### Secretary of State Certificate and Order for Filing

### PERMANENT ADMINISTRATIVE RULES

I certify that the attached copies\* are true, full and correct copies of the PERMANENT Rule(s) adopted on December 3, 2007 by the

Date prior to or same as filing date

Department of Consumer & Business Services/Oregon Occupational Safety & Health Division 437 Agency and Division

Administrative Rules Chapter Number

Sue Joye

350 Winter Street NE, Salem OR 97301-3882

503-947-7449

Rules Coordinator

Telephone

to become effective

December 3, 2007 as OR-OSHA Administrative Order 9-2007. Date upon filing or later

Rulemaking Notice was published in the

October 2007 Month and Year

Oregon Bulletin.\*\*

### **RULE CAPTION**

Adopt changes to Dipping and Coating rules in General Industry.

Not more than 15 words that reasonably identifies the subject matter of the agency's intended action.

**RULEMAKING ACTION** 

ADOPT:

OAR 437-002-0122

AMEND:

OAR 437-002-0100

ARCHIVES DIVISION SECRETARY OF STATE

### **RULE SUMMARY**

Oregon OSHA adopts a new Dipping and Coating standard in General Industry. This rule combines the requirements of the current standards in 1910.122 through 1910.126. This is also part of our initiative to convert our rules into clear language. The standards in 1910.122 through 1910.126 are removed and a new rule OAR 437-002-0122, Dipping and Coating is adopted into Division 2/H.

Please visit OR-OSHA's web site at www.orosha.org

Michael D. Wood

<sup>\*</sup>With this original, file one photocopy of certificate, one paper copy of rules listed in Rulemaking Actions, and electronic copy of rules.

<sup>\*\*</sup>The Oregon Bulletin is published on the 1st of each month and updates the rule text found in the Oregon Administrative Rules Compilation. Notice forms must be submitted to the Administrative Rules Unit, Oregon State Archives, 800 Summer Street NE, Salem, Oregon 97310 by 5.00 pm on the 15th day of the preceding month unless this deadline falls on a ARC 930-2005 Saturday, Sunday or legal holiday when Notice forms are accepted until 5:00 pm on the preceding workday.

# OAR 437, Oregon Occupational Safety and Health Division OR-OSHA Administrative Order 9-2007 Filed and effective December 3, 2007

OAR 437, Division 2, General Occupational Safety and Health Rules

Subdivision H - Hazardous Materials

### 437-002-0100

**Adoption by Reference.** In addition to and not in lieu of any other safety and health codes contained in OAR Chapter 437, the Department adopts by reference the following federal rules as printed in the Code of Federal Regulations, 29 CFR 1910, revised as of 7/1/02, and any subsequent amendments published in the Federal Register as listed below:

- (1) 29 CFR 1910.101 Compressed gases (General requirements), published 6/27/74, Federal Register, vol. 39, p. 23502; 3/7/96, FR vol. 61, no. 46, p. 9236.
- (2) 29 CFR 1910.102 Acetylene, published 6/27/74, Federal Register, vol. 39, p. 23502; 3/7/96, FR vol. 61, no. 46, p. 9236.
- (3) 29 CFR 1910.103 Hydrogen, published 6/27/74, Federal Register, vol. 39, p. 23502; amended 10/24/78, FR vol. 43, p. 49746; 4/12/88, FR vol. 53, p. 12121; 8/6/90, FR vol. 55, no. 151, p. 32015; 6/30/93, FR vol. 58, no. 124, p. 35309; 3/7/96, FR vol. 61, no. 46, p. 9236.
- (4) 29 CFR 1910.104 Oxygen, published 6/27/74, Federal Register, vol. 39, p. 23502; amended 10/24/78, FR vol. 43, p. 49746; 3/7/96, FR vol. 61, no. 46, p. 9237.
- (5) 29 CFR 1910.105 Nitrous oxide, published 6/27/74, Federal Register, vol. 39, p. 23502; 3/7/96, FR vol. 61, no. 46, p. 9237.
- (6) 29 CFR 1910.106 Flammable and combustible liquids, published 6/27/74, Federal Register, vol. 39, p. 23502; amended 1/27/75, FR vol. 40, p. 3982; 6/2/75, FR vol. 40, p. 23743; 10/24/78, FR vol. 43, p. 49746; 11/7/78, FR vol. 43, p. 51759; 9/7/82, FR vol. 47, p. 39164; 9/12/86, FR vol. 51, p. 34560; 4/12/88, FR vol. 53, p. 12121; 8/6/90, FR vol. 55, no. 151, p. 32015; 3/7/96, FR vol. 61, no. 46, p. 9237; 9/13/05, FR vol. 70, no. 176, p. 53925.
- (7) 29 CFR 1910.107 Spray finishing using flammable and combustible materials, published 6/27/74, Federal Register, vol. 39, p. 23502; amended 9/12/80, FR vol. 45, p. 60704; 2/10/84, FR vol. 49, p. 5322; 4/12/88, FR vol. 53, p. 12121; 3/7/96, FR vol. 61, no. 46, p. 9237; amended with AO 3-2003, removed 1910.107, and Oregon note added, f. and ef. 4/21/03.
- (8) 29 CFR 1910.108 Reserved. Published 3/23/99, Federal Register, vol. 64, no. 55, p. 13909.

