Audits Division's return for the fiscal year 2005 audit, as the Legislative session may demand the attention of key individuals that need to participate in the work group.

Book Value of Highway System

The department does not concur with this audit finding. We believe the methodology the department used to determine useful life and historical cost fulfills the intent of GASB 34. The useful life of 20 years was arrived at through discussions with Highway Division staff, other state governments, and Department of Administrative Services staff. The pavement condition would only have been used had the department chosen to use the modified approach instead of depreciation. The department and the State Controller's Division evaluated using the modified approach versus depreciation and concluded that several substantive factors would stand in the way of a successful implementation. Furthermore, the department's Highway Division has very detailed records that include a mile-by-mile description of the highway (e.g., location, terrain, condition, year, etc.). By using this information, we were able to arrive at a more precise infrastructure value than the minimum requirements imposed by GASB.

Since you have raised a concern regarding the methodology, however, we will ask the work group set up to examine the capitalization of highway costs to also review our approach to calculating the system's book value.

Section III – Federal Awards Findings and Questioned Costs

DEPARTMENT OF HEALTH AND HUMAN SERVICES

04-16

Oregon Department of Human Services

**Centers for Disease Control and Prevention-Investigations and Technical Assistance,
CFDA 93.283**

Inadequate Supporting Documentation for Payroll Costs (Material Weakness)

Questioned Costs Total \$8,041,269

Inadequate supporting documentation was provided for direct payroll costs charged to the federal program. In particular, reports generated did not include employee activity distributions by federal award program nor did documentation indicate approval of payroll costs charged to the specific federal award program by a responsible official. In addition, required certifications were not completed during the year ended June 30, 2004. The current information systems do not generate personnel activity reports, and the Oregon Department of Human Services (department) does not currently ensure that certifications are generated and signed by employees.

Based on the documentation provided, the department could not provide reasonable assurance that direct payroll and related costs were charged to the appropriate federal program. The cost allocation plan is driven by direct payroll costs and, therefore, cannot be reasonably relied upon. Questioned costs are \$8,041,269. Of this amount, \$7,353,939 represents the amount of total payroll and related expenditures claimed and \$687,330 represents allocated non-payroll expenditures.

In addition, five of 60 timesheets did not contain supervisor signatures and an additional two of 60 timesheets were not provided to the auditors. (Note that timesheets referenced here are different than those required for personnel activity reporting in that the timesheets do not report time by federal award program or cost objective).

Office of Management and Budget (OMB) Circular A-87 states when employees work on multiple activities or cost objectives, a distribution of their salaries or wages must be supported by personnel activity reports or equivalent documentation. Specific requirements for personnel activity reporting include, but are not limited to, the following: Reports must reflect an after-the-fact distribution of the actual activity [by federal award program or cost objective] of each employee. Reports must be signed by the employee. In addition, a general requirement under this part is that all salaries and wages must be approved by a responsible official.

OMB Circular A-87 states where employees are expected to work solely on a single federal award or cost objective, charges for their salaries and wages must be supported by periodic certifications that the employees worked solely on that program for the period covered by the certification. These certifications must be prepared at least semi-annually and must be signed

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2004

by the employee or supervisory official having first-hand knowledge of the work performed by the employee.

OMB Circular A-87 also states a cost is allocable to a particular cost objective if the goods or services involved are chargeable or assignable to such cost objective in accordance with the relative benefits received.

We recommend the department either modify its current information systems so that employee time activity reports may be generated or implement a new system to ensure that employee time activity reports are otherwise available for management's review and approval. The department should ensure that certifications are generated and signed by employees.

AGENCY'S RESPONSE:

The department partially agrees with this finding. Prior to consolidating all accounting records of the department into one agency from seven, a BRIO report was easily run against the payroll files to create employee time/activity reports for certification of work on public health grants.

After conversion to one agency it was difficult to recreate these certifications due to the complexities and size of the files involved. Even though the certification reports were not available, program managers continued to get reports that listed employees who charged hours to the grants. The program managers contacted accounting if the hours did not look right and adjustments were made.

The department's process for verifying and approving time worked by employees is as follows:

- Employees enter their time on the statewide on-line system.*
- Managers review the time and "lock" the time on-line.*
- A paper timesheet is printed after the time is locked and the payroll month has closed. The paper timesheet contains the information entered by employees and locked by the managers.*
- The paper timesheet is signed by the employee and manager and retained by the manager.*

The department's main control is electronic viewing and approving of time. The department offered to show the auditors the time-locking reports to show that even though they may not have been signed, there was a compensating control when they were locked on-line. The statewide payroll data warehouse can also be queried to print out the same information that would have been on a paper timesheet. Starting with the October 2004 payroll, monthly time/activity certifications were run for each employee. These will be distributed each month to be certified by signatures of employee and manager.

04-17

Oregon Department of Human Services
Centers for Disease Control and Prevention-Investigations and Technical Assistance,
CFDA 93.283, Subrecipient Monitoring
(Material Weakness)

The Oregon Department of Human Services (department) schedules on-site fiscal and program monitoring visits on a three-year rotation. Program monitoring of subrecipients was completed and documented on schedule for the year ended June 30, 2004. However, only two of the 11 scheduled on-site fiscal subrecipient monitoring visits were completed and documented for the same period.

Under the subrecipient monitoring requirements in OMB Circular A-133 Compliance Supplement, pass-through entities are required to monitor subrecipient activities to provide reasonable assurance that the subrecipient administers federal awards in compliance with federal requirements.

The department could not provide reasonable assurance that the subrecipients administer federal awards in compliance with federal requirements for each audit period based on the scheduled monitoring rotation. In addition, due to the lack of completion of the scheduled fiscal monitoring visits for the current audit period, the department violated its own procedures with respect to fiscal monitoring of subrecipients. The department passed through \$7,893,133 to subrecipients for the year ended June 30, 2004. Insufficient resources appear to be allocated to monitoring of subrecipients.

We recommend the department allocate more resources to fulfill its responsibility to monitor subrecipients. The department should consider taking a risk-based approach in scheduling monitoring of subrecipients. In particular, the department should consider monitoring some subrecipients annually.

AGENCY'S RESPONSE:

The department partially agrees with this finding. The functions of the staff person assigned to do the on-site fiscal monitoring have changed over the past three years. The department has experienced budget and staff cuts. To continue on-site reviews would require additional staff. A review tool is being developed that can be sent to the subrecipient for completion and returned for office review, minimizing the need to go on-site.

While on-site reviews are not a requirement, they can provide valuable information of a program's operation. Our monitoring reviews are done two ways, a program review and a fiscal review. All program reviews were completed on schedule. To address the lack of resources for the fiscal reviews, the department plans to move to a risk-based process. On-site reviews will be scheduled based on a risk analysis and not per a set schedule. This, combined with desk reviews, will allow the best monitoring coverage with limited resources.

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2004

The department will develop a new risk-based review process. This process will include:

- *Working with program staff to establish a set of criteria to evaluate risk in the subrecipients,*
- *Developing a desk review tool to be used for monitoring the fiscal operations, and*
- *Setting up on-site reviews for subrecipients considered high risk.*

04-18

Oregon Department of Human Services

Centers for Disease Control and Prevention-Investigations and Technical Assistance,
CFDA 93.283, Cash Management

Subrecipients under this federal program are disbursed equal installments of the contract budget each month or quarter. Subrecipients are to submit quarterly expenditure reports. However, the Oregon Department of Human Services (department) does not require documentation of anticipated and actual expenditures (with appropriate supporting documentation) from subrecipients before funds are disbursed.

Subsequent disbursements may be modified based on the reported expenditures. While additional funding may be withheld when quarterly expenditure reports are not filed, the initial two monthly disbursements have been made by the time the first quarterly expenditure report is due. We identified one instance in which funds were disbursed in August 2003 and the first expenditure report was not submitted by the subrecipient until February 2004. (Note: Scheduled disbursements between September 2003 and January 2004 were withheld based upon the subrecipient's failure to file the quarterly expenditure report, in the case noted above.)

Office of Management and Budget Circular A-102, Cooperative Agreements with State and Local Governments states pass-through entities must implement procedures to assure that subrecipients minimize the time elapsing between the transfer of federal funds and the pay out of funds for program purposes.

The practice of disbursing substantially equal monthly payments to subrecipients does not ensure that time is minimized between the receipt of federal funds and the payout of funds for program purposes. The department passed through a total of \$7,893,133 to subrecipients for year ended June 30, 2004.

We recommend that the state implement a policy to require subrecipients to submit documentation of anticipated and actual expenditures (with appropriate supporting documentation) prior to disbursing funds to subrecipients.

