1. Awards credits or contains or is readily adaptable to contain, a circuit, meter, or switch capable of removing or recording the removal of credits earned by a player, other than removal during the course of continuous play; or
2. Plays, emulates, or simulates a casino game, bingo, or keno. A device is no less a gray machine because, apart from its use or adaptability as such, it may also sell or deliver something of value on the basis other than chance.

"Gray Machine" does not include any device operated under the authority of State law or under the terms of this Compact.

I. "Key Employee" means any officer or any person who can affect the course of business, make decisions, or is in a sensitive position.

J. "High Security Employee" means any person with responsibility for the management or operation of the Class III gaming activities or access to gaming terminals or cash.

K. "Low Security Employee" means any person employed to work in a gaming area with no responsibility for management or operation of the Class III gaming activities and no access to inside gaming terminals or cash.

- L. "Major Procurement" means any procurement action or contract for:
1. The printing of tickets used in any Class III gaming;
 2. Any goods or services involving the receiving or recording of number selections in any Class III gaming;
 3. Any goods, services, or products involving the determination of winners in any Class III gaming; or
 4. Video devices.
- M. "Management Contract" means any contract, subcontract, or collateral agreement between the Tribes and a contractor or between a contractor and a subcontractor if such contract or agreement provides for the management of all or part of a gaming operation.
- N. "Minor Procurement" means any procurement action or contract related to Class III gaming that is neither a Major Procurement nor a Sensitive Procurement. A typical example of this class of procurement is a contract to change the external appearance of a video terminal.
- O. "Owner" means any person or entity that owns 5% or more of the equity ownership of a company, alone or in combination with another person who is a spouse, parent, child or sibling.
- P. "Primary Management Official" means any person who:
1. Is designated as having management responsibility for any part of a Management Contract;
 2. Has authority --
 - a. to hire and fire employees; or
 - b. to set or otherwise establish working policy for the gaming operations; or
 3. Is the chief financial officer or other person who has financial management responsibility for Class III gaming operations.

- Q. "Sensitive Procurement" means any procurement action or contract for goods or services, other than a "Major Procurement," that may either directly or indirectly affect the integrity, security, honesty, and fairness of the operation and administration of Class III gaming. A typical example of this class of procurement is the acquisition of security systems required to protect the security and integrity of the Class III gaming.
- R. "Video lottery terminal" or "terminal" means an electrical or electro-mechanical device, component, or terminal that displays a ticket through the use of a video display screen, and that is available for consumer play upon payment of any consideration, with winners determined by the application of the element of chance and the amount won determined by the possible prizes displayed on the device.

SECTION 4. AUTHORIZED CLASS III GAMING.

- A. Only Compact Between Tribes and State. This Compact shall be the only Compact between the Tribes and State and any and all Class III gaming conducted in the Gaming Facility shall be pursuant to this Compact. To the extent that elements of this Compact need to be altered to incorporate changes to the agreements between the parties -- including to permit additional Class III gaming -- the parties shall provide such changes in accordance with Subsection 11.D. of this Compact.
- B. Authorized games.
1. Subject to the provisions of this Compact, the Tribes may engage in only the following Class III games: Video lottery games of chance as described in Appendix A, keno as described in Appendix B and off-race course mutuel wagering as described in Appendix C.
 2. This section shall be construed consistent with federal classification of gaming activities. Notwithstanding any provision of this Compact, any gaming activity classified by federal regulation as Class II activity shall not be subject to the provisions of the Compact.

C. Gaming Location.

1. The Gaming Facility authorized by this Compact shall be located on the Tribes' land at Coos Bay, Oregon. Both the Gaming Facility and the land are specifically described in Exhibit I to this Compact. This land is held in trust for the Tribes by the United States. Gaming authorized under this Compact shall be conducted only in the Gaming Facility. If another Oregon Tribe is authorized to operate a gaming facility on non-Tribal lands, the Tribes do not hereby abrogate any rights they may have under Section 20 of IGRA.

D. Number of video terminals. The number of Class III video lottery games of chance authorized by this Compact shall not exceed the number of such games that would occupy 15 percent (15%) of the total square footage of the gaming area and related portions of the Gaming Facility under customary industry spacing. The parties acknowledge that the Gaming Facility is a mixed use facility. The parties agree that the size of the Gaming Facility to be devoted to Class III video lottery games of chance is determined by the area of those parts of the facility that are appropriately related to the gaming activities conducted therein (the "gaming area"). The parties also agree that, in combination, the gaming area of the facility and the spacing of video lottery terminals customary in the industry limit the number of video lottery terminals on the gaming floor to no more than 252. Subject to other terms of this agreement, the Tribes may determine in their discretion the location and spacing of video lottery terminals within the Gaming Facility.

E. Expansion of Gaming Area. If the Tribes decide to expand the square footage of the Gaming Facility the parties shall enter into an addendum to this Compact in which the precise number of additional video lottery terminals to be located in the expansion shall be established. The limit on the number of video lottery terminals established in subsection D of this section shall be increased by the number of video lottery terminals that would occupy 15 percent (15%) of the total square footage of the expansion that is devoted to Class II and Class III gaming and related activities, given customary industry spacing of video lottery terminals.

SECTION 5. JURISDICTION.

A. In General.

1. The State shall have criminal jurisdiction over offenses committed by or against Indians and non-Indians within the Gaming Facility and on Tribal trust land on which the Gaming Facility is located; the criminal laws of the State shall have the same force and effect at the gaming location as they have on non-Tribal lands within the State. The State and the Tribes will enter into a Memorandum of Understanding concerning the assignment of law enforcement officers for enforcement of criminal laws of the State.
2. If the Tribes authorize the Tribal Court to hear criminal cases arising on the Tribal Lands, the Tribes and the State shall have concurrent criminal jurisdiction over offenses committed by Indians within the Gaming Facility and on the Tribal Lands on which the Gaming Facility is located. The criminal laws of the State shall have the same force and effect on the Tribal Lands on which the Gaming Facility is located as they have on non-Tribal lands within the State. Once a tribal police force is in operation on the Tribal lands, the enforcement of criminal laws at the Gaming Facility shall be established pursuant to and by a Memorandum of Understanding to be executed by the Tribes and the Oregon State Police.

B. Except as provided in a Memorandum of Understanding executed in accordance with the foregoing paragraph 5.A.2., law enforcement officers of the State of Oregon, or officers designated by the State, shall have free access to anywhere within the Gaming Facility and on Tribal trust land on which the Gaming Facility is located for the purpose of maintaining public order and public safety, conducting investigations related to possible criminal activity and enforcing applicable laws of the State. The Tribes, or individuals acting on its behalf, shall provide State law enforcement officers or officers designated by the State access to locked and secure areas of the Gaming Facility in accordance with the regulations for the operation and management of the gaming operation.

C. The State may station one or more officers, designated in accordance with subsection B of this section, at the Gaming Facility by mutual agreement with the Tribes.

- D. Nothing in this agreement shall be construed to affect the civil or criminal jurisdiction of the State under Public Law 280.

SECTION 6. LICENSING AND CONTRACTING.

A. Licensing of Gaming Employees.

1. All Primary Management Officials and High Security Employees employed in the Gaming Facility shall be licensed by the Tribes in accordance with the provisions of this Compact.
2. All prospective employees -- both High Security Employees and Low Security Employees -- shall provide to the Tribes and the State any required application fees and the following information:
 - a. Full name, including any aliases by which the applicant has been known;
 - b. Social security number;
 - c. Date and place of birth;
 - d. Residential addresses for the past five years;
 - e. Employment history for the past five years;
 - f. Driver's license number and state of issuance;
 - g. All licenses issued and disciplinary actions taken by any State agency or Tribal gaming agency;
 - h. All criminal proceedings, except for minor traffic offenses, to which the applicant has been a party;
 - i. A current photograph.
 - j. Provide the results of a drug test and physical examination upon request of either of the parties to this Compact.
 - k. Any other information required by the Tribes.

3. In addition to the requirements of paragraph 6.A.2. above, prospective High Security Employees shall provide a set of fingerprints.
4. The Tribes shall forward the applicant information to the State, along with the State required portion of the application fee as described in subsection 6.C. The Oregon State Police shall conduct a background investigation and provide a written report to the Tribes approving or disapproving the applicant within a reasonable period of time, but in no event shall such background checks exceed thirty (30) days without notice to and consent of the Tribes. If after investigation, the State determines there is cause to disapprove any applicant under the criteria established in paragraph 6.B.5. below, it shall promptly notify the Tribes of such determination and furnish the Tribes with copies of all relevant information pertaining to such determination.
5.
 - a. If the Oregon State Police disapproves for failure to meet the criteria established in paragraph 6.B.5. below, the Tribes shall not issue a license or approve employment of the applicant.
 - b. The Tribes shall deny a gaming license to any High Security Employee or Primary Management Official who does not meet the criteria established in paragraph 6.B.5. below. Denial of a license by the Tribes is final.
 - c. The Tribes shall not hire any Low Security Employee who does not meet the criteria established in subsection B.5. below.
6. Background investigation during employment. The Tribes or the State may conduct additional background investigations of any gaming employee at any time during the term of employment. If after investigation, the State determines there is cause for the dismissal of any employee under the criteria established in paragraph 6.B.5. below, it shall promptly notify the Tribes of such determination and furnish the Tribes with copies of all relevant information pertaining to such determination, along with a Request for Termination of employment. The Tribes shall review the State's request and supporting materials and if it concludes that good cause for dismissal is shown under the criteria established in paragraph 6.B.5. below, the subject employee shall be dismissed.

7. Temporary licensing of employees.

- a. The Tribes may issue a temporary license to High Security Employees 30 days after submission of the application to the Oregon State Police. The temporary license shall expire and become void upon completion of the background check and award or denial of a permanent license.
- b. The Tribes may employ Low Security Employees on probation 10 days after submission of the application to the state police. Any Low Security Employee shall be subject to immediate termination during probation if the State determines that the employee does not meet the criteria established in paragraph 6.B.5. below.

8. Waiver of Disqualifying Criteria.

- a. If a prospective Primary Management Official, High Security Employee or Low Security Employee is disqualified for licensing or employment under the provisions of paragraph 5. above, and the Tribe believes that there are mitigating circumstances that justify waiver of the disqualifying factor, the Tribe may give written notice to the State asking to meet and confer concerning waiver of the disqualification. The Tribe and the State shall meet within 15 days after written notice is given.
- b. In order to waive disqualification of licensing or employment of any prospective Primary Management Official, High Security Employee or Low Security Employee, both the Tribe and the State must agree on the waiver.
- c. Waiver of disqualification of licensing or employment may be based on one or more of the following circumstances:
 - (1) Passage of time since conviction of a crime;
 - (2) The applicant's age at the time of conviction;
 - (3) The severity of the offense committed;

- (4) The overall criminal record of the applicant;
 - (5) The applicant's present reputation and standing in the community;
 - (6) The nature of the position for which the application is made.
9. Duration of license and renewal. Any employee license shall be effective for not more than three (3) years from the date of issue except that a licensed employee who has applied for renewal may continue to be employed under the expired license until final action is taken on the renewal application in accordance with the provisions of paragraphs 6.A.2. to 6.A.5. above. Applicants for renewal shall provide a renewal fee and updated information to the Tribes but will not be required to resubmit historical data already provided.
 10. Revocation of license. The Tribes may revoke the license of any employee pursuant to policies determined by the Tribes. If the State notifies the Tribes that an employee does not meet the criteria described in paragraph 6.B.5. below, and the Tribes are satisfied of that fact, the Tribes shall revoke the employee's license.
 11. The Tribes shall maintain a procedural manual for employees that includes rules and regulations of conduct and disciplinary standards for breach of procedures.

B. Contracts with Manufacturers and Suppliers.

1. The Tribes shall contract with all managers, manufacturers or suppliers of goods or services related to the play of Class III games authorized by this Compact before conducting any business related to Class III games.

2. The Tribes shall submit all Class III Gaming Contracts to the State for review, comment and approval and such contracts will specifically provide that the State will have such authority. The State must approve all contracts prior to execution. It is agreed that the State can deny a contract only in accordance with criteria established in paragraph 6.B.5. It is further agreed that State action on such contracts shall be completed within 60 days, and that failure by the State to meet this deadline shall create a presumption of approval that can be rebutted for good cause shown. Should the parties fail to agree, then disputes shall be resolved in accordance with Section 15 of this Compact.
3. A background investigation may be conducted by the State on all Class III Gaming Contract applicants or contractors. The level of investigation will be determined by whether the individual procurement is classified as a Major Procurement, Minor Procurement or Sensitive Procurement. The level of investigation for a Major Procurement and Sensitive Procurement shall be more intense than that for a Minor Procurement. If a contract applicant has been approved by the State for a contract with another Tribe, the level of investigation need not be as intense as for a previously unapproved contract applicant.
4. The Tribes and the State shall not approve any Class III Gaming Contract that does not grant the State or the Tribes access to the contractor's business and financial records.
5. Criteria for Denial of Contract Application.
 - a. Unless otherwise specified, the State or the Tribes may deny a Class III Gaming Contract application for any of the following reasons:
 - (1) A conviction of the applicant or any owner or key employee of the applicant for any crime in any jurisdiction;
 - (2) A conviction of the applicant or any owner or key employee of the applicant for any gambling offense in any jurisdiction;

- (3) A civil judgment against the applicant or any owner or key employee of the applicant, based in whole or in part upon conduct that allegedly constitutes a crime;
- (4) A failure to disclose any material fact to the State or the Tribes or their authorized agents during initial or subsequent background or security investigations;
- (5) A misstatement or untrue statement of material fact as determined by the Tribes or the State;
- (6) An association with persons or businesses of known criminal background, or persons of disreputable character, that may adversely affect the general credibility, security, integrity, honesty, fairness or reputation of the Tribes;
- (7) Any aspect of the applicant's past conduct that the Tribes or the State determines would adversely affect the integrity, security, honesty or fairness of Tribal gaming;
- (8) A person who is unqualified or disqualified to be a Class III Gaming Contractor owns, is an agent of or has any other interest in the applicant, regardless of the qualifications of the person who seeks approval as a contractor;
- (9) The applicant demonstrates inadequate financing for the business proposed under the type of contract for which application is made. The Tribes and the State shall consider whether financing is from a source that meets the qualifications of this paragraph 6.B.5. and is in an amount to ensure the likelihood of success in the performance of the contractor's duties and responsibilities; or

- (10) The applicant or its employees fail to demonstrate business ability and experience to establish, operate, and maintain the business for the type of contract for which application is made.
- b. In evaluating whether to deny a contract related to Class III gaming based on subparagraphs 6.B.5.a.(1), (2) and (3) above, the State and the Tribes may consider the following factors:
 - (1) The nature and severity of the conduct that constituted the offense or crime;
 - (2) The time that has passed since satisfactory completion of the sentence, probation, or payment of the fine imposed;
 - (3) The number of offenses or crimes; and
 - (4) Any extenuating circumstances that enhance or reduce the impact of the offense or crime on the security, integrity, honesty, and fairness of the Tribal gaming enterprise.
 - c. No person applying for a Class III Gaming Contract shall own, manufacture, possess, operate, own an interest in, or gain income or reimbursement in any manner from video gaming devices in any jurisdiction unless the devices are approved and certified by another state lottery, gambling or gaming control agency, Indian Tribe, or National Indian Gaming Commission, and such ownership, manufacture, possession, operation, or income is disclosed to and approved by the Tribes and the State.
 - d. The Tribes or the State may reject an application if the applicant has not provided all of the information requested in the application.

6. Revocation of Class III Gaming Contract.

- a. The Tribes may revoke any contract pursuant to policies and procedures determined by the Tribes.
- b. Every Class III Gaming Contract shall provide that the State, although not a party to that contract, may revoke any contract for cause consistent with the criteria established by paragraph 6.B.5. of this section and that the Class III Gaming Contractor shall consent to the State's right to review and revoke all Class III Gaming Contracts. If the State intends to revoke a Class III Gaming Contract under this provision, the State shall first suspend the contract, and give the Tribes notice of the suspension. The Contractor shall have thirty (30) days in which to correct the situation giving rise to the suspension before the contract may be revoked.

7. Contractor Reporting Requirements.

- a. All contractors shall submit to the Tribes and the State any financial and operating data requested by the Tribes or the State.
- b. The Tribes shall specify the frequency and a uniform format for the submission of such data.
- c. The Tribes, the State, or their agents reserve the right to examine contractor tax records and the detailed records from which the tax reports are compiled.

8. Termination of Contract.

- a. No contract shall be in effect for a term longer than five (5) years.
- b. The Tribes and the State shall retain, in each contract, the right to terminate the contract immediately upon the occurrence of any of the following:
 - (1) The contractor is discovered to have made any statement, representation, warranty, or certification in

connection with the contract that is materially false, deceptive, incorrect, or incomplete;

- (2) The contractor fails to perform any material requirements of the contract or is in violation of any material provision thereof, and fails to cure same within ten (10) days' written notice of such failure;
- (3) The Tribes or the State determines satisfactory performance of the contract is substantially endangered or can reasonably anticipate such occurrence or default;
- (4) The Contractor, or any officer or employee of the Contractor or any owner of five percent (5%) or more of the equity ownership in the Contractor is convicted of a felony or a gambling-related offense that reflects on Contractor's ability to perform honestly in carrying out the contract;
- (5) The Contractor jeopardizes the integrity, security, honesty, or fairness of the Tribal gaming operation; or
- (6) Upon transfer of a controlling interest of the Contractor.

C. Fees for Approval of Employment Licenses and Contracts.

1. The State shall be reimbursed its costs for approval of employees, licenses and contracts, in accordance with the terms of this Compact.
2. The fees for State approval of licenses and contracts shall be set pursuant to a Memorandum of Understanding between the parties to be negotiated annually.

3. Should actual costs incurred by the State exceed the fees agreed to by the parties in the annual Memorandum of Understanding, the State will assess those additional costs to the applicants during or after the investigation. The applicant is required to pay the investigation fee in full prior to issuance of the contract or license except that interim contracts or licenses shall be issued for the period of time that a dispute is pending as contemplated at paragraph 6.C.4. below.
4. Should the State and the Tribes fail to agree to fees in the Memorandum of Understanding, the dispute shall be resolved pursuant to Section 15 of this Compact.

D. Management Contracts.

1. The Primary Management Official shall provide the State at all times with a current copy of any management agreement with the Tribes that allows it to conduct Class III gaming on the Tribal trust land.
2. The Primary Management Official shall furnish to the State complete information pertaining to any transfer of controlling interest in the management company at least 30 days before such change; or, if the Primary Management Official is not a party to the transaction effecting such change of ownership or interests, immediately upon acquiring knowledge of such change or any contemplated change.

SECTION 7. REGULATIONS FOR OPERATION AND MANAGEMENT OF CLASS III GAMES.

- A. Video Lottery Games of Chance. The acquisition, use and operation of all video lottery games of chance and keno authorized under this Compact shall be in accordance with the rules and regulations set forth in Appendices A and B. Appendices A and B are hereby incorporated into and made a part of this compact.
- B. Pari-Mutuel Wagering. The operation of off-race course mutuel wagering authorized under this Compact shall be in accordance with the rules and regulations set forth in Appendix C. Appendix C is hereby incorporated into and made part of this Compact.

- C. Identification badges. The Tribes shall require all employees to wear, in plain view, identification badges issued by the Tribes that include photo and name. The Tribes and the State may provide, in a memorandum of understanding, for exceptions to the requirement that badges be worn in plain view, for confidential compliance personnel.
- D. No credit extended. All gaming shall be conducted on a cash basis. Except as provided herein, no person shall be extended credit for gaming nor shall the Tribes permit any person or organization to offer such credit for a fee. This restriction shall not apply to credits won by players who activate play on video games of chance after inserting coins or currency into the games. This section shall not restrict the right of the Tribes or any other person to offer check cashing or install and accept bank card or credit card transactions in the same manner as is permitted at any retail business in the State.
- E. Prohibition on attendance and play of minors. No person under the age of twenty one (21) shall be allowed to play any video lottery game of chance operated under this Compact. If any person under the age of twenty one (21) plays and otherwise qualifies to win any video lottery prize or compensation, the prize or compensation shall not be paid. No person under the age of eighteen (18) shall be allowed to play keno or place or collect pari-mutuel bets. No person under the age of eighteen (18) may work in the gaming area. No person under the age of twenty-one (21) may sell alcohol within the Gaming Facility.
- F. Prohibition of firearms. With the exception of federal, state, county, city or Tribal law enforcement agents or officers, no person shall possess firearms within the Gaming Facility.
- G. Alcohol Policy. No alcohol shall be served in the Gaming Facility unless authorized by the Tribes as permitted by federal law. Currently the Tribes do not legally permit the sale or possession of alcohol within the Coos, Lower Umpqua and Siuslaw Reservation. If Tribal law is changed to permit sales at the Gaming Facility, the Tribes shall notify the State. Service of alcohol shall be in compliance with State laws and Oregon Liquor Control Commission licensing regulations as provided in a memorandum of understanding under this Compact. Nothing in this subsection shall permit the State to impose taxes on the sale of alcohol by the Tribes. If alcohol is served in the Gaming Facility, no alcoholic

beverages may be served free of charge or at a reduced price to any patron of the Gaming Facility as an inducement to participate in any gaming.

- H. Liability for damage to persons and property. During the term of this Compact, the Tribes shall maintain public liability insurance with limits of not less than \$250,000 for one person and \$2,000,000 for any one occurrence for any bodily injury or property damage. The Tribes' insurance policy shall have an endorsement providing that the insurer may not invoke tribal sovereign immunity up to the limits of the policy. The Tribes shall indemnify, defend and hold harmless the State, its officers, directors, employees and agents from and against any claims, damages, losses or expenses asserted against or suffered or incurred by the State or its officers, directors, employees and agents (except as may be the result of their own negligence) based upon or arising out of any bodily injury or property damage resulting or claimed to result in whole or in part from any act or omission of the Tribes relating to the inspection of any gaming or gaming related facility pursuant to this Compact.

SECTION 8. INSPECTION AND ENFORCEMENT OF GAMING REGULATIONS.

- A. Tribal Gaming Commission.
1. The Tribal Gaming Commission shall have primary responsibility for the on-site regulation, control and security of the gaming operation authorized by this Compact, and for the enforcement of this Compact on Tribal Lands. The Tribal Gaming Commission's role shall include the following functions:
 - (1) Ensure compliance with all relevant laws;
 - (2) Ensure the physical safety of patrons in, and of personnel employed by, the establishment;
 - (3) Safeguard the assets transported to and from the gaming facility and cashier's cage department;
 - (4) Protect patrons and property from illegal activity;
 - (5) Detain persons suspected of crimes for the purpose of notifying the law enforcement authorities;

- (6) Record any and all unusual occurrences within the gaming facility in indelible ink in a bound notebook from which pages cannot be removed, and each side of each page of which is sequentially numbered, as follows:
 - (a) The assigned sequential number of the incident;
 - (b) The date;
 - (c) The time;
 - (d) The nature of the incident;
 - (e) The person involved in the incident; and
 - (f) The security employee assigned;
- (7) Maintain logs relating to surveillance, security, cashier's cage, credit, machine (showing when video machines opened), and machine location;
- (8) Establish and maintain an updated list of persons barred from the gaming facility either because of their criminal history or because their association with career offenders or career offender organizations poses a threat to the honesty, security and integrity of gaming operations, and furnish that list to the State;
- (9) Obtain an annual audit by a Certified Public Accountant;
- (10) Maintain a closed circuit television system in the cash room of the gaming facility and provide copies of floor plan and TV system to the State;
- (11) Maintain a cashier's cage in accordance with industry standards for security;
- (12) Employ and train sufficient security personnel; and

(13) Subject to State review and approval, establish a method for resolving disputes with players.

2. Reporting of Violation. A Tribal game inspector shall inspect the Gaming Facility at random during all hours of gaming operation, and shall have immediate access to any and all areas of the gaming operation for the purpose of ensuring compliance with the provisions of this Compact and Tribal ordinances. Any violations of the provisions of this Compact, or of Tribal ordinances by the Tribal gaming operation, a gaming employee, or any person on the premises whether or not associated with the Tribal gaming operation, shall be reported immediately to the Tribal Gaming Commission and reported to the State within seventy-two (72) hours of the time the violation was noted.
3. Investigations and Sanctions. The Tribal Gaming Commission shall investigate any reported violation of the Compact provisions and shall require the Tribal gaming operation to correct the violation upon such terms and conditions as the Tribal Gaming Commission determines to be necessary. The Tribal Gaming Commission shall be empowered by Tribal ordinance to impose fines and other sanctions within the jurisdiction of the Tribes against a gaming employee, or any other person directly or indirectly involved in, or benefitting from, the gaming operation.
4. Reporting to State. The Tribal Gaming Commission shall forward copies of all completed investigation reports and final dispositions to the State on a continuing basis. If requested by the Tribal Gaming Commission, the State shall assist in any investigation initiated by the Tribal Gaming Commission, and provide other requested services to ensure proper compliance with the provisions of this Compact, Tribal ordinances and regulations or applicable laws of the State.

B. State Enforcement of Compact Provisions.

1. Monitoring. The State is authorized hereby to monitor the Tribal gaming operation to ensure that the operation is conducted in compliance with the provisions of this Compact. The State shall have free and unrestricted access to all areas of the Gaming Facility

during normal operating hours without giving prior notice to the Tribal gaming operation.

2. Access to Records. The State is authorized hereby to review and copy, during normal business hours, and upon reasonable notice, all records maintained by the Tribal gaming operation; provided, that any copy thereof and any information derived therefrom, shall be deemed confidential and proprietary financial information of the Tribes to the extent provided under ORS 192.410 to 192.505. Any records or copies removed from the premises shall be returned to the Tribes after use. Nothing in this subsection precludes the State or the Tribes from disclosing information subject to the Rules of Civil Procedure or Evidence in connection with litigation, a prosecution or a criminal investigation.
3. Investigation Reports. After completion of any inspection or investigation report, the State shall provide a copy of the report to the Tribal Gaming Commission.

SECTION 9. STATE ASSESSMENT OF COSTS FOR OVERSIGHT.

- A. Imposition of assessment for State law enforcement and regulatory expenditures. The State shall make annually an assessment sufficient to compensate the State for the reasonable and necessary costs of regulating gaming operations and conducting state law enforcement investigations pursuant to this Compact. The State shall assess only those costs related to gaming. The State acknowledges expressly herein that the extent of oversight is related directly to the size and scope of gaming. Such assessment shall include any costs of fringe benefits for personnel. Fees received with respect to the submission of gaming licenses and contracts pursuant to subsection 6.C. of this Compact shall be subtracted from the amount of the assessment.
- B. Procedure for Assessments. The procedure for assessments shall be determined and agreed upon annually in a Memorandum of Understanding between the parties to this Compact. Such agreement shall include provisions for adjustments of excess assessments and underpayment of costs.
- C. If the parties fail to agree to the assessments under this section, such dispute shall be resolved pursuant to Section 15 of this Compact.

SECTION 10. APPLICATION OF STATE REGULATORY STANDARDS.

- A. Health, environmental and safety standards. Tribal ordinances and regulations governing health, environmental and safety standards applicable to the Gaming Facility shall be at least as rigorous as standards imposed by the laws and regulations of the State. The Tribes agree to cooperate with any State agency generally responsible for enforcement of such health, environmental and safety standards in order to assure compliance with such standards. Tribal ordinances and regulations governing water discharges from the Gaming Facility shall be at least as rigorous as standards generally imposed by the laws and regulations of the State relating to public facilities; provided, however, that to the extent that federal water discharge standards specifically applicable to the Tribal lands would preempt such State standards, then such federal standards shall govern.
- B. Transportation Issues.
1. The Tribes shall provide a traffic impact study, prepared by a qualified traffic engineer registered in the State of Oregon. The study shall evaluate the effect of the proposed Gaming Facility, and any related development proposed by the Tribes as part of the same site, on the state highway system and any city street or county road that may be used by customers as access to the Gaming Facility. The traffic impact study shall determine the impacts of the proposed Gaming Facility and related development on the level of service of the affected highway(s), road(s) or street(s).
 2. A determination whether the Gaming Facility shall be served directly by a state highway or by a city street or county road shall be made by the State and appropriate local officials on a consistent basis with other proposed developments.
 - a. If the Gaming Facility is to be served directly by a state highway, the Tribes shall apply for and obtain a road approach permit under Oregon Administrative Rules, Chapter 734, Division 50, and shall construct the approach and any other necessary improvements in accordance with that permit. A road approach permit shall not be denied because of the proposed use of the Tribes' land. The Tribes shall provide and maintain access from its Gaming Facility onto the

highway that is adequate to meet standards of the Oregon Department of Transportation, or shall enter into agreements with the Oregon Department of Transportation for the provision of such access by the State. The allocation of costs shall be as provided in Oregon Administrative Rule 734-50-020(1), which provides that the costs of constructing the road approach shall be borne by the permit applicant.

- b. If the Gaming Facility is to be served directly by a city street or county road, and indirectly by a state highway, the Tribes shall comply with applicable city or county street or road improvement requirements and satisfying any requirements the State imposes on the county or city relating to access to a state highway.
3. If the Tribes plans additional development of the Gaming Facility site, the Tribes shall advise the appropriate state or local transportation planning officials of the planned development by submitting a master plan. In planning street, road or highway improvements, the Tribes, state and local transportation planning officials shall plan for improvements using the master plan. Construction of street, road or highway improvements may be completed in phases if practicable.
4. Traffic improvements shall be those necessary to maintain the level of service of the affected highway(s), road(s) or street(s), and to provide safe access to and from the Gaming Facility. The Tribes shall not be responsible for improvements to affected high-ways, roads or streets unless the improvements are necessary to correct traffic impacts attributable to the Gaming Facility. For state highways, traffic improvements shall be consistent with the requirements of the State Highway Plan, including improvements necessary to mitigate traffic congestion, and to conform to the Oregon Department of Transportation access management policies. If the Oregon Department of Transportation determines that highway improvements are necessary, the department shall confer with the Tribes concerning the planning, design and construction of those improvements.
5. The Tribes shall pay the reasonable cost of necessary street, road or highway improvements determined to be necessary on the basis of

the traffic impact study and Oregon Department of Transportation requirements. If the Tribes disputes the amount of costs to be paid by the Tribes, the Tribes may initiate the dispute resolution procedure established under section 15 of this Compact.

- C. The Tribes shall report to the Oregon Department of Revenue gambling winnings paid to any person subject to Oregon Personal Income Tax on those winnings whenever the Tribes would be required to report those winnings to the Internal Revenue Service. The information shall be reported in the manner required by the Oregon Department of Revenue.

SECTION 11. EFFECTIVE DATE; TERMINATION; AMENDMENTS.

- A. Effective Date. This Compact shall become effective upon execution by the State and by the Tribes and appropriate federal approval.
- B. Termination. This Compact shall remain in effect until such time as:
 - 1. This Compact is terminated by written agreement of both parties;
 - 2. The State amends its Constitution or laws to criminally prohibit within the State conduct of all of the Class III gaming authorized by this Compact, whether for profit or not for profit;
 - 3. A court of competent authority makes a final determination that all of the Class III games authorized by this Compact are criminally prohibited under the law of the State, and the determination has become final and enforceable;
 - 4. The federal government amends or repeals IGRA so that a Compact is no longer required for the Tribes' exercise of Class III gaming; or
 - 5. Either party materially breaches this Compact; but only after the dispute resolution process set forth in Section 15 of this Compact has been exhausted, and the breach has continued for a period of 60 days after written notice following the conclusion of the dispute resolution process.

C. Automatic Amendment.

1. If a type of Class III game authorized under Section 4 of this Compact is criminally prohibited by an amendment to State statute or Constitution, this Compact shall no longer authorize the Tribes to engage in that type of Class III game, and any provisions in this Compact authorizing such gaming shall be void and of no effect.
2. If a court decides that a Class III game authorized under this Compact is criminally prohibited, this Compact shall no longer authorize the Tribes to engage in that type of Class III game, and any provisions in this Compact authorizing such gaming shall be void and of no effect, but the Tribes shall be required to cease operating that Class III game only if and under the same circumstances and conditions as the State or any other affected person must cease operating the corresponding game under the court's decision.

D. Amendments.

1. Except as provided in subsection 11.C. above, this Compact shall not be amended unless one of the following conditions occur:
 - a. The State becomes a party to another Tribal-State Compact that authorizes a tribe other than the Confederated Tribes of Coos, Lower Umpqua and Siuslaw Indians to engage in any Class III gaming activity or scope of gaming activity not permitted under the terms of this Compact;
 - b. Three years elapse after the effective date of this Compact;
 - c. The State amends State statute or Constitution to expand the type of Class III gaming permitted in the State for any purpose by any person, organization, or entity;
 - d. The State amends any rule or regulation that corresponds specifically to Appendices A, B or C of this Compact, but in such case this Compact shall be subject to amendment only to the extent of the specific rule or regulation.
2. Paragraph 11.D.1. above does not require the State to renegotiate the terms of this Compact that apply to those forms of gaming

previously authorized by Section 4 of this Compact, unless the State voluntarily consents to such renegotiation or as is otherwise provided for in this Compact.

3. Pursuant to paragraph 11.D.1., the State or the Tribes may by appropriate and lawful means, request negotiations to amend, replace or repeal this Compact. In the event of a request for renegotiation or the negotiation of a new agreement, this Compact shall remain in effect until renegotiated or replaced, unless sooner terminated under subsection 11.B. Such request to renegotiate shall be in writing and shall be sent by certified mail to the Governor of the State or the Chair of the Tribes at the appropriate office identified at Section 13 below. If a request is made by the Tribes, it shall be treated as a request to negotiate pursuant to IGRA. All procedures and remedies available under IGRA shall thereafter apply with the exception that the 180-day period for negotiation set forth at 25 U.S.C. 2710(d) shall be 100 days.

SECTION 12. DISCLAIMERS AND WAIVERS.

- A. Gaming at Another Location or Facility. The Tribes hereby waive any right it may have under IGRA to negotiate a Compact for Class III gaming at any other location or facility for a period of three (3) years from the effective date of this Compact.
- B. Status of Class II Gaming. Nothing in this Compact shall be deemed to affect the operation by the Tribes of any Class II gaming as defined in the Act or to confer upon the State any jurisdiction over such Class II gaming conducted by the Tribes.
- C. Prohibition on taxation by the State. Nothing in this Compact shall be deemed to authorize the State to impose any tax, fee, charge or assessment upon the Tribes or any Tribal gaming operation except for charges expressly authorized in accordance with this Compact.
- D. Preservation of Tribal self-government. Nothing in this Compact shall be deemed to authorize the State to regulate in any manner the government of the Tribes, including the Tribal Gaming Commission, or to interfere in any manner with the Tribes' selection of its governmental officers including members of the Tribal Gaming Commission. No licensing or registration

requirement contemplated by this Compact shall be applicable to such officers with respect to their capacity as officers of the Tribes.

- E. This Compact is exclusively for the benefit of and governs only the respective authorities of and the relations between the Tribes and the State. Nothing in this Compact shall be construed as creating or granting any rights to any third party, or as establishing any objection or defense for any third party to any charge, offense or prosecution.

SECTION 13. NOTICES.

All notices required or authorized to be served to the Oregon State Police shall be served by first class mail at the following address:

Lieutenant
Oregon State Police
Lottery Security Section
Salem, OR 97310

All other notices required or authorized to be served shall be served by first class mail at the following addresses:

Legal Counsel to the Governor
Office of the Governor
254 State Capitol
Salem, OR 97310

Chair of the Tribal Council
Confederated Tribes of Coos,
Lower Umpqua and Siuslaw Indians
455 South Fourth
Coos Bay, OR 97420

SECTION 14. SEVERABILITY.

In the event that any section or provision of this Compact is held invalid, or its application to any particular activity is held invalid, it is the intent of the parties that the remaining sections of the Compact and the remaining applications of such section or provision shall continue in full force and effect.

SECTION 15. DISPUTE RESOLUTION.

- A. At the discretion of either party, in the event either party believes that the other party has failed to comply with any requirement of the Compact, that

party may invoke the following dispute resolution procedure in order to foster cooperation and avoid the costs of litigation:

1. The party asserting noncompliance shall serve written notice on the other party in the manner provided in section 13. The notice shall identify the specific provision of the Compact alleged to have been violated and shall specify the factual basis for the alleged noncompliance. The State and the Tribes shall thereafter meet within thirty (30) days in an effort to resolve the dispute.
 2. In the event the dispute is not resolved to the satisfaction of the parties within ninety (90) days after service of notice, either party may initiate an action against the other party in the United States District Court for the District of Oregon to interpret or enforce the provisions of this Compact. In the event that the Federal court declines jurisdiction, an action can be filed in a State court of competent jurisdiction to interpret or enforce the provisions of this Compact.
- B. Nothing in subsection 15.A. shall be construed to waive, limit or restrict any remedy that is otherwise available to either party to enforce the provisions of this Compact or limit or restrict the ability of the parties to pursue, by mutual agreement, alternative methods of dispute resolution.
- C. With respect to gaming not authorized by this Compact, nothing in this Compact shall be construed to limit the authority of the State or the federal government to take immediate action to enforce and prosecute the gambling laws of the State and the United States pursuant to 18 USC §1166 (Section 23 of IGRA).

SECTION 16. INTEGRATION

This compact is the complete and exclusive expression of the parties' intent.

EXECUTED as of the date and year above-written.

Appendix A

I. VIDEO LOTTERY GAMES

APPLICATION FOR CERTIFICATION OF A VIDEO LOTTERY TERMINAL

Section 177-100-070

- (1) A manufacturer shall not distribute a video lottery game or terminal for placement at the Gaming Facility unless the manufacturer and the game have been approved and the terminal has been certified by the State of Oregon. Only approved manufacturers may apply for certification of a video lottery terminal. Any manufacturer approved for Oregon State Lottery shall automatically be approved for the Tribes' gaming enterprise.
- (2) The manufacturer shall supply the Tribes and the State with a guideline and time table for accomplishing tasks involved in the acceptance and testing of the video lottery terminals. This includes all system functionality and communication of all information to and from the video lottery terminals, if any.
- (3) The manufacturer must provide a person to work with the Tribes and the State as needed in establishing, planning, and executing acceptance tests. Manufacturer assistance may also be requested in trouble-shooting communication and technical problems that are discovered when video lottery terminals are initially installed.
- (4) The manufacturer must submit terminal illustrations, schematics, block diagrams, circuit analysis, technical and operation manuals, program source codes and hexadecimal dumps (the compiled computer program represented in base 16 format), and any other information required by the Tribes and the State for purposes of analyzing and testing the video lottery terminal.
- (5) Testing of video lottery terminals will require working models of a video lottery terminal, associated required equipment, documentation described

above to be transported to locations the Tribes and the State designate for testing, examination and analysis. The manufacturer shall pay all costs of any testing, examination, analysis, and transportation of the video lottery terminals. The testing, examination, and analysis of the video lottery terminals may include entire dismantling of the video lottery terminal and some tests that may result in damage or destruction to one or more electronic components of the video lottery terminal. The Tribes or the State may require that the manufacturer provide specialized equipment or the services of an independent technical expert to test the video lottery terminal.

- (6) All video lottery terminal manufacturers must submit all hardware, software, and test equipment necessary for testing of their video lottery terminals.
- (7) Hardware that does not meet the standards of the Compact, its appendices, the Tribes and the State shall not be acceptable.

TRIBAL GAMING INVENTORY DECAL

Section 177-100-080

- (1) Each video lottery terminal certified for placement in the Gaming Facility shall display a Tribal Gaming Inventory Decal and must conform to the exact specifications of terminal prototypes tested and certified by the State.
- (2) No persons other than authorized Tribal or State personnel or their agents may affix or remove a Tribal Gaming Inventory Decal. The placement of the Tribal Gaming Inventory Decal represents that the terminal has been certified, inspected, and approved for operation in the State. The placement of the Tribal Gaming Inventory Decal on any equipment by the Tribal Gaming Commission represents that the terminal has been certified, inspected and approved for operation in the State and shall constitute documentation that the certification has been and will be kept on file by the Tribes. No persons other than authorized tribal personnel may affix or remove the Tribal Gaming Inventory Decal.
- (3) No terminal may be transported off Tribal land until the Tribal Gaming Inventory Decal has been removed.

- (4) A terminal shall not be moved out of the Gaming Facility without prior notification to the State.

EXTERNAL TERMINAL SPECIFICATIONS

Section 177-100-090

- (1) Terminals may publicly display information only on screen or housing that has been approved by the Tribes.
- (2) All information required for external display must be kept under glass or another transparent substance and at no time may stickers or other removable devices be placed on the terminal face.
- (3) Age restriction shall clearly be shown on the face of the terminal ("No person under 21 years of age may play").
- (4) Coin drops and non-video slot machines are prohibited.
- (5) Casino-style attract features shall be restricted but not prohibited.

PROCUREMENT OF TERMINALS

Section 177-100-095

- (1) Terminals to be located and operated within the State of Oregon shall be procured only by the Tribes.
- (2) The Tribes shall select and procure terminals from approved manufacturers pursuant to the Tribal-State Compact.

LOCATION OF AND ACCESS TO TERMINALS

Section 177-100-100

The terminals must be located in an area that is at all times monitored by the owner, manager, or employee of the manager to prevent access or play of video lottery terminals by persons under the age of 21.

DUTIES OF PRIMARY MANAGEMENT OFFICIAL

Section 177-100-110

- (1) No Primary Management Official or any employee of the Primary Management Official shall own or operate any gray machines.
- (2) The Primary Management Official shall not provide any form of financial assistance, or grant credit to enable players to play video lottery games.
- (3) The Primary Management Official shall attend all meetings, seminars, and training sessions required by the Tribes.
- (4) The Primary Management Official shall supervise its employees and their activities to ensure compliance with these rules.
- (5) The Primary Management Official shall assume responsibility for the proper and timely payment to players of video lottery game prizes.

DUTIES OF MANUFACTURERS

Section 177-100-130

Manufacturers, their representatives and agents shall have the following duties and constraints:

- (1) Promptly report to the Tribes any violation or any facts or circumstances that may result in a violation of these rules.
- (2) Provide immediate access to all records and the entire physical premises of the business for inspection at the request of the Tribes, the State or their auditors.
- (3) Provide the Tribes or State with keys to the logic area of each approved video lottery terminal model upon request.

TRANSPORTATION OF VIDEO LOTTERY TERMINALS WITHIN, INTO OR THROUGH THE STATE

Section 177-100-160

- (1) No person shall ship or transport video lottery terminals within or into the State, without first obtaining a written authorization or notification of approval from the State. Transporting or shipping within the State means the starting point and termination point of a trip are both within the boundaries of the State. Transportation or shipping into the State means the starting point is outside the State and terminates in the State.
- (2) No person shall ship or transport video lottery terminals through the State without first obtaining a written authorization from the nearest port of entry immediately upon arrival in the State.
- (3) The written authorization required under Subsections (1) and (2) of this rule shall include:
 - (a) The serial number of each terminal being transported;
 - (b) The full name and address of the person or establishment from which the terminals are obtained;
 - (c) The full name and address of the person or venue to whom the machines are being sent or transported; and
 - (d) The dates of shipment or transport within, into or through the State.
- (4) The written authorization shall accompany, at all times, the terminal or terminals in transport.

II. GENERAL VIDEO LOTTERY GAME RULES

AUTHORIZED VIDEO LOTTERY GAMES

Section 177-200-000

- (1) Video lottery terminals may offer any video lottery game that satisfies the elements of prize, chance and consideration as described in Op. Atty. Gen. No. 6336, September 25, 1989.
- (2) A video lottery terminal may offer one or more of the authorized video games.

GAME REQUIREMENTS

Section 177-200-010

- (1) Each game must display the amount wagered and the amount awarded for the occurrence of each possible winning occurrence based on the number of tickets wagered.
- (2) Each game must provide a method for players to view payout tables.

TICKET PRICE

Section 177-200-015

Except as limited by the terms of the Compact, the price of a ticket for all video lottery games shall be determined by the Tribes.

PAYMENT OF PRIZES

Section 177-200-020

No payment for prizes awarded on a terminal may be made unless the cash slip meets the following requirements:

- (1) It is fully legible and meets all the Tribes' security requirements.
- (2) It must not be mutilated, altered, unreadable, or tampered with in any manner.

- (3) It must not be counterfeit in whole or in part.
- (4) It has been presented by a person authorized to play under these rules.

METHOD OF PAYMENT

Section 177-200-030

The Primary Management Official shall designate employees authorized to redeem cash slips during the Tribes' business hours of operation. Prizes shall be immediately paid in cash or by check when a player presents a cash slip for payment meeting the requirements of these rules. No prizes may be paid in tokens or chips.

REQUIREMENTS FOR RANDOMNESS TESTING

Section 177-200-050

Each video lottery terminal must have a random number generator that will determine the occurrence of a specific card or a specific number to be displayed on the video screen. A selection process will be considered random if it meets the following requirements.

- (1) Each card position, symbol position or, in the case of Keno, each number position satisfies the 99 percent confidence limit using the standard "Chi-squared analysis." "Chi-squared analysis" is the sum of the squares of the difference between the expected result and the observed result. "Card position" means the first card dealt, second card dealt, in sequential order. "Number position" means first number drawn, second number drawn in sequential order, up to the 20th number drawn.
- (2) Each card position, symbol position, or number position does not produce a significant statistic with regard to producing patterns of occurrences. Each card or number position will be considered random if it meets the 99 percent confidence level with regard to the "run test" or any similar pattern testing statistic. The "run test" is a mathematical statistic that determines the existence of recurring patterns within a set of data.

- (3) Each card position, symbol position, or number position is independently chosen without regard to any other card or number drawn within that game play. The test is the "correlation test." Each pair of card or number positions is considered random if they meet the 99 percent confidence level using standard correlation analysis.
- (4) Each card position, symbol position, or number position is independently chosen without reference to the same card or number position in the previous game. This test is the "serial correlation test." Each card or number position is considered random if it meets the 99 percent confidence level using standard serial correlation analysis.
- (5) The random number generator and selection process must be impervious to influences from outside devices including, but not limited to, electro-magnetic interferences, electrostatic discharge and radio frequency interfaces.

**Tribal-State Compact for Regulation of Class III Gaming
Confederated Tribes of Coos, Lower Umpqua and Siuslaw Indians
and the State of Oregon**

Appendix B

KENO DESCRIPTION

DEFINITIONS

Section 177-99-000

For the purposes of Keno, the following definitions apply unless the context requires a different meaning or is otherwise inconsistent with the intention of the rules adopted by the Oregon State Lottery Commission.

- (1) "Exchange ticket" means the ticket issued to replace a consecutive game ticket that is validated before the last game on the ticket.
- (2) "Game" means the opportunity provided to a player to win a prize.
- (3) "Game slip" means the form used to indicate a player's selections.
- (4) "Spot" means the amount of numbers a player may play per game.
- (5) "Winning numbers" means the twenty (20) numbers from one (1) to eighty (80) which are randomly selected for each game.
- (6) "Keno runner" means an individual who picks up and delivers the Keno tickets that are written by customers in the gaming facility.
- (7) "Keno writer" means an individual stationed at the Keno counter who processes received tickets from either the customer or Keno runner.

GAME DESCRIPTION

Section 177-99-010

A Keno ticket has the numbers 1 through 80 on it. For each game a player may select from 1 to 20 numbers or spots. Twenty numbers are selected or drawn randomly.

Prizes are awarded based on the total amount of winning numbers matched by a player for the number of spots played for that game.

PLAY RULES

Section 177-99-020

- (1) To play, a player must use a game slip.
- (2) The player must mark the amount of spots to be played. A player can pick from one (1) to twenty (20) spots per game slip. A player may also play a "way ticket." A way ticket is the equivalent of playing multiple Keno tickets, but marking only one ticket.
- (3) The player must mark the number of dollars to be wagered per game and/or per way.
- (4) The player may then select the spots to be played by one of two methods. The player may mark the player's own selections on the game slip; if this method is used, the number of spots marked on the game slip must equal the number of spots that were selected to play. The other method of play is to select "Quick Pick", the number of spots randomly generated by the computer will match the number of spots indicated by the player.
- (5) The player shall indicate the number of consecutive games to be played: 1, 2, 3, 4, 5, 10, 20, 50 or 100.
- (6) The player shall present the completed game slip and the amount wagered either to a Keno runner or directly to the Keno counter for processing by the Keno writer. The cost of the ticket is equal to the amount wagered times the number of ways you are playing the ticket times the number of consecutive games indicated by the player. For example, if \$2 per game is wagered on a regular (one-way) ticket for 5 consecutive games, the total cost is \$10. If the same ticket is played "3 ways" the cost is \$30.
- (7) Minimum and maximum wagers will be set by the Tribal Gaming Commission.

CANCELLATION OF TICKETS

Section 177-99-030

A game ticket may be canceled or voided provided it is canceled from the system prior to the start of the game.

DETERMINATION OF WINNERS

Section 177-99-040

- (1) Keno tickets will be sold only during the hours of operation of the gaming facility. The selection of winning numbers shall take place at established intervals.
- (2) Winning number combinations shall be generated at the established intervals through the use of a computer-driven random number generator or conventional Keno blower mechanism. The number generating device shall meet the requirements of the Tribal-State Compact pertaining to contracts with manufacturers and suppliers, security, terminal specifications, equipment testing, procurement, duties of manufacturer and requirements for randomness testing.
- (3) The Tribal Gaming Commission shall establish the procedures for the operation and security of the numbers generation equipment.

PRIZE STRUCTURE

Section 177-99-050

- (1) Published payoff schedules shall be made available to the public at all times throughout the facility and in a conspicuous place immediately adjacent to the game.
- (2) A player is eligible to receive only the highest prize per game played on a ticket.

TICKET VALIDATION REQUIREMENTS

Section 177-99-060

- (1) After the numbers are drawn, the manager will review all inside (house copy) tickets and pull all winning tickets.
- (2) A master ticket to verify winners will be produced. The master ticket will have the winning numbers hole punched. This facilitates the verification of the customer's tickets.

**Tribal-State Compact for Regulation of Class III Gaming
Confederated Tribes of Coos, Lower Umpqua and Siuslaw Indians
and the State of Oregon**

Appendix C

I. PARI-MUTUEL RULES - IN GENERAL

OPERATION OF PART-MUTUEL DEPARTMENT

Section 462-50-040

The Tribal Gaming Commission shall require a Primary Management Official to maintain separate oversight of pari-mutuel activities within the Gaming Facility.

PROHIBITIONS AGAINST WAGERS BY MINORS AND EMPLOYEES

Section 462-50-140

- (1) No person under the age of 18 years shall be allowed to place or collect a wager at the off-track wagering facility.
- (2) No employee of the off-track wagering facility shall be allowed to place or collect a wager at the off-track wagering facility while on duty.

UNCLAIMED WINNINGS

Section 462-50-210

- (1) The Tribal Gaming Commission shall require the pari-mutuel wagering facility to maintain, or provide for, an unclaimed winnings account for each race meet in which wagers are accepted.
- (2) The Commission shall require that any person claiming to be entitled to any part of the winnings from a mutuel wagering system operated by the Tribes who fails to claim the money due the person prior to completion of the race meet for which a mutuel ticket was purchased, may file a claim for payment of winnings within 90 days after the close of the race meet. After 90 days from the close of a race meet, all tickets may be deemed void.

- (3) After 120 days after the close of a race meet, unclaimed winnings in the account may revert to the Tribes.

RECORDS

Section 462-50-240

The Tribal Gaming Commission shall assure that sufficient records of wagering are maintained by the pari-mutuel wagering facility to allow review of the opening line, odds fluctuations and the amount of wagers at each window or station.

PARI-MUTUEL TICKETS

Section 462-50-250

- (1) A pari-mutuel ticket is evidence of a contribution to the pari-mutuel pool in which the Tribes are participating, and is evidence of the obligation of the operator of the pool to pay to the holder thereof such portion of the distributable amount of the pari-mutuel pool as is represented by such valid pari-mutuel ticket. The Tribes shall cash all valid winning tickets when such are presented for payment during the course of the race meeting for which the tickets were sold, and for 90 days after the last day of the race meeting.
- (2) To be deemed a valid pari-mutuel ticket, such ticket shall have been issued by a pari-mutuel ticket machine operated by the Tribes and recorded as a ticket entitled to a share of the pari-mutuel pool, and contain imprinted information as to:
 - (a) The name of the Tribes and of the association operating the race meeting;
 - (b) A unique identifying number or code;
 - (c) Identification of the terminal at which the ticket was issued;
 - (d) A designation of the performance for which the wagering transaction was issued;
 - (e) The contest number for which the pool is conducted;

- (f) The type or types of wagers represented;
 - (g) The number or numbers representing the betting interests for which the wager is recorded;
 - (h) The amount or amounts of the contributions to the pari-mutuel pool or pools for which the ticket is evidence.
- (3) The Tribes may withhold payment and refuse to cash any pari-mutuel ticket deemed not valid. A ticket is not valid if it has been recorded or reported as previously paid, canceled or non-existent.

PARI-MUTUEL TICKET SALES

Section 462-50-260

- (1) Pari-mutuel tickets shall not be sold by anyone other than the Tribes or a licensed employee of the Tribes.
- (2) No pari-mutuel ticket may be sold on a contest for which wagering has already been closed and the Tribes shall not be responsible for ticket sales entered into but not completed by issuance of a ticket before wagering is closed on that contest.
- (3) Claims relating to a mistake on an issued or unissued ticket must be made by the bettor before leaving the seller's window. Once a bettor has left the window all bets are final, except as provided by rule of the Tribal Gaming Commission.
- (4) Payment on winning pari-mutuel wagers shall be made on the basis of the order of finish as posted and declared "official." Any subsequent change in the order of finish or award of purse money as may result from a subsequent ruling by race stewards or the regulatory body governing the race meet shall in no way affect the pari-mutuel payoff.
- (5) The Tribes are not required to satisfy claims on lost, mutilated or altered pari-mutuel tickets, except as provided in rules of the Tribal Gaming Commission.
- (6) The Tribes are not obligated to enter a wager into a betting pool if unable to do so due to an equipment failure.

CLAIMS FOR PAYMENT FROM PARI-MUTUEL POOL

Section 462-50-280

- (1) At a designated location, a written, verified claim for payment from a pari-mutuel pool shall be accepted by the Tribes in any case in which the Tribes have withheld payment or have refused to cash a pari-mutuel wager. The claim shall be made in the manner and on such form as prescribed by the Tribal Gaming Commission.
- (2) In the case of a claim made for payment of a mutilated pari-mutuel ticket that does not contain the total imprinted elements required in section 462-50-250, the manager of the pari-mutuel department shall make a recommendation to accompany the claim to the Tribal Gaming Commission as to whether or not the mutilated ticket has sufficient elements to be positively identified as a winning ticket.
- (3) In the case of a claim made for payment on a pari-mutuel wager, the Commission shall adjudicate the claim and order payment, deny the claim or make such other order as it may deem proper.

PAYMENT FOR ERRORS

Section 462-50-290

If an error occurs in the payment amounts for pari-mutuel wagers that are cashed or entitled to be cashed; and as a result of the error the pari-mutuel pool involved in the error is not correctly distributed among winning ticket holders, the following shall apply, unless otherwise provided in the rules governing any interstate pari-mutuel pool in which the Tribes participate:

- (1) The Tribes shall verify that the amount of the commission, the amount of breakage and the amount of payoffs is equal to the total gross pool. If the amount of the pool is more than the amount used to calculate the payoff, the underpayment shall revert to the Tribes.
- (2) If the error results in an overpayment to winning wagers, the Tribes shall be responsible for such payment.

COMPLAINTS CONCERNING PARI-MUTUEL OPERATIONS

Section 462-50-350

- (1) When a patron makes a complaint concerning the pari-mutuel department to the Tribes or the Primary Management Official, a complaint report shall be prepared. The report shall contain the following information:
 - (a) The name of the complainant;
 - (b) The nature of the complaint;
 - (c) The name of the person(s), if any, against whom the complaint was made;
 - (d) The date of the complaint;
 - (e) The action taken or proposed to be taken, if any, by the Tribes or Primary Management Official.
- (2) The complaint report shall be submitted to the Tribal Gaming Commission as required by the Commission.

II. OFF-TRACK PARIMUTUEL WAGERING

DEFINITIONS

Section 462-50-400

The following definitions shall apply to these rules unless the text otherwise requires.

- (1) "Authorized User" means a person authorized by the Tribes to receive, to decode and to use for legal purposes the encrypted simulcast signal of racing events.
- (2) "Combined Pari-Mutuel Pools," or "Combined Pools" means the pari-mutuel wagers at one or more off-track wagering facilities being contributed into the pari-mutuel pools of a host association.
- (3) "Commission" means the Tribal Gaming Commission.
- (4) "Host," "Host Association," or "Host Track" means the race track conducting a licensed race meet that is being simulcast.
- (5) "Intrastate Wagering" means pari-mutuel wagering at an off-track wagering facility on Oregon racing events being run at an Oregon host association.
- (6) "Off-Track Wagering" means pari-mutuel wagering conducted on a race at a location other than the race course where the race is actually held.
- (7) "Off-Track Wagering Facility," "Intrastate Wagering Facility" or "Extended Wagering Facility" means physical premises, utilized for the conduct of pari-mutuel wagering on racing events being run elsewhere.
- (8) "Simulcast" or "simulcasting" means live audiovisual electronic signals emanating from a race meeting and transmitted simultaneously with the running of the racing events at that meeting, and includes the transmission of pari-mutuel wagering odds, amounts wagered and payoff on such events, and other racing programming relating to the race animals or participants.

OFF-TRACK WAGERING RULES

Section 462-50-420

No person, partnership, corporation or other entity shall be allowed to operate an off-track wagering facility under this Compact except according to the rules of the Tribal Gaming Commission. No change in the plan of operation of an off-track wagering facility may occur until the change to the plan is approved by the Commission.

APPROVAL OF OFF-TRACK WAGERING FACILITIES

Section 462-50-430

The Commission's rules shall require an off-track wagering facility to:

- (1) Provide security measures adequate to assure personal safety of patrons and employees, safeguard transmission of simulcast signals, secure money used for pari-mutuel wagering activity and to control the transmission of wagering data to effectuate common wagering pools.
- (2) Use data processing, communication and transmission equipment that will at all times assure accurate and secure transmission of wagers, take outs and surcharges; program information, weight changes, over weights, tip sheets, scratches, and all other information that is usually made available to patrons at a race track.
- (3) Use adequate transmitting and receiving equipment of acceptable broadcast quality.
- (4) Assure that all equipment is in proper working order, and that sufficient back up equipment is available to prevent foreseeable interruptions in operations due to breakdowns or malfunctions of data, transmission or communications equipment.
- (5) Use a system of accounts that will maintain a separate record of pari-mutuel revenues collected by the simulcast facility, the distribution of those revenues (take out, breakage and return to the public) and account for costs of the simulcast operation.

- (6) Provide, or obtain access to, the necessary totalizator equipment to conduct simulcast wagering, and assure that the integrity of the tote system used by the off-track wagering facility is maintained.
- (7) Ensure correct payment of the distributable amounts of parimutuel pools held by the Tribes pursuant to the rules applicable to the combined pools in which the off-track wagering facility is participating, and rules of the Commission.
- (8) Ensure that patrons of the off-track wagering facility receive accurate information as to the rules for wagering and distribution of winnings that apply to each race.
- (9) Ensure that personnel employed in the off-track wagering facility are sufficiently trained in the areas of money handling, operation of tote and ticket generating equipment and communications equipment.
- (10) Provide for continuous viewing and continuous transmission of odds for the race meets on which wagers will be accepted by the off-track wagering facility.

FINANCIAL REPORTS

Section 462-50-440

The Commission shall provide for the audit of the pari-mutuel operations at an off-track wagering facility. The audit shall enable review of the financial records related to each separate betting pool in which patrons of the facility participate.

GENERAL OPERATIONS

Section 462-50-460

The Commission shall provide for sufficient communications capability with the disseminator of a simulcast signal to assure accurate transmission and receipt of wagering and odds information. The Commission shall provide for immediate, uninterruptible communication by voice and by other data transmission media in order to be able to respond in a timely way to any operational problem with equipment or any problem related to the conduct of a race meet that would affect wagering at the off-track facility.

UNUSUAL SITUATIONS IN OFF-TRACK WAGERING

Section 462-50-480

The Commission shall establish procedures for responding to loss of audio or video signal at the off-track wagering facility. In the case of loss of signal, the Commission's rules shall assure that unless an alternative means of displaying odds is provided, wagering shall cease until signal can be re-established.

INTERSTATE COMMON POOL WAGERS

Section 462-50-490

- (1) Pursuant to the Interstate Horseracing Act of 1978 (15 USC §3001 to 3007), the Tribal Gaming Commission shall obtain consent from the Oregon Racing Commission in order to participate in interstate common pools.
- (2) The Tribal Gaming Commission shall require any wagers in interstate common pools to be accounted for separately other than for purposes of computing odds and calculating payoffs and breakage.

GUEST STATE PARTICIPATION IN INTERSTATE COMMON POOLS

Section 462-50-500

The Tribal Gaming Commission shall provide rules for the combination of pari-mutuel wagering pools with corresponding pools in multiple jurisdictions. Those rules shall govern the adjustment of takeout rates and merging of bets placed in an interstate common pool.

**Tribal-State Compact for Regulation of Class III Gaming
Confederated Tribes of Coos, Lower Umpqua and Siuslaw Indians
and the State of Oregon**

EXHIBIT I

DESCRIPTION OF GAMING LOCATION

That tract of land conveyed to Confederated Tribes of Coos, Lower Umpqua and Siuslaw by Quit Claim deed recorded January 22, 1985, bearing Microfilm Reel No. 85-1-1243, Records of Coos County, Oregon and platted by BLM Cadastral Surveyor Harvey E. Wofford on metes and bounds survey to Parcel A in Section 20, Township 25 South, Range 13 West of the Willamette Meridian, Coos County, Oregon, approved March 7, 1986, and further described as follows:

Beginning at a 3/4 inch diameter iron pipe in the A.N. Foley Donation Land Claim No. 38 in Section 20, Township 25 South, Range 13 West of the Willamette Meridian, Coos County, Oregon, from which point the corner of Sections 20, 21, 28 and 29 in said Township and Range bears South 23 degrees 21' East 3756.72 feet; thence South 45 degrees 06' West 733.72 feet to a stainless steel post with brass cap; thence North zero degrees 29' West a distance of 933.57 feet to a stainless steel post with brass cap; thence North 89 degrees 32' East a distance of 94.97 feet to a stainless steel post with brass cap; thence South 46 degrees 05' East a distance of 600.40 feet to the point of beginning.

DESCRIPTION OF GAMING FACILITY

The Gaming Facility is a building of approximately 25,250 square feet, consisting of the following major areas: Reception area of 930 square feet; Bingo Hall of approximately 7,680 square feet; Class III Gaming Room of approximately 4,125 square feet; Kitchen, dining and lounge areas of approximately 5,240; Gift Shop of approximately 750 square feet; Administration area of approximately 5,675 square feet; Restrooms of approximately 1,800 square feet; meeting rooms of approximately 1,500 square feet.

The Gaming Facility will be as illustrated in this Exhibit, or an alternate design similar in all material respects.

**AMENDED AND RESTATED
TRIBAL-STATE COMPACT FOR REGULATION
OF CLASS III GAMING BETWEEN THE COQUILLE TRIBE OF INDIANS
AND THE STATE OF OREGON**

PREAMBLE.

This amended and restated Compact is made between the State of Oregon (hereinafter "State") and the Coquille Tribe of Indians (hereinafter the "Tribe") and pertains to Class III gaming conducted on lands that are held in trust for the Tribe as part of the Tribe's Reservation, restored to federal recognition pursuant to P.L. 101-42 and 25 USC § 715-715e, and that are subject to the provisions of the Indian Gaming Regulatory Act of October 17, 1988 (Public Law 100-497), 25 U.S.C. 2701 et seq. ("IGRA"). The terms of this Compact are unique to this Tribe.

SECTION 1. TITLE.

THIS amended and restated Compact is entered into this ___ day of _____, 2000, by and between The Coquille Tribe of Indians, a federally recognized Tribe of Indians, and the State of Oregon. Upon execution by the parties and approval by the Secretary of the Interior, this amended and restated Compact replaces the Compact entered into between the parties on December 8, 1994, and approved by the Secretary of the Interior on February 16, 1995, and all amendments thereto.

SECTION 2. FINDINGS.

WHEREAS, the Tribe is a federally recognized Indian Tribe and is the beneficial owner of, and government for, the trust lands of the Tribe located in the State of Oregon;

AND WHEREAS, the State and the Tribe are separate sovereigns and each respects the laws of the other sovereign;

AND WHEREAS, the public policy of the State is reflected in the Constitution, statutes and administrative rules of the State;

AND WHEREAS, the tribal public policy, as reflected in the Tribe's Constitution and ordinances adopted by the Tribe, is to exercise and retain its rights to regulate gaming activities upon its lands and reservation for the purposes of encouraging Tribal employment, economic and social development and funding of Tribal services while ensuring fair and lawful operation of gaming and the prevention of corrupt and criminal influences;

AND WHEREAS, the United States Congress has enacted IGRA which declares federal policy and provides a statutory basis for operation of gaming by the Tribe as a means of promoting tribal economic development, self-sufficiency, and strong tribal government;

AND WHEREAS, the Tribe exercises authority over Tribal trust land that was restored to the Tribe pursuant to P.L. 101-42;

AND WHEREAS, the Secretary of the Interior has determined that the gaming location is on land described in 25 USC §2719(b)(1)(B)(iii);

AND WHEREAS, IGRA is intended to provide a statutory basis for regulation of gaming by the Tribe adequate to shield it from organized crime and other corrupting influences, to ensure that the Tribe is the primary beneficiary of the gaming revenues, and to ensure that gaming is conducted fairly and honestly by both the operators and players;

AND WHEREAS, the continued growth and success of tribal gaming depends upon public confidence and trust that the Tribal Gaming Operation is honest, fair and secure, and is free from criminal and corruptive influences;

AND WHEREAS, public confidence and trust can be maintained only if there is strict compliance with laws and regulations related to licensed gaming establishments, by all persons involved in the gaming operation;

AND WHEREAS, the relationship between the State and the Tribe rests on mutual trust and the recognition that each has a primary duty to protect the gaming public through separate, appropriate responsibilities during the life of current and future Compacts;

AND WHEREAS, the Tribe and the State agree that state regulation of Indian gaming in the State of Oregon will be funded by the Indian gaming industry;

AND WHEREAS, Congress has declared that it is a principal goal of federal Indian policy to promote tribal economic development, tribal self-sufficiency and strong tribal government;

AND WHEREAS, IGRA provides for a system of joint regulation by Indian Tribes and the Federal government (to the exclusion of the State) of Class I and II gaming on Tribal lands as defined in IGRA;

AND WHEREAS, IGRA establishes a system of agreements between Indian Tribes and States for the regulation of Class III gaming as defined in that Act;

AND WHEREAS, IGRA provides that Class III gaming activities are lawful on Tribal lands only if such activities are (1) located in a state that permits such gaming for any purpose by any person, organization or entity, (2) authorized by tribal ordinance, and (3) conducted in accordance with a Tribal-State Compact;

AND WHEREAS, the Congressional intent in passing IGRA was to reaffirm a long and well-established principle of federal Indian law as expressed in the United States Constitution, reflected in federal statutes and articulated in decisions of the United States Supreme Court that unless authorized by an act of Congress, the jurisdiction of State governments does not extend to Tribal lands;

AND WHEREAS, IGRA does not extend State jurisdiction or the application of State laws for any purpose other than jurisdiction and application of State laws directly related to gaming conducted on Tribal land as set forth in this Compact;

AND WHEREAS, Congress recognized a role for State public policy and State law in the regulation of Class III Gaming;

AND WHEREAS, nothing in the Tribal-State Compact shall be construed to extend to any other activities or as an abrogation of other reserved rights of the Tribe or of the Tribe's sovereignty;

AND WHEREAS, IGRA is intended to expressly preempt the field in the governance of gaming activities on Tribal lands;

AND WHEREAS, the State recognizes the Tribe's continuing cooperation with the State in assuring the honesty, integrity and security of the gaming operation and the Tribe's commitment to an effective working relationship with the Oregon State Police;

AND WHEREAS, the State recognizes that the Tribe's gaming operation provides essential employment, substantial tax revenue, and significant commerce which directly benefit surrounding non-Indian communities;

AND WHEREAS, the Tribe is authorized to act through Resolutions adopted by its Tribal Council;

AND WHEREAS, the State of Oregon is authorized to act through the Governor of the State;

NOW THEREFORE, in consideration of the mutual undertakings and agreements herein set forth, the Tribe and the State enter into the following Compact:

SECTION 3. DEFINITIONS.

As used in this Compact, and in its Appendix and Exhibit:

- A. "Average Daily Drop" means, in the context of Section 4(D), the difference between the total wagers on VLTs made in a day, and the total prizes paid on VLTs on that day, with that difference divided by the number of VLTs available for play on the gaming floor on that day:

$$\frac{(\text{Total wagers} - \text{Total Prizes})}{\text{VLTs}}$$

The Average Daily Drop for a certain period is the total of the Average Daily Drops for each day in that period, divided by the number of days in that period:

$$\frac{\text{Total Average Daily Drop for period}}{\text{Days in period}}$$

- B. "Background investigation" means a security and financial history check of an applicant for a Class III Tribal gaming license, whether the applicant is a prospective employee, consultant, contractor or vendor.
- C. "Certification" means the inspection process used by the State and the Tribe to approve Class III gaming equipment for use in the Gaming Facility.
- D. "Class III Gaming Contract" means a contract that involves Major or Sensitive Procurements.
- E. "Class III Gaming Contractor" is any individual, business or other entity that applies for or is a party to a Class III Gaming Contract.
- F. "Consultant" means any person, other than an employee, who provides advice or expertise to the Tribe concerning the operation, management or financing of the Tribe's Class III gaming activities for compensation. "Consultant" does not include a person engaged for the purpose of training or teaching employees of the Tribal Gaming Operation if the contract for those services is no greater than ninety days in duration, or attorneys or accountants performing those functions.
- G. "Controlling interest" means fifteen percent (15%) of the equity ownership of a company.
- H. "Counter Game" means keno, race and sports book and off-race course mutuel wagering.
- I. "Gaming Facility" means any building, structure and grounds at the location specifically described in Exhibit I to the Compact, which is hereby incorporated by reference, and

any property that is used by the Tribe in connection with Class III gaming, including any property used to store gaming equipment.

- J. "High Security Employee" means any natural person who participates in the operation or management of the Class III Tribal Gaming Operation, whether employed by the Tribe or by a person or entity providing on-site or off-site gaming operation or management services to the Tribe, including but not limited to: gaming operations administrators, managers and assistant managers, gaming facility surveillance or security personnel, dealers, croupiers, shift supervisors, cage personnel (including cashiers and cashier supervisors), drop and count personnel, gaming management consultants, video lottery terminal technicians, junket representatives; and any other person whose employment duties require or authorize access to areas of the Gaming Facility related to Class III gaming and which are not otherwise open to the public.
- K. "Key Employee" means any officer or any person who can substantially affect the course of business, make decisions, or is in a sensitive position in an organization or corporation that is a Class III Gaming Contractor or applicant for a Tribal gaming license.
- L. "Low Security Employee" means any employee of the Tribal Gaming Operation whose duties require the employee's presence in any area of the Gaming Facility where Class III gaming activities take place, but who is not a High Security Employee and who is not involved in the operation of Class III gaming.
- M. "Major Procurement" means any procurement action or contract for goods, services or products used in the operation of Class III games, including but not limited to:
 - 1. The printing of tickets used in any Class III gaming;
 - 2. Any goods or services involving the receiving or recording of number selections in any Class III gaming;
 - 3. Any goods, services, or products involving the determination of winners in any Class III gaming;
 - 4. Video devices or other equipment used in Class III games that may affect the integrity, security, honesty or fairness of the operation and administration of Class III gaming; except equipment specifically included in the definition of sensitive procurement.
 - 5. A contract or license to use a patented Class III game or game product.
 - 6. Accounting systems or surveillance systems to be used in the Tribe's Class III gaming activities;
 - 7. A contract that provides for, or the terms of which will make necessary, a continuing relationship over time (more than thirty days) between the parties; or

8. A contract that involves or requires commitments by either party to the contract such that there would be substantial financial consequences to one of the parties if the contract or procurement action was terminated prematurely. For this purpose a contract involving consideration or value of \$100,000 or more shall be deemed to involve substantial financial consequences to one of the parties if the contract or procurement action was terminated prematurely.
- N. "Mill Casino Net Income" means the net income of the Mill Casino operations, which includes Class III gaming, restaurant, bar, gift shop, bingo, pull tabs, and entertainment.
- O. "Minimum Internal Controls" means the Tribal/State "Minimum Standards for Internal Controls" attached as the Appendix to this Compact, including revisions made pursuant to Section 8(A) of this Compact.
- P. "Oregon State Police" or "OSP" refers to the Gaming Enforcement Division, or that administrative unit, of the Department of State Police established under Oregon Revised Statutes section 181.020, charged with gaming enforcement regulatory responsibilities, or its successor agency established by law.
- Q. "Owner" means any person or entity that owns five percent (5%) or more of the equity ownership of a company, alone or in combination with another person who is a spouse, parent, child, or sibling.
- R. "Primary Management Official" means any person who:
1. Has administrative or high-level management responsibility for part or all of the Class III gaming operation, whether as an employee or under a management contract;
 2. Has authority --
 - a. to hire and fire Class III supervisory employees; or
 - b. to set or otherwise establish working policy for the gaming operations; or
 3. Is the chief financial officer or other person who has financial management responsibility for Class III gaming operations.
- S. "Sensitive Procurement" means any procurement action or contract that is not a "Major Procurement," for Class III gaming equipment (such as cards, dice, keno balls, roulette wheels, roulette balls, chips, tokens, VLT or keno paper, gaming tables, table layouts or the like), or any other products that are not used directly in the conduct of Class III gaming, but that directly affect the integrity, security, honesty, and fairness of the operation and administration of the Tribe's Class III gaming activities, such as

replacement parts for video lottery terminals (bill acceptors, printers), locks and keys for secure storage areas or gaming devices, or individual surveillance cameras.

- T. "Table game" means any Class III game allowed under this Compact except video lottery games, keno, off-race course mutuel wagering, and race book.
- U. "Tribal Gaming Commission" or "Coquille Gaming Commission" means the entity established pursuant to tribal law with independent authority to regulate gaming activities on tribal lands.
- V. "Tribal Gaming Operation" means the entity, whether or not separately incorporated, that operates Class III gaming under tribal authority, and receives revenues, issues prizes and pays expenses in connection with Class III games authorized under this Compact.
- W. "Tribal Gaming Code" means the code adopted by the Tribe to govern the conduct of Class III gaming, as well as non-Class III gaming activities, as required by IGRA, including subsequent amendments.
- X. "Video Lottery Terminal" or "Terminal" means any electronic or other device, contrivance or machine where the game outcome decision-making portion of the overall assembly is microprocessor controlled wherein the ticket or game outcome is displayed on a video display screen, electronically controlled physical reels, or other electronic or electro-mechanical display mechanism and that is available for consumer play by one player at a time at the device upon payment of any consideration, with winners determined by the application of the element of chance and the amount won determined by the possible prizes displayed on the device and which awards game credits. Such device shall also display both win amounts and current credits available for play to the player.

SECTION 4. AUTHORIZED CLASS III GAMING.

- A. Only Compact between the Tribe and the State. This Compact shall be the only Compact between the Tribe and State pursuant to IGRA and any and all Class III gaming conducted in the Gaming Facility shall be pursuant to this Compact. To the extent that elements of this Compact need to be altered to incorporate changes to the agreements between the parties, the parties shall provide such changes in accordance with Subsection 12(D) of this Compact.
- B. Authorized games.
1. Subject to, and in compliance with the provisions of this Compact, the Tribe may engage in the following Class III games:
 - a. Video lottery games of chance which meet the specifications set forth in the Appendix. The Oregon State Constitution prohibits video lottery terminals that dispense coins, which is reflected in the Minimum Internal Controls. Accordingly, all Video Lottery Terminals shall comply with that definition in the Minimum Internal Controls, unless and until there is a final enforceable court order requiring the state to negotiate regarding Video Lottery Terminals that dispense coins.
 - b. keno,
 - c. off-race course pari-mutuel wagering,
 - d. blackjack,
 - e. craps,
 - f. roulette,
 - g. pai-gow poker,
 - h. Caribbean stud poker,
 - i. let-it-ride,
 - j. mini-baccarat,
 - k. big 6 wheel.
 - l. Off track pari-mutuel racing, except that no wagers may be accepted by telephone, except to accomplish off-race course mutuel wagering as permitted by state law.

Any off-track parimutuel wagering held at race courses outside the state shall be conducted in compliance with the applicable requirements of the interstate Horseracing Act of 1978, as amended 15 USC § 3001-3007.

2. Subject to, and in compliance with, the provisions of this Compact, the Tribe may engage in any other Class III game that has been approved by the Nevada Gaming Control Board. Operation of any game under this paragraph must be pursuant to rules, procedures and internal controls for the new game at least as stringent as the Tribal/State Minimum Internal Control Standards set forth in the Appendix to this Compact.
3. a. Before the Tribe offers a new game under subsection 4(B)(2), the Tribe and the State must agree that the Tribe has adopted appropriate internal controls, surveillance plans, game rules and procedures, as provided in subsection E of this section, and the Tribal Gaming Commission and the State shall be adequately prepared to regulate and monitor the new game. The State will not unreasonably withhold its agreement. The State shall be deemed to be adequately prepared to fulfill its regulatory and monitoring roles regarding the new game 180 days from the Tribe's notice pursuant to Section 4(E)(1).
- b. The Tribe and State make use of the Nevada Gaming Control Board decisions for convenience only. Nothing herein shall be interpreted as granting the Nevada Gaming Control Board jurisdiction over Tribal gaming activities in any form, whatsoever. In the event the State of Nevada changes its regulatory structure, or otherwise changes its laws to restrict the scope of permissible games, the Tribe and the State agree to substitute the Nevada Gaming Control Board with a comparable body of another state or national government, or otherwise agree to establish a comparable body at the State and/or tribal level.

The Tribe shall not offer any Class III games other than those authorized pursuant to Sections 4(B)(1) and (2) of this Compact.

4. This section shall be construed consistent with federal classification of gaming activities. Notwithstanding any provision of this Compact, any gaming activity classified by federal regulation as a Class II activity shall not be subject to the provisions of the Compact. The State and Tribe will enter into a memorandum of agreement regarding the manner in which gaming will be regulated if and when Class II and Class III gaming activities are intermingled.

5. No wagers may be placed or accepted over the internet or by any telecommunications system or device, except to accomplish off-race course mutuel wagering as permitted by state law.

C. Gaming Location. The Gaming Facility authorized by this Compact shall be located on the Tribe's trust land at North Bend, Oregon. The site of the Gaming Facility is specifically described in Exhibit I to this Compact. Gaming authorized under this Compact shall be conducted only in the Gaming Facility.

D. Number of Video lottery terminals.

1. The number of Class III video lottery games of chance authorized by this Compact shall not exceed 750, except as authorized pursuant to Section 4(D)(2) of this Compact. Subject to other terms of this agreement, the Tribe may determine in its discretion the location and spacing of video lottery terminals within the Gaming Facility.
2. The Tribe may request authorization for additional Class III Video Lottery Terminals as follows. When the Tribal Gaming Operation has maintained 550 or more Class III Video Lottery Terminals at an Average Daily Drop agreed on by the parties in a memorandum of understanding, for each of any three consecutive months chosen by the Tribe, the Tribe may request an increase in the authorized number of Class III Video Lottery Terminals. There shall be no increase of authorized Video Lottery Terminals prior to execution of the memorandum of understanding. The Tribes shall make the request in writing to OSP. Upon verification of the Average Daily Drop by OSP, the number of authorized Class III Video Lottery Terminals will increase to 850. Pursuant to the same procedures, the Tribe may request authorization for additional Video Lottery Terminals according to the following formula. When the Tribal Gaming Operation has maintained 700 Video Lottery Terminals at the agreed upon Average Daily Drop for each of any three consecutive months chosen by the Tribe, the number of Video Lottery Terminals authorized will increase to 1000. Once the OSP has verified the requisite Average Daily Drop provided pursuant to this subsection, the number of authorized Video Lottery Terminals shall automatically be increased as provided herein, without need to execute a Compact amendment.

3. After the Tribe is authorized to have 1000 Video Lottery Terminals, the Tribe may request negotiations regarding amending the compact to increase the number of authorized Video Lottery Terminals, pursuant to Section 12(D). In such an event, the scope of the Compact Amendment shall be limited to the Tribe's economic justification for the increase in the number of authorized Class III Video Lottery Terminals, and issues directly related to the requested increase in the number of authorized Class III Video Lottery Terminals, unless otherwise agreed by the parties. Such amendments shall not be in effect until approved by the Secretary or as otherwise provided under IGRA.
4. The Tribe may maintain Video Lottery Terminals that it is not using in on site storage at the Gaming Location, so long as the total number of Video Lottery Terminals in operation and in storage does not exceed 110% of the authorized number of Video Lottery Terminals, and so long as the site and manner of storage are consistent with Tribal Gaming Commission policies approved by the Oregon State Police. Off-site storage may occur so long as the site and manner of such storage is approved by the Oregon State Police, and the Oregon State Police are provided access to the storage site.
5. For purposes of the calculation of the authorized number of Class III Video Lottery Terminals in this subsection 4(D), a video lottery terminal providing for play by multiple players shall count as one VLT, as long as the total number of such devices does not exceed one (1) percent of the total authorized Video Lottery Terminals.

E. Addition of Authorized Games at Gaming Facility.

1. At least sixty (60) days before any new game otherwise authorized under this Compact is conducted at the Gaming Facility the Tribal Gaming Commission shall:
 - a. Ensure that the Gaming Facility develops rules and procedures for a system of internal controls for the new game that meets the minimum standards established in the Appendix to this Compact.
 - b. Require that the Gaming Facility provide appropriate training for all dealers, supervisors, surveillance personnel and any other employees involved in the conduct or regulation of the new game and for the Tribal Gaming Commission, such that those employees have the knowledge and skills required under typical industry standards for the job function that employee performs, including but not limited to player money management and betting, card counting and detection of cheating methods. The Commission shall notify the Oregon State Police prior to beginning training and provide OSP an opportunity to participate.
 - c. Ensure that the Gaming Facility establishes a security and surveillance plan for the new game that meets the minimum standards established in the Appendix hereto.

- d. Adopt rules of operation for the game that meet the minimum standards established in the Appendix hereto, including rules of play and standards for equipment.
 - e. Notify the Oregon State Police that the Tribe proposes to offer the new game to the public and, at the same time, provide to the Oregon State Police for review all of the internal controls, regulations, plans, procedures and rules required under paragraph 1 of this subsection.
2. The Tribe agrees to introduce new games authorized under this section according to the following schedule:
 - a. Within the sixty-day period after the Secretary of the Interior approves this amended and restated Compact the Tribe may offer three of the games authorized under paragraph 1 of subsection B of this section;
 - b. Within the ninety-day period after the sixty-day period specified in subparagraph a of this paragraph, the remaining games authorized under paragraph 1 of subsection B of this section;
 - c. After the period of time specified in subparagraphs a and b of this paragraph, for any game authorized by paragraph 2 of subsection B of this section, one new game within a single calendar quarter.
 - d. The Tribe may offer new games sooner if mutually agreed by OSP and the Tribal Gaming Commission. But in no event may the Tribe offer new games prior to approval of this Amended and Restated Compact by the Department of the Interior or as otherwise provided by IGRA.
 3. The Tribe shall establish wager limits for all games. The maximum wager for any table game or counter game, except for race book, shall be \$1,000. The maximum wagers for race shall be \$5,500 for a straight bet and \$500 for a parlay bet. Whenever a new table or counter game, other than race book, is introduced, the Tribe shall establish an initial wager limit of \$500 per hand, play or bet. After a period of six months of operation of the new table game in full compliance with the requirements of this Compact, the Tribe may request that a maximum wager of \$1,000 be authorized. If, after an increase in the wager limits, there are any significant problems with the conduct of the table games due to noncompliance with internal controls, rules of the games or with the terms of this subsection, the Oregon State Police will notify the Tribal Gaming Commission of the problems. If the Tribal Gaming Commission cannot correct the problem with 24 hours, the Tribal Gaming Commission will lower the wager limits to the previously authorized maximum wager limit.

4. The Tribe may operate a maximum of sixty (60) tables of Class III table games at the Gaming Facility.

SECTION 5. JURISDICTION.

A. In General.

1. The State shall have criminal jurisdiction over offenses committed by or against Indians and non-Indians at the Gaming Facility; the criminal laws of the State shall have the same force and effect at the Tribal gaming facility as they have on non-Tribal lands within the State. Nothing in this Compact shall be interpreted to diminish the criminal jurisdiction of the United States.
2. If the Tribe authorizes the Tribal Court to hear criminal cases arising at the Gaming Facility, the Tribe and the State shall have concurrent criminal jurisdiction over offenses committed by Indians within the Gaming Facility and on the Tribal Lands. The enforcement of criminal laws at the Gaming Facility shall be established pursuant to and by a Memorandum of Understanding to be executed by the Tribe, the Coquille Tribal Police Department and the Oregon State Police.
3. The Tribe and the State agree that tribal or local law enforcement officials will provide the first response for criminal or public safety issues that are not related to the operation of gaming or that occur other than in the course of the play of games. The Oregon State Police, the federal government and the Tribe shall each have authority to investigate crimes under state laws which are also assimilated into federal law that are related to the operation of gaming or that occur in the course of play of games. As between the OSP and local law enforcement officials, the OSP shall have exclusive authority to investigate violations of state criminal law related to the operations of gaming or that occur in the course of play of games.
4. If the Tribe establishes a law enforcement agency that is responsible to investigate criminal law violations at the Gaming Facility, the Tribe agrees that the State shall continue to have the authority to investigate possible violations of this Compact or other gaming regulatory matters. The Tribe and the State further agree that their respective law enforcement agencies will cooperate in any investigation that involves or potentially involves both criminal and regulatory violations.
5. The Tribe and the State agree to cooperate on the investigation and prosecution of any gambling crime committed at the Gaming Facility. The Tribe and the State agree to cooperate in maintaining a state-wide system to identify and monitor persons excluded from any tribal gaming facility in the State.

- B. Except as provided in a Memorandum of Understanding executed in accordance with the foregoing paragraph 5(A), law enforcement officers of the State of Oregon, or officers

designated by the State, shall have free access to all areas within the Gaming Facility and on Tribal trust land used for or in relation to Class III gaming for the purpose of maintaining public order and public safety, conducting investigations related to possible criminal activity and enforcing applicable laws of the State. Action taken by the State pursuant to this section shall be conducted to minimize any interruption of the day-to-day operations of the Gaming Facility. The Tribe, or individuals acting on its behalf, shall provide Oregon State Police officers access to locked and secure areas of the Gaming Facility in accordance with the regulations for the operation and management of the gaming operation. Tribal Gaming Commission officials may accompany State officers during inspection of locked or secure areas of the Gaming Facility.

- C. Nothing in this agreement shall be construed to affect the civil or criminal jurisdiction of the State under Public Law #83-280. The Tribe and the State agree that the criminal laws of the State of Oregon that proscribe gambling activities shall apply to any person who engages in the proscribed activities if those activities are not conducted under the authority of the Tribe as provided in this Compact and under the Indian Gaming Regulatory Act. Nothing herein shall be interpreted to preclude a retrocession agreement with the State, as contemplated by the Coquille Restoration Act, which will supersede any conflicting provisions in this Compact.

SECTION 6. PRINCIPLES GOVERNING GAMING OPERATIONS DECISIONS

- A. The Tribe and the State agree that maintaining the honesty, integrity, fairness and security of the Tribe's gaming operation is essential both to the success of the enterprise, and to satisfy the interests of the State and of the Tribe. The Tribe and the State agree that both of them have an interest in protecting the citizens of this State who patronize the Tribe's gaming facility from any breach of security of the gaming operation. Accordingly, all decisions by the Tribe, the Tribal Gaming Commission and the management of the gaming operation, concerning regulation and operation of the Gaming Facility, including those decisions expressly placed within the Tribe's discretion under the terms of this Compact, shall be consistent with each of the following principles:
1. Any and all decisions concerning regulation and operation of the Tribal gaming enterprise, whether made by the Tribe, the Tribal Gaming Commission or the management of the gaming operation, shall reflect the particularly sensitive nature of a gaming operation.
 2. In order to maintain the honesty, integrity, fairness and security of the Tribe's gaming operation, the Tribe, the Tribal Gaming Commission and the management of the gaming operation shall work diligently and take all reasonably necessary affirmative steps to prevent cheating and theft, and to protect the gaming operations from the influence or control by any form of criminal activity or organization.

3. The honesty, integrity, fairness and security of the Tribe's gaming operation shall be of paramount consideration in awarding contracts, licensing and hiring employees, and in making other business decisions concerning the operation of the gaming enterprise. The Tribe, the Tribal Gaming Commission and the management of the gaming operation shall make no decisions that compromise the honesty, integrity, fairness or security of the gaming operation.
4. Regulation and operation of the Tribe's gaming activities shall be, at a minimum, consistent with generally accepted industry standards and practices, in order to maintain the honesty, integrity, fairness and security of the Tribe's gaming operation.

B. Procedure for Resolving Disputes Concerning Operational Decisions.

1. If the State, in good faith, believes that any decision by the Tribe relating to the employment or licensing of any employee, awarding of any contract or operation of the gaming enterprise is inconsistent with the principles set forth in subsection A of this section, or any other requirement of this section, the State may give written notice to the Tribal Gaming Commission. The written notice shall describe the factual basis for the State's concern.
2. The parties shall meet and confer within fifteen (15) days after the Tribal Gaming Commission receives the notice.
3. a. If the State's concern is not resolved informally, either party may initiate non-binding arbitration within forty-five (45) days after the service of the written notice.
 - b. An arbitrator shall be selected in the following manner:
 - (1) The parties shall obtain a list of qualified arbitrators from U.S. Arbitration and Mediation of Oregon, or any other arbitration panel agreed to by the parties.
 - (2) Each party, in turn, shall strike one name from the list, until one name remains. The parties shall draw lots to determine which party makes the first strike.
 - c. Upon agreement by both parties, the arbitration proceeding shall be binding.
 - d. The parties shall divide the cost of the arbitration proceeding equally between them.
4. Upon conclusion of the arbitration proceeding, if the parties have not elected to be bound by that result, either party may initiate an action in the United States District Court for the District of Oregon as provided in Section 16 of this Compact.

5. Expedited Procedure.

- a. If the State, in good faith, believes that there is an immediate threat to the honesty, integrity, fairness and security of the Tribal Gaming Operations, and believes that substantial harm will result during the time that would pass if the procedure established in paragraphs 1 to 3 of this subsection is followed, the State may give written notice to the Tribal Gaming Commission. The written notice shall describe the factual basis for the State's concern. The written notice shall describe the specific action the State believes is necessary to prevent substantial harm from occurring. The Tribe agrees that the Tribal Gaming Commission shall act according to the State's recommendation or otherwise take mutually acceptable action to address the State's concerns, unless the Commission determines that such action would adversely affect the honesty, integrity, fairness and security of the Tribal Gaming Operation. Nothing in this subparagraph shall preclude the Tribe from invoking the dispute resolution procedures provided in this Compact after the Commission implements the State's recommendation.
- b. The parties shall confer within five (5) days after the Tribal Gaming Commission receives the notice.
- c. If the State's concern is not resolved informally within ten days after the Tribal Gaming Commission receives the notice, the State or the Tribe may initiate an action in the United States District Court for the District of Oregon as provided in Section 16 of this Compact.
- d. An immediate threat to the honesty, integrity, fairness and security of the Tribal Gaming Operations includes but is not limited to the following examples:
 - (1) A felony criminal indictment or a gaming-related offense is filed against any contractor, or owner or key employee of a contractor, or against any key employee of the Tribal Gaming Operation;
 - (2) A criminal organization or members of a criminal organization have obtained an ownership interest in a contractor, or a member of a criminal organization has become a key employee of a contractor;
 - (3) A malfunction of gaming equipment hardware or software causes patrons of the Gaming Facility to lose money, and that loss is directly related to the equipment malfunction;
 - (4) The security of gaming equipment has been impaired by loss, theft, or tampering;
 - (5) The physical safety or security of patrons at the Gaming Facility is seriously at risk;

- (6) A continuing pattern of failure by the Tribe, the Tribal Gaming Commission or management of the gaming operation to enforce compliance with the provisions of this Compact, or the regulations and internal controls governing the gaming operation.
- C. The provisions of this section shall provide the exclusive method for resolving disputes between the Tribe and the State as to the Tribe's decisions concerning hiring or contracting under Section 7 of this Compact, or concerning operation of the Gaming Facility.

SECTION 7. LICENSING AND CONTRACTING.

A. Licensing of Gaming Employees.

1. All Primary Management Officials, High Security Employees and Low Security Employees employed in the Gaming Facility shall be licensed by the Tribal Gaming Commission in accordance with the provisions of this Compact.
2. All prospective employees -- whether High Security Employees, Low Security Employees or Primary Management Officials -- shall provide to the Coquille Tribal Gaming Commission any required application fees and full and complete information, on forms provided by the Coquille Tribal Gaming Commission and approved by the State, including but not limited to:
 - a. Full name, including any aliases by which the applicant has been known;
 - b. Social security number;
 - c. Date and place of birth;
 - d. Residential addresses for the past five years;
 - e. Employment history for the past five years;
 - f. Driver's license number or state-issued identification card;
 - g. All licenses issued and disciplinary actions taken by any State agency or local, federal or Tribal gaming agency;
 - h. All criminal proceedings, except for minor traffic offenses, to which the applicant has been a party;
 - i. A current photograph.

- j. Any other information required by the Coquille Tribal Gaming Commission.
3. In addition to the requirements of paragraph 7(A)(2) above, prospective High Security Employees and Primary Management Officials shall provide two sets of fingerprints.
 4. a. The Tribe shall forward the applicant information for each prospective High Security Employee and Primary Management Official to the Oregon State Police. The Oregon State Police may conduct a background investigation and provide a written report to the Tribal Gaming Commission within a reasonable period of time, but in no event shall such background checks exceed sixty (60) days without notice to the Tribe. In the event that the Tribal Gaming Commission conducts a background investigation, it shall submit the completed report to the Oregon State Police within sixty (60) days.
 - b. The Tribe may request the State to perform a background investigation on any prospective Low Security Employee. Upon such request, the Oregon State Police shall conduct a background check as provided in subparagraph a of this paragraph.
 5. a. Except as provided in paragraph 6 of this subsection, the Tribal Gaming Commission shall deny a gaming license to any High Security Employee or Primary Management Official who:
 - (1) Has, within the ten-year period preceding the date of application for a license, committed a felony other than a traffic offense, whether or not conviction of such a felony has been expunged, under the law of any federal, state or tribal jurisdiction, or is the subject of a civil judgment under the law of any federal, state or tribal jurisdiction that is based on facts that constitute the elements of a felony other than a traffic offense, in that jurisdiction.
 - (2) Has committed a crime involving unlawful gambling under the law of any federal, state or tribal jurisdiction, whether or not conviction of such a crime has been expunged, or is the subject of a civil judgment under the law of any federal, state or tribal jurisdiction that is based on facts that constitute the elements of a crime involving unlawful gambling in that jurisdiction.
 - (3) Knew or should have known that he associated in a direct business relationship, whether as a partner, joint venturer or employer, with any other person known to the applicant who has committed a felony other than a traffic offense, or a crime involving unlawful gambling, under the law of any federal, state, or tribal jurisdiction.

- (4) Was employed by any other person who has committed a felony other than a traffic offense, or a crime involving unlawful gambling, under the law of any federal, state or tribal jurisdiction, if the prospective employee or official was in any way an accomplice involved in or in any way aided and abetted the criminal activity.
 - (5) Notwithstanding anything herein to the contrary, in the absence of other violations, it shall not be automatic grounds for revocation, suspension, or denial for an Indian from a federally recognized Indian Tribe to have been charged or convicted of a felony if the case involved the following non-gambling related offenses; (1) fishing or hunting offenses; (2) cigarette, fireworks or alcohol sales offenses; or (3) cases involving the exercise of trust or treaty rights. In the absence of other violations, these Indian individuals shall not be barred solely as a result of such activities. This exemption shall not apply to offenses that are concurrent with any gaming-related activity.
- b. The Tribe shall deny a gaming license to any prospective High Security Employee or Primary Management Official if:
- (1) The applicant fails to disclose any material fact to the Tribal Gaming Commission or the State or its authorized agents during a background or security investigation; or
 - (2) The applicant misstates or falsifies a material fact to the Tribal Gaming Commission or the State during a background or security investigation.
- c. The Tribal Gaming Commission may deny a gaming license to any prospective High Security Employee or Primary Management Official for any reason the Tribal Gaming Commission deems sufficient. Such decisions to grant or deny a gaming license shall be consistent with the principles set forth in subsection A of Section 6 of this Compact. In determining whether to deny a gaming license to any prospective High Security Employee or Primary Management Official, the factors to be considered by the Tribal Gaming Commission shall include, but need not be limited to, the following:
- (1) The applicant has been convicted of any crime (other than a crime listed in subparagraph a of this paragraph) in any jurisdiction; or
 - (2) The applicant knew or should have known that he has associated with persons or businesses of known criminal background, or persons of disreputable character, that may adversely affect the general credibility, honesty, integrity, security, fairness or reputation of the Tribal Gaming Operation; or

- (3) There is any aspect of the applicant's past conduct that the Tribal Gaming Commission determines would adversely affect the honesty, integrity, security or fairness of Tribal Gaming Operation.
 - d. After this Amended and Restated Compact becomes effective, the Tribal Gaming Commission shall deny a gaming license to any prospective Low Security Employee who has committed a crime described in subparagraphs (1) or (2) of subparagraph a of this paragraph. The Tribal Gaming Commission may deny a gaming license to any Low Security Employee applicant who does not meet the criteria established in the remainder of this paragraph 5. Decisions to grant or deny a gaming license shall be consistent with the principles set forth in subsection A of Section 6 of this Compact.
 - e. The Tribal Gaming Commission may reject an application if the applicant has not provided all of the information requested in the application.
 - f. Denial of a gaming license by the Tribal Gaming Commission is final.
 - g. No Primary Management Official or High Security Employee may receive a biannual gaming license by the Tribal Gaming Commission until all background checks required under paragraph 7(A)(4) of this section are completed.
6. Waiver of Disqualifying Criteria.
- a. If a prospective Primary Management Official, High Security Employee or Low Security Employee is disqualified for licensing under the provisions of paragraph 5 above, and the Tribal Gaming Commission believes that there are mitigating circumstances that justify waiver of the disqualifying factor, the Tribal Gaming Commission may give written notice to the Oregon State Police asking to meet and confer concerning waiver of the disqualification. The Tribal Gaming Commission and the State shall meet within fifteen (15) days after written notice is given.
 - b. In order to waive disqualification of licensing of any prospective Primary Management Official, High Security Employee or Low Security Employee, both the Tribal Gaming Commission and the Oregon State Police must agree on the waiver.
 - c. Waiver of disqualification of licensing may be based on one or more of the following circumstances:
 - (1) Passage of time since conviction of a crime;
 - (2) The applicant's age at the time of conviction;

- (3) The severity of the offense committed;
 - (4) The overall criminal record of the applicant;
 - (5) The applicant's present reputation and standing in the community;
 - (6) The nature of the position for which the application is made;
 - (7) The nature of a misstatement or omission made in the application.
7. Background investigation during employment. The Tribal Gaming Commission or the State may conduct additional background investigations of any Class III gaming employee at any time during the term of employment. If, after investigation, the State Police determine there is cause for the revocation of the license of any employee under the criteria established in this subsection 7(A), it shall promptly so report to the Tribal Gaming Commission and furnish the Tribal Gaming Commission with copies of all relevant information pertaining to such determination. The Tribal Gaming Commission shall review the State's report and supporting materials and if the report concludes that good cause for revocation is shown under the criteria established in this subsection 7(A), the license shall be revoked.
8. Temporary licensing of employees.
- a. The Tribal Gaming Commission may issue a temporary license to High Security Employees, Primary Management Officials or Consultants, ten working days after submission of the application to the Oregon State Police, or upon completion of a review of the employee's application, a computerized criminal history check and credit check by the Tribal Gaming Commission, if the applicant would not be disqualified on the basis of the results of the review and checks. The temporary license shall expire and become void upon completion of the background check and submission of the results to the Tribal Gaming Commission. If the employee does not qualify for a biannual license, the Tribal Gaming Commission shall immediately revoke the temporary license and deny a biannual license.
 - b. The Tribal Gaming Commission may issue a temporary license to a Low Security Employee upon completion of a review of the employee's application and completion of a computerized criminal history check and credit check by the Tribal Gaming Commission, if the applicant would not be disqualified on the basis of the results of the review and checks. Any Low Security Employee shall be subject to immediate termination if the Oregon State Police or the Tribal Gaming Commission determines that the employee does not meet the criteria established in subparagraph 7(A)(5)(d).
 - c. For purposes of this paragraph, if an application is forwarded by mail to the Oregon State Police or the results of a background check by the Oregon State

Police are provided to the Tribal Gaming Commission by mail, the material is deemed to be submitted three days after the date of mailing.

9. Duration of license and renewal. Any employee license shall be effective for not more than three (3) years from the date of issue except that a licensed employee who has applied for renewal may continue to be employed under the expired license until final action is taken on the renewal application in accordance with the provisions of paragraphs 7(A)(2) to 7(A)(5) above. Applicants for renewal shall provide updated information to the Tribal Gaming Commission on a form provided by the Tribal Gaming Commission and approved by the State but will not be required to resubmit historical data already provided. The State may perform a new background investigation for any employee whose license is renewed.
 10. Revocation of license. The Tribal Gaming Commission may revoke the license of any employee pursuant to policies determined by the Tribal Gaming Commission. The Tribal Gaming Commission shall revoke the license of any employee upon determination that the employee does not meet the criteria described in paragraph 7(A)(5) above.
 11. The Gaming Operation shall maintain a procedural manual for employees that includes rules and regulations of conduct and disciplinary standards for breach of procedures.
 12. The Tribal Gaming Commission agrees to provide to the Oregon State Police, on a monthly basis, a list of all current employees of the Gaming Facility and to give notice to the Oregon State Police of any disciplinary action related to the fairness, integrity, security or honesty of the gaming operation, or termination of an employee, and any suspension or revocation of an employee's gaming license.
- B. Contracts with Manufacturers and Suppliers.
1. Major Procurements.
 - a. The Tribe agrees not to execute or consummate any contract for a Major Procurement unless it is in writing. The Tribe also agrees not to consummate any contract until a background investigation has been completed by the Oregon State Police on the proposed Class III Gaming Contractor.
 - b. The Tribal Gaming Commission shall submit any proposed Major Procurement to the State for review, comment and a background investigation of the proposed Class III Gaming Contractor.
 - c. Except as provided in paragraph 3 below, the Oregon State Police shall conduct a background investigation and provide a written report to the Tribal Gaming Commission within a reasonable period of time, but in no event shall the time for completion of such background investigations exceed sixty (60) days after the Oregon State Police receives from the proposed Class III Gaming Contractor both the Oregon State Police's fee for the background investigation under subsection C of this section, and full disclosure of all information requested by the Tribal

Gaming Commission and the Oregon State Police under paragraph 4 of this subsection, without written notice to and consent by the Tribe.

- d. If the Tribal Gaming Commission requests, the Oregon State Police agrees to make its best efforts to complete a background investigation within less than sixty days. The Tribal Gaming Commission and the Oregon State Police may also agree that if business necessity or the protection of the honesty, integrity, fairness and security require it, the State may perform an abbreviated review to enable the Tribe to execute a temporary contract while a complete background investigation is being performed. Any temporary contract executed under authority of this subparagraph, shall be rescinded immediately if the complete background investigation discloses that the Class III Gaming Contractor does not meet the criteria described in paragraph 6 of this subsection 7(B).

2. Sensitive Procurements.

- a. After a proposed Class III Gaming Contractor has made full disclosure of all information requested by the Tribal Gaming Commission and the Oregon State Police under paragraph 4 of this subsection, and paid any necessary investigation fee required by the Oregon State Police, the Tribe may execute or consummate a contract for a Sensitive Procurement before a background investigation has been completed by the Oregon State Police on the proposed Class III Gaming Contractor.
 - b. The Tribal Gaming Commission shall submit a proposed contract for a Sensitive Procurement, or if there is no written contract, a letter of intent to do business with the proposed Class III Gaming Contractor, or a confirming memorandum from the Tribal Gaming Commission representing that an oral contract is proposed, to the Oregon State Police for a background investigation of the proposed Class III Gaming Contractor before execution of the contract.
 - c. The Oregon State Police shall conduct a background investigation, if the Oregon State Police considers it necessary, and provide a written report to the Tribal Gaming Commission. If the Class III Gaming Contractor does not meet the criteria described in paragraph 6 of this subsection 7(B) for approval of a contract, the contract shall be terminated and the Tribe agrees to discontinue doing business with the contractor so long as the contractor fails to meet the criteria for approval.
3. The Oregon State Police agrees to maintain a list of Class III Gaming Contractors that have been previously approved to do business in Oregon with any Tribal Gaming Operation. If a Class III Gaming Contractor has been included in the list, the Tribe may execute or consummate a contract with the Class III Gaming Contractor for a Sensitive Procurement upon giving notice of the contract to the Oregon State Police. If a Class III Gaming Contractor has been included in the list for Major Procurements, the Oregon State Police shall complete any necessary background investigation required under paragraph 1 of this subsection within thirty (30) days after any fees have been paid and full disclosure has been made to the Oregon State Police by the contractor.
4. Class III Gaming Contractors, and any Owner or Key Employee of a Class III Gaming Contractor, shall provide all personal and business information required by the Oregon State Police to conduct its background investigation, before executing a contract or beginning to do business with the Tribe.
5. The Tribe shall not consummate any Class III Gaming Contract with a Class III Gaming Contractor that does not grant both the Oregon State Police and the Tribal

Gaming Commission access to such Class III Gaming Contractor's business and financial records upon request.

6. Criteria for Contract Denial or Termination.

- a. The Tribe shall not consummate any Major Procurement, and the Tribe shall terminate a contract for a Sensitive Procurement immediately, if the following conditions are either disclosed in the application materials or reported by the Oregon State Police relative to a particular Class III Gaming Contractor:
 - (1) A conviction of the Class III Gaming Contractor or any Owner or Key Employee of the Class III Gaming Contractor for any felony other than a traffic offense, in any jurisdiction within the ten year period preceding the date of the proposed Class III Gaming Contract;
 - (2) A conviction of the Class III Gaming Contractor or any Owner or Key Employee of the Class III Gaming Contractor for any gambling offense in any jurisdiction;
 - (3) A civil judgment against the Class III Gaming Contractor or any Owner or Key Employee of the Class III Gaming Contractor, based in whole or in part upon conduct that would constitute a gambling offense, or a civil judgment entered within the ten year period preceding the date of the proposed Class III Gaming Contract against the Class III Gaming Contractor or any Owner or Key Employee of the Class III Gaming Contractor, based in whole or in part upon conduct that would constitute a felony other than a traffic offense;
 - (4) A failure by the Class III Gaming Contractor to disclose any material fact to the Oregon State Police or the Tribal Gaming Commission or their authorized agents during initial or subsequent background or security investigations;
 - (5) A misstatement or untrue statement of material fact made by the Class III Gaming Contractor to the Oregon State Police or the Tribal Gaming Commission or their authorized agents during initial or subsequent background or security investigations as determined by the Tribal Gaming Commission or the Oregon State Police;
 - (6) An association of the Class III Gaming Contractor with persons or businesses of known criminal background, or persons of disreputable character, that may adversely affect the general credibility, security, integrity, honesty, fairness or reputation of the Gaming Facility;
 - (7) Any aspect of the Class III Gaming Contractor's past conduct that the Tribal Gaming Commission or the Oregon State Police determines would adversely affect the integrity, security, honesty or fairness of the Gaming Facility;
 - (8) If the Class III Gaming Contractor has engaged in a business transaction with a tribe that involved providing gaming devices for Class III gaming conducted by a tribe without a tribal-state Class III gaming compact, such Contractor shall not be disqualified per se, but shall be subject to strict scrutiny wherein the Contractor shall have the burden of establishing why such history should not disqualify the Contractor from the privilege of doing business with the Tribe. The final determination to approve the contractor shall be by mutual agreement of the Oregon State Police and the Tribal Gaming Commission.

- (9) A prospective Class III Gaming Contractor fails to provide any information requested by the Tribal Gaming Commission or the Oregon State Police for the purpose of making any determination required by this subsection 7(B)
- b. The Tribal Gaming Commission may choose not to approve any Class III Gaming Contract for any reason the Commission deems sufficient, consistent with the Tribal Gaming Code.
- c. Other criteria the Tribal Gaming Commission may use to decide not to approve any Class III Contract include, but are not limited to, the Tribal Gaming Commission's determination that:
- (1) A person who is otherwise qualified to be a Class III Gaming Contractor owns, is an agent of or has any other interest in any person or business that is unqualified or disqualified to be a Class III Gaming Contractor, regardless of the qualifications of the person seeking to consummate the Class III Gaming Contract;
 - (2) A prospective Class III Gaming Contractor demonstrates inadequate financing for the business anticipated under the proposed Class III Gaming Contract. In determining whether financing is adequate, the Tribal Gaming Commission shall consider whether financing is from a source that meets the qualifications of paragraph 5 of subsection A of this section, or paragraph 6 of subsection B of this section and whether that financing is in an amount to ensure the likelihood of success in the performance of the contractor's duties and responsibilities; or
 - (3) A prospective Class III Gaming Contractor or its employees fail to demonstrate business ability and experience to establish, operate and maintain the business of the type of Class III Gaming Contract proposed.
- d. No Class III Gaming Contractor shall own, manufacture, possess, operate, own an interest in, or gain income or reimbursement in any manner from gaming activities or gaming devices in any jurisdiction unless the activities or devices are approved and certified by another state or tribal lottery, gambling or gaming control agency, or the National Indian Gaming Commission, and such ownership, manufacture, possession, operation, or income is disclosed to and approved by the Tribal Gaming Commission and the Oregon State Police.
- e. Notwithstanding subparagraph a. of this paragraph 6, if a prospective Class III Gaming Contract may not be consummated because of the requirements of this subsection 7(B), because a person previously associated with the Class III Gaming Contractor or an employee of the Class III Gaming Contractor has been convicted of a crime or a civil judgment has been entered against the Class III Gaming Contractor or its employee within the ten year period preceding the date of the proposed Class III Gaming Contract, based in whole or in part upon conduct that allegedly constitutes a felony other than a traffic offense, the Tribe may enter into the proposed Class III Gaming Contract if the Class III Gaming Contractor has severed its relationship with the convicted or liable person or employee. Before the Tribe may enter into a Class III Gaming Contract under this subparagraph, the Oregon State Police and the Tribal Gaming Commission must agree that the relationship between the Class III Gaming Contractor and the convicted or liable person or employee has been severed. For purposes of this subparagraph, a relationship is severed if the convicted or liable person or employee has no continuing connection with the direction or control of any aspect of the business of the Class III Gaming Contractor, and the convicted or liable

person or employee is no longer employed by the Class III Gaming Contractor in any capacity. The Class III Gaming Contractor shall bear the burden of showing to the satisfaction of the Tribal Gaming Commission and the Oregon State Police that a relationship has been severed.

7. Rescission or Termination of Class III Gaming Contracts.

- a. The Tribal Gaming Commission may require the Gaming Operation to rescind or terminate any Class III Gaming Contract pursuant to policies and procedures determined by the Tribal Gaming Commission consistent with the Tribal Gaming Code.
- b. Class III Gaming Contracts shall be subject to rescission or termination for cause consistent with the criteria established by paragraph 7.B.6. of this section. After the effective date of this Compact, such contracts shall provide that Class III Gaming Contractors consent to rescission or termination of any Class III Gaming Contract for cause consistent with the criteria established by paragraph 7(B)(6) of this section by virtue of entering into a Class III Gaming Contract.

8. Contractor Reporting Requirements.

- a. All Class III Gaming Contractors shall submit to the Tribal Gaming Commission and the Oregon State Police any financial and operating data requested by the Tribal Gaming Commission or the Oregon State Police.
- b. The Tribal Gaming Commission shall specify the frequency and a uniform format for the submission of such data on a case by case basis.
- c. The Tribal Gaming Commission, the Oregon State Police, or their agents reserve the right to examine Class III Gaming Contractor tax reports and filings and all records from which such tax reports and fillings are compiled.
- d. All Class III Gaming Contractors shall notify both the Tribal Gaming Commission and the Oregon State Police of the transfer of a Controlling Interest in the ownership of the Class III Gaming Contractor.

9. Termination of Contract.

- a. No Class III Gaming Contract shall have a term longer than seven (7) years, other than contracts for traditional financing of capital.
- b. A Class III Gaming Contract shall terminate immediately upon the occurrence of any of the following:
 - (1) The Class III Gaming Contractor is discovered to have made any statement, representation, warranty, or certification in connection with the Class III Gaming Contract that is materially false, deceptive, incorrect, or incomplete;
 - (2) The Class III Gaming Contractor fails to perform any material requirements of the Class III Gaming Contract or is in violation of any material provision thereof, and fails to cure same within ten (10) days' written notice of such failure;
 - (3) The Class III Gaming Contractor, or any Owner, officer or key employee of the Class III Gaming Contractor is convicted of a felony or a gambling-related offense that reflects on the Class III Gaming Contractor's ability to perform

honestly in carrying out the Class III Gaming Contract. However, the Tribe may maintain the contract if the Class III Gaming Contractor has severed its relationship with the convicted or liable person or employee. Before the Tribe may maintain a Class III Gaming Contract under this subparagraph, the Oregon State Police and the Tribal Gaming Commission must agree that the relationship between the Class III Gaming Contractor and the convicted or liable person or employee has been severed. For purposes of this subparagraph, a relationship is severed if the convicted or liable person or employee has no continuing connection with the direction or control of any aspect of the business of the Class III Gaming Contractor, and the convicted or liable person or employee is no longer employed by the Class III Gaming Contractor in any capacity. The burden of showing to the satisfaction of the Tribal Gaming Commission and the Oregon State Police that a relationship has been severed is on the Class III Gaming Contractor;

- (4) The Class III Gaming Contractor jeopardizes the integrity, security, honesty, or fairness of the Gaming Facility; or
- c. The Tribal Gaming Commission shall immediately require the Tribe to terminate a Class III Gaming Contract if the Tribal Gaming Commission determines satisfactory performance of the Class III Gaming Contract is substantially endangered or can reasonably anticipate such occurrence or default.

C. Fees for Background Investigations.

1. The State shall be reimbursed its reasonable and necessary costs for performing background investigations in accordance with the terms of Section 10 of this Compact.
2. The State will assess the cost of background investigations for Class III Gaming Contract applications to the applicants. The applicant is required to pay the investigation fee in full prior to commencement of the investigation. If the applicant refuses to prepay the cost of a background investigation, the State shall notify the Tribal Gaming Commission and the Tribal Gaming Commission may choose to pay the investigation cost or withdraw its request for the investigation.

D. Access to Contracts.

1. If the Primary Management Official is a corporation or other form of organization, the Primary Management Official shall provide the State at all times with a current copy of any management agreement with the Tribe that allows it to conduct Class III gaming on the Tribal trust land.
2. If the Primary Management Official is a corporation or other form of organization, the Primary Management Official shall furnish to the State complete information pertaining to any transfer of controlling interest in the management company at least 30 days before such change; or, if the Primary Management Official is not a party to the transaction effecting such change of ownership or interests, immediately upon acquiring knowledge of such change or any contemplated change.

3. In order to assure the honesty, integrity, fairness and security of the Tribe's Class III gaming activities, the Tribal Gaming Commission agrees to make available for inspection to the Oregon State Police, upon request, a list of all non-gaming contractors, suppliers and vendors doing business with the Gaming Facility and to give the Oregon State Police access to copies of all gaming contracts, provided however, that the Oregon State Police shall make a written request for such information.

SECTION 8. REGULATIONS FOR OPERATION AND MANAGEMENT OF CLASS III GAMES.

- A. Gaming Regulations. Conduct of all Class III gaming activity authorized under this Compact shall be in accordance with the requirements of this Compact and with the "Minimum Internal Control Standards" attached as the Appendix; federal regulations applicable to Class III gaming, and with the Tribal Gaming Code. The Tribe shall be deemed to be in compliance with NIGC regulations for purposes of this Compact provision so long as its conduct is consistent with NIGC's application or interpretation of the regulations. The Tribe and the State agree that the Minimum Internal Control Standards may be modified or supplemented by mutual agreement of the Tribal Gaming Commission and the Oregon State Police. Subsequent amendment of this Compact shall not be necessary for that purpose. If the Oregon State Police notifies the Tribal Gaming Commission of a violation of the Minimum Internal Control Standards, the Tribal Gaming Commission will take corrective measures immediately upon such notice. Thereafter, the Tribal Gaming Commission shall meet with the Oregon State Police to discuss and identify specific measures that were and/or will be taken to bring the conduct of Class III gaming back into compliance with the Minimum Internal Control Standards within 48 hours (or such period as mutually agreed by the parties) of the notification of the violation. Failure of the Tribal Gaming Commission to bring the Class III gaming operation into compliance with the Minimum Internal Control Standards as set forth in this paragraph shall constitute a violation of the Compact.
- B. Identification badges. The Tribal Gaming Commission shall require all employees to wear, in plain view, identification badges issued by the Tribal Gaming Commission that include photo and name. Employees assigned to covert compliance duties shall only be required to have on their person an identification badge. Oregon State Police employees shall be required to wear identification badges issued by Oregon State Police that include photo and name, or "VISITOR" badges issued by the Tribal Gaming Commission while in secured areas of the facility. OSP employees shall not be required to wear identification badges while in unsecured areas of the facility, but while on duty shall be required to carry badges on their persons at all times.

- C. No credit extended. All gaming shall be conducted on a cash basis. Except as provided herein, no person shall be extended credit for gaming nor shall the Tribe permit any person or organization to offer such credit for a fee. Cashing checks for purposes of Class III gaming constitutes extending credit under this subsection. This restriction shall not apply to credits won by players who activate play on video games of chance after inserting coins or currency into the games. This section shall not restrict the right of the Tribe or any other person to install and accept bank card or credit card transactions in the same manner as is permitted at any retail business in the State.
- D. Prohibition on attendance and play of minors. No person under the age of twenty-one (21) shall participate in any Class III gaming authorized by this Compact. If any person under the age of twenty-one (21) plays and otherwise qualifies to win any Class III game prize or compensation the prize or compensation shall not be paid. Employees under age twenty-one (21) whose non-gaming duties require their presence on the gaming floor may be present on the gaming floor. Notwithstanding the requirements of this subsection, the Tribe may employ any Indian employees eighteen (18) years of age and older who are required to perform gaming duties as part of their employment, *provided*, if the Tribe offers alcohol on the Class III gaming floor, employees whose gaming duties require a presence on the Class III gaming floor shall be at least twenty-one (21) years of age.
- E. Prohibition of firearms. With the exception of federal, state, local or Tribal law enforcement agents or officers on official business, no person shall possess firearms within the Gaming Facility.
- F. Service of Alcohol. No alcohol shall be served in the Gaming Facility unless authorized by the Tribe as permitted by federal law. Nothing in this subsection shall permit the State to impose taxes on the sale of alcoholic beverages by the Tribe. If alcohol is served in the Gaming Facility, no alcoholic beverages may be served free or at a reduced price to any patron of the Gaming Facility as an inducement to participate in any gaming. In the event that the Tribe does not authorize service of alcohol on the gaming floor, the Tribe may locate up to five (5) of its total authorized Video Lottery Terminals in the Gaming Facility lounge. The Tribe and the State shall enter into a Memorandum of Understanding that will establish which State laws and Oregon Liquor Control Commission licensing regulations shall apply to the sale or service of alcoholic beverages at the Gaming Facility.
- G. Liability for damage to persons and property. During the term of this Compact, the Tribe shall maintain public liability insurance with limits of not less than \$250,000 for one person and \$2,000,000 for any one occurrence for any bodily injury or property damage. The Tribe's insurance policy shall have an endorsement providing that the insurer may not invoke tribal sovereign immunity up to the limits of the policy and it shall provide that the State, OSP, their divisions, officers and employees are additional insureds, but only with respect to the Tribe's activities under this Compact, provided that the Tribe shall not be liable for any claim or cause of action for injury or damages caused

by the errors or omissions of the State, OSP, or their divisions, officers and employees. The Tribe shall indemnify, defend and hold harmless the State, its officers, directors, employees and agents from and against any claims, damages, losses or expenses asserted against or suffered or incurred by the State or its officers, directors, employees and agents (except as may be the result of their own negligence) based upon or arising out of any bodily injury or property damage resulting or claimed to result in whole or in part from any act or omission of the Tribe relating to the inspection of any gaming or gaming related facility pursuant to this Compact.

SECTION 9. INSPECTION AND ENFORCEMENT OF GAMING REGULATIONS.

A. Tribal Gaming Commission.

1. The Tribe agrees to maintain a Tribal Gaming Commission, which has the exclusive authority to regulate gaming activities on Tribal lands, and that has adequate resources to perform its duties under Tribal law and this Compact. The Commission or individuals designated to perform Commission duties shall not participate in any way in the management of the Gaming Facility. Commission members may be removed only for cause by the Tribal Council. Commission members must satisfy the security requirements that are applicable to High Security Employees and Primary Management Officials outlined in Section 7(A)(5) of this Compact.
2. The Tribal Gaming Commission shall have primary responsibility for the on-site regulation, control and security of the gaming operation authorized by this Compact, and for the enforcement of this Compact on Tribal Lands. The Tribal Gaming Commission's role shall include the following functions:
 - a. Ensure compliance with all relevant laws, Compact provisions, regulations, internal controls, policies and procedures that are applicable to the operation of gaming activities on Tribal lands;
 - b. Ensure the physical safety of patrons in, and of personnel employed by, the establishment;
 - c. Safeguard the assets transported to and from and within the gaming facility;
 - d. Protect patrons and property from illegal activity;
 - e. Detain persons suspected of crimes for the purpose of notifying law enforcement authorities;
 - f. Record any and all unusual occurrences within the gaming facility on computer printouts or in indelible ink in a bound notebook from which pages cannot be

removed, and each side of each page of which is sequentially numbered, as follows:

- (1) The assigned sequential number of the incident;
 - (2) The date;
 - (3) The time;
 - (4) The nature of the incident;
 - (5) The person involved in the incident; and
 - (6) The security employee assigned;
- g. Maintain logs relating to surveillance, security, cashier's cage, credit, video lottery terminals (showing when machines opened), and video lottery terminal location;
 - h. Establish and maintain an updated list of persons barred from the gaming facility either because of their criminal history or because their association with career offenders or career offender organizations poses a threat to the honesty, security and integrity of gaming operations, and furnish that list to the State;
 - i. Obtain an annual audit by a Certified Public Accountant;
 - j. Ensure that a closed circuit television system is maintained in the cash room of the gaming facility and that copies of the floor plan and TV system are provided to the State;
 - k. Ensure that a cashier's cage is maintained in accordance with industry standards for security;
 - l. Ensure that sufficient security personnel are employed and trained;
 - m. Subject to State review and comment, establish a method for resolving disputes with players; and
 - n. Ensure that surveillance equipment and personnel are managed and controlled independently of management of the gaming facility.
3. Tribal Gaming Inspections.
 - a. Persons authorized by the Tribal Gaming Commission shall have immediate access to any and all areas of the Gaming Facility for the purpose of ensuring compliance with the provisions of this Compact and Tribal Gaming Code and

regulations governing gaming. Any violations of the provisions of this Compact, or of the Tribal Gaming Code or regulations by the Tribal Gaming Operation, a gaming employee, or any person on the premises whether or not associated with the Tribal Gaming Operation, shall be reported immediately to the Tribal Gaming Commission by the persons authorized. The Tribal Gaming Commission shall report to the State within seventy-two (72) hours of the time the violation was noted by the Commission any violations of the provisions of this Compact, or of the Tribal Gaming Code or regulations by the Tribal Gaming Operation, a gaming employee, or any person on the premises whether or not associated with the Tribal Gaming Operation.

- b. The Tribal Gaming Commission may designate any individual or individuals to perform the inspection duties outlined in this subsection 9(A)(3), so long as those individuals perform those duties independently of the management of the Tribal Gaming Operation, and are supervised and evaluated by the Commission as to the performance of those duties.
- c. Inspections by the Tribal Gaming Commission shall include monitoring compliance with the requirements of applicable law, this Compact, regulations, internal controls, and policies and procedures, including but not limited to:
 - (1) Observation for compliance on a monthly basis, or more frequently, as determined by the Tribal Gaming Commission, the following:
 - (a) Sensitive gaming inventories;
 - (b) Video Lottery Terminal or table game drop;
 - (c) Soft count;
 - (d) Security and surveillance logs;
 - (e) Movement of cash within, into and outside the gaming facility;
 - (f) Surveillance procedures;
 - (g) Security procedures;
 - (h) Games controls;
 - (i) Integrity of VLT microprocessor or E-prom, CD rom, hard disk or other electronic decision-making technologies.
 - (2) Investigation of any potential violations of the provisions of this Compact, and applicable regulations, internal controls, policies and procedures.

- (3) Investigation of any cash variance greater than \$500 or that the Tribal Gaming Commission determines is a threat to the integrity of the gaming operation followed by a report of the findings to the Tribal Gaming Commission and the Oregon State Police.
 - (4) Review of all customer disputes reported and investigation of disputes over \$100.
 - (5) Reporting to the Oregon State Police any criminal or regulatory issues that may affect the fairness, integrity, security and honesty of the gaming operation.
4. Investigations and Sanctions. The Tribal Gaming Commission shall investigate any reported violation of the Compact provisions and shall require the Tribal Gaming Operation to correct the violation upon such terms and conditions as the Tribal Gaming Commission determines to be necessary. The Tribal Gaming Commission shall be empowered by the Tribal Gaming Code to impose fines and other sanctions within the jurisdiction of the Tribe against the gaming operation, a gaming employee, or any other person directly or indirectly involved in, or benefiting from, the gaming operation.
 5. Reporting to State. The Tribal Gaming Commission shall allow the OSP to inspect completed investigation reports and final dispositions upon reasonable notice. The State acknowledges that access to the information is provided with the understanding that the information is confidential and is being provided with the expectation that the information will not be subject to public disclosure. If requested by the Tribal Gaming Commission, the State shall assist in any investigation initiated by the Tribal Gaming Commission, and provide other requested services to ensure proper compliance with the provisions of this Compact, Tribal Gaming Code and regulations or applicable laws of the State.

B. State Enforcement of Compact Provisions.

1. Monitoring. The State is authorized hereby to monitor the Tribal Gaming Operation as the State considers necessary to ensure that the operation is conducted in compliance with the provisions of this Compact. The State shall have free and unrestricted access to all areas of the Gaming Facility during normal operating hours without giving prior notice to the Tribal Gaming Commission. The State must, however, whenever practicable, give prior notice to the Tribal Gaming Commission unless, in judgment of the Oregon State Police, to do so would impair or jeopardize the integrity of the investigation. The Tribe agrees that the State monitoring function includes at a minimum the activities identified in the Compact, the amendments and the memorandum of understanding entered into pursuant to this Compact, and that the actual, reasonable and necessary cost of monitoring activities shall be assessed to

the Tribe as provided in Section 10 of this Compact. In addition to the State's regular monitoring functions, the Tribe agrees that the State may conduct the following activities, the cost of which shall also be assessed to the Tribe as provided in Section 10:

- a. An annual comprehensive compact compliance review, which shall be planned and conducted jointly with the Tribal Gaming Commission, of the gaming operation to verify compliance with the requirements of this Compact and with the regulations and internal controls adopted by the Tribal Gaming Commission, including at a minimum, a review in the following areas: administrative controls (internal controls), gaming operations controls, drop boxes, station inventories, surveillance department controls, cashier cage controls, count room controls (security and surveillance), accounting department controls (security), general controls (Compact regulatory requirements), blackjack controls, VLT controls, Class III accounts payable, employee identification, gaming chip inventory for gaming floor and cage, physical examination of all class III gaming cards, chips, e-proms, paper stock, printers, keno balls, fill slips, video gaming devices, keno controls, off-track betting and security department controls;
 - b. Periodic review of any part of the gaming operation in order to verify compliance with the requirements of this Compact and with the regulations and internal controls;
 - c. Investigation of possible violations of this Compact or other gaming regulatory matters, whether discovered during the action, review, or inspection by the State during its monitoring activities, or otherwise;
 - d. Investigation of possible criminal law violations that involve the conduct of the gaming operation whether discovered during the action, review, or inspection by the State during its monitoring activities, or otherwise;
2. Access to Records. The State is authorized hereby to review and copy, during normal business hours, and upon reasonable notice, any and all Tribal records pertaining to the operation, management, or regulation of Class III Gaming by the Tribe, including all Class III gaming-related contracts, whether those records are prepared or maintained by the Tribe, the Tribal Gaming Commission or the Tribal Gaming Operation.
- a. The State believes that its activities under this Compact are subject to the State Public Records Law, ORS 192.410 to 192.505, and the Tribe acknowledges that this is the State's position. The State and Tribe acknowledge that the Tribe may contractually agree that any records created by or maintained by the State, including any records created or maintained in connection with the performance of the State's duties and functions under this Compact, belong to the State and are fully subject to the State Public Records Law. The Tribe agrees that the State can

legally include such a contractual provision in this Compact. Any information concerning the Tribe's Class III gaming operation that is contained in state records may be subject to disclosure under this contractual provision under ORS 192.410 to 192.505, unless the State would be permitted to withhold that information from disclosure under ORS 192.410 to 192.505. Examples of the kind of information that may be withheld from disclosure by the State under appropriate circumstances include:

- (1) "Trade secrets" as defined in ORS 192.501(2);
 - (2) Investigatory information compiled for criminal law purposes as described in ORS 192.501(3);
 - (3) Information submitted in confidence, as provided in ORS 192.502(3), which could include, for example, information contained in state records which would reveal information about the operation of any Class III game or which would reveal information about the workings of the Gaming Operation that could reasonably assist a person in the conduct of activity that could adversely affect the fairness, integrity, security or honesty of the Class III gaming activities; or
 - (4) Any information the disclosure of which is specifically prohibited by state or federal law.
- b. The parties contractually agree that for purposes of this Compact, applications submitted to and retained by the Oregon State Police for Class III gaming licenses are State records and may be subject to disclosure under ORS 192.410 to 192.505 unless the State would be permitted to withhold that information from disclosure under ORS 192.410 to 192.505.
 - c. The parties contractually agree that for purposes of this Compact, information about the Tribe's Class III gaming activities, whether obtained from the Tribe or from any other source, that is included in a document prepared, owned, used or retained by the State in connection with its duties and functions under this Compact may be subject to disclosure under ORS 192.410 to 192.505 unless the State would be permitted to withhold that information from disclosure under ORS 192.410 to 192.505 or as otherwise provided by this Compact.
 - d. The Tribe has agreed to allow the Oregon State Police access to sensitive financial, security and surveillance information that the Tribe considers confidential. The State acknowledges that the Tribe has voluntarily given the state access to this information and that the Tribe would not otherwise be required by law to do so. The State acknowledges that this information should reasonably be considered confidential. To the extent such information is included in any State records that are subject to disclosure, the State hereby obliges itself not to

disclose this information when the public interest, including the public interest in maintaining the honesty, integrity, fairness and security of the Tribe's Class III gaming activities, would suffer by such disclosure.

- e. The State agrees to notify the Tribe promptly of any request for disclosure of documents containing information about the Tribe's Class III gaming activities. If the State decides to release any documents that contain information about the Tribe's Class III gaming activities, the State will notify the Tribe at least five (5) working days before any disclosure is made.
 - f. Any dispute as to the disclosure of documents under this subsection shall be resolved according to the dispute resolution provisions of Section 16 of this Compact, but the parties agree that in any event the sole jurisdiction for the interpretation of the State Public Records law shall be the Oregon state courts.
 - g. Nothing in this subsection precludes the State or the Tribe from disclosing information pursuant to state, tribal or federal rules of civil procedure or evidence in connection with litigation, a prosecution or criminal investigation, subject to any defenses either party may assert.
3. Investigation Reports. After completion of any inspection or investigation report, the State shall provide a copy of the report to the Tribal Gaming Commission.

SECTION 10. TRIBAL PAYMENT OF COSTS FOR OVERSIGHT; CONTRIBUTION FOR PUBLIC BENEFIT.

A. Assessment for State Regulatory and Law Enforcement Costs

1. The Tribe agrees that it has the responsibility to pay for its fair share of costs for the monitoring, law enforcement, annual compliance review and vendor and employee license background investigations authorized pursuant to this Compact. The Tribe agrees to pay its fair share of the Oregon State Police costs pursuant to the formula set forth in this Section.
2. To give the Oregon Gaming Tribes an opportunity for review and comment, the Oregon State Police shall distribute a draft of the Tribal Gaming Section portion of the budget to the Oregon Gaming Tribes prior to submission of the budget to either the Governor or the Legislature. The Oregon State Police shall give full consideration to the Oregon Gaming Tribes' comments on the Tribal Gaming Section budget. Notwithstanding the right of the Oregon Gaming Tribes to comment on the Tribal Gaming Section budget, each Tribe retains the right to participate in any public review by either the Governor or the Legislature on the Oregon State Police budget as well as before the Emergency Board for any increase in the Oregon State Police budget.

3. Because of the government-to-government relationship between the Tribe and the State, the parties recognize that the obligation of the Tribe to pay for the Oregon State Police costs as provided by this Compact is unique. Nothing in this Compact is intended to, nor shall be construed as, creating a responsibility for the Tribe to pay for any other governmental services rendered by or received from the State.
4. The Tribe's monthly payment to the Oregon State Police shall be computed as follows:
 - a. The biennium budget for the Tribal Gaming Section shall be divided by twenty four (24) to determine the total monthly payment that must be made by the Oregon Gaming Tribes to the Oregon State Police for Compact related activities. This payment shall be referred to as the "OSP Monthly Payment."
 - b. Amounts received by the Oregon State Police from Class III Gaming Contractor license applicants, or any other gaming vendor license applicant, and from the payment for the assignment of Tribal Gaming Section officers to non-tribal gaming duties, shall reduce the OSP Monthly Payment owed by the Oregon Gaming Tribes which reduced sum shall be referred to as the "adjusted OSP Monthly Payment". The reduction in the OSP Monthly Payment owed by the Oregon Gaming tribes shall occur in the month the Oregon State Police receives such payments from third party sources.
 - c. The Tribe's monthly payment to the Oregon State Police shall be computed as follows:

No. of direct Service Hours billed to Coquille Tribal Gaming Operations		Adjusted OSP		Tribe's Share of
Total No. of Direct Service Hours Billed to All Oregon Tribal Gaming Operations.	X	Monthly Payment	=	OSP Monthly Payment
 - d. Every six months, or biennium quarter, the Oregon State Police shall reconcile the total payments received from the Oregon Gaming Tribes and third party sources during the six month period. The total of these payments should equal one-fourth of the Oregon State Police/Tribal Gaming Section biennium budget. Any underpayment or overpayment shall adjust the amount owed by the Oregon Gaming Tribes the month following the reconciliation.
5. As used in this section
 - a. "Oregon Gaming Tribes" means the federally recognized Indian Tribes in Oregon engaged in Class III gaming pursuant to a Tribal-State Compact.

b. "Direct Service Hours" means the actual time spent by Oregon State Police personnel in performing employee background checks, performing background checks on Class III Gaming Contractors or other gaming vendors (unless paid by the Class III Gaming Contractor or other gaming vendor), performing Compact monitoring functions (including the annual comprehensive compact compliance review), conducting an investigation, and traveling to and from the Gaming facility or the site of a Class III Gaming Contractor background investigation, for a particular Tribal Gaming Operation. The Oregon State Police shall keep direct service hour billing records setting forth the date work is performed, a brief description of the work performed and the amount of time spent.

B. If the Tribal Gaming Commission disputes the amount of the assessment under this Section, the Tribal Gaming Commission shall timely pay the undisputed amount and within thirty (30) days of billing, shall notify OSP in writing of the specific nature of the dispute. If the parties have not resolved the dispute within fifteen (15) days, the Tribal Gaming Commission shall pay the disputed amount into an off-reservation escrow, mutually agreeable to the parties, with escrow instructions providing that the funds are to be released only upon authorization by both the Tribal Gaming Commission and the Oregon State Police. The parties shall share the reasonable costs of the escrow. The dispute shall then be resolved pursuant to the procedures set forth in Section 6(B)(3) and (4) of this Compact.

If the Tribal Gaming Commission fails to timely pay the disputed amount into escrow or timely pay the undisputed amount, the Oregon State Police may suspend any background checks that are in process or withhold authorization for the shipment of equipment, and/or pursue other remedies for Compact violations available under this Compact or IGRA.

C. Creation and Maintenance of Community Benefit Fund.

1. Joint Recognitions.

- a. The Tribe and the State recognize that there are positive impacts and may be negative impacts or the perception of some negative impacts to the local community as a result of the presence of large employers such as the Tribe's gaming operation, some of which may be difficult or impossible to quantify.
- b. The Tribe and the State recognize that a formal process for collaborative decision-making regarding contributions to charitable causes fosters the goals of both governments to improve the general welfare of the community and is a way to ameliorate any negative impacts from the Tribal Gaming Operation.
- c. The Tribes and the State recognize that a formal community benefit fund allows specific benefits from this Compact to be identified by the community at large as stemming from the gaming operations conducted pursuant to this Compact.

2. Establishment of Fund. The Tribe agrees to establish a Fund within ninety (90) days of engaging in any of the games listed in Section 4(B)(1)(e)-(k) or 4(B)(2) ("new games"). The Tribe anticipates beginning to engage in the new games in the calendar year 2003. However, in the event the Tribe engages in any of the "new games" in the calendar year 2000, the fund contribution for that year shall be \$60,000. In the event the Tribe engages in any of those games in the calendar year 2001, the fund contribution for that year shall be \$90,000. In the event the Tribe engages in any of those games in the calendar year 2002, the fund contribution for that year shall be \$120,000. Otherwise, and thereafter, the fund contribution shall be calculated as provided in Section 10(C)(5). Beginning in the first calendar quarter after the Tribe implements any of the new games described in subsection 4(B) of this Compact, the Tribe will contribute to the Fund, from the Mill Casino Net Income, an amount calculated as provided in paragraph 5 below. The Tribe, in its discretion, may choose to make its contributions quarterly or annually. The Tribe shall name the Fund.

3. Fund Administration.
 - a. The assets of the Fund shall be expended for the benefit of the public within Coos, Curry, Douglas, Jackson and Lane Counties. Grants from the Fund may be made to charitable organizations in the above counties, to the Tribe, or to local government bodies within the county within whose boundaries the Coquille Tribal Reservation is located (Coos County) for any of the following purposes: education; health; public safety; gambling addiction prevention, education and treatment; the arts; the environment, cultural activities; historic preservation and such other charitable purposes as may be provided in the by-laws of the Fund.
 - b. The Fund will be administered by a board of seven trustees. Each trustee shall have an equal vote on actions of the board.
 - c. The trustees of the Fund shall establish by-laws governing the conduct and discharge of their responsibilities not inconsistent with the terms of this subsection.
 - d. The Tribe shall submit proposals for grants from the Fund to the trustees, who shall make the final determination of the proposals to be funded in accordance with the by-laws. Grants shall be made on the basis of merit. The trustees may reserve a portion of the Fund in a single year to fund a multi-year grant or grants.

4. Qualifications, Term and Selection of Trustees.
 - a. The membership of the board of trustees shall be:
 - (1) One member of the Coquille Tribal Council of the Coquille Tribe of Indians, appointed by the Tribal Council;

- (2) One representative of the Coquille Economic Development Corporation Board of Directors ("CEDCO"), appointed by the Tribal Council;
 - (3) Four members from the public at large, appointed by the Tribal Council after consultation with the Governor, from a list of candidates submitted by the community or tribe to the council. Two of these four must be non-tribal members.
 - (4) One member of the public at large, appointed by the Governor of the State after consultation with the Tribe.
- b. Except for the initial board, trustees shall serve two-year terms and may be removed before the end of their terms by the appointing authority at any time for any reason. The initial board shall serve as follows: the Tribal Council member, CEDCO board member and the Governor's appointee shall serve for two years; the remaining members of the initial board shall serve for one year. Trustees may be reappointed. Vacancies on the board of trustees shall be filled within thirty days by the appropriate appointing authority. Any trustee whose term has expired shall continue to serve until a successor has been appointed.
5. Calculation of Fund Contribution. The Tribe's annual contribution to the Fund shall be based upon the Mill Casino Net Income as shown in the audited financial statement of the Gaming Facility for the calendar year ending before the contribution is made. The contribution shall be calculated as follows:
 - a. Deduct from the Mill Casino Net Income before tribal taxes, and excluding any payment for Oregon State Police assessments, for the prior calendar year, the amount paid by the Tribe for Oregon State Police Part A assessments for the State's fiscal year ending the preceding June 30.
 - b. Multiply the result in subparagraph a. of this paragraph by six per cent (6%). The product shall be the Tribe's base community benefit contribution.
 - c. Deduct from the base community benefit contribution the amount paid by the Tribe for Oregon State Police Part B assessments for the State's fiscal year ending the preceding June 30. An amount equal to the difference is the amount of the annual contribution to the Fund.
 6. For purposes of this subsection:
 - a. Oregon State Police assessment Part A includes the amount paid by the Tribe to OSP for all employee background investigations, all criminal and regulatory investigations, and any consulting or gaming related services requested by the

Tribe that are not required by this Compact or by a Memorandum of Understanding under this Compact.

- b. Oregon State Police assessment Part B includes the amount paid by the Tribe to OSP for routine monitoring activities and all comprehensive compact compliance reviews.
7. For purposes of determining Mill Casino Net Income, the Tribal Gaming Operation shall obtain an unqualified audit opinion from an independent public accounting firm that the financial statement fairly reflects the Mill Casino's financial position and the Mill Casino Net Income. For purposes of determining the Mill Casino's financial position, "Mill Casino" includes the Class III Gaming Operation, bingo, pull tabs, restaurant, bar, gift shop and entertainment. The firm must have recent casino experience with at least one other casino, at least one client with revenues in excess of \$50,000,000, and must have received an unqualified report on its most recent peer review. The determination of the Mill Casino's financial position and the Mill Casino Net Income is subject to review by the State at its own expense. For purposes of this paragraph 10(C)(7), the State may act through the Oregon State Police or through an official designated as provided in Section 14 of this Compact. In the event the Tribal Gaming Operation has a qualified audit opinion, the State and the Tribal Gaming Commission shall confer on the materiality of the qualification.
8. Termination or Modification of Fund Contributions. The Tribe's contributions to the community benefit fund established as described in subsection C of this section may be discontinued if the Oregon Constitution is amended to remove the prohibition of casinos in the State. The Tribe and the State agree that if the Tribe is prohibited for any reason from offering blackjack or any of the Class III games listed in paragraphs 1 or 2 of subsection B of Section 7 of this Compact, the parties shall enter into negotiations to establish how the community benefit fund contribution provided for in this subsection shall be adjusted to reflect the impact of the discontinuation of those games on the Mill Casino Net Income.
9. Annual Fund Report. The Tribe shall provide a report to the Governor and the Oregon State Police detailing the amount contributed to the Fund for the calendar year, the grantees of the Fund and amounts of the grants. The Tribe shall provide the report within ninety (90) days of the end of the calendar year.

The State may at its discretion and expense perform an audit of the calculation of the contribution to the Fund.

SECTION 11. APPLICATION OF STATE REGULATORY STANDARDS.

A. Health, Safety and Environmental Standards.

1. The Tribe agrees to adopt, and the Tribal Gaming Commission shall enforce, ordinances and regulations governing health, safety and environmental standards applicable to the Gaming Facility that are at least as rigorous as comparable standards imposed by the laws and regulations of the State. The Tribe agrees to cooperate with any State or local agency generally responsible for enforcement of such health, safety and environmental standards outside Indian lands in order to assure compliance with such standards within the Gaming Facility. However, the Tribe shall have the exclusive regulatory jurisdiction over the enforcement of health, safety and environmental standards applicable to the Gaming Facility. The Tribe shall use its regulatory jurisdiction to assure that health, safety and environmental standards are met and maintained. Tribal ordinances and regulations governing water discharges from the Gaming Facility shall be at least as rigorous as standards generally imposed by the laws and regulations of the State relating to public facilities; provided, however, that to the extent that federal water discharge standards specifically applicable to the Gaming Facility would preempt such State standards, then such federal standards shall govern. Nothing herein shall be construed as precluding the Tribe from seeking "Treatment as a State" status under federal environmental laws.
2. Upon request by the State, the Tribal Gaming Commission agrees to provide evidence satisfactory to the State that any new construction, renovation or alteration of the Gaming Facility performed after the effective date of this Compact satisfies applicable Tribal health, safety and environmental standards. The Tribal Gaming Commission can demonstrate that it has satisfied this section by providing a certificate or other evidence of compliance from the appropriate state, local or tribal official responsible for enforcement of comparable state standards.
3. As used in this subsection, "health, safety and environmental standards" include but are not limited to structural standards, fire and life safety standards, water quality and discharge standards, food handling standards, and any other standards that are generally applicable under state or federal law to a non-tribal facility that is open to the public for purposes of protecting the public within the facility. "Health, safety and environmental standards" does not include land use regulations or zoning laws.
4. After the State has notified the Tribal Gaming Commission, the State may have state or local inspectors verify compliance with this subsection. If the State asserts that the Tribe is in breach of this subsection, and that the breach creates an immediate and substantial threat to the health or safety of the patrons or employees of the Gaming Facility, the Tribe agrees to take such steps as are necessary to protect the public or employees until the breach is remedied. Resolution of any dispute as to what steps are necessary shall be conducted in the same manner as and under the principles and

procedures established for resolution of operating disputes in Section 6 of this Compact.

- B. Transportation Issues. The Tribe agrees to consult and cooperate with the Oregon Department of Transportation regarding any traffic issues arising out of the Gaming Operation and vehicles that patronize the Gaming Facility. To the extent the Gaming Facility contributes to any traffic impacts on surrounding city, county or State roads, the Tribe agrees to fund an appropriate proportion of improvements necessary to mitigate or reduce such impacts.

The Tribe shall maintain access from its Gaming Facility onto the public road known as Highway 101 that is adequate to meet standards of the Oregon Department of Transportation or shall enter into agreements with the Oregon Department of Transportation for the maintenance of such access by the State, including provisions for compensation by the Tribe for some portion of the costs incurred by the State in constructing such improvements to the public highway, including traffic control signals, as may be necessary.

- C. The Tribe shall report to the Oregon Department of Revenue gambling winnings paid to any person subject to Oregon Personal Income Tax on those winnings whenever the Tribe would be required to report those winnings to the Internal Revenue Service. The information shall be reported in the manner required by the Oregon Department of Revenue. The Tribe agrees that the management of the Gaming Facility will withhold and remit personal income taxes from employee wages to the Oregon Department of Revenue in the manner prescribed by the Department of Revenue.
- D. Public Safety Issues. If local government officials believe that an off-Indian land public safety problem has been created by the existence of the Gaming Facility, the Tribe, or its designated representative, shall agree to meet with the mayor or county commission of the affected government to discuss whether a problem exists, and to develop mutually agreeable measures to alleviate the problem. The burden shall be on the local government officials to meet with the Tribe and to demonstrate that the public safety problem is directly attributable to the existence of the Gaming Facility. If an off-Indian land public safety problem has been created by the existence of the Gaming Facility, the Tribe shall undertake to perform any mutually agreeable and reasonable measures to alleviate the problem. If the Tribe and local government officials are unable to agree on measures to alleviate the problem, the State may initiate the dispute resolution process established in Section 16 of this Compact. Any burden imposed on the Tribe under this subsection shall be reasonable and proportionate to the problem created.

SECTION 12. EFFECTIVE DATE; TERMINATION; AMENDMENTS.

A. Effective Date. This amended and restated Compact shall become effective upon execution by the State and by the Tribe and appropriate federal approval.

B. Termination. This Compact shall remain in effect until such time as:

1. This Compact is terminated by written agreement of both parties;
2. The State amends its Constitution or laws to criminally prohibit within the State conduct of all of the Class III gaming authorized by this Compact, whether for profit or not for profit;
3. A court of competent authority makes a final determination that all of the Class III games authorized by this Compact are criminally prohibited under the law of the State, and the determination has become final and enforceable;
4. The federal government amends or repeals IGRA so that a Compact is no longer required for the Tribe's exercise of Class III gaming; or
5. Either party materially breaches this Compact; but only after the dispute resolution process set forth in Section 16 of this Compact has been exhausted, and the breach has continued for a period of sixty (60) days after written notice following the conclusion of the dispute resolution process.

C. Automatic Amendment.

1. If a type of Class III game authorized under Section 4 of this Compact is criminally prohibited by an amendment to State statute or Constitution, this Compact shall no longer authorize the Tribe to engage in that type of Class III game, and any provisions in this Compact authorizing such gaming shall be void and of no effect.
2. If a court decides that a Class III game authorized under this Compact is criminally prohibited, this Compact shall no longer authorize the Tribe to engage in that type of Class III game, and any provisions in this Compact authorizing such gaming shall be void and of no effect.
3. If a type of Class III game authorized is prohibited as provided in paragraphs 1 or 2 of this subsection, the Tribe shall be required to cease operating that Class III game only if and under the same circumstances and conditions as the State or any other affected person must cease operating the corresponding game.

D. Amendments.

1. This Compact may be amended if one of the following conditions occur:

- a. The State becomes a party to another Tribal-State Compact that authorizes a tribe other than the Coquille Tribe of Indians to engage in any Class III gaming activity or scope of gaming activity not permitted under the terms of this Compact.
 - b. One year elapses after the date this amended and restated Compact is approved by the Secretary of the Interior.
 - c. The State amends State statute or Constitution to expand the type of Class III gaming permitted in the State for any purpose by any person, organization, or entity.
 - d. The Tribe notifies the State that it has entered into an agreement with another Indian Tribe for joint operation, management or interest in the Gaming Facility or the gaming activities under this Compact.
2. Paragraph 12(D)(1) above does not authorize the Tribe to renegotiate the terms of this Compact applicable to forms of gaming authorized by Section 4 of this Compact, except to the extent that the State voluntarily consents to such renegotiation or as is otherwise provided for in this Compact.
3. Pursuant to paragraph 12(D)(1), the State or the Tribe may by appropriate and lawful means, request negotiations to amend, replace or repeal this Compact. In the event of a request for renegotiation or the negotiation of a new agreement, this Compact shall remain in effect until renegotiated or replaced, unless sooner terminated under subsection 12.B. Such request to renegotiate shall be in writing and shall be sent by certified mail to the Governor of the State or the Chair of the Tribe at the appropriate office identified at Section 14 below. If a request is made by the Tribe, it shall be treated as a request to negotiate pursuant to IGRA. All procedures and remedies available under IGRA shall thereafter apply with the exception that the 180-day period for negotiation set forth at 25 U.S.C. 2710(d) shall be 100 days.
4. No amendment per this section 12(D) shall be in effect prior to approval of the Department of the Interior or as otherwise deemed approved under IGRA.

SECTION 13. DISCLAIMERS AND WAIVERS.

- A. Gaming at Another Location or Facility. For a period of five (5) years, the Tribe hereby waives any right it may have under IGRA to negotiate a Compact for Class III gaming at any other location or facility, unless another Tribe that is operating a gaming facility in this State as of December 31, 1997, signs a Compact that authorizes that Tribe to operate more than one gaming facility simultaneously, or is otherwise authorized to operate more than one gaming facility simultaneously, or unless a physical calamity occurs that makes operation at the existing location unfeasible.
- B. Status of Class II Gaming. Nothing in this Compact shall be deemed to affect the operation by the Tribe of any Class II gaming as defined in the Indian Gaming Regulatory Act or to confer upon the State any jurisdiction over such Class II gaming conducted by the Tribe.
- C. Prohibition on taxation by the State. Nothing in this Compact shall be deemed to authorize the State to impose any tax, fee, charge or assessment upon the Tribe or any Tribal Gaming Operation, except for charges expressly authorized in accordance with this Compact.
- D. Preservation of Tribal Self-Government. Except as provided in Section 9(A)(1), nothing in this Compact shall be deemed to authorize the State to regulate in any manner the government of the Tribe, including the Tribal Gaming Commission, or to interfere in any manner with the Tribe's selection of its governmental officers, including members of the Tribal Gaming Commission. No licensing or registration requirement contemplated by this Compact shall be applicable to such officers with respect to their capacity as officers of the Tribe.
- E. This Compact is exclusively for the benefit of and governs only the respective authorities of and the relations between the Tribe and the State. Nothing in this Compact shall be construed as creating or granting any rights to any third party, or as establishing any objection or defense for any third party to any charge, offense or prosecution.
- F. The Tribe and the State agree that any activities that must be performed under this amended and restated Compact to prepare for implementation of any new games authorized under Section 4 may be undertaken before the Secretary of the Interior approves this amended and restated Compact.
- G. Change in Federal Law. The Tribe reserves the right to take advantage of any change in federal law that permits additional gaming to be conducted by the Tribe without the need for a Compact, but only after the Tribe has provided thirty (30) days written notice of its intent to offer a game under this provision. Nothing herein shall be interpreted to prevent the State from objecting to the form of gaming pursuant to the dispute resolution provisions of this Compact. This Compact shall not be construed as a surrender by the Tribe of those rights.

SECTION 14. NOTICES.

All notices required or authorized to be served to the Oregon State Police shall be served by first class mail at the following address:

Captain
Oregon State Police
Gaming Enforcement Division
400 Public Service Building
Salem, OR 97310

All other notices required or authorized to be served shall be served by first class mail at the following addresses:

Legal Counsel to the Governor
Office of the Governor
254 State Capitol
Salem, OR 97310

Chair of the Coquille
Tribal Gaming Commission
P.O. Box 1525
Coos Bay, OR 97420

SECTION 15. SEVERABILITY.

In the event that any section or provision of this Compact is held invalid, or its application to any particular activity is held invalid, it is the intent of the parties that the remaining sections of the Compact and the remaining applications of such section or provision shall continue in full force and effect.

SECTION 16. DISPUTE RESOLUTION.

- A. At the discretion of either party, in the event either party believes that the other party has failed to comply with any requirement of the Compact, that party may invoke the following dispute resolution procedure in order to foster cooperation and avoid the costs of litigation:
 - 1. The party asserting noncompliance shall serve written notice on the other party in the manner provided in Section 14. The notice shall identify the specific provision of the Compact alleged to have been violated and shall specify the factual basis for the alleged noncompliance. The State and the Tribe shall thereafter meet within thirty (30) days in an effort to resolve the dispute.
 - 2. In the event the dispute is not resolved to the satisfaction of the parties within ninety (90) days after service of notice, either party may initiate an action against the other party in the United States District Court for the District of Oregon to interpret or enforce the provisions of this Compact. In the event that the Federal court declines jurisdiction, an action can be filed in a State court of competent jurisdiction to interpret or enforce the provisions of this Compact.
- B. Nothing in subsection 16(A) shall be construed to waive, limit or restrict any remedy that is otherwise available to either party to enforce the provisions of this Compact or limit or restrict the ability of the parties to pursue, by mutual agreement, alternative methods of dispute resolution.
- C. With respect to gaming not authorized by this Compact, nothing in this Compact shall be construed to limit the authority of the State or the federal government to take immediate action to enforce and prosecute the gambling laws of the State and the United States pursuant to 18 USC §1166 (Section 23 of IGRA).

SECTION 17. INTEGRATION

This compact is the complete and exclusive expression of the parties' intent.

EXECUTED as of the date and year above-written.

EXHIBIT I

DESCRIPTION OF PERMANENT GAMING LOCATION

Beginning at a point on the Easterly boundary of the Southern Pacific Railroad right-of-way, from which the City monument located at the intersection of the centerline of Sherman Avenue and the South line of Ohio Avenue, said monument being the initial point of Coos Bay Plat "B" (amended), North Bend, Oregon, bears North 55 degrees 55'11" West 1557.24 feet, more or less; thence North 17 degrees 43'30" East 110.42 feet to a 3-inch galvanized iron pipe fence corner; thence South 83 degrees 04'37" East 73.85 feet (formerly South 83 degrees 08'40" East) along the existing cyclone fence to a 3-inch galvanized iron pipe fence corner; thence North 09 degrees 35'53" East 172.13 feet (formerly North 09 degrees 31'50" East) along the existing cyclone fence to a 3-inch galvanized iron pipe fence corner; thence North 25 degrees 49'09" East 15.75 feet (formerly North 25 degrees 45'06" East) to a steel I-beam guard post; thence North 41 degrees 26'29" East 59.00 feet (formerly North 41 degrees 22'26" East) to a steel I-beam piping support post; thence South 80 degrees 18'00" East 111.42 feet along a line parallel to the North line of vacated Lombard Street; thence North 09 degrees 42'00" East 14.53 feet; thence South 80 degrees 18'00" East 194.58 feet, more or less, to the United States Harbor line; thence South 02 degrees 41'46" West 14.81 feet along said U.S. Harbor line; thence continuing along said U.S. Harbor line South 12 degrees 11'14" West 1427.66 feet, more or less, to the intersection of said U.S. Harbor line and an Easterly projection of the North line of Newmark Street; thence North 80 degrees 18'00" West 115.63 feet along said projected line of Newmark Street to the Southeast corner of Lot 9, Block 6, Coos Bay Plat "B", North Bend, Oregon; thence North 80 degrees 18'00" West 50.00 feet along the South line of said Lot 9, Block 6; thence North 09 degrees 42'00" East 99.82 feet to the North line of Lot 6, Block 6; thence North 80 degrees 15'43" West 190.00 feet to the East line of Tremont Street (also being the Easterly line of the Southern Pacific Railroad right-of-way), said point also being the Northwest corner of Lot 6, Block 19, Coos Bay Plat "B", North Bend, Oregon; thence North 09 degrees 42'00" East 861.46 feet along said Eastern boundary of Tremont Street (also being the Easterly line of the Southern Pacific Railroad right-of-way); thence leaving said Eastern line of Tremont Street, and continuing along said Easterly line of the Southern Pacific Railroad right-of-way 115.77 feet along a 739.72 foot radius curve left through a central angle of 08 degrees 58'02" (the long chord of which bears North 02 degrees 29'46" East 115.65 feet) to the point of beginning.

Said above described tract of land contains 11.88 acres, more or less.

DESCRIPTION OF PERMANENT GAMING FACILITY

The Gaming Facility is a building of approximately 340,000 square feet, consisting of more than one development phase.

**AMENDED AND RESTATED
TRIBAL-STATE COMPACT FOR REGULATION
OF CLASS III GAMING BETWEEN THE COW CREEK BAND OF
UMPQUA TRIBE OF INDIANS AND THE STATE OF OREGON**

PREAMBLE.

This Amended and Restated Compact (this "Compact") is made between the State of Oregon (hereinafter the "State") and the Cow Creek Band of Umpqua Tribe of Indians (hereinafter the "Tribe") and pertains to Class III gaming conducted on Tribal trust lands subject to the provisions of the Indian Gaming Regulatory Act of October 17, 1988 (Public Law 100-497), 25 U.S.C. §2701, et seq. ("IGRA"). The terms of this Compact are unique to this Tribe.

SECTION 1. TITLE.

THIS Compact is entered into this ___ day of _____, 1997, by and between Cow Creek Band of Umpqua Tribe of Indians, a federally recognized Tribe, and the State of Oregon. Upon execution by the parties and approval by the Secretary of the Interior, this Compact replaces the compact entered into between the parties on October 2, 1992, and approved by the Secretary of the Interior on November 20, 1992, and all prior amendments thereto.

SECTION 2. FINDINGS.

WHEREAS, the Tribe is a federally recognized Indian Tribe and the beneficial owner of, and local government for, trust lands of the Tribe located in the State;

AND WHEREAS, the State and the Tribe are separate sovereigns and each respects the laws of the other sovereign;

AND WHEREAS, the public policy of the State is reflected in the Constitution, statutes and administrative rules of the State;

AND WHEREAS, Tribal policy, as reflected in the Tribe's Constitution, is "to secure and protect the powers inherent in our sovereign status and guaranteed to us by treaty and Federal law, to preserve our culture and tribal identity, to promote the social and economic welfare of our people, to secure, protect, and develop our common resources, to maintain peace and order and safeguard individual rights, and to advance our mutual welfare";

AND WHEREAS, the United States Congress has enacted IGRA, which declares federal policy and provides a statutory basis for operation of tribal gaming as a means of promoting tribal economic development, self-sufficiency, and strong tribal governments;

AND WHEREAS, the Tribe exercises authority over Tribal trust land acquired prior to the enactment of IGRA;

AND WHEREAS, IGRA is intended to provide a statutory basis for regulation of gaming by the Tribe adequate to shield it from organized crime and other corrupting influences, to ensure that the Tribe is the primary beneficiary of gaming revenues, and to ensure that tribal gaming is conducted fairly and honestly by both operators and players;

AND WHEREAS, the continued growth and success of tribal gaming depends upon public confidence and trust that tribal gaming operations are honest, fair, secure and free from criminal and corruptive influences;

AND WHEREAS, public confidence and trust can be maintained through strict compliance with laws and regulations related to licensed gaming establishments, by all persons

involved in tribal gaming operations;

AND WHEREAS, the relationship between the State and the Tribe rests on mutual trust and the recognition that each has a fundamental duty to protect the gaming public through separate, appropriate responsibilities during the life of current and future Compacts;

AND WHEREAS, the Tribe and the State agree that State regulation of tribal gaming operations will be funded by the tribal gaming industry;

AND WHEREAS, Congress has declared that it is a principal goal of federal Indian policy to promote tribal economic development, tribal self-sufficiency and strong tribal government;

AND WHEREAS, IGRA provides for a system of joint regulation by tribes and the federal government (to the exclusion of the State) of Class I and II gaming on tribal lands as defined in IGRA;

AND WHEREAS, IGRA establishes a system of agreements between tribes and states for the regulation of Class III gaming as defined in that Act;

AND WHEREAS, IGRA provides that Class III games are lawful on Tribal lands only if such activities are (1) located in a state that permits such gaming for any purpose by any person, organization or entity, (2) authorized by tribal ordinance and (3) conducted in accordance with a Tribal-State Compact;

AND WHEREAS, the Congressional intent in passing IGRA was to reaffirm a long and well-established principle of federal Indian law as expressed in the United States Constitution, reflected in federal statutes and articulated in decisions of the United States Supreme Court that unless authorized by an act of Congress, the jurisdiction of state governments does not extend to tribal lands;

AND WHEREAS, IGRA does not extend State jurisdiction or the application of State laws for any purpose other than jurisdiction and application of State laws to Class III gaming conducted on tribal land as set forth in this Compact;

AND WHEREAS, Congress recognized a role for state public policy and state law in the regulation of Class III gaming;

AND WHEREAS, nothing in this Compact shall be construed to extend to any activities other than Class III gaming, any other lands than those limited lands of the tribe upon which Class III gaming is conducted, or as an abrogation of any reserved rights of the Tribe or of the Tribe's sovereignty;

AND WHEREAS, IGRA is intended to expressly preempt the field in the governance of gaming activities on Tribal lands;

AND WHEREAS, the State recognizes the Tribe's continuing cooperation with the State in assuring the honesty, integrity and security of the gaming operation and the Tribe's commitment to a close working relationship with the Oregon State Police;

AND WHEREAS, the Tribe is authorized to act through its Board of Directors;

AND WHEREAS, the State of Oregon is authorized to act through the Governor of the State;

NOW THEREFORE, in consideration of the mutual undertakings and agreements herein

set forth, the Tribe and the State enter into the following Compact:

SECTION 3. DEFINITIONS.