- (9) 29 CFR 1910.109 Explosives and blasting agents, published 6/27/74, Federal Register, vol. 39, p. 23502; amended 10/24/78, FR vol. 43, p. 49747; 9/12/80, FR vol. 45, p. 60704; 4/12/88, FR vol. 53, p. 12122; 2/24/92, FR vol. 57, no. 36, p. 6403; 3/29/93, FR vol. 58, no. 58, p. 16496; 6/30/93, FR vol. 58, no. 124, p. 35309; 3/7/96, FR vol. 61, no. 46, p. 9237; 6/18/98, FR vol. 63, no. 117, p. 33466.
- (10) 29 CFR 1910.110 Storage and handling of liquefied petroleum gases, published 6/27/74, Federal Register, vol. 39, p. 23502; amended 10/24/78, FR vol. 43, p. 49747; 2/10/84, FR vol. 49, p. 5322; 4/12/88, FR vol. 53, p. 12122; 6/20/90, FR vol. 55, p. 25094; 8/6/90, FR vol. 55, no. 151, p. 32015; 3/19/93, FR vol. 58, no. 52, p. 15089; 6/30/93, FR vol. 58, no. 124, p. 35309; 3/7/96, FR vol. 61, no. 46, p. 9237; 6/18/98, FR vol. 63, no. 117, p. 33466.
- (11) 29 CFR 1910.111 Storage and handling of anhydrous ammonia, published 6/27/74, Federal Register, vol. 39, p. 23502; amended 10/24/78, FR vol. 43, p. 49748; 2/10/84, FR vol. 49, p. 5322; 4/12/88, FR vol. 53, p. 12122; 3/7/96, FR vol. 61, no. 46, p. 9238; 1/8/98, FR vol. 63, no. 5, p. 1269; 6/18/98, FR vol. 63, no. 117, p. 33466; amended with AO 12-2001, Oregon note added, f. and ef. 10/26/01.
- (12) Reserved for 29 CFR 1910.112 (Reserved)
- (13) Reserved for 29 CFR 1910.113 (Reserved)
- (14) 29 CFR 1910.114 Removed. Published 3/7/96, Federal Register, vol. 61, no. 46, p. 9238.
- (15) 29 CFR 1910.115 Removed. Published 3/7/96, Federal Register, vol. 61, no. 46, p. 9238.
- (16) 29 CFR 1910.116 Removed. Published 3/7/96, Federal Register, vol. 61, no. 46, p. 9238.
- (17) 29 CFR 1910.119 Process safety management of highly hazardous chemicals, published 2/24/92, Federal Register, vol. 57, no. 36, pp. 6403-6417; amended 3/4/92, FR vol. 57, no. 43, p. 7847; 6/1/92, FR vol. 57, no. 105, pp. 23060-1. (NOTE: Excepted rules adopted by reference by OR-OSHA by Admin. Order 6-1994 on 9/30/94.) Amended 3/7/96, FR vol. 61, no. 46, p. 9238; amended with AO 12-2001, Oregon note added, f. and ef. 10/26/01.
- (18) 29 CFR 1910.120 Hazardous waste operations and emergency response, Interim Final Rules, published 12/19/86, Federal Register, vol. 51, no. 244, pp. 45663-45675; and amended 5/5/87, FR vol. 52, no. 85, pp. 16241-16243. Final Rules were published 3/6/89, FR vol. 54, no. 42, pp. 9294-9335; amended 4/13/90, FR vol. 55, no. 72, pp. 14072-14075; 4/18/91, FR vol. 56, no. 75, pp. 15832-15833; amended 8/22/94, FR vol. 59, no. 161, pp. 43270-43275; 3/7/96, FR vol. 61, no. 46, p. 9238; amended with AO 12-2001, Oregon note added, f. and ef. 10/26/01; 4/3/06, FR vol. 71, no. 63, p. 16669. (19) 29 CFR 1910.121 Reserved. Published 3/23/99, Federal Register, vol. 64, no. 55, p. 13909.
- (20) 29 CFR 1910.122 Table of contents, published 3/23/99, Federal Register, vol. 64, no. 55, p. 13909; Repealed with OR-OSHA Admin. Order 9-2007, f. and ef. 12/3/07. (21) 29 CFR 1910.123 Dipping and coating operations: Coverage and definitions, published 3/23/99, Federal Register, vol. 64, no. 55, p. 13909; Repealed with OR-OSHA Admin. Order 9-2007, f. and ef. 12/3/07.
- (22) 29 CFR 1910.124 General requirements for dipping and coating operations, published 3/23/99, Federal Register, vol. 64, no. 55, p. 13909; amended with AO 4-