AGENCY'S RESPONSE:

The department disagrees with this finding. The reported condition and cause is not accurate. The current process minimizes elapsed time between transfer of federal funds and related expenditures. The department receives documentation of anticipated and actual expenditures from subrecipients. Subrecipients submit budget documents, program goals,

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2004

and performance measures, during the contract/agreement negotiations that are conducted yearly. This information is reviewed and updated periodically throughout the year.

Payments are made at the end of the month after the major share of the month's expenditures has occurred. The department reviews quarterly expense information from the subrecipient and makes adjustments to the monthly payments. The documentation provided to the auditors clearly shows variances in the monthly payment amounts and does not match "equal installments of the contract budget". This process ensures compliance with federal guidelines.

Section 31 CFR 205.11a states, "A State and a Federal Program Agency must minimize the time elapsing between the transfer of funds from the United States Treasury and the State's payout of funds for Federal assistance program purposes" (i.e. payments to subrecipients). Funds to subrecipients are transferred at the end of the month in which the expenditures are incurred which meets the above requirement.

In addition, section 31 CFR 205.23 requires the State ensure that the estimate reasonably represents the flow of Federal funds under the Federal assistance program or program component to which the estimate applies. At the completion of each quarter, actual expenditure reports are reconciled with distributed estimates and the following disbursements are adjusted by any under or over spent funds. Corrective action is not needed as the current process meets federal requirements.

04-19

Oregon Department of Human Services

Centers for Disease Control and Prevention-Investigations and Technical Assistance, CFDA 93.283, Reports Not Filed Timely

Five of five financial status reports (FSRs) selected for testing were not filed timely. The Oregon Department of Human Services (department) failed to liquidate obligations within 90 days after the end of the budget period, which barred the department from timely filing of its financial status reports.

The cooperative agreements for the program require the submission of financial status reports within 90 days after the end of the budget period and that those reports be based upon the underlying accounting records of the agency.

We recommend the department liquidate its obligations within an amount of time that will allow the department to timely file financial status reports.

AGENCY'S RESPONSE:

The department agrees. Interim reports are due 90 days after the grant period is over. Final reports are due 90 days after the grant period is over unless there are unliquidated obligations and an interim report is due. The final report is due at the end of the month after the obligations are cleared.

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2004

Report delays were due to program staff changes (one grant) and remaining outstanding obligations (four grants). Based on language in the Public Health Service Grants Policy Statement Manual (page 8-21), the program is allowed to obligate expenditures 12-15 months beyond the end of the grant budget period. When the obligations are not cleared within the 90-day reporting period, an interim report is filed. For the four grants where this occurred, interim reports were filed. Final reports have been or will be filed after the obligations are fully liquidated.

Corrective Action: Improve the procedures to insure that the following occurs:

- Provide programs with information to review grant obligations, allowing enough lead-time to determine if they will be outstanding after the end of the grant FSR due date.*
- Coordinate with program(s) to prevent delay.*
- If a delay is anticipated, the granting entity will be advised that an interim report will be filed.*
- File interim FSR.*
- Once obligations have been satisfied, file a final SFR.*

04-20

Oregon Department of Human Services

Temporary Assistance for Needy Families (TANF), CFDA 93.558 and

Medicaid Cluster

Cash Management

Expenditures for Medicaid and TANF must be paid for by the state before reimbursement is requested from the Federal government. The state of Oregon has entered into a formal agreement with the U.S. Treasury outlining requirements for drawing down Federal funds. Federal regulations indicate that records must be retained to allow for calculations, outlined in the Treasury-State agreements, to be reviewed and replicated for compliance purposes. States must ensure that these records are readily available, fully documented, and verifiable.

The Oregon Department of Human Services (department) relies on its financial accounting system to track expenditures and federal reimbursements. On a daily basis, department employees use on-line cumulative expenditure totals to determine the amounts to be drawn. However, because staff performing this procedure did not retain documentation that later could be verified, compliance with the Treasury-State Cash Management Agreement could not be ascertained as required. See prior year finding 03-21.

We recommend department management develop and implement procedures or methods for documenting its daily draw process to ensure that supporting records are readily available, fully documented, and verifiable for compliance purposes.

AGENCY'S RESPONSE:

The department disagrees with this finding. The department uses on-line cumulative expenditure totals to determine the amounts drawn daily. We use the Statewide Financial

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2004

Management Application (SFMA) 66 screen and transfer the dollar amounts to a spreadsheet for documentation. This screen cannot be used to recreate the expenditures at the exact time of a daily draw. Amounts shown on the screen can change from moment to moment. We do not believe it is necessary to print copies of all the 66 screens for a year of daily draws for several grants. This is time consuming and wasteful.

Financial Services is developing and testing a process to provide verifiable documentation of the sum of the daily draws for each calendar month of a fiscal year. We plan to make monthly screen prints of the SFMA 66 screen at the end of each calendar month. The difference between one month and the subsequent month equals the expenditures for the calendar month. The totals can be traced to our draw spreadsheet. We can provide detail expenditures for the draws made using a Brio query for a period of time. We anticipate providing this information for the audit period ended June 30, 2005.

04-21

Oregon Department of Human Services

Medicaid Cluster

Calculation of Interest Obligation for Cash Management

The Code of Federal Regulations requires that records be retained to allow for calculations outlined in the Treasury-State agreements to be reviewed and replicated for compliance purposes. States must maintain these records to be readily available, fully documented, and verifiable.

Oregon Department of Human Services (department) staff calculated the interest obligation for Medicaid using a running overdraw balance maintained by department staff on a spreadsheet. However, department staff could not provide sufficient documentation to support the overdraw balances on the spreadsheet. Therefore, we could not ascertain whether the interest amounts the department calculated were in compliance with the Treasury-State agreement.

We recommend department management develop and implement policies and procedures to ensure compliance with documentation requirements for cash management of federal programs. The department's records should be readily available and verifiable for compliance purposes.

AGENCY'S RESPONSE:

The department agrees with this finding. The department did not have the documentation readily available and verifiable for the auditors. Section 8.6.3 of the Treasury-State agreement states that "the State shall measure the time between the date Federal funds are received and credited to a State's account and the date those funds are debited from the State's account". There is not a separate department account that we can provide to show the cash on hand balances. The department uses an analytical approach with an Excel worksheet containing draw balances from the monthly draw worksheets and information from the Payment Management System showing cash on hand balances at the end of each quarter. We recognize the need for process improvement.

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2004

We plan to develop a process where we more frequently calculate the cash on hand balances and document the explanations for the balances, rather than wait until the year end to do this calculation. At month end, we will tie the cash on hand figures back to the monthly draw worksheets. We believe this will provide verifiable information to support the calculation. We plan to start with the month of April 2005 for this process.

04-22

Oregon Department of Human Services

Medicaid Cluster

Medicaid Reporting

Office of Management and Budget A-133 Compliance Supplement requires that amounts reported on the Centers for Medicare and Medicaid Services (CMS)-64 and its attachments must be actual expenditures for which all supporting documentation, in readily reviewable form, has been compiled and is available immediately at the time the claim is filed.

The Oregon Department of Human Services (department) did not report actual total expenditures on its CMS-64 for fiscal year 2004. During our audit, we reviewed the report for the quarter ended December 31, 2003. Total Medicaid expenditures for that quarter were understated by approximately \$13 million.

In addition, the department generally did not submit CMS-64 reports to the required Federal agency in a timely manner. For example, the CMS-64 for the quarter ended December 31, 2003 was submitted about 45 days after the required deadline. See prior year finding 03-17.

We recommend that department management implement procedures to appropriately report Medicaid expenditures and to ensure that CMS-64 quarterly reports are submitted to the Federal agency within 30 days of the end of each quarter as required by federal regulations.

AGENCY'S RESPONSE:

The department agrees with this finding. We agree that the CMS-64 report was submitted to the Federal agency later than required. This is a very complex report, requiring over 50 pages of detailed expenditure information. Statewide Financial Management Application month end close occurs two weeks after the calendar month date. We strive to complete the report 30 days from month end close for the complete quarterly information. Each quarter the Region X Federal Accountant comes to the department, usually two weeks after the due date. When his review of the CMS-64 is complete, we can then certify the report electronically.

We are working closely with other areas in department accounting and Finance and Policy Analysis to refine the report preparation process. We are identifying needed coding changes so we will be prepared for the start of the new biennium. Once the coding changes are implemented, we anticipate a more timely submission of the CMS-64 report. Once the coding is corrected, the CMS-64 should be able to be prepared within the timelines.

04-23

Oregon Department of Human Services

Medicaid Cluster

Lack of Supporting Documentation for Eligibility, Questioned Costs \$108

Code of Federal Regulations 435.913 indicates that facts supporting the agency's decision to award Medicaid benefits must be included in the client's case file.