As used in this Compact, and in its Appendix and Exhibits:

- A. "Background investigation" means a security and financial history check of a Class III Gaming Contractor or an applicant for a Tribal gaming license, whether the applicant is a prospective employee, consultant or vendor.
- B. "Class III Gaming Contract" means a contract that involves a Major Procurement or a Sensitive Procurement.
- C. "Class III Gaming Contractor" is any individual, business or other entity that proposes to consummate, or in fact consummates, a Class III Gaming Contract.
- D. "Consultant" means any person, other than an employee, who provides advice or expertise to the Tribe concerning the operation, management or financing of the Tribe's Class III gaming activities for compensation. "Consultant" does not include a person engaged for the purpose of training or teaching employees of the Tribal Gaming Operation if the contract for those services is no greater than one month in duration.
- E. "Controlling interest" means fifteen percent (15%) of the equity ownership of a company.
- F. "Counter Game" means keno, race and sports book and off-race course mutuel wagering.
- G. "Gaming Facility" means the building and grounds located on the Tribe's trust land immediately north of and adjacent to Canyonville, Oregon, known as the "Seven Feathers Hotel and Casino Resort" at the location specifically described in Exhibit 1 to the Compact, and any property used to store gaming equipment.
- H. "High Security Employee" means any natural person who participates in the operation or management of the Tribal Gaming Operation, whether employed by the Tribe or by a person or entity providing on-site or off-site gaming operation or management services to the Tribe, including but not limited to: gaming operations administrators, managers and assistant managers, gaming facility surveillance or security personnel, dealers, croupiers, shift supervisors, cage personnel (including cashiers and cashier supervisors), drop and count personnel, gaming management consultants, video lottery terminal technicians, junket representatives; and any other person whose employment duties require or authorize access to areas of the Gaming Facility related to Class III gaming and which are not otherwise open to the public.
- I. "Key Employee" means any officer or any person who can substantially affect the course of business, make decisions, or is in a sensitive position in an organization or corporation that is a Class III Gaming Contractor or an applicant for a Tribal gaming license.
- J. "Low Security Employees" means any employee of the Tribal Gaming Operation whose duties require the employee's presence in any area of the Gaming Facility where Class III gaming activities take place, but who is not a High Security Employee and who is not involved in the operation of Class III gaming.

- K. "Major Procurement" means any procurement action or contract between the Tribe or the Tribal Gaming Operation and a manufacturer, supplier, consultant, management contractor, or lender, for goods, services or products used in, or affecting the honesty, integrity, security or fairness of, the operation of the Tribe's Class III gaming activities, including but not limited to:
1. The printing of tickets used in any Class III gaming;
 2. Any goods or services involving the receiving or recording of number selections or bets in any Class III gaming;
 3. Any goods, services, systems or products used to determine winners in any Class III gaming;
 4. Video devices or other equipment used in Class III games, except equipment specifically included in the definition of Sensitive Procurement;
 5. A contract or license to use a patented game or game product;
 6. Accounting systems or surveillance systems to be used in the Tribe's Class III gaming activities;
 7. A contract that provides for, or the terms of which will make necessary, a continuing relationship over time (more than thirty days) between the parties; or
 8. A contract that involves or requires commitments by either party to the contract such that there would be substantial financial consequences to one of the parties if the contract or procurement action was terminated prematurely. For this purpose a contract involving consideration or value of \$100,000 or more shall be deemed to involve substantial financial consequences to one of the parties if the contract or procurement action was terminated prematurely.
- L. "Oregon State Police" refers to the Gaming Enforcement Division, or that administrative unit charged with gaming enforcement regulatory responsibilities, of the Department of State Police established under Oregon Revised Statutes section 181.020, or its successor agency established by law.
- M. "Owner" means any person or entity that owns 5% or more of the equity ownership of a company, alone or in combination with another person who is a spouse, parent, child or sibling.
- N. "Primary Management Official" means any person who:
1. Has administrative or high-level management responsibility for part or all of the Class III Tribal Gaming Operation, whether as an employee or under a management contract;
 2. Has authority --
 - a. to hire and fire supervisory employees; or
 - b. to set or otherwise establish working policy for the gaming operations; or

3. Is the chief financial officer or other person who has financial management responsibility for the Tribal Gaming Operation.
- O. "Sensitive Procurement" means any procurement action or contract that is not a "Major Procurement," for Class III gaming equipment (such as cards, dice, keno balls, roulette wheels, roulette balls, chips, tokens, VLT or keno paper, gaming tables, table layouts or the like), or any other products that are not used directly in the conduct of Class III gaming, but that directly affect the integrity, security, honesty, and fairness of the operation and administration of the Tribe's Class III gaming activities such as replacement parts for video lottery terminals (bill acceptors, printers), locks and keys for secure storage areas or gaming devices, or individual surveillance cameras.
- P. "Table game" means any Class III game allowed under this Compact except video lottery games, keno, off-race course mutuel wagering, and race and sports book.
- Q. "Tribal Gaming Operation" means the entity, whether or not separately incorporated, that operates Class III gaming under tribal authority, and receives revenues, issues prizes and pays expenses in connection with Class III games authorized under this Compact.
- R. "Video lottery terminal" or "terminal" means an electrical or electronic device, component, or terminal that displays a ticket through the use of a video display screen, and that is available for consumer play upon payment of any consideration, with winners determined by the application of the element of chance and the amount won determined by the possible prizes displayed on the device.

SECTION 4. AUTHORIZED CLASS III GAMING.

- A. This Compact shall be the only Compact between the Tribe and State pursuant to IGRA and any and all Class III gaming conducted in the Gaming Facility shall be pursuant to this Compact. To the extent that elements of this Compact need to be altered to incorporate changes to the agreements between the parties the parties shall provide such changes in accordance with Subsection 12.D. of this Compact.

B. Authorized games.

1. Subject to, and in compliance with the provisions of this Compact, the Tribe may engage in the following Class III games: video lottery games of chance, keno, off-race course mutuel wagering, blackjack, craps, roulette, pai-gow poker, mini-Baccarat, let-it-ride, and big 6 wheel. The Tribe may offer race and sports bookmaking except that no wagers may be accepted by telephone and no wagers may be accepted or paid on:
 - a. Any amateur sports event in Oregon;
 - b. Any event held outside Oregon, if any participant in the event represents a public or private institution located in Oregon;
 - c. Any event, regardless of where it is held, involving a professional sports team whose home field, court or base is in Oregon.
 - d. Any event other than a racing or athletic sports event.
2. Subject to, and in compliance with, the provisions of this Compact, including but not limited to subsection E of this section, the Tribe may engage in any other Class III game that has been approved by the Nevada Gaming Commission. Operation of any game under this paragraph must be pursuant to rules, procedures and internal controls for the new game at least as stringent as the minimum internal control standards set forth in the Appendix to this Compact.
3. Before the Tribe offers a new game under this subsection 4.B., the Tribe and the Oregon State Police must agree that the Tribe has adopted appropriate internal controls, surveillance plans, game rules and procedures, as provided in subsection E of this section, and that the Tribal Gaming Commission and the Oregon State Police are fully prepared to regulate and monitor the new game.
4. This section shall be construed consistent with federal classification of gaming activities. Notwithstanding any provision of this Compact, any gaming activity classified under federal law or regulation as Class II activity shall not be subject to the provisions of the Compact.

C. Gaming Location. Gaming authorized under this Compact shall be conducted only in the Gaming Facility.

D. Number of gaming devices. The number of Class III video lottery games of chance authorized by this Compact shall not exceed 1300. Subject to other terms of this agreement, the Tribe may determine in its discretion the location and spacing of video lottery terminals within the Gaming Facility. The Tribe may operate a maximum of sixty tables of table games at the Gaming Facility.

E. Addition of Authorized Games at Gaming Facility.

1. At least 60 days before any game newly authorized under this Compact is conducted at the Gaming Facility the Tribal Gaming Commission shall:
 - a. Ensure that the Tribal Gaming Operation develops rules and procedures for a system of internal controls for the new game that meet the minimum standards established in the Appendix to this

Compact.

- b. Require that the Tribal Gaming Operation provide appropriate training for all dealers, supervisors, surveillance personnel, Tribal Gaming Inspectors and any other employees involved in the conduct or regulation of the new game, such that those employees have the knowledge and skills required under typical industry standards for the job function that employee performs, including but not limited to player money management and betting, card counting and detection of cheating methods.
 - c. Ensure that the Gaming Facility establishes a security and surveillance plan for the new game that meets the minimum standards established in the Appendix hereto.
 - d. Adopt rules of operation for the game that meet the minimum standards established in the Appendix hereto, including rules of play and standards for equipment.
 - e. Notify the Oregon State Police that the Tribe proposes to offer the new game to the public, and provide to the Oregon State Police for review all of the internal controls, regulations, plans, procedures and rules required under this paragraph 1 of this subsection.
2. The Tribe agrees to introduce new games authorized under this section according to the following schedule:
- a. Within the sixty day period after the Secretary of the Interior approves this Compact the Tribe may offer three of the games authorized under paragraph 1 of subsection B of this section in addition to any games already authorized pursuant to the prior Class III gaming compact between the Tribe and the State;
 - b. Within the ninety day period after the sixty-day period specified in subparagraph a of this paragraph, the remaining games authorized under paragraph 1 of subsection B of this section;
 - c. After the period of time specified in subparagraphs a. and b. of this paragraph, for any game authorized by paragraph 2 of subsection B of this section, one new game may be introduced in each following calendar quarter.

3. The Tribe shall establish wager limits for all games. The maximum wager for any table game or counter game, except for race and sports book, shall be \$500. The maximum wagers for race and sports book shall be \$5,500 for a straight bet and \$500 for a parlay bet. Whenever a new table or counter game, other than race and sports book, is introduced, the Tribe shall establish an initial wager limit of \$100 per hand, play or bet. After a period of six months of operation of the new table game in full compliance with the requirements of this Compact, the Tribe may request that a maximum wager of \$500 be authorized. The Oregon State Police may refuse to agree to an increase in the maximum wager limit if there have been any significant problems with the conduct of the new game due to noncompliance with internal controls, rules of operation of the game or with the terms of this subsection. Wager limits, and the time lines provided for increasing them, authorized for any games authorized pursuant to the prior Class III gaming compact between the Tribe and the State are not reduced by this amended and restated Compact.

SECTION 5. JURISDICTION.

A. In General.

1. The State shall have criminal jurisdiction over offenses committed by or against Indians and non-Indians within the Gaming Facility and on the Tribe's trust land; the criminal laws of the State shall have the same force and effect on Tribal trust lands as they have on non-Tribal lands within the State.
2. The Tribe and the State shall have concurrent criminal jurisdiction over offenses committed by Indians within the Gaming Facility and on the Tribal Lands. Once a Tribal police force or a Tribal criminal court is in operation on Tribal lands, the enforcement of criminal laws at the Gaming Facility shall be further clarified by a Memorandum of Understanding to be executed by the Tribe and the Superintendent of the Oregon State Police.
3. The Tribe and the State agree that local law enforcement officials may provide the first response for law enforcement matters that are not related to the operation of gaming or that occur other than in the course of the play of games. As between the Oregon State Police and local law enforcement officials, the Oregon State Police shall have exclusive authority to investigate violations of state criminal law related to the operation of gaming or that occur in the course of play of games.
4. If the Tribe establishes a law enforcement agency that is responsible to investigate criminal law violations on Tribal lands, the Tribe agrees that the Oregon State Police shall continue to have the authority to investigate possible violations of this Compact or other gaming regulatory matters. The Tribe and the State further agree that their respective law enforcement agencies will cooperate in any investigation that involves or potentially involves both criminal and regulatory violations.

5. The Tribe and the State agree to cooperate on the investigation and prosecution of any gambling crime committed at the Gaming Facility. The Tribe and the State agree to cooperate in establishing a state-wide system to identify and monitor persons excluded from any tribal gaming facility in the State.
- B. Except as provided in a Memorandum of Understanding executed in accordance with the foregoing paragraph 5.A.2., officers of the Oregon State Police, or other State officers designated by the State in writing, as provided in Section 14 of this Compact, shall have unrestricted access anywhere within the Gaming Facility and on Tribal trust land used for or in relation to class III gaming for the purpose of maintaining public order and public safety, conducting investigations related to possible criminal activity and enforcing applicable laws of the State. The Tribe, or authorized individuals acting on its behalf, shall provide officers of the Oregon State Police, or other State officers designated as provided in Section 14, access to locked and secure areas of the Gaming Facility in accordance with the regulations for the operation and management of the Gaming Facility.
- C. The Oregon State Police may station one or more officers at the Gaming Facility by mutual agreement with the Tribe.
- D. Nothing in this agreement shall be construed to affect the civil or criminal jurisdiction of the Tribe, or of the State under Public Law 83-280. The Tribe and the State agree that the criminal laws of Oregon that proscribe gambling activities shall apply to any person who engages in the proscribed activities if those activities are not conducted under the authority of the Tribe as provided in this Compact and under IGRA.

SECTION 6. PRINCIPLES GOVERNING GAMING OPERATIONS DECISIONS

- A. The Tribe and the State agree that maintaining the honesty, integrity, fairness and security of the Tribe's Class III gaming activities is essential both to the success of the enterprise, and to satisfy the interests of the State and of the Tribe. The Tribe and the State agree that both of them have the responsibility to protect persons who patronize the Gaming Facility from any breach of integrity or security. Accordingly, all decisions by the Tribe, the Tribal Gaming Commission and the management of the Tribal Gaming Operation, concerning regulation and operation of the Gaming Facility, including those decisions expressly placed within the Tribe's discretion under the terms of this Compact, shall be consistent with each of the following principles:
 1. Any and all decisions concerning regulation and operation of the Tribe's Class III gaming activities, whether made by the Tribe, the Tribal Gaming Commission or the management of the Tribal Gaming Operation, shall reflect the particularly sensitive nature of a gaming operation.
 2. In order to maintain the honesty, integrity, fairness and security of the Tribe's Class III gaming activities, the Tribe, the Tribal Gaming Commission and the management of the Tribal Gaming Operation shall work diligently and take all reasonably necessary steps to prevent cheating and theft, and to protect the Tribe's Class III gaming activities from influence or control by any form of criminal activity or organization.
 3. The honesty, integrity, fairness and security of the Tribe's Class III gaming activities shall be a paramount consideration in awarding contracts,

licensing and hiring employees, and in making other business decisions concerning the operation of the Tribe's Class III gaming activities. The Tribe, the Tribal Gaming Commission and the management of the Tribal Gaming Operation shall knowingly make no decision that compromises the honesty, integrity, fairness or security of the Tribe's Class III gaming activities.

4. Regulation and operation of the Tribe's Class III gaming activities shall be, at a minimum, consistent with generally accepted industry standards and practices, in order to maintain the honesty, integrity, fairness and security of the Tribe's Class III gaming activities.

B. Procedure for Resolving Disputes Concerning Operational Decisions.

1. If the State, in good faith, believes that any decision by the Tribe relating to the employment or licensing of any employee, awarding of any contract or operation of the Tribe's Class III gaming activities is inconsistent with the principles set forth in subsection A of this section, or any other requirement of this section, the State may give written notice to the Tribe. The written notice shall describe the factual basis for the State's concern.
2. The parties shall meet and confer within 15 days after the Tribe receives the notice.
3.
 - a. If the State's concerns set forth in the written notice are not resolved informally, either party may initiate non-binding arbitration within 45 days after the service of the written notice.
 - b. An arbitrator shall be selected in the following manner:
 - (1) The parties shall obtain a list of qualified arbitrators from U.S. Arbitration and Mediation of Oregon, or any other arbitration panel agreed to by the parties.
 - (2) Each party, in turn, shall strike one name from the list, until one name remains. The parties shall draw lots to determine which party makes the first strike.
 - c. Upon agreement by both parties, the arbitration proceeding shall be binding.
 - d. The parties shall divide the cost of the arbitration proceeding equally between them.
4. Upon conclusion of the arbitration proceeding, if the parties have not elected to be bound by that result, either party may initiate an action in the United States District Court for the District of Oregon as provided in section 16 of this Compact.

5. Expedited Procedure.

- a. If the State, in good faith, believes that there is an immediate threat to the honesty, integrity, fairness and security of the Tribe's Class III gaming activities, and believes that substantial harm will result during the time that would pass if the procedure established in paragraphs 1 to 3 of this subsection is followed, the State may give written notice to the Tribe. The written notice shall describe the factual basis for the State's concern. The written notice shall describe the specific action the State believes is necessary to prevent substantial harm from occurring. The Tribe agrees that it shall act according to the State's recommendation, unless the Tribal Gaming Commission determines that acting according to the State's recommendation would adversely affect the honesty, integrity, fairness and security of the Tribe's Class III gaming activities. Nothing in this subparagraph shall preclude the Tribe from invoking the dispute resolution procedures provided in this Compact after it implements the State's recommendation provided pursuant to this subparagraph.
- b. The parties shall confer within five (5) days after the Tribe receives the notice.
- c. If the State's concern is not resolved informally within ten days after the Tribe receives the notice, either party may initiate an action in the United States District Court for the District of Oregon as provided in section 16 of this Compact.
- d. An immediate threat to the honesty, integrity, fairness and security of the Tribe's Class III gaming activities includes but is not limited to the following examples:
 - (1) A criminal indictment is filed against any Class III Gaming Contractor, or Owner or Key Employee of a Class III Gaming Contractor, or against any Key Employee of the Tribal Gaming Operation;
 - (2) A criminal organization or members of a criminal organization have obtained an ownership interest in a Class III Gaming Contractor, or a member of a criminal organization has become a Key Employee of a Class III Gaming Contractor;
 - (3) A malfunction of gaming equipment hardware or software causes patrons of the Gaming Facility to lose money improperly, and that loss is directly related to the equipment malfunction;
 - (4) The security of gaming equipment has been impaired by loss, theft, or tampering;
 - (5) The physical safety or security of patrons is seriously at risk;

- (6) A continuing pattern of failure by the Tribe, the Tribal Gaming Commission or management of the Tribal Gaming Operation to enforce compliance with the provisions of this Compact or the regulations and internal controls established pursuant to this Compact.
- 6. For purposes of this subsection 6.B., the State shall act through the Oregon State Police, or an official designated in the manner provided in Section 14 of this Compact.
- C. The provisions of this section shall provide the preferred method for resolving disputes as to the Tribe's decisions concerning hiring or contracting under section 7 of this Compact, or concerning operation of the Tribe's Class III gaming activities.

SECTION 7. LICENSING AND CONTRACTING.

A. Licensing of Gaming Employees.

- 1. All Primary Management Officials, High Security Employees and Low Security Employees employed in the Gaming Facility shall be licensed by the Tribal Gaming Commission in accordance with the provisions of this Compact.
- 2. All prospective employees -- whether High Security Employees, Low Security Employees or Primary Management Officials -- shall provide to the Tribal Gaming Commission and the Oregon State Police any required application fees and, at a minimum, the following information, on forms provided or approved by the Oregon State Police:
 - a. Full name, including any aliases by which the applicant has been known;
 - b. Social security number;
 - c. Date and place of birth;
 - d. Residential addresses for the past five years;
 - e. Employment history for the past five years;
 - f. Driver's license number;
 - g. All licenses issued and disciplinary actions taken by any federal, state or tribal gaming agency;
 - h. All criminal proceedings, except for minor traffic offenses, to which the applicant has been a party;
 - i. A current photograph.
- 3. In addition to the requirements of paragraph 7.A.2. above, prospective High Security Employees and Primary Management Officials shall provide two sets of fingerprints.

4. a. The Tribal Gaming Commission shall forward the applicant information for each prospective High Security Employee and Primary Management Official to the Oregon State Police. The Oregon State Police shall conduct a background investigation and provide a written report to the Tribal Gaming Commission within a reasonable period of time, but in no event shall such background checks exceed thirty (30) days without written notice to and consent by the Tribe.
- b. The Tribe may request the Oregon State Police to perform a background investigation on any prospective Low Security Employee. Upon such request, the Oregon State Police shall conduct a background check as provided in subparagraph a. of this paragraph.
5. a. Except as provided in paragraph 6 of this subsection, the Tribal Gaming Commission shall deny a gaming license to any High Security Employee or Primary Management Official who:
 - (1) Has, within the ten-year period preceding the date of license application, committed a felony other than a traffic offense, whether or not conviction of such a felony has been expunged, under the law of any federal, state or tribal jurisdiction, or is the subject of a civil judgment under the law of any federal, state or tribal jurisdiction that is based on facts that constitute the elements of a felony other than a traffic offense, in that jurisdiction;
 - (2) has committed a crime involving unlawful gambling under the law of any federal, state or tribal jurisdiction, whether or not conviction of such a crime has been expunged, or is the subject of a civil judgment under the law of any federal, state or tribal jurisdiction that is based on facts that constitute the elements of a crime involving unlawful gambling in that jurisdiction;
 - (3) has associated in a direct business relationship, whether as a partner, joint venturer or employer, with any other person who has committed a felony other than a traffic offense, or a crime involving unlawful gambling, under the law of any federal, state or tribal jurisdiction; or
 - (4) was employed by any other person who has committed a felony other than a traffic offense, or a crime involving unlawful gambling, under the law of any federal, state or tribal jurisdiction, if the prospective employee or official was in any way involved in the criminal activity as it occurred.
- b. The Tribal Gaming Commission shall deny a gaming license to any prospective High Security Employee or Primary Management Official if:
 - (1) The applicant fails to disclose any material fact to the Tribal Gaming Commission or the Oregon State Police or their authorized agents during a background or security

investigation; or

(2) The applicant misstates or falsifies a material fact to the Tribal Gaming Commission or the Oregon State Police during a background or security investigation.

c. The Tribal Gaming Commission may deny a gaming license to any prospective High Security Employee or Primary Management Official for any reason the Tribal Gaming Commission deems sufficient. Such decisions to grant or deny a gaming license shall be consistent with the principles set forth in subsection A of Section 6 of this Compact. In determining whether to deny a gaming license to any prospective High Security Employee or Primary Management Official, the factors to be considered by the Tribal Gaming Commission shall include, but need not be limited to, the following:

(1) The applicant has been convicted of any crime (other than a crime listed in subparagraph a. of this paragraph) in any jurisdiction; or

(2) The applicant has associated with persons or businesses of known criminal background, or persons of disreputable character, that may adversely affect the general credibility, honesty, integrity, security, fairness or reputation of the Tribe's Class III gaming activities; or

(3) There is any aspect of the applicant's past conduct that the Tribal Gaming Commission determines would adversely affect the honesty, integrity, security or fairness of the Tribe's Class III gaming activities.

d. After this Compact becomes effective, the Tribal Gaming Commission shall deny a gaming license to any prospective Low Security Employee who has committed a crime described in subparagraphs (1) or (2) of subparagraph a. of this paragraph. The Tribal Gaming Commission may deny a gaming license to any Low Security Employee applicant who does not meet the criteria established in the remainder of this paragraph 5. Decisions to grant or deny a gaming license shall be consistent with the principles set forth in subsection A of Section 6 of this Compact.

e. The Tribal Gaming Commission may reject an application if the applicant has not provided all of the information requested in the application.

f. Denial of a gaming license by the Tribal Gaming Commission is final.

g. No Primary Management Official or High Security Employee may be permanently licensed by the Tribal Gaming Commission until all background checks required under paragraph 7.A.4. of this section are completed.

6. Waiver of Disqualifying Criteria.

- a. Notwithstanding the requirements of paragraph 5 of this subsection, if a prospective Primary Management Official, High Security Employee or Low Security Employee is disqualified for licensing under the provisions of paragraph 5 above, and the Tribal Gaming Commission believes that there are mitigating circumstances that justify waiver of the disqualifying factor, the Tribal Gaming Commission may give written notice to the Oregon State Police asking to meet and confer concerning waiver of the disqualification. The Tribal Gaming Commission and the Oregon State Police shall meet within 15 days after written notice is given.
 - b. In order to waive disqualification of licensing of any prospective Primary Management Official, High Security Employee or Low Security Employee, both the Tribal Gaming Commission and the Oregon State Police must agree on the waiver.
 - c. Waiver of disqualification of licensing may be based on one or more of the following circumstances:
 - (1) Passage of time since conviction of a crime;
 - (2) The applicant's age at the time of conviction;
 - (3) The severity of the offense committed;
 - (4) The overall criminal record of the applicant;
 - (5) The applicant's present reputation and standing in the community;
 - (6) The nature of the position for which the application is made.
 - (7) The nature of a misstatement or omission made in the application.
7. Background investigation during employment. The Tribal Gaming Commission or the Oregon State Police may conduct additional background investigations of any gaming employee at any time during the term of employment. If, after investigation, the Oregon State Police determines there is cause for the revocation or suspension of an employee's gaming license under the criteria established in paragraph 5 of this subsection 7.A., it shall promptly so report to the Tribal Gaming Commission and furnish the Tribal Gaming Commission with copies of all relevant information pertaining to such determination. The Tribal Gaming Commission shall review the Oregon State Police report and supporting materials and if it concludes that good cause for revocation or suspension of an employee's gaming license exists under the criteria established in this subsection 7.A., the subject employee shall have his gaming license suspended or revoked according to the procedures set forth in the Tribe's Gaming Ordinance.
8. Temporary licensing of employees.
- a. The Tribal Gaming Commission may issue a temporary license to High Security Employees fifteen days after submission of the application to the Oregon State Police, or upon completion of a

review of the employee's application and completion of a computerized criminal history check and credit check by the Tribal Gaming Commission, if the applicant would not be disqualified on the basis of the results of the application review and preliminary checks. The temporary license shall expire and become void upon completion of the full background check by the Oregon State Police and submission of the results to the Tribal Gaming Commission. If the employee does not qualify for a permanent license, the Tribal Gaming Commission shall immediately revoke the temporary license.

- b. The Tribal Gaming Commission may issue a temporary license to a Low Security Employee upon submission of the application to the Oregon State Police, or upon completion of a review of the employee's application and completion of a computerized criminal history check and credit check by the Tribal Gaming Commission, if the applicant would not be disqualified on the basis of the results of the application review and preliminary checks. Any Low Security Employee shall be subject to immediate license revocation if the Oregon State Police or the Tribal Gaming Commission determines that the employee does not meet the criteria established in subparagraph 7.A.5.d.
 - c. For purposes of this paragraph, if an application is forwarded by mail to the Oregon State Police or the results of a background check by the Oregon State Police are provided to the Tribe by mail, the material is deemed to be submitted three days after the date of mailing.
 - d. No temporary license may be granted under this paragraph to a Primary Management Official or to a consultant performing or consulting on Primary Management Official functions or duties.
9. Duration of license and renewal. Any employee license shall be effective for not more than three (3) years from the date of issue except that a licensed employee who has applied for renewal may continue to be employed under the expired license until final action is taken on the renewal application in accordance with the provisions of paragraphs 7.A.2. to 7.A.5. above. Applicants for renewal shall provide the Tribal Gaming Commission with updated information on a form provided or approved by the Oregon State Police but will not be required to resubmit historical data already provided. The Oregon State Police may perform a new background investigation for any employee whose license is renewed.
10. Revocation of license. The Tribal Gaming Commission may revoke the license of any employee pursuant to policies set forth in the Tribe's Gaming Ordinance. The Tribal Gaming Commission shall revoke the license of any employee upon determination that the employee does not meet the criteria described in paragraph 7.A.5. above.
11. The Tribe shall maintain a procedural manual for employees of the Tribal Gaming Operation that includes rules and regulations of conduct and disciplinary standards for breach of procedures.
12. The Tribal Gaming Commission agrees to provide to the Oregon State Police, on a monthly basis, a list of all current employees of the Gaming

Facility and to give notice to the Oregon State Police of any disciplinary action or termination of an employee, related to the fairness, integrity, security or honesty of the Tribe's Class III gaming activities, and any suspension or revocation of an employee's gaming license.

B. Contracts with Manufacturers and Suppliers.

1. Major Procurements.

- a. The Tribe agrees not to execute or consummate any contract for a Major Procurement until a background investigation has been completed by the Oregon State Police on the proposed Class III Gaming Contractor.
- b. The Tribal Gaming Commission shall submit any proposed Major Procurement to the State for review, comment and a background investigation of the proposed Class III Gaming Contractor.
- c. Except as provided in paragraph 3 below, the Oregon State Police shall conduct a background investigation and provide a written report to the Tribal Gaming Commission within a reasonable period of time, but in no event shall the time for completion of such background investigations exceed sixty (60) days after the Oregon State Police receives from the proposed Class III Gaming Contractor both the Oregon State Police's fee for the background investigation under subsection C of this section, and full disclosure of all information requested by the Tribe and the Oregon State Police under paragraph 4 of this subsection, without written notice to and consent by the Tribe.
- d. If the Tribe requests, the Oregon State Police agrees to make its best efforts to complete a background investigation within less than sixty days. The Tribal Gaming Commission and the Oregon State Police may also agree that if business necessity or the protection of the honesty, integrity, fairness and security require it, the State may perform an abbreviated review to enable the Tribe to execute a temporary contract while a complete background investigation is being performed. Any temporary contract executed under authority of this subparagraph, shall be rescinded immediately if the complete background investigation discloses that the Class III Gaming Contractor does not meet the criteria described in paragraph 6 of this subsection 7.B.

2. Sensitive Procurements.

- a. After a proposed Class III Gaming Contractor has submitted full disclosure of all information requested by the Tribe and the Oregon State Police under paragraph 4 of this subsection, and any necessary fee required by the Oregon State Police, the Tribe may execute or consummate a contract for a Sensitive Procurement before a background investigation has been completed by the Oregon State Police on the proposed Class III Gaming Contractor.
- b. The Tribal Gaming Commission shall submit a proposed contract for a Sensitive Procurement, or if there is no contract, a letter of intent to do business with the proposed Class III Gaming

Contractor, to the Oregon State Police for a background investigation of the proposed Class III Gaming Contractor before execution of the contract.

- c. The Oregon State Police shall conduct a background investigation, if the Oregon State Police considers it necessary, and provide a written report to the Tribal Gaming Commission. If the Class III Gaming Contractor does not meet the criteria described in paragraph 6 of this subsection 7.B. for approval of a contract, the contract shall be terminated and the Tribe agrees to discontinue doing business with the contractor so long as the contractor fails to meet the criteria for approval.
3. The Oregon State Police agrees to maintain a list of Class III Gaming Contractors that have been previously approved to do business in Oregon with any tribal gaming operation. If a Class III Gaming Contractor has been included in the list, the Tribe may execute or consummate a contract with the Class III Gaming Contractor for a Sensitive Procurement upon giving notice of the contract to the Oregon State Police. If a Class III Gaming Contractor has been included in the list for Major Procurements, the Oregon State Police shall complete any necessary background investigation required under paragraph 1 of this subsection within thirty (30) days after the fees and full disclosure have been submitted to the Oregon State Police by the contractor.
4. Class III Gaming Contractors, and any Owner or Key Employee of a Class III Gaming Contractor, shall provide all personal and business information required by the Oregon State Police to conduct its background investigation, before executing a contract or beginning to do business with the Tribe.
5. The Tribe shall not consummate any Class III Gaming Contract with a Class III Gaming Contractor that does not grant both the Oregon State Police and the Tribe access to such Class III Gaming Contractor's business and financial records upon request.
6. Criteria for Contract Denial or Termination.
 - a. The Tribe shall not consummate any Major Procurement, and a contract for a Sensitive Procurement shall be immediately terminated, if the following conditions are either disclosed in the application materials or reported by the Oregon State Police relative to a particular Class III Gaming Contractor:
 - (1) A conviction of the Class III Gaming Contractor or any Owner or Key Employee of the Class III Gaming Contractor for any felony other than a traffic offense, in any jurisdiction within the ten year period preceding the date of the proposed Class III Gaming Contract;
 - (2) A conviction of the Class III Gaming Contractor or any Owner or Key Employee of the Class III Gaming Contractor for any gambling offense in any jurisdiction;

- (3) A civil judgment against the Class III Gaming Contractor or any Owner or Key Employee of the Class III Gaming Contractor, based in whole or in part upon conduct that would constitute a gambling offense, or a civil judgment entered within the ten year period preceding the date of the proposed Class III Gaming Contract against the Class III Gaming Contractor or any Owner or Key Employee of the Class III Gaming Contractor, based in whole or in part upon conduct that would constitute a felony other than a traffic offense;
 - (4) A failure by the Class III Gaming Contractor to disclose any material fact to the Oregon State Police or the Tribe or their authorized agents during initial or subsequent background or security investigations;
 - (5) A misstatement or untrue statement of material fact made by the Class III Gaming Contractor to the Oregon State Police or the Tribe or their authorized agents during initial or subsequent background or security investigations as determined by the Tribe or the Oregon State Police;
 - (6) An association of the Class III Gaming Contractor with persons or businesses of known criminal background, or persons of disreputable character, that may adversely affect the general credibility, security, integrity, honesty, fairness or reputation of the Gaming Facility;
 - (7) Any aspect of the Class III Gaming Contractor's past conduct that the Tribe or the Oregon State Police determines would adversely affect the integrity, security, honesty or fairness of the Gaming Facility;
 - (8) The Class III Gaming Contractor has engaged in a business transaction with a tribe that involved providing gaming devices for Class III gaming conducted by such tribe without a state-tribal Class III gaming compact in violation of IGRA; or
 - (9) A prospective Class III Gaming Contractor fails to provide any information requested by the Tribe or the Oregon State Police for the purpose of making any determination required by this subsection 6.B.
- b. The Tribe may choose not to consummate any Class III Gaming Contract for any reason the Tribe deems sufficient.
 - c. Other criteria the Tribe may use to decide not to consummate any Class III Contract include, but are not limited to, the Tribe's determination that:
 - (1) A person who is otherwise qualified to be a Class III Gaming Contractor owns, is an agent of or has any other interest in any person or business that is unqualified or

disqualified to be a Class III Gaming Contractor, regardless of the qualifications of the person seeking to consummate the Class III Gaming Contract;

- (2) A prospective Class III Gaming Contractor demonstrates inadequate financing for the business anticipated under the proposed Class III Gaming Contract. In determining whether financing is adequate, the Tribe shall consider whether financing is from a source that meets the qualifications of paragraph 5 of subsection A of this section, or paragraph 6 of subsection B of this section and whether that financing is in an amount to ensure the likelihood of success in the performance of the contractor's duties and responsibilities; or
- (3) A prospective Class III Gaming Contractor or its employees fail to demonstrate business ability and experience to establish, operate and maintain the business of the type of Class III Gaming Contract proposed.

- d. No Class III Gaming Contractor shall own, manufacture, possess, operate, own an interest in, or gain income or reimbursement in any manner from gaming activities or gaming devices in any jurisdiction unless the activities or devices are approved and certified by another state or tribal lottery, gambling or gaming control agency, or the National Indian Gaming Commission, and such ownership, manufacture, possession, operation, or income is disclosed to and approved by the Tribe and the Oregon State Police.
- e. Notwithstanding subparagraph a. of this paragraph 6, if a prospective Class III Gaming Contract may not be consummated because of the requirements of this subsection 7.B., because a person previously associated with the Class III Gaming Contractor or an employee of the Class III Gaming Contractor has been convicted of a crime or a civil judgment entered against the Class III Gaming Contractor or its employee within the ten year period preceding the date of the proposed Class III Gaming Contract, based in whole or in part upon conduct that allegedly constitutes a felony other than a traffic offense, the Tribe may enter into the proposed Class III Gaming Contract if the Class III Gaming Contractor has severed its relationship with the convicted or liable person or employee. Before the Tribe may enter into a Class III Gaming Contract under this subparagraph, the Oregon State Police and the Tribe must agree that the relationship between the Class III Gaming Contractor and the convicted or liable person or employee has been severed. For purposes of this subparagraph, a relationship is severed if the convicted or liable person or employee has no continuing connection with the direction or control of any aspect of the business of the Class III Gaming Contractor, and the convicted or liable person or employee is no longer employed by the Class III Gaming Contractor in any capacity. The burden of showing to the satisfaction of the Tribe and the Oregon State Police that a relationship has been severed is on the Class III Gaming Contractor.

7. Rescission or Termination of Class III Gaming Contracts.

- a. The Tribe may rescind or terminate any Class III Gaming Contract pursuant to policies and procedures determined by the Tribe.
- b. Class III Gaming Contracts shall be subject to rescission or termination for cause consistent with the criteria established by paragraph 7.B.6. of this section. Class III Gaming Contractors consent to rescission or termination of any Class III Gaming Contract for cause consistent with the criteria established by paragraph 7.B.6. of this section by virtue of entering into a Class III Gaming Contract.

8. Contractor Reporting Requirements.

- a. All Class III Gaming Contractors shall submit to the Tribe and the Oregon State Police any financial and operating data requested by the Tribe or the Oregon State Police.
- b. The Tribe shall specify the frequency and a uniform format for the submission of such data on a case by case basis.
- c. The Tribe, the Oregon State Police, or their agents reserve the right to examine Class III Gaming Contractor tax reports and filings and all records from which such tax reports and filings are compiled.
- d. All Class III Gaming Contractors shall notify both the Tribe and the Oregon State Police of the transfer of a Controlling Interest in the ownership Class III Gaming Contractor.

9. Termination of Contract.

- a. No Class III Gaming Contract shall have a term longer than seven (7) years.
- b. A Class III Gaming Contract shall terminate immediately upon the occurrence of any of the following:
 - (1) The Class III Gaming Contractor is discovered to have made any statement, representation, warranty, or certification in connection with the Class III Gaming Contract that is materially false, deceptive, incorrect, or incomplete;
 - (2) The Class III Gaming Contractor fails to perform any material requirements of the Class III Gaming Contract or is in violation of any material provision thereof, and fails to cure same within ten (10) days' written notice of such failure;
 - (3) The Class III Gaming Contractor, or any Owner, officer or

key employee of the Class III Gaming Contractor is convicted of a felony or a gambling-related offense that reflects on the Class III Gaming Contractor's ability to perform honestly in carrying out the Class III Gaming Contract;

- (4) The Class III Gaming Contractor jeopardizes the integrity, security, honesty, or fairness of the Gaming Facility; or
- c. A Class III Gaming Contract shall terminate if the Tribe determines satisfactory performance of the Class III Gaming Contract is substantially endangered or can reasonably anticipate such occurrence or default.

C. Fees for Background Investigations.

1. The Oregon State Police shall be reimbursed its costs for performing background investigations made pursuant to this Compact as provided in section 10 of this Compact.
2. The Oregon State Police will assess the cost of a background investigation of a Class III Gaming Contractor to such Class III Gaming Contractor. Class III Gaming Contractors are required to pay the investigation fee in full in advance. If the Class III Gaming Contractor refuses to prepay the investigation fee, the Oregon State Police shall notify the Tribe and the Tribe may pay the investigation cost or withdraw its request for the investigation.

D. Access to Contracts.

1. If a Primary Management Official is a corporation or other form of organization, such Primary Management Official shall provide the Oregon State Police at all times with a current copy of any management agreement with the Tribe that allows it to conduct Class III gaming on Tribal trust land.
2. If a Primary Management Official is a corporation or other form of organization, such Primary Management Official shall furnish to the Oregon State Police complete information pertaining to any transfer of a Controlling Interest in such corporation or organization at least 30 days before such transfer; or, if the Primary Management Official is not a party to the transfer of the Controlling Interest, immediately upon acquiring knowledge of such change or any contemplated change.
3. In order to assure the honesty, integrity, fairness and security of the Tribe's Class III gaming activities, The Tribe agrees to provide to the Oregon State Police, upon request, a list of all non-gaming contractors, suppliers and vendors doing business with the Gaming Facility, and to give the Oregon State Police access to copies of all non-gaming contracts, provided, however, that the Oregon State Police shall make a written request for such information.

SECTION 8. REGULATIONS FOR OPERATION AND MANAGEMENT OF CLASS III GAMES.

- A. Gaming Regulations. Conduct of all Class III gaming activity authorized under this Compact shall be in accordance with the requirements of this Compact and with the minimum standards set forth in the Appendix to this Compact. The provisions of the Appendix, "Tribal/State Minimum Internal Control Standards," are hereby incorporated into and made a part of this Compact. The Tribe and the State agree that the minimum standards set forth in the Appendix may be modified or supplemented by mutual agreement of the parties, and that subsequent amendment of this Compact shall not be necessary for any such modification or supplementation of the minimum standards set forth in the Appendix.
- B. Identification badges. The Tribe shall require all Gaming Facility employees to wear, in plain view, identification badges issued by the Tribal Gaming Commission that include photo and name, with the exception of employees assigned to covert compliance duties, who shall only be required to have on their person an identification badge. Oregon State Police employees shall not be required to wear identification badges.
- C. No credit extended. All gaming conducted pursuant to this Compact shall be conducted on a cash basis. Except as provided herein, no person shall be extended credit for gaming nor shall the Tribe permit any person or organization to offer such credit for a fee. Cashing checks for purposes of Class III gaming constitutes extending credit under this subsection. This restriction shall not apply to credits won by players who activate play on video games of chance after inserting coins or currency into the games. This section shall not restrict the right of the Tribe or any other person to install and accept bank card or credit card transactions in the same manner as is permitted at any retail business in the State.
- D. Prohibition on attendance and play of minors. No person under the age of twenty-one (21) shall participate in any Class III gaming authorized by this Compact. No person under the age of twenty-one (21) shall be allowed to play any Class III game operated under this Compact. If any person under the age of twenty-one (21) plays and otherwise qualifies to win any Class III game prize or compensation the prize or compensation shall not be paid. Employees under age twenty-one (21) whose non-gaming duties require may be present on the gaming floor. Notwithstanding the requirements of this subsection, the Tribe may continue to employ any employees under age twenty-one (21) who are required to perform gaming duties as part of their employment as of the date this Compact was signed by the Tribe and the State, but shall not employ any new employees under age twenty-one (21) to perform Class III gaming duties thereafter.
- E. Prohibition of firearms.
1. Except as provided in paragraphs 2. and 3. below, no person shall possess firearms within the Gaming Facility.
 2. Federal, State and Douglas County law enforcement agents or officers may possess firearms within the Gaming Facility.
 3. Pursuant to a memorandum of understanding between the Oregon State Police and the Tribe, security supervisors at the Gaming Facility employed by the Tribe may possess firearms within the Gaming Facility. The

memorandum of understanding shall provide for the policies, standards and training controls that will apply to armed security supervisors.

- F. Service of Alcohol. No alcohol shall be served in the Gaming Facility unless authorized by the Tribe as permitted by federal law. The Tribe and the Oregon Liquor Control Commission have entered into a Memorandum of Understanding which establishes which State laws and Oregon Liquor Control Commission licensing regulations shall be applied to the sale or service of alcoholic beverages at the Gaming Facility. Nothing in this subsection shall permit the State to impose taxes on the sale of alcoholic beverages by the Tribe. If alcohol is served in the Gaming Facility, no alcoholic beverages may be served free or at a reduced price to any patron of the Gaming Facility as an inducement to participate in any gaming. No alcohol may be served or consumed on a gaming floor where gaming is underway.
- G. Liability for damage to persons and property. During the term of this Compact, the Tribe shall maintain public liability insurance with limits of not less than \$250,000 for one person and \$2,000,000 for any one occurrence for any bodily injury or property damage. The Tribe's insurance policy shall have an endorsement providing that the insurer may not invoke tribal sovereign immunity up to the limits of the policy. The Tribe shall indemnify, defend and hold harmless the State, its officers, directors, employees and agents from and against any claims, damages, losses or expenses asserted against or suffered or incurred by the State or its officers, directors, employees and agents (except as may be the result of their own negligence) based upon or arising out of any bodily injury or property damage resulting or claimed to result in whole or in part from any act or omission of the Tribe relating to the inspection of any gaming or gaming related facility pursuant to this Compact.

SECTION 9. INSPECTION AND ENFORCEMENT OF GAMING REGULATIONS.

- A. Tribal Gaming Commission.
1. The Tribe agrees to establish a Tribal Gaming Commission, to grant such Commission the independent authority to regulate gaming activities on Tribal lands, and to provide such Commission with adequate resources to perform its duties under Tribal law and this Compact. The Commission shall not participate in any way in the management of the Tribe's Class III gaming activities. Commission members may be removed only for cause by the Tribal Board of Directors. Commission members must satisfy the security requirements that are applicable to High Security Employees and Primary Management Officials.
 2. The Tribal Gaming Commission shall have primary responsibility for the on-site regulation, control and security of the gaming authorized by this Compact, and for the enforcement of this Compact on Tribal Lands. The Tribal Gaming Commission's role shall include the following functions:
 - a. Ensure compliance with all relevant laws, Compact provisions, regulations, internal controls, policies and procedures that are applicable to the operation of gaming activities on Tribal lands;
 - b. Ensure the physical safety of patrons in the Gaming Facility, and of personnel employed by the Tribal Gaming Operation;
 - c. Safeguard the assets transported to and from and within the Gaming Facility;
 - d. Protect Gaming Facility patrons and property from illegal activity;

- e. Detain persons suspected of crimes for the purpose of notifying appropriate law enforcement authorities;
 - f. Record any and all unusual occurrences within the Gaming Facility in indelible ink in a bound notebook from which pages cannot be removed, and each side of each page of which is sequentially numbered, as follows:
 - (1) The assigned sequential number of the incident;
 - (2) The date;
 - (3) The time;
 - (4) The nature of the incident;
 - (5) The person involved in the incident; and
 - (6) The security employee assigned;
 - g. Maintain logs relating to surveillance, security, cashier's cage, credit, video lottery terminals (showing when video machines opened), and video lottery terminal location;
 - h. Establish and maintain an updated list of persons barred from the Gaming Facility either because of their criminal history or because their association with career offenders or career offender organizations poses a threat to the honesty, security and integrity of gaming operations, and furnish that list to the Oregon State Police;
 - i. Obtain an annual audit by a Certified Public Accountant;
 - j. Ensure that a closed circuit television system is maintained in the cash room of the Gaming Facility and that copies of floor plan and TV system are provided to the Oregon State Police;
 - k. Ensure that a cashier's cage is maintained in accordance with industry standards for security;
 - l. Ensure that sufficient security personnel are employed and trained;
 - m. Establish a method for resolving disputes with players; and
 - n. Ensure that surveillance equipment and personnel are managed and controlled independently of management of the Gaming Facility.
3. Tribal Gaming Inspector.
- a. Tribal Gaming Inspectors, as agents of the Tribal Gaming Commission, shall inspect the Gaming Facility at random during all hours of gaming operation, and shall have immediate access to any and all areas of the Gaming Facility for the purpose of ensuring compliance with the provisions of this Compact and Tribal ordinances, and regulations governing gaming. Any material

violations of the provisions of this Compact, or of Tribal ordinances or regulations by the Tribal Gaming Operation, a gaming employee, or any person on the premises whether or not associated with the Gaming Facility, shall be reported immediately to the Tribal Gaming Commission.

The Tribal Gaming Commission shall report such violations to the Oregon State Police within seventy-two (72) hours of the time the violation was noted. For purposes of this subparagraph, a violation of the provisions of this Compact or of Tribal ordinances or regulations governing those matters identified in subparagraph c. of this paragraph are material violations.

- b. The Tribal Gaming Commission may designate any individual or individuals to perform the duties of Tribal Gaming Inspector, so long as each inspector performs those duties independently of the management of the Tribal Gaming Operation, and is supervised and evaluated by the Tribal Gaming Commission as to the performance of those duties.
- c. Tribal Gaming Inspectors shall monitor compliance with the requirements of applicable law, this Compact, regulations, internal controls, policies and procedures, including but not limited to:
 - (1) Observe for compliance, on a monthly basis or more frequently as determined by the Tribal Gaming Commission, at least four of the following:
 - (a) Sensitive gaming inventories;
 - (b) VLT or table game drop;
 - (c) Soft count;
 - (d) Security and surveillance logs;
 - (e) Movement of cash within, into and outside the Gaming Facility;
 - (f) Surveillance procedures;
 - (g) Security procedures;
 - (h) Games controls;
 - (i) Integrity of VLT E-proms.
 - (2) Investigate any potential violations of the provisions of this Compact, and applicable regulations, internal controls, policies and procedures.
 - (3) Investigate any cash variance greater than \$100, and report the findings to the Tribal Gaming Commission, which shall report such variances to the Oregon State Police.
 - (4) Investigate customer disputes related to gaming that involve

more than \$500 and that are not resolved by management of the Tribal Gaming Operation.

- (5) Report to the Tribal Gaming Commission, which shall report to the Oregon State Police, any criminal or regulatory issues that may affect the fairness, integrity, security and honesty of the Tribe's Class III gaming activities.
4. Investigations and Sanctions. The Tribal Gaming Commission shall investigate any reported violation of the Compact provisions and shall require the Gaming Facility to correct actual violations upon such terms and conditions as the Tribal Gaming Commission deems to be necessary. The Tribal Gaming Commission shall be empowered by Tribal ordinance to impose fines and other sanctions within the jurisdiction of the Tribe against a gaming employee, or any other person directly or indirectly involved in, or benefitting from, the Tribe's Class III gaming activities.
5. Reporting to State. The Tribal Gaming Commission shall forward copies of all completed investigation reports and final dispositions to the Oregon State Police on a continuing basis. If requested by the Tribal Gaming Commission, the Oregon State Police shall assist in any investigation initiated by the Tribal Gaming Commission, and provide other requested services to ensure proper compliance with the provisions of this Compact, Tribal ordinances and regulations or applicable laws of the State.

B. State Enforcement of Compact Provisions.

1. Monitoring. The Oregon State Police is authorized hereby to monitor the Tribe's Class III gaming activities to ensure that they are conducted in compliance with the provisions of this Compact. The Tribe and the State agree that the Oregon State Police must determine the manner in which it monitors the Tribe's Class III gaming activities independently of any influence or control by the Tribe. The Tribe may request removal of a State law enforcement officer or monitor on the basis of malfeasance, abuse of authority, or conduct disrespectful of Tribal institutions or culture. Effective performance of the officer's or monitor's duties shall not be a basis for disapproval. The Oregon State Police, and other State officers designated in writing as provided in Section 14 of this Compact, shall have free and unrestricted access to all areas of the Gaming Facility during normal operating hours without giving prior notice to the Tribal Gaming Operation. The Tribe agrees that the Oregon State Police monitoring function includes the activities identified in this Compact, any amendments hereto and any memoranda of understanding entered into pursuant to this Compact, and that the actual, reasonable and necessary cost of monitoring activities shall be assessed to the Tribe as provided in Section 10 of this Compact. In addition to the Oregon State Police's regular monitoring functions, the Tribe agrees that the Oregon State Police may conduct the following activities, the cost of which shall also be assessed to the Tribe as provided in Section 10 of this Compact:

- (a) An annual comprehensive Compact compliance review, which shall be planned and conducted jointly with the Tribal Gaming Commission, of the Tribe's Class III gaming activities to verify compliance with the requirements of this Compact and with the regulations and internal controls adopted by the Tribal Gaming Commission, including at a minimum, review in the following areas: administrative controls (gaming management internal controls), gaming operations controls, drop boxes, station inventories, surveillance department controls, cashier cage controls, count room controls (security and surveillance), accounting department controls (security), general controls (Compact regulatory requirements), blackjack controls, VLT controls, accounts payable, employee identification, gaming chip inventory for gaming floor and cage, physical examination of all class III gaming cards, chips, e-proms, paper stock, printers, keno balls, fill slips, video gaming devices, keno controls, off-track betting and security department controls;
 - (b) Periodic review of any part of the Tribe's Class III gaming activities in order to verify compliance with the requirements of this Compact and with the regulations, internal controls and minimum standards;
 - (c) Investigation of possible violations of this Compact or other gaming regulatory matters, whether discovered during the action, review, or inspection by the State during its monitoring activities, or otherwise;
 - (d) Investigation of possible criminal law violations that involve the conduct of gaming whether discovered during the action, review, or inspection by the State during its monitoring activities, or otherwise;
 - (e) Periodic review of any contracts between the Tribe and suppliers, vendors or contractors that provide non-gaming goods or services to the Gaming Facility. The Oregon State Police will report any concerns about a particular supplier, contractor or vendor to the Tribal Gaming Commission before taking any action.
2. The Tribe agrees that if any Class III gaming activities are conducted or intermingled in such a way that they are inseparable from Class II gaming activities, such as surveillance of both Class III and Class II gaming operations by a single surveillance department, the Oregon State Police shall have full access to both for purposes of carrying out the duties of the Oregon State Police with respect to Class III gaming under this Compact.
3. Access to Records.
- (a) The Tribe agrees that the Oregon State Police shall have the right to inspect and copy, during normal business hours, and upon reasonable notice, any and all Tribal records pertaining to the operation, management, or regulation of Class III Gaming by the Tribe, whether those records are prepared or maintained by the Tribe, the Tribal Gaming Commission or the Tribal Gaming Operation. Any records or copies removed from the premises shall be returned to the Tribe immediately after use.
 - (b) The State acknowledges that records created and maintained by the

Tribe, the Tribal Gaming Commission or the Tribal Gaming Operation belong to the Tribe.

- (c) The Tribe acknowledges that any records created or maintained by the State, including any records created or maintained in connection with the performance of the State's duties and functions under this Compact, belong to the State and are fully subject to the State Public Records Law, ORS 192.410 to 192.505. Any information concerning the Tribe's Class III gaming operation that is contained in state records may be subject to disclosure under ORS 192.410 to 192.505 unless the State would be permitted to withhold that information from disclosure under ORS 192.410 to 192.505. Examples of the kind of information that may be withheld from disclosure by the State under appropriate circumstances include:
 - (1) "Trade secrets" as defined in ORS 192.501(2).
 - (2) Investigatory information compiled for criminal law purposes as described in ORS 192.501(3).
 - (3) Information submitted in confidence, as provided in ORS 192.502(3).
 - (4) Any information the disclosure of which is specifically prohibited by state or federal law.
- (d) Applications submitted to and retained by the Oregon State Police for Class III gaming licenses are State records and may be subject to disclosure under ORS 192.410 to 192.505 unless the State would be permitted to withhold that information from disclosure under ORS 192.410 to 192.505.
- (e) Information about the Tribe's Class III gaming activities, whether obtained from the Tribe or from any other source, that is included in a document prepared, owned, used or retained by the State in connection with its duties and functions under this Compact may be subject to disclosure under ORS 192.410 to 192.505 unless the State would be permitted to withhold that information from disclosure under ORS 192.410 to 192.505.
- (f) The Tribe has agreed to allow the Oregon State Police access to sensitive financial, security and surveillance information that the Tribe considers confidential. The State acknowledges that the Tribe has voluntarily given the State access to this information and that the Tribe would not otherwise be required by law to do so. The State acknowledges that this information should reasonably be considered confidential. To the extent such information is included in any State records that are subject to disclosure, the State hereby obliges itself not to disclose this information when the public interest, including the public interest in maintaining the honesty, integrity, fairness and security of the Tribe's Class III gaming activities, would suffer by such disclosure.
- (g) The State agrees to notify the Tribe promptly of any request for disclosure of documents containing information about the Tribe's Class III gaming activities. If the State decides to release any

documents that contain information about the Tribe's Class III gaming activities, the State will notify the Tribe at least five (5) working days before any disclosure is made.

- (h) The parties agree that any dispute as to the disclosure of documents under the Public Records Law or under this subsection shall first be brought in state court.
 - (i) Nothing in this subsection precludes the State or the Tribe from disclosing information pursuant to state, tribal or federal rules of civil procedure or evidence in connection with litigation, a prosecution or a criminal investigation.
4. Investigation Reports. After completion of any inspection or investigation report, the Oregon State Police shall provide a copy of the report to the Tribal Gaming Commission.

**SECTION 10. TRIBAL PAYMENT OF COSTS FOR OVERSIGHT;
CONTRIBUTION FOR PUBLIC BENEFIT.**

A. Assessment for State Regulatory and Law Enforcement Costs

1. The maximum number of direct service hours that will be necessary for the Oregon State Police to perform its routine monitoring duties and functions under this Compact (including the annual comprehensive compact compliance review) based on the maximum number of gaming devices allowed under this Compact, is 3028 hours per fiscal year. The maximum number of direct service hours for routine monitoring shall be adjusted for new games as provided in Exhibit II to this Compact.
2. On July 1 of each year, the Tribe shall prepay an assessment to compensate the Oregon State Police for the costs of regulatory and law enforcement activities to be performed by the Oregon State Police under this Compact for the ensuing fiscal year. The Tribe may elect to pay the annual assessment in quarterly installments, on July 1, September 1, January 1 and April 1 of each fiscal year.
3. The Tribe's annual assessment shall be calculated by multiplying the Oregon State Police legislatively approved budget for the fiscal year times the ratio that the number of direct service hours of monitoring activity calculated as provided in Exhibit II to this Compact based on the actual number of gaming devices on the gaming floor at the beginning of the fiscal year bears to the total number of direct service hours of monitoring activity calculated for all tribes that are operating gaming facilities in this State based on the actual number of gaming devices on the gaming floors for all tribes that are operating gaming facilities in this State at the beginning of the fiscal year. Costs included in the legislatively approved budget are salaries, benefits, services and supplies, capital outlay, administrative supervision and support, vehicle and equipment lease or rental expenses, training costs, legal services charges, bookkeeping expenses, and all other expenses of the Oregon State Police Tribal Gaming Section.
4. If the Tribe elects to pay the annual assessment in quarterly installments,

the Tribe shall be credited, for the second, third and fourth installment payments during the fiscal year, for its proportionate share of any fees paid to the Oregon State Police for vendor or employee licensing investigations during the preceding calendar quarter. The amount of any quarterly installment due may be recalculated by the Oregon State Police if there is a change of more than twenty-five percent of the number of gaming devices on the gaming floor of any Tribe during the fiscal year.

5. During the fiscal year, the Oregon State Police shall account for all activities performed pursuant to this Compact on an hourly basis. For purposes of this accounting, the Oregon State Police shall calculate an hourly rate that is sufficient to allow the State to recover the total amount of the legislatively approved budget for tribal gaming regulation from all tribes that are operating gaming facilities in the state.

The cost of all employee background investigations, all criminal and regulatory investigations, and any consulting or gaming related services requested by the Tribe that are not required by this Compact or by a memorandum of understanding under this Compact and all recoverable expenses shall be charged against the Tribe's prepaid assessment amount, quarterly during the fiscal year. All recoverable expenses charged to the Tribe shall be properly accounted for and documentation of these expenses shall be made available to the Tribe upon request.

6. At the end of each fiscal year, the Oregon State Police shall determine the amount of the legislatively approved budget for the fiscal year that has not been charged under paragraph 4 of this subsection. The remainder of the legislatively approved budget for the fiscal year shall constitute the total assessment against all tribes that operated gaming facilities in this State during the year for routine monitoring (including comprehensive compact compliance reviews). The total assessment for routine monitoring shall then be divided among the tribes based on the actual number of hours of monitoring activity performed with respect to each of them. The final charge to the Tribe under this paragraph for the fiscal year shall be the cost of routine monitoring activities and all comprehensive compact compliance reviews. If the Tribe's prepaid assessments exceed the sum of the charges to the Tribe under paragraph 5 of this subsection and this paragraph, credit shall be given against the Tribe's assessment for the next fiscal year. If the Tribe's prepaid assessments are less than the sum of the charges to the Tribe under paragraph 5 of this subsection and this paragraph, the Tribe shall pay the difference.

7. As used in this subsection:

- a. "Investigation" means any activity performed by Oregon State Police because of the occurrence of a specific incident or event, and includes activity performed to determine whether there has been a violation of gaming related criminal law or any gaming regulation.
- b. "Monitoring" means any activity performed during routine review of Tribal gaming operations pursuant to this Compact, but does not include investigations.
- c. "Direct Service Hours" means the actual time spent by Oregon State Police personnel in performing employee background checks, performing background checks on Class III Gaming Contractors

(unless paid by the Class III Gaming Contractor), performing Compact monitoring functions (including the annual comprehensive compact compliance review), conducting an investigation, and traveling to and from the Gaming Facility or the site of a Class III Gaming Contractor background investigation, for the Tribe.

- d. "Recoverable Expenses" means charges paid by the Oregon State Police for processing fingerprint cards, for processing credit history checks, and actual per diem expenses (transportation, lodging, food) and other actual expenses incurred by Oregon State Police personnel in connection with performance of their duties under this Compact.
 - e. "Fiscal Year" means the State's fiscal year which begins July 1 and ends June 30.
8. If the Tribe disputes the amount of the assessments under this subsection, such dispute shall be resolved pursuant to Section 16 of this Compact.

B. Creation and Maintenance of Community Benefit Fund.

1. Establishment of Fund. The Tribe agrees to establish a Fund within 90 (ninety) days after execution and final federal approval of this Compact. Beginning in the first calendar quarter after the Tribe implements any of the new games described in subsection 4.B. of this Compact, the Tribe will contribute to the Fund, from the proceeds of the Gaming Facility, an amount calculated as provided in paragraph 4 below. The Tribe, in its discretion, may choose to make its contributions quarterly or annually. The Tribe shall name the Fund.

2. Fund Administration.

a. The assets of the Fund shall be expended for the benefit of the public within Douglas, Jackson, Klamath, Coos, Josephine, Lane and Deschutes counties. Grants from the Fund may be made to charitable organizations in the above counties, to the Tribe, or to local government bodies within the county within whose boundaries the Cow Creek Reservation is located (Douglas) for any of the following purposes: education, health, public safety, gambling addiction prevention, education and treatment, the arts, the environment, cultural activities, historic preservation and such other charitable purposes as may be provided in the by-laws of the Fund.

b. The Fund will be administered by a board of eight trustees. Each trustee shall have an equal vote on actions of the board.

c. The trustees of the Fund shall establish by-laws governing the conduct and discharge of their responsibilities not inconsistent with the terms of this subsection.

d. The Tribe shall submit proposals for grants from the Fund to the trustees, who shall make the final determination of the proposals to be funded in accordance with the by-laws. Grants shall be made on the basis of merit. The trustees may reserve a portion of the Fund in a single year to fund a multi-year grant or grants.

3. Qualifications, Term and Selection of Trustees.

a. The membership of the board of trustees shall be:

(1) Three members of the Tribal Board of Directors of the Cow Creek Band of Umpqua Tribe of Indians, appointed by the Tribe;

(2) One representative of the Seven Feathers Gaming Corporation (or its successor), appointed by the Tribe;

(3) Three trustees appointed by the Tribe from a list of candidates nominated by the Tribal Board of Directors in consultation with the Governor of the State;

(4) One member of the public at large, appointed by the Governor of the State.

b. Except for the trustees who are members of the Tribal Board of

Directors, each trustee must reside in Douglas County.

- c. Except for the initial board, trustees shall serve two-year terms and may be removed before the end of their terms only for cause by the appointing authority. The initial board shall serve as follows: The three members of the Tribal Board of Directors and the representative of Seven Feathers Gaming Corporation shall serve for two years; the remaining members of the initial board shall serve for one year. Trustees may be reappointed. Vacancies on the board of trustees shall be filled within thirty days by the appropriate appointing authority. Any trustee whose term has expired shall continue to serve until a successor has been appointed.
4. Calculation of Fund Contribution. The Tribe's annual contribution to the Fund shall be based upon the Gaming Facility's net income from Class III Gaming as shown in the audited financial statement of the Gaming Facility for the fiscal year ending before the contribution is made. The contribution shall be calculated as follows:
 - a. Deduct from the Gaming Facility's net income from Class III Gaming before tribal taxes, and excluding any payment for Oregon State Police assessments, for the prior calendar year, the amount paid by the Tribe for Oregon State Police Part A assessments for the State's fiscal year ending the preceding June 30.
 - b. Multiply the result in subparagraph a. of this paragraph by 6 per cent. The product shall be the Tribe's base community benefit contribution.
 - c. Deduct from the base community benefit contribution the amount paid by the Tribe for Oregon State Police Part B assessments for the State's fiscal year ending the preceding June 30. An amount equal to the difference is the amount of the annual contribution to the Fund.
5. For purposes of this subsection:
 - a. Oregon State Police assessment Part A includes the cost of all employee background investigations, all criminal and regulatory investigations, and any consulting or gaming related services requested by the Tribe that are not required by this Compact or by a memorandum of understanding under this Compact.
 - b. Oregon State Police assessment Part B includes the cost of routine monitoring activities and all comprehensive compact compliance reviews.
6. For purposes of determining the Gaming Facility's net income from Class III Gaming, the Tribal Gaming Operation shall obtain an unqualified audit opinion that the financial statement fairly reflects the Gaming Facility's financial position from an independent public accounting firm mutually acceptable to the State and the Tribe and engaged by the Tribe for the purpose. The determination of the net income of the Gaming Facility is subject to review by the State at its own expense. For purposes of this paragraph 10.B.6., the State may act through the Oregon State Police or

through an official designated as provided in Section 14 of this Compact.

7. Termination or Modification of Fund Contributions. The Tribe's contributions to the community benefit fund established as described in subsection B of this section may be discontinued if the Oregon Constitution is amended to remove the prohibition of casinos in the State. The Tribe and the State agree that if the Tribe is prohibited for any reason from offering blackjack or any of the Class III games listed in paragraphs 1 or 2 of subsection B of section 7 of this Compact, the parties shall enter into negotiations to establish how the community benefit fund contribution provided for in this subsection shall be adjusted to reflect the impact of the discontinuation of those games on the net income of the Gaming Facility.

SECTION 11. APPLICATION OF STATE REGULATORY STANDARDS.

A. Health, Safety and Environmental Standards.

1. The Tribe agrees to adopt and enforce ordinances and regulations governing health, safety and environmental standards applicable to the Gaming Facility that are at least as rigorous as comparable standards imposed by the laws and regulations of the State. The Tribe agrees to cooperate with any State agency generally responsible for enforcement of such health, safety and environmental standards outside Indian lands in order to assure compliance with such standards within the Gaming Facility. However, the Tribe shall have the exclusive regulatory jurisdiction over the enforcement of health, safety and environmental standards applicable to the Gaming Facility. The Tribe shall use its regulatory jurisdiction to assure that health, safety and environmental standards are met. Tribal ordinances and regulations governing water discharges from the Gaming Facility shall be at least as rigorous as standards generally imposed by the laws and regulations of the State relating to public facilities; provided, however, that to the extent that federal water discharge standards specifically applicable to the Tribal lands would preempt such State standards, then such federal standards shall govern.
2. Upon request by the State, the Tribe agrees to provide evidence satisfactory to the State that any new construction, renovation or alteration of the Gaming Facility performed after the effective date of this Compact satisfies applicable Tribal health, safety and environmental standards. The Tribe may choose to demonstrate that it has satisfied this section by providing a certificate or other evidence of compliance from an appropriate federal, State, or local official responsible for enforcement of comparable standards.
3. As used in this subsection, "health, safety and environmental standards" include but are not limited to structural standards, fire and life safety standards, water quality and discharge standards, food handling standards, and any other standards that are generally applicable under state or federal law to a non-tribal facility that is open to the public for purposes of protecting the public within the facility. "Health, safety and environmental standards" does not include land use regulations or zoning laws.
4. If the State has a specific concern about the Tribe's regulation of health, safety or environmental standards at the Gaming Facility, the State may

notify the Tribe in the manner provided in paragraph 5 of this subsection, asking to meet and confer within a time that is reasonable under the circumstances and specified in the notice. The State and the Tribe agree to meet and confer about the concern within the time requested by the State. If, after the State and the Tribe have met and conferred, the State's concern has not been satisfactorily addressed, the State may designate an appropriate inspector, who is acceptable to the Tribe, to verify compliance with this subsection. An inspector so designated may conduct an inspection only pursuant to a written directive from the State. Any inspector designated by the State shall be professional, objective and competent for the purpose.

The Tribe may object to any particular inspector if that inspector has shown disrespect for tribal culture or institutions. The Tribe's acceptance of an inspector will not be unreasonably withheld. If the State asserts that the Tribe is in breach of this subsection, and that the breach creates an immediate and substantial threat to the health or safety of the patrons or employees of the Gaming Facility, the Tribe agrees to take such steps as are reasonable and necessary to protect the public or employees until the breach is remedied. Resolution of any dispute as to what steps are necessary shall be conducted in the same manner as and under the principles and procedures established for resolution of operating disputes in section 6 of this Compact.

5. Written notices, designations or directives given under this subsection 11.A. shall be directed to the Tribal Chairperson by the Governor or by a person designated as provided in Section 14 of this Compact.
 6. The State and the Tribe agree that each will share with the other all pertinent regulatory information, including inspection reports.
- B. Traffic standards. The Tribe shall provide access from its Gaming Facility onto the public road known as "Old Highway 99" that is adequate to meet standards of the Oregon Department of Transportation or shall enter into agreements with the Oregon Department of Transportation for the provision of such access by the State, including provisions for compensation by the Tribe for some portion of the costs incurred by the State in constructing such improvements to the public highway, including traffic control signals, as may be necessary.
- C. The Tribe shall report to the Oregon Department of Revenue gambling winnings paid to any person subject to Oregon Personal Income Tax on those winnings whenever the Tribe would be required to report those winnings to the Internal Revenue Service. The information shall be reported in a manner reasonably requested by the Oregon Department of Revenue. The Tribe agrees that the management of the Gaming Facility will withhold and remit personal income taxes from employee wages to the Oregon Department of Revenue in the manner prescribed by the Department of Revenue.
- D. If local government officials believe that an off-Indian land public safety problem has been created by the existence of the Gaming Facility, the Tribe, or its designated representative, shall meet with the mayor or county commission of the affected government to develop mutually agreeable measures to alleviate the problem. The burden shall be on the local government officials to demonstrate that the public safety problem is directly attributable to the existence of the Gaming Facility. If an off-Indian land public safety problem has in fact been created by the existence of the Gaming Facility, the Tribe shall undertake to perform any reasonable and mutually agreeable measures to alleviate the problem. If the Tribe

and local government officials are unable to agree on measures to alleviate the problem, the State may initiate the dispute resolution process established in Section 16 of this Compact.

SECTION 12. EFFECTIVE DATE; TERMINATION; AMENDMENTS.

- A. Effective Date. This Compact shall become effective upon execution by the State and by the Tribe and appropriate federal approval.
- B. Termination. This Compact shall remain in effect until such time as:
1. This Compact is terminated by written agreement of both parties;
 2. The State amends its Constitution or laws to criminally prohibit within the State conduct of all of the Class III gaming authorized by this Compact, whether for profit or not for profit;
 3. A court of competent authority makes a final determination that all of the Class III games authorized by this Compact are criminally prohibited under the law of the State, and the determination has become final and enforceable;
 4. The federal government amends or repeals IGRA so that a Compact is no longer required for the Tribe's exercise of Class III gaming; or
 5. Either party materially breaches this Compact; but only after the dispute resolution process set forth in Section 16 of this Compact has been exhausted, and the breach has continued for a period of 60 days after written notice following the conclusion of the dispute resolution process.
- C. Automatic Amendment.
1. If a type of Class III game authorized under Section 4 of this Compact is criminally prohibited by an amendment to State statute or Constitution, this Compact shall no longer authorize the Tribe to engage in that type of Class III game, and any provisions in this Compact authorizing such Class III game shall be void and of no effect as to that Class III game.
 2. If a court decides that a Class III game authorized under this Compact is criminally prohibited, this Compact shall no longer authorize the Tribe to engage in that type of Class III game, and any provisions in this Compact authorizing such Class III game shall be void and of no effect as to that Class III game.
 3. If a type of Class III game authorized is prohibited as provided in paragraphs 1 or 2 of this subsection, the Tribe shall be required to cease operating that Class III game only if and under the same circumstances and conditions as the State or any other affected person must cease operating the corresponding game.
- D. Amendments.
1. Except as provided in subsection 12.C. above, this Compact shall not be amended unless one of the following conditions occur:
 - a. The State becomes a party to another tribal-state Compact that

authorizes a tribe other than the Cow Creek Band of Umpqua Tribe of Indians to engage in any Class III gaming activity or scope of gaming activity not permitted under the terms of this Compact;

- b. One year elapses after the date this Compact is approved by the Secretary of the Interior;
 - c. The State amends State statute or Constitution to expand the type of Class III gaming permitted in the State for any purpose by any person, organization, or entity.
2. Paragraph 12.D.1.above does not authorize the Tribe to renegotiate the terms of this Compact applicable to forms of gaming authorized by Section 4 of this Compact, except to the extent that the State voluntarily consents to such renegotiation or as is otherwise provided for in this Compact.
 3. Pursuant to paragraph 12.D.1., the State or the Tribe may by appropriate and lawful means, request negotiations to amend, replace or repeal this Compact. In the event of a request for renegotiation or the negotiation of a new agreement, this Compact shall remain in effect until renegotiated or replaced, unless sooner terminated under subsection 12.B. Such request to renegotiate shall be in writing and shall be sent by certified mail to the Governor of the State or the Chair of the Tribe at the appropriate office identified at Section 14 below. If a request is made by the Tribe, it shall be treated as a request to negotiate pursuant to IGRA. All procedures and remedies available under IGRA shall thereafter apply with the exception that the 180-day period for negotiation set forth at 25 U.S.C. 2710(d) shall be 100 days.

SECTION 13. DISCLAIMERS AND WAIVERS.

- A. Gaming at Another Location or Facility. The Tribe hereby waives any right it may have under IGRA to negotiate a Compact for Class III gaming at any other location or facility, unless another Tribe that is operating a gaming facility in this State as of December 31, 1996, signs a Compact that authorizes that Tribe to operate more than one gaming facility simultaneously, or is otherwise authorized to operate more than one gaming facility simultaneously.
- B. Status of Class II Gaming. Nothing in this Compact shall be deemed to affect the operation by the Tribe of any Class II gaming as defined in IGRA or to confer upon the State any jurisdiction over such Class II gaming conducted by the Tribe.
- C. Prohibition on taxation by the State. Nothing in this Compact shall be deemed to authorize the State to impose any tax, fee, charge or assessment upon the Tribe or the Tribe's Class III gaming activities except for charges expressly authorized in accordance with this Compact.
- D. Preservation of Tribal Self-Government. Nothing in this Compact shall be deemed to authorize the State to regulate in any manner the government of the Tribe, including the Tribal Gaming Commission, or to interfere in any manner with the Tribe's selection of its governmental officers including members of the Tribal Gaming Commission. No licensing or registration requirement contemplated by this Compact shall be applicable to such officers with respect to their capacity as officers of the Tribe.
- E. This Compact is exclusively for the benefit of and governs only the respective

authorities of and the relations between the Tribe and the State. Nothing in this Compact shall be construed as creating or granting any rights to any third party, or as establishing any objection or defense for any third party to any charge, offense or prosecution.

- F. The Tribe and the State agree that any activities that must be performed under this Compact to prepare for implementation of any new games authorized under Section 4 may be undertaken before the Secretary of the Interior approves this Compact.

SECTION 14. NOTICES.

- A. All notices required or authorized to be served to the Oregon State Police shall be served by first class mail at the following address:

Captain
Oregon State Police
Gaming Enforcement Division
400 Public Service Building
Salem, OR 97310

- B. All other notices required or authorized to be served shall be served by first class mail at the following addresses:

Legal Counsel to the Governor
Office of the Governor
160 State Capitol
Salem, OR 97310

Tribal Chairperson
Cow Creek Tribe
2400 Stewart Parkway, Suite 300
Roseburg, OR 97470

- C. For the purposes of subsection 5.B., subsection 6.B., paragraph 9.B.1., paragraph 10.B.6., subsection 11.A., or subsection 16.A. of this Compact, in each instance in which the State may designate an official outside the Oregon State Police to take action under this Compact, the designation shall be made by the Governor in writing, or by a person who, in that instance, the Governor has named in writing to make the designation. Such designations shall name the official and the specific purpose for which the official is being designated, and shall be directed to the Tribal Chairperson.

SECTION 15. SEVERABILITY.

In the event that any section or provision of this Compact is held invalid, or its application to any particular activity is held invalid, it is the intent of the parties that the remaining sections of the Compact and the remaining applications of such section or provision shall continue in full force and effect.

SECTION 16. DISPUTE RESOLUTION.

- A. At the discretion of either party, in the event either party believes that the other party has failed to comply with any requirement of the Compact, that party may invoke the following dispute resolution procedure in order to foster cooperation and avoid the costs of litigation:

- 1. The party asserting noncompliance shall serve written notice on the other party in the manner provided in section 14. The notice shall identify the specific provision of the Compact alleged to have been violated and shall

specify the factual basis for the alleged noncompliance. Designated representatives of the State and the Tribe shall thereafter meet within thirty (30) days in an effort to resolve the dispute. The State's representative shall be designated as provided in section 14 of this Compact.

2. In the event the dispute is not resolved to the satisfaction of the parties within ninety (90) days after service of notice, either party may initiate an action against the other party in the United States District Court for the District of Oregon to interpret or enforce the provisions of this Compact. In the event that the Federal court declines jurisdiction, an action can be filed in a court of competent jurisdiction to interpret or enforce the provisions of this Compact.
- B. Nothing in subsection 16.A. shall be construed to waive, limit or restrict any remedy that is otherwise available to either party to enforce the provisions of this Compact, protect their rights and assets or limit or restrict the ability of the parties to pursue, by mutual agreement, alternative methods of dispute resolution.
 - C. With respect to gaming not authorized by this Compact, nothing in this Compact shall be construed to limit the authority of the State or the federal government to take immediate action to enforce and prosecute the gambling laws of the State and the United States pursuant to 18 USC §1166 (Section 23 of IGRA).

SECTION 17. INTEGRATION

This Compact is the complete and exclusive expression of the parties' intent with regard to the subject matter hereof.

EXECUTED as of the date and year above-written.

EXHIBIT II

OVERSIGHT/MONITORING HOURS

CALCULATION OF OVERSIGHT HOURS

The number of oversight/monitoring hours for purposes of Section 10 of this Compact shall be calculated based on the total number of video lottery terminals and table games authorized under the Compact according to the following formula:

VIDEO LOTTERY TERMINALS	MAXIMUMS
First 500 VLTs @ 10 hours/100 machines/mo	50 hours
Next 500 VLTs @ 5 hours/100 machines/mo	25 hours
Next 500 VLTs @ 2 hours/100 machines/mo	10 hours

CLASS III TABLE GAMES (baseline)*	
Up to 5 tables	50 hours/month
Next 25 tables @ 2 hours/table/month	50 hours
Next 30 tables @ 1 hour/table/month	30 hours

KENO - 8 hours per month

OTB - 8 hours per month

***NEW TABLE GAMES** - In addition to the table games baseline hours add the following for each different game

Craps	20 hours/mo/table
Roulette	20 hours/mo/table
Pai Gow Poker	10 hours/mo/table
Let-It-Ride	10 hours/mo/table
Mini-Baccarat	10 hours/mo/table
Big Wheel	5 hours/mo/wheel
Other Games	10 hours/mo/table

**AMENDED AND RESTATED
TRIBAL-STATE COMPACT FOR REGULATION
OF CLASS III GAMING BETWEEN THE CONFEDERATED TRIBES OF THE
GRAND RONDE COMMUNITY OF OREGON AND
THE STATE OF OREGON**

PREAMBLE.

This amended and restated Compact is made between the State of Oregon (hereinafter "State") and the Confederated Tribes of the Grand Ronde Community of Oregon (hereinafter the "Tribe") and pertains to Class III gaming conducted on lands that are held in trust for the Tribe as part of the Tribe's Reservation, restored to federal recognition pursuant to P.L. 98-165 and P.L. 100-425, and that are subject to the provisions of the Indian Gaming Regulatory Act of October 17, 1988 (Public Law 100-497), 25 U.S.C. 2701 et seq. ("IGRA"). The terms of this Compact are unique to this Tribe.

SECTION 1. TITLE.

THIS amended and restated Compact is entered into this ___ day of January, 1997, by and between The Confederated Tribes of the Grand Ronde Community of Oregon, a federally recognized Tribe of Indians, and the State of Oregon. Upon execution by the parties and approval by the Secretary of the Interior, this amended and restated Compact replaces the Compact entered into between the parties on August 21, 1993, and approved by the Secretary of the Interior on June 17, 1994.

SECTION 2. FINDINGS.

WHEREAS, the Tribe is a federally recognized Indian Tribe and is the beneficial owner of, and local government for, the trust lands of the Tribe located in the State of Oregon;

AND WHEREAS, the State and the Tribe are separate sovereigns and each respects the laws of the other sovereign;

AND WHEREAS, the public policy of the State is reflected in the Constitution, statutes and administrative rules of the State;

AND WHEREAS, the tribal public policy, as reflected in the Tribe's Constitution and ordinances adopted by the Tribe, is "to form a better tribal organization, secure the rights and powers inherent in our sovereign status and guaranteed to us by federal law, preserve our culture and tribal identity, promote the social and economic welfare of our people, protect and develop our common resources, maintain peace and order, and safeguard individual rights";

AND WHEREAS, the United States Congress has enacted IGRA which declares federal policy and provides a statutory basis for operation of gaming by the Tribe as a means of promoting tribal economic development, self-sufficiency, and strong tribal government;

AND WHEREAS, the Tribe exercises authority over Tribal trust land that was restored to the Tribe pursuant to Public Law 98-165 and P.L. 100-425;

AND WHEREAS, the Secretary of the Interior has determined that the gaming location is on land described in 25 USC §2719(b)(1)(B)(iii);

AND WHEREAS, IGRA is intended to provide a statutory basis for regulation of gaming by the Tribe adequate to shield it from organized crime and other corrupting influences, to ensure that the Tribe is the primary beneficiary of the gaming revenues, and to ensure that gaming is conducted fairly and honestly by both the operators and players;

AND WHEREAS, the continued growth and success of tribal gaming depends upon public confidence and trust that the tribal gaming operation is honest, fair and secure, and is free from criminal and corruptive influences;

AND WHEREAS, public confidence and trust can be maintained only if there is strict compliance with laws and regulations related to licensed gaming establishments, by all persons involved in the gaming operation;

AND WHEREAS, the relationship between the State and the Tribe rests on mutual trust and the recognition that each has a primary duty to protect the gaming public through separate, appropriate responsibilities during the life of current and future Compacts;

AND WHEREAS, the Tribe and the State agree that state regulation of Indian gaming in the State of Oregon will be funded by the Indian gaming industry;

AND WHEREAS, Congress has declared that it is a principal goal of federal Indian policy to promote tribal economic development, tribal self-sufficiency and strong tribal government;

AND WHEREAS, IGRA provides for a system of joint regulation by Indian Tribes and the Federal government (to the exclusion of the State) of Class I and II gaming on Tribal lands as defined in IGRA;

AND WHEREAS, IGRA establishes a system of agreements between Indian Tribes and States for the regulation of Class III gaming as defined in that Act;

AND WHEREAS, IGRA provides that Class III gaming activities are lawful on Tribal lands only if such activities are (1) located in a state that permits such gaming for any purpose by any person, organization or entity, (2) authorized by tribal ordinance, and (3) conducted in accordance with a Tribal-State Compact;

AND WHEREAS, the Congressional intent in passing IGRA was to reaffirm a long and well-established principle of federal Indian law as expressed in the United States Constitution, reflected in federal statutes and articulated in decisions of the United States Supreme Court that

unless authorized by an act of Congress, the jurisdiction of State governments does not extend to Tribal lands;

AND WHEREAS, IGRA does not extend State jurisdiction or the application of State laws for any purpose other than jurisdiction and application of State laws to gaming conducted on Tribal land as set forth in this Compact;

AND WHEREAS, Congress recognized a role for State public policy and State law in the regulation of Class III Gaming;

AND WHEREAS, nothing in the Tribal-State Compact shall be construed to extend to any other activities or as an abrogation of other reserved rights of the Tribe or of the Tribe's sovereignty;

AND WHEREAS, IGRA is intended to expressly preempt the field in the governance of gaming activities on Tribal lands;

AND WHEREAS, the State recognizes the Tribe's continuing cooperation with the State in assuring the honesty, integrity and security of the gaming operation and the Tribe's commitment to a close working relationship with the Oregon State Police;

AND WHEREAS, the Tribe is authorized to act through Resolutions adopted by its Tribal Council;

AND WHEREAS, the State of Oregon is authorized to act through the Governor of the State;

NOW THEREFORE, in consideration of the mutual undertakings and agreements herein set forth, the Tribe and the State enter into the following Compact:

SECTION 3. DEFINITIONS.

As used in this Compact, and in its Appendix and Exhibit:

- A. "Background investigation" means a security and financial history check of an applicant for a Tribal gaming license, whether the applicant is a prospective employee, consultant, contractor or vendor.
- B. "Certification" means the inspection process used by the State and the Tribe to approve gaming equipment for use in the Gaming Facility.
- C. "Class III Gaming Contract" means a contract that involves Major, Minor, or Sensitive Procurements.

- D. "Class III Gaming Contractor" is any individual, business or other entity that applies for or is a party to a Class III Gaming Contract.
- E. "Controlling interest" means fifteen percent (15%) of the equity ownership of a company.
- F. "Counter Game" means keno, race and sports book and off-race course mutuel wagering.
- G. "Gaming Facility" means the building and grounds located on the Tribe's Reservation at Grand Ronde, Oregon, known as the "Spirit Mountain Casino" at the location specifically described in Exhibit I to the Compact, and any property that is used by the Tribe in connection with Class III gaming, including any property used to store gaming equipment.
- H. "Key Employee" means any officer or any person who can affect the course of business, make decisions, or is in a sensitive position in an organization or corporation that is an applicant for a Tribal gaming license.
- I. "High Security Employee" means any natural person who participates in the operation or management of the Class III Tribal Gaming Operation, whether employed by the Tribe or by a person or entity providing on-site or off-site gaming operation or management services to the Tribe, including but not limited to: gaming operations administrators, managers and assistant managers, gaming facility surveillance or security personnel, dealers, croupiers, shift supervisors, cage personnel (including cashiers and cashier supervisors), drop and count personnel, gaming management consultants, video lottery terminal technicians, junket representatives; and any other person whose employment duties require or authorize access to areas of the Gaming Facility related to Class III gaming and which are not otherwise open to the public.
- J. "Low Security Employee" means any employee of the Tribal Gaming Operation whose duties require the employee's presence in any area of the Gaming Facility where Class III gaming activities take place, but who is not a High Security Employee and who is not involved in the operation of Class III gaming.
- K. "Major Procurement" means any procurement action or contract for goods, services or products used in the operation of Class III games, including but not limited to:
1. The printing of tickets used in any Class III gaming;
 2. Any goods or services involving the receiving or recording of number selections in any Class III gaming;
 3. Any goods, services, or products involving the determination of winners in any Class III gaming;
 4. Video devices or other equipment used in Class III games; or

5. A contract or license to use a patented game or game product.
- L. "Minor Procurement" means any procurement action or contract related to Class III gaming that is neither a Major Procurement nor a Sensitive Procurement. A typical example of this class of procurement is a contract to change the external appearance of a video terminal.
- M. "Owner" means any person or entity that owns 5% or more of the equity ownership of a company.
- N. "Primary Management Official" means any person who:
1. Has administrative or high-level management responsibility for part or all of the Class III gaming operation, whether as an employee or under a management contract;
 2. Has authority --
 - a. to hire and fire supervisory employees; or
 - b. to set or otherwise establish working policy for the gaming operations; or
 3. Is the chief financial officer or other person who has financial management responsibility for Class III gaming operations.
- O. "Sensitive Procurement" means any procurement action or contract for goods or services, other than a "Major Procurement," that may either directly or indirectly affect the integrity, security, honesty, and fairness of the operation and administration of Class III gaming such as acquisition of security systems required to protect the security and integrity of the Class III gaming, design of surveillance plans, gaming consulting services, or financing for construction or operation of a Gaming Facility.
- P. "Table game" means any Class III game allowed under this Compact except video lottery games, keno, off-race course mutuel wagering, and race and sports book.
- Q. "Video lottery terminal" or "terminal" means an electrical or electronic device, component, or terminal that displays a ticket through the use of a video display screen, and that is available for consumer play upon payment of any consideration, with winners determined by the application of the element of chance and the amount won determined by the possible prizes displayed on the device.

SECTION 4. AUTHORIZED CLASS III GAMING.

- A. This Compact shall be the only Compact between the Tribe and State and any and all Class III gaming conducted in the Gaming Facility shall be pursuant to this Compact. To

the extent that elements of this Compact need to be altered to incorporate changes to the agreements between the parties the parties shall provide such changes in accordance with Subsection 12.D. of this Compact.

B. Authorized games.

1. Subject to, and in compliance with the provisions of this Compact, the Tribe may engage in the following Class III games: Video lottery games of chance, keno, off-race course mutuel wagering, blackjack, craps, roulette, pai-gow poker, Caribbean stud poker, let-it-ride, and big 6 wheel. The Tribe may offer race and sports bookmaking except that no wagers may be accepted by telephone and no wagers may be accepted or paid on:
 - a. Any amateur sports event in Oregon;
 - b. Any event held outside Oregon, if any participant in the event represents a public or private institution located in Oregon;
 - c. Any event, regardless of where it is held, involving a professional sports team whose home field, court or base is in Oregon.
 - d. Any event other than a racing or athletic sports event.
2. Subject to, and in compliance with, the provisions of this Compact, the Tribe may engage in any other Class III game that has been approved by the Nevada Gaming Commission. Operation of any game under this paragraph must be pursuant to rules, procedures and internal controls for the new game at least as stringent as the Tribal/State Minimum Internal Control Standards set forth in the Appendix to this Compact.
3. Before the Tribe offers a new game under this subsection 4.B., the Tribe and the State must agree that the Tribe has adopted appropriate internal controls, surveillance plans, game rules and procedures, as provided in subsection E of this section, and that the Tribal Gaming Commission and the State are fully prepared to regulate and monitor the new game.
4. This section shall be construed consistent with federal classification of gaming activities. Notwithstanding any provision of this Compact, any gaming activity classified by federal regulation as Class II activity shall not be subject to the provisions of the Compact. However, the Tribe agrees that if any Class II gaming activities are conducted or intermingled in such a way that they are inseparable from Class III gaming activities, such as surveillance, those activities shall be considered as Class III for purposes of the regulatory authority of the State under this Compact.

C. Gaming Location. The Gaming Facility authorized by this Compact shall be located on the Tribe's trust land at Grand Ronde, Oregon. The site of the Gaming Facility is specifically described in Exhibit I to this Compact. Gaming authorized under this Compact shall be conducted only in the Gaming Facility.

D. Number of video lottery terminals. The number of Class III video lottery games of chance authorized by this Compact shall not exceed 1,200. Subject to other terms of this agreement, the Tribe may determine in its discretion the location and spacing of video lottery terminals within the Gaming Facility.

E. Addition of Authorized Games at Gaming Facility.

1. At least 60 days before any new game otherwise authorized under this Compact is conducted at the Gaming Facility the Tribal Gaming Commission shall:
 - a. Ensure that the Gaming Facility develops rules and procedures for a system of internal controls for the new game that meets the minimum standards established in the Appendix to this Compact.
 - b. Require that the Gaming Facility provide appropriate training for all dealers, supervisors, surveillance personnel and any other employees involved in the conduct or regulation of the new game and for the Tribal Gaming Inspector, such that those employees have the knowledge and skills required under typical industry standards for the job function that employee performs, including but not limited to player money management and betting, card counting and detection of cheating methods.
 - c. Ensure that the Gaming Facility establishes a security and surveillance plan for the new game that meets the minimum standards established in the Appendix hereto.
 - d. Adopt rules of operation for the game that meet the minimum standards established in the Appendix hereto, including rules of play and standards for equipment.
 - e. Notify the Oregon State Police that the Tribe proposes to offer the new game to the public, and provide to the Oregon State Police for review all of the internal controls, regulations, plans, procedures and rules required under this paragraph 1 of this subsection.
 - f. Negotiate with the Oregon State Police the amount of any additional direct service hours needed for the State to monitor the new game.
2. The Tribe agrees to introduce new games authorized under this section according to the following schedule:

- a. Within the sixty day period after the Secretary of the Interior approves this amended and restated Compact the Tribe may offer three of the games authorized under paragraph 1 of subsection B of this section;
 - b. Within the ninety day period after the sixty-day period specified in subparagraph a of this paragraph, the remaining games authorized under paragraph 1 of subsection B of this section;
 - c. After the period of time specified in subparagraphs a and b of this paragraph, for any game authorized by paragraph 2 of subsection B of this section, one new game within a single calendar quarter.
3. The Tribe shall establish wager limits for all games. The maximum wager for any table game or counter game, except for race and sports book, shall be \$500. The maximum wagers for race and sports book shall be \$5,500 for a straight bet and \$500 for a parlay bet. Whenever a new table or counter game, other than race and sports book, is introduced, the Tribe shall establish an initial wager limit of \$100 per hand, play or bet. After a period of six months of operation of the new table game in full compliance with the requirements of this Compact, the Tribe may request that a maximum wager of \$500 be authorized. The State may refuse to agree to an increase in the maximum wager limit if there have been any significant problems with the conduct of the new game due to noncompliance with the internal controls, the rules of operation of the game or with the terms of this subsection.
 4. The Tribe may operate a maximum of sixty tables of table games at the Gaming Facility.
 5. The Tribe agrees to cooperate with State law enforcement on the investigation and prosecution of any gambling crime committed at the gaming facility. The Tribe and the State agree to cooperate in establishing a state-wide system to identify and monitor persons excluded from the gaming facility or from any other tribal gaming facility in this State.

SECTION 5. JURISDICTION.

A. In General.

1. The State shall have criminal jurisdiction over offenses committed by or against Indians and non-Indians within the gaming facility and on Tribe trust land; the criminal laws of the State shall have the same force and effect at on Tribal Lands as they have on non-Tribal lands within the State.
2. If the Tribe authorizes the Tribal Court to hear criminal cases arising on the Tribal Lands, the Tribe and the State shall have concurrent criminal jurisdiction over

offenses committed by Indians within the Gaming Facility and on the Tribal Lands. Once a tribal police force is in operation on the Tribal lands, the enforcement of criminal laws at the Gaming Facility shall be established pursuant to and by a Memorandum of Understanding to be executed by the Tribe and the Oregon State Police.

3. The Tribe and the State agree that local law enforcement officials will provide the first response for criminal or public safety issues that are not related to the operation of gaming or that occur other than in the course of the play of games. The Oregon State Police shall have exclusive authority to investigate crimes under state laws that are related to the operation of gaming or that occur in the course of play of games.
 4. If the Tribe establishes a law enforcement agency that is responsible to investigate criminal law violations on tribal lands, the Tribe agrees that the State shall continue to have the authority to investigate possible violations of this Compact or other gaming regulatory matters. The Tribe and the State further agree that their respective law enforcement agencies will cooperate in any investigation that involves or potentially involves both criminal and regulatory violations.
- B. Except as provided in a Memorandum of Understanding executed in accordance with the foregoing paragraph 5.A.2., law enforcement officers of the State of Oregon, or officers designated by the State, shall have free access to anywhere within the Gaming Facility and on Tribal trust land for the purpose of maintaining public order and public safety, conducting investigations related to possible criminal activity and enforcing applicable laws of the State. The Tribe, or individuals acting on its behalf, shall provide State law enforcement officers or officers designated by the State access to locked and secure areas of the Gaming Facility in accordance with the regulations for the operation and management of the gaming operation.
- C. The State may station one or more officers at the Gaming Facility by mutual agreement with the Tribe.
- D. Nothing in this agreement shall be construed to affect the civil or criminal jurisdiction of the State under Public Law 83-280. The Tribe and the State agree that the criminal laws of the State of Oregon that proscribe gambling activities shall apply to any person who engages in the proscribed activities if those activities are not conducted under the authority of the Tribe as provided in this Compact and under the Indian Gaming Regulatory Act.

SECTION 6. PRINCIPLES GOVERNING GAMING OPERATIONS DECISIONS

- A. The Tribe and the State agree that maintaining the honesty, integrity, fairness and security of the Tribe's gaming operation is essential both to the success of the enterprise, and to satisfy the interests of the State and of the Tribe. The Tribe and the State agree

that both of them have the responsibility to protect the citizens of this State who patronize the Tribe's gaming facility from any breach of security of the gaming operation. Accordingly, all decisions by the Tribe, the Tribal Gaming Commission and the management of the gaming operation, concerning regulation and operation of the Gaming Facility, including those decisions expressly placed within the Tribe's discretion under the terms of this Compact, shall be consistent with each of the following principles:

1. Any and all decisions concerning regulation and operation of the Tribal gaming enterprise, whether made by the Tribe, the Tribal Gaming Commission or the management of the gaming operation, shall reflect the particularly sensitive nature of a gaming operation.
2. In order to maintain the honesty, integrity, fairness and security of the Tribe's gaming operation, the Tribe, the Tribal Gaming Commission and the management of the gaming operation shall work diligently and take all reasonably necessary affirmative steps to prevent cheating and theft, and to protect the gaming operations from the influence or control by any form of criminal activity or organization.
3. The honesty, integrity, fairness and security of the Tribe's gaming operation shall be of paramount consideration in awarding contracts, licensing and hiring employees, and in making other business decisions concerning the operation of the gaming enterprise. The Tribe, the Tribal Gaming Commission and the management of the gaming operation shall make no decisions that compromise the honesty, integrity, fairness or security of the gaming operation.
4. Regulation and operation of the Tribe's gaming activities shall be, at a minimum, consistent with generally accepted industry standards and practices, in order to maintain the honesty, integrity, fairness and security of the Tribe's gaming operation.

B. Procedure for Resolving Disputes Concerning Operational Decisions.

1. If the State, in good faith, believes that any decision by the Tribe relating to the employment or licensing of any employee, awarding of any contract or operation of the gaming enterprise is inconsistent with the principles set forth in subsection A of this section, or any other requirement of this section, the State may give written notice to the Tribe. The written notice shall describe the factual basis for the State's concern.
2. The parties shall meet and confer within 15 days after the Tribe receive the notice.
3.
 - a. If the State's concern is not resolved informally, either party may initiate non-binding arbitration within 45 days after the service of the written notice.
 - b. An arbitrator shall be selected in the following manner:

- (1) The parties shall obtain a list of qualified arbitrators from U.S. Arbitration and Mediation of Oregon, or any other arbitration panel agreed to by the parties.
 - (2) Each party, in turn, shall strike one name from the list, until one name remains. The parties shall draw lots to determine which party makes the first strike.
- c. Upon agreement by both parties, the arbitration proceeding shall be binding.
- d. The parties shall divide the cost of the arbitration proceeding equally between them.
4. Upon conclusion of the arbitration proceeding, if the parties have not elected to be bound by that result, either party may initiate an action in the United States District Court for the District of Oregon as provided in section 16 of this Compact.
5. Expedited Procedure.
 - a. If the State, in good faith, believes that there is an immediate threat to the honesty, integrity, fairness and security of the Tribal gaming operations, and believes that substantial harm will result during the time that would pass if the procedure established in paragraphs 1 to 3 of this subsection is followed, the State may give written notice to the Tribal Gaming Commission. The written notice shall describe the factual basis for the State's concern. The written notice shall describe the specific action the State believes is necessary to prevent substantial harm from occurring. The Tribe agrees that the Tribal Gaming Commission shall act according to the State's recommendation, unless the commission determines that acting according to the State's recommendation would adversely affect the honesty, integrity, fairness and security of the Tribal gaming operation. Nothing in this subparagraph shall preclude the Tribe from invoking the dispute resolution procedures provided in this Compact after the commission implements the State's recommendation.
 - b. The parties shall confer within five (5) days after the Tribe receives the notice.
 - c. If the State's concern is not resolved informally within ten days after the Tribe receives the notice, the state may initiate an action in the United States District Court for the District of Oregon as provided in section 16 of this Compact.
 - d. An immediate threat to the honesty, integrity, fairness and security of the Tribal gaming operations includes but is not limited to the following examples:

- (1) A criminal indictment is filed against any contractor, or owner or key employee of a contractor, or against any key employee of the Tribal gaming operation;
- (2) A criminal organization or members of a criminal organization have obtained an ownership interest in a contractor, or a member of a criminal organization has become a key employee of a contractor;
- (3) A malfunction of gaming equipment hardware or software causes patrons of the Gaming Facility to lose money, and that loss is directly related to the equipment malfunction;
- (4) The security of gaming equipment has been impaired by loss, theft, or tampering;
- (5) The physical safety or security of patrons is seriously at risk;
- (6) A continuing pattern of failure by the Tribe, the Tribal Gaming Commission or management of the gaming operation to enforce compliance with the provisions of this Compact, or the regulations and internal controls governing the gaming operation.

C. The provisions of this section, shall provide the exclusive method for resolving disputes as to the Tribe's decisions concerning hiring or contracting under section 7 of this Compact, or concerning operation of the Gaming Facility.

SECTION 7. LICENSING AND CONTRACTING.

A. Licensing of Gaming Employees.

1. All Primary Management Officials, High Security Employees and Low Security Employees employed in the Gaming Facility shall be licensed by the Tribe in accordance with the provisions of this Compact.
2. All prospective employees -- whether High Security Employees, Low Security Employees or Primary Management Officials -- shall provide to the Tribe and the State any required application fees and the following information, on forms provided by or approved by the State:
 - a. Full name, including any aliases by which the applicant has been known;
 - b. Social security number;
 - c. Date and place of birth;

- d. Residential addresses for the past five years;
 - e. Employment history for the past five years;
 - f. Driver's license number;
 - g. All licenses issued and disciplinary actions taken by any State agency or Tribal gaming agency;
 - h. All criminal proceedings, except for minor traffic offenses, to which the applicant has been a party;
 - i. A current photograph.
3. In addition to the requirements of paragraph 7.A.2. above, prospective High Security Employees and Primary Management Officials shall provide two sets of fingerprints.
4. a. The Tribe shall forward the applicant information for each prospective High Security Employee and Primary Management Official to the State. The Oregon State Police shall conduct a background investigation and provide a written report to the Tribal Gaming Commission within a reasonable period of time, but in no event shall such background checks exceed thirty (30) days without notice to and consent of the Tribe.
- b. The Tribe may request the State to perform a background investigation on any prospective Low Security Employee. Upon such request, the Oregon State Police shall conduct a background check as provided in subparagraph a of this paragraph.
5. a. Except as provided in paragraph 6 of this subsection, the Tribe shall deny a gaming license to any High Security Employee or Primary Management Official who:
- (1) Has, within the ten-year period preceding the date of application for a license, committed a felony other than a traffic offense, whether or not conviction of such a felony has been expunged, under the law of any federal, state or tribal jurisdiction, or is the subject of a civil judgment under the law of any federal, state or tribal jurisdiction that is based on facts that constitute the elements of a felony other than a traffic offense, in that jurisdiction.
 - (2) Has committed a crime involving unlawful gambling under the law of any federal, state or tribal jurisdiction, whether or not conviction of such a crime has been expunged, or is the subject of a civil judgment under the law of any federal, state or tribal jurisdiction that is based on facts that constitute the elements of a crime involving unlawful gambling in that jurisdiction.

- (3) Has associated in a direct business relationship, whether as a partner, joint venturer or employer, with any other person who has committed a felony other than a traffic offense, or a crime involving unlawful gambling, under the law of any federal, state or tribal jurisdiction.
 - (4) Was employed by any other person who has committed a felony other than a traffic offense, or a crime involving unlawful gambling, under the law of any federal, state or tribal jurisdiction, if the prospective employee or official was in any way involved in the criminal activity as it occurred.
- b. The Tribe shall deny a gaming license to any prospective High Security Employee or Primary Management Official if:
- (1) The applicant fails to disclose any material fact to the Tribe or the State or their authorized agents during a background or security investigation; or
 - (2) The applicant misstates or falsifies a material fact to the Tribe or the State during a background or security investigation.
- c. The Tribe may deny a gaming license to any prospective High Security Employee or Primary Management Official for any reason the Tribe deems sufficient. Such decisions to grant or deny a gaming license shall be consistent with the principles set forth in subsection A of Section 6 of this Compact. In determining whether to deny a gaming license to any prospective High Security Employee or Primary Management Official, the factors to be considered by the Tribe shall include, but need not be limited to, the following:
- (1) The applicant has been convicted of any crime (other than a crime listed in subparagraph a of this paragraph) in any jurisdiction; or
 - (2) The applicant has associated with persons or businesses of known criminal background, or persons of disreputable character, that may adversely affect the general credibility, honesty, integrity, security, fairness or reputation of the Tribal Gaming Operation; or
 - (3) There is any aspect of the applicant's past conduct that the Tribe determines would adversely affect the honesty, integrity, security or fairness of Tribal Gaming Operation.
- d. After this amended and restated Compact becomes effective, the Tribe shall deny a gaming license to any prospective Low Security Employee who has committed a crime described in subparagraphs (1) or (2) of subparagraph a of this paragraph. The Tribe may deny a gaming license to any Low Security Employee applicant who does not meet the criteria established in the remainder of this

paragraph 5. Decisions to grant or deny a gaming license shall be consistent with the principles set forth in subsection A of Section 6 of this Compact.

- e. The Tribe may reject an application if the applicant has not provided all of the information requested in the application.
- f. Denial of a gaming license by the Tribe is final.
- g. No Primary Management Official or High Security Employee may be licensed by the Tribe until all background checks required under paragraph 7.A.4. of this section are completed.

6. Waiver of Disqualifying Criteria.

- a. If a prospective Primary Management Official, High Security Employee or Low Security Employee is disqualified for licensing under the provisions of paragraph 5 above, and the Tribe believes that there are mitigating circumstances that justify waiver of the disqualifying factor, the Tribe may give written notice to the State asking to meet and confer concerning waiver of the disqualification. The Tribe and the State shall meet within 15 days after written notice is given.
- b. In order to waive disqualification of licensing of any prospective Primary Management Official, High Security Employee or Low Security Employee, both the Tribe and the State must agree on the waiver.
- c. Waiver of disqualification of licensing may be based on one or more of the following circumstances:
 - (1) Passage of time since conviction of a crime;
 - (2) The applicant's age at the time of conviction;
 - (3) The severity of the offense committed;
 - (4) The overall criminal record of the applicant;
 - (5) The applicant's present reputation and standing in the community;
 - (6) The nature of the position for which the application is made.
 - (7) The nature of a misstatement or omission made in the application.

7. Background investigation during employment. The Tribe or the State may conduct additional background investigations of any gaming employee at any time during the term of employment. If after investigation, the State determines there is cause for the

dismissal of any employee under the criteria established in this subsection 7.A., it shall promptly so report to Tribe and furnish the Tribe with copies of all relevant information pertaining to such determination. The Tribe shall review the State's report and supporting materials and if it concludes that good cause for dismissal is shown under the criteria established in this subsection 7.A., the subject employee shall be dismissed.

8. Temporary licensing of employees.

- a. The Tribe may issue a temporary license to High Security Employees fifteen days after submission of the application to the Oregon State Police, or upon completion of a review of the employee's application and completion of a computerized criminal history check and credit check by the Tribal Gaming Commission, if the applicant would not be disqualified on the basis of the results of the review and checks. The temporary license shall expire and become void upon completion of the background check and submission of the results to the Tribal Gaming Commission. If the employee does not qualify for a permanent license, the Tribe shall immediately revoke the temporary license.
- b. The Tribe may issue a temporary license to a Low Security Employee upon submission of the application to the Oregon State Police, or upon completion of a review of the employee's application and completion of a computerized criminal history check and credit check by the Tribal Gaming Commission, if the applicant would not be disqualified on the basis of the results of the review and checks. Any Low Security Employee shall be subject to immediate termination if the State or the Tribal Gaming Commission determines that the employee does not meet the criteria established in subparagraph 7.A.5.d.
- c. For purposes of this paragraph, if an application is forwarded by mail to the Oregon State Police or the results of a background check by the Oregon State Police are provided to the Tribe by mail, the material is deemed to be submitted three days after the date of mailing.
- d. No temporary license may be granted to a Primary Management Official or to a consultant under this paragraph.

9. Duration of license and renewal. Any employee license shall be effective for not more than three (3) years from the date of issue except that a licensed employee who has applied for renewal may continue to be employed under the expired license until final action is taken on the renewal application in accordance with the provisions of paragraphs 7.A.2. to 7.A.5. above. Applicants for renewal shall provide updated information on a form provided or approved by the State to the Tribe but will not be required to resubmit historical data already provided. The State may perform a new background investigation for any employee whose license is renewed.

10. Revocation of license. The Tribe may revoke the license of any employee pursuant to policies determined by the Tribe. The Tribe shall revoke the license of any employee only upon determination that the employee does not meet the criteria described in paragraph 7.A.5. above.
11. The Tribe shall maintain a procedural manual for employees that includes rules and regulations of conduct and disciplinary standards for breach of procedures.
12. The Tribe agrees to provide to the Oregon State Police, on a monthly basis, a list of all current employees of the Gaming Facility and to give notice to the Oregon State Police of any disciplinary action related to the fairness, integrity, security or honesty of the gaming operation, or termination of an employee, and any suspension or revocation of an employee's gaming license.

B. Contracts with Manufacturers and Suppliers.

1. The Tribe shall enter into contracts with all prospective managers, manufacturers, consultants or suppliers of goods or services related to the play of Class III gaming authorized by this Compact before conducting any business with those individuals or entities related to Class III gaming.
2. The Tribe shall submit any proposed Class III Gaming Contract to the State for review and comment and for a background investigation for the contract applicant.
3. A background investigation may be conducted by the State on all Class III Gaming Contract applicants or contractors. The level of investigation will be determined by whether the individual procurement is classified as a Major Procurement, Minor Procurement or Sensitive Procurement. The level of investigation for a Major Procurement and Sensitive Procurement shall be more intense than that for a Minor Procurement.
4. All Class III Gaming Contract applicants, and any owner or key employee of an applicant, shall provide all personal and business information required by the State to conduct its background investigation.
5. The Tribe shall not approve any Class III Gaming Contract that does not grant both the State and the Tribe access to the contractor's business and financial records.
6. Criteria for Denial of Contract Application.
 - a. The Tribe shall deny a Class III Gaming Contract application for any of the following reasons:
 - (1) A conviction of the applicant or any owner or key employee of the applicant for any felony other than a traffic offense, in any jurisdiction within the ten year period preceding the date of the application;

- (2) A conviction of the applicant or any owner or key employee of the applicant for any gambling offense in any jurisdiction;
 - (3) A civil judgment against the applicant or any owner or key employee of the applicant, based in whole or in part upon conduct that allegedly constitutes a gambling offense, or a civil judgment entered within the ten year period preceding the date of the application against the applicant or any owner or key employee of the applicant, based in whole or in part upon conduct that allegedly constitutes a felony other than a traffic offense;
 - (4) A failure by the applicant to disclose any material fact to the State or the Tribe or their authorized agents during initial or subsequent background or security investigations;
 - (5) A misstatement or untrue statement of material fact made by the applicant to the State or the Tribe or their authorized agents during initial or subsequent background or security investigations as determined by the Tribe or the State;
 - (6) An association with persons or businesses of known criminal background, or persons of disreputable character, that may adversely affect the general credibility, security, integrity, honesty, fairness or reputation of the Tribe;
 - (7) Any aspect of the applicant's past conduct that the Tribe or the State determines would adversely affect the integrity, security, honesty or fairness of Tribal gaming;
 - (8) The applicant has engaged in a business transaction with an Indian tribe that involved providing gaming devices for a Class III gaming operation that was conducted by the tribe without a State-Tribal Class III gaming compact in violation of the Indian Gaming Regulatory Act.
- b. The Tribe may deny any Class III Gaming Contract application for any reason the Tribe deems sufficient. Such decisions to deny a Class III Gaming Contract application shall be consistent with the principles set forth in subsection A of Section 6 of this Compact. In determining whether to deny a Class III Gaming Contract application, the factors to be considered by the Tribe shall include, but need not be limited to the reasons described in subparagraph 7.A.5.c. of this section.
- c. The Tribe may deny any Class III Gaming Contract application if:

- (1) A person who is unqualified or disqualified to be a Class III Gaming Contractor owns, is an agent of or has any other interest in the applicant, regardless of the qualifications of the person who seeks approval as a contractor; or
 - (2) The applicant demonstrates inadequate financing for the business proposed under the type of contract for which application is made. In determining whether financing is adequate, the Tribe shall consider whether financing is from a source that meets the qualifications of paragraph 5 of subsection A of this section, or paragraph 6 of subsection B of this section and whether that financing is in an amount to ensure the likelihood of success in the performance of the contractor's duties and responsibilities; or
 - (3) The applicant or its employees fail to demonstrate business ability and experience to establish, operate and maintain the business for the type of contract for which the application is made.
- d. In evaluating whether to deny a contract related to Class III gaming based on subparagraph c of this paragraph 6, the Tribe may consider the following factors:
- (1) The nature and severity of the conduct that constituted the offense or crime;
 - (2) The time that has passed since satisfactory completion of the sentence, probation, or payment of the fine imposed;
 - (3) The number of offenses or crimes; and
 - (4) Any extenuating circumstances that enhance or reduce the impact of the offense or crime on the security, integrity, honesty, and fairness of the Tribal gaming enterprise.
- e. No person applying for a Class III Gaming Contract shall own, manufacture, possess, operate, own an interest in, or gain income or reimbursement in any manner from gaming activities or gaming devices in any jurisdiction unless the activities or devices are approved and certified by another state lottery, gambling or gaming control agency, Indian Tribe, or National Indian Gaming Commission, and such ownership, manufacture, possession, operation, or income is disclosed to and approved by the Tribe and the State.
- f. The Tribe or the State may reject an application if the applicant has not provided all of the information requested in the application.
- g. Notwithstanding subparagraph a of this paragraph 6, if a Class III Gaming Contract application is required to be denied under this subsection 7.B., because a person previously associated with the applicant or an employee of the applicant

has been convicted of a crime or a civil judgment entered within the ten year period preceding the date of the application against the applicant or employee of the applicant, based in whole or in part upon conduct that allegedly constitutes a felony other than a traffic offense, the Tribe may enter into a contract with the applicant if the applicant has severed its relationship with that person or employee. Before the Tribe may enter into a contract under this subparagraph, the State and the Tribe must agree that the relationship between the applicant and the person or employee has been severed. For purposes of this subparagraph, a relationship is severed if the person or the employee has no continuing connection with the direction or control of any aspect of the business of the applicant, and the person or employee is no longer employed by the applicant in any capacity. The burden of showing to the satisfaction of the Tribe and the State that a relationship has been severed is on the applicant.

7. Revocation of Class III Gaming Contract.

- a. The Tribe may revoke any contract pursuant to policies and procedures determined by the Tribe.
- b. Every Class III Gaming Contract shall provide that the State, although not a party to that contract, may revoke any contract for cause consistent with the criteria established by paragraph 7.B.5. of this section and that the Class III Gaming Contractor shall consent to the State's right to review and revoke all Class III Gaming Contracts.

8. Contractor Reporting Requirements.

- a. All contractors shall submit to the Tribe and the State any financial and operating data requested by the Tribe or the State.
- b. The Tribe shall specify the frequency and a uniform format for the submission of such data.
- c. The Tribe, the State, or their agents reserve the right to examine contractor tax records and the detailed records from which the tax reports are compiled.

9. Termination of Contract.

- a. No contract shall be in effect for a term longer than seven (7) years.
- b. The Tribe and the State shall retain, in each contract, the right to terminate the contract immediately upon the occurrence of any of the following:

- (1) The contractor is discovered to have made any statement, representation, warranty, or certification in connection with the contract that is materially false, deceptive, incorrect, or incomplete;
- (2) The contractor fails to perform any material requirements of the contract or is in violation of any material provision thereof, and fails to cure same within ten (10) days' written notice of such failure;
- (3) The Tribe or the State determines satisfactory performance of the contract is substantially endangered or can reasonably anticipate such occurrence or default;
- (4) The Contractor, or any officer or employee of the Contractor or any owner of five percent (5%) or more of the equity ownership in the Contractor is convicted of a felony or a gambling-related offense that reflects on Contractor's ability to perform honestly in carrying out the contract;
- (5) The Contractor jeopardizes the integrity, security, honesty, or fairness of the Tribal gaming operation; or
- (6) Upon transfer of a controlling interest of the Contractor.

C. Fees for Background Investigations.

1. The State shall be reimbursed its costs for performing background investigations in accordance with the terms of section 10 of this Compact.
2. The State will assess the cost of background investigations for Class III Gaming Contract applications to the applicants. The applicant is required to pay the investigation fee in full prior to commencement of the investigation. If the applicant refuses to prepay the cost of a background investigation, the State shall notify the Tribe and the Tribe may choose to pay the investigation cost or withdraw its request for the investigation.

D. Access to Contracts.

1. If the Primary Management Official is a corporation or other form of organization, the Primary Management Official shall provide the State at all times with a current copy of any management agreement with the Tribe that allows it to conduct Class III gaming on the Tribal trust land.
2. If the Primary Management Official is a corporation or other form of organization, the Primary Management Official shall furnish to the State complete information

pertaining to any transfer of controlling interest in the management company at least 30 days before such change; or, if the Primary Management Official is not a party to the transaction effecting such change of ownership or interests, immediately upon acquiring knowledge of such change or any contemplated change.

3. The Tribe agrees to provide to the State, upon request, a list of all non-gaming contractors, suppliers and vendors, and to give the State access to copies of all non-gaming contracts.

SECTION 8. REGULATIONS FOR OPERATION AND MANAGEMENT OF CLASS III GAMES.

- A. Gaming Regulations. Conduct of all Class III gaming activity authorized under this Compact shall be in accordance with the requirements of this Compact and with the minimum internal control standards set forth in the Appendix to this Compact. The provisions of the Appendix "Tribal/State Minimum Internal Control Standards" are hereby incorporated into and made a part of this Compact. The Tribe and the State agree that the minimum internal control standards set forth in the Appendix may be modified or supplemented by mutual agreement of the parties, and that subsequent amendment of this Compact shall not be necessary for that purpose.
- B. Identification badges. The Tribe shall require all employees to wear, in plain view, identification badges issued by the Tribe that include photo and name, with the exception of employees assigned to covert compliance duties, who shall only be required to have on their person an identification badge. Oregon State Police employees shall not be required to wear identification badges.
- C. No credit extended. All gaming shall be conducted on a cash basis. Except as provided herein, no person shall be extended credit for gaming nor shall the Tribe permit any person or organization to offer such credit for a fee. Cashing checks for purposes of Class III gaming constitutes extending credit under this subsection. This restriction shall not apply to credits won by players who activate play on video games of chance after inserting coins or currency into the games. This section shall not restrict the right of the Tribe or any other person to install and accept bank card or credit card transactions in the same manner as is permitted at any retail business in the State.
- D. Prohibition on attendance and play of minors. No person under the age of twenty one (21) shall participate in any Class III gaming authorized by this Compact. No person under the age of twenty one (21) shall be allowed to play any Class III game operated under this Compact. If any person under the age of twenty one (21) plays and otherwise qualifies to win any Class III game prize or compensation the prize or compensation shall not be paid. Employees under age 21 whose non-gaming duties require may be present on the gaming floor.

- E. Prohibition of firearms. With the exception of federal, state, local or Tribal law enforcement agents or officers, no person shall possess firearms within the Gaming Facility.

- F. Service of Alcohol. No alcohol shall be served in the Gaming Facility unless authorized by the Tribe as permitted by federal law. The Tribe and the State shall enter into a Memorandum of Understanding that will establish which State laws and Oregon Liquor Control Commission licensing regulations shall be applied to the sale or service of alcoholic beverages at the Gaming Facility. Nothing in this subsection shall permit the State to impose taxes on the sale of alcoholic beverages by the Tribe. If alcohol is served in the Gaming Facility, no alcoholic beverages may be served free or at a reduced price to any patron of the Gaming Facility as an inducement to participate in any gaming. No alcohol may be served or consumed on the gaming floor while gaming is taking place.

- G. Liability for damage to persons and property. During the term of this Compact, the Tribe shall maintain public liability insurance with limits of not less than \$250,000 for one person and \$2,000,000 for any one occurrence for any bodily injury or property damage. The Tribe's insurance policy shall have an endorsement providing that the insurer may not invoke tribal sovereign immunity up to the limits of the policy. The Tribe shall indemnify, defend and hold harmless the State, its officers, directors, employees and agents from and against any claims, damages, losses or expenses asserted against or suffered or incurred by the State or its officers, directors, employees and agents (except as may be the result of their own negligence) based upon or arising out of any bodily injury or property damage resulting or claimed to result in whole or in part from any act or omission of the Tribe relating to the inspection of any gaming or gaming related facility pursuant to this Compact.

SECTION 9. INSPECTION AND ENFORCEMENT OF GAMING REGULATIONS.

- A. Tribal Gaming Commission.
 - 1. The Tribe agrees to establish a Tribal Gaming Commission, to grant the commission the exclusive authority to regulate gaming activities on Tribal lands, and to provide the commission adequate resources to perform its duties under Tribal law and this Compact. The commission shall not participate in any way in the management of the Gaming Facility. Commission members may be removed only for cause by the Tribal Council. Commission members must satisfy the security requirements that are applicable to High Security Employees and Primary Management Officials.

2. The Tribal Gaming Commission shall have primary responsibility for the on-site regulation, control and security of the gaming operation authorized by this Compact, and for the enforcement of this Compact on Tribal Lands. The Tribal Gaming Commission's role shall include the following functions:
 - a. Ensure compliance with all relevant laws, Compact provisions, regulations, internal controls, policies and procedures that are applicable to the operation of gaming activities on Tribal lands;
 - b. Ensure the physical safety of patrons in, and of personnel employed by, the establishment;
 - c. Safeguard the assets transported to and from and within the gaming facility;
 - d. Protect patrons and property from illegal activity;
 - e. Detain persons suspected of crimes for the purpose of notifying the law enforcement authorities;
 - f. Record any and all unusual occurrences within the gaming facility in indelible ink in a bound notebook from which pages cannot be removed, and each side of each page of which is sequentially numbered, as follows:
 - (1) The assigned sequential number of the incident;
 - (2) The date;
 - (3) The time;
 - (4) The nature of the incident;
 - (5) The person involved in the incident; and
 - (6) The security employee assigned;
 - g. Maintain logs relating to surveillance, security, cashier's cage, credit, video lottery terminals (showing when video machines opened), and video lottery terminal location;
 - h. Establish and maintain an updated list of persons barred from the gaming facility either because of their criminal history or because their association with career offenders or career offender organizations poses a threat to the honesty, security and integrity of gaming operations, and furnish that list to the State;
 - i. Obtain an annual audit by a Certified Public Accountant;

- j. Ensure that a closed circuit television system is maintained in the cash room of the gaming facility and that copies of floor plan and TV system are provided to the State;
 - k. Ensure that a cashier's cage is maintained in accordance with industry standards for security;
 - l. Ensure that sufficient security personnel are employed and trained;
 - m. Subject to State review and approval, establish a method for resolving disputes with players; and
 - n. Ensure that surveillance equipment and personnel are managed and controlled independently of management of the gaming facility.
2. Tribal Gaming Inspector.
- a. A Tribal gaming inspector, as an agent of the Tribal Gaming Commission, shall inspect the Gaming Facility at random during all hours of gaming operation, and shall have immediate access to any and all areas of the gaming operation for the purpose of ensuring compliance with the provisions of this Compact and Tribal ordinances, and regulations governing gaming. Any violations of the provisions of this Compact, or of Tribal ordinances or regulations by the Tribal gaming operation, a gaming employee, or any person on the premises whether or not associated with the Tribal gaming operation, shall be reported immediately to the Tribal Gaming Commission and reported to the State within seventy-two (72) hours of the time the violation was noted.
 - b. The Tribal Gaming Commission may designate any individual or individuals to perform the duties of a Tribal gaming inspector, so long as each inspector performs those duties independently of the management of the tribal gaming operation, and is supervised and evaluated by the commission as to the performance of those duties.
 - c. The Tribal gaming inspector shall monitor compliance with the requirements of applicable law, this Compact, regulations, internal controls, policies and procedures, including but not limited to:
 - (1) Observe for compliance, on a monthly basis or more frequently as determined by the Tribal Gaming Commission, at least four of the following:
 - (a) Sensitive gaming inventories;
 - (b) VLT or table game drop;

- (c) Soft count;
 - (d) Security and surveillance logs;
 - (e) Movement of cash within, into and outside the gaming facility;
 - (f) Surveillance procedures;
 - (g) Security procedures;
 - (h) Games controls;
 - (i) Integrity of VLT E-proms.
- (2) Investigate any potential violations of the provisions of this Compact, and applicable regulations, internal controls, policies and procedures.
 - (3) Investigate any cash variance greater than \$100, and report the findings to the Tribal Gaming Commission and the State Police.
 - (4) Investigate customer disputes related to gaming that involve more than \$500 and that are not resolved by the gaming operation management.
 - (5) Report to the Oregon State Police any criminal or regulatory issues that may affect the fairness, integrity, security and honesty of the gaming operation.
3. Investigations and Sanctions. The Tribal Gaming Commission shall investigate any reported violation of the Compact provisions and shall require the Tribal gaming operation to correct the violation upon such terms and conditions as the Tribal Gaming Commission determines to be necessary. The Tribal Gaming Commission shall be empowered by Tribal ordinance to impose fines and other sanctions within the jurisdiction of the Tribe against a gaming employee, or any other person directly or indirectly involved in, or benefitting from, the gaming operation.
4. Reporting to State. The Tribal Gaming Commission shall forward copies of all completed investigation reports and final dispositions to the State on a continuing basis. If requested by the Tribal Gaming Commission, the State shall assist in any investigation initiated by the Tribal Gaming Commission, and provide other requested services to ensure proper compliance with the provisions of this Compact, Tribal ordinances and regulations or applicable laws of the State.

B. State Enforcement of Compact Provisions.

1. Monitoring. The State is authorized hereby to monitor the Tribal gaming operation as the State considers necessary to ensure that the operation is conducted in compliance with the provisions of this Compact. The State shall have free and unrestricted access to all areas of the Gaming Facility during normal operating hours without giving prior notice to the Tribal gaming operation. The Tribe agrees that the State monitoring function includes at a minimum the activities identified in the Compact, the amendments and the memorandum of understanding entered into pursuant to this Compact, and that the actual, reasonable and necessary cost of monitoring activities shall be assessed to the Tribe as provided in Section 10 of this Compact. In addition to the State's regular monitoring functions, the Tribe agrees that the State may conduct the following activities, the cost of which shall also be assessed to the Tribe:
 - (a) An annual comprehensive compact compliance review, which shall be planned and conducted jointly with the Tribal Gaming Commission, of the gaming operation to verify compliance with the requirements of this Compact and with the regulations and internal controls adopted by the Tribal Gaming Commission, including at a minimum, review in the following areas: administrative controls (gaming management internal controls), gaming operations controls, drop boxes, station inventories, surveillance department controls, cashier cage controls, count room controls (security and surveillance), accounting department controls (security), general controls (Compact regulatory requirements), blackjack controls, VLT controls, accounts payable, employee identification, gaming chip inventory for gaming floor and cage, physical examination of all class III gaming cards, chips, e-proms, paper stock, printers, keno balls, fill slips, video gaming devices, keno controls, off-track betting and security department controls;
 - (b) Periodic review of any part of the gaming operation in order to verify compliance with the requirements of this Compact and with the regulations and internal controls;
 - (c) Investigation of possible violations of this Compact or other gaming regulatory matters, whether discovered during the action, review, or inspection by the State during its monitoring activities, or otherwise;
 - (d) Investigation of possible criminal law violations that involve the conduct of the gaming operation whether discovered during the action, review, or inspection by the State during its monitoring activities, or otherwise;
 - (e) Periodic review of any contracts between the Tribe and suppliers, vendors or contractors that provide non-gaming goods or services to the Gaming Facility. The Oregon State Police will report any concerns about a particular supplier, contractor or vendor to the Tribal Gaming Commission before taking any action.

2. Access to Records.

- (a) The Tribe agrees that the State shall have the right to inspect and copy, during normal business hours, and upon reasonable notice, any and all tribal records pertaining to the operation, management, or regulation of Class III Gaming by the Tribe, whether those records are prepared or maintained by the Tribe, the Tribal Gaming Commission or the Tribal Gaming Operation. Any records or copies removed from the premises shall be returned to the Tribe immediately after use.
- (b) The State acknowledges that records created and maintained by the Tribe belong to the Tribe.
- (c) The Tribe acknowledges that any records created or maintained by the State, including any records created or maintained in connection with the performance of the State's duties and functions under this Compact, belong to the State and are fully subject to the State Public Records Law, ORS 192.410 to 192.505. Any information concerning the Tribe's Class III gaming operation that is contained in state records may be subject to disclosure under ORS 192.410 to 192.505 unless the State would be permitted to withhold that information from disclosure under ORS 192.410 to 192.505. Examples of the kind of information that may be withheld from disclosure by the State under appropriate circumstances include:
 - (1) "Trade secrets" as defined in ORS 192.501(2).
 - (2) Investigatory information compiled for criminal law purposes as described in ORS 192.501(3).
 - (3) Information submitted in confidence, as provided in ORS 192.502(3).
 - (4) Any information the disclosure of which is specifically prohibited by state or federal law.
- (d) Applications submitted to and retained by the Oregon State Police for Class III gaming licenses are state records and may be subject to disclosure under ORS 192.410 to 192.505 unless the State would be permitted to withhold that information from disclosure under ORS 192.410 to 192.505.
- (e) Information about the Tribe's Class III gaming activities, whether obtained from the Tribe or from any other source, that is included in a document created or retained by the State in connection with its duties and functions under this Compact may be subject to disclosure under ORS 192.410 to 192.505 unless

the State would be permitted to withhold that information from disclosure under ORS 192.410 to 192.505.

- (f) The Tribe has agreed to allow the State access to sensitive financial, security and surveillance information that the Tribe considers confidential. The State acknowledges that the Tribe has voluntarily given the State access to this information and that the Tribe would not otherwise be required by law to do so. The State acknowledges that this information should reasonably be considered confidential. To the extent such information is included in any state records that are subject to disclosure, the State hereby obliges itself not to disclose this information when the public interest in maintaining the honesty, integrity, fairness and security of the tribal gaming operation would suffer by the disclosure.
- (g) The State agrees to notify the Tribe of any request for disclosure of information about the Tribe's Class III gaming activities. If the State decides to release any documents that contain information about the Tribe's Class III gaming activities, the State will notify the Tribe at least five (5) working days before any disclosure is made.
- (h) The parties agree that any dispute as to the disclosure of documents under the Public Records Law or under this subsection shall be decided in Marion County Circuit Court.
- (i) Nothing in this subsection precludes the State or the Tribe from disclosing information pursuant to state, tribal or federal rules of civil procedure or evidence in connection with litigation, a prosecution or a criminal investigation.

- 3. Investigation Reports. After completion of any inspection or investigation report, the State shall provide a copy of the report to the Tribal Gaming Commission.

**SECTION 10. TRIBAL PAYMENT OF COSTS FOR OVERSIGHT;
CONTRIBUTION FOR PUBLIC BENEFIT.**

A. Assessment for State Regulatory and Law Enforcement Costs

- 1. Before July 1 of each year, the Tribe and the State shall negotiate the number of direct service hours that will be necessary for the State to perform its duties and functions under this Compact. The amount of direct service hours shall reflect the size and scope of the Tribal gaming operation. The amount of direct services hours may be changed by mutual agreement during the ensuing year if the size and scope of the tribal gaming operation changes.

2. On July 1 of each year, the Tribe shall prepay an assessment to compensate the State for the costs of regulatory and law enforcement activities to be performed by the Oregon State Police under this Compact for the ensuing fiscal year.
3. The Tribe's annual assessment shall be calculated by multiplying the Oregon State Police legislatively approved budget for the fiscal year times the ratio that the maximum number of direct service hours of monitoring activity authorized under a memorandum of agreement to this Compact bears to the total number of direct service hours of monitoring activity authorized by compacts for all Tribes that are operating gaming facilities in this State at the beginning of the fiscal year. Costs included in the legislatively approved budget are salaries, benefits, services and supplies, capital outlay, administrative supervision and support, vehicle and equipment lease or rental expenses, training costs, legal services charges, bookkeeping expenses, and all other expenses of the Oregon State Police, Tribal Gaming Section.
4. During the fiscal year, the Oregon State Police shall account for all activities performed pursuant to this Compact on an hourly basis. For purposes of this accounting, the Oregon State Police shall calculate an hourly rate that is sufficient to allow the State to recover the total amount of the legislatively approved budget for tribal gaming regulation. Costs for all activities denominated as Part A costs in subsection B of this section and all recoverable expenses shall be charged against the Tribe's prepaid assessment amount, quarterly during the fiscal year.
5. At the end of each fiscal year, the Oregon State Police shall determine the amount remaining after the deductions from the Tribe's prepaid assessment provided in paragraph 3. The remainder of the assessment shall be added to the remainder of the assessments for all Tribes that operated gaming facilities in this State during the year, and shall constitute the total assessment for routine monitoring. Any costs recovered from vendor or employee licensing investigations shall be offset against the total. The total shall then be divided among the tribes based on the actual number of hours of monitoring activity performed with respect to each of them. The final charge for the fiscal year shall be the cost of Part B activities under subsection B of this section. If the Tribe has overpaid, credit shall be given against the next year's assessment. If the Tribe has underpaid, the Tribe shall pay the difference.
6. As used in this subsection:
 - a. "Investigation" means any activity performed by Oregon State Police because of the occurrence of a specific incident or event, and includes activity performed to determine whether there has been a violation of criminal law or any gaming regulation.
 - b. "Monitoring" means any activity performed during routine review of tribal gaming operations, but does not include investigations.

- c. "Direct Service Hours" means the actual time spent by Oregon State Police personnel in performing employee background checks, performing contract applicant background checks (unless paid by the contract applicant), performing Compact monitoring functions and traveling to and from the Gaming Facility or the site of a contract applicant background investigation, for the Grand Ronde Tribe.
 - d. "Recoverable Expenses" means charges paid by the Oregon State Police for processing fingerprint cards, for processing credit history checks, and actual per diem expenses (transportation, lodging, food) and other actual expenses incurred by Oregon State Police personnel in connection with performance of their duties under this Compact.
7. If the parties fail to agree to the assessments under this subsection, such dispute shall be resolved pursuant to Section 16 of this Compact.

B. Creation and Maintenance of Community Benefit Fund.

1. Establishment of Fund. The Tribe agrees to establish a Fund within 90 (ninety) days after execution and approval of this Compact. Annually, the Tribe will contribute to the Fund, from the proceeds of the Gaming Facility, an amount

calculated as provided in paragraph 4 below, for the previous fiscal year. The Tribe shall name the Fund.

2. Fund Administration.

- a. The assets of the Fund shall be expended for the benefit of the public within Polk, Yamhill, Tillamook, Marion, Washington, Multnomah, Clackamas, Lane, Linn, Benton or Lincoln counties. Grants from the Fund may be made to charitable organizations in the above counties, or to local government bodies within the two counties within whose boundaries the Grand Ronde Reservation is located (Polk and Yamhill) for any of the following purposes: education, health, public safety, gambling addiction prevention, education and treatment, the arts, the environment, cultural activities, historic preservation and such other charitable purposes as may be provided in the by laws of the Fund.
- b. The Fund will be administered by a board of eight trustees. Each trustee shall have an equal vote on actions of the board.
- c. The trustees of the Fund shall establish by laws governing the conduct and discharge of their responsibilities not inconsistent with the terms of this subsection.
- d. The Tribe shall submit proposals for grants from the Fund to the trustees, who shall make the final determination of the proposals to be funded in accordance with the by laws. Grants shall be made on the basis of merit. The trustees may reserve a portion of the Fund in a single year to fund a multi-year grant or grants.

3. Qualifications, Term and Selection of Trustees.

- a. The membership of the board of trustees shall be:
 - (1) Three members of the tribal council of the Confederated Tribes of the Grand Ronde Community of Oregon, appointed by the Tribe;
 - (2) One representative of the Spirit Mountain Development Corporation or Spirit Mountain Gaming, Inc. (or their successors), appointed by the Tribe;
 - (3) Three trustees who are not affiliated with the Tribe, appointed by the Tribe from a list of candidates nominated by the Tribal Council in consultation with the Governor of the State of Oregon;
 - (4) One member of the public at large, appointed by the Governor of the State of Oregon.

- b. Each trustee must reside in one of the following counties: Polk, Yamhill, Tillamook, Marion, Washington, Multnomah, Clackamas, Lane, Linn, Benton or Lincoln.
 - c. Except for the initial board, trustees shall serve two-year terms and may be removed before the end of their terms only for cause by the appointing authority. The initial board shall serve as follows: The three members of the tribal council and the representative of Spirit Mountain shall serve for two years; the remaining members of the initial board shall serve for one year. Trustees may be reappointed. Vacancies on the board of trustees shall be filled within thirty days by the appropriate appointing authority. Any trustee whose term has expired shall continue to serve until a successor has been appointed.
4. Calculation of Fund Contribution. The Tribe's annual contribution to the Fund shall be based upon the Tribal Gaming Operation's net income as shown in the audited financial statement of the Tribal Gaming Operation for the fiscal year ending before the contribution is made, and for which the Tribal Gaming Operation has received an unqualified audit opinion that the financial statement fairly reflects the Tribal Gaming Operation's financial position from an independent nationally recognized public accounting firm (commonly recognized as a "Big Six" firm) engaged by the Tribe for the purpose. The contribution shall be calculated as follows:
- a. Deduct from the Tribal Gaming Operation's net income before tribal taxes, and excluding any payment for Oregon State Police assessments, for the prior calendar year, the amount paid by the Tribe for Oregon State Police Part A assessments for the State's fiscal year ending the preceding June 30.
 - b. Multiply the result in subparagraph a of this paragraph by 6 per cent. The product shall be the Tribe's base public service assessment.
 - c. Deduct from the base public service assessment the amount paid by the Tribe for Oregon State Police Part B assessments for the State's fiscal year ending the preceding June 30. An amount equal to the difference is the amount of the annual contribution to the Fund.
5. For purposes of this subsection:
- a. Oregon State Police assessment Part A includes the cost of all employee background investigations, all criminal and regulatory investigations, and any consulting or gaming related services requested by the Tribe that are not required by this Compact or by a memorandum of understanding under this Compact.
 - b. Oregon State Police assessment Part B includes the cost of routine monitoring activities and all comprehensive compact compliance reviews.

6. The determination of the net income of the Tribal Gaming Operation is subject to review by the State.
7. Termination or Modification of Fund Contributions. The Tribe's contributions to the community benefit fund established as described in subsection B of this section may be discontinued if the Oregon Constitution is amended to allow the operation of casinos in this state. The Tribe and the State agree that if the Tribe is prohibited from offering blackjack or any of the Class III games listed in paragraphs 1 or 2 of subsection B of section 7 of this Compact, the parties will enter into negotiations to establish how the community benefit fund contribution provided for in this subsection will be adjusted to reflect the impact of the discontinuation of those games on the net income of the Tribal Gaming Operation.

SECTION 11. APPLICATION OF STATE REGULATORY STANDARDS.

A. Health, Safety and Environmental standards.

1. The Tribe agrees to adopt and enforce ordinances and regulations governing health, safety and environmental standards applicable to the Gaming Facility that are at least as rigorous as comparable standards imposed by the laws and regulations of the State. The Tribe agrees to cooperate with any State or local agency generally responsible for enforcement of such health, safety and environmental standards outside Indian lands in order to assure compliance with such standards within the Gaming Facility. However, the Tribe shall have the exclusive regulatory jurisdiction over the enforcement of health, safety and environmental standards applicable to the Gaming Facility. The Tribe shall use its regulatory jurisdiction to assure that health, safety and environmental standards are met. Tribal ordinances and regulations governing water discharges from the Gaming Facility shall be at least as rigorous as standards generally imposed by the laws and regulations of the State relating to public facilities; provided, however, that to the extent that federal water discharge standards specifically applicable to the Tribal lands would preempt such State standards, then such federal standards shall govern.
2. Upon request by the State, the Tribe agrees to provide evidence satisfactory to the State that any new construction, renovation or alteration of the Gaming Facility performed after the effective date of this Compact satisfies applicable Tribal health, safety and environmental standards. The Tribe can demonstrate that it has satisfied this section by providing a certificate or other evidence of compliance from the appropriate state or local official responsible for enforcement of comparable state standards.
3. As used in this subsection, "health, safety and environmental standards" include but are not limited to structural standards, fire and life safety standards, water quality and discharge standards, food handling standards, and any other standards that are generally applicable under state or federal law to a non-tribal facility that is open to

the public for purposes of protecting the public within the facility. "Health, safety and environmental standards" does not include land use regulations or zoning laws.

4. The Tribe agrees that the State may have state or local inspectors verify compliance with this subsection. If the State asserts that the Tribe is in breach of this subsection, and that the breach creates an immediate and substantial threat to the health or safety of the patrons or employees of the Gaming Facility, the Tribe agrees to take such steps as are necessary to protect the public or employees until the breach is remedied. Resolution of any dispute as to what steps are necessary shall be conducted in the same manner as and under the principles and procedures established for resolution of operating disputes in section 6 of this Compact.
- B. Traffic standards. The Tribe shall provide access from its Gaming Facility onto the public road known as State Highway 18 that is adequate to meet standards of the Oregon Department of Transportation or shall enter into agreements with the Oregon Department of Transportation for the provision of such access by the State, including provisions for compensation by the Tribe for some portion of the costs incurred by the State in constructing such improvements to the public highway, including traffic control signals, as may be necessary.
 - C. The Tribe shall report to the Oregon Department of Revenue gambling winnings paid to any person subject to Oregon Personal Income Tax on those winnings whenever the Tribe would be required to report those winnings to the Internal Revenue Service. The information shall be reported in the manner required by the Oregon Department of Revenue. The Tribe agrees that the management of the Gaming Facility will withhold and remit personal income taxes from employee wages to the Oregon Department of Revenue in the manner prescribed by the Department of Revenue.
 - D. If local government officials believe that an off-Indian land public safety problem has been created by the existence of the Gaming Facility, the Tribe, or its designated representative, shall meet with the mayor or county commission of the affected government to develop mutually agreeable measures to alleviate the problem. The burden shall be on the local government officials to demonstrate that the public safety problem is directly attributable to the existence of the Gaming Facility. If an off-Indian land public safety problem has been created by the existence of the Gaming Facility, the Tribe shall undertake to perform any mutually agreeable measures to alleviate the problem. If the Tribe and local government officials are unable to agree on measures to alleviate the problem, the State may initiate the dispute resolution process established in Section 16 of this Compact.

SECTION 12. EFFECTIVE DATE; TERMINATION; AMENDMENTS.

- A. Effective Date. This amended and restated Compact shall become effective upon execution by the State and by the Tribe and appropriate federal approval.

B. Termination. This Compact shall remain in effect until such time as:

1. This Compact is terminated by written agreement of both parties;
2. The State amends its Constitution or laws to criminally prohibit within the State conduct of all of the Class III gaming authorized by this Compact, whether for profit or not for profit;
3. A court of competent authority makes a final determination that all of the Class III games authorized by this Compact are criminally prohibited under the law of the State, and the determination has become final and enforceable;
4. The federal government amends or repeals IGRA so that a Compact is no longer required for the Tribe's exercise of Class III gaming; or
5. Either party materially breaches this Compact; but only after the dispute resolution process set forth in Section 16 of this Compact has been exhausted, and the breach has continued for a period of 60 days after written notice following the conclusion of the dispute resolution process.

C. Automatic Amendment.

1. If a type of Class III game authorized under Section 4 of this Compact is criminally prohibited by an amendment to State statute or Constitution, this Compact shall no longer authorize the Tribe to engage in that type of Class III game, and any provisions in this Compact authorizing such gaming shall be void and of no effect.
2. If a court decides that a Class III game authorized under this Compact is criminally prohibited, this Compact shall no longer authorize the Tribe to engage in that type of Class III game, and any provisions in this Compact authorizing such gaming shall be void and of no effect.
3. If a type of Class III game authorized is prohibited as provided in paragraphs 1 or 2 of this subsection, the Tribe shall be required to cease operating that Class III game only if and under the same circumstances and conditions as the State or any other affected person must cease operating the corresponding game.

D. Amendments.

1. Except as provided in subsection 12.C. above, this Compact shall not be amended unless one of the following conditions occur:
 - a. The State becomes a party to another Tribal-State Compact that authorizes a tribe other than the Confederated Tribes of the Grand Ronde Community of Oregon to

engage in any Class III gaming activity or scope of gaming activity not permitted under the terms of this Compact;

- b. One year elapses after the date this amended and restated Compact is approved by the Secretary of the Interior;
 - c. The State amends State statute or Constitution to expand the type of Class III gaming permitted in the State for any purpose by any person, organization, or entity.
2. Paragraph 12.D.1.above does not authorize the Tribe to renegotiate the terms of this Compact applicable to forms of gaming authorized by Section 4 of this Compact, except to the extent that the State voluntarily consents to such renegotiation or as is otherwise provided for in this Compact.
 3. Pursuant to paragraph 12.D.1., the State or the Tribe may by appropriate and lawful means, request negotiations to amend, replace or repeal this Compact. In the event of a request for renegotiation or the negotiation of a new agreement, this Compact shall remain in effect until renegotiated or replaced, unless sooner terminated under subsection 12.B. Such request to renegotiate shall be in writing and shall be sent by certified mail to the Governor of the State or the Chair of the Tribe at the appropriate office identified at Section 14 below. If a request is made by the Tribe, it shall be treated as a request to negotiate pursuant to IGRA. All procedures and remedies available under IGRA shall thereafter apply with the exception that the 180-day period for negotiation set forth at 25 U.S.C. 2710(d) shall be 100 days.

SECTION 13. DISCLAIMERS AND WAIVERS.

- A. Gaming at Another Location or Facility. The Tribe hereby waives any right it may have under IGRA to negotiate a Compact for Class III gaming at any other location or facility, unless another Tribe that is operating a gaming facility in this State as of December 31, 1996, signs a Compact that authorizes that Tribe to operate more than one gaming facility simultaneously, or is otherwise authorized to operate more than one gaming facility simultaneously.
- B. Status of Class II Gaming. Nothing in this Compact shall be deemed to affect the operation by the Tribe of any Class II gaming as defined in the Indian Gaming Regulatory Act or to confer upon the State any jurisdiction over such Class II gaming conducted by the Tribe.
- C. Prohibition on taxation by the State. Nothing in this Compact shall be deemed to authorize the State to impose any tax, fee, charge or assessment upon the Tribe or any Tribal gaming operation except for charges expressly authorized in accordance with this Compact.

- D. Preservation of Tribal Self-Government. Nothing in this Compact shall be deemed to authorize the State to regulate in any manner the government of the Tribe, including the Tribal Gaming Commission, or to interfere in any manner with the Tribe's selection of its governmental officers including members of the Tribal Gaming Commission. No licensing or registration requirement contemplated by this Compact shall be applicable to such officers with respect to their capacity as officers of the Tribe.

- E. This Compact is exclusively for the benefit of and governs only the respective authorities of and the relations between the Tribe and the State. Nothing in this Compact shall be construed as creating or granting any rights to any third party, or as establishing any objection or defense for any third party to any charge, offense or prosecution.

- F. The Tribe and the State agree that any activities that must be performed under this amended and restated Compact to prepare for implementation of any new games authorized under Section 4 may be undertaken before the Secretary of the Interior approves this amended and restated Compact.

SECTION 14. NOTICES.

All notices required or authorized to be served to the Oregon State Police shall be served by first class mail at the following address:

Captain
 Oregon State Police
 Gaming Enforcement Division
 400 Public Service Building
 Salem, OR 97310

All other notices required or authorized to be served shall be served by first class mail at the following addresses:

Legal Counsel to the Governor
 Office of the Governor
 254 State Capitol
 Salem, OR 97310

Chair of the Grand Ronde
 Tribal Gaming Commission
 9615 Grand Ronde Rd.
 Grand Ronde, OR 97347

SECTION 15. SEVERABILITY.

In the event that any section or provision of this Compact is held invalid, or its application to any particular activity is held invalid, it is the intent of the parties that the remaining sections of the Compact and the remaining applications of such section or provision shall continue in full force and effect.

SECTION 16. DISPUTE RESOLUTION.

- A. At the discretion of either party, in the event either party believes that the other party has failed to comply with any requirement of the Compact, that party may invoke the following dispute resolution procedure in order to foster cooperation and avoid the costs of litigation:
 - 1. The party asserting noncompliance shall serve written notice on the other party in the manner provided in section 14. The notice shall identify the specific provision of the Compact alleged to have been violated and shall specify the factual basis for the alleged noncompliance. The State and the Tribe shall thereafter meet within thirty (30) days in an effort to resolve the dispute.
 - 2. In the event the dispute is not resolved to the satisfaction of the parties within ninety (90) days after service of notice, either party may initiate an action against the other party in the United States District Court for the District of Oregon to interpret or enforce the provisions of this Compact. In the event that the Federal court declines jurisdiction, an action can be filed in a State court of competent jurisdiction to interpret or enforce the provisions of this Compact.
- B. Nothing in subsection 16.A. shall be construed to waive, limit or restrict any remedy that is otherwise available to either party to enforce the provisions of this Compact or limit or restrict the ability of the parties to pursue, by mutual agreement, alternative methods of dispute resolution.
- C. With respect to gaming not authorized by this Compact, nothing in this Compact shall be construed to limit the authority of the State or the federal government to take immediate action to enforce and prosecute the gambling laws of the State and the United States pursuant to 18 USC §1166 (Section 23 of IGRA).

SECTION 17. INTEGRATION

This compact is the complete and exclusive expression of the parties' intent.

EXECUTED as of the date and year above-written.

**TRIBAL-STATE COMPACT FOR REGULATION
OF CLASS III GAMING BETWEEN THE KLAMATH TRIBES AND
THE STATE OF OREGON**

PREAMBLE

This Compact is made between the State of Oregon (hereinafter "State") and the Klamath Tribes (hereinafter "Tribes") and pertains to Class III gaming to be conducted on Indian Trust lands within the 1954 boundaries of the Klamath Indian Reservation pursuant to the Indian Gaming Regulatory Act (hereinafter "IGRA") of October 17, 1988 (Public Law 100-97), 25 U.S.C. § 2701 *et seq.* and the Klamath Tribes Restoration Act (Public Law 99-398), Exhibit I, and reflects the sovereign status and jurisdictional authority of the Tribes and addresses the legitimate concerns of the State. The terms of this Compact are unique to these Tribes and reflect the fact that the lands that are the subject of this Compact, have all the recognition, rights and privileges as were restored to the Tribes under the Klamath Indian Tribe Restoration Act (hereinafter "Restoration Act", and may be used for Class III gaming under IGRA.

SECTION 1. TITLE

This Compact is entered into this 16th day of December 1994, by and between the Klamath Tribes, a federally recognized Tribe of Indians, and the State of Oregon.

SECTION 2. FINDINGS

WHEREAS, the Tribes is a federally recognized Indian Tribe and are the government for the Klamath Tribes, located within the State of Oregon; and

WHEREAS, the State and the Tribes are separate sovereigns and each respects the laws of the other sovereign; and

WHEREAS, the public policy of the State is reflected in the Constitution, statutes and administrative rules of the State, and the Constitution provides that the "Legislative Assembly has no power to authorize, and shall prohibit, casinos from operation in the State"; and

WHEREAS, the Tribal public policy, as reflected in the Tribes' Constitution and ordinances, "recognize[s] our Tribe[s] for the continued preservation of its culture, identity and to provide a responsible organization to carry out the official business of the Tribe[s] including our treaty rights...and to establish ourselves as a body which...shall act to represent the Klamath Tribe[s] in its full relationships with the United States government, the State of Oregon, other Indian Tribes and associations, and all other persons or bodies."; and

WHEREAS, the United States Congress has enacted IGRA which declares federal policy and provides a statutory basis for operation of gaming by the Tribes as a means of promoting Tribal economic development, self-sufficiency, and strong Tribal government; and

WHEREAS, the Tribes exercises governmental authority over all Klamath Indian lands; and

WHEREAS, the Tribes represent that the Gaming Location will be on land described in 25 U.S.C. § 2719; and

WHEREAS, IGRA is intended to provide a statutory basis for regulation of gaming by the Tribes adequate to shield it from organized crime and other corrupting influences, to ensure that the Tribes is the primary beneficiary of the gaming revenues, and to ensure that gaming is conducted fairly and honestly by both the operators and players; and

WHEREAS, Congress has declared that it is a principal goal of federal Indian policy to promote Tribal economic development, Tribal self-sufficiency and strong Tribal government; and

WHEREAS, IGRA provides for a system of joint regulation by Indian Tribes and the federal government (to the exclusion of the State) of Class I and II gaming on Tribal lands as defined in IGRA; and

WHEREAS, IGRA establishes a system of agreements between Indian Tribes and States for the regulation of Class III gaming as defined in that Act; and

WHEREAS, IGRA provides that Class III gaming activities are lawful on Tribal lands only if such activities are (1) located in a state that permits such gaming for any purpose by any person, organization or entity, (2) authorized by Tribal Ordinance, and (3) conducted in accordance with a Tribal-State Compact; and

WHEREAS, the Congressional intent in passing IGRA was to reaffirm a long and well-established principle of federal Indian law as expressed in the United States Constitution, reflected in Federal statutes and articulated in decisions of the United States Supreme Court that unless authorized by an act of Congress, the jurisdiction of State governments does not extend to Tribal lands; and

WHEREAS, IGRA does not extend State jurisdiction or the application of State laws for any purpose other than jurisdiction and application of State laws to gaming conducted on Tribal land as set forth in this Compact; and

WHEREAS, in IGRA, Congress recognized a role for State public policy and State law in the regulation of Class III Gaming; and

WHEREAS, nothing in the Tribal-State Compact shall be construed to extend to any other activities or as an abrogation of other reserved rights of the Tribes or of the Tribes' sovereignty; and

WHEREAS, IGRA is intended to expressly preempt the field in the governance of gaming activities on Tribal lands; and

WHEREAS, the Tribes is authorized to act through Resolutions adopted by its Executive Committee; and

WHEREAS, the State of Oregon is authorized to act through the Governor of the State;

NOW THEREFORE, in consideration of the mutual undertakings and agreements herein set forth, the Tribes and the State enter into the following Compact:

SECTION 3. DEFINITIONS

As used in this Compact, and in its Appendices and Exhibits:

- A. "Background Investigation" means the security and financial history checks of an employee, licensee or applicant for Tribal contract for the operation or sale of Class III games to the Tribes.
- B. "Certification" means the inspection process used by the Oregon State Lottery to approve video lottery game terminals and games.
- C. "Class III Gaming Contract" means a contract that involves Major, Minor, or Sensitive Procurement.

- D. "Class III Gaming Contractor" is any individual, business or other entity that applies for or is a party to a Class III Gaming Contract.
- E. "Controlling Interest" means 15 percent (15%) of the equity ownership of a company.
- F. "Display" means the visual presentation of video lottery game features shown on the screen of a video lottery terminal.
- G. "Gaming Facility" means the building proposed to be constructed as of the date of execution of this Compact, by the Tribes on lands currently being placed in trust as per the Klamath Tribes' Restoration Act, Exhibit I, within the Former Klamath Indian Reservation, immediately east of the junction of Highways 97 and 62, more specifically described in Exhibit II to this Compact. If the size of the Gaming Facility is expanded as otherwise provided in this Compact, the term "Gaming Facility" shall thereafter refer to the expanded facility.
- H. "Gray Machine" means any electrical or electro-mechanical device, whether or not it is in working order or some act of manipulation, repair, adjustment or modification is required to render it operational that:
1. Awards credits or contains or is readily adaptable to contain, a circuit, meter or switch capable of removing or recording the removal of credits earned by a player, other than removal during the course of continuous play; or
 2. Plays, emulates or simulates a casino game, bingo or keno. A device is no less a "gray machine" because, apart from its use or adaptability as such, it may also sell or deliver something of value on the basis other than chance.
- "Gray Machine" does not include any device operated under the authority of State law or under the terms of this Compact.
- I. "High Security Employee" means any person with responsibility for the management or operation of the Class III gaming activities or access to gaming terminals or cash.
- J. "Key Employee" means any officer or any person who can affect the course of business, make decisions or is in a sensitive position.
- K. "Low Security Employee" means any person employed to work in a gaming area with no responsibility for management or operation of the Class III gaming activities and no access to inside gaming terminals or cash.
- L. "Major Procurement" means any procurement action or contract for:
1. The printing of tickets used in any Class III gaming;
 2. Any goods or services involving the receiving or recording of number selections in any Class III gaming;
 3. Any goods, services or products involving the determination of winners in any Class III gaming; or
 4. Video devices.
- M. "Minor Procurement" means any procurement action or contract related to Class III gaming that is neither a Major Procurement nor a Sensitive Procurement. A typical example of this class of procurement is a contract to change the external appearance of a video terminal.

- N. "Owner" means any person or entity that owns five percent (5%) or more of the equity ownership of a company.
- O. "Primary Management Official" means any person who:
1. Has management responsibility for any gaming management contract;
 2. Has authority:
 - a. to hire and fire employees; or
 - b. to set or otherwise establish working policy for the gaming operations; or
 3. Is the chief financial officer or other person who has financial management responsibility for Class III gaming operations.
- P. "Sensitive Procurement" means any procurement action or contract for goods or services, other than a "Major Procurement", that may either directly or indirectly affect the integrity, security, honesty and fairness of the operation and administration of Class III gaming. A typical example of this class of procurement is the acquisition of security systems required to protect the security and integrity of the Class III gaming.
- Q. "Video Lottery Terminal" or "Terminal" means an electrical or electro-mechanical device, component or terminal that displays a ticket through the use of a video display screen, and that is available for consumer play upon payment of any consideration, with winners determined by the application of the element of chance and the amount won determined by the possible prizes displayed on the device, as more fully described in Appendix A.

SECTION 4. AUTHORIZED CLASS III GAMING

- A. This Compact shall be the only and entire Compact between the Tribes and State and any and all Class III gaming conducted in the Gaming Facility shall be pursuant to this Compact. To the extent that elements of this Compact need to be altered to incorporate changes to the agreements between the parties, including to permit additional Class III gaming, the parties shall provide such changes in accordance with subsection D of Section 12 of this Compact.
- B. Authorized Games.
1. Subject to the provisions of this Compact, the Tribes may engage in only the following Class III games: Video lottery games of chance as described in Appendix A, Keno as described in Appendix B, and off-race course mutuel wagering as described in Appendix C.
 2. This section shall be construed consistent with federal classification of gaming activities. Notwithstanding any provision of this Compact, any gaming activity classified by federal regulation as Class II activity shall not be subject to the provisions of the Compact.
- C. Gaming Location. The Gaming Facility authorized by this Compact shall be located on Indian land near Chiloquin, Oregon, East of the junction of Highways 97 and 62, on land that is currently being placed in trust for the Tribes by the United States. This land is within the former Klamath Reservation and shall be placed in trust as per the Restoration Act, Exhibit I, and more fully described in Exhibit II to this Compact. Gaming authorized under this Compact shall be conducted only in the Gaming Facility on the above stated trust lands.

If another Oregon Tribe is authorized to operate a gaming facility on non-Tribal lands, the Tribes do not hereby abrogate any rights they may have under Section 20 of IGRA.

- D. Number of Video Terminals. The number of Class III video lottery games of chance authorized by this Compact shall not exceed the number of such games that would occupy 15 percent (15%) of the total square footage of the gaming area and related portions of the Gaming Facility under customary industry spacing. The parties acknowledge that the Gaming Facility is a mixed use facility. The parties agree that the size of the Gaming Facility to be devoted to Class III video lottery games of chance is determined by the area of those parts of the facility that are appropriately related to the gaming activities conducted therein (the "gaming area"). The parties also agree that, in combination, the gaming area of the facility and the spacing of video lottery terminals customary in the industry limit the number of video lottery terminals on the gaming floor to no more than five hundred (500). Subject to other terms of this Compact, the Tribes may determine at its discretion, the location and spacing of video lottery terminals within the Gaming Facility.
- E. Temporary Gaming Facility.
1. The Tribes is authorized to develop a temporary Gaming Facility on the site designated for the permanent Gaming Facility under the Compact.
 2. Type of Facility. The temporary Gaming Facility will consist of a Chief Steel Building and will include a surveillance room, cage, money count room, utility room, delicatessen and two bathrooms. A diagram of the building is attached as Exhibit II to this Compact.
 3. Layout of Facility. The total square footage of the temporary Gaming Facility shall be no more than 6000 square feet. The proposed floor plan for the building is attached as Exhibit II to this Compact.
 4. Class III Gaming. The only Class III games that will be conducted in the temporary Gaming Facility will be video lottery terminals as defined in this Compact. The Tribes may install up to 150 video lottery terminals in the temporary Gaming Facility.
 5. Duration of Temporary Gaming. Gaming under this subsection may be conducted for a period of no more than one year beginning after the effective date of this Compact and ending before the opening of the permanent Gaming Facility.
 6. Access to Temporary Facility. Access to the temporary Gaming Facility shall be provided subject to the conditions imposed in Section 11.B of this Compact. The Tribes shall consult with the Oregon Department of Transportation and appropriate local officials so that access from State Highway 97 will meet appropriate standards. The Tribes is responsible to provide adequate parking off Highway 97 for patrons of the temporary Gaming Facility.
 7. Alcohol Policy. No alcohol will be served in the temporary Gaming Facility.
 8. Security. The Tribes shall consult with the Oregon State Police to assure that the security requirements of the Compact are fully satisfied before opening the temporary Gaming Facility.
 9. Applicability of Compact Requirements: Except as explicitly provided in this subsection, all terms of this Compact shall apply to the operation of the temporary Gaming Facility.