2002, repeal (g)(2), and Oregon note added, f. and ef. 5/30/02; Repealed with OR-OSHA Admin. Order 9-2007, f. and ef. 12/3/07.

(23) 29 CFR 1910.125 Additional requirements for dipping and coating operations that use flammable or combustible liquids, published 3/23/99, Federal Register, vol. 64, no. 55, p. 13910; Repealed with OR-OSHA Admin. Order 9-2007, f. and ef. 12/3/07.

(24) 29 CFR 1910.126 Additional requirements for special dipping and coating applications, published 3/23/99, Federal Register, vol. 64, no. 55, p. 13911; Repealed with OR-OSHA Admin. Order 9-2007, f. and ef. 12/3/07.

These standards are on file with the Oregon Occupational Safety and Health Division, Oregon Department of Consumer and Business Services, and the United States Government Printing Office.

Stat. Auth.: ORS 654.025(2) and ORS 656.726(4). Stats. Implemented: ORS 654.001 through 654.295.

### 437-002-0122

### Dipping and Coating.

- (1) Scope
- (a) This rule applies to all operations where an object is partially or fully immersed in a liquid, or the vapors of a liquid. Such operations include, but are not limited to, cleaning, coating, altering the surface of an object, or changing the character of an object. Examples of covered operations are paint dipping, electroplating, pickling, quenching, tanning, degreasing, stripping, cleaning, roll coating, flow coating, and curtain coating. This rule also applies to draining or drying an object that has been dipped or coated.
- (b) This rule does not apply to tanks that contain only water or a molten material.
- (2) Definitions
- (a) Adjacent area: Any area within 20 feet (6.1 m) of a vapor area that is not separated from the vapor area by tight partitions.
- (b) Approved: The equipment is listed or approved by a nationally recognized testing laboratory.
- (c) Autoignition temperature: The minimum temperature required to cause self-sustained combustion, independent of any other source of heat.
- (d) Combustible liquid: A liquid having a flash point of 100° F (37.8° C) or above. For purposes of this rule, combustible liquids include any liquid with a flash point above 200° F that is heated or has heated items placed in it.
- (e) Dip tank: A container holding a liquid other than water and is used for dipping or coating. An object may be immersed (or partially immersed) in a dip tank or it may be suspended in a vapor coming from the tank.
- (f) Flammable liquid: A liquid having a flashpoint below 100° F (37.8° C).
- (g) Flashpoint: The minimum temperature at which a liquid gives off a vapor in sufficient concentration to ignite if tested in accordance with the definition of "flashpoint" in OAR 437-002-1910.1200(c).
- (h) Lower flammable limit (LFL): The lowest concentration of a material that will propagate a flame. The LFL is usually expressed as a percent by volume of the material in air (or other oxidant).