During eligibility testing, Oregon Department of Human Services' (department) staff could not locate current Medicaid eligibility applications for two of 31 sample items. Because the department could not provide documentary evidence that the clients were eligible for the benefits provided, we questioned the costs associated with those exceptions. The actual questioned cost totaled \$108.

We recommend department management provide assurance that supporting documentation for eligibility redeterminations is retained to allow for independent verification according to federal requirements.

AGENCY'S RESPONSE:

The department agrees with this finding. The examples identified were isolated to a specific program area and branch. The department has taken several steps to address this including:

- Seniors and People with Disabilities (SPD) is developing a program review tool for financial and service eligibility, which includes the need for complete documentation initially and annually upon recertification. This tool is available for use by field offices and will be used by a central office review team in conducting future reviews in each of the SPD/AAA (Area Agencies on Aging) offices. The field review team will complete a formal statewide review by July 2007.*
- SPD is taking action to eliminate the computer coding which allows a case to be "suspended" from reassessment. A system edit will ensure that notices are generated for all cases for annual recertification. By March 2005, a policy transmittal will be sent to field offices to discontinue the use of the code which suspends the reassessment.*
- Department internal audits is performing a review of the field office in which the sample cases were noted. This should be completed by May 2005.*
- SPD will begin utilizing the Medicaid Quality Control review tool and protocol to sample long term care Medicaid cases. Beginning July 2005 this will be an ongoing process.*

04-24

Oregon Department of Human Services

Temporary Assistance for Needy Families (TANF), CFDA #93.558

State Maintenance of Effort (MOE) Requirements

Inaccurate Financial Reporting for Federal Fiscal Year 2003

The Office of Management and Budget A-133 Compliance Supplement states that every fiscal year a state must maintain an amount of "qualified State expenditures" for eligible families. "This is termed 'basic MOE' (Maintenance of Effort) and the requirement is based on the Federal fiscal year." "In addition, expenditures by the State from amounts that originated

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2004

from Federal funds may not count toward meeting a MOE requirement even if the expenditures 'qualify'." Federal requirement 45 CFR 265.7 also indicates that agencies must submit a complete and accurate financial report.

Because the Oregon Department of Human Services (department) routinely anticipates that TANF expenditures will significantly exceed the required MOE for any given year, it applies a predetermined funding split to all TANF expenditures made during the year, then makes adjustments to that funding at year end to ensure state expenditures meet, but do not exceed the MOE. For federal fiscal year ended September 30, 2003, the department reported that it met the required MOE of \$91,636,299. However, \$8,283,247 of that amount represented funding adjustments the department intended to make, but did not make until April 2004. Thus, when the September 30, 2003 federal report was filed, the reported MOE did not agree to the agency's financial records. In addition, \$2,752,762 of the reported MOE for federal fiscal year 2003 was expended during federal fiscal year 2002 and later transferred to the 2003 fiscal year. Therefore, the department was short of meeting the required MOE by approximately \$11 million for federal fiscal year ended September 30, 2003.

We recommend department management ensure compliance with state MOE requirements and ensure federal financial reports are fully supported by its financial system. We also recommend the department ensure that the approximate \$2.7 million shortfall, not adjusted in April 2004, is resolved using state originated funds.

AGENCY'S RESPONSE:

The department disagrees with this finding. The department is confident each year that expenditures will meet the MOE requirements. The Federal report is filed for federal fiscal year (FFY) end, reporting those requirements. As with many accounting processes, there is a timing difference between when entries are made. Typically, adjustments are completed by the December following the FFY end.

For the FFY ended September 30, 2003, adjustments were not completed until April 2004. There were many factors that attributed to this. The department relies on several other state agencies to provide us MOE information. In addition, on July 1, 2003, the department converted our method of accounting from seven separate sets of books (agencies) into one. It was an incredible workload to convert the information for the report for FFY ended September 30, 2003. The processes that had been used prior to that year to prepare the MOE could not be used because of the accounting changes.

The department disagrees that \$2.7 million of reported MOE for FFY 2003 was expended during FFY 2002. This amount was contributed by the State Scholarship commission as TANF MOE and was reported to the department in October 2003. As MOE for FFY 2002 was already met, other MOE expenditures previously reported in FFY 2002 were reclassified and moved to FFY 2003. This is allowable because more than one year of expenditures can be open at one time and the TANF program allows carryover of funds. The \$2.7 million was not reported as MOE for FFY 2003. We have identified some ways to improve the TANF MOE process, as discussed in the TANF MOE finding for FFY 2004 below.

04-25

Oregon Department of Human Services

Temporary Assistance for Needy Families (TANF), CFDA 93.558,

State Maintenance of Effort (MOE) Requirements

Inaccurate Financial Reporting For Federal Fiscal Year 2004

The Office of Management and Budget A-133 Compliance Supplement states that every fiscal year a state must maintain an amount of “qualified State expenditures” for eligible families. “This is termed ‘basic MOE’ (Maintenance of Effort) and the requirement is based on the Federal fiscal year.” “In addition, expenditures by the State from amounts that originated from Federal funds may not count toward meeting a MOE requirement even if the expenditures ‘qualify’.” Also, federal requirement 45 CFR 265.7 states that agencies must submit a complete and accurate financial report.

Because the Oregon Department of Human Services (department) routinely anticipates that TANF expenditures will significantly exceed the required MOE for any given year, it applies a predetermined funding split to all TANF expenditures made during the year, then makes adjustments to that funding at year end to ensure state expenditures meet, but do not exceed the MOE. For federal fiscal year ended September 30, 2004, the department reported that it met the required MOE of \$91,636,299. However, that amount included funding adjustments the department intended to make, but had not made as of January 2005. Thus, when the department filed its September 30, 2004 federal report, the department’s financial records indicated that actual allowable MOE was approximately \$15.6 million less than what was reported on the federal report.

We recommend department management ensure compliance with state MOE requirements and ensure federal financial reports are fully supported by its financial system. We also recommend that the department ensure that the MOE shortfall of approximately \$15.6 million is resolved using state originated funds.

AGENCY’S RESPONSE:

The department disagrees in part with this finding. We do not believe that there was inaccurate financial reporting for federal fiscal year (FFY) 2004. The department reconciles the Federal ACF-196 report and Statewide Financial Management Application each year. The department believes that the federal report was correct as submitted. For the TANF program, each expenditure does not have to be matched, but MOE needs to be met for each FFY. This gives the states flexibility in how they fund expenditures.

Approximately \$10.8 million of the difference was reported in the accounting records as the State Only General Fund grant, not the TANF MOE grant, although the expenditures qualified as MOE. The remaining expenditures were reported under the TANF grant as federal expenditures, based on the estimated funding split. The expenditures are allowable as MOE, but had not been classified in the accounting system at the time the report was prepared. As described in the finding above, there are timing issues between the accounting system and the federal report.

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2004

The amounts discussed in the finding have been recorded via an adjustment in January 2005. Financial Services is in the process of working with Finance and Policy Analysis (FPA) to improve the MOE recording process including:

- *Establishing a direct working relationship between Accounting staff and other state agencies rather than having FPA as an intermediate step, and*
- *Developing a process where expenditures that qualify as MOE are charged, as expenditures are made, rather than adjusting after the fact.*

04-26

Oregon Department of Human Services

Temporary Assistance for Needy Families (TANF), CFDA 93.558

Questioned Costs \$4,125

The Code of Federal Regulations requires that financial management systems “permit the tracing of funds to a level of expenditures adequate to establish that such funds have not been used in violation of the restrictions and prohibitions of applicable statutes.” This documentation should be complete, accurate, and readily available for examination.

During testing, Oregon Department of Human Services’ (department) staff did not provide sufficient or timely documentation supporting two of the TANF expenditures included in the sample. As a result, we questioned their actual costs totaling \$4,075. In addition, one sample item contained costs that were not allowable under the state plan for TANF. Actual cost for that exception was \$50.

We recommend department management ensure that supporting documentation is readily available for all TANF expenditures in such a form as to allow for subsequent verification and testing.

AGENCY’S RESPONSE:

The Department agrees with this finding. The department provided documentation for all the sample transactions with one exception. Part of the transaction was for \$3,578 and was interfaced into the Statewide Financial Management Application (SFMA) from the Overpayment Recovery system. Because the transactions are summarized at a high level on the interface, detail case numbers are not available. The department has identified the need to address this gap in tracing SFMA transactions to detail information generated by the Overpayment Recovery System. A work group will be established to identify the documentation needs and system/interface issues that need to be addressed.

04-27

Oregon Department of Human Services

Foster Care – Title IV – E, CFDA #93.658

Eligibility

Questioned Costs \$1,150

Branch personnel did not perform the criminal check that was required by Oregon Department of Human Services (department) policy on a timely basis.