- F. Expansion of Gaming Area. If the Tribes decides to expand the square footage of the Gaming Facility the parties to this Compact shall enter into an addendum to this Compact in which the precise number of additional video lottery terminals to be located in the expansion shall be established. The limit on the number of video lottery terminals established in subsection D of this section shall be increased by the number of video lottery terminals that would occupy 15 percent (15%) of the total square footage of the expansion that is devoted to Class II and Class III gaming and related activities, given customary industry spacing of video lottery terminals.
- G. Off-Track Mutuel Wagering. The Tribes may conduct off-track mutuel wagering on races held at race courses within or outside the State. Any off-track mutuel wagering on races held at race courses outside the State shall be conducted in compliance with the applicable requirements of the Interstate Horse Racing Act of 1978, as amended, (15 U.S.C. § 3001 to 3007). All off-track mutuel wagering at the Gaming Facility shall be conducted in person and no wagers may be accepted by telephone or other electronic medium.

SECTION 5. JURISDICTION

- A. In General.
1. The State shall have criminal jurisdiction over offenses committed by or against Indians and Non-Indians within the Gaming Facility and on Tribal trust land on which the Gaming Facility is located. The criminal laws of the State shall have the same force and effect at the gaming location as they have on non-Tribal lands within the State. The State and the Tribes will enter into a Memorandum of Understanding concerning the assignment of law enforcement officers for enforcement of criminal laws of the State.
 2. If the Tribes authorizes the Tribal Court to hear criminal cases arising on Tribal lands, the Tribes and the State shall have concurrent criminal jurisdiction over offenses committed by Indians within the Gaming Facility and on the Tribal lands on which the Gaming Facility is located. The criminal laws of the State shall have the same force and effect on the Tribal lands on which the Gaming Facility is located as they have on non-Tribal lands within the State. Once a Tribal Police Force is in operation on the Tribal lands, enforcement of criminal laws at the Gaming Facility shall be established pursuant to and by a Memorandum of Understanding to be executed by the Tribes and the Oregon State Police.
- B. Except as provided in a Memorandum of Understanding executed in accordance with the foregoing paragraph 2 of subsection A above, law enforcement officers of the State of Oregon, or officers designated by the State, shall have free access to anywhere within the Gaming Facility for the purpose of maintaining public order and public safety, conducting investigations related to possible criminal activity and enforcing applicable laws of the State with respect to non-Indians. Any law enforcement activities undertaken by law enforcement officers of the State shall be in compliance with this Compact, the Tribes' Law and Order Code and any Cross Deputization Agreement executed by the Klamath Tribes and the State. The Tribes, or individuals acting on their behalf, shall provide State law enforcement officers or officers designated by the State, access to locked and secure areas of the Gaming Facility in accordance with the regulations for the operation and management of the Gaming Operation.
- C. Subject to the provisions of paragraph 1 of subsection B of Section 9 of this Compact, the State may station one or more officers at the Gaming Facility by mutual agreement with the Tribes. The Tribes agrees to provide appropriate training in Tribal culture and institutions to any officer stationed at the Gaming Facility.

- D. Nothing in this Compact shall be construed to affect the civil jurisdiction of the State under Public Law 280.

SECTION 6. PRINCIPLES GOVERNING GAMING OPERATIONS

- A. The Tribes and the State agree that maintaining the honesty, integrity, fairness and security of the Tribes' Gaming Operation is essential both to the success of the Gaming Operation and to satisfy the interests of the State and the Tribes. Accordingly, all decisions by the Tribes concerning operation of their Gaming Facility, including those decisions expressly placed within the Tribes' discretion under the terms of this Compact, shall be consistent with each of the following principles:

1. Any and all of the Tribes' decisions concerning operation of the Tribal Gaming Operation shall reflect the particularly sensitive nature of a gaming operation.
2. In order to maintain the honesty, integrity, fairness and security of the Tribes' Gaming Operation, the Tribes shall work diligently and take all reasonably necessary affirmative steps to prevent cheating and theft, and to protect the Gaming Operations from the influence or control by any form of criminal activity or organization.
3. The honesty, integrity, fairness and security of the Tribes' Gaming Operation shall be of paramount consideration in awarding contracts, licensing and hiring employees, and in making other business decisions concerning the operation of the Gaming Facility. The Tribes shall not make any decisions that compromise the honesty, integrity, fairness or security of the Gaming Operation.
4. Regulation and operation of the Tribes' gaming activities shall be, at a minimum, consistent with generally accepted industry standards and practices, in order to maintain the honesty, integrity, fairness and security of the Tribes' Gaming Operation.

- B. Procedure for Resolving Disputes Concerning Operational Decisions.

1. If the State, in good faith, believes that any decision by the Tribes relating to the employment or licensing of any employee, awarding of any contract or operation of the Gaming Facility, is inconsistent with the principles set forth in subsection A of this section, or any other requirement of this section, the State may give written notice to the Tribes. The written notice shall describe the factual basis for the State's concern.
2. The parties shall meet and confer within 15 days after the Tribes receive the notice.
3. Arbitration.
 - a. If the State's concern is not resolved informally, either party may initiate non-binding arbitration within 45 days after the service of the written notice.
 - b. An arbitrator shall be selected in the following manner:
 - (1) The parties shall obtain a list of qualified arbitrators from U.S. Arbitration and Mediation of Oregon or any other arbitration panel agreed to by the parties.

- (2) Each party, in turn, shall strike one name from the list, until one name remains. The parties shall draw lots to determine which party makes the first strike.
 - c. Upon agreement by both parties, the arbitration proceeding shall be binding.
 - d. The parties shall divide the cost of the arbitration proceeding equally between them.
 4. Upon conclusion of the arbitration proceeding, if the parties have not elected to be bound by that result, either party may initiate an action in the United States District Court for the District of Oregon as provided in Section 16 of this Compact.
 5. Expedited Procedure.
 - a. If the State, in good faith, believes that there is an immediate threat to the honesty, integrity, fairness and security of the Tribal Gaming Operations, and believes that substantial harm will result during the time that would pass if the procedure established in paragraphs 1 to 3 of this subsection is followed, the State may give written notice to the Tribes. The written notice shall describe the factual basis for the State's concern.
 - b. The parties shall confer within five (5) days after the Tribes receive the notice.
 - c. If the State's concern is not resolved informally, the State may initiate an action in the United States District Court for the District of Oregon as provided in Section 16 of this Compact.
 - d. An immediate threat to the honesty, integrity, fairness and security of the Tribal Gaming Operations includes but is not limited to the following examples:
 - (1) A criminal indictment is filed against any contractor, owner or key employee of a contractor; or
 - (2) A criminal organization or members of a criminal organization have obtained an ownership interest in a contractor, or a member of a criminal organization has become a key employee of a contractor; or
 - (3) A malfunction of gaming equipment hardware or software causes patrons of the Gaming Facility to lose money, and that loss is directly related to the equipment malfunction.
 6. The provisions of this section, shall provide the exclusive method for resolving disputes as to the Tribes' decisions concerning hiring or contracting under Section 7 of this Compact, or concerning operation of the Gaming Facility.

SECTION 7. LICENSING AND CONTRACTING

A. Licensing Of Gaming Employees.

1. All Primary Management Officials and High Security Employees to be employed in the Gaming Facility shall be licensed by the Tribes in accordance with the provisions of this Compact.

2. All prospective employees, Primary Management Officials, High Security Employees and Low Security Employees, shall provide to the Tribes any required application fees and the following information:
 - a. Full name, including any aliases by which the applicant has been known;
 - b. Social security number;
 - c. Date and place of birth;
 - d. Residential addresses for the past ten years;
 - e. Employment history for the past ten years;
 - f. Driver's license number;
 - g. All licenses issued and disciplinary actions taken by any State agency or Tribal gaming agency;
 - h. All criminal proceedings, except for minor traffic offenses, to which the applicant has been a party;
 - i. A current photograph;
 - j. Any other information required by the Tribes.
3. In addition to the requirements of paragraph 2 of this subsection, prospective High Security Employees and Primary Management Officials shall provide a set of fingerprints.
4. Applicant Information and Investigation.
 - a. The Tribes shall forward the applicant information to the State, along with the State required portion of the application fee as described in subsection C of this section. The Oregon State Police shall conduct a background investigation on all prospective Primary Management Officials and High Security Employees, and provide a written report to the Tribal Gaming Regulatory Commission within a reasonable period of time, but in no event shall such background checks exceed 30 days without notice to and consent of the Tribes.
 - b. The Tribes may request the State to perform a background investigation on any prospective Low Security Employee. Upon such request, the Oregon State Police shall conduct a background check as provided in subparagraph a of this paragraph.
5. Denial of Gaming License.
 - a. The Tribes shall deny a gaming license to any prospective High Security Employee or Primary Management Official who has committed any of the following crimes under the law of any jurisdiction, or is the subject of a civil judgment in any jurisdiction that is based upon facts that constitute the elements of any of the following crimes:
 - (1) Aggravated murder; murder in the first degree;
 - (2) Assault (in the first or second degree);

- (3) Kidnapping in the first degree;
- (4) Rape in the first degree;
- (5) Sodomy in the first or second degree;
- (6) Unlawful sexual penetration in the first degree;
- (7) Sexual abuse in the first or second degree;
- (8) Any crime related to child pornography;
- (9) Forgery in the first degree;
- (10) Possession of a forgery device;
- (11) Unlawful factoring of a credit card transaction;
- (12) Falsifying business records;
- (13) Sports bribery or receiving a sports bribe;
- (14) Making a false financial statement;
- (15) Obtaining execution of a document by deception;
- (16) Theft by extortion;
- (17) Arson in the first degree;
- (18) Computer crime;
- (19) Robbery in the first or second degree;
- (20) Bribery;
- (21) Bribing a witness;
- (22) Perjury;
- (23) Any theft accomplished by manipulation of records; e.g., embezzlement;
- (24) Promotion of unlawful gambling;
- (25) Conviction of any crime if the original charge was promotion of unlawful gambling, and a lesser charge was plea-bargained; or
- (26) Tax evasion.

- b. The Tribes shall deny a gaming license to any prospective High Security Employee or Primary Management Official who has associated in a business relationship, whether as a partner, joint venturer or employer, with any other person who has been convicted of one of the crimes listed in subparagraph a of this paragraph. The Tribes shall deny a gaming license to any prospective High Security Employee or Primary Management Official who was employed by any other person who has been convicted of one of the crimes listed in subparagraph a of this paragraph, if the prospective employee or official was in any way involved in or aware of the criminal activity as it occurred.
- c. The Tribes shall deny a gaming license to any prospective High Security Employee or Primary Management Official if:
 - (1) The applicant fails to disclose any material fact to the Tribes or the State or their authorized agents during a background or security investigation; or
 - (2) The applicant misstates or falsifies a material fact to the Tribes or the State during a background or security investigation.
- d. The Tribes may deny a gaming license to any prospective High Security Employee or Primary Management Official for any reason the Tribes deem sufficient. Such decisions to grant or deny a gaming license shall be consistent with the principles set forth in subsection A of Section 6 of this Compact. In determining whether to deny a gaming license to any prospective High Security Employee or Primary Management Official, the factors to be considered by the Tribes shall include, but need not be limited to, the following:

- (1) The applicant has been convicted of any crime (other than a crime listed in subparagraph a of this paragraph) in any jurisdiction; or
 - (2) The applicant has associated with persons or businesses of known criminal background, or persons of disreputable character, that may adversely affect the general credibility, honesty, integrity, security, fairness or reputation of the Tribes' Gaming Operation; or
 - (3) There is any aspect of the applicant's past conduct that the Tribes determine would adversely affect the honesty, integrity, security or fairness of Tribes' Gaming Operation.
- e. The Tribes shall deny employment to any prospective Low Security Employee who does not meet the criteria established in sub-subparagraphs (1) to (5) of subparagraph A of this paragraph. The Tribes may deny employment to any Low Security Employee applicant who does not meet the criteria established in sub-subparagraphs (6) to (26) of subparagraph A of this paragraph or in subparagraphs c or d of this paragraph. Decisions to grant or deny employment shall be consistent with the principles set forth in subsection A of Section 6 of this Compact.
- f. The Tribes may reject an application if the applicant has not provided all of the information requested in the application.
6. Denial of employment or a license by the Tribes is final.
7. Waiver of Disqualifying Criteria.
- a. If a prospective Primary Management Official, High Security Employee or Low Security Employee is disqualified for licensing or employment under the provisions of paragraph 5 above, and the Tribes believe that there are mitigating circumstances that justify waiver of the disqualifying factor, the Tribes may give written notice to the State asking to meet and confer concerning waiver of the disqualification. The Tribes and the State shall meet within 15 days after written notice is given.
 - b. In order to waive disqualification of licensing or employment of any prospective Primary Management Official, High Security Employee or Low Security Employee, both the Tribes and the State must agree on the waiver.
 - c. Waiver of disqualification of licensing or employment may be based on one or more of the following circumstances:
 - (1) Passage of time since conviction of a crime;
 - (2) The applicant's age at the time of conviction;
 - (3) The severity of the offense committed;
 - (4) The overall criminal record of the applicant;
 - (5) The applicant's present reputation and standing in the community;
 - (6) The nature of the position for which the application is made.

8. Temporary Licensing Of Employees.
 - a. The Tribes may issue a temporary license to High Security Employees 30 days after submission of the application to the Oregon State Police. The temporary license shall expire and become void upon completion of the background check award or denial of a permanent license.
 - b. The Tribes may employ Low Security Employees on probation ten (10) days after submission of the application to the Oregon State Police. Any Low Security Employee shall be subject to immediate termination during probation if the Tribes determine that the employee does not meet the criteria established in sub-subparagraphs (1) to (5) of subparagraph a of paragraph 5 above.
9. Background Investigation During Employment. The Tribes may request the State to conduct additional background investigations of any gaming employee at any time during the term of employment. The State shall report to the Tribes any cause for the dismissal of any employee under the criteria established in paragraph 5 above, and furnish the Tribes with copies of all relevant information. The Tribes shall review the State's report and supporting materials and if the Tribes concludes that good cause for dismissal is shown under the criteria established in paragraph 5 above, the subject employee may be dismissed. An employee shall be dismissed if the Tribes would have been required to deny employment to that employee under the provisions of paragraph 5 above.
10. Duration Of License And Renewal. Any employee license shall be effective for not more than three (3) years from the date of issue except that a licensed employee who has applied for renewal may continue to be employed under the expired license until final action is taken on the renewal application in accordance with the provisions of paragraphs 2 to 5 above. Applicants for renewal shall provide a renewal fee and updated information to the Tribes but will not be required to resubmit historical data already provided.
11. Revocation Of License. The Tribes may revoke the license of any employee pursuant to policies determined by the Tribes. The Tribes shall revoke the license of any employee upon determination that an event has occurred that would have prohibited the Tribes from hiring the employee under the criteria described in paragraph 5 above.
12. The Tribes shall maintain a procedural manual for employees that includes rules and regulations of conduct and disciplinary standards for breach of procedures.

B. Contracts With Manufacturers and Suppliers.

1. The Tribes shall contract with all managers, manufacturers or suppliers of goods or services related to the play of Class III games authorized by this Compact before conducting any business related to Class III games.
2. The Tribes shall submit any proposed Class III Gaming Contract to the State for review and comment and for a background investigation of the contract applicant.
3. A background investigation may be conducted by the State on all Class III Gaming Contract applicants or contractors. The level of investigation will be determined by whether the individual procurement is classified as a Major Procurement, Minor Procurement or Sensitive Procurement. The level of investigation for a Major

Procurement and Sensitive Procurement shall be more intense than that for a Minor Procurement.

4. All Class III Gaming Contract applicants, and any owner or key employee of an applicant, shall provide all personal and business information required by the State to conduct its background investigation.
5. The Tribes shall not enter into any Class III Gaming Contract that does not grant the State or the Tribes access to the contractor's business and financial records.
6. Criteria For Denial of Contract Application.
 - a. The Tribes shall deny a Class III Gaming Contract application for a Major or Sensitive Procurement if the applicant, or any owner or key employee of the applicant has been convicted of a crime, or is the subject of a civil judgment based upon facts that constitute the elements of a crime described in subparagraph a of paragraph 5 of subsection A above.
 - b. The Tribes shall deny a Class III Gaming Contract application for a Major or Sensitive Procurement if the applicant, or any owner or key employee of the applicant, has associated in a business relationship, whether as a partner, joint venturer or employer, with any other person who has been convicted of one of the crimes listed in subparagraph a of paragraph 5 of subsection A above. The Tribes shall deny a Class III Gaming Contract for a Major or Sensitive Procurement if the applicant, or any owner or key employee of the applicant, was employed by any other person who has been convicted of one of the crimes listed in subparagraph a of paragraph 5 of subsection A of this section, if the applicant, owner or key employee was in any way involved in or aware of the criminal activity as it occurred.
 - c. The Tribes shall deny a Class III Gaming Contract application for a Minor Procurement if the applicant, or any owner or key employee of the applicant, has been convicted of a crime described in sub-subparagraphs (1) to (5) of subparagraph a of paragraph 5 of subsection A of this section, or is the subject of a civil judgment based upon facts that constitute the elements of a crime described in sub-subparagraphs (1) to (5) of subparagraph a of paragraph 5 of subsection A of this section.
 - d. The Tribes shall deny a Class III Gaming Contract application if:
 - (1) The applicant fails to disclose any material fact to the Tribes or the State or their authorized agents during a background or security investigation; or
 - (2) The applicant misstates or falsifies a material fact to the Tribes or the State during a background or security investigation.
 - e. The Tribes may deny any Class III Gaming Contract application for any reason the Tribes deem sufficient. Such decisions to deny a Class III Gaming Contract application shall be consistent with the principles set forth in subsection A of Section 6 of this Compact. In determining whether to deny a Class III Gaming Contract application, the factors to be considered by the Tribes shall include, but need not be limited to the reasons described in subparagraph d of paragraph 5 of subsection A of this section.
 - f. The Tribes may deny any Class III Gaming Contract application if:

- (1) A person who is unqualified or disqualified to be a Class III Gaming Contractor owns, is an agent of or has any other interest in the applicant, regardless of the qualifications of the person who seeks approval as a contractor; or
 - (2) The applicant demonstrates inadequate financing for the business proposed under the type of contract for which application is made. In determining whether financing is adequate, the Tribes shall consider whether financing is from a source that meets the qualifications of paragraph 5 of subsection A of this section, or paragraph 6 of subsection B of this section and whether that financing is in an amount to ensure the likelihood of success in the performance of the contractor's duties and responsibilities; or
 - (3) The applicant or its employees fail to demonstrate business ability and experience to establish, operate and maintain the business for the type of contract for which the application is made.
- g. In evaluating whether to deny a contract related to Class III gaming based on subparagraph e or f of this subsection, the Tribes may consider the following factors:
- (1) The nature and severity of the conduct that constituted the offense or crime;
 - (2) The time that has passed since satisfactory completion of the sentence, probation or payment of the fine imposed;
 - (3) The number of offenses or crimes; and
 - (4) Any extenuating circumstances that enhance or reduce the impact of the offense or crime on the security, integrity, honesty and fairness of the Tribal Gaming Operation.
- h. (1) No person applying for a Class III Gaming Contract shall own, manufacture, possess, operate, own an interest in or gain income or reimbursement in any manner from video gaming devices in any jurisdiction unless the devices are approved and certified by another state lottery, gambling or gaming control agency, Indian Tribe, National Indian Gaming Commission, or foreign country, that has jurisdiction to approve that activity, and such ownership, manufacture, possession, operation, or income is disclosed to the Tribes.
- (2) No person applying for a Class III Gaming Contract shall own, operate, own an interest in or gain income or reimbursement in any manner from off-track pari-mutuel wagering in any jurisdiction unless that activity is approved and certified by another state racing regulatory body, gambling or gaming control agency, Indian Tribe, National Indian Gaming Commission, or foreign country, that has jurisdiction to approve that activity, and such ownership, operation, or income is disclosed to the Tribes.
- i. The Tribes may reject an application if the applicant has not provided all of the information requested in the application.

7. Contractor Reporting Requirements.

- a. All contractors shall submit to the Tribes and the State any financial and operating data requested by the Tribes or the State.
- b. The Tribes and the State each may specify the frequency and a uniform format for the submission of such data.
- c. The Tribes, State or their agents reserve the right to examine contractor tax records and the detailed records from which the tax reports are compiled.

C. Fees For Approval of Employment Licenses and Contracts.

1. The State shall be reimbursed its costs for approval of employees and licenses, in accordance with the terms of this Compact.
2. The fees for State approval of licenses and contracts shall be set pursuant to a Memorandum of Understanding between the parties to be negotiated annually.
3. Should actual costs incurred by the State exceed the fees agreed to by the parties in the annual Memorandum of Understanding, the State will assess those additional costs to the applicants during or after the investigation. The applicant is required to pay the investigation fee in full prior to issuance of the contract or license except that interim contracts or licenses shall be issued for the period of time that a dispute is pending as contemplated at paragraph 4 of this subsection.
4. Should the State and the Tribes fail to agree to fees in the Memorandum of Understanding, the dispute shall be resolved pursuant to Section 6 of this Compact.

D. Management Contracts.

1. The Primary Management Official shall provide the State at all times with a current copy of any management agreement with the Tribes that allows it to conduct Class III gaming on the Tribal trust land.
2. The Primary Management Official shall furnish to the Tribes and the State complete information pertaining to any transfer of controlling interest in the management company at least 30 days before such change; or, if the Primary Management Official is not a party to the transaction effecting such change of ownership or interests, immediately upon acquiring knowledge of such change or any contemplated change.

SECTION 8. REGULATIONS FOR OPERATION AND MANAGEMENT OF CLASS III GAMES.

- A. Compliance With Regulations. The acquisition, use and operation of all video lottery games of chance, keno and off-track parimutuel wagering authorized under this Compact shall be in accordance with the rules and regulations set forth in Appendices A, B and C. Appendices A, B and C are hereby incorporated into and made a part of this Compact.
- B. Identification Badges. The Tribes shall require all employees to wear, in plain view, identification badges issued by the Tribes that include photo and name, with the exception of employees assigned to covert compliance duties, who shall only be required to have on their person an identification badge.

- C. No Credit Extended. All gaming shall be conducted on a cash basis. Except as provided herein, no person shall be extended credit for gaming nor shall the Tribes permit any person or organization to offer such credit for a fee. This restriction shall not apply to credits won by players who activate play on video games of chance after inserting coins or currency into the games. This section shall not restrict the right of the Tribes or any other person to offer check cashing or install and accept bank card or credit card transactions in the same manner as is permitted at any retail business in the State.
- D. Prohibition on Attendance and Play of Minors. No person under the age of 21 shall be allowed to play any video lottery game of chance operated under this Compact. If any person under the age of 21 plays and otherwise qualifies to win any video lottery prize or compensation, the prize or compensation shall not be paid. No person under the age of 18 shall be allowed to play keno or place or collect pari-mutuel bets.
- E. Prohibition of Firearms. With the exception of Federal, State, County or Tribal law enforcement agents or officers and gaming security officers pursuant to a Memorandum of Understanding between the Tribes and State, no person shall possess firearms within the Gaming Facility.
- F. Service of Alcohol. No alcohol shall be served in the Gaming Facility unless authorized by the Tribes as permitted by federal law. Currently, the Klamath Tribes does not legally permit the sale of alcohol on its Indian lands. If the sale of alcohol is authorized by the Tribes at the Gaming Facility, the Tribes shall notify the State. The Tribes and the State shall enter into a Memorandum of Understanding that will establish which State laws and Oregon Liquor Control Commission licensing regulations shall be applied to the sale or service of alcoholic beverages at the Gaming Facility. Nothing in this subsection shall permit the State to impose taxes on the sale of alcoholic beverages by the Tribes. If alcohol is served in the Gaming Facility, no alcoholic beverages may be served free or at a reduced price to any patron of the Gaming Facility as an inducement to participate in any gaming.
- G. Liability for Damage to Persons and Property. During the term of this Compact, the Tribes shall maintain public liability insurance with limits of not less than \$250,000 for one person and \$2,000,000 for any one occurrence for any bodily injury or property damage. The Tribes' insurance policy shall have an endorsement providing that the insurer may not invoke Tribal sovereign immunity up to the limits of the policy. The Tribes shall indemnify, defend and hold harmless the State, its officers, directors, employees and agents from and against any claims, damages, losses or expenses asserted against or suffered or incurred by the State or its officers, directors, employees and agents (except as may be the result of their own negligence) based upon or arising out of any bodily injury or property damage resulting or claimed to result in whole or in part from any act or omission of the Tribes relating to the inspection of any gaming or gaming related facility pursuant to this Compact.

SECTION 9. INSPECTION AND ENFORCEMENT OF GAMING REGULATIONS

- A. Tribal Gaming Regulatory Commission.
 - 1. The primary responsibility for the regulation of the Gaming Operation authorized by this Compact, and for enforcement of this Compact within Klamath Tribes Indian lands, shall be that of the Tribal Gaming Regulatory Commission. The Tribal Gaming Regulatory Commission's role shall include the promulgation and enforcement of rules and regulations to provide for the following:
 - a. Ensure compliance with all relevant laws;
 - b. Ensure the physical safety of patrons in, and of personnel employed by, the establishment;

- c. Safeguard the assets transported to and from the gaming facility and cashier's cage department;
 - d. Protect patrons and property from illegal activity;
 - e. Detain persons suspected of crimes for the purpose of notifying the law enforcement authorities;
 - f. Record any and all unusual occurrences within the gaming facility in indelible ink in a bound notebook from which pages cannot be removed, and each side of each page of which is sequentially numbered, as follows:
 - (1) The assigned sequential number of the incident;
 - (2) The date;
 - (3) The time;
 - (4) The nature of the incident;
 - (5) The person involved in the incident; and
 - (6) The security employee assigned.
 - g. Maintain logs relating to surveillance, security, cashier's cage, credit, machine (showing when video machines opened) and machine location;
 - h. Establish and maintain an updated list of persons barred from the Gaming Facility either because of their criminal history or because their association with career offenders or career offender organizations poses a threat to the honesty, security and integrity of Gaming Operations, and furnish that list to the State as updated;
 - i. Obtain an annual audit by a Certified Public Accountant;
 - j. Maintain a closed circuit television system in the cash room of the Gaming Facility and provide copies of floor plan and TV system to the State;
 - k. Maintain a cashier's cage in accordance with industry standards for security;
 - l. Employ and train sufficient mutuel clerks;
 - m. Employ and train sufficient security personnel; and
 - n. Subject to State review and approval, establish a method for resolving disputes with players.
2. Reporting of Violations. A Tribal representative of the Tribal Gaming Regulatory Commission shall inspect the Gaming Facility at random during all hours of Gaming Operation, and shall have immediate access to any and all areas of the Gaming Operation for the purpose of ensuring compliance with the provisions of this Compact and Tribal Ordinances. Any violations of the provisions of this Compact, or of Tribal Ordinances by the Tribal Gaming Operation, a gaming employee, or any person on the premises whether or not associated with the Tribal Gaming Operation,

shall be reported immediately to the Tribal Gaming Regulatory Commission and reported to the State within 72 hours of the time the violation was noted.

3. Investigations and Sanctions. The Tribal Gaming Regulatory Commission shall investigate any reported violation of the Compact provisions and shall require the Tribal Gaming Operation to correct the violation upon such terms and conditions as the Tribal Gaming Regulatory Commission determines to be necessary. The Tribal Gaming Regulatory Commission shall be empowered by Tribal Ordinance to impose fines and other sanctions within the jurisdiction of the Tribes against a gaming employee, or any other person directly or indirectly involved in, or benefitting from the gaming operation. The State shall make all reasonable efforts to assist the Tribes in enforcing sanctions imposed by the Tribal Gaming Regulatory Commission against non-Indians.
4. Reporting to State. The Tribal Gaming Regulatory Commission shall forward copies of all completed investigation reports and final dispositions to the State on a continuing basis. If requested by the Tribal Gaming Regulatory Commission, the State shall assist in any investigation initiated by the Tribal Gaming Regulatory Commission, and provide other requested services to ensure proper compliance with the provisions of this Compact, Tribal Ordinances and Regulations or applicable laws of the State.

B. State Enforcement of Compact Provisions.

1. Monitoring. The State is authorized hereby to monitor the Tribal Gaming Operation to ensure that the operation is conducted in compliance with the provisions of this Compact. The Tribes may request removal of a State law enforcement officer or monitor on the basis of malfeasance, abuse of authority or conduct disrespectful of Tribal institutions or culture. Effective performance of the officer's or monitor's duties shall not be a basis for disapproval. The State shall have free and unrestricted access to all areas of the Gaming Facility during normal operating hours without giving prior notice to the Tribal Gaming Operation.
2. Access to Records. The State is authorized hereby to review and copy, during normal business hours, and upon reasonable notice, all records maintained by the Tribal Gaming Operation; provided, that any copy thereof and any information derived therefrom, shall be deemed confidential and proprietary financial information of the Tribes to the extent provided under ORS 192.410 to 192.505. Any records or copies removed from the premises shall be returned to the Tribes after use. Only the State employee(s) formally designated by the State, and approved by the Tribes, shall be authorized to access Tribal gaming records pursuant to this subsection. Nothing in this subsection precludes the State or the Tribes from disclosing information subject to the Rules of Civil Procedure or Evidence in connection with litigation, a prosecution or a criminal investigation.
3. Investigation Reports. After completion of any inspection or investigation report, the State shall provide a copy of the report to the Tribal Gaming Regulatory Commission.

SECTION 10. STATE ASSESSMENT OF COSTS FOR OVERSIGHT

- A. Imposition of Assessment for State Law Enforcement and Regulatory Expenditures. The State shall make annually an assessment sufficient to compensate the State for the reasonable and necessary costs of regulating Gaming Operations and conducting state law enforcement investigations pursuant to this Compact. The State shall assess only those costs related to gaming. The State acknowledges expressly herein that the extent of oversight is

related directly to the size and scope of gaming. Such assessment shall include any costs of fringe benefits for personnel. Fees received with respect to the submission of gaming licenses and contracts pursuant to subsection C of Section 7 of this Compact shall be subtracted from the amount of the assessment.

- B. Procedure for Assessments. The procedure for assessments shall be determined and agreed upon annually in a Memorandum of Understanding between the parties to this Compact. Such agreement shall include provisions for adjustments of excess assessments and underpayment of costs.
- C. If the parties fail to agree to the assessments under this section, such dispute shall be resolved pursuant to Section 16 of this Compact.
- D. If local government officials believe that an off-Indian land law enforcement problem has been created by the existence of the Gaming Facility, the Tribes shall meet with the mayor or county commission of the affected government to develop appropriate measures to alleviate the problem. The burden shall be on the local government officials to demonstrate that the law enforcement problem is directly attributable to the existence of the Gaming Facility. If an off-Indian land law enforcement problem has been created by the existence of the Gaming Facility, the Tribes shall take all reasonably necessary steps to alleviate the problem. If the Tribes and local government officials are unable to agree on appropriate measures to alleviate the problem, the State may initiate the dispute resolution process established in Section 6 of this Compact.

SECTION 11. APPLICATION OF REGULATORY STANDARDS

- A. Health, Safety and Environmental Standards. Tribal Ordinances and Regulations governing health, safety and environmental standards applicable to the Gaming Facility shall be at least as rigorous as standards imposed by the laws and regulations of the State. The Tribes agree to cooperate with any State agency generally responsible for enforcement of such health, safety and environmental standards outside Indian lands in order to assure compliance with such standards within the Gaming Facility. However, the Tribes shall have the exclusive regulatory jurisdiction over the enforcement of health and safety standards applicable to the Gaming Facility. The Tribes shall use their regulatory jurisdiction to assure that health, safety and environmental standards are met.
- B. Transportation Issues.
 - 1. The Tribes shall provide a traffic impact study, prepared by a qualified traffic engineer registered in the State of Oregon. The study shall evaluate the effect of the proposed Gaming Facility, and any related development proposed by the Tribes as part of the same site, on the state highway system and any city street or county road that may be used by customers as access to the Gaming Facility. The traffic impact study shall determine the impacts of the proposed Gaming Facility and related development on the level of service of the affected highway(s), road(s) or street(s). If the traffic impact study indicates the need for major highway improvements for any phase of development, the Tribes shall provide a master plan that includes a preliminary design of the necessary improvements and a proposed site plan for the complete development.
 - 2. A determination whether the Gaming Facility shall be served directly by a state highway or by a city street or county road shall be made by the State and appropriate local officials on a consistent basis with other proposed developments.
 - a. If the Gaming Facility is to be served directly by a state highway, the Tribes shall apply for and obtain a road approach permit under Oregon Administrative

Rules, Chapter 734, Division 50, and shall construct the approach and any other necessary improvements in accordance with that permit. A road approach permit shall not be denied because of the proposed use of the Tribes' land. The Tribes shall provide and maintain access from its Gaming Facility onto the highway that is adequate to meet the standards of the Oregon Department of Transportation, or shall enter into agreements with the Oregon Department of Transportation for the provision of such access by the State. The allocation of costs shall be as provided in Oregon Administrative Rule 734-50-020(1), which provides that the costs of constructing the road approach shall be borne by the permit applicant.

- b. If the Gaming Facility is to be served directly by a city street or county road, and indirectly by a state highway, the Tribes shall comply with applicable city or county street or road improvement requirements and satisfying any requirements the State imposes on the county or city relating to access to a state highway.
 3. If the Tribes plans additional development of the Gaming Facility site, the Tribes shall advise the appropriate state or local transportation planning officials of the planned development by submitting a master plan. In planning street, road or highway improvements, the Tribes, state and local transportation planning officials shall use the master plan. Construction of street, road or highway improvements may be completed in phases if practicable.
 4. Traffic improvements shall be those necessary to maintain the level of service of the affected highway(s), road(s) or street(s) and to provide safe access to and from the Gaming Facility. For state highways, traffic improvements shall be consistent with the requirements of the State Highway Plan, including improvements necessary to mitigate traffic congestion and to conform to the Oregon Department of Transportation access management policies. If the Oregon Department of Transportation determines that highway improvements are necessary, the department shall confer with the Tribes concerning the planning, design and construction of those improvements.
 5. The Tribes shall pay the cost of street, road or highway improvements determined to be necessary on the basis of the traffic impact study and Oregon Department of Transportation requirements. If the Tribes disputes the amount of costs to be paid by the Tribes, the Tribes may initiate the dispute resolution procedure established under Section 16 of this compact.
- C. The Tribes shall report to the Oregon Department of Revenue, gambling winnings paid to any person subject to Oregon Personal Income Tax on those winnings whenever the Tribes would be required to report those winnings to the Internal Revenue Service. The information shall be reported in the manner required by the Oregon Department of Revenue.

SECTION 12. EFFECTIVE DATE; TERMINATION; AMENDMENTS

- A. Effective Date. This Compact shall become effective upon execution by the State and by the Tribes and appropriate federal approval.
- B. Termination. This Compact shall remain in effect until such time as:
 1. This Compact is terminated by written agreement of both parties;
 2. The State amends its Constitution or laws to criminally prohibit, within the State, conduct of all of the Class III gaming authorized by this Compact, whether for profit or not for profit;

3. A court of competent authority makes a final determination that all of the Class III games authorized by this Compact are criminally prohibited under the law of the State and the determination has become final and enforceable;
4. The federal government amends or repeals IGRA so that a Compact is no longer required for the Tribes' exercise of Class III gaming; or
5. Either party materially breaches this Compact; but only after the dispute resolution process set forth in Section 16 of this Compact has been exhausted and the breach has continued for a period of sixty (60) days after written notice following the conclusion of the dispute resolution process.

C. Automatic Amendment.

1. If a type of Class III game authorized under Section 4 of this Compact is criminally prohibited by an amendment to State statute or Constitution, this Compact shall no longer authorize the Tribes to engage in that type of Class III game and any provisions in this Compact authorizing such gaming shall be void and of no effect.
2. If a court decides that a Class III game authorized under this Compact is criminally prohibited, this Compact shall no longer authorize the Tribes to engage in that type of Class III game and any provisions in this Compact authorizing such gaming shall be void and of no effect, but the Tribes shall be required to cease operating that Class III game only if and under the same circumstances and conditions as the State or any other affected person must cease operating the corresponding game under the court's decision.

D. Amendments.

1. Except as provided in subsection C of this section, this Compact shall not be amended for a period of three years after the effective date of this Compact, unless one of the following conditions occur:
 - a. The State becomes a party to another Tribal-State Compact that authorizes a tribe other than the Klamath Tribes to engage in any Class III gaming activity or scope of gaming activity not permitted under the terms of Section 4 of this Compact;
 - b. The State amends State statute or Constitution to expand the type of Class III gaming permitted in the State for any purpose by any person, organization or entity;
 - c. The State amends any rule or regulation that corresponds specifically to Appendices A, B or C of this Compact, but in such case this Compact shall be subject to amendment only to the extent of the specific rule or regulation.
 - d. The parties to this Compact agree in writing to enter amendment negotiations.
 - e. The Tribes notifies the State that the fee-to-trust process will not be completed before December 31, 1995, as provided in Section 13 F. Any negotiation under this subparagraph shall be limited to extension of the date for completion of the fee-to-trust process.
2. Paragraph (1) of this subsection does not require the State to renegotiate those terms of this Compact that apply to the forms of gaming authorized by Section 4 of this

Compact, except to the extent that the State voluntarily consents to such renegotiation or as is otherwise provided for in this Compact.

3. Pursuant to paragraph 1 of subsection D above, the State or the Tribes may, by appropriate and lawful means, request negotiations to amend, replace or repeal this Compact. In the event of a request for renegotiation or the negotiation of a new Compact, this Compact shall remain in effect until renegotiated or replaced, unless sooner terminated under subsection B of Section 12. Such request to renegotiate shall be in writing and shall be sent by certified mail to the Governor of the State or the Chairman of the Klamath Tribes at the appropriate office identified in Section 14 below. If a request is made by the Tribes, it shall be treated as a request to negotiate pursuant to IGRA. All procedures and remedies available under IGRA shall thereafter apply with the exception that the 180 day period for negotiation set forth at 25 U.S.C. § 2710(d) shall be 100 days.

SECTION 13. DISCLAIMERS AND WAIVERS

- A. Gaming at Another Location or Facility. Except as provided in this Compact, The Tribes hereby waive any right it may have under IGRA to negotiate a Compact for Class III gaming at any other location or facility for a period of three (3) years from the effective date of this Compact.
- B. Status of Class III Gaming. Nothing in this Compact shall be deemed to affect the operation by the Tribes of any Class II gaming as defined in the Act or to confer upon the State any jurisdiction over such Class II gaming conducted by the Tribes.
- C. Prohibition on Taxation by the State. Nothing in this Compact shall be deemed to authorize the State to impose any tax, fee, charge or assessment upon the Tribes or any Tribal Gaming Operation except for charges expressly authorized in accordance with this Compact.
- D. Preservation of Tribal Self-Government. Nothing in this Compact shall be deemed to authorize the State to regulate in any manner the government of the Tribes, including the Tribal Gaming Regulatory Commission, or to interfere in any manner with the Tribes' selection of its governmental officers including members of the Tribal Gaming Regulatory Commission. No licensing or registration requirement contemplated by this Compact shall be applicable to such officers with respect to their capacity as officers of the Tribes.
- E. This Compact is exclusively for the benefit of and governs only the respective authorities of and the relationship between the Tribes and the State. Nothing in this Compact shall be construed as creating or granting any rights to any third party, or as establishing any objection or defense for any third party to any charge, offense or prosecution.
- F. Location Eligible for Class III Gaming. The State has negotiated and executed this Compact pursuant to the process established under 25 USC § 2710(d)(3), with knowledge that the Gaming Location identified in Exhibit II is not currently held in trust by the United States for the benefit of the Klamath Tribes. This compact is effective only at the time the United States takes the land described in Exhibit II to this Compact into trust for the Tribes. Operation of this Compact is dependent upon the described land being taken into trust as a result of the Bureau of Indian Affairs fee-to-trust process. Operation of this Compact is further dependent upon the described land being taken into trust no later than December 31, 1995. Operation of this Compact is further dependent upon a determination by the Secretary of the Interior, in connection with review and approval of this Compact, that the Gaming Location is eligible to be used by the Tribes for the purpose of gaming as described in 25 USC § 2719. If at any time it is determined by the Secretary or other competent authority that the Gaming Location is not eligible to be used by the Tribes for the purpose of gaming

as described in 25 USC § 2719, this Compact shall no longer authorize gaming at that location.

SECTION 14. NOTICES

All notices required or authorized to be served to the Oregon State Police shall be served by first class mail at the following address:

Lieutenant
Oregon State Police
Lottery Security Section
Salem, OR 97310

All other notices required or authorized to be served shall be served by first class mail at the following addresses:

Legal Counsel to the Governor
Office of the Governor
254 State Capitol
Salem, OR 97310

Chairman, Klamath Tribes
P.O. Box 436
Chiloquin, OR. 97624

SECTION 15. SEVERABILITY

In the event that any section or provision of this Compact is held invalid, or its application to any particular activity is held invalid, it is the intent of the parties that the remaining sections of this Compact and the remaining applications of such section or provision shall continue in full force and effect.

SECTION 16. DISPUTE RESOLUTION

- A. Except as specifically provided in Section 6 of this Compact, at the discretion of either party, in the event either party believes that the other party has failed to comply with any requirement of the Compact, that party may invoke the following dispute resolution procedure in order to foster cooperation and avoid the costs of litigation:
1. The party asserting noncompliance shall serve written notice on the other party in the manner provided in Section 14. The notice shall identify the specific provision of the Compact alleged to have been violated and shall specify the factual basis for the alleged noncompliance. The State and the Tribes shall thereafter meet within 30 days in an effort to resolve the dispute.
 2. In the event the dispute is not resolved to the satisfaction of the parties within 90 days after service of notice, either party may initiate an action against the other party in the United States District Court for the District of Oregon to interpret or enforce the provisions of this Compact. In the event that the federal court declines jurisdiction, an action can be filed in a State or Tribal court of competent jurisdiction to interpret or enforce the provisions of this Compact.
- B. Nothing in subsection A of this section shall be construed to waive, limit or restrict any remedy that is otherwise available to either party to enforce the provisions of this Compact or limit or restrict the ability of the parties to pursue, by mutual agreement, alternative methods of dispute resolution.
- C. With respect to gaming not authorized by this Compact, nothing in this Compact shall be construed to limit the authority of the state or the federal government to take immediate

action to enforce and prosecute the gambling laws of the State and the United States pursuant to 18 USC § 1166 (Section 23 of IGRA).

SECTION 17. INTEGRATION

This Compact is the entire and complete expression of the parties' intent.

EXECUTED as of the date and year above-written.

Appendix A

I. VIDEO LOTTERY GAMES

APPLICATION FOR CERTIFICATION OF A VIDEO LOTTERY TERMINAL

Section 177-100-070

- (1) A manufacturer shall not distribute a video lottery game or terminal for placement at the Gaming Facility unless the manufacturer and the game have been approved and the terminal has been certified by the State of Oregon. Only approved manufacturers may apply for certification of a video lottery terminal. Any manufacturer approved for Oregon State Lottery shall automatically be approved for the Tribes' gaming enterprise.
- (2) The manufacturer shall supply the Tribes and the State with a guideline and time table for accomplishing tasks involved in the acceptance and testing of the video lottery terminals. This includes all system functionality and communication of all information to and from the video lottery terminals, if any.
- (3) The manufacturer must provide a person to work with the Tribes and the State as needed in establishing, planning, and executing acceptance tests. Manufacturer assistance may also be requested in trouble-shooting communication and technical problems that are discovered when video lottery terminals are initially installed.
- (4) The manufacturer must submit terminal illustrations, schematics, block diagrams, circuit analysis, technical and operation manuals, program source codes and hexadecimal dumps (the compiled computer program represented in base 16 format), and any other information required by the Tribes and the State for purposes of analyzing and testing the video lottery terminal.
- (5) Testing of video lottery terminals will require working models of a video lottery terminal, associated required equipment, documentation described above to be transported to locations the Tribes and the State designate for testing, examination and analysis. The manufacturer shall pay all costs of any testing, examination, analysis, and transportation of the video lottery terminals. The testing, examination, and analysis of the video lottery terminals may include entire dismantling of the video lottery terminal and some tests that may result in damage or destruction to one or more electronic components of the video lottery terminal. The Tribes or the State may require that the manufacturer provide

specialized equipment or the services of an independent technical expert to test the video lottery terminal.

- (6) All video lottery terminal manufacturers must submit all hardware, software, and test equipment necessary for testing of their video lottery terminals.
- (7) Hardware that does not meet the standards of the Compact, its appendices, the Tribes and the State shall not be acceptable.

TRIBAL GAMING INVENTORY DECAL

Section 177-100-080

- (1) Each video lottery terminal certified for placement in the Gaming Facility shall display a Tribal Gaming Inventory Decal and must conform to the exact specifications of terminal prototypes tested and certified by the State.
- (2) No persons other than authorized Tribal or State personnel or their agents may affix or remove a Tribal Gaming Inventory Decal. The placement of the Tribal Gaming Inventory Decal represents that the terminal has been certified, inspected, and approved for operation in the State. The placement of the Tribal Gaming Inventory Decal on any equipment by the Tribal Gaming Commission represents that the terminal has been certified, inspected and approved for operation in the State and shall constitute documentation that the certification has been and will be kept on file by the Tribes. No persons other than authorized tribal personnel may affix or remove the Tribal Gaming Inventory Decal.
- (3) No terminal may be transported off Tribal land until the Tribal Gaming Inventory Decal has been removed.
- (4) A terminal shall not be moved out of the Gaming Facility without prior notification to the State.

EXTERNAL TERMINAL SPECIFICATIONS

Section 177-100-090

- (1) Terminals may publicly display information only on screen or housing that has been approved by the Tribes.
- (2) All information required for external display must be kept under glass or another transparent substance and at no time may stickers or other removable devices be placed on the terminal face.
- (3) Age restriction shall clearly be shown on the face of the terminal ("No person under 21 years of age may play").
- (4) Coin drops and non-video slot machines are prohibited.
- (5) Casino-style attract features shall be restricted but not prohibited.

PROCUREMENT OF TERMINALS

Section 177-100-095

- (1) Terminals to be located and operated within the State of Oregon shall be procured only by the Tribes.
- (2) The Tribes shall select and procure terminals from approved manufacturers pursuant to the Tribal-State Compact.

LOCATION OF AND ACCESS TO TERMINALS

Section 177-100-100

The terminals must be located in an area that is at all times monitored by the owner, manager, or employee of the manager to prevent access or play of video lottery terminals by persons under the age of 21.

DUTIES OF PRIMARY MANAGEMENT OFFICIAL

Section 177-100-110

- (1) No Primary Management Official or any employee of the Primary Management Official shall own or operate any gray machines.
- (2) The Primary Management Official shall not provide any form of financial assistance, or grant credit to enable players to play video lottery games.
- (3) The Primary Management Official shall attend all meetings, seminars, and training sessions required by the Tribes.
- (4) The Primary Management Official shall supervise its employees and their activities to ensure compliance with these rules.
- (5) The Primary Management Official shall assume responsibility for the proper and timely payment to players of video lottery game prizes.

DUTIES OF MANUFACTURERS

Section 177-100-130

Manufacturers, their representatives and agents shall have the following duties and constraints:

- (1) Promptly report to the Tribes any violation or any facts or circumstances that may result in a violation of these rules.
- (2) Provide immediate access to all records and the entire physical premises of the business for inspection at the request of the Tribes, the State or their auditors.
- (3) Provide the Tribes or State with keys to the logic area of each approved video lottery terminal model upon request.

TRANSPORTATION OF VIDEO LOTTERY TERMINALS WITHIN, INTO OR THROUGH THE STATE

Section 177-100-160

- (1) No person shall ship or transport video lottery terminals within or into the State, without first obtaining a written authorization or notification of approval from

the State. Transporting or shipping within the State means the starting point and termination point of a trip are both within the boundaries of the State. Transportation or shipping into the State means the starting point is outside the State and terminates in the State.

- (2) No person shall ship or transport video lottery terminals through the State without first obtaining a written authorization from the nearest port of entry immediately upon arrival in the State.
- (3) The written authorization required under Subsections (1) and (2) of this rule shall include:
 - (a) The serial number of each terminal being transported;
 - (b) The full name and address of the person or establishment from which the terminals are obtained;
 - (c) The full name and address of the person or venue to whom the machines are being sent or transported; and
 - (d) The dates of shipment or transport within, into or through the State.
- (4) The written authorization shall accompany, at all times, the terminal or terminals in transport.

II. GENERAL VIDEO LOTTERY GAME RULES

AUTHORIZED VIDEO LOTTERY GAMES

Section 177-200-000

- (1) Video lottery terminals may offer any video lottery game that satisfies the elements of prize, chance and consideration as described in Op. Atty. Gen. No. 6336, September 25, 1989.
- (2) A video lottery terminal may offer one or more of the authorized video games.

GAME REQUIREMENTS

Section 177-200-010

- (1) Each game must display the amount wagered and the amount awarded for the occurrence of each possible winning occurrence based on the number of tickets wagered.
- (2) Each game must provide a method for players to view payout tables.

TICKET PRICE

Section 177-200-015

Except as limited by the terms of the Compact, the price of a ticket for all video lottery games shall be determined by the Tribes.

PAYMENT OF PRIZES

Section 177-200-020

No payment for prizes awarded on a terminal may be made unless the cash slip meets the following requirements:

- (1) It is fully legible and meets all the Tribes' security requirements.
- (2) It must not be mutilated, altered, unreadable, or tampered with in any manner.
- (3) It must not be counterfeit in whole or in part.
- (4) It has been presented by a person authorized to play under these rules.

METHOD OF PAYMENT

Section 177-200-030

The Primary Management Official shall designate employees authorized to redeem cash slips during the Tribes' business hours of operation. Prizes shall be immediately paid in cash or by check when a player presents a cash slip for payment meeting the requirements of these rules. No prizes may be paid in tokens or chips.

REQUIREMENTS FOR RANDOMNESS TESTING

Section 177-200-050

Each video lottery terminal must have a random number generator that will determine the occurrence of a specific card or a specific number to be displayed on the video screen. A selection process will be considered random if it meets the following requirements.

- (1) Each card position, symbol position or, in the case of Keno, each number position satisfies the 99 percent confidence limit using the standard "Chi-squared analysis." "Chi-squared analysis" is the sum of the squares of the difference between the expected result and the observed result. "Card position" means the first card dealt, second card dealt, in sequential order. "Number position" means first number drawn, second number drawn in sequential order, up to the 20th number drawn.
- (2) Each card position, symbol position, or number position does not produce a significant statistic with regard to producing patterns of occurrences. Each card or number position will be considered random if it meets the 99 percent confidence level with regard to the "run test" or any similar pattern testing statistic. The "run test" is a mathematical statistic that determines the existence of recurring patterns within a set of data.
- (3) Each card position, symbol position, or number position is independently chosen without regard to any other card or number drawn within that game play. The test is the "correlation test." Each pair of card or number positions is considered random if they meet the 99 percent confidence level using standard correlation analysis.
- (4) Each card position, symbol position, or number position is independently chosen without reference to the same card or number position in the previous game. This test is the "serial correlation test." Each card or number position is considered random if it meets the 99 percent confidence level using standard serial correlation analysis.
- (5) The random number generator and selection process must be impervious to influences from outside devices including, but not limited to, electromagnetic interferences, electrostatic discharge and radio frequency interfaces.

**Tribal-State Compact for Regulation of Class III Gaming
The Klamath Tribes
and the State of Oregon**

Appendix B

KENO DESCRIPTION

DEFINITIONS

Section 177-99-000

For the purposes of Keno, the following definitions apply unless the context requires a different meaning or is otherwise inconsistent with the intention of the rules adopted by the Oregon State Lottery Commission.

- (1) "Exchange ticket" means the ticket issued to replace a consecutive game ticket that is validated before the last game on the ticket.
- (2) "Game" means the opportunity provided to a player to win a prize.
- (3) "Game slip" means the form used to indicate a player's selections.
- (4) "Spot" means the amount of numbers a player may play per game.
- (5) "Winning numbers" means the twenty (20) numbers from one (1) to eighty (80) which are randomly selected for each game.
- (6) "Keno runner" means an individual who picks up and delivers the Keno tickets that are written by customers in the gaming facility.
- (7) "Keno writer" means an individual stationed at the Keno counter who processes received tickets from either the customer or Keno runner.

GAME DESCRIPTION

Section 177-99-010

A Keno ticket has the numbers 1 through 80 on it. For each game a player may select from 1 to 20 numbers or spots. Twenty numbers are selected or drawn randomly. Prizes are awarded based on the total amount of winning numbers matched by a player for the number of spots played for that game.

PLAY RULES

Section 177-99-020

- (1) To play, a player must use a game slip.
- (2) The player must mark the amount of spots to be played. A player can pick from one (1) to twenty (20) spots per game slip. A player may also play a "way ticket." A way ticket is the equivalent of playing multiple Keno tickets, but marking only one ticket.
- (3) The player must mark the number of dollars to be wagered per game and/or per way.
- (4) The player may then select the spots to be played by one of two methods. The player may mark the player's own selections on the game slip; if this method is used, the number of spots marked on the game slip must equal the number of spots that were selected to play. The other method of play is to select "Quick Pick", the number of spots randomly generated by the computer will match the number of spots indicated by the player.
- (5) The player shall indicate the number of consecutive games to be played: 1, 2, 3, 4, 5, 10, 20, 50 or 100.
- (6) The player shall present the completed game slip and the amount wagered either to a Keno runner or directly to the Keno counter for processing by the Keno writer. The cost of the ticket is equal to the amount wagered times the number of ways you are playing the ticket times the number of consecutive games indicated by the player. For example, if \$2 per game is wagered on a regular (one-way) ticket for 5 consecutive games, the total cost is \$10. If the same ticket is played "3 ways" the cost is \$30.
- (7) Minimum and maximum wagers will be set by the Tribal Gaming Commission.

CANCELLATION OF TICKETS

Section 177-99-030

A game ticket may be canceled or voided provided it is canceled from the system prior to the start of the game.

DETERMINATION OF WINNERS

Section 177-99-040

- (1) Keno tickets will be sold only during the hours of operation of the gaming facility. The selection of winning numbers shall take place at established intervals.
- (2) Winning number combinations shall be generated at the established intervals through the use of a computer-driven random number generator or conventional Keno blower mechanism. The number generating device shall meet the requirements of the Tribal-State Compact pertaining to contracts with manufacturers and suppliers, security, terminal specifications, equipment testing, procurement, duties of manufacturer and requirements for randomness testing.
- (3) The Tribal Gaming Commission shall establish the procedures for the operation and security of the numbers generation equipment.

PRIZE STRUCTURE

Section 177-99-050

- (1) Published payoff schedules shall be made available to the public at all times throughout the facility and in a conspicuous place immediately adjacent to the game.
- (2) A player is eligible to receive only the highest prize per game played on a ticket.

TICKET VALIDATION REQUIREMENTS

Section 177-99-060

- (1) After the numbers are drawn, the manager will review all inside (house copy) tickets and pull all winning tickets.
- (2) A master ticket to verify winners will be produced. The master ticket will have the winning numbers hole punched. This facilitates the verification of the customer's tickets.

**Tribal-State Compact for Regulation of Class III Gaming
The Klamath Tribes
and the State of Oregon**

Appendix C

I. PARI-MUTUEL RULES - IN GENERAL

OPERATION OF PART-MUTUEL DEPARTMENT

Section 462-50-040

The Tribal Gaming Commission shall require a Primary Management Official to maintain separate oversight of pari-mutuel activities within the Gaming Facility.

PROHIBITIONS AGAINST WAGERS BY MINORS AND EMPLOYEES

Section 462-50-140

- (1) No person under the age of 18 years shall be allowed to place or collect a wager at the off-track wagering facility.
- (2) No employee of the off-track wagering facility shall be allowed to place or collect a wager at the off-track wagering facility while on duty.

UNCLAIMED WINNINGS

Section 462-50-210

- (1) The Tribal Gaming Commission shall require the pari-mutuel wagering facility to maintain, or provide for, an unclaimed winnings account for each race meet in which wagers are accepted.
- (2) The Commission shall require that any person claiming to be entitled to any part of the winnings from a mutuel wagering system operated by the Tribes who fails to claim the money due the person prior to completion of the race meet for which a mutuel ticket was purchased, may file a claim for payment of winnings within 90 days after the close of the race meet. After 90 days from the close of a race meet, all tickets may be deemed void.
- (3) After 120 days after the close of a race meet, unclaimed winnings in the account may revert to the Tribes.

RECORDS

Section 462-50-240

The Tribal Gaming Commission shall assure that sufficient records of wagering are maintained by the pari-mutuel wagering facility to allow review of the opening line, odds fluctuations and the amount of wagers at each window or station.

PARI-MUTUEL TICKETS

Section 462-50-250

- (1) A pari-mutuel ticket is evidence of a contribution to the pari-mutuel pool in which the Tribes are participating, and is evidence of the obligation of the operator of the pool to pay to the holder thereof such portion of the distributable amount of the pari-mutuel pool as is represented by such valid pari-mutuel ticket. The Tribes shall cash all valid winning tickets when such are presented for payment during the course of the race meeting for which the tickets were sold, and for 90 days after the last day of the race meeting.
- (2) To be deemed a valid pari-mutuel ticket, such ticket shall have been issued by a pari-mutuel ticket machine operated by the Tribes and recorded as a ticket entitled to a share of the pari-mutuel pool, and contain imprinted information as to:
 - (a) The name of the Tribes and of the association operating the race meeting;
 - (b) A unique identifying number or code;
 - (c) Identification of the terminal at which the ticket was issued;
 - (d) A designation of the performance for which the wagering transaction was issued;
 - (e) The contest number for which the pool is conducted;
 - (f) The type or types of wagers represented;
 - (g) The number or numbers representing the betting interests for which the wager is recorded;
 - (h) The amount or amounts of the contributions to the pari-mutuel pool or pools for which the ticket is evidence.
- (3) The Tribes may withhold payment and refuse to cash any pari-mutuel ticket deemed not valid. A ticket is not valid if it has been recorded or reported as previously paid, canceled or non-existent.

PARI-MUTUEL TICKET SALES

Section 462-50-260

- (1) Pari-mutuel tickets shall not be sold by anyone other than the Tribes or a licensed employee of the Tribes.
- (2) No pari-mutuel ticket may be sold on a contest for which wagering has already been closed and the Tribes shall not be responsible for ticket sales entered into but not completed by issuance of a ticket before wagering is closed on that contest.
- (3) Claims relating to a mistake on an issued or unissued ticket must be made by the bettor before leaving the seller's window. Once a bettor has left the window all bets are final, except as provided by rule of the Tribal Gaming Commission.
- (4) Payment on winning pari-mutuel wagers shall be made on the basis of the order of finish as posted and declared "official." Any subsequent change in the order of finish or award of purse money as may result from a subsequent ruling by race stewards or the regulatory body governing the race meet shall in no way affect the pari-mutuel payoff.
- (5) The Tribes are not required to satisfy claims on lost, mutilated or altered pari-mutuel tickets, except as provided in rules of the Tribal Gaming Commission.
- (6) The Tribes are not obligated to enter a wager into a betting pool if unable to do so due to an equipment failure.

CLAIMS FOR PAYMENT FROM PARI-MUTUEL POOL

Section 462-50-280

- (1) At a designated location, a written, verified claim for payment from a pari-mutuel pool shall be accepted by the Tribes in any case in which the Tribes have withheld payment or have refused to cash a pari-mutuel wager. The claim shall be made in the manner and on such form as prescribed by the Tribal Gaming Commission.
- (2) In the case of a claim made for payment of a mutilated pari-mutuel ticket that does not contain the total imprinted elements required in section 462-50-250, the manager of the pari-mutuel department shall make a recommendation to accompany the claim to the Tribal Gaming Commission as to whether or not the mutilated ticket has sufficient elements to be positively identified as a winning ticket.
- (3) In the case of a claim made for payment on a pari-mutuel wager, the Commission shall adjudicate the claim and order payment, deny the claim or make such other order as it may deem proper.

PAYMENT FOR ERRORS

Section 462-50-290

If an error occurs in the payment amounts for pari-mutuel wagers that are cashed or entitled to be cashed; and as a result of the error the pari-mutuel pool involved in the error is not correctly distributed among winning ticket holders, the following shall apply, unless

otherwise provided in the rules governing any interstate pari-mutuel pool in which the Tribes participate:

- (1) The Tribes shall verify that the amount of the commission, the amount of breakage and the amount of payoffs is equal to the total gross pool. If the amount of the pool is more than the amount used to calculate the payoff, the underpayment shall revert to the Tribes.
- (2) If the error results in an overpayment to winning wagers, the Tribes shall be responsible for such payment.

COMPLAINTS CONCERNING PARI-MUTUEL OPERATIONS

Section 462-50-350

- (1) When a patron makes a complaint concerning the pari-mutuel department to the Tribes or the Primary Management Official, a complaint report shall be prepared. The report shall contain the following information:
 - (a) The name of the complainant;
 - (b) The nature of the complaint;
 - (c) The name of the person(s), if any, against whom the complaint was made;
 - (d) The date of the complaint;
 - (e) The action taken or proposed to be taken, if any, by the Tribes or Primary Management Official.
- (2) The complaint report shall be submitted to the Tribal Gaming Commission as required by the Commission.

II. OFF-TRACK PARIMUTUEL WAGERING

DEFINITIONS

Section 462-50-400

The following definitions shall apply to these rules unless the text otherwise requires.

- (1) "Authorized User" means a person authorized by the Tribes to receive, to decode and to use for legal purposes the encrypted simulcast signal of racing events.
- (2) "Combined Pari-Mutuel Pools," or "Combined Pools" means the pari-mutuel wagers at one or more off-track wagering facilities being contributed into the pari-mutuel pools of a host association.
- (3) "Commission" means the Tribal Gaming Commission.
- (4) "Host," "Host Association," or "Host Track" means the race track conducting a licensed race meet that is being simulcast.
- (5) "Intrastate Wagering" means pari-mutuel wagering at an off-track wagering facility on Oregon racing events being run at an Oregon host association.
- (6) "Off-Track Wagering" means pari-mutuel wagering conducted on a race at a location other than the race course where the race is actually held.
- (7) "Off-Track Wagering Facility," "Intrastate Wagering Facility" or "Extended Wagering Facility" means physical premises, utilized for the conduct of pari-mutuel wagering on racing events being run elsewhere.
- (8) "Simulcast" or "simulcasting" means live audiovisual electronic signals emanating from a race meeting and transmitted simultaneously with the running of the racing events at that meeting, and includes the transmission of pari-mutuel wagering odds, amounts wagered and payoff on such events, and other racing programming relating to the race animals or participants.

OFF-TRACK WAGERING RULES

Section 462-50-420

No person, partnership, corporation or other entity shall be allowed to operate an off-track wagering facility under this Compact except according to the rules of the Tribal Gaming Commission. No change in the plan of operation of an off-track wagering facility may occur until the change to the plan is approved by the Commission.

APPROVAL OF OFF-TRACK WAGERING FACILITIES

Section 462-50-430

The Commission's rules shall require an off-track wagering facility to:

- (1) Provide security measures adequate to assure personal safety of patrons and employees, safeguard transmission of simulcast signals, secure money used for pari-mutuel wagering activity and to control the transmission of wagering data to effectuate common wagering pools.
- (2) Use data processing, communication and transmission equipment that will at all times assure accurate and secure transmission of wagers, take outs and surcharges; program information, weight changes, over weights, tip sheets, scratches, and all other information that is usually made available to patrons at a race track.
- (3) Use adequate transmitting and receiving equipment of acceptable broadcast quality.
- (4) Assure that all equipment is in proper working order, and that sufficient back up equipment is available to prevent foreseeable interruptions in operations due to breakdowns or malfunctions of data, transmission or communications equipment.
- (5) Use a system of accounts that will maintain a separate record of pari-mutuel revenues collected by the simulcast facility, the distribution of those revenues (take out, breakage and return to the public) and account for costs of the simulcast operation.
- (6) Provide, or obtain access to, the necessary totalizator equipment to conduct simulcast wagering, and assure that the integrity of the tote system used by the off-track wagering facility is maintained.
- (7) Ensure correct payment of the distributable amounts of parimutuel pools held by the Tribes pursuant to the rules applicable to the combined pools in which the off-track wagering facility is participating, and rules of the Commission.
- (8) Ensure that patrons of the off-track wagering facility receive accurate information as to the rules for wagering and distribution of winnings that apply to each race.
- (9) Ensure that personnel employed in the off-track wagering facility are sufficiently trained in the areas of money handling, operation of tote and ticket generating equipment and communications equipment.
- (10) Provide for continuous viewing and continuous transmission of odds for the race meets on which wagers will be accepted by the off-track wagering facility.

FINANCIAL REPORTS

Section 462-50-440

The Commission shall provide for the audit of the pari-mutuel operations at an off-track wagering facility. The audit shall enable review of the financial records related to each separate betting pool in which patrons of the facility participate.

GENERAL OPERATIONS

Section 462-50-460

The Commission shall provide for sufficient communications capability with the disseminator of a simulcast signal to assure accurate transmission and receipt of wagering and odds information. The Commission shall provide for immediate, uninterrupted communication by voice and by other data transmission media in order to be able to respond in a timely way to any operational problem with equipment or any problem related to the conduct of a race meet that would affect wagering at the off-track facility.

UNUSUAL SITUATIONS IN OFF-TRACK WAGERING

Section 462-50-480

The Commission shall establish procedures for responding to loss of audio or video signal at the off-track wagering facility. In the case of loss of signal, the Commission's rules shall assure that unless an alternative means of displaying odds is provided, wagering shall cease until signal can be re-established.

INTERSTATE COMMON POOL WAGERS

Section 462-50-490

- (1) Pursuant to the Interstate Horseracing Act of 1978 (15 USC §3001 to 3007), the Tribal Gaming Commission shall obtain consent from the Oregon Racing Commission in order to participate in interstate common pools.
- (2) The Tribal Gaming Commission shall require any wagers in interstate common pools to be accounted for separately other than for purposes of computing odds and calculating payoffs and breakage.

GUEST STATE PARTICIPATION IN INTERSTATE COMMON POOLS

Section 462-50-500

The Tribal Gaming Commission shall provide rules for the combination of pari-mutuel wagering pools with corresponding pools in multiple jurisdictions. Those rules shall govern the adjustment of takeout rates and merging of bets placed in an interstate common pool.

**TRIBAL-STATE COMPACT FOR REGULATION
OF CLASS III GAMING BETWEEN THE CONFEDERATED TRIBES OF
SILETZ INDIANS OF OREGON AND
THE STATE OF OREGON**

PREAMBLE.

This Compact is made between the State of Oregon (hereinafter "State") and the Confederated Tribes of Siletz Indians of Oregon (hereinafter the "Tribe") and pertains to Class III gaming to be conducted on lands taken into trust for the Tribe pursuant to Public Law 103-435, and is subject to the provisions of the Indian Gaming Regulatory Act of October 17, 1988 (Public Law 100-497), 25 U.S.C. 2701 et seq. ("IGRA"). The terms of this Compact are unique to this Tribe and reflect the fact that the lands which are covered by this compact are subject to IGRA.

SECTION 1. TITLE.

THIS Compact is entered into this ___ day of _____, 1999, by and between The Confederated Tribes of Siletz Indians of Oregon, a federally recognized Tribe of Indians, and the State of Oregon. Upon approval by the Secretary of the United States Department of the Interior, this Compact shall completely replace the original Compact, dated November 14, 1994, and all amendments thereto.

SECTION 2. FINDINGS.

These findings are agreed to by the Tribe and the State for purposes of this Compact:

WHEREAS, the Tribe is a federally recognized Indian Tribe and is the beneficial owner of, and local government for, the Siletz Indian Reservation and for trust lands of the Tribe located in the State of Oregon;

AND WHEREAS, the State and the Tribe are separate sovereigns and each respects the laws of the other sovereign;

AND WHEREAS, the public policy of the State is reflected in the Constitution, statutes and administrative rules of the State;

AND WHEREAS, the Tribe's public policy, as reflected in the Tribe's Constitution and ordinances adopted by the Tribe, is to exercise and retain its rights to regulate gaming activities upon its lands and reservation for the purposes of encouraging Tribal employment, economic and social development and funding of Tribal services while ensuring the fair and lawful operation of gaming and the prevention of corrupt and criminal influences;

AND WHEREAS, the United States Congress has enacted IGRA which declares federal policy and provides a statutory basis for operation of gaming by the Tribe as a means of promoting tribal economic development, self-sufficiency, and strong tribal government;

AND WHEREAS, the Tribe exercises governmental authority over all tribal trust lands, individual trust lands and lands within the Siletz Indian Reservation;

AND WHEREAS, the Tribe's gaming location is on land subject to IGRA;

AND WHEREAS, IGRA is intended to provide a statutory basis for regulation of gaming by the Tribe adequate to shield it from organized crime and other corrupting influences, to ensure that the Tribe is the primary beneficiary of the gaming revenues, and to ensure that gaming is conducted fairly and honestly by both the operators and players;

AND WHEREAS, Congress has declared that it is a principal goal of federal Indian policy to promote tribal economic development, tribal self-sufficiency and strong tribal government;

AND WHEREAS, IGRA provides for a system of joint regulation by Indian Tribes and the Federal government (to the exclusion of the State) of Class II gaming on Tribal lands as defined in IGRA;

AND WHEREAS, IGRA establishes a system of agreements between Indian Tribes and States for the regulation of Class III gaming as defined in that Act;

AND WHEREAS, IGRA provides that Class III gaming activities are lawful on Tribal lands only if such activities are (1) located in a state that permits such gaming for any purpose by any person, organization or entity, (2) authorized by tribal ordinance, and (3) conducted in accordance with a Tribal-State Compact;

AND WHEREAS, the Congressional intent in passing IGRA was to reaffirm a long and well-established principle of federal Indian law as expressed in the United States Constitution, reflected in federal statutes and articulated in decisions of the United States Supreme Court that unless authorized by an act of Congress, the jurisdiction of State governments does not extend to Tribal lands;

AND WHEREAS, IGRA does not extend State jurisdiction or the application of State laws for any purpose other than jurisdiction and application of State laws to gaming conducted on Tribal land as set forth in this Compact;

AND WHEREAS, Congress recognized a role for State public policy and State law in the regulation of Class III Gaming;

AND WHEREAS, nothing in the Tribal-State Compact shall be construed to extend to any other activities or as an abrogation of other reserved rights of the Tribe or of the Tribe's sovereignty;

AND WHEREAS, IGRA is intended to expressly preempt the field in the governance of gaming activities on Tribal lands;

AND WHEREAS, the Tribe is authorized to act through Resolutions adopted by its Tribal Council;

AND WHEREAS, the State of Oregon is authorized to act through the Governor of the State;

AND WHEREAS, the continued growth and success of tribal gaming depends upon public confidence and trust that the tribal gaming operation is honest, fair and secure, and is free from criminal and corruptive influences;

AND WHEREAS, public confidence and trust can be maintained only if there is strict compliance with laws and regulations directly related to, and necessary for, the licensing and regulation of gaming activity in licensed gaming establishments, by all persons involved in the gaming operation;

AND WHEREAS, the relationship between the State and the Tribe rests on mutual trust and the recognition that each has a duty to protect the gaming public through separate, appropriate responsibilities during the life of current and future Compacts;

AND WHEREAS, the Tribe and the State agree that reasonable state regulation of Indian Gaming in the State of Oregon will be funded by the Indian gaming tribes.

NOW THEREFORE, in consideration of the mutual undertakings and agreements herein set forth, the Tribe and the State enter into the following Compact:

SECTION 3. DEFINITIONS.

As used in this Compact, and in its Appendix and Exhibits:

- A. "Average Daily Drop" means the difference between the total wagers on VLTs made in a day, and the total prizes paid on VLTs on that day, with that difference divided by the number of VLTs available for play on the gaming floor on that day:

$$\frac{(\text{Total wagers} - \text{Total Prizes})}{\text{VLTs}}$$

The Average Daily Drop for a certain period is the total of the Average Daily Drops for each day in that period, divided by the number of days in that period:

$$\frac{\text{Total Average Daily Drop for period}}{\text{Days in period}}$$

- B.. "Background investigation" means the security and financial history checks of a Class III Gaming Contractor or an applicant for a Tribal gaming license, whether the applicant is a prospective employee, consultant or vendor.
- C. "Certification" means the inspection process used by the Oregon State Lottery to approve video lottery game terminals and games.
- D. "Class III Gaming Contract" means a contract that involves a Major Procurement or a Sensitive Procurement involving or related to Class III gaming.
- E. "Class III Gaming Contractor" is any individual, business or other entity that proposes to consummate, or in fact consummates a Class III Gaming Contract.
- F. "Consultant" means any person, other than an employee, who provides advice or expertise to the Tribe concerning the operation, management or financing of the Tribe's Class III gaming activities for compensation. "Consultant" does not include a person engaged for the purpose of training or teaching employees of the Tribal Gaming Operation if the contract for those services is episodic, and no greater than ninety (90) days in duration.
- G. "Controlling interest" means fifteen percent (15%) of the equity ownership of a company.
- H. "Counter Game" means keno, race and off-race course mutuel wagering.

- I. "Display" means the visual presentation of video lottery game features shown on the screen of a video lottery terminal.
- J. "Gaming Facility" means the building or buildings constructed on land taken into trust for the Tribe at Lincoln City, Oregon, at the Gaming Location, including any property used to store Class III gaming equipment.
- K. "Gaming Location" means the real property described in Exhibit 1 to this Compact which is hereby incorporated by reference, where the Gaming Facility will be located.
- L. "Gray Machine" means any electrical or electro-mechanical device, whether or not it is in working order or some act of manipulation, repair, adjustment or modification is required to render it operational that:
1. Awards credits or contains or is readily adaptable to contain, a circuit, meter, or switch capable of removing or recording the removal of credits earned by a player, other than removal during the course of continuous play; or
 2. Plays, emulates, or simulates a casino game, bingo, or keno. A device is no less a gray machine because, apart from its use or adaptability as such, it may also sell or deliver something of value on the basis other than chance.
- "Gray Machine" does not include any device operated under the authority of State law or under the terms of this Compact.
- M. "High Security Employee" means any natural person who participates in the operation or management of the Class III Tribal Gaming Operation, whether employed by the Tribe or by a person or entity providing on-site or off-site gaming operation or management services to the Tribe, including but not limited to: gaming operations administrators, managers and assistant managers, gaming facility surveillance or security personnel, dealers, croupiers, shift supervisors, cage personnel (including cashiers and cashier supervisors), drop and count personnel, video lottery terminal technicians, junket representatives; and any other person whose employment duties require or authorize access to areas of the Gaming Facility related to Class III gaming and which are not otherwise open to the public.
- N. "Key Employee" means any officer or any person who can substantially affect the course of business, make decisions, or is in a sensitive position in an organization or corporation that is a Class III Gaming Contractor or an applicant for a Class III Tribal gaming license.

- O. "Low Security Employee" means any employee of the Tribal Gaming Operation whose duties require the employee's presence in any area of the Gaming Facility where Class III gaming activities take place, but who is not a High Security Employee and who is not involved in the operation of Class III gaming.
- P. "Major Procurement" means any procurement action or contract between the Tribe or the Tribal Gaming Operation and a manufacturer, supplier, consultant, management contractor, or lender, for goods, services or products used in, or related to, the operation of the Tribe's Class III gaming activities, including but not limited to:
1. The printing of tickets used in any Class III gaming;
 2. Any goods or services involving the receiving or recording of number selections or bets in any Class III gaming;
 3. Any goods, services, or products used to determine winners in any Class III gaming; or
 4. Video devices or other equipment used in Class III games, except equipment specifically included in the definition of Sensitive Procurement;
 5. A contract or license to use a patented game or game product;
 6. Accounting systems or surveillance systems to be used in the Tribe's Class III gaming activities;
 7. A contract involving Class III gaming related goods or services that provides for, or the terms of which will make necessary, a continuing relationship over time (more than thirty days) between the parties; or
 8. A contract involving Class III gaming related goods or services that involves or requires commitments by either party to the contract such that there would be substantial financial consequences to one of the parties if the contract or procurement action was terminated prematurely. For this purpose a contract involving consideration or value of \$100,000 or more shall be deemed to involve substantial financial consequences to one of the parties with regard to Class III gaming activity if the contract or procurement action was terminated prematurely.
- Q. "Minimum Internal Control Standards" means the Tribal/State "Minimum Standards for Internal Controls" attached as the Appendix to this Compact,

including revisions that may be agreed upon by the Tribal Gaming Commission and the Oregon State Police from time to time.

- R. "Oregon State Police" or "OSP" refers to the Gaming Enforcement Division, or that administrative unit charged with gaming enforcement regulatory responsibilities, of the Department of State Police established under Oregon Revised Statutes section 181.020, or its successor agency established by law.
- S. "Owner" means any person, alone or in combination with another person who is a spouse, parent, child or sibling, or entity that owns 5% or more of the equity ownership of a company.
- T. "Primary Management Official" means any person who:
1. Has administrative or high-level management responsibility for part or all of the Class III Tribal Gaming Operation, whether as an employee or under a management contract;
 2. Has authority --
 - a. to hire and fire supervisory employees; or
 - b. to set or otherwise establish working policy for the gaming operations; or
 3. Is the chief financial officer or other person who has financial management responsibility for the Tribal Gaming Operation.

Primary Management Official does not include a person or entity that does not have decision-making authority with regard to a Class III Tribal Gaming Operation.

- U. "Sensitive Procurement" means any procurement action or contract that is not a "Major Procurement," for Class III gaming equipment (such as cards, dice, keno balls, roulette wheels, roulette balls, chips, tokens, VLT or keno paper, gaming tables, table layouts or the like), or any other products that are not used directly in the conduct of Class III gaming, but that directly relates to the operation and administration of the Tribe's Class III gaming activities such as replacement parts for video lottery terminals (bill acceptors, printers), locks and keys for secure storage areas or gaming devices, or individual surveillance cameras.
- V. "Table game" means any Class III game allowed under this Compact except video lottery games, keno, off-race course mutuel wagering, and race book.

- W. “Tribal Gaming Commission” means the tribal entity established by the Tribe with independent authority to regulate gaming activities on tribal lands.
- X. "Tribal Gaming Operation" or "Gaming Operation" means the enterprise operated by the Tribe that operates Class III gaming under tribal authority, and receives revenues, issues prizes and pays expenses in connection with Class III games authorized under this Compact, and includes both gaming and non-gaming activities.
- Y. “Tribal Gaming Ordinance” means the ordinance adopted by the tribe to govern the conduct of Class III gaming, as well as non-Class III gaming activities, as required by IGRA, including all implementing regulations and subsequent amendments thereto.
- Z. "Video lottery terminal" or "terminal" or “VLT” means a terminal or electronic gaming device where the decision-making portion of the overall assembly is an electrical or electronic device or component that displays a ticket through the use of a video display screen, and that is available for consumer play by one player at a time at the device upon payment of any consideration, with winners determined by the application of the element of chance and the amount won determined by the possible prizes displayed on the device and which awards game credits.

SECTION 4. AUTHORIZED CLASS III GAMING.

- A. Only Compact between the Tribe and the State. This Compact shall be the only Compact between the Tribe and State pursuant to IGRA and any and all Class III gaming conducted in the Gaming Facility shall be pursuant to this Compact.
- B. Authorized games.
 - 1. Subject to the provisions of this Compact, the Tribe may engage in the following Class III games: Video lottery games of chance, keno, off-race course mutuel wagering, blackjack, craps, roulette, pai-gow poker, Caribbean stud poker, let-it-ride, and big 6 wheel, as described in the Appendix. No wagers may be placed or accepted via the internet or by any telecommunications system or device, except to accomplish off-race course mutuel wagering as permitted by state law except as provided in subsection 4(B)4.
 - 2. Subject to, and in compliance with, the provisions of this Compact, the Tribe may, subject to the provisions of Section 4.D., engage in any other Class III gaming activity that has been approved by the Nevada Gaming Commission or by an Indian tribe with an approved Class III Compact in

the State in which the tribe conducts a gaming operation, *provided*, that for an Indian approved game, certification from the State where such Tribe conducts gaming that such game is permissible under IGRA shall be provided, and Oregon State Police review and approval shall be required. Operation of any game under this paragraph must be pursuant to rules, procedures and internal controls for the new game at least as stringent as the Tribal/State Minimum Internal Control Standards set forth in the Appendix to this Compact and, where appropriate, subject to new MICS developed and approved by both the Tribal Gaming Commission and Oregon State Police.

3. Before the Tribe offers a new game under this subsection 4.B., the Tribe and the State must agree that the Tribe has adopted appropriate internal controls, surveillance plans, game rules and procedures, as provided in subsection E of this section, and that the Tribal Gaming Commission is fully prepared to regulate and the Oregon State Police fully prepared to monitor the new game. In the event a dispute exists between the Tribe and the State about whether a particular gaming activity can be offered by the Tribe under this Compact and under IGRA, such dispute shall be resolved pursuant to Section 16 of this Compact.
4. This Compact is not intended to preclude the Tribe from seeking negotiation, consistent with the policies of IGRA and this Compact, to offer internet gaming in the event of a final federal judicial decision, final State of Oregon judicial decision, or congressional legislative action permitting internet gaming. If the State disputes whether internet gaming may be offered consistent with this subsection and federal and/or state law, including IGRA, such dispute shall be resolved pursuant to Section 16 of this Compact. Compact negotiation as set forth in this subsection B.4 shall be initiated pursuant to Section 12.D of this Compact. No such gaming shall be offered until dispute resolution concludes and all legal appeals are final.
5. This section shall be construed consistent with federal classification of gaming activities. Notwithstanding any provision of this Compact, any gaming activity classified by federal regulation as Class II activity shall not be subject to the provisions of the Compact. However, the Tribe agrees that if any Class II gaming activities are conducted or intermingled in such a way that they are inseparable from Class III gaming activities, such as surveillance, those activities shall be considered as Class III for purposes of the regulatory authority of the State under this Compact.

C. Gaming Location. The Gaming Facility authorized by this Compact is located on land within the boundaries of Lincoln City, Oregon, specifically described in

Exhibit I to this Compact. The land on which the Gaming Facility is located is land that has been designated by Act of Congress as "Restored Land" for purposes of 25 USC §2719, and has been taken into trust for the Tribe by the United States. Gaming authorized under this Compact shall be conducted only in the Gaming Facility. If another Oregon Tribe is authorized to operate a gaming facility on lands which did not qualify as Indian lands as defined by IGRA as of the date of enactment of that statute, the Tribe does not hereby abrogate any rights it may have under Section 20 of IGRA.

D. Addition of Authorized Games at Gaming Facility.

1. At least 60 days before any new game otherwise authorized under this Compact is conducted at the Gaming Facility the Tribal Gaming Commission shall:
 - a. Ensure that the Gaming Operation develops rules and procedures for a system of internal controls for the new game that meets the minimum standards established in the Appendix to this Compact.
 - b. Require that the Gaming Operation provide appropriate training for all dealers, supervisors, surveillance personnel and any other employees involved in the conduct or regulation of the new game and for the Tribal Gaming Inspector, such that those employees have the knowledge and skills required under typical industry standards for the job function that employee performs, including but not limited to player money management and betting, card counting and detection of cheating methods. The Gaming Operation or Tribal Gaming Commission, as appropriate, shall notify the Oregon State Police prior to beginning training and shall provide the Oregon State Police opportunity to participate.
 - c. Ensure that the Gaming Operation establishes a security and surveillance plan for the new game that meets the minimum standards established in the Appendix hereto.
 - d. Adopt rules of operation for the game that meet the minimum standards established in the Appendix hereto, including rules of play and standards for equipment.

- e. Notify the Oregon State Police that the Tribe proposes to offer the new game to the public, and provide to the Oregon State Police for review all of the internal controls, regulations, plans, procedures and rules required under this paragraph 1 of this subsection.
2. The Tribe agrees to introduce new games authorized under this section according to the following schedule:
 - a. Within the sixty day period after the Secretary of the Interior approves this amended and restated Compact the Tribe may offer the following six games - craps, roulette, Caribbean stud poker, big 6 wheel, let-it-ride, and pai-gow poker - authorized under paragraph 1 of subsection B of this section.
 - b. If the Tribe so chooses, after the period of time specified in subparagraphs a and b of this paragraph, for any game authorized by paragraph 2 of subsection B of this section, one new game within a single calendar quarter.
 - c. The Tribe may offer new games sooner than the time tables established under this subsection if mutually agreed upon in writing by the Tribal Gaming Commission and the Oregon State Police.

E. Table Game Wager Limits.

1. The Tribe shall establish wager limits for all table games. The Tribe has established a current wager limit of \$500 per hand for house banked blackjack offered at the Gaming Facility, and the Tribal Gaming Commission has adopted regulations establishing a minimum level of experience, training and competence for dealers at those tables that were commensurate with the need to maintain the honesty, integrity, fairness and security of the Table Games.
2. For Table Games other than house banked blackjack, the initial wager limit under this Compact shall be \$500 initial wager per hand. The wager limit for house banked blackjack shall be set at \$1000 initial wager per hand. The Tribe may request an increase in the wager limit of any Table Game offered at the Gaming Facility, up to a maximum wager of \$1000 initial wager per hand. The State shall not withhold its consent to an increase in the wager limit of any Table Game if there has been full compliance under the previous wager limit with the Minimum Internal Controls, the Tribal Gaming Ordinance, the rules of operation of the game or with the terms of this subsection for a period of ninety (90) days and

upon mutual consent, which time frame can be extended by either party. The amount of any increase in the wager limit must be agreed to by both the State and the Tribe before the limits are changed on the gaming floor. If the State determines that there has not been full compliance with the Minimum Internal Controls, the Tribal Gaming Ordinance, rules of compliance or terms of this subsection, the State may require that the wager limit be reduced to a level where such full compliance is likely to occur.

3. For purposes of this subsection 4(E), "full compliance" means:
 - a) All of the rules, procedures and plans required under subsection 2 of this section have been adopted and approved by the Tribal Gaming Commission, have been approved by OSP as meeting the Minimum Internal Control Standards, and have been implemented;
 - b) All training required by the Minimum Internal Control Standards and the regulations of the Tribal Gaming Commission is up to date;
 - c) The Tribal Gaming Commission has adopted policies and procedures that set forth appropriate sanctions for employees who fail to follow the regulations and internal controls of the commission, gaming operation management has committed in writing to train employees and impose the sanctions for violations, and the Tribal Gaming Commission's procedures provide for investigation of possible violations by the gaming operation;
 - d) The Tribal Gaming Commission has adopted and implemented procedures for direct reporting of possible violations to the Tribal Gaming Commission by any employee of the Tribal Gaming Operation; and
 - e) The Tribal Gaming Commission has maintained records of investigations of all reports of possible violations, and has promptly reported confirmed violations to the Oregon State Police including the action taken by the commission or gaming operation management to correct the failure, and the discipline or sanctions imposed.
4. The Tribe may operate a maximum of 60 tables of Table Games at the Gaming Facility under this Compact.

F. Numbers of Video Lottery Terminals.

1. The number of Class III video lottery games of chance authorized by this Compact shall not exceed 1250. Subject to other terms of this Compact, the Tribe may determine in its discretion the location and spacing of video lottery terminals (VLTs) within the Gaming Facility.
2. The Tribe may request authorization for additional VLTs as follows. When the Tribal Gaming Operation has maintained 1150 or more VLTs, as determined by the actual number of VLTs available for play on the gaming floor, but not including stored VLTs, at an Average Daily Drop of \$125 or as may be otherwise established in a memorandum of understanding between the parties, for each of any three consecutive months chosen by the Tribe, the Tribe may request an increase in the authorized number of VLTs. The Tribe shall make the request in writing to OSP. Upon verification by OSP that the Average Daily Drop exceeds \$125, the number of authorized VLTs will increase to 1350. Pursuant to the same procedures, the Tribe may request authorization for additional VLTs according to the following formula: When the Tribal Gaming Operation has maintained 1250 or more VLTs, as determined by the actual number of VLTs available for play on the gaming floor, but not including stored VLTs, at an average daily drop of \$120 for each of any three consecutive months chosen by the Tribe, the number of VLTs authorized will increase to 1500. Once the OSP has verified the requisite Average Daily Drop provided pursuant to this subsection, the number of authorized VLTs shall automatically be increased as provided herein, without need to execute a Compact amendment.
3. Renegotiation regarding amending the Compact to increase the number of authorized VLTs pursuant to section 12.D shall be triggered when the Tribal Gaming Operation has maintained 1400 VLTs, as determined by the actual number of VLTs available for play on the gaming floor, but not including stored VLTs, at an Average Daily Drop of \$115 for each of any three consecutive months chosen by the Tribe. In such event, the scope of negotiations and any Compact amendment shall be limited to the Tribe's economic justification for the requested increase in number of authorized video lottery machines, and issues directly related to the requested numbers of VLTs, unless otherwise agreed to by the parties.

4. The Tribe may maintain VLTs that it is not using in storage at the Gaming Location, so long as the total number of VLTs in operation and in storage does not exceed 110% of the authorized number of VLTs, and so long as the site and manner of storage is approved by the Oregon State Police, and the Oregon State Police are provided access to the storage site.

SECTION 5. JURISDICTION.

A. In General.

1. The State shall have criminal jurisdiction over offenses committed by or against Indians and non-Indians within the Gaming Facility and on Tribal trust land; the criminal laws of the State shall have the same force and effect at the Gaming Location as they have on non-Tribal lands within the State.
2. If the Tribe authorizes the Tribal Court to hear criminal cases arising on the Tribal Lands, the Tribe and the State shall have concurrent criminal jurisdiction over offenses committed by Indians within the Gaming Facility and on the Tribal Lands. The criminal laws of the State shall have the same force and effect on the Tribal Lands as they have on non-Tribal lands within the State. Once a tribal police force is in operation on the Tribal lands, the enforcement of criminal laws at the Gaming Facility shall be established pursuant to and by a Memorandum of Understanding to be executed by the Tribe and the Oregon State Police.
3. The Tribe and the State agree that local law enforcement officials may provide the first response for law enforcement matters that are not related to the operation of gaming or that occur other than in the course of the play of games. As between the Oregon State Police and local law enforcement officials, the Oregon State Police shall have exclusive authority to investigate violations of state criminal law related to the operation of gaming or that occur in the course of play of games.
4. If the Tribe establishes a law enforcement agency that is responsible to investigate criminal law violations on Tribal lands, the Tribe agrees that the Oregon State Police shall continue to have the authority to investigate possible violations of this Compact or other gaming regulatory matters. The Tribe and the State further agree that their respective law enforcement agencies will cooperate in any investigation that involves or potentially involves both criminal and regulatory violations.

5. The Tribe and the State agree to cooperate on the investigation and prosecution of any gambling crime committed at the Gaming Facility. The Tribe and the State agree to cooperate in maintaining a state-wide system to identify and monitor persons excluded from any tribal gaming facility in the State.
- B. Except as provided in a Memorandum of Understanding executed in accordance with the foregoing paragraph 5.A.2., officers of the Oregon State Police and other state officers designated by the State in writing as provided in Section 14 of this compact shall have unrestricted access to anywhere within the Gaming Facility and on the Tribal trust land used for or in relation to class III gaming for the purpose of maintaining public order and public safety, conducting investigations related to possible criminal activity and enforcing applicable laws of the State. The Tribe or authorized individuals acting on its behalf shall provide officers of the Oregon State Police or other state officers designated as provided in Section 14 access to locked and secure areas of the Gaming Facility in accordance with the regulations for the operation and management of the Gaming Operation.
- C. Nothing in this agreement shall be construed to affect the civil or criminal jurisdiction of the State and Tribe under Public Law 280. The Tribe and the State agree that the criminal laws of Oregon that proscribe gambling activities shall apply to any person who engages in the proscribed activities if those activities are not conducted under the authority of the Tribe as provided in this Compact and under IGRA. Nothing in this subsection 5(C) shall be construed to confer jurisdiction on the State over crimes not otherwise provided by law.

SECTION 6. PRINCIPLES GOVERNING GAMING OPERATIONS DECISIONS

- A. The Tribe and the State agree that maintaining the honesty, integrity, fairness and security of the Tribe's Gaming Operation is essential both to the success of the enterprise, and to satisfy the interests of the State and of the Tribe. The Tribe and the State agree that both of them have the responsibility to protect the citizens of this State who patronize the Tribe's Gaming Facility from any breach of security of the Gaming Operation. Accordingly, all decisions by the Tribe, the Tribal Gaming Commission and the management of the Gaming Operation, concerning regulation of the Gaming Operation and operation of the Gaming Facility, including those decisions expressly placed within the Tribe's discretion under the terms of this Compact, shall be consistent with each of the following principles:
 1. Any and all decisions concerning regulation of the Gaming Operation and operation of the Tribal Gaming Facility, whether made by the Tribe, the Tribal Gaming Commission or the management of the Gaming Operation, shall reflect the particularly sensitive nature of a gaming operation.

2. In order to maintain the honesty, integrity, fairness and security of the Tribe's Gaming Operation, the Tribe, the Tribal Gaming Commission and the management of the Gaming Operation shall work diligently and take all reasonably necessary affirmative steps to prevent cheating and theft, and to protect the gaming operations from the influence or control by any form of criminal activity or organization.
3. The honesty, integrity, fairness and security of the Tribe's Gaming Operation shall be of paramount consideration in awarding contracts, licensing and hiring employees, and in making other business decisions concerning the operation of the gaming enterprise. The Tribe, the Tribal Gaming Commission and the management of the Gaming Operation shall make no decisions that compromise the honesty, integrity, fairness or security of the Tribe's class III gaming activities.
4. Regulation and operation of the Tribe's class III gaming activities shall be, at a minimum, consistent with generally accepted industry standards and practices, in order to maintain the honesty, integrity, fairness and security of the Tribe's class III gaming activities.

B. Procedure for Resolving Disputes Concerning Operational Decisions.

1. If the State, in good faith, believes that any Class III related decision by the Tribe relating to the employment or licensing of any employee, awarding of any contract or operation of the gaming enterprise is inconsistent with the principles set forth in subsection A of this section, or any other requirement of this section, the State may give written notice to the Tribe. The written notice shall describe the factual basis for the State's concern.
2. The parties shall meet and confer within 15 days after the Tribe receives the notice.
3.
 - a. If the State's concern is not resolved informally, either party may initiate non-binding arbitration within 45 days after the service of the written notice.
 - b. An arbitrator shall be selected in the following manner:
 - (1) The parties shall obtain a list of qualified arbitrators from U.S. Arbitration and Mediation of Oregon, or any other arbitration panel agreed to by the parties.

- (2) Each party, in turn, shall strike one name from the list, until one name remains. The parties shall draw lots to determine which party makes the first strike.
 - c. Upon agreement by both parties, the arbitration proceeding shall be binding.
 - d. The parties shall divide the cost of the arbitration proceeding equally between them.
4. Upon conclusion of the arbitration proceeding, if the parties have not elected to be bound by that result, either party may initiate an action in the United States District Court for the District of Oregon as provided in section 16 of this Compact.

5. Expedited Procedure.

- a. If the State, in good faith, believes that there is an immediate threat to the honesty, integrity, fairness and security of the Tribe's Gaming Operation, and believes that substantial harm will result during the time that would pass if the procedure established in paragraphs 1 to 3 of this subsection is followed, the State may give written notice to the Tribal Gaming Commission. The written notice shall describe the factual basis for the State's concern. The written notice shall describe the specific action the State believes is necessary to protect the honesty, integrity, fairness and security of the Gaming Operation. The Tribe agrees that the Tribal Gaming Commission shall act according to the State's recommendation, unless the Commission determines that acting according to the State's recommendation would adversely affect the honesty, integrity, fairness or security of the Tribe's Class III gaming activities or the Commission believes in good faith that the honesty, integrity, or security of the Tribe's Class III gaming activities can be protected by an equally effective action that would result in less disruption to the Gaming Operation during the pendency of any dispute.

Nothing in this subparagraph shall preclude either party from invoking the dispute resolution procedures provided in this Compact.

- b. The parties shall confer within 5 days after the Tribe receives the notice.

- c. If the State's concern is not resolved informally, the state may initiate an action in the United States District Court for the District of Oregon as provided in section 16 of this Compact. If the State disagrees with the Gaming Commission's "equally effective" recommended course of action as set forth in subsection 5(a) above on the grounds that such action would not protect the fairness, integrity, security or honesty of the Class III gaming activities, the Tribe shall follow the State's recommendation but the Tribe may present the dispute to the federal court as provided in Section 6.B.4.
- d. An immediate threat to the honesty, integrity, fairness or security of the Tribe's Gaming Operation includes but is not limited to the following examples:
 - (1) A criminal indictment is filed against any Class III Gaming Contractor, or Owner or Key Employee of such a Contractor, or against any Key Employee of the Tribal Gaming Operation;
 - (2) A criminal organization or members of a criminal organization have obtained an ownership interest in a Class III Gaming Contractor, or a member of a criminal organization has become a Key Employee of such a contractor;
 - (3) A malfunction of Class III gaming equipment hardware or software causes patrons of the Gaming Facility to lose money, and that loss is directly related to the equipment malfunction;
 - (4) The security of Class III gaming equipment has been impaired by loss, theft, or tampering;
 - (5) The physical safety or security of patrons of the Gaming Facility is seriously at risk;
 - (6) A continuing pattern of failure by the Tribe, the Tribal Gaming Commission or management of the Gaming Operation to enforce compliance with the provisions of this Compact, or the regulations and internal controls governing the gaming operation such that the fairness, integrity, security and honesty of the Tribe's Class III gaming activities is threatened in a time frame that cannot be concluded pursuant to subsections B.1-B.4 of this Section.

For the purposes of this subsection 6.B, the State shall act through the Oregon State Police, or an official designated in the manner provided in section 14 of this compact.

6. The provisions of this Section 6 shall provide the exclusive method for resolving disputes as to the State or Tribe's decisions concerning hiring or contracting under Section 7 of this Compact, or concerning operation of the Gaming Facility.

SECTION 7. LICENSING AND CONTRACTING.

A. Licensing of Gaming Employees.

1. All Primary Management Officials, High Security Employees, and Low Security Employees to be employed in the Gaming Facility shall be licensed by the Tribal Gaming Commission in accordance with the provisions of this Compact.
2. A background investigation shall be performed with respect to all prospective employees, whether Primary Management Officials, High Security Employees or Low Security Employees. Prospective employees shall provide to the Tribal Gaming Commission and the Oregon State Police any required application fees and complete and full information on forms provided or approved by the Oregon State Police, including but not limited to:
 - a. Full name, including any aliases by which the applicant has been known;
 - b. Social security number;
 - c. Date and place of birth;
 - d. Residential addresses for the past five years;
 - e. Employment history for the past five years;
 - f. Driver's license number;
 - g. All licenses issued and disciplinary actions taken by any federal, State, local or Tribal gaming agency;

- h. All criminal proceedings, except for minor traffic offenses, to which the applicant has been a party;
 - i. A current photograph;
 - j. Any other information required by the Tribal Gaming Commission.
3. In addition to the requirements of paragraph 2 of this subsection, prospective High Security Employees and Primary Management Officials shall provide two sets of fingerprints.
4. a. The Tribal Gaming Commission shall forward the applicant information for each prospective High Security Employee and Primary Management Official to the Oregon State Police, along with the State required portion of the application fee as described in subsection C of this section. The Oregon State Police may conduct a background investigation on all prospective Primary Management Officials and High Security Employees, and provide a written report to the Tribal Gaming Commission within a reasonable period of time, but in no event shall such background checks exceed sixty (60) days without notice to the Tribe. In the event that the Tribal Gaming Commission conducts a background investigation, it shall submit the completed report to the Oregon State Police within sixty (60) days.
- b. The Tribe may request the State to perform a background investigation on any prospective Low Security Employee. Upon such request, the Oregon State Police shall conduct a background check as provided in subparagraph a. of this paragraph. The Tribe may contract for background investigation services for Low Security Employees from a private contractor, if the contractor is acceptable to the State.
5. a. Except as provided in paragraph 6 of this subsection, the Tribal Gaming Commission shall deny a gaming license to any High Security Employee or Primary Management Official who:
- (1) Has, within the ten-year period preceding the date of license application, committed any felony other than a traffic offense, whether or not the crime resulted in a conviction or any such conviction has been expunged, under the law of any federal, state or tribal jurisdiction, or is the subject of a civil judgment under the law of any federal, state or tribal jurisdiction that is based on facts that constitute the

elements of a felony other than a traffic offense, in that jurisdiction;

(2) has committed a crime involving unlawful gambling under the law of any federal, state or tribal jurisdiction, whether or not conviction of such a crime has been expunged, or is the subject of a civil judgment under the law of any federal, state or tribal jurisdiction that is based on facts that constitute the elements of a crime involving unlawful gambling in that jurisdiction; or

(3) has associated in a direct business relationship, whether as a partner, joint venturer or employer, with any other person who has committed a felony other than a traffic offense, or a crime involving unlawful gambling, under the law of any federal, state, local or tribal jurisdiction within the last ten years, *provided*, that if a prospective High Security Employee or Primary Management Official was unaware of the offenses committed by such person, reported such activity to appropriate law enforcement officials when he or she became aware of the offenses or attempted to stop such offenses, or terminated his or her business relationship with such person within a reasonable time after discovering or learning of such offenses, the prohibition in this subsection shall not apply.

b. The Tribe shall deny a gaming license to any prospective High Security Employee or Primary Management Official who was employed by any other person who has committed in the last ten years a felony other than a traffic offense, or a crime involving unlawful gambling, under the law of any federal, state, local or tribal jurisdiction, if the prospective employee or official was in any way involved in or aware of the criminal activity as it occurred and did nothing to report or stop the activity or to remove himself or herself from association with such person.

c. The Tribe shall deny a gaming license to any prospective High Security Employee or Primary Management Official if:

(1) The applicant fails to disclose any material fact to the Tribe or the State or their authorized agents during a background or security investigation; or

- (2) The applicant misstates or falsifies a material fact to the Tribe or the State during a background or security investigation.
- d. The Tribe may deny a gaming license to any prospective High Security Employee or Primary Management Official for any reason the Tribe deems sufficient. Such decisions to grant or deny a gaming license shall be consistent with the principles set forth in subsection A of section 6 of this Compact. In determining whether to deny a gaming license to any prospective High Security Employee or Primary Management Official, the factors to be considered by the Tribe shall include, but need not be limited to, the following:
 - (1) The applicant has been convicted of any crime (other than a crime listed in subparagraph a. of this paragraph) in any jurisdiction;
 - (2) The applicant has associated with persons or businesses of known criminal background, or persons of disreputable character, that may adversely affect the general credibility, honesty, integrity, security, fairness or reputation of the Tribe's gaming operation; or
 - (3) There is any aspect of the applicant's past conduct that the Tribe determines would adversely affect the honesty, integrity, security or fairness of Tribal gaming operation.
- e. After this Compact becomes effective, the Tribal Gaming Commission shall deny a gaming license to any prospective Low Security Employee who has committed a crime described in sub-subparagraphs (1) or (2) of subparagraph a. of this paragraph, within the time frames specified therein. The Tribal Gaming Commission may deny a gaming license to any Low Security Employee applicant who does not meet the criteria established in the remainder of this paragraph 5. Decisions to grant or deny a gaming license shall be consistent with the principles set forth in subsection A of Section 6 of this Compact.
- f. The Tribal Gaming Commission may reject an application if the applicant has not provided all of the information requested in the application.

8. Temporary licensing of employees.

- a. The Tribe may issue a temporary license to High Security Employees fifteen days after submission of the application to the Oregon State Police or upon completion of a review of the employee's application and completion of a computerized criminal history check and credit check by the Tribal Gaming Commission, if the applicant would not be disqualified on the basis of the results of the application review and preliminary checks. The Temporary license shall expire and become void upon completion of the full background check by the Oregon State Police and submission of the results to the Tribal Gaming Commission. If the employee does not qualify for a regular license, the Tribal Gaming Commission shall immediately void the temporary license and deny a regular license.
- b. The Tribal Gaming Commission may issue a temporary license to a Low Security Employee upon submission of the application to the Oregon State Police, or upon completion of a review of the employee's application and completion of a computerized criminal history check and credit check by the Tribal Gaming Commission, if the applicant would not be disqualified on the basis of the results of the application review and preliminary checks. Any Low Security Employee shall be subject to immediate license revocation if the Oregon State Police or the Tribal Gaming Commission determines that the employee does not meet the criteria established in subparagraph 7.A.5.d.
- c. For purposes of this paragraph, if an application is forwarded by mail to the Oregon State Police or the results of a background check by the Oregon State Police are provided to the Tribe by mail, the material is deemed to be submitted three days after the date of mailing.
- d. The provisions of this paragraph shall apply to any consultant retained by the Tribe to consult on Class III gaming activities or on Primary Management Official functions or duties. A consultant shall be subject to immediate license revocation if the Oregon State Police or the Tribal Gaming Commission determines that the consultant does not meet the criteria for licensure under Section 7.A.5.
- e. No temporary license may be granted under this paragraph to a Primary Management Official.

9. Background investigation during employment. The Tribal Gaming Commission or the Oregon State Police may conduct additional background investigations of any gaming employee at any time during the term of employment. If, after investigation, the Oregon State Police determine there is cause for the revocation or suspension of an employee's gaming license under the criteria established in paragraph 5 of this subsection 7.A., it shall promptly so report to the Tribal Gaming Commission, and furnish the Tribe with copies of all relevant information pertinent to such determination. The Tribal Gaming Commission shall review the State's report and supporting materials and if the Tribe concludes that good cause for revocation or suspension of an employee's gaming license exists under the criteria established in this subsection 7.A., the subject employee shall have his gaming license suspended or revoked according to the procedures set forth in the Tribal Gaming Ordinance and implementing regulations.
10. Duration of license and renewal. Any regular employee license shall be effective for not more than three (3) years from the date of issue except that a licensed employee who has applied for renewal may continue to be employed under the expired license until final action is taken on the renewal application in accordance with the provisions of paragraphs 2 to 5 of subsection A above. Applicants for renewal shall provide the Tribal Gaming Commission with updated information on a form provided or approved by the Oregon State Police but will not be required to resubmit historical data already provided. The Oregon State Police may perform a new background investigation for any employee whose license is renewed.
11. Revocation of license. The Tribal Gaming Commission may revoke the license of any employee pursuant to policies set forth in the Tribe's Gaming Ordinance. The Tribal Gaming Commission shall revoke the license of any employee upon determination that the employee does not meet the criteria described in paragraph 7.A.5. above.
12. Personnel Manual. The Tribe shall maintain a procedural manual for employees of the Tribal Gaming Operation that includes rules and regulations of conduct and disciplinary standards for breach of procedures.
13. Employee List. The Tribal Gaming Commission agrees to provide to the Oregon State Police, on a monthly basis, a list of all current employees of the Gaming Facility and to give notice to the Oregon State Police of any disciplinary action or termination of an employee related to the fairness, integrity, security or honesty of the Tribe's Class III gaming activities, and any suspension or revocation of an employee's gaming license.

B. Contracts with Manufacturers and Suppliers.

1. Major Procurement.

- a. The Tribe agrees not to execute, commence or consummate any contract for a Major Procurement until a background investigation has been completed by the Oregon State Police on the proposed Class III Gaming Contractor and shall not consummate procurement action for a Major Procurement without a written contract.
- b. The Tribal Gaming Commission shall submit any proposed Major Procurement to the State for review, comment and a background investigation of the proposed Class III Gaming Contractor.
- c. Except as provided in paragraph 3 below, the Oregon State Police shall conduct a background investigation and provide a written report to the Tribal Gaming Commission within a reasonable period of time, but in no event shall the time for completion of such background investigations exceed sixty (60) days after the Oregon State Police receives from the proposed Class III Gaming Contractor both the Oregon State Police's fee for the background investigation under subsection C of this section, and full disclosure of all information requested by the Tribe and the Oregon State Police under paragraph 4 of this subsection, without written notice to the Tribe.
- d. If the Tribe requests, the Oregon State Police agrees to make its best efforts to complete a background investigation within less than sixty days. The Tribal Gaming Commission and the Oregon State Police may also agree that if business necessity or the protection of the honesty, integrity, fairness and security of the Gaming Operation require it, the State may perform an abbreviated review to enable the Tribe to execute a temporary contract while a complete background investigation is being performed. Any temporary contract executed under authority of this subparagraph, shall be rescinded immediately by the Tribe if the complete background investigation discloses that the Class III Gaming Contractor does not meet the criteria described in paragraph 6 of this subsection 7.B.

2. Sensitive Procurement.

- a. After a proposed Class III Gaming Contractor has submitted full disclosure of all information requested by the Tribe and the Oregon State Police under paragraph 4 of this subsection, and any necessary

investigation fee required by the Oregon State Police, the Tribe may execute, commence or consummate a contract for a Sensitive Procurement before a background investigation has been completed by the Oregon State Police on the proposed Class III Gaming Contractor. The Tribes shall not consummate a procurement action for a Sensitive Procurement without a written contract.

- b. The Tribal Gaming Commission shall submit a proposed contract for a Sensitive Procurement, or if there is no contract, a letter of intent to do business with the proposed Class III Gaming Contractor, to the Oregon State Police for a background investigation of the proposed Class III Gaming Contractor before execution of the contract.
 - c. The Oregon State Police shall conduct a background investigation, if the Oregon State Police considers it necessary, and provide a written report to the Tribal Gaming Commission. If the Class III Gaming Contractor does not meet the criteria described in paragraph 6 of this subsection 7.B. for approval of a contract, the contract shall be terminated by the Tribe and the Tribe agrees to discontinue doing business with the contractor so long as the contractor fails to meet the criteria for approval.
3. The Oregon State Police agrees to maintain a list of Class III Gaming Contractors that have been previously approved to do business in Oregon with any tribal gaming operation. If a Class III Gaming Contractor has been included in the list, the Tribe may execute, commence or consummate a contract with the Class III Gaming Contractor for a Sensitive Procurement upon giving notice of the contract to the Oregon State Police. If a Class III Gaming Contractor has been included in the list for Major Procurement, the Oregon State Police shall complete any necessary background investigation required under paragraph 1 of this subsection within thirty (30) days after any fees have been paid and full disclosure has been made to the Oregon State Police by the contractor.
 4. Class III Gaming Contractors, and any Owner or Key Employee of a Class III Gaming Contractor, shall provide all personal and business information required by the Oregon State Police to conduct its background investigation, before executing a contract or beginning to do business with the Tribe.
 5. The Tribe shall not consummate any Class III Gaming Contract with a Class III Gaming Contractor that does not grant both the Oregon State

Police and the Tribe access to such Class III Gaming Contractor's business and financial records upon request.

6. Criteria for Contract Denial or Termination.

- a. The Tribe shall not consummate any Major Procurement, and a contract for a Sensitive Procurement shall be immediately terminated, if the following conditions are either disclosed in the application materials or reported by the Oregon State Police relative to a particular Class III Gaming Contractor:
- (1) A conviction of the Class III Gaming Contractor or any Owner or Key Employee of the Class III Gaming Contractor for any felony other than a traffic offense, in any jurisdiction within the ten year period preceding the date of the proposed Class III Gaming Contract;
 - (2) A conviction of the Class III Gaming Contractor or any Owner or Key Employee of the Class III Gaming Contractor for any gambling offense in any jurisdiction;
 - (3) A civil judgment against the Class III Gaming Contractor or any Owner or Key Employee of the Class III Gaming Contractor, based in whole or in part upon conduct that would constitute a gambling offense, or a civil judgment entered within the ten year period preceding the date of the proposed Class III Gaming Contract against the Class III Gaming Contractor or any Owner or Key Employee of the Class III Gaming Contractor, based in whole or in part upon conduct that would constitute a felony other than a traffic offense;
 - (4) A failure by the Class III Gaming Contractor to disclose any material fact to the Oregon State Police or the Tribe or their authorized agents during initial or subsequent background or security investigations;
 - (5) A misstatement or untrue statement of material fact made by the Class III Gaming Contractor to the Oregon State Police or the Tribe or their authorized agents during initial or subsequent background or security investigations as determined by the Tribe or the Oregon State Police;

- (6) An association of the Class III Gaming Contractor with persons or businesses of known criminal background, or persons of disreputable character, that may adversely affect the general credibility, security, integrity, honesty, fairness or reputation of the Gaming Facility;
 - (7) Any aspect of the Class III Gaming Contractor's past conduct that the Tribe or the Oregon State Police determines would adversely affect the integrity, security, honesty or fairness of the Gaming Facility;
 - (8) The Class III Gaming Contractor has engaged in a business transaction with a tribe that involved providing gaming devices for Class III gaming conducted by such tribe without a state-tribal Class III gaming compact and in violation of IGRA; or
 - (9) A prospective Class III Gaming Contractor fails to provide any information requested by the Tribe or the Oregon State Police for the purpose of making any determination required by this subsection 6.B.
- e. The Tribe may deny or choose not to consummate any Class III Gaming Contract application for any reason the Tribe deems sufficient.
- f. Other criteria the Tribe may use to decide not to consummate any Class III Contract include, but are not limited to, the Tribe's determination that:
- (1) A person who is otherwise qualified to be a Class III Gaming Contractor owns, is an agent of or has any other interest in any person or business that is unqualified or disqualified to be a Class III Gaming Contractor, regardless of the qualifications of the person seeking to consummate the Class III Gaming Contract;
 - (2) A prospective Class III Gaming Contractor demonstrates inadequate financing for the business anticipated under the type of contract for which application is made. In determining whether financing is adequate, the Tribe shall consider whether financing is from a source that meets the qualifications of paragraph 5 of subsection A of this section, or paragraph 6 of subsection B of this section and whether

that financing is in an amount to ensure the likelihood of success in the performance of the contractor's duties and responsibilities; or

- (3) A prospective Class III Gaming Contractor or its employees fail to demonstrate business ability and experience to establish, operate, and maintain the business of the type of Class III Gaming Contract proposed.
- g. In evaluating whether to deny a contract related to Class III gaming based on subparagraph e or f of paragraph 6 of subsection B of this section, the Tribe may consider the following factors:
- (1) The nature and severity of the conduct that constituted the offense or crime;
 - (2) The time that has passed since satisfactory completion of the sentence, probation, or payment of the fine imposed;
 - (3) The number of offenses or crimes; and
 - (4) Any extenuating circumstances that enhance or reduce the impact of the offense or crime on the security, integrity, honesty, and fairness of the Tribal gaming enterprise.
- h. No Class III Gaming Contractor shall own, manufacture, possess, operate, own an interest in, or gain income or reimbursement in any manner from gaming activities or gaming devices in any jurisdiction unless the activities or devices are approved and certified by another state lottery, gambling or gaming control agency, Indian Tribe operating pursuant to an IGRA Compact, or National Indian Gaming Commission that has jurisdiction to approve that activity, and such ownership, manufacture, possession, operation, or income is disclosed to and approved by the Tribe and the Oregon State Police.
- i. The Tribe may reject an application if the applicant has not provided all of the information requested in the application.
- j. Notwithstanding subparagraph a. of this paragraph 6, if a prospective Class III Gaming Contract may not be consummated because of the requirements of this subsection 7.B., because a person previously associated with the Class III Gaming Contractor or an employee of the Class III Gaming Contractor has been

convicted of a crime or a civil judgment entered against the Class III Gaming Contractor or its employee within the ten year period preceding the date of the proposed Class III Gaming Contract, based in whole or in part upon conduct that allegedly constitutes a felony other than a traffic offense, the Tribe may enter into the proposed Class III Gaming Contract if the Class III Gaming Contractor has severed its relationship with the convicted or liable person or employee. Before the Tribe may enter into a Class III Gaming Contract under this subparagraph, the Oregon State Police and the Tribe must agree that the relationship between the Class III Gaming Contractor and the convicted or liable person or employee has been severed. For purposes of this subparagraph, a relationship is severed if the convicted or liable person or employee has no continuing connection with the direction or control of any aspect of the business of the Class III Gaming Contractor, and the convicted or liable person or employee is no longer employed by the Class III Gaming Contractor in any capacity. The burden of showing to the satisfaction of the Tribe and the Oregon State Police that a relationship has been severed is on the Class III Gaming Contractor.

7. Rescission or Termination of Class III Gaming Contracts.

- a. The Tribe may rescind or terminate any Class III Gaming Contract pursuant to policies and procedures determined by the Tribe.
- b. Class III Gaming Contracts shall be subject to rescission or termination for cause consistent with the criteria established by paragraph 7.B.6. of this section. The contracts shall provide that Class III Gaming Contractors consent to rescission or termination of any Class III Gaming Contract for cause consistent with the criteria established by paragraph 7.B.6. of this section by virtue of entering into a Class III Gaming Contract, including temporary contracts.

8. Contractor Reporting Requirements.

- a. All Class III Gaming Contractors shall submit to the Tribe and the Oregon State Police any financial and operating data requested by the Tribe or the Oregon State Police.
- b. The Tribe and the State each may specify the frequency and a uniform format for the submission of such data on a case by case basis.

- c. The Tribe, the Oregon State Police, or their agents reserve the right to examine Class III Gaming Contractor tax reports and filings and the detailed records from which the tax reports are compiled.
- d. All Class III Gaming Contractors shall notify both the Tribe and the Oregon State Police of the transfer of a Controlling Interest in the ownership Class III Gaming Contractor.

9. Termination of Contract.

- a. No Class III Gaming Contract shall have a term longer than seven (7) years.
- b. The Tribe shall terminate a Class III Gaming Contract immediately upon the occurrence of any of the following:
 - (1) The Class III Gaming Contractor is discovered to have made any statement, representation, warranty, or certification in connection with the Class III Gaming Contract that is materially false, deceptive, incorrect, or incomplete;
 - (2) The Class III Gaming Contractor fails to perform any material requirements of the Class III Gaming Contract or is in violation of any material provision thereof, and fails to cure same within ten (10) days' written notice of such failure, or if such violation is not capable of cure within ten (10) days, fails to cure same within a reasonable period of time under the circumstances;
 - (3) The Class III Gaming Contractor, or any Owner, officer or key employee of the Class III Gaming Contractor is convicted of a felony or a gambling-related offense that reflects on the Class III Gaming Contractor's ability to perform honestly in carrying out the Class III Gaming Contract;
 - (4) The Class III Gaming Contractor jeopardizes the integrity, security, honesty, or fairness of the Gaming Facility; or
- c. The Tribe shall terminate a Class III Gaming Contract if the Tribe determines satisfactory performance of the Class III Gaming Contract is substantially endangered or can reasonably anticipate such occurrence or default.

C. Fees for Background Investigation.

1. The Oregon State Police shall be reimbursed its costs for performing background investigations made pursuant to this compact as provided in Section 10 of this compact, in accordance with the terms of this Compact.
2. The Oregon State Police will assess the cost of a background investigation of a Class III Gaming Contractor to such Class III Gaming Contractor. Class III Gaming Contractors are required to pay the investigation fee in full in advance. If the Class III Gaming Contractor refuses to prepay the investigation fee, the Oregon State Police shall notify the Tribe and the Tribe may pay the investigation cost or withdraw its request for the investigation.

D. Access to Contracts.

1. If a Primary Management Official is a corporation or other form of organization, such Primary Management Official shall provide the Oregon State Police at all times with a current copy of any management agreement with the Tribe that allows it to conduct Class III gaming on the Tribal trust land.
2. If a Primary Management Official is a corporation or other form of organization, such Primary Management Official shall furnish to the Tribe and the State complete information pertaining to any transfer of controlling interest in the management company at least 30 days before such change; or, if the Primary Management Official is not a party to the transaction effecting such change of ownership or interests, immediately upon acquiring knowledge of such change or any contemplated change.
3. The Tribe agrees to provide the Oregon State Police access to all Class III gaming related contracts.

4. In order to assure the honesty, integrity, fairness and security of the Tribe's Class III gaming activities, The Tribe agrees to provide the Oregon State Police, upon request, access to the contracts of all non-gaming contractors, suppliers and vendors doing business with the Gaming Facility twice annually, once during the annual compliance review described in Section 9(B)(1)(a) of this Compact and once at another time during the year selected by the Oregon State Police. At any other time if the Oregon State Police has reasonable grounds to suspect any criminal involvement with or infiltration of a non-gaming contractor, supplier or vendor, the Tribe agrees to give the Oregon State Police access to that non-gaming contract. Such documents shall remain the property of the Tribe.
- E. Nothing in this Compact shall grant any right to any person or entity having a contractual or employment relationship with the Tribe.
- F. Nothing in this Compact is intended to preclude the Tribe from denying, suspending or terminating a license for other reasons consistent with tribal law.

SECTION 8. REGULATIONS FOR OPERATION AND MANAGEMENT OF CLASS III GAMES.

- A. Gaming Regulations. Conduct of all Class III gaming activity authorized under this Compact shall be in accordance with the requirements of this Compact and federal substantive regulatory standards applicable to Class III gaming, the Tribal Gaming Ordinance and the Minimum Internal Control Standards set forth in the Appendix to this Compact. The provisions of the Appendix, "Tribal/State Minimum Internal Control Standards," are hereby incorporated into and made a part of this Compact. The Tribe and the State agree that the minimum standards set forth in the Appendix may be modified or supplemented by mutual agreement of the parties, and that subsequent amendment of this Compact shall not be necessary for any such modification or supplementation of the minimum standards set forth in the Appendix.
- B. Identification badges. The Tribe shall require all Gaming Operation employees to wear, in plain view, identification badges issued by the Tribal Gaming Commission that include photo and name, with the exception of employees assigned to covert compliance duties, who shall only be required to have on their person an identification badge. Oregon State Police employees shall not be required to wear identification badges.

- C. No credit extended. All gaming shall be conducted on a cash basis. Except as provided herein, no person shall be extended credit for gaming nor shall the Tribe permit any person or organization to offer such credit for a fee. This restriction shall not apply to credits won by players who activate play on video games of chance after inserting coins or currency into the games. Cashing checks in the class III gaming area constitutes extending credit under this subsection. This section shall not otherwise restrict the right of the Tribe or any other person to offer check cashing or install and accept bank card or credit card transactions in the same manner as is permitted at any retail business in the State.
- D. Prohibition on attendance and play of minors. No person under the age of twenty-one (21) shall participate in any Class III gaming authorized by this Compact. No person under the age of twenty-one (21) shall be allowed to play any Class III game operated under this Compact. If any person under the age of twenty-one (21) plays and otherwise qualifies to win any Class III game prize or compensation the prize or compensation shall not be paid. Employees under age twenty-one (21) whose non-gaming duties require their presence on the gaming floor may be present on the gaming floor. Notwithstanding the requirements of this subsection, the Tribe may employ any Indian employees eighteen (18) years of age and older who are required to perform gaming duties as part of their employment, *provided*, if the Tribe offers alcohol on the class III gaming floor, employees whose gaming duties require a presence on the class III gaming floor shall be at least twenty-one (21) years of age.
- E. Alcohol Policy. No alcohol shall be served in the Gaming Facility unless authorized by the Tribe as permitted by Federal law. Service of alcohol shall be in compliance with State laws and Oregon Liquor Control Commission licensing regulations as negotiated in a memorandum of understanding under this Compact. Nothing in this subsection shall permit the State to impose taxes on the sale of alcoholic beverages by the Tribe. No alcoholic beverages may be served free or at a reduced price to any patron of the Gaming Facility as a direct inducement to participate in any gaming.
- F. Prohibition of Firearms. With the exception of federal, state, county, city or tribal law enforcement agents or officers who are on official business, no person shall possess firearms within the Gaming Facility.
- G. Liability for damage to persons and property. During the term of this Compact, the Tribe shall maintain public liability insurance in an amount that is reasonable and consistent with prudent business practice, with limits of not less than \$250,000 for one person and \$2,000,000 for any one occurrence for any bodily injury or property damage. The Tribe's insurance policy shall have an endorsement providing that the insurer may not invoke tribal sovereign immunity up to the limits of the policy and it shall provide that the State, OSP, their

divisions, officers and employees are additional insureds, but only with respect to the Tribe's activities under this Compact. The Tribe shall indemnify, defend and hold harmless the State, its officers, directors, employees and agents from and against any claims, damages, losses or expenses asserted against or suffered or incurred by the State or its officers, directors, employees and agents (except as may be the result of their own negligence) based upon or arising out of any bodily injury or property damage resulting or claimed to result in whole or in part from any act or omission of the Tribe relating to the inspection of any gaming or gaming related facility pursuant to this Compact.

SECTION 9: INSPECTION AND ENFORCEMENT OF GAMING REGULATIONS.

A. Tribal Gaming Commission.

1. The Tribe has established and agrees to maintain a Tribal Gaming Commission with the independent authority to regulate gaming activities on Tribal lands. The Tribe agrees to provide such Commission with adequate resources to perform its duties under Tribal law and this Compact. The Commission shall not participate in any way in the management or operation of the Tribe's Class III gaming activities. Commission members may be removed only for cause by the Tribal Gaming Enterprise Board of Directors. The Tribe shall enact and enforce standards for the selection of Gaming Commission members which are substantively equivalent to or exceed the standards applicable to High Security Employees and Primary Management Officials.
2. The Tribal Gaming Commission shall have primary responsibility for the on-site regulation, control, and oversight of the gaming operation authorized by this Compact, and for the enforcement of this Compact on Tribal Lands and authority for surveillance as described in paragraph 9(A)2(12). The Tribal Gaming Commission's role shall include the following functions:
 - (1) Ensure compliance with all relevant laws, Compact provisions, regulations, internal controls, policies and procedures that are applicable to the operation of gaming activities on Tribal lands;
 - (2) Ensure the physical safety of patrons in the Gaming Facility and of personnel employed by the Tribal Gaming Operation;
 - (3) Ensure the safeguarding of assets transported to and from the Gaming Facility and cashier's cage department;

- (4) Ensure that Gaming Facility patrons and property are protected from illegal activity;
- (5) Ensure that persons suspected of crimes are detained for the purpose of notifying the law enforcement authorities;
- (6) Ensure that any and all unusual occurrences within the Gaming Facility are recorded in indelible ink in a bound notebook from which pages cannot be removed, and each side of each page of which is sequentially numbered, as follows:
 - (a) The assigned sequential number of the incident;
 - (b) The date;
 - (c) The time;
 - (d) The nature of the incident;
 - (e) The person involved in the incident; and
 - (f) The security employee assigned;
- (7) Ensure that logs relating to surveillance, security, cashier's cage, credit, video lottery terminals (showing when video machines opened), and video lottery terminal location are maintained;
- (8) Establish and maintain an updated list of persons barred from the gaming facility either because of their criminal history or because their association with career offenders or career offender organizations poses a threat to the honesty, security and integrity of gaming operations, and furnish that list to the State;
- (9) Obtain an annual audit by a Certified Public Accountant;
- (10) Ensure that a closed circuit television system in the cash room of the Gaming Facility is maintained and provide copies of floor plan and TV system to the State;
- (11) Ensure that a cashier's cage is maintained in accordance with industry standards for security;

- (12) Ensure that the training of surveillance personnel and operation of surveillance equipment protects the fairness, integrity, security and honesty of the Class III gaming activities, and that the Gaming Commission or other tribal entity independent of management of the Gaming Operation has unrestricted access to and ultimate decision-making authority over surveillance operations to fulfill its regulatory responsibilities (including the authority to review and approve the hiring and firing of surveillance employees and managers); and
- (13) Ensure that, subject to State review and approval, a method for resolving disputes with players is established.
- (14) Ensure that sufficient security personnel are employed and trained.

3. Tribal Gaming Inspector.

- a. Tribal Gaming Inspectors, as agents of the Tribal Gaming Commission, shall inspect the Gaming Facility at random during all hours of gaming operation, and shall have immediate access to any and all areas of the Gaming Facility for the purpose of ensuring compliance with the provisions of this Compact and Tribal ordinances, including the Tribal Gaming Ordinances, and regulations governing gaming, including applicable federal regulations. Any material violations of the provisions of this Compact, or of Tribal ordinances, including the Tribal Gaming Ordinances, or regulations by the Tribal Gaming Operation, a gaming employee, or any person on the premises whether or not associated with the Gaming Facility, shall be reported immediately to the Tribal Gaming Commission.

The Tribal Gaming Commission shall report such violations to the Oregon State Police within seventy-two (72) hours of the time the violation was noted. For purposes of this subparagraph, material violations include but are not limited to violations of the provisions of this Compact or of Tribal ordinances or regulations governing those matters identified in subparagraph c. of this paragraph.

- b. The Tribal Gaming Commission may designate any individual or individuals to perform the duties of Tribal Gaming Inspector, so long as each inspector performs those duties independently of the management of the Tribal Gaming Operation, and is supervised and evaluated by the Tribal Gaming Commission as to the performance of those duties.

- c. Tribal Gaming Inspectors shall monitor compliance with the requirements of applicable law, this Compact, regulations, internal controls, policies and procedures, including but not limited to:
- (1) Observe for compliance, on a monthly basis or more frequently as determined by the Tribal Gaming Commission, the following:
 - (a) Sensitive gaming inventories;
 - (b) VLT or table game drop;
 - (c) Soft count;
 - (d) Security and surveillance logs;
 - (e) Movement of cash within, into and outside the Gaming Facility;
 - (f) Surveillance procedures;
 - (g) Security procedures;
 - (h) Games controls;
 - (i) Integrity of VLT microprocessor or E-prom, CD rom, hard disk or other electronic decision-making technologies.
 - (2) Investigate any potential violations of the provisions of this Compact, and applicable regulations, internal controls, policies and procedures.
 - (3) Investigate any cash variance greater than \$100, and report the findings to the Tribal Gaming Commission, which shall report such variances to the Oregon State Police.
 - (4) Investigate customer disputes related to gaming that involve more than \$500 and that are not resolved by management of the Tribal Gaming Operation.

- (5) Report to the Tribal Gaming Commission, which shall report to the Oregon State Police, any criminal or regulatory issues that may affect the fairness, integrity, security and honesty of the Tribe's Class III gaming activities.
4. Reporting of Violation. A Tribal Gaming Inspector shall inspect the Gaming Operation at random during all hours of gaming operation, and shall have immediate access to any and all areas of the Gaming Facility for the purpose of ensuring compliance with the provisions of this Compact and Tribal ordinances. Any violations of the provisions of this Compact, or of Tribal ordinances by the Tribal Gaming Operation, a gaming employee, or any person on the premises whether or not associated with the Tribal Gaming Operation, shall be reported immediately to the Tribal Gaming Commission and reported to the State within seventy-two (72) hours of the time the violation was noted.
5. Investigations and Sanctions. The Tribal Gaming Commission shall investigate any reported violation of the Compact provisions and shall require the Gaming Operation to correct the violation upon such terms and conditions as the Tribal Gaming Commission determines to be necessary. The Tribal Gaming Commission shall be empowered by Tribal ordinance to impose sanctions within the jurisdiction of the Tribe against a gaming employee, or any other person directly or indirectly involved in, or benefiting from, the Tribe's Class III gaming activities.
6. Reporting to State. The Tribal Gaming Commission shall forward copies of all completed investigation reports and final dispositions to the State on a continuing basis. If requested by the Tribal Gaming Commission, the State shall assist in any investigation initiated by the Tribal Gaming Commission, and provide other requested services to ensure proper compliance with the provisions of this Compact, Tribal ordinances, Tribal Gaming Commission regulations or applicable laws of the State.

B. State Enforcement of Compact Provisions.

1. Monitoring. The Oregon State Police is authorized hereby to monitor the Tribal Gaming Operation as the State considers necessary to ensure that the operation is conducted in compliance with the provisions of this Compact. The Tribe and the State agree that the Oregon State Police must determine the manner in which it monitors the Tribe's Class III gaming activities independently of any influence or control by the Tribe. The Tribe may request removal of a State law enforcement officer or monitor on the basis of malfeasance, abuse of authority, or conduct disrespectful of Tribal institutions or culture. Effective performance of the officer's or

monitor's duties shall not be a basis for disapproval. The Oregon State Police, and other State officers designated in writing as provided in Section 14 of this Compact, shall have free and unrestricted access to all areas of the Gaming Facility during normal operating hours without giving prior notice to the Tribal gaming operation. The Tribe agrees that the State monitoring function includes at a minimum the activities identified in the Compact, the amendments and the memorandum of understanding entered into pursuant to Section 5(A)2 of this Compact, and that the actual, reasonable and necessary cost of monitoring activities shall be assessed to the Tribe as provided in Section 10 of this Compact. In addition to the regular monitoring functions of the Oregon State Police, the Tribe agrees that the Oregon State Police may conduct the following activities, the cost of which shall also be assessed to the Tribe as provided in Section 10 of this compact:

- a) An annual comprehensive compact compliance review which shall be planned and conducted jointly with the Tribal Gaming Commission, of the Gaming Operation to verify compliance with the requirements of this Compact and with the regulations and internal controls adopted by the Tribal Gaming Commission, including at a minimum review in the following areas: administrative controls (gaming management internal controls), gaming operations controls, drop boxes, station inventories, surveillance department controls, cashier cage controls, count room controls (security and surveillance), accounting department controls (security), general controls, (Compact regulatory requirements) blackjack controls, VLT controls, accounts payable, employee identification, gaming chip inventory for gaming floor and cage, physical examination of all class III gaming cards, chips, e-proms, paper stock, printers, keno balls, fill slips, video gaming devices, keno controls, off-track betting and security department controls;
- b) Periodic review of any part of the gaming operation in order to verify compliance with the requirements of this Compact and with the regulations and internal controls;
- c) Investigation of possible violations of this Compact or other gaming regulatory matters, whether discovered during the action, review, or inspection by the State during its monitoring activities, or otherwise;
- d) Investigation of possible criminal law violations that involve the conduct of the gaming operation whether discovered during the

action, review, or inspection by the State during its monitoring activities, or otherwise;

- e) Investigation of a non-gaming contractor, supplier, or vendor to the Gaming Operation where the Oregon State Police has reasonable grounds to believe such contractor, supplier, or vendor may be subject to criminal influence or infiltration, or as set forth in Section 7.D.3 of this Compact.
2. The Tribe agrees that if any Class III gaming activities are conducted or intermingled in such a way that they are inseparable from Class II gaming activities, such as surveillance of both Class III and Class II gaming operations by a single surveillance department, the Oregon State Police shall have full access to both for purposes of carrying out the duties of the Oregon State Police with respect to Class III gaming under this Compact. If regulatory issues related to Class II games arise during the State Police's monitoring activity, those concerns will be documented and immediately reported to the Tribal Gaming Commission.
 3. Access to Records. The State is authorized hereby to review and copy, during normal business hours, and upon reasonable notice, any and all Tribal records pertaining to the operation, management, or regulation of Class III Gaming by the Tribe, whether those records are prepared or maintained by the Tribe, the Tribal Gaming Commission or the Tribal Gaming Operation.
 - (a) The State believes that its activities under this Compact are subject to the State Public Records Law, ORS 192.410 to 192.505, and the Tribe acknowledges that this is the State's position. The State and Tribe acknowledge that the Tribe may contractually agree that any records created by or maintained by the State, including any records created or maintained in connection with the performance of the State's duties and functions under this Compact, belong to the State and are fully subject to the State Public Records Law. The Tribe agrees that the State can legally include such a contractual provision in this Compact. Any information concerning the Tribe's Class III gaming operation that is contained in state records may be subject to disclosure under this contractual provision under ORS 192.410 to 192.505 unless the State would be permitted to withhold that information from disclosure under ORS 192.410 to 192.505. Examples of the kind of information that may be withheld from disclosure by the State under appropriate circumstances include:
 - (1) "Trade secrets" as defined in ORS 192.501(2);

- (2) Investigatory information compiled for criminal law purposes as described in ORS 192.501(3);
 - (3) Information submitted in confidence, as provided in ORS 192.502(3), which could include, for example, information contained in state records which would reveal information about the operation of any Class III game or which would reveal information about the workings of the Gaming Operation that could reasonably assist a person in the conduct of activity that could adversely affect the fairness, integrity, security or honesty of the Class III gaming activities; or
 - (4) Any information the disclosure of which is specifically prohibited by state or federal law.
- (b) The parties contractually agree that for purposes of this Compact, applications submitted to and retained by the Oregon State Police for Class III gaming licenses are State records and may be subject to disclosure under ORS 192.410 to 192.505 unless the State would be permitted to withhold that information from disclosure under ORS 192.410 to 192.505.
 - (c) The parties contractually agree that for purposes of this Compact, information about the Tribe's Class III gaming activities, whether obtained from the Tribe or from any other source, that is included in a document prepared, owned, used or retained by the State in connection with its duties and functions under this Compact may be subject to disclosure under ORS 192.410 to 192.505 unless the State would be permitted to withhold that information from disclosure under ORS 192.410 to 192.505 or as otherwise provided by this Compact.
 - (d) The Tribe has agreed to allow the Oregon State Police access to sensitive financial, security and surveillance information that the Tribe considers confidential. The State acknowledges that the Tribe has voluntarily given the state access to this information and that the Tribe would not otherwise be required by law to do so. The State acknowledges that this information should reasonably be considered confidential. To the extent such information is included in any State records that are subject to disclosure, the State hereby obliges itself not to disclose this information when the public interest, including the public interest in maintaining the honesty,

integrity, fairness and security of the Tribe's Class III gaming activities, would suffer by such disclosure.

- (e) The State agrees to notify the Tribe promptly of any request for disclosure of documents containing information about the Tribe's Class III gaming activities. If the State decides to release any documents that contain information about the Tribe's Class III gaming activities, the State will notify the Tribe at least five (5) working days before any disclosure is made.
 - (f) Any dispute as to the disclosure of documents under this subsection shall be resolved according to the dispute resolution provisions of Section 16 of this Compact, but the parties agree that in any event the sole jurisdiction for the interpretation of the State Public Records law shall be the Oregon state courts.
 - (g) Nothing in this subsection precludes the State or the Tribe from disclosing information pursuant to state, tribal or federal rules of civil procedure or evidence in connection with litigation, a prosecution or criminal investigation, subject to any defenses either party may assert.
4. Investigation Reports. After completion of any inspection or investigation report, the Oregon State Police shall provide a copy of the report and, upon request, all supporting documentation, other than information which could reveal the identity of a confidential informant, to the Tribal Gaming Commission.

SECTION 10. STATE ASSESSMENT OF COSTS FOR OVERSIGHT.

- A. Assessment for State Monitoring, Oversight and Law Enforcement Costs.
- 1. The Tribe agrees that the Oregon Gaming Tribes have the collective responsibility to pay for the cost of performance by OSP of its activities authorized pursuant to this Compact, including associated overhead. The Tribe agrees to pay its fair share of the Oregon State Police costs pursuant to the formula set forth in this Section within 30 days of billing.
 - 2. To give the Oregon Gaming Tribes an opportunity for review and comment, the Oregon State Police shall distribute, during the development of its biennium budget, a draft of the Tribal Gaming Section portion of the budget to the Oregon Gaming tribes prior to submission of the budget to either the Governor or the Legislature. The Oregon State Police shall give

full consideration to the Oregon Gaming Tribes' comments on the Tribal Gaming Section budget. Notwithstanding the right of the Oregon Gaming tribes to comment on the Tribal Gaming Section budget, each Tribe retains the right to participate in any public review by either the Governor or the Legislature on the Oregon State Police budget as well as before the Emergency Board for any increase in the Oregon State Police budget.

3. Because of the government-to-government relationship between the Tribes and the State, the parties recognize that the obligation of the Tribe to pay for the Oregon State Police costs as provided by this Compact is unique. Nothing in this Compact is intended to, nor shall be construed as, creating a responsibility for the Tribe to pay for any other governmental services rendered by or received from the State.

4. The Tribe's monthly payment to the Oregon State Police shall be computed as follows:

a) The biennium budget for the Tribal Gaming Section shall be divided by 24 to determine the total monthly payment that must be made by the Oregon Gaming Tribes to the Oregon State Police for Compact related activities. This payment shall be referred to as the "OSP Monthly Payment."

b) Amounts received by the Oregon State Police from Class III Gaming Contractor license applicants, or any other gaming vendor license applicant, and from the payment for the assignment of Tribal Gaming Section officers to non-tribal gaming duties, shall reduce the OSP Monthly Payment owed by the Oregon Gaming Tribes, which reduced amount shall be referred to as the "adjusted OSP monthly payment." The reduction in the OSP Monthly Payment owed by the Oregon Gaming Tribes shall occur in the month the Oregon State Police receives such payments from third party sources.

c) The Tribe's monthly payment to the Oregon State Police shall be computed as follows:

No. of direct Service Hours billed to Siletz Tribal Gaming Operations	adjusted OSP X Monthly Payment	=	Tribes Share of OSP Monthly Payment
--	--------------------------------------	---	---

Total No. of Direct Service Hours
Billed to All Oregon Tribal Gaming
Operations

- d) Every six months, or biennium quarter, the Oregon State Police shall reconcile the total payments received from the Oregon Gaming Tribes and third party sources during the six month period. The total of these payments should equal one-fourth of the Oregon State Police/Tribal Gaming Section biennium budget. Any underpayment or overpayment shall adjust the amount owed by the Oregon Gaming Tribes the month following the reconciliation.

5. As used in this section:

- a) “Oregon Gaming Tribes” means any federally recognized Indian Tribes in Oregon engaged in Class III gaming pursuant to a Tribal-State Compact.
- b) “Direct Service Hours” means the actual time spent by Oregon State Police personnel in performing employee background checks, performing background checks on Class III Gaming Contractors or other gaming vendors (unless paid by the Class III Gaming Contractor or other gaming vendor), performing Compact monitoring functions (including the annual comprehensive compact compliance review), conducting an investigation, and traveling to and from the Gaming facility or the site of a Class III Gaming Contractor background investigation, for a particular Tribal Gaming Operation. This definition is in no way intended to limit OSP’s activities authorized pursuant to this Compact. The Oregon State Police shall keep direct service hour billing records setting forth the date work is performed, a brief description of the work performed and the amount of time spent.

6. The methodology for the payment of Oregon State Police costs shall begin on January 1, 1999.

- B. If the Tribe disputes the amount of the assessment under this Section, the Tribe shall timely pay the undisputed amount and within thirty (30) days of billing, shall notify OSP in writing of the specific nature of the dispute and the disputed amount. The parties shall meet and attempt to resolve the dispute. If the parties have not resolved the dispute within 15 days, the Tribe shall pay the disputed amount into an off-reservation escrow, mutually agreeable to the parties, with escrow instructions providing that the funds are to be released only upon the mutual authorization of the Tribes and the Oregon State Police. The parties shall share the reasonable costs of the escrow. The dispute shall then be resolved pursuant to the procedures set forth in section 6b(3) and (4) of this Compact.

If the Tribe fails to timely pay the disputed amount into escrow or timely pay the undisputed amount, OSP shall send written notice to the Chairman of the Tribe, informing him of OSP's authority to take further action. Fifteen (15) days after such notice is sent by OSP, the Oregon State Police may suspend any background checks that are in process or withhold authorization for the shipment of equipment, and/or pursue other remedies for Compact violations available under this Compact or IGRA.

SECTION 11. APPLICATION OF STATE REGULATORY STANDARDS.

A. Health and Safety Standards.

1. The Tribe agrees to adopt and enforce ordinances and regulations governing health and safety standards applicable to the Gaming Facility that are at least as rigorous as standards imposed by the laws and regulations of the State. The Tribe agrees to cooperate with any State agency generally responsible for enforcement of such health and safety standards outside Indian lands in order to assure compliance with such standards within the Gaming Facility. However, the Tribe shall have the exclusive regulatory jurisdiction over the enforcement of health, safety and environmental standards applicable to the Gaming Facility. The Tribe shall use its authority to assure that health and safety standards are met and maintained. Tribal ordinances and regulations governing water discharges from the Gaming Facility shall be at least as rigorous as standards generally imposed by the laws and regulations of the State relating to public facilities; provided, however, that to the extent that federal water discharge standards specifically applicable to the Tribal lands would preempt such State standards, then such federal standards shall govern.
2. Upon request by the State, the Tribe agrees to provide evidence satisfactory to the State that any new construction, renovation or alteration of the Gaming Facility performed after the effective date of this Compact satisfies applicable Tribal health, safety and environmental standards. The Tribe can demonstrate that it has satisfied this section by providing a certificate or other evidence of compliance from the appropriate state or local official responsible for enforcement of comparable state standards, or from a contractor who is certified by state or local government to evaluate such compliance.

3. As used in this subsection, "health, safety and environmental standards" include but are not limited to structural standards, fire and life safety standards, water quality and discharge standards, food handling standards, and any other standards that are generally applicable under state or federal law to a non-tribal facility that is open to the public for purposes of protecting the public within the facility. "Health, safety and environmental standards" does not include land use regulations or zoning laws.
 4. The Tribe agrees that the State may use state or local inspectors to verify compliance with this subsection. Such inspectors shall cooperate with Gaming Facility management to conduct such inspections in a manner that does not disrupt operations at the Gaming Facility, and shall be conducted only with advance notice to and permission of the Gaming Facility where practicable. If the State asserts that the Tribe is in breach of this subsection, and that the breach creates an immediate and substantial threat to the health or safety of the patrons or employees of the Gaming Facility, the Tribe agrees to take steps as are necessary to protect the public or employees until the breach is remedied. Resolution of any dispute as to what steps are necessary shall be conducted in the same manner as and under the principles and procedures established for resolution of operating disputes in section 6 of this Compact.
- B. Transportation Issues. The Tribe agrees to consult and cooperate with the Oregon Department of Transportation regarding any traffic issues arising out of the Gaming Operation and vehicles that patronize the Gaming Facility. To the extent the Gaming Facility contributes to any traffic impacts on surrounding city, county or State roads, the Tribe agrees to fund an appropriate proportion of improvements necessary to mitigate or reduce such impacts. The Tribe also agrees to participate in any community forum or process established to discuss or attempt to resolve traffic problems on Highway 101 at the North end of Lincoln City. If the State or Tribe disputes that the Tribe is contributing a fair share of necessary road improvements, taking into account any mitigation measures the Tribe adopts, the State or Tribe may initiate the dispute resolution procedure established under section 16 of this Compact.
- C. Report of Winnings. The Tribe shall report to the Oregon Department of Revenue gambling winnings paid to any person subject to Oregon Personal Income Tax on those winnings whenever the Tribe would be required to report those winnings to the Internal Revenue Service. The information shall be reported in the manner required by the Oregon Department of Revenue. The Tribe agrees that management of the Gaming Operation will withhold and remit personal income taxes from employee wages to the Oregon Department of Revenue in the manner prescribed by the Department of Revenue.

- D. Public Safety Issues. If local government officials believe that an off-Indian land public safety problem has been created by the existence of the Gaming Facility, the Tribe, or its designated representative, shall agree to meet with the mayor or county commission of the affected government to discuss whether a problem exists, and to develop mutually agreeable measures to alleviate the problem. The burden shall be on the local government officials to meet with the Tribe and to demonstrate that the public safety problem is directly attributable to the existence of the Gaming Facility. If an off-Indian land public safety problem has been created by the existence of the Gaming Facility, the Tribe shall undertake to perform any mutually agreeable and reasonable measures to alleviate the problem. If the Tribe and local government officials are unable to agree on measures to alleviate the problem, the State may initiate the dispute resolution process established in Section 16 of this Compact. Any burden imposed on the Tribe under this subsection shall be reasonable and proportionate to the problem created.
- E. Miscellaneous Issues. The State and the Tribe are executing simultaneously with this Compact a Memorandum of Understanding entitled “*Memorandum of Understanding between the Confederated Tribes of Siletz Indians of Oregon and the State of Oregon regarding Community Relations*” to address miscellaneous issues of State and local concern (MOU). The terms of the MOU, once properly executed, shall become effective and shall be incorporated by reference into this Compact upon approval of the Compact by the Secretary of the Interior and publication of such approval in the Federal Register. Any disputes arising under the MOU shall be resolved pursuant to Section 16 of the Compact.

SECTION 12. EFFECTIVE DATE; TERMINATION; AMENDMENTS.

- A. Effective Date. This Compact shall become effective upon execution by the State and by the Tribe and appropriate federal approval.
- B. Termination. This Compact shall remain in effect until such time as:
1. This Compact is terminated by written agreement of both parties;
 2. The State amends its Constitution or laws to criminally prohibit within the State conduct of all of the Class III gaming authorized by this Compact, for any purpose and conducted by any person, entity, or government;
 3. A court of competent authority makes a final determination that all of the Class III games authorized by this Compact are criminally

prohibited under the law of the State, and the determination has become final and enforceable;

4. The federal government amends or repeals IGRA so that a Compact is no longer required for the Tribe's exercise of Class III gaming; or
5. Either party materially breaches this Compact; but only after the dispute resolution process set forth in Section 16 of this Compact has been exhausted, and the breach has continued for a period of 60 days after written notice following the conclusion of the dispute resolution process, if the breach can be cured within such period. If the breach cannot be cured within 60 days, the time for termination shall be thirty (30) days after the time established in dispute resolution reasonably necessary to cure such breach.

C. Automatic Amendment.

1. If a Class III gaming activity authorized under Section 4 of this Compact is criminally prohibited for all purposes by all persons by State statute or Constitution, this Compact shall no longer authorize the Tribe to engage in that type of Class III game, and any provisions in this Compact authorizing such gaming shall be void and of no effect.
2. If a court decides that a Class III game authorized under this Compact is criminally prohibited as defined under IGRA, this Compact shall no longer authorize the Tribe to engage in that type of Class III game, and any provisions in this Compact authorizing such gaming shall be void and of no effect, but the Tribe shall be required to cease operating that Class III game only if and under the same circumstances and conditions as the State or any other affected person must cease operating the corresponding game under the court's decision.

D. Amendments.

1. Except as provided in subsection 12.C. above, this Compact shall not be amended unless one of the following conditions occur:
 - a. The State becomes a party to another Tribal-State Compact that authorizes a tribe other than the Confederated Tribes of the Siletz Indians of Oregon to engage in any Class III gaming activity or scope of gaming activity not permitted under the terms of this Compact;
 - b. One year elapses after the effective date of this Compact;

- c. The State amends State statute or Constitution to expand the type of Class III gaming permitted in the State for any purpose by any person, organization, or entity;
2. Paragraph 12.D.1. above does not authorize the Tribe to renegotiate the terms of this Compact that apply to those forms of gaming previously authorized by Section 4 of this Compact, unless the State voluntarily consents to such renegotiation or as is otherwise provided for in this Compact. Further negotiation of numbers of VLTs is specifically provided for in Section 4.F. of this Compact, and negotiation of Internet gaming is specifically provided for in Section 4.B.4 of this Compact.
3. Pursuant to paragraph 12.D.1., the State or the Tribe may by appropriate and lawful means, request negotiations to amend, replace or repeal this Compact. In the event of a request for renegotiation or the negotiation of a new agreement, this Compact shall remain in effect until renegotiated or replaced, unless sooner terminated under subsection 12.B. Such request to renegotiate shall be in writing and shall be sent by certified mail to the Governor of the State or the Chair of the Tribe at the appropriate office identified at Section 14 below. If a request is made by the Tribe, it shall be treated as a request to negotiate pursuant to IGRA. All procedures and remedies available under IGRA shall thereafter apply with the exception that the 180-day period for negotiation set forth at 25 U.S.C. 2710(d) shall be 100 days.

SECTION 13. DISCLAIMERS AND WAIVERS.

- A. Gaming at Another Location or Facility. The Tribe hereby waives any right it may have under IGRA to negotiate a Compact for Class III gaming at any other location or facility for a period of five (5) years from the effective date of this Compact, *provided*, that if any other Oregon Indian tribe operates Class III gaming at more than one location under a Compact with the State, the Tribe shall have the right to request immediate negotiations on the issue, *and provided further*, that the Tribe shall have the right to negotiate for Class III gaming at another location if some natural occurrence makes the Gaming Location unusable for a Gaming Facility.
- B. Status of Class II Gaming. Nothing in this Compact shall be deemed to affect the operation by the Tribe of any Class II gaming as defined in IGRA or to confer upon the State any jurisdiction over such Class II gaming conducted by the Tribe.

- C. Prohibition on Taxation by the State. Nothing in this Compact shall be deemed to authorize the State to impose any tax, fee, charge or assessment upon the Tribe or any Tribal gaming operation except for charges expressly authorized in accordance with this Compact.
- D. Preservation of Tribal Self-Government. Nothing in this Compact shall be deemed to authorize the State to regulate in any manner the government of the Tribe, including the Tribal Gaming Commission, or to interfere in any manner with the Tribe's selection of its governmental officers including members of the Tribal Gaming Commission. No licensing or registration requirement contemplated by this Compact shall be applicable to such officers with respect to their capacity as officers of the Tribe.
- E. This Compact is exclusively for the benefit of and governs only the respective authorities of and the relations between the Tribe and the State. Nothing in this Compact shall be construed as creating or granting any rights to any third party, or as establishing any objection or defense for any third party to any charge, offense or prosecution.
- F. Governing Law. The provisions of this Compact shall be construed consistently with the Indian Gaming Regulatory Act, and the laws of the State of Oregon. Tribal ordinances shall be construed consistent with tribal law.
- G. The Tribe and the State agree that any activities that must be performed under this amended and restated Compact to prepare for implementation of any new games authorized under Section 4 may be undertaken before the Secretary of the Interior approves this amended and restated Compact.
- H. Change in Federal Law. The Tribe reserves the right to take advantage of any change in federal law that permits additional gaming to be conducted by the Tribe without the need for a Compact. This Compact shall not be construed as a surrender by the Tribe of those rights.

SECTION 14. NOTICES.

All notices required or authorized to be served to the Oregon State Police shall be served by first class mail at the following address:

Captain
Oregon State Police
Gaming Enforcement Division
Salem, OR 97310

All other notices required or authorized to be served shall be served by first class mail at the following addresses:

Legal Counsel to the Governor
Office of the Governor
254 State Capitol
Salem, OR 97310

Tribal Council
Confederated Tribes of
Siletz Indians of Oregon
P.O. Box 549
Siletz, OR 97380

SECTION 15. SEVERABILITY.

In the event that any section or provision of this Compact is held invalid, or its application to any particular activity is held invalid, it is the intent of the parties that the remaining sections of the Compact and the remaining applications of such section or provision shall continue in full force and effect.

SECTION 16. DISPUTE RESOLUTION.

- A. At the discretion of either party, in the event either party believes that the other party has failed to comply with any requirement of the Compact, that party may invoke the following dispute resolution procedure in order to foster cooperation and avoid the costs of litigation:
1. The party asserting noncompliance shall serve written notice on the other party in the manner provided in section 14. The notice shall identify the specific provision of the Compact alleged to have been violated and shall specify the factual basis for the alleged noncompliance. The State and the Tribe shall thereafter meet within thirty (30) days in an effort to resolve the dispute.
 2. In the event the dispute is not resolved to the satisfaction of the parties within ninety (90) days after service of notice, either party may initiate an action against the other party in the United States District Court for the District of Oregon to interpret or enforce the provisions of this Compact. In the event that the Federal court declines jurisdiction, an action can be filed in a State court of competent jurisdiction to interpret or enforce the provisions of this Compact.
- B. Nothing in subsection 16.A. shall be construed to waive, limit or restrict any remedy that is otherwise available to either party to enforce the provisions of this Compact or limit or restrict the ability of the parties to pursue, by mutual agreement, alternative methods of dispute resolution.

- C. With respect to gaming not authorized by this Compact, nothing in this Compact shall be construed to limit the authority of the State or the federal government to take immediate action to enforce and prosecute the gambling laws of the State and the United States pursuant to 18 USC §1166 (Section 23 of IGRA).

SECTION 17. INTEGRATION

This compact is the complete and exclusive expression of the parties' intent.

EXECUTED as of the date and year above-written.

STATE OF OREGON

**CONFEDERATED TRIBES OF
SILETZ INDIANS OF OREGON**

**AMENDED AND RESTATED
TRIBAL-STATE COMPACT FOR REGULATION
OF CLASS III GAMING BETWEEN THE CONFEDERATED TRIBES OF THE
UMATILLA INDIAN RESERVATION AND
THE STATE OF OREGON**

PREAMBLE.

This Amended and Restated Compact is made between the State of Oregon (hereinafter "State") and the Confederated Tribes of the Umatilla Indian Reservation (hereinafter the "Tribes") and pertains to Class III gaming to be conducted on lands within the Umatilla Indian Reservation pursuant to the Indian Gaming Regulatory Act of October 17, 1988 (Public Law 100-497), 25 U.S.C. 2701 et seq. ("IGRA"), and reflects the sovereign status and jurisdictional authority of the Tribes and addresses the legitimate concerns of the State. The terms of this Compact are unique to these Tribes and reflect the fact that the lands that are the subject of this Compact have been held in trust by the United States since the Umatilla Indian Reservation was established in 1855, and that these lands may be used for Class III gaming under IGRA.

SECTION 1. TITLE.

THIS Compact is entered into this ____ day of _____, 1999, by and between The Confederated Tribes of the Umatilla Indian Reservation, a federally recognized Tribe of Indians, and the State of Oregon. Upon execution by the parties and by the Secretary of the Interior, this Amended and Restated Compact replaces the Compact entered into by the parties on November 18, 1993, and approved by the Secretary of the Interior on February 2, 1994, and Amendments I-VII thereto.

SECTION 2. FINDINGS.

WHEREAS, the Tribes are a federally recognized Indian Tribe and are the beneficial owner of, and government for, the Umatilla Indian Reservation located within the State of Oregon;

AND WHEREAS, the State and the Tribes are separate sovereigns and each respects the laws of the other sovereign;

AND WHEREAS, the public policy of the State is reflected in the Constitution, statutes and administrative rules of the State, which, at the time of execution of this Compact, authorize a variety of games classified as Class III games under IGRA;

AND WHEREAS, the Tribal public policy, as reflected in the Tribes' Constitution and ordinances adopted by the Tribes, is "to exercise and protect all existing and future tribal rights arising from any source whether treaty, federal statute, state statute, common law or otherwise; to achieve a maximum degree of self-government in all tribal affairs; and to protect and promote the interests of the Indians of the Umatilla Indian Reservation";

AND WHEREAS, the United States Congress has enacted IGRA which declares federal policy and provides a statutory basis for operation of gaming by the Tribes as a means of promoting Tribal economic development, self-sufficiency, and strong Tribal government;

AND WHEREAS, the Tribes exercise governmental authority over all lands within the Umatilla Indian Reservation;

AND WHEREAS, IGRA is intended to provide a statutory basis for regulation of gaming by the Tribes adequate to shield them from organized crime and other corrupting influences, to ensure that the Tribes are the primary beneficiary of the gaming revenues, and to ensure that gaming is conducted fairly and honestly by both the operators and players;

AND WHEREAS, Congress has declared that it is a principal goal of federal Indian policy to promote Tribal economic development, Tribal self-sufficiency and strong Tribal government;

AND WHEREAS, IGRA provides for a system of joint regulation by Indian Tribes and the Federal government (to the exclusion of the State) of Class I and II gaming on Tribal lands as defined in IGRA;

AND WHEREAS, IGRA establishes a system of agreements between Indian Tribes and States for the regulation of Class III gaming as defined in that Act;

AND WHEREAS, IGRA provides that Class III gaming activities are lawful on Tribal lands only if such activities are (1) located in a state that permits such gaming for any purpose by any person, organization or entity, (2) authorized by Tribal ordinance, and (3) conducted in accordance with a Tribal-State Compact;

AND WHEREAS, the Congressional intent in passing IGRA was to reaffirm a long and well-established principle of federal Indian law as expressed in the United States Constitution, reflected in federal statutes and articulated in decisions of the United States Supreme Court, that unless authorized by an act of Congress, the jurisdiction of State governments does not extend to Tribal lands;

AND WHEREAS, IGRA does not extend State jurisdiction or the application of State laws for any purpose other than jurisdiction and application of State laws to gaming conducted on Tribal land as set forth in this Compact;

AND WHEREAS, in IGRA, Congress recognized a role for State public policy and State law in the regulation of Class III Gaming;

AND WHEREAS, nothing in the Tribal-State Compact shall be construed to extend to any other activities or as an abrogation of other reserved rights of the Tribes or of the Tribes' sovereignty;

AND WHEREAS, IGRA is intended to expressly preempt the field in the governance of gaming activities on Tribal lands;

AND WHEREAS, the continued growth and success of tribal gaming depends upon public confidence and trust that the Tribal Gaming Operation is honest, fair and secure, and is free from criminal and corruptive influences;

AND WHEREAS, public confidence and trust can be maintained only if there is strict compliance with laws and regulations related to licensed gaming establishments, by all persons involved in the Tribal Gaming Operation;

AND WHEREAS, the Tribes and the State agree that the State functions of monitoring and oversight of tribal gaming operations will be funded by the tribal gaming industry;

AND WHEREAS, the relationship between the State and the Tribes rests on mutual trust and the recognition that each has a primary duty to protect the gaming public through separate, appropriate responsibilities during the life of current and future Compacts;

AND WHEREAS, the Tribes are authorized to act through Resolutions adopted by its Board of Trustees;

AND WHEREAS, the State of Oregon is authorized to act through the Governor of the State;

NOW THEREFORE, in consideration of the mutual undertakings and agreements herein set forth, the Tribes and the State enter into the following Compact:

SECTION 3. DEFINITIONS.