- (i) Vapor area: Any space containing a dip tank, including its drain boards, associated drying or conveying equipment, and any surrounding area where the vapor concentration exceeds 25% of the LFL of the liquid in the tank.
- (3) Any container used as a dip tank must be strong enough to withstand any expected load.
- (4) Ventilation
- (a) Ensure airborne concentrations of materials in any vapor area do not exceed 25% of its LFL.
- (b) A tank cover or material that floats on the surface of the liquid in a dip tank to replace or supplement ventilation is acceptable, as long as the airborne concentrations do not exceed 25% of the LFL or any limit established by Division 2, Subdivision Z.
- (c) When mechanical ventilation is used, it must conform to design standards based on national consensus standards that meet the following:
- (A) The standard specifies the safety requirements for the particular equipment;
- (B) The standard is recognized in the United States as providing specifications that result in an adequate level of safety;
- (C) The standard was developed by a standards development organization under a method providing for input and consideration of views of industry groups, experts, users, governmental authorities, and others having broad experience and expertise in issues related to the design and construction of the particular equipment.
- (d) Nonmandatory appendix A of this section contains examples of consensus standards that meet the requirements of paragraph (4)(c) of this section.
- (e) When mechanical ventilation is used, each dip tank must have an independent exhaust system unless the combination of substances being removed will not cause a fire, explosion, or chemical reaction.
- (f) When mechanical ventilation is used, it must draw the flow of air into a hood or exhaust duct.
- (A) Ensure each room with exhaust hoods has make-up airflow that is at least 90% of the volume of air exhausted.
- (B) Ensure that make-up air does not damage exhaust hoods.
- (C) When air is recirculated, it must meet the requirements of OAR 437-002-0081, "Oregon Ventilation Regulations."
- (g) Inspect hoods and ventilation ductwork for corrosion or damage at least quarterly and prior to operation after a prolonged shutdown.
- (h) Ensure the ventilation airflow is adequate at least quarterly and prior to operation after a prolonged shutdown.
- (5) Periodically inspect all dipping and coating equipment, including covers, drains, overflow piping, and electrical and fire-extinguishing systems, and promptly correct any deficiencies.
- (6) Thoroughly clean dip tanks of solvents and vapors before permitting welding, burning, or open-flame work.
- (7) Provide mechanical ventilation or respirators (selected and used as specified in OAR 437-002-1910.134, "Respiratory Protection) to protect employees in the vapor area from exposure to toxic substances released during welding, burning, or open-flame work.
- (8) Medical, first aid, and hygiene facilities.

- (a) All employees working with or around dip tanks must know the first-aid procedures appropriate to the dipping and coating hazards to which they are exposed.
- (b) When employees work with liquids that may burn, irritate, or otherwise harm their skin:
- (A) Obtain a physician's approval before an employee with a sore, burn, or other skin lesion that requires medical attention can return to work in a vapor area.
- (B) Only a properly designated person can provide treatment for any skin abrasion, cut, rash, or open sore.
- (C) Keep appropriate first-aid supplies near dipping or coating operations.
- (D) Provide employees who work with chromic acid periodic examinations, at least annually, of their exposed body parts, especially their nostrils.
- (E) Provide locker space or other storage space to prevent contamination of employee's street clothes.
- (F) Provide at least one basin with hot water for every 10 employees who work with such liquids.
- (G) Follow the emergency eyewash and shower facilities requirements of OAR 437-002-0161, "Medical & First Aid."
- (9) Before cleaning a dip tank:
- (a) Drain the tank and open the cleanout doors; and
- (b) Ventilate and clear any pockets where hazardous vapors may have accumulated.
- (10) Use of flammable or combustible liquids.
- (a) Use only dip tanks constructed from non-combustible materials. When drainboards are used, use only drainboards constructed from non-combustible materials.
- (b) Overflow piping.
- (A) Provide properly trapped overflow piping for dip tanks that have a capacity greater than 150 gallons (568 liters) or a surface area greater than 10 square feet (0.95 square meters).
- (B) Overflow piping must discharge to a safe location.
- (C) Overflow piping must be at least 3 inches (7.6 cm) diameter and must have sufficient capacity to prevent the tank from overflowing.
- (D) The bottom of the overflow connector must be at least 6 inches (15.2 cm) below the top of the dip tank.
- (c) Bottom Drains.
- (A) Dip tanks containing more than 500 gallons (1893 L) of liquid must have a bottom drain.
- (i) A bottom drain is not required if an automatic cover that meets the requirements of paragraph (10)(d)(C) is used.
- (ii) A bottom drain is not required if the viscosity of the liquid at normal atmospheric temperature makes this impractical.
- (B) Ensure the bottom drain will empty the dip tank in the event of a fire.
- (C) Properly trap the bottom drain.
- (D) Ensure the bottom drain has pipes that will empty the dip tank within 5 minutes.
- (E) Bottom drains must discharge to a safe location.
- (F) Bottom drains must be capable of manual and automatic operation. Manual operation must be from a safe and accessible location.
- (G) When gravity flow from the bottom drain is impractical, use automatic pumps.