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2004

Per the code of federal regulations (45 CFR Section 1356.21 (a) and (b)), Office of Management and Budget's Compliance Supplement requirement E.b.1.e., and the related State of Oregon Child Administrative Rule #413-120-0420 (17), a criminal records check must be made of the foster home provider. These references state, "the foster home provider must have satisfactorily met a criminal records check with respect to prospective foster and adoptive parents" and "criminal checks for other persons in a household is (a) a person 18 years of age or older who is living in the home; and is not a child or (b) a person assisting in the home to enrich the care provided to children placed in the home."

In six branches tested for compliance, three branches (Hood River, Multnomah Midtown and Lane) did not have criminal checks performed on certain home providers. The total number of files selected for review for all branches amounted to 40 and criminal checks for three home providers were not performed on a timely basis. Specifically, we noted:

1. Lane: A criminal check was not performed on the home provider for the period March 2003 – March 2004. Branch personnel noted in the provider file that the check was not performed. In March 2004 a criminal check was performed and it was determined that the provider was free of criminal activity for the period March 2003-2004.
2. Multnomah: An adult was living in the provider's home for six months without a criminal check being performed by branch personnel.
3. Hood River: The home provider self-reported criminal activity records to Branch personnel. Branch personnel did not perform a follow up to verify the information provided. The foster child lived in the home for the period June 2003 through March 2004 at which time the foster child was returned to its birth parent.
4. Prineville: The October 2003-04 certification, 2003-04 agreement and the criminal check for the adult co-applicant could not be located in the case file. However, the Facis System review performed in October 2003 indicated that these items were in the case file at that time. This exception did not result in questioned costs.

Total payments made to providers in our sample without criminal checks were \$1,150 and the projected likely questioned costs were \$3,050,000. Not complying with the criminal check requirement for adults living in the home exposes vulnerable children to a potentially unsafe environment.

We recommend that department branch personnel adhere to existing policies that require criminal checks be performed prior to a child being placed in a foster home.

AGENCY'S RESPONSE:

The department agrees in part with the finding. The department agrees that three of 40 cases reviewed did not have compliance with department policy. The cases involved failure to document a criminal history check on:

- *A foster parent for an annual re-certification*
- *An adult who moved into a foster home*

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2004

- *An approval of criminal history on a foster parent who self-disclosed a crime*

The department disagrees with the calculated questioned costs. The department is currently in the process of reviewing the Title IV-E program across the state in preparation for a 2005 Federal audit. For any cases identified for non-compliance during the Federal audit, the department must develop a corrective action plan and only the amount of the affected cases is considered questioned cost. The case amounts are not extrapolated over the entire population unless our corrective action does not reduce the errors by the next Federal audit.

Staff from the Federal Planning and Reporting, and Foster Case units are involved in these reviews. The three aspects of IV-E eligibility (financial, legal, and provider certification) are reviewed in an average sample of 15 percent of the branch IV-E eligible cases. To date, nine branches have had internal program reviews. The remaining branches are scheduled for review between January and June 2005.

The department has in place a combination of management and branch office guidance, as well as training to address Federal compliance requirements. Guidance is provided to staff on IV-E compliance issues by Children, Adults and Families management at statewide service delivery area and field child welfare program managers' meetings. The Foster Care Unit also conducts quarterly meetings throughout the state. Central Office staff is invited to these meetings to provide training, answer questions, and give updates on any policy changes. Guidance is also provided to all levels of staff (caseworkers, certifiers, supervisors, and managers) during the internal program reviews.

At each internal review, the reviewers conduct an exit briefing with staff to discuss concerns, and problem-solve ways to correct any findings. The findings are also shared with foster care coordinators, assigned to individual branches, which then follow up with individual case consultation. The branch is asked to respond to each finding and if there are significant concerns, must outline changes to practice that will result in meeting the policy requirements.

The Federal Planning and Reporting Unit and the Foster Care Unit conducted training for supervisors and specialists (consultation, education, and training), for Multnomah, Clackamas, and Washington counties on IV-E compliance. The manager of the Technical Assistance Unit, provides training at the statewide core training for certifiers with emphasis on the need to gain approvals on criminal history prior to placing a child in the home. In addition, Portland State University Child Welfare Partnership, along with staff from the Foster Care Unit, developed a Net-Link training on emergency placements including practice guidelines on obtaining criminal history information.

The above action items have begun and are designed to focus attention on correcting practices that result in non-compliance issues noted from both the Secretary of State Audit and the internal program reviews.

04-28

Oregon Department of Administrative Services
Statewide Central Service Cost Allocation Plan
Agencies Assessed for Central Service Charge Not Included in Cost Allocation Plan

The Oregon Department of Administrative Services (department) is assessing state agencies a total of \$779,678 for the 2003-05 biennium for capitol mall plaza debt service, according to the *State of Oregon 2003-2005 Price List of Goods and Services*. These revenues and the associated costs are not accounted for in the statewide central service cost allocation plan and the department has not instructed state agencies to not charge these payments to federal programs. Office of Management and Budget Circular A-87 states that central service charges omitted from the plan will not be reimbursed.

We recommend the department communicate with agencies to ensure that federal programs were not charged for this assessment for the current biennium. In the future, the department should consider including the capitol mall plaza debt service assessment revenues and expenses in the statewide central service cost allocation plan; if not, the Price List should specifically state that agencies cannot use federal funding to pay the assessment.

AGENCY'S RESPONSE:

The department agrees with this finding. The statewide cost allocation plan was revised for fiscal years 2002 and 2003 to include the capitol mall plaza debt service. These revised financial statements were submitted to the Department of Health and Human Services.

04-29

Oregon Department of Administrative Services
Statewide Central Service Cost Allocation Plan
\$1,000,000 Non-Operating Transfer Reported as an Operating Transfer

The Oregon Department of Administrative Services' (department) Telecommunications program transferred \$1,000,000 to the General Fund during fiscal year 2003. However, a review of the program's narrative and A-87 reconciliation of net assets for the fiscal year, included in the 2005 statewide central service cost allocation plan submitted to the Department of Health and Human Services (DHHS), revealed that the transfer was reported as an operating transfer to the department's Information Resources Management Division. The transfer reduced the A-87 net assets balance rather than the state only net assets. Office of Management and Budget Circular A-87 states that general governmental expenses are unallowable; the transfer should have been reported as a non-operating transfer to the General Fund and the state only net assets for the program should have been reduced in the reconciliation of net assets.

We recommend that the department contact DHHS to determine the required corrective action. Also, when preparing the annual reporting for department programs included in the cost allocation plan, department staff should review transfers out of the programs to ascertain that they have been properly reported in the narrative and in the A-87 reconciliation of net assets.

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2004

AGENCY'S RESPONSE:

The department agrees with this audit finding. The statewide cost allocation plan was revised for fiscal years 2002 and 2003 to report the one million dollar transfer as unallowable and state only net assets was reduced. These revised financial statements were submitted to DHHS.

04-30

Oregon Department of Administrative Services

Statewide Central Service Cost Allocation Plan

Unallowable Payments for Fines, Penalties, Damages, and Other Settlements

In testing a sample of payments transactions for fiscal year 2004 in the Oregon Department of Administrative Services' (department) Liability Insurance program, we found two transactions totaling \$607,034 in court awards, settlements, and legal costs for civil rights violations. According to Office of Management and Budget Circular A-87, attachment B section 16 (issued May 2004), fines, penalties, damages, and other settlements resulting from violations (or alleged violations) of, or failure of the government to comply with laws and regulations are unallowable. Furthermore, per interpretation by the State of Oregon's cognizant agency, the associated legal costs are unallowable as are directly associated costs of the unallowable fines, penalties, damages or settlement costs. As part of its liability self-insurance program, the department reported that \$2,342,089 in payments coded as civil rights violations (or alleged violations) in its subsidiary claims system were made during fiscal year 2003. The department included these payments as allowable costs in the Liability Insurance program's A-87 reconciliation of net assets.

We recommend the department determine the amounts paid for civil rights violations, including directly associated costs, for the fiscal years 2002, 2003 and 2004 as the Department of Health and Human Services (DHHS) has not closed the cost allocation plans for those years. The department should then contact DHHS for further clarification as to whether these costs are allowable. If applicable, the department should submit a restated A-87 reconciliation and any federal reimbursements as required for those years.

AGENCY'S RESPONSE:

The department respectfully disagrees with this finding. However, per the auditor's recommendation, the department will determine the total amount of the subject payments and consult with DHHS regarding final resolution.