As used in this Compact, and in its Appendix and Exhibit:

- A. "Average Daily Drop" means the difference between total wagers made, minus the total prizes paid on Class III VLTs in a day, with that difference divided by the number of Class III VLTs on the gaming floor on that day:

$$\frac{\text{Total wagers} - \text{total prizes paid}}{\text{VLTs}}$$

The Average Daily Drop for a certain period is the total of the Average Daily Drops for each day in that period, divided by the number of days in that period:

Total Average Daily Drop for period
Days in period

- B. "Background investigation" means the security and financial history checks of an employee, licensee or applicant for Tribal contract for the operation or sale of Class III games to the Tribes.
- C. "Class III Gaming Contract" means a contract that involves a Major or a Sensitive Procurement.
- D. "Class III Gaming Contractor" is any individual, business or other entity that proposes to consummate, or in fact consummates a Class III Gaming Contract.
- E. "Consultant" means any person, other than an employee, who provides advice or expertise to the Tribal Gaming Operation concerning the operation or management of the Tribes' Class III gaming activities for compensation. "Consultant" does not include a person engaged for the purpose of training or teaching employees of the Tribal Gaming Operation if the contract for those services is no greater than one month in duration.
- F. "Controlling interest" means fifteen percent (15%) of the equity ownership of a company.
- G. "Counter Game" means keno and off-track pari-mutuel wagering.
- H. "Display" means the visual presentation of video lottery game features shown on the screen of a video lottery terminal.
- I. "Gaming Facility" means the building constructed for gaming purposes by the Tribes, and associated grounds, on Tribal trust lands within the Umatilla Indian Reservation immediately north and east of exit 216 on Interstate 84, more specifically described in Exhibit 1 to this Compact, (which is hereby incorporated by reference), and any property used to store Class III gaming equipment. If the size of the Gaming Facility is expanded as otherwise provided in this Compact, the term "Gaming Facility" shall thereafter refer to the expanded facility.
- J. "High Security Employee" means any natural person who participates in the operation or management of the Class III Tribal Gaming Operation, whether employed by the Tribes or by a person or entity providing on-site or off-site gaming operation or management services to the Tribes, including but not limited to: Tribal Gaming Operation administrators, managers and assistant managers, gaming facility surveillance or security personnel, dealers, croupiers, shift supervisors, cage personnel (including cashiers and cashier supervisors), drop and count personnel, Consultants, Video Lottery Terminal technicians, junket representatives; and any other person whose employment duties require or authorize uncontrolled access to areas of the Gaming Facility related to Class III gaming and which are not otherwise open to the public. The Tribal Gaming Commission or its inspectors shall not be considered "High Security Employees."

- K. "Key Employee" means any officer or any person who can substantially affect the course of business, make decisions, or is in a sensitive position in an organization or corporation that is a Class III Gaming Contractor or an applicant for a Class III Tribal gaming license.
- L. "Low Security Employee" means any employee of the Tribal Gaming Operation whose duties require the employee's presence in any area of the Gaming Facility where Class III gaming activities take place, but who is not a High Security Employee and who is not involved in the operation of Class III gaming.
- M. "Major Procurement" means any procurement action or contract for the following products, systems or services used in Class III gaming:
1. The printing of tickets;
 2. Any goods or services involving the receiving or recording of number selections or bets;
 3. Any goods, services, or products used to determine winners; or
 4. Video devices or other equipment, except equipment specifically included in the definition of Sensitive Procurement;
 5. A contract or license to use a patented game or game product;
 6. Accounting systems or surveillance systems;
 7. A contract that provides for, or the terms of which will make necessary, a continuing relationship over time (more than thirty days) between the parties; or
 8. A contract that involves or requires commitments by either party to the contract such that there would be substantial financial consequences to one of the parties if the contract or procurement action was terminated prematurely. For this purpose a contract involving consideration or value of \$100,000 or more shall be deemed to involve substantial financial consequences to one of the parties if the contract or procurement action was terminated prematurely.
- N. "Minimum Internal Control Standards" or "MICS" means the Tribal/State "Minimum Standards for Internal Controls" attached as the Appendix to this Compact, including revisions that may be agreed upon by the Tribal Gaming Commission and the Oregon State Police from time to time.
- O. "New Class III Games" means those Class III gaming activities authorized in this Compact in addition to blackjack, Video Lottery Terminals, keno, and off-track pari-mutuel wagering.

- P. "Oregon State Police" or "OSP" refers to the Tribal Gaming Section within the Gaming Enforcement Division, or that administrative unit charged with gaming enforcement regulatory responsibilities, of the Department of State Police established under Oregon Revised Statutes section 181.020, or its successor agency established by law.
- Q. "Owner" means any person or entity that owns 5% or more of the equity ownership of a company alone or in combination with another person who is a spouse, parent, child or sibling.
- R. "Primary Management Official" means any person, whether employed by the Tribes or the Tribal Gaming Operation, who:
1. Has administrative or high-level management responsibility for part or all of the Class III Tribal Gaming Operation, whether as an employee or under a management contract;
 2. Has authority --
 - a. to hire and fire supervisory employees of the Tribal Gaming Operation; or
 - b. to set or otherwise establish working policy for the Tribal Gaming Operation; or
 3. Is the chief financial officer or other person who has financial management responsibility for the Tribal Gaming Operation.
- S. "Sensitive Procurement" means any procurement action or contract that is not a "Major Procurement," for Class III gaming equipment (such as cards, dice, keno balls, roulette wheels, roulette balls, chips, tokens, VLT or keno paper, gaming tables, table layouts or the like), or any other products that are not used directly in the conduct of Class III gaming, but that directly affect the integrity, security, honesty, and fairness of the operation and administration of the Tribes' Class III gaming activities such as replacement parts for video lottery terminals (bill acceptors, printers), locks and keys for secure storage areas or gaming devices, or individual surveillance cameras.
- T. "Table Game" means any Class III game allowed under this Compact except video lottery games, keno, and off-track pari-mutuel wagering.
- U. "Tribal Gaming Operation" means the entity, whether or not separately incorporated, that operates Class III gaming under tribal authority, and receives revenues, issues prizes and pays expenses in connection with Class III games authorized under this Compact.

- V. "Tribal Gaming Ordinance" means the ordinance adopted by the Tribes to govern the conduct of Class III gaming, as well as non-Class III gaming activities, as required by IGRA. The Tribal Gaming Ordinance was initially approved by the Tribes' Board of Trustees by Resolution 94-13 on February 22, 1994. Any reference to the Tribal Gaming Ordinance shall also refer to any subsequent amendments to the ordinance.
- W. "Video Lottery Terminal" or "VLT" means an electrical or electromechanical device, component, or terminal that displays a ticket through the use of a video display screen, and that is available for consumer play upon payment of any consideration, with winners determined by the application of the element of chance and the amount won determined by the possible prizes displayed on the device, as more fully described in the Appendix to this Compact.

SECTION 4. AUTHORIZED CLASS III GAMING.

- A. This Compact shall be the only Compact pursuant to IGRA between the Tribes and State and any and all Class III gaming conducted in the Gaming Facility shall be pursuant to this Compact. To the extent that elements of this Compact need to be altered to incorporate changes to the agreements between the parties -- including to permit additional Class III gaming -- the parties shall provide such changes in accordance with subsection D of section 12 of this Compact.
- B. Authorized games.
1. Subject to the provisions of this Compact, the Tribes may engage in the following Class III games: Video Lottery Terminals, keno, off-track pari-mutuel wagering, blackjack, craps, roulette, pai-gow poker, Caribbean stud poker, let-it-ride, and big 6 wheel, as described in the Appendix. The Tribes may conduct off-track pari-mutuel wagering on races held at race courses within or outside the State. Any off-track pari-mutuel wagering on races held at race courses outside the State shall be conducted in compliance with the applicable requirements of the Interstate Horseracing Act of 1978, as amended, (15 U.S.C. §3001 to 3007).
 2. Subject to, and in compliance with, the provisions of this Compact, the Tribes may, subject to the provisions of Section 4.D., engage in any other Class III gaming activity that has been approved by the Nevada Gaming Commission or by an Indian tribe with an approved Class III Compact in the state in which the tribe conducts a gaming operation, provided, that for an Indian approved game, certification from the state where such tribe conducts gaming that such game is permissible under IGRA shall be provided, and Oregon State Police review and approval shall be required. Operation of any game under this paragraph must be pursuant to rules, procedures and internal controls for the new game at least as stringent as the Tribal/State Minimum Internal Control Standards set forth in the Appendix to this Compact and, where appropriate, subject to new MICS

developed and approved by both the Tribal Gaming Commission and Oregon State Police.

3. Before the Tribes offer a New Class III Game under this subsection 4.B., the Tribes and the State must agree that the Tribes have adopted appropriate internal controls, surveillance plans, game rules and procedures, as provided in subsection D of this Section, and that the Tribal Gaming Commission is fully prepared to regulate and the Oregon State Police fully prepared to monitor the new game. In the event a dispute exists between the Tribes and the State about whether a particular gaming activity can be offered by the Tribes under this Compact and under IGRA, such dispute shall be resolved pursuant to Section 16 of this Compact.
 4. This Compact is not intended to preclude the Tribes from seeking negotiation, consistent with the policies of IGRA and this Compact, to offer internet gaming in the event of a final federal judicial decision binding in Oregon, final State of Oregon judicial decision, or congressional legislative action permitting internet gaming. If the State disputes whether internet gaming may be offered consistent with this subsection and federal and/or state law, including IGRA, such dispute shall be resolved pursuant to Section 16 of this Compact. Compact negotiation as set forth in this subsection B.4 shall be initiated pursuant to Section 12.D of this Compact. No such gaming shall be offered until dispute resolution concludes and all legal appeals are final.
 5. This Section shall be construed consistent with federal classification of gaming activities under IGRA.
 6. The Tribes may not offer sports bookmaking, except as may be agreed to under section 12(D)(1)(a) of this Compact.
- C. Gaming location. Gaming authorized under this Compact shall be conducted only in the Gaming Facility building constructed for the purpose of Class III gaming. If another Oregon Tribe is authorized to operate a gaming facility on non-Tribal lands, the Tribes do not hereby abrogate any rights they may have under Section 20 of IGRA.
- D. Number of Video Lottery Terminals.
1. The number of Class III VLTs authorized by this Compact shall not exceed 800 except as increased pursuant to the process set forth in this subsection 4D. Subject to other terms of this Compact, the Tribes may determine in their discretion the location and spacing of Video Lottery Terminals within the Gaming Facility.
 2. The Tribes may request authorization for additional VLTs as follows. When the Tribal Gaming Operation has maintained 600 or more VLTs at an Average Daily Drop agreed on by the parties in a memorandum of

understanding, for each of any three consecutive months chosen by the Tribes, the Tribes may request an increase in the authorized number of VLTs. The Average Daily Drop should be determined based on the actual number of VLTs available for play on the floor, even if that number exceeds 600. There shall be no increase of authorized VLTs prior to execution of the memorandum of understanding. The Tribes shall make the request in writing to OSP. Upon verification of the Average Daily Drop by OSP, the number of authorized VLTs will increase to 880. Pursuant to the same procedures, the Tribes may request authorization for additional VLTs according to the following formula. When the Tribal Gaming Operation has maintained 660 or more VLTs at the agreed upon Average Daily Drop for each of any three consecutive months chosen by the Tribes, the number of VLTs authorized will increase to 968. The Average Daily Drop should be determined based on the actual number of VLTs available for play on the floor, even if that number exceeds 660. When the Tribal Gaming Operation has maintained 720 or more VLTs at the agreed upon average daily drop for each of any three consecutive months chosen by the Tribes, the number of VLTs authorized will increase to 1000. The Average Daily Drop should be determined based on the actual number of VLTs available for play on the floor, even if that number exceeds 720. Once the OSP has verified the requisite Average Daily Drop provided pursuant to this subsection, the number of authorized VLTs shall be automatically increased as provided herein without need to execute a Compact amendment.

3. After the Tribes are authorized to have 1000 VLTs, the Tribes may request negotiations regarding amending the Compact to increase the number of authorized VLTs, pursuant to subsection 12(D). In such an event, the scope of the Compact amendment shall be limited to the increase in the number of authorized VLTs, and directly related matters, unless otherwise agreed by the parties.
4. If a VLT allows play by more than one player at a time, each betting station for that VLT shall constitute one VLT for purposes of determining the authorized number of VLTs in this subsection 4D of the Compact.
5. The Tribes may maintain VLTs in storage at the Gaming Facility, so long as the total number of VLTs in operation and in storage does not exceed 110% of the authorized number of VLTs, and so long as the site and manner of storage is approved by the Oregon State Police, and the Oregon State Police are provided access to the storage site.

E. Addition of Authorized Games at Gaming Facility.

1. At least sixty (60) days before any New Class III Game authorized under this Compact is conducted at the Gaming Facility, the Tribal Gaming Commission shall:

- a) Ensure that the Tribal Gaming Operation develops rules and procedures for a system of internal controls for the new game that meets the minimum standards established in the Appendix to this Compact.
 - b) Require that the Tribal Gaming Operation provide appropriate training for all dealers, supervisors, surveillance personnel and any other employees involved in the conduct or regulation of the new game and for the Tribal Gaming Inspector, such that those employees have the knowledge and skills required under typical industry standards for the job function that employee performs, including but not limited to player money management and betting, card counting and detection of cheating methods. The Tribal Gaming Operation or Tribal Gaming Commission, as appropriate, shall notify the Oregon State Police prior to beginning training and shall provide the Oregon State Police opportunity to participate.
 - c) Ensure that the Tribal Gaming Operation establishes a security and surveillance plan for the new game that meets the minimum standards established in the Appendix hereto.
 - d) Adopt rules of operation for the game that meet the minimum standards established in the Appendix hereto, including rules of play and standards for equipment.
 - e) Notify the Oregon State Police that the Tribes propose to offer the new game to the public, and provide to the Oregon State Police for review all of the internal controls, regulations, plans, procedures and rules required under this paragraph 1 of this subsection.
2. The Tribes agrees to introduce new games authorized under this Section according to the following schedule:
- a) Within the sixty-day period after the Secretary of the Interior approves this Compact, the Tribes may offer the following six games: craps, roulette, Caribbean stud poker, big 6 wheel, let-it-ride, and pai-gow poker, authorized under paragraph 1 of subsection B of this Section.
 - b) If the Tribes choose, after the period of time specified in subparagraph a of this paragraph, for any game authorized by paragraph 2 of subsection B of this Section, one new game within a single calendar quarter.
 - c) The Tribes may offer new games sooner than the time tables established under this subsection if mutually agreed upon in writing by the Tribal Gaming Commission and the Oregon State Police.

F. Number of Table Games. The Tribes may operate a maximum of 40 tables of Table Games at the Gaming Facility.

G. Table Game Wager Limits.

1. The Tribes shall establish wager limits for all Table Games. The Tribes have established a current wager limit of \$500 per hand for house banked blackjack offered at the Gaming Facility, and the Tribal Gaming Commission has adopted regulations establishing a minimum level of experience, training and competence for dealers at those tables that were commensurate with the need to maintain the honesty, integrity, fairness and security of the Table Games.
2. For Table Games other than house banked blackjack, the initial wager limit under this Compact shall be \$500 initial wager per hand. The wager limit for house banked blackjack shall be increased to \$1,000 initial wager per hand. The Tribes may request an increase in the wager limit of any Table Game offered at the Gaming Facility, up to a maximum wager of \$1,000 initial wager per hand. The State shall not withhold its consent to an increase in the wager limit of any Table Game if there has been full compliance under the previous wager limit with the Minimum Internal Controls, the Tribal Gaming Ordinance, the rules of operation of that game or with the terms of this subsection for a period of ninety (90) days and upon mutual consent, which time frame can be extended by either party for a period not to exceed an additional 90 days. The amount of any increase in the wager limit must be agreed to by both the State and the Tribe before the limits are changed on the gaming floor. If, after an increase in the maximum wager limit for any Table Game, the State determines that there has been any significant problems with the conduct of any Table Game, the State may require that the maximum wager limit for that Table Game be reduced to the previously authorized maximum wager limit.
3. For purposes of this subsection 4G, “full compliance” means:
 - a) All of the rules, procedures and plans required under subsection 2 of this Section have been adopted and approved by the Tribal Gaming Commission, have been approved by OSP as meeting the Minimum Internal Control Standards, and have been implemented;
 - b) All training required by the Minimum Internal Control Standards and the regulations of the Tribal Gaming Commission is up to date;
 - c) The Tribal Gaming Commission has adopted policies and procedures that set forth appropriate sanctions for employees who fail to follow the regulations and internal controls of the

commission, gaming operation management has committed in writing to train employees and impose the sanctions for violations, and the Tribal Gaming Commission's procedures provide for investigation of possible violations by the gaming operation;

- d) The Tribal Gaming Commission has adopted and implemented procedures for direct reporting of possible violations to the Tribal Gaming Commission by any employee of the Tribal Gaming Operation; and
- e) The Tribal Gaming Commission has maintained records of investigations of all reports of possible violations, and has promptly reported confirmed violations to the Oregon State Police including the action taken by the Commission or Gaming Operation management to correct the failure, and the discipline or sanctions imposed.

- H. No wagers may be placed or accepted by telephone or other electronic medium, including over the internet or any future technology that simulates internet services, except as may be authorized in Section 4(B)4 of this Compact.
- I. Nothing in this Section 4 is intended to, nor shall be construed to, prohibit the use of telecommunications systems, including the internet, or successor technology, to conduct off-track pari-mutuel wagering and progressive VLT games as are being operated by the Tribes at the time of the execution of this Compact.

SECTION 5. JURISDICTION.

A. In General.

- 1. The Tribes and Federal Government shall have criminal jurisdiction over offenses committed by Indians within the Gaming Facility. The criminal laws of the Tribes, and the Federal Government where applicable, shall govern the criminal conduct of Indians at the Gaming Facility. The Tribes have a Police Department, a Tribal Court and an agreement with Umatilla County for incarceration of Indian offenders.
- 2. The State has criminal jurisdiction over offenses committed by non-Indians within the Gaming Facility and the Umatilla Indian Reservation. The criminal laws of the State shall be applicable to non-Indians and have the same force and effect at the Gaming Facility as they have on non-Tribal lands within the State. The enforcement of criminal laws with respect to non-Indians at the Gaming Facility shall be established pursuant to and by a Memorandum of Understanding to be executed by the Tribes and the Oregon State Police. The State shall make reasonable efforts to

enforce the criminal laws applicable to offenses committed by non-Indians within the Gaming Facility and the Reservation.

3. Consistent with their Memorandum of Understanding governing law enforcement coordination executed under the foregoing Subsection A(2) of Section 5 of this Compact, both the Tribes and the State, through their respective law enforcement agencies, agree to cooperate with one another in the investigation and prosecution of any gambling crime committed at the Gaming Facility. The Tribes and the State agree to cooperate in maintaining a state-wide system to identify and monitor persons excluded from the Gaming Facility or from any other tribal gaming facility in this State.
- B. Except as provided in a Memorandum of Understanding executed in accordance with the foregoing paragraph 2 of subsection A above, law enforcement officers of the State of Oregon, or officers designated by the State, shall have free access to anywhere within the Gaming Facility for the purpose of maintaining public order and public safety, conducting investigations related to possible criminal activity and enforcing applicable laws of the State with respect to non-Indians. Any law enforcement activities undertaken by law enforcement officers of the State shall be in compliance with this Compact, the Tribes' Extradition Code and the Cross Deputization Agreement executed by the Umatilla Tribal Police Department and the State. The Tribes, or individuals acting on their behalf, shall provide State law enforcement officers or officers designated by the State access to locked and secure areas of the Gaming Facility in accordance with the regulations for the operation and management of the Tribal Gaming Operation.
- C. Subject to the provisions of paragraph 1 of subsection B of section 9 of this Compact, the State may assign one or more officers to the Gaming Facility. The Tribes agree to provide appropriate training in Tribal culture and institutions to any officer assigned to the Gaming Facility.
- D. Nothing in this Compact shall be construed to affect the civil jurisdiction of the State under Public Law 280.

SECTION 6. PRINCIPLES GOVERNING TRIBAL GAMING OPERATIONS DECISIONS

- A. The Tribes and the State agree that maintaining the honesty, integrity, fairness and security of the Tribal Gaming Operation is essential both to the success of the enterprise, and to satisfy the interests of the State and of the Tribes. The Tribes and the State agree that both of them have a the responsibility to protect the citizens of this State who patronize the Tribes' Gaming Facility from any breach of security of the Tribal Gaming Operation. Accordingly, all decisions by the Tribes, the Tribal Gaming Commission and the management of the Tribal Gaming Operation, concerning regulation and operation of the Gaming Facility, including

those decisions expressly placed within the Tribes' discretion under the terms of this Compact, shall be consistent with each of the following principles:

1. Any and all decisions concerning regulation and operation of the Tribal gaming enterprise, whether made by the Tribes, the Tribal Gaming Commission or the management of the Tribal Gaming Operation, shall reflect the particularly sensitive nature of a Tribal Gaming Operation.
2. In order to maintain the honesty, integrity, fairness and security of the Tribal Gaming Operation, the Tribes, the Tribal Gaming Commission and the management of the Tribal Gaming Operation shall work diligently and take all reasonably necessary affirmative steps to prevent cheating and theft, and to protect the Tribal Gaming Operation from the influence or control by any form of criminal activity or organization.
3. The honesty, integrity, fairness and security of the Tribal Gaming Operation shall be of paramount consideration in awarding contracts, licensing and hiring employees, and in making other business decisions concerning the operation of the gaming enterprise. The Tribes, the Tribal Gaming Commission and the management of the Tribal Gaming Operation shall make no decisions that compromise the honesty, integrity, fairness or security of the Tribal Gaming Operation.
4. Regulation and operation of the Tribes' gaming activities shall be, at a minimum, consistent with generally accepted industry standards and practices, in order to maintain the honesty, integrity, fairness and security of the Tribal Gaming Operation.
5. In order to maintain the honesty, integrity, fairness and security of the Tribal Gaming Operation, as well as the primary regulatory licensing duties of the Tribal Gaming Commission, the Tribes shall abide by the principal that Commission members shall meet or exceed the licensing standards of high security employees in its appointments to the Commission under the Tribal Gaming Ordinance.

B. Procedure for Resolving Disputes Concerning Operational Decisions.

1. If the State, in good faith, believes that any decision by the Tribes relating to the employment or licensing of any employee, awarding of any contract or operation of the gaming enterprise is inconsistent with the principles set forth in subsection A of this section, or any other requirement of this section, the State may give written notice to the Tribes. The written notice shall describe the factual basis for the State's concern.
2. The parties shall meet and confer within 15 days after the Tribes receive the notice.

3.
 - a. If the State's concern is not resolved informally, either party may initiate non-binding arbitration within 45 days after the service of the written notice.
 - b. An arbitrator shall be selected in the following manner:
 - (1) The parties shall obtain a list of qualified arbitrators from U.S. Arbitration and Mediation of Oregon, or any other arbitration panel agreed to by the parties.
 - (2) Each party, in turn, shall strike one name from the list, until one name remains. The parties shall draw lots to determine which party makes the first strike.
 - c. Upon agreement by both parties, the arbitration proceeding shall be binding.
 - d. The parties shall divide the cost of the arbitration proceeding equally between them.
4. Upon conclusion of the arbitration proceeding, if the parties have not elected to be bound by that result, either party may initiate an action in the United States District Court for the District of Oregon as provided in section 16 of this Compact.
5. Expedited Procedure.
 - a. If the State, in good faith, believes that there is an immediate threat to the honesty, integrity, fairness and security of the Tribal Gaming Operation, and believes that substantial harm will result during the time that would pass if the procedure established in paragraphs 1 to 3 of this subsection is followed, the State may give written notice to the Tribes and the Tribal Gaming Commission. The written notice shall describe the factual basis for the State's concern. The written notice shall recommend specific action or actions the State believes will prevent substantial harm from occurring. The State and the Tribal Gaming Commission shall meet and confer, in person or by conference call, within 24 hours after the Commission, or any member thereof, receives the notice. The Tribal Gaming Commission shall consider the State's recommendation and immediately thereafter shall take such action that addresses the State's concern as is necessary to protect the honesty, integrity, fairness and security of the Tribal Gaming Operation. Nothing in this subparagraph shall preclude either party from invoking the dispute resolution procedures provided in this Compact after the Commission has acted.

- b. On request of either party, the parties shall again confer within 5 days after the Tribes receive the notice.
 - c. If the State's concern is not resolved informally, the State may initiate an action in the United States District Court for the District of Oregon as provided in section 16 of this Compact.
 - d. An immediate threat to the honesty, integrity, fairness and security of the Tribal Gaming Operation includes but is not limited to the following examples:
 - (1) A criminal indictment is filed against any contractor, or owner or key employee of a contractor, or against any key employee of the Tribal Gaming Operation;
 - (2) A criminal organization or members of a criminal organization have obtained an ownership interest in a contractor, or a member of a criminal organization has become a key employee of a contractor;
 - (3) A malfunction of gaming equipment hardware or software causes patrons of the Gaming Facility to lose money, and that loss is directly related to the equipment malfunction;
 - (4) The security of gaming equipment has been impaired by loss, theft, or tampering;
 - (5) The physical safety or security of patrons is seriously at risk;
 - (6) A continuing pattern of failure by the Tribes, the Tribal Gaming Commission or management of the Tribal Gaming Operation to enforce compliance with the provisions of this Compact, or the regulations and internal controls governing the Tribal Gaming Operation.
6. The provisions of this section shall provide the exclusive method for resolving disputes as to the Tribes' decisions concerning hiring or contracting under section 7 of this Compact, or concerning operation of the Gaming Facility.

SECTION 7. LICENSING AND CONTRACTING.

A. Licensing of Gaming Employees.

1. All Primary Management Officials, High Security Employees and Low Security Employees to be employed in the Gaming Facility shall be licensed by the Tribal Gaming Commission in accordance with the provisions of this Compact.
2. All prospective employees -- Primary Management Officials, High Security Employees and Low Security Employees -- shall provide to the Tribal Gaming Commission at a minimum the following information on forms mutually agreed to by the Tribal Gaming Commission and the Oregon State Police:
 - a. Full name, including any aliases by which the applicant has been known;
 - b. Social security number;
 - c. Date and place of birth;
 - d. Residential addresses for the past five years;
 - e. Employment history for the past five years;
 - f. Driver's license number;
 - g. All licenses issued and disciplinary actions taken by any federal, state (or subdivisions thereof) or tribal gaming agency;
 - h. All criminal proceedings, except for minor traffic offenses, to which the applicant has been a party;
 - i. A current photograph;
 - j. Any other information required by the Tribal Gaming Commission.
3. In addition to the requirements of paragraph 2 of this subsection, prospective High Security Employees and Primary Management Officials shall provide two sets of fingerprints.
4. a. The Tribal Gaming Commission shall forward the applicant information to the Oregon State Police. The Oregon State Police may conduct a background investigation on all prospective Primary Management Officials and High Security Employees, and provide a written report to the Tribal Gaming Commission within a reasonable period of time, but in no event shall such background

checks exceed sixty (60) days without notice to the Tribes. In the event that the Tribal Gaming Commission conducts a background investigation, it shall submit the completed report to the Oregon State Police within 60 days.

- b. The Tribes may request the Oregon State Police to perform a background investigation on any prospective Low Security Employee. Upon such request, the Oregon State Police shall conduct a background check as provided in subparagraph a. of this paragraph.
5. a. Except as provided in paragraph 6 of this subsection, the Tribal Gaming Commission shall deny a gaming license to any High Security Employee or Primary Management Official who:
- (1) has, within the ten-year period preceding the date of license application, committed any felony other than a traffic offense, whether or not the crime resulted in a conviction or any such conviction has been expunged, under the law of any federal, state or tribal jurisdiction, or is the subject of a civil judgment under the law of any federal, state or tribal jurisdiction that is based on facts that constitute the elements of a felony other than a traffic offense, in that jurisdiction;
 - (2) has committed a crime involving unlawful gambling under the law of any federal, state (or subdivisions thereof) or tribal jurisdiction, whether or not conviction of such a crime has been expunged, or is the subject of a civil judgment under the law of any federal, state or tribal jurisdiction that is based on facts that constitute the elements of a crime involving unlawful gambling in that jurisdiction;
 - (3) has associated in a direct business relationship, whether as a partner, joint venturer or employer, with any other person who has committed a felony other than a traffic offense, or a crime involving unlawful gambling, under the law of any federal, state or tribal jurisdiction; which criminal activity is of such a nature that it could potentially affect the fairness, integrity, security or honesty of the Tribal Gaming Operation unless the prospective employee or official demonstrates that he or she did not and could not reasonably have been expected to know of the criminal activity or;

- (4) was employed by any other person who has committed a felony other than a traffic offense, or a crime involving unlawful gambling, under the law of any federal, state or tribal jurisdiction, if the prospective employee or official was in any way involved in the criminal activity as it occurred.
- b. The Tribal Gaming Commission shall deny a gaming license to any prospective High Security Employee or Primary Management Official if:
- (1) The applicant fails to disclose any material fact to the Tribes or the State or their authorized agents during a background or security investigation; or
 - (2) The applicant misstates or falsifies a material fact to the Tribes or the State during a background or security investigation.
- c. The Tribal Gaming Commission may deny a gaming license to any prospective High Security Employee or Primary Management Official for any reason the Tribal Gaming Commission deems sufficient. Such decisions to grant or deny a gaming license shall be consistent with the principles set forth in subsection A of section 6 of this Compact. In determining whether to deny a gaming license to any prospective High Security Employee or Primary Management Official, the factors to be considered by the Tribes shall include, but need not be limited to, the following:
- (1) The applicant has been convicted of any crime (other than a crime listed in subparagraph a. of this paragraph) in any jurisdiction;
 - (2) The applicant has associated with persons or businesses of known criminal background, or persons of disreputable character, that may adversely affect the general credibility, honesty, integrity, security, fairness or reputation of the Tribes' class III gaming activities; or
 - (3) There is any aspect of the applicant's past conduct that the Tribal Gaming Commission determines would adversely affect the honesty, integrity, security or fairness of the Tribal class III gaming activities.

- d. After this Compact becomes effective, the Tribal Gaming Commission shall deny a gaming license to any prospective Low Security Employee who has committed a crime described in subparagraphs (1) or (2) of subparagraph a. of this paragraph. The Tribal Gaming Commission may deny a gaming license to any prospective Low Security Employee applicant who does not meet the criteria established in the remainder of this paragraph 5. Decisions to grant or deny a gaming license shall be consistent with the principles set forth in subsection A of section 6 of this Compact.
- e. The Tribes may reject an application if the applicant has not provided all of the information requested in the application.
- f. No Primary Management Official or High Security Employee may be permanently licensed by the Tribal Gaming Commission until all background checks required under section 7.A.4. are completed.
- g. Denial of a license by the Tribal Gaming Commission is final.

6. Waiver of Disqualifying Criteria

- a. Notwithstanding the requirements of paragraph 5 of this subsection, if a prospective Primary Management Official, High Security Employee or Low Security Employee is disqualified for licensing under the provisions of Paragraph 5, above, and the Tribal Gaming Commission believes that there are mitigating circumstances that justify waiver of the disqualifying factor, it shall set forth the basis for its waiver decision in writing, which decision should specifically identify the factors listed under subparagraph (c) below, and the facts which justified the waiver. At either party's written request, the Tribal Gaming Commission and Oregon State Police shall meet and confer within 15 days concerning the waiver request.
- b. The waiver decision of the Tribal Gaming Commission shall be transmitted to the Oregon State Police for its review and approval. The Oregon State Police shall give due consideration to the basis for the Tribal Gaming Commission's waiver decision in exercising its right to approve or disapprove the waiver request. Oregon State Police approval of the Tribal Gaming Commission waiver decision shall not be arbitrarily denied.
- c. Waiver of disqualification of licensing or employment may be based on one or more of the following circumstances:
 - (1) Passage of time since conviction of crime;
 - (2) The applicant's age at the time of conviction;
 - (3) The severity of the offense committed;

- (4) The overall criminal record of the applicant;
 - (5) The applicant's present reputation and standing in the community;
 - (6) The nature of the position for which the application is made; and
 - (7) The nature of a misstatement or omission made in the application.
 - (8) Whether the applicant is an enrolled member of the Tribes or otherwise a resident of the Umatilla Indian Reservation who is enrolled or otherwise enrolled in another federally recognized Indian Tribe.
 - (9) In the event that the applicant was convicted of a crime that was due in part to alcohol or drug dependency, the applicant's participation in any treatment program for this dependency and/or the applicant's progress in recovery from this dependency.
 - (10) Whether the offense committed is of such a nature that it could potentially affect the fairness, integrity, security and honesty of the Tribal Gaming Operation.
 - (11) Whether the Tribal Gaming Commission has personal or direct knowledge of the applicant.
 - (12) Whether the Tribal Gaming Commission has imposed any conditions on the applicant's license, such as a probationary period, restrictions on duties or specific kinds of supervision.
- d. The Oregon State Police may approve a waiver subject to conditions, such as a probationary period, restrictions on duties or specific kinds of supervision.
 - e. Any Oregon State Police disapproval of a Tribal Gaming Commission waiver decision shall be subject to dispute resolution as provided in Sections 6(B)(3)-(4) of this Compact.
 - f. No gaming employee license granted by the Tribal Gaming Commission prior to the execution of this Compact shall be revoked or renewal denied solely because of the change in licensing criteria set forth in Section 7(A)(5) of this Compact from the different licensing criteria set forth in the previous Compact between the parties. However, this provision shall not prevent revocation or denial of such a license under the new licensing criteria based on

7. Temporary licensing of employees.

- a. The Tribal Gaming Commission may issue a temporary license to High Security Employees fifteen days after submission of the application to the Oregon State Police, or upon completion of a review of the employee's application and completion of a

computerized criminal history check and credit check by the Tribal Gaming Commission, if the applicant would not be disqualified on the basis of the results of the application review and preliminary checks. The temporary license shall expire and become void upon completion of the full background check by the Oregon State Police and submission of the results to the Tribal Gaming Commission. If the employee does not qualify for a permanent license, the Tribal Gaming Commission shall immediately void the temporary license and deny a permanent license.

- b. The Tribal Gaming Commission may issue a temporary license to a Low Security Employee upon submission of the application to the Oregon State Police, or upon completion of a review of the employee's application and completion of a computerized criminal history check by the Tribal Gaming Commission, if the applicant would not be disqualified on the basis of the results of the application review and preliminary checks. Any Low Security Employee shall be subject to immediate license revocation if the Oregon State Police or the Tribal Gaming Commission determines that the employee does not meet the criteria established in subparagraph 7.A.5.d.
 - c. For purposes of this paragraph, if an application is forwarded by mail to the Oregon State Police or the results of a background check by the Oregon State Police are provided to the Tribal Gaming Commission by mail, the material is deemed to be submitted three days after the date of mailing.
 - d. No temporary license may be granted under this paragraph to a Primary Management Official or to a Consultant performing or consulting on Primary Management Official functions or duties.
8. Background investigation during employment. The Tribes may request the State to conduct additional background investigations of any gaming employee at any time during the term of employment. The State shall report to the Tribes any cause for the dismissal of any employee under the criteria established in paragraph 5 of subsection A above, and furnish the Tribes with copies of all relevant information. The Tribes shall review the State's report and supporting materials and if the Tribes conclude that good cause for dismissal is shown under the criteria established in paragraph 5 of subsection A above, the subject employee may be dismissed. An employee's license shall be revoked if the Tribes would have been required to deny employment to that employee under the provisions of paragraph 5 of subsection A above.

9. Duration of license and renewal. Any employee license shall be effective for not more than three (3) years from the date of issue except that a licensed employee who has applied for renewal may continue to be employed under the expired license until final action is taken on the renewal application in accordance with the provisions of paragraphs 2 to 5 of subsection A above. Applicants for renewal shall provide the Tribal Gaming Commission with updated information on a form mutually agreed to by the Oregon State Police and the Tribal Gaming Commission but will not be required to resubmit historical data already provided. The Oregon State Police may perform an updated background investigation for any employee who has applied for license renewal.
10. Revocation of license. The Tribal Gaming Commission may revoke the license of any employee pursuant to policies and procedures set forth in the Tribal Gaming Ordinance. The Tribal Gaming Commission shall revoke the license of any employee upon determination that an event has occurred that would have prohibited the Tribes from hiring the employee under the criteria described in paragraph 5 of subsection A above.
11. The Tribes shall maintain a procedural manual for employees of the Tribal Gaming Operation that includes rules and regulations of conduct and disciplinary standards for breach of procedures.
12. The Tribal Gaming Commission agrees to provide to the Oregon State Police, on a monthly basis, a list of all current employees of the Gaming Facility and to give notice to the Oregon State Police of any disciplinary action or termination of an employee, related to the fairness, integrity, security or honesty of the Tribes' Class III gaming activities, and any suspension or revocation of an employee's gaming license.

B. Contracts with Manufacturers and Suppliers.

1. Major Procurements
 - a. The Tribes agree not to consummate any contract for a Major Procurement unless it is in writing and until a background investigation has been completed by the Oregon State Police on the proposed Class III Gaming Contractor.
 - b. The Tribal Gaming Commission shall submit any proposed Major Procurement to the State for review, comment and a background investigation of the proposed Class III Gaming Contractor.
 - c. Except as provided in paragraph 3 below, the Oregon State Police shall conduct a background investigation and provide a written report to the Tribal Gaming Commission within a reasonable period of time, but in no event shall the time for completion of such

background investigations exceed sixty (60) days after the Oregon State Police receives from the proposed Class III Gaming Contractor both the Oregon State Police's fee for the background investigation under subsection C of this section, and full disclosure of all information requested by the Tribes and the Oregon State Police under paragraph 4 of this subsection, without written notice to and consent by the Tribes.

- d. If the Tribes request, the Oregon State Police agrees to make its best efforts to complete a background investigation within less than sixty days. The Tribal Gaming Commission and the Oregon State Police may also agree that if business necessity or the protection of the honesty, integrity, fairness and security require it, the State may perform an abbreviated review to enable the Tribes to execute a temporary contract while a complete background investigation is being performed. Any temporary contract executed under authority of this subparagraph shall be rescinded immediately if the complete background investigation discloses that the Class III Gaming Contractor does not meet the criteria described in paragraph 6 of this subsection 7.B.

2. Sensitive Procurements.

- a. After a proposed Class III Gaming Contractor has submitted full disclosure of all information requested by the Tribes and the Oregon State Police under paragraph 4 of this subsection, and any necessary investigation fee required by the Oregon State Police, the Tribes may execute or consummate a contract for a Sensitive Procurement before a background investigation has been completed by the Oregon State Police on the proposed Class III Gaming Contractor.
- b. The Tribal Gaming Commission shall submit a proposed contract for a Sensitive Procurement, or if there is no written contract, a letter of intent to do business with the proposed Class III Gaming Contractor, to the Oregon State Police for a background investigation of the proposed Class III Gaming Contractor before consummation of the contract.
- c. The Oregon State Police shall conduct a background investigation, if the Oregon State Police considers it necessary, and provide a written report to the Tribal Gaming Commission. If the Class III Gaming Contractor does not meet the criteria described in paragraph 6 of this subsection 7.B. for approval of a contract, the contract shall be terminated and the Tribes agree to discontinue doing business with the contractor so long as the contractor fails to meet the criteria for approval.

3. The Oregon State Police agrees to maintain a list of Class III Gaming Contractors that have been previously approved to do business in Oregon with any Tribal Gaming Operation. If a Class III Gaming Contractor has been included in the list, the Tribes may execute or consummate a contract with the Class III Gaming Contractor for a Sensitive Procurement upon giving notice of the contract to the Oregon State Police. If a Class III Gaming Contractor has been included in the list for Major Procurements, the Oregon State Police shall complete any necessary background investigation required under paragraph 1 of this subsection within thirty (30) days after any fees have been paid and full disclosure has been made to the Oregon State Police by the contractor.
4. Class III Gaming Contractors, and any Owner or Key Employee of a Class III Gaming Contractor, shall provide all personal and business information required by the Oregon State Police to conduct its background investigation, before executing a contract or beginning to do business with the Tribes.
5. The Tribes shall not consummate any Class III Gaming Contract with a Class III Gaming Contractor that does not grant both the Oregon State Police and the Tribes access to such Class III Gaming Contractor's business and financial records upon request.
6. Criteria for Denial of Contract Application.
 - a. The Tribes shall not consummate any Major Procurement, and the Tribes shall immediately terminate a contract for a Sensitive Procurement, if the following conditions are either disclosed in the application materials or reported by the Oregon State Police relative to a particular Class III Gaming Contractor:
 - (1) A conviction of the Class III Gaming Contractor or any Owner or Key Employee of the Class III Gaming Contractor for any felony other than a traffic offense, in any jurisdiction within the ten year period preceding the date of the proposed Class III Gaming Contract;
 - (2) A conviction of the Class III Gaming Contractor or any Owner or Key Employee of the Class III Gaming Contractor for any gambling offense in any jurisdiction;

- (3) A civil judgment against the Class III Gaming Contractor or any Owner or Key Employee of the Class III Gaming Contractor, based in whole or in part upon conduct that would constitute a gambling offense, or a civil judgment entered within the ten year period preceding the date of the proposed Class III Gaming Contract against the Class III Gaming Contractor or any Owner or Key Employee of the Class III Gaming Contractor, based in whole or in part upon conduct that would constitute a felony other than a traffic offense;
- (4) A failure by the Class III Gaming Contractor to disclose any material fact to the Oregon State Police or the Tribes or their authorized agents during initial or subsequent background or security investigations;
- (5) A misstatement or untrue statement of material fact made by the Class III Gaming Contractor to the Oregon State Police or the Tribes or their authorized agents during initial or subsequent background or security investigations as determined by the Tribes or the Oregon State Police;
- (6) An association of the Class III Gaming Contractor with persons or businesses of known criminal background, or persons of disreputable character, that may adversely affect the general credibility, security, integrity, honesty, fairness or reputation of the Gaming Facility;
- (7) Any aspect of the Class III Gaming Contractor's past conduct that the Tribes or the Oregon State Police determines would adversely affect the integrity, security, honesty or fairness of the Gaming Facility;
- (8) The Class III Gaming Contractor has engaged in a business transaction with a tribe that involved providing gaming devices for Class III gaming conducted by such tribe without a state-tribal Class III gaming compact in violation of IGRA; or
- (9) A prospective Class III Gaming Contractor fails to provide any information requested by the Tribes or the Oregon State Police for the purpose of making any determination required by section 7(B)(6).

- b. The Tribes may choose not to consummate any Class III Gaming Contract for any reason the Tribes deem sufficient.

- c. In evaluating whether to deny a contract related to Class III gaming based on subparagraph e or f of paragraph 6 of subsection B of this section, the Tribes may consider the following factors:
- (1) The nature and severity of the conduct that constituted the offense or crime;
 - (2) The time that has passed since satisfactory completion of the sentence, probation, or payment of the fine imposed;
 - (3) The number of offenses or crimes; and
 - (4) Any extenuating circumstances that enhance or reduce the impact of the offense or crime on the security, integrity, honesty, and fairness of the Tribal gaming enterprise.
- d. No Class III Gaming Contractor shall own, manufacture, possess, operate, own an interest in, or gain income or reimbursement in any manner from Class III gaming activities or gaming devices in any jurisdiction unless the activities or devices are approved and certified by another state gambling or gaming control agency, or tribal gaming commission operating through an IGRA Compact (where necessary because of the involvement of Class III gaming), National Indian Gaming Commission, that has jurisdiction to approve that activity, and such ownership, manufacture, possession, operation, or income is disclosed to and approved by the Tribes and the Oregon State Police.
- e. Notwithstanding subparagraph a. of this paragraph 6, if a prospective Class III Gaming Contract may not be consummated because of the requirements of this subsection 7.B., because a person previously associated with the Class III Gaming Contractor or an employee of the Class III Gaming Contractor has been convicted of a crime or a civil judgment entered against the Class III Gaming Contractor or its employee within the ten year period preceding the date of the proposed Class III Gaming Contract, based in whole or in part upon conduct that allegedly constitutes a felony other than a traffic offense, the Tribes may enter into the proposed Class III Gaming Contract if the Class III Gaming Contractor has severed its relationship with the convicted or liable person or employee. Before the Tribes may enter into a Class III Gaming Contract under this subparagraph, the Oregon State Police and the Tribes must agree that the relationship between the Class III Gaming Contractor and the convicted or liable person or employee has been severed. For purposes of this subparagraph, a relationship is severed if the convicted or liable person or employee has no continuing connection with the direction or control of any aspect of the business of the Class III Gaming Contractor, and the convicted or

liable person or employee is no longer employed by the Class III Gaming Contractor in any capacity. The burden of showing to the satisfaction of the Tribes and the Oregon State Police that a relationship has been severed is on the Class III Gaming Contractor.

- f. The Tribes may reject an application if the applicant has not provided all of the information requested in the application.

7. Contractor Reporting Requirements.

- a. All Class III Gaming Contractors shall submit to the Tribes and the Oregon State Police any financial and operating data requested by the Tribes or the Oregon State Police.
- b. The Tribes shall specify the frequency and a uniform format for the submission of such data on a case by case basis.
- c. The Tribes, the Oregon State Police, or their agents reserve the right to examine Class III Gaming Contractor tax reports and filings and all records and records from which such tax reports and filings are compiled.
- d. All Class III Gaming Contractors shall notify both the Tribes and the Oregon State Police of the transfer of a Controlling Interest in the ownership Class III Gaming Contractor.

8. Termination of Contract.

- a. No Class III Gaming Contract shall have a term longer than seven (7) years.
- b. The Tribes shall terminate a Class III Gaming Contract immediately upon the occurrence of any of the following:
 - (1) The Class III Gaming Contractor is discovered to have made any material statement, representation, warranty, or certification in connection with the Class III Gaming Contract that is materially false, deceptive, incorrect, or incomplete;
 - (2) The Class III Gaming Contractor fails to perform any material requirements of the Class III Gaming Contract or is in violation of any material provision thereof, and fails to cure same within the time period provided in the contract for cure of such a breach or a reasonable time if the contract does not provide a specific period.

- (3) The Class III Gaming Contractor, or any Owner, officer or key employee of the Class III Gaming Contractor is convicted of a felony or a gambling-related offense that reflects on the Class III Gaming Contractor's ability to perform honestly in carrying out the Class III Gaming Contract;
 - (4) The Class III Gaming Contractor jeopardizes the integrity, security, honesty, or fairness of the Gaming Facility; or
- c. The Tribes shall terminate a Class III Gaming Contract if the Tribes determine satisfactory performance of the Class III Gaming Contract is substantially endangered or can reasonably anticipate such occurrence or default.

C. Fees for Background Investigations.

1. The Oregon State Police shall be reimbursed its costs for performing background investigations made pursuant to this Compact as provided in section 10 of this Compact.
2. The Oregon State Police will assess the cost of a background investigation of a Class III Gaming Contractor to such Class III Gaming Contractor. Class III Gaming Contractors are required to pay the investigation fee in full in advance. If the Class III Gaming Contractor refuses to prepay the investigation fee, the Oregon State Police shall notify the Tribes and the Tribes may pay the investigation cost or withdraw the request for the investigation.

D. Access to Class III Contracts.

1. If a Primary Management Official is a corporation or other form of organization, the Primary Management Official shall provide the Oregon State Police at all times with a current copy of any management agreement with the Tribes that allows it to conduct Class III gaming on the Tribal trust land.
2. If a Primary Management Official is a corporation or other form of organization, the Primary Management Official shall furnish to the Tribes and the Oregon State Police complete information pertaining to any transfer of controlling interest in the management company at least 30 days before such transfer; or, if the Primary Management Official is not a party to the transaction effecting such change of ownership or interests, immediately upon acquiring knowledge of such change or any contemplated change.

SECTION 8. REGULATIONS FOR OPERATION AND MANAGEMENT OF CLASS III GAMES.

- A. Gaming Regulations. Conduct of all Class III gaming activity authorized under this Compact shall be in accordance with the requirements of this Compact, the minimum standards set forth in the Appendix to this Compact, federal regulations applicable to Class III gaming, and the Tribal Gaming Ordinance. The provisions of the Appendix, "Tribal/State Minimum Internal Control Standards," are hereby incorporated into and made a part of this Compact. The Tribes and the State agree that the minimum standards set forth in the Appendix may be modified or supplemented by mutual agreement of the parties, and that subsequent amendment of this Compact shall not be necessary for any such modification or supplementation of the minimum standards set forth in the Appendix.

- B. Identification badges. The Tribes shall require all Gaming Facility employees to wear, in plain view, identification badges issued by the Tribes that include photo and name, except that employees assigned to covert compliance duties shall only be required to have on their person an identification badge. Prior approval of the Tribal Gaming Commission with notification to OSP is required for Gaming Facility employees to carry out covert compliance duties without the required identification badges in plain view. Oregon State Police employees shall not be required to wear identification badges.

- C. No credit extended. All gaming conducted pursuant to this Compact shall be conducted on a cash basis. Except as provided herein, no person shall be extended credit for gaming nor shall the Tribes permit any person or organization to offer such credit for a fee. Cashing checks in the Class III gaming area constitutes extending credit under this subsection. This restriction shall not apply to credits won by players who activate play on video games of chance after inserting coins or currency into the games. This section shall not restrict the right of the Tribes or any other person to install and accept bank card or credit card transactions in the same manner as is permitted at any retail business in the State.

- D. Prohibition on attendance and play of minors. No person under the age of twenty one (21) shall participate in any Class III gaming authorized by this Compact. If any person under the age of twenty one (21) plays and otherwise qualifies to win any Class III gaming prize or compensation, the prize or compensation shall not be paid. All employees of the Tribal Gaming Operation whose job duties require them to be present in areas where Class III gaming takes place shall be at least twenty-one (21) years of age, except that so long as the Tribes do not serve alcohol in areas where Class III gaming takes place, the Tribes may permit enrolled Indians to work on the Class III gaming floor who are at least eighteen (18) years of age. For purposes of this subsection, in the event the Tribes permit the sale of alcohol in the restaurant located in the casino, the activities of "Keno runners" taking bets from restaurant patrons shall not constitute the service of alcohol in areas where Class III gaming takes place.

- E. Prohibition of firearms. With the exception of federal, state, county or Tribal law enforcement agents or officers, no person shall possess firearms within the Gaming Facility.
- F. Alcohol Policy. No alcohol shall be served in the Gaming Facility unless authorized by the Tribes as permitted by Federal law. Currently, the Tribes do not legally permit the sale or possession of alcohol within the Umatilla Indian Reservation. If Tribal law is changed to permit sales at the Gaming Facility, the Tribes shall notify the State. Where required by federal law, service of alcohol shall be in compliance with State laws and Oregon Liquor Control Commission licensing regulations. Nothing in this subsection shall permit the State to impose taxes on the sale of alcoholic beverages by the Tribes. If alcohol is served in the Gaming Facility, no alcoholic beverages may be served free or at a reduced price to any patron of the Gaming Facility as an inducement to participate in any gaming.
- G. Liability for damage to persons and property. During the term of this Compact, the Tribes shall maintain public liability insurance with limits of not less than \$250,000 for one person and \$2,000,000 for any one occurrence for any bodily injury or property damage. The Tribes' insurance policy shall have an endorsement providing that the insurer may not invoke Tribal sovereign immunity up to the limits of the policy and it shall provide that the State, OSP, their divisions, officers and employees are additional insureds, but only with respect to the Tribes' activities under this Compact; provided that the Tribe shall not be liable for any claim or cause of action for injury or damages caused by the errors or omissions of the State, OSP, or their divisions, officers and employees. The Tribes shall indemnify, defend and hold harmless the State, its officers, directors, employees and agents from and against any claims, damages, losses or expenses asserted against or suffered or incurred by the State or its officers, directors, employees and agents (except as may be the result of their own negligence) based upon or arising out of any bodily injury or property damage resulting or claimed to result in whole or in part from any act or omission of the Tribes relating to the inspection of any gaming or gaming related facility pursuant to this Compact.

SECTION 9: INSPECTION AND ENFORCEMENT OF GAMING REGULATIONS.

- A. Tribal Gaming Commission.
 - 1. The Tribes have established, and will maintain, a Tribal Gaming Commission and have granted such Commission the independent authority to regulate gaming activities on Tribal lands. The Tribes agree to provide such Commission with adequate resources to perform its duties under Tribal law and this Compact. The Commission shall not be responsible for the management of the Tribes' Class III gaming activities. Commission members may be removed only for cause by the Tribes' Board of Trustees, as provided in the Tribal Gaming Ordinance.

2. The primary responsibility for the regulation, control and security of the gaming authorized by this Compact, and for enforcement of this Compact within the Umatilla Indian Reservation, shall be that of the Tribal Gaming Commission. The Tribal Gaming Commission's role shall include the promulgation and enforcement of rules and regulations to provide for the following:
 - a. Ensure compliance with all relevant laws;
 - b. Ensure the physical safety of patrons in, and of personnel employed by the Tribal Gaming Operation;
 - c. Ensure that the assets transported to and from the gaming facility are safeguarded;
 - d. Protect Gaming Facility patrons and property from illegal activity;
 - e. Detain persons suspected of crimes for the purpose of notifying the law enforcement authorities;
 - f.
 - (1) Ensure that the security department record any and all unusual occurrences within the Gaming Facility that come to the attention of that Department in indelible ink in a bound notebook from which pages cannot be removed, and each side of each page of which is sequentially numbered, as follows:
 - (a) The assigned sequential number of the incident;
 - (b) The date;
 - (c) The time;
 - (d) The nature of the incident;
 - (e) The person involved in the incident; and
 - (f) The security employee assigned;
 - (2) Ensure that the surveillance department record any and all unusual occurrences within the Gaming Facility that comes to the attention of that Department, which may be recorded in different form.
 - g. Ensure that logs are maintained relating to surveillance, security, cashier's cage, video lottery terminal (showing when video machines opened), and video lottery terminal location;

- h. Establish and maintain an updated list of persons barred from the Gaming Facility and furnish that list to the Oregon State Police as updated;
- i. Ensure that an annual audit by a Certified Public Accountant is obtained;
- j. Ensure that a closed circuit television system is maintained in the cash room of the Gaming Facility and that copies of the floor plan and TV system are provided to the Oregon State Police;
- k. Ensure that a cashier's cage is monitored in accordance with industry standards for security;
- l. Ensure that pari-mutuel clerks are sufficiently trained;
- m. Ensure that sufficient security personnel are employed and trained;
- n. Subject to State review and approval, establish a method for resolving disputes with players; and
- o. By March 31, 2000, ensure that surveillance equipment and personnel are managed and controlled independently of management of the Gaming Facility.

3. Inspections.

- a. Agents of the Tribal Gaming Commission shall inspect the Gaming Facility at random during all hours of Tribal Gaming Operation, and shall have immediate access to any and all areas of the Gaming Facility for the purpose of ensuring compliance with the provisions of this Compact, the Tribal Gaming Ordinance, the Tribal Gaming Commission Regulations and applicable federal regulations governing gaming. Any material violations of the provisions of this Compact, the Tribal Gaming Ordinance or of Tribal Gaming Commission Regulations or applicable federal regulations by the Tribal Gaming Operation, a gaming employee, or any person on the premises whether or not associated with the Gaming Facility, shall be reported immediately to the Tribal Gaming Commission.

The Tribal Gaming Commission shall report such violations that would materially affect the fairness, integrity, safety and honesty of the gaming operation to the Oregon State Police within seventy-two (72) hours of the time the violation was noted.

"Material," as used in this subparagraph, includes but is not limited to, reports of incidents, occurrences or violations that:

- i) can affect the integrity, security, honesty or fairness of the gaming operation or the customer participation of the games;
- ii) indicate potential or suspected criminal activity; or
- iii) involve operational irregularities with a potential impact of \$500 or greater.

The Tribes and the State agree that the Tribal Gaming Commission and the Oregon State Police Tribal Gaming Section representatives shall meet at least twice yearly to review and establish guidelines for reporting under the provisions of this subparagraph. Issues of disagreement may be forwarded to the parties' Compact negotiating teams for resolution which shall satisfy the requirements of section 16A(1) of this Compact. In the event the negotiation teams or other method of informal dispute resolution are unable to resolve the dispute, the remaining dispute resolution provisions of Section 16 of this Compact shall be utilized.

- b. The Tribal Gaming Commission may designate any individual or individuals to perform inspection duties, so long as each inspector performs those duties independently of the management of the Tribal Gaming Operation, and is supervised and evaluated by the Tribal Gaming Commission as to the performance of those duties.
- c. Inspections shall include monitoring compliance with the requirements of applicable law, this Compact, regulations, internal controls, policies and procedures that affect the fairness, integrity, security and honesty of the Tribal Gaming Operation, including but not limited to:
 - (1) Observation for compliance, on a monthly basis or more frequently as determined by the Tribal Gaming Commission, at least four of the following:
 - (a) Sensitive gaming inventories;
 - (b) VLT or table game drop;
 - (c) Soft count;
 - (d) Security and surveillance logs;
 - (e) Movement of cash within, into and outside the Gaming Facility;

- (f) Surveillance procedures;
- (g) Security procedures;
- (h) Games controls;
- (i) Integrity of VLT E-proms.

All areas will be covered at least annually.

- (2) Investigation of any potential violations of the provisions of this Compact, and applicable regulations, internal controls, policies and procedures.
 - (3) Investigation of any cash variance greater than \$500 and report the findings to the Tribal Gaming Commission, which shall report such variances to the Oregon State Police.
 - (4) Investigation of customer disputes related to gaming that are not resolved by management of the Tribal Gaming Operation.
4. Investigations and Sanctions. The Tribal Gaming Commission shall investigate any reported violation of the Compact provisions and shall require the Tribal Gaming Operation to correct actual violations upon such terms and conditions as the Tribal Gaming Commission determines to be necessary. The Tribal Gaming Commission shall be empowered by Tribal ordinance to impose fines and other sanctions within the jurisdiction of the Tribes against a gaming employee, or any other person directly or indirectly involved in, or benefiting from, the Tribal Gaming Operation. The State shall make all reasonable efforts to assist the Tribes in enforcing sanctions imposed by the Tribal Gaming Commission against non-Indians.
5. Notification to State. The Tribal Gaming Commission shall forward copies of all civil and criminal investigation reports and final dispositions to the Oregon State Police upon completion. If requested by the Tribal Gaming Commission, the Oregon State Police shall assist in any investigation initiated by the Tribal Gaming Commission, and provide other requested services to ensure proper compliance with the provisions of this Compact, the Tribal Gaming Ordinance, the Tribal Gaming Commission regulations and applicable federal regulations or applicable laws of the State.

B. State Enforcement of Compact Provisions.

1. a. **Monitoring.** The Oregon State Police is authorized hereby to independently monitor the Tribal Gaming Operation in the manner the State considers necessary to ensure that the operation is conducted in compliance with the provisions of this Compact. The Tribes may request removal of a State law enforcement officer or monitor on the basis of malfeasance, abuse of authority, or conduct disrespectful of Tribal institutions or culture. Effective performance of the officer's or monitor's duties shall not be a basis for disapproval. The Oregon State Police shall have free and unrestricted access to all areas of the Gaming Facility during normal operating hours without giving prior notice to the Tribal Gaming Operation. The Tribes agree that the Oregon State Police monitoring function includes at a minimum the activities identified in the Compact, any amendments and any memoranda of understanding entered into pursuant to this Compact, and that the actual, reasonable and necessary cost of monitoring activities shall be assessed to the Tribes as provided in Section 10 of this Compact. In addition to the Oregon State Police's regular monitoring functions, the Tribes agree that the Oregon State Police may conduct the following activities, which shall also be assessed to the Tribes as provided in Section 10 of this Compact:

- 1) An annual comprehensive review, which shall be pre-planned and conducted jointly with the Tribal Gaming Commission, of the Tribes' Class III gaming activities to verify compliance with the requirements of this Compact and with the regulations and internal controls adopted by the tribal gaming commission, including at a minimum review in the following areas: administrative controls (gaming management internal controls), Tribal Gaming Operations controls, drop boxes, station inventories, surveillance department controls, cashier cage controls, count room controls (security and surveillance), accounting department controls (security), general controls (Compact regulatory requirements), blackjack controls, VLT controls, accounts payable, employee identification, gaming chip inventory for gaming floor and cage, physical examination of all class III gaming cards, chips, e-proms, paper stock, printers, keno balls, fill slips, video gaming devices, keno controls, off-track betting and security department controls;
- 2) Periodic review of any part of the Tribal Gaming Operation in order to verify compliance with the requirements of this Compact, the Tribal Gaming Ordinance, and with the Tribal Gaming Commission regulations and applicable federal

regulations governing gaming and with the minimum internal control standards;

- 3) Investigation of possible violations of this Compact or other gaming regulatory matters, whether discovered during the action, review, or inspection by the State during its monitoring activities, or otherwise;
 - 4) Reasonable periodic review of contracts between the Tribes and the suppliers, vendors or contractors that provide non-gaming goods or services to the Gaming Facility for the limited purpose of determining whether such suppliers, vendors or contractors present a threat to the fairness, integrity, security and honesty of the Tribal Gaming Operation. During the course of the annual comprehensive review described in Section 9(B)(1)(a)(1) of this Compact, and at one other time during each calendar year, to be determined by the Oregon State Police, the Oregon State Police is authorized to conduct a reasonable review of contracts with suppliers, vendors or contractors that provide non-gaming goods or services to the Gaming Facility without any specific suspicion of wrongdoing. At any other time, if OSP has a reasonable suspicion that the supplier, vendor or contractor presents a threat to the fairness, integrity, security and honesty of the Tribal Gaming Operation, Oregon State Police is authorized to review contracts with that supplier, vendor or contractor. The Oregon State Police will report any concerns about a particular supplier, contractor or vendor to the Tribal Gaming Commission before taking any action.
- b. As provided in Section 5 of this Compact, the Tribes' law enforcement agency is responsible for investigation of criminal law violations by Indians on the Reservation. The Tribes and the State agree that the Tribes' criminal law jurisdiction does not prevent the State from investigating possible violations of this Compact or other gaming regulatory matters whether discovered during the action, review, or inspection by the State during its monitoring activities, or otherwise. The Tribes and the State agree that their respective law enforcement agencies shall cooperate in any investigation that involves or potentially involves both criminal and gaming regulatory violations.
2. The Tribes agree that if any Class III gaming activities are conducted or intermingled in such a way that they are inseparable from Class II gaming activities, such as surveillance of both Class III and Class II Tribal Gaming Operations by a single surveillance department, the Oregon State Police shall have full access to both for purposes of carrying out the duties

of the Oregon State Police with respect to Class III gaming under this Compact. Nothing in this subsection shall be construed as authorizing state regulation of Class II gaming, which is prohibited under Section 13B of this Compact.

3. Access to Records.

- (a) The State is authorized hereby to review and copy, during normal business hours, and upon reasonable notice, all records maintained by the Tribal Gaming Operation pertaining to the operation, management, or regulation of Class III Gaming by the Tribes, whether those records are prepared or maintained by the Tribes, the Tribal Gaming Commission or the Tribal Gaming Operation, including all Class III Gaming Contracts. Any records or copies removed from the premises shall be returned to the Tribes after use. Only the State employee(s) formally designated by the State, and approved by the Tribes, shall be authorized to access Tribal gaming records pursuant to this subsection.
- (b) The State acknowledges that records created and maintained by the Tribes, the Tribal Gaming Commission or the Tribal Gaming Operation belong to the Tribes.
- (c) The Tribes acknowledge that any records created or maintained by the State, including any records created or maintained in connection with the performance of the State's duties and functions under this Compact, belong to the State and are fully subject to the State Public Records Law, ORS 192.410 to 192.505. Any information concerning the Tribes' Class III gaming operation that is contained in state records may be subject to disclosure under ORS 192.410 to 192.505 unless the State would be permitted to withhold that information from disclosure under ORS 192.410 to 192.505. Examples of the kind of information that may be withheld from disclosure by the State under appropriate circumstances include:
 - (1) "Trade secrets" as defined in ORS 192.501(2).
 - (2) Investigatory information compiled for criminal law purposes as described in ORS 192.501(3).
 - (3) Information submitted in confidence, as provided in ORS 192.502(3).
 - (4) Any information the disclosure of which is specifically prohibited by state or federal law.

- (d) Applications submitted to and retained by the Oregon State Police for Class III gaming licenses are State records and may be subject to disclosure under ORS 192.410 to 192.505 unless the State would be permitted to withhold that information from disclosure under ORS 192.410 to 192.505.
- (e) Information about the Tribes' Class III gaming activities, whether obtained from the Tribes or from any other source, that is included in a document prepared, owned, used or retained by the State in connection with its duties and functions under this Compact may be subject to disclosure under ORS 192.410 to 192.505 unless the State would be permitted to withhold that information from disclosure under ORS 192.410 to 192.505.
- (f) The Tribes have agreed to allow the Oregon State Police access to sensitive financial, security and surveillance information that the Tribes consider confidential. The State acknowledges that the Tribes have voluntarily given the State access to this information and that the Tribes would not otherwise be required by law to do so. The State acknowledges that this information should reasonably be considered confidential. To the extent such information is included in any State records that are subject to disclosure, the State hereby obliges itself not to disclose this information when the public interest, including the public interest in maintaining the honesty, integrity, fairness and security of the Tribes' Class III gaming activities, would suffer by such disclosure.
- (g) The State agrees to notify the Tribes promptly of any request for disclosure of documents containing information about the Tribes' Class III gaming activities. If the State decides to release any documents that contain information about the Tribes' Class III gaming activities, the State will notify the Tribes at least five (5) working days before any disclosure is made.
- (h) The parties agree that any dispute as to the disclosure of documents under the Public Records Law or under this subsection shall first be brought in state court.
- (i) Nothing in this subsection precludes the State or the Tribes from disclosing information pursuant to state, tribal or federal rules of civil procedure or evidence in connection with litigation, a prosecution or a criminal investigation.

4. Investigation Reports. After completion of any inspection or investigation report, the State shall provide a copy of the report to the Tribal Gaming Commission.

- C. If local government officials believe that an off-reservation law enforcement problem has been created by the existence of the Gaming Facility, the Tribes shall meet with the mayor or county commission of the affected government to develop appropriate measures to alleviate the problem. The burden shall be on the local government officials to demonstrate that the law enforcement problem is directly attributable to the existence of the Gaming Facility. If an off-reservation law enforcement problem has been created by the existence of the Gaming Facility, the Tribes shall take all reasonably necessary steps to alleviate the problem. If the Tribes and local government officials are unable to agree on appropriate measures to alleviate the problem, the State may initiate the dispute resolution process established in section 6 of this Compact.

**SECTION 10. STATE ASSESSMENT OF COSTS FOR OVERSIGHT;
CONTRIBUTION FOR PUBLIC BENEFIT.**

A. Assessment for State Monitoring, Oversight and Law Enforcement Costs

1. The Tribes agree that the Oregon Gaming Tribes have the collective responsibility to pay for the cost of performance by OSP of its activities authorized pursuant to this Compact, including associated overhead. The Tribes agree to pay their fair share of the Oregon State Police costs pursuant to the formula set forth in this Section within 30 days of billing.
2. To give the Oregon Gaming Tribes an opportunity for review and comment, the Oregon State Police shall distribute a draft of the Tribal Gaming Section portion of the budget to the Oregon Gaming Tribes prior to submission of the budget to the Governor. The Oregon State Police shall give full consideration to the Oregon Gaming Tribes' comments on the Tribal Gaming Section budget. Notwithstanding the right of the Oregon Gaming Tribes to comment on the Tribal Gaming Section budget, each Tribe retains the right to participate in any public review by either the Governor or the Legislature on the Oregon State Police budget as well as before the Emergency Board for any increase in the Oregon State Police budget.
3. Because of the government-to-government relationship between the Tribes and the State, the parties recognize that the obligation of the Tribes to pay for the Oregon State Police costs as provided by this Compact is unique. Nothing in this Compact is intended to, nor shall be construed as, creating a responsibility for the Tribes to pay for any other governmental services rendered by or received from the State.
4. The Tribes' (as in the "Confederated Tribes of the Umatilla Indian Reservation") monthly payment to the Oregon State Police shall be computed as follows:

- a) The biennium budget for the Tribal Gaming Section shall be divided by 24 to determine the total monthly payment that must be made by the Oregon Gaming Tribes to the Oregon State Police for Compact related activities. This payment shall be referred to as the "OSP Monthly Payment."
- b) Amounts received by the Oregon State Police from Class III Gaming Contractor license applicants, or any other gaming vendor license applicant, and from the payment for the assignment of Tribal Gaming Section officers to non-tribal gaming duties, shall reduce the OSP Monthly Payment owed by the Oregon Gaming Tribes, which reduced amount shall be referred to as the "Adjusted OSP Monthly Payment." The reduction in the OSP Monthly Payment owed by the Oregon Gaming Tribes shall occur in the month the Oregon State Police receives such payments from third party sources.
- c) The Tribes' (as in the "Confederated Tribes of the Umatilla Indian Reservation") monthly payment to the Oregon State Police shall be computed as follows:

No. of direct Service Hours billed to CTUIR Tribal Gaming Operations	X	Adjusted OSP Monthly Payment	=	Tribes' Share of OSP Monthly Payment
Total No. of Direct Service Hours Billed to All Oregon Tribal Gaming Operation.				

- d) Every six months, or biennium quarter, the Oregon State Police shall reconcile the total payments received from the Oregon Gaming Tribes and third party sources during the six month period. The total of these payments should equal one-fourth of the Oregon State Police/Tribal Gaming Section biennium budget. Any underpayment or overpayment shall adjust the amount owed by the Oregon Gaming Tribes the month following the reconciliation.
5. As used in this section
- a) "Oregon Gaming Tribes" means any federally recognized Indian Tribes in Oregon engaged in Class III gaming pursuant to a Tribal-State Compact.
 - b) "Direct Service Hours" means the actual time spent by Oregon State Police personnel in performing employee background checks, performing background checks on Class III Gaming Contractors or other gaming vendors (unless paid by the Class III Gaming Contractor or other gaming vendor), performing Compact monitoring functions (including the annual comprehensive compact compliance review), conducting an investigation, and traveling to

and from the Gaming facility or the site of a Class III Gaming Contractor background investigation, for a particular Tribal Gaming Operation. This definition is in no way intended to limit OSP's activities authorized pursuant to this Compact. The Oregon State Police shall keep direct service hour billing records setting forth the date work is performed, a brief description of the work performed and the amount of time spent.

6. The methodology for the payment of Oregon State Police costs shall begin on January 1, 1999.

B. If the Tribes dispute the amount of the assessment under this Section, the Tribes shall timely pay the undisputed amount and within thirty (30) days of billing, shall notify OSP in writing of the specific nature of the dispute. If the parties have not resolved the dispute within 15 days, the Tribes shall pay the disputed amount into an off-reservation escrow, mutually agreeable to the parties, with escrow instructions providing that the funds are to be released only upon authorization by both the Tribes and the Oregon State Police. The parties shall share the reasonable costs of the escrow. The dispute shall then be resolved pursuant to the procedures set forth in section 6b(3) of this Compact.

If the Tribes fail to pay the disputed amount into escrow or timely pay the undisputed amount, the Oregon State Police may suspend any background checks that are in process or withhold authorization for the shipment of equipment, and/or pursue other remedies for compact violations available under this Compact.

C. Creation and Maintenance of Community Benefit Fund.

1. State Recognition. The State recognizes that the Tribes are unique among Oregon tribes in that:

- a) The Umatilla Indian Reservation has a checkerboard land ownership pattern where approximately 50% of the lands are owned in fee by non-Indians;
- b) Over 60% of the population of the Umatilla Indian Reservation is comprised of non-Indians and non-member Indians;
- c) The Tribes offer a broad array of governmental programs and services to all Reservation residents, which programs and services are in part paid for by Tribal revenues from the Gaming Facility; and
- d) Most of the governmental programs and services are provided by the Tribes free of charge.

- e) The State also recognizes that the Tribes have a long-standing history of constructive working relationships with the local governments that surround the Umatilla Indian Reservation.

2. Joint Recognitions.

- a) The Tribes and the State recognize that there may be both positive and negative impacts to the local community -- or the perception of such impacts -- as a result of the presence of the Tribes' gaming operation, some of which may be difficult or impossible to quantify.
- b) The Tribes and the State recognize that a formal process for collaborative decision-making regarding contributions to charitable causes is a way to ameliorate negative impacts (or the perception of negative impacts) from the Tribal Gaming Operation.
- c) The Tribes and the State recognize that a formal community benefit fund allows specific benefits from this Compact to be identified by the community at large as stemming from the gaming operations conducted pursuant to this Compact.

3. Establishment of Fund. The Tribes agree to establish a Fund within ninety (90) days after the introduction of any New Class III Games. Beginning in the first calendar quarter after the Tribes implement any of the New Class III Games, the Tribes will contribute to the Fund, from the proceeds of the Gaming Facility, an amount calculated as provided in paragraph 5 below. The Tribes' obligation to maintain and make contributions to the Fund shall terminate if and when the Tribes remove all of the New Class III Games from the Gaming Facility. The Tribes, in its discretion, may choose to make its contributions quarterly or annually. The Tribes shall name the Fund.

4. Fund Administration.

- a) The assets of the Fund shall be expended for the benefit of the public within Umatilla, Union, Morrow, and Wallowa counties. Grants from the Fund may be made to charitable organizations in the above counties, to the Tribes, or to local government bodies within the county whose boundaries the Umatilla Indian Reservation is located (Umatilla) for any of the following purposes: education, health, public safety, gambling addiction prevention, education and treatment, the arts, the environment, cultural activities, salmon restoration, historic preservation, and such other charitable purposes as may be provided in the by-laws of the Fund;

- b) The Fund will be administered by a board of five directors. Each director shall have an equal vote on actions of the board;
- c) The Tribes' Board of Trustees shall establish by-laws governing the conduct and discharge of the responsibilities of the Fund board of directors, after consultation with the Fund board of directors, which shall be consistent with the terms of this subsection; and
- d) The Tribes' Board of Trustees, or their designee, shall submit proposals for grants from the Fund to the directors, who shall make the final determination of the proposals to be funded in accordance with the by-laws. Grants shall be made on the basis of merit. The directors may reserve a portion of the Fund in a single year to fund a multi-year grant or grants.

5. Qualifications, Term and Selection of Directors.

- a) The membership of the board of directors shall be:
 - (1) One director from the Tribes' Board of Trustees, which person shall be recommended by the Chairman of the Board of Trustees and subject to the approval of the Board of Trustees;
 - (2) Two directors from the Tribes' membership, approved by the Board of Trustees; and
 - (3) Two directors who are not enrolled with the Tribes that are residents of Umatilla County, provided that only one shall be a resident of the City of Pendleton. Of these directors, one shall be nominated by the Umatilla County Commissioners, and the other director shall be nominated by the Pendleton City Council. Each director shall be subject to the approval of the Board of Trustees. The nominations from the Umatilla County Commissioners and the Pendleton City Council shall be submitted to the Governor for review and the opportunity to comment prior to submission of the nominations to the Board of Trustees for approval. The Governor shall be provided fifteen (15) days to provide comments. Alternatively, at the Tribes' discretion, the Tribes may request that the Governor nominate the two directors from a slate of candidates proposed by the Tribes; and
- b) Except for the initial board, directors shall serve two-year terms and may be removed before the end of their terms only for cause by the Board of Trustees. The initial board shall serve as follows: The director from the Board of Trustees, and the two directors

from the Tribes' membership shall serve for two years; the remaining members of the initial board shall serve for one year. Directors may be reappointed. Vacancies on the board of directors shall be filled within thirty (30) days by the appropriate appointing authority. Any director whose term has expired shall continue to serve until a successor has been appointed.

6. Calculation of Fund Contribution.

The Tribes' annual contribution to the Fund shall be based upon the Gaming Facility's net income as shown in the audited financial statement of the Gaming Facility for the fiscal year ending before the contribution is made. The contribution shall be calculated as follows:

- a) Deduct from the Gaming Facility's net income from all gaming and non-gaming activities before Tribal taxes all loan principal payments made by the Tribes for the Gaming Facility's capital, construction, and equipment costs;
- b) Multiply the result in subparagraph a) by six percent, which shall be the Tribes' community benefit fund contribution. However, because of the recognitions in paragraph 10(C)(1) of this section, the parties agree that the Tribes may in their discretion determine that the appropriate contribution to the Fund in any calendar year shall be less than six percent (6%); but in no event shall the contribution equal less than three percent (3%) of the result in subparagraph a of this paragraph.
- c) In addition to the Tribes' community benefit contribution set forth in subparagraph b of this paragraph, the Tribes also commit to using revenues derived from the Gaming Facility and from other unrestricted Tribal funds to provide governmental services to all residents of the Umatilla Indian Reservation. The Tribes shall provide an annual report to the State within 150 days after the close of the Tribal fiscal (calendar) year as follows:
 - (1) identifying the amount of gaming and unrestricted Tribal funds used to support Tribal governmental programs serving all residents of the Umatilla Indian Reservation, the nature of governmental services provided, and the extent to which the recipients of these services were charged fees or taxes for such services, if any; and
 - (2) identifying the charitable grant requests funded, the entities funded, the purposes for which funding was provided, the amount funded, and the total amount contributed to the Fund. The report shall also identify how the contribution to the Fund was calculated. The State may at its discretion

and expense perform an audit of the calculation of the contribution to the Fund.

- (3) The State agrees to keep the report confidential to the extent permitted by applicable law.

7. Audit.

For purposes of determining the Gaming Facility's net income, the Tribes and the State agree to use the audit conducted by the independent auditors selected by the Tribe to comply with IGRA's audit requirements. For purposes of this Section, the Tribes agree that their Gaming Facility auditor shall:

- a) Have recent casino audit experience with at least one other casino;
- b) Has at least one client with annual revenues in excess of \$50 million; and
- c) Must have received an unqualified report in its most recent peer review.

The determination of the net income of the Gaming Facility is subject to review by the State at its own expense. For purposes of this paragraph 10.C.6, the State may act through the Oregon State Police or through an official designated as provided in Section 14 of this Compact.

8. Termination or Modification of Fund Contributions.

The Tribes' contributions to the community benefit fund established as described in this subsection C may be discontinued if the Oregon Constitution is amended to remove the prohibition of casinos in the State. The Tribes' contributions to the community benefit fund may be discontinued if and when the Tribes remove all of the New Class III Games from the Gaming Facility. The Tribes and the State agree that if the Tribes are prohibited for any reason from offering blackjack or any of the Class III games listed in paragraphs 1 or 2 of subsection B of Section 4 of this Compact, the parties shall enter into negotiations to establish how the community benefit fund contribution provided for in this subsection shall be adjusted to reflect the impact of the discontinuation of those games on the net income of the Gaming Facility.

SECTION 11. APPLICATION OF REGULATORY STANDARDS.

A. Health and safety standards.

1. The Tribes agree to adopt and enforce ordinances and regulations governing health and safety standards applicable to the Gaming Facility that are at least as rigorous as standards imposed by the laws and regulations of the State. The Tribes agree to cooperate with any State agency generally responsible for enforcement of such health and safety standards outside the reservation in order to assure compliance with such standards within the Gaming Facility. However, the Tribes shall have the exclusive regulatory jurisdiction over the enforcement of health and safety standards applicable to the Gaming Facility. The Tribes shall use their regulatory jurisdiction to assure that health and safety standards are met and maintained. The Tribes agree to adopt and enforce ordinances and regulations governing water discharges from the Gaming Facility that are at least as rigorous as standards generally imposed by the laws and regulations of the State relating to public facilities; provided, however, that to the extent that federal water discharge standards specifically applicable to the Tribal lands would preempt such State standards, then such federal standards shall govern.
2. Upon request by the State, the Tribes agree to provide evidence satisfactory to the State that any new construction, renovation or alteration of the Gaming Facility performed after the effective date of this Compact satisfies applicable Tribal health, safety and environmental standards. The Tribes can demonstrate that it has satisfied this Section providing a certificate or other evidence of compliance from the appropriate state or local official responsible for enforcement of comparable state standards, or from a contractor who is certified by state or local government to evaluate such compliance.
3. As used in this subsection, “health, safety and environmental standards” include but are not limited to structural standards, fire and life safety standards, water quality and discharge standards, food handling standards, and any other standards that are generally applicable under state or federal law to a non-tribal facility that is open to the public for purposes of protecting the public within the facility. “Health, safety and environmental standards” does not include land use regulations or zoning laws.
4. The Tribes agree that the State may use state or local inspectors to verify compliance with this subsection. Such inspectors shall cooperate with Gaming Facility management to conduct such inspections in a manner that does not disrupt operations at the Gaming Facility, and shall be conducted only with advance notice to and permission of the Gaming Facility where practicable. If the State asserts that the Tribe is in breach of this subsection, and that the breach creates an immediate and substantial threat to the health or safety of the patrons or employees of the Gaming Facility, the Tribes agree to take steps as are necessary to protect the public or employees until the breach is remedied. Resolution of any dispute as to what steps are necessary shall be conducted in the same manner as and

under the principles and procedures established for resolution of operating disputes in Section 6 of this Compact.

- B. Traffic standards. The Tribes shall maintain access from its Gaming Facility onto the public road known as State Highway 331 that is adequate to meet standards of the Oregon Department of Transportation or shall enter into agreements with the Oregon Department of Transportation for the maintenance of such access by the State, including provisions for compensation by the Tribes for some portion of the costs incurred by the State in constructing such improvements to the public highway, including traffic control signals, as may be necessary. If the Oregon Department of Transportation determines that highway improvements are necessary, the department shall confer with the Tribes concerning the planning, design and construction of those improvements. The Tribes agree to consult and cooperate with the Oregon Department of Transportation regarding any other traffic issues arising out of the Gaming Operation and vehicles that patronize the Gaming Facility. To the extent the Gaming Facility contributes to any traffic impacts on surrounding city, county or State roads, the Tribes agree to fund an appropriate proportion of improvements necessary to mitigate or reduce such impacts. If the Tribes dispute the amount of the cost to be paid by the Tribes, the Tribes may initiate the dispute resolution procedure established under section 6 of this Compact.

- C. The Tribes shall report to the Oregon Department of Revenue gambling winnings paid to any person subject to Oregon Personal Income Tax on those winnings whenever the Tribes would be required to report those winnings to the Internal Revenue Service. The information shall be reported in the manner required by the Oregon Department of Revenue.

SECTION 12. EFFECTIVE DATE; TERMINATION; AMENDMENTS.

- A. Effective Date. This Compact shall become effective upon execution by the State and by the Tribes and appropriate federal approval.

- B. Termination. This Compact shall remain in effect until such time as:
 - 1. This Compact is terminated by written agreement of both parties;

 - 2. The State amends its Constitution or laws to criminally prohibit within the State conduct of all of the Class III gaming authorized by this Compact, whether for profit or not for profit;

 - 3. A court of competent authority makes a final determination that all of the Class III games authorized by this Compact are criminally prohibited under the law of the State, and the determination has become final and enforceable;

4. The federal government amends or repeals IGRA so that a Compact is no longer required for the Tribes' exercise of Class III gaming; or
5. Either party materially breaches this Compact; but only after the dispute resolution process set forth in section 16 of this Compact has been exhausted, and the breach has continued for a period of 60 days after written notice following the conclusion of the dispute resolution process.

C. Automatic Amendment.

1. If a type of Class III game authorized under section 4 of this Compact is criminally prohibited for all purposes by all persons by an amendment to State statute or Constitution, this Compact shall no longer authorize the Tribes to engage in that type of Class III game, and any provisions in this Compact authorizing such gaming shall be void and of no effect.
2. If a court decides that a Class III game authorized under this Compact is criminally prohibited, this Compact shall no longer authorize the Tribes to engage in that type of Class III game, and any provisions in this Compact authorizing such gaming shall be void and of no effect, but the Tribes shall be required to cease operating that Class III game only if and under the same circumstances and conditions as the State or any other affected person must cease operating the corresponding game under the court's decision.

D. Amendments.

1. Except as provided in subsection C of this section and Section 4D with respect to the number of video lottery terminals, this Compact shall not be amended for a period of three years after the effective date of this Compact, unless one of the following conditions occur:
 - a. The State becomes a party to another Tribal-State Compact that authorizes a tribe other than the Confederated Tribes of the Umatilla Indian Reservation to engage in any Class III gaming activity or scope of gaming activity not permitted under the terms of section 4 of this Compact;
 - b. The State amends State statute or Constitution to expand the type of Class III gaming permitted in the State for any purpose by any person, organization, or entity;
 - c. The parties to this Compact agree in writing to enter amendment negotiations.
2. Paragraph 1. of this subsection does not require the State to renegotiate those terms of this Compact that apply to the forms of gaming authorized by Section 4 of this Compact, except to the extent that the State

voluntarily consents to such renegotiation or as is otherwise provided for in this Compact.

3. Pursuant to paragraph 1 of subsection D above, the State or the Tribes may, by appropriate and lawful means, request negotiations to amend, replace or repeal this Compact. In the event of a request for renegotiation or the negotiation of a new Compact, this Compact shall remain in effect until renegotiated or replaced, unless sooner terminated under subsection B of section 12. Such request to renegotiate shall be in writing and shall be sent by certified mail to the Governor of the State or the Chairman of the Board of Trustees of the Tribes at the appropriate office identified at section 14 below. If a request is made by the Tribes, it shall be treated as a request to negotiate pursuant to IGRA. All procedures and remedies available under IGRA shall thereafter apply with the exception that the 180-day period for negotiation set forth at 25 U.S.C. 2710(d) shall be 100 days.

SECTION 13. DISCLAIMERS AND WAIVERS.

- A. Gaming at Another Location or Facility. The Tribes hereby waive any right they may have under IGRA to negotiate a Compact for Class III gaming at any other location or facility for a period of five (5) years from the effective date of this Compact, provided, that if any other Oregon Indian tribe operates Class III gaming at more than one location under a Compact with the State, the Tribes shall have the right to request immediate negotiations on the issue, and provided further, that the Tribes shall have the right to negotiate for Class III gaming at another location if some natural occurrence makes the Gaming Facility unusable.
- B. Status of Class II Gaming. Nothing in this Compact shall be deemed to affect the operation by the Tribes of any Class II gaming as defined in the Act or to confer upon the State any jurisdiction over such Class II gaming conducted by the Tribes.
- C. Prohibition on taxation by the State. Nothing in this Compact shall be deemed to authorize the State to impose any tax, fee, charge or assessment upon the Tribes or any Tribal Gaming Operation except for charges expressly authorized in accordance with this Compact.
- D. Preservation of Tribal self-government. Nothing in this Compact shall be deemed to authorize the State to regulate in any manner the government of the Tribes, including the Tribal Gaming Commission, or to interfere in any manner with the Tribes' selection of its governmental officers including members of the Tribal Gaming Commission. No licensing or registration requirement contemplated by this Compact shall be applicable to such officers with respect to their capacity as officers of the Tribes.

- E. This Compact is exclusively for the benefit of and governs only the respective authorities of and the relations between the Tribes and the State. Nothing in this Compact shall be construed as creating or granting any rights to any third party, or as establishing any objection or defense for any third party to any charge, offense or prosecution.

SECTION 14. NOTICES.

All notices required or authorized to be served to the Oregon State Police shall be served by first class mail at the following address:

Captain
Oregon State Police
Gaming Enforcement Division
Salem, OR 97310

All other notices required or authorized to be served shall be served by first class mail at the following addresses:

Legal Counsel to the Governor
Office of the Governor
254 State Capitol
Salem, OR 97310

Chairman, Board of Trustees
Confederated Tribes of the
Umatilla Indian Reservation
P.O. Box 638
Pendleton, OR 97801

SECTION 15. SEVERABILITY.

In the event that any section or provision of this Compact is held invalid, or its application to any particular activity is held invalid, it is the intent of the parties that the remaining sections of the Compact and the remaining applications of such section or provision shall continue in full force and effect.

SECTION 16. DISPUTE RESOLUTION.

- A. Except as specifically provided in section 6 of this Compact, at the discretion of either party, in the event either party believes that the other party has failed to comply with any requirement of the Compact, that party may invoke the following dispute resolution procedure in order to foster cooperation and avoid the costs of litigation:
 - 1. The party asserting noncompliance shall serve written notice on the other party in the manner provided in section 14. The notice shall identify the specific provision of the Compact alleged to have been violated and shall specify the factual basis for the alleged noncompliance. The State and the

Tribes shall thereafter meet within thirty (30) days in an effort to resolve the dispute.

2. In the event the dispute is not resolved to the satisfaction of the parties within ninety (90) days after service of notice, either party may initiate an action against the other party in the United States District Court for the District of Oregon to interpret or enforce the provisions of this Compact. In the event that the Federal court declines jurisdiction, an action can be filed in a State or Tribal court of competent jurisdiction to interpret or enforce the provisions of this Compact.

B. Nothing in subsection A of this section shall be construed to waive, limit or restrict any remedy that is otherwise available to either party to enforce the provisions of this Compact or limit or restrict the ability of the parties to pursue, by mutual agreement, alternative methods of dispute resolution.

C. With respect to gaming not authorized by this Compact, nothing in this Compact shall be construed to limit the authority of the State or the federal government to take immediate action to enforce and prosecute the gambling laws of the State and the United States pursuant to 18 USC §1166 (Section 23 of IGRA).

SECTION 17. INTEGRATION

This Compact is the complete and exclusive expression of the parties' intent.

EXECUTED as of the date and year above-written.

STATE OF OREGON

CONFEDERATED TRIBES OF THE
UMATILLA INDIAN RESERVATION

**Tribal-State Compact for Regulation of Class III Gaming
Confederated Tribes of the Umatilla Indian Reservation
and the State of Oregon**

EXHIBIT I

DESCRIPTION OF GAMING LOCATION:

The Tribes' Gaming Facility is located on Tribal trust land within the boundaries of the Umatilla Indian Reservation. The Gaming Facility authorized by this Compact is located near Mission, Oregon, north and east of Exhibit 216 on Interstate Highway 84. A map showing the location of the Gaming Facility is attached (Exhibit 1.A). The Gaming Facility is located on Trust Allotment No. TC36, which has a legal description as follows:

The SW ¼ of Section 15, Township 2 North, Range 33 East, Willamette Meridian.
The above-described land involves a combined total of approximately 160 acres.

**TRIBAL-STATE GOVERNMENT-TO-GOVERNMENT COMPACT
FOR REGULATION OF CLASS III GAMING
BETWEEN THE CONFEDERATED TRIBES OF THE
WARM SPRINGS RESERVATION OF OREGON AND
THE STATE OF OREGON**

PREAMBLE:

This Compact is made between the State of Oregon (hereinafter "State") and the Confederated Tribes of the Warm Springs Reservation of Oregon (hereinafter the "Tribes") and pertains to Class III gaming to be conducted on lands within the Warm Springs Indian Reservation pursuant to the Indian Gaming Regulatory Act of October 17, 1988 (Public Law 100-497), 25 U.S.C. 2701 et seq. ("IGRA") and reflects the sovereign status and jurisdictional authority of the Tribes and addresses the legitimate concerns of the State. The terms of this Compact are unique to this Tribe and reflect the fact that the lands that are the subject of this Compact are held in trust by the United States, and that these lands may be used for Class III gaming under IGRA.

SECTION 1. TITLE.

THIS Compact is entered into this 6th day of January, 1995, by and between The Confederated Tribes of the Warm Springs Reservation of Oregon, a federally recognized Tribe of Indians, and the State of Oregon.

SECTION 2. FINDINGS.

WHEREAS, Tribes is a federally recognized Indian Tribe and is the beneficial owner of, and government for, the Warm Springs Indian Reservation (hereinafter the "Reservation") located within the State of Oregon;

AND WHEREAS, the Tribes have adopted a "Declaration of Sovereignty," dated June, 1992, setting forth the Tribes' position as to the inherent sovereignty of the Tribes;

AND WHEREAS, the Tribes have adapted a "Vision for Tribal Gaming" to guide the development, planning and implementation of Indian gaming by the Tribes;

AND WHEREAS, the Reservation is specifically exempted from the extension of state jurisdiction to Indian country by Public Law 83-280.

AND WHEREAS, the Reservation consists of approximately 1,000 square miles, almost all of which is eligible trust lands;

AND WHEREAS, the Reservation encompasses no non-tribal communities and non-tribal activity is almost solely limited to tribally supported tourist and recreational activities;

AND WHEREAS, the Tribes provides a full range of governmental services on the Reservation;

AND WHEREAS, the economic benefits to be realized from Indian gaming are consistent with the goals of the Oregon Benchmarks;

AND WHEREAS, the State and the Tribes are separate sovereigns and each respects the laws of the other sovereign;

AND WHEREAS, the public policy of the State is reflected in the Constitution, statutes and administrative rules of the State, which, at the time of execution of this Compact, authorize a variety of games classified as Class III games under IGRA;

AND WHEREAS, the State Constitution provides that the "Legislative Assembly has no power to authorize, and shall prohibit casinos from operation in the State," and the parties to this Compact recognize that the precise meaning and application of this provision to the conduct of Class III games in this State is currently unsettled and unclear;

AND WHEREAS, the Tribal public policy, as reflected in the Tribes' Constitution and Bylaws includes the powers of the Tribal Council to negotiate with state government, manage the economic affairs of the Tribes and protect the health, security and general welfare of the members of the Tribes;

AND WHEREAS, the United States Congress has enacted IGRA which declares federal policy and provides a statutory basis for operation of gaming by the Tribes as a means of promoting Tribal economic development, self-sufficiency, and strong Tribal government;

AND WHEREAS, the Tribes exercises governmental authority over all lands within the Warm Springs Indian Reservation;

AND WHEREAS, IGRA is intended to provide a statutory basis for regulation of gaming by the Tribes adequate to shield them from organized crime and other corrupting influences, to ensure that the Tribes are the primary beneficiary of the gaming revenues, and to ensure that gaming is conducted fairly and honestly by both the operators and players;

AND WHEREAS, Congress has declared that it is a principal goal of federal Indian policy to promote Tribal economic development, Tribal self-sufficiency and strong Tribal government;

AND WHEREAS, IGRA provides for a system of joint regulation by Indian Tribes and the Federal government (to the exclusion of the State) of Class I and II gaming on Tribal lands as defined in IGRA;

AND WHEREAS, IGRA establishes a system of agreements between Indian Tribes and States for the regulation of Class III gaming as defined in that Act;

AND WHEREAS, IGRA provides that Class III gaming activities are lawful on Tribal lands

only if such activities are (1) located in a state that permits such gaming for any purpose by any person, organization or entity, (2) authorized by Tribal ordinance, and (3) conducted in accordance with a Tribal-State Compact;

AND WHEREAS, the Congressional intent in passing IGRA was to reaffirm a long and well-established principle of federal Indian law as expressed in the United States Constitution, reflected in federal statutes and articulated in decisions of the United States Supreme Court that unless authorized by an act of Congress, the jurisdiction of State governments does not extend to Tribal lands;

AND WHEREAS, IGRA does not extend State jurisdiction or the application of State laws for any purpose other than jurisdiction and application of State laws to gaming conducted on Tribal land as set forth in this Compact;

AND WHEREAS, in IGRA, Congress recognized a role for State public policy and State law in the regulation of Class III Gaming;

AND WHEREAS, nothing in the Tribal-State Government-to-Government Compact shall be construed to extend to any other activities or as an abrogation of other reserved rights of the Tribes or of the Tribes' sovereignty; and the Tribes expressly reserve all such rights and sovereign powers;

AND WHEREAS, IGRA is intended to expressly preempt the field in the governance of gaming activities on Tribal lands;

AND WHEREAS, the Tribes are authorized to act through Ordinance and Resolutions adopted by its Tribal Council; subject to the referendum powers of the members of Tribes;

AND WHEREAS, the State of Oregon is authorized to act through the Governor of the State;

NOW THEREFORE, in consideration of the mutual undertakings and agreements herein set forth, the Tribes and the State enter into the following Compact:

SECTION 3. DEFINITIONS.

As used in this Compact, and in its Appendices and Exhibits:

- A.** "Background investigation" means the security and financial history checks of an employee, licensee or applicant for Tribal contract for the operation or sale of Class III games to the Tribes.
- B.** "Certification" means the inspection process used by the Oregon State Lottery to approve video lottery game terminals and games.
- C.** "Class III Gaming Contract" means a contract that involves Major, Minor, or Sensitive Procurements.

- D.** "Class III Gaming Contractor" is an individual, business or other entity that applies for or is a party to a Class III Gaming Contract.
- E.** "Controlling interest" means fifteen percent (15%) of the equity ownership of a company.
- F.** "Display" means the visual presentation of video lottery game features shown on the screen of a video lottery terminal.
- G.** "Gaming Facility" means any building or structure in which the Tribes conduct Class III gaming under this Compact, and includes both the Kah-Nee-Ta facility and the Permanent Gaming Facility as those terms are defined in this Compact.
- H.** "Gray Machine" means any electrical or electro-mechanical device, whether or not it is in working order or some act of manipulation, repair, adjustment or modification is required to render it operational that:
 - 1.** Awards credits or contains or is readily adaptable to contain, a circuit, meter, or switch capable of removing or recording the removal of credits earned by a player, other than removal during the course of continuous play; or
 - 2.** Plays, emulates, or simulates a casino game, bingo, or keno. A device is no less a gray machine because, apart from its use or adaptability as such, it may also sell or deliver something of value on the basis other than chance.

"Gray Machine" does not include any device operated under the authority of State law or under the terms of this Compact.
- I.** "High Security Employee" means any person with responsibility for the management or operation of the Class III gaming activities or access to gaming terminals or cash.
- J.** "Kah-Nee-Ta Facility" means the addition to the Kah-Nee-Ta Lodge proposed to be constructed as of the date of execution of this Compact by the Tribes on Indian trust lands at the Kah-Nee-Ta Resort on the Warm Springs Indian Reservation, as more specifically described in Exhibit "1" to this Compact, and includes the square footage of any expansion devoted to the play of Class II or Class III games.
- K.** "Key Employee" means any officer or any person who can affect the course of business, make decision, or is in a sensitive position.
- L.** "Low Security Employee" means any person employed to work in a gaming area with no responsibility for management or operation of the Class III gaming activities and no access to inside gaming terminals or cash.

- M.** "Major Procurement" means any procurement action or contract for:
1. The printing of tickets used in any Class III gaming;
 2. Any goods or services involving the receiving or recording of number selections in any Class III gaming;
 3. Any goods, services, or products involving the determination of winners in any Class III gaming; or
 4. Video devices.
- N.** "Minor Procurement" means any procurement action or contract related to Class III gaming that is neither a Major Procurement nor a Sensitive Procurement. A typical example of this class of procurement is a contract to change the external appearance of a video terminal.
- O.** "Owner" means any person or entity that owns 5 percent or more of the equity ownership of a company.
- P.** "Permanent Gaming Facility" means any building, other than the Kah-Nee-Ta Facility, constructed by the Tribes on Indian trust lands on the Warm Springs Indian Reservation pursuant to Section 4 of this Compact.
- Q.** "Primary Management Official" means any person who:
1. Has management responsibility for any gaming management contract;
 2. Has authority -
 - a. to hire and fire employees; or
 - b. to set or otherwise establish working policy for the gaming operations; or
 3. Is the chief financial officer or other person who has financial management responsibility for Class III gaming operations.
- R.** "Sensitive Procurement" means any procurement action or contract for goods or services, other than a "Major Procurement," that may either directly or indirectly affect the integrity, security, honesty and fairness of the operation and administration of Class III gaming. A typical example of this class of procurement is the acquisition of security systems required to protect the security and integrity of the Class III gaming.

- S. "Temporary Gaming Facility" means the Temporary Gaming Facility described in Section 4.F. of this Compact.
- T. "Video lottery terminal" or "terminal" means an electrical or electro-mechanical device, component, or terminal that displays a ticket through the use of a video display screen, and that is available for consumer play upon payment of any consideration with winners determined by the application of the element of chance and the amount won determined by the possible prizes displayed on the device as more fully described in Appendix A.

SECTION 4. AUTHORIZED CLASS III GAMING.

A. This Compact shall be the only Compact between the Tribes and State and any and all Class III gaming conducted in any Gaming Facility shall be pursuant to this Compact. To the extent that elements of this Compact need to be altered to incorporate changes to the agreements between the parties--including to permit additional Class III gaming--the parties shall provide such changes in accordance with subsection D of Section 12 of this Compact.

B. Authorized Games.

- 1. Subject to the provisions of this Compact, the Tribes may engage in only the following Class III games: Video lottery games of chance as described in Appendix A, keno as described in Appendix B, and off-race course mutuel wagering as described in Appendix C.
- 2. This Section shall be construed consistent with federal classification of gaming activities. Notwithstanding any provision of this Compact, any gaming activity classified by federal regulation as Class II activity shall not be subject to the provisions of the Compact.

C. **Gaming Location.** Gaming authorized under this Compact shall be conducted only in the Gaming Facility. If another Oregon Tribe is authorized to operate a gaming facility on non-tribal lands, the Tribes does not hereby abrogate any rights it may have under Section 30 of IGRA. Gaming authorized under this Compact may be conducted at either the Kah-Nee-Ta Facility or the Permanent Gaming Facility, but not at both facilities concurrently. If the Tribes elect to conduct gaming at the Kah-Nee-Ta Facility first, they agree to discontinue gaming at that facility before opening a Permanent Gaming Facility at another location.

- 1. The Kah-Nee-Ta Facility authorized under this Compact shall be located on the Warm Springs Indian Reservation at the site of the Kah-Nee-Ta Lodge.

- 2. The Permanent Gaming Facility shall be located on Indian lands that

qualify for Class III Gaming under 25 USC §2701 *et seq.* within the boundaries of the Warm Springs Indian Reservation at a site, other than the Kah-Nee-Ta Lodge, to be designated by the Tribes.

D. Number of Video Terminals. The number of Class III video lottery terminals authorized by this Compact for either Gaming Facility shall not exceed the number of such terminals that would occupy fifteen percent (15%) of the total square footage of the gaming area and related portions of the Gaming Facility under customary industry spacing. Subject to other terms of this agreement, the Tribes may determine in its discretion the location and spacing of video lottery terminals within the Gaming Facility.

1. The parties acknowledge that the Kah-Nee-Ta Lodge is a mixed use facility. The parties agree that the size of the Kah-Nee-Ta Facility to be devoted to Class III video lottery terminals is determined by the areas of those parts of the facility and the Lodge of which it will be a part that are appropriately related to the gaming activities conducted therein (the gaming area). The parties also agree that, in combination, the gaming area of the facility and the lodge and the spacing of video lottery terminals customary in the industry limit the number of video lottery terminals on the gaming floor to no more than 295.
2. The Permanent Gaming Facility has not yet been designed. The Tribes anticipate that the Permanent Gaming Facility will be a mixed used facility. The Tribes and the State agree that the number of video lottery terminals to be authorized in the Permanent Gaming Facility shall be established, according to the principles described in this subsection, in a memorandum of understanding entered into between the Tribes and the State at such time as the Permanent Gaming Facility is designed.

E. Expansion of Gaming Area. If the Tribes expands the square footage of the Gaming Facility, the limit on the number of video lottery terminals established in subsection D of this section shall be increased by the number of video lottery terminals that would occupy fifteen percent (15%) of the total square footage of the expansion that is devoted to Class II and Class III gaming and related activities, given customary industry spacing of video lottery terminals. The parties shall enter into a memorandum of understanding in which the precise number of additional video lottery terminals shall be established.

F. Temporary Gaming Facility.

1. The Tribe is authorized to develop a Temporary Gaming Facility on eligible trust lands on the reservation. The location of a Temporary Gaming Facility has not been determined. The Tribe shall notify the State in writing at such

time as a location for a Temporary Gaming Facility is determined.

2. Class III Gaming. The only Class III games that will be conducted in the Temporary Gaming Facility will be video lottery terminals as defined in this Compact. The Tribe may install up to 250 video lottery terminals in the temporary Gaming Facility: provided that the total square footage of the Temporary Gaming Facility shall be not less than 10,000 square feet. If the square footage of the Temporary Gaming Facility is less than 10,000 square feet, the number of video lottery terminals authorized shall be reduced proportionately.
3. Duration of Temporary Gaming. Gaming under this subsection may be conducted for a period of no more than one year beginning after the effective date of this Compact and ending before the opening of the Gaming Facility.
4. Access to Temporary Facility. Access to the Temporary Gaming Facility shall be provided subject to the conditions imposed in Section 11.B of this Compact. In the event that the Temporary Gaming Facility is accessed from U.S. Highway 26, rather than BIA roads, the Tribe shall consult with the Oregon Department of Transportation and appropriate local officials so that access from State Highway 26 will meet appropriate standards and shall otherwise comply with Section 11.B.2. of this Compact. The Tribe is responsible to provide adequate parking for patrons of the Temporary Gaming Facility.
5. Alcohol Policy. No alcohol will be served in the Temporary Gaming Facility.
6. Security. The Tribe shall consult with the Oregon State Police to assure that the security requirements of the Compact are fully satisfied before opening the temporary Gaming Facility.
7. Applicability of Compact Requirements: Except as explicitly provided in this subsection, all terms of this Compact shall apply to the operation of the Temporary Gaming Facility.

- G. Off-Track Mutuel Wagering.** The Tribes may conduct off-track mutuel wagering on races held at race courses within or outside the State. Any off-track mutuel wagering on races held at race courses outside the State shall be conducted in compliance with the applicable requirements of the Interstate Horseracing Act of 1978, as amended, (15 U.S.C. § 3001 to 3007). All off-track mutuel wagering at any Gaming Facility shall be conducted in person and no wagers may be accepted by telephone or other electronic medium.

SECTION 5. JURISDICTION.

A. In General.

1. The Tribes and Federal Government have criminal jurisdiction over offenses committed by Indians within the Reservation. The criminal laws of the Tribes, and the Federal Government where applicable, shall govern the criminal conduct of Indians on the Reservation. The Tribes have a Police Department, a Tribal Court and a facility for incarceration of Indian offenders.
2. The State and Federal Government have criminal jurisdiction over offenses committed by non-Indians within any Gaming Facility and over offenses committed by Indians outside the exterior boundaries of the Reservation. The criminal laws of the State shall be applicable to non-Indians and have the same force and effect at any Gaming Facility within the Reservation as they have on non-Tribal lands within the State. The enforcement of criminal laws with respect to non-Indians at any Gaming Facility within the Reservation shall be established pursuant to and by a Memorandum of Understanding to be executed by the Tribes and the Oregon State Police. The State shall make reasonable efforts to enforce the criminal laws applicable to offenses committed by non-Indians within any Gaming Facility and the reservation.

B. Except as provided in a Memorandum of Understanding executed in accordance with the foregoing paragraph 2 of subsection A above, law enforcement officers of the State of Oregon, or officers of the State of Oregon, or officers designated by the State, shall have free access to anywhere within any Gaming Facility for the purpose of maintaining public order and public safety, conducting investigations related to possible criminal activity and enforcing applicable laws of the State with respect to non-Indians. Any law enforcement activities undertaken by law enforcement officers of the State shall be in compliance with this Compact and applicable inter-governmental agreements between the Tribes and the state and local governments, the Tribes' Extradition Code and the Cross Deputization Agreement executed by the Warm Springs Tribal Police Department and the State. The Tribes, or individuals acting on their behalf, shall provide State law enforcement officers or officers designated by the State access to locked and secured areas of any Gaming Facility in accordance with the regulations for the operation and management of the gaming operation.

C. Subject to the provisions of paragraph 1 of subsection B of Section 9 of this Compact, the State may station one or more officers at any Gaming Facility by mutual agreement with the Tribes. The Tribes agree to provide appropriate training in tribal culture and the institutions to any officer stationed at any Gaming Facility.

D. Nothing in this Compact shall be construed to affect the civil jurisdiction of the State under Public Law 83-280.

SECTION 6. PRINCIPLES GOVERNING GAMING OPERATIONS DECISIONS.

A. The Tribes and the State agree that maintaining the honesty, integrity, fairness and security of the Tribes' gaming operation is essential both to the success of the enterprise and to satisfy the interests of the State and of the Tribes. Accordingly, all decisions by the Tribes concerning operation of their Gaming Facility, including those decisions expressly placed within the Tribes' discretion under the terms of this Compact, shall be consistent with each of the following principles:

1. Any and all of the Tribes' decisions concerning operation of the Tribal gaming enterprise shall reflect the particularly sensitive nature of a gaming operation.
2. In order to maintain the honesty, integrity, fairness and security of the Tribes' gaming operation, the Tribes shall work diligently and take all reasonably necessary affirmative steps to prevent cheating and theft, and to protect the gaming operations from the influence or control by any form of criminal activity or organization.
3. The honesty, integrity, fairness and security of the Tribes' gaming operation shall be of paramount consideration in awarding contracts, licensing and hiring employees, and in making other business decisions concerning the operation of the gaming enterprise. The Tribes shall make no decisions that compromise the honesty, integrity, fairness or security of the gaming operation.
4. Regulation and operation of the Tribes' gaming activities shall be, at a minimum, consistent with generally accepted industry standards and practices, in order to maintain the honesty, integrity, fairness and security of the Tribes' gaming operation.

B. Procedure for Resolving Disputes Concerning Operational Decisions.

1. If the State, in good faith, believes that any decision by the Tribes relating to the employment or licensing of any employee, awarding of any contract or operation of the gaming enterprise is inconsistent with the principles set forth in subsection A of this Section, or any other requirement of this Section, the State may give written notice to the Tribes. The written notice shall describe the factual basis for the State's concern.
2. The parties shall meet and confer within 15 days after the Tribes receive the notice.
3. **a.** If the State's concern is not resolved informally, either party may initiate non-binding arbitration within 45 days after the service of the written notice.

- b. An arbitrator shall be selected in the following manner:
 - (1) The parties shall obtain a list of qualified arbitrators from U.S. Arbitration and Mediation of Oregon, or any other arbitration panel agreed to by the parties.
 - (2) Each party, in turn, shall strike one name from the list, until one name remains. The parties shall draw lots to determine which party makes the first strike.
 - c. Upon agreement by both parties, the arbitration proceeding shall be binding.
 - d. The parties shall divide the cost of the arbitration proceeding equally between them.
4. Upon conclusion of the arbitration proceeding, if the parties have not elected to be bound by that result, either party may initiate an action in the United States District Court for the District of Oregon as provided in Section 16 of this Compact.
5. **Expedited Procedure.**
- a. If the State, in good faith, believes that there is an immediate threat to the honesty, integrity, fairness and security of the Tribal gaming operations, and believes that substantial harm will result during the time that would pass if the procedure established in paragraphs 1 to 3 of this subsection is followed, the State may give written notice to the Tribes. The written notice shall describe the factual basis for the State's concern.
 - b. The parties shall confer within five days after the Tribes receive the notice.
 - c. If the State's concern is not resolved informally, the state may initiate an action in the United States District Court for the District of Oregon as provided in Section 16 of this Compact.
 - d. An immediate threat to the honesty, integrity, fairness and security of the Tribal gaming operations includes but is not limited to the following examples:
 - (1) A criminal indictment is filed against any contractor, or owner of key employee of a contractor;

- (2) A criminal organization or members of a criminal organization have obtained an ownership interest in a contractor, or a member of a criminal organization has become a key employee of a contractor;
 - (3) A malfunction of gaming equipment hardware or software causes patrons of the Gaming Facility to lose money, and that loss is directly related to the equipment malfunction.
6. The provisions of this Section shall provide the exclusive method for resolving disputes as to the Tribes' decisions concerning hiring or contracting under Section 7 of this Compact, or concerning operation of the Gaming Facility.

SECTION 7. LICENSING AND CONTRACTING.

A. Licensing of Gaming Employees.

1. All Primary Management Officials and High Security Employees to be employed in the Gaming Facility shall be licensed by the Tribes in accordance with the provisions of this Compact.
2. All prospective employees--Primary Management Officials, High Security Employees and Low Security Employees--shall provide to the Tribes any required application fees and the following information:
 - a. Full name, including any aliases by which the applicant has been known;
 - b. Social security number;
 - c. Date and place of birth;
 - d. Residential and addresses for the past five years;
 - e. Employment history for the past five years;
 - f. Driver's license number;
 - g. All licenses issued and disciplinary actions taken by any State agency or Tribal gaming agency;
 - h. All criminal proceedings, except for minor traffic offenses, to which the applicant has been a party;

- i. A current photograph;
 - j. Any other information required by the Tribes.
- 3. In addition to the requirements of paragraph 2 of this subsection, prospective High Security Employees and Primary Management Officials shall provide a set of fingerprints.
- 4.
 - a. The Tribes shall forward the applicant information to the State, along with the State required portion of the application fee as described in subsection C of this Section. The Oregon State Police shall conduct a background investigation on all prospective Primary Management Officials and High Security Employees, and provide a written report to the Tribal Gaming Commission within a reasonable period of time, but in no event shall such background checks exceed thirty (30) days without notice to and consent of the Tribes.
 - b. The Tribes may request the State to perform a background investigation on any prospective Low Security Employee. Upon such request, the Oregon State Police shall conduct a background check as provided in subparagraph a. of this paragraph.
- 5.
 - a. The Tribes shall deny a gaming license to any prospective High Security Employee or Primary Management Official who has committed any of the following crimes under the law of any jurisdiction, or is the subject of a civil judgment in any jurisdiction that is based upon facts that constitute the elements of any of the following crimes:
 - (1) Aggravated murder; murder in the first degree
 - (2) Assault (in the first or second degree)
 - (3) Kidnapping in the first degree
 - (4) Rape in the first degree
 - (5) Sodomy in the first or second degree
 - (6) Unlawful sexual penetration in the first degree
 - (7) Sexual abuse in the first or second degree
 - (8) Any crime related to child pornography
 - (9) Forgery in the first degree
 - (10) Possession of a forgery device
 - (11) Unlawful factoring of a credit card transaction
 - (12) Falsifying business records
 - (13) Sports bribery or receiving a sports bribe
 - (14) Making a false financial statement
 - (15) Obtaining execution of a document by deception
 - (16) Theft by extortion

- (17) Arson in the first degree
- (18) Computer crime
- (19) Robbery in the first or second degree
- (20) Bribery
- (21) Bribing a witness
- (22) Perjury
- (23) Any theft accomplished by manipulation of records; e.g., embezzlement
- (24) Promotion of unlawful gambling
- (25) Conviction of any crime if the original charge was promotion of unlawful gambling, and a lesser charge was plea-bargained.
- (26) Tax evasion

b. The Tribes shall deny a gaming license to any prospective High Security Employee or Primary Management Official who has associated in a business relationship, whether as a partner, joint venturer or employer, with any other person who has been convicted of one of the crimes listed in subparagraph a. of this paragraph. The Tribes shall deny a gaming license to any prospective High Security Employee or Primary Management Official who was employed by any other person who has been convicted of one of the crimes listed in subparagraph a. of this paragraph, if the prospective employee or official was in any way involved in or aware of the criminal activity as it occurred.

c. The Tribes shall deny a gaming license to any prospective High Security Employee or Primary Management Official if:

- (1) The applicant fails to disclose any material fact to the Tribes or the State or their authorized agents during a background or security investigation; or
- (2) The applicant misstates or falsifies a material fact to the Tribes or the State during a background or security investigation.

d. The Tribes may deny a gaming license to any prospective High Security Employee or Primary Management Official for any reason the Tribes deem sufficient. Such decisions to grant or deny a gaming license shall be consistent with the principles set forth in subsection A of Section 6 of this Compact. In determining whether to deny a gaming license to any prospective High Security Employee or Primary Management Official, the factors to be considered by the Tribes shall include, but need not be limited to, the following:

- (1) The applicant has been convicted of any crime (other than a

crime listed in subparagraph a. of this paragraph) in any jurisdiction;

- (2) The applicant has associated with persons or businesses of known criminal background, or persons of disreputable character, that may adversely affect the general credibility, honesty, integrity, security, fairness or reputation of the Tribes' gaming operation; or
- (3) There is any aspect of the applicant's past conduct that the Tribes determine would adversely affect the honesty, integrity, security or fairness of Tribal gaming operation.

- e. The Tribes shall deny employment to any prospective Low Security Employee who does not meet the criteria established in sub-subparagraph (1) to (5) of this subparagraph. The Tribes may deny employment to any Low Security Employee applicant who does not meet the criteria established in sub-subparagraphs (6) to (26) of this subparagraph or in subparagraphs c. or d. of this paragraph. Decisions to grant or deny employment shall be consistent with the principles set forth in subsection A of Section 6 of this Compact.
- f. The Tribes may reject an application if the applicant has not provided all of the information requested in the application.

6. Denial of employment or a license by the Tribes is final.

7. **Waiver of Disqualifying Criteria.**

- a. If a prospective Primary Management Official, High Security Employee or Low Security Employee is disqualified for licensing or employment under the provisions of paragraph 5. above, and the Tribes believe that there are mitigating circumstances that justify waiver of the disqualifying factor, the Tribes may give written notice to the State asking to meet and confer concerning waiver of the disqualification. The Tribes and the State shall meet within 15 days after written notice is given.
- b. In order to waive disqualification of licensing or employment of any prospective Primary Management Official, High Security Employee or Low Security Employee, both the Tribes and the State must agree on the waiver.
- c. Waiver of disqualification of licensing or employment may be based on

one or more of the following circumstances:

- (1) Passage of time since conviction of a crime;
- (2) The applicant's age at the time of conviction;
- (3) The severity of the offense committed;
- (4) The overall criminal record of the applicant;
- (5) The applicant's present reputation and standing in the community;
- (6) The nature of the position for which the application is made.

8. Temporary Licensing of Employees.

- a. The Tribes may issue a temporary license to High Security Employees 30 days after submission of the application to the Oregon State Police. The temporary license shall expire and become void upon completion of the background check and award or denial of a permanent license.
- b. The Tribes may employ Low Security Employees on probation 10 days after submission of the application to the State Police. Any Low Security Employee shall be subject to immediate termination during probation if the Tribes determine that the employee does not meet the criteria established in sub-subparagraphs (1) to (5) of subparagraph a. above.

9. Background Investigation During Employment. The Tribes may request the State to conduct additional background investigations of any gaming employee at any time during the term of employment. The State shall report to the Tribes any cause for the dismissal of any employee under the criteria established in paragraph 5 of subsection A above, and furnish the Tribe with copies of all relevant information. The Tribes shall review the State's report and supporting materials and if the Tribes conclude that good cause for dismissal is shown under the criteria established in paragraph 5 of subsection A above, the subject employee may be dismissed. An employee shall be dismissed if the Tribes would have been required to deny employment to that employee under the provisions of paragraph 5 of subsection A above.

10. Duration of License and Renewal. Any employee license shall be effective for not more than three (3) years from the date of issue except that a licensed employee who has applied for a renewal may continue to be employed under the expired license until final action is taken on the renewal application in

accordance with the provisions of paragraphs 2 to 5 of subsection A above. Applicants for renewal shall provide a renewal fee and updated information to the Tribes but will not be required to resubmit historical data already provided.

11. **Revocation of License.** The Tribes may revoke the license of any employee pursuant to policies determined by the Tribes. The Tribes shall revoke the license of any employee upon determination that an event has occurred that would have prohibited the Tribes from hiring the employee under the criteria described in paragraph 5 of subsection A above.
12. The Tribes shall maintain a procedural manual for employees that includes rules and regulations of conduct and disciplinary standards for breach of procedure.

B. Contracts with Manufacturers and Suppliers.

1. The Tribes shall contract with all managers, manufacturers or suppliers of goods or services related to the play of Class III games authorized by this Compact before conducting any business related to Class III games.
2. The Tribes shall submit any proposed Class III Gaming Contract to the State for review and comment, and for a background investigation of the contract applicant.
3. A background investigation may be conducted by the State on all Class III Gaming Contract applicants or contractors. The level of investigation will be determined by whether the individual procurement is classified as a Major Procurement, Minor Procurement or Sensitive Procurement. The level of investigation for a Major Procurement and Sensitive Procurement shall be more intense than that for a Minor Procurement.
4. All Class III Gaming Contract applicants, and any owner or key employee of an applicant, shall provide all personal and business information required by the State to conduct its background investigation.
5. The Tribes shall not enter into any Class III Gaming Contract that does not grant the State or the Tribes access to the contractor's business and financial records.

6. Criteria for Denial of Contract Application.

- a.** The Tribes shall deny a Class III Gaming Contract application for a Major or Sensitive Procurement if the applicant, or any owner or key employee of the applicant has been convicted of a crime, or is the subject of a civil judgment based upon facts that constitute the elements of a crime described in subparagraph a of paragraph 5 of subsection A above.
- b.** The Tribes shall deny a Class III Gaming Contract application for a Major or Sensitive Procurement if the applicant, or any owner or key employee of the applicant, has associated in a business relationship, whether as a partner, joint venturer or employer, with any other person who has been convicted of one of the crimes listed in subparagraph a of paragraph 5 of subsection A above. The Tribes shall deny a Class III Gaming Contract for a Major or Sensitive Procurement if the applicant, or any owner or key employee of the applicant, was employed by any other person who has been convicted of one of the crimes listed in subparagraph a of paragraph 5 of subsection A of this Section, if the applicant, owner or key employee was in any way involved in or aware of the criminal activity as it occurred.
- c.** The Tribes shall deny a Class III Gaming Contract application for a Minor Procurement if the applicant, or any owner or key employee of the applicant, has been convicted of a crime described in sub-subparagraphs (1) to (5) of subparagraph a of paragraph 5 of subsection A of this Section, or is the subject of a civil judgment based upon facts that constitute the elements of a crime described in sub-subparagraphs (1) to (5) of subparagraph a of paragraph 5 of subsection A of this Section.
- d.** The Tribes shall deny a Class III Gaming Contract application if:

 - (1)** The applicant fails to disclose any material fact to the Tribes or the State or their authorized agents during a background or security investigation; or
 - (2)** The applicant misstates or falsified a material fact to the Tribes or the State during a background or security investigation.
- e.** The Tribes may deny any Class III Gaming Contract application for any reason the Tribes deem sufficient. Such decisions to deny a Class III Gaming Contract application shall be consistent with the principles set forth in subsection A of Section 6 of this Compact. In determining whether to deny a Class III Gaming Contract application, the factors to

be considered by the Tribes shall include, but need not be limited to the reasons described in subparagraph d of paragraph 5 of subsection A of this Section.

- f.** The Tribes may deny any Class III Gaming Contract application if:
- (1)** A person who is unqualified or disqualified to be a Class III Gaming Contractor owns, is an agent of or has any other interest in the applicant, regardless of the qualifications of the person who seeks approval as a contractor;
 - (2)** The applicant demonstrates inadequate financing for the business proposed under the type of contract for which application is made. In determining whether financing is adequate, the Tribes shall consider whether financing is from a source that meets the qualifications of paragraph 5 of subsection A of this Section, or paragraph 6 of subsection B of this Section and whether that financing is in an amount to ensure the likelihood of success in the performance of the contractor's duties and responsibilities; or
 - (3)** The applicant or its employees fails to demonstrate business ability and experience to establish, operate, and maintain the business for the type of contract for which application is made.
- g.** In evaluating whether to deny a contract related to Class III gaming based on subparagraphs e or f of paragraph 6 of subsection B of this Section, the Tribes may consider the following factors:
- (1)** The nature and severity of the conduct that constituted the offense or crime;
 - (2)** The time that has passed since satisfactory completion of the sentence, probation, or payment of the fine imposed;
 - (3)** The number of offenses or crimes; and
 - (4)** Any extenuating circumstances that enhance or reduce the impact of the offense or crime on the security, integrity, honesty, and fairness of the Tribal gaming enterprise.
- h.** **(1)** No person applying for a Class III Gaming Contract shall own, manufacture, possess, operate, own an interest in, or gain income or reimbursement in any manner from video gaming devices in any jurisdiction unless the devices are approved and

certified by another state lottery, gambling or gaming control agency, Indian Tribe, National Indian Gaming Commission, or foreign country, that has jurisdiction to approve that activity, and such ownership, manufacture, possession, operation, or income is disclosed to the Tribes.

(2) No person applying for a Class III Gaming Contract shall own, operate, own an interest in, or gain income or reimbursements in any manner from off-track pari-mutuel wagering in any jurisdiction unless that activity is approved and certified by another state racing regulatory body, gambling or gaming control agency, Indian Tribe, National Indian Gaming Commission, or foreign country, that has jurisdiction to approve that activity, and such ownership, operation or income is disclosed to the Tribes.

i. The Tribes may reject an application if the applicant has not provided all of the information requested in the application.

7. Contractor Reporting Requirements.

a. All contractors shall submit to the Tribes and the State any financial and operating data requested by the Tribes or the State.

b. The Tribes and the State each may specify the frequency and a uniform format for the submission of such data.

c. The Tribes, the State, or their agents reserve the right to examine contractor tax records and the detailed records from which the tax reports are compiled.

C. Fees for Approval of Employment Licenses and Contracts.

1. The State shall be reimbursed its costs for approval of employees and licenses, in accordance with the terms of this Compact.

2. The fees for State approval of licenses and contracts shall be set pursuant to a Memorandum of Understanding between the parties to be negotiated annually.

3. Should actual costs incurred by the State exceed the fees agreed to by the parties in the annual Memorandum of Understanding, the State will assess those additional costs to the applicants during or after the investigation. The applicant is required to pay the investigation fee in full prior to issuance of the contract or license except that interim contracts or licenses shall be issued for the period of time that a dispute is pending as contemplated at paragraph 4 of

this subsection.

4. Should the State and the Tribe fail to agree to fees in the Memorandum of Understanding, the dispute shall be resolved pursuant to Section 6 of this Compact.

D. Management Contracts.

1. The Primary Management Official shall provide the State at all times with a current copy of any management agreement with the Tribe that allows it to conduct Class III gaming on the Tribal trust land.
2. The Primary Management Official shall furnish to the Tribes and the State complete information pertaining to any transfer of controlling interest in the management company at least 30 days before such change; or, if the Primary Management Official is not a party to the transaction effecting such change of ownership or interests, immediately upon acquiring knowledge of such change or any contemplated change.

SECTION 8. REGULATIONS FOR OPERATION AND MANAGEMENT OF CLASS III GAMES.

- A. **Compliance with Regulations.** The acquisition, use and operation of all video lottery games of chance, keno and off-track parimutuel wagering authorized under this Compact shall be in accordance with the rules and regulations set forth in Appendices A, B and C. Appendices A, B and C are hereby incorporated into and made a part of this Compact.
- B. **Identification Badges.** The Tribes shall require all employees to wear, in plain view, identification badges issued by the Tribes that include photo and name. This requirement shall not apply to those security or compliance personnel identified in a memorandum of understanding between Tribes and the State.
- C. **No Credit Extended.** All gaming shall be conducted on a cash basis. Except as provided herein, no person shall be extended credit for gaming nor shall the Tribes permit any person or organization to offer such credit for a fee. This restriction shall not apply to credits won by players who activate play on video games of chance after inserting coins or current into the games. This Section shall not restrict the right of the Tribes or any other person to offer check cashing or install and accept bank card or credit card transactions in the same manner as is permitted at any retail business in the State.
- D. **Prohibition on Attendance and Play of Minors.** No under the age of 21 shall be allowed to play any video lottery game of chance operated under this Compact. If any person under the age of 21 plays and otherwise qualifies to win any video lottery prize

or compensation, the prize or compensation shall not be paid. No person under the age of 18 shall be allowed to play keno or place or collect pari-mutuel bets.

- E. Prohibition of Firearms.** With the exception of federal, state, county or Tribal law enforcement agents or officers, no person shall possess firearms within the Gaming Facility.
- F. Alcohol Policy.** No alcohol shall be served in the Gaming Facility unless authorized by the Tribes as permitted by Federal law. Currently, the Tribes do not legally permit the sale or possession of distilled spirits within the Warm Springs Indian Reservation, except at Kah-nee-ta Lodge. If tribal law is changed to permit alcohol sales at other locations, the Tribes shall notify the State. The Tribes and the State shall enter into a memorandum of understanding which will establish which state laws and Oregon Liquor Control Commission regulations shall be applied to the sale or service of alcoholic beverages at such location. Where required by federal law, service of alcohol shall be in compliance with State laws and Oregon Liquor Control Commission licensing regulations. Nothing in this subsection shall permit the State to impose taxes on the sale of alcoholic beverages by the Tribes. If alcohol is served in the Gaming Facility, no alcoholic beverages may be served free or at a reduced price to any patron of the Gaming Facility as an inducement to participate in any gaming.
- G. Liability for Damage to Person and Property.** During the term of this Compact, the Tribes shall maintain public liability insurance with limits of not less than \$250,000 for one person and \$2,000,000 for any one occurrence of any bodily injury or property damage. The Tribes' insurance policy shall have an endorsement providing that the insurer may not invoke Tribal sovereign immunity up to the limits of the policy. The Tribes shall indemnify, defend and hold harmless the State, its officers, directors, employees and agents from and against any claims, damages, losses or expenses asserted against or suffered or incurred by the State or its officers, directors, employees and agents (except as may be the result of their own negligence) based upon or arising out of any bodily injury or property damage resulting or claimed to result in whole or in part from any act or omission of the Tribes relating to the inspection of any gaming or gaming related facility pursuant to this Compact.

SECTION 9. INSPECTION AND ENFORCEMENT OF GAMING REGULATIONS.

A. Tribal Gaming Commission.

1. The primary responsibility for the regulation of the gaming operation authorized by this Compact, and for enforcement of this Compact within the Warm Springs Indian Reservation, shall be that of the Tribal Gaming Commission. The Tribal Gaming Commission's role shall include the promulgation and enforcement of rules and regulations to provide for the following:

- a. Ensure compliance with all relevant laws;
- b. Ensure the physical safety of patrons in, and of personnel employed by, the establishment;
- c. Safeguard the assets transported to and from the gaming facility and cashier's cage department;
- d. Protect patrons and property from illegal activity;
- e. Detain persons suspected of crimes for the purpose of notifying the law enforcement authorities;
- f. Record any and all unusual occurrences within the gaming facility in indelible ink in a bound notebook from which pages cannot be removed, and each side of each page of which is sequentially numbered, as follows:
 - (1) The assigned sequential number of the incident;
 - (2) The date;
 - (3) The time;
 - (4) The nature of the incident;
 - (5) The person involved in the incident; and
 - (6) The security employee assigned;
- g. Maintain logs relating to surveillance, security, cashier's cage, credit, machine (showing when video machines opened), and machine location;
- h. Establish and maintain an updated list of persons barred from the Gaming Facility either because of their criminal history or because their association with career offenders or career offender organizations poses a threat to the honesty, security and integrity of gaming operations, and furnish that list to the State as updated;
- i. Obtain an annual audit by a Certified Public Accountant;
- j. Maintain a closed circuit television system in the cash room of the Gaming Facility and provide copies of floor plan and TV system to the State.

- k. Maintain a cashier's cage in accordance with industry standards for security;
- l. Employ and train sufficient mutuel clerks;
- m. Employ and train sufficient security personnel; and
- n. Subject to State review and approval, establish a method for resolving disputes with players.

2. **Reporting of Violation.** A tribal game inspector shall inspect the Gaming Facility at random during all hours of gaming operation, and shall have immediate access to any and all areas of the gaming operation for the purpose of ensuring compliance with the provisions of this Compact and Tribal ordinances. Any violations of the provisions of this Compact, or of Tribal ordinances by the Tribal gaming operation, a gaming employee, or any person on the premises whether or not associated with the Tribal gaming operation, shall be reported immediately to the Tribal Gaming Commission and reported to the State within 72 hours of the time the violation was noted.
3. **Investigations and Sanctions.** The Tribal Gaming Commission shall investigate any reported violation of the Compact provisions and shall require the Tribal gaming operation to correct the violation upon such terms and conditions as the Tribal Gaming Commission determines to be necessary. The Tribal Gaming Commission shall be empowered by Tribal ordinance to impose fines and other sanctions within the jurisdiction of the Tribes against a gaming employee, or any other person directly or indirectly involved in, or benefitting from, the gaming operation. The State shall make all reasonable efforts to assist the Tribes in enforcing sanctions imposed by the Tribal Gaming Commission against non-Indians.
4. **Reporting to State.** The Tribal Gaming Commission shall forward copies of all completed investigation reports and final dispositions to the State on a continuing basis. If requested by the Tribal Gaming Commission, the State shall assist in any investigation initiated by the Tribal Gaming Commission, and provide other requested services to ensure proper compliance with the provisions of this Compact, Tribal ordinances and regulations or applicable laws of the State.

B. State Enforcement of Compact Provisions.

1. **Monitoring.** The State is authorized hereby to monitor the Tribal gaming operation to ensure that the operation is conducted in compliance with the provisions of this Compact. The Tribes may request removal of a State law enforcement officer or monitor on the basis of malfeasance, abuse or authority, or conduct disrespectful of Tribal institutions or culture. Effective performance of the officers' or monitor's duties shall not be the basis for disapproval. The State shall have free and unrestricted access to all areas of the Gaming Facility during normal operating hours without giving prior notice to the Tribal gaming operation.
2. **Access to Records.** The State is authorized hereby to review and copy, during normal business hours, and upon reasonable notice, all records maintained by the Tribal gaming operation; provided, that any copy thereof and any information derived therefrom, shall be deemed confidential and proprietary financial information of the Tribes to the extent provided under ORS 192.410 to 192.505. Any records or copies removed from the premises shall be returned to the Tribes after use. Only the State employee(s) formally designated by the State, and approved by the Tribes, shall be authorized to access Tribal gaming records pursuant to this subsection. Nothing in this subsection precludes the State or the Tribes from disclosing information subject to the Rules of Civil Procedure or Evidence in connection with litigation, a prosecution or a criminal investigation.
3. **Investigation Reports.** After completion of any inspection or investigation report, the State shall provide a copy of the report to the Tribal Gaming Commission.

SECTION 10. STATE ASSESSMENT OF COSTS FOR OVERSIGHT.

- A. **Imposition of Assessment for State Law Enforcement and Regulatory Expenditures.** The State shall make annually an assessment sufficient to compensate the State for the reasonable and necessary costs of regulating gaming operations and conducting state law enforcement investigations pursuant to this Compact. The State shall assess only those costs related to gaming. The State acknowledges expressly herein that the extent of oversight is related directly to the size and scope of gaming. Such assessment shall include any costs of fringe benefits for personnel. Fees received with respect to the submission of gaming licenses and contracts pursuant to subsection C of Section 7 of this Compact shall be subtracted from the amount of the assessment.
- B. **Procedure for Assessments.** The procedure for assessments shall be determined and agreed upon annually in a Memorandum of Understanding between the parties to this Compact. Such agreement shall include provisions for adjustments of excess assessments and underpayment of costs.

- C. If the parties fail to agree to the assessments under this section, such dispute shall be resolved pursuant to Section 16 of this Compact.

SECTION 11. APPLICATION OF REGULATORY STANDARDS.

- A. **Health and Safety Standards.** Tribal ordinances and regulations governing health and safety standards applicable to the Gaming Facility shall be at least as rigorous as standards imposed by the laws and regulations of the State. The Tribes agree to cooperate with any State agency generally responsible for enforcement of such health and safety standards outside the reservation in order to assure compliance with such standards within the Gaming Facility. However, the Tribes shall have the exclusive regulatory jurisdiction over the enforcement of health and safety standards applicable to the Gaming Facility. The Tribes shall use their regulatory jurisdiction to assure that health and safety standards are met.

- B. **Traffic Standards.**

- 1. **Kah-Nee-Ta Site.** The Tribes shall provide and maintain access from the Kah-Nee-Ta site from BIA roads onto the public road known as U.S. Highway 26 that is adequate to meet standards of the Oregon Department of Transportation or shall enter into agreements with the Oregon Department of Transportation for the provision and maintenance of such access by the State, including provisions for compensation by the Tribes for some portion of the costs incurred by the State in constructing such improvements to the public highway, including traffic control signals, as may be necessary. If the Oregon Department of Transportation determines that highway improvements are necessary, the department shall confer with the Tribes concerning the planning, design and construction of those improvements. If the Tribes dispute the amount of the cost to be paid by the Tribes, the Tribes may initiate the dispute resolution procedure established under Section 6 of this Compact.

- 2. **Permanent Gaming Facility.**

- a. The Tribe shall provide a traffic impact study, prepared by a qualified traffic engineer registered in the State of Oregon. The study shall evaluate the effect of the proposed Gaming Facility, and any related development proposed by the Tribe as part of the same site, on U.S. Highway 26. The traffic impact study shall determine the impacts of the proposed Gaming Facility and related development on the level of service of U.S. Highway 26.
- b. The Tribe shall provide and maintain access from its Gaming Facility onto the highway that is adequate to meet standards of the Oregon Department of Transportation, or shall enter into agreements with the

Oregon Department of Transportation for the provision of such access by the State.

- c. Traffic improvements shall be those necessary to maintain the level of service of U.S. Highway 26 and to provide safe access to and from the Gaming Facility. If the Oregon Department of Transportation determines that highway improvements are necessary, the department shall confer with the Tribe concerning the planning, design and construction of those improvements.
 - d. The Tribe shall pay the reasonable cost of necessary street, road or highway improvements determined to be necessary on the basis of the traffic impact study and Oregon Department of Transportation requirements. If the Tribe disputes the amount of costs to be paid by the Tribe, the Tribe may initiate the dispute resolution procedure established under section 16 of this Compact.
- C. The Tribes shall report to the Oregon Department of Revenue gambling winnings paid to any person subject to Oregon Personal Income Tax on those winnings whenever the Tribes would be required to report those winnings to the Internal Revenue Service. The information shall be reported in the manner required by the Oregon Department of Revenue.

SECTION 12. EFFECTIVE DATE; TERMINATION; AMENDMENTS.

- A. **Effective Date.** This Compact shall become effective upon execution by the State and by the Tribes and appropriate federal approval.
- B. **Termination.** This Compact shall remain in effect until such time as:
- 1. This Compact is terminated by written agreement of both parties;
 - 2. The State amends its Constitution or laws to criminally prohibit within the State conduct of all of the Class III gaming authorized by this Compact, whether for profit or not for profit;
 - 3. A court of competent authority makes a final determination that all of the Class III games authorized by this Compact are criminally prohibited under the law of the State, and the determination has become final and enforceable;
 - 4. The federal government amends or repeals IGRA so that a Compact is no longer required for the Tribes' exercise of Class III gaming; or
 - 5. Either party materially breaches this Compact; but only after the dispute resolution process set forth in Section 16 of this Compact has been exhausted,

and the breach has continued for a period of 60 days after written notice following the conclusion of the dispute resolution process.

C. Automatic Amendment.

1. If a type of Class III game authorized under Section 4 of this Compact is criminally prohibited by an amendment to State statute or Constitution, this Compact shall no longer authorize the Tribes to engage in that type of Class III game, and any provisions in this Compact authorizing such gaming shall be void and of no effect.
2. If a court decides that a Class III game authorized under this Compact is criminally prohibited, this Compact shall no longer authorize the Tribes to engage in that type of Class III game, and any provisions in this Compact authorizing such gaming shall be void and of no effect, but the Tribes shall be required to cease operating that Class III game only if and under the same circumstances and conditions as the State or any other affected person must cease operating the corresponding game under the court's decision.

D. Amendments.

1. Except as provided in subsection C of this section, this Compact shall not be amended for a period of three years after the effective date of this Compact, unless one of the following conditions occur:
 - a. The State becomes a party to another Tribal-State Compact that authorizes a tribe other than the Confederated Tribes of the Warm Springs Indian Reservation to engage in any Class III gaming activity or scope of gaming activity not permitted under the terms of Section 4 of this Compact;
 - b. The State amends State statute or Constitution to expand the type of Class III gaming permitted in the State for any purpose by any person, organization, or entity;
 - c. The State amends any rule or regulation that corresponds specifically to Appendices A, B or C of this Compact, but in such case this Compact shall be subject to amendment only to the extent of the specific rule or regulation.
 - d. The parties to this Compact agree in writing to enter amendment negotiations.
2. Paragraph 1. of this subsection does not require the State to renegotiate those terms of this Compact that apply to the forms of gaming authorized by Section

4 of this Compact, except to the extent that the State voluntarily consents to such renegotiation or as is otherwise provided for in this Compact.

3. Pursuant to paragraph 1 of subsection D above, the State or the Tribes may, by appropriate and lawful means, request negotiations to amend, replace or repeal this Compact. In the event of a request for renegotiation or the negotiation of a new Compact, this Compact shall remain in effect until renegotiated or replaced, unless sooner terminated under subsection B of Section 12. Such request to renegotiate shall be in writing and shall be sent by certified mail to the Governor of the State or the Chairman of the Board of Trustees of the Tribes at the appropriate office identified in Section 14 below. If a request is made by the Tribes, it shall be treated as a request to negotiate pursuant to IGRA. All procedures and remedies available under IGRA shall thereafter apply with the exception that the 180-day period for negotiation set forth at 25 U.S.C. 2710(d) shall be 100 days.

SECTION 13. DISCLAIMERS AND WAIVERS.

- A. **Gaming at Another Location or Facility.** Except as provided in this Compact, the Tribes hereby waive any right it may have under IGRA to negotiate a Compact for Class III gaming at any other location or facility for a period of three years from the effective date of this Compact.
- B. **Status of Class II Gaming.** Nothing in this Compact shall be deemed to affect the operation by the Tribes of any Class II gaming as defined in the Act or to confer upon the State any jurisdiction over such Class II gaming conducted by the Tribes.
- C. **Prohibition on Taxation by the State.** Nothing in this Compact shall be deemed to authorize the State to impose any tax, fee, charge or assessment upon the Tribes or any Tribal gaming operation except for charges expressly authorized in accordance with this Compact.
- D. **Preservation of Tribal Self-Government.** Nothing in this Compact shall be deemed to authorize the State to regulate in any manner the government of the Tribes, including the Tribal Gaming Commission, or to interfere in any manner with the Tribes' selection of its governmental officers including members of the Tribal Gaming Commission. No licensing or registration requirement contemplated by this Compact shall be applicable to such officers with respect to their capacity as officers of the Tribes.
- E. This Compact is exclusively for the benefit of and governs only the respective authorities of and the relations between the Tribes and the State. Nothing in this Compact shall be construed as creating or granting rights to any third party, or as establishing any objection or defense for any third party to any charge, offense or prosecution.

SECTION 14. NOTICES.

All notices required or authorized to be served to the Oregon State Police shall be served by first class mail at the following address:

Lieutenant
Oregon State Police
Lottery Security Section
Salem, Oregon 97310

All other notices required or authorized to be served shall be served by first class mail at the following addresses:

Legal Counsel to the Governor
Office of the Governor
254 State Capitol
Salem, Oregon 97310

Secretary/Treasurer, Tribal Council
Confederated Tribes of the
Warm Springs Reservation of Oregon
P.O. Box C
Warm Springs, Oregon 97761

SECTION 15. SEVERABILITY.

In the event that any section or provision of this Compact is held invalid, or its application to any particular activity is held invalid, it is the intent of the parties that the remaining sections of the Compact and the remaining applications of such section or provision shall continue in full force and effect.

SECTION 16. DISPUTE RESOLUTIONS.

- A. Except as specifically provided in Section 6 of this Compact, at the discretion of either party, in the event either party believes that the other party has failed to comply with any requirement of the Compact, that party may invoke the following dispute resolution procedure in order to foster cooperation and avoid the costs of litigation:
 - 1. The party asserting noncompliance shall serve written notice on the other party in the manner provided in Section 14. The notice shall identify the specific provision of the Compact alleges to have been violated and shall specify the factual basis for the alleged noncompliance. The State and the Tribes shall thereafter meet within thirty (30) days in an effort to resolve the dispute.
 - 2. In the event the dispute is not resolved to the satisfaction of the parties within ninety (90) days after service of notice, either party may initiate an action against the other party in the United States District Court for the District of Oregon to interpret or enforce the provisions of this Compact. In the event that the Federal court declines jurisdiction, an action can be filed in a State or

Tribal court of competent jurisdiction to interpret or enforce the provisions of this Compact.

- B.** Nothing in subsection A of this section shall be construed to waive, limit or restrict any remedy that is otherwise available to either party to enforce the provisions of this Compact or limit or restrict the ability of the parties to pursue, by mutual agreement, alternative methods of dispute resolution.
- C.** With respect to gaming not authorized by this Compact, nothing in this Compact shall be construed to limit the authority of the State or the federal government to take immediate action or enforce and prosecute the gambling laws of the State and the United States pursuant to 18 USC § 1166 (Section 23 of IGRA).

SECTION 17. INTEGRATION.

This Compact is the complete and exclusive expression of the parties' intent.

Appendix A

I. VIDEO LOTTERY GAMES

APPLICATION FOR CERTIFICATION OF A VIDEO LOTTERY TERMINATION

Section 177-100-070

- (1) A manufacturer shall not distribute a video lottery game or terminal for placement at the Gaming Facility unless the manufacturer and the game have been approved and the terminal has been certified by the State of Oregon. Only approved manufacturers may apply for certification of a video lottery terminal. Any manufacturer approved for Oregon State Lottery shall automatically be approved for the Tribes' gaming enterprise.
- (2) The manufacturer shall supply the Tribe and the State with a guideline and time table for accomplishing tasks involved in the acceptance and testing of the video lottery terminals. This includes all system functionality and communication of all information to and from the video lottery terminals, if any.
- (3) The manufacturer must provide a person to work with the Tribe and the State as needed in establishing, planning, and executing acceptance tests. Manufacturer assistance may also be requested in trouble-shooting communication and technical problems that are discovered when video lottery terminals are initially installed.
- (4) The manufacturer must submit terminal illustrations, schematics, block diagrams, circuit analysis, technical and operation manuals, program source codes and hexadecimal dumps (the compiled computer program represented in base 16 format), and any other information required by the Tribe and the State for purposes of analyzing and testing the video lottery terminal.
- (5) Testing of video lottery terminals will require working models of a video lottery terminal, associated required equipment, documentation described above to be transported to locations the Tribe and the State designate for testing, examination and analysis. The manufacturer shall pay all costs of any testing, examination, analysis and transportation of all video lottery terminals. The testing, examination and analysis of the video lottery terminals may include entire dismantling of the video lottery terminal and some tests that may result in damage or destruction to one or more electronic components of the video lottery terminal. The Tribe or the State may require that the manufacturer provide specialized equipment or the services of an independent technical

expert to test the video lottery terminal.

- (6) All video lottery terminal manufacturers must submit all hardware, software and test equipment necessary for testing of their video lottery terminals.
- (7) Hardware that does not meet the standards of the Compact, its appendices, the Tribe and the State shall not be acceptable.

TRIBAL GAMING INVENTORY DECAL.

Section 177-100-080

- (1) Each video lottery terminal certified for placement in the Gaming Facility shall display a Tribal Gaming Inventory Decal and must conform to the exact specifications of terminal prototypes and certified by the State.
- (2) No persons other than authorized Tribal or State personnel or their agents may affix or remove a Tribal Gaming Inventory Decal. The placement of the Tribal Gaming Inventory Decal represents that the terminal has been certified, inspected and approved for operation in the State. The placement of the Tribal Gaming Inventory Decal on any equipment by the Tribal Gaming Commission represents that the terminal has been certified, inspected and approved for operation in the State and shall constitute documentation that the certification has been and will be kept on file by the Tribe. No persons other than authorized tribal personnel may affix or remove the Tribal Gaming Inventory Decal.
- (3) No terminal may be transported off Tribal land until the Tribal Gaming Inventory Decal has been removed.
- (4) A terminal shall not be moved out of the Gaming Facility without prior notification to the State.

EXTERNAL TERMINAL SPECIFICATIONS.

Section 177-100-095

The terminals must be located in an area that is at all times monitored by the owner, manager, or employee of the manager to prevent access or play of video lottery terminals by persons under the age of 21.

DUTIES OF PRIMARY MANAGEMENT OFFICIAL.

Section 177-100-110

- (1) No Primary Management Official or any employee of the Primary Management Official

shall own or operate any gray machines.

- (2) The Primary Management Official shall not provide any form of financial assistance, or grant credit to enable players to play video lottery games.
- (3) The Primary Management Official shall attend all meetings, seminars, and training sessions required by the Tribe.
- (4) The Primary Management Official shall supervise its employees and their activities to ensure compliance with these rules.
- (5) The Primary Management Official shall assume responsibility for the proper and timely payment to players of video lottery game prizes.

DUTIES OF MANUFACTURERS.

Section 177-100-130

Manufacturers, their representatives and agents shall have the following duties and constraints:

- (1) Promptly report to the Tribe any violation or any facts or circumstances that may result in a violation of these rules.
- (2) Provide immediate access to all records and the entire physical premises of the business for inspection at the request of the Tribe, the State or their auditors.
- (3) Provide the Tribe or State with keys to the logic area of each approved video lottery terminal model upon request.

TRANSPORTATION OF VIDEO LOTTERY TERMINALS WITHIN, INTO OR THROUGH THE STATE.

Section 177-100-160

- (1) No person shall ship or transport video lottery terminals within or into the State, without first obtaining a written authorization or notification of approval from the State. Transporting or shipping within the State means the starting point and termination point of a trip are both within the boundaries of the State. Transportation or shipping into the State means the starting point is outside the State and terminates in the State.
- (2) No person shall ship or transport video lottery terminals through the State without first obtaining a written authorization from the nearest port of entry immediately upon arrival in the State.

- (3) The written authorization required under Subsections (1) and (2) of this rule shall include:
 - (a) The serial number of each terminal being transported;
 - (b) The full name and address of the person or establishment from which the terminals are obtained;
 - (c) The full name and address of the person or venue to whom the machines are being sent or transported; and
 - (d) The dates of shipment or transport within, into or through the State.
- (4) The written authorization shall accompany, at all times, the terminal or terminals in transport.

II. GENERAL VIDEO LOTTERY GAME RULES

AUTHORIZED VIDEO LOTTERY GAMES.

Section 177-200-000

- (1) Video lottery terminals may offer any video lottery game that satisfies the elements of prize, chance and consideration as described in Op. Atty. Gen. No. 6336, September 25, 1989.
- (2) A video lottery terminal may offer one or more of the authorized video games.

GAME REQUIREMENTS.

Section 177-200-010

- (1) Each game must display the amount wagered and the amount awarded for the occurrence of each possible winning occurrence based on the number of tickets wagered.
- (2) Each game must provide a method for players to view payout tables.

TICKET PRICE.

Section 177-200-015

Except as limited by the terms of the Compact, the price of a ticket for all video lottery games shall be determined by the Tribe.

PAYMENT OF PRIZES.

Section 177-200-020

No payment for prizes awarded on a terminal may be made unless the cash slip meets the following requirements:

- (1) It is fully legible and meets all the Tribe's security requirements.
- (2) It must not be mutilated, altered, unreadable or tampered with in any manner.
- (3) It must not be counterfeit in whole or in part.
- (4) It has been presented by a person authorized to play under these rules.

METHOD PAYMENT.

Section 177-200-030

The Primary Management Official shall designate employees authorized to redeem cash slips during the Tribe's business hours of operation. Prizes shall be immediately paid in cash or by check when a player presents a cash slip for payment meeting the requirements of these rules. No prizes may be paid in tokens or chips.

REQUIREMENTS FOR RANDOMNESS TESTING.

Section 177-200-050

Each video lottery terminal must have a random number generator that will determine the occurrence of a specific card or a specific number to be displayed on the video screen. A selection process will be considered random if it meets the following requirements:

- (1) Each card position, symbol position or, in the case of Keno, each number position satisfies the 99 percent confidence limit using the standard "Chi-squared analysis." "Chi-squared analysis" is the sum of the squares of the difference between the expected result and the observed result. "Card position" means the first card dealt, second card dealt, in sequential order. "Number position" means first number drawn, second number drawn in sequential order, up to the 20th number drawn.
- (2) Each card position, symbol position or number position does not produce a significant statistic with regard to producing patterns of occurrences. Each card or number position will be considered random if it meets the 99 percent confidence level with regard to the "run test" or any similar pattern testing statistic. The "run test" is a mathematical statistic that determines the existence

of recurring patterns within a set of data.

- (3) Each card position, symbol position or number position is independently chosen without regard to any other card or number drawn within that game play. The test is the "correlation test." Each pair of card or number positions is considered random if they meet the 99 percent confidence level using standard correlation analysis.
- (4) Each card position, symbol position or number position is independently chosen without reference to the same card or number position in the previous game. This test is the "serial correlation test." Each card or number position is considered random if it meets the 99 percent confidence level using standard serial correlation analysis.
- (5) The random number generator and selection process must be impervious to influences from outside devices including, but not limited to, electro-magnetic interferences, electrostatic discharge and radio frequency interfaces.

Regulation of Class III Gaming Between the
Confederated Tribes of the Warm Springs Reservation of Oregon
and the State of Oregon**

Appendix B

KENO DESCRIPTION

DEFINITIONS

Section 177-99-000

For the purposes of Keno, the following definitions apply unless the context requires a different meaning or is otherwise inconsistent with the intention of the rules adopted by the Oregon State Lottery Commission.

- (1) "Exchange ticket" means the ticket used to replace a consecutive game ticket that is validated before the last game on the ticket.
- (2) "Game" means the opportunity provided to a player to win a prize.
- (3) "Game slip" means the form used to indicate a player's selection.
- (4) "Spot" means the amount of numbers a player may play per game.
- (5) "Winning numbers" means the twenty (20) numbers from one (1) to eighty (80) which are randomly selected for each game.
- (6) "Keno runner" means an individual who picks up and delivers the Keno tickets that are written by customers in the gaming facility.
- (7) "Keno writer" means an individual stationed at the Keno counter who processes received tickets from either the customer or Keno runner.

GAME DESCRIPTION

Section 177-99-010

A Keno ticket has the numbers 1 through 80 on it. For each game a player may select from 1 to 20 numbers or spots. Twenty numbers are selected or drawn randomly. Prizes are awarded based on the total amount of winning numbers matched by a player for the number of spots played for that game.

PLAY RULES

Section 177-99-020

- (1) To play, a player must use a game slip.
- (2) The player must mark the amount of spots to be played. A player can pick from one (1) to twenty (20) spots per game slip. A player must also play a "way ticket." A way ticket is the equivalent of playing multiple Keno tickets, but marking only one ticket.
- (3) The player must mark the number of dollars to be wagered per game and/or per way.
- (4) The player may then select the spots to be played by one or two methods. The player may mark the player's own selections on the game slip; if this method is used, the number of spots marked on the game slip must equal the number of spots that were selected to play. The other method of play is to select "Quick Pick," the number of spots randomly generated by the computer will match the number of spots indicated by the player.
- (5) The player shall indicate the number of consecutive games to be played; 1, 2, 3, 4, 5, 10, 20, 50 or 100.
- (6) The player shall present the completed game slip and the amount wagered either to a Keno runner or directly to the Keno counter for processing by the Keno writer. The cost of the ticket is equal to the amount wagered times the number of ways you are playing the ticket times the number of consecutive games indicated by the player. For example, if \$2 per game is wagered on a regular (one-way) ticket for 5 consecutive games, the total cost is \$10. If the same ticket is played "3 ways," the cost is \$30.
- (7) Minimum and maximum wagers will be set by the Tribal Gaming Commission.

CANCELLATION OF TICKETS

Section 177-99-030

A game ticket may be cancelled or voided provided it is cancelled from the system prior to the start of the game.

DETERMINATION OF WINNERS

Section 177-99-040

- (1) Keno tickets will be sold only during the hours of operation of the gaming facility. The selection of winning numbers shall take place at established intervals.
- (2) Winning number combinations shall be generated at the established intervals through the use of a computer-driven random number generator or conventional Keno blower mechanism. The number generating device shall meet the requirements of the Tribal-State Government-to-Government Compact pertaining to contracts with manufacturers and suppliers, security, terminal specifications, equipment testing, procurement, duties of manufacturer and requirements for randomness testing.
- (3) The Tribal Gaming Commission shall establish the procedures for the operation and security of the numbers generation equipment.

PRIZE STRUCTURE

Section 177-99-050

- (1) Published payoff schedule shall be made available to the public at all times throughout the facility and in a conspicuous place immediately adjacent to the game.
- (2) A player is eligible to receive only the highest prize per game played on a ticket.

TICKET VALIDATION REQUIREMENTS

Section 177-99-060

- (1) After the numbers are drawn, the manager will review all inside (house copy) tickets and pull all winning tickets.
- (2) A master ticket to verify winners will be produced. The master ticket will have the winning numbers hole punched. This facilitates the verification of the customer's tickets.

**Tribal-State Government-to-Government Compact for
Regulation of Class III Gaming Between the
Confederated Tribes of the Warm Springs Reservation of Oregon
and the State of Oregon**

Appendix C

I. PARI-MUTUEL RULES - IN GENERAL

OPERATION OF PARI-MUTUEL DEPARTMENT

Section 462-50-040

The Tribal Gaming Commission shall require a Primary Management Official to maintain separate oversight of par-mutuel activities within the Gaming Facility.

PROHIBITIONS AGAINST WAGERS BY MINORS AND EMPLOYEES

Section 462-50-140

- (1) No person under the age of 18 years shall be allowed to place or collect a wager at the off-track wagering facility.
- (2) No employee of the off-track wagering facility shall be allowed to place or collect a wager at the off-track wagering facility while on duty.

UNCLAIMED WINNINGS

Section 462-50-210

- (1) The Tribal Gaming Commission shall require the pari-mutuel wagering facility to maintain, or provide for, an unclaimed winnings account for each race meet in which wagers are accepted.
- (2) The Commission shall require that any person claiming to be entitled to any part of the winnings from a mutuel wagering system operated by the Tribes who fails to claim the money due the person prior to completion of the race meet for which a mutuel ticket was purchased, may file a claim for payment of winnings within 90 days after the close of the race meet. After 90 days from the close of a race meet, all tickets may be deemed void.
- (3) After 120 days after the close of a race meet, unclaimed winnings in the account may revert to the Tribes.

RECORDS

Section 462-50-240

The Tribal Gaming Commission shall assure that sufficient records of wagering are maintained by the pari-mutuel wagering facility to allow review of the opening line, odds fluctuations and the amount of wagers at each window or station.

PARI-MUTUEL TICKETS

Section 462-50-250

- (1) A pari-mutuel ticket is evidence of a contribution to the pari-mutuel pool in which the Tribes are participating, and is evidence of the obligation of the operator of the pool to pay to the holder thereof such portion of the distributable amount of the pari-mutuel pool as is represented by such valid pari-mutuel ticket. The Tribes shall cash all valid winning tickets when such are presented for payment during the course of the race meeting for which the tickets are sold, and for 90 days after the last day of the race meeting.
- (2) To be deemed a valid pari-mutuel ticket, such ticket shall have been issued by a pari-mutuel ticket machine operated by the Tribes and recorded as a ticket entitled to a share of the pari-mutuel pool, and contain imprinted information as to:
 - (a) The name of the Tribes and of the association operating the race meeting;
 - (b) A unique identifying number of code;
 - (c) Identification of the terminal at which the ticket was issued;
 - (d) A designation of the performance for which the wagering transaction was issued;
 - (e) The contest number for which the pool is conducted;
 - (f) The type or types of wagers represented;
 - (g) The number of numbers representing the betting interests for which the wager is recorded;
 - (h) The amount or amounts of the contributions to the pari-mutuel pool or pools for which the ticket is evidence.
- (3) The Tribes may withhold payment and refuse to cash any pari-mutuel ticket

deemed not valid. A ticket is not valid if it has been recorded or reported as previously paid, cancelled or non-existent.

PARI-MUTUEL TICKET SALES

Section 462-50-260

- (1) Pari-mutuel tickets shall not be sold by anyone other than the Tribes or a licensed employee of the Tribes.
- (2) No pari-mutuel ticket may be sold on a contest for which wagering has already been closed and the Tribes shall not be responsible for ticket sales entered into but not completed by issuance of a ticket before wagering is closed on that contest.
- (3) Claims relating to a mistake on an issued or unissued ticket must be made by the bettor before leaving the seller's window. Once a bettor has left the window all bets are final, except as provided by rule of the Tribal Gaming Commission.
- (4) Payment on winning pari-mutuel wagers shall be made on the basis of the order of finish as posted and declared "official." Any subsequent change in the order of finish or award of purse money as may result from a subsequent ruling by race stewards or the regulatory body governing the race meet shall in no way affect the pari-mutuel payoff.
- (5) The Tribes are not required to satisfy claims on lost, mutilated or altered pari-mutuel tickets, except as provided in rules of the Tribal Gaming Commission.
- (6) The Tribes are not obliged to enter a wager into a betting pool if unable to do so due to an equipment failure.

CLAIMS FOR PAYMENT FROM PARI-MUTUEL POOL

Section 462-50-280

- (1) At a designated location, a written, verified claim for payment from a pari-mutuel pool shall be accepted by the Tribes in any case in which the Tribes have withheld payment or have refused to cash a pari-mutuel wager. The claim shall be made in the manner and on such form as prescribed by the Tribal Gaming Commission.
- (2) In the case of a claim made for payment of a mutilated pari-mutuel ticket that does not contain the total imprinted elements required in Section 462-50-250, the manager of the pari-mutuel department shall make a recommendation to

accompany the claim to the Tribal Gaming Commission as to whether or not the mutilated ticket has sufficient elements to be positively identified as a winning ticket.

- (3) In the case of a claim made for payment for a pari-mutuel wager, the Commission shall adjudicate the claim and order payment, deny the claim or make such other order as it may deem proper.

PAYMENT FOR ERRORS

Section 462-50-290

If an error occurs in the payment amounts for pari-mutuel wager that are cashed or entitled to be cashed; and, as a result of the error the pari-mutuel pool involved in the error is not correctly distributed among winning ticket holders, the following shall apply, unless otherwise provided in the rules governing any interstate pari-mutuel pool in which the Tribes participate.

- (1) The Tribes shall verify that the amount of the commission, the amount of breakage and the amount of payoffs is equal to the total gross pool. If the amount of the pool is more than the amount used to calculate the payoff, the underpayment shall revert to the Tribes.
- (2) If the error results in an overpayment to winning wagers, the Tribes shall be responsible for such payment.

COMPLAINTS CONCERNING PARI-MUTUEL OPERATIONS

Section 462-50-350

- (1) When a patron makes a complaint concerning the pari-mutuel department to the Tribes or the Primary Management Official, a complaint report shall be prepared. The report shall contain the following information:
 - (a) The name of the complaint;
 - (b) The nature of the complaint;
 - (c) The name of the person(s), if any, against whom the complaint was made;
 - (d) The date of the complaint;
 - (e) The action taken or proposed to be taken, if any, by the Tribes or Primary Management Official.

- (2) The complaint report shall be submitted to the Tribal Gaming Commission as required by the Commission.

II. OFF-TRACK PARIMUTUEL WAGERING

DEFINITIONS

Section 462-50-400

The following definitions shall apply to these rules unless the text otherwise requires.

- (1) "Authorized User" means a person authorized by the Tribes to receive, to decode and to use for legal purposes the encrypted simulcast signal of racing events.
- (2) "Combined Pari-Mutuel Pools," or "Combined Pools" means the pari-mutuel wagers at one or more off-track wagering facilities being contributed into the pari-mutuel pools of a host association.
- (3) "Commission" means the Tribal Gaming Commission.
- (4) "Host," "Host Association," or "Host Track" means the race track conducting a licensed race meet that is being simulcast.
- (5) "Intrastate Wagering" means pari-mutuel wagering at an off-track wagering facility on Oregon racing events being run at an Oregon host association.
- (6) "Off-Track Wagering" means pari-mutuel wagering conducted on a race at a location other than the race course where the race is actually held.
- (7) "Off-Track Wagering Facility," "Intrastate Wagering Facility" or "Extended Wagering Facility" means physical premises, utilized for the conduct of pari-mutuel wagering on racing events being run elsewhere.
- (8) "Simulcast" or "simulcasting" means live audiovisual electronic signals emanating from a race meeting and transmitted simultaneously with the running of the racing events at that meeting, and includes the transmission of pari-mutuel wagering odds; amounts wagered and payoff on such events, and other racing programming relating to the race animals or participants.

