

HOW TO PREPARE TIN CANS

Clean and remove paper label

Cut out both top and bottom and flatten can.

Put top and bottom inside flattened can, store in carton.

Sunday, May 27

Salem Tin AND Paper Day

City-wide house to house pickup of prepared tin cans and bundled newspapers, magazines, old books and cardboard cartons. Put your bundles of paper and boxes of tin cans on the curb in front of your home before noon Sunday, May 27th.

PUT YOUR SCRAP INTO THE FIGHT !

The tin salvaged from YOUR prepared tin cans is used to make:

Morphine syrette tubes for the medical divisions;

Tin for the making of superfort bombers;

Vital parts for bombs and ammunition.

Save, Clean and Flatten Every Can!

Your old newspapers and magazines are used to make:

Cartons for K rations;

Paper jackets for large calibre shells;

Shipping cartons for supplies;

And hundreds of other uses.

Turn in Your Old Newspapers and Magazines!

MARION COUNTY SALVAGE COMMITTEE

Cascade Area Council, Boy Scouts of America

A BUNDLE OF PAPER AND A BOX OF CANS IN FRONT OF EVERY HOME!

CORRUGATED AND CARDBOARD BOXES AND CARTONS: Flatten them out and tie them in bundles about 12 inches high.

MAGAZINES AND BOOKS: Tie them in bundles about 18 inches high, so they can be easily handled for collection.

NEWSPAPERS: Fold them flat (the way the paper boy sells them) and tie them in bundles about 12 inches high.

Please Tie Bundles Firmly

WHY SAVE TIN CANS

Most of America's Tin Supply Is Cut Off By the Japs
YOUR TIN CANS MUST HELP TO SUPPLY AMERICA'S TIN FOR WAR

THE LIFE SAVING MORPHINE SYRETTTE

It takes the tin from 2 cans for each of the millions of syrettes used.

TIN — 100% pure TIN — encloses the little individual morphine hypodermic syringe (syrette) which soothes the pain of the soldier lying wounded on the Battlefield.

TIN encases the emergency sulpha ointments which protect him from deadly infections in the jungle — which help heal his burns — which relieve injuries to his eyes.

TIN safeguards the precious blood plasma which enables the Medical Corps to save countless lives right at the "Battle Front," where countless lives are saved by treating for loss of blood, shock, burns, etc. TIN is the most perfect protective covering — no other metal will serve as well.

TIN containers of many kinds are indispensable to every Army and Navy Medical Corps doctor, every ambulance company, and every field and base hospital.

SAVE YOUR TIN CANS

UNITED STATES military regulations authorize approximately 6 pounds of food every day for every soldier, sailor, marine, and coast guardsman. Nothing is so important as the health of our men; their food must be kept pure. TIN is the best protective covering for food. TIN COATED steel containers for food withstand shock, heat, cold, contamination, climatic changes, storage hazards. Abroad—almost all food for the Army arrives in TIN and steel. At sea every sailor, marine, and coast guardsman eats food protected by TIN. Our

Army, Navy, Marine Corps, and Coast Guard are the best fed in the world. TIN makes that possible.

TIN "KEEPS THE POWDER DRY"—The fighting efficiency of our soldiers depends upon their having dry powder for their guns. It takes 500 million salvaged-TIN cans each year to supply sufficient TIN to solder the ammunition boxes of our armed forces.

SAVE YOUR TIN CANS

The TIN from two of your "TIN-CANS" may save THE LIFE of some boy who needs your help—don't let our boys down for THE LACK OF YOUR "TIN CANS."

Save and Prepare All of Your Tin Cans Now!

(OVER ... TO SAVE PAPER)

Your Scrap Paper IS NEEDED

because:

1. There is less paper now available.
2. Overseas shipment of paper normally returnable to mills as waste is cutting the nation's supply of paper pulp.
3. Manpower difficulties in pulpwood production.
4. Manpower and transportation difficulties in waste paper collection.
5. Increased demand for waste paper by paper-board mills.

FACTS ABOUT WASTE PAPER

Once we get our fighting men overseas, it takes 81 tons of supplies per month per man to keep them there, compared to 43 tons per month per man in the last war. This requires huge quantities of containers and packaging material. U. S. Army Field Ration "K" is packed in folding cartons.

Paperboard protects every shell until it is fired.

100 pounds of waste paper will make 650 cartons for U. S. Army Field Ration "K"

100 pounds of waste paper will make 115 boxes, each containing ten 20 mm. shells.

100 pounds of waste paper will make fifty 75 mm. shell containers.

Scrap Paper Drive - February 1 to 12

SAVE THESE KINDS OF SCRAP PAPER --

1. Newspapers.
2. Magazines of all kinds.
3. Old books and catalogs.
4. Cardboard and corrugated cartons (smashed flat).

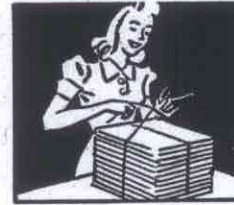

Material NOT WANTED includes small loose waste paper, lightweight cardboard boxes, wrapping paper, and any material that cannot be tied in bundles as illustrated below.

PREPARE AND BUNDLE THE MATERIAL FOR SCHOOL COLLECTORS

Schools to Collect Scrap Paper

Newspapers: Fold them flat (the way the paper boy sells them) and tie them in bundles about 12 inches high.

Magazines and Books: Tie them in bundles about 18 inches high.

Corrugated and Cardboard Boxes and Cartons: Flatten them out and tie them in bundles about 12 inches high.

All residential collections of scrap paper will be made by school children of the county. Please cooperate by having your scrap paper tied in bundles and ready for pickup Feb. 1 to 12. If you have a large quantity please haul it to the school building --- it takes just a few minutes time and means a lot to the students of the schools.

Loads of scrap paper will also be received at the Reid Murdock Cannery green fruit dock on North Front Street in Salem between February 1 and 12. Receipts will be issued and credit given to any school in county for paper delivered to dock. Net proceeds from sale of paper to go to schools for purchase of War Bonds.

Scrap paper from business district of City of Salem to be handled by the Salem Junior Chamber of Commerce.