04-31

Oregon Department of Administrative Services

Statewide Central Service Cost Allocation Plan

Costs Not Assigned Consistently to Agencies

Office of Management and Budget Circular A-87 requires that statewide central service cost allocation plans assign costs to state agencies on a consistent basis. For the 2003-05 biennium, the Oregon Department of Administrative Services' (department) charges for its three self-insurance programs (Liability, Workers' Compensation, and Property) were

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2004

calculated at a single agency-level for all agencies except for two, the Oregon Department of Human Services (DHS) and the Oregon University System (OUS). DHS was based on 12 divisions and facilities and OUS was based on the seven schools and higher education management. By doing this, DHS and OUS benefit from being allowed to exclude more than one loss per insurance program as part of the calculation of their charge, while all other state agencies are only allowed one exclusion per insurance program. As a result, we estimate that DHS was undercharged \$1,324,965 (\$1,076,713 for Liability, \$192,814 for Workers' Compensation, and \$55,438 for Property) for the biennium. We did not estimate the amount OUS would have been undercharged. The other state agencies would have been overcharged, in total, by the amounts that DHS and OUS were undercharged for the three insurance programs.

Likewise, we found that DHS was treated as seven entities (the Director's Office and six divisions) for the 2003-05 biennial assessment for the E-Government program within the department's Computer Services program. The statewide cost allocation plan and *State of Oregon 2003-2005 Price List of Goods and Services* state that the assessment is at the agency level. The result of not assessing DHS as a single agency was an over-assessment of \$253,915 for DHS for the biennium while 37 agencies (agencies with 50 or more FTE) were each under-assessed \$6,863 for the biennium.

We recommend the department revise the biennial allocation process to conform to the cost allocation plan and determine the amounts billed at the agency level in order for all agencies to be treated on a consistent basis.

AGENCY'S RESPONSE:

The department agrees with this audit finding. The department is currently making adjustments to bill DHS as one agency in the 2007-2009 state fiscal period.

04-32

Oregon Department of Administrative Services

Statewide Central Service Cost Allocation Plan

Services Billed Not Based on Usage or Usage Not Supported

Our testing of revenues for the Oregon Department of Administrative Services' (department) Computer Services program revealed that there were services billed to state agencies that were not based on usage or for which usage was not adequately documented. Also, costs and other data used to distribute costs should adequately support the propriety of the amounts billed to users. Due to a lack of software capability, agencies are billed for data storage in the Burns Archive Center based on data transferred to the center rather than the amount of data stored. Additionally, state agencies were charged a monthly amount for BRIO use from April 2003 through January 2004 equal to the amount, based on actual use, charged for March 2003. We also found that for other services billed, including tape charges and disk space, the Information Resources Management Division could not provide adequate documentation for the billing units underlying the amounts billed to state agencies. Office of Management and Budget Circular A-87 requires that billed services be related to the benefits received.

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2004

We recommend the department implement procedures to ensure that agencies using services provided by its Computer Services program are billed based on actual use of the service and that adequate documentation is retained to support the amounts billed to those state agencies.

AGENCY'S RESPONSE:

The department agrees with this audit finding. Beginning January 2005, the department will charge Burns Archive Center users for storage and transport costs using currently available data. By early in the 2005-2007 state fiscal period, the department will install CIMS account management software and upgraded archiving software to provide more stable and accurate measurement of utilization and improved cost allocation.

DEPARTMENT OF EDUCATION

04-33

Oregon Department of Education

Improving Teacher Quality State Grants, CFDA #84.367

Maintaining Level of Effort

During our review of the Improving Teacher Quality State Grant, we found that the Oregon Department of Education (department) has not been monitoring Local Education Agencies (LEA) to ensure they maintain the proper fiscal level of effort. The department reported expenditures of approximately \$21.2 million for this program during fiscal year 2004. The majority of these funds were disbursed to 178 LEAs. The department manager in charge of this program indicated she was not aware this requirement was applicable to this specific program.

Office of Management and Budget Circular A-133 requires the department to reduce the amount of the allocation of federal funds in the same proportion by which the LEA falls below the required level of effort. Without a monitoring function in place, the department is unable to determine whether a reduction of funds is necessary.

We recommend the department comply with the federal requirement and monitor LEAs to ensure that the proper level of effort is maintained.

AGENCY'S RESPONSE:

We agree with the finding. As indicated in the finding, the department manager in charge of this program was unaware that monitoring maintenance of effort was required for this specific program. This occurred because of turnover in staffing for the program. We will take the following corrective actions:

- *We will comply with the federal requirements and monitor local education agency expenditures to ensure that the proper level of effort is maintained.*
- *Monitoring will be done jointly by staff of the Office of Finance and Administration (OFA) and the Office of Educational Improvement and Innovation (EII) within the department.*

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2004

- *Based on the expenditures reported by the district to the OFA, the EII will determine district compliance with maintenance of effort requirements. Annual allocations to districts will be adjusted accordingly.*
- *We will begin review of 2001-2002 and 2002-2003 non-federal expenditure information for recipients of Teacher Quality Grants immediately.*
- *To ensure that we are properly monitoring all federal grants, we will implement a review of all federal programs, identify those that have maintenance of effort requirements, assign responsibility to the appropriate staff, and update position descriptions to reflect the responsibility.*

Section IV – Schedule of Prior Financial Statement Findings for the Years Ended June 30, 2003 and 2002

This section includes the current status reported by the department of all financial audit findings from fiscal year ended June 30, 2003. It also includes the current status reported by the department of all financial audit findings from fiscal year ended June 30, 2002 that were uncorrected at June 30, 2003.

**Finding 03-1: General Accounting and Internal Control Weaknesses
(Material Weakness)**

Recommendation: The Oregon Department of Human Services (department) should develop and implement policies and procedures to ensure that all accounting transactions are appropriately authorized, justified, documented and reviewed for accuracy and compliance with federal requirements. Department management also should ensure that sufficient resources are allocated to timely address information technology security risks.

Status: Partial corrective action was taken.

Corrective action was taken to address weaknesses and to ensure consistency in documentation. The Office of Financial Services partnered with internal audit staff and provided training on sufficient/reliable documentation for transactions. We are monitoring our documentation process to ensure that all accounting transactions are appropriately authorized, justified, documented, and reviewed for accuracy and compliance with federal requirements. We have several projects still in process relating to Federal CMS-64 and other grant accounting, and inventory control. We also are evaluating our processes and accounting for projects using Advance Planning Documents (enhanced federal match). Refer to Finding 02-7 for department's actions to address information technology security risk.

Finding 03-2: Classification of Expenditures

Recommendation: The Oregon Department of Corrections (department) should develop a more descriptive chart of accounts for its internal accounting system. The chart of accounts should provide clear guidance to accounting staff regarding which accounts should be used to ensure that their balances are recorded into appropriate Statewide Financial Management Application accounts. We also recommend that department management design and implement controls to ensure more effective transaction error prevention and detection.

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2004

Status: Partial corrective action was taken:

- An accountant has been assigned to review and revise the chart of accounts to provide adequate description and organization of this document. This revised chart of accounts has been developed and is in a review process prior to being implemented. It is expected to be in place by March 1, 2005.
- An accountant has been assigned to review and identify all material accounts (cumulative balance of \$5.0 million or greater) as part of pre-closing review and year-end accounting activities. All entries that had been misclassified during fiscal year 2004 were identified and were reclassified by the close of Month 13. This process will be repeated annually.
- The department has established and filled the Statewide Business Coordinator position. The Coordinator is now providing technical assistance to cost center managers department wide. A portion of this technical assistance is related to appropriate classification of both contracts and purchase requests at the beginning of the process so that subsequent accounting corrections can be minimized.

Finding 03-3: **Expenditure Decision Authority**

Recommendation: The Oregon Department of Corrections (department) should develop and implement policies and procedures to ensure that a more accurate and complete record of formal delegation of expenditure authority is maintained. In addition, department management should reevaluate the delegated authority it has given to subordinates to ensure that it is justified and adequate. Furthermore, department management should ensure that these controls are periodically monitored to promote or validate compliance.

Status: Corrective action was taken.

Finding 03-4: **Payroll**

Recommendation: The Department of Corrections (department) should fully comply with internal controls over payroll as outlined in the *Oregon Accounting Manual* (OAM). Specifically, department management should ensure that important payroll functions are appropriately separated; gross pay adjustment reports are timely reviewed by managers outside of the payroll unit and are retained as required; reconciliations are performed timely; and authorization forms for voluntary payroll deductions are completed and retained. We also recommend that the department develop and implement formal procedures to ensure payroll data is completely and successfully

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2004

transferred to internal and external accounting systems. In addition, department management should ensure supporting documentation is available for all payroll transactions and employees sign timesheets as required.

Status: Partial corrective action was taken.