OFF-TRACK WAGERING RULES

Section 462-50-420

No person, partnership, corporation or other entity shall be allowed to operate an off-track wagering facility under this Compact except according to the rules of the Tribal Gaming Commission. No change in the plan of operation of an off-track wagering facility may occur until the change to the plan is approved by the Commission.

APPROVAL OF OFF-TRACK WAGERING FACILITIES

Section 462-50-430

The Commission's rules shall require an off-track wagering facility to:

- (1) Provide security measures adequate to assure personal safety of patrons and employees, safeguard transmission of simulcast signals, secure money used for pari-mutuel wagering activity and to control the transmission of wagering data to effectuate common wagering pools.
- (2) Use data processing, communication and transmission equipment that will at all times assure accurate and secure transmission of wagers, take outs and surcharges; program information, weight changes, over weights, tip sheets, scratches and all other information that is usually made available to patrons at a race track.
- (3) Use adequate transmitting and receiving equipment of acceptable broadcast quality.
- (4) Assure that all equipment is in proper working order, and that sufficient back up equipment is available to prevent foreseeable interruption in operations due to breakdowns or malfunctions of data, transmission or communications equipment.
- (5) Use a system of accounts that will maintain a separate record of pari-mutuel revenues collected by the simulcast facility, the distribution of those revenues (take out, breakage and return to the public) and account for costs of the simulcast operation.
- (6) Provide, or obtain access to, the necessary totalizator equipment to conduct simulcast wagering, and assure that the integrity of the tote system used by the off-track wagering facility is maintained.
- (7) Ensure correct payment of the distributable amounts of parimutuel pools held by the Tribes pursuant to the rules applicable to the combined pools in which the off-track wagering facility is participating, and rules of the Commission.
- (8) Ensure that patrons of the off-track wagering facility receive accurate information as to the rules for wagering and distribution of winnings that apply

to each race.

- (9) Ensure that personnel employed in the off-track wagering facility are sufficiently trained in the areas of money handling, operation of tote and ticket generating equipment and communications equipment.
- (10) Provide for continuous viewing and continuous transmission of odds for the race meets on which wagers will be accepted by the off-track wagering facility.

FINANCIAL RECORDS

Section 462-50-440

The Commission shall provide for the audit of the pari-mutuel operations at an off-track wagering facility. The audit shall enable review of the financial records related to each separate betting pool in which patrons of the facility participate.

GENERAL OPERATIONS

Section 462-50-460

The Commission shall provide for sufficient communications capability with the disseminator of a simulcast signal to assure accurate transmission and receipt of wagering and odds information. The Commission shall provide for immediate, uninterrupted communication by voice and by other data transmission media in order to be able to respond in a timely way to any operational problem with equipment or any problem related to the conduct of a race meet that would affect wagering at the off-track facility.

UNUSUAL SITUATIONS IN OFF-TRACK WAGERING

Section 462-50-480

The Commission shall establish procedures for responding to loss of audio or video signal at the off-track wagering facility. In the case of loss of signal, the Commission's rules shall assure that unless an alternative means of displaying odds is provided, wagering shall cease until signal can be re-established.

INTERSTATE COMMON POOL WAGERS

Section 462-50-490

- (1) Pursuant to the Interstate Horseracing Act of 1978 (15 USC § 3001 to 3007), the Tribal Gaming Commission shall obtain consent from the Oregon Racing Commission in order to participate in interstate common pools.

- (2) The Tribal Gaming Commission shall require any wagers in interstate common pools to be accounted for separately other than for purposes of computing odds and calculating payoffs and breakage.

GUEST STATE PARTICIPATION IN INTERSTATE COMMON POOLS

Section 462-50-500

The Tribal Gaming commission shall provide rules for the combination of pari-mutuel wagering pools with corresponding pools in multiple jurisdictions. Those rules shall govern the adjustment of takeout rates and merging of bets placed in an interstate common pool.

**Tribal-State Government-to-Government Compact
for Regulation of Class III Gaming between the
Confederated Tribes of the Warm Springs Reservation of Oregon
and the State of Oregon**

EXHIBIT 1

DESCRIPTION OF GAMING LOCATION

The Kah-Nee-Ta Facility is an addition to the existing Kah-Nee-Ta Lodge building. The combined Facility and Lodge will consist of at least 70,838 square feet, including the following major areas: Entry and public areas of approximately 10,687 square feet; Class II and Class III gaming areas of approximately 8,518 square feet; Kitchen and Food Service of approximately 24,853 square feet; Meeting Rooms of approximately 6,400 square feet; Building Services of approximately 12,896 square feet; and Administrative Area of approximately 9,426 square feet. The Gaming Facility will be as illustrated in this Exhibit, or an alternate design similar in all material respects.

**TRIBAL-STATE COMPACT FOR REGULATION OF
CLASS III GAMING BETWEEN THE KLAMATH TRIBES AND
THE STATE OF OREGON**

AMENDMENT I

This amendment is made to the Class III Gaming Compact between the Klamath Tribes and the State of Oregon executed on December 16 1994, and approved by the Secretary of the Interior on February 24, 1995. The terms of this amendment are in addition to and, except as specifically provided herein, do not supersede any of the provisions of the original compact.

WHEREAS, the Class III Gaming Compact between the Klamath Tribes and the State of Oregon provides that the operation of the compact is dependent upon the Secretary of the Interior taking certain land into trust for the Tribes by December 31, 1995; and

WHEREAS the Tribes have made all reasonable efforts to have the land taken into trust; and

WHEREAS the land has not been taken into trust for reasons beyond the control of the Tribes; and

WHEREAS the Tribes have requested an extension of the deadline for taking the land into trust; and

AND WHEREAS, the State agrees that the circumstances justify this Amendment;

NOW THEREFORE, the Tribe and the State hereby approve the following amendments to the Compact:

I. Section 13.F is amended to read:

F. Location Eligible for Class III Gaming. The State has negotiated and executed this Compact pursuant to the process established under 25 USC § 2710(d)(3), with knowledge that the Gaming Location identified in Exhibit II is not currently held in trust by the United

States for the benefit of the Klamath Tribes. This compact is effective only at the time the United States takes the land described in Exhibit II to this Compact into trust for the Tribes. Operation of this Compact is dependent upon the described land being taken into trust as a result of the Bureau of Indian Affairs fee-to-trust process. Operation of this Compact is further dependent upon the described land being taken into trust no later than December 31, [~~1995~~] **1996**. Operation of this Compact is further dependent upon a determination by the Secretary of the Interior, in connection with review and approval of this Compact, that the Gaming Location is eligible to be used by the Tribes for the purpose of gaming as described in 25 USC § 2719. If at any time it is determined by the Secretary or other competent authority that the Gaming Location is not eligible to be used by the Tribes for the purpose of gaming as described in 25 USC § 2719, this Compact shall no longer authorize gaming at that location.

**TRIBAL-STATE COMPACT FOR REGULATION OF
CLASS III GAMING BETWEEN
THE CONFEDERATED TRIBES OF SILETZ INDIANS OF OREGON
AND THE STATE OF OREGON**

AMENDMENT I

This amendment is made to the Class III Gaming Compact between the Confederated Tribes of Siletz Indians of Oregon (Tribes) and the State of Oregon (the State) executed on September 14, 1999, and approved by the Secretary of the Interior on October 29, 1999. The terms of this amendment are in addition to and, except as specifically provided herein, do not supersede any of the provisions of the original Compact.

WHEREAS, the Tribes desire to purchase additional video lottery terminals as provided in that Compact, but the definition in that Compact has caused some confusion with respect to the manufacture of one kind of Video Lottery Terminal the Tribes desire to purchase; and

WHEREAS, the parties desire to clarify that definition, in accordance with the intent of the parties;

NOW THEREFORE, the Tribes and the State hereby approve the following amendment to the Compact:

The parties agree to clarify the definition of "Video Lottery Terminal" (Section 3Z) as follows:

Z. "Video Lottery Terminal" or "Terminal" means any electronic or other device, contrivance or machine where the game outcome decision-making portion of the overall assembly is microprocessor controlled wherein the ticket or game outcome is displayed on a video display screen, electronically controlled physical reels, or other electronic or electro-mechanical display mechanism and that is available for consumer play by one player at a time at the device upon payment of any consideration, with winners determined by the application of the element of

chance and the amount won determined by the possible prizes displayed on the device and which awards game credits. Such device shall also display both win amounts and current credits available for play to the player.

**TRIBAL-STATE GOVERNMENT-TO-GOVERNMENT COMPACT
FOR REGULATION OF CLASS III GAMING
BETWEEN THE CONFEDERATED TRIBES OF
THE WARM SPRINGS RESERVATION OF OREGON AND
THE STATE OF OREGON**

AMENDMENT I

This amendment is made to the Class III Gaming Compact between the Confederated Tribes of the Warm Springs Reservation of Oregon and the State of Oregon executed on January 6, 1995, and approved by the Secretary of the Interior on March 6, 1995. The terms of this amendment are in addition to and, except as specifically provided herein, do not supersede any of the provisions of the original compact.

WHEREAS, the continued growth and success of tribal gaming depends upon public confidence and trust that the tribal gaming operation is honest, fair and secure, and is free from criminal and corruptive influences;

AND WHEREAS, public confidence and trust can be maintained only if there is strict compliance with laws and regulations related to licensed gaming establishments, by all persons involved in the gaming operation;

AND WHEREAS, the relationship between the State and the Tribes rests on mutual trust and the recognition that each has a primary duty to protect the gaming public through separate, appropriate responsibilities during the life of current and future Compacts;

AND WHEREAS, the Tribes wishes to amend the Compact to provide for regulation of house banked blackjack at the gaming facility;

AND WHEREAS, the State agrees that the circumstances justify this Amendment;

NOW THEREFORE, the Tribes and the State hereby approve the following amendments to the Compact:

I. Section 7.B.6. is amended by adding a new subparagraph j, as follows:

- j. Notwithstanding subparagraphs a, b, or c of this paragraph, if a Class III Gaming Contract application is required to be denied under subparagraphs a, b, or c of this paragraph, because a person previously associated with the applicant or an employee of the applicant has been convicted of a crime, the Tribes may enter into a contract with the applicant if the applicant has severed its relationship with that person or employee. Before the Tribes may enter into a contract under this subparagraph, the State and the Tribes must agree that the relationship between the applicant and the person or employee has been severed. For purposes of this subparagraph, a relationship is severed if the person or the employee has no continuing connection with the direction or control of any aspect of the business of the applicant, and the person or employee is no longer employed by the applicant in any capacity. The burden of showing to the satisfaction of the Tribes and the State that a relationship has been severed is on the applicant.

II. Section 7.A.8. (Temporary Licensing of Employees.) is amended to read:

- a. The Tribes may issue a temporary license to High Security Employees [30] **seven** days after submission of the application to the Oregon State Police. The Temporary license shall expire and become void upon completion of the background check and award or denial of a permanent license.
- b. The Tribes may employ Low Security Employees on probation **upon** submission of the application to the state police. Any Low Security Employee shall be subject to immediate termination during probation if the Tribes determines that the employee does not meet the criteria established in sub-subparagraphs (1) through (5) of subparagraph 7.B.5. below.

III. Appendix A. I. is amended to read:

Section 177-100-070

(1) A manufacturer shall not distribute a video lottery game or terminal for placement at the Gaming Facility unless the manufacturer and the game have been approved and the terminal has been certified by the State of Oregon. Only approved manufacturers may apply for certification of a video lottery terminal. [~~Any manufacturer approved for Oregon State Lottery shall automatically be approved for the Tribes' gaming enterprise.~~]

IV. Section 4 is amended to add a new Subsection H and Appendix D, as follows:

H. Additional Authorized Game at Gaming Facility.

1. In addition to the games identified in Subsection B of this Section, and subject to the conditions prescribed in this subsection, the Tribes may engage in house banked blackjack as described in Appendix D, at the gaming facility.
2. Before house banked blackjack is conducted at the gaming facility the Tribal Gaming Commission shall:
 - a. Develop rules and procedures for a system of internal controls that meets the minimum standards established in Appendix D.
 - b. Provide appropriate training for all dealers, supervisors and surveillance personnel involved in house banked blackjack, and for all Tribal Gaming Inspectors, according to the minimum training standards established in Appendix D.
 - c. Ensure that there is established a security and surveillance plan that meets the minimum standards established in Appendix D.
 - d. Adopt rules of operation for house banked blackjack that meet the minimum standards established in Appendix D, including rules of play, standards for equipment.
 - e. Adopt a dispute resolution procedure that provides for investigation and review of any player complaint.
3. The Tribes shall establish an initial wager limit of \$50 per hand, except that the Tribes may offer a maximum wager limit of \$75 per hand on one table. After a period of two months of operation of house banked blackjack in full compliance with the requirements of this subsection, the Tribes may change the initial wager limit from \$75 to \$100 for one table. After any period of six months of operation of house banked blackjack in full compliance with the requirements of this subsection, the Tribes may request a change in the initial wager limit. The State may refuse to agree to an increase in the initial wager limit if there have been any significant problems with the conduct of house banked blackjack due to noncompliance with the internal controls, the rules of operation of the game or with the terms of this subsection. The amount of

any increase in the wager limit must be agreed to by both the State and the Tribes.

4. The Tribes may operate a maximum of eight tables of house banked blackjack at the gaming facility during the term of this agreement. The Tribes also agrees that during the term of this amendment the Tribes will not operate more than 340 video lottery terminals at the gaming facility, except that the Tribes may increase the number of video lottery terminals by decreasing the number of blackjack tables on the gaming floor and vice versa. An increase of eight video lottery terminals is permitted for each decrease of one blackjack table.
5. The Tribes agrees to cooperate with State law enforcement on the investigation and prosecution of any gambling crime committed at the gaming facility. The Tribes and the State agree to cooperate in establishing a state-wide system to identify and monitor persons excluded from the gaming facility or from any other tribal gaming facility in this State.
6. The Tribes and the State agree to the Memorandum of Understanding set forth in Exhibit I to this Amendment.
7. Except as specifically provided in this amendment, this amendment does not operate to modify Subsection B of Section 4 of the Compact in any other way.
8. The Tribes and the State agree that the gaming area of the Kah-Nee-Ta Facility has been expanded and that the limit on the number of video lottery terminals set forth in Section 4.D.1. of the Compact shall be increased to no more than 403, for the purposes of this amendment only.

VI. Paragraph IV of this amendment expires on June 30, 1996. Unless an extension of paragraph IV of this amendment or a permanent amendment governing the operation of house banked blackjack has been negotiated and executed before the expiration of paragraph IV of this amendment, the Tribes agrees to terminate blackjack games at the gaming facility until a new agreement has been negotiated and executed. In the event that a compact amendment is under negotiation the Tribes may replace blackjack tables with video lottery terminals at the ratio of eight terminals per blackjack table.

**TRIBAL-STATE GOVERNMENT-TO-GOVERNMENT COMPACT
FOR REGULATION OF CLASS III GAMING
BETWEEN THE CONFEDERATED TRIBES OF
THE WARM SPRINGS RESERVATION OF OREGON AND
THE STATE OF OREGON**

**APPENDIX D
HOUSE BANKED BLACKJACK**

I. DEFINITIONS

As used in this Amendment and Appendix the following definitions shall apply:

Blackjack. "Blackjack" is a card game in which the object of the game is to accumulate cards with a total count nearer to 21 than that of the dealer.

Industry Standard. "Industry standard" refers to standards accepted or approved by the Nevada Gaming Control Board and the Nevada Gaming Commission. If the Nevada Gaming Control Board and Nevada Gaming Commission have no accepted or approved standard, "industry standard" refers to the commonly used practice in the gaming industry in the State of Nevada.

II. ADOPTION OF RULES FOR HOUSE BANKED BLACKJACK

A. The Tribal Gaming Commission shall adopt rules to govern the conduct of house banked blackjack at the gaming facility. Current copies of the game rules in effect shall be provided to the State. The rules shall include:

1. Procedures of play
2. Minimum and maximum permissible wagers
3. Payout on each form of wager
4. Procedures to be followed on occurrence of irregularities in play
5. Prohibitions on side betting between and against player and against the house
6. Hours of operation

Summaries of the rules for the method of play and payouts on winning bets shall be visibly displayed in the gaming facility and betting limits applicable to any gaming station shall be displayed at such gaming station.

B. The Tribal Gaming Commission shall also adopt specifications (may be provided by the equipment manufacturer or supplier) applicable to gaming equipment for:

1. Physical characteristics of chips; and
2. Physical characteristics of the following:
 - a. Cards (including procedures for receipt and storage)
 - b. Blackjack tables
 - c. Blackjack layouts
 - d. Dealing shoes (including procedures for receipt and storage)
 - e. Such other equipment as may be required for use in the game.

C. The Tribal Gaming Commission shall establish and provide to the State for review the rules and procedures for use of drop boxes at each gaming station to include: security, transportation to and from gaming stations, storage, counting and recording contents.

D. The Tribal Gaming Commission shall establish and provide to the State the duties, responsibilities and operating procedures for supervisors, pit bosses, floor managers, security and surveillance personnel.

III. INTERNAL CONTROLS

The Tribal Gaming Commission shall develop rules, policies, procedures and regulations for house banked blackjack, consistent with industry standards, that include provisions for the following:

1. Dealer Qualifications and Training Procedures
2. Shuffling, Cutting and Dealing Procedures
3. Specific Game Procedures & Rules
4. House Bank Rules (stake/chair or table rental if any)
5. Bet/Wager Limit By Table or Game
6. Card Inventory, Security, and Storage
7. Replacing Decks
8. Destruction of Used Decks
9. Qualifications and Training for Floor Supervisors and Pit Bosses
10. Chips
 - a. Denominations
 - b. Storage and Security
 - c. Table Inventory
 - d. Replacement Procedures (changing chip design)
 - e. Payment Procedures for Replaced Chips

11. Accepting Tips by Dealers
12. Federal and State Tax Reporting
13. Distributing gaming chips to gaming stations
14. Procedures for opening and closing gaming stations
15. Procedures for removing chips and coins from gaming stations
16. Table Identification

IV. TRAINING

A. The Tribal Gaming Commission shall require each blackjack supervisor, each pit boss, each blackjack dealer and all surveillance personnel to be trained either by a training school, academy or college recognized under industry standards or through an in-house training program such that the supervisor, pit boss, dealer or surveillance employee has the knowledge and skills required under industry standards for the job function that employee performs.

B. If blackjack dealers are trained through an in-house training program, the Tribes and State must agree that the training program meets the following minimum standards:

1. A minimum of 96 hours of instruction.
2. The instruction shall consist of a combination of lecture and laboratory.
3. The instruction shall be provided by an instructor licensed by the Tribal Gaming Commission.
4. The curriculum must be designed to provide students with the knowledge and skills necessary to satisfy entry level requirements common in the industry.

C. Each blackjack supervisor, pit boss and surveillance officer, shall receive training sufficient to meet industry standards in the areas of game protection, player money management and betting, card counting, and detection of other cheating methods.

D. The Tribal Gaming Commission may license blackjack trainers. At a minimum those licensees shall demonstrate sufficient skills, and meet minimum requirements that are consistent with industry standards, in the area of house banked blackjack. The Gaming Commission shall impose appropriate requirements for trainer licensing, such as graduation from a training school, academy or college recognized by the industry as having expertise in the areas of casino management and house banked blackjack, or an acceptable substitute of actual experience and references and a demonstrated ability to teach blackjack dealing skills and/or blackjack theory and games protection.

E. Training standards and programs shall be submitted to the State for review and comment. If the State determines that the Tribes' training standards or programs do not meet industry standards, or that the standards are not met in dealer or supervisor training, dispute resolution may be initiated.

V. SURVEILLANCE SYSTEMS

A. SURVEILLANCE SYSTEMS (GENERAL)

1. The purposes of a gaming facility surveillance system is to safeguard assets, to deter, detect and prosecute criminal acts, and to maintain public confidence and trust that Tribal gaming is conducted honestly and free of criminal elements and activity.
2. The Tribal Gaming Commission shall develop a surveillance system plan, and install, maintain and operate the gaming facility surveillance system in accordance with the standards set forth in this Appendix. The surveillance system plan shall be approved by the Tribal Gaming Commission if it satisfies the minimum standards.
3. The Tribal Gaming Commission shall submit the surveillance system plan to the State for review within 30 days after the date of execution of this amendment.
4. The plan shall include a description of all equipment utilized in the surveillance system; a blueprint or diagram that shows all of the areas to be monitored and the placement of surveillance equipment in relation to the activities being observed; a description of the procedures utilized in the operation of the gaming facility surveillance system; a description of the qualifications, training, and procedures of surveillance personnel; organizational reporting structure for surveillance personnel; and any other information required by the standards set forth in this Appendix.
5. The State shall review the proposed surveillance system plan submitted by the Tribes and advise the Tribal Gaming Commission and the Primary Management Official whether the minimum standards are satisfied. The State shall review the installation of the surveillance system when a review and inspection is performed. The State shall advise the Tribal Gaming Commission and the Primary Management Official whether the surveillance system has been installed, maintained, and operated according to the minimum standards. The Tribes agrees that the surveillance system will be altered as necessary to meet the minimum standards. If the Tribes currently has a surveillance system in place, the surveillance plan may use a combination of current equipment and new to meet the standards, if there is no compromise of picture and recording quality.

6. In addition to the access granted under section 9.B.1. of the Compact, the State may review the operation of the surveillance system at least twice each year during an announced compliance audit. The State shall have access at any time to all surveillance records, tapes, reports and monitoring rooms at any time for the purpose of monitoring compliance with minimum standards and to confirm gaming integrity or security.

7. At the completion of any random or scheduled inspection the State will report its findings concerning the surveillance system to the Tribal Gaming Commission and the Primary Management Official. The Tribes and the State agree that the results of the inspection are for the internal use of the Tribes and the State and, to the extent allowed under Oregon law, shall not be disclosed to anyone other than the Tribal Gaming Commission and the Primary Management Official unless such disclosure is necessary for resolution of a dispute pursuant to the procedures in Section 16 of the Compact, or to provide evidence for a criminal prosecution.

8. The Tribes shall separate management of the functions of security and surveillance within the gaming facility.

9. The State shall perform a background investigation on all personnel employed as surveillance personnel, as provided in section 7 of the compact.

B. SURVEILLANCE SYSTEMS MINIMUM STANDARDS

1. SURVEILLANCE SYSTEM EQUIPMENT

- a. The surveillance system equipment must be able to identify each player, the dealer, and be of sufficient resolution and clarity to read individual cards and money denomination.
- b. The surveillance system shall be a combination of fixed cameras and pan-tilt-zoom (PTZ).
- c. The cameras and monitors may be either black and white, color or a combination of both. (The State recommends, but does not require, a combination of black/white and color.)
- d. The primary surveillance room and monitors must have override capabilities.

- e. Gaming Facility management shall establish communications systems on the gaming floor that are capable of immediately alerting surveillance personnel.
 - f. Telephones on the gaming floor shall have the capability of a direct line or extension to the surveillance personnel.
 - g. Surveillance personnel in the surveillance room shall have radio communication with security personnel if security officers have radio communication with each other.
 - h. Surveillance equipment shall include a means of alerting surveillance personnel of money transfers prior to the transfer taking place and a means to advise surveillance personnel of the locations, table number, time, date, and amount of transfers, and to whom the transfers will be made.
 - i. All monitors being recorded must display time and date on screen
 - j. All fixed cameras will be continuously taped/all PTZ cameras will have the capability for taping of what is being monitored.
2. SURVEILLANCE SYSTEM EQUIPMENT LOCATIONS. At a minimum, surveillance cameras must provide:
- a. Main cashier
 - (1) Overview of cage working area
 - (2) Ability to identify patrons and employees
 - (3) PTZ or fixed camera allowing identification of cash transactions at each cash drawer
 - (4) Camera over file window

- b. Soft count room
 - (1) Clear view of entire count room
 - (2) Camera directly over count table to identify dollar amounts
 - (3) Clear view of vault
 - (4) Clear view of drop box
 - (5) Ability to read counting scale/meter

- c. Hard count room (if used)
 - (1) Clear view of entire count room
 - (2) Clear view of wrapping and/or counting machine

- d. Pit
 - (1) Ability to determine chip value and card value
 - (2) Clear view of playing surface
 - (3) Ability to identify patron, employee and table number

- e. Card Game Tables
 - (1) Fixed camera at each table
 - (2) Same view and identification requirements as pit cameras

EXHIBIT I
MEMORANDUM OF UNDERSTANDING
PURSUANT TO
TRIBAL-STATE GOVERNMENT-TO-GOVERNMENT COMPACT
FOR REGULATION OF CLASS III GAMING
BETWEEN THE CONFEDERATED TRIBES OF
THE WARM SPRINGS RESERVATION OF OREGON AND
THE STATE OF OREGON

This Memorandum of Understanding (MOU) is entered into at the same time as Amendment I to the Tribal-State Compact for Class III Gaming between the parties is executed. This MOU is to furnish certain operating guidelines for the Class III Gaming Compact. The parties to this document are the Confederated Tribes of the Warm Springs Reservation (hereinafter referred to as the Tribes) and the Oregon State Police (hereinafter referred to as the State).

This document constitutes the MOUs contemplated by sections 7 and 10 of the Compact.

I. The purpose of this MOU is:

- A. To establish procedures for performance of the agreed responsibilities identified in the Compact;
- B. To address the obligations of the Tribes to reimburse the State for the cost it incurs in doing background checks pursuant to Section 7.C. of the Compact and for monitoring of the Tribal Gaming Operations under Section 10 of the Compact; and
- C. To identify any additional law enforcement, gaming security and gaming regulation assistance as may be provided by the State or requested by the Tribes from time to time. The parties to this MOU acknowledge that this document satisfies the obligations of the Tribes and the State pursuant to the Compact.

II. THE STATE'S COMMITMENTS

- A. The State shall conduct background investigations on each prospective Primary Management Official and High Security Employee as provided by Section 7.A.4.a. of the Compact. The State shall provide a written report to the Tribal Gaming Commission on the findings of said background investigation within a reasonable period of time. Every effort will be made to complete the investigation within 30 days, but at no time will the investigation exceed 60 days without the consent of the Tribal Gaming commission. In the event that a background investigation exceeds 30 days, the Tribal Gaming Commission will be provided a briefing, upon the Commission's request, that will outline the investigation, concerns and approximate conclusion date of the investigation.
- B. The State may, at the request of the Tribes, perform background investigations on any prospective Low Security Employee as requested by the Tribal Gaming Commission as provided in Section 7.A.4.b. of the Compact within the time frame in paragraph A above.
- C. The State may perform a background investigation on each contract applicant for a Class III Gaming Contract as provided in Section 7.B. of the Compact. The State shall also provide its review and comment on any such contract. The State will not commence a background investigation on a vendor, management company, or contractor until a notice of intent to conduct business is received from the Tribes. The State shall conduct an update investigative review annually of each vendor, management compact and gaming contractor. The annual investigative review will be conducted at the expense of the vendor, management company or gaming contractor. The Tribes shall include in any future contracts a request that the contractor agrees to pay for the annual review.
- D. The State shall monitor the Tribal Gaming Operation to insure that it is being operated in compliance with the provisions of the Compact. The State acknowledges that the Tribes may request removal of any state law enforcement officer or monitor placed at the Tribal Gaming Facility as provided in Section 9.B.1. of the Compact.
- E. The State agrees to provide services to the Tribes as part of its oversight functions as agreed to by the parties in the Compact. The State acknowledges that the extent of oversight is related directly to the size and scope of gaming. Specifically, the State agrees to provide review of the Compact security measures, which oversight will be furnished by a member of the Oregon State Police Indian Gaming Unit, up to but not to exceed 875 hours for the period from October 1,

1995 through June 30, 1996. This oversight shall include, but is not limited to, the following:

1. Assurance that proper procedures are followed as outlined in Appendix A of the Compact.
2. Kobotron testing of the E-prom chip from each video lottery terminal operating at the Gaming Facility regulated by the Compact.
3. Provide unannounced on-site facility inspections, minimum of two per month.
4. Review gaming surveillance tapes of cash transfers from the video lottery terminals (VLTs) to the cash rooms at the facility and procedures for storage and retention of tapes. Review procedures of securing tapes in the event of a Player contested incident, security breach, or major incident at the gaming facility.
5. Review tapes of cash counting procedures and policies.
6. Review records kept by the Tribes to assure that VLT hard meter readings match the cash flow.
7. Immediately notify the Tribes of any discrepancy in the E-prom signature and cash count or any deviation from the rules found in Appendix a to the Compact.
8. Review and inspection of authorized video gaming devices.
9. Review of authorized access to sensitive records and logs.
10. Review of all security measures, rules and regulations.
11. Review of proper procedures dealing with the retention and destruction of sensitive materials and records.
12. Inspection of procedures followed on security issues, action taken, and reporting on incidents occurring at the gaming facility.
13. Review and inspection of accounting procedures.

14. Review of methods established to resolve disputes with players and reporting of same.
 15. Review of all games to ensure compliance with the requirements of the Compact and the Indian Gaming Regulatory Act.
 16. Assist the Tribes in enforcing sanctions imposed by the Tribal Gaming commission against non-Indians.
- F. It is understood that the State's presence at the gaming site shall be at various times and shall be dedicated to the activities identified in the Compact and this MOU. The State shall not be responsible for the day to day policing and surveillance of the gaming site for activities such as preventing theft or other similar violations of law.

III. THE TRIBAL COMMITMENTS

The Tribes agrees to the following as its obligations under Section 10 of the Compact in exchange for the background investigations and other services provided by the State described above.

- A. The Tribes will advance \$10,000 to the Oregon State Police for the purpose of payment of expenses to be incurred by the State in performance of its responsibility under the Compact. Payment for expenses under this MOU shall first be charged against this advance, and when the advance is depleted charged to and paid by the Tribes.
- B. The Tribes agrees to reimburse the State for the following expenses incurred by the State:
 1. **Direct Service Hours.** Direct service hours will be billed by the State and paid by the Tribes at a maximum rate of \$80 per hour, as determined by the State. Direct service hours are actual time spent by Tribal Gaming Unit personnel in performing employee background checks, performing contract applicant background checks (unless paid by the contract applicant), performing Compact monitoring functions and traveling to and from the Gaming Facility or the site of a contract applicant background investigation, for the Tribes. Direct service hours spent performing background checks for Class III gaming contract applicants will first be billed to the applicant, and the Tribes will be responsible for payment only if the applicant fails to pay the costs charged.

2. Recoverable Fees. Recoverable fees paid by the Tribal Gaming Unit will be billed by the State and paid by the Tribes at actual cost. Recoverable fees are: fees for processing fingerprint cards, fees for processing credit history checks, and actual per diem expenses (transportation, lodging, food) expenses incurred by Tribal Gaming Unit personnel in connection with direct service hours to the Warm Springs Tribes.
 3. The Tribes agrees to pay for up to 875 direct service hours for the period beginning on October 1, 1995, and ending June 30, 1996, for the performance of Compact monitoring functions identified in the Compact, the amendments thereto, and the MOU between the Tribes and the State. The Tribes must agree in writing to pay for any additional hours. However, if any investigation of criminal law violations, Compact violations or other regulatory matters, results from the action, review, or inspection by the Tribal Gaming Unit during its monitoring activities, and that investigation requires additional hours of direct service beyond the limit stated in this paragraph, the Tribes agrees to pay the State for the expenses incurred in that investigation. An investigation may be initiated by the Tribal Gaming Unit in its sole discretion. Cost of an investigation of a contractor or management company shall first be billed to the contractor or management company.
- C. Costs included in the base direct service hour rate of \$80 are salary, benefits, services and supplies, capital outlay, administrative supervision and support, vehicle and equipment lease or rental expenses, training costs, legal services charges, bookkeeping expenses, and all other fixed expenses of the Tribal Gaming Unit. The State agrees to provide to the Tribes a budget summary and explanation of the hourly rate for direct services hours prescribed in this MOU.
- D. In addition to the time and charges described in paragraph B. above, the Tribes agrees to pay the direct service hour rate for any time that personnel of the Tribal Gaming Unit perform law enforcement, security consultation, gaming regulatory consultation or other gaming related services not identified in the Compact or the MOU, if requested by the Tribal Gaming Commission or the Tribes.
- E. If a dispute arises as to the correctness of an assessment under this Exhibit, the Tribes and the State agree that the Tribes will pay any undisputed amount and that the parties will follow the dispute resolution process set forth in section 16 of the Compact. If the Tribes fails to make any payment within 30 days of the date it is due (except for a partial payment of an assessment under dispute under this paragraph) the State may suspend any background checks that are in process or

withhold permission for the shipment of equipment. Failure to pay an assessment in a timely manner shall be considered a violation of the Compact.

- F. The Tribes agrees to provide the State a notice of intent to do business with all vendors, management companies, and gaming contractors prior to signing any contract. Any costs incurred by the State while conducting a background investigation of a vendor, management company, or gaming contractor shall be reimbursed by the Tribes to the State if the prospective contractor fails to reimburse the State. Cost of background investigations shall be paid whether or not a contract is awarded.
- G. The Tribes agrees to provide appropriate training in Tribal culture, customs, laws and rules to any State officers stationed at or assigned to the Gaming Facility.

IV. PARI-MUTUEL WAGERING

Any off track pari-mutuel wagering on races held at race courses inside or outside the State shall be conducted in compliance with Appendix C of the Compact and the applicable provisions of the Interstate Horse Racing Act of 1978 as amended (15 U.S.C. sections 3001 to 3007). The State and the Tribes agree to confer with the Oregon Racing Commission in the establishment of pari-mutuel wagering with continued oversight provided by the State. The amount of hours necessary for oversight are included in the hours identified in paragraph III.B.3. above.

V. TRIBAL POLICE FORCE

The Tribes and the State agree to negotiate a separate MOU that addresses the respective responsibilities of the State and the Tribes for law enforcement services at the Gaming Facility.

VI. PROCEDURE FOR ASSESSMENTS

- A. In order to provide an established and orderly procedure for assessment of costs incurred by the State under the Compact and this MOU, the parties agree that the State will furnish to the Tribes an itemized statement of the hours worked on tribal business by State employees, as well as an accounting of all recoverable fees incurred by the State during performance of its duties under the Compact and this MOU. It is understood and agreed that expenses incurred by the State prior to the execution of this MOU will be assessed to and paid by the Tribes.

- B. The State will first deduct its costs from the advance paid by the Tribes under paragraph III.A. above. The State will provide an accounting to the Tribes within 30 days following each calendar quarter. The Tribes has the right to contest any expense incurred by the State as provided in paragraph III.E. above.
- C. Once the advance paid by the Tribes is exhausted, the State shall furnish an accounting to the Tribes within 30 days after each calendar quarter. The Tribes shall remit payments (or partial payments) not contested no later than 30 days following receipt of the accounting provided by the State. Such payments shall be delivered to the Oregon State Police.

VII. EXPIRATION

This MOU shall expire June 30, 1996. Thirty days before the expiration date of this MOU the parties shall meet to re-negotiate the terms of the MOU and to address any change in circumstances to which this MOU applies. If the State and the Tribes have not re-negotiated a replacement MOU by the expiration date of this MOU, this MOU shall continue in effect until such time as a new MOU is executed.

PURSUANT TO
TRIBAL-STATE GOVERNMENT-TO-GOVERNMENT COMPACT
FOR REGULATION OF CLASS III GAMING
BETWEEN THE CONFEDERATED TRIBES OF
THE WARM SPRINGS RESERVATION OF OREGON AND
THE STATE OF OREGON**

This Addendum sets forth matters beyond the scope of the MOU executed pursuant to Section 7.C.2. of the Compact, but reflects the further understanding and intentions of the parties.

As a sovereign federally recognized Indian tribe, Tribes intends and expects to develop its gaming regulatory expertise in order to undertake and conduct gaming regulatory activity to the fullest extent authorized by applicable federal law. In the future, Tribes may seek to assume increased responsibility for regulatory activity through renegotiation of the Compact.

The State acknowledges the above objective of the Tribes. To the extent that the State has knowledge and experience that would assist in the development of the Tribes' expertise in gaming regulation, gaming security and gaming law enforcement, the State agrees to share that knowledge and experience with Tribal personnel in the course of performing the State's duties under the Compact and the MOU.

Unless modified by mutual agreement, this Addendum shall have the same term as the term of the MOU.

**TRIBAL-STATE COMPACT FOR REGULATION OF
CLASS III GAMING BETWEEN THE KLAMATH TRIBES AND
THE STATE OF OREGON**

AMENDMENT II

This amendment is made to the Class III Gaming Compact between the Klamath Tribes and the State of Oregon executed on December 16 1994, and approved by the Secretary of the Interior on February 24, 1995. The terms of this amendment are in addition to and, except as specifically provided herein, do not supersede any of the provisions of the original compact.

WHEREAS, the Class III Gaming Compact between the Klamath Tribes and the State of Oregon provides that the operation of the compact is dependent upon the Secretary of the Interior taking certain land into trust for the Tribes by December 31, 1995; and

WHEREAS the Tribes have made all reasonable efforts to have the land taken into trust; and

WHEREAS the land has not been taken into trust for reasons beyond the control of the Tribes; and

WHEREAS the Tribes have requested an extension of the deadline for taking the land into trust; and

AND WHEREAS, the State agrees that the circumstances justify this Amendment;

NOW THEREFORE, the Tribes and the State hereby approve the following amendments to the Compact:

I. Section 13.F as amended by Amendment I to the Compact is further amended to read:

F. Location Eligible for Class III Gaming. The State has negotiated and executed this Compact pursuant to the process established under 25 USC § 2710(d)(3), with knowledge that the Gaming Location

identified in Exhibit II is not currently held in trust by the United States for the benefit of the Klamath Tribes. This compact is effective only at the time the United States takes the land described in Exhibit II to this Compact into trust for the Tribes. Operation of this Compact is dependent upon the described land being taken into trust as a result of the Bureau of Indian Affairs fee-to-trust process. Operation of this Compact is further dependent upon the described land being taken into trust no later than [~~December 31, 1996~~] **July 1, 1997**. Operation of this Compact is further dependent upon a determination by the Secretary of the Interior, in connection with review and approval of this Compact, that the Gaming Location is eligible to be used by the Tribes for the purpose of gaming as described in 25 USC § 2719. If at any time it is determined by the Secretary or other competent authority that the Gaming Location is not eligible to be used by the Tribes for the purpose of gaming as described in 25 USC § 2719, this Compact shall no longer authorize gaming at that location.

EXECUTED as of the date and year below.

RE: Klamath Extension

Please have the Governor and the Tribal Chair sign all four copies. We keep one and give the other three to the Tribe. They are responsible to send copies for signature to the Secretary of the Interior.

Please ask Diane to send me, Lt. Sitton and Greg a copy of the signed extension. THANKS

**TRIBAL-STATE GOVERNMENT-TO-GOVERNMENT COMPACT
FOR REGULATION OF CLASS III GAMING
BETWEEN THE CONFEDERATED TRIBES OF
THE WARM SPRINGS RESERVATION OF OREGON AND
THE STATE OF OREGON**

AMENDMENT II

This amendment is made to the Class III Gaming Compact between the Confederated Tribes of the Warm Springs Reservation of Oregon and the State of Oregon executed on January 6, 1995, and approved by the Secretary of the Interior on March 6, 1995. The terms of this amendment are in addition to and, except as specifically provided herein, do not supersede any of the provisions of the original Compact, or Amendment I thereto.

WHEREAS, the Tribes wishes to extend the terms of Amendment I to the Compact which provides for regulation of house banked blackjack at the gaming facility, and

WHEREAS, the State agrees that the circumstances justify this Amendment,

NOW THEREFORE, the Tribes and the State hereby approve the following amendments to the Compact:

I. Section VI. of Amendment I to the Compact, is amended as follows:

VI. Paragraph IV of this amendment expires on [~~June 30, 1996~~] June 30, 1997. However, if the compliance review described in Section 4.H.9. of the Compact (added by this Amendment) is completed before October 1, 1996, Paragraph IV of this amendment shall expire on December 31, 1997. Unless an extension of this amendment or a permanent amendment governing the operation of house banked blackjack has been negotiated and executed before the expiration of this amendment, the Tribes agrees to terminate blackjack games at the gaming facility until a new agreement has been negotiated and executed. In the event that a compact amendment is under negotiation the Tribes may replace blackjack tables with video lottery terminals at the ratio of eight terminals per blackjack table.

II. The following new paragraph 9 is added to Subsection H of Section 4 of the Compact (added by Amendment I):

9. The Tribes and the State agree that the State shall conduct a comprehensive compliance review of the tribal gaming operation, as described in Section 9.B.1. of the Compact, to be completed no later than October 1, 1996.

III. Paragraph 3 of Subsection H of Section 4 of the Compact (added by Amendment II) is amended to read:

3. The Tribes shall establish an initial wager limit of [~~\$50~~] \$100 per hand except that the Tribes may offer a maximum [~~\$75~~] \$500 wager limit on [~~one table~~] two tables. [~~After a period of two months of operation of house banked blackjack in full compliance with the requirements of this subsection, the Tribes may change the initial wager limit from \$75 to \$100 for one table.~~] After any period of six months of operation of house banked blackjack in full compliance with the requirements of this subsection, the Tribes may request a change in the initial wager limits. The State may refuse to agree to an increase in the initial wager limit if there have been any significant problems with the conduct of house banked blackjack due to noncompliance with the internal controls, the rules of operation of the game or with the terms of this subsection. The amount of any increase in the wager limit must be agreed to by both the State and the Tribes.

IV. Paragraph 1 of Subsection B of Section 9 of the Compact is amended to read:

1.
 - a. Monitoring. The State is authorized hereby to monitor the Tribal gaming operation as the State considers necessary to ensure that the operation is conducted in compliance with the provisions of this Compact. The Tribes may request removal of a State law enforcement officer or monitor on the basis of malfeasance, abuse of authority, or conduct disrespectful of Tribal institutions or culture. Effective performance of the officers' or monitor's duties shall not be the basis for disapproval. The State shall have free and unrestricted access to all areas of the Gaming Facility during normal operating hours without giving prior notice to the Tribal gaming operation. The Tribes agrees that the State monitoring function includes at a minimum the activities identified in the Compact, the amendments and the memorandum of

understanding entered into pursuant to this Compact, and that the actual, reasonable and necessary cost of monitoring activities shall be assessed to the Tribes as provided in the memorandum of understanding entered into pursuant to this Compact. In addition to the State's regular monitoring functions, the Tribes agrees that the State may conduct the following activities, which shall also be assessed to the Tribes:

- 1) A comprehensive annual review of the gaming operation, which shall be planned and conducted jointly with the tribal gaming commission, to verify compliance with the requirements of this Compact and with the regulations and internal controls adopted by the tribal gaming commission, including at a minimum review in the following areas: administrative controls (gaming management internal controls), gaming operations controls, drop boxes, station inventories, surveillance department controls, cashier cage controls, count room controls (security and surveillance), accounting department controls (security), general controls (Compact regulatory requirements), blackjack controls, VLT controls, accounts payable, employee identification, gaming chip inventory for gaming floor and cage, physical examination of all class III gaming cards, chips, e-proms, paper stock, printers, keno balls, fill slips, video gaming devices, keno controls, off-track betting and security department controls;
- 2) Periodic review of any part of the gaming operation in order to verify compliance with the requirements of this Compact and with the regulations and internal controls;
- 3) Investigation of possible violations of this Compact or other gaming regulatory matters, whether discovered during the action, review, or inspection by the State during its monitoring activities, or otherwise.

b. As provided in Section 5 of this Compact, the Tribes' law enforcement agency is responsible for investigation of criminal law violations. The Tribes and the State agree that the Tribes' criminal law jurisdiction shall not prevent the State from investigating possible violations of this Compact or other gaming regulatory matters. The Tribes and the State agree that their respective law enforcement agencies shall cooperate in any investigation that involves or potentially involves both criminal and regulatory violations.

V. Section 6.A. of the Compact is amended as follows:

A. The Tribes and the State agree that maintaining the honesty, integrity, fairness and security of the Tribes' gaming operation is essential both to the success of the enterprise, and to satisfy the interests of the State and of the Tribes. The Tribes and the State agree that both of them have responsibility to protect the patrons of the Tribes' gaming facility from any breach of security of the gaming operation. Accordingly, all decisions by the Tribes, the Tribal Gaming Commission and the management of the gaming operation, concerning regulation and operation of [their] the Gaming Facility, including those decisions expressly placed within the Tribes' discretion under the terms of this Compact, shall be consistent with each of the following principles:

1. Any and all [~~of the Tribes'~~] decisions concerning regulation and operation of the Tribal gaming enterprise, whether made by the Tribes, the Tribal Gaming Commission or the management of the gaming operation, shall reflect the particularly sensitive nature of a gaming operation.
2. In order to maintain the honesty, integrity, fairness and security of the Tribes' gaming operation, the Tribes, the Tribal Gaming Commission and the management of the gaming operation shall work diligently and take all reasonably necessary affirmative steps to prevent cheating and theft, and to protect the gaming operations from the influence or control by any form of criminal activity or organization.
3. The honesty, integrity, fairness and security of the Tribes' gaming operation shall be of paramount consideration in awarding contracts, licensing and hiring employees, and in making other business

decisions concerning the operation of the gaming enterprise. The Tribes, the Tribal Gaming Commission and the management of the gaming operation shall make no decisions that compromise the honesty, integrity, fairness or security of the gaming operation.

4. Regulation and operation of the Tribes' gaming activities shall be, at a minimum, consistent with generally accepted industry standards and practices, in order to maintain the honesty, integrity, fairness and security of the Tribes' gaming operation.

VI. Subparagraph 6.B.5.a. of the Compact is amended as follows:

- a. If the State, in good faith, believes that there is an immediate threat to the honesty, integrity, fairness and security of the Tribal gaming operations, and believes that substantial harm will result during the time that would pass if the procedure established in paragraphs 1 to 3 of this subsection is followed, the State may give written notice to the [~~Tribes~~] Tribal Gaming Commission. The written notice shall describe the factual basis for the State's concern. The written notice shall recommend specific action or actions the State believes will prevent substantial harm from occurring. The State and the Tribal Gaming Commission shall meet and confer, in person or by conference call, within 24 hours after the commission, or any member thereof, receives the notice. The Tribal Gaming Commission shall consider the State's recommendation, and immediately thereafter shall take such action that addresses the State's concern as is necessary to protect the honesty, integrity, fairness and security of the Tribal gaming operation. Nothing in this subparagraph shall preclude either party from invoking the dispute resolution procedures provided in this Compact after the commission has taken action.

VII. Subparagraph 6.B.5.d. of the Compact is amended as follows:

- d. An immediate threat to the honesty, integrity, fairness and security of the Tribal gaming operations includes but is not limited to the following examples:

- (1) A criminal indictment is filed against any contractor, or owner or key employee of a contractor, or against any key employee of the Tribal gaming operation;
- (2) A criminal organization or members of a criminal organization have obtained an ownership interest in a contractor, or a member of a criminal organization has become a key employee of a contractor;
- (3) A malfunction of gaming equipment hardware or software causes patrons of the Gaming Facility to lose money, and that loss is directly related to the equipment malfunction;
- (4) The security of gaming equipment has been impaired by loss, theft, or tampering;
- (5) The physical safety or security of patrons is seriously at risk;
- (6) A continuing pattern of failure by the Tribes, the Tribal Gaming Commission or management of the gaming operation to enforce compliance with the provisions of this Compact, or the regulations and internal controls governing the gaming operation.

VIII. The Tribes and the State agree to amend the Memorandum of Understanding adopted under Amendment I to the Compact, as set forth in Exhibit I to this Amendment.

IX. This amendment is effective as an extension under Paragraph VI of Amendment I to the Compact, upon execution by the State and the Tribes, and submission to the Secretary of the Interior. It is the intent of both the State and the Tribe that this Amendment be fully enforceable as between the parties to it from and after the date it is executed and submitted to the Secretary of the Interior, both as to the Tribe's ability to offer house banked blackjack and the State's and the Tribe's responsibility to implement the regulatory amendments contained herein.

MEMORANDUM OF UNDERSTANDING
PURSUANT TO
TRIBAL-STATE GOVERNMENT-TO-GOVERNMENT COMPACT
FOR REGULATION OF CLASS III GAMING
BETWEEN THE CONFEDERATED TRIBES OF
THE WARM SPRINGS RESERVATION OF OREGON AND
THE STATE OF OREGON

1. Paragraph 3 of Subsection B of Section III of the Memorandum of Understanding (MOU) executed contemporaneously with Amendment I to the Compact is amended as follows, effective July 1, 1996:

3. The Tribes agrees to pay for up to ~~[875]~~ 1,200 direct service hours for the period beginning on ~~[October 1, 1995, and ending June 30, 1996,]~~ July 1, 1996, and ending June 30, 1997, for the actual, reasonable and necessary costs of the performance of Compact monitoring functions identified in the Compact, the amendments thereto, and the MOU between the Tribe and the State. The Tribes agrees to pay for up to 400 direct service hours during the same period for performance of one comprehensive compact compliance review. ~~[The Tribes must agree in writing to pay for any additional hours.]~~ If the State determines that more hours are necessary for Compact monitoring functions, the State shall notify the Tribes and the parties agree to meet and negotiate a new limit in writing on direct service hours for monitoring functions. However, if any investigation of criminal law violations, Compact violations or other gaming regulatory matters, results from the action, review, or inspection by the Tribal Gaming Unit during its monitoring activities, ~~[and that investigation requires additional hours of direct service beyond the limit stated in this paragraph,]~~ the Tribes agrees to pay the State for the actual, reasonable and necessary expenses incurred in that investigation separately from and without regard to the limit on the number of direct service hours stated in this paragraph. An investigation may be initiated by the Tribal Gaming Unit in its sole discretion. Cost of an investigation of a contractor or management company shall first be billed to the contractor or management company.

2. Section VII of the MOU executed contemporaneously with Amendment I to the Compact is amended as follows, effective July 1, 1996:

VII. EXPIRATION

This MOU shall expire [~~June 30, 1996~~] June 30, 1997. Thirty days before the expiration date of this MOU the parties shall meet to renegotiate the terms of the MOU and to address any change in circumstances to which this MOU applies. If the State and the Tribes have not re-negotiated a replacement MOU by the expiration date of this MOU, this MOU shall continue in effect until such time as a new MOU is executed.

3. The remainder of the MOU executed contemporaneously with Amendment I to the Compact shall remain in effect until July 1, 1997, unless amended sooner.

**TRIBAL-STATE COMPACT FOR REGULATION OF
CLASS III GAMING BETWEEN
THE BURNS – PAIUTE TRIBE
AND THE STATE OF OREGON**

AMENDMENT III.

This amendment is made to the Class III Gaming Compact between the Burns – Paiute Tribe of Oregon and the State of Oregon executed on December 12, 1996, and approved by the Secretary of the Interior on February 25, 1997. The terms of this amendment are in addition to and, except as specifically provided herein, do not supersede any of the provisions of the original compact, or Amendments I or II thereto.

WHEREAS, the Tribes wish to extend the terms of Amendment II to the Compact regarding house banked blackjack at the gaming facility, and

WHEREAS, the State agrees that the circumstances justify this Amendment, and

WHEREAS, the Tribe and the State agree that the State functions of monitoring and oversight of tribal gaming operations will be funded by the tribal gaming industry and wish to amend Section 9 of the Compact with respect to assessment of state costs;

NOW THEREFORE, the Tribe and the State hereby approve the following amendments to the Compact:

I. Paragraph 4 of Subsection E of Section 4 of the Compact, as amended in Amendment II, is amended as follows:

4. The authorization in this Compact for house banked blackjack shall expire on ~~June 30, 1999~~ March 31, 2000 unless an amendment authorizing the play of house banked blackjack beyond that date has been negotiated and executed.

II. Section 9 of the Compact is amended as follows:

SECTION 9. STATE ASSESSMENT OF COSTS FOR OVERSIGHT.

~~A. Imposition of assessment for State law enforcement and regulatory expenditures. The State shall make annually an assessment sufficient to compensate the State for the reasonable and necessary costs of regulating gaming operations and conducting state law enforcement investigations pursuant to this Compact. The State shall assess only those costs related to gaming. The State acknowledges expressly herein that the extent of oversight is related directly to the size and scope of gaming. Such assessment shall include any costs of fringe benefits for personnel. Fees received with respect to the submission of gaming licenses and contracts pursuant to~~

~~subsection 6.C. of this Compact shall be subtracted from the amount of the assessment.~~

~~B. Procedure for Assessments. The procedure for assessments shall be determined and agreed upon annually in a Memorandum of Understanding between the parties of this Compact. Such agreement shall include provisions for adjustments of excess assessments and underpayment of costs.~~

~~C. If the parties fail to agree to the assessments under this section, such dispute shall be resolved pursuant to Section 15 of this Compact.~~

A. Assessment for State Monitoring, Oversight and Law Enforcement Costs

1. The Tribe agrees that the Oregon Gaming Tribes have the collective responsibility to pay for the cost of performance by OSP of its activities authorized pursuant to this Compact, including associated overhead. The Tribe agrees to pay its fair share of the Oregon State Police costs pursuant to the formula set forth in this Section within 30 days of billing.
2. During the development of its biennium budget, the Oregon State Police shall distribute a draft of the Tribal Gaming section portion of the budget to the Oregon Gaming tribes for their review and comment prior to submission of the budget to either the Governor or the Legislature. The Oregon State Police shall give full consideration to the Oregon Gaming Tribes' comments on the Tribal Gaming Section budget. Notwithstanding the right of the Oregon Gaming tribes to comment on the Tribal Gaming Section budget before it is finalized within the Oregon State Police, each Tribe retains the right to participate in any public review by either the governor or the Legislature on the Oregon State Police budget as well as before the Emergency Board for any increase in the Oregon State Police budget.
3. Because of the government-to-government relationship between the Tribes and the State, the parties recognize that the obligation of the Tribes to pay for the Oregon State Police costs as provided by this Compact is unique. Nothing in this Compact is intended to, nor shall be construed as, creating a responsibility for the Tribes to pay for any other governmental services rendered by or received from the State.
4. The Tribe's monthly payment to the Oregon State Police shall be computed as follows:

- a) The biennium budget for the Tribal Gaming Section shall be divided by 24 to determine the total monthly payment that must be made by the Oregon Gaming Tribes to the Oregon State Police for Compact related activities. This payment shall be referred to as the "OSP Monthly Payment."
- b) Amounts received by the Oregon State Police from Class III Gaming Contractor license applicants, or any other gaming vendor license applicant, and from the payment for the assignment of Tribal Gaming Section officers to non-tribal gaming duties, shall reduce the OSP Monthly Payment owed by the Oregon Gaming Tribes, which sum shall be referred to as the "Adjusted OSP Monthly Payment." The reduction in the OSP Monthly Payment owed by the Oregon Gaming Tribes shall occur in the month the Oregon State Police receives such payments from third party sources.
- c) The Tribe's monthly payment to the Oregon State Police shall be computed as follows:

No. of direct Service Hours billed to Burns-Paiute Tribal Gaming Operations		Adjusted		OSP			Tribes Share of
	X	Monthly	=	Payment			OSP Monthly
Total No. of Direct Service Hours Billed to All Oregon Tribal Gaming Operation.							Payment

- d) Every six months, or biennium quarter, the Oregon State Police shall reconcile the total payments received from the Oregon Gaming Tribes and third party sources during the six month period. The total of these payments should equal one-fourth of the Oregon State Police/Tribal Gaming Section biennium budget. Any underpayment or overpayment shall adjust the amount owed by the Oregon Gaming Tribes the month following the reconciliation.
5. As used in this section
- a) "Oregon Gaming Tribes" means any federally recognized Indian Tribes in Oregon engaged in Class III gaming pursuant to a Tribal-State Compact.

b) "Direct Service Hours" means the actual time spent by Oregon State Police personnel in performing employee background checks, performing background checks on Class III Gaming Contractors or other gaming vendors (unless paid by the Class III Gaming Contractor or other gaming vendor), performing Compact monitoring functions (including the annual comprehensive compact compliance review), conducting an investigation, and traveling to and from the Gaming facility or the site of a Class III Gaming Contractor background investigation, for a particular Tribal Gaming Operation. This definition is in no way intended to limit OSP's activities authorized pursuant to this Compact. The Oregon State Police shall keep direct service hour billing records setting forth the date work is performed, a brief description of the work performed and the amount of time spent.

6. The methodology for the payment of Oregon State Police costs shall begin on January 1, 1999.
7. For the time period beginning January 1, 1999, this provision supersedes the terms of any and all Memoranda of Understanding entered into between the Tribe and OSP pursuant to Section 9 of the Compact, as those terms relate to payment of OSP costs.

B. If the Tribes dispute the amount of the assessment under this Section, the Tribes shall timely pay the undisputed amount and within thirty (30) days of billing, shall notify OSP in writing of the specific nature of the dispute. If the parties have not resolved the dispute within 15 days, the Tribes shall pay the disputed amount into an off-reservation escrow, mutually agreeable to the parties, with escrow instructions providing that the funds are to be released only upon authorization by both the Tribes and the Oregon State Police. The parties shall share the reasonable costs of the escrow. The dispute shall then be resolved pursuant to the procedures set forth in section 4F(2) of this Compact.

If the Tribes fail to pay the disputed amount into escrow or timely pay the undisputed amount, the Oregon State Police may suspend any background checks that are in process or withhold authorization for the shipment of equipment, and/or pursue other remedies for Compact violations available under this Compact.

III. This amendment is effective, upon execution by the State and the Tribes, and submission to the Secretary of the Interior. It is the intent of both the State and the Tribe that this Amendment be fully enforceable as between the parties to it from and after the date it is executed and submitted to the Secretary of the Interior.

EXECUTED as of the date and year below.

**TRIBAL-STATE COMPACT FOR REGULATION
OF CLASS III GAMING BETWEEN THE KLAMATH TRIBES AND
THE STATE OF OREGON**

AMENDMENT III

This amendment is made to the Class III Gaming Compact between the Klamath Tribes and the State of Oregon executed on December 16 1994, and approved by the Secretary of the Interior on February 24, 1995. The terms of this amendment are in addition to and, except as specifically provided herein, do not supersede any of the provisions of the original compact, or Amendment II thereto.

WHEREAS, the continued growth and success of tribal gaming depends upon public confidence and trust that the tribal gaming operation is honest, fair and secure, and is free from criminal and corruptive influences;

AND WHEREAS, public confidence and trust can be maintained only if there is strict compliance with laws and regulations related to licensed gaming establishments, by all persons involved in the gaming operation;

AND WHEREAS, the relationship between the State and the Tribes rests on mutual trust and the recognition that each has a primary duty to protect the gaming public through separate, appropriate responsibilities during the life of current and future Compacts;

AND WHEREAS, the Tribes wish to amend the Compact to provide for regulation of house banked blackjack during the start up phase of its gaming facility;

AND WHEREAS, the Tribes and the State agree that the circumstances justify this Amendment;

NOW THEREFORE, the Tribes and the State hereby approve the following amendments to the Compact:

- I. Section 7.B.6. is amended by adding a new subparagraph j, as follows:
 - j. Notwithstanding subparagraphs a, b, or c of this paragraph, if a Class III Gaming Contract application is required to be denied under subparagraphs a, b, or c of this paragraph, because a person previously associated with the applicant or an employee of the applicant has been convicted of a crime, the Tribes may enter into a contract with the applicant if the applicant has severed its relationship with that person or employee. Before the Tribes may enter into a contract under this subparagraph, the State and the Tribes must agree that the relationship

between the applicant and the person or employee has been severed. For purposes of this subparagraph, a relationship is severed if the person or the employee has no continuing connection with the direction or control of any aspect of the business of the applicant, and the person or employee is no longer employed by the applicant in any capacity. The burden of showing to the satisfaction of the Tribes and the State that a relationship has been severed is on the applicant.

II. Section 7.A.8.a. (Temporary Licensing of Employees.) is amended to read:

- a. The Tribes may issue a temporary license to High Security Employees ~~[30]~~ seven days after submission of the application to the Oregon State Police. The Temporary license shall expire and become void upon completion of the background check and award or denial of a permanent license.

III. Appendix A. I. is amended to read:

Section 177-100-070

(1) A manufacturer shall not distribute a video lottery game or terminal for placement at the Gaming Facility unless the manufacturer and the game have been approved and the terminal has been certified by the State of Oregon. Only approved manufacturers may apply for certification of a video lottery terminal. ~~[Any manufacturer approved for Oregon State Lottery shall automatically be approved for the Tribe's gaming enterprise.]~~

IV. Subsection E of Section 4 is amended to read:

E. Temporary Gaming Facility.

1. The Tribes is authorized to develop a temporary Gaming Facility on the site designated for the permanent Gaming Facility under the Compact.
2. Type of Facility. The temporary Gaming Facility will consist of a ~~[Chief Steel Building]~~ rolled steel building and one or more modular buildings and will include, in addition to the gaming floor, a surveillance room, cage, money count room, utility room, ~~[delicatessen]~~ kitchen, buffet and two bathrooms. ~~[A diagram of the building is attached as Exhibit II to this Compact.]~~

3. Layout of Facility. The total square footage of the temporary Gaming Facility shall be no more than [~~6,000~~] 19,000 square feet, of which the square footage of the modular buildings shall be approximately 3,000 square feet. The proposed floor plan for the building is attached as Exhibit II to this Compact.
4. Class III Gaming. The only Class III games that will be conducted in the temporary Gaming Facility will be video lottery terminals as defined in this Compact, and blackjack as defined in this Amendment. The Tribes may install up to [~~150~~] 300 video lottery terminals and up to six blackjack tables in the temporary Gaming Facility. Blackjack may be offered only until December 31, 1997, unless this Compact is further amended to extend that date.
5. Duration of Temporary Gaming. Gaming under this subsection may be conducted for a period of no more than [~~one year~~] two years beginning after the [~~effective date of this Compact~~] date the temporary Gaming Facility is opened to the public and ending before the opening of the permanent Gaming Facility.
6. Access to Temporary Facility. Access to the temporary Gaming Facility shall be provided subject to the conditions imposed in Section 11.B of this Compact. The Tribes shall consult with the Oregon Department of Transportation and appropriate local officials so that access from State Highway 97 will meet appropriate standards. The Tribes is responsible to provide adequate parking off Highway 97 for patrons of the temporary Gaming Facility.
7. Alcohol Policy. [~~No alcohol will be served in the temporary Gaming Facility.~~] If the Tribes decide to serve alcohol in the temporary Gaming Facility, the Tribes shall enter into a memorandum of understanding with the Oregon Liquor Control Commission as provided in Section 8.F. of the Compact.
8. Security. The Tribes shall consult with the Oregon State Police to assure that all security and surveillance requirements of the Compact are fully satisfied before opening the temporary Gaming Facility.
9. Applicability of Compact Requirements: Except as explicitly provided in this subsection, all terms of this Compact, and of this Amendment, shall apply to the operation of the temporary Gaming Facility.

V. Section 4 is amended to add a new Subsection H and Appendix D, as follows:

H. Temporary Authority for Additional Game.

1. In addition to the games identified in Subsection B of Section 4 of the Compact, and subject to the conditions prescribed in this subsection, the Tribes may engage in house banked blackjack as described in Appendix D, at the gaming facility during the period specified in this section.
2. Before the Tribes begin to offer house banked blackjack at the gaming facility, the Tribal Gaming Commission shall:
 - a. Develop rules and procedures for a system of internal controls that meets the minimum standards established in Appendix D.
 - b. Provide appropriate training for all dealers, supervisors and surveillance personnel involved in house banked blackjack, and for the Tribal Gaming Inspector, according to the minimum training standards established in Appendix D.
 - c. Establish a security and surveillance plan that meets the minimum standards established in Appendix D.
 - d. Adopt rules of operation for house banked blackjack that meet the minimum standards established in Appendix D, including rules of play, standards for equipment.
 - e. Adopt a dispute resolution procedure that provides for investigation and review of any player complaint.
3. The Tribes shall establish an initial wager limit of \$50 per hand, except that the Tribes may offer a maximum \$100 wager limit on one table. After any period of six months of operation of house banked blackjack in full compliance with the requirements of this subsection, and upon agreement between the Tribes and the State, the Tribes may change the initial wager limit. The State may refuse to agree to an increase in the initial wager limit if there have been any significant problems with the conduct of house banked blackjack due to noncompliance with the internal controls, the rules of operation of the game or with the terms of this subsection.
4. The Tribes may operate a maximum of six tables of house banked blackjack at the temporary Gaming Facility during the term of this agreement. The Tribes also agrees that during the term of this amendment, and so long as the Tribes is operating six blackjack tables, the Tribes will not increase the number of video lottery terminals beyond

300. The Tribes may increase the number of video lottery terminals by decreasing the number of blackjack tables on the gaming floor and vice versa, up to the maximum number of tables specified in this paragraph. An increase of eight video lottery terminals is permitted for each decrease of one blackjack table.

5. The Tribes agrees to cooperate with State law enforcement on the investigation and prosecution of any gambling crime committed at the temporary gaming facility. The Tribes and the State agree to cooperate in establishing a state-wide system to identify and monitor persons excluded from the temporary gaming facility or from any other tribal gaming facility in this State.
6. Except as specifically provided in this amendment, this amendment does not operate to modify Subsection B of Section 4 of the Compact in any other way.
7. The Tribes and the State agree that the State shall conduct a comprehensive compliance review of the tribal gaming operation, as described in Section 9.C.1. of the Compact, to be completed no later than six months after the temporary gaming facility opens.

VI. Paragraph 1 of Subsection B of Section 9 of the Compact is amended to read:

1. Monitoring. The State is authorized hereby to monitor the Tribal gaming operation as the State considers necessary to ensure that the operation is conducted in compliance with the provisions of this Compact. The Tribes may request removal of a State law enforcement officer or monitor on the basis of malfeasance, abuse of authority, or conduct disrespectful of tribal institutions or culture. Effective performance of the officer's or monitor's duties shall not be a basis for disapproval. The State shall have free and unrestricted access to all areas of the Gaming Facility during normal operating hours without giving prior notice to the Tribal Gaming Operation. The Tribes agrees that the State monitoring function includes at a minimum the activities identified in the Compact, the amendments and the memorandum of understanding entered into pursuant to this Compact, and that the actual, reasonable and necessary cost of monitoring activities shall be assessed to the Tribes as provided in the memorandum of understanding entered into pursuant to this Compact. In addition to the State's regular monitoring functions, the Tribes agrees that the State may conduct the following activities, which shall also be assessed to the Tribes:

- a. A comprehensive annual review, which shall be planned and conducted jointly with the tribal gaming commission, of the gaming operation to verify compliance with the requirements of this Compact and with the regulations and internal controls adopted by the tribal gaming commission, including at a minimum review in the following areas, if they involve Class III gaming activities in any way: administrative controls (gaming management internal controls), gaming operations controls, drop boxes, station inventories, surveillance department controls, cashier cage controls, count room controls (security and surveillance), accounting department controls (security), general controls (Compact regulatory requirements), blackjack controls, VLT controls, accounts payable, employee identification, gaming chip inventory for gaming floor and cage, physical examination of all class III gaming cards, chips, e-proms, paper stock, printers, keno balls, fill slips, video gaming devices, keno controls, off-track betting and security department controls;
- b. Periodic review of any part of the gaming operation that involves Class III gaming in any way in order to verify compliance with the requirements of this Compact and with the regulations and internal controls;
- c. Investigation of possible violations of this Compact or other gaming regulatory matter that involves Class III gaming in any way, whether discovered during the action, review, or inspection by the State during its monitoring activities, or otherwise; and
- d. Investigation of possible criminal law violations that involve the conduct of the gaming operation whether discovered during the action, review, or inspection by the State during its monitoring activities, or otherwise.

VII. Section 6.A. of the Compact is amended as follows:

- A. The Tribes and the State agree that maintaining the honesty, integrity, fairness and security of the Tribes' gaming operation is essential both to the success of the enterprise, and to satisfy the interests of the State and of the Tribes. The Tribes and the State agree that both of them have the responsibility to protect the citizens of this State who patronize the Tribe's gaming facility from any breach of security of the gaming operation. Accordingly, all decisions by the

Tribes, the Tribal Gaming Commission and the management of the gaming operation, concerning regulation and operation of ~~[their]~~ the Gaming Facility, including those decisions expressly placed within the Tribes' discretion under the terms of this Compact, shall be consistent with each of the following principles:

1. Any and all ~~[of the Tribes']~~ decisions concerning regulation and operation of the Tribal gaming enterprise, whether made by the Tribe, the Tribal Gaming Commission or the management of the gaming operation, shall reflect the particularly sensitive nature of a gaming operation.
2. In order to maintain the honesty, integrity, fairness and security of the Tribes' gaming operation, the Tribes, the Tribal Gaming Commission and the management of the gaming operation shall work diligently and take all reasonably necessary affirmative steps to prevent cheating and theft, and to protect the gaming operations from the influence or control by any form of criminal activity or organization.
3. The honesty, integrity, fairness and security of the Tribes' gaming operation shall be of paramount consideration in awarding contracts, licensing and hiring employees, and in making other business decisions concerning the operation of the gaming enterprise. The Tribes, the Tribal Gaming Commission and the management of the gaming operation shall make no decisions that compromise the honesty, integrity, fairness or security of the gaming operation.
4. Regulation and operation of the Tribes' gaming activities shall be, at a minimum, consistent with generally accepted industry standards and practices, in order to maintain the honesty, integrity, fairness and security of the Tribes' gaming operation.

VIII. Subparagraph 6.B.5.a. of the Compact is amended as follows:

- a. If the State, in good faith, believes that there is an immediate threat to the honesty, integrity, fairness and security of the Tribal gaming operations, and believes that substantial harm will result during the time that would pass if the procedure established in paragraphs 1 to 3 of this subsection is followed, the State may give written notice to the ~~[Tribes]~~ Tribal Gaming Commission. The written notice shall describe the factual basis for the State's concern. The written notice shall describe the specific action the State believes is necessary to prevent substantial harm from

occurring. The State and the Tribal Gaming Commission shall confer as soon thereafter as possible to discuss alternative ways to address the State's concern. If such consultation does not result in mutually acceptable action, the Tribes agrees that the Tribal Gaming Commission shall act according to the State's recommendation, unless the commission determines that acting according to the State's recommendation would adversely affect the honesty, integrity, fairness and security of the Tribal gaming operation. Nothing in this subparagraph shall preclude the Tribes from invoking the dispute resolution procedures provided in this Compact.

IX. Subparagraph 6.B.5.d. of the Compact is amended as follows:

- d. An immediate threat to the honesty, integrity, fairness and security of the Tribal gaming operations includes but is not limited to the following examples:
 - (1) A criminal indictment for an offense listed in subparagraph 7.A.5.a. of the Compact is filed against any contractor, or owner or key employee of a contractor, or against any key employee of the Tribal gaming operation;
 - (2) A criminal organization or members of a criminal organization have obtained an ownership interest in a contractor, or a member of a criminal organization has become a key employee of a contractor;
 - (3) A malfunction of gaming equipment hardware or software causes patrons of the Gaming Facility to lose money, and that loss is directly related to the equipment malfunction;
 - (4) The security of gaming equipment has been impaired by loss, theft, or tampering;
 - (5) The physical safety or security of patrons is seriously at risk;
 - (6) A continuing pattern of failure by the Tribes, the Tribal Gaming Commission or management of the gaming operation to enforce compliance with the provisions of

this Compact, or the regulations and internal controls governing the gaming operation.

- X. The provisions of Section V of this amendment expire on December 31, 1997. Unless an extension of the provisions of Section V of this amendment or a permanent amendment governing the operation of house banked blackjack has been negotiated and executed before the expiration of this amendment, the Tribes agrees to terminate blackjack games at the gaming facility until a new agreement has been negotiated and executed.

EXECUTED as of the date and year below.

**TRIBAL-STATE COMPACT FOR REGULATION
OF CLASS III GAMING BETWEEN THE KLAMATH TRIBES
AND THE STATE OF OREGON**

APPENDIX D

HOUSE BANKED BLACKJACK

I. DEFINITIONS

As used in this Amendment and Appendix the following definitions shall apply:

Blackjack. "Blackjack" is a card game in which the object of the game is to accumulate cards with a total count nearer to 21 than that of the dealer.

Industry Standard. "Industry standard" refers to standards accepted or approved by the Nevada Gaming Control Board and the Nevada Gaming Commission. If the Nevada Gaming Control Board and Nevada Gaming Commission have no accepted or approved standard, "industry standard" refers to the commonly used practice in the gaming industry in the State of Nevada.

II. ADOPTION OF RULES FOR HOUSE BANKED BLACKJACK

A. The Tribal Gaming Commission shall adopt rules to govern the conduct of house banked blackjack at the temporary gaming facility. Current copies of the game rules in effect shall be provided to the State. The rules shall include:

1. Procedures of play
2. Minimum and maximum permissible wagers
3. Payout on each form of wager
4. Procedures to be followed on occurrence of irregularities in play
5. Prohibitions on side betting between and against player and against the house
6. Hours of operation

Summaries of the rules for the method of play and payouts on winning bets shall be visibly displayed in the gaming facility and betting limits applicable to any gaming station shall be displayed at such gaming station.

B. The Tribal Gaming Commission shall also adopt specifications (may be provided by the equipment manufacturer or supplier) applicable to gaming equipment for:

1. Physical characteristics of chips; and
2. Physical characteristics of the following:
 - a. Cards (including procedures for receipt and storage)
 - b. Blackjack tables
 - c. Blackjack layouts
 - d. Dealing shoes (including procedures for receipt and storage)
 - e. Such other equipment as may be required for use in the game.

C. The Tribal Gaming Commission shall establish and provide to the State for review the rules and procedures for use of drop boxes at each gaming station to include: security, transportation to and from gaming stations, storage, counting and recording contents.

D. The Tribal Gaming Commission shall establish and provide to the State the duties, responsibilities and operating procedures for supervisors, pit bosses, floor managers, security and surveillance personnel.

III. INTERNAL CONTROLS

The Tribal Gaming Commission shall develop rules, policies, procedures and regulations for house banked blackjack, consistent with industry standards, that include provisions for the following:

1. Dealer Qualifications and Training Procedures
2. Shuffling, Cutting and Dealing Procedures
3. Specific Game Procedures & Rules
4. House Bank Rules (stake, chair or table rental if any)
5. Bet/Wager Limit By Table or Game
6. Card Inventory, Security and Storage
7. Replacing Decks
8. Destruction of Used Decks
9. Qualifications and Training for Floor Supervisors and Pit Bosses

10. Chips
 - a. Denominations
 - b. Design
 - c. Table Inventory
 - d. Replacement Procedures (changing chip design)
 - e. Payment Procedures for Replaced Chips
11. Accepting Tips by Dealers
12. Federal and State Tax Reporting
13. Distributing gaming chips to gaming stations
14. Procedures for opening and closing gaming stations
15. Procedures for removing chips and coins from gaming stations
16. Table Identification

IV. TRAINING

- A. The Tribal Gaming Commission shall require each blackjack supervisor, each pit boss, each blackjack dealer and all surveillance personnel to be trained either by a training school, academy or college recognized under industry standards or through an in-house training program such that the supervisor, pit boss, dealer or surveillance employee has the knowledge and skills required under industry standards for the job function that employee performs.
- B. If blackjack dealers are trained through an in-house training program, the Tribe and State must agree that the training program meets the following minimum standards:
 1. A minimum of 96 hours of instruction.
 2. The instruction shall consist of a combination of lecture and laboratory.
 3. The instruction shall be provided by an instructor licensed by the Tribal Gaming Commission.
 4. The curriculum must be designed to provide students with the knowledge and skills necessary to satisfy entry level requirements common in the industry.
- C. Each blackjack supervisor, pit boss and surveillance officer, shall receive training sufficient to meet industry standards in the areas of game protection, player money management and betting, card counting, and detection of other cheating methods.
- D. The Tribal Gaming Commission may license blackjack trainers. At a minimum those licensees shall demonstrate sufficient skills, and meet minimum requirements that are consistent with industry standards, in the area of house banked blackjack. The Gaming Commission shall impose appropriate requirements for trainer licensing, such as graduation from a training school, academy or college recognized by the industry as having

expertise in the areas of casino management and house banked blackjack, or an acceptable substitute of actual experience and references and a demonstrated ability to teach blackjack dealing skills and/or blackjack theory and games protection.

E. Training by the Tribe is not required under this Section IV. for employees who have previous experience in their assigned job function if the employee has been evaluated by gaming management under rules adopted by the Tribal Gaming Commission. The rules of the commission shall be consistent with industry standard, and shall provide, at a minimum, that an experienced employee be tested for knowledge of all applicable rules, procedures and internal controls, and for proficiency in the skills necessary for the assigned job function.

V. SURVEILLANCE SYSTEMS

A. SURVEILLANCE SYSTEMS (GENERAL)

1. The purposes of a gaming facility surveillance system is to safeguard assets, to deter, detect and prosecute criminal acts, and to maintain public confidence and trust that Tribal gaming is conducted honestly and free of criminal elements and activity.

2. The management of the gaming facility shall develop a surveillance system plan, and install, maintain and operate the gaming facility surveillance system in accordance with the standards set forth in this Appendix. The surveillance system plan shall be approved by the Tribal Gaming Commission if it satisfies the minimum standards.

3. The management of the gaming facility shall submit the surveillance system plan to the State for review [*within 30 days after the date of execution of this amendment.*] **no later than 90 days before the date the gaming facility is scheduled to open to the public.**

4. The plan shall include a description of all equipment utilized in the surveillance system; a blueprint or diagram that shows all of the areas to be monitored and the placement of surveillance equipment in relation to the activities being observed; a description of the procedures utilized in the operation of the gaming facility surveillance system; a description of the qualifications, training, and procedures of surveillance personnel; organizational reporting structure for surveillance personnel; and any other information required by the standards set forth in this Appendix.

5. The State shall review the proposed surveillance system plan submitted by the Tribe and advise the Tribal Gaming Commission and the management of the gaming facility whether the minimum standards are satisfied. The State shall review the installation of the surveillance system when a review and inspection is performed. The State shall advise the Tribal Gaming Commission and the management of the gaming facility whether the

surveillance system has been installed, maintained, and operated according to the minimum standards. The Tribe agrees that the surveillance system will be altered as necessary to meet the minimum standards. If the Tribe currently has a surveillance system in place, the surveillance plan may use a combination of current equipment and new to meet the standards, if there is no compromise of picture and recording quality.

6. In addition to the State's right of access provided in section 9.C.1. The State may review the operation of the surveillance system at least twice each year during an announced compliance audit. The State shall have access at any time to all surveillance records, tapes, reports and monitoring rooms at any time for the purpose of monitoring compliance with minimum standards and to confirm gaming integrity or security.

7. At the completion of any random or scheduled inspection the State will report its findings concerning the surveillance system to the Tribal Gaming Commission and the gaming facility management. The Tribe and State agree that the results of the inspection are for the internal use of the Tribe and the State and, to the extent allowed under Oregon law, shall not be disclosed by the State to anyone other than the Tribal Gaming Commission and gaming facility management unless such disclosure is necessary for resolution of a dispute pursuant to the procedures in Section 16 of the Compact, or to provide evidence for a criminal prosecution.

8. The gaming facility management shall separate management of the functions of security and surveillance within the temporary gaming facility.

9. The State shall perform a background investigation on all personnel employed as surveillance personnel, as provided in section 7 of the compact.

B. SURVEILLANCE SYSTEMS MINIMUM STANDARDS

1. SURVEILLANCE SYSTEM EQUIPMENT

- a. The surveillance system equipment must be able to identify each player, the dealer, and be of sufficient resolution and clarity to read individual cards and money denomination.
- b. The surveillance system shall be a combination of fixed cameras and pan-tilt-zoom (PTZ).
- c. The cameras and monitors may be either black and white, color or a combination of both. (The State recommends, but does not require, a combination of black/white and color.)
- d. The primary surveillance room and monitors must have override capabilities.
- e. Gaming Facility management shall establish communications systems on the gaming floor that are capable of immediately alerting surveillance personnel.
- f. Telephones on the gaming floor shall have the capability of a direct line or extension to the surveillance personnel.
- g. Surveillance personnel in the surveillance room shall have radio communication with security personnel if security officers have radio communication with each other.
- h. Surveillance equipment shall include a means by which surveillance personnel may observe and videotape all money transfers between the cashier and the gaming floor as transfers occur. The surveillance plan shall provide a means by which surveillance personnel can verify the locations, table number, time, date, and amount of transfers, and to whom the transfers were made.
- i. All monitors being recorded must display time and date on screen
- j. All fixed cameras will be continuously taped. All PTZ cameras will have the capability for taping of what is being monitored.

2. SURVEILLANCE SYSTEM EQUIPMENT LOCATIONS. At a minimum, surveillance cameras must provide:

- a. Main cashier

- (1) Overview of cage working area
 - (2) Ability to identify patrons and employees
 - (3) PTZ or fixed camera allowing identification of cash transactions at each cash drawer
 - (4) Camera over file window
- b. Soft count room
- (1) Clear view of entire count room
 - (2) Camera directly over count table to identify dollar amounts
 - (3) Clear view of vault
 - (4) Clear view of drop box
 - (5) Ability to read counting scale/meter
- c. Hard count room (if used)
- (1) Clear view of entire count room
 - (2) Clear view of wrapping and/or counting machine
- d. Pit
- (1) Ability to determine chip value and card value
 - (2) Clear view of playing surface
 - (3) Ability to identify patron, employee and table number
- e. Card Game Tables
- (1) Fixed camera at each table
 - (2) Same view and identification requirements as pit cameras

Re: Revised Draft Amendment III

Dear Bill:

Enclosed is a revised draft Amendment III to the compact. I have made the changes we discussed at our last meeting. I have deleted the Memorandum of Understanding from the amendment. As the Tribes' prior MOU has already expired, I will leave it to the Tribes and the State Police to negotiate the new MOU.

Please let me know if this draft is acceptable to the Tribes. All changes to the 8/22/96 draft are either underlined (new material) or bracketed and italicized (deletions). As you can see, part IV is new - we are amending the existing compact provisions concerning the temporary facility.

Sincerely,

ELIZABETH S. HARCHENKO
Special Counsel to the Attorney General

Bill Soltman

**TRIBAL-STATE GOVERNMENT-TO-GOVERNMENT COMPACT
FOR REGULATION OF CLASS III GAMING BETWEEN THE
CONFEDERATED TRIBES OF THE WARM SPRINGS RESERVATION
OF OREGON AND THE STATE OF OREGON**

AMENDMENT III.

This amendment is made to the Class III Gaming Compact between the Confederated Tribes of the Warm Springs Reservation of Oregon and the State of Oregon executed on January 6, 1995, and approved by the Secretary of the Interior on March 6, 1995. The terms of this amendment are in addition to and, except as specifically provided herein, do not supersede any of the provisions of the original compact, or Amendments I and II thereto.

WHEREAS, the Tribes wish to extend the terms of Amendment I and II to the Compact which provide for regulation of house banked blackjack at the gaming facility, and

WHEREAS, the State agrees that the circumstances justify this Amendment,

NOW THEREFORE, the Tribes and the State hereby approve the following amendments to the Compact:

I. Section I of Amendment II is amended as follows:

Paragraph IV of this Amendment I expires on ~~June 30, 1997~~. However if the compliance review described in Section 4.H.9 of the Compact (added by this Amendment) is completed before October 1, 1996, paragraph IV of this amendment shall expire on ~~December 31, 1997~~. April 30, 1998. Unless an extension of this amendment or a permanent amendment governing the operation of house banked blackjack has been negotiated and executed before the expiration of this amendment, the Tribes agree to terminate blackjack games at the gaming facility until a new agreement has been negotiated and executed. In the event that a compact amendment is under negotiation, the Tribes may replace blackjack tables with video lottery terminals at the ratio of eight terminals per blackjack table.

II. This amendment is effective as an extension under paragraph IX of Amendment II and paragraph VI of Amendment I of the Compact, upon execution by the State and the Tribes, and submission to the Secretary of the Interior. It is the intent of both the State and the Tribe that this Amendment be fully enforceable as between the parties to it from and after the date it is executed and submitted to the Secretary of the Interior, both as to the Tribe's ability to offer house banked blackjack and the State's and the Tribe's responsibility to implement the regulatory amendments contained herein.

EXECUTED as of the date and year below.

**TRIBAL-STATE COMPACT FOR REGULATION OF
CLASS III GAMING BETWEEN
THE BURNS – PAIUTE TRIBE
AND THE STATE OF OREGON**

AMENDMENT IV.

This Amendment is made to the Class III Gaming Compact between the Burns-Paiute Tribe of Oregon and the State of Oregon executed on December 12, 1996, and approved by the Secretary of the Interior on February 25, 1997. The terms of this amendment are in addition to and, except as specifically provided herein, do not supersede any of the provisions of the original compact, or Amendments I, II or III thereto.

WHEREAS, the Tribe wishes to extend the terms of Amendment III to the Compact regarding house banked blackjack at the gaming facility, and

WHEREAS, the State agrees that the circumstances justify this Amendment, and

NOW THEREFORE, the Tribe and the State hereby approve the following amendments to the Compact:

I. Section 4(E)(4) of the Compact, as amended in Amendment III, is amended as follows:

4. The authorization in this Compact for house banked blackjack shall expire on ~~March 31, 2000~~ December 31, 2001, unless an amendment authorizing the play of house banked blackjack beyond that date has been negotiated and executed.

II. Section 4(B)(1) is amended as follows:

B. Authorized games.

Subject to the provisions of this Compact, the Tribe may engage in only the following Class III games: Video lottery games of chance as described in ~~Appendix A the Appendix~~, keno as described in ~~Appendix B the Appendix~~ and house banked blackjack as described in ~~Appendix C the Appendix~~ and as further limited under subsection E of this section.

III. Section 7 is amended as follows:

SECTION 7. REGULATIONS FOR OPERATION AND MANAGEMENT OF CLASS III GAMES.

~~A. Video Lottery Games of Chance. The acquisition, use and operation of all video lottery games of chance and keno authorized under this Compact shall be in accordance with the rules and regulations set forth in Appendices A and B. Appendices A and B are hereby incorporated into and made a part of this Compact.~~

~~B. Blackjack. The rules and regulations governing the play of house banked blackjack authorized under this Compact shall be those set forth in Appendix C which is hereby incorporated into and made a part of this Compact.~~

A. Video Lottery Games of Chance; Keno; Blackjack. The acquisition, use and operation of all video lottery games of chance, and keno *and blackjack* authorized under this Compact shall be in accordance with the **standards** rules and regulations set forth in Appendices A and B. Appendices A and B are hereby incorporated into and made a part of this Compact *the Appendix.*

B. The provisions of the Appendix, "Tribal/State Minimum Internal Control Standards," are hereby incorporated into and made a part of this Compact. The Tribe and the State agree that the minimum standards set forth in the Appendix may be modified or supplemented by mutual agreement of the parties, and that subsequent amendment of this Compact shall not be necessary for any such modification or supplementation of the minimum standards set forth in the Appendix.

IV. This Amendment is effective, upon execution by the State and the Tribe, and submission to the Secretary of the Interior. It is the intent of both the State and the Tribe that this Amendment be fully enforceable as between the parties to it from and after the date it is executed and submitted to the Secretary of the Interior.

EXECUTED as of the date and year below.

AMENDMENT IV

This amendment is made to the Class III Gaming Compact between the Klamath Tribes and the State of Oregon executed on December 16, 1994, and approved by the Secretary of the Interior on February 24, 1995. The terms of this amendment are in addition to and, except as specifically provided herein, do not supersede any of the provisions of the original compact, or Amendments I, II, and III thereto.

WHEREAS, the Tribes wish to extend the terms of Amendment III to the Compact which provide for regulation of house banked blackjack at the gaming facility, and

WHEREAS, the State agrees that the circumstances justify this Amendment,

NOW THEREFORE, the Tribes and the State hereby approve the following amendments to the Compact:

I. Paragraph X of Amendment III is amended as follows:

The provisions of ~~Section V~~ of this amendment expire on ~~December 31, 1997~~. March 31, 1998. Unless an extension of ~~Section V~~ of this amendment or a permanent amendment governing the operation of house banked blackjack has been negotiated and executed before the expiration of this amendment, the Tribes agree to terminate blackjack games at the gaming facility until a new agreement has been negotiated and executed.

II. This amendment is effective as an extension under paragraph X of Amendment III of the Compact, upon execution by the State and the Tribes, and submission to the Secretary of the Interior. It is the intent of both the State and the Tribe that this Amendment be fully enforceable as between the parties to it from and after the date it is executed and submitted to the Secretary of the Interior.

**TRIBAL-STATE COMPACT FOR REGULATION OF
CLASS III GAMING BETWEEN THE
CONFEDERATED TRIBES OF THE WARM SPRINGS RESERVATION
AND THE STATE OF OREGON**

AMENDMENT V.

This amendment is made to the Class III Gaming Compact between the Confederated Tribes of the Warm Springs Reservation of Oregon and the State of Oregon executed on January 6, 1995, and approved by the Secretary of the Interior on March 6, 1995. The terms of this amendment are in addition to and, except as specifically provided herein, do not supersede any of the provisions of the original compact, or Amendments I, II, III and IV thereto.

WHEREAS, the Tribes wish to extend the terms of Amendment IV to the Compact which provide for regulation of house banked blackjack at the gaming facility, and

WHEREAS, the State agrees that the circumstances justify this Amendment, and

WHEREAS, the Tribes and the State agree that the State functions of monitoring and oversight of tribal gaming operations will be funded by the tribal gaming industry and wish to amend Section 10 of the Compact with respect to assessment of state costs;

NOW THEREFORE, the Tribes and the State hereby approve the following amendments to the Compact:

I. Section I of Amendment IV is amended as follows:

Paragraph IV of Amendment I expires on ~~March 31, 1999~~ March 31, 2000. Unless an extension of this amendment or a permanent amendment governing the operation of house banked blackjack has been negotiated and executed before the expiration of this amendment, the Tribes agree to terminate blackjack games at the gaming facility until a new agreement has been negotiated and executed. In the event that a compact amendment is under negotiation, the Tribes may replace blackjack tables with video lottery terminals at the ratio of eight terminals per blackjack table.

II. Subsections A, B and C of Section 10 of the Compact are amended as follows:

SECTION 10. STATE ASSESSMENT OF COSTS FOR OVERSIGHT.

~~A. **Imposition of Assessment for State Law Enforcement and Regulatory Expenditures.** The State shall make annually an assessment sufficient to~~

~~compensate the State for the reasonable and necessary costs of regulating gaming operations and conducting state law enforcement investigations pursuant to this Compact. The State shall assess only those costs of fringe benefits for personnel. Fees received with respect to the submission of gaming licenses and contracts pursuant to subsection C of Section 7 of this Compact shall be subtracted from the amount of the assessment.~~

~~**B. Procedure for Assessments.** The procedure for assessments shall be determined and agreed upon annually in a Memorandum of Understanding between the parties to this Compact. Such agreement shall include provisions for adjustments of excess assessments and underpayment of costs.~~

~~**C.** If the parties fail to agree to the assessments under this section, such dispute shall be resolved pursuant to Section 16 of this Compact.~~

A. Assessment for State Monitoring, Oversight and Law Enforcement Costs

1. The Tribes agree that the Oregon Gaming Tribes have the collective responsibility to pay for the cost of performance by OSP of its activities authorized pursuant to this Compact, including associated overhead. The Tribes agree to pay its fair share of the Oregon State Police costs pursuant to the formula set forth in this Section within 30 days of billing.
2. During the development of its biennium budget, the Oregon State Police shall distribute a draft of the Tribal Gaming section portion of the budget to the Oregon Gaming tribes for their review and comment prior to submission of the budget to either the Governor or the Legislature. The Oregon State Police shall give full consideration to the Oregon Gaming Tribes' comments on the Tribal Gaming Section budget. Notwithstanding the right of the Oregon Gaming tribes to comment on the Tribal Gaming Section budget before it is finalized within the Oregon State Police, each Tribe retains the right to participate in any public review by either the governor or the Legislature on the Oregon State Police budget as well as before the Emergency Board for any increase in the Oregon State Police budget.
3. Because of the government-to-government relationship between the Tribes and the State, the parties recognize that the obligation of the Tribes to pay for the Oregon State Police costs as provided by this Compact is unique. Nothing in this Compact is intended to, nor shall be construed as, creating a responsibility for the Tribes to pay for any other governmental services rendered by or received from the State.

4. The Tribes' monthly payment to the Oregon State Police shall be computed as follows:

- a) The biennium budget for the Tribal Gaming Section shall be divided by 24 to determine the total monthly payment that must be made by the Oregon Gaming Tribes to the Oregon State Police for Compact related activities. This payment shall be referred to as the "OSP Monthly Payment."
- b) Amounts received by the Oregon State Police from Class III Gaming Contractor license applicants, or any other gaming vendor license applicant, and from the payment for the assignment of Tribal Gaming Section officers to non-tribal gaming duties, shall reduce the OSP Monthly Payment owed by the Oregon Gaming Tribes. The reduction in the OSP Monthly Payment owed by the Oregon Gaming Tribes shall occur in the month the Oregon State Police receives such payments from third party sources.
- c) The Tribes' monthly payment to the Oregon State Police shall be computed as follows:

No. of direct Service Hours billed to CTWSR Tribal Gaming Operations		OSP		Tribes Share of
		X Monthly	=	OSP Monthly
<hr/>		Payment		Payment
Total No. of Direct Service Hours Billed to All Oregon Tribal Gaming Operation.				

- d) Every six months, or biennium quarter, the Oregon State Police shall reconcile the total payments received from the Oregon Gaming Tribes and third party sources during the six month period. The total of these payments should equal one-fourth of the Oregon State Police/Tribal Gaming Section biennium budget. Any underpayment or overpayment shall adjust the amount owed by the Oregon Gaming Tribes the month following the reconciliation.

5. As used in this section

- a) "Oregon Gaming Tribes" means any federally recognized Indian Tribes in Oregon engaged in Class III gaming pursuant to a Tribal-State Compact.
- b) "Direct Service Hours" means the actual time spent by Oregon State Police personnel in performing employee background checks, performing background checks on Class III Gaming Contractors or other gaming vendors (unless paid by the Class III Gaming Contractor

or other gaming vendor), performing Compact monitoring functions (including the annual comprehensive compact compliance review), conducting an investigation, and traveling to and from the Gaming facility or the site of a Class III Gaming Contractor background investigation, for a particular Tribal Gaming Operation. This definition is in no way intended to limit OSP's activities authorized pursuant to this Compact. The Oregon State Police shall keep direct service hour billing records setting forth the date work is performed, a brief description of the work performed and the amount of time spent.

6. The methodology for the payment of Oregon State Police costs shall begin on January 1, 1999.
7. For the time period beginning January 1, 1999, this provision supersedes the terms of any and all Memoranda of Understanding entered into between the Tribes and OSP pursuant to Section 10 of the Compact, as they relate to payment of OSP costs.

- B. If the Tribes dispute the amount of the assessment under this Section, the Tribes shall timely pay the undisputed amount and within thirty (30) days of billing, shall notify OSP in writing of the specific nature of the dispute. If the parties have not resolved the dispute within 15 days, the Tribes shall pay the disputed amount into an off-reservation escrow, mutually agreeable to the parties, with escrow instructions providing that the funds are to be released only upon authorization by both the Tribes and the Oregon State Police. The parties shall share the reasonable costs of the escrow. The dispute shall then be resolved pursuant to the procedures set forth in section 6B(3) and (4) of this Compact.

If the Tribes fail to timely pay the disputed amount into escrow or timely pay the undisputed amount, the Oregon State Police may suspend any background checks that are in process or withhold authorization for the shipment of equipment, and/or pursue other remedies for Compact violations available under this compact or IGRA.

III. This amendment is effective as an extension under Paragraph IX of Amendment II and Paragraph VI of Amendment I Subsection G of Section 4 of the Compact, upon execution by the State and the Tribes, and submission to the Secretary of the Interior. It is the intent of both the State and the Tribe that this Amendment be fully enforceable as between the parties to it from and after the date it is executed and submitted to the Secretary of the Interior.

**TRIBAL-STATE COMPACT FOR REGULATION OF
CLASS III GAMING BETWEEN
THE KLAMATH TRIBES
AND THE STATE OF OREGON**

AMENDMENT VI.

This amendment is made to the Class III Gaming Compact between the Klamath Tribes and the State of Oregon executed on December 16, 1994, and approved by the Secretary of the Interior on February 24, 1995. The terms of this amendment are in addition to and, except as specifically provided herein, do not supersede any of the provisions of the original compact, or Amendments I, II, III, IV and V thereto.

WHEREAS, the Tribes wish to extend the terms of Amendment V to the Compact which provide for regulation of house banked blackjack at the gaming facility, and

WHEREAS, the State agrees that the circumstances justify this Amendment, and

WHEREAS, the Tribes and the State agree that the State functions of monitoring and oversight of tribal gaming operations will be funded by the tribal gaming industry and wish to amend Section 10 of the Compact with respect to assessment of state costs;

NOW THEREFORE, the Tribes and the State hereby approve the following amendments to the Compact:

I. Paragraph I of Amendment V is amended as follows:

The provisions of this amendment expire on ~~March 31, 1999~~ March 31, 2000. Unless an extension of this amendment or a permanent amendment governing the operation of house banked blackjack has been negotiated and executed before the expiration of this amendment, the Tribes agree to terminate blackjack games at the gaming facility until a new agreement has been negotiated and executed.

II. Subsections A, B and C of Section 10 of the Compact are amended as follows:

SECTION 10. STATE ASSESSMENT OF COSTS FOR OVERSIGHT

A. ~~Imposition of Assessment for State Law Enforcement and Regulatory Expenditures. The State shall make annually an assessment sufficient to compensate the State for the reasonable and necessary costs of regulating Gaming Operations and conducting state law enforcement investigations pursuant to this Compact. The State shall assess only those costs related to gaming. The State acknowledges expressly herein that the extent of oversight is related directly to the size and scope of gaming. Such assessment shall include any costs of fringe benefits for personnel. Fees received with respect to the submission of gaming~~

~~licenses and contracts pursuant to subsection C of Section 7 of this Compact shall be subtracted from the amount of the assessment.~~

~~B. Procedure for Assessments. The procedure for assessments shall be determined and agreed upon annually in a Memorandum of Understanding between the parties to this Compact. Such agreement shall include provisions for adjustments of excess assessments and underpayment of costs.~~

~~C. If the parties fail to agree to the assessments under this section, such dispute shall be resolved pursuant to Section 16 of this Compact.~~

A. Assessment for State Monitoring, Oversight and Law Enforcement Costs

1. The Tribes agree that the Oregon Gaming Tribes have the collective responsibility to pay for the cost of performance by OSP of its activities authorized pursuant to this Compact, including associated overhead. The Tribes agree to pay its fair share of the Oregon State Police costs pursuant to the formula set forth in this Section within 30 days of billing.
2. During the development of its biennium budget, the Oregon State Police shall distribute a draft of the Tribal Gaming section portion of the budget to the Oregon Gaming tribes for their review and comment prior to submission of the budget to either the Governor or the Legislature. The Oregon State Police shall give full consideration to the Oregon Gaming Tribes' comments on the Tribal Gaming Section budget. Notwithstanding the right of the Oregon Gaming tribes to comment on the Tribal Gaming Section budget before it is finalized within the Oregon State Police, each Tribe retains the right to participate in any public review by either the governor or the Legislature on the Oregon State Police budget as well as before the Emergency Board for any increase in the Oregon State Police budget.
3. Because of the government-to-government relationship between the Tribes and the State, the parties recognize that the obligation of the Tribes to pay for the Oregon State Police costs as provided by this Compact is unique. Nothing in this Compact is intended to, nor shall be construed as, creating a responsibility for the Tribes to pay for any other governmental services rendered by or received from the State.

4. The Tribes' monthly payment to the Oregon State Police shall be computed as follows:

- a) The biennium budget for the Tribal Gaming Section shall be divided by 24 to determine the total monthly payment that must be made by the Oregon Gaming Tribes to the Oregon State Police for Compact related activities. This payment shall be referred to as the "OSP Monthly Payment."
- b) Amounts received by the Oregon State Police from Class III Gaming Contractor license applicants, or any other gaming vendor license applicant, and from the payment for the assignment of Tribal Gaming Section officers to non-tribal gaming duties, shall reduce the OSP Monthly Payment owed by the Oregon Gaming Tribes. The reduction in the OSP Monthly Payment owed by the Oregon Gaming Tribes shall occur in the month the Oregon State Police receives such payments from third party sources.
- c) The Tribes' monthly payment to the Oregon State Police shall be computed as follows:

No. of direct Service Hours billed to Klamath Tribal Gaming Operations		OSP		Tribes Share of
		X Monthly	=	OSP Monthly
<hr/>		Payment		Payment
Total No. of Direct Service Hours Billed to All Oregon Tribal Gaming Operation.				

- d) Every six months, or biennium quarter, the Oregon State Police shall reconcile the total payments received from the Oregon Gaming Tribes and third party sources during the six month period. The total of these payments should equal one-fourth of the Oregon State Police/Tribal Gaming Section biennium budget. Any underpayment or overpayment shall adjust the amount owed by the Oregon Gaming Tribes the month following the reconciliation.

5. As used in this section

- a) "Oregon Gaming Tribes" means any federally recognized Indian Tribes in Oregon engaged in Class III gaming pursuant to a Tribal-State Compact.

- b) "Direct Service Hours" means the actual time spent by Oregon State Police personnel in performing employee background checks, performing background checks on Class III Gaming Contractors or other gaming vendors (unless paid by the Class III Gaming Contractor or other gaming vendor), performing Compact monitoring functions (including the annual comprehensive compact compliance review), conducting an investigation, and traveling to and from the Gaming facility or the site of a Class III Gaming Contractor background investigation, for a particular Tribal Gaming Operation. This definition is in no way intended to limit OSP's activities authorized pursuant to this Compact. The Oregon State Police shall keep direct service hour billing records setting forth the date work is performed, a brief description of the work performed and the amount of time spent.
- 6. The methodology for the payment of Oregon State Police costs shall begin on January 1, 1999.
 - 7. For the time period beginning January 1, 1999, this provision supersedes the terms of any and all Memoranda of Understanding entered into between the Tribes and OSP pursuant to Section 10(B) of the Compact, as those terms relate to payment of OSP costs.
- B. If the Tribes dispute the amount of the assessment under this Section, the Tribes shall timely pay the undisputed amount and within thirty (30) days of billing, shall notify OSP in writing of the specific nature of the dispute and the disputed amount. The parties shall meet and attempt to resolve the dispute. If the parties have not resolved the dispute within 15 days, the Tribes shall pay the disputed amount into an off-reservation escrow, mutually agreeable to the parties, with escrow instructions providing that the funds are to be released only upon the mutual authorization of the Tribes and the Oregon State Police. The parties shall share the reasonable costs of the escrow. The dispute shall then be resolved pursuant to the procedures set forth in section 6b(3) and (4) of this Compact.

If the Tribes fail to timely pay the disputed amount into escrow or timely pay the undisputed amount, OSP shall send written notice to the Chairman of the Tribes, informing him of OSP's authority to take further action. Fifteen days after such notice is sent by OSP, the Oregon State Police may suspend any background checks that are in process or withhold authorization for the shipment of equipment, and/or pursue other remedies for Compact violations available under this Compact or IGRA.

III. This amendment is effective as an extension under paragraph X of Amendment III of the Compact, upon execution by the State and the Tribes, and submission to the Secretary of the Interior. It is the intent of both the State and the Tribes that this Amendment be fully enforceable as between the parties to it from and after the date it is executed and submitted to the Secretary of the Interior, both as to the Tribes' ability to offer house banked blackjack and the State's and the Tribes' responsibility to implement the regulatory amendments contained herein.

AMENDMENT VII

This amendment is made to the Class III Gaming Compact between the Klamath Tribes and the State of Oregon executed on December 16, 1994, and approved by the Secretary of the Interior on February 24, 1995. The terms of this amendment are in addition to and, except as specifically provided herein, do not supersede any of the provisions of the original compact, or Amendments I, II, III, IV, V and VI thereto.

WHEREAS, the Tribes wish to extend the terms of Amendment V and VI to the Compact which provide for regulation of house banked blackjack at the gaming facility, and

WHEREAS, the State agrees that the circumstances justify this Amendment, and

NOW THEREFORE, the Tribes and the State hereby approve the following amendment to the Compact:

I. Paragraph I of Amendment V is amended as follows:

The provisions of this amendment expire on ~~March 31, 2000~~ December 31, 2001. Unless an extension of this amendment or a permanent amendment governing the operation of house banked blackjack has been negotiated and executed before the expiration of this amendment, the Tribes agree to terminate blackjack games at the gaming facility until a new agreement has been negotiated and executed.

II. Section 8A of the Compact is amended to add the following language:

The provisions of the Appendix, "Tribal/State Minimum Internal Control Standards," are hereby incorporated into and made a part of this Compact. The Tribes and the State agree that the minimum standards set forth in the Appendix may be modified or supplemented by mutual agreement of the parties, and that subsequent amendment of this Compact shall not be necessary for any such modification or supplementation of the minimum standards set forth in the Appendix.

III. This amendment is effective as an extension under paragraph X of Amendment III of the Compact, upon execution by the State and the Tribes, and submission to the Secretary of the Interior. It is the intent of both the State and the Tribes that this Amendment be fully enforceable as between the parties to it from and after the date it is executed and submitted to the Secretary of the Interior, both as to the Tribes' ability to offer house banked blackjack and the State's and the Tribes' responsibility to implement the regulatory amendments contained herein.

WHEREAS, the State agrees that the circumstances justify this Amendment, and

NOW THEREFORE, the Tribes and the State hereby approve the following amendment to the Compact:

I. Section I of Amendment VI is amended as follows:

Paragraph IV of Amendment I expires on ~~September 30, 2000~~ February 1, 2001. Unless an extension of this amendment or a permanent amendment governing the operation of house banked blackjack has been negotiated and executed before the expiration of this amendment, the Tribes agree to terminate blackjack games at the gaming facility until a new agreement has been negotiated and executed. In the event that a compact

amendment is under negotiation, the Tribes may replace blackjack tables with video lottery terminals at the ratio of eight terminals per blackjack table.

- II. A. The provisions of the Appendix, “Tribal/State Minimum Internal Control Standards,” are hereby incorporated into and made a part of this Compact, modified as noted in the Appendix. The Tribes and the State agree that the minimum standards set forth in the Appendix may be modified or supplemented by mutual agreement of the parties, and that subsequent amendment of this Compact shall not be necessary for any such modification or supplementation of the minimum standards set forth in the Appendix.

- B. With respect to Section VI, paragraph A(10), Section VI, paragraph C(3) and Section VII, paragraph T(10), the parties recognize that there may be extraordinary circumstances in which it will be impractical to have three count team members present, such as in cases of extreme inclement weather. In such rare circumstances, and as long as the annual gross gaming revenues of the Tribal Gaming Operation do not exceed ten million dollars, the Tribal Gaming Operation may operate with two count team members, and shall notify the Oregon State Police in writing within 10 days of the occurrence.

III. This amendment is effective as an extension under Paragraph IX of Amendment II and Paragraph VI of Amendment I Subsection G of Section 4 of the Compact, upon execution by the State and the Tribes, and submission to the Secretary of the Interior. It is the intent of both the State and the Tribe that this Amendment be fully enforceable as between the parties to it from and after the date it is executed and submitted to the Secretary of the Interior.

EXECUTED as of the date and year below.

SECTION I TRIBAL GAMING OPERATION

A. ORGANIZATION

1. The tribal gaming operation will have a system of internal controls, policies and procedures or regulations that includes the following:
 - a. Administrative control, which includes but is not limited to the plan of organization and the procedures and records that are concerned with the decision processes leading to management's authorization of transactions; and
 - b. Accounting control which includes the plan of organization and the procedures and records that are concerned with the safeguarding of assets and the reliability of financial records and are consequently designed to provide reasonable assurance that:
 - i. Transactions are executed in accordance with the management's general and specific authorization, which will include the requirements of these standards;
 - ii. Transactions are recorded as necessary to permit preparation of financial statements in conformity with generally accepted accounting principles and with these standards, and to maintain accountability for assets;
 - iii. Access to assets is permitted only in accordance with management's authorization which will include the requirements of these standards; and
 - iv. The recorded accountability for assets is compared with existing assets at reasonable intervals and appropriate action is taken with respect to any differences.
2. The tribal gaming operation's system of internal control will provide for:
 - a. Personnel with an understanding of prescribed procedures; and
 - b. The segregation of incompatible functions so that no employee is in a position to perpetrate and conceal errors or irregularities in the normal course of his or her duties.
3. The tribal gaming operation will, at a minimum, establish the following departments:
 - a. A security department supervised by the head of the security department who will co-operate with, yet perform independently of, all other departments and will report directly to the General Manager of the tribal gaming operation

regarding matters of policy, purpose, and responsibilities. The head of security will be responsible for, but not limited to the following:

- I. Security of the gaming facility;
 - ii. Ensure compliance with policies, procedures, and the law;
 - iii. Safeguards assets transported within the gaming facility and cage/vault;
 - iv. Insures safety of employees and guests; and
 - v. Assures security of property and gaming facility;
 - vi. Establish an evidence storage area that has security controls that assure the chain of possession and integrity of stored evidence.
- b. A surveillance department supervised by the head of the surveillance department who will co-operate with, yet perform independently of, all other departments and will report directly to the Tribal Gaming Commission or other department or entity independent of operations regarding matters of policy, purpose, and responsibilities. The head of surveillance will be responsible for, but not limited to the following:
- I. The clandestine surveillance of the operation and conduct of the games;
 - ii. The clandestine surveillance of the operation of the cashier's cage;
 - iii. The audio-video taping of activities in the count rooms;
 - iv. The detection of cheating, theft, embezzlement, and other illegal activities in the gaming facility, count rooms, and cashier's cage;
 - v. The video taping of illegal and unusual activities monitored; and
 - vi. The notification of appropriate gaming facility supervisors, the Tribal Gaming Commission who will notify the Oregon State Police upon the detection and taping of cheating, theft, embezzlement, or other illegal activities.
- c. A gaming facility department supervised by a gaming facility manager who will perform independently of all other departments and will report directly to the General Manager. The gaming facility manager will be responsible for the operation and conduct of all Class III activities conducted in the gaming facility.
- d. A gaming facility accounting department supervisor who will report directly to the General Manager. The supervisor responsibilities will include, but not be limited to, the following;
- i. Accounting controls;
 - ii. The preparation and control of records and data required by these standards;
 - iii. The control of stored data, the supply of unused forms, the accounting for and comparing of forms used in the gaming operation and required by these standards; and
 - iv. The control and supervision of the cashier's cage.

- e. A cashier's cage supervised by a cage supervisor who will supervise cage cashiers and co-operate with, yet perform independently of, the gaming facility and security departments, and will be under the supervision of, and report directly to the Controller. The cashier's cage will be responsible for, but not limited to the following:
 - i. The custody of currency, coin, patron checks, gaming chips, and documents and records normally associated with the operation of a cashier's cage;
 - ii. The approval, exchange, redemption and consolidation of gaming chips received in conformity with the gaming operation's standards;
 - iii. The receipt, distribution and redemption of gaming chips in conformity with these standards; and
 - iv. Such other functions normally associated with the operation of a cashier's cage.
- 4. The tribal gaming operation's personnel will be trained in all accounting and internal control practices and procedures relevant to each employee's individual function. Special instructional programs will be developed by the tribal gaming operation in addition to any on-the job instruction sufficient to enable all members of the departments required by this standard to be thoroughly conversant and knowledgeable with the appropriate and required manner of performance of all transactions relating to their function.

B. ADOPTION OF RULES FOR CLASS III ACTIVITIES

- 1. The tribal gaming operation will submit for approval to the Tribal Gaming Commission who will provide rules to the Oregon State Police to govern the conduct of Class III activities operated in the tribal gaming facility. Copies of game rules in effect will be provided to the Oregon State Police 60 days prior to implementation. Summaries of the rules of each game relevant to the method of play and odds paid to winning bets will be visibly displayed in the gaming facility and betting limits applicable to any gaming station will be displayed at such gaming station. Game rules approved by the Tribal Gaming Commission will include in addition to the rules of play:
 - a. Specifications provided by the equipment manufacturer or supplier applicable to gaming equipment:
 - i. Physical characteristics of chips; and
 - ii. Physical characteristics of such other gaming equipment as may be required for use in authorized Class III gaming.
- 2. Rules for each authorized game, to include:

- a. Procedures of play;
- b. Minimum and maximum permissible wagers;
- c. Shuffling, cutting and dealing techniques, as applicable;
- d. Payout odds on each form of wager;
- e. Procedures to be followed on occurrence of irregularities, including definition of irregularities as applicable to each game; and
- f. Prohibitions on side betting between and against player and against the house.

SECTION II ACCOUNTING STANDARDS

A. ACCOUNTING RECORDS

1. The tribal gaming operation will maintain complete, accurate, legible and permanent records of all transactions relating to the revenues and costs of the gaming operation.
2. General accounting records will be prepared and maintained according to generally accepted accounting principles on a double entry system of accounting with transactions recorded on the accruals basis, and detailed, supporting, subsidiary records, sufficient to meet the requirements of paragraph 4.
3. The forms of accounts adopted should be of a standard form, which would ensure consistency, comparability, and effective disclosure of financial information.
4. The detailed, supporting and subsidiary records will include, but not necessarily be limited to:
 - a. Statistical game records to reflect drop and win amounts for each station, for each game, for each shift, or daily for each type of table game, and individual and statistical game records reflecting similar information for all other games;
 - b. Records of investments in property and services, including equipment used directly in connection with the operation of Class III gaming;
 - c. Records of accounts payable by the tribal gaming operation;

- d. Records that identify the purchase, receipt and destruction of gaming chips used in wagering.
- e. Video lottery terminal analysis reports compare actual hold percentages to theoretical hold percentages by each machine;
- f. Journal entries prepared by the gaming facility;
- g. The records required either by these minimum internal control standards or by the gaming facility's system of internal control; and
- h. Any other supporting source documents that are specifically required to be maintained.

B. AUDITING FINANCIAL STATEMENTS

1. Each gaming facility will prepare financial statements covering all financial activities of the gaming facility for each fiscal year.
2. Each Tribe will engage an independent accountant licensed to practice within the State of Oregon. The accountant will examine the statements in accordance with generally accepted auditing standards.
3. If a gaming facility changes its fiscal year, the gaming facility will prepare and submit to the Tribe audited or reviewed financial statements covering the "stub" period from the end of the previous fiscal year to the beginning of the new fiscal year. The submission will be made in a timely manner after the end of the stub period or incorporated the financial results of the stub period in the statements for the new fiscal year.
4. The annual financial statements will be prepared on a comparative basis for the current and prior calendar or fiscal year and will present the financial position and results of operations in conformity with generally accepted accounting principles.
5. Two copies of the audited financial statements, together with the report thereon of the tribal gaming operation's independent accountant will be filed with the Tribal Gaming Commission and made available to the Oregon State Police at a location determined by the Tribal Gaming Commission not later than 120 days following the end of the calendar or fiscal year. Extensions may be granted by the Tribal Gaming Commission for extenuating circumstances.
6. The tribal gaming operation will require its independent accountant to render the following additional reports:

- a. A report on material weaknesses in accounting and internal controls. Whenever, in the opinion of the independent account, there exists no material weaknesses in accounting and internal controls, the report will say so; and
 - b. A report expressing the opinion of the independent accountant that, based on his or her examination of the financial statements, the tribal gaming operation has followed, in all material respects, during the period covered by his or her examination, the system of accounting and internal control on file with the Tribal Gaming Commission. Whenever, in the opinion of the independent accountant, the tribal gaming operation has materially deviated from the system of accounting and internal controls filed with the Tribal Gaming Commission, or the accounts, records, and control procedures examined are not maintained by the tribal gaming operation in accordance with the Compact and these standards. The report will enumerate such deviations of the areas of the system no longer considered effective and will make recommendations in writing regarding improvements in the system of accounting and internal controls.
7. Two copies of the reports required by paragraph (6) and two copies of any other reports on accounting and internal control, administrative controls, or other matters relating to the tribal gaming operation's accounting or operating procedures rendered by the tribal gaming operation's independent accountant, will be filed with the Tribal Gaming Commission and made available to the Oregon State Police at a location to be determined by the Tribal Gaming Commission by the Tribal gaming operation within 120 days following the end of each fiscal year or within thirty (30) days of receipt whichever is earlier. Provided, extensions may be granted for extenuating circumstances by the Tribal Gaming Commission.

C. SYSTEM OF INTERNAL CONTROL

1. Each gaming facility will establish administrative and accounting procedures for the purpose of determining effective control over the gaming facility's internal fiscal affairs. These will be submitted to the Tribal Gaming Commission and be made available to the Oregon State Police at a location determined by the Tribal Gaming Commission. The tribal gaming operation will submit to the Tribal Gaming Commission and the Oregon State Police a description of its system of internal procedures and administrative and accounting controls at least 60 days before any new gaming operations are to commence. The system of internal procedures and administrative and accounting controls will meet or exceed the minimum standards set forth in the Compact agreement. No new games will be put into play or offered to the public until the controls meet or exceed these standards. The procedures will be designated to reasonably ensure that:
 - a. Assets are safeguarded;

- b. Financial records are accurate and reliable;
 - c. Transactions are performed only in accordance with management's general or specific authorization;
 - d. Transactions are recorded adequately to permit proper reporting of gaming revenue, and to maintain accountability for assets;
 - e. Access to assets is permitted only in accordance with the Tribes specific authorization;
 - f. Recorded accountability for assets is compared with actual assets at reasonable intervals and appropriate action is taken with respect to any discrepancies; and
 - g. Functions, duties, and responsibilities are appropriately segregated in accordance with sound practices by competent, qualified personnel.
2. Each such submission will contain both a detailed narrative and diagrammatic representation of the internal control system to be utilized by the tribal gaming operation. Each written system of internal control will include an organizational chart depicting appropriate segregation of functions and responsibilities.
 3. The submission required by paragraph 1 will be signed by the executive responsible for its preparation that the submitted system conforms in all respects to the principles of internal control required by these standards.
 4. Each gaming facility will follow procedural changes as required by the Tribe.
 5. Before making operational changes such as adding or eliminating a game, adding any computerized system that affects the proper reporting of gross revenue, adding any computerized system for monitoring video lottery terminals or other games, or any other computerized associated equipment, the Tribe agrees to:
 - a. Amend its accounting and administrative procedures and its written system of internal control to comply with these standards and have the amendment signed by the gaming operations Senior Financial Officer and General Manager or similar position.
 - b. Comply with any written requirements imposed by the Tribe regarding administrative approval of computerized associated equipment; and
 - c. Provide copies of the amended accounting and administrative procedures and its written system of internal control to the Oregon State Police.

- d. After paragraphs a, b and c have been complied with, implement the procedures and written system as amended.

D. GROSS REVENUE CALCULATIONS

1. For each table game, gross revenue equals the closing bankroll plus credit slips for cash, chips, or tokens returned to the cage, plus drop, less opening bankroll and fills to the table.
2. For each video lottery terminal, gross revenue equals drop less jackpot/cash slip payout.
3. For each counter game, gross revenue equals:
 - a. The money accepted by the gaming facility on events or games that occur during the month or will occur in subsequent months, less money paid out during the month to patrons on winning wagers; or
 - b. The money accepted by the gaming facility on events or games that occur during the month plus money, not previously included in gross revenue, that was accepted by the gaming location in previous months on events or games occurring in the month, less money paid out during the month to patrons on winning wagers.

E. HANDLING OF CASH

1. Each gaming employee, gaming facility, or Tribe who receives currency (other than tips or gratuities) from a patron in the gaming area of the gaming facility will promptly place the currency in the locked box in the table, or on those games which do not have a locked box, in an appropriate place on the table, in the cash register, in a change wallet, or other approved repository.

F. ACCEPTANCE OF GRATUITIES FROM PATRONS

1. No tribal gaming operation employee with work duties directly related to gaming management, accounting and surveillance will solicit or accept any tip or gratuity from any player or patron.
2. The tribal gaming operation agrees to establish a procedure consistent with state or federal laws for accounting for all tips received by other gaming employees.

3. Upon receipt from a patron of a tip, a croupier or dealer assigned to a gaming station will tap the table or wheel indicating to surveillance that he has received a tip and immediately deposit such tip in the tip box.

G. UNCLAIMED JACKPOTS

1. The tribal gaming operation will have procedures and controls that describe how the gaming operation will handle unclaimed jackpots.

H. MINIMUM BANKROLL REQUIREMENTS

1. Each gaming facility agrees to maintain, in such manner and amount as the Tribe may approve or require, cash or cash equivalents in an amount sufficient to reasonably protect the gaming facility's patrons against defaults in gaming debts owed by the gaming facility. The Tribe agrees to distribute to the gaming facility a formula approved by the Tribe by which a gaming facility determines the minimum bankroll requirements of this section. If at any time the gaming facility's available cash or cash equivalents should be less than the amount required by this section, the gaming facility will immediately notify the Tribe of this deficiency. Failure to maintain the minimum bankroll required by this section, or a higher bankroll as required by the Tribe pursuant to this section, or failure to notify the Tribe of any deficiencies, is not a generally accepted method of operation.

I. FORMS, RECORDS, DOCUMENTS AND RETENTION

1. All information required by these standards are to be placed on a form, record or document in ink or stored data or other permanent form.
2. Whenever duplicate or triplicate copies are required of a form, record or document:
 - a. The original, duplicate and triplicate copies will be color-coded.
 - b. If under these standards, forms, records, and documents are required to be inserted in a locked dispenser, the last copy will remain in a continuous unbroken form in the dispenser; and
 - c. If under these standards, forms or serial numbers of forms are required to be accounted for or copies of forms are required to be compared for agreement and exceptions noted, such exceptions will be reported immediately in writing to the Tribal Gaming Commission for investigation.

3. Unless otherwise specified in these standards or exempted by the Tribal Gaming Commission, all forms, records, documents and stored data required to be prepared, maintained and controlled by these standards will:
 - a. Have the title of the form, record, document or stored data imprinted or pre-printed thereon or therein;
 - b. Be located on Tribal Lands or such other location as is approved by the Tribal Gaming Commission; and
 - c. Be retained for a period of at least two (2) years in a manner that assures accessibility to members of the Tribal Gaming Commission and personnel of the Oregon State Police within 24 hours of a written request.

J. PERIODIC PAYMENTS

1. Periodic payment of winnings awarded to a patron will be made if the method of funding for the periodic payment assures such payments to the winning patron. Payment terms shall be conspicuously posted within the gaming facility.

**SECTION III
SURVEILLANCE DEPARTMENT STANDARDS**

A. CLOSED CIRCUIT TELEVISION SYSTEM

1. The tribal gaming operation will install a closed circuit television system according to the following specifications.
2. The closed circuit television system will include, but need not be limited to the following:
 - a. A matrix-type switching system with the capabilities of pan-tilt-zoom and fixed camera position with the capacity to bring up any camera throughout the gaming facility to a designated monitor to effectively and clandestinely monitor in detail and from various vantage points, the following:
 - I. The gaming conducted at each table gaming station in the gaming facility and the activities in the gaming facility pits. The surveillance system equipment will be able to identify each player, the dealers or croupier, and be of sufficient resolution and clarity to read individual cards, game table layout symbols or numbers and money and chip denominations.

- ii. The operations conducted at and in the cashier's cage;
 - iii. All count processes conducted in the count rooms in conformity with these standards.
 - iv. The movement of cash, gaming chips, drop boxes, and bill validator boxes in the establishment;
 - v. The entrances and exits to the gaming facility, unless continuously alarmed, and the count rooms;
 - vi. Secured storage areas for playing cards, chips, tokens, EPROMS and sensitive paper stock or other controlled item;
 - vii. Progressive video lottery terminals.
 - viii. As further designated in these standards to assure game integrity; and
 - ix. Such other areas as the Tribal Gaming Commission designates.
- b. Video units with time and date insertion capabilities for taping what is being viewed by any camera of the system;
 - c. Audio capability in the count rooms; and
 - d. One or more monitoring rooms in the establishment which will be in use at all times by the employees of the surveillance department assigned to monitor the activities in the gaming facility and which may be used as necessary by the members of the Tribal Gaming Commission and accessed by members of the Oregon State Police.
3. Adequate lighting will be present in all areas, including table gaming stations and pits, where closed circuit camera coverage is required.
 4. The tribal gaming operation will be required to maintain a surveillance log of all surveillance activities in the monitor room. The log will be maintained by monitor room personnel and include, at a minimum, the following:
 - a. Date and time of surveillance;
 - b. Person initiating surveillance;
 - c. Reason for surveillance;
 - d. Time of termination of surveillance;
 - e. Summary of the results of the surveillance; and
 - f. A record of any equipment or camera malfunctions.
 5. The surveillance log will be available for inspection at any time by members of the Tribal Gaming Commission and members of the Oregon State Police.

6. Video or audio tapes of sensitive areas and areas accessible to the public will be retained for at least seven (7) days and at least thirty (30) days in the case of tapes of evidentiary value, or for such longer period as the Tribal Gaming Commission may require. In the case of video or audio tapes associated with a criminal investigation or prosecution, the tapes will be retained until the criminal case or prosecution has been concluded.
7. Entrances to the closed circuit television monitoring rooms will not be visible from the gaming ~~facility~~ area.
8. The surveillance room is to be staffed **to allow coverage during** ~~for all shifts and~~ activities in the gaming facility.
9. Changing of surveillance tapes will be performed by personnel not involved in the handling of cash or cash equivalents.
10. The surveillance room will remain locked and access will be limited to authorized personnel as defined by the Tribal Gaming Commission.
11. The primary surveillance room and monitors will have override capabilities.
12. A minimum of one PTZ camera in the count rooms, and all house chip fill cage stations.
13. All fixed cameras for Class III gaming related areas as specifically identified in the MICS will be continuously taped. All PTZ cameras will have the capability for taping of what is being monitored.
14. The Tribal gaming operation will establish communications systems on the gaming floor that are capable of immediately alerting surveillance personnel.
15. Telephones on the gaming floor will have the capability of a direct line or extension to the surveillance department.
16. Surveillance personnel in the surveillance room will have radio communication with security personnel if security officers have radio communication with each other.
17. Gaming operations procedures will include a means of alerting surveillance personnel of money transfers prior to the transfer taking place and a means to advise surveillance of the locations, gaming device/table number, time, date, and amount of transfers, and to whom the transfers will be made.

B. GAMING FACILITY PERIMETERS

1. Internal - All entrances and exits to the gaming facility, unless continuously alarmed, will be monitored by fixed cameras. These fixed cameras do not have the requirement to be continuously ~~tapes~~ **recorded**.
2. External - Cameras and/or security in the parking lot will be positioned to enable coverage of the entire gaming facility.

C. ELEVATORS

1. The interior of elevators used in the transport of cash or cash equivalents and personnel at the same time will be monitored by a fixed camera.

D. VAULT

1. Each vault will have a fixed overhead camera on each work station.
2. Two fixed cross views will be used covering the vault, preventing blind spots.
3. Each vault will have a minimum of at least one pan-tilt-zoom camera.

**SECTION IV
CAGE STANDARDS**

A. CASHIER'S CAGE

1. As part of the gaming operation there will be on, or immediately adjacent to, the gaming floor a physical structure known as the cashier's cage to house the cashiers and to serve as the central location for the following:
 - a. The custody of the cage inventory comprising currency, coin, patron checks, gaming chips, forms, documents and records normally associated with the operation of a cage;
 - b. The receipt, distribution, and redemption of gaming chips in conformity with these standards; and
 - c. Such other functions normally associated with the operation of a cage.

2. The cage will be designed and constructed to provide maximum security including, at a minimum, the following:
 - a. A fully enclosed structure except for openings through which items such as gaming chips, cash, records, and documents can be passed to service the public and gaming stations;
 - b. Manually triggered silent alarm systems that are immediately available to each cashier's cage work station and that are connected directly to the surveillance or security department office;
 - c. Access will be through a locked door.
 - d. Closed circuit television coverage, which will be monitored by the gaming facility surveillance department.
3. The tribal gaming operation will place on file with the Tribal Gaming Commission the names of all persons authorized to enter the cage, those who possess the combination or the keys or who control the mechanism to open the locks securing the entrance to the cage, and those who possess the ability to operate the alarm systems.

B. ACCOUNTING CONTROLS WITHIN THE CASHIER'S CAGE

1. The assets for which the cashiers are responsible will be maintained on an imprest basis. At the end of each shift, the cashiers assigned to the outgoing shift, will record on a cashier's count sheet the face value of each cage inventory item counted and the total of the opening and closing cage inventories and will reconcile the total closing inventory with the total opening inventory.
 - a. Cashier or Vault functions will be, but are not limited to the following:
 - i. Receive cash and gaming chips from patrons;
 - ii. Receive Slot cash slips from patrons in exchange for cash;
 - iii. Effectively cancel the Slot cash slips to prevent the possibility of future improper payment;
 - iv. Receive gaming chips from patrons in exchange for cash;
 - v. Receive documentation with signatures thereon, required to be prepared for the effective segregation of functions in the cashier's cage; and
 - vi. Receive from security department members, chips removed from gaming stations in exchange for the issuance of a credit;
 - vii. Receive from security department members, requests for fills in exchange for the issuance of a fill and the disbursement of gaming chips;
 - viii. Receive cash from the coin and currency count rooms;
 - ix. Prepare the overall cage reconciliation and accounting records; and

- x. Perform such other functions as necessary to ensure proper accountability consistent with these standards.
2. The Cage and Vault inventories will be counted by at least two persons evidenced by their signatures on the cage accountability/ checkout form.
3. At the conclusion of gaming activity each day, at a minimum, copies of the cashier's count sheet, recapitulation, fill, main, and related documentation, will be forwarded to the accounting department for agreement of opening and closing inventories, and agreement of amounts thereon to other forms, records and documentation required by these standards or for the recording of transactions.

C. TITLE 31 ANTI-MONEY LAUNDERING/CASH TRANSACTION REPORTING

1. The tribal gaming operation will comply with all applicable laws regarding anti-money laundering and cash transaction reporting.

D. SURVEILLANCE STANDARDS - CAGE

1. The following surveillance standards apply to the cashier cage:
 - a. Each cashier station will be equipped with one fixed camera covering the transaction area. Coverage will allow identification of cash transactions at each cash drawer;
 - b. Each cage area will have at a minimum one pan-tilt-zoom camera, which will be used as an overview for cash transactions. This overview should include the customer, the employee and the surrounding area;
 - c. Non-customer areas of the cage will have two fixed stationary cross views preventing any blind spots and at least one pan-tilt-zoom;
 - d. All stationary banks used by change runners on the gaming floor will be covered by a fixed overview camera, covering the bank and general area; and
 - e. One fixed color camera over fill window.

SECTION V COUNT ROOM STANDARDS

A. COUNT ROOM: CHARACTERISTICS

1. As part of the gaming operation, there will be a room(s) specifically designated for counting the contents of drop boxes/buckets, which will be known as the count room(s). The following standards apply to both hard and soft count rooms.
2. The count room will be designed and constructed to provide maximum security for the materials housed therein and for the activities conducted therein, to include at a minimum, the following:
 - a. A door equipped with locking device(s) securing the interior of the count room.
 - b. Surveillance will be notified prior to any person entering the count room during non-count times.
 - c. The count room will be hardwired and supported by an UPS system. An emergency lighting system that is battery powered should be in place as a back up to the UPS system.
 - d. The count room will be painted in a light single color that contrasts with the color of currency.
 - e. The floor of the count room will be constructed of a material adhered to the base floor of a color contrasting currency.
 - f. If a bathroom is part of the count room, it will be limited to a toilet, sink, bar soap, toilet paper and an electric hand dryer. If wastebaskets are needed, they will be clear. A member of the security department and the count room supervisor will search bathrooms for contraband or currency at the end of each count.
 - g. A table constructed of clear glass or similar material for the emptying, counting and recording of the contents of the drop boxes, which will be known as the "Count Table";
3. Music, which would interfere with audio recording, is not allowed in the count rooms.

B. SURVEILLANCE STANDARDS - COUNT ROOM

1. Closed circuit television cameras and microphones wired to monitoring rooms capable of, but not limited to the following:
 - a. Effective and detailed audio-video monitoring of the entire count process;
 - b. Effective detailed video monitoring of the count room, including storage cabinets or cart/trolleys used to store drop boxes;
 - c. Audio-video taping of the entire count process and any other activities in the count room.
 - d. Each count room will have two fixed cross views preventing blind spots.
 - e. Each count room will have an overhead fixed camera for all workstations.
 - f. Each count room will have one color pan-tilt-zoom camera.

SECTION VI

TABLE GAME STANDARDS

A. DROP BOXES

1. Each gaming station in a gaming facility will have attached to it a metal container known as a "Drop Box", in which will be deposited all cash, fills and credits, requests for fills and credits, and station inventory forms.
2. Each drop box will have:
 - a. One separate lock securing the contents placed into the drop box, the key to which will be different from any other key;
 - b. A separate lock securing the drop box to the gaming stations, the key to which will be different from the key to the lock securing the contents of the drop box;
 - c. An opening through which currency, coins, forms, records and documents can be inserted into the drop box;
 - d. Permanently imprinted or impressed thereon, and clearly visible a number corresponding to a permanent number on the gaming station to which it is attached, and a marking to indicate game and shift, except that emergency

drop boxes may be maintained without such number or marking, provided the word "emergency" is permanently imprinted or impressed thereon and, when put into use, are temporarily marked with the number of the gaming station and identification of the game and shift.

3. The key utilized to unlock the drop boxes from the gaming stations will be maintained and controlled by a department independent of the table games department. Persons authorized to drop the table game drop boxes are precluded from having access to drop box contents keys. Only persons authorized to remove drop boxes from the table games are allowed access to the release keys. However, the count team members may have access to the release keys during the count in order to reset the drop boxes.
4. The key to the lock securing the contents of the drop boxes will be maintained and controlled by a department independent of the table games department. Only authorized count team members are allowed access to drop box contents keys and only during the soft count process.
5. The physical custody of the keys needed to access stored full drop box contents requires involvement of persons from two separate departments.
6. Access to the drop box content keys at other than scheduled count times shall require the involvement of at least three persons from separate departments, including management, and the reason for access shall be documented with signatures of all participants and observers.
7. A person independent of the table games department is required to accompany drop box storage rack keys and observe each time drop boxes are removed from or placed in storage racks. Persons authorized to obtain drop box storage rack keys are precluded having access to drop box contents keys (with the exception of the count room team.)
8. All duplicate keys will be maintained in a manner, which provides the same degree of control over drop boxes as is required for the original keys.
9. The involvement of at least two persons independent of the cage department is required to access stored empty drop boxes.
10. At least three count team members are required to be present at the time count room and other soft count keys are issued for the soft count.
11. Logs will be maintained to document authorization of personnel accessing keys.

B. DROP BOXES, TRANSPORTATION TO AND FROM GAMING STATIONS AND STORAGE IN THE COUNT ROOM

1. At the end of each shift, all locked drop boxes shall be removed from the gaming tables by an individual independent of the pit shift being dropped.
2. A separate lock box shall be placed on each table each shift or a gaming operation may utilize a single drop box with separate openings and compartments for each shift.
3. All drop boxes removed from the gaming stations will be transported, at a minimum, by ~~three~~ **two** persons, ~~two~~ **one** of which must be a security department member or Gaming Commission directly to, and secured in, the count room. Only one gaming station at a time will be subject to drop. **The setting out of empty drop boxes and the drop shall be a continuous process.** This procedure does not apply to emergency drops of two boxes or less.
4. A security department member will remain with the trolley/drop cart and receive full drop boxes and dispense empty boxes.
5. Security will advise surveillance upon the start of the drop, when the drop cart/trolley is moved, and when the cart is secured in the soft count room.
6. All drop boxes, not attached to a gaming station, will be stored in the count room in an enclosed storage cabinet or trolley and secured in such cabinet or trolley.
7. The drop cart/trolley will be secured after being emptied and upon being filled by a keyed locking system.
8. Gaming Tables, when not in use during a shift may store attached drop boxes on the gaming stations provided that there is adequate security. If adequate security is not provided during this time, the drop boxes will be stored in the count room in an enclosed storage cabinet or trolley as required in paragraph 6.
9. The entire drop process will be monitored and taped by the surveillance department. Drop tapes will be held for at least seven days. If an unusual incident occurs during the drop the tape will be placed in evidence until a full review of the incident is concluded.
10. If an emergency occurs during the drop process, the drop box will be returned to the soft count room and secured.
11. Drop and count team authorized persons ~~shall~~ **may** maintain separate duties, **or in the event any drop and count team personnel are the same, the drop box content keys and the keys securing drop boxes to gaming devices must be signed in before any count keys are signed out.**

C. STANDARDS FOR COUNTING AND RECORDING CONTENTS OF DROP BOXES

1. The contents of drop boxes will be counted and recorded in the count room in conformity with this standard.
2. The tribal gaming operation will notify the Tribal Gaming Commission whenever the contents of drop boxes removed from gaming stations are to be counted and recorded, which, at a minimum, will be **at least once every third** each gaming day. The gaming operation may satisfy this standard by providing the Gaming Commission with a schedule in advance of drop/count times. Any variance of the scheduled times requires notification of the Tribal Gaming Commission.
3. The opening, counting and recording of the contents of drop boxes will be performed by three or more employees assigned by the tribal gaming operation for the conduct of the count ("Count Team") who have ~~incompatible~~ functions **dissimilar from the drop team, except as provided in Section VI(B)(11)**. The Count Team will be rotated so that the count team members are not the same for more than seven (7) consecutive days.
4. Immediately prior to the opening of the drop boxes, the doors to the count room will be securely locked.
5. At no time, other than in an emergency, will a soft count team member be replaced by a new member after the count has commenced.
6. Except in an emergency, those persons allowed to enter or leave the count room during the count process will not do so until unverified cash is counted and recorded.
7. Members of the Tribal Gaming Commission will be allowed immediate access to the count room during the count process. The Tribal Gaming Section will not be denied access in an emergency situation during the count process.
8. Immediately prior to the commencement of the count, one count team member will notify surveillance that the count is about to begin. Surveillance will make an audio-video recording, with the time and date inserted thereon, of the entire counting process which will be retained by the surveillance department for at least seven days from the date of recording unless otherwise directed by the Tribal Gaming Commission.
9. Minimum procedures and requirements for conducting the count will be the following:
 - a. As each drop box is placed on the count table, one count team member will announce, in a tone of voice to be heard by all persons present and to be

recorded by the audio recording device, the game, station number, and shift marked thereon;

- b. The contents of each drop box will be emptied and counted separately on the count table, which procedures will be at all times conducted in full view of the closed circuit television cameras located in the count room. This subparagraph not applicable to an automatic count system.
- c. Immediately after the contents of a drop box are emptied onto the count table, the inside of the drop box will be held up to the full view of a closed circuit television camera for at least two seconds, and will be shown to at least one other count team member to confirm that all contents of the drop box have been removed, after which the drop box will be locked and placed in the storage area for drop boxes;
- d. The drop boxes shall be individually emptied and counted in such a manner to prevent the commingling of funds with other drop boxes until the count has been recorded.
- e. As the contents of each drop box is counted, one count team member will record in ink or verify on a master game report, by game, station number, and shift, the following information:
 - i. The total amount of currency counted;
 - ii. The amount of the opener;
 - iii. The amount of the closer;
 - iv. The serial number and amount of each fill;
 - v. The total amount of all fills;
 - vi. The serial number and amount of each credit;
 - vii. The total amount of all credits; and
 - viii. The win or loss.
- f. Corrections to information originally recorded by the count team on the master game report or other documentation will be made by crossing out the error, entering the correct information and then obtaining the initials of two other count team members who verify the change. Crossing out errors will be made in ink and be done with one line in a manner that leaves the crossed out portion visible. Initials will be placed in a manner not to interfere with the legibility of the document.
- g. After the contents of each drop box have been counted and recorded, one member of the count team will record by game and shift, on the master game report, the total amounts of currency, station inventory slips, fills and credits counted, and win or loss, together with such additional information as may be required on the master game report by the tribal gaming operations. Any unreconciled discrepancies of \$100 or more will be immediately brought to

the attention of the Controller and a report generated to the Tribal Gaming Commission. The surveillance tape of the count will be secured by surveillance and stored in evidence until the discrepancy is corrected.

- h. Notwithstanding the requirements of sub-paragraphs (e) and (g), if the tribal gaming operation's system of accounting and internal controls provides for the recording on the master game report of fills, credits, and station inventory slips by cage cashiers prior to the commencement of the count, a count team member will compare for agreement the serial numbers and totals of the amounts recorded thereon to the fills, credits, and station inventory slips removed from the drop boxes;
 - i. Notwithstanding the requirements of sub-paragraphs (e) and (g), if the tribal gaming operation's system of accounting and internal controls provides for the count team functions to be comprised only of counting and recording currency and credits' accounting department employees will perform all other counting, recording and comparing duties herein;
 - j. After completion and verification of the master game report, each count team member will sign the report attesting to the accuracy of the information recorded thereon;
10. Minimum procedures and requirements at the conclusion of the count for each gaming shift will be the following:
- a. All cash removed from each drop box after the initial count will be presented in the count room by a count team member to a cashier who, prior to having access to the information recorded on the master game report and in the presence of the count team, will count in detail all loose currency and bulk count all strapped bundles of currency, after which the cashier will sign the report evidencing the fact that both the cashier and count team have agreed on the total amount of cash counted. If an unreconciled variance of \$100 or more is found, surveillance will be notified and a count team member and cashier independent of the first cashier and count team will recount the currency. If there is still a variance, a member of the gaming commission will be notified.
 - b. The original copy of the master game report, after signing, and the requests for fills, the fills, the requests for credits, the credits, and the station inventory slips removed from drop boxes will be transported directly to the accounting department and will not be available to any cashier's cage personnel;
 - c. If the tribal gaming operation's system of accounting and internal controls does not provide for the forwarding from the cashier's cage of the duplicate of the fills, credits, request for credits, request for fills, such documents recorded

or to be recorded on the master game report will be transported from the count room directly to the accounting department.

11. The originals and copies of the master game report, request for fills, fills, request for credits, credits and station inventory slips will on a daily basis, in the accounting department be:
 - a. Compared for agreement with each other, on a test basis, by persons with no recording responsibilities and, if applicable, to triplicates or stored data;
 - b. Reviewed for the appropriate number and property of signatures on a test basis;
 - c. Accounted for by series number, if applicable;
 - d. Tested for proper calculation, summarization, and recording;
 - e. Subsequently recorded; and
 - f. Maintained and controlled by the accounting department.
12. No personal items are allowed into the count rooms.
13. While the soft count is in process, all personnel in the Soft Count room will wear pocketless coveralls. The coveralls will have loosely fitted sleeves and pant legs with no cuffs or collars and they will zip in the front. The zipper will be maintained fully closed at the top.
14. All trash in the count room will be placed in a transparent bag for disposal. The material will be removed at the end of the count and received by a member of the security department for disposal.

D. STANDARDS FOR ACCEPTING CASH AT TABLE GAMING STATIONS

1. The cash will be spread on the top of the table gaming station, with each bill separated from each other, by the croupier or dealer, accepting it in full view of the patron who presented it and the facility supervisor specifically assigned to such gaming station.
2. The amount of cash, if \$100 or over, will be announced by the croupier or dealer accepting it in a tone of voice calculated to be heard by the patron who presented the cash and the facility supervisor specifically assigned to such gaming station.

3. Immediately after an equivalent amount of gaming chips has been given to the patron, the cash will be taken from the top of the gaming station and placed by the croupier or dealer into the drop box attached to the gaming station. After completion of the transaction, the dealer or croupier will clear their hands.

E. STATION INVENTORIES AND STANDARDS FOR OPENING STATIONS FOR GAMING

1. Whenever a gaming station is opened for gaming, operations will commence with an amount of gaming chips to be known as the "Station Inventory" and the tribal gaming operation will not cause or permit gaming chips to be added to or removed from such station inventory during the gaming day except:
 - a. In exchange for cash;
 - b. In payment of winning wagers and collections of losing wagers made at such gaming station;
 - c. In exchange for gaming chips received from a patron having an equal aggregate face value; and
 - d. In conformity with the fill and credit procedures described in these standards.
2. Each station inventory and the station inventory slip prepared in conformity with the procedures set forth in these standards will be stored during non-gaming hours in a separate locked, clear container which will be clearly marked on the outside with the game and the gaming station number to which it corresponds. The information on the station inventory slip will be visible from the outside of the container. All containers will be stored either in the cashier's cage during non-gaming hours or secured to the gaming station subject to arrangements for security approved by the Tribal Gaming Commission. If transferred to the cage, it will be done through a transfer accountability process.
3. The keys to the locked containers containing the station inventories will be maintained in a lock box that requires sign-in and sign-out by the pit supervisor. At no time will the station inventory container keys be accessible to any cashier's cage personnel or to any person responsible for transporting such station inventories to or from the gaming stations.
4. Whenever gaming stations are to be opened for gaming activity, the locked container securing the station inventory and the station inventory slip will be unlocked by the pit supervisor assigned to such station.

5. A croupier or dealer assigned to the gaming station will count the contents of the container in the presence of the pit supervisor assigned to such station and will agree the count to the opener removed from the container.
6. Signatures attesting to the accuracy of the information on the opener will be placed on such opener by the croupier or dealer assigned to the station and the pit supervisor that observed the croupier or dealer count the contents of the container.
7. Any discrepancy between the amount of gaming chips counted and the amount of the gaming chips recorded on the opener, will be immediately reported to the pit manager, assistant pit manager, or gaming facility shift manager in charge at such time, the security department and the Tribal Gaming Commission. Security will complete a security report in writing and immediately forward a copy to the Tribal Gaming Commission.
8. After the count of the contents of the container and the signing of the opener, such slip will be immediately deposited in the drop box attached to the gaming station by the croupier or dealer after the opening of such station.

F. STANDARDS FOR DISTRIBUTING GAMING CHIPS AND COINS TO GAMING STATIONS

1. A request for fill ("Request") will be prepared by a pit supervisor to authorize the preparation of a fill slip ("Fill") for the distribution of gaming chips to gaming stations. The request will be prepared in a duplicate form and restricted to pit supervisors.
2. On the original and duplicate of the request, the following information, at a minimum, will be recorded:
 - a. The date, time and shift of preparation;
 - b. The denomination of gaming chips or coins to be distributed to the gaming stations;
 - c. The total amount of each denomination of gaming chips or coins to be distributed to the gaming stations;
 - d. The game and station number to which the gaming chips or coins are to be distributed;
 - e. The signature of the pit supervisor; and
 - f. The signature of the security department member.

3. After preparations of the request, one part of such request will be transported directly to the cashier's cage.
4. One part of the request will be placed by the croupier or dealer in public view on the gaming station to which the gaming chips are to be received. Such duplicate copy will not be removed until the chips are received, at which time the request and fill are deposited in the drop box.
5. A fill will be prepared by a cashier whenever gaming chips are distributed to the gaming stations from the cashier's cage.
6. Fills will be serially pre-numbered forms, and each series of fills will be used in sequential order, and the series of numbers of all fills received by a gaming facility will be separately accounted. All the originals and duplicates of void fills will be marked "VOID" and will require the signature of the preparer.
7. The following procedures and requirements will be observed with regard to fills:
 - a. Each series of fills will be in triplicate form to be kept in a locked dispenser that will permit an individual slip in the series and its copies to be written upon simultaneously while still located in the dispenser, and that will discharge the original and duplicate while the triplicate remains in a continuous, unbroken form in the dispenser;
 - b. Access to the triplicate copy of the form will be maintained and controlled at all times by employees responsible for controlling and accounting for the unused supply of fills, placing fills in the dispensers and removing from the dispensers.
8. On the original, duplicate and triplicate copies of the fill, the preparer will record, at a minimum, the following information:
 - a. The denomination of the gaming chips being distributed;
 - b. The total amount of the gaming chips being distributed;
 - c. The total amount of all denominations of gaming chips being distributed;
 - d. The game and station number to which the gaming chips are being distributed;
 - e. The date and shift during which the distribution of gaming chips occur; and
 - f. The signature of the preparer.

9. Upon preparation, the time of preparation of the fill will be recorded, at a minimum, on the original and the duplicate.
10. All gaming chips distributed to the gaming stations from the cashier's cage will be transported directly to the gaming stations from the cashier's cage by a security department member who will agree the request to the fill and sign the original of the fill, maintained at the cashier's cage, before transporting the gaming chips and the original of the fill for signature.
11. The surveillance department will be notified when there is a fill so that they can monitor the transaction.
12. The container used to move the chips will be made of a clear material to include the rack that contains the actual chips.
13. Signatures attesting to the accuracy of the information contained on the original of the fills will be, at a minimum, of the following personnel at the following times:
 - a. The cashier upon preparation;
 - b. The security department member transporting the gaming chips to the gaming station upon receipt from the cashier of gaming chips to be transported;
 - c. The croupier or dealer assigned to the gaming station upon receipt;
 - d. The pit supervisor assigned to the gaming station, upon receipt of the gaming chips at such station.
14. Upon meeting the signature requirements as described in paragraph (14), the security department member that transported the gaming chips and the original copy of the fill to the station, will observe the immediate placement by the croupier or dealer of the fill and request in the drop box attached to the gaming station to which the gaming chips were transported.
15. The original and duplicate "VOID" fills, the original request and the duplicate fill will be maintained and controlled and forwarded to:
 - a. The count team for agreement with the copy of the fill and copy of the request removed from the drop box after which the original and duplicate copy of the request and the original duplicate copy of the fill will be forwarded to the accounting department for agreement, on a daily basis, with the triplicate; or
 - b. The accounting department on a daily basis for reconciliation and comparison of all copies of the fill/ credit slip and the request for fill/ credit.

G. STANDARDS FOR REMOVING GAMING CHIPS AND COINS FROM GAMING STATIONS

1. A request for credit ("Request") will be prepared by a pit supervisor to authorize the preparation of a credit ("Credit") for the removal of gaming chips to the cashier's cage. The request will be in duplicate form and access to such form will, prior to use, be restricted to gaming facility supervisors.
2. The surveillance department will be notified when there is a credit and observe the transaction.
3. On the original and the duplicate copy of the request the following information, at a minimum, will be recorded:
 - a. The date, time and shift of preparation;
 - b. The denomination of gaming chips to be removed from the gaming station;
 - c. The total amount of each denomination of gaming chips to be removed from the gaming station;
 - d. The game and station number from which the gaming chips are to be removed; and
 - e. The signature of the pit supervisor and croupier or dealer assigned to the gaming station from which gaming chips are to be removed.
4. Immediately upon preparation of a request and transfer of gaming chips to a security department member, a pit supervisor will obtain on the original and duplicate copy of the request, the signature of the security department member to whom the gaming chips were transferred and the croupier or dealer will place one part of the request in public view on the gaming station from which the gaming chips are to be removed, and such request will not be removed until a credit is received from the fill bank at which time the request and credit are deposited in the drop box.
5. One part of the request will be transported directly to the cashier's cage by the security department member who will transport the gaming chips removed from the gaming station.
6. A credit will be prepared by a fill bank cashier whenever gaming chips are removed from the gaming stations to the cashier's cage.
7. Credits will be serially pre-numbered forms, each series of credits will be used in sequential order, and the series number of all credits received by a gaming facility will be separately accounted for.

8. The following procedures and requirements will be observed with regard to credits:
 - a. Each series of credits will be a three-part form and will be inserted in a locked dispenser that will permit an individual slip in the series and its copies to be written upon simultaneously while still locked in the dispenser, and that will discharge the original and duplicate while the triplicate remains in a continuous, unbroken form in the dispenser; and
 - b. Access to the triplicate will be maintained and controlled at all times by employees responsible for controlling and accounting for the unused supply of credits, placing credits in the dispensers, and removing from the dispensers.
9. On the original, duplicate and triplicate copies of a credit, the preparer will record, at a minimum, the following information:
 - a. The denomination of the gaming chips removed from the gaming station to the cashier's cage;
 - b. The total amount of each denomination of gaming chips removed from the gaming station to the cashier's cage;
 - c. The total amount of all denominations of gaming chips removed from the gaming station to the cashier's cage;
 - d. The game and station number from which the gaming chips were removed;
 - e. The date and shift during which the removal of gaming chips occurs; and
 - f. The signature of the preparer.
10. Upon preparation, the time of preparation of the credit will be recorded, at a minimum, on the original and duplicate copy.
11. Signatures attesting to the accuracy of the information contained on the duplicate copy of a credit will be, at a minimum, the following personnel at the following times:
 - a. The fill bank cashier upon preparation;
 - b. The security department member transporting the gaming chips to the cashier's cage;
 - c. The croupier or dealer assigned to the gaming station upon receipt at such station from the security department member; and

- d. The gaming facility supervisor assigned to the gaming station upon receipt at such station.
12. Upon meeting the signature requirements as described in paragraph (11), the security department member transporting one part of the credit to the gaming station, will observe the immediate placement by the croupier or dealer of the credit and the request in the drop box attached to the gaming station from which the gaming chips are removed. One part of the credit and request will be maintained together, and controlled by employees independent of the table game department.
 13. The original and duplicate copy of "VOID" credits and the original request and duplicate request for credit, maintained and controlled in conformity with paragraph (12) will be forwarded to:
 - a. The count team for agreement with the original credit and the duplicate request removed from the drop box, after which the original and duplicate request and the original and duplicate credit will be forwarded to the accounting department for agreement, on a daily basis, with the triplicate; or
 - b. The accounting department for agreement, on a daily basis, with the duplicate copies of the credit and request removed from the drop box and the triplicate.

H. STANDARDS FOR SHIFT CHANGES AT GAMING STATIONS

1. Whenever gaming stations are to remain open for gaming activity at the conclusion of a shift, the gaming chips remaining at the gaming stations at the time of the shift change will be counted by the pit supervisor assigned to the outgoing shift, and the pit supervisor assigned to the incoming shift. Prior to leaving the table, dealers and croupier will clear their hands.
2. The gaming chips counted will be recorded on the station inventory slip by the pit supervisor assigned to the gaming station of the outgoing shift or the pit supervisor assigned to the gaming station at the time of the drop box shift change.
3. Station inventory slips will be three-part serially pre-numbered forms and on the original of the slip ("Closer"), the duplicate of the slip ("Opener"), and on the triplicate, which is maintained and controlled by the pit supervisor will record the following:
 - a. The date and identification of the shift ended;
 - b. The game and station number; and

- c. The total value of each denomination of gaming chips remaining at the station.
4. Signatures attesting to the accuracy of the information recorded on the station inventory slips will be of the pit supervisors assigned to the incoming and outgoing shifts.
5. Upon meeting the signature requirements as described in paragraph (4), the closer will be deposited in the drop box that is attached to the gaming station immediately prior to the change of shift at which time the drop boxes will then be removed and the opener will be deposited in the replacement drop box that is to be attached to the same gaming station immediately following the drop. The triplicate will be forwarded to the accounting department. If a shift compartment type box is used, that shift slot will be closed after dropping the closer and the next slot will be opened and the opener slip will be inserted.

I. STANDARDS FOR CLOSING GAMING STATIONS

1. Whenever the daily gaming activity at each gaming station is concluded, the gaming chips on the gaming station will be counted by the croupier or dealer and observed by a pit *supervisor* assigned to the gaming station. The closing table game inventory will be recorded or the station float will be brought back to the imprest value if required.
2. If the bank is to remain on the table, the inventory will be documented by denomination and totaled and signed by the dealer and the pit supervisor. This slip will be placed under the securing lid in a place that can be easily read through the glass. If the table inventory is to be stored elsewhere, the following procedures outlined under paragraphs 3-10 of this section apply:
3. The gaming chips counted will be recorded on a station inventory slip by the pit supervisor assigned to the gaming station.
4. Station inventory slips will be forms (closer, opener and triplicate) which are maintained and controlled by the pit supervisor who will record the following:
 - a. The date and identification of the shift ended;
 - b. The game and station number;
 - c. The total value of each denomination of gaming chips remaining at the stations; and
 - d. The total value of all denominations of gaming chips remaining at the gaming stations.

5. Signatures attesting to the accuracy of the information recorded on the station inventory slips at the time of closing the gaming stations will be of the croupier or dealer and the pit supervisor assigned to the gaming station that observed the croupier or count the contents of the station inventory.
6. Upon meeting the signature requirements specified in paragraph (4), the closer will be deposited in a drop box attached to the gaming station immediately prior to the closing of the station.
7. The triplicate copy of the station inventory slip will be forwarded to the accounting department.
8. Upon meeting the signature requirements specified in paragraph (4), the opener and the gaming chips remaining at the station will be placed in the clear container provided for that purpose as specified in these standards after which the container will be locked.
9. At the end of each gaming day, if the locked containers are transported to the cashier's cage, a cage cashier will determine that all locked containers have been returned or, if the locked containers are secured to the gaming station, a pit supervisor will account for all the locked containers.
10. The station inventory may also be removed from the table by a credit to the cage (see credit procedures).

J. TABLE GAMES COMPUTERIZED STANDARDS *The following standards shall apply for gaming operations that employ a computer system for table games:*

1. The computer system shall be capable of generating adequate documentation of all information recorded on the source documents and transaction details.
2. This documentation shall be restricted to authorized personnel and shall include at a minimum;
 - a. System exception information;
 - b. Personnel access listing including employee name, identification number, and listing of functions employee can perform.
3. For any authorized computer application utilized, alternate documentation and/or procedures which provide at least the level of control described by the standards in this section will be acceptable.

K. STATISTICS

1. Records reflecting hold percentage by table and type of game shall be maintained by shift, by day, cumulative month-to-date, and cumulative year-to-date.
2. This information shall be presented to and reviewed by management independent of the pit department on at least a monthly basis.
3. The independent management shall investigate any unusual fluctuations in hold percentage with pit supervisory personnel. At a minimum, investigations are performed for all statistical percentage fluctuations from the base level for a month in variation of more than $\pm 3\%$.

L. MISCELLANEOUS

1. Playing cards, and dice, not yet issued to the pit, will be maintained in a secure location to prevent unauthorized access and prevent tampering. This area will be under constant monitoring by surveillance department personnel. The exit and entrance to this area will be viewed by one fixed camera. A sign-in and sign-out sheet will be filled out by individuals entering, except by Gaming Commission personnel. Surveillance will be notified when persons request entry into this area. At no time will a single individual be allowed to enter this area alone.
2. Used cards and dice will be maintained in a secure area until permanently marked, scored, drilled or destroyed to prevent unauthorized access and the possibility of tampering. This area will be under constant monitoring by surveillance department personnel. Used cards and dice will be permanently marked, scored, drilled or destroyed within seven (7) days of being taken out of service. This process will be viewed by surveillance unless performed by the Gaming Commission.
3. Playing cards used will have only one playing cycle and this will not be any longer than 24 hours. Any playing card that is marked, altered, flawed, scratched, nicked, crimped, or discolored in any way will be permanently removed from play.
4. Gaming chips will be maintained in a secure location to prevent unauthorized access. This area will be under constant monitoring by surveillance department personnel.
5. The destruction or defacing of chips will be witnessed by representatives of the management, security and accounting departments and the documentation thereof maintained for a period of three years.
6. The Tribal Gaming Commission will assure the gaming operation maintains an ongoing perpetual inventory of cards and dice that allows for the immediate verification of balances.

7. All Class III used cards must be accounted for prior to destruction. Any discrepancies will be immediately investigated and a report forwarded to the Tribal Gaming Commission.

M. SURVEILLANCE STANDARDS - TABLE GAMES

1. All table games will have sufficient camera placement to determine chip/token/card value, a clear view of the playing area and the ability to identify patrons, employees and gaming device/station number.
2. All Class III card games will have a minimum of one fixed camera over the gaming table and PTZ coverage that has the capability of the requirements listed in standard 1 above.
3. All craps tables will have two fixed cross view cameras covering both ends of the table and one dedicated PTZ per table.
4. All roulette areas will have one overhead fixed camera covering the roulette wheel and will also have one fixed camera overview of the play of the table. There will be PTZ coverage that has the capability of the requirements listed in standard 1 above.
5. All big wheel games will have one fixed camera viewing the wheel and PTZ camera coverage that has the capability of the requirements listed in standard 1 above.

**SECTION VII
VIDEO GAMING DEVICE STANDARDS**

A. GENERAL

3. The purpose of these Video Lottery Terminal (VLT) Standards is to set forth the procedure for VLT certification, VLT transportation into the State of Oregon as well as the hardware and software requirements of VLT's and other electronic games of chance. Each of these procedures are relevant to the manufacture and transport of VLT's before they get to a tribal gaming facility. While the primary focus of these MICS govern gaming operations within the gaming facility, the VLT standards set forth below have been included in these MICS to better inform the Tribes on the requirements VLT's must meet in order for them to be licensed and put into play at their Tribal gaming facility.

2. Access to keys, locked cabinets, and counting areas will be limited to those people specified in writing. A list of authorized persons will be kept at the lock box where the keys are maintained. Keys issued will be signed in and out at the end of an employee's shift and not transferred directly to the on coming designated key person.
3. The Drop Team will, at a minimum, consist of ~~three~~ **two** members, **accompanied by a** ~~At least one member will be~~ from the security department who will ~~provide security over~~ **accompany** the drop cart. All members of the drop team will be independent of the VLT slot department.
4. ~~Any money found in the gaming facility will be turned over to the security department and received into the vault area.~~ **The tribal gaming operation will have written procedures regarding the handling of found money.**
5. Any access to any video lottery terminal for any reason **other than the daily drop**, will be logged on a Machine Entry Authorization Log and returned to the inside of the machine prior to securing the door. This log and entry will include the date, time, reason for access, and the legible first initial and last name of the person gaining access. These logs will be securely maintained by the tribal gaming operation for a period of one (1) year.

B. AUTHORIZED VIDEO LOTTERY GAMES

1. Video lottery terminals may offer any video lottery game that satisfies the elements of prize, chance and consideration as described in Op. Atty. Gen. No. 6336, September 25, 1989.