- (d) Fire Protection.
- (A) Provide portable fire extinguishers that meet the requirements of OAR 437-002-0157 in every vapor area.
- (B) Provide an automatic fire extinguishing system:
- (i) When the capacity of the dip tank is at least 150 gallons (568 L) or the liquid surface area is 4 square feet (0.38 square meters) or more; or
- (ii) When the capacity of a hardening or tempering tank is at least 500 gallons (1893 L) or a liquid surface area of 25 square feet (2.37 square meters) or more.
- (C) A cover that is closed by an approved automatic device for the automatic fireextinguishing system may be used instead of the fire extinguishing system if the cover:
- (i) Can also be activated manually;
- (ii) Is noncombustible or tin-clad, with the enclosing metal applied with locked joints; and (iii) Is kept closed when the dip tank is not in use.
- (D) In each vapor area and any adjacent area, ensure that:
- (i) All electrical wiring and equipment conform to OAR 437, Division 2, Subdivision S (except as specifically permitted in paragraph (15)); and
- (ii) There are no flames, spark-producing devices, or other surfaces that are hot enough to ignite vapors.
- (E) Electrically bond and ground portable containers used to add liquids to dip tanks to prevent static electrical sparks or arcs.
- (F) All vapor areas must be free of combustible debris and as free as practicable of combustible stock.
- (G) Deposit all rags or waste impregnated with dipping or coating material in a tightlyclosing metal waste can immediately after use. Use only waste cans that are approved or acceptable to the local fire authority.
- (H) Empty all waste containers at the end of each shift.
- (I) Prohibit smoking in all vapor areas. Post a readily visible "No Smoking" sign near each dip tank or designate the entire area as "No Smoking."
- (e) If a conveyor system is used with a dip tank, it must automatically shut down in the event of a fire. If a ventilation system is used to meet the ventilation requirements of paragraph (4), the conveyor system must automatically shut down if the ventilation system fails.
- (f) If a liquid is heated in a dip tank, it must be maintained below the liquid's boiling point, and it must be maintained at least 100° F (37.8° C) below the liquid's autoignition temperature.
- (g) Ensure that a heating system that is used in a drying operation and could cause ignition:
- (A) Is installed in accordance with NFPA 86A-1969, Standard for Ovens and Furnaces (which is incorporated by reference in §1910.6 of this part); and
- (B) Has adequate mechanical ventilation that operates before and during the drying operation; and
- (C) Shuts down automatically if any ventilating fan fails to maintain adequate ventilation.
- (11) Hardening or Tempering Tanks.
- (a) Ensure that hardening or tempering tanks
- (A) Are located as far as practicable from furnaces;
- (B) Are on noncombustible flooring;