Payroll areas under Human Resources:

- Payroll will train the Personnel Records unit to sort and disburse the paychecks and stubs rather than doing it themselves. This should be accomplished by March 1, 2005.
- The Payroll Manager will continue to work with the employee reviewing the reports to train them to recognize anomalies and question them. If this staff is unable to review reports in a timely manner the duty will be shifted to another management service employee. This is currently in progress.
- The Payroll Manager has taken steps to ensure that reports are filed in the appropriate places in a timely manner so as not to be misplaced. The Payroll Manager will continue to monitor this to ensure it is done.
- The Payroll Unit's procedure is to only enter voluntary deductions to the payroll system which are authorized in writing by the employee. The Payroll Manager will follow up on the possibility of misfiled authorization forms.
- This is an ongoing problem occurring in the security units that are staffed 24 hours per day. Timekeepers for these units have to send many unsigned copies of timesheets to the payroll unit to meet data entry deadlines. The timekeepers are required to obtain the missing signatures on the original timesheets and send them to the Payroll Unit as soon as possible. Some security units do not follow up timely. The department concurs with the need to establish an agency policy on unsigned timesheets.

Specific to Fiscal Services Data Processing:

- The department has a draft of the payroll interface process.
- The Accounting staff have now been trained in appropriate documentation of accounting entries per OAM Policy 10.15.00.PO. The department's controller now reviews all accruals and prior period adjustments to ensure that adequate documentation exists.

Finding 03-5: **Segregation of Duties and Logical Access to Accounting Systems**

Recommendation: The Oregon Department of Corrections (department) should develop, document and implement policies and procedures to ensure

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2004

accounting responsibilities are appropriately segregated. Specifically, management should ensure adequate separation of authorization for the execution of transactions, recording of transactions, custody of assets, and periodic reconciliation of existing assets to recorded amounts. In addition, management should ensure that individuals performing financial system security functions do not have conflicting accounting duties or responsibilities for monitoring and validating logical access, to ensure those functions are independently performed. In addition, the department should review and adjust logical access to its financial system on a case-by-case basis to ensure that users' access is based on a demonstrated need to view, add, change or delete data.

Status: Partial corrective action was taken.

- Information concerning internal controls and segregation of duties has been distributed to Fiscal Services managers. Roles based security has been developed for accounts payable, accounts receivable, and general ledger and will continue to be developed for remaining Automated Financial Accounting Manufacturing Inventory System (AFAMIS) modules through the upgrade process.
- Fiscal Services has increased cross training to compensate for lower staffing levels.
- Information concerning security roles, and a policy and procedure for review of security assigned to staff by managers throughout the department is in developmental stages.
- The hiring of the new Fixed Asset accountant has allowed the department to separate the AFAMIS Technical Support team from their previous responsibilities of recording, depreciating, and conducting inventory and fixed asset audits.

Finding 03-6: Fee Accruals for Fiscal Years 2003 and 2002

Recommendation: The Oregon Department of Parks and Recreation should establish and implement procedures that assign responsibility for performing the revenue accruals at year-end. These procedures should also assign responsibility for reviewing the accrual calculations to ensure that they are properly prepared and posted to the agency's accounting system and to the Statewide Financial Management Application.

Status: Corrective action was taken.

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2004

Finding 03-7: Controls Over Cigarette Tax Program

Recommendation: The Oregon Department of Revenue (department) should further evaluate and revise its system of controls over the cigarette tax program as previously recommended. The department's controls should ensure, at a minimum, that tax stamps are physically secure; key duties are separated; documentation is completed and retained regarding tax stamp purchases and destruction; staff perform a periodic inventory of the cigarette tax stamps; and bonding requirements meet administrative rule requirements and are periodically validated.

Status: Partial corrective action has been taken. Corrective action has been completed on all recommendations, except item two below. Processes have been re-engineered to strengthen internal controls and security. Corrective action on the remaining item will be completed by November 2004 when an agreement with a third party vendor is expected to be complete. The vendor will handle the storage, inventory maintenance and order-filling processes. The status of each recommendation is listed below.

- Appropriately segregate key duties relating to the maintenance and record keeping of cigarette tax stamps. Corrective action is complete.
- Adequately limit physical access to the tax stamps. Controls to limit physical access to the tax stamps have been improved; however, the final solution will be implemented upon transfer of inventories to a third party vendor. This is expected to occur in November 2004.
- Maintain adequate documentation of inventory records and records of destroyed stamps. Corrective action is complete.
- Develop sufficient policies and procedures to ensure compliance with *Oregon Administrative Rules* relating to bonding levels for purchasers of cigarette tax stamps. Corrective action was completed with development of *Oregon Administrative Rule* 150-323.100, effective July 31, 2004.
- Ensure that cigarette tax order forms contain all of the necessary information. Corrective action has been completed.
- Maintain supporting documentation for the sale of cigarette tax stamps. Corrective action has been completed.

Finding 03-8: Headquarters Point of Sale (POS) Reconciliation

Recommendation: The Oregon Department of Fish and Wildlife (department) should strengthen its controls over cash receipts by reconciling cash register

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2004

sales to the licensing system to ensure that all cash receipts have been properly accounted for.

Status: Partial corrective action was taken.
The department has separated the use of two cash registers within the Licensing Division located at the Salem headquarters office. The first register is exclusively used for walk-in customers and cash transactions. This will provide for regular reconciliations between this register and the POS system. The second register will be used for mail orders and faxes being received. The daily revenue of this register is balanced on a daily basis and the Licensing Sales Supervisor is reviewing and approving daily cash reconciliations. Due to the timing of the receipt of monies and the processing and distribution of the actual document, reconciliation between the register and the POS licensing system is extremely difficult. The department has assigned an accountant for whom reconciling the POS licensing system is one of their primary duties. This individual is currently working with our Information Services Division to review the current system and identify necessary improvements and the fiscal impact of reprogramming the current cash register system and/or the POS system to provide increased reconciliation functions. It has been determined that the reprogramming of the existing system would not be cost effective. The department is currently in the process of finalizing a Request for Proposal for a new point of sale system. *See finding 02-3.*

Finding 03-9: **Point of Sale (POS) Canceled Document Process**

Recommendation: The Oregon Department of Fish and Wildlife should develop a comprehensive system of reviewing voided/canceled documents received from POS licensing system agents.

Status: Corrective action was taken. *See finding 02-2.*

Finding 03-10: **Controls over Financial Reporting**

Recommendation: The Oregon Department of Forestry should:

- Fully develop, document and implement policies and procedures over financial reporting.
- Establish a delegation of duties at the program and district level.
- Update position descriptions to reflect current staffing.
- Establish and implement risk assessment process to identify, analyze and manage risks.
- Monitor internal controls at the district level.

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2004

- Update or develop desk manuals.
- Modify the cash receipting process and establish controls to ensure compliance with the *Oregon Accounting Manual* regarding cash receipting.
- Fully document evidence of the reconciliation process, including preparer and reviewer initials and the date prepared and reviewed.
- Consider filling the internal audit position or developing compensating controls.

Status:

Partial corrective action was taken. *See finding 02-4.*

- We are in the process of updating all of our fiscal policies and procedures. Most of these have either been implemented or are in the final review process before implementation. We have also added new policies on internal controls that address many of the deficiencies noted in the findings above. These will be fully implemented by December 2004.
- We have filled our Internal Audit position. The Director of Quality Assurance will be reviewing the agency's internal controls and will be implementing many new procedures to strengthen them.
- One of the new policies we've written is Internal Controls-Cash. This policy outlines the responsibilities of those employees with access to cash or cash transactions and outlines the requirement for surprise reviews of the procedures being used by holders of cash funds, change funds and cash receipts. These reviews will be a part of a larger review of each office that handles fiscal transactions and will take place on a rotating basis with each office being reviewed at least yearly.
- All position descriptions (PDs) in Business Services have been updated within the last year and will continue to be updated at each yearly employee evaluation.
- Every position in Business Services has a desk manual in place. These will be updated on an as needed basis. A review of the desk manuals is done by each manager on a regular basis.
- The PD and desk manual of each position that handles cash will be checked as part of the fiscal review mentioned above.

Finding 03-11:

Contracting

Recommendation:

The Oregon Department of Forestry (department) should:

- Establish policies and procedures for the preparation and approval of payment documentation, monitoring activities, and overall contract administration responsibilities.

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2004

- Provide training to staff assigned with contract administration responsibilities addressing basic principles of state contracting rules and responsibilities of contract administrators.
- Ensure payments are made timely, calculated correctly, have adequate supporting documentation, and are posted to the accounting records correctly.
- Monitor internal controls to ensure compliance with department guidelines and state statute.
- Ensure that state funds are used appropriately.