C. CERTIFICATION OF A VIDEO LOTTERY TERMINAL

1. A manufacturer or its distributor will not distribute a video lottery game or terminal for placement in a Tribal Gaming Facility unless the manufacturer and the game have been approved and the terminal has been certified by the Tribal Gaming Commission and the Oregon State Police. Only approved manufacturers may apply for certification of a video lottery terminal.
2. The Oregon State Police and the Tribal Gaming Commission will agree on an independent laboratory to conduct certification testing of all equipment submitted for approval. Upon request the manufacturer will submit any technical data and any other information required for testing by the State's designated laboratory.
3. Hardware that does not meet the criteria of the Compact or these standards will not receive approval.

D. QUALIFICATIONS OF INDEPENDENT GAMING TEST LABORATORY

1. To meet the qualifications of a State designated independent gaming test laboratory the laboratory will be approved by the State. The approval will be determined through a background investigation to meet the suitability requirements outlined in the Compacts, and determination of the State's satisfaction of the qualifications of the laboratory to perform the requirements of testing as set forth in the Compact and its appendices, and to determine the level of independence from possible outside influences in its testing procedures. The expenses related to this investigation will be reimbursed to the State by the gaming test laboratory subjected to the investigation.

E. TRANSPORTATION OF VIDEO LOTTERY TERMINALS WITHIN, INTO OR THROUGH THE STATE

1. The Tribe and no other person will ship or transport video lottery terminals within or into the state of Oregon without first obtaining a written authorization or notification and approval from the Oregon State Police. Transporting or shipping within the State means the starting point and termination point of a trip are both within the boundaries of the State. Transportation or shipping into the State means the starting point is outside the State and terminates in the State.

2. The Tribe and no other person will ship or transport video lottery terminals through the State without first obtaining a written authorization from the nearest port of entry immediately upon arrival in the State.
3. The written authorization required above will include:
 - a. The serial number of each terminal being transported; and
 - b. The full name and address of the person, manufacturer, distributor or venue to whom the machines are being sent or transported and the dates of shipment or transport within, into or through the State.
4. The written authorization will accompany, at all times, the terminal or terminals in transport. A copy of this authorization will be forwarded to the Tribal Gaming Commission.
5. Once shipment has been received at a tribal gaming facility, in the event the terminals are sold or traded between compacted tribal gaming operations within the State, written notice is to be forwarded to the Oregon State Police not less than ten (10) days prior to the date written approval is requested for transportation. Verification that the machines are not altered and meet the Compact requirements are required either from a manufacturing representative or the Oregon State Police prior to the machines being placed into play at a different tribal gaming facility.

F. HARDWARE REQUIREMENTS FOR VIDEO LOTTERY TERMINALS

1. No Physical Hazard. Electrical and mechanical parts and design principles may not subject a player to any physical hazards.
2. Surge Protectors. A surge protector will be installed for all power that is fed to the device.
3. Battery Backup. A battery backup, or an equivalent, for the electronic meters will be capable of maintaining accurate reading for 180 days after power is discontinued from the device for all information regarding current and total tallies of amounts wagered and paid out, records of access to the logic board compartment, and records of access to the cash compartment. The backup device will be located within the locked logic board compartment and will not be accessible to the manufacturer or distributor after the initial installation of the equipment.
4. Power Switch. A power switch will be located in an accessible place within the interior of the game that controls the electrical current used in the operation of the game.

5. Resistance to Electromagnetic Interference. The operation of the video lottery terminal will not be adversely affected by static discharge, radio frequency interference or other electromagnetic interference.
6. Secure Cabinets. The internal space of the video game of chance will not be readily accessible when the door is closed.
7. Secure Electronic Components. Logic board and software erasable programmable read only memory chips (EPROMS) and other game logic control components will be located in a separate compartment within the video game of chance and that compartment will be locked with a different key than is used for the main cabinet door.
8. Secure Cash Compartment. The currency/coin/token compartment will be secured with a different key than is used for the main cabinet door or logic area.
9. No Hardware Modification of Pay Tables or Payouts. No hardware switches (DIP Switches) may be installed which alter the pay tables or payout percentages for the game.
10. Printed Record of Credits and Payouts Required. A single printing mechanism will be capable of printing an original ticket and retaining an exact, legible copy with the game, which records the following information when credits accrued on the game are redeemed for cash. The number of credits won and its redeemable cash value will be reflected in both written and numerical formats.
11. Video Lottery Terminals will have both electronic and electro-mechanical meters. VLT meters will have at least six digits. The VLT meters will accumulate the same values in electronic digital storage and provide the means for an on-demand display of the stored information. The cash-in meter will accumulate all cash transactions. The credit-out meter will accumulate all cash and credit transactions paid for winning combinations. The jackpots-paid meter will reflect the cumulative amounts of jackpots paid out by the machine.
12. No VLT machines may have a mechanism that causes the electronic accounting meters to clear automatically when an error occurs. A VLT's meters will be maintained at all times, regardless of whether the machine is being supplied with power. Meter readings will be recorded before and after the electronic accounting meter is cleared.
13. Electro-mechanical meters will have an accuracy rate of 99 percent or better. Electronic meters will have an accuracy rate of 99.99 percent or better.
14. A VLT will be designed so that replacement of parts or modules required for normal maintenance does not require replacement of the electro-mechanical meters.

15. The following information will be recorded and stored on meters:
 - a. The number of credits wagered;
 - b. The number of credits won;
 - c. The number of credits available for wagering; and
 - d. The number of credits based on currency, token/coins accepted.
16. Display of Rule of Play. The rules of play for a VLT will be displayed on the machine face or screen. Rules of play will be kept under glass or another transparent substance. At no time may stickers or other removable devices be placed on the terminal face except as authorized elsewhere by these standards.
17. Each video lottery terminal certified for placement in the Gaming Facility will display a Tribal Gaming Inventory Decal which certifies it conforms to the exact specifications of terminal prototypes tested and certified for the State. The decal will be affixed to the machine prior to the machine being placed into play.
18. No persons other than authorized Tribal personnel or their agents may affix or remove a Tribal Gaming Inventory Decal. The placement of the Tribal Gaming Inventory Decal represents that the terminal has been certified, inspected, and approved for the operation in the State. The placement of the Tribal Gaming Inventory Decal on any equipment by the Tribal personnel constitutes documentation that the certification has been and will be kept on file by the Tribe. No persons other than authorized Tribal personnel may affix or remove the Tribal Gaming Inventory Decal.
19. Within 10 days of the initial installation of a VLT at a Tribal Gaming Center, the Tribal Gaming Commission, or its representative, will report to the Oregon State Police the following information for each VLT, including, but not limited to:
 - a. The type of VLT;
 - b. The game's serial number;
 - c. The games manufacturer; and
 - d. The unique identification number assigned by the Tribe.
20. No terminal may be transported off Tribal land until the Tribal Gaming Inventory Decal has been removed. The Tribal Gaming Decal shall not be transferred to another machine.

21. A terminal will not be moved out of the State approved gaming facility without prior notification to the Oregon State Police.
- ~~22. The age restriction will clearly be shown on the face of the terminal.~~
22. The Tribe solely regulates the minimum and maximum wager of a VLT placed at a Tribal Gaming Center.
23. Each game will display the amount wagered and the amount awarded for the occurrence of each possible winning occurrence based on the number of credits wagered. Each game will provide a method for player to view payout tables.

G. WIDE AREA PROGRESSIVE VIDEO LOTTERY TERMINAL/SYSTEM

1. The wide area progressive system will be adequately restricted to prevent unauthorized access (e.g., changing passwords at least quarterly, access to EPROMS and physical access to computer hardware, etc.)
2. Procedures are developed, implemented and documented for:
 - a. Reconciliation of meters and jackpot payouts;
 - b. Collection/drop of video lottery terminal funds;
 - c. Jackpot verification and payment procedures that include a requirement that a member of the Tribal Gaming Commission or their designee be present for independent prize verification and payment.
 - d. System maintenance;
 - e. System accuracy; and
 - f. System security.
3. Reports adequately documenting the procedures above are generated and retained.
4. The hardware requirements of this section will not be construed to prevent the operation of the VLT as part of a network with an aggregate prize or prizes; provided:
 - a. A VLT capable of bi-directional communication with external associated equipment will utilize communication protocol that insures the erroneous data or signals will not adversely affect the operation of the game. The operation

of the local network will be approved by the State designated independent gaming test laboratory; and

- b. Where the network links the Tribe's VLT's to other machines at other State or State's approved Tribal Gaming Centers, each Tribe participating in the network will have in force a Class III Gaming Compact authorizing such gaming as part of a network and all segments of the network will utilize security standards agreed between the Tribes and the State.
5. Approved Token/Coin and Bill Acceptors. At least one bill acceptor for denomination determined by the Tribe will be installed in or on each VLT. The devices may also contain electronic token or coin acceptors, denominations to be determined by the Tribe. Prior to operation, all models of token/coin and bill acceptors installed will have been tested and approved in writing by the gaming laboratory designated by the State.
6. Restrictions on Hopper and Token/Coin Drop. No VLT's in the State, or at any Tribal Gaming Center will be equipped with a token/coin hopper which enables the device to dispense any winnings of token or coin directly to the player of such device.
7. All VLT's operated in approved tribal gaming facilities will be equipped with a door open light or candle. While the door is open a light will be visible on top of the machine visible to surveillance cameras.

H. IN-HOUSE PROGRESSIVE CONTROLLER NETWORK

1. Any progressive system that links one or more electronic gaming devices must meet the same standards set forth in this section for Software Requirements for Electronic Games of Chance. Those include the requirement for testing by an independent laboratory, randomness testing for systems with a random number generator, and the ability to verify the EPROM through assigned signatures.
2. During the normal mode of progressive electronic gaming devices, the progressive controller, or other approved device must continuously monitor each machine on the link for inserted funds by a patron and must multiply the accepted funds by the rate of progression and denomination in order to determine the correct amounts to apply to the progressive jackpot. The progressive display must be constantly updated to display the accumulated progressive jackpot amounts.
3. Each progressive controller system must be housed in a secure compartment requiring locking entry and authorization logs in a manner approved by the gaming Commissions.

4. In addition to other funding requirements for gaming facilities, each gaming facility will maintain an amount sufficient to fully fund the present value of all amounts currently reflected on the progressive displays.

I. SOFTWARE REQUIREMENTS FOR ELECTRONIC GAMES OF CHANCE

1. Randomness testing. Each electronic game of chance will have a microprocessor based random number generator that will determine the occurrence of the specific card, symbol, number or stop position to be displayed. A selection process will be considered random if it meets all the following requirements:
 - a. Chi-square Analysis. Each card, symbol, number or stop position which is wholly or partially determinative of the outcome of the game satisfies the 99 percent confidence limit using the standard chi-square analysis;
 - b. Runs Test. Each-card, symbol, number or stop position does not as a significant statistic produce predictable patterns of game elements or occurrences. Each card, symbol, number, or stop position will be considered random if it meets the 99 percent confidence level with regard to the "runs test" or any generally accepted pattern of testing statistic;
 - c. Correlation Analysis. Each card, symbol, number or stop position is independently chosen without regard to any card, symbol, number, or stop position, drawn within that game play. Each card, symbol, number, or stop position is considered random if it meets the 99 percent confidence level using standard correlation analysis;
 - d. Serial Correlation Analysis. Each card, symbol, number, or stop position is independently chosen without reference to the same card, number, or stop position on the previous game. Each card, number, or stop position is considered random if it meets the 99 percent confidence level using standard correlation analysis; and
 - e. Live Game Correlation. Electronic games of chance that are representatives of live gambling games will fairly and accurately depict the play of the live game.
2. Software Requirements for Continuation after Game Malfunction. Each game will be capable of continuation of the current game with all current game features after a game malfunction is cleared. This provision does not apply if the game is rendered totally inoperable; however, the current wager and all player credits prior to the malfunction will be returned to the player.

J. TESTING OF ELECTRONIC GAMES OF CHANCE

1. Testing and approval of VLT's. No VLT may be purchased, leased or otherwise acquired by the Tribe unless:
 - a. The VLT or prototype thereof, has been tested, approved or certified by the State's designated test laboratory as meeting the requirements and standards as set forth herein. For purposes of these standards, a gaming test laboratory will be designated by the State as competent and qualified to conduct scientific tests and evaluations of VLT's and related equipment.
2. If required by the gaming test laboratory, the State will require the manufacturer or distributor to transport not more than two working models of the electronic games of chance and related equipment to a location designated by the laboratory for testing, examination, and analysis. In addition, the manufacturer or distributor will supply copies of illustrations, schematics, block diagrams, circuit analysis, technical and operation manuals, program object and source codes, hexadecimal dumps (the compiled computer program represented in the base-16 format), and any other information requested by the gaming laboratory. The State will require the manufacturer or distributor to pay for any and all costs for the transportation, testing, examination, and analysis. The testing, examination, and analysis may include the entire dismantling of the VLT's and related equipment and some tests may result in damage or destruction to one of more electronic components of the devices. If required by the laboratory, the State will require the manufacturer to provide specialized equipment or the services of an independent technical expert to assist the testing, examination, and analysis.
3. Report of Test Results. At the conclusion of each test, the laboratory will provide to the State and Tribal Gaming Commission designee a report that contains findings, conclusions, and determination that the VLT and related equipment conforms or fails to conform to the hardware and software requirements of these standards. If modifications can be made which would bring the VLT or related equipment into compliance, the report may contain recommendations for such modifications. A report from the laboratory stating that the machine is an eligible VLT gaming device under the technical standards defined herein will qualify for application to the State for shipment to an authorized gaming facility.
4. Modifications of Approved VLT's. No modification to the assembly or operational functions of any VLT or related equipment may be made after testing and installation unless a gaming test laboratory certifies to the State that the modified VLT conforms to the standards set herein. Any proposed modifications will be subject to the requirements of the paragraphs above, before the modification may be implemented.

K. CHANGING/REPLACING VLT's ERASABLE PROGRAMMABLE READ ONLY MEMORY (EPROM) CHIPS.

1. After being tested through the independent gaming test laboratory as meeting the requirements of the Compact and these standards, the approved EPROM chips may be shipped by the manufacturer or distributors directly to the Tribal Gaming Commission. Once received the possession and security of the EPROM chips will be the responsibility of the Tribal Gaming Commission.
2. Prior to being installed or replaced and placed into play in a VLT, the Tribal Gaming Commission or representative of the Oregon State Police, will verify the EPROM internal signature as assigned by the manufacturer and verified by the independent laboratory is accurate.
3. The EPROM chip will be placed on the VLT logic board under the direct supervision of the Tribal Gaming Commission or an Oregon State Police representative. The EPROM chip will be sealed with a uniquely numbered tape by the State or Tribal Gaming Commission.
4. The security tape will be secured and available to only the Tribal Gaming Commission personnel, or Oregon State Police members. The agency installing the EPROM chip will maintain accurate and complete records including the following:
 - a. The serial number of the machine the EPROM is being installed in;
 - b. The date;
 - c. The machine type and manufacturer;
 - d. The Tribal Gaming Center;
 - e. The EPROM chip type;
 - f. The approved signature result;
 - g. The name and authority of person conducting testing; and
 - h. The Tribal Gaming Inventory Decal number.
5. Documentation of initial EPROM chip installation or replacement conducted by the Tribal Gaming Commission along with the required information will be forwarded to the Oregon State Police within 10 days after completion. Nothing in this section is meant to restrict the access of either the Tribal Gaming Commission or the State from random access and verification of EPROM chip security.

L. EPROM DUPLICATION

1. If duplication of gaming device program storage media is performed and approval has been obtained, or the gaming facility is a licensed manufacturer, procedures are developed and implemented for the following:
 - a. Removal of EPROMS from devices, the verification of the existence of errors as applicable, and the correction via duplication from the master game program EPROM;
 - b. Copying one gaming device program to another approved program;
 - c. Verification of duplicated EPROMS prior to being offered for play;
 - d. Destruction, as needed, of EPROMS with electrical failures; and
 - e. Securing the EPROM duplicator and master game EPROMS from unrestricted access.
2. The master game program number, par percentage and the pay table are verified when initially received from the manufacturer to the par sheet.
3. Video lottery terminals with potential jackpots in excess of \$100,000 will have the circuit boards locked and physically sealed. If a seal is used to secure the board to the frame of the gaming device, it will be pre-numbered.
4. Prior to being installed or replaced and placed into play in a VLT, the Tribal Gaming Commission or representative of the Oregon State Police, will verify the EPROM internal signature as assigned by the manufacturer and verified by the independent laboratory is accurate.
5. The EPROM chip will be placed on the VLT logic board under the direct supervision of the Tribal Gaming Commission or an Oregon State Police representative. The EPROM chip will be sealed with a uniquely numbered tape by the State or Tribal Gaming Commission.
6. The security tape will be secured and available to only the Tribal Gaming Commission personnel, or Oregon State Police members. The agency installing the EPROM chip will maintain accurate and complete records including the following:
 - a. The serial number of the machine the EPROM is being installed in;
 - b. The date;
 - c. The machine type and manufacturer;

- d. The Tribal Gaming Center;
- e. The EPROM chip type;
- f. The approved signature result;
- g. The name and authority of person conducting testing;
- h. The Tribal Gaming Inventory Decal number.

M. CONFORMITY TO TECHNICAL STANDARDS

- 1. The State will require the manufacturer or distributor to certify, in writing, that upon installation each VLT:
 - a. Conforms precisely to the exact specifications of the electronic game of chance or prototypes tested and approved by the gaming test laboratory; and
 - b. Operates and plays in accordance with the technical standards set forth in these provisions.

N. VLT RECORDS

- 1. Records shall be maintained for each video lottery terminal, which shall include the following:
 - a. Date installed
 - b. Manufacture's serial number
 - c. Manufacture's name
 - d. Program number
 - e. Disposition of permanently removed EPROM's
 - f. Seal #, if applicable
 - g. Current denomination of machine
 - h. Any changes to the machine number or denomination
 - i. Theoretical Hold percentages

O. THEORETICAL/ACTUAL HOLD

1. Accurate and current theoretical hold work sheets are maintained for each video lottery terminal.
2. For those video lottery terminals or groups of identical machines with differences in theoretical payback percentage exceeding a four percent (4%) spread between the minimum and maximum theoretical payback, and which contain meters require:
 - a. On a quarterly basis, read the meters that records the number of plays by wager (i.e., one coin, two coins, etc.);
 - b. On an annual basis, calculate the theoretical hold percentage based on the distribution of plays by wager type; and
 - c. On an annual basis, adjust the machine(s) theoretical hold percentage in the video lottery terminal statistical report to reflect this revised percentage.
3. Records are maintained for each machine which indicate the dates and type of changes made and the recalculation of theoretical hold as a result of the changes.
4. Records are maintained for each machine which indicate the date the machine was placed into service, the date the machine was removed from operation, the date the machine was placed back into operation, and any changes in machine numbers and designations.
5. For those video lottery terminals that accept coin or tokens will contain a functioning "coin-in" meter.
6. All currency acceptors will contain functioning "bill-in" meters that record the dollar amounts or number of bills accepted by denomination.
7. Video lottery terminal in-meter readings are recorded, manually or electronically, at least weekly immediately prior to or subsequent to a video lottery terminal drop. Exception: the time between readings may extend beyond one week in order for a reading to coincide with the end of an accounting period only if such extension is for no longer than six days.
8. The employee who records the in-meter readings either is independent of the hard count team or is assigned on a rotating basis unless the in-meter readings are randomly verified quarterly for all video lottery terminal currency acceptors by someone other than the regular in-meter reader.
9. Upon receipt of the meter-reading summary, the accounting department reviews all meter readings for reasonableness using pre-established parameters.

10. Prior to final preparation of statistical reports, meter readings that do not appear reasonable are reviewed with slot department employees, and exceptions documented, so that meters can be repaired or clerical errors in the recording of meter readings can be corrected.
11. A report is produced at least monthly showing month-to-date and year-to-date actual hold percentage computations for individual machines and a comparison to each machine's theoretical hold percentage previously discussed.
 - a. If practicable, the report should include the actual hold percentage for the entire time the machine has been in operation.
 - b. Each change to a video lottery terminal's theoretical hold percentage, including progressive percentage contributions, results in that machine being assigned a new number and treated as a new machine in the statistical reports.
 - c. $\text{Actual hold} = \text{dollar amount of win} \div \text{dollar amount of coin in}$.
12. The statistical reports are reviewed by both slot department management and management employees independent of the slot department on at least a monthly basis.
13. Large variances in excess of 3% between theoretical hold and actual hold are investigated and resolved with the findings documented in a timely manner.
14. Computerized video lottery terminal monitoring system data file maintenance will be performed by a department independent of the slot department or may be performed by slot supervisory employees if sufficient documentation is generated and it is randomly verified by employees independent of the slot department on a monthly basis.
15. Updates to the computerized video lottery terminal monitoring system to reflect additions, deletions or movements of video lottery terminals are made at least weekly prior to in-meter readings and the weigh process.

P. PAYMENT OF PRIZES

1. No payment for prizes awarded on a terminal may be made unless the cash slip meets the following requirements:
 - a. It is fully legible and meets all the Tribe's security requirements;
 - b. It will not be mutilated, altered, unreadable, or tampered with in any manner;

- c. It will not be counterfeit in whole or part; and
 - d. It has been presented by a person authorized to play under the terms of the Tribal/State Compact and these standards.
2. The Tribal Gaming operation shall develop and implement procedures to control VLT ticket paper. These procedures shall include;
- a. Inventory control of the VLT ticket paper; and
 - b. Destruction of all unused VLT ticket paper.

Q. METHOD OF PAYMENT

1. The gaming management will designate employees authorized to redeem cash slips during the Tribe's business hours of operation. Prizes will be immediately paid in cash, by check or by established annuity payment after verification of the jackpot occurrence and jackpot amount when a player presents a cash slip for payment meeting the requirements of these standards. No prizes may be paid in tokens or chips.

R. HAND PAY JACKPOT PAYOUT STANDARDS

1. For hand pay jackpot payouts a three-part payout form/documentation will be used that includes:
- a. Date and time;
 - b. Machine number;
 - c. Dollar amount of payout (both alpha and numeric);
 - d. Game outcome (including reel symbols, card values and suits, etc) and type of jackpot;
 - e. Signatures of at least two employees verifying and witnessing the payout;
 - f. Preprinted or concurrently-printed sequential numbers;
 - g. ~~Jackpot payouts over \$500 require the additional signature and verification of a member of the security department; and~~ **Jackpot payouts of \$500-\$1199 require two authorizing signatures which may include a member of the security department; jackpot payouts of \$1200 or more require three signatures including a member of the security department.**

- ~~h. Jackpot payouts over \$10,000 require the additional signature and verification of a security department supervisor and member of the Tribal Gaming Commission or if required by the Gaming Commission, a signature of a management member independent from security or the slot departments.~~
Jackpot payouts exceeding \$10,000 require an additional management signature and EPROM verification and notification of the Tribal Gaming Commission.
2. For short pays of \$20 or more, the payout form will include:
 - a. Date and time;
 - b. Machine number;
 - c. Dollar amount of payout (alpha and numeric); and
 - d. Signatures of at least two employees verifying and witnessing the payout;
3. Computerized jackpot systems will be restricted to prevent unauthorized access and fraudulent payouts by one individual.
4. Payout forms will be controlled and routed in a manner that precludes any one individual from producing a fraudulent payout by forging signatures, or by altering the amount paid out subsequent to the payout, and misappropriating the funds.

S. VIDEO LOTTERY TERMINAL - STORAGE & RELOCATION

1. The Tribal Gaming Commission will be notified by the Tribal Gaming Operation if video lottery terminals are moved, taken out of service, placed back in service or if there is a change in the denomination. Hard and soft meter readings will be taken and forwarded to the accounting department with notification of the change. No video lottery terminal printer paper or EPROM will remain in any machine that is taken out of play. VLT terminal printer paper will be either returned to inventory or destroyed.
2. When machines are temporarily removed from the floor, slot loads are protected to preclude the misappropriation of stored funds.
3. When machines are permanently removed from the floor, the slot loads are counted and recorded by at least two employees with appropriate documentation being routed to the accounting department for proper recording.
4. The Oregon State Police will have access to any storage area for video lottery terminals or any part thereof.

5. Detailed perpetual inventory records of video lottery terminal printer paper inventory will be maintained at all times. Video lottery terminal printer paper stock cases will be hand numbered with a sequential identification number in indelible ink upon storage.
6. Payout printer paper will be stored under lock and key with access limited only to authorized personnel.
7. Effective controls will exist for the secure storage and accounting of EPROM chips, logic boards, printer paper and other sensitive device items when machines are taken out of play or stored off the gaming floor for any reason.
8. Effective controls will exist for the secure storage, accounting and destruction of EPROM chips, logic boards, printer paper and other sensitive device items.
9. Each Tribe will maintain a current listing of all gaming devices (leased or owned) including the game type, game serial number, EPROM chip identification number, tribal identification number and location.

T. CURRENCY/COIN/TOKEN ACCEPTOR DROP BOXES

1. Each video lottery terminal in the gaming facility will have a locked container known as a "Currency Acceptor Drop Box" or "Coin/Token Drop Box", in which will be deposited all cash, coin or token resulting from the play of the device.
2. Each video lottery terminal will have a lock securing the drop box cabinet. These keys, and any duplicates, will be maintained and controlled by a department independent of the VLT slot department. Two employees (separate from key custodian) are required to accompany these keys and observe each time slot machine drop cabinets are accessed, unless surveillance is notified each time keys are checked out and surveillance observes the person throughout the period.
3. Each such drop box will have:
 - a. One separate lock securing the contents placed into the drop box, the key to which will be different from any other key;
 - b. A separate lock securing the drop box to the gaming device, the key to which will be different from the key to the lock securing the contents of the drop box; and
 - c. Permanently imprinted or impressed thereon, and clearly visible a number corresponding to the video lottery terminal to which it is attached.

4. The key utilized to unlock the drop boxes from the gaming devices will be maintained and controlled by a department independent of the VLT slot department. Persons authorized to drop VLT boxes are precluded from having access to drop box contents keys **except for members of the count team during the count as provided in Section VI(B)11 and VI(C)3**. Only persons authorized to remove drop boxes from VLT's are allowed access to the release keys.
5. The key to the lock securing the contents of the drop boxes will be maintained and controlled by a department independent of the VLT slot department. Only authorized count team members are allowed access to drop box contents keys and only during the count process.
6. The physical custody of the keys needed to access stored full drop box contents requires involvement of persons from two separate departments.
7. Access to the drop box content keys at other than scheduled count times shall require the involvement of at least three persons from separate departments, including management, and the reason for access shall be documented with signatures of all participants and observers.
8. A person independent of the VLT slot department is required to accompany drop box storage rack keys and observe each time drop boxes are removed from or placed in storage racks. Persons authorized to obtain drop box storage rack keys are precluded having access to drop box contents keys (with the exception of the count team.)
9. All duplicate keys will be maintained in a manner that provides the same degree of control as is required for the original keys.
10. At least three count team members are required to be present at the time count room and other count keys are issued for the count.
11. Logs will be maintained to document authorization of personnel accessing keys.

U. DROP BOX, TRANSPORTATION TO AND FROM GAMING DEVICES AND STORAGE IN THE COUNT ROOM

1. All drop boxes removed from the gaming devices will be transported, at a minimum, by three persons, **one of which must be a security department member**, ~~two of which must be security department members~~ or Tribal Gaming Commission directly to, and secured in, the count room. Only one bank of video lottery terminals will be subject to a drop team at any one time.
2. The security department member will remain with the drop cart/trolley and receive full drop boxes and dispense empty drop boxes.

3. Security will advise surveillance upon the start of the drop, when the drop cart/trolley is moved, and when the cart is secured in the soft count room.
4. All drop boxes, not attached to a gaming device, will be stored in the count room, or other secure location, in an enclosed storage cabinet or trolley and secured in such cabinet or trolley.
5. The drop cart/trolley will be secured after being emptied and upon being filled by a locking system.
6. The entire drop process will be monitored and taped by the surveillance department. Drop tapes will be held for at least seven days. If an unusual incident occurs during the drop the tape will be placed in evidence until a full review of the incident is concluded.
7. If an emergency occurs during the drop process, the drop box will be returned to the soft count room and secured.
8. At no time, other than in an emergency, will a soft count team member be replaced by a new member after the count has commenced.
9. Drop and count team authorized persons shall maintain separate duties.

V. STANDARDS FOR COUNTING AND RECORDING CONTENTS OF BILL VALIDATOR BOXES (SOFT COUNT)

1. The contents of bill validator boxes will be counted and recorded in the count room in conformity with these standards.
2. The tribal gaming operation will notify the Tribal Gaming Commission whenever the contents of bill validator boxes removed from gaming stations are to be counted and recorded, which should be **at least** once ~~each~~ **every three** gaming days. The gaming operation may satisfy this standard by providing the Gaming Commission with a schedule in advance of drop/count times. Any variance of the scheduled times requires notification to the Tribal Gaming Commission.
3. The opening, counting and recording of the contents of bill validator boxes will be by three or more employees assigned by the tribal gaming operation for the conduct of the count ("Count Team") who have ~~incompatible~~ functions **dissimilar from the drop team except as provided in Section VI(B)(11)**. The Count Team will be rotated so that the count team members are not the same for more than seven (7) consecutive days.

4. Immediately prior to the opening of the bill validator boxes, the doors to the count room will be securely locked.
5. Except in an emergency, those persons allowed to enter or leave the count room during the count process will not do so until unverified cash is counted and recorded.
6. Members of the Tribal Gaming Commission will be allowed immediate access to the count room during the count process. Members of the Tribal Gaming Section will not be denied access in an emergency situation during the count process.
7. Immediately prior to the commencement of the count, one count team member will notify surveillance that the count is about to begin. Surveillance will make an audio-video recording, with the time and date inserted thereon, of the entire counting process which will be retained by the surveillance department for at least seven days from the date of recording unless otherwise directed by the Tribal Gaming Commission.
8. Minimum procedures and requirements for conducting the count will be the following:
 - a. As each bill validator box is placed on the count table, one count team member will announce, in a tone of voice to be heard by all persons present and to be recorded by the audio recording device, the bill validator box number. This sub-paragraph is not applicable to an automated count system.
 - b. The contents of each bill validator box will be emptied and counted separately on the count table, which procedures will be at all times conducted in full view of the closed circuit television cameras located in the count room;
 - c. Immediately after the contents of a bill validator box are emptied onto the count table, the inside of the box will be held up for a minimum of two seconds to the full view of a closed circuit television camera, and will be shown to at least one other count team member to confirm that all contents of the box have been removed, after which the box will be locked and placed in the storage area for bill validator boxes;
 - d. The contents of each bill validator box will be segregated by a count team member into separate stacks on the count table by denominations of currency. This sub-section is not applicable to an automated count system.
 - e. The bill validator boxes shall be individually emptied and counted to prevent the commingling of funds with other drop boxes until the count has been recorded.

- f. As the contents of each bill validator box is counted, one count team member will record in ink on a count sheet, cash tally slip or other report, by box number the total amount of currency counted. Corrections to information originally recorded by the count team on bill validator count documentation will be made by crossing out the error, entering the correct figure, and then obtaining the initials of two other count team member who verify the change. Crossing out errors will be made in ink and be done with one line in a manner that leaves the crossed out portion visible. Initials will be placed in a manner not to interfere with the legibility of the document.
 - g. After the contents of each bill validator box have been counted and recorded, the count sheets will be added together and all of the cash will be strapped and counted. The total cash should equal the total of the count sheets. Any unreconciled discrepancies of \$100 or more will be immediately brought to the attention of the Controller and a report generated to the Tribal Gaming Commission. The surveillance tape of the count will be secured by surveillance and stored in evidence until the discrepancy is corrected.
 - h. After completion and verification of the count, each count team member will sign a report attesting to the accuracy of the information recorded thereon.
7. Minimum procedures and requirements at the conclusion of the count for each gaming shift will be the following:
- a. All cash removed from each bill validator box and the count sheets after the initial count will be presented in the count room by a count team member to a cashier who, prior to having access to the information recorded on the final count report and in the presence of the count team, will re-count, either manually or mechanically, the cash received, after which the cashier will sign the report evidencing the fact that both the cashier and count team have agreed on the total amount of cash counted. If an unreconciled variance of \$100 or more is found, surveillance will be notified and a count team member and cashier independent of the initial cashier and count team will recount the currency. If there is still a variance, a member of the Tribal Gaming Commission will be called to investigate the variance.
 - b. The original copy of the final count report, after signing, will be transported directly to the accounting department and will not be available to any cashier's cage personnel;
8. The originals and copies of the final count report, will on a daily basis, in the accounting department be:
- a. Compared for agreement with each other, on a test basis, by persons with no recording responsibilities and, if applicable, to triplicates or stored data;

- b. Reviewed for the appropriate number and property of signatures on a test basis;
 - c. Accounted for by series number, if applicable;
 - d. Tested for proper calculation, summarization, and recording;
 - e. Subsequently recorded; and
 - f. Maintained and controlled by the accounting department.
9. No personal items are allowed into the count rooms.
 10. While the soft count is in process, all personnel in the Soft Count room will wear pocketless coveralls provided by the Tribal Gaming Operation. The coveralls will have loosely fitted sleeves and pant legs with no cuffs or collars and they will zip in the front. The zipper will be maintained fully closed at the top.
 11. All trash in the count room will be placed in a transparent bag for disposal. The material will be removed at the end of the count and received by a member of the security department for disposal.

W. COIN/TOKEN DROP EQUIPMENT STANDARDS (HARD COUNT) *The following standards apply for gaming operations that employ such equipment:*

1. A weigh scale calibration module is secured to prevent unauthorized access (e.g., pre-numbered seal, lock and key etc.).
2. Someone independent of the cage, vault, slot and count team function is required to be present whenever the calibration module is accessed.
3. Such access is documented and maintained.
4. If a weigh scale interface is used, it is adequately restricted to prevent unauthorized access (passwords, keys, etc.).
5. If the weigh scale has a “zero adjustment mechanism,” it is either physically limited to minor adjustment (e.g. weight of a bucket) or physically situated so that any unnecessary adjustment to it during the weigh process would be observed by other count team members.
6. The weigh scale and weigh scale interface (if applicable) are tested by someone else who is independent of the cage, vault, and slot departments and count team

at least semi-annually. The above test is performed by internal audit in accordance with the internal audit standards.

7. During the slot count at least two employees verify the accuracy of the weigh scale with varying amounts of previously counted coin for each denomination to ensure the scale is properly calibrated. (Varying weights/coin from drop to drop is acceptable).
8. The preceding weigh scale and weigh scale interface test results are documented and maintained.
9. If a mechanical coin counter is used (instead of a weigh scale), procedures are equivalent to those described in the standards 5, 6, and 7.

X. VIDEO LOTTERY TERMINAL - HARD COUNT AND WRAP STANDARDS *The following standards apply for gaming operations that employ such equipment:*

1. The contents of coin/token drop boxes will be counted and recorded in the count room in conformity with these standards.
2. The hard drop and count will be conducted by a separate count team and as a distinctly separate activity from the soft drop and count.
3. The tribal gaming operation will notify the Tribal Gaming Commission whenever the contents of coin drop boxes removed from gaming stations are to be counted and recorded, which should be once each gaming day. The gaming operation may satisfy this standard by providing the Gaming Commission with a schedule in advance of drop/count times. Any variance of the scheduled times requires notification to the Tribal Gaming Commission.
4. The recording of the contents of the coin drop buckets will be performed by three or more employees assigned by the tribal gaming operation for the conduct of the count. One member of the count team will be from the accounting department. The Count Team will be rotated so that the count team members are not the same for more than seven (7) consecutive days.
5. Immediately prior to the weighing of the coin drop buckets, the doors to the count room will be securely locked. Persons entering and exiting the count room will be scanned or searched by a metal detection device.
6. Members of the Tribal Gaming Commission and of the Oregon State Police will be allowed immediate access to the count room during the count process.
7. The initial weigh/count is performed by a minimum of three employees.

8. The slot count team is independent of the generation of the slot revenue and the subsequent accountability of slot count process.
9. The following functions are performed in the counting of the slot drop:
 - a. Recorder function that involves the recording of the initial slot count;
 - b. Count team supervisor function that involves the control of the slot weigh and wrap process; and
 - c. The amount of the slot drop from each machine is recorded in ink on a slot count document by the recorder or mechanically printed by the weigh scale. If a weigh scale interface is used, the slot drop figures are transferred via direct line or computer storage media.
10. The recorder and at least one other count team member sign the slot count document or weigh tape attesting to the accuracy of the initial weigh/count.
11. At least three employees who participate in the weigh/count and/or wrap process sign the slot count document or a summary report to attest to their presence. If all other count team members do not sign the slot count document or a summary report, they sign a supplemental document evidencing their participation in the weigh/count and/or wrap.
12. The coins/tokens are wrapped and reconciled in a manner that precludes the commingling of slot drop coin/token with coin/token (for each denomination) from the next slot drop.
13. At least three employees are present throughout the wrapping of the slot drop. If the slot count is conducted with a continuous mechanical count meter which is not reset during the count and is verified in writing by at least three employees at the start and end of each denomination count, then this requirement is not applicable.
14. If the coins/tokens are not wrapped immediately after being weighed/counted, they are secured and not commingled with other coin. The term "wrapped slot drop" includes wrapped, bagged (with continuous metered verification), and racked coin/tokens.
15. If the coins/tokens are transported off the property, a second (alternative) count procedure will be performed before the coins leave the property and any variances are documented.
16. Transfers out of the count room during the slot count and wrap process are either strictly prohibited, or if transfers are permitted during the count and wrap, each transfer is recorded on a separate multi-part pre-numbered form (used solely for

slot count transfers) which are subsequently reconciled by the Accounting Department to ensure the accuracy of the reconciled wrapped slot drop.

17. Transfers, as noted above, are counted and signed for by two members of the count team, and by someone independent of the count team who is responsible for authorizing the transfer.
18. If the count room serves as a coin room and coin room inventory is not secured so as to preclude access by the count team, then the next two requirements (#19 & 20) are satisfied:
19. At the commencement of the slot count the following standards are met:
 - a. The coin room inventory is counted by at least two employees, one who is a member of the count team and the other is independent of the weigh/count wrap procedures.
 - b. The above count is recorded on an appropriate inventory form.
20. Upon completion of the wrap of the slot drop, the following standards are met:
 - a. At least two members of the count team (wrap team), independently from each other, count the ending coin room inventory;
 - b. The above counts are recorded on a summary report(s) which evidences the calculation of the final wrap by subtracting the beginning inventory from the sum of the ending inventory and transfers in and out of the coin room;
 - c. The same count team members as discussed above compare the calculated wrap to the initial weigh/count, recording the comparison and noting any variances on the summary report;
 - d. A member of the cage/vault department counts the ending coin room inventory by denomination. This count is reconciled to the beginning inventory, wrap, transfers and initial weigh/count on a timely basis by the cage/vault or other department independent of the slot department and the weigh/wrap procedures; and
 - e. At the conclusion of the reconciliation, two count/wrap team members, and the verifying employee sign the summary reports(s) attesting to its accuracy.
 - f. If the count room is segregated from the coin room, or if the coin room is used as a count room and the coin room inventory is secured to preclude access by the count team, the following requirement is satisfied:
21. Upon completion of the wrap of the slot drop:

- a. At least two members of the count/wrap team count the final wrapped slot drop independently from each other;
 - b. The above counts are recorded on a summary report;
 - c. The same count team members as discussed above (or the accounting department) compare the final wrap to the weigh/count, recording the comparison and noting any variances on the summary report;
 - d. A member of the cage/vault department counts the wrapped slot drop by denomination and reconciles it to the weigh/count;
 - e. At the conclusion of the reconciliation, at least two count team members and the cage/vault employee sign the summary report attesting to its accuracy; and
 - f. The wrapped coins (exclusive of proper transfers) are transported to the cage, vault or coin vault after the reconciliation of the weigh/count to the wrap.
22. Large or unusual variances between the weigh/count and wrap in excess of 2% are investigated by management personnel independent of the slot department, count team and the cage/vault functions on a timely basis. Any such variances will be immediately brought to the attention of the Controller and a report generated to the Tribal Gaming Commission.
23. The results of such investigation are documented and maintained and subject to review by the Oregon State Police.
24. All slot count and wrap documentation, including any applicable computer storage media, is immediately delivered to the accounting department by other than the cashier's department. Alternatively, it is adequately secured (e.g., locked container to which only accounting personnel can gain access) until retrieved or received by the accounting department.
25. Corrections on slot count documentation are made by crossing out the error, entering the correct figure, and then obtaining the initials of one other count team employee. If a weigh scale interface is used, corrections to slot count data are made using the following method:
- a. Crossing out the error in ink on the slot document, entering the correct figure, and then obtaining the initials of at least two count team employees. Crossing out the error is done with one line in a manner that leaves the crossed out portion visible. Initials will be placed in a manner not to interfere with the legibility of the document. If this procedure is used, an employee independent of the slot department and count team enters the correct figure into the computer system prior to the generation of related slot reports;

- b. During the count process, correct the error in the computer system and enter the passwords of at least two count team employees. If this procedure is used, an exception report is generated by the computer system identifying the slot machine number, the error, the correction and the count team employees testifying to the correction; and
26. The hard count will be recorded on videotape by the Surveillance Department in the same manner as the soft count process.
27. No personal items are allowed into the count rooms.
28. While the hard count is in process, all personnel in the count room will wear pocket less coveralls provided by the Tribal Gaming Operation. The coveralls will have loosely fitted sleeves and pant legs with no cuffs or collars and they will zip in the front. The zipper will be maintained fully closed at the top.
29. All trash in the count room will be placed in a transparent bag for disposal. The material will be removed at the end of the count and received by a member of the security department for disposal.

Y. SURVEILLANCE STANDARDS - VIDEO LOTTERY TERMINALS

1. Every video lottery terminal located in the gaming facility will be able to be viewed by at least one pan-tilt-zoom camera.
2. The top of every video lottery terminal will contain a number readily observable by a surveillance camera for the purpose of identifying a particular device.
3. Fixed cameras will be placed to view all banks of two or more progressive electronic gaming devices to include clarity to identify game play and jackpot results. This video footage will be taped on a 24-hour basis to a dedicated recording device.
4. The locked and secure storage area for slot printer paper stock and EPROM's will be under a fixed camera.

Z. SLOT AUDIT PROCEDURES *The following standards apply for gaming operations that employ such systems:*

1. For computerized jackpot/fill systems, accounting/auditing employees will perform the following procedures at least one day per month:

- a. Foot jackpot and fill slips for all cashiers and trace totals to those produced by the system; and
 - b. Review all slips written (from the restricted copy) for continuous sequencing.
2. For computerized player tracking systems, an accounting/auditing employee will perform the following procedures at least one day per month:
 - a. Foot all points-redeemed documentation and trace to the system-generated totals.
 - b. Review all points-redeemed documentation for propriety.
 3. For computerized slot monitoring systems, procedures are performed at least monthly to verify the continuing accuracy of the meter readings as recorded in the slot statistical report.
 4. For weigh scale interface systems, for at least one-drop period per month, accounting/auditing employees will compare the weigh tape to the system-generated weigh, as recorded in the slot statistical report, in total. Discrepancies should be resolved prior to generation/distribution of slot reports.
 5. For currency acceptors, for each drop period, accounting/auditing personnel will compare the "bill-in" meter reading to the currency acceptor drop amount. Discrepancies should be resolved prior to generation/distribution of slot statistical reports.
 6. Accounting/auditing employees review exception reports for all computerized slot systems on a daily basis for propriety of transactions and unusual occurrences.
 7. All slot auditing procedures and any follow-up performed is to be documented and retained for a minimum of twelve months.

SECTION VIII CHIPS AND TOKEN INTEGRITY

A. CHIPS AND TOKENS

1. Use of Chips and Tokens: Chips and tokens are solely representative of value which evidence a debt owed to their custodian by the Tribe that issued them and are not the property of anyone other than the Tribe.
2. A Tribe that utilizes chips or tokens at its gaming establishment will:

- a. Issue chips or tokens only to patrons of its gaming establishment;
- b. Promptly redeem its own chips and tokens from its patrons by cash or check drawn on an account of the Tribe;
- c. Post conspicuous signs at its establishment notifying patrons that the use of the Tribe's chips or tokens outside the establishment for any monetary purpose whatever is prohibited, and that the chips or tokens issued by the Tribe are the property of the Tribe only; and.
- d. Promotional chips and tokens may be used for promotions and tournaments as long as each chip and token (with a numerical figure) conspicuously bears the inscription "No Cash Value".

B. REDEMPTION AND DISPOSAL OF DISCONTINUED CHIPS AND TOKENS

1. A Tribe that permanently removes from use or replaces chips or tokens at its gaming establishment, or that ceases operating its gaming establishment, will redeem within the period designated by the Tribe discontinued chips or tokens that remain outstanding at the time of discontinuance.
2. The destruction or defacing of chips and tokens will be witnessed by representatives of the management, security and accounting departments and the documentation thereof maintained for three years.

**SECTION IX
KENO (MANUAL)**

A. PHYSICAL CONTROLS OVER EQUIPMENT UTILIZED

1. The keno write and desk area is restricted to specified.
2. There is effective periodic maintenance planned to service keno equipment.
3. Keno equipment maintenance is independent of the keno function.
4. Keno maintenance reports irregularities to management personnel independent of keno, either in writing or verbally.

B. GAME PLAY STANDARDS

1. The individual-controlling inside tickets either:
 - a. Is precluded from writing and making payouts, including during writers break periods; or
 - b. Has all winning tickets written by him with payouts exceeding \$25 verified, re-graded, and compared to the inside ticket by another keno employee. Additionally, this individual writes tickets out of his own writer's station and bank (unless a community bank is used).
2. At no time shall a keno game with annual write greater than \$500,000 be operated by one person.
3. Both inside (ticket presented by customer for play) and outside (receipt ticket given customer by keno writer) keno tickets are stamped with the date, ticket sequence number, and game number (as applicable to the system being used). The ticket will indicate that it is a multi-race ticket (if applicable).
4. The game openers and closers are stamped with the date, ticket sequence number, and game number. An alternative that provides the same controls is acceptable.
5. Controls exist to ensure that inside tickets have been received from outstations prior to calling of a game.
6. Controls exist to prevent the writing and voiding of tickets after a game has been closed. A ticket may be canceled or voided provided it is canceled from the system prior to the start of the game.
7. A legible restricted copy of written keno tickets is created (carbonized locked box copy, microfilm, videotape, etc.) for, at a minimum, all winning tickets exceeding \$30. If there are no restricted copies of winning tickets of \$30 or less, then the desk person does not write tickets.
8. Procedures are established for locking out or closing down all mechanisms for ticket writing/filming and time stamp equipment while keno balls for that race are being selected.
9. When it is necessary to void a ticket that contains the sequence number, the ticket is designated as "VOID" and initialed or signed by at least one person.

C. NUMBER SELECTION

1. A video camera is utilized to film the following both prior to, and subsequent to, the calling of a game: Empty rabbit ears, date and time, game number, and full rabbit ears.
2. The videotape picture of the rabbit ears on the camera provides a legible identification of the numbers on the balls drawn. These tapes will be maintained for a minimum of seven days.
3. Keno personnel will produce a draw ticket as numbers are drawn, and such tickets contain the race number, numbers drawn and date. The draw ticket is verified to the balls drawn by a second keno employee.
4. Procedures are in effect that prevents unauthorized access to keno balls in play.
5. Backup keno ball inventories are secured in a manner to prevent unauthorized access.
6. Effective procedures are established for inspecting new keno balls put into play as well as for those in use.

D. WINNING TICKET VERIFICATION AND PAYMENT

1. All winning tickets are compared with the draw ticket by the writer before being paid, marked with evidence that the ticket was "paid" and marked with the amount of payout.
2. Payouts over a predetermined amount (not to exceed \$30) are verified by actual examination of the inside ticket.
3. Winning tickets \$1,500 and over also require the following:
 - a. Approval of management personnel independent of the keno department evidenced by their signature;
 - b. Examination of videotape of "rabbit ears" prior to and after the game is called to determine that the same numbers called were not left up from the prior game and to verify the accuracy of the draw ticket;
 - c. Regrading of the inside ticket and comparison of both the winning ticket presented for payment and the inside ticket to the restricted copy (machine copy, microfilm, videotape, etc.); and
 - d. Procedures described above are documented for later verification and reconciliation by the keno audit process on a ball check form.

4. Published payoff schedules will be made available to the public at all times throughout the facility and in a conspicuous place immediately adjacent to the game.
5. A player is eligible to receive only the highest prize per game played on a ticket.

E. CHECK OUT STANDARDS

1. A cash summary report (count sheet) is prepared for the end of every shift that includes:
 - a. Computation of cash proceeds for the shift by bank (i.e., community bank or individual writer banks, whichever is applicable); and
 - b. Signatures in ink of two employees who have verified the cash proceeds recorded in the above computation.

F. STATISTICS

1. Records are maintained which include (for each game) win, write, and win-to-write hold percentage for:
 - a. Each shift;
 - b. Each day;
 - c. Month-to-date; and
 - d. Year-to-date.
2. Non-keno management reviews keno statistical information at least on a monthly basis and investigates any large or unusual statistical fluctuations.
3. Such investigations are documented and maintained for a minimum of twelve months.

G. KEY CONTROL

1. Keys to locked box tickets are maintained by a department independent of the keno function.
2. A member of the security department is required to accompany such keys to the keno area and observe repairs or refills each time locked boxes are accessed.

3. The master panel, which safeguards the wiring that controls the sequence of the game is locked at all times to prevent unauthorized access.
4. Master panel keys are maintained by a department independent of the keno function.
5. A member of the security department is required to accompany such keys to the keno area and observe repairs, etc., each time the master panel is accessed.
6. Microfilm machine keys are maintained by personnel who are independent of the keno writer function.
7. A member of the security department is required to observe each time the microfilm machine is accessed by keno personnel.
8. Keno equipment discussed above is always locked when not being accessed. The keys to this locked area will be maintained in a double lock box designated for key storage.
9. All electrical connections are wired in such a manner to prevent tampering.
10. Duplicate keys to the above areas are maintained independently of the keno department.

H. KENO AUDIT

1. The keno audit function is independent of the keno department.
2. Keno audit personnel foot write (either inside ticket or restricted copy) and payouts (customer copy) to arrive at an audited win/loss by shift.
3. Keno audit personnel obtain an audited win/loss for each bank (i.e., individual writer or community bank).
4. The keno receipts (net cash proceeds) are compared with the audited win/loss by keno audit personnel.
5. Major cash variances (i.e., overages or shortages in excess of \$25) noted in the proceeding comparison are investigated on a timely basis.
6. On a sample basis (for at least one race per shift or ten races per week) keno audit personnel perform the following, where applicable:
 - a. Re-grade winning tickets utilizing the payout schedule and draw tickets and compare winning tickets (inside and outside) to restricted copies (locked box

copy; developed microfilm, videotape, etc.) for 100% of all winning tickets of \$100 or greater and 25% of all winning tickets under \$100 for those races selected; and

- b. Either review sequential numbering on inside tickets (microfilm and videotape systems) to ensure that tickets have not been destroyed to alter the amount of write, or computer write from developed film and compare to write computed from inside tickets.
 - c. Review restricted copies for blank tickets and proper voiding of voids.
7. In addition to the above audit procedures, when a keno game is operated by one person:
- a. At least 25 percent (25%) of all other winning tickets are regraded;
 - b. At least 10 percent (10%) of all tickets are traced to the restricted copy; and
 - c. Film of rabbit ears is randomly compared to draw tickets for at least 25 percent (25%) of the races.
8. Draw tickets are compared to "rabbit ears" film for at least five races per week with payouts that do not require draw ticket verification independent of the keno department. (The draw information can be compared to the rabbit ears at the time the balls are drawn provided it is done without the knowledge of keno personnel and it is subsequently compared to the keno draw ticket.)
9. Documentation (e.g., logs, checklists, etc.) is maintained evidencing the performance of all keno audit procedures.
10. Non-keno management reviews keno audit exceptions, performs investigations into unresolved exceptions and documents results.

I. MISCELLANEOUS

1. Copies of all keno tickets and the videotape of the rabbit ears are maintained for at least seven (7) days.
2. All copies of winning keno tickets of \$1,500 or more are maintained for a minimum of twelve months. This includes restricted copies and ball check forms.

J. MULTI-RACE

1. Procedures are established to notify keno personnel immediately of large multi-race winners to ensure compliance with Standard #D.3. - Winning Ticket Verification and Payment.
2. Controls exist to ensure that keno personnel are aware of multi-race tickets still in process at the end of a shift.

SECTION X KENO (COMPUTERIZED)

A. MAINTENANCE

1. There is effective maintenance planned to service keno equipment, including computer program updates, hardware servicing, and keno ball selection equipment (e.g., service contract with lessor).
2. Keno equipment maintenance (excluding keno balls) is independent of the keno function.
3. Keno maintenance reports irregularities to management personnel independent of keno.

B. GAME PLAY STANDARDS

1. The computerized customer ticket includes the date, game number, conditioning, ticket sequence number and the station number (including multi-race if applicable).
2. Concurrently with the generation of the ticket the information on the ticket is recorded on a restricted transaction log or computer storage media.
3. When it is necessary to void a ticket, the void information is input in the computer and the computer documents the appropriate information pertaining to the voided wager (i.e., void slip is issued or equivalent documentation is generated).
4. Controls exist to prevent the writing and voiding of tickets after a race has been closed and after the number selection process for that race has begun. A ticket may be canceled or voided provided it is canceled from the system prior to the start of the game.
5. The controls in effect for tickets prepared in outstations (if applicable) are identical to those in effect for the primary keno game.

6. Keno tickets will be sold only during the hours of operation of the gaming facility. The selection of winning numbers will take place at established intervals.

C. NUMBER SELECTION: RABBIT EAR SYSTEM

1. A video camera is utilized to film the following both prior to, and subsequent to, the calling of a game:
 - a. Empty rabbit ears;
 - b. Date and time;
 - c. Game number; and
 - d. Full rabbit ears.
2. The videotape picture of the rabbit ears on the camera provides a legible identification of the numbers on the balls drawn.
3. Keno personnel immediately input the selected numbers in the computer and the computer documents the date, game number, the time the game was closed and the numbers drawn.
4. Procedures are in effect that prevents unauthorized access to keno balls in play.
5. Backup keno ball inventories are itemized and secured in a manner to prevent unauthorized access. When a complete set of keno balls is replaced, the used balls will be destroyed.
6. Effective procedures are established for inspecting new keno balls put into play as well as for those in use.

D. NUMBER SELECTION: RANDOM NUMBER GENERATOR

1. The random number generator is linked to the computer system and directly relays the numbers selected into the computer for preparation of a draw ticket without manual input.
2. The number generating device will meet the requirements of the Tribal-State Compact and these minimum standards pertaining to contracts with manufacturers and suppliers, security, terminal specifications, equipment testing, procurement, duties of manufacture and requirements for randomness testing.

E. WINNING TICKET VERIFICATION AND PAYMENT

1. The sequence number of tickets presented for payment is input into the computer, and the payment amount generated by the computer is given to the patron.
2. Procedures are established to preclude payment on tickets previously presented for payment, unclaimed winning tickets (sleepers) after a specified period of time, voided tickets, and tickets which have not been issued.
3. All payouts are supported by the customer (computer-generated) copy of the winning ticket (payout amount is indicated on the customer ticket or a payment slip is issued.)
4. A manual report is produced and maintained documenting any payments made on tickets that are not authorized by the computer.
5. Winning tickets \$1,500 and over also require the following:
 - a. Approval of a department supervisor independent of Keno evidenced by their signature.
 - b. Retention by surveillance of the tape for seven days in order to verify the legitimacy of the draw and the accuracy of the draw ticket.
 - c. Comparison of the winning customer copy to the computer reports.
 - d. Regrading of the customer copy using the payout schedule and draw information.
 - e. Documentation of the performance of all of the above on a ball check (or proof of win) form. Alternatively, if the computer adequately records the above, the resulting documentation may be substituted.
6. When one person operates the keno game, all winning tickets in excess of an amount to be determined by management (not to exceed \$1,500) will be reviewed and authorized by someone independent of the keno department.
7. Published payoff schedules will be made available to the public at all times throughout the facility and in a conspicuous place immediately adjacent to the game.
8. A player is eligible to receive only the highest prize per game played on a ticket.

F. CHECK OUT STANDARDS

1. A cash summary report (count sheet) is prepared for each shift which includes:
 - a. Computation of cash proceeds for the shift by bank (i.e., community bank or individual writer banks, whichever is applicable); and
 - b. The signature of at least two employees who have verified the cash proceeds recorded in the above computation.

G. STATISTICS

1. Records are maintained which include win and write by either individual writer for each shift or for each race during the shift.
2. Records are maintained which include win, write, and win-to-write hold percentage for:
 - a. Each shift;
 - b. Each day;
 - c. Month-to-date; and
 - d. Year-to-date.
3. Non-keno management reviews keno statistical information at least on a monthly basis and investigates any large or unusual statistical fluctuations.
4. Such investigations are documented and maintained.

H. SYSTEM SECURITY STANDARDS

1. Access to the computer system is adequately restricted (i.e., passwords are changed at least quarterly, access to computer hardware is physically restricted, etc.).
2. Keys to sensitive computer hardware in the keno area are maintained by a department independent of Keno.
3. A member of the security department is required to accompany such keys to the keno area and observe changes or repairs each time the sensitive areas are accessed.

I. DOCUMENTATION

1. Adequate documentation of all pertinent keno information is generated by the computer system.
2. This documentation is restricted to authorized personnel.
3. The documentation is to include, at a minimum:
 - a. Ticket information duplicated;
 - b. Payout information;
 - c. Race information (number, ball draw, time, etc.);
 - d. System exception information, including:
 - i. Voids;
 - ii. Late pays; and
 - iii. Appropriate system parameter information (i.e., changes in pay tables, ball draws, payouts over a predetermined amount, etc.).
 - e. Personnel access listing that includes at a minimum:
 - i. Employee name;
 - ii. Employee identification number; and
 - iii. Listing of functions employee can perform or equivalent means of identifying the same.

J. KENO AUDIT

1. The keno audit function is independent of the keno department.
2. For at least one shift every other month keno audit performs the following:
 - a. Foot the customer copy of the payouts and trace the total to the payout report.
 - b. Re-grade at least one percent (1%) of the winning tickets using the payout schedule and draw ticket. (This procedure can be reduced if an adequate

alternative software analysis is performed to the satisfaction of the Audit Division).

3. Keno audit also performs the following:

- a. On a sample basis (a minimum of five races per week) compare the film of the rabbit ears to the draw ticket (or equivalent document) and computer transaction summary;

Note: If a random number generator is used, then at least weekly the number generator report is reviewed for potential numerical patterns.

- b. Compare net cash proceeds to the audited win/loss by shift and investigate any large cash overages or shortages (i.e., in excess of \$25);
- c. Review and re-grade all winning tickets greater than or equal to \$3,000, including all forms that document that the proper authorizations and verifications were obtained and performed;
- d. Review the documentation for payout adjustments made outside the computer and investigate large and frequent payments; and
- e. Review all other pertinent documentation, as applicable (i.e., system exception information, etc.).

4. When one person operates the keno game:

- a. All winning tickets in excess of \$100 and at least five percent (5%) of all other winning tickets (inside and customer copies) are re-graded and traced to the computer payout report;
- b. Videotape of rabbit ears is randomly compared to computer draw tickets for at least ten percent (10%) of the races during the shift (not applicable for a random number generator); and
- c. Keno audit personnel review winning tickets for proper authorization pursuant to Standard #E.5. - Winning Ticket Verification and Payment.

5. In the event any person performs the writer and deskman functions on the same shift, the procedures described in Standard 4 (a) and 4 (b) above (using the sample sized indicated) are performed on tickets written by that person.

6. Documentation (i.e., a log, checklist, etc.) is maintained evidencing the performance of all keno audit procedures.

7. Non-keno management reviews keno audit exceptions, and performs and documents investigations into unresolved exceptions.

K. MISCELLANEOUS

1. Copies of all keno tickets, computer storage media, and the videotape of rabbit ears are maintained for at least seven days.
2. All copies of winning keno tickets of \$1,500 or more are maintained for inspection. This includes restricted copies.

L. MULTI-RACE

1. Procedures are established to notify keno personnel immediately of large multi-race winners to ensure compliance with Standard #E.5. - Winning Ticket Verification and Payment.
2. Controls exist to ensure that keno personnel are aware of multi-race tickets still in process at the end of a shift.

**SECTION XI
PARI-MUTUEL & OFF-TRACK**

A. SYSTEM SECURITY STANDARDS

1. Access to the computer system is adequately restricted (e.g., passwords are changed at least quarterly, access to computer hardware is physically restricted, etc.).
2. Procedures have been developed for use in case of hardware failure, power failure, fire, etc.

B. BETTING TICKET AND EQUIPMENT STANDARDS

1. All Pari-Mutuel and Off-Track wagers will be transacted through a computer system.

C. WAGERING STANDARDS

1. Whenever a betting station is opened for wagering or turned over to a new writer/ cashier, the betting ticket writer/ cashier signs on and the computer documents the writer's/ cashier's identity, the date and time, and the fact that the station was opened on either the unused ticket that is first in sequence or in a separate report.
2. Whenever the betting station is closed or the writer/ cashier is replaced, the writer/ cashier signs off and the computer documents the date and time, and the fact that the station was closed out on either the unused ticket that is next in sequence after the last ticket written or in a separate report.
3. Upon accepting a wager a betting ticket is created which consists of at least three parts:
 - a. An original which is transacted and issued through a printer and given to the patron; and
 - b. A copy which is recorded concurrently with the generation of the original ticket either on paper or other storage media (e.g., tape or diskette); and
 - c. An internally recorded copy to which access by employees is adequately restricted.
4. If a writer/ cashier voids a betting ticket then:
 - a. The word "void" is immediately written/stamped and the date and time at which the ticket was voided is stamped on the original; and
 - b. The writer/ cashier and the supervisor sign the ticket at the time of voiding.
5. The computer system will adequately document supervisory approval for appropriate transactions, as applicable.

D. PAYOUT STANDARDS

1. Prior to making payment on a ticket the writer/ cashier shall input the ticket for verification and payment authorization.
2. Upon computer authorization of payment the patron is paid, the patron's copy is marked "paid," noted with the amount of payment, and date stamped.

E. CHECKOUT STANDARDS

1. For each writer/ cashier station:
 - a. The system indicates the amount of cash that should be in a given drawer.
 - b. Writers/ cashiers are not permitted access to this information without supervisory approval.
2. For each writer/ cashier station a summary report is completed at the conclusion of each shift including:
 - a. Computation of net cash proceeds for the shift; and
 - b. Signatures of two employees who have verified the cash turned in for the shift.
3. For each writer/ cashier station a summary report is completed at the conclusion of each shift including:
 - a. Computation of cash turned in for the shift; and
 - b. Signatures of two employees who have verified the cash turned in for the shift.

F. COMPUTER REPORTS

1. At least the following types of reports are maintained (if applicable):
 - a. Write transaction report;
 - b. Payout transaction report;
 - c. Results report;
 - d. Futures report;
 - e. Unpaid winners report;
 - f. Exception report (e.g., past-post voids, past-post writes, voids, odds changes);
 - g. Daily recap report; and
 - h. Personnel access listing.

G. ACCOUNTING AND AUDIT FUNCTIONS

1. The Pari-Mutuel and Off-Track accounting and audit procedures shall be performed by personnel who are independent of the transactions being audited/accounted for.
2. Documentation shall be maintained evidencing the performance of all accounting and auditing procedures performed.

SECTION XII GLOSSARY

Accounting Department

Is that established in the tribal gaming operation's system of organization in accordance with these standards.

Actual Hold

Means coins-in and cash-in less coins-out and cash ticket payouts, less manual payouts less hopper fills.

Bank (Bankroll)

The inventory of currency, coins, chips and tokens in the cage, pit area, change booths, electronic gaming devices and on the playing tables used to make change and pay winning bets.

Base Jackpot

The fixed, minimum amount of a progressive gaming or electronic gaming device payout for a specific combination.

Base Level

The table games hold percentages that are calculated from the previous business year and are used to compare current table games hold percentages.

Bill Validator Box

Means a locked container securely attached to the electronic gaming device for the purpose of collecting bills. The machine number is clearly visible on the box.

Bill Validator Box Rack

Means a locked cabinet or rack where bill validator boxes are securely stored when not attached to an electronic gaming device.

Booth Cashier

An employee who is the custodian of a change booth fund.

Boxman

A pit supervisor assigned to an individual craps table.

Cage

A secure work area within the gaming facility for cashiers and a storage area for the gaming facility bankroll.

Cage Cashiers

Are the cashiers performing any of the functions in the Cashier's Cage as set forth in these standards.

Calibration Module

The section of a weigh scale used to set the scale to a specific amount or number of coins to be counted.

Card Game

A game in which the gaming facility is not party to wagers and from which the gaming facility receives compensations in the form of a rake-off, a time buy-in, or other fee or payment from a player for the privilege of playing, and include but is not limited to the following: poker, bridge, whist, solo and panguingui.

Cash Count Sheet

The form used to record the contents of the bankroll as they are counted.

Cash Equivalent

Means a treasury check, personal check, travelers check, wire transfer of funds, money order, certified check, cashiers check, a check drawn on the tribal gaming operation payable to the patron or to the tribal gaming operation, or a voucher recording cash drawn against a credit card or charge card.

Cash Loads

The initial currency, coins, chips, and tokens issued from a bankroll to a gaming table or an electronic gaming device.

Cashier's Count Sheet (check out sheet)

An itemized list of the components that make up the cage accountability.

Cashier's Count Sheet Reconciliation

A detailed reconciliation of the beginning to the ending cage accountability.

Change Booth

A booth or small cage in the gaming area that is used to provide change to customers, store change banks, make electronic gaming device fills, account for jackpot payouts, and make gaming receipt payouts.

Change Person

A person who has an imprest fund of coins, tokens and currency for making change for customers.

Chip

Means a non-metal or partly metal representative of value issued by a Tribe for use at table games.

Chip and Token Float

Means the dollar value of chips and tokens held by customers.

Class II

Means Class II gaming as defined in the Indian Gaming Regulatory Act.

Class III

Means Class III gaming as defined in the Indian Gaming Regulatory Act.

Closer

Means the original of the table inventory slip upon which each table inventory is recorded at the end of each shift.

Coins-In

Means the total amount wagered which includes physical coins-in and credits played. See also Handle.

Combined Pari-Mutuel Pools, or "Combined Pools"

Means the pari-mutuel wagers at one or more off-track wagering facilities being contributed into the pari-mutuel pools of a host association.

Commission

Means the Tribal Gaming Commission.

Compact

Means the Tribal-State of Oregon Gaming Compact adopted pursuant to the Indian Gaming Regulatory Act, 25U.S.C. s2706 et seq.

Count

The total funds counted for a particular game, electronic gaming device, shift, or other period.

Counter Game

Means keno, race and sports book and off-course mutuel wagering.

Credit

Means the smallest unit of value that may be used to play a game on an electronic game of chance or that may be redeemed in currency.

Credit Slip (known as a "Credit")

Is the document reflecting the removal of gaming chips from a gaming station in accordance with these standards.

Customer Deposits

The amounts placed with a cage cashier by customers for the customers' use at a future time.

Dealer

An employee who conducts a table game in a gaming facility.

Distributor

Means a person who obtains an electronic game of chance from a manufacturer and who intends to furnish it to the Tribe.

Drop

In table games, it is the total amount of cash and chips contained in the drop box. In electronic gaming devices, the "drop is the total amount of money removed from the drop bucket and bill validator box.

Drop Box

Is the metal container attached to a gaming station for deposit of cash drop/rake and certain documents received at a gaming station as provided by these standards. The game type, table number, and shift are indicated on the box.

Drop Bucket

A container located beneath an electronic gaming device for the purpose of collecting coins and tokens from the device.

Drop Count Card

A document prepared by the count team to record the amount of cash or chips by denomination, in a drop box.

Electronic Gaming Device

Means a microprocessor-controlled electronic device which allows a player to play games of chance, some of which are affected by skill, which device is activated by the insertion of a coin, token or currency, or by the use of a credit, and which awards game credits, cash, tokens, or replays, or a written statement of the player's accumulated credits, which written statements are redeemable for cash. A video lottery terminal.

Electronic Gaming Devices Supervisor

An individual with responsibility for electronic gaming device area and jackpots but does not include a person within the security department.

EPROM

Means an erasable programmable read only memory chip.

False Drop

The amount of cash or cash equivalents used to purchase chips at a gaming table at which the customer does not play.

Fill

A transaction whereby a supply of chips, coins and tokens is transferred from a bankroll to a table or an electronic gaming device.

Fill Slip (known as a "fill")

Is the document reflecting the distribution of gaming chips to a gaming station as provided in these standards.

Fiscal Year

Means the annual period used by a Tribe for internal accounting for its gaming operations.

Floor Person

For tables games, the first-level supervisor responsible for the operation and conduct of a game. In electronic gaming devices, the supervisor who approves jackpots and observes floor activity.

Foreign Chips

Chips that are redeemed for money or house chips by other than the issuing gaming facility.

Game Bankroll (table bankroll)

The inventory of gaming chips and tokens stored in the chip tray for each table game. Game bankrolls may be under the control of the bankroll or under separate general ledger controls.

Gaming Facility

Means any gaming facility as defined in the Compact in which a tribal gaming operation is conducted.

Gaming Facility Supervisor

Is a reference to a person in a supervisory capacity and required to perform certain functions under these standards, including but not limited to, Slot Managers, Slot Shift Supervisors, Lead Slot Technicians, Keno Managers, Keno Supervisor, Pit Bosses, Gaming Facility Shift Managers, the Assistant Gaming Facility Manager and the Gaming Facility Manager.

General Manager

Is the senior executive of the tribal gaming operation exercising the overall management or authority over all the operations of the tribal gaming operation and the carrying out by employees of the tribal gaming operation of their duties'.

Gross Gaming Revenue

The net win from gaming activities, which is the difference between gaming wins and losses before deducting costs and expenses.

Handle

The total amount wagered.

Hard Count

The count of the contents in a drop bucket.

Hold

See gross gaming revenue.

Hold Percentage

The relationship of hold to drop or handle.

Host, Host Association, or Host Track

Means the racetrack conducting a licensed race meet that is being simulcast.

House

A gaming facility.

House Bank Game

Each player opposes the gaming facility and the gaming facility opposes each player on behalf of the Tribe.

Imprest Basis

Means the basis on which Cashier's Cage funds are replenished from time to time by exactly the amount of the net expenditures made from the funds and amounts received and in which a review of the expenditure is made by a higher authority before replenishment.

Incompatible Function

Means a function, for accounting and internal control purposes, that places any person or department in a position to both perpetrate and conceal errors or irregularities in the normal course of his or her duties. Anyone both recording transactions and having access to the relevant assets is in a position to perpetrate errors or irregularities.

Independent Accountant

Means a professional accountant suitably qualified and sufficiently independent to act as auditor of the tribal gaming operation.

Inspector

Means an employee of the Tribal Gaming Commission duly appointed by the Commission as an inspector.

Intrastate Wagering

Means pari-mutuel wagering at an off-track wagering facility on Oregon racing events being run at an Oregon host association.

Jackpot Payout

The portion of a jackpot paid by gaming facility personnel. The amount is usually determined as the difference between the total posted jackpot amount and the machine payout. May also be the total amount of the jackpot.

Jackpot Payout Slip

A form on which the portion of a jackpot paid by gaming facility personnel is recorded.

Junket Office

A satellite office of a gaming facility that organizes trips (travel) to the gaming facilities.

Key Control Ledger

A ledger which authorized personnel sign to receive keys to sensitive areas, such as drop boxes, count room and cashier's cage.

Key Employee

As defined by the Tribal-State Compact agreement.

Leakage Current

Means an electrical current which flows when a conductive path is provided between exposed portions of an electronic gaming device and the environmental electrical ground when the electronic gaming device is isolated from the normal AC power ground.

Limit

The maximum amounts that a customer may wager at a particular table.

Logs

Document used for recording and tracking information and activity.

Machine Payout

The amount paid out to the customer by a coin/currency operated gaming device as the result of a winning combination.

Manufacturer

Means a person who manufactures, produces, or assembles an electronic game of chance, and who intends to furnish it to a distributor or the Tribe.

Master Game Report

(Game count sheet, stiff sheet, pit report) a form used to record, by shift and day, each table games' winnings and losses. This form reflects the opening and closing table inventories, the fills and credits, and the drop and win.

Matrix

Computer operated unit used to receive video signals from a camera and then routes those signals to a viewing monitor.

Meter

An electronic or a mechanical apparatus in an electronic gaming device. May record the number of coins wagered, the number of coins dropped, the number of times the handle was pulled, or the number of coins paid out to winning players.

Meter Reading Summary

A report reflecting the meter readings on electronic gaming devices. The number is recorded when the drop bucket and/or bill validator is removed from the cabinet.

Monitor

Television type viewing unit used specifically for closed circuit television.

Non-House Banking Card Game

Means a card game where the house does not participate in or have any interest in the outcome of the wager.

Off-Track Wagering

Means pari-mutuel wagering conducted on a race at a location other than the racecourse where the race is actually held.

Off-Track Facility, Intrastate Wagering Facility or Extended Wagering Facility

Means physical premises utilized for the conduct of pari-mutuel wagering on racing events being run elsewhere.

Opener

Means the duplicate copy of the table inventory slip upon which each table inventory is recorded at the end of each shift and serves as the record of each table inventory at the beginning of the next succeeding shift.

Oregon State Police

Means those members of the Oregon State Police, or their designated agents, specifically assigned by the Superintendent of State Police to tribal gaming regulatory duties.

Paid Outs

The total amount of money paid to customers as winnings on various games.

Pan-Tilt-Zoom (PTZ)

A camera that has the capabilities of panning 360 degrees right to left, up and down, and focusing closer to specific area.

Par Sheet

Means a document, provided by the electronic gaming device manufacturer, which depicts the possible outcomes from the play of an electronic gaming device, the probability of occurrence of each, and the contribution of each winning outcome to the payback percentage of the electronic gaming device.

Payout

The amount paid out on a winning wager.

Payout Schedule

(Award schedule card, award schedule) a statement printed on cards, paper, Plexiglas, and so on, of the payoffs or awards applicable to a particular game or device.

Pit

Means the area enclosed or encircled by an arrangement of table gaming stations in which gaming facility personnel administer and supervise the games played at the tables by the patrons located on the outside perimeter of the area.

Pit Clerk

Can be an employee in the pit who reports to the cage cashier and who prepares documentation such as requests for fills and credits, etc.

Pit Supervisor

The employee who supervises all games in a pit.

Player

Means one person to whom a hand has been dealt.

Policy

A plan or course of action designed to influence and determine decisions and actions.

Procedure

A way of performing, or a method used, in dealing with the affairs of a business.

Progressive Controllers

A progressive controller is any collateral or support equipment that links two or more electronic gaming devices to create a value representation on the screen of the gaming device different from the normal values. Progressive jackpot means a gaming machine payoff that increases and over time, solely as a function of funds played on a machine or group of machines.

Progressive Electronic Gaming Machine

An electronic gaming machine, with a payoff indicator, in which the payoff increases as it is played.

Race

Means the individual pari-mutuel race event.

Race Meet

Means the duration of a pari-mutuel race season at each individual racetrack.

Rake

Means the fee the gaming facility charges a customer for using a position at a gaming table.

Ram or "Random Access Memory"

Means the electronic component used for computer work space and storage of volatile information in an electronic gaming device.

Randomness

Means the unpredictability and absence of patten in the outcome of an event or sequence of events.

Random Number Generator

Means hardware, software, or combination of hardware and software devices for the generating number values that exhibit characteristics of randomness.

Recording Device

A video cassette recorder used to record video footage from a camera.

Reel Strip Settings

Setting positions on electronic gaming machine reels so that they correspond to the calibrations regulating winning combinations and payoffs.

Request For Credit

A document prepared by a pit supervisor or pit clerk to authorize the preparation of a credit slip.

Request For Fill

Is the document reflecting the request for the distribution of gaming chips to a table gaming station as provided in these standards.

ROM or "Read Only Memory"

Means the electronic component used for storage of non-volatile information in an electronic gaming device, including programmable ROM and erasable programmable ROM.

Runner

Means a gaming employee who transports chips/cash to and from a gaming table to a cashier.

Runs Test

Means a mathematical statistic that determines the existence of recurring patterns within a set of data.

Security Department

Means a department within, or utilized by, a gaming operation whose employees assist in maintaining compliance with all internal controls but do not participate in operating table games or electronic gaming devices, and do not participate in cashier cage operations.

Security Department Member

Means any person who is a member of the Security Department as provided in the organization of the tribal gaming operation in accordance with these standards.

Shift Boss

(Manager) the executive with overall responsibility for gaming facility operations during a shift.

Shill

Individuals used to encourage poker or other non-house banking card games play or maintain the minimum number of players required to sustain the game. Also, called a proportional player.

Short Pay

A payoff from an electronic gaming device that is less than the listed amount.

Simulcast or Simulcasting

Means live audiovisual electronic signals emanating from a race meeting and transmitted simultaneously with the running of the racing events at that meeting, and includes the transmission of pari-mutuel wagering odds, amounts wagered and payoff on such events, and other racing programming relating to the race animals or participants.

Slip Dispenser (Whiz machine)

A locked device used primarily in a cage to dispense fill and credit slips in numerical sequence.

Slot

A term often used to describe an electronic video lottery terminal.

Soft Count

The count of the contents in a drop box or bill validator.

Standard Chi-Squared Analysis

Means the sum of the squares of the difference between the expected result and the observed result.

Standard Operating Procedure

Refers to an established procedure to be followed in a given situation. Give step by step instructions so that anyone coming into the operation would be able to follow the instructions and actually perform the task.

Stationary Camera

A camera fixed into a set position and can only be moved manually.

Surveillance/Observation Room

Designated area to monitor surveillance equipment.

System of Internal Control

Plan of organization and all of the coordinated methods and measures adopted within a business to safeguard its assets, check the accuracy and reliability of its accounting data, promote operational efficiency, and encourage adherence to prescribed managerial policies.

Table Chip Tray

A container used to hold coins and chips at a gaming table.

Table Game

Means any Class III game allowed under this Compact except video lottery games, keno, off-race course mutuel wagering, and race and sports book.

Table Game Drop

Means the sum of the total amounts of currency removed from a drop box.

Table Game Win or Loss

Is determined by adding the amount of cash, the amount recorded on the loser, removed from a drop box, plus credits, and subtracting the amount recorded on the opener and the total of the amounts recorded on fills removed from a drop box.

Table Inventory

Total coins and chips at a table.

Theoretical Hold

The intended hold percentage or win of an individual electronic gaming device as computed by reference to its payout schedule and reel strip settings.

Theoretical Hold Sheet (Par Sheet)

A form that lists the characteristics of an individual electronic gaming device, such as reel settings, award schedule, number of coins that may be played, number of reels, theoretical hold, and other data applicable to an electronic gaming device.

Tilt Condition

Means a programmed error state for an electric gaming device which occurs when the electronic gaming device detects an internal error, malfunction, or attempted cheating. The electronic gaming device ceases processing the further input, output, or display information other than that indicating the tilt condition itself.

Token

A metal representative of value issued by a tribe for use in electronic gaming devices or at table games at the tribal gaming facility.

Tribal Gaming Operation

Means the economic entity that is licensed by the Tribe, operates the games, receives the revenues, issues the prizes, and pays the expenses involving the Class III games authorized under the Tribal-State Compact. A gaming operation may be operated by a tribe directly; by a management contractor; or, under certain conditions, by another person or other entity.

Tribe

The respective federally recognized Tribe, Band, Nation, Pueblo, Rancheria or any of its authorized entity(s), body(s), official(s), agent(s) or representative(s).

Vault

A secure area within the gaming facility where currency, coins, chips and other sensitive items are stored.

Video Gaming Device/Video Lottery Terminal/VLT

Means gaming equipment that is electric or electronic which plays a game involving an element of prize, chance and consideration, some of which are affected by skill, which device is activated by insertion of currency, or by the use of credit, and which awards game credits, which are redeemable by a written statement or ticket redeemable for cash. The gaming equipment may be linked to a central computer for purposes of security, monitoring, and auditing. An electronic gaming device. (Video gaming device, video lottery terminal, and VLT are all interchangeable.)

Wager

A sum of money or thing of value risked on an uncertain occurrence.

Weigh Count

The value of coins and currency counted by a weigh machine.

Weigh Scale

A scale that calculates (by weight) the amount of money in a given bucket/bags from an electronic gaming device/slot.

Work Papers

Documents containing the evidence to support the auditors or Compact compliance review findings, options, conclusions, and judgements.

Wrap

The procedure of wrapping coins. May also refer to the total amount or value of the wrapped coins.

**TRIBAL STATE COMPACT FOR REGULATION OF
CLASS III GAMING BETWEEN THE
CONFEDERATED TRIBES OF THE WARM SPRINGS RESERVATION
OF OREGON AND THE STATE OF OREGON**

AMENDMENT IX

This amendment is made to the Class III Gaming Compact between the Confederated Tribes of the Warm Springs Reservation of Oregon (Tribes) and the State of Oregon (the State) executed on January 6, 1995, and approved by the Secretary of the Interior on March 6, 1995. The terms of this amendment are in addition to and, except as specifically provided herein, do not supersede any of the provisions of the original compact, or Amendments I, II, III, IV, V, VI, VII and VIII thereto.

WHEREAS, the Tribes wish to extend the terms of Amendment VIII to the Compact which provide for regulation of house banked blackjack at the gaming facility, and

WHEREAS, the State agrees that the circumstances justify this Amendment, and

NOW THEREFORE, the Tribes and the State hereby approve the following amendment to the Compact:

I. Section I of Amendment VIII is amended as follows:

Paragraph IV of Amendment I expires on ~~May 1, 2001~~ **December 31, 2001**. Unless an extension of this amendment or a permanent amendment governing the operation of house banked blackjack has been negotiated and executed before the expiration of this amendment, the Tribes agree to terminate blackjack games at the gaming facility until a new agreement has been negotiated and executed. In the event that a compact amendment is under negotiation, the Tribes may replace blackjack tables with video lottery terminals at the ratio of eight terminals per blackjack table.

II. This amendment is effective as an extension under Paragraph IX of Amendment II and Paragraph VI of Amendment I Subsection G of Section 4 of the Compact, upon execution by the State and the Tribes, and submission to the Secretary of the Interior. It is the intent of both the State and the Tribes that this Amendment be fully enforceable as between the parties to it from and after the date it is executed and submitted to the Secretary of the Interior.

III. Section 7A4a is amended as follows:

4. a. The Tribes shall forward the applicant information to the State, along with the State required portion of the application fee as described in subsection C of this Section. The Oregon State Police shall conduct a background investigation on all prospective Primary Management Officials and High Security Employees, and provide a written report to the Tribal Gaming Commission within a reasonable period of time, but in no event shall such background checks exceed ~~thirty (30)~~ **sixty (60)** days without notice to and consent of the Tribes. **Upon agreement of the Oregon State Police and the**

Tribal Gaming Commission, the Tribal Gaming Commission may perform the background investigations. In the event that the Tribal Gaming Commission conducts a background investigation, it shall submit the completed report to the Oregon State Police within sixty (60) days, including the investigative report, criminal history report, credit report, one photograph, and available relevant tribal court records.

IV. Section 9B2 is amended as follows:

2. **Access to Records.** ~~The State is authorized hereby to review and copy, during normal business hours, and upon reasonable notice, all records maintained by the Tribal gaming operation; provided, that any copy thereof and any information derived therefrom, shall be deemed confidential and proprietary financial information of the Tribes to the extent provided under ORS 192.410 to 192.505. Any records or copies removed from the premises shall be returned to the Tribes after use. Only the State employee(s) formally designated by the State, and approved by the Tribes, shall be authorized to access Tribal gaming records pursuant to this subsection. Nothing in this subsection precludes the State or the Tribes from disclosing information subject to the Rules of Civil Procedure or Evidence in connection with litigation, a prosecution or a criminal investigation.~~
 - (a) **The Tribe and the State agree that the Oregon State Police shall be permitted and allowed to inspect and copy, during normal business hours, and upon reasonable notice, any and all Tribal records pertaining to the operation, management, or regulation of Class III Gaming by the Tribe, including but not limited to all Tribal Gaming Commission reports related to Class III gaming, all Class III related gaming contracts and documents related to employee or contractor license applications and background investigations, whether those records are prepared or maintained by the Tribe, the Tribal Gaming Commission or the Tribal Gaming Operation.**
 - (b) **The Oregon State Police shall return to the Tribes copies of tribal documents related to background investigations within 60 days of obtaining the copies. The Oregon State Police shall be entitled to retain copies of the following: the Tribal Gaming Commission investigative report, a photograph of the applicant, and information release forms. The Oregon State Police will not retain records of information regarding applicants developed by the Tribal Gaming Commission solely from tribal records which are not accessible in any other manner.**
 - (c) **The State acknowledges that records created and maintained by the Tribe, the Tribal Gaming Commission or the Tribal Gaming Operation, belong to the Tribe.**
 - (d) **The Tribe acknowledges that any records created or maintained by the State, including any records created or maintained in connection with the performance of the State's duties and functions under this Compact, other than copies of records obtained by the Oregon State Police in accordance with the foregoing sections, belong to the State and may be subject to the State Public Records Law,**

ORS 192.410 to 192.505. Information about the Tribe's Class III gaming activities, whether obtained from the Tribe or from any other source, that is included in a document prepared, owned, used or retained by the State in connection with its duties and functions under this Compact may be subject to disclosure under ORS 192.410 to 192.505 unless the State would be permitted to withhold that information from disclosure under ORS 192.410 to 192.505.

Examples of the kind of information that may be withheld from disclosure by the State under appropriate circumstances include:

- (1) "Trade secrets" as defined in ORS 192.501(2);**
- (2) Investigatory information compiled for criminal law purposes as described in ORS 192.501(3);**
- (3) Information submitted in confidence, as provided in ORS 192.502(3);**
- (4) Any information the disclosure of which is specifically prohibited by state or federal law.**

The parties agree that any dispute as to the State's disclosure of documents to third parties is governed by ORS 192.410 to 192.505.

- (e) Applications submitted to and retained by the Oregon State Police for Class III gaming licenses are State records and may be subject to disclosure under ORS 192.410 to 192.505 unless the State would be permitted to withhold that information from disclosure under ORS 192.410 to 192.505.**
- (f) The Tribe has agreed to allow the Oregon State Police access to sensitive financial, security and surveillance information that the Tribe considers confidential. The State acknowledges that the Tribe has voluntarily given the State access to this information and that the Tribe would not otherwise be required by law to do so. The State acknowledges that this information should be considered confidential. To the extent such information is included in any State records that are subject to disclosure, the State hereby obliges itself not to disclose this information when the public interest, including the public interest in maintaining the honesty, integrity, fairness and security of the Tribe's Class III gaming activities, would suffer by such disclosure.**
- (g) The State agrees to notify the Tribe promptly of any request for disclosure of documents containing information about the Tribe's Class III gaming activities. If the State is required to release any documents that contain information about the Tribe's Class III gaming activities, the State will notify the Tribe at least five (5) working days before any disclosure is made.**

- (h) **Nothing in this subsection precludes the State or the Tribe from disclosing information pursuant to state, tribal or federal rules of civil procedure or evidence in connection with litigation, a prosecution or a criminal investigation.**

Summary of HB 3659: Early Childhood System of Supports

HB 3659 represents a comprehensive investment policy for Oregon's youngest children and their families beginning with firstborn children. It builds on legislation passed in 1999 (SB 555) and has three primary policy elements:

1. It defines the goals and essential elements of an Early Childhood System of Supports;
2. It defines coordinated state and local responsibilities in carrying out the Early Childhood System; and
3. It builds on existing programs and links them together into a coordinated and efficient system.

Key Policy Element #1: Goals and essential elements of an Early Childhood System.

Bill Reference	Summary
Sections 1-4	<ul style="list-style-type: none"> • Legislative findings about the importance of the first years of life in the long-term development of the child. • Outlines the goals of Oregon's Early Childhood System: <ul style="list-style-type: none"> • Prevent abuse/neglect • Improve health and development • Promote bonding and attachment • Support parents • Ensure child readiness to learn • Ensure quality childcare • Integrate services

Key Policy Element #2: State and local responsibilities in carrying out the Early Childhood System

Bill Reference	Summary
<p>Section 5 (amends and clarifies early childhood portion of SB 555)</p>	<ul style="list-style-type: none"> • State Commission on Children and Families, Department of Human Services and Department of Education work together to: <ul style="list-style-type: none"> • Adopt benchmarks and outcomes • Consolidate administrative functions • Establish training and technical assistance • Identify research-based, age-appropriate screening and assessment tools • Develop a plan for evaluating outcomes & linking families to services • Adopt quality assurance standards for local programs and systems • Ensure the coordination of local plans • Connect with services to older children/families • Adopt rules • Report to the Legislature and Governor • Essential elements of the Early Childhood System are outlined. Participation in any or all services is <u>voluntary</u>. Services are provided to families who give their express written consent. <ul style="list-style-type: none"> • Early identification of children/families who need support • Home visiting services • Community-based services • Quality child care • Preschool • Health services • Mental health services • Alcohol and other drug treatment • other
<p>Section 7</p>	<ul style="list-style-type: none"> • State Commission on Children and Families, Department of Human Services and Department of Education develop a plan to share and link statistical data. Information may only be used to evaluate program outcomes and link families to services. <ul style="list-style-type: none"> • Conform with data directives set by the Legislature through the Statewide Enterprise Information Technology Strategy • Ensure confidentiality • Report to interim Joint Legislative Committee on Information Management and Technology

Section 8 | Section 8 was deleted by amendment. Subsequent sections were not renumbered.

- Section 9** |
- Local Commissions on Children and Families (as part of SB 555 planning) lead and coordinate the development of a local early childhood plan. The plan shall be put together by a broad range of participants representing parents and providers.
 - The plan itself shall:
 - Coordinate early childhood programs
 - Include components outlined in Section 5
 - Build on existing programs
 - Ensure culturally appropriate services
 - Use of private non-profit organizations is encouraged to raise awareness and support
 - Involvement of the medical community is encouraged

Key Policy Element #3: Build a coordinated and efficient system, based on existing programs

Bill Reference	Summary
Section 10	<ul style="list-style-type: none"> • Clarifies purpose of existing Family Resource Center statute. • Links Family Resource Centers to local plan (see section 9) • States requirement for express written consent for services
Section 11	<ul style="list-style-type: none"> • Housekeeping language that clarifies the word “entities” in existing statute
Section 12	<ul style="list-style-type: none"> • Links Relief Nurseries to local plan (see section 9) • Links Parents-as-Teachers programs to local plan (see section 9)
Section 13	<ul style="list-style-type: none"> • Amends existing Great Start grant stream so that funded programs are community-based and proven successful and are available to serve children who are newborn through eight years of age
Section 14	<ul style="list-style-type: none"> • Amends existing Healthy Start program to serve as the primary home visiting element of the Early Childhood System and to ensure that services are <u>voluntary</u> and non-stigmatizing. Makes the program consistent with the goals and elements of the Early Childhood System. • Ensures that information gathered in conjunction with voluntary screening is limited to statistical data and service provision.

- Adds to Healthy Start Statute:
 - Link to mental health and alcohol and drug services
 - Independent evaluation
 - Statewide training and quality assurance
 - Nurse home visitors
 - Coordination with local health departments
 - Disciplinary procedures for violation of confidentiality requirements and policies for voluntary participation by families

- Sections 15-22**
 - Removes “parents as teachers” program from Oregon Prekindergarten/Head Start statute.
 - Requires Oregon Prekindergarten services to be coordinated with the local plan (see Section 9)
 - Requires interface of data in order to track outcomes
 - Clarifies that all state and federal guidelines must be met

- Sections 23-24**
 - Sections 23 and 24 were deleted by amendment. Subsequent sections were not renumbered.

- Sections 25-27**
 - Requires Early Intervention /Early Childhood Special Education Services to be coordinated with the local plan (see Section 9)
 - Requires interface of data in order to track outcomes
 - Clarifies that all state and federal guidelines must be met, and all eligible children served

- Section 28**
 - Requires Commission for Child Care to create a Task Force for the purpose of recommending mechanisms to finance quality childcare. Recommendations must be made to appropriate interim committee(s) by October 2002
 - Requires recommendations on a long-term plan to provide quality child care that is driven by local needs

- Section 29-31**
 - Housekeeping to repeal citations in the printed bill, and remove “parents as teachers” program (see Section 15).

- Section 32**
 - Operative provisions
- Section 33**
 - Emergency Clause

HB 3659: Legislatively Approved Budget

HB 3659 represents a comprehensive investment policy for Oregon's youngest children and their families, beginning with firstborn children. The Legislatively Approved Budget for the Oregon Children's Plan contains \$60m (the Governor had proposed \$66m) to support the essential elements of the Early Childhood System of Supports as defined in Section 5 of SB 965. The \$60m includes \$21.3m in total new funds and \$38.7m in total funds redirected from budget cuts.

Essential Element of HB 3659 (Section 5)	Legislatively Approved Budget for Oregon Children's Plan
<ul style="list-style-type: none"> • Early Identification 	\$1.3 million (Oregon Commission on Children and Families and Dept. of Human Services)
<ul style="list-style-type: none"> • Home Visiting Services 	\$29.3 million (Oregon Commission on Children and Families and Dept. of Human Services)
<ul style="list-style-type: none"> • Community Based Services 	\$8.3 million (Oregon Commission on Children and Families)
<ul style="list-style-type: none"> • Preschool 	\$5.9 million to expand Oregon Prekindergarten/Head Start (Oregon Dept. of Education)
<ul style="list-style-type: none"> • Mental Health and Alcohol & Drug Treatment 	\$11 million (Dept. of Human Services)
<ul style="list-style-type: none"> • Evaluation and Technical Assistance 	\$ 3.4 million (Oregon Commission on Children and Families)

Funding for the Oregon Children's Plan will be on delayed roll out. Existing Healthy Start counties remain at 60% of full funding until January 2003. Counties currently without Healthy Start get 60% of full funding February 2002, and all counties will be funded at 80% of full funding January 2003. The legislature expects communities, businesses, and foundations to contribute the balance of funding.

Prenatal/At-Birth Screening

No. 1 in a series

Screening newborns and their families, on a voluntary basis, for medical and significant social risks can help assure that Oregon children are healthy and thriving. All families can use support when a baby is born. Not every family requires the same degree of assistance, however. Screening helps target the most appropriate services and supports for each individual family.

Public health departments, physicians, the Oregon Healthy Start Program, and others have been utilizing screening for a number of years. Screening and assessment has been utilized to provide families with an opportunity to take advantage of services and supports for which they are eligible. The Oregon Children's Plan (OCP) builds on these efforts in an attempt to reach more families and to match all families with the most appropriate services and supports.

Research findings show that critical physical brain development occurs by the age of three and that early experiences directly affect the way the brain develops. Comprehensive screening and assessment combined with early intervention for families at risk for poor child and family outcomes can give children the opportunity to succeed in life and in school. For example, the unborn child of a pregnant inmate would be identified as being at risk. Such early identification of a child's risk followed by appropriate treatment or social support can help him/her achieve optimal development and avoid future problems such as drug addiction, school failure, delinquency or incarceration.

The Governor's budget allocates \$4 million in new funds to screen all first-born children as early as possible under the OCP. Physicians, nurses, family support personnel and others will use a common tool to provide voluntary screening. If risks are found, a more thorough assessment will be considered and a plan for services will be developed, if desired by the family.

The goal of the OCP is to screen and provide follow-up support to all families who need and want it. The proposal in the Governor's budget is woefully underfunded, however, and predicted to reach only about 40% of those families needing it. Out of the 44,300 births in Oregon each year, 18,400 are first births. First births are initially targeted because many of the social risks for first births, if addressed, will be addressed for subsequent children as well. In addition, by considering a single cohort initially, the success of the entire OCP can be evaluated more accurately. Nevertheless, Oregon must continue to strive to provide all children in the state with access to the support provided by the OCP.

Assessment and Family Support

No. 2 in a series

More than half of Oregon's families with newborns will have significant risks that warrant additional support. In its report of January 2001, the Interim Task Force on Children and Families emphasized that services should be delivered seamlessly to families through collaboration and coordinated services.

The coordination of services for families occurs on multiple levels--from individual service providers, between programs, at the policy and planning level, and through the connection of services and projects to the community at large.

A key feature of the Oregon Children's Plan (OCP) is the coordination of existing programs into a system of supports for children and families. The Plan recognizes noteworthy efforts already in place throughout the state and seeks to make coordination and collaboration Oregon's standard for all early childhood services. For example, if after voluntary screening newborns are found to have significant risks, a more thorough assessment will be conducted to determine the level of need, family strengths and the best type of support to be provided. A multi-disciplinary team will work with the family through the assessment and will also serve as a point of contact for referral from physicians and other organizations.

Coordinated services are most effective in responding to the full range of a child's needs and circumstances. The most effective service coordination requires collaboration and communication among all system partners. To this end, the OCP emphasizes coordination at three levels:

1. The development of a plan to support the family
2. Integration of family centered services
3. Comprehensive community planning

Family Support Plan

Case management is a core organizing principle for family support programs. Vulnerable families often struggle with the cumulative effects of multiple risks. Families with multiple risks, whether short in duration or long-term, benefit from the development of an individualized family support plan that is regularly reviewed and updated by the family and monitored by a team. No single service strategy becomes a "stand-alone" intervention. Multiple needs are addressed by multiple services within the individualized support plan and bound together through the case management of a multi-disciplinary team.

Because the needs of overburdened families are complex, it is inadvisable for one individual alone to be responsible for assessing, and managing a complex support plan. There are a number of key dimensions (which may require more than one person's interaction with the family) including health, child development, parenting skills, mental health, substance abuse, and ability to meet basic needs. Whenever possible, the family support plan will provide for general family support with specialists available to offer more in-depth assessments and resources as needed. For example, children of incarcerated parents present special challenges which can be met through a coordinated family support plan. A comprehensive approach might include coordination of services to the children and their caregivers in the community while improving inmates' parenting skills and their interaction with their children. A coordinated approach is particularly critical for these families where caregivers often are not biological parents and many times are single parents.

In conceptualizing the team case management approach, home visitors are seen as the main contact point with a family, but the entire team should participate in assessment, planning and services. By using specialists as a resource to the entire team, those team members with specific training and skills are not locked into a single small caseload. Instead, they are able to utilize their skills on behalf of those who need it most

Family-centered Service Integration

Each day in Oregon, hundreds of children and their families face a multitude of problems associated with personal crisis or ongoing difficulties. The problems families face are interrelated at a variety of levels and in complex ways. Children and families at risk of one problem are often at risk for a number of other problems. It is often difficult to distinguish between problem areas. To the extent that the dynamics of individual and social problems are interrelated, it makes sense that solutions to these problems must also be integrated and multidimensional.¹

Integrating services recognizes that everyone plays a part in the success (or failure) of children and families. Family-centered systems of services vary according to the needs of each community and the availability of resources, but they are always:

1. **Comprehensive.** A variety of opportunities and services respond to the full range of child and family needs.
2. **Preventive.** The bulk of resources are provided at the front end to prevent problems, rather than at the back end for more costly crisis intervention services.
3. **Family centered and family driven.** The system meets the needs of whole families not just individuals and assumes every family has strengths. Families have a major voice in setting goals and deciding what services they need to meet them. Service delivery features, such as hours or location, serve family needs rather than institutional preferences.
4. **Integrated.** Separate services are connected by common intake, eligibility determination and individual family service planning, so that each family's range of needs is addressed.
5. **Developmental.** Assessments and plans are responsive to families changing needs.
6. **Flexible.** Frontline workers respond quickly to family needs.
7. **Outcomes oriented.** Performance is measured by improved outcomes for children and families, not by the number and kind of services delivered.²

Comprehensive Community Planning

The Oregon Children's Plan uses the framework of SB555, established by the 1999 legislature, which directs state and local commissions on children and families to facilitate the development of a coordinated comprehensive plan for children 0-8 and their families. The Oregon Children's Plan further defines the essential elements of the local planning process. This planning process:

1. Is based on local needs and strengths
2. Promotes collaboration and innovation, not the development of yet another program
3. Mobilizes communities to work toward a vision for their children and families

Communities work to achieve the vision by integrating the service delivery system in neighborhoods close to where families live and children attend school. Services are financed by providing flexible funds and tying expenditures to results. Families, neighborhood residents and community stakeholders are involved in decisions that affect their well-being.³

Success is the result of proven interventions employed by local design and the responsibility communities assume to improve the well-being of their residents. Effective Community planning leads to:

1. More supports and services available to families and children
2. Services the communities want
3. Services that are more accessible to families
4. Children showing improved outcomes
5. Community members with increased decision making about services and supports
6. Communities that are more aware of and are using more neighborhood services.⁴

Presently, the degree of coordination of early childhood services varies around the state. The Oregon Children's Plan supports successful efforts already in place. It calls for communities to mobilize their public and private partners in an effort to develop coordinated, family centered service systems that meet the needs of their children.

In-Home Support

No. 3 in a series

Providing services in the home offers a unique opportunity to transmit information and support for families. Home visiting delivers services where the family is most comfortable and enables the visitor to achieve a holistic view of the family. It also allows the visitor to better consider family circumstances when tailoring support. This is especially important when families are geographically, socially, or psychologically isolated.

Oregon has a long history of providing in-home support for families. Public Health nurses have been visiting families in their homes since 1915. Early Intervention/Early Childhood Education has been assisting children with developmental delays and other disabilities since the late 60's. The Oregon Healthy Start program, which consists of voluntary, intensive home visits provided by family support workers, has been supporting families in select counties since 1993.

The Joint Interim Task Force on Children and Families, in its January 2001 report, recommended that voluntary, universal home visitation services be provided in all Oregon counties to ensure that every newborn baby and its family receive appropriate community support.¹ The Oregon Children's Plan's (OCP) is based on this recommendation and builds on Oregon's existing in-home services.

A 1999 Rand report verified the value of in-home visits.² The authors found that in eight of ten model programs reviewed in their study of early intervention programs, home visitation was an important component. The study concluded that funds invested early in the lives of children could result in decreasing costs associated with drug treatment and justice system programs for delinquent youth. Without intervention, children of incarcerated parents for example, are five times more likely to be incarcerated than are their peers.³

Oregon's Healthy Start Evaluation found that for every dollar invested in early home visiting services, \$4.25 is saved through improved educational attainment, reduction in child maltreatment, and increased use of preventative health care.⁴

Under OCP, each community will provide, at the family's request, in-home services for children and families who have medical or significant social risks. Eligible children with disabilities, delays, or who are medically fragile will receive special education, therapy and other needed services. These services will be provided by nurses, social workers, early childhood specialists, and family support workers.

The Oregon Children's Plan will ensure that children of incarcerated parents receive needed services after their parents are released from prison as well as during the time of the parent's detention. The OCP acknowledges that it is important for these children to receive these integrated supports such as home visiting, to minimize the significantly higher risks that they face. A community corrections aspect of the program will build on the reality that the biggest home-visiting program in the state involves parole and probation officers. The OCP will train parole and probation officers who will work with offenders in child welfare awareness.

Of the \$66 million allocated in the Governor's 2001-2003 budget, \$4.1 million in new funds and \$29.2 million in redirected funds will go to the in-home element of the OCP. The OCP will include regular, voluntary contact during the first eight years of the child's life if needed. As such, the OCP will achieve the Legislature's desired goal of expanding Healthy Start to all 36 counties.

Furthermore, \$89.3 million is continued for services for eligible children with developmental delays and other disabilities through the existing Early Intervention/Early Childhood Education (EI/ECSE) program. These services may be provided in the home or other settings based on the individual needs of the family by licensed professionals (speech therapists, hearing specialist, vision specialists, etc.).

Substance Abuse & Mental Health Treatment

No. 4 in a series

Mental health services for young children and alcohol and drug treatment for their families are essential in assuring that children have ample opportunity to succeed. The Oregon Children's Plan includes both of these elements.

Mental Health Services for Young Children

Early childhood mental health interventions can help reduce risk factors, enhance protective factors, and support young children and their families in achieving optimal levels of development and functioning.

Sixty percent of Oregon's children evidence risk factors at birth that are correlated with later behavioral, educational, interpersonal, vocational, criminal, mental health and substance abuse problems. Identifying and addressing these multiple risks – early and simultaneously – can increase the likelihood of positive outcomes for children. It can provide them with an opportunity to succeed in school and avoid future problems such as drug addiction, school failure, delinquency or incarceration.

The need for early childhood mental health services is clear. Twelve to 22% of children aged 0 to 8 have diagnosable mental or emotional disorders. The Surgeon General's Conference on Children's Mental Health concluded that only 1 out of every 5 children with mental health conditions actually receives services.¹ World Health Organization evidence indicates that "by the year 2020, childhood neuropsychiatric disorders will rise proportionately by over 50% to become one of the five most common causes of morbidity, mortality and disability among children."² Childhood mental health conditions also persist into adulthood. Proceedings from the U.S. Surgeon General's 2000 Conference indicate that an estimated 74% of 21-year-olds with mental disorders had prior conditions in childhood.

Recent brain research confirms that if trauma, stress and early onset mental health conditions are recognized and addressed during the first few years of life, structural and functional changes in the brain that would otherwise compromise the child's success and self-sufficiency can be avoided or reversed.³

Growing evidence confirms that specific mental health interventions in early childhood, coupled with other social supports to young children and their families, can lead to positive outcomes for

children, families, schools and communities. These benefits accrue across the life-span, and can include: improved school readiness, lower utilization of special education, fewer grade repetitions, higher educational achievements, lower rates of criminal behavior, reduced emergency room visits, enhanced parent-child relationships, decreased rates of child abuse, improved maternal reproductive health, decreased maternal substance abuse, lower welfare usage, and higher rates of employment.⁴

Alcohol and Drug Services for Families

Parents or other family members who abuse drugs or alcohol constitute a significant risk to a child's chances of achieving success in life. While prenatal exposure to alcohol and other drugs has received much attention, many more children are harmfully exposed through the behavior of their parents and through the environment in which they grow up.

Nationally, 13 million children live with a parent who reportedly has used illicit drugs, and some 28.6 million children are living in alcoholic households.⁵ Sixty to seventy percent of the nearly two million inmates in American prisons test positive for substance abuse on arrest. These inmates are the parents of 2.3 million children, all of whom are disproportionately likely to follow their parent to jail.⁶ In a recent survey administered by the Oregon Department of Corrections, 55% of incarcerated women and 31% of incarcerated men report that their children have observed substance abuse in their homes.⁷

In Oregon, one out of seven adults abuses or depends on alcohol or other drugs - and most of these are parents. Their children may be at significant risk of maltreatment. Sixty percent of child abuse and neglect cases involve alcohol or other drugs, and two of every three children in foster care in Oregon come from families where a parent or parents abuse alcohol and/or other drugs.⁸ Parental alcohol and drug use also significantly interferes with the family's ability to secure and maintain employment.

Parental attitudes and behavior toward alcohol and other drug use and crime clearly influence the attitudes and behavior of children. In families where parents use illegal drugs, or where they are heavy users of alcohol or are tolerant of children's use, children are more likely to become drug abusers in adolescence.⁹ The risk is further increased if parents involve children in their own drug or alcohol-using behavior.

In spite of the clear correlation between parental substance abuse and the profound impact on their children, there are few treatment opportunities in Oregon to treat families affected by addiction. Most existing treatment models work effectively with individuals, but often do not provide services in the context of the entire family. National models identify and encourage a family-centered approach, which emphasizes strategies that support, strengthen, and empower families. A few such models have been implemented in Oregon. The need for these services greatly outweighs availability despite obvious success. RMC Research Corporation noted in a 2000 study "One persistent finding is the high degree of success achieved by this sample of clients in your (Oregon) treatment facilities...over 70% of the sample evidenced declines or remained abstinent in their use of alcohol or illicit drugs..."¹⁰ For every dollar invested in treating addiction, taxpayers save an average of \$5.62.¹¹

Oregon Children's Plan

Identifying and addressing the risks to children created by the early onset of mental disorders and the existence of parental substance abuse will increase the likelihood of positive outcomes for children. It will provide them with an opportunity to succeed in school and avoid future problems such as drug addiction, school failure, delinquency or incarceration.

As part of the effort to give Oregon's children the services and supports they need to become healthy, successful and productive members of their communities, the Oregon Children's Plan (OCP) allocates \$14 million in new funds for services. The dollars will allow families to access resources for mental health treatment and/or substance abuse treatment. Research supported models such as in-home and school-linked services, parent-child attachment facilitation, behavior management training, preventative skill building services for children, and other wraparound supports will be available as well as traditional alcohol /drug and mental health clinical care. These services will not duplicate existing services.

Sadly, there is far too little treatment available to protect Oregon's children. The 1999 Oregon Household Survey found that more than 400,000 Oregonians (380,000 adults and 25,000 youth) need access to alcohol or other drug treatment – and nearly half of these need state help to pay for their treatment. Yet, the state was able to treat only 75,000 per biennium.¹²

In 1999 the Legislature allocated \$10 million to cover the costs of state supported treatment. An additional \$56 million is needed. Over the last biennium, the need for substance abuse treatment has risen sharply for two reasons. First, Oregon's population has increased. And second, the increase in the percentage of the population needing state supported treatment has grown.

One of the guiding principles of an ideal mental health system is that mental health needs should be identified at the earliest point possible and at the youngest age possible. The Oregon Children's Plan will help make this ideal a reality for many of Oregon's children and families.

Early Learning

No. 5 in a series

Oregonians understand the importance of a good education. For many, educational opportunity paves the road to economic success and personal fulfillment. One important ingredient for future success is participation in an early learning program. Early learning opportunities provide a strong connection between early childhood supports and involvement in a school classroom. There is no doubt that the provision of quality early learning experiences will improve child outcomes. The Oregon Children's Plan will give children the opportunity to succeed in school by supporting access to quality child care and preschool learning experiences.

Access to Preschool

Preschool children range in age from three years to school entry. Preschools provide an enriched environment in which children have opportunities to learn and grow, through a planned schedule of activities, that promotes school readiness. To this end, preschools must include developmentally appropriate standards, curriculum and practices that address the following developmental dimensions:

1. Social emotional development
2. Physical well being
3. Language usage
4. Positive approaches to learning
5. Cognitive and general knowledge
6. Motor development

“High quality” preschools are key to achieving the outcome of school readiness. Preschool environments include private, faith-based, and cooperative preschools in addition to Title 1, Head Start and child care preschools. Achieving high quality in all preschool environments must be addressed in order to reach the “readiness to learn” benchmark.

Although children's readiness is a necessary part of defining school readiness, it is not sufficient for school success. Readiness in the child must be accompanied by:

1. School's readiness for children
2. Family and community supports that contribute to children's readiness

Oregon Head Start Prekindergarten programs serve families at or below the federal poverty level. These are Oregon's highest need and lowest income children. Each program strives to improve the child's social competence and school readiness through the following key program components:

1. Enhancing children's growth and development
2. Strengthening families as the primary nurturers of their children
3. Providing children with educational, health and nutritional services
4. Linking children and families to needed community services
5. Ensuring well-managed programs that involve parents in decision-making

Research indicates that children who participate in Oregon Head Start Prekindergarten are ready for school.¹ The typical four-year old child completing Head Start has knowledge and skills in early literacy and numbers, as well as social skills signifying readiness to learn in kindergarten. Children show familiarity with storybooks, understanding of print, and comprehension of a simple story. Head Start Prekindergarten four-year olds also perform above the levels expected for children from low-income families who have not participated in preschool. Almost 90% of parents are very satisfied with Head Start Prekindergarten program services, safety and promotion of child growth and development. In the Comprehensive Plans of October 2000, coordinated through the local children and families commissions, one of the most frequently reported needs was preschools that meet parents' needs.

Every Oregon child, particularly those at high risk or from low-income families, should have the chance to participate in an early learning setting or pre-school such as Oregon Head Start Prekindergarten and Early Head Start. Currently only 50 percent of eligible 3-and 4-year-old children in Oregon are enrolled in Oregon Head Start Prekindergarten. By allocating \$5.9 million in new funds (plus existing funds), the OCP has the targeted goal of serving at least 60 percent of eligible children in the next biennium. In addition, Oregon will work with the federal Head Start program to identify efficiencies that could lead to a greater enrollment by the end of the next biennium.

Quality Child Care

Child care is a critical community support for families in their efforts to achieve economic stability while fostering the physical, emotional and cognitive development of their children. For parents to find and retain employment, they must have access to child care that accommodates the demands of the workplace. For shift workers this means care available during non-traditional hours, or extended hours of care. It means care for children who are sick and care for infants and toddlers.

Child care must be available and affordable. When it isn't, families often are forced to make choices that either jeopardize their employment or create high levels of stress within the family. An inadequate supply of child care may lead to families putting together a patchwork of care arrangements that involves moving children among multiple caregivers, or choosing care solely on the basis of cost. This can be stressful for children and can have adverse impacts on the developing brain.

In addition to the convenience of the hours of care, parents are concerned with the adequacy of adult supervision, whether their children are happy in the arrangement and whether they get the opportunity to learn new things.²

The quality of the care and the competence of the child care provider most often drops in priority when balanced against the economic survival of the family. At the same time, however, we know that the years before a child enters school are critical to long-term social, emotional, and intellectual development. Consistency and quality of early care promotes later success in interpersonal relationships, in school, and ultimately in the workplace.

Providers need training in the basics of health and safety for children, as well as training in early child development to ensure that children in their care have a learning environment that promotes healthy development. Children need steady quality care from their families and from child care providers. The Governor and other advocates for children have been working since 1999 to ensure the health and safety of children in child care.

The supply of specific types of child care is inadequate. Contained in the Comprehensive Plans of October 2000, this message from all counties was virtually identical. Both rural and urban counties repeatedly mentioned shortages of infant and toddler care, special needs care, care for sick children, and care for children during non-traditional hours. In addition, the lack of affordable child care was a common theme for most working families. Finally, there was a consistent concern expressed about quality of available child care and the need to link quality care to provider training and professionalism.

The Oregon Children's Plan addresses these issues. Effort is being made this legislative session to ensure that all children in registered child care be in a facility that is reviewed for health and safety. OCP provides flexible funding for child care and other early learning environments through the Commission on Children and Families. The Child Care Division of the Employment Department will continue as the lead agency to increase and stabilize the supply and quality of child care.

Community Programs

Community Programs

No. 6 in a series

The Oregon Children's Plan (OCP) directs flexible funds to counties for use in stabilizing or expanding community-based programs for young children and their families. The flexibility of these funds will allow communities to build program models that:

- ? Provide ongoing connections between families and service providers
- ? Reflect the culture of the community being served
- ? Have an array of services that span developmental stages
- ? Provide links for the transitions of early childhood¹

Research suggests that positive growth is best supported when children are firmly grounded in their present stage of development and are appropriately challenged to move to the next stage. In contrast, too much change, inappropriate expectations, or abrupt change may interfere with development. Thus, the task facing home, school, and community partnerships is twofold: 1) to offer a stable base to children by connecting the home with service settings, and 2) to connect service settings to smooth transitions or changes.

Creating continuity means building bridges for the transitions young children and their families must naturally make.² The OCP will adjust the Great Start Program so that each county will be able to use flexible funds for research-proven services to children ages 0-8 years. This funding strategy will provide resources for community-based services and provide a smooth transition into school for the youngest, highest risk children. Community-based services are an important part of the OCP because some families prefer or want services outside the home.

The Oregon Commission on Children and Families (OCCF) will work with stakeholders to identify research-based, proven approaches in serving young children and their families. Communities will identify priorities and build program models that integrate appropriate proven approaches into their system of supports for young children.

Communities will be encouraged to seek other public and private partners and to combine funding streams to further expand these services. A growing number of very effective programs are already the result of communities working to develop a system of coordinated care for young children at the local level. This has been accomplished by Oregon's Crisis/Relief Nurseries, school-based teen parent programs, Early Head Start, targeted parent education models, and others.

Community-based programs complement home visitation supports by providing a supportive environment that encourages families to practice new skills and gain the input of others. Parents need an opportunity to process, practice, and integrate the lessons learned in family support programs. As parents learn new skills, community-based programs help prepare the children to respond to new approaches. For this reason it is important that parent and child services be coordinated. For many families, the anxieties of resolving day to day issues are reduced through linkages with community resources and the new skills they develop.

Community-based programs are an important element in the Oregon Children's Plan because they:

1. Provide an array of services supporting families
2. Replicate key proven approaches or program elements
3. Engage families through classes and groups resulting in improved family functioning
4. Utilize appropriately trained and skilled staff
5. Build family skills³

Measuring Success

The Oregon Children's Plan takes a comprehensive look at measuring the success of the system of services and supports for families with children birth to age eight. Performance measurement will be integrally tied to planning and community implementation. Performance measurement seeks to establish the extent to which planned activities were conducted, expected outputs were produced, and anticipated results were achieved. Effective utilization of information from performance measurement is realized through a quality improvement cycle of planning, implementation, and evaluation.

Utilizing performance measurement findings is dependent on several factors:

1. Commitment by top leadership—philosophically and with needed resources and technical assistance
2. Commitment by leadership, staff, and advocates to “continuous improvement” in which findings are used primarily to strengthen programs and initiatives—not primarily to inform budget cutting
3. Clear relevance of performance information to planning and implementation decisions
4. Effective, communication of findings¹

The Oregon Children's Plan strengthens efforts to measure success by:

1. Setting the well-being and success of Oregon's young children as a top priority
2. Demonstrating commitment at all levels of leadership—legislative, governmental, service providers, and parents
3. Identifying a common set of benchmarks for population outcomes*
4. Identifying a set of intermediate outcomes shared across the state system of services**
5. Developing a statewide data system to track and analyze outcomes

The Health Division will be responsible for maintaining the FamilyNet data system to track services and outcomes for young children and their families. This statewide system will allow accurate information that is easy to analyze with regard to effectiveness of multiple interventions, services and supports across the state. FamilyNet data analysis, together with data analysis from other DHS services, the Department of Education, census data, and other relevant data sources, will increase Oregon's capacity to assess the success of our children.

The coordinated data system will build on and expand the FamilyNet data system maintained by the Oregon Health Division. It will be developed in phases paralleling the developmental process of a child. Phase One focuses on the voluntary identification and screening process. As families participate in screening either prenatally or in the hospital as their child is born, FamilyNet will be used to connect the family with needed supports or services through local coordinated efforts. The second phase of development focuses on ensuring 1) that the child/family receives needed services through a family support plan; and 2) determining whether the service results in a positive change for the child and family.

In addition, benchmarks, outcomes from the statewide data system, and an independent third party's evaluation of the Oregon Children's Plan will be conducted. The Department of Corrections inmate parent education and structured visitation program—a program for children of incarcerated parents—will also be continually evaluated by the Oregon Social Learning Center (OSLC).

The Oregon Children's Plan will improve the success and well-being of our children by taking advantage of the earliest opportunities. Many programs and initiatives are needed to realize this ambitious vision. Oregon will reach this goal by taking steady, deliberate steps through hundreds of small and large community programs, collaborations, and other efforts. Indicators of progress from statewide benchmarks to individual program performance indicators are essential to guide each step toward these goals. Carefully planned, built on a solid empirical base, and consistently evaluated, these multiple community efforts will create a more positive environment for all Oregon children and families.²

*The success of the Oregon Children's Plan will be measured by the following high-level outcomes:

1. Decreased rate of child abuse and neglect
2. Decreased infant mortality
3. Decreased percent of infants whose mothers used alcohol and/or tobacco during pregnancy
4. Increased percent of children entering school ready to learn
5. Increased percent of children fully immunized at age two
6. Increased percent of women accessing early prenatal care

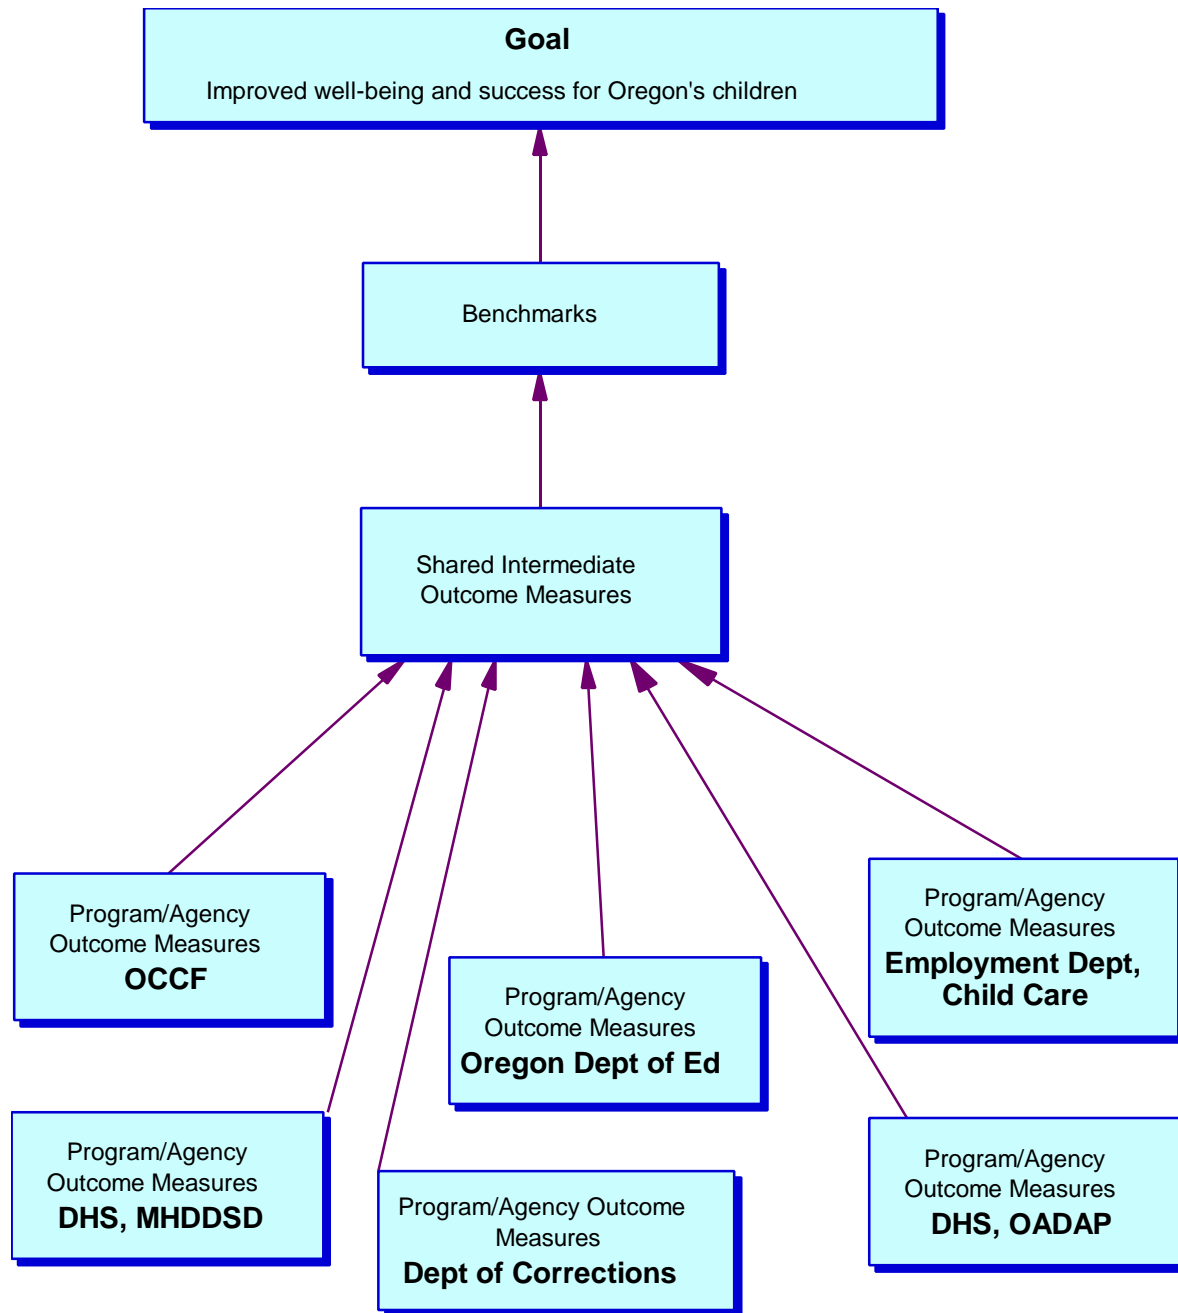

**Intermediate outcomes:

1. Percent of children who show improved patterns of growth and development
2. Percent of families reporting increased skills in parenting their children
3. Percent of families who regularly read to their children
4. Percent of families who have a primary health care provider
5. Percent of children receiving regular well-child check ups
6. Percent of children who are diagnosed with a disability and who are receiving early intervention services
7. Percent of families who are working and have income above 185 percent federal poverty level
8. Percent of children living in foster care or other alternative out of home setting
9. Percent of child care slots per 100 children under age thirteen
10. Percent of children in quality child care settings
11. Percent of children with special needs who receive care appropriate to their needs in normal child care settings

Day of Prayer and Remembrance

Opening Remarks by Gerry Frank

September 14, 2001

Salem, Oregon

Ladies and gentlemen, it goes without saying that the last few days have been amongst the most difficult for all of us who are privileged to live in this great country. The dastardly attacks on our nation succeeded only in one way - materially - and that doesn't really matter. They failed on the human side. The idea was to divide us and to scare us, and the opposite has been true.

Our nation today, ladies and gentlemen, is more united than ever before in the history of our great country. We see the great American flag waving in front of us - and ladies and gentlemen, as a symbol of that, did you know that there have been more American flags sold and flown in this country than ever before in the history of the United States?

We are a great melting pot in this country. That is what has made America great. And this is the time when we join hands and join our hearts and reach out to folks of all colors and all faiths. That is happening on the streets of Salem, Corvallis, Eugene, and Portland - all over the state of Oregon, and indeed, all over the United States.

The human toll in this wicked crime has been unbelievable. We heard of a gentleman who rode the rubble down 62 floors in the building in New York. We heard about a young girl whose father was killed who said to her mother, "Will daddy call me on my cell phone from heaven?" We heard of brave firemen and policemen carrying the cripples down the stairways in the World Trade Center. The stories of heroism are legendary. It makes us all so proud to be Americans, and today we are saluting those folks, those brave folks, who have done so much in these past few days.

Day of Prayer and Remembrance

Remarks by Senator Peter Courtney of Salem

September 14, 2001

Salem, Oregon

The sky was so very blue and sun was shining so brightly, as it probably does on a Tuesday in late summer when all those individuals got on those planes. When that woman said goodbye to her three little girls to work in that building that was ever so tall. When those individuals who were on the night shift, as their fathers had been on the night shift, and their sons, and maybe even their grandsons, and were exchanging with the other shifts in the fire department. The police officer who was about to go on duty, too. And the soldiers who had gone to that odd-shaped pentagon of a building, which symbolizes our military strength and the ultimate sacrifice we pay to defend our way of life.

Tuesday is a good day of the week. Usually. Then all of a sudden that blue sky, it was not blue any more. And that sun that had been shining was not shining. It was Armageddon for so many of our fellow countrymen and Americans. And today, there are individuals walking around the streets of New York City with pictures of loved ones begging people - begging people - to say whether or not they had seen them or heard from them. And there are valleys in their cheeks from tears, unspeakable pain.

Today when I went to work, a woman called into a talk show and said "I don't know what to do, I can't go back to being normal, so I called my grandmother, because grandmothers and grandfathers have wisdom, and said when will things be getting back to normal? Will it ever be back to normal?" And grandmother recited some things in history and said, "One day things do go back to normal." But then the grandmother said something that was very sad. Of course, she told her granddaughter, those who lost loved ones as well as those who lost their lives will never be normal again.

That is something that is so very important. That little soccer game that is coming for that little girl, and that little football game at the boys and girls club. And that little girl who leaves the field says if only daddy were here to see how well I played today as her grandmother and mother hug her. And that little boy says you know coach, my other coach would have been so proud of me. They are gone.

That dance recital - true story. She was working so hard to make her mother happy, that mother who was working in that tall building, but now it will be her grandfather with tears streaming down his cheeks who goes to that dance recital to tell her how pretty she looks and tell her how much her mother would have loved what she had done.

How about Thanksgiving? There will be a place set at the table, oh yes. I know that part of the country and the holiday. And there will be different generations there for Thanksgiving and they will do what they do, but no one will sit at that chair because the grandfather is gone. And on Christmas, that mother and daughter with beautiful blond hair, they will never open those presents that they put under that tree; they will never open another present again. I could go on and on.

How about this one - It's July 4th. It will come. There is nothing like a July 4th parade. Only this time, in that July 4th parade back there, and maybe even out here, there will be a gap in the parade. Because you see, the fire trucks, and the companies of individuals in the fire trucks - they are all gone. They are gone forever.

I would not want any of you here or anyone else not to go back to a normal way of life. But whatever we do, we can never have it so normal that we forget those who died so tragically and those who are grieving so much.

You know this little tie I am wearing? I am known to wear cute, funny ties. I was wearing this tie on Tuesday. I bought this tie two or three years ago. You know, it has firefighters on it and fire equipment. I was wearing this tie on Tuesday. I will keep this tie for the rest of my life, and I will wear it occasionally, but it will never be cute or fun again. It will be a memorial. Not only to those firefighters who unbelievably went back, those police officers who are still hanging in there, the military personnel - it is a memorial. We are part of them and they are part of us. We are their extended family. Normalcy, yes; but never so normal that we ever again forget or don't remember.

God bless Oregon! God bless America!

By Chief Jeffrey D. Johnson
Tualatin Valley Fire & Rescue
September 14, 2001
Salem, Oregon

At the turn of the century, Edward Croker, then fire chief of the City of New York, spoke about members of that organization who had been killed in a fire. He stated that when someone became a firefighter, their act of bravery had already been accomplished and that everything they did after that was simply in the line of duty.

The department Chief Croker once headed has now been struck by the worst tragedy in the history of the American fire service.

And make no mistake about it we all acutely feel the loss and share the sense of horror and grief. The fire service is a small family in a large country a family that learns, plays, and works together.

Last Tuesday morning, several hundred firefighters, police officers, EMTs, and military personnel, America's domestic defenders, charged headlong into the very face of danger. In spite of the odds, against all human instinct, they advanced to get people out of those buildings and attempt to stop what, for most of us, would be the catastrophe of a lifetime.

They advanced against an onslaught of people literally scrambling for their lives who cheered and encouraged the firefighters as they watched them climb toward their objective.

Their fateful advance was not born by ignorance of the dangers or some inherent absence of fear...but rather, the conscious, thoughtful and deliberate decision to risk their lives to save others. Bravery is not the absence of fear; it is the ability to move forward in spite of it.

What do you call people who thoughtfully contemplate:

Leaving their spouse a widow.

Their loved ones alone.

Their children parentless.

Their aspirations abandoned.

Their lives, not fully lived?

Yet, in spite of all personal risk, consciously risk their lives for people who they've never met.

We call them heroes.

Our public safety personnel are often not given a second thought until we need them. While Tuesday's events brought national attention to their work, we need them every day. Sadly, they also die and get injured with often-unrecognized regularity. Recent events here in Oregon have reminded us of just those risks.

We know that our job is not one that affords us a "do-over." When we are called, we've got to do it right the first time or lives are lost. And we live with the full knowledge that even getting it right doesn't guarantee a positive outcome.

Even when we're brave, even when we do everything right, the cards are sometimes tragically stacked against us. But for most of us our work is more than a job—it is a calling; and what happened Tuesday morning in New York City was an acknowledgment of that by hundreds of public safety professionals. Many lives were lost—but many lives were saved because, as a firefighter once put it, "It's what we do."

A German philosopher once rhetorically asked the question, "What, then, is your duty?" and responded "What the day demands." Last Tuesday, duty demanded the highest price ever of those who daily defend America against the force of nature and human malevolence. We mourn them, share our condolences with those who survive them, and perform our duty in their continuing memory.

Prayer By Lane Shetterly
Oregon State Representative
September 14, 2001
Salem, Oregon

God our creator,

Who sees what we cannot see,

Knows what we do not know,

Comprehends the things we cannot begin to fathom,

We have seen within the borders of this great nation this week the unspeakable
fruit of hatred:

Lives shattered,

Bodies broken,

Families torn apart,

Sons and daughters, fathers and mothers, friends ripped away in an awful
instant,

- Death and destruction, pain and agony on a scale we are afraid even to contemplate.

We have felt fear.

- Our sense of safety and security has been torn from us.

Like the Psalmist, we have cried out "My God, My God, why have you forsaken me? Trouble is near and there is none to help."

But in these days that have seen such great evil, and brought us such great sorrow, we rejoice that we have also seen so much that is good.

- We have seen strangers helping strangers, risking their lives for the lives of others.

We are in grateful awe of the courage and selflessness of the firefighters, police, military personnel, emergency medical technicians, nurses, doctors, iron workers, heavy equipment operators, blood donors and countless others who have seen their neighbor in need, and have answered the call.

- We thank you for these saints, and we ask for your protection over them as they continue their efforts in the days and weeks, and months to come. Bless them. Give them strength and hope to persevere.

We pray for those who have suffered the loss of family members, friends, loved ones and colleagues. Comfort them in these dark days, and give them courage to face tomorrow.

- We pray for the injured. Heal their bodies, and bind-up their hearts.

We pray for this nation and the people who make it great. Sustain us in hope, and in the liberty and freedom our forbears fought and died to win.

- We pray for the President, and his administration; our leaders in Congress and the military; our Governor, and the leaders of our state. Give them the wisdom and judgment to guide us in these difficult times.

Renew us, God. Restore us. Give us hope. Give us courage. Draw us close to each other and bring us closer to you. Unite us with new resolve to persevere through these dark days of tragedy.

- Help us remember, as we go from here today, these words of hope and victory.

God is our refuge and strength, a very present help in time of trouble.

- Therefore we will not fear though the earth should change,

Though the mountains shake in the heart of the sea,

- Though its waters roar and foam,

Though the mountains tremble with its tumult.

- There is a river whose streams make glad the city of God.

The holy habitation of the most high.

God is in the midst of her; she shall not be moved;

God will help her right early.

The nations rage, the kingdoms totter,

He makes wars cease to the end of the earth,

- He breaks the bow, and shatters the spear; he burns the chariots with fire!

Be still and know that I am God.

I am exalted among the nations,

I am exalted in the earth.

The Lord of hosts is with us,

The God of Jacob is our refuge.

Amen.

Water Resources Department

http://www.wrd.state.or.us/drought_watch/index.shtml

- 1) Drought Emergency Permits and Limited Licenses

As of June 7, 2001, the Department has approved 58 emergency ground water well permits and 12 limited licenses for drought-related ground water pumping, with a total water production potential of some 75,000 acre-feet. Permitting staff are detailed to our Klamath Falls watermaster office every week to provide assistance and ground water staff are reviewing applications on a priority basis. Applications are being turned around in 10 days or less. Staff time estimates are 5 FTE per week, with some \$75,000 in salary and expenses to date. The Department has also budgeted \$75,000 to rebate the drought permit application fees (averaging some \$800 per permit).

- Point of Contact:
Dwight French, Water Rights Section Manager
(503)378-8455 ext. 268
Dwight.W.French@wrds.state.or.us

- 2) Well Permit Use Extensions

The Department is extending the term of use of some 40 wells that had been previously issued for a five-year use period set to expire July 31, 2001. The use period will be extended to December 31, 2002 to allow the wells to be used for both this year's and next year's irrigation season while the Department completes its ground water studies and resolves longer term permit concerns.

- Point of Contact:
Dwight French, Water Rights Section Manager
(503)378-8455 ext. 268
Dwight.W.French@wrds.state.or.us

- 3) Ground Water Evaluations

The Department has three major ground water evaluations underway totaling some \$1.7 million in expenditures and approximately 4 FTE:

- a) Basin-wide cooperative study with Bureau of Reclamation, California Water Resources Department and local governments to characterize the aquifer, determine balance between aquifer recharge and withdrawals, and identify potential for sustainable ground water development and use. The three year effort to date has involved some \$780,000 in expenditures and 1.5 FTE.

b) The Shasta View demonstration project began with preliminary evaluations of four areas in the Basin for the potential to develop ground water for irrigation supply. The Shasta View area was selected, a monitoring well was drilled and a new pump installed in an existing production well, now being test pumped on a long-term basis to determine aquifer response and potential effects on other wells. The three year effort to date has involved some \$510,000 in expenditures and 1.5

FTE.

c) The Bonanza Springs project involves detailed monitoring and evaluation in the Bonanza area to assess potential for new development of ground water and identify actions necessary to avoid or mitigate potential effects on other surface and ground water users. This five year effort to date has involved some \$400,000 in expenditures and 1 FTE.

Point of Contact:

Fred Lissner, Ground Water Section Manager
(503)378-8455 ext. 204
Frederick.G.LISSNER@ wrd.state.or.us

4) Klamath Basin Drought Plan

The Department is currently engaged in a one-year project to develop a drought contingency plan for the Basin in cooperation with the Bureau of Reclamation, state and local agencies, and water user organizations. This effort will involve expenditures of some \$125,000 and 1.5 FTE.

• Point of Contact:

Barry Norris, Technical Services Division Administrator
(503)378-8455 ext. 246
Barry.F.NORRIS@ wrd.state.or.us

5) Water Resource Information Data Base

The Department has focused heavily on the Klamath Basin in terms of collecting, organizing and displaying water resource information in a user friendly, easily accessible manner. This includes development of a drought web page; the Klamath Basin stewardship and supply pilot project; well log data; GIS mapping; drought permit tracking; and customer service technology stations in our Klamath watermaster's office. Information made available through this effort has been key to fast-tracking new ground water development in both Oregon and California. Expenditures to date have totaled some \$160,000 with 1.5 FTE.

• Point of Contact:

Bob Devyldere, Information Services Section Manager
(503)378-8455 ext. 325
Bob.J.DEVYLDERE@ wrd.state.or.us

6) Klamath Basin Adjudication; Alternative Dispute Resolution; and Mediation Processes

The Department is the leader in a number of efforts and forums attempting to resolve long-term water allocation and management issues in concert with water quality improvements, watershed restoration, and species recovery to provide for long-term sustainability of all interests in the Basin. This multi-year effort to date has involved expenditures of some \$2 million with varying FTEs.

• Point of Contact:

Meg Reeves, Deputy Director
(503)378-8455 ext. 247
Meg.R.REEVES@ wrd.state.or.us

[Back To Drought Emergency Information](#)

Department of Human Services

<http://www.klamathbasin crisis.org/>

Services Needed

Some have estimated the total economic loss to the community to be as much as \$250 to \$350 million. Given this impact, 2,200 agricultural employees (1,200 of whom are reported to be ineligible for regular unemployment benefits) and 1,400 farmers or ranchers and their families will be in need of economic assistance, supplemental food, social services, substance abuse services and mental health services.

Assessing workforce impacts and disaster assistance application

A survey of needs and of resources available for drought response started in Klamath Falls on May 29, 2001 by the Federal Emergency Management Agency and Oregon Emergency Management. The survey involves the local office of the Oregon Human Development Corporation (OHDC) which will provide information on both seasonal and migrant farm workers and the number of persons affected.

The Klamath Lake Training Institute (known locally as The Work Connection) has hired four local farmers/ranchers to gather information on drought effects and available resources and to disseminate it to the farmers and ranchers of the area.

The Department of Community Colleges and Workforce Development is seeking Legislative approval to apply for a \$3,425,000 grant from the U.S. Department of Labor, Employment and Training Administration which will aid in retraining workers.

If the Klamath drought is declared a disaster by the President of the United States, that would allow Oregon to apply for a FEMA grant for a crisis-counseling programs in the area. This will also allow certain qualified Klamath residents to receive disaster unemployment assistance.

Department of Human Services readiness

DHS Director Bobby Mink has appointed Bob Marsalli, Adult and Family Service district manager for Klamath and Lake counties, to be the point person for the Department's response.

Marsalli will work with others in the community to determine how we can best do outreach, how we can expedite eligibility when appropriate, and how we can get itinerant teams to outlying areas.

The Department is also taking action to prepare the area's mental health system for any increase in demand for services.

The Department and its local partners will focus on outreach and crisis counseling for particularly vulnerable persons including children, the elderly, persons in various ethnic groups, persons with severe and persistent mental illness and those whose livelihoods are directly affected by the disaster.

Some strategies will include mobile outreach workers; services delivered in physicians' offices, home-based counseling, school-based counseling and education about drought effects, and community educators on the effects of stress on individuals and families.

Other DHS activities in the Klamath area

- An AFS family service worker will be out-stationed at the Merrill Health Clinic one day each week to assist folks in determining need and signing up for programs.
- Meetings with Malin/Merrill Town Councils to discuss ways to identify and address local needs.
- Considering a possible contract for training of community members in peer counseling.
- Local mediation center is developing projects to help parents and children in conflict.
- Ongoing contact with the Klamath County Farm Services Agency.
- Working with County Public Health Director on possibility of hosting a teen suicide prevention summit.
- Exchanging agency web links with the <http://www.klamathbasincrisis.org> web page coordinator and community action team lead, Cindy Deas.

[Back To Drought Emergency Information](#)

Employment Department

The Employment Department is committed to working with the Governor's office and the citizens of the Klamath Basin as we collectively address the disaster resulting from the water shortage in the Klamath Basin.

The Employment Department has four major program areas that may come into play in the Klamath County drought situation.

1. Our Unemployment Insurance program will provide unemployment benefits to those who are out of work as a result of the drought, providing that the employer with whom they were employed was covered by Unemployment Insurance. Specific information on which employers in the area are covered is available from our Klamath Falls office. Any worker who becomes unemployed as a result of the drought is encouraged to contact our office to determine their eligibility for benefits.

Our office is located at 801 Oak Avenue in Klamath Falls, (541) 883-5630, and at 18 S "G" Street Room 207 in Lakeview (541) 3501.

Additionally, should the President issue a Presidential Disaster Declaration, then Disaster Unemployment Assistance (DUA) insurance benefits become available for those workers who are not otherwise eligible for unemployment insurance including self-employed workers. The Employment Department estimates that approximately 880 citizens worked in non-covered employment during 2000. The attached document "Disaster Unemployment Assistance" provides more information on the specifics of the DUA program.

2. Our Employment Services program provides assistance to workers who are unemployed through our Claimant

Re-employment services, and for those who are still working through our regular Employment Services programs. These programs work with customers to help them locate current job openings for persons with their skills within the community or in other parts of the state should they be willing to relocate. The Employment Department staff also work with claimants to identify transferable skills for moving into different industries, and they identify training needs should they wish to move into different occupations. Our partnerships with other employment and training providers within the community enables us to refer claimants to other organizations who may have services and/or benefits available as well.

3. Our Labor Market Information program, delivered through Kevin Sicard, our Regional Economist in Klamath Falls, provides specific information on the industries within the area, the employment levels within those industries, and the projected job growth for those industries. This information is used by local elected officials, other employment and training organizations, and community based organizations to tailor their requests for assistance or program services for their citizens or customers. Kevin may be reached at the Klamath Falls office, (541) 883-5643 ext. 241, or by email at Kevin.G.Sicard@state.or.us
4. Our Child Care program can offer information and assistance to those who are interested in establishing a child care center. We are also able to refer interested customers to local agencies that can provide referrals to certified child care providers within the local area. If members of farming families decide to seek employment outside their farm, the need for quality child care may become of critical importance. Child care services to the Klamath Basin are provided out of our Medford office. They can be reached by calling (541) 734-7526.

Detail on funds, staff time, and other agency resources committed:

- Within the Klamath Basin, the Employment Department has 13.75 FTE engaged in the delivery of unemployment services and employment services to claimants; one Regional Economist; and one Unemployment Tax Auditor (our on-site tax auditor is Richard J. Bloomer). He can be reached at (541) 883-5628 or by email Richard.J.Bloomer@state.or.us

The department's local contact in Klamath Falls is Roger Rutledge, the manager of the Klamath Falls office. Roger can be reached at (541) 883-5642 ext 226. Roger's email is William.R.Rutledge@state.or.us

[Back To Drought Emergency Information](#)

Economic and Community Development Department

Oregon Business Development Fund Information:

<http://www.econ.state.or.us/businessfinance/subordin.htm>

Oregon Economic and Community Development Dept. Drought Assistance:

http://www.econ.state.or.us/0601PR/01_02806.htm

The Economic & Community Development Department, with 12 Regional Development Officers around the state and five regional teams, has been very active in working with communities and individuals affected by the drought.

Major activities include:

1. \$500,000 of Community Development Block Grants funds was made available to Klamath County to establish a revolving loan fund to assist farmers in drilling wells to expand the supply of groundwater for irrigation.
2. \$1 million from the Oregon Business Development Fund for farm and business loans are available for drought assistance statewide. Farm and business loans are available for up to 40 percent of costs for any drought-related problems, including drilling wells, purchasing feed, providing working capital or any business, ranching, or farming need.
3. Our Regional Development Officer in Klamath Falls has organized and attended many meetings on the water crisis in Klamath County including a meeting with the Klamath Irrigation District to discuss the delivery of emergency ground water to district customers. This would involve using the department's Special Public Works program.
4. Our Regional Development Officer from Marion County has attended many meetings in the North Santiam Canyon to discuss the water crisis at Detroit Lake, including a Town Hall meeting last Tuesday which identified 17 businesses that need assistance and meeting this next week with the Small Business Development Center, Mid Willamette Council of Governments, and the Departments Business Finance staff to discuss Detroit Lake business community needs.
5. Our Regional Development Officer and Business Finance staff met with Mike McArthur, Sherman county Judge, to discuss farmers' needs in that county. Judge McArthur requested that Department funds be identified to refinance existing lines of credit for farmers which will be needed in August.

The Department's point of contact is Tom Brumm, Intergovernmental Relations Manager. His phone number is (503) 986-0205

[Back To Drought Emergency Information](#)

Oregon Department of Agriculture

<http://oda.state.or.us/oda/drought.html>

ODA's role in drought disaster response focuses on four areas of effort--

- Creating the initial requests to USDA for disaster declaration;
 - Determining economic impact, in collaboration with OSU and USDA;
 - Assessing immediate, on-going, and long-term needs of the affected ag community; and,
 - Working with state and federal agencies to find resources to address needs.
1. Since early January, ODA staff have been monitoring the snow pack, stream flow, and lake level data from the Bureau of Interior, OR Water Resources Department, and other sources to evaluate the impact on agriculture in Klamath County and around the state.
 2. ODA prepared the initial economic impact analysis of water restrictions in Klamath County. This data was used in correspondence between the Governor and federal agencies. The economic impact analysis was also provided to the Drought Council meeting on March 23.
 3. ODA was instrumental in getting the Drought Council to recommend to the Governor to declare a State disaster declaration for Klamath County to enable the Bureau of Interior to seek additional funds for payment to irrigators.
 4. ODA has had extensive and on-going discussions with USDA/FSA about what assistance might be available through USDA programs in a prevented planting situation facing Klamath growers.
 5. ODA drafted the request to Sec. Veneman for a drought declaration; the draft was reviewed by Klamath County Commissioners and forwarded to the Governor for signature. On April 19, Sec. Veneman issued a letter to Gov.

- Kitzhaber designating Klamath County a disaster area.
6. April 11-12: ODA Director Ward accompanied the Governor to Klamath Falls and met with irrigators in small meetings as well as with the general public at county fairgrounds.
 7. Based on discussions with irrigators and others, ODA drafted additional letters requesting immediate federal assistance from the Secretaries of Commerce, Agriculture, and Interior. These letters were sent on April 16. The correspondence requested:
 - Payment to irrigators in lieu of water not delivered.
 - Assistance in seeding cover crops to prevent erosion and help with weed control.
 - When appropriate, USDA release surplus feed stocks from Commodity Credit Corp. (CCC) for animal feed to dairies and livestock operations.
 - USDA transportation assistance or CCC credit for moving livestock or shipping feed.
 - USDA assistance/cost-share for replanting perennials next year (mint, alfalfa, pasture) due to damage from drought.
 - USDA assistance in monitoring grasshopper levels over the next 12-18 months and control assistance if necessary.
 - Ensure SBA programs are available to non-farm businesses impacted by the farm situation.
 8. ODA provided information to grower/irrigator representatives about federal income tax issues due to drought affecting crop and livestock production. ODA is also working with the Oregon Revenue Department on issues relative to Oregon tax code for disaster situations.
 9. ODA staff are working with OSU on refinements to economic impacts as well as drought management information for growers, including topics such as dealing with weed control, fertilization, livestock and other concerns. This information is in the publication "Drought Strategies for Farmers" on our web site at: <http://www.oda.state.or.us/oda/Drought.html>
 10. ODA reviewed draft letter and proposals from Attorney General to Federal Judge Coffin on proposed mediation of water issues.
 11. ODA staff are in daily contact with the Klamath Soil and Water Conservation District, determining where/how technical assistance is needed. The Soil and Water Conservation Commission approved a special allocation of \$6,000 of technical assistance funding for the Klamath SWCD to hire temporary staff to assist with the implementation of the Emergency Watershed Protection (EWP) Program. The EWP Program is providing cost-share funding for landowners to plant cover crops for erosion control.
 12. April 30 -- ODA facilitates the allocation of \$6,000 to Klamath SWCD to hire additional temporary assistance for working with producers in land management, cover crop establishment, and other issues during drought/non-irrigation.
 13. May 1 -- ODA followed on requests from irrigators, urging WRD to quickly resolve any outstanding issues holding up permits for well drilling and emergency water usage from groundwater sources. WRD is working on rebating permit application fees if wells cannot be used. WRD is also extending the terms of 40 existing 5-yr. well permits through 12/31/02. Irrigators are generally very complimentary of WRD efforts.
 14. May 7 -- Director Ward met directly with Sec. Veneman in Chicago to discuss Klamath situation and urge immediate action and assistance.
 15. May 10 -- Director Ward sends letter to Sec. Veneman requesting urgent attention to assisting Klamath growers on FSA, NRCS, and other programs (posted on web site <http://www.oda.state.or.us/oda/Drought.html>).
 16. ODA works with the State Board of Licensed Professional Counselors and Therapists to develop list of licensed counselors in Klamath County. This and additional information were provided at an Information Open House on May 18-19. ODA had two staff at this event.
 17. May 15 -- ODA CAFO staff contacts all dairies in Klamath County and assesses feed needs and status of situation. This information is used in letters to USDA for emergency feed assistance.
 18. May 18-19 -- ODA visits with Klamath Co. Extension and tours Klamath area gathering information for further documenting impacts, needs, and Congressional assistance.
 19. May 22 -- ODA develops letter for State Board of Agriculture to Sec. Veneman and Congressional delegation urging action and assistance for Klamath Falls growers and community. (posted on web site: <http://www.oda.state.or.us/oda/Drought.html>)
 20. May 29 -- ODA noxious weed program staff consult with Klamath SWCD about weed control needs and funding

assistance.

21. May 30 -- ODA meets with OECD staff to discuss program development of state funds for well drilling.

The overall point of contact at ODA for information on these activities is:

- Brent Searle
Special Assistant to the Director and ADR Coordinator
Oregon Department of Agriculture
(503) 986-4558
bsearle@oda.state.or.us
<http://www.oda.state.or.us/>

[Back To Drought Emergency Information](#)

Department of Environmental Quality

- Although DEQ does not directly administer disaster relief programs for individuals, the Department is able to assist drought communities in the following ways:
 1. Providing technical assistance to people on well water, including identifying potential or actual sources of contamination and potential restrictions on its use,
 2. Assisting in identifying individual or community water conservation practices,
 3. Facilitating the use of properly-treated wastewater effluents for irrigating land, thus reducing the amount of fresh water needed for that irrigation,
 4. Monitoring and assessing ground water and surface water quality for pollutants such as bacteria, nitrogen, and toxic substances,
 5. Providing technical assistance for the management of wastewater treatment plants to ensure they run as efficiently and effectively as possible,
 6. Providing low-interest loans to communities to improve or upgrade their wastewater treatment plants,
 7. Providing low-interest loans to communities to design and implement nonpoint source controls, including water conservation measures,
 8. Responding to complaints that persons have illegally disposed of sewage or other wastewater in ways that may cause significant environmental damage due to the low stream-flow conditions,
 9. Restricting or prohibiting otherwise appropriate wastewater discharges from municipalities and industries that threaten water quality due to low stream-flow conditions.
- Over the long term, DEQ is preparing a corrective action plan known as a "total maximum daily load" (TMDL) for Upper Klamath Lake that will result in improved water quality throughout the basin. This should then result in fewer impacts to fish and wildlife in drought conditions and less impact due to irrigation withdrawals.

The Klamath Basin area is served by DEQ's Eastern Regional Office located at

- 2146 NE Fourth, Suite 104
Bend 97701
(541) 388-6146

There is also a local DEQ office at Klamath Falls at

- 700 Main Street, Suite 202
Klamath Falls, OR 97601
(541) 850-0295

The DEQ services listed above are available on an "as requested" basis by contacting one of the above locations.

-

In addition, DEQ is currently providing technical assistance to the City of Klamath Falls on the treatment and disposal of its effluent. We are also assisting with effluent reuse at the Klamath Cogeneration facility. The City is considering constructing facilities that would provide improved sewage treatment. The resulting high quality water will then be available for use by irrigation districts as well as cooling water for the cogeneration facility.

DEQ Resources Deployed in the Klamath Basin

- DEQ has one full-time employee working on the TMDL out of the Bend office plus additional laboratory resources to collect and analyze water quality samples.

DEQ also has 2-3 employees available to provide assistance on sewage treatment problems as well as other water quality issues.

DEQ's Point of Contact for Klamath Basin

- Interested members of the public should contact Dick Nichols, Water Quality Manager, in the Bend office by phone at (541) 388-6146, X251; and by e-mail at nichols.dick@deq.state.or .

Department of Energy

<http://www.energy.or.us>.

- The Department offers tax credits, low-interest loans, and grants to homeowners, renters, businesses, farmers, ranchers, and schools and local governments for investments in a wide range of energy- and water-saving equipment, technologies and practices. We participated in the recent Klamath Falls information fair.

Contacts:

Energy tax credits, Suzanne Dillard, 503-373-7565

Energy loans, Larry Gray, 503-378-8607.

[Back To Drought Emergency Information](#)

Department of Forestry

We are maintaining a strong communication link with other State, County and Federal agencies within the basin. We took part in the "Drought Relief Information Open House" this past month. At the Open House we were able to sign up four pieces of equipment and five individuals for our emergency fire resource directory. All of the equipment and the individuals were from drought effected farmers within the basin.

We have expanded our outreach to sign up as many of these individuals by placing an advertisement in the local newspaper recruiting people to sign up as fire fighting time keepers, fire camp helpers and several other fire emergency jobs that we would utilize in a large fire emergency. We currently are training the people that responded to our recruiting announcement, 32 people to date. We have two additional training days scheduled for the future.

We have offered our services to assist with hauling water to livestock. To date we have had no request for this service.

Another effort we are working on is in conjunction with the "National Fire Plan" and the Wildland Urban Interface grant money we received locally. We currently have two pilot projects identified, one being in the Klamath Basin "Chiloquin" and the other in Lake County. The grant funds are to be used for fuel reduction near homes with the main goal of creating defensible space. The tie to the drought relief on this project will be to supply a list of local contractors that can do the fuel reduction work to the landowners. Numerous local contractors have hired displace farm workers. Top date we are in the final planning phase of this pilot project with a projected beginning date for project work to begin of June 15th. We have applied for \$100,000 additional grant funds for this project.

Also, we are working with the Bureau of Land Management to receive an additional \$100,000 grant to fund an additional pilot project within the basin.

The primary contacts for information dealing with drought emergency is as follows:

- Bill Hunt, District Forester
- Danny Benson, Protection Unit Forester.

Mailing address for both is 3200 Delap Road, Klamath Falls, Oregon 97601

Phone number is (541) 883-5681.

August 30, 2001

Jim Connaughton, Chair
Council on Environmental Quality
360 Old Executive Office Building
Washington, DC 20500

Dear Jim:

Thank you for taking time to talk to me this morning. The purpose of this letter is simply to summarize my concerns about the need to get both a short-term and a long-term resolution to the crisis in the Klamath as soon as possible.

The mediation must propose a short-term resolution *quickly*. The current proposal of the federal agencies and the mediators is for the mediation to continue until February 2002. We believe it imperative, for a number of reasons, that the mediation proceed much more quickly and be concluded by November 2, 2001 at the latest.

First, people in the Basin have to make business decisions about the 2002 growing season.

Second, federal decisions about the Klamath Operating Plan have to run their procedural course. If anything, the optimal time frame has shortened since we made our initial recommendation.

Third, Senator Wyden's letter of August 14, 2001, to Judge Coffin states that he hopes the mediation effort will recommend any legislation needed for a solution, and press reports since quote the Senator as saying that the six-month time frame currently proposed in the mediation is too long. The Senator may convene a separate group to craft legislation, which would be a missed opportunity for mediation participants. The mediation has to produce some concrete recommendations for legislative action at the sessions on September 5 and 6 and October 3 and 4, at least for the short-term.

Finally, the political situation in the basin is, in my view, deteriorating rapidly. Last night's incident involving the protestors who climbed the fence onto federal property should make it abundantly clear to all of us the volatile nature of the status quo. In the absence of a clearly articulated short-term solution there is no reason for the protests to diminish. In fact the acts of civil disobedience will undoubtedly continue to escalate. This potentially dangerous situation -- which will bring no additional water into the basin -- serves no purpose other than to further polarize an already suffering community.

We have before us a unique opportunity create a road map for resolving this type of situation in a win-win manner. Unquestionably we will be seeing more incidents like this in the future and it is critical that we seize the moment and provide leadership toward a solution rather than simply reacting to events over which we have little or no control.

The federal agencies must lead by example -- they must divulge more about what they are doing, when they are doing it, and what they need from the other participants. The federal agencies have made clear that the Klamath Operating Plan is not subject to negotiation as such -- it is a federal decision that will be "informed" by the mediation efforts. They appear to be looking for commitments from all the entities in the basin that have something to contribute to species recovery, to enable them to exercise more flexibility on water allocation decisions. We can work with that approach, but we need to know what actions and commitments can influence the federal decision, what actions and commitments the other parties to the mediation need, and what actions and commitments the other parties are bringing to the table.

Oregon has distributed a list of commitments it can make today toward augmenting supply, reducing demand and improving habitat in the Basin. So far, Oregon is the only participant in the mediation that has done so. To date the federal government has not proposed even a conceptual solution, will not say when it will do so, and has not signaled which of the activities within their control or the control of the other parties might provide flexibility on the water decisions. The federal government's inability, or unwillingness, to be forthcoming provides cover for the other participants, none of whom have come forward with their needs or their commitments.

The federal government should make clear to all the other parties that the mediation will influence the federal decision. Concern is widespread that federal decisions are actually being made in some other forum while the mediation is proceeding. People are uncertain in what forum to expend limited resources. The federal government should assure the other participants that a successful mediation effort will influence the federal decision.

Jim Connaughton, Chair

August 30, 2001

Page 3

It is important that the federal water managers attend mediation sessions. Supply augmentation and demand reduction will certainly be part of the Klamath solution, but the federal water managers are not in attendance at the mediation sessions. If progress is to be made on these fronts, federal water managers, either from the region or the Klamath Project, need to attend.

I believe the crisis in the Klamath is solvable but it will take all the parties in the mediation, including the federal agencies, discussing in as much detail as possible what can and should be done in the basin to raise the environmental baseline, in order for the Services to be able to scientifically justify more flexibility in the water allocation in the basin.

Again, thank you for the time this morning and I stand ready to assist you in any way.

Sincerely,

John A. Kitzhaber, M.D.

JAK/NR/sm

March 26, 2001

The Honorable Ann Veneman
Secretary of Agriculture
U.S. Department of Agriculture
Washington DC 20250

Dear Secretary Veneman:

This letter is being submitted to request a natural resource disaster declaration for Klamath County, Oregon, for losses incurred due to drought, beginning in September 2000 and continuing.

Oregon is experiencing the second driest winter on record, and streamflow into the Upper Klamath Lake, in particular, is estimated to be 29 percent of normal. Precipitation for the rain year from September 1, 2000 through March 16, 2001 was 45 percent of normal. Snow water equivalent for snow pack in the Upper Klamath Basin as of March 23, 2001 is 40 percent of normal.

As a result of the on-going conditions and endangered species listings in this area, irrigators may be left without any water at all. Ninety-five percent of harvested cropland in the Klamath County relies on irrigation. A total of 224,500 acres are at risk, along with repercussions this will have in the local communities. Farmers have already sunk costs into winter wheat planted last fall and without irrigation, this will be totally lost. Because the drought is affecting producers planting decisions this spring, much of the remaining acreage will not go into production at all. This is a "prevented planting" situation, which will mean income lost to producers -- over \$65 million in farmgate value -- as well as to many local businesses where growers purchase inputs, which would otherwise put over \$45 million into the local economy.

Therefore, I hereby request that, as Secretary of Agriculture, you make a determination if losses to producers in Klamath County are sufficient to give this county a natural disaster declaration, making local producers if they qualify eligible for USDA assistance.

Sincerely,

John A. Kitzhaber, M.D.

March 30, 2001

The Honorable Ann Veneman
Secretary of Agriculture
Department of Agriculture
14th St & Independence Ave SW
Washington DC 20250

Dear Secretary Veneman:

I am writing to inform you that I have declared a state of drought emergency in Klamath County, Oregon, and have concurred with the Klamath County Commission's request for federal drought assistance. My state declaration will trigger a number of coordinated assistance activities by various state agencies, including emergency water permitting and transfer authorities of the Oregon Water Resources Department. I would hope to see a parallel effort by the federal government, and request any assistance your agency can provide in this time of critical water shortages in the Klamath Basin.

Given the effects of drought conditions on Basin water supplies, and the demands for water to meet the needs of endangered species, tribal trust obligations, agriculture, and wildlife refuges, it is essential that there be a coordinated state-federal response to the Klamath County drought emergency. This response must also be reflected in other federal agency actions affecting Basin water supplies and demands; in particular, decisions concerning the 2001 operation of the U.S. Bureau of Reclamation's Klamath Project.

In 1998, the State of Oregon encouraged the involved federal agencies to seek maximum flexibility and balance in the operation of the Klamath Project, with full involvement of the Basin's interests in the decision-making processes. This year's water conditions demand an even greater commitment to flexibility, balance and community involvement in the development of the 2001 operation plan. Moreover, the burden of rebalancing water supplies and demands, both for the short-term drought and to provide for long-term sustainability, must not be imposed on any one entity but spread to all parties in the Basin.

