TRADE AND SERVICE MARK APPLICATION FOR RENEWAL OREGON SECRETARY OF STATE

PLEASE TYPE OR PRINT LEGIBLY IN BLACK INK

1. Correspondent's Mailing Address:

PAUL L HAVEL
111 SW FIFTH AVE STE 3400

PORTLAND OR 97204

2. Applicant's (owner) business address:

ENERGY TRUST OF OREGON, INC.
421 SW OAK STE 300

PORTLAND OR 97204

Renewal date : 7/20/2017

Original file date : 7/17/2012

Trade or Service Mark:

THE WORD "EPS"

3. Attach a separate page with a drawing or photocopy of the mark as it is actually used. Any change in the mark requires a new registration.

The mark is still in use in Oregon. To renew the trademark, complete this section.

4. Class number(s) of Goods or Services:

Complete only if changing class numbers. (See reverse for class list)

To see the filings associated with this trademark go to: <http://sos.oregon.gov/business/Pages/trademarks.aspx>

5. Applicant declares under penalties of perjury that this application is true, correct, and complete.

Signature

6/13/17

Date

6. Person to contact about this registration:

Paul Havel

Name

503-224-5858

Daytime Phone Number

NEXT RENEWAL DUE DATE: The registration is effective for five years from the renewal due date above.

Make checks payable to the Corporation Division. Submit the form and fee to: Corporation Division, Business Registry, 255 Capitol St NE Ste 151, Salem, OR 97310-1327

Fees may be paid with a major creditcard. The card number and expiration date should be submitted on a separate sheet for your protection.

Energy Performance Score
Brought to you by Energy Trust of Oregon

SAMPLE
 NOT AN ACTUAL HOME

EPS is a tool to assess a home's energy cost and carbon footprint.

EPS™ is an energy performance score that measures and rates the net energy consumption and carbon footprint of a newly constructed home. The lower the score, the better — a low EPS identifies a home as energy efficient with a smaller carbon footprint and lower energy costs.

Estimated Monthly Energy Costs

\$111*

Estimated average annual energy costs:

\$1,330*

Location

1234 Example Way
 Portland, OR 97204

YEAR BUILT: 2017

SQ. FOOTAGE: 2,400

EPS ISSUE DATE: 2/1/17

RATED BY: Example Verifier

CCB #: 132456789

Utilities:

Gas: NW Natural

Electric: Portland General Electric

Estimated average energy cost per month: Electric \$64, Natural Gas \$26

Estimated Energy Cost calculated using \$0.11 per kWh and \$1.01 per therm

ENERGY SCALE: Based on home energy use of natural gas, electricity, or energy generated from an installed renewable system.

Energy Score

67

Estimated total annual gross energy usage: Electric (kWh) 9,486, Natural Gas (therms) 315

Estimated average annual energy generation: No system

Estimated average net energy usage: Electric (kWh) 9,486*, Natural Gas (therms) 315

CARBON FOOTPRINT:

Measured in tons of carbon dioxide per year (tons/yr). One ton = 2,000 miles driven by one car (typical 21 mpg car).

Estimated average carbon footprint: Electric (tons/yr) 5.0, Natural gas (tons/yr) 1.8

*Actual energy costs may vary and are affected by many factors such as occupant behavior, weather, utility rates and potential for renewable energy generation. A home's EPS takes into account the energy-efficient features installed in the home on the date the EPS was issued, but does not account for occupant behavior.

42321

EnergyPerformanceScore

brought to you by Energy Trust of Oregon

EPS is a tool to assess a home's energy cost and carbon footprint.

+ Energy-efficient features that contribute to this home's score:

- Insulated Ceiling: R-49
- Efficient Windows: U-0.3
- Space Heating: 95.0 % AFUE Furnace
- Insulated Walls: R-23
- Efficient Lighting: 100.0 %
- Envelope Tightness: 4.0 ACH @ 50Pa
- Insulated Floors: R-38
- Water Heater: Storage 0.93 EF

What was considered in developing this score?

A home's EPS is based on the energy-efficient features listed above as well as the home's size and specific design. Improvements and updates made to the home after the issue date will impact its EPS. EPS does not factor in occupant behavior, and as a result, actual energy costs may vary.

USEFUL TERMINOLOGY

Energy-efficient features

R-Value: Rates the efficiency of insulation. A higher R-Value signals improved performance of floor, ceiling and wall insulation.

U-Value: Indicates the rate of heat loss in windows. A lower U-Value demonstrates the effectiveness of a window, resulting in a more comfortable home.

ACH @ 50Pa: Total air changes per hour at 50 pascals, a low number signifies a properly-sealed home with fewer air leaks.

EF: Energy Factor for water heaters or appliances, the higher the EF, the more energy efficient the model.

Energy Score

A home's EPS is shown on an energy scale that ranges from zero to 200+ and is based on home energy use of natural gas, electricity, or energy generated from an installed renewable system.

Carbon footprint:

A home's energy consumption affects carbon emissions and impacts the environment. The carbon calculation for EPS is based on emissions from the utility-specific electricity generation method and natural gas consumption of the home at the time of this report.

Similar size Oregon home

Energy: The energy consumption of an average Oregon home of similar square footage, heating type and geographical region.

Carbon: The carbon footprint of an average Oregon home of similar square footage, heating type, geographical region and utility mix.

This home if built to code: The estimated annual energy and carbon use for this home if it was just built to the minimum standards allowed under Oregon code at the time of construction without energy-efficient features installed.

Brought to you by Energy Trust of Oregon

Energy Trust developed EPS to educate about energy efficiency and provide a tool to help inform home-buying decisions.

energytrust.org

Energy Trust of Oregon is an independent nonprofit organization dedicated to helping utility customers benefit from saving energy and tapping renewable resources. Our services, cash incentives and energy solutions have helped participating customers of Portland General Electric, Pacific Power, NW Natural, Cascade Natural Gas and Avista save on energy costs. Our work helps keep energy costs as low as possible, creates jobs and builds a sustainable energy future. 1/17