Status: Partial corrective action was taken. *See finding 02-5.*

- We are in the process of rewriting all of our contracting policies and procedures. We are incorporating the new requirements of *Oregon Revised Statute* (ORS) 279 and the implementation of the new Oregon Procurement Information Network (ORPIN). This will be completed by October 2004.
- We are scheduling contract training for the spring of 2005. This training will coincide with the implementation of the ORS 279 rewrite and its associated Oregon Administrative Rules. Training will include ORPIN and the new procurement directive.
- The agency has filled its contracting specialist 2 position, which has the lead for the procurement training.
- Monitoring for compliance will be incorporated into the upcoming training and the procurement directive that is currently being revised. These will also be coordinated with the new ORPIN system that is scheduled for implementation in October 2004.
- The agency has begun a review of the process of procuring and paying for emergency fire situations.

Finding 03-12: Payroll

Recommendation: The Oregon Department of Forestry (department) should improve controls over payroll including:

- Providing sufficient oversight and adequately segregating payroll responsibilities.
- Performing a thorough review and approval throughout the payroll process.
- Developing and implementing policies and procedures in compliance with the *Oregon Accounting Manual* and *Oregon Revised Statutes*.
- Taking appropriate action regarding department managers' intentional override of controls.

Status: Partial corrective action has been taken.

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2004

The agency has designed and implemented a standardized training program for all staff that process payroll. The training is designed in two modules to include the duties/processes done for that level employee. The first series of classes have been completed, with approximately one-half of the agency's payroll technicians attending. The training schedule will continue in the fall, after the completion of fire season. All agency staff that performs any payroll related duties are required to attend the necessary sessions, and will be expected to attend all annual updates.

The agency has developed a standardized records review process, and has begun onsite visits. During the review, particular attention is given to the following areas:

- Security and confidentiality of employee's records and files.
- Ensuring that access to confidential information is restricted and appropriate.
- Reviewing the location's archiving and retention process for payroll documents.
- What the process is for review and approval of time sheets, corrections to completed time sheets, and the documentation necessary for changes.

Payroll reports are reviewed each pay period for accuracy and appropriateness of the transaction. The originating office is contacted if there are any questions, or for clarification, and a random number of locations are contacted to provide the copies of the supporting documentation.

New processes are in place for the following payment types:

- The granting, application, and tracking of discretionary leave,
- The payment and approval for payment of vacation time,
- The reporting and tracking of military leave, and
- The use and documentation for miscellaneous paid leave use.

A database program has been created, and is in use for this fire season, to track, record, and accurately calculate payroll information for the agency's Administratively Determined employees. This includes standardizing the information entered into the Oregon State Payroll Application system.

The policy, procedures, and administrative guidelines are in the process of being updated and modified to reflect the department's current processes. This is an ongoing process, with drafts in review. Once the documents are updated, an annual review schedule will be set.

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2004

Finding 02-1: User Access Management

Recommendation: The Oregon Department of Corrections should implement a process to periodically review and monitor users' access privileges and activity to ensure that it is appropriate.

Status: Partial corrective action was taken.

- User access system wide in the Automated Financial Accounting Manufacturing Inventory System (AFAMIS) has been reviewed and weaknesses identified during the AFAMIS information technology audit have been addressed and resolved.
- Individuals who prepare payment no longer have the ability to authorize or release payments.
- A procedure and mechanism for management review of security is in development.

Finding 02-2: Point of Sale Canceled Document Process

Recommendation: The Oregon Department of Fish and Wildlife should develop a comprehensive system of reviewing canceled documents and ensure that all required information is received from licensing agents.

Status: *Please refer to finding 03-9 for the status of this finding.*

Finding 02-3: Headquarters Point of Sale (POS) Reconciliation

Recommendation: The Oregon Department of Fish and Wildlife should strengthen its controls over cash receipts by reconciling cash register sales to the POS licensing system to ensure that all funds have been properly accounted for.

Status: *Please refer to finding 03-8 for the status of this finding.*

Finding 02-4: Controls over Financial Reporting

Recommendation: The Oregon Department of Forestry should: fully develop, document and implement policies and procedures over financial reporting, develop a risk assessment process to identify, analyze and manage risks; follow established policy regarding contracting and cash receipting, ensure that all staff at the district and program level have a clear assignment of duties; update position descriptions and ensure that all employees are adequately trained to perform their assigned duties and responsibilities; and consider filling the internal audit position or develop compensating controls.

Status: *Please refer to finding 03-10 for the status of this finding.*

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2004

Finding 02-5: Contracting

Recommendation: The Oregon Department of Forestry (department) should further develop policies and procedures over its contracting activities to ensure that files are complete and up-to-date, work is independently reviewed, and payments are tied to specific contracts, calculated and posted correctly, and made in a timely manner. In addition, the department should correct errors identified during the audit.

Status: *Please refer to finding 03-11 for the status of this finding.*

Finding 02-6: Timber Sales and Transfers to Counties

Recommendation: The Oregon Department of Forestry (department) should establish controls to ensure that revenue is recognized in the correct period and the calculation of payments to counties is accurate and follows statute. Those controls should include, at a minimum, written instructions, training and independent review of the work performed. In addition, the department should determine the total amount of revenue distributed to counties in error and seek reimbursement.

Status: Partial corrective action has been taken.

- We have corrected our method of revenue recognition for timber revenues. We accrue revenues due to the counties in the year in which the revenues were earned.
- We have corrected the procedures and formulae for calculation of amounts due to the counties. We have reached partial agreement with all counties except two on the repayment of the amounts due to the department and have formal written intergovernmental agreements with two counties, Washington and Benton. We will be implementing these repayment agreements this quarter.

Finding 02-7: Logical Access Controls (Material Weakness)

Recommendation: The Oregon Department of Human Services (department) should develop and implement both long-range and short-range plans to improve security controls over its computer applications. Those plans should fully address the computer security issues outlined in the following reports issued by the Oregon Secretary of State:

- Report No. 2001-23, Oregon Department of Human Services, Food Stamp Management Information System - Application Controls Review.

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2004

- Report No. 2001-37, Oregon Department of Human Services, Security Controls for Computer Applications and its associated confidential report.
- Report No. 2001-55, Oregon Department of Human Services, Evaluation of General Computer Controls.

Status: Partial corrective action was taken.
The department has implemented policies, procedures, and programs that have addressed the issues stated in the audit. The department is addressing the outstanding issues through the Business Continuity Plan project, Identity Management and Access Control Project, Role Base Access Control project, Incident Response project, Data Classification policy, and Assessment Action Plan project. The department is participating in numerous state committees to develop statewide strategies addressing many of the issues identified in this audit.

Finding 02-8: **General Accounting Internal Control Weaknesses
(Material Weakness)**

Recommendation: The Oregon Department of Human Services (department) should develop and implement policies and procedures to ensure that all accounting transactions are appropriately authorized, justified, documented, and reviewed for accuracy and compliance with federal regulations prior to initiation and finalization. We also recommend that the department separate payment calculation and expenditure authorization functions for proportionate share incentive adjustment payments.

Status: Partial corrective action was taken.
The Department of Audit and Consulting Services provided training to Financial Services staff on appropriate documentation requirements for transactions. Also, the State Controller's Division issued a new policy Oregon Accounting Manual (10.15.00.PO) on transaction documentation requirements, effective December 1, 2004. The department has discontinued proportionate share incentive adjustment payments while in negotiations with the Centers for Medicare and Medicaid Services.

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2004

Section V – Schedule of Prior Federal Awards Findings and Questioned Costs for the Years Ended June 30, 2003 and 2002

This section includes the current status reported by the department of all federal audit findings from fiscal year ended June 30, 2003. It also includes the current status reported by the department of all federal audit findings from fiscal year ended June 30, 2002 that were uncorrected at June 30, 2003.

Finding 03-13: **Social Services Block Grant, CFDA 93.667**
 Insufficient Documentation of Expenditures
 Questioned Costs Total \$8,617,513

Recommendation: The Oregon Department of Human Services should implement procedures that ensure SSBG cost allocation transactions agree to supporting documentation and ensure that all transactions are supported by documents indicating when expenditures occurred, the specific goods or services provided, amounts expended for those services and other information necessary to determine compliance with federal funding requirements.

Status: Corrective action was taken.

Finding 03-14: **Social Services Block Grant, CFDA 93.667**
 Cash Management

Recommendation: The Oregon Department of Human Services (department) should ensure that all SSBG draws for Federal reimbursement are traceable to supporting documentation. Supporting information should be readily available, fully documented, and verifiable for compliance purposes.

Status: No corrective action was taken. The department disagrees with this finding. This grant is a reimbursement grant and revenues are drawn from the federal government after the expenditure is made. There is no time limit to when the amounts are drawn as long as they are expended within the time limit, and drawn while the grant is still available on the Division of Payment Management, Smartlink Payment Request System. We have detailed analysis on the SSBG revenue and expenditures for those prior fiscal years that fully support the increased draw amount.

Auditor Comment:

The department has not supplied evidence that the draws in question are supported by eligible expenditures. The United States Public

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2004

Health Service is currently looking into the matter and has not issued a resolution.