The Honorable Ann Veneman

March 30, 2001

Page 2

I encourage your direct involvement in these federal agency decisions to ensure they allow for implementation of a 2001 operation plan that will not irretrievably commit resources to the detriment of endangered species or tribal trust obligations, nor deprive Project irrigators and refuges of water for essential needs. The burdens of the ESA, tribal trust obligations, refuge requirements, and the long-standing commitment to the Basin's irrigation community must be equitably balanced and shared for all to survive this severe water shortage. I appreciate your cooperation and assistance in doing everything possible to help the Basin get through this crisis.

Sincerely,

John A. Kitzhaber, M.D.

JAK/NR/sm

May 7, 2001

The Honorable Ron Wyden
United States Senate
SH-516
Washington DC 20510

Dear Ron:

I want to again thank you and your staff very much for the important discussions we had during my recent trip to the nation's capitol. For the benefit of all Oregonians I look forward to continuing to work with you in partnership to address a number of the issues raised in those talks. I write to you today, however, on one specific matter of importance and immediacy -- obtaining relief for drought-stricken Klamath Basin farmers, their families, and the communities in which they live.

I ask that you consider making an immediate request to the Administration that funding for this relief be included in any supplemental appropriations request to Congress. Efforts are already underway, by my office and yours, among others, to address the desperate needs of the Klamath Basin community utilizing existing funds and programs. We have high hopes that these efforts will provide a useful amount of relief resources. But existing funds and programs can address only a fraction of the whole need, and additional funds must be appropriated. In addition to supplemental funds for FY 2001, additional funds may also be necessary from FY 2002 appropriations.

As usual with disasters of this sort, it is very difficult to arrive quickly at a precise estimate of impacts, including financial losses requiring relief. I have attached to this letter a document briefly summarizing early estimates. These are useful in scoping the approximate amount of financial relief we must seek for Klamath Basin farmers. As you can see, the total amount necessary will be at least \$150 million, and almost certainly will climb past \$200 million. The U.S. Bureau of Reclamation has estimated the impact of no irrigation water at approximately \$250 million. Clearly, these amounts are orders of magnitude beyond what state, local, and private relief efforts can contribute. The fate of Klamath Basin agriculture depends significantly on the federal government's ability to step forward with generous assistance for those hard-hit citizens.

The Honorable Ron Wyden

May 7, 2001

Page 2

As we have discussed previously, a true solution to the web of natural resource problems in the Klamath Basin requires addressing a number of different issues and opportunities relating to habitat restoration and protection, water quality protection, water supply development, water management, and the interrelationships among the many interested parties, both in Oregon and in California. Even as we press ahead at full speed to obtain financial relief for disaster-stricken farmers, we also must consider how immediate investments of public and private capital on these other strategies may be necessary to minimize the chance of such a disaster occurring again.

Thank you for your determination to help the people -- and wildlife -- of the Klamath Basin get through these difficult times. If you have any questions, feel free to give me a call.

Sincerely,

John A. Kitzhaber, M.D.

JAK/NR/sm

Oregon State Archives 1-13-03 copy of website. This is *not* current information and hyperlinks may not work properly.

Sharon Kitzhaber
Editorial
June 1, 2000

In May the state reported a 9 percent drop in teenage pregnancy rates from 1994 to 1998. This is significant. More teenagers are taking control of their lives and are making choices that will protect their futures.

But the fact remains that 3,176 girls in Oregon ages 10-17 got pregnant in 1998. That number is still alarmingly high. And girls as young as 10 are contributing to these statistics. Parents, schools, community organizations and teens should recommit themselves to this effort and find new ways to reduce the number of teens that get pregnant each year.

When girls get pregnant they experience serious consequences as a result of their actions: many drop out of school, go on welfare and end up earning less than their peers. We have a responsibility to make sure that Oregon teens are aware of the consequences of early sexual involvement, to ensure that they do not throw away their futures and place their children at risk.

As first lady, I helped bring STARS (Students Today Aren't Ready for Sex) to Oregon five years ago. STARS is an abstinence-based teen pregnancy prevention program. It uses a proven, skills-based curriculum to teach middle school children how to resist social and peer pressures which cause them to engage in sex too early.

We started with a pilot project at four schools in one school district in 1995. That year 3,284 girls ages 10-17 got pregnant in Oregon. Based on national data, we can assume that one third of those girls dropped out of high school and two-thirds of those teen mothers and their families ended up living in poverty. In short, teenage pregnancy cost many of these teens their futures and placed their children at greater risk for lower birth weights, criminal behavior and poor school performance.

Today, five years later, the STARS program is in almost 200 schools across Oregon, has involved over 2,000 teen leaders and reached over 80,000 teens since 1995. During this same time period, teen pregnancy has declined in Oregon. In fact, 660 teens did not get pregnant who would have gotten pregnant had our rates remained as high as they were in 1995.

STARS is just one part of this success story. The Governor's Action Agenda applies a comprehensive approach to teen pregnancy prevention. But we do know that STARS is making a difference and our evaluations and national studies attest to its impact. In post-program evaluations, 70 percent of STARS students indicate that the program helped them abstain from sex until they are older.

STARS is committed to further reducing the number of teens that get pregnant each year. We have set a goal of making the STARS curriculum available to every middle school student by the year 2002. And we have set our sights on delivering STARS not just in the public school classroom but in the community when needed.

Our first community effort is a new Latino outreach program called Estrellas (Spanish for "stars"). Teens in Woodburn experienced this new curriculum for the first time in April at Nuevo Amanecer, a housing development in Woodburn that is home to many Latino families. Estrellas follows the same curriculum as STARS and still utilizes teen mentors to deliver the program. The Estrellas curriculum will be translated into Spanish for the students who are not yet fluent in

English.

We brought STARS to the Latino community because the teen pregnancy rate among Oregon Latina families ages 10-17 has been increasing dramatically since 1990. In 1996, 44 out of every thousand Latina females ages 10-17 got pregnant. This is up from 33 per thousand in 1990. The Latina teen pregnancy rate is the highest of all ethnic groups both nationally and in the state.

I believe that STARS will make a difference in this community and that our work in the schools will further impact the overall teen pregnancy rate in Oregon. I also know that our work is best supported by families and other teens who can share a consistent message with their peers to refrain from sexual involvement and focus on the future. Remember you are their best defense against dangerous behaviors.

YOUNG TEENS BETTER PREPARED TO AVOID SEX, NEW STUDY SHOWS

Oregon middle school students show a 73-percent gain in knowledge about the risks of teenage sexual activity, and a 34-percent gain in skills to refuse sex, drugs and alcohol, after taking the five-session STARS program at school, a new study shows. First Lady Sharon Kitzhaber and representatives of the Oregon Health Division announced the findings at a news conference today at Sellwood Middle School in Portland.

The study showed that after receiving instruction through STARS:

- 97% of students knew that a girl can get pregnant the first time she has sex (only 61% knew this before STARS).
- 86% knew that over 80% of Oregon middle school students are not having sex (only 42% new this before STARS).
- 77% knew most boys in middle school are old enough to get a girl pregnant (only 40% knew this before STARS).
- 85% knew that most teens think it is best to wait to have sex until they are older (only 51% knew this before STARS).

In addition, more students after STARS said they would do the following when dealing with unwanted sexual pressure:

- say "no" without making excuses or giving reasons (69% vs. 55% before STARS).
- say "no" again and tell the person how the pressure made them feel if the pressure continues (75% vs. 56% before STARS).

More students learned to:

- say "no" without making excuses or giving reasons (69% vs. 55% before STARS).
- say "no" again and tell the person how the pressure made them feel if the pressure continues (75% vs. 56% before STARS).

The study also showed that students rated the STARS program very highly. About 75% said that it had helped "a lot" in understanding the risks of early sexual involvement, believing in personal rights to set limits, respecting people who say "no," abstaining from sex until older, and refusing to do things that aren't right for them.

"This study gives us concrete and very encouraging evidence that our young teens are better able to make the right decisions about their bodies and their futures," said First Lady Sharon Kitzhaber, founder of the STARS Foundation, which supports the state-delivered STARS program. "Even in the first two weeks after students received the program, some were already dealing with pressures to have sex, or use drugs and alcohol. But they told us that they were able to put the skills they learned in STARS to use, and are better prepared to walk away from those influences."

In a random sample of 20 Oregon schools in the Spring of 2000, 1,396 6th and 7th graders filled out the surveys right before and after participating in the STARS program. They were asked questions about their knowledge of adolescent sexuality, about how they would say "no" to unwanted pressure to have sex or do other things they didn't want to do, and the extent that they had already used the skills.

STARS worked equally well across various groups of students -- very few differences emerged in survey results across various student groups, such as gender, race/ethnicity, grade, school region and size, current school rank, educational plans, and family situation.

"These are very significant improvements in skills and attitudes," said David Dowler, Ph.D. of the Oregon Health Division, lead researcher for the analysis and report. "This is a successful first step in showing that STARS helps to increase the knowledge and skills important for personal decisions to delay sexual involvement."

The STARS program is presented once a week over a five-week period. The STARS curriculum is taught by trained high school students because younger students respond when older teens say, "It's better for teens not to have sex."

STARS (Students Today Aren't Ready for Sex) is an abstinence-only sex education program that is part of Oregon's comprehensive effort to reduce teen pregnancy. The study was sponsored by the Department of Human Services and conducted as a collaboration between the Adult and Family Services Division and the Oregon Health Division.

STARS teen leaders, adult facilitators and sixth- and seventh-grade classroom teachers were also surveyed. Teen leaders rated the program highly, saying it helped develop leadership skills and showed them they can make a difference. Most teen leaders -- 99% -- would encourage their friends to become teen leaders. Adult facilitators and teachers also rated the program highly, saying they were very satisfied with the training of teen leaders and the engagement of students during the sessions.

The STARS program is delivered to about 30,000 6th and 7th grade students within 121 school districts statewide each year. During the 2001 school year, almost 1,800 teen leaders will participate in the program. STARS receives state, federal and foundation funding, and is administered by the Department of Human Services, Adult and Family Services Division and by county health departments.

**FIRST LADY SHARON KITZHABER TO ATTEND
CELEBRATION FOR STARS LATINO OUTREACH PROGRAM**

Oregon First Lady Sharon Kitzhaber will attend a celebration on **Tuesday, July 11** for teens who participated in Estrellas, the first community-based STARS (Students Today Aren't Ready For Sex) program for Latino teens. The event will be held at **5:30 p.m.** at St. Luke's Parish-Rubis Hall, 417 Harrison Street in **Woodburn**. Families and community members are invited to join the 15 Estrellas graduates.

STARS is an abstinence-based teen pregnancy prevention program aimed at sixth and seventh graders. Estrellas, the new Latino outreach program is Spanish for "stars". Students attended classes for five weeks at Nuevo Amanecer, a housing development in Woodburn that is home to many Latino families. Like STARS, Estrellas trains teen mentors to deliver the message to their younger peers that "it's best for teens not to have sex."

"STARS is working to reduce teenage pregnancies in Oregon communities," Sharon Kitzhaber said. "Estrellas brings STARS' proven approach to teenage pregnancy prevention to the Latino community, which currently experiences the highest teenage pregnancy rate in the state."

GOVERNOR AND SHARON KITZHABER TO BOWL WITH STARS TEEN LEADERS

Governor John Kitzhaber and First Lady Sharon Kitzhaber will go bowling with 250 STARS (Students Today Aren't Ready for Sex) teen leaders from Portland, Beaverton and Clackamas counties, the North Coast and the Salem area on May 18. The annual event recognizes teens who mentor middle school students in the STARS program and it will be held at the **Hollywood Bowl, 4030 NE Halsey in Portland from 3:30 to 6 p.m.** Gov. Kitzhaber and Sharon Kitzhaber will attend the event from 4 to 5 p.m.

"Young people look up to and listen to their natural role models -- older teens," said Sharon Kitzhaber, founder and board member of the STARS Foundation. "STARS is able to provide those role models and give teens the skills they need to resist sex and other peer pressures such as drugs and alcohol, tobacco and criminal behaviors."

Gov. Kitzhaber said "teenage pregnancy rates have dropped 9 percent from 1994 to 1998 and STARS is certainly part of that success. Spending time with these teen leaders gives me hope that we can see that figure drop even further."

STARS is an abstinence-only teen pregnancy prevention program aimed at sixth and seventh graders. Trained teen mentors deliver the message to their younger peers that "it's best for teens not to have sex." STARS uses a proven, skills-based curriculum that teaches middle school children how to resist social and peer pressures which cause them to engage in sex and other destructive behaviors. The program has grown from a small demonstration project in four schools in Multnomah County to a program having reached over 80,000 children since 1995.

STARS is a public private partnership supported by Adult and Family Services, Multnomah County Health Department, Oregon Health Division, and the STARS Foundation. The teen leader celebration at Hollywood Bowl will be sponsored by the STARS Foundation and hosted by the state Teen Advisory Board Chair, Amy Lilly, a Barlow High School student.

**OFFICE OF THE GOVERNOR
STATE OF OREGON**

PROCLAMATION

WHEREAS; The State of Oregon faces a budget deficit, currently projected to be over \$870 million which must be rebalanced by budget reductions, one-time revenues and new revenues; and

WHEREAS; The State of Oregon needs to deliberate the opportunities for and the implications of economic stimulus initiatives; and

WHEREAS; The State of Oregon is still in need of a school stabilization fund to help tide our schools through economic downturns, and the state should continue to explore new ideas for a school stabilization fund; and

**NOW,
THEREFORE, I, John A. Kitzhaber, Governor of the State of Oregon, pursuant to Article V, section 12, of the Oregon Constitution, hereby proclaim Wednesday, June 12, 2002 at 9:00 a.m. to be**

THE CONVENING OF THE OREGON LEGISLATIVE ASSEMBLY

for the purposes of rebalancing the budget, to further deliberate economic stimulus opportunities and to consider new school stabilization fund proposals.

IN WITNESS WHEREOF, I hereunto set my hand and cause the Great Seal of the State of Oregon to be affixed. Done at the Capitol in the City of Salem in the State of Oregon on this day, June 9, 2002.

/s/ John A. Kitzhaber

John A. Kitzhaber, Governor

Paddy McGuire, Deputy Secretary of State

Oregon Administrative Rules
Chapter 122, Division 65

Allotment Reductions to Balance Budget and Prevent Deficit

122-065-0010

- (1) (a) The Department of Administrative Services (Department) has determined that probable receipts from taxes and other revenue sources for 2001-2003 General Fund appropriations will be less than anticipated, and that consequently the amount of General Fund revenue available for the remainder of the 2001-2003 biennium for 2001-2003 appropriations will be less than the amounts estimated or allotted therefor. Pursuant to ORS 291.254, acting on this determination and with the Governor's approval, and following notice to the agencies affected, the Department is reducing allotment amounts for the remainder of the 2001-2003 biennium to balance the state's budget for the 2001-2003 biennium and prevent state government from incurring a deficit in violation of Article XI, Section 7 of the Oregon Constitution.
- (b) The reductions specified in Section 2 of this rule (Selective Reductions) take effect on the date on which the Department files the rule with the Archives Division, Secretary of State and will be reflected in agency allotment estimates, beginning with those submitted to the Department for the fourth quarter of the fiscal year ending June 30, 2002.
- (c) The reductions specified in Section 3 of this rule (Alternative Reductions) take effect if, and on the date that, the Department is legally precluded from implementing all of the Selective Reductions, by action of a court or otherwise.
- (d) If one or more individual allotment reductions made under Section 2 or 3 of this rule is for any reason held to be invalid or unlawful, the remaining reductions shall not be affected but shall remain in full force and effect in accordance with the terms of this rule, and to this end the reductions made by this rule are severable.

(3) Alternative Reductions

Moneys allotted from General Fund appropriations for the final five quarters of the 2001-2003 biennium to agencies subject to the allotment system established in ORS chapter 291 are reduced by .8055%.

Moneys allotted from appropriations made from Other Funds and Federal Funds are reduced to the extent required by the reductions in amounts allotted from General Fund appropriations.

(4) On a schedule to be established by the Department, each agency for which reduced allotments are implemented under this rule must submit to the Department estimates for remaining allotment periods of the 2001-2003 biennium that are consistent with the implemented reductions.

OREGON TRANSPORTATION INVESTMENT ACT - 2002

Last week, the Oregon Transportation Commission released \$400 million to fund over 130 road and bridge projects throughout Oregon through the Oregon Transportation Investment Act (OTIA) of 2001. This was a direct result of a cooperative effort between stakeholders, the legislature and the Governor. When combined with the \$300 million already spent every year on Oregon state highways, over 7,000 family wage jobs for Oregonians are currently supported by these investments in highway projects.

The Oregon Transportation Investment Act of 2002 (OTIA-2002) will address over \$750 million in badly needed road repair and congestion needs, create over 2,000 transportation-related jobs and do it all for \$15 more per year per vehicle. With the cooperation of the legislature, we could provide a real engine for economic recovery, invest utilizing extremely attractive bond rates and build on the excellent policy established in OTIA-1.

What Changes?

- ◆ Raise auto registration fee \$15 per year. (From \$30 to \$60 every two years)
- ◆ Raise weight-mile tax on trucks in an amount sufficient to cover cost responsibility.
- ◆ Oregon is currently 50th in the United States in registration fees. This will place us 45th.
- ◆ Generate \$60 million to \$70 million per year for road and bridge investments.
- ◆ Provide roughly \$40 million next biennium for counties and \$28 million for cities to meet their critical road needs.

What Do We Invest In?

- ◆ Invest \$750 million in road and bridge improvements.
- ◆ Utilize a portion of the state's \$70 million annual commitment for bridge repair and construction to back \$400 million in bonds to meet critical bridge repair needs.
- ◆ Utilize the state's share of the new revenue stream to back \$350 million in bonds for road repair and improvement projects.
- ◆ Geographically spread projects and utilize the good work performed by the Oregon Transportation Commission in reviewing \$1.5 billion in road and bridge projects identified through the OTIA-1 process.
- ◆ Focus on road and bridge improvements that will positively impact Oregon economic development. Reserve significant funds for strategic road investments necessary to retain, expand and recruit Oregon businesses.

Who Benefits?

- ◆ Oregon businesses that want to move products. Oregonians who want to move through congestion. And the state of Oregon and its communities as more funds will allow us to more aggressively pursue federal transportation dollars to make repairs on the interstate highway system.
- ◆ Oregon cities and counties that desperately need more dollars to fix potholes and ensure that farm-to-market roads are passable.
- ◆ Oregon employees and contractors. Conservative estimates from economists tell us that for every \$1 million invested in Oregon roads, roughly 20 family wage jobs are created. This package will create and sustain thousands of jobs over the next three biennia and generate millions for Oregon's economy—all for a \$15 annual fee per car.

April 26, 2001

Ron Eachus, Chairman
Oregon Public Utility Commission
550 Capitol Street NE STE 215
Salem, OR 97301-2551

Dear Ron:

I was obviously disappointed to read your comments of last week attempting to characterize my reasons for not re-appointing you to the Public Utility Commission (PUC). Your characterizations are without foundation and require me to respond.

You raised the issue of your re-appointment on April 2nd in a meeting with Bill Wyatt, my Chief of Staff, and indicated that while you had heard rumors to the effect that you would not be re-appointed, you wanted to be sure that if that were the case you could have an opportunity to influence the point of transition. Specifically, you indicated that you did not want to leave immediately after the August – September rate cases, because you did not want significant rate increases to be your last remembered action as a PUC Commissioner. Further, you hoped to stay through the end of the year so that you could conclude the implementation of SB 1149, the passage of which represented a milestone of which you are justly proud.

At my request you met with me on April 9th. At that meeting I told you that I would not be re-appointing you to the PUC. I congratulated you on 14 years of service to Oregon and its utility ratepayers on whose behalf you have been a champion. I told you that we would accommodate your desire to stay to the end of the year. You thanked me and left my office. The next day Bill Wyatt notified you that we would be appointing Senator Lee Beyer to the Public Utility Commission in the vacancy created by the conclusion of your term. Senator Beyer's term as a PUC Commissioner was to begin on January 1, 2002.

Ron, you have been a bright, thoughtful and impassioned consumer advocate on the PUC. Oregonians are in your debt, whether they know it or not. In the aftermath of the AT&T breakup, you and the Commission did an excellent job of bringing pressure to bear on U.S. West to improve what had been a rapidly declining level of service. You played a significant role in the development of SB 1149 from last session and helped us avoid the pitfalls of California in the process.

In many respects you have been the Commission's greatest asset; but, it must also be said, you have been its greatest liability as well. You are gone a significant amount, you have a tendency to personalize controversial matters that come before the Commission, and your relations with fellow Commissioners and the Legislature are often unnecessarily tense and difficult. Your comments in the paper only serve to underscore an unhealthy sense that the Public Utility Commission is about you – it isn't.

I have concluded that, under the circumstances, a quick transition would be in everyone's interest and have therefore directed that Roy Hemmingway is nominated for the vacancy created by the conclusion of your term and that he will begin immediately upon confirmation.

Sincerely,

John A. Kitzhaber, M.D.

ENERGY CONSERVATION PACKAGE

Oregon is facing unprecedented energy challenges. Any plan formed to meet those challenges must include energy conservation as an essential ingredient. This energy conservation package focuses on nine means for meeting Oregon's need both for immediate and for longer-term energy savings.

Objectives

1. Trim the average yearly growth of electricity use in Oregon by at least half (50 average megawatts a year)
2. Provide enhanced incentives for homes and businesses to accelerate energy conservation
3. Reduce the energy burden on Oregon's low-income households
4. Improve the efficiency of state government to save energy and reduce the tax bite of the state's energy use

Package

1. Retain on schedule the 3 percent electricity "public purpose" charge to provide a stable, predictable source of funding for conservation and renewable resource investments.
2. Directs \$10 million in lottery bond proceeds to provide public and private building owners with extremely low-interest financing for energy efficiency improvements and technical assistance to accomplish improvements.
3. Continue the residential tax credit to provide incentives to households to buy energy-efficient appliances and install highly efficient space and water heating systems (SB 520)
4. Expand the business energy tax credit to provide enhanced incentives to small businesses to install energy-efficient lighting and heating/cooling systems (SB 521)
5. Require state agencies to conserve energy by 10 percent in existing buildings and by 20 percent in new buildings (amend HB 3788):
 - Require new and remodeled state buildings to incorporate all cost-effective energy-efficiency measures
 - Require state agencies to buy energy-efficient equipment and products
 - Require state agency purchase of renewable-generated power
 - Require development and implementation of a state energy conservation investment plan
1. Review and upgrade the energy provisions of state building codes to incorporate all cost-effective measures.
2. Establish electricity-pricing mechanisms that encourage conservation such as tiered rates and time-of-use pricing.
3. Increase funding for low-income energy programs:
 - Dedicate \$10 million annually for low-income electric bill payment assistance (HB 2075)
 - Support the doubling of funding for federal low-income energy programs
1. Increase federal funding for conservation and renewable resource programs:

- Extend and expand the federal production tax credit for solar, wind, geothermal and biomass power plants
- Establish federal tax credits for the weatherization of homes and for the purchase of energy-efficient home appliances.

ENERGY FACILITY SITING PACKAGE

Oregon is facing unprecedented energy challenges because demand for energy is outstripping supply. Energy conservation can help meet some of that demand, but the state also needs new sources of electricity generation.

Oregon's effective process for the review and siting of new power plants has led to 1300 megawatts under construction today and 2700 megawatts under review. However, that process can be reformed to facilitate quicker development of new electricity supplies without compromising Oregon's environment. This siting reform package proposes changes to the state's energy facility siting process both to stimulate immediate electricity supplies and to speed the development of longer-term investments in generation.

Objectives

1. Achieve 1000 megawatts of new generation from temporary power plants, wind power plants and conventional power plants by this winter.
2. Spur the development of environmentally sound wind, solar and geothermal power plants by easing regulatory requirements.
3. Cut the review time of an application for low-impact conventional power plants from 14 months to nine months.
4. Maintain a strong state role in the siting process to protect public health, safety and the environment and to ensure continued ample opportunity for citizen comment.
5. Provide for quick start-up of emergency generators in the event of power outages.

Short-Term Siting Bill (SB 843)

1. Exempt temporary power plants less than 100 megawatts from state siting review:
 - Power plant developers must get air- and water-quality permits and local land use approval before beginning construction.
 - Power plant developers must meet Oregon's standards for reducing emissions of carbon dioxide.
 - Plants may operate no more than 24 months unless they apply for a permanent site certificate.
1. Exempt emergency, stand-by generators from state siting review under certain conditions:
 - Stand-by units must be independent from the grid, operate only in the event of a power outage and receive local land-use and DEQ approval for air- and water-quality requirements.
1. Speed the development of environmentally sound renewable power generation
 - Raise the size limit for wind, solar and geothermal power plans under state siting review from 25 megawatts to 35 average megawatts
 - Require six-month review for all renewable power plants less than 100 average megawatts
 - Waive the requirement that a developer of a renewable power plant demonstrate compliance with certain state siting review standards.
 - Exempt expansions at sites of wind power plants that begin operation by Dec. 31, 2001, from state siting review.

Long-Term Siting Bill (HB3788)

1. Expedite the siting review process for demonstrably low-impact gas-fired power plants:

- Qualifying plants must be located near an existing industrial or energy facility and must comply with local land use regulations.
 - Qualifying plants must need no more than three miles of associated transmission lines and new natural gas pipelines outside of existing rights-of-way.
 - Qualifying plants must need no new water right or a water right transfer.
 - Qualifying plants must use methods of wastewater disposal that do not require new or significantly amended permits.
1. Allow the potential for extending a temporary plant's operation:
 - Require a plant owner to apply for a state site certificate.
 - Amend air-quality statutes to remove retroactive penalties that hinder a qualifying temporary plant in its application for a permanent site certificate.
 1. Streamline the siting review process by all state agencies:
 - Require state agencies to complete timely review, if necessary, by hiring contractors with funding from the applicant
 - Ensure that state agency reviews occur simultaneously rather than sequentially
 1. Prohibit local governments from imposing taxes on any power plant generation.
 2. Provide local governments the option to offer enterprise zone property-tax exemptions for new power plants.

BUILDING CONSERVATION INVESTMENT PROGRAM

Background

Oregon's public and private buildings offer the best opportunity for achieving significant energy conservation quickly. In the short term, making sure existing building systems operate at their most efficient will yield substantial savings. Additional savings will accrue with longer-term investments in energy-efficient lighting, heating/cooling systems and other equipment. Investments in public building conservation also save tax dollars that can be spent for more essential services.

However, two key barriers stand in the way of widespread building efficiency: Making a building run at its most energy efficient requires an expertise that operators often lack, and building owners often lack the capital for making energy efficiency a priority. The two-year Building Conservation Investment Program will help remove these barriers.

Program Description

- Uses \$10 million in lottery bond proceeds to provide public and private building owners with extremely low financing for energy efficiency improvements and technical assistance to accomplish improvements.
- Provides 2 percent loans for capital improvements through the state's existing Small Scale Energy Loan Program.
- Provides technical assistance services. Technical teams would:

- conduct energy studies to identify cost-effective energy saving measures
- test and tune heating, ventilation and air conditioning systems
- train building staff on best operation of equipment
- find and implement no- and low-cost opportunities to save energy in buildings

- Gives priority to state agency, university, local government and other public buildings.
- Ensures broad geographic distribution of program benefits.

Results

- Stimulate \$55 million in capital improvement projects and additional no-cost, low-cost energy efficiency projects.
- Complete up to 280 capital improvement projects that together will save an estimated \$9 million a year on energy bills and conserve an estimated 100 million kilowatt-hours and 7 million therms.
- Reduce building operation and maintenance costs.

For public buildings, reduce dollars spent for energy by \$6 million a year. Energy dollar savings from projects will exceed agency loan payments.

The Honorable Bill Richardson
Secretary of Energy
Fax No 202-586-7573

Dear Secretary Richardson:

I am writing to urge that you take immediate action to deal with the ongoing energy emergency in the western states. I understand the urgency that led you to take the unprecedented action yesterday to require power generators and marketers in the west to ship energy to California in order to avoid imminent blackouts. Mr. Secretary, I am not suggesting that your action was inappropriate – I, too, am concerned about the situation in California and we certainly want to help.

However, I am concerned that this action was taken unilaterally and without any consultation with the other western states – particularly those that come under the Northwest Power Act. Part of the justification for invoking your extraordinary emergency powers was the conclusion that the Northwest is not shipping enough power into the California market. However, the Northwest is not generally an exporter of power to California during winter months. Rather, the Northwest generally depends on just the opposite: power imports from California. This situation raises serious questions.

Mr. Secretary, I respectfully submit that California's failed deregulation experiment has created a crisis not only for California, but for the entire West. Certainly wholesale deregulation and insufficient generating capacity are contributing factors. But the fact is that when California deregulated retail sales and established a market-based mechanism for wholesale transactions, it was never anticipated that wholesale prices would deviate by a hundred-fold from the actual costs of generation. In addition, it is disturbing that, in the face of this crisis, there is so much generation capacity in California that is not currently running.

It was also not anticipated that what happened in California would spill over to neighboring states that had not joined in the California deregulation experiment. With retail utilities now paying prices for power determined by the flawed California market, a financial crisis in the whole regional electricity industry is just across the horizon, threatening our entire system of supplying low-cost energy to customers.

Writing as the governor of a Northwest state, the current situation puts us in great jeopardy economically, environmentally, and in terms of the future reliability of energy to our citizens.

Economics Under your proposed order, our regional utilities must sell power into California at a yet to be determined rate. Some of this power was purchased at a very high price on the open market and these utilities may well suffer a significant financial loss on this transaction, let alone the risk they take of providing power to a system that may not be able to repay them at all. This situation can only lead to significantly increased cost to retail customers.

Reliability As you know, the heart of the Northwest power generation system is the hydroelectric energy marketed by the Bonneville Power Administration (BPA). The stability of our energy future is determined, to a large extent, by the water stored behind the Columbia and Snake River dams. By running the system hard at this time, we run the risk of having too little water in future months to meet energy demand in the region. Indeed, the snowpack in the mountains of the Columbia River Basin is currently well below normal.

Environment Our situation in the Pacific Northwest is complicated by our obligations under both the Endangered Species Act – and under federal treaties with the Northwest Indian Tribes -- to recover dwindling runs of Columbia and Snake River salmon. Without the ability to maintain adequate flows, this effort will be severely compromised.

If no region-wide action is taken soon, the situation threatens to escalate such that the whole West may be short of power throughout a cold and dry winter, and retail utilities may lack the financial resources to purchase needed supplies or to build the generation we all agree is necessary.

While I appreciate the need to assist California in the short term, we cannot manage this crisis through reaction, unguided by a well thought-out strategy that takes into consideration the needs and interest of the entire West.

Events are overtaking us and we run the risk of becoming victims of a set of circumstances which are rapidly moving beyond our control.

While I understand that FERC may impose region-wide price caps in the near future, I do not believe that this action alone will resolve the structural problems in the markets that are at the heart of this crisis.

For these reasons I urge you and Mr. Hoecker, the Chairman of the Federal Energy Regulatory Commission, to convene a forum next week in this region to discuss with the western states what can be done to lay the groundwork for a much needed integrated strategy to resolve this crisis in both the short term and the long term.

Such a strategy must necessarily consider not only the problems with the California market, but also how they impact the demand side of the problem – at both the industrial and residential levels. Without an aggressive interim conservation strategy, it will be difficult to stabilize the system long enough to develop and implement a long term solution.

Thank you for your consideration of this urgent request.

Sincerely,

John A. Kitzhaber, M.D.

RECOMMENDATIONS OF THE GOVERNORS OF IDAHO, MONTANA, OREGON AND WASHINGTON FOR THE PROTECTION AND RESTORATION OF FISH IN THE COLUMBIA RIVER BASIN

I. INTRODUCTION

Almost two decades after Congress passed the Northwest Power Act and nearly a decade after the first Endangered Species Act (ESA) listings of fish in the Columbia River Basin, state and federal agencies and Indian tribes have not agreed on a long-term, comprehensive, effective and coordinated approach to protecting and restoring fish of the Columbia River Basin, particularly salmon and steelhead. Individually and collectively, we governors have the authority to contribute to the efforts currently under way to develop an integrated, regionwide approach to fish recovery.

We acknowledge a broad regional responsibility to protect fish and wildlife species. Such an effort is under way through the Northwest Power Planning Council's (Council) fish and wildlife program amendments. As currently envisioned, the Council's program should be an important preventive component because wise management will help the region avoid future ESA listings.

Because of the work of the last 10 years, including research and on-the-ground efforts, there is regional support for many key elements of fish recovery. In this document, we express our support for these elements as the nucleus of a regional approach to the recovery of ESA-listed aquatic species, particularly salmon and steelhead.

We want to stress that while we intend the consensus recommendations contained in this document to be useful advice and guidance to decision-making entities such as the National Marine Fisheries Service (NMFS), U.S. Fish and Wildlife Service, Environmental Protection Agency and the Northwest Power Planning Council, our recommendations do not constitute a plan that can substitute for the procedural and substantive planning requirements of the Endangered Species Act, Clean Water Act, Northwest Power Act, or other relevant state and federal laws.

We are keenly aware of the extent to which breaching the four lower Snake River dams has become a polarizing and divisive issue. Regardless of the ultimate fate of the dams, the region must be prepared in the near term to recover salmon and meet its larger fish and wildlife restoration obligations by acting now in areas of agreement without resort to breaching the four dams on the lower Snake River. In order to succeed, the region must have the necessary tools including a clear and comprehensive plan, adequate time, and sufficient funding. Our recommendations address some of those necessary tools.

II. KEY ELEMENTS OF A REGIONAL APPROACH

A successful approach to recovery of salmonids and other aquatic species must include a clear goal, objectives that describe and measure the environmental and biological improvements needed to meet the goal, and an aggressive series of explicit strategies and actions designed to achieve the goal.

The approach must address the so-called “Four Hs” of human activities that influence fish and wildlife survival -- habitat, hydropower, harvest and hatcheries and also account for what we call the “Fifth H” -- the impact of these actions on humans. Strategies and actions must be biologically sound, economically sensitive, and sufficiently flexible to accommodate alternative approaches depending on what works best. Finally, the approach must be truly coordinated, in the sense that it must account for and successfully integrate salmon recovery efforts ongoing at the federal, regional, state and local levels.

With these features, this approach will have the public support needed for effective implementation.

RECOMMENDATIONS

Goal

The regional approach must include a clear goal so that, in short, the region can understand what constitutes success. Accordingly, the goal we suggest is protection and restoration of salmonids and other aquatic species to sustainable and harvestable levels meeting the requirements of the Endangered Species Act, the Clean Water Act, the Northwest Power Act and tribal rights under treaties and executive orders while taking into account the need to preserve a sound economy in the Pacific Northwest.

Objectives

The approach must include objectives geared toward accomplishing this goal. Objectives may be qualitative or quantitative. One qualitative objective should be a healthy, functioning ecosystem. In practical terms, this means that we prefer to benefit salmon through strategies and actions that emphasize and build upon natural processes. While we recognize this may not always be feasible, we think it is an important policy decision that will, in turn, clarify the region’s choice of strategies and allow us to make most effective use of our finite financial resources.

It is our understanding that, at least in the federal biological opinion and “All-H Paper” soon to be issued, quantitative objectives, also known as performance standards, will play an important role. The creation and use of performance standards will be critical -- both in terms of allowing the region to move forward with specific strategies and actions and

in measuring their success in achieving the desired environmental and biological improvements. Three criteria can ensure that performance standards are used appropriately:

- Performance standards must be grounded in the best available science. This means the standards must be technically valid as a measure of the success of actions taken to achieve salmon recovery. To that end, we recommend performance standards be subject to scientific peer review.
- Performance standards must be reasonably attainable. This means the standards must be clearly described, measurable and administered by a clearly designated entity with responsibility for compliance. This also requires that the actions to achieve the standards must be adequately funded in order to assure they can be implemented in a timely fashion.
- Performance standards must be implemented in a manner that coordinates the short-, mid- and long- term actions that are necessary to improve overall salmon recovery. Standards focused on near-term measures should describe the immediate on-the-ground actions that benefit fish. Mid-term standards should describe the success of the on-the-ground actions, and long-term standards should describe the overall success in achieving the desired biological response or improvement. Additionally, long-term standards should be crafted, wherever possible, in such a way that if improvement is not achieved, the performance standard would be useful in identifying the problem.

III. HABITAT REFORMS

In addition to the mainstem areas altered and blocked by dams, many key tributaries of the Columbia have inadequate flows for fish, impaired water quality, barriers to fish passage, unscreened water diversions or degraded riparian habitat. With Snake River and other dams in the Federal Columbia River Power System remaining in place, systemwide habitat improvements that respect private property rights, focused particularly in the tributaries and the estuary, become an even more critical component of salmonid and aquatic species recovery.

RECOMMENDATIONS

Partnerships

Because much of the habitat is on non-federal lands, state, tribal and local governments, as well as private landowners, must be full partners in the recovery effort. To date, the National Marine Fisheries Service has not been clear with these entities about the specific improvements needed for recovery and has not conducted regular discussions about how to address issues of mutual concern. We are disturbed by this lack of full partnership in what should be a collaborative effort. As one step to achieve greater collaboration, we recommend the President designate one official in the region to oversee federal agency fish recovery efforts in the Columbia River Basin and serve as the regular point of contact with the states, local and tribal governments.

Water for Fish

Stream and river reaches throughout the Columbia River Basin have flow and water quality problems that impede regional fish recovery efforts. The states are setting water quality standards and preparing implementation plans in accordance with previously established schedules. The states are also reviewing instream flow levels to address biological requirements for ESA-listed aquatic species. We are concerned, however, that the timelines for these tasks be fully consistent with the timeline required for salmon recovery. Therefore, we recommend federal assistance and support be made available to the states to better coordinate these timelines and, where necessary, to accelerate water quality improvements and to establish instream flows that benefit listed aquatic species in the Columbia Basin.

We support voluntary exchanges to obtain needed water for fish and support the development of water markets to effect exchanges among willing buyers and sellers. We believe this strategy has potential to contribute to fish recovery, and we are committed to support changes in state law or policies to facilitate this approach. We also recognize existing efforts to conserve water and support further assistance to promote conservation.

Protecting and recovering salmonids and other aquatic species requires protecting land on and around fish-bearing streams. Building upon successes elsewhere, we endorse creation of salmon sanctuaries that protect key aquatic habitats and related uplands through voluntary conservation easements, leases, land purchases, and tax-incentive donations. The region should attempt to obtain substantial additional habitat protections in the locations that promise the greatest benefits for fish.

Finally, given the major responsibilities that will fall upon private landowners, voluntary habitat improvement programs need to be fully encouraged through the use of a federally funded incentive program. Increased riparian fencing is an obvious place to start.

Local Recovery Plans

We strongly endorse the concept of local planning for recovery of salmonids and other aquatic species. This concept has the advantage of bringing together local and tribal governments with local citizens to develop and implement local recovery plans. A local focus also helps avoid duplication of efforts and “top-down” planning. Recovery plans developed at the local level, whether through state salmon plans, federal agency actions or through the Council’s process, must be complementary. The federal government has a fundamental obligation to assist local efforts in developing fish recovery plans. A premium should be placed on implementation of those plans that meet requirements of the Endangered Species Act, the Clean Water Act and the Northwest Power Act.

To assist the local planning effort, we recommend that state authorities designate priority watersheds for salmon and steelhead and that plans for these watersheds be developed by October 1, 2002. Plans for all watersheds in the Columbia River Basin should be developed by 2005.

We request that by January 1, 2001, the Council provide a report to the states detailing how the Council’s amended fish and wildlife program has addressed the necessary integration of federal, state and regional planning processes. Bonneville funding must be integrated with other funding sources for state and federal recovery initiatives, and the Council should address this issue in its report as well.

Fish Passage

In the Columbia River Basin, over one-half of the original habitat area for salmon and steelhead has been blocked by mainstem and tributary dams. The largest losses occurred from the construction of the dams within Hells Canyon and by Chief Joseph and Grand Coulee dams on the upper Columbia.

For the mainstem Columbia and Snake rivers, we must focus not only on currently accessible habitat, but also look for opportunities to increase the current level of habitat access with all dams remaining in place. A recent study by the Battelle Pacific Northwest National Laboratory and the U.S. Geological Survey (USGS) found a substantial percentage of the historic mainstem riverine habitat for Snake River fall chinook still remains unimpounded upstream of the Hells Canyon complex. Although there is still riverine environment where fall chinook historically spawned, it may not be capable of supporting

fish today because of degraded quality. It must be better understood whether the present quality of the historic habitat is capable of supporting a self-sustaining population of fall chinook above the Hells Canyon complex. The feasibility of reintroduction, including an evaluation of the existing habitat, is being investigated as part of the Federal Energy Regulatory Commission (FERC) relicensing process for the Hells Canyon complex. While mindful of the challenges involved, options and costs should continue to be assessed as part of the relicensing process. A similar challenge confronts reintroduction of migrating salmonids above Chief Joseph and Grand Coulee dams, particularly above Grand Coulee. Nevertheless, we encourage work currently under way to assess the possibility.

Each state commits, by October 1 this year and annually thereafter, to provide a list of priority fish passage projects to the Council for proposed funding. The list could include such things as screening diversions and replacing culverts, as well as removal of, or passage at, tributary dams, as is being done at Condit, Wapatox and Marmot dams.

Estuary

The lower Columbia River estuary has come into focus as a vitally important component of salmon recovery. The region is fortunate that a water quality and fish and wildlife habitat plan has been developed by the Lower Columbia River National Estuary Program (NEP). This plan has identified actions to inventory those habitats critical for salmon health, as well as measures to protect or acquire such habitats. We believe that the federal government must immediately engage the states, tribes and local governments in implementing the NEP plan for the lower Columbia River estuary, including creation of the salmon sanctuaries referenced above.

Predation

The legitimate, but disparate, focus of varying federal laws, including the Endangered Species Act, the Migratory Bird Treaty Act and the Marine Mammal Protection Act present management challenges as we seek to protect ESA-listed juvenile and adult salmon and steelhead that, in turn, are prey for the birds and mammals also protected by these laws. We support actions to improve the coordination among these laws so that they are not working at cross purposes.

We recommend that the U. S. Army Corps of Engineers (Corps), NMFS and the Fish and Wildlife Service develop a long-term management plan to address predation by fish-eating birds and marine mammals. The relocation of Caspian terns within the estuary was a good start but is not sufficient by itself. The number of Caspian terns, as well as that of double-crested cormorants, should be significantly reduced in the Columbia River Estuary. The Caspian tern predation rate on juvenile salmon and steelhead remains unacceptable, as is the inability of the federal agencies to agree upon a common approach and a lead agency status for this effort. We recommend that such an approach be presented to the region by the appropriate federal agencies by the end of the year.

As part of the long-term management strategy for seals and sea lions, we recommend congressional approval of NMFS's proposal to acquire additional authority to take seals and sea lions that persistently impact listed salmonid species.

The Ocean

Recent studies and salmon returns suggest that ocean habitat is a significant factor influencing salmon survival. NMFS should work with the region to conduct an intensive study to address the role of the ocean in fish recovery, including the relative impact on fish mortality due to ocean predation, lack of food sources, temperature problems and harvest regimes. In addition, management of fish in freshwater should reflect new information about the ocean as it is developed. For example, it may be necessary to adjust hatchery production based on a better understanding of changes in ocean carrying capacity.

Interior Columbia Basin

Fully 50-60 percent of the land area in the Columbia River Basin is owned or managed by the federal government, including major headwater areas so important for fish. We believe modifications to management practices on these lands is essential to salmon recovery.

To assure these needed modifications occur, the interior Columbia River Basin needs a balanced strategy that can provide for stable and predictable multiple-use management on federal lands for fish and wildlife and other purposes while permitting needed flexibility, particularly on private lands. The existence of such a strategy is long overdue, and we urge Congress and the Administration to work with the region to have the strategy in place by year's end.

IV. HYDROELECTRIC SYSTEM REFORMS

Dams on the Columbia and Snake rivers provide energy, flood control, transportation, recreation and irrigation benefits to the people and economy of the Pacific Northwest. At the same time, construction and operation of the dams altered the ecosystem in which the once-great fish runs of the Columbia River Basin evolved.

RECOMMENDATIONS

Capital Improvements at Dams

We acknowledge that the Columbia and Snake River hydropower system has been improved for fish passage. Nonetheless, the dams continue to adversely affect fish survival. Therefore, we support further modifications to the configuration and operation of the hydrosystem where appropriate and necessary to benefit fish and so long as the modifications do not jeopardize the region's reliable electricity supply.

To benefit salmon migrants, both upstream and downstream, expedited schedules should be established to design and install passage improvements.

Priority capital improvements must also include those necessary to address water quality issues relating to both temperature and dissolved gas. All capital improvements should benefit the fullest range of salmonid species and should offer demonstrated biological gains. Uncertainty regarding the long-term status of the four lower Snake River dams should not preclude making passage improvements at those four facilities.

Transportation of Juvenile Salmon and Steelhead

Consistent with our preference to emphasize and build upon natural processes, we believe strategies and actions should be implemented that provide the best possible survival for fish that migrate in the river through the reservoirs and past the dams. We recognize that in the short term there are survival benefits from continuing to use fish transportation as a transitional strategy. However, we believe that when ongoing research affirms that survival of listed salmon populations would increase from migration in an improved river environment, an increasing number of juvenile fish should then be allowed to migrate inriver. An immediate evaluation is also necessary of survival rates for fish transported by trucks compared to barges. If survival is lower in trucks and barging is an available alternative, then trucking should be discontinued.

Spill

We recognize the need to improve the riverine character of the mainstem Columbia and Snake rivers as a means of further improving successful salmon migration, spawning and rearing. Spill is important in this regard.

Spill is recognized as a highly effective means of passing juvenile salmon downstream, reducing the mortality associated with passage through many turbine sets and in most bypass systems. The use of spill should be improved -- in duration, timing and quantity -- at all the federal hydropower projects. Experiments testing spill benefits at different levels and times of year should be expanded, and the impacts on juvenile fish survival from these alternative spill operations, including summer spill, should be carefully monitored and evaluated.

Flow

Flow management in the Columbia and Snake mainstems should continue as part of the mainstem strategy. Flow augmentation pursuant to state law, a key component of flow management, remains controversial. But there are ways to reduce the controversy in the future. First, federal agencies must document the benefits of flow augmentation and the precise attributes of flow that may make it beneficial. Second, where the benefits of flow augmentation have been documented, migrating fish should be left in the river to benefit from it. Third, the region should review off-river storage for additional water if flow augmentation is going to continue to be a key strategy. Fourth, flow management should be designed to integrate all water-related statutory mandates, including not only the Endangered Species Act but also the Clean Water Act, and should consider impacts to non-anadromous listed and unlisted species. Fifth, implementation of flow management should fully account for actual water conditions so that, for example, if cool water is provided for temperature benefits, the benefits are not negated by simultaneous releases of warmer water from other sources. Sixth, additional water may be available for flow augmentation if flood control operations can be prudently altered. The Corps and NMFS should work with the region on a study to determine whether flood control rule curves can be reconfigured to allow shaping of flows to improve survival of migrating salmon and steelhead. Finally, the region should explore whether salmon benefits could be achieved through cooperative agreements regarding power peaking operations, such as those currently in place for the Hanford Reach stocks and listed chum salmon spawning below Bonneville Dam.

V. HARVEST REFORMS

Salmon fishing has decreased to a level that represents a mere fraction of what once occurred. We commit to support a recovery approach designed not only to achieve ESA delisting levels but also to rebuild the runs to levels that support treaty and non-treaty harvest. But we believe rebuilding requires that all harvest may have to be reduced in the short term, together with aggressive actions taken to address mortality in the other life stages.

We respect the legal status and cultural importance of Indian treaty fishing rights. Changes in harvest management suggested below must be developed in partnership with the treaty tribes so they are consistent with the ongoing harvest and production litigation under *U.S. v. Oregon*, and also with federal and state governments to comply with the Pacific Salmon Treaty.

RECOMMENDATIONS

Ocean Harvest

The United States and Canada have signed a 10-year Pacific Salmon Treaty that, for the first time, implements an abundance-based ocean harvest regime for chinook and coho salmon. The agreement places special emphasis on further restrictions for fisheries that incidentally harvest weak stocks, and on getting the required number of fish onto the spawning grounds. We agree that this is a critical first step in the overall management of Columbia River stocks, and we recognize that the increased complexity of the management regimes to carry out the intent of the Treaty will require additional funding.

Given that long-term, biologically based management for the ocean is now in place, other steps can be explored to reduce ocean impacts on listed fish through use of more selective fishing techniques and a license buyback program that can reduce the current excess fishing capacity. Additional opportunities may exist to align viable fisheries with the opportunities available through a license buyback program given the excess fishing capacity that currently exists.

Finally, a random-observer program is needed to ensure the collection of information necessary for managers and the industry to reduce salmon bycatch mortality.

Columbia/Snake Mainstem Harvest

We support continuing current levels of tribal ceremonial and subsistence harvest. For commercial and non-treaty sport fisheries, we recommend that harvest rates, gear and timing in the mainstem fisheries be consistent with ensuring survival of the species and providing for their eventual recovery when combined with recovery actions in other sectors.

This means that harvest rates must ensure sufficient escapement to rebuild declining stocks. With inriver harvest rates ranging up to 31 percent for one of the listed stocks, we are not convinced that current practices are compatible with rapid recovery.

To achieve these reductions, we support increasing the selectivity of mainstem harvesting by exploring further gear, timing and location restrictions. The region must initiate research to better understand migration timing and movement of individual stocks to develop better selective fishing techniques.

Financial incentives must be broadened beyond selective fisheries to include economic incentives to reduce impacts to listed stocks, financial assistance for developing “value-added” fishery-related industries and mitigation of economic impacts to fishing-dependent communities.

Finally, hatchery operations must be modified so that excess fish are not being produced for fisheries where they cannot be harvested because of the impacts on weak stocks. Harvest goals must be linked to fish production goals. We expect state, federal and tribal fish agencies to produce a long-term production and harvest plan that protects ESA-listed fish. To that end, we call for a new Columbia River Fish Management Plan to be agreed upon in time for the spring 2001 salmon fishery.

Terminal Fisheries

As another important means of achieving the mainstem reductions described above, as well as replacing lost mainstem fishing opportunities, fisheries should be established in terminal areas below Bonneville Dam and in Zone 6, similar to those currently taking place in Oregon’s Youngs Bay. Commercial harvest opportunities would target the hatchery-produced stocks returning to terminal areas. Reformed hatchery programs, which we address elsewhere in this document, could include establishing these terminal fisheries.

Law Enforcement

The region’s fisheries law enforcement program should be strengthened to ensure accountability and to reduce illegal catch. Increased law enforcement should be concentrated and coordinated with habitat strategies to aid specific watersheds. We recommend this be accomplished through appropriate tribal, state and federal law enforcement programs.

Control Competitor Species

We recommend changing existing sport fishing restrictions to concentrate on species that prey on, and compete with, salmon for food, including northern pikeminnow. Sport fishing regulation changes also should strive to minimize effects of exotic species on native species. The region could experience short-term benefits from increased fishing opportunities for these competitor species.

VI. HATCHERY REFORMS

Since as long ago as the late 1800s, fish hatcheries have been seen as a tool to use in rebuilding fish runs decimated by overfishing or, in more recent times, as a means of producing large numbers of fish to support commercial harvest to mitigate the impact of dams. Yet our region's experience demonstrates that past hatchery practices have contributed to the decline of naturally spawning fish populations, as hatchery stocks increased while the naturally spawning component of the runs continued to decline.

It is time to recognize that hatcheries are used for multiple purposes, primarily producing fish for harvest but also for rebuilding naturally spawning populations through the technique of supplementation and for captive broodstock experiments. Careful thought must be given to how these techniques could maximize the efficiency of fish production to provide treaty, sport and commercial harvest opportunities while also protecting and rebuilding unique fish populations and complying with existing laws and legal processes, such as the *U.S. v. Oregon* litigation.

RECOMMENDATIONS

Implement the Artificial Production Review

The outline for redirecting artificial production of fish in the Columbia River Basin hatchery program is contained in the Council's recommendations in its 1999 Artificial Production Review report to Congress. We support these recommendations to significantly modify hatchery management practices among all federal and state salmon and steelhead hatcheries in the region.

To begin this process of reform, we recommend all hatcheries in the Columbia River Basin be reviewed within three years to determine the facilities' specific purposes and potential future uses in support of fish recovery and harvest. The Council should identify priority hatcheries that need expedited review and complete the reviews within eight months so that modification of hatchery operations can commence by January 1, 2001. Funding for hatchery reforms must be a joint federal, state and Bonneville responsibility. We recommend that, regardless of the funding source, future hatchery funding decisions take into account consistency with Artificial Production Review reforms.

Develop a Comprehensive Plan for Artificial Production

Consistent with the Artificial Production Review, the region's fish managers and tribes should jointly develop a comprehensive supplementation plan that includes aggressive monitoring and evaluation. We commit state agencies to work with tribal fish managers to develop such a plan. The plan should specify watersheds that can be used for supplementation, and also recommend respective tribal, state and federal roles in implementation of the supplementation plan. We support the concept that certain

watersheds, with local cooperation, should be maintained as wild fish refuges as a hedge against uncertainty inherent in artificial propagation, as well as a “control” for evaluating conservation hatchery efforts.

We anticipate this plan would be part of the renegotiated Columbia River Fish Management Plan.

Fish Marking

To facilitate a robust harvest program for hatchery fish in a way that does not impact wild fish, we endorse a program that results in the marking of hatchery fish that pose threats to ESA-listed fish, to the fullest extent consistent with the Pacific Salmon Treaty. We also urge tribal, state and federal fish managers to put such a program in place promptly, as it will be difficult to implement many improved harvest techniques until it is possible to identify hatchery-reared fish.

VII. FUNDING AND ACCOUNTABILITY

Since 1980, the use of ratepayer money to protect and recover fish in the Columbia River Basin has been inconsistent. Sometimes there has been strong oversight and scientific guidance, and at other times little oversight or scientific guidance. While this situation has improved in recent years, too often money has been used to fund bureaucracies and process as opposed to on-the-ground projects.

We anticipate that as the region's state, federal and tribal agencies improve their collaboration and focus on meeting the obligations of the Endangered Species Act, Clean Water Act, Northwest Power Act and tribal rights under treaties and executive orders, it is likely that the cost of the effort will increase. As a result, we expect decision-makers to redouble their efforts to ensure that funding decisions are informed by independent scientific review, all funding is used in an efficient and accountable manner, and funding is prioritized for actions that most directly advance the goal of protecting and restoring salmonids and other aquatic species to sustainable and harvestable levels.

RECOMMENDATIONS

Funding

Fish and wildlife programs should be streamlined, and rules should be more flexible and goal-oriented. We endorse BPA's stated commitment to increase the amount of ratepayer dollars to support salmon recovery. Congress should similarly increase the amount of federal appropriations, in recognition of the fact that fish and wildlife of the Columbia River Basin are national resources and their protection satisfies obligations in federal law, including treaties with Indian tribes and Canada, the Endangered Species Act, the Clean Water Act and the Northwest Power Act.

Federal financial assistance, both from Congress and/or BPA, should be provided to help fund existing activities designed to improve ecosystem health and fish and wildlife health and protection. These include state and tribal on-reservation programs to develop total maximum daily loads (TMDLs), enhance water quality monitoring, secure water and land rights for fish and wildlife benefits, implement the Lower Columbia River Estuary Program, undertake other watershed restoration activities and, where necessary, establish instream flows.

Accountability

We believe the principles and activities in this document will protect the Federal Columbia River Power System and also recover and rebuild Columbia River Basin fish and wildlife. There will be a significant cost, but we expect the power system to pay only its fair share. Having said that, nothing jeopardizes the recovery effort, and the benefits we receive from the Federal Columbia River Power System, more than the perception and the reality of

ratepayer funds being misspent. The region needs a strong program to ensure a far better accounting of the spending than we have received to date.

The Council should continue to work to ensure the accountability of each project it recommends to Bonneville for funding -- accountability in terms of meeting program goals and accountability for the expenditure of ratepayer money.

Accountability for meeting goals:

All projects recommended by the Council should have explicit quantitative goals, and the projects should be rigorously evaluated for their ability to meet these goals.

Accountability for expenditures:

Expenditures by Bonneville, the Council, the Columbia Basin Fish and Wildlife Authority, state agencies and project sponsors may make sense individually, but not when considered in total. Planning and overhead expenses must be kept to a minimum, and project expenditures should focus on activities that benefit fish and wildlife.

Specifically, we recommend that the Council:

- Prepare an Annual Accountability Report:

To better understand Bonneville's expenditures in a basinwide context, and to improve accountability to the ratepaying public, the Council should prepare an annual report to clearly document progress toward meeting fish and wildlife mitigation goals, and how ratepayer money is being spent. A specific breakout should be provided on funding for ESA-listed species.

The report could provide assurance that Bonneville's expenditures are directed toward on-the-ground projects rather than redundant or excessive planning processes and that funding for research is clearly focused and prioritized. By addressing project failures as well as successes, the report could show progress -- or lack of it -- toward goals and demonstrate that projects are being effectively monitored and evaluated.

- Consider Shifting Contract Management:

The Council and Bonneville should study the possibility of transferring project contracting responsibility from Bonneville to a neutral entity.

In its unique regional role, the success of Bonneville depends on maintaining good relations among a wide range of parties, including many of the parties with which it contracts for fish and wildlife project implementation. This need for good relationships creates a potential conflict with the regional interest in accountable and businesslike implementation of fish and wildlife projects, and the enforcement of contractual terms. Simply put, there would be an inherent efficiency in having a neutral entity responsible for project contracting.

Transferring contracting authority to a neutral entity also would avoid complicated, time-consuming federal contracting procedures.

This proposal should not be seen as a criticism of Bonneville's fish and wildlife staff but as a shift of responsibility that would benefit both Bonneville and the fish and wildlife program by increasing the efficiency of program management, reducing the potential for conflicts of interest and improving public accountability for the expenditure of ratepayer dollars. If the shift occurs, a more independent oversight of contract management should be structured in a way that allows Bonneville to ensure its contracts are properly and efficiently carried out.

- Establish a Coordinated Information System

Also under an improved accountability initiative, but singled out for special attention, is the need to establish a coordinated information system. Although the Pacific Northwest is data rich, it is information poor. Data is stored in a random and haphazard fashion in some cases, in highly organized and computerized fashions in other places, and in combinations of these approaches in still other cases. The region needs a standardized information system that is capable of providing answers to basic questions regarding the documentation of progress toward recovery of salmon and other aquatic species. This information needs to be provided in a form accessible to everyone as part of the annual accountability report. Creating such a system is a task for the Council; we ask that it be done by October 1, 2001.

VIII. THE CHALLENGE AHEAD

The Columbia River Basin is a great natural resource and a dynamic economic engine and, for both these reasons, is critical to the well-being of the four states in the region. The Columbia River Basin's hydropower system is part of our legacy in the Northwest, built through the foresight of our leaders and the skill and determination of our workers, on our waterways and across our landscapes.

But we also recognize the impact the hydropower system has had on our fish and wildlife populations, particularly anadromous fish. We have benefited in an economic sense, but we have lost a healthy ecosystem. We wish to restore that healthy ecosystem as part of the Northwest legacy we leave to our children and their children.

This is a challenge of course, and one we accept. It is the federal government's role to administer the Endangered Species Act and to uphold tribal trust responsibilities. But the states also have an important role and responsibilities, as do other regional entities. Agreement on a regional approach, consisting of specific federal, state and regional plans that protect both our salmon and our communities, should be reached and accepted by federal and state officials in consultation with tribal leaders no later than January 1, 2001. Reaching such agreement, as well as implementing the other recommendations in this document, will enable all of us, together, to begin to fulfill our respective roles and responsibilities and meet the challenge that lies ahead.

PREFACE

Almost two decades after Congress passed the Northwest Power Act and nearly a decade after the first Endangered Species Act (ESA) listings of fish in the Columbia River Basin, state and federal agencies and Indian tribes have not agreed on a long-term, comprehensive, effective and coordinated approach to protecting and restoring fish of the Columbia River Basin, particularly salmon and steelhead.

Individually and collectively, we Governors have the authority to contribute to the efforts currently under way to develop an integrated, regionwide approach to recovery of ESA-listed aquatic species. We hereby set forth our recommendations for key elements of a regional approach.

It is the federal government's role to administer the Endangered Species Act and to uphold tribal trust responsibilities. But the states also have an important role and responsibilities, as do other regional entities. Agreement on a regional approach, consisting of specific federal, state and regional plans that protect both our salmon and our communities, as well as implementing the other recommendations in the attached document, will enable all of us to begin to fulfill our respective roles and responsibilities and meet the challenge that lies ahead.

We look forward to the needed collaboration and cooperation among state and federal governments as we plan for the recovery of ESA-listed aquatic species in the Columbia River Basin.

Sincerely,

DIRK KEMPTHORNE
GOVERNOR OF IDAHO

GOVERNOR OF WASHINGTON

Elements for a Steens Mountain Protection Bill

(July 11, 2000)

Purpose of the Act:

To designate the Steens Mountain Wilderness Units and the Steens Mountain Cooperative Management and Protection Area in the State of Oregon, to provide for the acquisition of private lands through exchange for inclusion in the wilderness units, to provide for and expand cooperative management activities between public and private landowners in the vicinity of the wilderness units and surrounding lands, to purchase land, development and non-development rights, to designate additional components of the National Wild and Scenic Rivers System, to support efforts to preserve the Redband Trout, and to establish a citizens' management advisory council.

The area of Steens Mountain will be managed to ensure the conservation, protection and improved management of the ecological, social and economic environment of the area. Management shall ensure protection of geological, biological, wildlife, riparian and scenic resources, North American Indian tribal and cultural and archaeological resource sites and additional cultural and historic sites, and recognition and promotion of current and historic recreation use. The purposes are: to maintain and enhance cooperative and innovative management practices between the public and private land managers; to maintain the viability of grazing and recreation operations on private and public land; and to conserve, protect and manage the long-term ecological health and functioning watersheds of Steens Mountain. The Secretary can authorize only such uses on public lands that are consistent with the purposes of the Act.

Steens Mountain Cooperative Management and Protection Area

Purpose of the Steens Mountain Cooperative Management and Protection Area:

An area will be created called the Steens Mountain Cooperative Management and Protection Area (hereafter referred to as the “Steens Mountain Area”). The Steens Mountain Area will be formed to continue existing, and create new and progressive, management programs and strong partnerships between all users that will lead to continued ecological improvements on Steens Mountain. The objectives of the Steens Mountain Area are: to maintain and enhance cooperative and innovative management practices between the public and private land managers; to maintain the viability of grazing and recreation operations on private and public land; and to conserve, protect and manage the long-term ecological health and functioning watersheds of Steens Mountain.

Boundary of Steens Mountain Area: See Map

Management of the Steens Mountain Area:

1. The Secretary, acting through the BLM, shall manage the Steens Mountain Area consistent with the purpose of the Act and allow only such uses on Federal lands within the Steens Mountain Area that will further the purposes for which the Steens Mountain Area was established.
2. The Secretary shall develop a comprehensive plan for the long-range protection and management of the federal lands with the area, in consultations with the Steens Mountain Advisory Council (SMAC) and with full public input and compliance with NEPA. The plan shall describe the appropriate uses and management of the Steens Mountain Area consistent with this Act, incorporate as appropriate decisions contained in any current management or activity plan, and use information developed in previous studies or management plans of land within or adjacent to the area.
3. Incentives or guidance for development, for purchase of development rights or non-development agreements on public and private land with willing landowners or permittees shall apply to lands within the Steens Mountain Area.
4. The Secretary is encouraged to facilitate exchanges of land with willing landowners, provided these exchanges promote the purposes of this Act.
5. The Secretary is encouraged to facilitate the purchase of long-term conservation easements and non-development agreements with willing landowners that promote the purposes of this Act.
6. The SMAC shall give priority in its work to lands within the Steens Mountain Area and may consider issues that involve lands both within and outside the boundary.

Roads and Travel Access within the Steens Mountain Area:

1. The BLM shall prepare an appropriate transportation plan for Federal lands within the Steens Mountain Area that addresses the actions needed to further the purposes for which the Steens Mountain Area was established.

2. All motorized or mechanized vehicle use off-road on Federal lands within the Steens Mountain Area is prohibited, except that vehicles may be used for: construction or maintenance of agricultural facilities; fish and wildlife management; ecological restoration projects; or other authorized administrative purposes and or for emergencies.
3. No new roads or ways may be constructed on Federal land within the Steens Mountain Area, except those necessary for public safety or protection of the environment and then only after consultation with the SMAC. Nothing in this section is intended to limit the construction or maintenance of trails intended for non-motorized or non-mechanized use.
4. Within the boundaries of the Steens Mountain Area and the wilderness units designated by this Act, the Secretary shall provide reasonable access to non-federal land or interests in land, which will provide the owner of such land or interest the reasonable use thereof. Nothing in this Act shall have the effect of terminating any valid existing right-of-way.

Development:

- (a) Development on public and private lands which is different from the current character and uses is inconsistent with the purposes of the Act. No new facilities will be constructed on public lands, with the exception of those structures necessary for: enhancing botanical, fishery, wildlife or watershed conditions; or for public information, health or safety. Nothing in this section is intended to affect rights or interests in real property, nor supersede state law.
- (b) Non-Development Incentives: As consideration for the purchase of land, development or non-development rights or conservation easements:
 - (1) Grazing permittees will be eligible for long-term (up to 30 years) grazing permits when they are coupled with equivalent long-term legally binding conservation easements or non-development agreements on private land within the Steens Mountain Area.
 - (2) The Secretary is specifically authorized to enter into land exchanges and non-development agreements with willing private landowners, irrespective of whether they hold federal grazing permits.
 - (3) The Secretary, in appraising non-federally owned land within the external boundaries of the Steens Mountain Area or wilderness units, shall disregard any adverse impacts on values resulting from the designation of these lands under this Act.

- (c) \$25,000,000 is authorized for the purpose of purchasing long-term legally binding easements, non-development agreements, and land within the designated boundary. This shall apply to all private landowners within the Steens Mountain Area.

Steens Mountain Wilderness Units:

Approximately 143,000 acres will be designated as wilderness and managed under the Wilderness Act, unless otherwise described below.

Units to be designated are:

- Blitzen River
- High Steens
- Little Blitzen Gorge
- South Fork Donner und Blitzen
- Home Creek
- Alvord Peak
- Land bridge acreage
- Current Private Land
- Certain Non-WSA Lands

The Steens Mountain Loop Road and access to private and state property within the wilderness units shall remain open to motorized and mechanized vehicles.

Vehicle use:

The Secretary shall prohibit the use of motorized vehicles in the wilderness units, except in the case of the following roads or ways:

- (a) Steens Mountain Loop Road
- (b) Newton Cabin Road to Indian Creek
- (c) Cold Springs Road
- (d) Access to private lands within the wilderness areas
- (e) Carlson Creek Road (land bridge & power line)
- (f) Bone Creek Road (“ “ “ “ “)

Management Within Wilderness:

The Secretary of the Interior shall manage the wilderness units. Subject to valid existing rights, lands shall be managed in accordance with the Wilderness Act and with Sec. 108, P.L. 96-560, House Report 96-617. The following exceptions may be permitted to promote ecological health:

- (1) Management of juniper species with mechanized tools, after consideration of non-mechanized treatments, and water developments intended and designed to improve

the ecological health of the area when recommended by the Science Committee and with the concurrence of the SMAC. Any management of juniper species with mechanized tools should not occur until non-mechanized treatments have been considered, and until mechanized treatments have been recommended by the Science Committee, with the concurrence of the SMAC.

- (2) Use of aircraft when necessary for livestock and wildlife management.
- (3) In Alvord Peak, there may be up to six water developments.

Wilderness Study Areas:

Those Wilderness Study Areas (WSAs) not included in the Steens Mountain Wilderness Units shall remain WSAs.

Management within WSAs:

It is anticipated that water developments, juniper management, and fencing may be necessary for the purpose of resource protection rather than to accommodate increased numbers of livestock. These improvements must comply with 603(c) of FLPMA. Any management of juniper species with mechanized tools should not occur until non-mechanized treatments have been considered, and until mechanized treatments have been recommended by the Science Committee, with the concurrence of the SMAC. The BLM shall be responsible for installing any fencing required for resource protection.

Water Rights in the Wilderness Units:

- (1) Congress hereby reserves a quantity of water sufficient to fulfill the purposes for which the wilderness units are established. The priority date of such reserved rights shall be the date of the enactment of the Act.
- (2) The Secretary shall take steps necessary to protect the rights reserved by the Act, including the filing by the Secretary of a claim for the quantification of such rights in any present or future appropriate stream adjudication in the courts of the State of Oregon in which the United States is or may be joined and which is conducted in accordance with the McCarran Amendment (43 U.S.C. 666).
- (3) Nothing in the Act shall be construed as a relinquishment or reduction of any water rights reserved or appropriated by the United States in the State of Oregon on or before the date of enactment of the Act.

Special Use Permits:

Existing BLM special-use permits may be renewed consistent with the purposes of the Wilderness Act. However, if current permit conditions are inconsistent with the Wilderness Act, the BLM shall negotiate with permit holders to realize historic permit use consistent with the purposes of the Wilderness Act and this Act.

Grazing:

(a) Grazing Permits Retired: Grazing permits will be permanently retired and livestock will be excluded from the following areas, totaling approximately 100,648 acres:

Blitzen River
High Steens
Little Blitzen Gorge
South Fork Donner und Blitzen

(b) Grazing allowed: Grazing will be allowed to continue in all other wilderness units.

(c) Grazing permit exchanges: Grazing on public lands under the Lothar and Roaring Springs permits (to be delineated) will be retired, and the Secretary shall not reallocate the forage available under such permits for livestock grazing purposes. The Secretary will continue to seek suitable forage for ranchers whose permits have been retired.

Grazing Administration:

The same laws, regulations and executive orders followed by the BLM in issuing and administering grazing permits on other lands under its jurisdiction shall be followed on lands within the Steens Mountain Area, except as provided by the 30/30 grazing option.

Land Acquisition and Disposal:

The Secretary may acquire other non-Federal lands and interests in lands located within the wilderness units from willing sellers.

The Secretary may not administratively dispose of Federal land in the Steens Mountain Area unless the Secretary disposes of the land as part of a land exchange that the Secretary certifies to Congress furthers the purposes of this Act. Congress must specifically authorize any other disposal of Federal land within the Steens Mountain Area.

Land Exchanges:

The land exchange package is critical to the purpose and implementation of this Act. Steens legislation will facilitate land exchanges with willing landowners for the purpose of protecting and consolidating Federal lands within the Steens Mountain Wilderness Units. The land exchanges overall, in combination with other measures, shall result in a net benefit for the public and the environment. Interested parties will have an opportunity to review and comment on the environmental benefit of the overall land exchange package. In addition to landowners and the Bureau of Land Management, an independent party will review the overall land exchange package to ensure that it reflects fair value and benefits the public.

State Lands:

For those lands and mineral interests that are managed by the Division of State Lands and held within the boundaries of the mineral withdrawal area, the State of Oregon and the Secretary shall agree to an exchange of Federal lands or Federal mineral interests that are outside the boundaries of the mineral withdrawal area and are of approximately equal value, or to a monetary payment to the State.

Cultural Site Protection Agreements:

The Secretary may enter into agreements with the Burns Paiute Tribe to protect cultural sites of importance to the Tribe.

Steens Mountain Advisory Council (SMAC):

The Secretary shall establish a council, to be known as the “Steens Mountain Advisory Council (SMAC),” to advise the Secretary in managing the Steens Mountain Area, including those lands designated as wilderness, and in promoting cooperative management programs between the Federal government, private landowners and other parties in the greater Steens Mountain area.

Membership of the SMAC shall be composed of the following:

- 1) A private landowner in the Steens Mountain Area, appointed from nominees submitted by the County Court for Harney County, Oregon.
- 2) Two persons holding federal grazing permits for lands within the Steens Mountain Area, appointed from nominees submitted by the County Court for Harney County, Oregon.
- 3) A person interested in fish and recreational fishing on Steens Mountain, appointed from nominees submitted by the Governor of Oregon.
- 4) A member of the Burns Paiute Tribe, appointed from nominees submitted by the Tribe.
- 5) Two persons who are recognized environmental representatives, one whom shall

represent the State as a whole, and one of whom is from the local area, appointed from nominees submitted by the Governor of Oregon.

- 6) A person who participates in what is commonly referred to as dispersed recreation, such as hiking, camping, nature viewing, nature photography, bird watching, horseback riding, or trail walking, appointed from nominees submitted by the Oregon State Director of the BLM.
- 7) A person who is a recreational permit holder, or is a representative of a commercial recreation operation, in the Steens Mountain Area, appointed from nominees submitted by the County Court and the Oregon State Director of the BLM.
- 8) A person who participates in what is commonly referred to as mechanized or consumptive recreation, such as hunting, off-road driving, hang gliding, or parasailing, appointed from nominees submitted by the Oregon State Director of the BLM.
- 9) A person with expertise and interest in wild horse management on Steens Mountain, appointed from nominees submitted by the Oregon State Director of the BLM.
- 10) A person who has no financial interest in the Steens Mountain Area to represent statewide interests, appointed from nominees submitted by the Governor of Oregon.

The Secretary shall provide the advisory council with necessary administrative support, and shall designate an appropriate officer of the BLM to serve as the Secretary's liaison to the advisory council.

Steens Mountain Advisory Council Activities:

The SMAC is advisory to the Secretary. The advisory council shall utilize sound science, existing management plans, and other tools to formulate new and unique approaches to management of the area of Steens Mountain. The advisory council shall work in conjunction with the Secretary and interested persons to develop cooperative programs and incentives for seamless landscape management that meet human needs and maintain and improve the ecological and economic integrity of the Steens Mountain Area.

The advisory council shall advise the Secretary with respect to preparation and implementation of the management plans for the wilderness areas and other Federal lands in the Steens Mountain Area.

In order for the SMAC to forward recommendations to the Secretary, nine (9) members of the SMAC must be in agreement. Other procedures of organization and operation will be decided by the SMAC.Independent Science Team:

The Secretary shall appoint, as needed or at the request of the SMAC, a team of respected, knowledgeable and diverse scientists to provide advice on questions relating to the management of the Steens Mountain Area to the Secretary and the SMAC. The Secretary shall seek the advice of the SMAC in making these appointments.

Wild and Scenic Rivers:

The Wild and Scenic Rivers Act is amended by including segments of the following creeks, located in the Steens Mountain Wilderness Units:

- 1) Wildhorse Creek
- 2) Mud Creek (South)
- 3) Ankle Creek

Establishment of Donner und Blitzen River Redband Trout Reserve:

The Donner und Blitzen Redband Trout Reserve will be designated for the purpose of conserving, protecting and enhancing the Donner und Blitzen population of redband trout and the unique ecosystem of plants, fish, and wildlife.

Establishment of Fir Groves Management Unit:

Upon completion of the Hammond land exchange, the Secretary shall establish a fir grove management unit in the area of Big Fir Creek, Little Fir Creek, and Fence Creek. The Secretary will protect the outstanding values of the only fir forest on Steens Mountain. The management unit shall be closed to grazing, but the Secretary shall continue to permit the trailing of livestock and maintenance of livestock trails through the unit.

Commercial timber harvest:

Removal of trees from Federal lands within the Steens Mountain Area may take place only if clearly needed for ecological restoration and maintenance, or for public safety. Any management of juniper species with mechanized tools should not occur until non-mechanized treatments have been considered, and until mechanized treatments have been recommended by the Science Committee, with the concurrence of the SMAC. Sale of products from harvest of junipers on Federal lands within the Steens Mountain Area is permitted when part of a scientifically based and approved ecological restoration project.

Hunting, Fishing and Trapping:

Hunting, fishing and trapping shall be permitted on Federal lands in accordance with the laws and regulations of the State of Oregon, except that the Secretary, after consultation with the State, may designate zones where and establish periods when no hunting, trapping or fishing will be allowed for reasons of public safety, administration or public use and enjoyment.

Appropriations:

There is hereby authorized to be appropriated such sums as may be necessary for the administration of the Act.

Mineral Withdrawal:

Subject to valid existing rights, all Federal land within the mineral withdrawal area and all land and interests in land acquired under this Act that are acquired by the United States after the date of enactment of this Act are withdrawn from:

- (1) All forms of entry, appropriation, or disposal under the public land laws;
- (2) location, entry, and patent under the mining laws; and
- (3) operation of the mineral leasing and geothermal leasing laws.

Where consistent with the purpose of this Act and the land use plans for the Steens Mountain Area, development of saleable mineral resources for road maintenance may be permitted in specific locations outside of wilderness units or wilderness study areas where authorized prior to the date of enactment of this Act.

Mineral Withdrawal Boundary: See Map.

Steens Mountain Protection Bill

National Monument versus Steens Mountain Protection Bill

	Monument	Steens Protection Bill
Wilderness	None- Hold Wilderness Harmless, No designation, No Release	Create 143,000 acre Steens Mountain Wilderness Units- From Following Areas Blitzen River High Steens Little Blitzen Gorge South Fork Donner and Blitzen Home Creek Alvord Peak Land Bridge Acreage Current Private Land
Wild and Scenic Rivers	None	3 Wild and Scenic Rivers Wildhorse Creek Mud Creek Ankle Creek
Livestock Grazing	Continue Grazing under existing rules and regulations	Livestock Grazing will be removed from 100,648 acres of Wilderness
Special Wildlife Areas	None	Blitzen Redband Trout Reserve
Ecological Areas	None	Fir Groves Management Unit (Contingent upon Hammond Land Exchange).
Wilderness Study Areas	Retained	Retained unless legislated as Wilderness
Roads	Prohibit Cross Country Vehicle Travel.	No new roads. Prohibits cross-country vehicle travel. Between Wilderness Areas, the Steens Maintain Loop Road, Newton Cabin Road to Indian Creek, Cold Springs Road and Bone Creek Road will remain open in current condition. BLM will develop an overall transportation plan to further the purposes of the act. Reasonable access to private property.
Exchanges	None	Land Exchanges blocking up approximately 125,000 plus acres of contiguous Wilderness
Non-Development Incentives	None	Incentive based programs to encourage non-development

Private Land		Non-Development Easements 30/30 Grazing Permits/Non Development Easements Land Sales to Government
Development Restrictions on Public Land	Facilities permitted if consistent with protection of the monument resources.	No new facilities will be constructed on public lands.
Mining	Withdrawn from all forms of entry -- all locatables, leaseables, saleables, and geothermal.	Withdrawn from all forms of entry -- all locatables, leaseables, saleables and geothermal from 1 million acres, including the Alvord Desert.
Future Fed. Land Sales	No Sale or Exchange of federal land except to further the management purposes of the area.	No Sale or Exchange of federal land except to further the management purposes of the area.
Boundaries	National Monument- Between 500,000 and 1.2 Million Acres	3 Boundaries (approximately) 1) Wilderness Boundary - 143,000 Acres 2) Steens Mountain Cooperative Management and Protection Area Boundary (500,000 acres) 3) Mineral Withdrawal Boundary (1.1 million acres)
Management	Manage for the protection of objects of scientific interest: biological, geological, and cultural resources.	The purposes of the Cooperative Area are: to maintain and enhance cooperative and innovative management practices between the public and private land managers; to maintain the economic viability of grazing and recreation operations on private and public land; and to conserve, protect and manage the long-term ecological health and functioning watersheds of Steens Mountain.
Landholding Pattern	Federal Lands and Private Lands will continue to be intermingled with continued difficulty in providing for landscape management	Approximately 125,000 acres of the High Steens and Blitzen watershed will be blocked up into one contiguous area. There will be a additional wilderness in the Home Creek area.

[Return to Governor's Office](#)

JOHN A. KITZHABER, M.D.
Governor

September 3, 1999

The Honorable Phil Keisling
Secretary of State
State Capitol 136
Salem OR 97310

Dear Secretary of State Keisling:

I am returning herewith Senate Bill 497 unsigned and disapproved.

I support the objective of historic preservation and believe there are opportunities to improve Oregon's current Special Assessment Program for Historic Properties. However, I believe that the potential gains provided by SB 497 towards these objectives are outweighed by what may be lost.

I have concerns about both the substance and the process of the bill. The Special Assessment Program for Historic Properties has issues associated with it that have been debated in court as well as in the Legislature for the last three sessions. Attempts to resolve these controversial issues did not pass the 1997 session, and appeared to be headed for the same end in 1999. In the last days of this session, the bill was entirely rewritten, and the new bill moved through without hearing or opportunity for sufficient review by interested parties. This is an unacceptable process to resolve these complex issues.

Substantively, I am concerned about the potential to lose the integrity of the historic preservation program through a minimization of the actions required to participate in the program and still qualify to receive tax benefits, and also about extending the special historic tax rate to new construction when it is attached to historic buildings. I am also concerned about concluding an ongoing debate about the definition of "frozen value" when there was so little public discussion about an issue with significant financial implications hanging in the balance.

I share the belief that it is important to have effective incentives in place to promote the rehabilitation, restoration, and preservation of historic properties. Incentives provided by the special assessment program have preserved irreplaceable historic buildings and character statewide - from Portland to Baker City. I recognize that Measures 47 and 50 all dramatically reduced the incentive that Oregon's Special Assessment Program for Historic Properties actually provides. I also recognize that certain aspects of the current program may actually be creating a disincentive to participating in the program.

Since the program is sunsetting in 2002, this next year is an appropriate time to take a comprehensive view of the entire program. It is also a good time to evaluate the current set of incentives we have in light of recent property tax changes. Finally, it is an opportunity to look at how we can do more to retain important historic resources within our broader livability goals.

I will request that the Oregon Parks and Recreation Department undertake the program review as well as how the State Historic Preservation Office is facilitating the goals of historic preservation. I will also ask the Community Development Incentive Advisory Board to shape incentives for historic preservation in the context of their identifying appropriate incentives for downtowns and main streets for the 21st Century Community

Incentive Fund. As a result of these two processes, I will propose legislation next session to improve the state historic preservation program to retain our historic resources. I am committed to a comprehensive review of this program and its incentives so that we continue to meet Oregon's public goals for historic resources into the future.

Sincerely,

John A. Kitzhaber, M.D.

[Return to Governor's Office](#)

JOHN A. KITZHABER, M.D.
Governor

September 3, 1999

The Honorable Phil Keisling
Secretary of State
136 State Capitol
Salem, OR 97310

Dear Secretary Keisling:

I am returning herewith enrolled HB 2942, unsigned and disapproved.

This bill increases funding for Economic Development and provides a framework to increase the Education Endowment Fund principal. These are excellent initiatives.

I welcome the opportunity to refine these concepts in the future with our local government partners. I support community projects to further economic development.

The bill provisions remain too restrictive in the current economic environment.

Sincerely,

John A. Kitzhaber, M.D.

[Return to Press Releases](#)
[Return to Governor's Office](#)

JOHN A. KITZHABER, M.D.
Governor

September 3, 1999

The Honorable Phil Keisling
Secretary of State
State Capitol 136
Salem OR 97310

Dear Secretary Keisling:

I am returning herewith House Bill 3282 to you unsigned and disapproved.

House Bill 3282 would allow churches that serve urban areas to be located outside urban growth boundaries on land zoned exclusive farm use. With this bill, Speaker Snodgrass has raised a very real problem faced by some congregations.

Large churches that want to cater to the diverse needs of their congregations are branching out to provide an array of community programs beyond the traditional Sunday services. These churches often seek large parcels of inexpensive land to provide youth and family classes throughout the week, gymnasiums for recreation, and large auditoriums for performances and events.

The needs of large churches and other urban uses to find land must be balanced with the need to protect Oregon's 3.52 billion dollar agricultural industry from the encroachment of urban activities that may disrupt farming operations with traffic, noise, and dust. Oregon protects its farmland in two major ways. First, by maintaining an urban growth boundary and establishing protective zoning to separate urban and rural uses. Second, by taxing farmland at a lower rate (a rate friendlier to farming) than land within the urban growth boundary which may be developed more intensively.

These measures have proven effective at protecting large parcels of relatively inexpensive land for farming. They are not intended to entice urban uses outside urban growth boundaries.

Alternatives exist, however, for locating large churches outside urban growth boundaries should that become necessary. Existing state land use laws do not prohibit counties from authorizing churches on rural residential, commercial and industrial land. This is appropriate under certain circumstances because these lands may already be committed to non-farm and non-forest uses.

While I believe churches provide a needed and beneficial service to communities, I cannot support using Oregon's best soils to accommodate them.

Sincerely,

John A. Kitzhaber, M.D.

[Return to Governor's Office](#)

JOHN A. KITZHABER, M.D.
Governor

July 22, 1999

The Honorable Lynn Snodgrass
Speaker of the House
269 State Capitol
Salem, Oregon 97310

Dear Speaker Snodgrass:

I am returning herewith HB 3595, unsigned and disapproved.

HB 3595 would prohibit any local government from subjecting to local taxation attorneys whose only conduct of business within the locality occurs at a city or county courthouse. The bill constitutes a preemption of local governments' authority and singles out attorneys for preferential treatment. It is aimed specifically at the City of Portland's business license tax and it runs contrary to the conclusions reached by my interim tax policy advisory committee chaired by Ron Timpe, Chairman and CEO of Standard Insurance and President of the Portland Chamber of Commerce. This committee recommended a statutory prohibition on such exemptions as one means to lessen local government's reliance upon property tax revenue to pay for needed local services.

Additionally, the bill's exemption for one single profession, namely attorneys, is unwise and operates in a manner contrary to the principle underlying business license fees collected by the City of Portland: the costs of providing municipal facilities, infrastructure, and services should be borne by all citizens who benefit from those services. Enactment of HB 3595 would invite members of other professions to seek similar license fee or tax exemptions, while providing no principled, profession-specific basis for such treatment.

As I indicated in correspondence to the legislature on this bill, this is a matter that should be brought before the Portland City Council, not the legislature. I encourage the proponents of HB 3595, representatives of the City of Portland, and the Oregon Bar Association to jointly review and resolve this issue in the interim.

Sincerely,

John A. Kitzhaber, M.D.

[Return to Press Releases](#)
[Return to Governor's Office](#)

JOHN A. KITZHABER, M.D.
Governor

July 21, 1999

The Honorable Brady Adams
President of the Senate
State Capitol Salem, OR 97310

Dear President Adams:

I am returning herewith Senate Bill 483, unsigned and disapproved.

SB 483 would allocate \$2 million to the Office of Energy to establish "smart jitney" pilot projects. The testimony on Senate Bill 483 indicates that the Smart Jitney and Advanced Community Information Systems Fund is a concept that has not been successful by others who have tried to establish such a program. According to public testimony during the hearing on the bill, a similar system was tried in Germany but failed.

Recently, the Federal Transit Administration approved grant funding to the Office of Energy for a \$150,000 smart jitney pilot project. This pilot project will be carried out cooperatively between the Oregon Energy Office, the City of Wilsonville, and a private contractor. I believe it is better to learn how this small scale pilot program fares before, investing \$2 million dollars of scarce state resources in a major expansion.

I am concerned that this bill appears to be targeted to benefit a single contractor. Projects under this bill would be exempted from public procurement and contracting requirements. I don't believe that such an exemption is good public policy.

I believe it is in the best interest of Oregonians to allow the Oregon Energy Office and City of Wilsonville to work to create a successful smart jitney pilot project before increasing state investment in such a project.

Sincerely,

John A. Kitzhaber, M.D.

[Return to Press Releases](#)
[Return to Governor's Office](#)

JOHN A. KITZHABER, M.D.
Governor

June 3, 1999

The Honorable Brady Adams
President of the Senate
S-203 State Capitol
Salem, Oregon 97310

Dear President Adams:

I am returning herewith Senate Bill 3, unsigned and disapproved.

Just over a year ago, the Republican leadership of the legislature requested that I take executive action to re-site the corrections intake center and new women's prison at Day Road in the City of Wilsonville's Urban Reserve. I have diligently worked to keep faith with leadership's request and with the commitments we made to the community of Wilsonville.

After an in-depth study, I decided to support the move to the Day Road site because I believe it is a good site and because I believe that cooperation was important for bringing this issue to a close. At that time, it was clear that strong bipartisan majorities existed to move this prison site from Dammasch to Day Road. With this veto, I am hopeful that the House and Senate leadership will allow consideration of a new bill to site the prison facilities at Day Road, and that the legislature will adopt it in a positive and bipartisan manner. As is well understood, without legislation the prison facilities will be constructed at the Dammasch Hospital site in Wilsonville because it is the state's only legal site, and this facility must be built.

Instead of signing Day Road legislation, I am disappointed to be vetoing Senate Bill 3 for reasons of public safety, cost-efficiency, and fairness.

For reasons of public safety policy, I believe it is crucial to build an accessible intake center in the Willamette Valley, as do our sheriffs. The public safety need for a new and secure women's prison is self evident, given the poor condition of the state's current facility. For cost efficiency reasons, a second men's facility at Umatilla is the right decision because it will operate very efficiently with the Two Rivers Correctional Facility; as it stands, Senate Bill 3 would sacrifice these saving efficiencies. Lastly, it is only fair that the tri-county metropolitan area have a prison site -- the eleven other adult and juvenile siting decisions I have made include every region of the state except the tri-county area.

Having been given the sweeping responsibility of siting all state correctional facilities, I have a deep appreciation and commitment to the idea of regional prison siting because it is perceived as fair and equitable across the state. The comments of citizens of the many communities I have visited, both east and west of the Cascades, affirm the view that it is fair to expect every region to share in the burden and benefits of prison siting. It is also practical to share the prison siting load regionally. A regional distribution of facilities will ensure available and talented staff, necessary infrastructure and reliable professional and medical services. For these reasons, I remain steadfast in the conviction that every region share in the state's prison siting efforts.

My veto holds true in word and deed to the responsibility I was given and to the commitments I have made to many Oregon citizens and communities.

Sincerely,

John A. Kitzhaber, M.D.

JOHN A. KITZHABER, M.D.
Governor

October 15, 1997

Chairman Henry Hewitt &
Members of the Commission
Oregon Transportation Commission
900 SW 5th Avenue
Portland, OR 97204

Dear Chairman Hewitt:

In light of the failure of the funding package at the legislature, we are faced with the reality that we have considerably less revenue than previously thought and currently needed. As you know, the Oregon Transportation initiative identified maintenance and preservation of our highway system as our highest priority. We need to do all we can to ensure that our investment in the existing transportation system is protected and wisely managed.

This situation must be acted upon immediately, I applaud the Commission's efforts to adjust the development section of the Statewide Transportation Improvement Plan (STIP) to reflect a smaller stream of future revenue. In setting this new course, it is important that we honor all existing project commitments. Still, we must be willing to pursue a new course and work to implement a plan, which maximizes the life of the existing transportation investments. If there is no legislative action forthcoming to provide sufficient funds for both modernization as well as maintenance and preservation, I will seek repeal of ORS 366.507 to eliminate the legislative mandate to earmark funds for modernization projects when projections show they cannot be supported from a fiscally responsible standpoint.

I therefore recommend to the Commission the following course of action:

Submit STIP to FHWA as planned with \$228 million in Capital.

Plan the next STIP update to retain capital expenditures in Years 2000 and 2001, but plan only for preservation work in 2002 and 2003.

Eliminate all ODOT capital projects from the development section. The Commission was planning to eliminate a sizable amount of the \$500 million in projects. I recommend you eliminate all state modernization projects in order to ensure that preservation and maintenance work is sustained over time.

I encourage the Commission to pursue any and all additional measures, which would direct and maximize all revenues toward preservation efforts, thus assuring protection to our existing investment in the state's transportation infrastructure.

Please keep me informed as you work your way through this process.

Sincerely,

John A. Kitzhaber, M.D.

Governor Kitzhaber's Letter to Senator Hatfield

September 27, 1996

The Honorable Mark O. Hatfield
United States Senator
711 Hart Senate Office Building
Second & C Streets NE
Washington DC 20515

Dear Senator Hatfield:

I am writing to follow up on our conversation Wednesday concerning S. 2102. As I mentioned then, I am extremely disappointed with the manner in which I learned of the efforts to nullify the Warm Springs Treaty of 1865. I learned of this bill from someone who happened to be watching C-SPAN and witnessed its introduction.

Enclosed you will find letters outlining our specific concerns from the Oregon Department of Fish and Wildlife, the Oregon Water Resources Department, and a letter from Oregon Attorney General Ted Kulongoski which takes specific issue with the September 24 letter you received from Tribal Chair Joe Moses.

Clearly, the Treaty of 1865 was not a proud moment in our nation's history and I make no attempt to defend it. Nevertheless, this treaty has been in existence 131 years and agreements and understandings on the affected lands have evolved based on its existence. Had I been brought into these discussions with reasonable advance notice, I could have entered into agreements with the Tribe to both protect necessary State interests and address the Tribe's concerns with the treaty. That was not the case.

This is an issue with huge ramifications for land management in Oregon. To attach it as a rider to the Omnibus Appropriations Act of 1997, thus preventing any meaningful input from the government of the State of Oregon, its natural resource agencies, or its citizens who will be affected, constitutes a significant setback in the state's relationship with the federal government.

This situation is made worse by the fact that Mr. Paul of your staff informed us that he received, and honored, a specific request from the Tribe to keep discussions of this bill quiet. You should know that last May, with the full support and encouragement of the Oregon Indian Tribes (including Warm Springs) I signed an Executive Order (enclosed) that established government-to-government relationships with the tribes in Oregon. The manner in which this bill has come

forward clearly violates that agreement and raises serious questions of trust between the Warm Springs Tribal Government and the government of the State of Oregon.

As you know, the State manages fish, wildlife, and water resources in Oregon and S. 2102 addresses tribal rights to natural resources off the Warm Springs Reservation. The State's specific resource concerns center around off-reservation hunting and water rights. Without the 1865 Treaty, tribal members can hunt deer, elk, bighorn sheep and other game species at any time and in any numbers on millions of acres of ceded lands without risk of prosecution. This kind of uncontrolled hunting could create a significant problem for wildlife management. It is clearly an issue that deserves to be worked out with an agreement that is a part of any changes to the Treaty.

In addition, S. 2102 will effectively destroy 12 years of work on a negotiated settlement of Warm Springs water rights. Under the bill, the Tribe can potentially lay claim to major water reservations from the Deschutes, John Day, Hood, Clackamas, and possibly other rivers.

This action has the potential to displace many other water users and is, therefore, of legitimate concern to the State.

Since we first learned of this issue, only 48 hours ago, my staff has worked continuously to develop language in the bill that would be mutually acceptable. The Tribe has been unwilling to agree to any modifications.

For the reasons listed above, I strongly oppose the passage of S. 2102. I believe it represents a significant threat to the State's ability to effectively manage state wildlife and water resources, as well as to our relationship with the Warm Springs Tribe.

If the Treaty of 1865 needs to be nullified -- and that may well be the case -- this is clearly not the way to do it. An issue of this magnitude deserves a thoughtful and open dialog between all the effected parties. The State of Oregon deserves more than a two-day window for input and involvement.

Let us take the time to work out the issues of legitimate concern to both the State of Oregon and the Tribal Government of Warm Springs. I stand ready to work with you and with the Tribe to seek a mutually acceptable solution to correct past injustices.

Sincerely,

John A. Kitzhaber, M.D.

[Return to Press Releases](#)

[Return to Governor's Office](#)

February 6, 2001

Mitchell E. Daniels, Jr. Director
Office of Budget and Management
Administrative Office
725 17th Street NW Room 9026
Washington DC 20503

Dear Mr. Daniels:

I am writing to seek your help on a matter of importance to the four Pacific Northwest states – Oregon, Washington, Idaho, and Montana.

The Bonneville Power Administration sells power to utilities throughout the Pacific Northwest. Because the resources of the Federal Columbia River Power System (FCRPS) are not sufficient to meet all of the power sales obligations of Bonneville, the agency must purchase power in the open market for resale to its customers. Bonneville's purchases increase during the winter months, when loads are highest in this region, and during years when streamflows are lowest.

This winter, streamflows are extremely low. While we continue to hope for precipitation for the remainder of the winter, it is so far one of the driest on record. Snow pack in the Columbia Basin is below 60% of normal, foretelling significant reductions in regional hydroelectric output until at least next fall.

Because of the extraordinary power prices now occurring in the western power market, Bonneville's purchases are coming at great cost. Recently, Bonneville has spent over \$50 million weekly to make power purchases. To limit its exposure to these costs, Bonneville has started to forego purchases and instead to order that more water be released from reservoirs in order to be run through the power-generating turbines of the FCRPS.

This water was being stored primarily in order to provide spring-time flows to assist migrating juvenile salmon to the ocean. (It also provides additional assurance for power purposes that the reservoirs will refill.) With this water being released now, it is more likely that there will be insufficient flows in spring and summer for fish purposes.

I do not want to suggest that Bonneville has acted inappropriately, given the circumstances, although I believe it would gain the agency more acceptance if it engaged in a public consultation process before deciding on its own that a particular dollar figure is its limit for power purchases. The effect of the high western power prices on ratepayers is already high and is expected to go much higher, particularly for Bonneville's customers, which must absorbed a

projected rate increase this fall possibly near 100%.

However, fish protection in the Columbia River is a very important public purpose and a mandated mission of the Bonneville Power Administration. In addition, twelve Columbia River salmonid species have been listed as threatened or endangered under the Endangered Species Act. The federal government also has an obligation to the Columbia River Indian tribes to provide fisheries under treaties signed in 1855. The federal government's fish responsibilities in the Columbia are neither small nor trivial.

Since the passage of the Northwest Power Act in 1980, it is estimated that ratepayers have invested \$3.5 billion in fish recovery in the Columbia Basin. State government and private parties have also spent large sums on fish recovery. We are beginning to see some results from that investment, with one of the strongest spring chinook runs in decades returning to the river last year. We could lose a lot of ground in fish recovery if an entire year class of juvenile fish cannot migrate successfully downriver due to low flows.

The power bills that Bonneville is paying are unfortunate. I, and several other western governors of both parties, have called upon FERC, the Energy Secretary, and the President to take regulatory action to control and bring down these prices, but these entreaties have been rebuffed. Given that these prices may be extant for a considerable period of time, Bonneville will continue to be faced with the difficult choice of power costs or fish.

The Administration could relieve this situation if it would indicate to Bonneville now that it does not expect it to make a payment on its Treasury obligations this year. Relief from this obligation would enable Bonneville to continue to make power purchases while limiting the future damage to Columbia River salmon populations. I believe that this course of action would be in the best interests of all: Bonneville and its customers, the people of the Pacific Northwest, the Columbia River Indian tribes, and the federal government.

I look forward to your response to this proposal.

Sincerely,

John A. Kitzhaber, M.D.

[Return to Speeches](#)

[Return to Governor's Office](#)

February 6, 2001

The Honorable George Bush
President of the United States
1600 Pennsylvania Avenue
Washington DC 20500

Dear President Bush:

High power prices are beginning to have devastating effects in the Pacific Northwest. Most of the national attention on this problem has focused on California. That attention is appropriate in so far as the long-term solution to the western power problems must start in California. However, while we wait for a long-term solution, the most immediate deleterious effects of the high power prices are occurring in the utility systems in Washington, Oregon, Idaho, and Montana.

Publicly owned utilities have no choice but to pass on the increased costs of purchased power to ratepayers. There are no shareholders who can temporarily or permanently shoulder these costs. Five publicly owned utilities in Oregon have had to raise rates by 20% or more to deal with the market price increases in the small portion of their power supplies they buy on the market. The publicly owned systems in Washington are experiencing even worse problems. Seattle City Light has raised rates 30%, Tacoma by 50%, Snohomish PUD (suburban Seattle) by 35%. All these utilities expect to raise rates even more to deal with future market costs and with the rate increases of nearly 100% that will come this fall from the Bonneville Power Administration.

The problem has also spread to investor-owned utilities. PacifiCorp has applied to the Oregon Public Utility Commission for a rate increase, and Idaho Power has increased rates in Idaho by 24% and expects to ask for another increase later this year.

While the Pacific Northwest has historically enjoyed lower power rates compared to the nation, electric power has been the engine of economic development for this region since the Great Depression. Abundant electricity at reasonable cost has allowed this region to compete economically despite its remoteness from markets and other sources of energy. Moreover, not all our energy costs have been low. We have experienced virtually the highest gasoline prices in the nation for the last two years.

The Honorable George Bush

February 6, 2001

Page 2

I am asking you to reconsider your opposition to establishing temporary price regulation in the western wholesale power market. At the current time, the high prices are not working to encourage more power to be brought to the market. In fact, I believe, the reverse is true. High prices encourage marketers to make sure that a tight power market always remains short of being adequate to meet load, driving prices higher for all power supplies. It is anomalous that despite these high prices, record amounts of California generation remain out of service.

Temporary price regulation would have no negative effect on development of new generation, which has a multi-year lead-time. Sufficient new generation is already under development in California, the Northwest, and elsewhere to provide the West with adequate power resources two to three years from now. In the meantime, however, the West is vulnerable to high prices and manipulation of tight power markets.

It is entirely feasible for FERC to establish temporary rate regulation that gives low cost producers good profits and high cost suppliers a generous return. All suppliers can profit in a well-ordered marketplace and have incentive to keep generation running and on the grid.

Even if California's efforts succeed in moving more power purchases into long-term contracts, the short-term market may remain vulnerable to high prices. Without temporary regulation to stabilize this market, I fear that the current crisis in the West will expand and start to ripple through the economies of our states. Please do not let what is a very controllable temporary situation become an agent of economic downturn for this important part of the nation.

Sincerely,

John A. Kitzhaber, M.D.

THE KITZHABER EDUCATION AGENDA

EXECUTIVE SUMMARY

The aim of education has always been to prepare young people to shoulder the varied responsibilities of adult life. Yet the realities of today's world, as we approach the 21st Century, demand a number of fundamental changes not only in our system of public education, but in our attitudes toward that system as well. Among these are:

- that we regard our education system not as a collection of separate parts, but as an unbroken continuum stretching from early childhood and pre-Kindergarten through post-secondary training and life-long learning;
- that we require schools to deliver and students to achieve a much higher level of academic performance and demonstrable skills than has ever before been necessary;
- that we strive for the greatest possible degree of access to a superior, comprehensive education for every Oregon child
 - ensuring readiness to learn for our preschoolers;
 - providing appropriate remediation for students who are struggling;
 - removing financial and geographic barriers to post-secondary education; and
 - bringing higher education into line with the needs of today's students and today's marketplace;
- that we devise for the entire spectrum of public education in Oregon a funding mechanism which is marked by both stability and accountability; and
- that we hold every single stakeholder in the education system strictly accountable for ensuring that all Oregonians are prepared to meet the social and economic demands which the new century will bring.

The following paper identifies the major challenges faced by Oregon's system of education, outlines our achievements to date in addressing those challenges, and proposes an agenda of further steps which must be taken if we are genuinely committed to assuring that our children will enter the next century equipped to succeed.

THE KITZHABER EDUCATION AGENDA

INTRODUCTION

As we pass from the 20th to the 21st century, the world itself is passing from a primarily labor-driven to a predominantly knowledge/information-driven society. This fact has profound implications for our systems of public education, since the number of low skill-level jobs that pay enough to support a family will continue to decline.

Success -- perhaps even survival -- in the new century will therefore demand both a wider range of knowledge and a higher level of skills than has ever before been necessary. Those who wish to be productive, economically self-sufficient members of society, able to keep pace with a competitive, global economy, will require a superior, comprehensive education stretching from pre-Kindergarten through post-secondary training and on into life-long learning.

Higher levels of education obviously lead to higher earnings, but the benefits reach far beyond individual well-being and security. As the level of education rises, unemployment rates fall. Workers with more education are re-employed more quickly, have smaller wage losses, and are more likely to have health insurance than those with less education. In addition, they are more likely to vote and to participate in civic and charitable activities.

By contrast, poverty rates for high school dropouts are over ten times higher than for college graduates. High school dropouts are also more than twice as likely to receive income from public assistance and nearly three times as likely to spend time in prison than are high school graduates.

America's long tradition of public education, adapted to meet the demands of a changing world, remains our best chance for ensuring equal opportunity for success for all our children.

Specifically:

- Children must enter school healthy and ready to learn.
- Primary and secondary schools must focus on raising performance in the basics and must require students to demonstrate that they can apply what they have learned.
- All Oregonians must have greater financial and geographic access to post-secondary and life-long learning.
- Post-secondary systems must be responsive to the changing needs of the workplace and the world.
- Education budgeting and financing systems must demonstrate accountable decision-making and provide stability in program planning.

Each of these areas presents a major challenge. In each we have already made significant progress: our achievements. In each, however, there is more to be done: our agenda.

EARLY CHILDHOOD

THE CHALLENGE:

Our children's ability to do well in school is a product not only of our school system, but of a number of other factors, e.g., their personal health, the emotional health of their families, and their early learning experiences.

OUR ACHIEVEMENTS:

- Expanded the Oregon Pre-Kindergarten (Oregon Head Start) program to cover 47 percent of all eligible children. This program offers classroom-based early care and education, as well as comprehensive support services to preschoolers from low-income families.
- Expanded programs to provide health care coverage to children and their families up to 170 percent of the federal poverty level.
- Expanded our Early Intervention and Early Childhood Special Education programs to serve another 1,900 children with identified disabilities.
- Expanded the Oregon Healthy Start program, which provides in-home assistance and support to families with newborn children, especially those with firstborns. The program improves parenting skills and detects problems at a stage when they can be more easily treated.
- Obtained federal waivers so that Oregon could use savings from reduced welfare caseloads to improve programs aimed at achieving long-term self-sufficiency for low-income families and their children.

OUR AGENDA:

- Expand the Oregon Pre-Kindergarten Program to serve 50 percent of eligible low-income children.
- Work with the federal government to allow expanded use of federal funds so that more low-income children and their families can be provided with health insurance coverage.
- Continue to improve the effectiveness, coordination, and scope of early childhood programs.
- Explore creative use of available funds and employ "best practices" to serve more children and families in need.

PRIMARY AND SECONDARY EDUCATION

HIGH PERFORMANCE IN THE BASICS

THE CHALLENGE:

To succeed in the world of the 21st century, all children will need high proficiency in math, reading, writing, science, and social studies. A high school diploma, which can still be earned with a "D-" GPA in classes totaling 22 credits, can no longer guarantee success -- in college, the workplace, or the community.

OUR ACHIEVEMENTS:

- Taken explicit, incremental steps to implement the Educational Act for the 21st Century.

The Educational Act for the 21st Century, passed by the 1991 Legislature, established new and much higher standards of achievement for students in Oregon's primary and secondary schools. Our entire K-12 system is now undergoing a process of transformation in order to help every child succeed. For students, this process will culminate in the Certificates of Initial and Advanced Mastery (CIM and CAM).

State assessments are being given at the 3rd, 5th, 8th, and 10th grades. Tenth-graders in the 1998-99 school year will be the first Oregon students eligible to earn a Certificate of Initial Mastery, demonstrating that they have reached the specified level of knowledge and skills.

- Provided leadership in bringing together all those at the state and local levels who need to participate in helping our schools and our children succeed so that they might have a common vision and understanding of their respective roles and responsibilities.
- Seen steady rise in student performance, indicative of further improvement yet to come.

In 1998, 78 percent of third-graders met the higher reading standards, while only 52 percent would have done so in 1991. In 1998, 48 percent of tenth-graders met such standards, whereas in 1991, only 31 percent of eleventh-graders would have done so.

- Stood by a pledge to veto any legislation that would undercut our commitment to fully implement the Educational Act for the 21st Century.

OUR AGENDA:

- Firmly refuse to turn back from our commitment to our children and their future.
- Continue to provide leadership -- including personal leadership and involvement by the Governor -- in working with school boards, administrators, teachers and parents in implementing the Educational Act.
- Work to help the public understand the changes we are making in our schools, why these changes are so important, and why it will take time to implement such a major system change.
- Provide funding for those state-level functions that are most critical to success at the local district level -- e.g., development of a solid and usable assessment system that can more accurately pinpoint individual student strengths and weaknesses; provide the support necessary to fill the most critical projected teacher shortage areas.

FUNDING TO SUPPORT HIGH STUDENT PERFORMANCE

THE CHALLENGE:

Local school districts and state policymakers alike must have a more accountable means of making funding decisions and of determining what outcomes they can and should expect for their investments. Decisions about specific funding priorities must remain in the hands of locally-elected school boards, but state policymakers must also clearly establish what is expected in return for the state's investment in its public schools.

The current funding system for our K-12 public schools does not allow us to make informed decisions at the state level regarding what can and should be expected in return for our investments. Today this is even more critical in the aftermath of recent voter-approved property tax limitations which have shifted the responsibility for school funding from the local to the state level. Before the passage of Ballot Measure 5 in 1990, the state supplied about 30 percent of local school funding. By 1997-98, it was providing close to 70 percent.

Today almost half of the State General Fund and lottery expenditures go to K-12 schools, and while we know that the amount of revenue per student (adjusted for inflation) has remained relatively flat since 1990-91, we have no way of knowing at the state level exactly what our investment is buying and what can and ought to be expected if additional funding is made available.

OUR ACHIEVEMENTS:

- Funded the development of a consolidated data base on a pilot-project basis so we can compare expenditures among Oregon school districts and examine their activities and outcomes.
- Asked the Association of School Superintendents to identify (a) those factors -- and their associated costs -- which are most likely to improve student performance, and (b) efficiencies that might be possible under the current system.
- Met with school and community leaders throughout the state to identify (a) the factors they believe would increase student performance, and (b) the areas where any additional dollars should be spent in order to raise student performance.

OUR AGENDA:

- Explicitly tie any additional funding for K-12 schools to the outcomes we expect in terms of increased student performance. In particular:
 - require that any additional K-12 funding go towards activities that have been identified as those which will lead to higher student achievement;
 - set clear expectations of performance gains to be achieved for that additional funding;
 - require from districts a reporting of actual gains made; and
 - establish a system of progressive intervention with those districts which do not show the expected gains.

This system will allow locally-elected school boards to determine the specific funding priorities most appropriate for their own districts, choosing from a "menu" of activities such as class size reduction, professional development, readiness to learn, remediation, and alternative learning opportunities. At the same time, the state will set targets for expected increases in student performance. If those targets are not met, then a series of interventions would occur to assist the district in meeting the goals.

- Provide the funding necessary to expand the consolidated data base to include all school districts in the state, allowing for further research into the connections between activities, outcomes, and costs.

Over time, this should enable state policymakers to make more informed funding decisions, and should also allow schools to better understand how they might reallocate resources toward those activities that are shown to improve student performance.

POST-SECONDARY EDUCATION

ACCESS TO POST-SECONDARY EDUCATION

THE CHALLENGE:

For Oregonians to be successful now and in the future, we must find new ways of delivering post-secondary education to people throughout the state, including establishing new partnerships among various institutions of higher learning and making tuition affordable to those who wish to access this education.

Today, the relationship between social and economic success is more closely tied to post-secondary education than ever before. And because people will change jobs and even careers many times during their lives, access to post-secondary education and retraining is an imperative for continued success. Yet a post-secondary education is difficult for many Oregonians to access -- both financially and geographically.

The cost of tuition at an Oregon four-year public university rose from \$1,864 in 1990-91 to \$3,269 in 1996-97, while enrollment in the Oregon University System dropped from 62,000 to under 59,000. The number of Oregon students who will need to borrow \$20,000 or more to get their degree more than doubled in that same six-year period.

In addition, the fact that not all Oregonians live near post-secondary institutions makes it difficult for many of them to acquire the skills they will need.

OUR ACHIEVEMENTS:

- Froze college tuition during the 1997-99 biennium.
- Increased funding for the Oregon Need Grant scholarship program to help defray the tuition costs for students attending Oregon post-secondary institutions.
- Expanded two- and four-year course offerings at schools in Southeastern Oregon, Jackson and Josephine Counties, and a ten-county area in Eastern Oregon by encouraging and investing in new partnerships between our community colleges and our public universities.
- Participated in the Western Governors' University's creation of a "virtual university," which allows Oregonians to augment their college work with offerings from other states without having to leave Oregon.

- Expanded community college provision of on-site customized training to Oregon employers and their employees.
- Increased the availability of distance learning, with the result that our community colleges now serve nearly 20,000 Oregon students in this manner.
- Supported the Oregon University System in its use of technology to give thousands of K-12, community college and university students expanded access to programs and services statewide.

OUR AGENDA:

Improve financial access to post-secondary learning for Oregon students by:

- Continuing the freeze on tuition during the 1999-2001 biennium for Oregon resident undergraduates.
- Establishing a State Scholarship loan program that will reward Oregon high school graduates who receive a Certificate of Initial Mastery; explore the possibility of establishing grants for these students who also meet financial need criteria. These programs will assist those young Oregonians who have worked hard to meet our new higher academic standards by helping them take the first step into an Oregon post-secondary education.
- Supporting Ballot Measure 55, which establishes a higher education prepaid tuition plan, allowing Oregon residents to purchase a future college education for their children at today's prices by paying in advance for tuition at any accredited community college or not-for-profit institution of higher learning.
- Requiring the State Board of Education and Board of Higher Education to develop a plan for seamless processes among our two- and four-year institutions, so that programs offered by one institution will be accepted by the others and students who transfer from one school to another will not lose credit.

Improve geographic access to post-secondary learning for Oregon students by:

- Enhancing state funding for off-campus and distance learning, which would give as many as another 21,000 Oregonians access to higher education courses.
- Supporting further development of partnerships between community colleges and higher education, especially in Eastern and Southern Oregon and the South Coast, so that Oregonians in those areas have greater access to post-secondary learning.

HIGHER EDUCATION GOVERNANCE

THE CHALLENGE:

The steady evolution and growth of Oregon's knowledge-centered economy makes higher education more critical than ever, not only to the financial security of individual Oregonians, but to the long-term health of the state's economy as a whole. Higher education is now a buyer-defined market, wherein buyers (i.e., employers and students) are demanding programs that provide what they need, when they need it, and delivered in a way that meets their requirements. Yet shortages in critical skills and specialties are impeding growth in Oregon industries, and such shortages threaten to increase in the near future.

To correct these deficiencies and to ensure that Oregon maintains a competitive edge in the economy of the 21st Century, our system of higher education must become more responsive, flexible, result-oriented, accountable, and entrepreneurial.

OUR ACHIEVEMENTS:

- Established a Task Force on Higher Education and the Economy to determine how Oregon's post-secondary systems could meet these challenges. The Task Force found:
 - that Oregon's colleges and universities are foreseeing the changing demands of a knowledge-based economy and a buyer-driven market;
 - that these institutions have taken a number of steps to meet these demands, particularly in making younger students more job-ready and in serving the continuing education needs of adults; and
 - that the way Oregon has traditionally thought about and governed its higher education resources is now impeding the ability to serve learner needs.

More specifically, the Oregon University System's tendency to focus on central authority requirements prevents it from focusing as much as is now necessary on the requirements of the customer.

- Directed the State Board of Higher Education to address these governance issues in a way that would make the Oregon University System more responsive to the needs of the student and the employer marketplace.

OUR AGENDA:

- Charge the State Board of Higher Education to:
 - direct the Chancellor to define measurable goals for each year, to include brokering opportunities for the System and mechanisms for assuring System responsiveness to state needs;
 - clarify and strengthen the role and responsibilities of institution presidents to assure accountability; and
 - require each institution to establish formal mechanisms for gathering and utilizing citizen advice and counsel regarding the effectiveness of the institution in serving the current and future needs of Oregonians.

BUDGET PROCESSES

THE CHALLENGE:

The Task Force on Higher Education and the Oregon Economy also found that the current method of financing the State System obscures a clear understanding not only of what product the State is buying, but also of its cost. Oregon must devise an up-to-date budget model so that, instead of merely funding facilities and programs that are already established, institutions can respond to the evolving needs of their students and of the economic marketplace.

As the State has reduced its investment in its University System (owing largely to Ballot Measure 5 and the resulting need to more fully fund K-12), it has shifted much of the cost of post-secondary education to students in the form of higher tuition. At the same time, however, the budget process has offered little or no incentive for schools to stay in touch with learner markets and to serve them well, since General Funds and most tuition revenues are aggregated at the state level and then redistributed to the institutions themselves. In other words, there is a disconnect between our funding of higher education and the programs and services our dollars are paying for.

OUR ACHIEVEMENTS:

- Charged the Board of Higher Education to devise a new financing system that will allow tuition to follow the student, thus making institutions more responsive to the market and enabling policymakers to make explicit decisions regarding what the state should and should not subsidize.

OUR AGENDA:

- Use the new financing system to develop a recommended Oregon University System budget for the 1999-2001 biennium, making explicit choices which will ensure that our public investments meet the most critical needs of Oregon's student and economic marketplaces.

STABILITY OF OUR EDUCATION FINANCING SYSTEMS

THE CHALLENGE:

Because Oregon's education systems now rely heavily upon state funding to carry out their missions, it is imperative that the state seek a system of taxation which has long-term stability.

Not only did Ballot Measure 5 shift to the state the major responsibility for funding our K-12 schools, it also made the income tax (as opposed to the property tax) the primary source of state revenues. Whereas the property tax was a relatively stable revenue source, the income tax by its nature is far more susceptible to fluctuations in the economy, (i.e., if people's incomes decline, so does their tax liability and so do state revenues.)

This means that the moneys available for our schools are today far less stable than in the past and that a downturn in our economy would have serious repercussions for the funding of education in Oregon.

OUR ACHIEVEMENTS:

- Appointed a committee to review Oregon's overall tax system and determine whether changes were necessary to address issues of fairness, stability, and economic incentives.

The committee found, as noted above, that while Oregon's economy is more diverse and stable than it was a decade ago, the revenue system is now more sensitive to changes in the economy. Although we have mechanisms for dealing with unanticipated revenues (the two-percent Surplus Kicker Law), there is no such mechanism for dealing with periods when revenues fall short of expectations.

OUR AGENDA:

- Appoint a task force to make recommendations on a number of tax-related issues, including that of stability. In the coming months, the task force will provide a list of short- and longer-term options which would stabilize Oregon's system of taxation, especially in regard to the impact of economic downturns on our ability to fund education.

SUMMARY

Education at all levels is a factor far too important to our future to leave any part of it to chance. In today's world it is more critical than ever before that our children be given the tools necessary to their ongoing success, as members of the workforce, as parents of the next generation, and as citizens of a free, democratic society.

Education has been called a debt owed by the present to the future. Someone paid that debt for us. Now it is our turn. Together we stand on the threshold of a new century and the gates of opportunity stand wide. We must equip our people to walk through them.

EMPLOYMENT

2. Please list all employment since your graduation from law school. Include professional employment before or during law school if you believe it is relevant.

Dates	Employer	Address	Position

3. (For applicants who are not presently on the bench.) Describe any prior judicial or quasi-judicial experience, including service as a pro tem judge, hearings officer, or arbitrator. Include the dates during which you held the judicial or quasi-judicial position, and describe the caseload and time commitment involved.

4. List the bars to which you are admitted and the dates of your admission:

Dates	Bar

PROFESSIONAL ACCOMPLISHMENTS

5. Please list any publications you have authored and any honors or awards you have received. Include academic honors if you believe they are relevant, and please list dates.

6. Describe your civic and community activities, including work on bar committees, major pro bono activities, volunteer positions, and other public service. Please include dates.

PLEASE SIGN BELOW AND AT THE END OF THIS FORM.

I am a citizen of the United States and a resident of this state. If selected by the Governor for this position, I will accept appointment. If appointed, I pledge my best efforts to resolve, before assumption of office, any conflicts of interest that would be inconsistent with my responsibilities in this position.

Signature: _____ Date: _____

THE FOLLOWING INFORMATION IS NOT REQUIRED BY LAW, AND WILL BE DEEMED TO HAVE BEEN SUBMITTED TO THE GOVERNOR IN CONFIDENCE. ACCORDINGLY, THIS INFORMATION WILL NOT BE MADE AVAILABLE TO PUBLIC INSPECTION PURSUANT TO ORS 192.502(3).

7. Please list any business organizations or enterprises of which you are presently an officer, director, partner, owner, shareholder, or manager. Indicate the nature of the business, your position or relationship with the organization or enterprise, and whether you intend to resign (or dispose of your interest, if you are an owner or shareholder) if appointed to the bench.

Name	Nature of Business	Your position	Will you resign?

8. Are you a member of any professional or business clubs, associations or organizations which discriminate against any person on the basis of race, religion, sexual preference or gender? If so, please list and state whether you intend to resign if appointed to the bench.

Name	Will you resign?

9. If your answer to any of the following questions is "yes," please give full details on a separate sheet of paper.

- | | | | |
|-----|---|-----|----|
| (a) | Have you ever been a defendant in a civil action? Do not include cases in which you were included as a nominal defendant with no potential liability, such as mandamus actions. | Yes | No |
| (b) | Have you ever filed for bankruptcy? | Yes | No |
| (c) | Have you ever been convicted or have you pleaded guilty of any crime or violation? Do not include minor traffic offenses resulting in fines of less than \$100. | Yes | No |
| (d) | Have you ever been the subject of any professional disciplinary proceeding or had any professional license or permit revoked or restricted? | Yes | No |
| (e) | Within the past five years, have you been hospitalized or incapacitated for a period of more than ten days for any reason? | Yes | No |
| (f) | Have you ever been treated or received counseling for alcoholism or chemical dependency? | Yes | No |
| (g) | Are you subject to any condition or handicap that might substantially impair your ability to hold judicial office? | Yes | No |

10. Please list the names, addresses and telephone numbers of three people who may be contacted as references.

Name	Address	Telephone

THE GOVERNOR'S STAFF AND THE OREGON STATE POLICE MAY CONDUCT A BACKGROUND INVESTIGATION TO OBTAIN INFORMATION ABOUT YOU. PLEASE PROVIDE THE FOLLOWING INFORMATION AND SIGN BELOW TO PERMIT THE INVESTIGATION TO BE CONDUCTED.

Name and home address: _____

Bar no.: _____

Driver's license no.: _____ Social security no.: _____ Date of birth: _____

I hereby authorize the State Department of Police and the Governor's Office to obtain any and all records pertaining to me on file with the Department of Revenue, the Motor Vehicles Division, law enforcement agencies, the Oregon State Bar, credit references or bureaus, and past and present employers, employees, business associates and acquaintances.

FAX 503-373-7643

December 31, 2001

Government-to-Government Report

1. *Agency:* Department of Administrative Services (DAS)
2. *Key Contact:*
Karmen Fore
155 Cottage Street NE, U20
Salem, OR 97301-3966
Phone: (503) 378-3118
Fax: (503) 373-7643
Email: karmen.fore@state.or.us
3. *Major Areas:* DAS is the internal administrative department of the Executive Branch of state government. Under the Government-to-Government Executive Order, we work with the agencies of the state to help them accomplish their work with the Oregon Indian Tribal Governments. Under SB 770, we are also responsible for coordinating a training of state agencies on tribal issues.
4. *Departmental Statement:* DAS recognizes the tribal governments' interests in the state's development of its policies.

DAS is responsible to support the whole of state government. That government exists to allocate and apply limited public resources to serve the diverse needs, values, rights, and expectations of the people of Oregon. It does this through more than 100 state agencies and thousands of programs.

Duties, powers, stakeholders, and funding differ widely among state agencies. It is the duty of DAS to be more concerned with how state agencies perform their duties than in what those duties are. We allocate and apply our internal resources to help other state agencies be economical, legal, and effective in all that they do.

Our key contact assists the Governor's Office in the coordination, and communication among all agencies under the Government-to-Government Executive Order and in the implementation of SB 770.

5. *Solutions and Programs:* In the past, we have attended Executive Committee meetings in an effort to improve state coordination in response to matters that cross agency lines. We also attend the Cultural Resources Cluster meetings, bringing information about state government operations and communications systems that may support this effort.

In addition, the Dispute Resolution Coordinator located at DAS and other agency Public Policy Dispute Resolution Program coordinators are available to consult on issues that might be more successfully addressed through a carefully convened collaborative process.

6. *Tools and Training:*

- Trainings

Joint trainings have been offered in previous years to further cultural understanding and methods for communicating more effectively. With the passage of SB 770, DAS will be responsible for hosting trainings on tribal issues for all state agencies; DAS staff have started the initial work to organize these trainings for state agencies.

- Central Purchasing and Surplus Property

Currently, three tribes are participating in Central Purchasing's Oregon Cooperative Purchasing Program (ORCPP) enabling them to purchase from contracts and price agreements established for state agencies. These tribes are the Confederated Tribes of the Grand Ronde, the Confederated Tribes of Umatilla, and the Confederated Tribes of Coos, Lower Umpqua and Siuslaw. In addition, Kevin Mueller, Confederated Tribes of Grand Ronde, is a member of the newly formed Cooperative Purchasing Advisory Council.

In past years, the Confederated Tribes of Siletz has also participated in the ORCPP program, but elected not to renew their membership this year. The ORCPP coordinator sent program and pertinent contract (i.e., pharmaceutical contract, vehicles, etc.) information to non-participating tribes in the fall of 2000.

In July of 2001, the Commission on Indian Services invited DAS Surplus Property Programs to make a presentation on goods and services available for tribal activities. Representatives of all 9 recognized tribes in Oregon were on hand for the presentation. It was explained that Federal Property Management Regulations place recognized tribes on a priority basis (along with federal agencies) when acquiring federal surplus property. This allocation position in the donation flow actually allows Indian Nations to acquire federal surplus property on a level higher than the State of Oregon (at no cost). However, the proximity of a Federal Distribution Center (DRMO) for Oregon Tribes is not conducive to their active participation. Although DAS is unable to place property with the Tribes in general, DAS is able to support certain Tribal activities (education, health care, etc.) with donation property at minimal costs.

The ORCPP program uses intergovernmental agreements to enroll the tribes into the cooperative purchasing program.

- Dispute Resolution

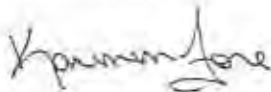

The Dispute Resolution Coordinator located at DAS has been assisting DAS Transportation, Purchasing, and Print Services in drafting a scope of work for a contract with a mediator and has offered public policy dispute resolution services support to the mediator. One of the identified stakeholders in this process is the Columbia River Intertribal Fish Commission. The contract administrator (and funding) is in the Governor's Office.

- Video Conferencing

IRMD/DVS has been providing video conferencing service to three tribes through Portland State University's (PSU) school of Public Affairs. Services are provided to the Unified Tribes of Umatilla, Siletz, and Grand Ronde. PSU delivers distance-learning instruction through the video network. The monetary benefit to the tribes and PSU was \$59,082 for 2001. As of January of 2002 all sites will begin leasing video services through IRMD.

Finally, DAS welcomes the opportunity to share information about state government administrative policies, systems, and services with others. The administrative structure to support continued efforts under SB 770 is in place. We look forward to future involvement to continue progress and to increase our knowledge of tribal government and common issues.

DEPARTMENT OF AGRICULTURE
GOVERNMENT-TO-GOVERNMENT 2001 ANNUAL REPORT
TO GOVERNOR'S OFFICE

1. **Agency:** Oregon Department of Agriculture
2. **Tribal Liaison:**
Debbie Gorham
635 Capitol St. NE
Salem, OR 97301-2532
503-986-4704
Fax 503-986-4730
Email dgorham@oda.state.or.us
2. **Executive Committee Member:**
Phil Ward, Director
635 Capitol St. NE
Salem, OR 97301-2532
503-986-4552
Fax 503-986-4750
Email pward@oda.state.or.us
3. **Department Statement:** The department developed an agency statement of interest in August 1997. Copies of the statement may be obtained from the director's office, or from the tribal liaison.
4. **Major areas of work with Oregon tribes FY 00/01:**

Water Quality: The Oregon Department of Agriculture (ODA) is responsible for regulating agricultural practices for the protection of water quality as well as endangered species. As a partner in the Oregon Plan for Salmon and Watersheds and the Healthy Streams Partnership, the department's Natural Resources Division continues to develop agricultural water quality management area plans and rules in most basins of the state. As the year 2001 comes to a close, the department has adopted rules in 15 basins, with 4 basins close to adoption of rules, 13 basins with committee work in progress, 6 basins scheduled to begin planning work in winter 2002, and one to begin in 2003.

While the department's responsibility for water quality regulation is limited to state and private agricultural land, the department is coordinating its planning process at the basin and sub basin level with tribes as well as with federal land

management agencies. The goal is the development of a comprehensive, watershed approach to water quality, water quality standards, and endangered species protection.

The agricultural water quality management area plans are the product of local advisory committees (LAC) appointed by the department to represent the interests of the affected area. Participation has been sought from local tribes in the local advisory groups to ensure that their concerns about water quality and endangered species protection are provided a forum among agricultural producers.

The Mid Coast LAC has a biologist with the Siletz Tribes, Stan van de Wetering, who has been an excellent and very active LAC member. The Yamhill LAC had a representative from the Grand Ronde Tribes for the first few meetings, but she resigned when she accepted a new job and was never replaced.

In the Greater Harney Basin LAC there are two members and an alternate from the Burns-Paiute Tribe. Cecil Dick (Tribal Council Vice-Chair) and Steve Namitz (Fish Biologist) are the members. Jim St. Martin (Tribal Manager), is an alternate for Cecil Dick

In the Hood River LAC there is one tribal member, Mick Jennings, who is a tribal fish biologist.

Shaun Robertson, a Fish Biologist and project manager for the Confederated Tribes of the Warm Springs Indian Reservation, is an active member of the North / Middle Forks John Day LAC. He also works very closely with the Grant Soil and Water Conservation District (SWCD) on numerous projects.

Mark Berry is an active member of the Middle John Day LAC. He is the project manager for the Pine Creek and Wagner Ranch properties for the Warm Springs Tribes. He also works closely with the Wheeler SWCD on projects.

ODA staff has interacted with the Confederated Tribes of the Umatilla Indian Reservation on numerous projects. Those projects include development of the Walla Walla Bi-State Habitat Conservation Plan, the Umatilla Basin Water Quality Technical Committee, development of the reservation agricultural management plan and several on-ground projects. Louie Dick, tribal member, is a member of the Umatilla County SWCD Board.

The Confined Animal Feeding Operations (CAFO) program is another regulatory function of ODA. The CAFO program permits livestock operations and inspects operations to assure compliance with federal and state water quality laws. House Bill 2156 passed last legislative session, giving ODA the responsibility to

revise the CAFO rules to include the federal definition of CAFO, and to regulate the entire class of facilities that meet either the state or federal definition. ODA set up a rules advisory committee to assist in this process, and sought out producers from all livestock industries in the state, as well as environmental organizations and the public. Tim Bare, who works for the Cow Creek Band of the Umpqua Tribe, serves on the LAC. Tim brings to the committee his lifetime experience with beef cattle ranching as well as his relationship with the Cow Creeks.

Measurement Standards: The Oregon Department of Agriculture, Measurement Standards Division provides technical assistance to the Oregon tribes throughout the state through certification of weighing and measuring equipment and motor fuel quality. Two specific examples were associated with the Seven Feathers Truck & Travel operated by the Cow Creek Band of the Umpqua Tribe in Canyonville, Oregon.

One example dealt with the licensing and certification examinations of this business's gasoline, diesel fuel, and propane dispensers. Even though Seven Feathers is on tribal land and is operated by the Cow Creeks, they requested and voluntarily paid Measurement Standards Division measuring device license fees and requested that the division continue to examine and certify their meters.

The other example dealt with motor fuel quality concerns expressed by the Cow Creeks at their Seven Feathers facility. A Seven Feathers representative contacted the Measurement Standards Division requesting assistance after a customer from another state complained to them about the gasoline that they had purchased there. The division responded to Seven Feathers' request by obtaining a sample of the gasoline in question and analyzing it. The analysis results were within specifications and nothing in the sample appeared to be amiss. This information was presented to Seven Feathers and satisfied their concerns regarding the quality of the gasoline that they were selling.

The Measurement Standards Division is available to all citizens and governments within Oregon to provide any necessary weights and measures related assistance.

Pest and Disease Control: The department has the responsibility to prevent the introduction and spread of exotic pests and diseases of both plants and animals. The Animal Health and Livestock Identification Division, in conjunction with the USDA, has worked with the Confederated Tribes of Warm Springs to survey their horses for Equine Infectious Anemia. Federal veterinary counterparts have conducted rabies vaccination clinics, an equine health seminar, and monthly animal health liaison visits on the Warm Springs reservation.

The division also met with the Umatilla Tribes to discuss emergency disease preparedness and to distribute the statewide plans that have been developed on the subject. The tribes have been asked to keep close watch on their livestock for symptoms of unknown diseases and to contact a veterinarian as soon as anything suspicious arises. The Animal Health Division is available to provide assistance to the tribes on livestock health issues.

The department's Pesticides Division administers Oregon law regulating distribution and use of all pesticide products within Oregon. Work is done in close collaboration with the U.S. E.P.A. with regard to implementation of "FIFRA", the Federal Insecticide, Fungicide and Rodenticide Act. The department collaborates with EPA Region 10 to investigate complaints or allegations of misuse of pesticide products. In 2001, the department investigated one incident on behalf of the Umatilla Tribes. The case is still pending resolution.

The department's Noxious Weed Control Program staff continues to work with land managers statewide to protect Oregon's natural resources from the invasion and proliferation of noxious weeds. This includes coordination and implementation of noxious weed control activities.

The Oregon State Weed Board awarded a new grant during 2001 to the Umatilla Tribes for control of yellow star thistle along the Umatilla River corridor. Other similar grant awards were made to the Warm Springs Tribes in 2000 for control of knapweed, yellow star thistle and Mediterranean sage and these grant projects were completed in 2001. ODA Weed Program staff continue to monitor biological control of weed releases that have been made in the past and will continue to coordinate with the tribes for additional biological control releases and other future noxious weed management activities.

5. *Training:*

In order to familiarize the Natural Resources Division staff with the Government-to-Government Executive Order (now law) and to begin discussion of basic Indian history and culture in Oregon, a training program was held on July 25, 2001. Karen Quigley, Executive Director of the Legislative Commission on Indian Services and Justin Martin, Intergovernmental Affairs Director for the Confederated Tribes of the Grand Ronde were the presenters. Division staff learned about some of the top issues and priorities of tribal governments, heard about tribal history, culture and heritage, and major Indian law themes. They also learned about how certain tribes were terminated and restored (like Grand Ronde). They also gained familiarity with what resources the Legislative Commission on Indian Services offers, why the Commission asked the governor to issue Executive Order 96-30, and ultimately requested passage of Senate Bill 770.

In August 2001, several staff attended the workshop "Working Effectively with American Indians" sponsored by the USDA Natural Resources Conservation Service (NRCS), in Pendleton. The workshop covered tribal history, the government-to-government process, and federal and state law relating to tribes, treaty rights, and cultural resources issues.

The workshop was a great opportunity for in-depth discussion of tribal issues. Some staff commented that highlights included staying in the tipi village, having Martin Boles and Gerald Allison speak in the evening around the campfire, and experiencing the drumming and singing session one night. Staff also enjoyed native foods at the longhouse, setting up the tipi, learning about the history between the federal government and the tribes over the last few centuries, listening to the personal stories of several tribal members, and having "Indian time" explained. The workshop provided a good exposure to tribal cultures and the historical context that has shaped current tribal ways.

In November 2001 a training session was held at the Oregon Association of Conservation District's (OACD) Annual Meeting in Newport. The training session provided information for conservation district employees and directors relating to:

1. Section 106 of the National Historic Preservation Act (related to federal undertakings or projects).
2. NRCS policy and procedure for conducting cultural resources inventories.
3. Senate Bill 770.
4. Oregon Revised Statutes 97.740 - 990 (Indian Graves Protection Statutes).

As part of the training and capacity building efforts with OACD, the department is working to incorporate information related to SB 770, ORS 97.740-990, and other laws regarding tribes and cultural resources. Over the past year the division has also made suggestions to the Oregon Watershed Enhancement Board to include tribes and address cultural resource issues in the proposed small grant program.

Department of Community Colleges and Workforce Development 2001 Government to Government Report

Key Contact: Dr. Terri Johanson
Assistant Commissioner—Programs
255 Capitol St. NE, 3rd Floor
Salem, OR 97301
503-378-8648 x468
503 378-8434 Fax

The Department of Community Colleges and Workforce Development (CCWD) and the seventeen Oregon Community Colleges have committed both time and resources to work with the recognized tribes in Oregon and the Education Cluster.

CCWD—Education Cluster Achievements:

- Regular participation in Education Cluster meetings
- Assisted with the facilitation of the Education Cluster annual planning session at the annual conference
- Led focus effort on Distance Learning and Resources available to the tribes and tribal members
- Coordinated and/or participated in several presentations for the NW Indian Education Summit
- Contributed funding for a lunch at the NW Indian Education Summit
- Hosted meeting and lunch for the Education Cluster at Chemeketa Community College
- Clarified need for and initiated effort to develop a community college section for the Oregon Indian Education Plan (OIEP). When complete, the new section will be presented to the State Board of Education, on the *Community College/Postsecondary* agenda, for adoption as an addition to the Secondary (Pre-K-12) and University sections of the OIEP.

CCWD Efforts and Achievements serving tribes and tribal members:

- Dislocated Worker Unit met with Warm Springs Tribe department personnel to provide Warm Springs representatives with a better understanding of the non-tribal services and resources that might be available for workers laid off from the tribe's Warm Springs Forest Products operation
- Provided technical assistance information for tribal access to Federal Even Start funding
- Provided technical assistance information about the GED 2002 changes and resource materials
- Provided training for tribal educators at the annual Basic Skills Conference
- Entire CCWD Management Team participated in the Statewide Diversity Conference
- Fiscal staff participated in WIA MOU training with tribal representatives

Community College Efforts and Achievements serving tribes and/or tribal members:

- *Blue Mountain Community College*
 - Advising, Counseling, Assessment/Placement, Financial Aid and Tutoring Services
 - Education/training programs in coordination with local tribes
- *Central Oregon Community College*
 - Native American Program with staff advisor
 - Advising, Counseling, Assessment/Placement, Financial Aid and Tutoring Services
 - Education/training programs in coordination with local tribes
 - Participated in Statewide Diversity Conference
- *Chemeketa Community College*
 - NW Center for Sustainable Resources-curriculum, connections between community colleges and tribes, Salmon Corps Career and Education Conferences, resource management tours
 - TRIO programs serving first generation college students
 - Advising, Counseling, Assessment/Placement, Financial Aid and Tutoring Services
 - Education/training programs in coordination with local tribes
 - Contributed to and participated in Statewide Diversity Conference
- *Clackamas Community College*
 - Education/training programs in coordination with Confederated Tribes of the Grand Ronde
 - Student services and tutoring services
- *Clatsop Community College*
 - Advising, Counseling, Assessment/Placement, Financial Aid and Tutoring Services
- *Columbia Gorge Community College*
 - Advising, Counseling, Assessment/Placement, Financial Aid and Tutoring Services
- *Lane Community College*
 - Native American Program with staff advisor
 - Advising, Counseling, Assessment/Placement, Financial Aid and Tutoring Services
 - Education/training programs in coordination with local tribes
 - Participated in Statewide Diversity Conference
- *Linn-Benton Community College*
 - Native American Program with staff advisor
 - Advising, Counseling, Assessment/Placement, Financial Aid and Tutoring Services
 - Education/training programs in coordination with local tribes
 - Participated in Statewide Diversity Conference
- *Oregon Coast Community College*
 - Advising, Counseling, Assessment/Placement, Financial Aid and Tutoring Services
 - Education/training programs in coordination with the Confederated Tribes of the Siletz
- *Portland Community College*
 - Advising, Counseling, Assessment/Placement, Financial Aid and Tutoring Services
- *Rogue Community College*
 - Advising, Counseling, Assessment/Placement, Financial Aid and Tutoring Services
- *Southwestern Oregon Community College*
 - Advising, Counseling, Assessment/Placement, Financial Aid and Tutoring Services

Department of Community Colleges and Workforce Development
2001 Government to Government Report

- *Treasure Valley Community College*
 - Advising, Counseling, Assessment/Placement, Financial Aid and Tutoring Services
 - *Tillamook Bay Community College*
 - Advising, Counseling, Assessment/Placement, Financial Aid and Tutoring Services
 - *Umpqua Community College*
 - Advising, Counseling, Assessment/Placement, Financial Aid and Tutoring Services
 - Education/training programs in coordination with the Umpqua Tribe and Seven Feathers Casino
-

Please note that there are additional services provided by the community colleges that serve and support all students, including Native American students that may not be specifically listed here. All services provided by the colleges are available to tribes and/or tribal members to support a successful community college experience for individuals or to design specific education/training opportunities for groups.

ACTIVITIES AND INTERACTIONS DURING 2001

The department's primary interaction with Oregon tribes this past year has been through participation with the Public Safety Cluster Group. This has been an effective forum for building relationships with the tribes as well as other state agencies in this cluster group. The Public Safety Cluster group meets on a quarterly basis.

The department's Religious Services staff continued to maintain on-going contact with various tribal representatives concerning provision of Native American religious services to inmates.

The department's Correctional Treatment Services staff also continued to maintain contracts with various tribal representatives to provide Native American alcohol and drug treatment programs within department prisons.

Staff from the New Prison Construction and Community Development Programs continued to make contact with tribes in the areas where new prisons will be built. In October, program staff attended an introductory meeting with the Warm Springs Tribal Council to meet key staff and to present new prison construction information. The purpose of the presentation was to discuss the construction schedule, tribal representation on the local prison advisory committee, departmental employment opportunities, job fairs, conducting a cultural resource survey at our site in Madras, and the possibility of contracting with tribal enterprises (such as the Warm Springs construction company).

Community Development and New Prison Construction staff also conducted preliminary discussions with the Klamath Tribe's Cultural Resource Program staff regarding conducting a cultural resource survey at the department's site in Lakeview.

Department staff attended the Legislative Commission on Indian Affairs at the State Capitol in July and provided information about several department programs. The staff presentation focused on the provision of religious services to inmates, the current construction schedule for the new prisons

planned for Oregon, as well as how the provisions of Native American religious services are being considered in the design of the new prisons.

Several of the department's prisons maintained on-going contact with tribal representatives to ensure that inmates can participate in cultural affiliations. The Oregon State Penitentiary and Oregon State Correctional Institution have active Native American cultural organizations and several of the prisons hold annual celebrations, cultural events, and ceremonies.

The department plans to continue working with various tribal representatives throughout the state to maintain the cooperative relationships that have been built; and to continue to seek out other opportunities to involve the Native American community.

Oregon

John A. Kitzhaber, M.D., Governor

Department of Environmental Quality

TTY (503) 229-6993

DEQ ANNUAL GOVERNMENT-TO-GOVERNMENT REPORT FOR 2001
EXECUTIVE ORDER 96-30 – SENATE BILL 770
DEQ – TRIBAL GOVERNMENT RELATIONS

1. **Agency:** Department of Environmental Quality

2. **Key Tribal Liaison:**

Roberta Young
Intergovernmental Coordinator
811 SW Sixth Ave.
Portland, Oregon 97204
(503) 229-6408
fax (503) 229-5850
email young.roberta@deq.state.or.us

Executive Committee Member:

Stephanie Hallock, Director
811 SW Sixth Ave.
Portland, Oregon 97204
(503) 229-6110
fax (503) 228-5850
email: hallock.stephanie@deq.state.or.us

3. **Agency Interest Areas:** As the State's environmental protection agency, the DEQ coordinates with the nine federally recognized Tribal governments on air quality, water quality and land quality issues. The federal Environmental Protection Agency (EPA) also works closely with the Tribes in these same areas.
4. **Department Statement:** After the issuance of Executive Order 96-30 (EO), the DEQ developed an agency "Statement of Intent" in response to the EO directives. With the approval of Senate Bill 770, DEQ recently updated this Statement (see attached copy). The Tribal Chairs and Key Contacts have been mailed a copy of the statement. DEQ's Tribal Liaison will work with each tribe individually to update a list of environmental issues of concern.
5. **Participation in Executive Order Process:** This past year, DEQ took part in a number of state activities relating to the EO including:
- DEQ staff attended Tribal Information Day on May 25th at the State Capitol.
 - The annual Governor's Summit has been postponed to Spring 2002. The Director and Tribal Liaison plans to attend this event.
 - The Director attended a Governor's Cabinet meeting on December 19th which involved a training update on tribal relations which was presented by Karen Quigley, Administrator of the Legislative Commission on Indian Services.

6. **Internal DEQ Activities:** DEQ's primary focus on internal tribal relation activities continues to be directed toward improving communications and consultation between agency and tribal staff. Specific activities this past year include:
- DEQ developed internal staff procedures to better ensure that permit applicants and individuals involved in cleanup activities are aware of the State's cultural resource protection laws. Staff discussed the proposed procedures at the August 7,8th joint Natural Resources/Cultural Resources Cluster Groups meeting, and sent a notice requesting input to tribe cultural resource and natural resource programs.
 - Notice and opportunity to comment was provided to the nine Key Tribal Contacts on DEQ's proposed Strategic Directions.
 - Updates of DEQ's citizen advisory committees and work groups are provided twice a year to the tribal key contacts. Staff routinely assesses tribal interests when setting up new committees.
 - DEQ and EPA will soon begin the biennial Performance Partnership Agreement. EPA has chosen to take the lead in consulting with tribes on the agreement process, with DEQ's participation.
 - DEQ's Tribal Liaison routinely advises, assists and consults with DEQ staff on issues and activities that potentially impact Tribal governments.
 - DEQ installed a Tribal Government Relations link on its internal website, which has information on the NRC group work, including notes from the NRC meetings.
 - Training was provided for DEQ's Cleanup Program staff on May 16. Jeff Van Pelt of Umatilla, Kathleen Feehan of Grand Ronde, and Louie Pitt of Warm Springs assisted by discussing their perspectives on what cultural resources are and why they are important to tribes.
7. **Participation in Natural Resource Cluster Group:** DEQ continues to be an active participant in the NRC Cluster Group. Ex-Deputy Director Taylor facilitated the NRC meeting on February 7, and Director Hallock facilitated the joint NRC/Cultural Resources Cluster meeting on August 7,8th. The Tribal Liaison assists with planning NRC meetings and agendas. She also participated in a NRC subgroup, which was assigned to develop draft operation procedures for the NRC. These procedures were formally adopted in 2001.
8. **Review of DEQ-Tribal Issues/Activities:** During the past year there were a number of issues/activities that involved DEQ-Tribal consultation and coordination including:
- General:
- DEQ Director and Tribal Liaison attend an Oregon Tribal Environmental Forum meeting for EPA and tribe environmental staff.
 - The Chemical Demilitarization Program and Umatilla Tribe finalized a MOA on consultation in March 2001. Program staff provides quarterly updates to the Board of Trustees.
- Air Quality:
- The Umatilla and Warm Springs Tribes were involved with Air Quality staff on an air quality strategy and visibility study project for the Columbia Gorge National Scenic Area.

- Air Quality staff presented a description of the Oregon Air Toxics Program development work at an EPA Region X Air Toxics Summit which included some staff from Oregon tribes.

Land Quality:

- DEQ, EPA and Siletz Tribe staff met to discuss the status of work under an MOA relating to the Tribe's cleanup effort and permitting issues for the Tribe's Toledo Mill site.
- Region Solid Wastes staff met with Umatilla Tribe staff to discuss issues relating to State fees and the Tribe's transfer station. The Tribe has expressed an interest in entering into a MOA to address State and Tribe issues. Region staff provided technical assistance to Umatilla Tribe staff on the handling of hazardous wastes. The Tribe also received a DEQ grant for household hazardous wastes collection.
- DEQ Emergency Response program staff responded to two spills of tribal interest. The Siletz Tribe was involved in the response to a fuel oil spill that occurred on the Yaquina River, and the M/V Tristan Coos Bay fuel release. Response included discussions with Grand Ronde, Coquille, Siletz and Coos, Lower Umpqua & Siuslaw Tribes.
- DEQ Emergency Response staff gave a presentation to the east-side Tribes on DEQ's roles and responsibilities concerning oil and hazardous material releases. Staff anticipates providing a similar presentation to west-side Tribes.
- Solid Wastes staff updated the Rethinking Recycling K-5 educational curriculum which includes a lesson on Native American values as they relate to recycling. Warm Springs staff provided suggestions and guidance for the update.
- DEQ continues to work on the Portland Harbor Cleanup with the six involved tribes (Nez Perce, Yakama, Umatilla, Siletz, Grand Ronde, Warm Springs) on upland cleanup issues, on EPA's in-water sediment work, and on cultural resource issues on the upland sites as required by the Portland Harbor Inter-Governmental MOU.
- Cleanup staff works with the same six tribes on the McCormick and Baxter cleanup project. As state lead on the federal NPL cleanup site, DEQ is involved in activities that ultimately support EPA's formal consultation requirements. An archeological firm was hired to conduct archeological and traditional use research to determine whether the proposed cleanup actions could impact cultural resources on the site. This work is on-going and should be completed by Summer 2002. DEQ staff has also briefed tribe technical/environmental staff on the proposed barrier wall and sediment cap installation.
- DEQ continues to provide update information to the interested Tribes on the Bradford Island Corps cleanup site in the Columbia River.

Water Quality:

- Water Quality Biomonitoring staff and Warm Springs staff collected stream data on Pine Creek, a tributary to the John Day River. They also worked out an agreement to resample 1990 sites in 2001 for comparison purposes.
- Cooperative efforts are continuing through a Letter of Agreement on coordinating Clean Water Act 401 certification and FERC relicensing processes for the Pelton-Round Butte hydro project.
- In other relicensing hydro projects, Siletz Tribe and CRITFC staff was involved in relicensing the powerhouse at Willamette Falls. Tribal issues included the use of

- the Falls, harvest of lamprey, and fishing. In the Hells Canyon Complex, several tribes expressed interest in restoring the anadromous runs in the Snake River Basin (Nez Perce, Shoshone-Paiute, Burns Paiute, Umatilla and CRITFC).
- Region staff administered two water quality 319 nonpoint source grants that were awarded to the Umatilla Tribe.
 - Umatilla Tribe staff provided DEQ with extensive water quality data and technical support on the Umatilla Basin TMDL work.
 - Region DEQ staff and Coquille Tribe water staff discussed Tribe's TMDL, beneficial uses and tribal land issues in the Coos subbasin.
 - Water Quality and Warm Springs staff discussions are taking place as to the Tribe's role in the Upper Deschutes TMDL process, which involves shared waters. The Tribe intends to participate in the advisory committee process.
 - The Klamath Tribe participates in the Upper Klamath Lake TMDL process.
 - Grand Ronde staff participates on the Willamette TMDL Council, which is providing assistance to DEQ regarding its decisions on targets and setting allocations for the Basin's TMDL.
 - Warm Springs staff and DEQ region staff continue to monitor the ecological health of Fifteenmile Creek in The Dalles. A herbicide spill occurred on I-84 in 2000.
 - CRITFC and Nez Perce staff are participating on the EPA sponsored NW Temperature Criteria Initiative. Its purpose is to identify water quality temperature criteria that could be adopted by states and tribes in the Pacific NW.
 - Region staff are working with the Klamath Tribe on a new wastewater system to serve a proposed housing development on tribal land near Chiloquin.
 - Warm Springs Fisheries staff provided technical assistance and participation on the Hood TMDL Technical Advisory Committee, as well as participation on the DEQ Standards Review Advisory Committee.
 - Warm Springs provided grant funds for DEQ water quality staff to help them support monitoring of the occurrence of organophosphate insecticides in the Hood River Basin, and the effects on threatened steelhead.
9. ***Cooperation and Consultation with other Agencies:*** Specific issue areas that DEQ has or is working with other agencies on include:
- DEQ's Air Quality Administrator co-chairs the Western Regional Air Partnership (WRAP) Issues Oversight Committee. The tribal co-chair is Governor Chino from Pueblo of Acoma.
 - Hydroelectric Project Review - DEQ is a member of the Hydroelectric Application Review Team (HART) that implements the State's hydroelectric project reauthorization law. Water Resources is the lead agency. Current projects include: the Round Butte-Pelton Dam; Klamath; North Umpqua; Willamette Falls; Clackamas and Sandy Rivers; and Hell's Canyon. The Warm Springs and Klamath Tribes are involved in this work. Region staff met with the Klamath and northern California Tribes on the relicensing process for the Pacific Corp Klamath project.
 - Water Rights - DEQ continues to be involved as requested in the water rights adjudication and alternative dispute resolution process for the Klamath Tribes. Water Resources is the lead agency.

- Agriculture Nonpoint Source Planning - The Department of Agriculture and DEQ continue to regularly consult on TMDL work throughout the State.
- Spill Cleanup - ODFW participated with DEQ and Tribal staff in the spill response to the fuel spills in the Yaquina River and Coos Bay.
- Community Solutions Team - DEQ participates with other member agencies on the Community Solutions Team (CST). The Team consists of five agencies that address local communities in solving community development problems within a partnership forum. Tribal governments also participate in some of the CST's work.
- Columbia River TMDL Work - Oregon and Washington are taking the lead on the Total Dissolved Gas TMDL for the Columbia mainstem, which is currently out on public notice. Tribal involvement has been primarily provided by CRITFC. EPA has the lead, with DEQ and tribal involvement, for the Temperature TMDL which is scheduled for completion late 2002. Both efforts involve significant involvement of other federal agencies, e.g. Corps of Engineers.
- The Department of Water Resources requested DEQ's participation in addressing a water rights transfer and new application issue involving the Grand Ronde Tribe.

2001 SUMMARY REPORT

The Oregon Department of Fish and Wildlife (ODFW) participates in all regular meetings of the Natural Resource and Cultural Cluster groups.

ODFW is also working to develop the best way to deliver government-to-government cultural resources training to employees who need this information. As part of this effort, ODFW personnel have begun to research, evaluate, and attend existing training programs. This work will be provided to leadership and executive staff as part of the information necessary to formulate a training strategy to implement Senate Bill (SB) 770.

The following summary is organized by ODFW Program and Regional responsibility and includes the major areas in which the agency works with tribal governments to address key issues.

Areas of Cooperation

Programatic / Statewide:

ODFW generally provides fish and wildlife for use in various Indian ceremonies and celebrations. The Department also provides the tribes with hides, antlers, horns, and feathers of culturally important wildlife collected in the course of normal department activities.

Fish Division has worked closely with tribal fish and wildlife staff in preparing population assessments and evaluating information gaps related to lamprey populations throughout the state. In addition, Division staff has worked closely with tribal staff to address lamprey harvest needs at Willamette Falls.

Fish Division has worked extensively with the Columbia River Treaty Tribes to develop a multi year sliding scale fishery for spring chinook in 2001. Our close coordination and cooperation on this issue resulted in the NMFS acceptance of this ground breaking approach to harvest management in the Columbia River.

Wildlife Division continues to work with The Klamath Tribes to reach final settlement on the Rivers End Ranch project, a wildlife habitat improvement project that inadvertently impacted

tribal cultural artifacts. A request has been made through the Department of Justice to meet with the Klamath's at their earliest convenience to reach resolution.

The Wildlife Division has set up a meeting this month (February 2002) with the Burns Paiute Tribe to discuss hunting opportunities for tribal members. The Burns Paiute Tribe has no historic treaty hunting rights.

Representatives from various Tribes will be asked to participate in the statewide review of mule deer and elk species management objectives. This will culminate with new deer and elk management plans being presented to the ODFW Fish and Wildlife Commission in December 2002.

The Wildlife Division and Oregon Department of Agriculture (ODA) have worked closely with various tribal councils to request participation on the Oregon Invasive Species Task Force. A representative has been selected from CRITFC.

The Director's Office, along with regional and headquarters staff met with representatives from the Tribal Council and Game Commission of The Klamath Tribes to discuss Government-to-Government relationships, communications and joint biological concerns. Fish, wildlife and administrative topics were all covered.

The Director's Office and SW Regional Manager met with representatives from the Coquille Tribe to discuss road closure and hunting concerns on Tribal lands in order to protect cultural sites and public recreational opportunities.

Habitat Division and Deschutes Watershed District and Region staff assisted the Confederated Tribes of Warm Springs Reservation, Oregon with review of the joint Tribes/PGE application for the hydro license for the Round Butte/Pelton Power Project on the Deschutes River.

Habitat Division and Klamath Watershed District staff has been working with the Klamath Tribe's biologist in regards to fishery issues related to the re-licensing of the Klamath hydro electric facility.

Southwest Region:

(See attached map)

The Umpqua District fish staff has worked with the Cow Creek Band of Umpqua Tribe Indians developing potential STEP projects on the South Umpqua River.

SW Regional staff has also met with the Cow Creek Band of Umpqua Tribe Indians discussing issues surrounding Tribal ceremonies and use of ceremonial meat.

High Desert Region:

The High Desert Region continues to allocate 10 percent of deer, elk and antelope tags to the Warm Springs within their ceded area.

ODFW's High Desert Region recently completed a Memorandum of Understanding with the Confederated Tribes of Warm Springs that outlined a cooperative project to reintroduce bighorn sheep back onto historic range within Reservation lands. Twenty sheep were released in mid-January.

Deschutes Watershed District staff cooperated and assisted the Confederated Tribes of the Warm Springs Reservation of Oregon (CTWSRO) with planning and implementing a bighorn sheep transplant into the Mutton Mts. on the Warm Springs Reservation. Twenty-one bighorn were captured near John Day, and released into the Mutton Mts. on January 11, 2002, marking the return of bighorn to historic habitat from which they were extirpated in the early 1900's.

Deschutes Watershed staff provided the CTWSRO with two salvaged bighorn sheep carcasses for ceremonial use.

The Confederated Tribes of the Warm Springs Reservation of Oregon (CTWSRO) were allocated 20 state pronghorn antelope tags for years 2000 and 2001, for use on their ceded lands. The pronghorn tags issued in year 2000 were the first pronghorn tags ever issued to the CTWSRO. The CTWSRO are also issued approximately 800 deer tags and 800 elk tags annually for use on their ceded lands.

Deschutes Watershed District staff coordinated and cooperated with CTWSRO staff in developing draft basin plans in the Hood, Deschutes, and Fifteen mile basins, under the Northwest Power Planning Council program.

Deschutes Watershed District staff worked closely with CTWSRO staff regarding hatchery fish evaluations in the Hood River, and implementation of habitat restoration projects in the Hood, Deschutes, and Fifteen mile basins.

Summer Lake Wildlife Area staff assisted CTWSRO members by providing gathering sites for large quantities of fresh tule stems, which tribal members used to construct burial mats for traditional funeral ceremonies. Wildlife area staff continued to coordinate with CTWSRO staff regarding management of archeological sites on the wildlife area.

The CTWSRO received more than 4,500 surplus spring Chinook and summer steelhead carcasses from Round Butte Hatchery for tribal subsistence and ceremonial use.

Malheur Watershed District staff worked with the Burns Paiute Tribe staff to develop tribal proposals for BPA projects for the Middle Snake River Province.

Malheur Watershed District staff provided the Burns Paiute Tribe with elk carcasses killed as a result of agricultural damage.

Malheur Watershed District staff worked with Burns Paiute Tribal staff to finalize data from the 2001 field season and prepare work plans for the 2002 field season for the cooperative bull trout study.

Klamath Wildlife Area staff are continuing to meet with the cultural and language staff of the Klamath Tribe to develop a coordinated name change proposal for USGS as per senate joint memorial 3.

Klamath Watershed District staff are coordinating with the Klamath tribal wildlife biologist (Rick Ward) in regards to proposed deer management and season recommendations.

Klamath Watershed District staff have provided seized wildlife parts to the cultural and heritage program at the Klamath tribes.

Klamath Watershed District staff have been working with the Klamath Tribe's biologist on an on-going basis to conserve Klamath Basin Bull trout.

Klamath Watershed District staff have been providing technical input to the Klamath Tribe's biologist in regards to habitat restoration projects on private land.

Klamath Watershed District staff have been working with the Klamath Tribes and commercial outfitters to reduce conflicts between treaty fishers and non-treaty fishers.

Northeast Region:

The Northeast Region is working on a cooperative project to develop a Memorandum of Understanding with the Confederated Tribes of the Umatilla Indian Reservation to identify bighorn sheep release sites within their legally recognized Ceded boundary.

The ODFW and CTUIR have attended multiple meeting to provide comments to the NPT on the Spring Chinook Master Plan. We have been working through the 3-step process and have submitted Step-2 documentation to the Northwest Power Planning Council in August 2001. This submittal contained pre-design drawing for a Lostine River hatchery, holding facility on the Imnaha River (Marks Ranch), and upgrades to the existing Imnaha satellite facility and Lookingglass Hatchery.

NE Region Research and Development (R&D) staff coordinated comprehensive chinook salmon spawning ground surveys with the Tribes in the John Day, Grande Ronde, and Imnaha river

basins. These surveys were conducted cooperatively by ODFW, the Confederated Tribes of Warm Springs, the Confederated Tribes of the Umatilla Indian Reservation, and the Nez Perce Tribe.

R&D staff worked with the Confederated Tribes of Warm Springs to develop and implement John Day basin monitoring and evaluation plans.

R&D worked with the Confederated Tribes of Warm Springs and the Confederated Tribes of the Umatilla Indian Reservation to develop Oregon Plan monitoring of adult and juvenile salmonids in NE Oregon. ODFW and the Tribes are sharing responsibility for conducting the Oregon Plan monitoring.

R&D are cooperatively developing a comprehensive monitoring and evaluation plan for chinook salmon in the Grande Ronde and Imnaha basins with the Confederated Tribes of the Umatilla Indian Reservation and the Nez Perce Tribe. This plan will guide the long-term monitoring of recovery efforts in the Northeast Region.

R&D worked with the Nez Perce Tribe to develop long-term hatchery planning documents for the Northeast Oregon Hatcheries project. We jointly submitted these Step 2 plans to the Northwest Power Planning Council and will continue to work together to complete the NEOH effort.

ODFW, the Nez Perce Tribe, and the Confederated Tribes of the Umatilla Indian Reservation are cooperatively conducting a steelhead genetics characterization study in the Grande Ronde and Imnaha basins. Together we have sampled 20 populations annually throughout both basins for the past three years.

R&D have been cooperatively investigating the effectiveness of steelhead pre-smolt releases in the Imnaha basin with the Nez Perce Tribe. Multi-agency crews conducted surveys to determine steelhead rearing densities in the Imnaha basin.

R&D has coordinated with the Nez Perce Tribe to assist in their genetics conservation—cryopreservation efforts. We coordinate with them to provide spawning dates and location of natural spawners.