- (C) Have noncombustible hoods and vents (or equivalent devices) for venting to the outside. For this purpose, treat vent ducts as flues and keep them away from combustible materials, particularly roofs.
- (b) Equip each tank with an alarm that will sound if the temperature of the liquid comes within 50° F (10° C) of its flashpoint (the alarm set point).
- (c) When practicable, provide each tank with a limit switch to shut down the conveyor supplying work to the tank.
- (d) If the temperature of the liquid can exceed the alarm set point, equip the tank with a circulating cooling system.
- (e) If the tank has a bottom drain, the bottom drain may be combined with the oil-circulating system.
- (f) Do not use air under pressure when filling the dip tank or agitating the liquid in the dip tank.
- (12) Flow Coating.
- (a) Use a direct low-pressure pumping system or a 10-gallon (38 L) or smaller gravity tank to supply the paint for flow coating. In case of fire, an approved heat-actuated device must shut down the pumping system.
- (b) Ensure that the piping is substantial and rigidly supported.
- (13) When roll coating, roll spreading, or roll impregnating operations use a flammable or combustible liquid that has a flashpoint below 140° F (60° C), prevent sparking of static electricity by:
- (a) Bonding and grounding all metallic parts (including rotating parts) and installing static collectors; or
- (b) Maintaining a conductive atmosphere (for example, one with a high relative humidity) in the vapor area.
- (14) Vapor degreasing tanks.
- (a) Ensure that the condenser or vapor-level thermostat keeps the vapor level at least 36 inches (91 cm) or one-half the tank width, whichever is less, below the top of the vapor degreasing tank.
- (b) When using gas as a fuel to heat the tank liquid, the combustion chamber must be airtight (except for the flue opening) to prevent solvent vapors from entering the air-fuel mixture.
- (c) The flue must be made of corrosion-resistant material, and it must extend to the outside. Install a draft diverter if mechanical exhaust is used on the flue.
- (d) Do not allow the temperature of the heating element to cause a solvent or mixture to decompose or to generate an excessive amount of vapor.
- (15) Ensure that cyanide tanks have a dike or other safeguard to prevent cyanide from mixing with an acid if a dip tank fails.
- (16) If a liquid is sprayed in the air over an open-surface cleaning or degreasing tank, control the spraying to the extent feasible by:
- (a) Enclosing the spraying operation; and
- (b) Using mechanical ventilation to provide enough inward air velocity to prevent the spray from leaving the vapor area.
- (17) Electrostatic paint detearing.

- (a) Use only approved electrostatic equipment in paint-detearing operations. Electrodes in such equipment must be substantial, rigidly supported, permanently located, and effectively insulated from ground by nonporous, noncombustible, clean, dry insulators.
- (b) Use conveyors to support any goods being paint deteared.
- (c) Do not manually handle goods being electrostatically deteared.
- (d) Maintain a minimum distance of twice the sparking distance between goods being electrostatically deteared and the electrodes or conductors of the electrostatic equipment.

This minimum distance must be displayed conspicuously on a sign located near the equipment.

- (e) Ensure that the electrostatic equipment has automatic controls that immediately disconnect the power supply to the high-voltage transformer and signal the operator if:
- (A) Ventilation or the conveyors fail to operate;
- (B) A ground (or imminent ground) occurs anywhere in the high-voltage system; or
- (C) Goods being electrostatically deteared come within twice the sparking distance of the electrodes or conductors of the equipment.
- (f) Use fences, rails, or guards, made of conducting material and adequately grounded, to separate paint-detearing operations from storage areas and from personnel.
- (g) To protect paint-detearing operations from fire, use automatic sprinklers or an automatic fire-extinguishing system conforming to the requirements of OAR 437, Division 2, Subdivision F.
- (h) To collect paint deposits, provide drip plates and screens and clean these plates and screens in a safe location.

Stat. Authority: ORS 654.025(2) and 656.726(4).

Stats. Implemented: ORS 654.001 through 654.295.

## Appendix A: Criteria for Ventilation Consensus Standards (Nonmandatory)

This appendix lists ventilation design consensus standards that meet OAR 437-002-0122(4)(c).

ANSI Z9.1-2006, Ventilation and Control of Airborne Contaminants During Open-Surface Tank Operations

ANSI Z9.2-2001, Fundamentals Governing the Design and Operation of Local Exhaust Ventilation Systems

NFPA 34-2007, Dipping and Coating Processes Using Flammable or Combustible Liquids

ACGIH's "Industrial Ventilation: A Manual of Recommended Practice" (25th ed., 2004)

Stat. Authority: ORS 654.025(2) and 656.726(4).

Stats. Implemented: ORS 654.001 through 654.295.