Finding 03-15: **Medicaid Cluster, Expenditure Allowability**
Questioned Costs total \$45,560,309 for payments made during state fiscal year 2003

Recommendation: The Oregon Department of Human Services (department) should fully comply with 42 CFR 447.272.

Status: There has been no final resolution. Due to a decreasing adjustment made on the federal expenditure report for the quarter ended June 30, 2003, Centers for Medicare and Medicaid Services (CMS) considers the remaining deferral amount to be \$21,222,635. The department is currently in negotiation with CMS regarding the proportionate share incentive adjustments.

Finding 03-16: **Medicaid Cluster**
Cash Management

Recommendation: The Oregon Department of Human Services (department) should develop and implement procedures or methods for documenting its daily draw process to ensure that supporting records are readily available, fully documented, and verifiable for compliance purposes. In addition, we recommend that the department make arrangements with the U.S. Department of Health and Human Services to address the amount overdrawn.

Status: Corrective action was taken.

Auditor Comment:

The department reported corrective action was taken as the status of this finding. We do not agree with the department's stated resolution. The department is still in negotiation with the Centers for Medicare and Medicaid Services National Institutional Reimbursement Team regarding the \$45.5 million that we questioned.

Finding 03-17: **Medicaid Cluster**
Reporting

Recommendation: The Oregon Department of Human Services (department) should implement procedures to ensure that actual total expenditure amounts are reported on the quarterly CMS-64 reports as required by

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2004

Federal regulations. In addition, the department should correct and resubmit CMS-64 reports submitted in error.

Status: No corrective action was required. We continue to improve and to educate others on the process for reporting on the CMS-64, especially since we now report on Oregon Department of Human Services and Oregon Youth Authority (OYA) instead of seven divisions and OYA. The department reports actual expenditures on its CMS-64. Actual expenditures in the state accounting system are reconciled to what is reported on the CMS-64. If a disallowance is received from U.S. Department of Health and Human Services, we report that amount on the CMS-64 as a prior period adjustment for the quarter the disallowed expenditures occurred.

Auditor Comment:

The auditee reported no corrective action was required. We do not concur. We noted the same issue during fiscal year 2004. As a result, we are reporting the current year finding at 04-22.

Finding 03-18: **Medicaid Cluster, Matching, Questioned Costs Total \$1,314,071**

Recommendation: The Oregon Department of Human Services should evaluate its procedures for ensuring that federal participation rates are consistently applied to Medicaid expenditures.

Status: Corrective action was taken.

Finding 03-19: **Section 8 Housing Assistance Payments Program, CFDA 14.195 Cash Management**

Recommendation: The Oregon Housing and Community Services Department should reevaluate its processes and make modifications as necessary to ensure funds are disbursed by the business day following receipt by the Oregon State Treasury.

Status: Corrective action was taken.

Finding 03-20: **Special Supplemental Nutrition Program for Women, Infants, and Children, CFDA 10.557, Subrecipient Monitoring**

Recommendation: The Oregon Department of Human Services should:

- Develop a comprehensive and practical schedule for local agency program reviews for the next several years;

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2004

- Consider combining the operational and fiscal reviews for efficiency; and,
- Submit the proposed schedule to the United States Department of Agriculture for approval, requesting an exception to established guidelines based upon the specific situation facing the Oregon Women, Infants, and Children program.

Status: Corrective action was taken.

Finding 03-21: **Temporary Assistance for Needy Families (TANF), CFDA 93.558 Cash Management**

Recommendation: The Oregon Department of Human Services (department) should develop and implement procedures or methods to ensure compliance with documentation requirements for cash draws for TANF expenditures. The department's records should be readily available and verifiable for compliance purposes. We also recommend that the department take action to ensure that the \$3.5 million drawn in excess is resolved with the Federal agency and all requirements of the Treasury-State cash agreement satisfied.

Status: Corrective action was taken.

Auditor Comment:

The auditee has reported corrective action was taken. We do not concur. We noted the same issue during fiscal year 2004. As a result, we are reporting the current year finding at 04-20.

Finding 03-22: **Block Grants for Prevention and Treatment of Substance Abuse CFDA 93.959, Level of Effort**

Recommendation: The Oregon Department of Human Services should apply for a federal waiver, which would exempt them from the Maintenance of Effort requirement for state fiscal year 2003.

Status: Corrective action was taken.

Finding 03-23: **Workforce Investment Act Cluster Cash Management Authorizations**

Recommendation: The Oregon Department of Community Colleges and Workforce Development (department) should improve controls over transaction authorization and supervisory review.

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2004

Status: Partial corrective action was taken.

The department has divided the duties and responsibilities of the Fiscal staff to assure that all transactions are sufficiently reviewed and authorized including an appropriate level of supervisory review. However, not all regions are in compliance with this requirement. Also, the department has implemented proper segregation of duties to assure compliance with the Office of Management and Budget's cash management requirements.

Finding 03-24: **Workforce Investment Act Cluster
Earmarking/Reporting**

Recommendation: The Oregon Department of Community Colleges and Workforce Development (department) should continue its efforts to correct the accounting system and revise federal reports to accurately reflect program expenditures. We also recommend that the department continue to work with subrecipients to correct errors in reported amounts.

Status: Partial corrective action was taken.
The department is continuing its efforts to track and reconcile the noted expenditures, therefore only partial corrective action has been taken.

The department believes it has identified the funding streams that need to be aligned in the proper reporting period. Currently, staff is in the process of verifying the proper alignment and to establish a revised accounting structure to assure the accuracy and documenting of future expenditures.

Finding 03-25: **Capitalization Grants for Drinking Water State Revolving Fund, CFDA 66.468, Matching**

Recommendation: The Oregon Economic and Community Development Department should deposit funds into the revolving fund to meet the 20 percent match requirement and develop a match deposit schedule with documented procedures for updating the schedule upon receipt of each new grant agreement.

Status: Corrective action was taken.

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2004

Finding 03-26: **Capitalization Grants for Drinking Water State Revolving Fund, CFDA 66.468, Environmental Review**

Recommendation: The Oregon Economic and Community Development Department should strengthen policies and procedure to ensure that environmental reviews are completed prior to loan-funded project work beginning.

Status: Corrective action was taken.

Finding 03-27: **Child Nutrition Cluster**
Fiscal Action Plans

Recommendation: The Oregon Department of Education should implement procedures to ensure that fiscal action plans are enforced.

Status: Corrective action was taken.

Finding 02-10: **Child Nutrition Cluster**
Monitoring of Food Service Program

Recommendation: The Oregon Department of Education should require specific program information from all School Food Authorities that discloses or affirms that the school food service programs are promptly accounted for.

Status: Partial corrective action has been taken.
The Oregon Department of Education/ Child Nutrition Programs (ODE/CNP) has implemented the following corrective action:

2003-2004 – ODE/CNP will send a letter to private schools and residential child care institutions requesting 2003-04 fiscal data. Non-responders will receive a follow-up letter. ODE/CNP will withhold payment of claims if fiscal data is not received by the due date.

2004-2005 – ODE/CNP will collect financial data as part of the yearly program renewal process. Sponsors will not be approved for participation, in the program, if the data is not received. Exceptions are sponsors with a fiscal year that does not correspond to the states fiscal year. These sponsors will be recorded. They will submit their data at a later date (This group will be delayed.)

State of Oregon
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2004

Finding 02-12: **Medicaid Cluster**
 Expenditure Documentation and Allowability

Recommendation: The Oregon Department of Human Services (department) should fully comply with 42 CFR 447.272.

Status: No resolution at this time. The department is currently in negotiation with Centers for Medicare and Medicaid Services regarding the proportionate share incentive adjustments.

Finding 02-14: **Medicaid Cluster**
 ADP Risk Analysis and System Security Reviews

Recommendation/Status: Please refer to finding 02-7 for the recommendation and status of this finding.

FACTS ABOUT THE SECRETARY OF STATE AUDITS DIVISION

The Oregon Constitution provides that the Secretary of State shall be, by virtue of his office, Auditor of Public Accounts. The Audits Division exists to carry out this duty. The division reports to the elected Secretary of State and is independent of the Executive, Legislative, and Judicial branches of Oregon government. The division audits all state officers, agencies, boards, and commissions and oversees audits and financial reporting for local governments.

Directory of Key Officials

STATE AUDITOR	Cathy Pollino, CGFM, MBA
Deputy State Auditor	Charles A. Hibner, CPA
Deputy State Auditor	Mary E. Wenger, CPA

This report, which is a public record, is intended to promote the best possible management of public resources.

If you received a copy of an audit report and no longer need it, you may return it to the Audits Division. We maintain an inventory of past audit reports. Your cooperation helps us save on printing costs.