R&D staff has worked closely with the Confederated Tribes of the Umatilla Indian Reservation in the Umatilla Basin Management and Monitoring Workgroup to provide coordinated direction for research and management in the Umatilla Basin.

R&D have cooperatively completed large-scale hatchery PIT Tagging at Lookingglass Fish Hatchery with the Nez Perce Tribe in a coordinated effort to determine smolt migration characteristics and smolt survival.

Northeast Region has generally maintained close working relationships with the Confederated Tribes of the Umatilla Indian Reservation through Intergovernmental Personnel Agreements. Three CTUIR biologists are working in the ODFW La Grande R&D office under the supervision of an ODFW Program Director. This agreement provides the opportunity to coordinate management and research activities in the Grande Ronde basin.

R&D worked closely with the Nez Perce Tribe and the Confederated Tribes of the Umatilla Indian Reservation on all aspects of the Grande Ronde Basin Captive Broodstock Program. Both Tribes and ODFW share many responsibilities for implementation of this program.

Monthly Umatilla River Managers meetings with CTUIR Fisheries program managers and ODFW Fish Management, Research and Hatchery staff. Review and development of Master Plan, Monitoring/Evaluation Plan and discussion of numerous management issues.

John Day Watershed District wildlife staff and USDA, Wildlife Services assistance with tribal lands wildlife damage complaints within the Umatilla Indian Reservation including bear, mountain lion, turkey, deer and elk.

John Day Fish Habitat coordination with CTUIR on new riparian lease lands in the upper North Fork John Day River.

Completion of Subbasin summaries for BPA/NWPPC with numerous coordinated efforts of CTUIR, CTWS and ODFW fisheries and wildlife staff in the John Day, Umatilla and Walla Walla subbasins.

In addition, ODFW Northeast Regional staff:

Participated in scoping/review of natural resource issues at the proposed CTUIR Wanapa cogeneration energy project in Umatilla County.

Provided various wildlife parts (antlers, skulls, etc.) to CTUIR cultural program for use in classes such as regalia education.

Provided a representative of the Confederated Tribes of the Umatilla Indian Reservation a tour of Ladd Marsh Wildlife Area specifically noting areas of hardstem bullrush for use in Tribal projects.

Facilitated representatives of the Nez Perce Tribe collected 2500 Canada thistle gall fly galls from Ladd Marsh Wildlife Area for use in controlling thistle on their properties in Wallowa County.

Worked with the Nez Perce and Confederated Tribes of the Umatilla Indian Reservation to have sport and tribal spring Chinook fisheries on the Imnaha Rivers and Lookingglass Creek (Grande Ronde Basin). This is the first spring Chinook fishery in these streams since the late 1950's.

Worked with the Confederated Tribes of the Umatilla Indian Reservation to implement habitat improvement projects on private lands of the Upper Grande Ronde.

Worked with the Confederated Tribes of the Umatilla Indian Reservation and the Nez Perce Tribe to plan for new hatchery facilities to improve spring Chinook production associated with Lookingglass Hatchery (Northeast Oregon Hatchery). This

Worked with the Confederated Tribes of the Umatilla Indian Reservation and Nez Perce Tribe to organize a review of the Blue Mountain Province and the BPA projects funded there for the ISRP and Power Planning Council staff.

Worked with the Umatilla Tribes to develop a MOU and Management Plan for the reintroduction of bighorn sheep within the ceded territory.

Continued discussions with CTUIR regarding the management, research and hatchery operations in the Umatilla subbasin. Approximately 8 meetings (April 21, May 15, June 13, July 19, Aug 23, Sept 20, Nov 8-no CTUIR attendees, Dec 12-minutes available upon request) were held in 2001. The outcome of these meeting provided updates on the various programs outlined in the Annual Operations Plan (AOP) for the period October 1, 2000 to Sept. 30, 2001 and, provided a forum to develop a new AOP starting October 1, 2001 to September 30, 2002.

Continued discussions regarding the management, research and hatchery operations of the spring chinook captive brood program. Approximately 8 meetings (Jan 9, Mar 7, May 10, June 13, July 11, Aug 10, Oct 17, Nov 14-minutes available upon request) were held in 2001 to discuss fish hatchery, management and research operations. The outcome of these meeting provided a dialog on the program and a venue for fish management discussions.

Finalized annual operations plans for 2001 on January 23 for Lookingglass, Irrigon, Wallowa hatcheries and Big Canyon, Little Sheep, Imnaha, Catherine Creek, Lostine River, and upper Grande Ronde satellite facilities. The process was initiated on December 10 for the 2002 AOP (document available upon request).

Northwest Region:

The Northwest Region staff coordinated fishing and hunting seas, including tag allocations, with the Confederated Tribes of Grand Ronde Community of Oregon (CTGR) and the Confederated Tribes of Siletz (CTS).

Northwest Region and Fish Division staff worked with several tribes on a status review of lamprey. Harvest regulations for take of lamprey at Willamette Falls were revised by the Commission based on these discussions.

The Northwest Region Manager attended training on tribal issues at the Attorney General's Law Conference.

The Northwest Region staff also provided surplus salmon carcasses (as available) to the Columbia Basin tribes as part of the US vs. Oregon process.

Northwest Region/North Coast Watershed District staff partnered with the CTS (Siletz) on several projects including:

- Salmon River Hatchery - raising 50,000 coho (Siletz stock) for release into the Siletz River.

- Tribal members operating the Rock Creek Hatchery (Siletz River) as a conservation hatchery for wild Siletz coho.

- Coordinating salmon management activities including monitoring and research.

2001 SUMMARY REPORT

Oregon Department of Forestry

Executive Order 96-30: State/Tribal Government-to-Government Relations

KEY CONTACT: Roy Woo, Deputy State Forester
2600 State Street, Salem Oregon 97310
PH: 503-945-7202; FAX: 503-945-7212
e-mail: rwoo@odf.state.or.us

The Oregon Department of Forestry (ODF) participates in all of the regular meetings of the Natural Resource and Cultural Resource Cluster groups. The agency has had an "interest statement" in place since 1997 and copies are available from the office of the Deputy State Forester. During this past year, the Protection from Fire, State Forests, Forestry Assistance and Forest Practices programs have engaged in the development of a cultural resource Memorandum of Agreement (MOA) with the State Historical Preservation Office (SHPO). The draft MOA specifically refers to development of relations with tribal governments for protection of cultural resources of importance to tribes and is currently being internally reviewed within ODF and SHPO. Many of the elements of the MOA will form the basis for the development of program policies within the Department and guide the agency's compliance with SB770. Final approval of the agreement by both agencies is expected in spring 2002.

ODF is also working to develop the best way to deliver government-to-government and cultural resources training to employees who need this information. As part of this effort, ODF personnel have begun to research, evaluate, and attend existing training programs. This work will be provided to leadership and executive staff as part of the information necessary to formulate a training strategy to implement Senate Bill 770.

The following summary is organized by ODF's program responsibilities and includes the major areas in which the agency works with tribal governments and efforts to address key issues, training, and collaboration and cooperation with other agencies and the tribes.

Protection from Fire Program

Northeast Oregon District, Pendleton Unit

The Umatilla Agency of the Bureau of Indian Affairs (BIA) has a fee-based fire protection agreement with the District. The agreement has been in place since 1961. Under the agreement, Northeast Oregon District (NEO) - Pendleton Unit provides fire protection for approximately 50,000 acres of Indian Trust land that is within both the Confederated Tribes of the Umatilla Indian Reservation (CTUIR) boundary and the NEO forest protection boundary. The agreement has recently been reviewed and rewritten so as to be in compliance with the Master Cooperative Fire Protection Agreement.

The BIA and ODF also have mutual aid fire protection agreements in the Pendleton Unit. The agreement provides available firefighting resources to the protecting agency. For ODF, we

provide engines and overhead to BIA for wildland fires outside of ODF's forest protection boundary. For BIA - Umatilla Agency, this agreement allows for them to provide firefighting resources on lands for which ODF - NEO is the protecting agency. In 2001, this agreement enabled ODF and BIA to work cooperatively on ten fires. Due to the effectiveness of this approach, all of these fires were kept small in size.

Both the BIA - Umatilla Agency and ODF - Pendleton Unit have Mutual Aid Fire Protection Agreements with the Tribal Fire Department for the CTUIR. As with the prior Mutual Aid Agreement, this agreement allows both the ODF - Pendleton Unit and the BIA - Umatilla Agency to provide available firefighting resources to the tribal fire department. The principle responsibility of the tribal fire department is structural protection while BIA and ODF are trained as wildland firefighters. As with the other agreements, this one was utilized extensively and productively in 2001.

Cooperation was also strong in the area of fire investigation this past fire season. Tips from individuals and a cooperative fire investigation effort allowed tribal and state law enforcement personnel to catch and convict an arsonist that had been plaguing the area this past fire season.

The Pendleton Unit coordinated a regional FIREWISE Workshop in May at the Tamastliik Cultural Institute and Wildhorse Resort complex. The workshop had very favorable reviews and was well attended by CTUIR representatives. CTUIR representatives included a welcoming address by Antone Minthorn, the Chairman of the Board of Trustees. ODF, CTUIR, the US Forest Service, and the State Fire Marshall's Office jointly sponsored the workshop.

In summary, Pendleton Unit perceives the working relationship concerning fire protection with the CTUIR and the BIA - Umatilla Agency as successful and productive, and one that enhances ODF's efficiency and effectiveness. Efficiency and effectiveness is gained by having one protection agency on what would otherwise be checkerboard ownership with redundant fire protection responsibilities.

Northeast Oregon District, Wallowa Unit

In 1999, the Wallowa Unit developed a written Cooperative Fire Protection Agreement with the Nez Perce Tribe. This agreement provides fire protection on 14,117 acres of tribal lands in Wallowa County. The Nez Perce Tribe pays the same fire patrol assessment rate as other private forest landowners. ODF agrees to request tribe-sponsored 20-man crews when needed to aid in the suppression efforts on the property. The Nez Perce will also provide a tribal representative to work with the fire managers on large fires and in the instances that heavy equipment will be used on the property, due to the presence of cultural resources.

Central Oregon District, Prineville

District coordination has been with the Warm Springs Tribe, mostly with the Protection from Fire program. The Central Oregon District has maintained Mutual Aid Agreements with both the Confederated Tribes of Warm Springs and BIA.

The level of coordination and cooperation in mutual sharing of initial attack resources has continued to make major strides. The Warm Springs Agency was able to provide both critical

helicopter and ground resources in several instances this past summer to structural and wildland incidents off the reservation. Those responses were coordinated through Central Oregon Interagency Dispatch Center (COIDC). The Warm Springs Fire Management Officer participates as an advisory member of the Steering Committee for COIDC and is also a member of the Steering Committee for the Central Oregon Interagency Incident Management Team, which has both BIA and Tribal members assigned.

The Warm Springs Tribe now has a fire prevention technician and participates in the activities of the Mid Columbia Fire Prevention Cooperative in conjunction with ODF and other fire agencies.. This position is new this year and should allow for better coordination of prevention activities in southern Wasco county and Jefferson county.

There is also a tribal representative that participates along with ODF and other agencies on the North Fork of the John Day Watershed Council and the Grant county Soil and Water Conservation District.

West Oregon District, Philomath

The West Oregon District has fee-based fire protection agreements with both the Confederated Tribes of Grand Ronde and the Confederated Tribes of Siletz. The Confederated Tribes of Grand Ronde sent four of their seasonal employees to the interagency fire school hosted by ODF prior to the 2001 fire season. During the summer, a two-acre fire occurred on tribal lands under ODF protection. ODF was joined in the attack by engines from the Confederated Tribes of Grand Ronde, as well as neighboring landowners and a rural fire department. Staff from the Confederated Tribes of Siletz regularly attend and participate in meetings of the West Oregon Forest Protective Association.

Forestry Assistance Program (Service Forestry)

Northeast Oregon District, La Grande

Cooperation is continuing in areas of salmonid restoration and enhancement activity. The service foresters have work on joint restoration projects weaving together tribal interest and dollars with other funding sources such as the Oregon Watershed Enhancement Board, Bonneville Power Administration (BPA), and the Conservation Reserve Enhancement Program.. Tribal fisheries biologists have played a valuable role during these activities. In Wallowa County, coordination with the Nez Perce Tribe, county representatives, and ODF occurs during the implementation of the Wallowa County/Nez Perce Tribe Salmon Habitat Recovery Plan. Representatives from the tribe and ODF serve on the technical committee that reviews land use actions and activities in the county.

The Wallowa Unit Forester is a member of the steering committee that provides input to the Nez Perce Tribal staff to aid in the development of a management plan for tribal land in Wallowa County. The land was purchased with BPA wildlife mitigation funds (from the Snake River dams) and the objective for these lands is to enhance and preserve wildlife habitat.

State Forests Program

Klamath-Lake District, Klamath Falls

As part of the Klamath-Lake District's Long Range Forest Management Plan, the University of Oregon's Anthropology Department completed a Cultural Resource Inventory Planning Document for all lands managed by the Klamath-Lake District. As a result of this report, the district will continue to contract with the University of Oregon to survey approximately 2,400 acres during this next year and hire members of the Klamath Tribe as part of the survey team.

Annual Operating Plans are reviewed and input collected from the Klamath Tribal Wildlife Biologist and Tribal Forester on former reservation lands managed by the district.

Forest Grove District, Forest Grove

During 2001, Pete Wakeland, Forester for the Confederated Tribes of the Grand Ronde, was a member of a 12-person Focus Group that reviewed and provided recommendations on the draft Forest Implementation Plan for the District. This 12-person group was comprised of a broad range of local stakeholders, including environmental interests, the timber industry, the public at large, local business, small woodland owners, and tribal representation. Pete made valuable contributions in this effort and it was a pleasure having him (and tribal representation) on this group.

Tillamook District, Tillamook

Cliff Adams from the Confederated Tribes of the Grand Ronde has participated on two Task Forces with the District. He was on the Tillamook Focus Group reviewing Tillamook's draft Implementation Plan and, most recently, was appointed to the Northwest Oregon Area Advisory Committee to advise ODF on future issues as we implement the Forest Management Plan.

Forest Practices Program

Northeast Oregon District, La Grande and Pendleton Units

The tribal interests in NEO are keenly interested in all facets of salmon recovery and water quality issues. This interest is evident in the TMDL/water quality planning processes that are currently underway on the Grand Ronde and the Umatilla Rivers. The tribes are key players and in some cases core partners in these processes.

The Forest Practices Act is administered on the private lands within the reservation boundary of the CTUIR. Notifications and permits to operate power driven machinery are required on all forest operations. Private landowners within the reservation boundary are also required to obtain a conditional use permit for harvesting activity within this area. Joint pre-operation inspections have been conducted on some operations.

Department of Human Services

Government to Government Report, 2001

Introduction

The Oregon Department of Human Services (DHS) is committed to joining with the Tribes of Oregon to address the full range of human services issues. Major areas of work with the Tribes include:

- Health care
- Child welfare
- Public welfare
- Alcohol and drug prevention and treatment
- Public health
- Mental health
- Developmental disability services
- Elder care
- Care for persons with disabilities
- Vocational rehabilitation
- Any human services issues that the Tribes wish to discuss

This report describes highlights of recent and current work in many of these areas. The report covers highlights of the interaction and program developments between the Tribes and DHS. Several of the areas covered in this report were identified at the December 2000 Government to Government meeting, held in Portland,

2001 activity highlights

■ New DHS

During 2001, DHS began a massive restructuring, consolidating administrative supports and streamlining services. Although the remaking of such a large organization is a complex task, the purpose is simple: to achieve better outcomes for clients and communities.

Throughout the process, DHS has sought and received consultation from the Tribes of Oregon. They continue to be a valued advisor.

■ Health Services, Health care

Health care continues to be a major agenda item between DHS and the Tribes. The DHS Office of Medical Assistance Programs (OMAP) continues its leadership with the Tribes in this area. Recent work has focused on billing and reimbursement issues.

- OMAP helped the Tribes bill for medical services using the federal encounter rate, which will get the Tribes reimbursed at a higher dollar amount.
- OMAP updated the American Indian/Alaska native billing guide to reflect HIPAA requirements.
- OMAP continues to be a leader by participating with a federal technical assistance group on recommendations to the federal government regarding services for American Indian/Alaskan Native.
- In conjunction with the DHS Director's Office, OMAP is working with the Coquille Tribe to enable the Tribe to receive Administrative Match funds, making them the first Tribe in Oregon to receive these dollars.

■ Health Services, Mental health

The Office of Mental Health and Addiction Services has continued to partner with the nine federally recognized Tribes in Oregon on issues ranging from joint conference planning and participation to ongoing

development of a plan for Tribes to become Local Mental Health Authorities (LMHA).

The Tribes and DHS were key players in passage of two pieces of legislation this year. The first was House Bill 3024, which established a Statewide Mental Health Plan.

The second piece of legislation changed the language in ORS 430.640, which establishes the criteria for Local Mental Health Authorities (LMHA). The language changed from requiring that the Tribe be land-based to a federally recognized Tribe. This change allows all nine Tribes within Oregon to become their own LMHA, if they so desire, potentially making mental health services more accessible to Tribal members.

The Confederated Tribes of Grand Ronde is currently in negotiation with the Office of Mental Health and Addiction Services (OMH/AS) to become a LMHA.

The Tribes helped plan and participated in the workgroup presentations of the first Annual Minority Mental Health Conference.

OMH/AS has a commitment to support and foster all ongoing working relationships and develop new and creative ways in which to partner with Oregon Indian communities.

■ Health Services, Alcohol and Drug Abuse

In the area of Alcohol and Drug abuse, the Emergency Board has approved a maximum of \$95,000 in Prevention Enhancement funds for the 2001-2003 biennium for all nine recognized Tribes. Other successful opportunities include:

- A joint project with the Oregon Department of Education resulted in 21 Native American youth trained as HIV peer educators.
- Letters approving Tribes as alcohol and drug programs were issued to the Warm Springs, Siletz, Grand Ronde, Burns Paiute, Cow Creek, Umatilla, and Klamath Tribes.
- DHS alcohol and drug staff held a workshop to help the Tribes apply for a federal RFP on juvenile crime prevention. Burns Paiute, the Confederated Tribes of Coos, Lower Umpqua and Siuslaw Indians, and

the Coquille Indian Tribes each received \$150,000 for a three-year period.

- The Tribal State Incentive Cooperative Agreement was completed in September 2001. All nine Tribes stated that they have a closer relationship with DHS, Department of Education, and OYA as a result of this grant.
- Fetal Alcohol Syndrome was identified by the Legislature as a major issue to address this year. As a result the DHS Health Cluster (of which alcohol and drug is a part) will work collaboratively with the Department of Education to pilot an approach targeting two entities, Linn County and the Confederated Tribes of Grand Ronde.

■ Health Services, Public Health

Breast and Cervical Cancer Program

Public Health Services funds a half-time Breast and Cervical Cancer Prevention Coordinator at Indian Health Services and provides \$25,000 to each Tribe for education and promotion.

Tobacco Prevention

Oregon may be the only state in the Union to provide Tobacco Prevention money directly to the Tribes. The Tribes developed the formula for distribution of funds. Because of the religious significance of tobacco in Indian culture careful distinctions are drawn between the use of tobacco in its religious and cultural practice and the misuse of tobacco as it relates to health.

Youth Suicide Prevention

Following a teen suicide, the Confederated Tribes of the Warm Springs Reservation and the Madras community held a two-day workshop on suicide prevention and how to recognize youth at risk.

Women, Infant and Children's Program

The Confederated Tribes of Warm Springs manage their own WIC Program. Funded by DHS, the program operates under DHS assurances, and training, staff development and consultation, and nutritional services are provided by DHS.

■ Seniors and People with Disabilities

A Tribal Elders Abuse Conference was held in May 2001, sponsored by SPD's Abuse Prevention Unit, the McMinneville Senior Services office and the Grand Ronde Tribe.

Nearly 100 people attended the all-day event held at Spirit Mountain, including Grand Ronde social and medical service providers, other Oregon tribal leadership and elder program coordinators, and numerous interested professional. Attorney General Hardy Meyers, National Indian Council on Aging, Director Dave Baldrige were speakers.

Medicare Empowerment Grant

DHS applied for and received a grant to provide Medicare outreach, information, and benefits access to Native American and Hispanic senior communities. The grant enables elders and their families/caregivers to access Medicare information to learn about benefit entitlements, patient rights and choices, and information on how Medicare and supplemental insurance works.

Currently, five Tribes participate in this program, receiving a high-quality computer, computer furniture and one year of paid Internet access. Four other Tribes are considering participating.

State Plan on Aging 2002-2005

The Confederated Tribes of Warm Springs and the Confederated Tribes of Umatilla were part of the nine-member advisory committee that developed Oregon's state plan on aging.

Native American Caregiving

A new family caregiver support program was created by the 2000 Reauthorization of the Older Americans Act.

Statewide, the area agencies on aging and all of the Native American Title VI programs received funding for this program.

All six Title VI recipients were awarded additional caregiving grants to develop services that will enable family caregivers to receive support services while caring for their aging relatives.

Video Project

A Native American elder-abuse video is being developed by the Adult Protective Services unit with a \$75,000 grant from the Oregon Department of Justice.

The project advisory board consists of mostly tribal leadership. The RFP went to independent Native American productions companies.

The National Council on Aging has offered to make copies of the video and distribute it to every Tribe in the U.S.

■ Children, Adult and Family Services

The Indian Child Welfare Act (ICWA) continues to be one of the cornerstones of the relationship between DHS and the Tribes of Oregon.

DHS continues to offer training on ICWA to all of its partners and staff. Prompt intervention in the early stages of ICWA cases has greatly reduced areas of dispute and ICWA non-compliance.

The 2001 ICWA Conference, held at Grand Ronde, was very successful for both Tribal and State participants. Native American culture was featured throughout the conference and the Confederated Tribes of Grand Ronde hosted a welcome dinner for the conference. Written participant evaluations rated this conference as very good and excellent with many reporting a new insight into ICWA and the Tribes.

A joint DHS-Tribal workgroup is developing a document that will describe the Principles & Expectations for Active Efforts. Active efforts — in contrast to reasonable efforts — is a higher level of effort required by federal law for ICWA cases. This project is in partnership with all nine Oregon Tribes.

Tribal Agreements

DHS has prioritized the need for a more efficient and timely negotiation process for DHS agreements and contracts with Oregon Tribes. DHS Children, Adult & Families enters into ICWA and federal fund access agreements with the Tribes.

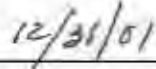

Significant progress has been made this year in finalizing or initiating Tribal agreements. The Coquille ICWA agreement is in the process of being signed and finalized. A new model ICWA agreement is being sent to the other Oregon Tribes for their consideration in updating their existing agreement, or entering into a new ICWA agreement with DHS.

New Title IV-E agreements, which allow payment for administrative and training cost to Tribes, have been finalized for the Coquille Indian Tribe and the Confederated Tribes of Warm Springs.

DHS has negotiated and renewed two Temporary Assistance for Needy Families agreements with the Klamath Tribe and the Confederated Tribes of Siletz. DHS continues to work with the Warm Springs Tribe to improve the service delivery system between DHS the Tribes.

Department Statement

The Oregon Department of Revenue continues to maintain good relationships with the tribes. By distributing the Governor's Executive Order and SB 770 among staff and discussing possible ways to improve our relationship with the tribes, the department stresses the importance of the unique legal status that the tribes retain as sovereign nations. During 2001, we have negotiated several issues to the satisfaction of both parties and are currently working to resolve several others. The primary issues this year continue to relate to Cigarette Tax agreements, garnishment of tribal employees and riparian rights.

Cigarette Tax Agreements

Under the provisions of ORS 323.401, the department now maintains cigarette refund agreements with six Oregon Tribes: the Confederated Tribes of Warm Springs, the Confederated Tribes of Umatilla, the Klamath Tribes, the Confederated Tribes of Grand Ronde, the Confederated Tribes of Siletz, and the Burns Paiute. The Tribes agree that all cigarette sales, including sales to tribal members on federal trust lands, will be subject to Oregon Tax. The department, in turn, agrees to remit refunds to the Tribes based upon tribal rolls and per capita cigarette consumption. We believe the agreements are in the best interest of both the Tribes and the State of Oregon and will assist the department in effectively administering the Oregon Cigarette Tax Program.

Department of Revenue 12/2001

Page 1

We are in the process of finalizing an agreement with the Coquille Tribe. We anticipate that agreement will be signed by January 31, 2002. There are two remaining tribes without agreements: the Coos and the Cow Creek Band of the Umpqua Tribe of Indians.

The cigarette tax refund agreements are essential in establishing a fair practical method of administering Oregon tax law requirements and complying with federal requirements governing the sale of cigarettes by the tribes.

Wage Garnishments of Tribal Employees

In order to collect delinquent debt owed to the State of Oregon, the department has requested tribes to garnish the paychecks of employees. At this time, all tribes are honoring our requests for wage garnishments except the Confederated Tribes of Warm Springs, the Klamath Tribes, the Burns-Pauite and the Umatilla Tribes.

Several tribes honor garnishment requests with no further action. The Confederated Tribes of Siletz accepts the department's garnishments and requires department staff to attend Tribal Court. The Court reviews and takes action on each garnishment, for both tribal and non-tribal member employees. The process is effective, but does require additional staff time. To reduce staff and travel time, we have worked with the tribe to schedule court hearings on several different garnishments together, rather than on separated days.

During the coming year, the department will continue to pursue negotiations with the tribes on the issue of wage garnishments and ask their assistance in ensuring that employees of the tribes pay their delinquent debts to the State of Oregon.

Riparian Property Tax Exemption

Over this past year, the department has had contact with Indian Tribes concerning legislation for designated riparian property tax exemption. "Designated riparian land" means the beds of streams, the adjacent vegetation communities, and the land thereunder, which are predominantly influenced by their association with water, not to extend more than 100 feet landward of the line of nonaquatic vegetation, which are privately owned and which qualify for exemption under ORS 308A.350 and 308A.383. The tribes wanted the departments input for legislation they were going to submit during the legislative session. The department provided information about the exemption and reviewed their legislative concept.

There was no legislative concept that passed this last session that dealt with riparian exemption on tribal lands. There were several other concepts that did make it through the legislative process.

Other Property Tax Issues

The department has been working closely with the Confederated Tribes of the Warm Springs regarding their proposed purchase of 1/3 interest in Portland General Electric's Pelton and Round Butte Dams. It appears that this sale is going to happen. The proposed date is January 1, 2002. At that time a portion of the property will become tax exempt. The department has been working with representatives of the Tribes and the Jefferson County Commissioners. The department is also finalizing a method to value this property.

HB 2332 created an Indian Enterprise Zone. At this time, it appears the Warm Springs Reservation will be the only reservation to qualify for this enterprise zone. The zone allows non-Indian companies to start a business within the zone. If the Tribal Government places a tax on the company's property, the company could then claim an income tax credit on their corporate return. The credit could be equal to the amount of tax the Tribal Government assessed.

Subject: Government to Government Annual Report (EO 96-30)

Burns Paiute Tribe:

- District 10 Maintenance staff is working closely with the Burns Paiute Tribe on a safety clear-zone project on Hwy. 20E. Staff has attended meetings, provided the Tribe with material to use in its tribal newsletter, worked with its environmental staff, and provided a written plan for the safety clear-zone work.
- District 10 Maintenance office is working with the Tribe to address a signing issue on Hwy. 20E. Dave Neys, District 10 Maintenance Manager is working to have the "Squaw Butte Experiment Station" sign changed to a name that meets the Tribe's satisfaction.
- Chuck Howe, Region 5 Environmental Coordinator; Hal Gard, ODOT Senior Archaeologist; and David Nyes met with the Tribal Council to discuss maintenance activity issues in the area of Brothers, Ore. The issues were successfully resolved.
- Chuck Howe has attended the Tribal Council meetings regularly to discuss annual reviews of maintenance activities in Devine Canyon, and upcoming projects on U.S. 20.
- Shelly Schmidt, Region 5 Biologist, worked with the Tribal fish biologists on Bull Trout studies.
- Rick Jerofke, Region 5 Environmental Coordinator, and Hal Gard met with the Tribal Council to discuss upcoming archaeological excavations on U.S. 20.

Confederated Tribes of Coos, Lower Umpqua and Siuslaw Indians

- None Reported.

Coquille Indian Tribe

- ODOT archaeologists attended the annual Coquille Tribe Cultural Resources Conference. Hal Gard served as an invited panel member.
- Kirsten Anderson, ODOT Archaeologist, assisted in excavation work conducted on ODOT right-of-way, which was initiated by the Coquille Tribe's Cultural Resources.

Cow Creek Band of Umpqua Indians

- None Reported.

The Confederated Tribes of Grand Ronde

- Kirsten Anderson coordinated update meetings with Grand Ronde Cultural Resources staff to review upcoming projects (Pacific Way – Dooley Bridge in particular), and to coordinate the next SB 770 cluster meeting.
- Lori Sundstrom, Environmental Services Manager, and Hal Gard met with the Tribal Cultural Resources Director to discuss joint development of a training and outreach program as part of our SB 770 obligation.
- District 3 held Oregon 18/22 Corridor coalition group meetings with Siletz and Grand Ronde Tribes.
- District 3 and District 4 are meeting with the Grand Ronde and Siletz Tribes to address the safety concerns of the Tribes and coastal area communities, especially dealing with Oregon 18 between Lincoln City and McMinnville.
- ODOT held a meeting with the Grand Ronde Tribe and Spirit Mountain Casino about development issues in and around the Grand Ronde area, and on tribal properties out of the area. At the same meeting, ODOT described projects that are planned for construction in the area.
- Don Jordan, ODOT District 3 Manager, and Dave Bishop, ODOT Mid-Willamette Valley Area Manager met with the Michael Moore, CEO/President of Spirit Mountain Casino, to discuss how to move forward with developments that Spirit Mountain Casino is considering. They also discussed the existing agreement in which the casino pays a part of the new interchange.
- Butch LaBonte, Grand Ronde Tribal Councilor is a member of the Mid-Willamette Valley Area Commission on Transportation. He attended and participated in nearly every monthly meeting.
- Jessie Davis, Grand Ronde Tribal Vice-Chairman, contacted Don Jordan, ODOT District 3 Manager at the Economic and Community Development Department summit meeting held in Pendleton. Don Jordan has since been contacted by the Grand Ronde tribal attorney about property owned by the tribe at Oregon 99/I-5 in Salem, off Ward Drive. The Tribe states that they helped to fund the improvements to Ward Drive so that the tribe could have access to the highway. The concern is that another developer already has used up the available highway capacity at this location. Further improvements will need to be completed to mitigate additional development. The tribal attorney is reviewing ODOT's files on this matter.
- The Grand Ronde Tribe is involved with donations, safety, and policing efforts for Oregon 18/22 and other coastal highways

Klamath Tribes:

- Kirsten Anderson coordinated an update meeting with Gerald Skelton, Cultural Site Protection Specialist and Dino Herrera, Culture and Heritage Director, to discuss upcoming projects and concerns.
- Kirsten Anderson met with Gerald Skelton for Modoc Point project field tour – discussion of cultural resources within project boundaries.
- Kirsten Anderson met with Gerald Skelton (along with Michael Schaaf and Shamon Struble) to discuss monitoring coordination on Maddock Corner – Lakeview project.
- Greg Holthoff, Environmental Project Manager, met with Larry Dunsmore, Tribal Fisheries Biologist, and Gerald Skelton, Tribal Site Protection Specialist, to discuss natural resource issues on Modoc Point to Algoma.
- Kirsten Anderson met with Gerald Skelton to review an archaeological survey report from University of Oregon for Modoc Point – Algoma project to identify concerns.

- Kirsten Anderson met with Oregon Department of Fish and Wildlife (ODFW) biologists, ODOT environmental project management staff, Gerald Skelton and Larry Dunsmore (Klamath Tribe biologist) to discuss proposed fish enhancement opportunities in association with Modoc Point – Algoma project.
- Kirsten Anderson and Randy Floyd, ODOT Biologist, met with ODOT project development staff, ODFW staff and Gerald Skelton to discuss proposed fish enhancement on Crooked Creek Bridge replacement project, and cultural resource concerns.
- During the spring/summer of 2001, ODOT participated in the development of the Klamath Tribes Transportation Plan and the Transportation Improvement Program. The Klamath Tribes TIP will be incorporated into the Statewide Transportation Improvement Program.
- Region 4's area manager, district manager, project manager and other ODOT staff continue to meet with representatives of the Tribe on a quarterly basis to discuss projects in development and construction, as well as maintenance work activities. ODOT and the Tribe discuss monitoring and protection of cultural resource sites. ODOT and the Klamath Tribe have discussed ways to improve communication and provide information that is necessary for each government.
- Region 4 is working with the Tribe to facilitate a permit for access to the state highway for its new administration building.
- Region 4 has met with the Tribe to look at the possible future needs of the Klamoya Casino. ODOT and the Tribe have reviewed plans for a possible truck stop near the facility.
- ODOT has kept in contact with the Tribe about utility permit issues where there is concern for cultural heritage impacts.
- ODOT has met with the Klamath Tribe on the Crooked Creek project to look at the possible relocation of spring drainage back to the natural flow to improve fish habitat and minimize impacts to the spring area.
- ODOT met with Klamath Tribal representatives Dino Herrera, Culture and Heritage Director and Gerald Skelton on a quarterly basis to discuss upcoming projects and address tribal concerns with regard to archaeological testing.
- ODOT environmental staff works closely with Tribal representatives to notify them when archaeological work is occurring and invites Tribal staff to participate and review work. ODOT shares all finding with the Klamath Tribe and other tribes as needed.
- ODOT is meeting with the Tribal Culture and Heritage to review the project site and obtain permits for archaeological work needed for excavations and rock fall improvements on the Modoc Point – Algoma project along U.S. 97.
- ODOT met with Gerald Skelton during the pre-construction meeting and in the field for the Maddock Corner to Lakeview project to coordinate and discuss sensitive cultural resources along the project and explain the purpose of tribal monitors throughout construction of the bridges.
- ODOT and ODFW met with Gerald Skelton regarding the Crook River Bridge on OR 62 to discuss changing the channel of a spring back to its original channel. This change will assist ODFW and the tribe for improving sucker habitat and avoiding cultural resources.
- ODOT worked with the City of Lakeview and the Klamath Tribe after cultural resources were discovered during the construction of the new water and sewer line portion of the Lakeview Streetscape Project. ODOT contacted the Tribe regarding the discovery and the investigation.

- The Klamath Tribe participates as a member on the South Central Oregon Area Commission on Transportation.

Confederated Tribes of Siletz Indians

- Laura Slater, Region 2 Project Leader, and Hal Gard met with Robert Kentta, Siletz Cultural Resources Director, to discuss the Whale Cove – Otter Crest project.
- Kirsten Anderson talked with Robert Kentta about proposed plans on the Pacific Way – Dooley Bridge project.
- Hal Gard engaged in extensive discussions with Robert Kentta concerning discoveries excavated at Bob Creek Bridge.
- District 3 held Oregon 18/22 Corridor coalition group meetings with Siletz and Grand Ronde tribes.
- District 3 and District 4 are meeting with the Grand Ronde and Siletz tribes to address safety concerns of the tribes and the coastal area communities, especially dealing with Oregon 18 between Lincoln City and McMinnville.
- A representative from the Siletz Tribe talked with ODOT staff and Cascades West Area Commission on Transportation representatives about possible improvements to Oregon 229 using funds from the Oregon Transportation Investment Act.
- The Siletz Indian Tribe is involved with safety efforts and donations for Oregon 18/22 and other coastal highways

Confederated Tribes of the Umatilla Indian Reservation

- Kirsten Anderson coordinated a project update meeting with CTUIR's Cultural Committee to review upcoming ODOT projects. Cape Horn - Albee Project team, including Chuck Howe and Hal Gard, met with the cultural committee on site to discuss project.
- Chuck Howe and Hal Gard worked with the CTUIR Cultural Committee on the re-burial of the Granite Creek remains found on U.S. 395.
- Kirsten Anderson attended a project update meeting with CTUIR's Cultural Committee.
- Kirsten Anderson sent an update to Jeff Van Pelt, Program Manager, CTUIR's Cultural Resources Protection Program on emergency repair to the John Day River (Coles) Bridge.
- Lower Perry Bridge Project Team met with CTUIR's Cultural Committee to discuss concerns regarding the design/build proposal on Lower Perry Bridge.
- Lower Perry Bridge Project Team met with CTUIR's Fish and Wildlife Committee to discuss the design/build proposal on Lower Perry Bridge—William Fletcher, Wetlands Team Leader and Molly Cary, Biology Team Leader and Chuck Howe attended.
- Kirsten Anderson sent a request for clearance letter for the Wayside Rockfall project on the CTUIR reservation to THPO Manfred Jaehnig (CTUIR Cultural Resources Program member assisted in University of Oregon survey of project).
- Chuck Howe attended regular Tribal Cultural Resource Committee meetings, and Tribal Fish and Wildlife Committee meetings. He coordinated with Jeff Van Pelt, Cultural Program Manager, on the Boardman/Port of Morrow project at the request of the community solutions team. He also worked with the Tribal Fish and

Wildlife Staff on cooperative partnering with watersheds and fishery projects, mitigation banking, and re-vegetation work.

- For several months, Region 5 has been working with the Umatilla Tribe on two surplus properties in Pandleton. Both parcels are within the reservation boundaries, and there are issues we are working through to achieve eventual sale to the tribe.
- There have been nine major projects, and a few minor ones that have been identified under the Memorandum of Understanding with the Confederated Tribes of the Umatilla Indian Reservation. The majority of these projects had a 25% hiring goal and a 1% compliance fee.
- Some of the prime contractors have been successful bidders on several jobs so the Confederated Tribes of the Umatilla Indian Reservation had worked with them on repeated occasions. The Tribe explains to the contractors what is expected from them in order to reach those goals and provide manpower through the Tribal Employment Rights Office (TERO). The tribe is a certified training agent under the U.S. Department of Labor. The tribe has been successful with placing trainees into on-the-job-training positions on ODOT projects. Also, the tribe along with ODOT will be working with Native American owned contracting firms in order to achieve DBE certification.
- ODOT's Labor Compliance Officer works on an ongoing basis with the Umatilla and Warm Springs tribal governments on labor and trucking issues concerning Native American construction workers, tribally-owned businesses, and Native American-owned businesses when highway construction work is performed on the reservation. ODOT worked to clarify overtime requirements for employees working for Tribe-owned businesses or Native American business owners on projects located on the reservation. This resulted in new language for contract specifications. Another issue addressed motor carrier exemptions for trucks owned by tribal governments or tribal members. A third issue related to tax withholding exemption for Native American employees performing work on the reservation.
- ODOT gave a joint presentation with the Confederated Tribes of the Umatilla Indian Reservation (CTUIR) cultural resources manager at the Region Environmental Coordinators meeting held at the Tamuliski Cultural Center.
- ODOT met with Jeff Van Pelt, Program Manager, Culture Resources Protection Program, to discuss tribal concerns with upcoming projects, tour of reservation, etc.
- A mandatory pre-bid is scheduled for each project, on or near CTUIR land, so that all parties involved understand the specific obligations under the MOU agreement.
- The Confederated Tribes of the Umatilla and ODOT are in the process of adopting a new MOU. The MOU is in its final stages and will be in effect by the 2002 construction season.
- Umatilla Tribal Police have participated in Three Flags safety belt overtime enforcement the past two years
- A Child Safety Seat Clinic was held at the Mission tribal fire station. Union County Safe Kids Chapter assisted Umatilla County Safe Kids chapter in holding the clinic.

The Confederated Tribes of the Warm Springs Reservation:

- ODOT awarded the Tribe a mini grant to purchase two in-car DUII video cameras.
- ODOT reviewed of the proposed casino site east of Hood River (Confederated Tribes of the Warm Springs Reservation).

- Overall, communication and coordination between the Confederated Tribes of Warm Springs and ODOT is very good, thanks in large part to the partnering sessions, focusing on Planning, Project Delivery, Maintenance, and Traffic Operations activities.
- ODOT has nearly completed one Statewide Transportation Improvement Program (STIP) project, *Frog Lake-Warms Springs Junction*. Tribal representatives are working closely with ODOT in the development of two upcoming STIP projects to be constructed in 2002:
 1. The *Mill Creek Bridge deck replacement* will require extended closures of U.S. 26 on the Reservation. ODOT staff and Tribal members have worked very closely on detour routes and ensured minimal impacts to the tribal community as well as the travelling public.
 2. The *Shitike Creek Overflow Bridge replacement*, where ODOT staff, Tribal members, Bureau of Indian Affairs, and the Federal Highway Administration, have partnered on not only the scope of the project, but a unique means of delivering the actual construction through the Warm Springs construction enterprise. For the first time in Oregon, a STIP project on the state highway system will be constructed by a Tribal contractor and administered by BIA, as allowed by federal law.
- The Confederated Tribes of Warm Springs continue to be active members of both the Lower John Day Area Commission on Transportation (LJDACT) and the Central Oregon Area Commission on Transportation (COACT).
- Tribal members took part in the presentation ceremony for the opening of the new U.S. 97 Crooked River Gorge Bridge.
- ODOT was contracted by the Confederated Tribes of Warm Springs to stripe all reservation roads this past summer.
- On January 4, 2002, ODOT will be hosting a winter maintenance symposium with Warm Springs Tribal Staff and the BIA. The Symposium will be held at the Kah-Nee-Ta Resort to discuss winter highway maintenance, incident response and anti-icing.
- ODOT archaeological staff met with Sally Bird, Acting Cultural Resources Coordinator for introductions.
- Kirsten Anderson met with Sally Bird to review upcoming ODOT projects.
- Kirsten Anderson met with the Cultural and Heritage Committee to discuss upcoming projects and proposed Mosier Mounds nomination.
- Kirsten Anderson sent update to Sally Bird on emergency repair for John Day River (Coles) bridge, followed up on questions.
- Kirsten Anderson coordinated with Sally Bird on permission to conduct survey on reservation (Shitike Creek Overflow Bridge).
- Kirsten Anderson talked with Sally Bird regarding staging areas for Shitike Creek overflow bridge project on reservation.
- Other environmental staff had extensive CTWS interaction for the Shitike Creek Project. Shelly Schmidt, Region 4 Environmental Coordinator and Stephanie Popp, Region 4 Project Leader, had several meetings with the Tribe's Natural Resources Department on proposed bridge design. They coordinated with the Tribal hydrologist on permitting. Ron Francis, ODOT wetland specialist, worked with Tribal staff to review the wetland resources near the project. They discussed potential impacts and compensatory mitigation and decided that project-related wetland impacts would be mitigated by giving funds to the Tribe for a wetland enhancement project on tribal land.

Statewide/Pan-Tribal

- Hal Gard attended the Natural Resources Cluster meeting by invitation in Salem.
- Hal Gard Chaired the Cultural Resources Cluster meeting in Burns.
- Hal Gard and Kirsten Anderson met with Wa Na Pa Koot Koot (Group of Columbia River Treaty Tribes) to review Mosier Mounds protection and proposed nomination, field tour, etc.
- Hal Gard and Kirsten Anderson attended the joint Cultural and Natural Resources Cluster meeting in Forest Grove.
- Hal Gard gave a presentation and program overview to the Legislative Commission on Indian Services in Klamath Falls.
- Hal Gard, Russ Frost, Region 4 Senior Geologist, and Mike Long, Geohydro Manager, have worked with members of the Fort Bidwell Indian Community in California, and the Confederated Tribes of Warm Springs to provide rock for stabilization of the Rivers End Ranch.
- Invitations were sent all tribal Police Departments (Burns Paiute Tribal Police, Coquille Indian Tribal Police, Siletz Tribal Police, Umatilla Tribal Police) for the Pedestrian Safety Police training.

(503) 378-5156 Fax

The Oregon Department of Education (ODE) in conjunction with the nine Oregon Tribes have been involved in various projects and activities this past year. Tribal Education Cluster Representatives and State education officials have had six (6) regular scheduled meetings, three workshops, two summits, and one telecommunications meeting. The following list reflects the work and accomplishments of the Government to Government for the year 2001.

- The Department of Education provided information regarding legislative issues related to education initiatives including native language licensure (SB690), Government-to-Government (SB770), Cultural Competency for teachers (782), Unemployment Insurance for Indian Tribes (HB3596), dropout prevention policy option packages, and various other education bills. In addition, members of the nine tribal nations were invited to be part of the SB 103 Multicultural Bill Committee whose mission is to increase efforts and strategies in the area of multicultural education and cultural competency.
- The ODE provided the results of the Minority Teacher Report, a ten-year summary of the progress of teacher recruitment and retention in the state of Oregon.
- The ODE through the Office of Curriculum Instruction and Field Services provided presentations on Social Science and Second Language requirements and Benchmarks. Of concern has been the need to utilize the Indians in Oregon Today 4th grade curriculum.
- The ODE participated in the Pacific Northwest Indian Education Summit, acting as a prime sponsor for this regional event.
- The Education Cluster attended the following meetings to present Education Cluster agenda/goals:
 - Oregon State School Board
 - Commission on Indian Services

- ODE representative, Merced Flores, participated in the Governor's Cluster meetings, providing information relative to the accomplishments of the Education Cluster.
- The ODE produced additional copies of the First Oregonians and encouraged schools to use it as a learning resource in building curriculum.
- The ODE in conjunction with Oregon tribal representatives and State Board Member Emilio Hernandez is in the process of revising the Oregon American Indian/Alaskan Native Indian Education State Plan. The Plan has been reviewed by the Oregon Board of Education and is awaiting approval for final Board adoption and distribution.
- Dialogue between state government and tribal officials have taken place regarding Local Education Agency (LEA) designation.
- Members of the Oregon Tribes have been involved in the Peer Education training and project headed by ODE Specialist Brad Victor. This training is intended to provide Oregon Indian youth with the skills to become trainers in HIV/STD and Unintended Pregnancy Prevention Education.
- The ODE has participated in the National Indian Education Association Conference and took part in the Common Ground III meeting in Tempe, Arizona.
- The ODE and the Confederated tribes have exchanged ideas, interagency updates, publications and materials, and other pertinent information to keep each group informed about government-to-government relations.
- ODE participation in ongoing meetings of the HIV/STD, Unintended Pregnancy Prevention for Oregon Indian Youth Advisory Committee.
- ODE participation in ongoing meetings of the Common Ground III Committee and the implementation of the 4 Bold Steps.
- ODE presentations at the OIEA Adult and Youth Conferences.
- ODE participation at the OIEA Board meetings.

The relationship between the Oregon Department of Education and the Nine Sovereign Nations has been very positive and amiable. Every effort is made to work through issues in a collaborative way, working for the benefit for all children.

Key Contact: Jan Dean, Deputy Director
(503) 947-1476
Jan.K.Dean@state.or.us

Major Areas:

Promote employment and develop the work force:

- More job openings than any other single source in Oregon
- Largest single source of job applicants in the state
- Resources and helpful staff
- 46 offices statewide
- Job outlook research and trends
- Career planning services and materials
- Wide range of timely economic information
- Touch-screen kiosk access to job openings statewide
- Internet sites available worldwide, anytime

Support the unemployed:

- Stabilize personal income and local economies
- Quality program and stable benefits fund
- Simplified tax and wage reporting process
- Simplified telephone continued claims reporting

Ensure safe, quality child care:

- Resource and referral network of services statewide
- Employer tax credits and benefits
- Certification for child care centers and group homes
- Registration for family child care providers

Conduct impartial and timely hearings (pilot program):

- Establish a consolidated central panel of six hearings units, formerly part of other agencies

- Conduct approximately 27,000 total contested cases (14,000 UI for nearly 70 state agencies, boards and commissions)
- Provide consistent interpretation and application of contested case rules

Departmental Statement:

The director has adopted the required Statement of Interest, which is available through the director's office and attached for your review.

Solutions and Programs:

Our department continues to have good working relationships with tribes in various regions of the state. Over the past several months, members of the department's executive team have traveled to 14 of the 15 regions in the state, meeting with stakeholders and customers to explain to them more about our programs and to obtain their input and recommendations on the programs and services that we provide.

Following are some examples of how our department has collaborated, partnered, and communicated with Oregon's nine federally recognized tribes, particularly through our 46 offices around the state.

Director's Office

The department conducted a focus group on Unemployment Insurance law implementation options for unemployment insurance coverage for individuals employed by American Indian tribes. Five of the nine tribes attended the focus group that was conducted on February 22, 2001 and helped draft language for HB 3596. HB 3596 changed unemployment law to treat Indian tribes similarly to state and local governments. Under this law, Indian tribes must be offered the choice of being reimbursing rather than taxpaying allowing the Indian tribes the same rights to certain exclusions of services as other governmental entities. The department and several representatives of the tribes testified in support of the legislation that was successfully passed, with some provisions effective retroactively to January 1, 2001.

Child Care Division

The division employs a child care certifier for the Warm Springs Early Childhood Education Center. Regular monitoring is conducted, as well as an annual recertification visit at the child care facility.

Research and Employment Services:

- Native American veterans are a target population group of the Veterans Workforce Investment Program (VWIP). Department representatives have met several times

with Tribal Councils to gain their support for this program. Council Elders have gained a basic knowledge of the program and can refer a tribal veteran in need to department staff for employment and VWIP services. Presentations have been made to:

- The Confederated Tribes of Siletz, Tribal Council
 - The Confederated Tribes of Klamath, Tribal Council
 - The Confederated Tribes of Warm Springs Reservation, Tribal Council
 - The Confederated Tribes of Umatilla, Tribal Council
 - The Confederated Tribes of the Grande Ronde
 - The Confederated Tribes of Coos, Lower Umpqua, and Siuslaw
- The Research Section works closely with a number of tribes to get their permission to publish occupational employment information and projections relating to the gaming industry.
 - Research also distributes a wide variety of labor market information publications to tribal governments/entities.
 - Most of the Oregon Indian tribes are participants in the monthly Current Employment Statistics program. Approximately 6,000 businesses and government agencies are ongoing participants in this survey. As such, each month these Indian tribes provide us with a count of their employment and the number of women workers.
 - Romelle Renner (Workforce Analyst) has responded to many data requests from the Coquille Economic Development Corporation (CEDCOR). They have several business interests in the Coos Bay area, most notably The Mill Casino and Hotel, which is owned and operated by The Confederated Tribes of Coos, Lower Umpqua, and Siuslaw.
 - Will Summers (Workforce Analyst) works with The Confederated Tribes of the Siletz. In November 2001, he made a presentation to Leadership Lincoln at the Siletz tribal house. He also provides labor market information to the tribal government on wage data, zip code level reporting unit and employment statistics, and occupational projections.

Field Services:

- *Astoria* – A representative from the Organization for Forgotten Americans, Lori Theros, serves on the Regional Workforce Investment Board and provides a liaison with tribal members in the area.
- *Brookings* – Although there are no ongoing relationships with Oregon tribal entities, this office does receive job orders and assist with job placement activities for two Northern California tribal entities.

- Bend/Redmond/Madras – Veterans representatives from our offices work with tribal veterans when requested. A small group of tribal members at the in Prineville have also been served through the veteran's clothes fair. Most tribal members are served through our Madras office, which is closest to the Warm Springs reservation.
- Coos Bay - During the past year we have continued to build on our working relationships with the Coquille Tribe and the Confederated Tribes of the Coos, Lower Umpqua and Siuslaw Indians. We regularly submit job opening information to the employment directors of each tribe and assist in major and minor tribal employment recruitment. During this time period we wrote letters of support for tribal projects and continued to partner successfully on many levels with tribal officials in our community. Here are some specific examples:
 - The Field Office maintains contact with Native American related businesses by assisting them in the process of locating workers. From January 1, 2001 through December 20, 2001 The Mill Casino, the Confederated Tribes, CEDCO, Miluk and Heritage Place have listed a total of 85 job orders with the Employment Department.
 - On January 11th, Job Service Representatives Gloria Clark and Debbie Sargent made an employer visit to the Confederated Tribe's facilities. They were given the grand tour, introduced to the staff and met with Kim Maxwell the Education / Employment Specialist for the Tribe.
 - February 14th, Francis Somday from the Confederated Tribes came to our office and shared with us the vision and plans of the Tribes proposed Family Recreation Center. They will build a 28,000 sq. ft building to house the Alishanee Bowling Center, a snack bar and lounge, game arcade and a Native American "theme" shopping center.
 - On April 6th the Employment Department participated in the Confederated Tribe's Career Fair held at their Tribal Hall. This was provided for area students.
 - April 7th was our Annual Veterans Benefit Golf Tournament and the Mill Casino is a contributing sponsor.
 - In July our Veterans Representative Frank Carpenter attended the Grand Opening and Dedication of the Confederated Tribe's new housing development in North Bend.
 - On August 29th the Newmark Center (our One-Stop) hosted GET SMART, a gathering of community partners (government, private sector and non-profit). Romelle Renner, our local Workforce Analyst served on the planning team.

- Our Veterans staff set-up a VA sponsored vocational rehabilitation program for a local tribal member that successfully commuted to a permanent position.
- The Treasurer of the South Coast Employer Council is a member of the Coquille Tribe. The Coquille Tribe is an active contributing member of the council and all of its activities and events.
- The Mill Casino is the host of our community's annual Economic Forum held on December 14th. Steve Metz, Ralph Richmond, Debbie Sargent and Romelle Renner attended from the Coos Bay office. One of the featured speakers was Guy Tauer, Employment Department Regional Economist.
- When our staff committee assessed "how we do business" this fall, it was decided that we would assign an Account Representative to The Mill Casino enabling us to provide the best possible customer service.
- Gresham - Phyllis Stevens of the Gresham Office has had an ongoing long-term relationship with many of the federally recognized tribes in Oregon. While she is now our JOBS Plus representative, she continues to have contact with these groups. Additionally, past year contacts and ongoing work with the tribes include:
 - Portland's office of the Confederate Tribes of Siletz Indians provides Employment Department job search information to their clients, intake workers and counselors, as well as referral of potentially eligible clients to their education, GED, and support services.
 - Referrals to Bureau of Indian Affairs (BIA) for certification and tribal enrollment.
 - Referrals to Indian Health Services (IHS)
 - Referrals to Low Income Housing for Native Americans.
 - Referrals to Native Indian Welfare Assistance (NIWA) (part of Services to Children and Families). She also provides employment services to parents in the program who are UI JOBS Plus eligible.
 - Contacts with the Native Indian Children Welfare Association (NICWA) (16-21 year olds) and parents; provide Employment Department information including Jobs Plus, as well as referral to their support services.
 - Native Indian Veterans Association (NIVA) Info and referral.
 - Native American Rehab Association (NARA) providing employment services to outpatients and referral to their in-patient and out patient program and support services.

- June 2001, Phyllis made a presentation to clients and counselors of the Confederated Tribes of Siletz Indians regarding Employment Department Services: job skills; and resume writing.
- Hermiston/Pendleton/Milton-Freewater area - During the year the department field offices have been in close contact with the Confederated tribes of the Umatilla Indian Reservation (CTUIR). The tribes have been an integral part of the Region 12 Workforce Investment Board, holding two voting membership seats (one as mandatory partner and the other through the Wildhorse Casino as a private sector member), and as a full one-stop partner. Department staff and the tribes worked very closely to put together the initial regional local plan, charter, and MOU for the RWIB.
- The department has also had substantial contact with the Organization for Forgotten Americans (OFA) out of Klamath Falls. The OFA also participated on the Region 12 WIB as an ancillary member and we have a minimum of once monthly contact with them.
- Recently, both the OFA and the CUTIR have expressed an interest to have a larger role in local plan and one-stop activities. OED has had an active support role in these efforts. The OED manager is working with the local Title 1B provider to modify the regional MOU to include the OFA and CUTIR as full one-stop partners. The RWIB membership has also recently been modified to change OFA's membership from ancillary to full.
- In the fall of 2000, the Pendleton office of OED participated in a career and information fair held on the reservation. Approximately 200 persons attended. In the spring of 2001, OED staff made a 2-hour presentation to a class of 25 persons at the Tumisklit Cultural Center located. The class participants were there to attend a flagging class. OED's presentation was focused on general job search techniques using OED's web page and career information and labor market assistance utilizing OLMIS.
- Outside of these more formal activities, the Pendleton office corresponds regularly with officers of the CUTIR on job orders and other employment service issues.
- Klamath Falls - The Klamath Falls office works with the Klamath Tribes in several areas. This office continually looks for areas of cooperation that would benefit Klamath Tribal members and currently provides services in these areas:
 - Provides recruitment services for Tribal job openings, office space on an as-needed basis for Tribal orientation for general assistance, orientation to the office job and career center, and information and valued-added referrals to Workforce Investment Act services. Recruitment for Tribal openings is also provided through America's Job Bank (AJB).

- Provides typing tests for applicants for Tribal positions when requested by the Tribal Employment Director.
- Provides verification of work registration and claims information for Tribal TANF recipients.
- Conduct job search presentations for participants in the summer youth program under WIA/Title 1B.
- Make presentations to tribal members on unemployment insurance.
- Write letters of support for the Klamath Tribes related to grant applications for programs and projects for tribal members.
- Oregon City - At this time, Region 15 has not partnered with a tribal entity, as there are no federally recognized tribes in the region. However, Clackamas Community College and some of the local high schools do have Native American clubs and put on awareness programs regarding Native Americans.
- Downtown Portland - The Westside One-Stop (Central City Concern and Downtown Employment Dept.) works with the Native Americans Rehabilitation Association (NARA), a cross-agency referral for treatment and housing, and One-Stop employment-related support.
- Newport/Lincoln City - These offices have excellent relationships with The Confederated Tribes of the Siletz.
 - The tribal Human Services Manager is a member of the Newport One-Stop management team, which oversees the new Lincoln County Employment and Training Center and the One-Stop service delivery system.
 - The department also has a contract with the Tribal Housing Authority, and tribal TANF and WIA/Title 1B programs for release of information on client unemployment insurance and work search status. Both tribal departments refer members to the Newport and Lincoln City offices for those services.
 - A veteran's representative visits the tribe at least three times a year to provide outreach for tribal veterans. This representative and a Veteran's Administration representative work with tribal veterans to co-sponsor annual veterans' benefits forums in Newport and Lincoln City.
 - The department provides job seekers with information about job openings and positions at the Chinooks Winds Casino through our job and career centers and information kiosks.

- *Salem* – The Grande Ronde tribe has a representative on the Willamette Employer's Council, which meets in Salem. An informational kiosk is also located at the Spirit Mountain Casino. The field offices in Dallas and Salem assist with recruitment for the casino as requested.

Sovereignty:

On December 21, 2000 President Clinton signed into law the Consolidated Appropriations Act, 2001 (CAA). As a condition of state conformity with federal requirements, unemployment insurance coverage is now required for services performed for Indian tribes. Prior to this coverage was at the option of the tribes. On February 22, 2001 the department conducted an Unemployment Insurance Focus Group for Indian tribes in Oregon to discuss the need for new legislation. The department worked with the Legislative Commission on Indian Tribes in organizing this focus group. During the meeting the department reviewed draft language and discussed implementation options that Oregon has under federal law. The department and several representatives of the tribes testified in support of the legislation that was successfully passed, with some provisions effective retroactively to January 1, 2001. The department's Tax Section has worked personally with each of the tribes to smoothly implement this new law and ensure that each tribe is able to make informed choices on payment options.

Although our Child Care Division has no direct jurisdiction over any child care facility sponsored by the tribes, tribes volunteer to have their facilities regularly certified. Several of the tribes have requested regular reviews to ensure they comply with recommended health and safety standards.

The Child Care Division committed funds to support collaboration with Oregon tribes in planning for child care for children with special needs. The division joined with the Confederated Tribes of Siletz and the Confederated Tribes of Grand Ronde on a project called Child Care for Children with Disabilities: A State and Tribal Collaborative Approach to Problem Solving. Through a series of community meetings and activities, this project identified problems and solutions in child care for special needs children. Strategies developed through the project form the basis for current statewide planning, and work with these tribes on a pilot project serves children with special needs. The division also enters into agreements with tribes to serve target populations, including child care for teen parents and parents undergoing substance-abuse treatment.

The positive working relationship and respect for these federally recognized tribes continues to be a high priority of our executive team, management, and staff.

Training:

Local field office managers in and near reservations are encouraged to invite members of the tribe to present an historical overview about their nations and participate in a dialogue on our working relationships—how well it's progressing and areas for improvement.

Cooperation among Departments:

Under the federal Workforce Investment Act, Native American tribes' employment and training programs are to be represented on the state and local Workforce Investment Boards. As mandatory partners, Native American tribes will be involved in planning, implementation, and development of one-stop service delivery systems.

Representatives from the tribes have been invited to the Workforce Investment Act, Methods of Administration training to be held on January 30, 2002. They have been asked to provide information on how local and regional Workforce Investment Boards, public workforce agencies, and private entities can work with the tribes in the areas of education, training, and job placement. Areas where the sovereignty of the tribes overlaps with federal and state regulations will also be discussed.

**Oregon Employment Department
Statement of Interest
State/Tribal Government to Government Relations
Executive Order 96-30
December 2001**

Background

The employment security system has been in existence for more than 60 years as a federal/state partnership to design and administer unemployment insurance and employment services programs at the local level. The Oregon Employment Department has approximately 1,400 employees in 47 offices throughout the state. Our \$1.1 billion budget is funded almost entirely by payroll taxes paid by Oregon employers. The majority of these funds go to pay unemployment insurance benefits to workers who have lost from their jobs through no fault of their own.

The department's top management team consists of a director, who reports directly to the governor, a deputy director, an assistant director for work force programs, an assistant director for field services, and an assistant director for administrative services. The Employment Department Advisory Council appointed by the governor advises the department on matters of concern to both business and labor -- our two primary customers.

Mission and goals

In 1996, the department wrote a two- and six- year strategic plan, which was approved by the governor. The plan has since been updated. It ties directly to the mission of the Employment Department:

To promote the employment of Oregonians by developing a diversified, multi-skilled work force, providing support during periods of unemployment, and promoting safe, quality child care

The plan has eight strategic goals:

- Give businesses a greater return on their investment by providing more direct services to address their priority needs.
- Become the state's Research and Development (R&D) center for researching emerging employment trends, testing model programs, and developing innovative solutions to local, regional, and statewide challenges in the emerging work force development system.

- Become a model agency for customer responsiveness and continuous improvement of the quality of programs and services; and collaboration with partners in the work force development system.
- Provide economic stability to Oregon communities by providing temporary income assistance to eligible individuals, helping unemployed workers return to work more quickly, and employed workers advance to higher paying jobs.
- Enhance the overall economic climate by maintaining a fair and equitable tax system and a solvent unemployment insurance trust fund.
- Create a comprehensive statewide system of accessible, affordable, quality and safe child care.
- Conduct hearings for panel agencies that are fair, timely, efficient, and meet public expectations of impartiality.
- Create an infrastructure support environment offering consistent, dependable, and innovative solutions for serving our internal and external customers.

Interests

The interests of the Employment Department are directly reflected in our mission and our ability to carry out that mission.

Promote employment and develop the work force. The department has the largest labor exchange in the state. We have thousands of job openings in a wide range of occupations and skill levels and are also the largest single source of job applicants statewide. Our field offices provide a variety of services to employers recruiting qualified applicants, including meetings rooms for interviews and nationwide access through America's Job Bank (AJB). Many services are also provided to job seekers, such as resume writing, Internet and kiosk access to job openings, career planning, timely labor trends and economic information, as well as job and skill matching opportunities.

Our field office managers and staff have developed good working relationships with leaders of the nine federally recognized Native American tribes around the state by providing comprehensive labor exchange services for the tribes. Several managers provide space in local offices to tribal staff; others provide part-time staffing or kiosks on reservations. All offices provide some level of these labor exchange services.

Our department is responsible for publishing industry employment statistics for the state and all its local labor market areas. Tribes provide accurate and consistent data and information on a regular basis to our Research Section. We secure written permission to publish monthly statistical information by county.

Support the unemployed. The department provides temporary income to workers who become unemployed through no fault of their own. This program helps maintain the purchasing power of individuals and communities by partially offsetting the lost wages of unemployed workers. Filing for unemployment insurance claims is both convenient and easy. In fact, once an application has been approved, the claimant can receive weekly

benefits through our computerized telephone system or by using one of our touch-screen kiosks located throughout the state.

Federal unemployment insurance (UI) laws do not require the tribes, as separate nations, to have UI coverage. However, all nine federally recognized tribes in Oregon have voluntarily agreed to participate in the unemployment insurance program. Accounts are paid in a timely manner and kept current. If any issues arise, our department works directly with the tribal council for immediate resolution.

Ensure safe, quality child care. The Child Care Division is the state's primary entity to ensure safe, quality, affordable, and available child care throughout Oregon. The division registers and regulates child-care facilities by establishing standards that programs must meet to operate. The division also contracts with local non-profit organizations to provide Child-care Resource and Referral (CCR&R) services to parents, child-care providers, employers, and communities. More than 95 percent of the division's budget represents federal funds, which are transferred to the Department of Human Services, Children, Adult and Family Services Division and used to subsidize child care for low-income working parents. Finally, the division provides information and technical assistance to businesses and promotes the Employer's Dependent Care Tax Credit program for businesses that develop child-care services for employees.

Under federal laws governing sovereign nations, the Child Care Division has no direct jurisdiction over child-care facilities sponsored by the tribes. However, when asked, the division does regularly certify these facilities. Several tribes have requested such a review. Also, several CCR&Rs have working relationships with tribal nations in Oregon. In the past, some tribes have chosen to participate in a federally subsidized child-care program provided by the division for high-risk children.

Communication process

Our staff believe they currently have good working relationships and effective communication processes with the tribes in their local areas. The issue for us is how we can improve on current practices and ensure that any problems and concerns are addressed at the appropriate level and in an expeditious manner.

The Oregon Employment Department strongly supports the concept of Executive Order 96-30 and is committed to carrying out the full intent of that order to ensure continued and improved relationships and communication with all sovereign Native American nations of Oregon.

**2001 Progress Report
Government-to-Government Executive Order &
Tribal Relations
Oregon Liquor Control Commission**

Key Contact::

Peter O'Rourke - Regional Manager - 927 Country Club Rd., Suite 200, Eugene, OR, 97401

Tel.# 541-686-7739 Fax: 541-687-7381

Email:pete.orourke@state.or.us

Background

The OLCC's main contacts with Tribes center on those that have liquor licenses:

<u>Name</u>	<u>Tribe</u>	<u>Location</u>
Chinook Winds	Siletz Tribe	Lincoln City
The Mill Casino	Coquille Tribe	North Bend
Seven Feathers	Cow Creek Tribe	Canyonville
Kah-Ne-Ta	Warm Springs	Warm Springs
Spirit Mountain	Grand Ronde	Grand Ronde
Old Camp Casino	Burns-Paiute	Burns

Status of current issues and relations

No Tribes have committed liquor law violations. We have received few complaints and have found no violations. In each case the Tribes have fully cooperated. We have processed routine licensing requests (to expand a facility, for example).

Regional staff maintained good relations with all licensed Tribes and keep in regular contact with them.

Licensed Tribes are eligible to purchase distilled liquor directly from OLCC's warehouse, at our cost plus a per-case handling fee (on which we make no profit). We recently raised the fee - which had remained unchanged for many years - in order to cover our own costs. Tribes, as well as others qualified to make these purchases, were affected. We received no negative feedback from this, as Tribal purchasing managers understood this was a necessary cost of doing business.

Future Issues

The Warm Springs Tribe is interested in opening a new casino somewhere along the Columbia River at Cascade Locks. This issue will be in development for some time.

None of the Tribes has asked for approval for alcohol on their gaming floors. However, this is likely to become an issue at some time in the future.

OREGON MILITARY DEPARTMENT
HEADQUARTERS OREGON NATIONAL GUARD
OFFICE OF THE ADJUTANT GENERAL
1776 MILITIA WAY

SALEM, OREGON 97309-5047

**Government-to-Government Relationships
Annual Report
January - December, 2001**

This report identifies Oregon Military Department (OMD) activities during the year 2001 regarding compliance with Executive Order (EO) 96-30 and SB-770, and its Government-to-Government Relationships with the nine federally-recognized Native American tribes in Oregon. During the year, the OMD continued to identify issues of mutual interest and to incorporate into its policies and operating procedures the requirements to continue government-to-government relationships with the nine tribes.

KEY CONTACTS:

Alexander H. Burgin, Major General
The Adjutant General
1776 Militia Way
Salem, OR 97309-5047
503-584-3991

J. Michael Caldwell, Colonel
Deputy Director, State Affairs
1776 Militia Way
Salem, OR 97309-5047
503-584-3984

Environmental Program Manager
1776 Militia Way
Salem, OR 97309-5047
503-584-3868

ACTIVITIES DURING 2001

➤ The OMD continued its coordination with the Oregon tribes during the preparation and development of a statewide Integrated Cultural Resources Management Plan

(ICRMP) for OMD/ORARNG facilities. All nine tribes were notified in CY 2000 and communication with individual natural and cultural resource programs continued throughout CY 2001. The Final Draft ICRMP and accompanying Environmental Assessment is undergoing final public review and should be implemented by early March 2002. It is important to note that the ICRMP addresses OMD procedures for continuing government-to-government relationships and compliance with EO 96-30 and SB 770.

⊗ The OMD has completed its Integrated Natural Resources Management Plans for Camp Adair (Benton County/Corvallis), Camp Rilea (Clatsop County/Warrenton), and Biak Training Center (Crook & Deschutes Counties/Redmond) in CY 2001. Coordination with the Oregon tribes continued throughout the preparation and development processes. Coordination with the tribes to address areas of mutual concern will continue throughout the five year implementation period of the plans.

AGI-ENV

SUBJECT: Government-to-Government Relationships Annual Report, CY-2001

➤ OMD staff participated in the Natural and Cultural Resources Cluster Group Meetings in 2001. It presented information specific to the Integrated Natural Resource Management Plans and the Integrated Cultural Resource Management Plan, including status reports on the review process and implementation.

➤ Formal and direct contacts were made with the Coquille Tribe, the Confederated Tribes of Coos, Lower Umpqua and Siuslaw, the Cow Creek Band of Umpqua Indians, and the Confederated Tribes of the Siletz for proposed Lane County Armed Forces Reserve Center and Operational Maintenance Shop in order to determine issues and areas of concern during the on-going Environmental Assessment process. Issues or areas of concern were not identified during the process. Completion of the Environmental Assessment for this project is expected in May 2002.

➤ The OMD continues to identify issues and opportunities for partnering with the tribes, and maintains a draft "State-Tribal Government Statement" for review. The Statement should be completed in 2002 and will identify policy issues of mutual interest with each of the tribes.

CONCLUSION

The OMD focused its efforts during the year 2001 to comply with EO 96-30 and SB 770, which both encourage an open dialogue with tribes where resource management concerns may exist. Three facility-specific Integrated Natural Resource Management Plans were implemented by November 2001, and a statewide Integrated Cultural Resources Management Plan for the agency will be implemented in early March 2002, following the final public review period. By this time next year, the OMD should have completed and adopted a "State-Tribal Government Statement" for the agency that will define how the agency will meet federal and state directives in the spirit of communicating and coordinating issues important to each Native American tribe.

Oregon Division of State Lands
Executive Order 96-30
2001 Government-to-Government Annual Report

Tribal Liaison: John E. Lilly
Assistant Director
775 Summer St. N.E.
Salem, Oregon 97301-1279
503-378-3805 extension 281
503-378-4844 Fax
Email: john.lilly@dsl.state.or.us

Division Interest Statement:

The Director has issued a statement, as well as a memo directed to staff regarding the Executive Order (December 9, 1996).

Major areas of work with Oregon tribes this past year:

Burns Paiute: Our Eastern Oregon office (Bend) is working with rangeland lessees in the Owyhee area to develop a stock water pipeline. Staff is discussing the work with the Burns Paiute cultural resources staff to determine if any resources are located within the planned pipeline right-of-way. The Burns Paiute are also leasing some Common School Fund rangeland. On intermingled state-owned and tribal lands we have been coordinating on management for wildlife and grazing. They have also indicated an interest in purchasing land from the Division.

Klamath: Our Eastern Oregon office has worked with the Klamath Tribe on a number of removal-fill permit projects relating to wetland restoration and enhancement where the tribes have been an applicant or project partner.

Umatilla: The Bend office has processed removal-fill permits for the Umatilla for wetland enhancement and restoration projects.

Warm Springs: The issuance of a state removal-fill permit to the Oregon Department of Transportation for work within the ODOT right-of-way in the reservation was coordinated with the tribe.

Coquille: A waterway lease for portions of the Old Mill Casino that extend onto state-owned submerged land is being discussed with the tribe.

Coos, Lower Umpqua and Siuslaw: The Division has open dialog with this tribe concerning its interests in conservation of the lower Siuslaw estuary through wetland restoration projects and in assisting in management planning for the Ten Mile Lakes complex near Lakeside.

General Comments: The Division continues to ask tribes for input into the issuance of removal-fill permits that affect resources within their area of interest. A proposed cultural resources guidance affecting land-disturbing activities on Division-managed lands is being drafted. Discussions with the Oregon State Museum of Anthropology have begun in regards to providing site reconnaissance when ground disturbance is planned. The Bend office staff plans to strengthen communication with tribal cultural resource contacts.

Energy Facility Siting Council

Acting as staff to the siting council, the Oregon Office of Energy consults with appropriate tribes regarding the proposed siting of new energy facilities and pipelines. The tribes receive copies of Notices of Intent and Applications. In 2001, the agency's director and siting council administrator met with partners of the Confederated Tribes of the Umatilla Indian Reservation (CTUIR) to discuss coordination as the tribe works toward developing an energy facility.

Nuclear Safety Division

Through the Office of Energy's Nuclear Safety Division, the State of Oregon continues to work closely with the Confederated Tribes of the Umatilla Indian Reservation. This is done under an MOU coordinating efforts on Hanford clean up policy and technical issues relating to the Columbia River, groundwater protection, radioactive material transport, public information and emergency preparedness. A tribal representative sits on the Oregon Hanford Waste Board. Tribal interests are described on the agency's Web site at <http://www.energy.state.or.us/nucsaf/native.htm>

Energy Loan Program

The first loan the agency made was to the Confederated Tribes of the Warm Springs Reservation. The \$1.5 million loan in 1981 was for a hydroelectric project. The Oregon Office of Energy Loan program continues to offer low-interest, long-term loans for energy efficiency and renewable resource projects to individuals, businesses, tribes and non-profits.

Conservation Division

The Office of Energy offers tax credits for the purchase of select energy-efficient home appliances, hybrid vehicles, alternative fuels, solar and wind energy. The Conservation Division is working to make these programs more accessible for tribal members. The Technology Development Division is available for assistance and helped solve a heating and cooling system problem for the CTUIR.

Public Information

The office participated in the Confederated Tribes of Coos, Lower Umpqua and Siuslaw Conference on Energy. The agency also attends the Natural Resource Cluster meetings.

3. Since the last summit, the Department, the OPRD Commission, and it's Division, the State Historic Preservation Office, have continued to make progress with the tribes on the following:
 - a. Testified in favor of the passage of SB 770, which codified EO 96-30
 - b. Governor Kitzhaber appointed Bobbie Conner, Confederated Tribes of the Umatilla Indian Reservation, to the Oregon Parks and Recreation Commission (senate confirmation)
 - c. The OPRD Director appointed Bobbie Conner to the Oregon Historic Trails Advisory Council.
 - d. The OPRD Director re-appointed June Olson, Confederated Tribes of the Grand Ronde, to the Oregon Pioneer Cemetery Commission.
 - e. Governor Kitzhaber appointed Jason Younker, Confederated Tribes of the Coos, Lower Umpqua and Siuslaw, to the State Advisory Committee on Historic Preservation.
 - f. Governor Kithaber re-appointed Jody Calica, Confederated Tribes of the Warm Springs, to the Oregon Heritage Commission.

- g. Drafted a Memorandum of Agreement with the Oregon Department of Forestry to better protect cultural resources on state forest lands. It is in the process of being executed.
- h. Initiated discussions with the Division of State Lands to create a similar agreement.
- i. Worked with DEQ to create an internal cultural resource policy that will insure better compliance with federal cultural resource laws.
- j. Initiated discussions between the Department of Forestry and the Forest Service relating to archaeological sites and emergency fire suppression.
- k. Last session, introduced SB 335 which would have made technical corrections to archaeological laws to better protect cultural resources. (did not pass)
- l. Contracted with the Oregon State Museum of Anthropology to systematically conduct archaeological survey of all Department lands. This is a three biennium project.
- m. Became a member of CETAS (Collaborative Environmental and Transportation Agreement for Streamlining), whose goal is to provide for the earliest possible consideration of agency concerns, including cultural, prior to planning for any transportation project.
- n. With the Umatilla, drafted an agreement that would address reburials in Oregon State Parks.
- o. Director and Assistant Director met with the Commission on Indian Services.
- p. Sent the Department Assistant Attorney General to a week-long training on cultural resources laws and practice.
- q. Authored a letter from the Governor to all land managing agencies and local governments about the threat to cultural resources during the low water crisis.
- r. Have been working cooperatively with the Grand Ronde on the possible development of the historic Ft. Yamhill.
- s. Trained OPRD Managers and field staff in the importance of cultural resource management, and how to recognize archaeological sites.
- t. Initiated a Cultural Resource Clearance Form to prevent inadvertent site disturbance in the Parks.
- u. Heard a presentation from the Executive Director of the Commission on Indian Services at the annual All OPRD Managers Meeting in December.

- v. Entered into grant agreements with the Warm Springs and Grand Ronde for various projects such as the Pelton/Round Butte, Deschutes Boater Pass and Reservation Lands projects, and Ft. Yamhill Master Plan.
- w. Worked closely with the Southern Oregon Indian Center to hold a three day inter-tribal Pow Wow at Valley of the Rogue State Park.
- x. Initiated changes to the Recreation Trails and Land and Water Conservation grant programs to make sure that funded projects do not adversely impact cultural resources.
- y. Invited tribal natural resources managers to the Oregon Outdoor Recreation Council meeting in November.
- z. Involved the Tamastlikt Cultural Institute in Heritage Days at Blue Mountain State Park, as well as worked with the Umatilla tribe on the Lewis and Clark Bicentennial Committee.
- aa. The Department received an award for its management of the Mosier Mounds archaeological site in the Columbia Gorge.
- bb. Participated with the tribes in two re-interments at Oregon State Parks (Farewell Bend and Battle Mountain).
- cc. Continue to hold meetings of the Ft. Rock Cave Advisory Committee. Active tribes include the Klamath, Burn/Paiute, and Warm Springs. The idea is to develop a management plan for the cave, a National Historic Landmark.
- dd. Initiated a sign program for culturally sensitive areas in State Parks that quote cultural resource laws and otherwise seeks to educate the public.
- ee. Relocated a recreational trail at Tillamook Head to avoid an archaeological site.
- ff. Continues to work with the Warm Springs Tribes on the implementation of the Lower Deschutes River Management Plan.
- gg. Continued digitizing SHPO archaeological maps, reports and site files into a GIS format.
- hh. Continues to respond to archaeological issues involving site disturbance and permit issuance.

RE: Annual Government-to-Government Report

AGENCY: Oregon State Police

KEY CONTACT: Captain Robert W. Miller
400 Public Service Building
Salem, Oregon 97310
Phone: (503)378-3720 Ext. 4127
Fax: (503)378-8282

The following constitutes the Oregon State Police State-Tribal Government-to-Government relations report to the Governor on the activities of this agency under sections 1 to 4 of Senate Bill 770 which was passed by the 2001 Legislature.

Please find attached a copy of Oregon State Police Policy Chapter 500.11 entitled, STATE-TRIBAL GOVERNMENT-TO-GOVERNMENT RELATIONS. The purpose of this policy is to formalize the government-to-government relationship that exists between Oregon Indian tribes and the Oregon State Police. It also established a process which is used to assist in resolving potential conflicts, maximize key inter-governmental relations and enhance an exchange of ideas and resources for the greater good of all of Oregon's citizens, whether tribal members or not.

The above referenced policy identifies key contacts within the Department by position. I have provided an additional key contact list that contains actual names and phone numbers.

The following is a summary of the various interactions between tribal governments and representatives of the Oregon State Police. The report is divided into interactions at the Headquarters/Division level and interactions at the Field Office level:

Headquarters/Divisions Interactions with Tribal Governments

All members identified as key contacts in the above referenced Department policy, as well as many others, attended twenty hours of training taught by the United States Indian Police Academy entitled "Criminal Jurisdiction in Indian Country." This training occurred April 18-20, 2001, in Pendleton, and September 24-26, 2001, at Warm Springs. The blocks of instruction that were presented included legal topics that are essential to understanding criminal jurisdiction in Indian Country. Major areas of instruction were, "Federal Criminal Law and Jurisdiction; Statutory Framework for Federal Prosecution of Crimes on Native American Reservations; and Child Sexual Abuse."

Tribal Gaming Section

- The Tribal Gaming Section has regular daily interactions with all the gaming tribes in Oregon. Due to the nature of the Section's mission, they have had numerous occasions to increase their awareness of the cultures, beliefs and governmental systems of Oregon's Native American tribes. Some of these opportunities are listed below.
- The Multicultural Student Union at Western Oregon University hosts an annual Powwow. It is primarily sponsored by the Grand Ronde Tribe, but has attendance from the Northwestern Tribes as well as Tribes as far south as Arizona. It is well attended by all cultures. This event has been attended by Section personnel for the past two years.
- The Coquille Tribe had a celebration when they opened their new Community Center in Coos Bay. The event was held in the Community Center and had as a keynote speaker, Michael Horse, actor and activist. This gave Section personnel an opportunity to see some of the Tribe's enterprises.
- The Klamath Tribes have an annual ceremony to celebrate the return of the c'waam (suckerfish). Section personnel were given the opportunity to gain an understanding of the issues facing the Tribes in that area. There was also community dancing and feasting associated with this gathering.
- Tribal Gaming Section personnel attended the Tu Kwa Ha Ne (Burns Paiute Powwow). The Powwow was well attended by the other Oregon Tribes. It was held in the Bingo area of the Old Camp Casino and there were booths and concessions in the parking lots. It gave Section personnel exposure to the cultural traditions of respect for elders and awareness of passing down these traditions to the next generation.
- Pi-Ume-Sha Treaty Days (Warm Springs) is one of the major gatherings in Oregon. Section personnel attended this event which includes the Powwow, softball tournaments, a golf tournament, a parade, an endurance race and stick games.
- Under the guidance of Orthelia Patt, chair of the Warm Springs Gaming Commission, Section personnel were given a tour of the Reservation. In addition to seeing their fish hatchery, cultural museum, power plant and the Kah-Nee-Tah resort, they were also given insight into some of the traditions of the Reservation. Orthelia related various rock

formations, root gathering areas and the history behind some of the sites on the Reservation.

- Section personnel attended the Wild Horse Powwow which is one of the few that was put on in conjunction with the casino. The Umatilla Powwow grounds, the Tamastsiht Cultural Institute and the rodeo grounds are all adjacent to the casino. Nez Perce and other Idaho Tribes as well as Montana, Washington and Canadian native Tribes were represented.
- The Siletz Powwow was held in the town of Siletz and mostly Oregon Tribes were represented. The remarkable point of the Siletz fete was that the vendor booths filled not only the Powwow grounds but spilled over into the town of Siletz.
- The Tribal Gaming Section has plans to expand their education process. There is a class in Indian Culture offered by Chemeketa Community College emphasizing the cultures of Native Tribes by region. They have already had attendance at these classes and plan on expanding. Since Section personnel are attending cultural events regularly, they plan on having more tours such as was done with Warm Springs to learn more about Reservation life and traditions. By increasing their rapport with the Tribes, they hope to better serve the citizens of the State of Oregon, both Tribal and non-Tribal.
- Nearly the entire Tribal Gaming Section participated in the training on Criminal Jurisdiction in Indian Country. Other shared training involved training on casino table games, such as craps and roulette.

State Fire Marshal Division

The Office of State Fire Marshal interacts with Tribal Governments in several ways to assist with fire and life safety needs:

- Code Assistance - Interaction on code assistance with several tribal casinos has been successful in the past. This has allowed the Fire Marshal's office to provide valuable input to the Tribes for their evaluation and consideration.
- Fire Defense Partner/Fire Defense Chiefs - The Warm Springs Indian Reservation has a well trained fire department, which participates in on-going training and leadership roles that parallel Oregon's fire service. Their local fire chief has also taken a pro-active role to assist Jefferson County in mutual aid efforts and acts as an alternate fire defense chief when necessary for the county. The Fire Marshal's office regularly assists the Warm Springs Fire Department with fire cause determination as well as interviews of both juvenile and adult fire-setters and/or arsonists.
- Mobilization Support - Through the Bureau of Indian Affairs, a formal agreement is in place between the Warm Springs Indian Reservation and the State Fire Marshal, which allows the Governor to mobilize state fire resources through the Conflagration Act on behalf of Warm

Springs. The Bureau of Indian Affairs would reimburse the State of Oregon for all costs in the event of mobilizations on the Reservation.

- Umatilla Tribal Fire Department – Umatilla Tribal Fire Department is included in the State Fire Marshal's Oregon fire departments listings and works closely with other departments in their area.

Fish and Wildlife Division

The following list briefly summarizes activities of the Fish and Wildlife Division of interest to tribal governments:

- Investigate violations of Native American archaeological laws.
- Coordinate with state and federal prosecutors and magistrates to bring defendants of archaeological laws to justice.
- Provide trained Fish and Wildlife Division staff on the Endangered Species Act and tribal treaty rights.
- Provide trained Fish and Wildlife Division staff knowledgeable about tribal sovereignty issues and the background of tribal sovereignty.
- Coordinate with tribal representatives on fish and wildlife issues before the Oregon Fish and Wildlife Commission.
- Coordinate with tribal representatives on fish and wildlife issues before the Oregon Legislature.
- As a member of the Columbia Basin Law Enforcement Council, they coordinate with the Columbia River Treaty Tribes on enforcement issues related to the Columbia River.
- Providing Native American cultural training as part of the Division's Workforce Development Plan.

Field Office Interactions with Tribal Governments

Northwest Region, Fish and Wildlife Division

- Lieutenant Steve Lane, Northwest Region Headquarters, continues to serve as the Department's representative on the Native American Cultural Resources Cluster Group. The primary purpose of this group is to provide a forum for the tribes and the state agencies to come together and cooperatively discuss the protection and preservation of Native American cultural resources. The group meets three to four times a year at various locations around the state. This group convened in March at Burns with the Burns Paiute Tribe hosting the event. Discussion centered on the use of the term "squaw" in landmark names. The group met again in August in conjunction with the Natural Resources Cluster Group in Forest Grove. The Oregon Department of Forestry hosted the gathering. Much discussion again revolved around the use of the term "squaw" in landmark names and pending legislation to remove the word from current landmark names. A work session was also held between state agencies and tribal representatives. On the second day of the

meeting state agency and tribal representatives toured the Tillamook Forest accompanied by Oregon Department of Forestry representatives.

- Lieutenant Lane and Lieutenant Randy Scorby (Eastern Region) participated in the Columbia Basin Law Enforcement Council. Columbia River Inter-Tribal Fisheries Enforcement also participates in the Council. This provides both lieutenants the opportunity to confer with managers from the Tribal Fisheries Enforcement agency on matters that may concern tribes conducting tribal fisheries on the Columbia River or its tributaries.
- On August 3, 4, and 5, Inter-Tribal fisheries enforcement officers assisted Region personnel with the Buoy 10 (Astoria) fisheries patrol efforts. On August 10-12 Inter-Tribal enforcement officers again assisted with the Buoy 10 season. These officers conducted both boat and shoreside patrols with Oregon Fish and Wildlife officers. Numerous citations were issued both weekends by both the State and the Inter-Tribal officers for recreational fishery violations.
- Lieutenant Lane and Senior Trooper Paul Randall provided two separate two-hour refresher courses in archaeological investigations at Fish and Wildlife Division annual in-service school in February and March. Approximately 115 fish and wildlife troopers received the training. June Olson, Cultural Resources Director for the Grand Ronde Tribe was invited to speak on the importance of cultural resources and the protection of those resources as related to Native Americans.
- Fish and Wildlife personnel have been involved in instructing a class in fish and wildlife enforcement at Oregon State University since 1995. In October, Lieutenant Lane provided a one-hour session to the class dealing with archaeological investigations. The intent of the session was to provide a brief synopsis of archaeological investigations, but also relate the importance of the protection of cultural resources not only to Native Americans but also to the citizens of Oregon.
- Lieutenant Lane continues to be a liaison between the State Historical Preservation Office "SHPO" (Dr. Leland Gilson, State Archaeologist) and the Tribes in regards to violations of the cultural resources protection laws. Dr. Gilson and the Tribes report violations to Lieutenant Lane and he forwards the information to the respective OSP Region for investigation.
- A Fish and Wildlife trooper from Springfield conducted an investigation into a contractor that excavated a known archaeological site on "Potato Hill" within the Springfield city limits. The contractor, who owned the property, proceeded to "scrape off" the known site with a road grader in preparation to build. Robert Kentta, Cultural Resources Director for the Confederated Tribes of Siletz Indians and the City of Springfield assisted in the investigation.

University Patrol Office – Corvallis

- The University Patrol Office on the Oregon State University campus has an officer assigned as a liaison with the Native American Cultural Center. Tribes from all over America are

represented in the center. This has provided the opportunity to share information on the role of the State Police at the university as well as answering questions regarding career opportunities.

- The office had personnel attend the annual Pow Wow held at Gill Coliseum. This event attracted tribes from all over the United States.

Newport Patrol Office

- The Newport Patrol Office enjoys an excellent working relationship with the Siletz Tribal Police Department and Chief Norm Counts. Chief Counts has been invited to participate in the Local Public Safety Coordinating Council and is included in local law enforcement administrators monthly meetings.
- The Newport Station Commander and members of the Lincoln County Interagency Narcotic Team have provided education and public forums in Siletz at the request of the Tribe on drug related problems, including methamphetamine lab recognition and hazards.
- The Newport Patrol Office also actively participates with the Tribe on the Highway 18/22 Traffic Safety Coalition. They are focusing their efforts on developing better public information about highway conditions to the coast and the need for more enforcement personnel on these highways.

Coos Bay Patrol Office

- The Coos Bay Office continues to provide assistance to the Coquille Tribal Police Department as needed. The Tribal Police Department has been added to the Coos County Cooperative Policing Agreement. The Coos Bay Office has invited the Police Department to attend Department training and they have actively participated.
- A Fish and Wildlife trooper conducted an investigation into the excavation of a shell midden done by the City of Bandon that contained at least one fragment of human bone. Don Ivy, Cultural Resources Director for the Coquille Tribe assisted with the investigation.
- Office members have assisted the Coquille Tribal Police Department with several criminal investigations. The most recent case involved a suspicious death which occurred on Tribal lands.

Roseburg Patrol Office

- The Roseburg Patrol Office continues to have a strong working agreement with the Cow Creek Indian tribe. Senior Trooper Monte Smith keeps in close contact with the casino's gaming commission director as well as the head of security. The casino continues to forward occasional theft, criminal mischief or drug cases to either Senior Trooper Smith or the station for follow-up.

Klamath Falls Patrol Office

- Relationships between the Oregon State Police, Klamath Tribe and other local public safety agencies continues to move forward with efforts to improve and expand the frequency of communications.
- The Klamath Falls Patrol Office continues to be responsive to the requests of the Klamath Tribe for law enforcement assistance when dealing with incidents at the Kla-Mo-Ya Casino.
- A Fish and Wildlife Trooper assisted the Klamath Tribe in investigating complaints and patrolling the Klamath River when the water level dropped due to the de-watering by Pacific Power and Light Company.
- During the summer water crisis, the Klamath Tribes requested assistance from the Klamath Falls Patrol Office in regards to a planned Calvary Ride. The ride was a protest by area farmers who rode 150 horses over a hill to the headgates. The area of the ride is called the Conger Area and has numerous cultural and archeological sites that are very sensitive to the Tribes. A meeting was held at the Klamath Falls Patrol Office with representatives from the Klamath Tribes. An acceptable route was located and that information was provided to the event organizer. The riders agreed to confine the horses to a narrow path for the ride.
- Office Detectives responded to a request for assistance from Klamath Tribal leaders upon their recovery of skeletal remains. After identifying the remains as Native American by the Medical Examiner, the remains were returned to Tribal authorities.

East Region Headquarters, Criminal Investigative Services Division

- Criminal Investigation Services Division detectives responded on three separate occasions to assist the Umatilla Tribal Police as Clandestine Lab Site Safety Officers on drug labs located on Tribal property.
- Division members also assisted the Umatilla Tribal Police with the death investigation of a Native American on Tribal property.
- Criminal Investigation Services Division members also participate with the Umatilla Tribal Police on the Umatilla Tribal Major Crime Team.
- Department members of the Central Oregon Drug Enforcement Team (CODE) responded to three investigations on Warm Springs Tribal land related to drug crimes.
- The Bend polygrapher conducted eight polygraph examinations at the request of the Warm Springs Tribal Police for a variety of crimes.

- Members from the John Day office coordinated and conferred with the Burns Paiute Tribe regarding human remains discovered in South Harney County. The remains were determined to be of ancient origin and the Burns Paiute Tribe conducted a repatriation.

East Region, Fish and Wildlife Division

- Over the past year, Lieutenant Scorby has continued his membership and attendance at the Columbia Basin Law Enforcement Committee. This committee is comprised of fish and wildlife law enforcement officers from the National Marine Fisheries Service, Washington, Idaho, Montana, Oregon and Inter-tribal Fisheries Enforcement personnel.
- East Region members made numerous cases with the assistance and cooperation of the Warm Springs Police Department. These cases involved the illegal taking of deer and salmon off the reservation by Tribal members.
- A region trooper cited a Warm Springs Tribal member as the result of an illegal deer kill investigation. The Gilliam County District Attorney allowed the Warm Springs Tribe to convene tribal court utilizing the county courthouse. This appears to be the first time this has ever occurred in Gilliam County.
- East Region Fish and Wildlife personnel participate in the Deschutes River Interagency Implementation Team. The Warm Springs Tribe, Bureau of Land Management, Oregon State Marine Board, Oregon State Parks and Recreation, and the Department managers meet regularly to discuss issues on the Deschutes River.
- A Bend Trooper assisted the Warm Springs Police Department in a cooperative wildlife enforcement decoy operation on the Warm Springs Reservation in November. This operation resulted in two Tribal members being cited by Warm Springs Tribal Police Officers for Hunting Deer on Reservation – Closed Season and Hunting From a Motor Vehicle. Fish and Wildlife Division members have trained Tribal police officers on the proper use of wildlife enforcement decoys, and routinely provide decoys and assistance as requested.
- A Fish and Wildlife trooper in Burns conducted an investigation into a subject that was obtaining human remains and artifacts from the desert in the Burns area. A search warrant was executed at the subject's residence where human remains and artifacts were recovered. The investigation also lead to a museum in California where other items were seized. The Burns Paiute Tribe assisted in the investigation.
- A Fish and Wildlife trooper from Pendleton received information from the Umatilla Tribal Police regarding a local resident who had purchased two Chinook salmon from the Umatilla Tribal member. The fish were harvested by tribal members in the Cascade Locks area and were brought to Pendleton and sold at a local gas station. The suspect was contacted (a non-tribal member) and cited for Unlawful Purchase of Fish. The Umatilla Tribal Police conducted the investigation on the tribal member.
- A Tribal salmon season opened on Looking Glass Creek on May 19, 2001. Two Tribal members were contacted with four salmon they had snagged with weighted treble hooks.

This is prohibited during the Tribal fishery, and the information was provided to the Umatilla Tribal Police for follow-up.

- A Heppner member assisted a Columbia River Inter-Tribal Fisheries Enforcement officer pull five illegal gill nets on the Columbia River under the I-82 bridge utilizing an Oregon State Police boat. Fourteen Sockeye, one Chinook, two Steelhead, three Shad, one 49 inch Sturgeon, and one Catfish were in the nets. The Tribal member who lives in Kennewick, Washington, was contacted and cited for numerous violations.
- During opening weekend of deer rifle season, a Pendleton trooper investigated the harvest of two cow elk along Summit Road in the Mt. Emily Unit. His investigation revealed the elk were killed by two subjects with Umatilla Tribal status. He later determined that the subjects had a level of enrollment that does not include general hunting privileges. The case was referred to Umatilla Tribal Police.

Bend Patrol Office

- The Bend Station Commander meets monthly with Tribal Police representatives and other law enforcement agency heads as a member of the Central Oregon Law Enforcement Services (COLES) board. The COLES board provides a forum for open discussion of issues facing all area police agencies and also serves as the policy board for the Central Oregon Drug Enforcement team (CODE) and the Central Oregon Major Crime Team, both of which the Bend Patrol Office and the Warm Springs Tribal Police participate.
- The Madras work-site sergeant is a member of the Jefferson County Human Relations Task Force, which is comprised of area citizens. Tribal members from Warm Springs are strongly represented on this group. Members of the task force attempt to resolve and alleviate race relation issues as they develop.
- Department members have also been involved, along with representatives from Warm Springs, in the Collage of Culture and Fear of Color events that are annual events in Madras.
- The Warm Springs Tribe is a co-partner with the Department on the Deschutes River Management Team. Members of the Fish and Wildlife Division represent the Department on this team which is based on a formal written agreement. This co-partnership has partially been responsible for increased communication between the tribe and Department Fish and Wildlife members.
- Members of the Madras work-site meet on a monthly basis with members of the Warm Springs Tribe as partners on the Jefferson County Local Public Safety Coordinating Council.
- The Bend Patrol Office continues to assist the Warm Springs Police Department by providing Crash Reconstruction expertise for fatal crash investigations.

Pendleton Patrol Office

- The Pendleton Patrol Office currently has three agreements with the Confederated Tribes of the Umatilla Indian Reservation. They are the Major Crime Team Agreement; the Policy and Procedures Agreement that defines the working relationship between the Tribe and the Department with regards to Native American Ancestral Remains discovered either intentionally or accidentally; and the Umatilla/Morrow Counties Cooperative Policing Agreement.
- The Department and Umatilla Tribal Police Department continue to be a part of the Umatilla/Morrow County Law Enforcement Administrators Conference, which meets monthly.
- The Pendleton Patrol Office continues to provide Drug Recognition Experts; Crash Reconstructionists; and Clandestine Lab Site Safety Officers to the Tribe as needed.

Ontario Patrol Office

- The Ontario Patrol Office and the Burns Paiute Tribal Police are both participants in the Harney County Cooperative Policing Agreement.
- The Tribe also participates with the Department in the Harney County Multi-Disciplinary Child Abuse Team, the Harney County Child Fatality Review team and the Harney County Commission on Children and Families.
- The Burns Paiute Tribal Police also participates with the Department as members of the Local Public Safety Coordinating Council and serve on the Council's Alcohol Dependency and Juvenile Crime Committees.

Arlington Patrol Office

- The north central area of Oregon and Zone 6 of the Columbia River is mainly comprised of the four treaty tribes: Yakima, from Central Washington to the Columbia River; Warm Springs, Central Oregon; the Umatilla, Northeastern Oregon; and the Nez Perce, Western Idaho. Contacts with tribal members are usually associated with monitoring area fisheries and with assisting Inter-Tribal police with operations and patrols.
- The Warm Springs Tribe has the responsibility to manage 24,304 acres of wildlife habitat in Wheeler County which was purchased by the Bonneville Power Administration. The management duties include setting hunting seasons and limits. Oregon State Police personnel have been partners with the Warm Springs Tribe, Oregon Department of Fish and Wildlife, and the National Park Service and local agencies to discuss issues and adopt rules to enhance the habitat and wildlife.

- Office members continue to participate in regularly established meetings with state, federal, local and tribal enforcement members. The Warm Springs Tribe has been active in the meetings, sending members from their Fish and Wildlife and Natural Resource Divisions. The Department established these meetings six years ago to promote information sharing and unifying enforcement strategies. Members of the Warm Springs Police Department and the Natural Resources Division have contacted the Patrol Office to address concerns and seek assistance. Department members have been successful in completing investigations with the assistance of the Warm Springs Police Department.
- The Inter-Tribal Police Department is located in Hood River and is primarily responsible for enforcement of tribal fisheries in Zone 6 on the Columbia River. The Arlington Patrol Office continues to work with the Inter-Tribal police in providing staff, flights, boat patrols and other enforcement and aid in strategic planning as needed.

In conclusion, the Department of Oregon State Police has embraced and remains committed to complying with the provisions of the Governor's Executive Order 96-30 and Senate Bill 770. The various Divisions and Offices of the Department will continue to advance opportunities to participate in intergovernmental agreements and interactions that foster mutual gain and cooperation.

If you have any questions regarding this report, please don't hesitate to contact me at (503)378-3720 ext. 4127.

Sincerely,

Robert W. Miller, Captain
Oregon State Police

Department Key Contacts

Department of State Police

CHAPTER: 500.11
SUBJECT: STATE-TRIBAL
GOVERNMENT
TO GOVERNMENT
RELATIONS
REVISED: September 8, 1999
SUPERSEDES: N/A

POLICY

There are nine federally recognized Indian tribal governments located in the State of Oregon. These Indian tribes have a unique legal status as sovereign governments. The importance of recognizing the relationship that exists between the tribes and State government agencies can not be underestimated. As sovereigns, the tribes and the State must work together to develop mutual respect and trust for the sovereign interests of both parties.

The purpose of this policy is to formalize the government-to-government relationship that exists between Oregon Indian tribes and the State and to establish a process which can assist in resolving potential conflicts, maximize key inter-governmental relations and enhance an exchange of ideas and resources for the greater good of all of Oregon's citizens, whether tribal members or not.

The State recognizes the sovereign status of Oregon Indian tribes and in furtherance of this, the Department of State Police establishes the following policy statement which:

1. Recognizes Oregon Indian tribal governments are interested in development of State policy that affects tribal interests and recognizes the desirability of dialogue between tribal governments, the federal government as trustee, where appropriate, and the State, with regard to those State policies;
2. Identifies key personnel of the Department as "key contacts" responsible for coordination with tribal governments;
3. Establishes a process for the identification of those Department policies by designated tribal representatives and key contacts;
4. Promotes dialogue between the Department and tribal governments on those state policies; and
5. That advances the government-to-government relationship by notifying Department members of Executive Order #96-30.

The Department of State Police will work cooperatively with other State agencies to accomplish the goals of Executive Order #96-30.

This policy is not intended to create a forum for resolution of all issues between the tribes and the Department, nor is it meant to replace presently existing lines of communications.

RELATED LAWS/REFERENCES

Office of the Governor, Executive Order #96-30
ORS 190.110

RULE

1. The key contacts of the Department are those members primarily responsible for advancing the government-to government relationships between the Department and Oregon Indian tribes and for coordination with tribal governments on agency policies.

A. The following position is designated as the primary Department representative for Oregon Indian tribes:

Primary contact: Operations Services Bureau Commander

B. The following positions are designated as Department representatives based upon local service area or specialized service responsibility:

Statewide Issues:

Fish & Wildlife/natural resources	Fish and Wildlife Division Director
Tribal Gaming	Gaming Enforcement Division Director
Department Policy & Procedures	Chair of Policy & Procedures Advisory Committee

Local Issues:

Cow Creek Band of Umpqua Tribe	Station Commander-Roseburg
Confederated Tribes of Warm Springs	Station Commander-Bend
Confederated Tribes of Umatilla	Station Commander-Pendleton
Burns Paiute Tribe	Station Commander-Ontario
Fort McDermitt Paiute Tribe	Station Commander-Ontario
Coos, Lower Umpqua & Siuslaw Tribes	Station Commander-Coos Bay
Coquille Tribe	Station Commander-Coos Bay
Confederated Tribes of Grand Ronde	Station Commander-McMinnville
Confederated Tribes of Siletz	Station Commander-Newport
Klamath Tribes	Station Commander-Klamath Falls

2. The listed Department representatives, or a designee, shall communicate with Oregon tribal governments that are located in their individual service areas for the purpose of working together to achieve mutual goals, identify policy issues and to discuss issues of mutual concern or interest.

3. In the development of issues of mutual concern, the Department representatives shall make reasonable efforts to design solutions and develop programs to achieve mutual goals in relation to Department policy.
4. Department representatives shall consider the use of cooperative agreements with Indian tribal governments as provided for in ORS 190.110 or other tools to achieve mutual cooperation when it is appropriate to do so.
5. Department representatives and designated supervisors shall attend periodic training in tribal culture, relations, and legal status designed to create an awareness of the unique nature of the tribal governments and an understanding of, and sensitivity to, Native American Issues.
6. The Operations Services Bureau Commander shall provide annually to the Superintendent a report on the Department's accomplishments and achievements derived from the advancement of Executive Order #96-30. A copy will be provided to each of the tribal public safety key contacts.
7. All members of the Department will consider impacts on Oregon tribal governments when developing policy and if appropriate shall consult with tribal representatives to discuss issues.
8. Station Commanders designated as Department representatives shall establish mutually agreeable meeting schedules with local tribal representatives.

PROCEDURE

1. The Operations Services Bureau Commander, or a designee, shall assist the Superintendent to coordinate and accomplish the requirements of this policy and the goals of Executive Order #96-30.
 - A. The Operations Services Bureau Commander will coordinate the periodic tribal cultural training for Department representatives and designated supervisors. Each Department representative shall designate those supervisors under their command that should attend this training.
 - B. The annual report to the Superintendent required by this policy shall be an Executive Summary.
2. The statewide annual meeting will serve as a means for Department representatives to further establish contacts with designated tribal government representatives, schedule additional meetings and develop appropriate protocols of communication on issues of mutual concern.

Oregon State Police Key Contacts

The key contacts of the Department of State Police are those members primarily responsible for advancing the government-to-government relationships between the Department and Oregon Indian tribes and for coordination with tribal governments on agency policies.

The primary Oregon State Police representative for Oregon Indian tribes is:

Robert W. Miller, Captain
400 Public Service Building
Salem, Oregon 97310
Phone: (503)378-3725 ext. 4127
Fax: (503)378-8282

The following members are designated as Department representatives based upon local service area or specialized service responsibility:

Statewide issues:

Fish and Wildlife/natural resources

Lieutenant Steve Lane
25195 SW Parkway Ave Suite 103
Wilsonville, Oregon 97070
Phone: (503)731-3027

Tribal Gaming

Lieutenant Tim Steiner
400 Public Service Building
Salem, Oregon 97310
Phone: (503)378-6999

Department Policy & Procedures

Lieutenant Mike Davidson
3313 NE Bret Clodfelter Way
The Dallas, Oregon 97058
Phone: (541)296-9646

Local Issues:

Cow Creek Band of Umpqua Tribe

Lieutenant Dennis Carr
Station Commander – Roseburg
761 NE Garden Valley Road
Roseburg, Oregon 97470
Phone: (541)440-3334

Confederated Tribes of Umatilla	Lieutenant Darin Helman Station Commander – Pendleton 700 SE Emigrant, Box 5 Pendleton, Oregon 97801 Phone: (541)278-4090
Burns Paiute Tribe	Lieutenant Dave Hoffman Station Commander – Ontario 325 Goodfellow St. Ontario, Oregon 97914
Fort McDermitt Paiute Tribe	Lieutenant Dave Hoffman Station Commander – Ontario
Coos, Lower Umpqua & Siuslaw Tribes	Lieutenant Dave Frye Station Commander – Coos Bay 333 S. 4 th Street Coos Bay, Oregon 97420
Coquille Tribe	Lieutenant Dave Frye Station Commander – Coos Bay
Confederated Tribes of Grand Ronde	Lieutenant Marti West Station Commander – McMinnville 1502 N. Highway 99W McMinnville, Oregon 97128
Confederated Tribes of Siletz	Lieutenant Randy Palmer Station Commander – Newport 52 NE 73 rd St. PO Box 947 Newport, Oregon 97365 Phone: (541)265-5354
Klamath Tribes	Lieutenant Dan Rutledge Station Commander – Klamath Falls 2525 Biehn St. Klamath Falls, Oregon 97601 Phone: (541)883-5713

**Agency Report: Oregon University System
2001 Government-to-Government Agency Reports (Education Cluster)**

The Oregon University System (OUS) promoted relationships with tribal communities through several initiatives during 2001. These include the following:

- During September 2001, OUS published *The OUS Native American Resource Guide (2nd edition)*, a compilation of a) campus programs and services that support Native American students; b) contact information for selected campus offices such as Admissions, Housing, Academic Advising, etc.; c) information concerning the OUS residence classification policy for members of Oregon tribes, affecting enrolled members of federally recognized tribes of Oregon and enrolled members of Native American tribes which had ceded or reserved lands within the state of Oregon; d) community college transfer procedures; 3) distance education resources; and e) information regarding state and institutional financial aid resources. Copies of the *Guide* were provided to tribal education offices and high school counselors throughout Oregon. The *Guide* is available on the Web at <www.ous.edu/aca/diversity>.
- OUS provided an opportunity for tribal representatives of the Government-to-Government Education Cluster to address the System Strategic Planning Committee of the Oregon State Board of Higher Education in June 2001. Cluster representatives engaged in an informative discussion with Board members regarding challenges and initiatives addressed by the Education Cluster.
- The OUS Chancellor's Office established an inter-institutional OUS work group and began developing policies for revisions to the Oregon American Indian/Alaska Native State Education Plan (Goal 11) and for the implementation of Senate Bill 770.
- The OUS Chancellor's Office and Portland State University (PSU) assisted with planning and sponsoring the 2001 Northwest Indian Education Summit, held at PSU during September 2001. Several OUS representatives gave presentations at the Summit regarding initiatives within their institutions that promote access and opportunity for American Indian students.
- Five OUS institutions – University of Oregon, Portland State University, Oregon State University, Western Oregon University, and Oregon Institute of Technology – were ranked among the top institutions nationwide, by Black Issues in Higher Education (Volume 18, No. 8, June 7, 2001), in awarding baccalaureate degrees to American Indian students.

Oregon

John A. Kitzhaber, M.D., Governor

Water Resources Department

Commerce Building

FAX (503) 578-8130

**Report to Governor's Office of Legal Counsel
Activities of the Water Resources Department
Under Executive Order 96-30**

December 26, 2001

1. AGENCY NAME Oregon Water Resources Department
2. KEY CONTACT Reed Marbut
158 12th Street N.E.
Salem, OR 97310
Telephone: (503) 378-8455 Ext. 292
Fax: (503) 378-2496
E-Mail: marbutar@wrdd.state.or.us
Web Site: www.wrdd.state.or.us

3. MAJOR AREAS

The Water Resources Department (Department) works with Oregon Indian tribes on issues related to watershed management and water distribution, including issues related to water rights held or claimed by tribes and/or tribal members.

a. Water Rights. Under state law, the Director of the Department is authorized to negotiate water right agreements with all federally recognized Indian tribes in Oregon. In addition, pursuant to EO 96-30, the Department is engaged in ongoing discussions with most of Oregon's tribes on issues related to water rights and administration of water resources. Some of these activities are conducted under EO 96-30 and some are conducted under specific provisions of state and federal law.

b. Watershed Management and Water Use Regulation. The Department works with Oregon's tribes to plan and implement strategies for streamflow restoration and riparian protection on both reservation lands and other geographical regions of interest to tribal communities. These strategies include streamflow measuring and monitoring, enforcement of illegal water uses and, where possible, transfer of out-of-stream rights to instream flows.

4. DEPARTMENT STATEMENT

The Department adopted its Government-to-Government *Interest Statement* on September 23, 1997. A copy of the Department's *Interest Statement* is attached. The *Interest Statement*

provides that the Department's relationship with Oregon's nine Tribes must be based on two essential attributes. First, the Department should endeavor to identify and help protect existing tribal rights to the use of water; and second, to continue to forge partnerships with tribes to share responsibility for water and watershed management.

5. SOLUTIONS AND PROGRAMS

a. Confederated Tribes of the Warm Springs Indian Reservation. ORS 539.310 authorizes the Director of the Department to negotiate water right settlements with any federally recognized Indian tribe claiming a reserved water right in Oregon. The Director began preliminary water right discussions with the Confederated Tribes of the Warm Springs Reservation and United States, as trustee for the Tribes and its members, in 1989. Formal negotiations began in 1991, and successfully concluded a water right settlement agreement on November 17, 1997. The settlement agreement defines the scope and attributes of the Warm Springs Reservation water rights.

In early 2001, the Parties to the settlement agreement realized that an element of the agreement could be subject to differing interpretation. The Parties concluded that the agreement should be amended to remove any question as to its original intent. The Parties conducted two supplemental negotiation sessions at which an amendment to the agreement was adopted to reflect the Parties' original intent. In addition, the Department and the Tribes executed a memorandum of understanding setting forth the Parties streamflow and fisheries protection interests and coordination mechanisms.

The final agreement must be submitted to the Deschutes County Circuit Court for incorporation into the Court's adjudication records. The Department completed the administrative portion of a supplemental adjudication of the Warm Springs Reservation and is preparing documents for court action. The negotiating parties hope to complete the court action in 2002.

b. Klamath Tribes. The Klamath Basin adjudication was initiated in 1975. After a number of delays during two major court cases, the claiming period for the adjudication of pre-1909 and federal reserved water rights in the Klamath Basin, including the rights of the Klamath Tribe, was completed on April 30, 1997. With support and assistance of the Klamath Tribe, the Department initiated an alternative dispute resolution (ADR) process to help resolve adjudication issues. Many adjudication claimants, including the Klamath Tribe, agree that a negotiated settlement of the adjudication issues would be preferable to protracted litigation. The ADR is an ongoing process and is being coordinated with the adjudication process and time-table. The Klamath Tribe continues to be an essential party in the ADR and to other Basin mediation and collaborative resource management processes.

c. Confederated Tribes of the Umatilla Reservation. The Umatilla River water rights were adjudicated in 1916. Representatives of the United States appeared in the Umatilla adjudication on behalf of the Confederated Tribes of the Umatilla Reservation. The issue of the scope and

finality of this adjudication has been raised by the Tribes and the United States. Resolution of the legal issues surrounding the reserved water rights of the Umatilla Reservation will be complex and time consuming. Pending resolution of the Reservation water right issues, the Department assisted the Tribes in securing a state water right permit for ground water use in the Tribes newly developed facilities.

On October 19, 2000, the Confederated Tribes of the Umatilla Indian Reservation hosted a tour of the Walla Walla River. The Department participated in the tour along with local stakeholders and representatives of both state and federal elected officials. Feasibility investigations and opportunities for supply augmentation were important topics of discussion. Other Basin meetings and discussions led to successful negotiation and enactment of two bills in the 2001 Legislative Session reflecting agreements between the Tribes and the City of Pendleton.

In late 2001, the Department and Tribes began discussions concerning resolution of the outstanding legal issues in particular and Umatilla Basin water management matters in general. A scoping meeting was held in November, and a staff technical meeting is tentatively scheduled for February 2002.

d. Coquille Indian Tribe. The Coquille Indian Tribe has acquired several parcels of land in Coos County. The Department has met several times with representatives of the Tribe to discuss the Tribe's water needs in general, and water rights associated with this land in particular. These activities will be ongoing.

e. Burns Paiute Tribe. The Department has been working with representatives of the Burns Paiute Tribe and the United States Bureau of Indian Affairs to complete processing of several water right applications filed by the Tribe. In addition, the Department's watermaster in District 10 has been in regular contact with the Tribe with respect to other water right and water use issues. Both of these activities are ongoing.

f. Confederated Tribes of Siletz Indians. The Department is working with the Siletz Tribe to develop strategies to protect the Tribe's existing water rights. These strategies include, but are not limited to, procedures for instream water right leasing and other transfer mechanisms.

g. Confederated Tribes of Grand Ronde. The Department has met with representatives of the Confederated Tribes of Grand Ronde on several occasions to discuss the Tribes' water needs and the requirements of state water law. Most importantly, the Department assisted the Tribes in a water lease program to protect a number of water rights held by the Tribes. The Department and Tribes have agreed to continue the leasing program in future years.

The Tribes have developed a proposal to convert a number of their irrigation water rights to a quasi-municipal right for use in various tribal facilities. The new quasi-municipal right will allow the Tribes to reduce its demand on the Grand Ronde community water system. The Department is working with the Tribes to develop the conversion proposal along with a streamflow mitigation plan for protection of flows in the South Yamhill River. The Department

is taking the lead in the government-to-government discussions with the State Departments of Fish and Wildlife and Environmental Quality to ensure that the water right conversion and mitigation plan provide the greatest degree of development flexibility for the Tribes while protecting streamflows in the river and its tributaries.

6. TRAINING

On January 25, 2000, the Department's Field Services Division hosted a tribal cultural training session at its bi-annual watermaster/field office conference. Representatives of the Klamath and Siletz Tribes presented a historical/cultural seminar about their respective tribes and engaged Department personnel in a discussion of the issues of common interest to the agency and the Tribes. The Department plans to continue this cultural cross-training at future field conferences. In addition, the Department's key contact person has met internally with a number of the Department's divisions to provide updates on the Government-to-Government activities. As a part of the Department's key contact activities we have included regional staff in visits to tribes and in cluster meetings.

7. COOPERATION AMONG DEPARTMENTS

During the Warm Springs negotiations, the Department worked closely with the Departments of Fish and Wildlife, Parks and Recreation, and Environmental Quality. As a part of the Klamath ADR process, the Department is working with the Departments of Fish and Wildlife, Environmental Quality, and Agriculture. Currently, the Department is working with the Department of Environmental Quality on issues related to water quality on the Warm Springs and Umatilla Reservations. Lastly, the Department continues to work with other State natural resource agencies to ensure that tribal communities have adequate safe water supplies.

The Department is the lead agency for implementation of the State's hydroelectric project reauthorization law. (ORS 543A.005 through 543-805.) Under this law, the Department administers the Hydroelectric Application Review Team (HART) for state projects. HART is made up of representatives from the Departments of Water Resources, Environmental Quality, and Fish and Wildlife. Where an Indian tribe is affected by a project or is involved as a project applicant, the HART members work with such tribe to ensure coordination, such as in the Pelton/Round Butte Project reauthorization process.

Oregon

John A. Kitzhaber, M.D., Governor

Water Resources Department

Commerce Building
158 12th Street NE
Salem, OR 97301-4172
(503) 378-3739
FAX (503) 378-8130

**Oregon Water Resources Department
Interest Statement on Government-to-Government Relations**

**Executive Order 96-30
September 23, 1997**

The mission of the Oregon Water Resources Commission is

"To serve the public by practicing and promoting wise long-term water management."

To fulfill this mission the Commission and Department intend to actively pursue efforts to:

Restore and protect streamflows and watersheds in order to ensure the long-term sustainability of Oregon's ecosystems, economy and quality of life.

and

Directly address Oregon's water supply needs.

To realize the expectations of our mission in the context of Executive Order 96-30, the Water Resources Department proposes to actively engage Oregon's nine tribal governments and their constituents in a dialogue for implementation of the Department's and Commission's goals and objective. The Department will seek to implement the expectations of Executive Order 96-30 by establishing cooperative ventures with tribes to address our mutual long-term interests.

The Department began discussions with the Confederated Tribes of the Warm Springs Reservation in the mid 1980s. In 1987 the Oregon Legislative Assembly enacted ORS 539.300-350 authorizing the Director of the Water Resources Department to negotiate with the Warm Springs Tribes and the United States to define the scope of the Tribes' reserved water rights. The parties are scheduled to sign this historic settlement agreement in mid October. In addition to the Warm Springs Reservation negotiations, the Department has begun preliminary discussions with the Confederated Tribes of the Umatilla Indian Reservation and is involved in discussions with the Klamath Tribes as a part of the Klamath Basin adjudication. Lastly, Department staff are also participating in water right discussions with the Coquille and Burns Paiute Tribes.

Water Resources Commission and Department propose to continue communication and collaborative problem solving with the nine Oregon tribes. The Water Resources Department has established the following guidelines to foster and maintain our relationship with each of the nine tribes:

1. Maintain parallel contact directories, one of agency personnel who are available to the tribe(s) for immediate contact, the other a list of tribal leaders or staff who can be contacted to initiate discussion quickly. (In WRD's case the initial contact is at our Regional office, with a Salem office follow up.)
2. Spot issues quickly, and get accurate details as soon as possible. That is, be aware of water use issues that may create conflict between state government and a tribe or the federal government as the tribe's trustee. Once the issue is identified, research the details, factual and legal, so that the issue can be scoped and accurate and appropriate contact can be initiated.
3. When an issue arises, Department staff should offer to meet fact-to-face with tribal leadership as soon as possible to ensure that clear, constructive communication is initiated promptly.
4. During initial contact on an issue, be positive and stress common interests and goals indicating that a cooperative solution is most likely possible.
5. Keep the agencies' other (non-Indian) constituents advised, and where appropriate involve the non-Indian community in discussions with the tribal leadership.
6. As issues arise and are addressed, establish a system or protocol for future issues -- building on successes.

The Agency believes that its relationship with Oregon's nine Tribes must be based on two essential attributes. First, we must honor and protect existing tribal rights to the use of water, and second, we must continue to forge partnerships with tribes to share responsibility for water management.

Governor's Message

To The Citizens Of Oregon:

Twenty years ago, Oregonians made some wise choices. We chose to invest in our state's future and we planned to manage its growth. As a result, today's economy is diversified, most of the state is thriving and Oregonians have an excellent quality of life. Today, even as we enjoy the fruits of those decisions and investments, we should continue to make the wise choices and sound investments that will provide for the years ahead.

But as Oregon entered the 1990s it chose, by default, to embark on a policy of disinvestment. The choice was largely inadvertent. It was a side-effect of enacting new, well-intentioned, but completely unfunded programs. These new programs had reasonable purposes. For example, they imprisoned felons, required that prisoners be given work to do and reduced local property taxes. But because they were unfunded, state tax money was diverted from the programs it had been paying for in order to pay for the new laws. In addition, we have kept on the books a law that prevents the state, during the best of times, from investing in the basics that make a strong economy possible.

At a time when our economy is stronger than ever before, we have had to consider closing 63 state parks for lack of funding. We have kept thousands of young Oregonians out of college by raising tuition 80 percent since 1991. We have laid off teachers, cut course offerings and increased class sizes in our primary and secondary schools, making it harder for our children to gain a strong education. We have left hundreds of our streams polluted and let our ancient salmon runs almost die away. And we are letting our highways fall behind the needs of our growing population and commerce. Incredibly but truly, we have been disinvesting during a time of prosperity.

The "two percent kicker" law is also part of the problem. It is a policy of not investing in our future when we are best able to do so. It says that if actual income taxes exceed state predictions by more than two percent, all the funds above the projection must be rebated to personal and corporate taxpayers. Yet it is when the economy is robust that taxes are most likely to exceed predictions. And it is when the economy is vigorous and growing that we are in the best position to invest. If we wait until the economy suffers a chill, it will be too late.

I propose to invest in Oregon's future and to do it now, in this time of prosperity. It is simply common sense to do so, even with the challenge of Ballot Measure 47, the property tax cut. My proposals to invest in the things that will secure and support our future are reflected in this budget.

They include:

- **Education.** Children are counting on us to provide accessible, quality education. There is no greater investment we can make than in educating our young people. I will propose investing our kicker proceeds in the entire continuum of education from pre-kindergarten through higher education and lifelong learning.
- **Transportation.** We must meet the needs of our growing population and commerce. Our quality of life and our economy will continue to depend on efficient transportation. I will propose additional revenue for the preservation and maintenance of our roads and highways and to manage growth.
- **Health Care.** Everyone, working or unemployed, prospering or destitute, must have access to basic health care. I will propose an expansion of the Oregon Health Plan funded by the voter-approved tax on tobacco.
- **Natural Resources.** Clean water is essential to the future of our salmon and wildlife, our families, agriculture and industry. Our state parks part of Oregon's heritage and identity are important to our quality of life. We must invest in both. I will propose a fund for the restoration of our watersheds and for stabilizing our park system.
- **Economic Development.** A vigorous economy provides the resources for everything else we want and need to accomplish as a state. I will propose ways to re-target our efforts to manage growth and to help small business and our lagging communities achieve and maintain the prosperity most of the state now enjoys.

Our future is built on the choices we make today. This budget reflects the choices necessary to carry our economic prosperity and our quality of life into the 21st century.

John A. Kitzhaber M.D.
Governor, State of Oregon

Investment Highlights

In the Governor's Budget

- **Investing in Education**
Redirects the revenues in the two percent kicker to:
 - Help replace an estimated \$459 million in revenues lost by schools and

- community colleges because of Ballot Measure 47.
 - Expand pre-kindergarten services.
 - Implement the Education Act for the 21st Century.
 - Continue school equalization.
 - Provide assistance to flat-funded districts
 - Freeze tuition at Oregon's four-year public colleges and universities for resident undergraduates and improve geographic access to higher education.
 - Expand engineering education in the Portland metropolitan area.
-
- **Investing in Transportation**
 - Raises new revenues to maintain and expand state, county, and local roads and highways.
 - Creates a dedicated fund to reduce urban sprawl, promote livability, and manage growth.
-
- **Investing in Human Resources**
 - Makes more low-income Oregonians eligible for the Oregon Health Plan.
 - Expands the Job Opportunity and Basic Skills (JOBS) program, which helps people move off welfare and into work.
 - Begins the process of closing Fairview Training Center.
-
- **Investing in Natural Resources**

Proposes a wholesale beverage container tax to:

 - Restore the health of watersheds and aid the recovery of coastal salmon.
 - Provide operating revenue for Oregon state parks and prevent the closure of 60 to 100 parks.
-
- **Investing in Economic Development**
 - Redirects state economic development services to rural areas and small businesses.
 - Emphasizes investments in durable, lasting infrastructure.
-
- **Investing in Public Safety**
 - Offers counties and cities grants and flexible funding to prevent juvenile crime.
 - Adds 65 new uniformed troopers to the Oregon State Police.
 - Pays for the start of construction of two new prisons required by Ballot Measure 11.
-
- **Managing Government**
 - Brings state employee pay nearer competitive levels to attract and keep good workers.

The Budget Without Investments

Budgeting means making choices. In this budget we choose to invest in education, transportation, and the

environment. We choose to invest in a future with a strong economy and a high quality of life. Choosing not to make these investments would mean a few cents less for a gallon of gas or a bottle of soda. It would mean that the two percent kicker provides slightly lower tax bills for one year. But it would also mean a choice to continue undermining those very things that make Oregon such a special place. Here are some likely impacts if we choose not to invest in Oregon's future.

Disinvesting in Education

- Without kicker revenue, local school budgets could lose millions of dollars because of Ballot Measure 47 and teacher lay-offs would likely follow.
- Class sizes would grow again, especially among the poorest counties, thereby cementing Oregon's current ranking among the top ten states for class size.
- Only wealthier local schools could afford to connect to the video and Internet resources that all the state's schools need.
- Thousands of low-income three and four-year-olds would miss the education, health, and nutrition services they need to prepare to start school.
- Thousands of teachers would not receive the training they need to lead their schools' transformation to 21st century standards for the Certificates of Initial Mastery and Advanced Mastery.
- There would be no progress on equalization of funding for lagging school districts.
- No assistance would be provided to flat-funded school districts.
- Community colleges could not expand into rural counties where students need education to prepare to enter the job market.
- State four-year colleges and universities would have to try to hire faculty with a salary package that is in the lowest third among the states.
- College tuition would likely rise again, even though it has already increased 80 percent in just six years.
- Oregon would continue to hire many high tech employees from outside the state because state colleges and universities are unable to meet the workforce needs of state industry.

Disinvesting in Transportation

Long-time Oregonians know how state and local roads and highways have become clogged with single passenger cars and other vehicles. Recent arrivals know how bad it can become; how bad it is in Los Angeles, Sacramento, and Seattle. With no additional investment in the transportation system we can expect the following:

- A continued deterioration of our roads, bridges, and highways from inadequate maintenance.
- Increased congestion, pollution, and travel times in our urban areas.
- Delayed freight movement and increased shipping costs.
- Rural communities without the transportation systems they need.

Disinvesting in Natural Resources

- Many state parks would close. Scenic trail and waterways programs would be cut or closed.
- Millions of dollars of deterioration would go unattended in the parks that do remain open.
- Further park fee increases would follow.
- There would be no new parks or expanded park capacity, despite our growing population.
- Hundreds of streams and watersheds would remain below health standards.
- Increased federal regulation would be likely for industry and agriculture to protect salmon and sea-run trout and to improve water quality.

Go to [Table of Content](#)

The Budget Environment

Decisions in recent years have put increased stress on a succession of the state budgets. In this budget, Oregon has choices it can make. We can choose to consume every dollar today's economy produces, or we can choose to invest some for our continued prosperity and high quality of life in the year's ahead.

Oregon's Economy is Thriving

- The state economy has diversified. In manufacturing, the high tech industries share has risen from 24 percent in 1985 to 32 percent today.
- Total employment has risen 14 percent since 1990, twice as fast as the national average.
- The state's average unemployment rate has fallen to five percent.
- Per capita income has risen 35 percent since 1990.
- Incomes are now 96 percent of the nation's average, compared to 92 percent in 1990. Incomes continue to rise.

A Growing State Means Growing Needs

- State population grew by 272,000 between 1990 and 1995, putting new pressure on state services.
- There has been an unprecedented growth in K-12 school enrollment.
- Growing numbers of 18- to 24-year-olds increase demands for college and entry jobs.
- Child and elderly age groups and their needs are outpacing the general population.
- Prison populations are swelling. The state system held 3,627 inmates in 1985. It now has more than 8,500 and will hold up to 17,000 inmates by 2006.
- Growing use and consumption puts Oregon's natural resources at risk.
- Some Oregonians still lag economically. Ten rural counties have unemployment rates above 7 percent.
- Oregon's tax burden has fallen from 17th in the nation in 1993, to a projected 45th in 1998.

Always a Balanced Budget

The Oregon Constitution requires the governor to present a balanced budget that relies only on existing revenues. This document goes further, identifying new revenues and making new investments in education, transportation, health care, and other vital services to protect our quality of life and support future prosperity. All spending remains within current and proposed revenues.

Balancing a budget does not mean meeting all needs. This budget does not and cannot preserve funding levels for all state or local government programs. It does cut some state programs and services. See the full text of the Governor's Budget for more detail.

State Resources

The state uses revenues from five sources to pay for services. Below is a brief description of each source and recent developments affecting each one.

The General Fund

The General Fund comes mostly from state income taxes, other state taxes, and their investment earnings. Total General Fund resources are estimated at \$9.8 billion for 1997-99. The General Fund is only 37 percent of the total state budget,

but it is the part that can be spent wherever it is needed.

General Fund Commitments

Recent years have seen increasing portions of the General Fund committed to single purposes. This trend reduces the state's ability to allocate money as needs arise.

- The "kicker law" says if biennial General Fund revenues exceed estimated revenues by two percent or more, the entire excess must be refunded, regardless of population growth or need.
- In 1990, Ballot Measure 5 diverted General Fund money to replace reduced property taxes for local schools and community colleges. During the last six years, Ballot Measure 5 has transferred to local schools \$3.27 billion formerly allocated to human resources, natural resources, and higher education programs.
- In 1994, Ballot Measure 11 increased criminal sentences, ultimately requiring more than \$1 billion from the General Fund to build prisons, requiring still more to operate them.
- This November, voters approved Ballot Measure 47, the property tax cut and cap. It will reduce revenues to schools, cities, and counties by as much as \$1 billion and put pressure on the General Fund to make up some or all of the difference.

The Oregon Lottery

Revenues produced by the state lottery fluctuate because of competition and customer demand, making it an increasingly volatile source of funds. Available receipts will fall in this biennium for two reasons. First, the previous budget carried forward a \$123 million ending balance in lottery receipts. That has now been spent. Second, this budget makes the first dedicated payment (about \$84 million) to the Oregon Education Trust Fund.

The Federal Government

Federal funds make up 19 percent of the state budget. The federal government limits the state's choices about where and how federal funds may be used. Most federal funding comes with conditions attached, such as requiring the state to maintain certain service levels or provide matching state funds.

Other Funds Revenues

Uses of these funds are typically limited to the purposes for which the funds were raised. Examples include payments for services or contracts (like a park fee or a veteran's loan payment) or charges for specific purposes (like a fishing license). Other Funds account for 48 percent of the budget.

State Spending

- The largest share of General Fund tax revenues in this budget goes to education. Local schools, once funded largely by their communities, now depend more on state revenues.
- The second largest share of General Fund revenues goes to human resources programs, mostly to meet matching fund or service-level requirements to qualify for federal funds. For example, 21 percent of the General Fund goes to human resources. Most of that \$2 billion is to meet conditions for the \$3.7 billion state human resources programs receive in federal funds.
- Public safety is now the third largest user of state tax revenues.
- The budget leaves less than two percent as a General Fund ending balance on reserve. That balance is held against the risk that actual revenues may be less than estimated.

Go to [Table of Content](#)

Education

Education in Oregon does not take place just in our primary and secondary schools. Instead, our educational system needs to function as a seamless continuum, from pre-kindergarten through graduate school, to lifelong learning. Only by investing in all phases of the educational system can we prepare our children for their careers and ensure that all Oregonians have the skills and knowledge they need to succeed in the 21st century.

This budget supports such investments. It replaces an estimated \$459 million schools and community colleges will lose because of new limits and reductions in property taxes. It also expands pre-kindergarten services, freezes undergraduate tuition at colleges and universities, improves geographic access to higher education, and provides the resources necessary to hire and keep the best college faculty.

Investing the Two Percent Kicker in Education

Investments in Pre-Kindergarten

- Expands pre-kindergarten services to 4,000 additional children by 1999.

Investments in Primary and Secondary Schools

- Replaces an estimated \$423 million in revenues lost under Ballot Measure 47.
- Continues to move toward statewide equalization.
- Provides an inflation adjustment and other assistance to flat-funded districts.
- Prepares educators for Certificates of Mastery, establishes a new financial management system, and takes other steps to implement the Education Act for the 21st Century.
- Increases access to the Internet and other new technologies.

Investments in Community Colleges

- Replaces an estimated \$36 million in revenues lost under Ballot Measure 47.
- Meets new budget demands caused by increased enrollment and inflation.
- Expands community college services into Jackson, Josephine, and Klamath counties.
- Moves state budget toward equalization statewide.

Investments in Colleges and Universities

- Freezes tuition for all 38,000 resident undergraduate students in public four-year colleges and universities.
- Creates a retention fund to help the state's most qualified faculty.

Investments in Workforce Development

- Increases the number of engineering graduates available for Oregon's growing high-technology industries.
- Creates a new workforce development partnership between Oregon colleges and universities and the food processing industry.
- Establishes Governor's Office of Education and Workforce Policy to meet the workforce training needs of Oregon's business and industry.

Go to [Table of Content](#)

Oregon Transportation Initiative

Preserving our state's quality of life, while ensuring a prosperous economy, requires a healthy, efficient network of well-planned roads, ports, transit, and rail. For the last four years, however, investment in our state's transportation system has failed to keep up with inflation and population growth. As a result, our existing roads and highways have begun to deteriorate and we are losing our ability to meet the demands new residents and our strong economy place on the transportation system.

Oregon Transportation Initiative

To meet these challenges, dozens of Oregonians spent much of this year reviewing the issues and developing possible solutions. The result of their work is the Oregon Transportation Initiative.

The Oregon Transportation Initiative (OTI) makes recommendations for how to better design, manage, and fund Oregon's transportation system. The OTI recommends:

- New revenues.
- Decentralized decision-making.
- Improved efficiency.
- Dedicated funds for both the preservation and maintenance of the existing system.
- Dedicated funds for expansion and modernization.

By implementing the recommendations of this initiative, Oregon can preserve its existing infrastructure and provide the resources necessary to manage growth and promote economic opportunity.

These proposals were formalized by the five regional committees and one statewide committee which developed the OTI. The OTI identified the need for an additional \$391 million per biennium to operate, maintain and preserve existing roads and highways and to expand capacity to accommodate growth.

While Governor Kitzhaber supports the need for additional revenue to maintain and preserve our existing system and to add capacity to accommodate growth, he believes it is equally important to recognize that simply building new roads and highways will not reduce congestion nor sustain our quality of life.

Efficiency First

Governor Kitzhaber believes that before adding new capacity to the transportation system, we must ensure that all land use and transportation management measures have been taken to maximize the efficiency of and recapture capacity on the existing system. The OTI begins to address this issue through the livability and economic opportunity criteria which must be met in order to gain access to funds for highway expansion and modernization.

To reduce congestion and maintain our quality of life into the 21st century will also require that we change how and when individual Oregonians use their transportation system. In order to provide incentives for Oregonians to use the transportation system in a more efficient way, Oregon must change the way it funds the system.

Current Transportation System Funding

Currently, gasoline and weight mile taxes are the primary sources of funds for the transportation system. The gasoline tax, however, is not a road use tax but rather a fuel use tax. People pay the same tax whether they drive at peak traffic hours or during off periods, whether they drive alone or with passengers.

In order to more closely link revenue sources to system use and demand, different methods of funding are needed. Financing the OTI should include a mileage-based user fee which would provide a foundation for future assessments based on facility costs, time of day use, and pollution. Another fee based on transportation access would fund a broader set of alternatives to automobile use.

Working To Craft the Specifics

Governor Kitzhaber is dedicated to implementing the recommendations of the OTI as well as other recommendations to deal with the immediate funding needed to stem the serious deterioration of our existing road system and to address some critical capacity expansion needs. He will work with legislators and affected parties to craft the specifics of the financing proposal.

Go to [Table of Content](#)

Human Resources

Oregonians have always extended a hand to those in need helping them get off welfare, get a job and become independent, self-sufficient members of the community. We also believe in keeping our children safe and we understand that stopping crime and insuring the success of our educational system depends on early and effective help with problems such as child abuse, drug and alcohol addiction, and mental illness. Helping our citizens move from dependence to independence makes sense. It is bipartisan. It is effective. It is the Oregon way.

Expanding the Oregon Health Plan

- Expands basic health care services to lower income Oregonians through a sliding scale subsidies based on income.
- Further reduces the cost shifts onto the business community.
- Protects health care benefits for low-income people moving off welfare and into jobs.
- Phases in full outpatient mental health services statewide.
- Adds new smoking prevention and education programs targeted especially to juveniles.

Children and Families

- Distributes state and federal funds to counties for a variety of local programs serving children and families.
- Adds new resources for child protective services.
- Boosts adoption resources to help children find permanent homes sooner.
- Increases in-home services for children with developmental disabilities.
- Consolidates the Portland and Salem offices of the Commission on Children and Families.
- Reduces children's intensive day treatment services (DARTS) by about one-third and requires schools to find alternative services.

Mental Health and Developmental Disability Services

- Replaces current fee-for-service reimbursement rates with a managed care delivery system for mental health providers.
- Develops more community-based resources for medically fragile children and offenders leaving Oregon State Hospital.
- Begins a process to close Fairview Training Center by 2000 and replace it with community-based homes and regional support services.

- Provides wage increases for community-based mental health care providers.

Welfare to Work

- Expands the JOBS programs which has successfully helped reduce welfare caseloads by 35 percent in three years.
- Continues using state and federal block grant funds to provide education, child care, and transportation services.

Vocational Rehabilitation

- Adds federal funding to determine eligibility for Social Security disability payments.
- Continues services to people who are visually impaired, including vocational rehabilitation services and job experience at the work activity center and the Industries for the Blind.

Alcohol and Drugs

- Maintains current community-based prevention, early intervention and treatment services for more than 60,000 persons.
- Uses state resources to replace lost federal funds at the Office of Alcohol and Drug Abuse Programs.

Pregnancy Prevention

- Adds federal funding for local and statewide pregnancy prevention initiative, including expansion of STARS, a school-based abstinence program.

Natural Resources

Oregon is not ours to spend. We hold it in trust for our children. Their quality of life, and ours, depends on the choices we make for our parks, scenic areas, wildlife, and watersheds. It is Oregon's remarkable natural resources that define the character of our state. We must invest in them if we hope to preserve them.

Oregon Natural Resource Investment Account

This new investment account will be financed by an excise tax on beverage containers collected at the wholesale level. The specifics of the financing proposal will be worked out in consultation with legislators and affected parties. The account will support \$60 million in state programs. Half of this revenue would go to state parks to ensure that parks slated for closure remain open, meet operating revenue deficits, and reduce some of the estimated \$100 million backlog in deferred park maintenance. The other \$30 million in revenue would pay for watershed grants and state services that improve water quality and restore salmon runs.

Below is a summary of how the Oregon Natural Resource Investment Account will help parks, the Healthy Streams Partnership, and the Coastal Salmon Restoration Initiative.

Parks

- Prevents the closure of 60 to 100 state parks.
- Rehabilitates existing facilities.

- Improves Scenic Waterways, Ocean Shores, Recreational Trails, and Historic Preservation programs.

Watershed Grants

- Watershed grants amount to two-thirds of all funds used to support the Healthy Streams Partnership and the Coastal Salmon Restoration Initiative.
- Provides \$20 million in cost-share grants to coastal landowners and organizations to restore streams and watersheds that shelter endangered salmon and trout.
- Uses the existing Governor's Watershed Enhancement Board to distribute grants.

The Healthy Streams Partnership

- Adds 19 staff positions at the Department of Agriculture and 19 staff positions at the Department of Environmental Quality to work with landowners and others in improving water quality.
- Keeps water quality management in state hands rather than in the courts.
- Restores stream health without new laws and regulations.

The Coastal Salmon Restoration Initiative

- Allows the state to monitor management of coastal salmon.
- Uses voluntary and collaborative approaches to recover coastal salmon.
- Adds new resources at state agencies in order to assist landowners and watershed councils, monitor core salmon habitat, and improve education and outreach.
- Provides technical assistance to landowners for good stewardship and monitoring.

Other Natural Resource Programs

Air and Water Quality

- Adds new resources to keep waiting times at current levels in new vehicle testing sites.
- Restores resources to keep processing times at current levels for air and water quality permits.
- Starts program to promote commuting and reduce single occupant commuting into downtown Portland.
- Establishes a fee-funded system to evaluate 94 hydroelectric license renewal requests.

Forest Stewardship

- Increases investments in Oregon's forests that benefit the Common School Fund and local government.
- Reallocates current revenues in order to improve forest fire prevention and control.

Agriculture

- Maintains basic food safety, consumer protection, and agricultural development services.
- Expands outreach in order to encourage natural resource stewardship.

Land Conservation and Development

- Expands the Transportation Growth Management program that provides grants for projects.

Go to [Table of Content](#)

Economic Development

For the last several years, most of Oregon's economy has done well. Average incomes are up. Statewide unemployment is very low. We are realizing excellent returns on our past investments of economic development dollars and have experienced a remarkable economic diversification and expansion. In the present economy we need our investment portfolio to build upon our past achievements, to ensure that all parts of Oregon share in our economic prosperity, and to acquire durable assets for the future.

New Directions in Economic Development

- Reduces total funding for the Oregon Economic Development Department by 15 percent to reflect decline in revenues from the Oregon Lottery.
- Centralizes workforce and education planning functions in the Office of Community College Services.
- Cuts funds for several major programs by about one-quarter in order to preserve or increase flexible funding for rural communities and small businesses.
- Reduces industry development services to fund higher priority ventures.

New Strategies in Economic Development

- The Department will now emphasize:
- Assisting rural and distressed urban areas.
- Investing in existing small businesses.
- Investing more than half of all funds in durable, local infrastructure.
- Capturing new jobs in areas where they are needed now.
- Investing two out of three dollars in long-term projects that will sustain us through economic downturns.
- Maintains full funding for the Arts Commission and Progress Board.
- Continues to invest about three-fourths of all funds in local ports, cities, counties, and special districts and one-fourth in private businesses.

Investments in Rural Oregon

- Maintains 20 small business centers across the state.
- Maintains Water/Wastewater Fund to help local communities with construction of water and sewer systems.
- Maintains tourism investment to preserve local room tax revenues.

Go to [Table of Content](#)

Public Safety

Oregon has recently made a number of significant choices about public safety. We are now building prisons to house, clothe, feed, treat, and employ more inmates than ever before. Public safety agencies (primarily the Department of Corrections) are now the third largest consumer of state taxes. Soon, they will be number two. It is imperative that we focus our efforts on preventing crime, not just punishing criminals.

If we do not prevent crime, we are left with no choice but to pay for it. And we do pay for it in the losses and injuries

of victims and in housing thousands upon thousands of criminals. Prisons are necessary, but they are also expensive. This budget is a choice to intervene early to put our young people on the right track. It is far cheaper to prevent a life of crime than it is to house a criminal for a lifetime.

Juvenile Crime Prevention

- Establishes prevention of juvenile crime as a priority for all state agencies with missions and programs that affect children's lives.
- Creates an inter-agency juvenile crime prevention team charged with coordinating planning and resource allocation for programs and services that serve at-risk youth.
- Defines measures of success in reducing juvenile crime for which agencies, programs, and providers will be held accountable.
- Coordinates and assists county juvenile crime prevention planning by Commissions on Children and Families, Public Safety Coordinating Councils, and other partners.
- Adds \$2 million to coordinated juvenile crime prevention grants for counties.
- Seeks coordination of juvenile case information in order to track program success.

Law Enforcement

- Doubles the amount of training for city and county police recruits.
- Adds 65 State Police sergeants and troopers.
- Adds 12 positions to increase State Police forensics lab and fingerprint identification services to city and county law enforcement and criminal justice agencies.
- Expands Indian Gaming enforcement within the Oregon State Police through charges to the tribes, vendors, and employees.

Corrections

- Expends \$168 million to expand four existing prisons, build a second 1,500-bed men's complex, and design two more prisons.
- Completes construction of five new regional custody facilities for juveniles.
- Provides \$15 million in state funds for the Inmate Work Program.
- Meets state funding commitment for funds to operate new county jail beds.
- Sets \$7.5 million aside for unexpected operational costs in county jails caused by fluctuations in numbers of inmates.

Military

- Constructs an armory in Ontario and Armed Forces Reserve centers in Marion and Clackamas counties.

Judiciary and Other

- Establishes a new Magistrate Division of the Tax Court.
- Funds new services by the Dispute Resolution Commission.
- Creates 11 new judgeships and supporting staff.

Go to [Table of Content](#)

Managing Government

Payment To SAIF Corporation

- Pays an \$80 million installment to SAIF Corporation against a legal claim, created when trust funds were expropriated by the state in the 1980s.

Central Government Efficiencies

- Provides for pay increases to make state salaries more competitive, thus allowing the state to recruit and retain good workers.
- Merges the State Employees' Benefit Board and the Bargaining Unit Benefit Board.
- Begins final implementation of the accounting functions of the statewide financial management system.
- Modernizes a central personnel database for 44,000 employees and more than 100 agencies.
- Consolidates communications and information networks and mail, print, copying, and motor pool services.

Governor's Message

To The Citizens Of Oregon:

Twenty years ago, Oregonians made some wise choices. We chose to invest in our state's future and we planned to manage its growth. As a result, today's economy is diversified, most of the state is thriving and Oregonians have an excellent quality of life. Today, even as we enjoy the fruits of those decisions and investments, we should continue to make the wise choices and sound investments that will provide for the years ahead.

But as Oregon entered the 1990s it chose, by default, to embark on a policy of disinvestment. The choice was largely inadvertent. It was a side-effect of enacting new, well-intentioned, but completely unfunded programs. These new programs had reasonable purposes. For example, they imprisoned felons, required that prisoners be given work to do and reduced local property taxes. But because they were unfunded, state tax money was diverted from the programs it had been paying for in order to pay for the new laws. In addition, we have kept on the books a law that prevents the state, during the best of times, from investing in the basics that make a strong economy possible.

At a time when our economy is stronger than ever before, we have had to consider closing 63 state parks for lack of funding. We have kept thousands of young Oregonians out of college by raising tuition 80 percent since 1991. We have laid off teachers, cut course offerings and increased class sizes in our primary and secondary schools, making it harder for our children to gain a strong education. We have left hundreds of our streams polluted and let our ancient salmon runs almost die away. And we are letting our highways fall behind the needs of our growing population and commerce. Incredibly but truly, we have been disinvesting during a time of prosperity.

The "two percent kicker" law is also part of the problem. It is a policy of not investing in our future when we are best able to do so. It says that if actual income taxes exceed state predictions by more than two percent, all the funds above the projection must be rebated to personal and corporate taxpayers. Yet it is when the economy is robust that taxes are most likely to exceed predictions. And it is when the economy is vigorous and growing that we are in the best position to invest. If we wait until the economy suffers a chill, it will be too late.

I propose to invest in Oregon's future and to do it now, in this time of prosperity. It is simply common sense to do so, even with the challenge of Ballot Measure 47, the property tax cut. My proposals to invest in the things that will secure and support our future are reflected in this budget.

They include:

- **Education.** Children are counting on us to provide accessible, quality education. There is no greater investment we can make than in educating our young people. I will propose investing our kicker proceeds in the entire continuum of education from pre-kindergarten through higher education and lifelong learning.
- **Transportation.** We must meet the needs of our growing population and commerce. Our quality of life and our economy will continue to depend on efficient transportation. I will propose additional revenue for the preservation and maintenance of our roads and highways and to manage growth.
- **Health Care.** Everyone, working or unemployed, prosperous or destitute, must have access to basic health care. I will propose an expansion of the Oregon Health Plan funded by the voter-approved tax on tobacco.
- **Natural Resources.** Clean water is essential to the future of our salmon and wildlife, our families, agriculture and industry. Our state parks part of Oregon's heritage and identity are important to our quality of life. We must invest in both. I will propose a fund for the restoration of our watersheds and for stabilizing our park system.
- **Economic Development.** A vigorous economy provides the resources for everything else we want and need to

accomplish as a state. I will propose ways to re-target our efforts to manage growth and to help small business and our lagging communities achieve and maintain the prosperity most of the state now enjoys.

Our future is built on the choices we make today. This budget reflects the choices necessary to carry our economic prosperity and our quality of life into the 21st century.

John A. Kitzhaber M.D.
Governor, State of
Oregon

Created 12/2/96

Investment Highlights

In the Governor's Budget

- **Investing in Education**

Redirects the revenues in the two percent kicker to:

- Help replace an estimated \$459 million in revenues lost by schools and community colleges because of Ballot Measure 47.
- Expand pre-kindergarten services.
- Implement the Education Act for the 21st Century.
- Continue school equalization.
- Provide assistance to flat-funded districts
- Freeze tuition at Oregon's four-year public colleges and universities for resident undergraduates and improve geographic access to higher education.
- Expand engineering education in the Portland metropolitan area.

- **Investing in Transportation**

- Raises new revenues to maintain and expand state, county, and local roads and highways.
- Creates a dedicated fund to reduce urban sprawl, promote livability, and manage growth.

- **Investing in Human Resources**

- Makes more low-income Oregonians eligible for the Oregon Health Plan.
- Expands the Job Opportunity and Basic Skills (JOBS) program, which helps people move off welfare and into work.
- Begins the process of closing Fairview Training Center.

- **Investing in Natural Resources**

Proposes a wholesale beverage container tax to:

- Restore the health of watersheds and aid the recovery of coastal salmon.
- Provide operating revenue for Oregon state parks and prevent the closure of 60 to 100 parks.

- **Investing in Economic Development**

- Redirects state economic development services to rural areas and small businesses.
- Emphasizes investments in durable, lasting infrastructure.

- **Investing in Public Safety**

- Offers counties and cities grants and flexible funding to prevent juvenile crime.

Adds 65 new uniformed troopers to the Oregon State Police.

- Pays for the start of construction of two new prisons required by Ballot Measure 11.

- **Managing Government**

- Brings state employee pay nearer competitive levels to attract and keep good workers.
-

W

The Budget Without Investments

Budgeting means making choices. In this budget we choose to invest in education, transportation, and the environment. We choose to invest in a future with a strong economy and a high quality of life. Choosing not to make these investments would mean a few cents less for a gallon of gas or a bottle of soda. It would mean that the two percent kicker provides slightly lower tax bills for one year. But it would also mean a choice to continue undermining those very things that make Oregon such a special place. Here are some likely impacts if we choose not to invest in Oregon's future.

Disinvesting in Education

- Without kicker revenue, local school budgets could lose millions of dollars because of Ballot Measure 47 and teacher lay-offs would likely follow.
- Class sizes would grow again, especially among the poorest counties, thereby cementing Oregon's current ranking among the top ten states for class size.
- Only wealthier local schools could afford to connect to the video and Internet resources that all the state's schools need.
- Thousands of low-income three and four-year-olds would miss the education, health, and nutrition services they need to prepare to start school.
- Thousands of teachers would not receive the training they need to lead their schools' transformation to 21st century standards for the Certificates of Initial Mastery and Advanced Mastery.
- There would be no progress on equalization of funding for lagging school districts.
- No assistance would be provided to flat-funded school districts.
- Community colleges could not expand into rural counties where students need education to prepare to enter the job market.
- State four-year colleges and universities would have to try to hire faculty with a salary package that is in the lowest third among the states.
- College tuition would likely rise again, even though it has already increased 80 percent in just six years.
- Oregon would continue to hire many high tech employees from outside the state because state colleges and universities are unable to meet the workforce needs of state industry.

Disinvesting in Transportation

Long-time Oregonians know how state and local roads and highways have become clogged with single passenger cars and other vehicles. Recent arrivals know how bad it can become; how bad it is in Los Angeles, Sacramento, and Seattle. With no additional investment in the transportation system we can expect the following:

- A continued deterioration of our roads, bridges, and highways from inadequate maintenance.
- Increased congestion, pollution, and travel times in our urban areas.
- Delayed freight movement and increased shipping costs.
- Rural communities without the transportation systems they need.

Disinvesting in Natural Resources

- Many state parks would close. Scenic trail and waterways programs would be cut or closed.
- Millions of dollars of deterioration would go unattended in the parks that do remain open.

- Further park fee increases would follow.
 - There would be no new parks or expanded park capacity, despite our growing population.
 - Hundreds of streams and watersheds would remain below health standards.
 - Increased federal regulation would be likely for industry and agriculture to protect salmon and sea-run trout and to improve water quality.
-

Created 12/2/96

The Budget Environment

Decisions in recent years have put increased stress on a succession of the state budgets. In this budget, Oregon has choices it can make. We can choose to consume every dollar today's economy produces, or we can choose to invest some for our continued prosperity and high quality of life in the year's ahead.

Oregon's Economy is Thriving

- The state economy has diversified. In manufacturing, the high tech industries share has risen from 24 percent in 1985 to 32 percent today.
- Total employment has risen 14 percent since 1990, twice as fast as the national average.
- The state's average unemployment rate has fallen to five percent.
- Per capita income has risen 35 percent since 1990.
- Incomes are now 96 percent of the nation's average, compared to 92 percent in 1990. Incomes continue to rise.

A Growing State Means Growing Needs

- State population grew by 272,000 between 1990 and 1995, putting new pressure on state services.
- There has been an unprecedented growth in K-12 school enrollment.
- Growing numbers of 18- to 24-year-olds increase demands for college and entry jobs.
- Child and elderly age groups and their needs are outpacing the general population.
- Prison populations are swelling. The state system held 3,627 inmates in 1985. It now has more than 8,500 and will hold up to 17,000 inmates by 2006.
- Growing use and consumption puts Oregon's natural resources at risk.
- Some Oregonians still lag economically. Ten rural counties have unemployment rates above 7 percent.
- Oregon's tax burden has fallen from 17th in the nation in 1993, to a projected 45th in 1998.

Always a Balanced Budget

The Oregon Constitution requires the governor to present a balanced budget that relies only on existing revenues. This document goes further, identifying new revenues and making new investments in education, transportation, health care, and other vital services to protect our quality of life and support future prosperity. All spending remains within current and proposed revenues.

Balancing a budget does not mean meeting all needs. This budget does not and cannot preserve funding levels for all state or local government programs. It does cut some state programs and services. See the full text of the Governor's Budget for more detail.

State Resources

The state uses revenues from five sources to pay for services. Below is a brief description of each source and recent

developments affecting each one.

The General Fund

The General Fund comes mostly from state income taxes, other state taxes, and their investment earnings. Total General Fund resources are estimated at \$9.8 billion for 1997-99. The General Fund is only 37 percent of the total state budget, but it is the part that can be spent wherever it is needed.

General Fund Commitments

Recent years have seen increasing portions of the General Fund committed to single purposes. This trend reduces the state's ability to allocate money as needs arise.

- The "kicker law" says if biennial General Fund revenues exceed estimated revenues by two percent or more, the entire excess must be refunded, regardless of population growth or need.
- In 1990, Ballot Measure 5 diverted General Fund money to replace reduced property taxes for local schools and community colleges. During the last six years, Ballot Measure 5 has transferred to local schools \$3.27 billion formerly allocated to human resources, natural resources, and higher education programs.
- In 1994, Ballot Measure 11 increased criminal sentences, ultimately requiring more than \$1 billion from the General Fund to build prisons, requiring still more to operate them.
- This November, voters approved Ballot Measure 47, the property tax cut and cap. It will reduce revenues to schools, cities, and counties by as much as \$1 billion and put pressure on the General Fund to make up some or all of the difference.

Pie Graph

The Oregon Lottery

Revenues produced by the state lottery fluctuate because of competition and customer demand, making it an increasingly volatile source of funds. Available receipts will fall in this biennium for two reasons. First, the previous budget carried forward a \$123 million ending balance in lottery receipts. That has now been spent. Second, this budget makes the first dedicated payment (about \$84 million) to the Oregon Education Trust Fund.

The Federal Government

Federal funds make up 19 percent of the state budget. The federal government limits the state's choices about where and how federal funds may be used. Most federal funding comes with conditions attached, such as requiring the state to maintain certain service levels or provide matching state funds.

Other Funds Revenues

Uses of these funds are typically limited to the purposes for which the funds were raised. Examples include payments for services or contracts (like a park fee or a veteran's loan payment) or charges for specific purposes (like a fishing license). Other Funds account for 48 percent of the budget.

GENERAL FUND \$9.43 BILLION INCLUDING KICKER

State Spending

- The largest share of General Fund tax revenues in this budget goes to education. Local schools, once funded largely by their communities, now depend more on state revenues.
- The second largest share of General Fund revenues goes to human resources programs, mostly to meet matching fund or service-level requirements to qualify for federal funds. For example, 21 percent of the General Fund goes to human resources. Most of that \$2 billion is to meet conditions for the \$3.7 billion state human resources programs receive in federal funds.
- Public safety is now the third largest user of state tax revenues.
- The budget leaves less than two percent as a General Fund ending balance on reserve. That balance is held against the risk that actual revenues may be less than estimated.

Created 12/2/96

Oregon State Archives 1-13-03 copy of website. This is *not* current information and hyperlinks may not work properly.

Education

Education in Oregon does not take place just in our primary and secondary schools. Instead, our educational system needs to function as a seamless continuum, from pre-kindergarten through graduate school, to lifelong learning. Only by investing in all phases of the educational system can we prepare our children for their careers and ensure that all Oregonians have the skills and knowledge they need to succeed in the 21st century.

This budget supports such investments. It replaces an estimated \$459 million schools and community colleges will lose because of new limits and reductions in property taxes. It also expands pre-kindergarten services, freezes undergraduate tuition at colleges and universities, improves geographic access to higher education, and provides the resources necessary to hire and keep the best college faculty.

Investing the Two Percent Kicker in Education

Investments in Pre-Kindergarten

- Expands pre-kindergarten services to 4,000 additional children by 1999.

Investments in Primary and Secondary Schools

- Replaces an estimated \$423 million in revenues lost under Ballot Measure 47.
- Continues to move toward statewide equalization.
- Provides an inflation adjustment and other assistance to flat-funded districts.
- Prepares educators for Certificates of Mastery, establishes a new financial management system, and takes other steps to implement the Education Act for the 21st Century.
- Increases access to the Internet and other new technologies.

FUNDING LOCAL SCHOOLS
Ballot Measures 5 and 47 have shifted the responsibility for funding schools from the local district to the state.

Investments in Community Colleges

- Replaces an estimated \$36 million in revenues lost under Ballot Measure 47.
- Meets new budget demands caused by increased enrollment and inflation.
- Expands community college services into Jackson, Josephine, and Klamath counties.
- Moves state budget toward equalization statewide.

PUBLIC TUITION IN OREGON

Resident tuition for Oregon's four-year colleges and universities has risen dramatically since the passage of Ballot Measure 5 in 1990.

Investments in Colleges and Universities

- Freezes tuition for all 38,000 resident undergraduate students in public four-year colleges and universities.
- Creates a retention fund to help the state's most qualified faculty.

Investments in Workforce Development

- Increases the number of engineering graduates available for Oregon's growing high-technology industries.
- Creates a new workforce development partnership between Oregon colleges and universities and the food processing industry.
- Establishes Governor's Office of Education and Workforce Policy to meet the workforce training needs of Oregon's business and industry.

Oregon Transportation Initiative

Preserving our state's quality of life, while ensuring a prosperous economy, requires a healthy, efficient network of well-planned roads, ports, transit, and rail. For the last four years, however, investment in our state's transportation system has failed to keep up with inflation and population growth. As a result, our existing roads and highways have begun to deteriorate and we are losing our ability to meet the demands new residents and our strong economy place on the transportation system.

Oregon Transportation Initiative

To meet these challenges, dozens of Oregonians spent much of this year reviewing the issues and developing possible solutions. The result of their work is the Oregon Transportation Initiative.

The Oregon Transportation Initiative (OTI) makes recommendations for how to better design, manage, and fund Oregon's transportation system. The OTI recommends:

- New revenues.
- Decentralized decision-making.
- Improved efficiency.
- Dedicated funds for both the preservation and maintenance of the existing system.
- Dedicated funds for expansion and modernization.

By implementing the recommendations of this initiative, Oregon can preserve its existing infrastructure and provide the resources necessary to manage growth and promote economic opportunity.

These proposals were formalized by the five regional committees and one statewide committee which developed the OTI. The OTI identified the need for an additional \$391 million per biennium to operate, maintain and preserve existing roads and highways and to expand capacity to accommodate growth.

While Governor Kitzhaber supports the need for additional revenue to maintain and preserve our existing system and to add capacity to accommodate growth, he believes it is equally important to recognize that simply building new roads and highways will not reduce congestion nor sustain our quality of life.

Efficiency First

Governor Kitzhaber believes that before adding new capacity to the transportation system, we must ensure that all land use and transportation management measures have been taken to maximize the efficiency of and recapture capacity on the existing system. The OTI begins to address this issue through the livability and economic opportunity criteria which must be met in order to gain access to funds for highway expansion and modernization.

To reduce congestion and maintain our quality of life into the 21st century will also require that we change how and when individual Oregonians use their transportation system. In order to provide incentives for Oregonians to use the transportation system in a more efficient way, Oregon must change the way it funds the system.

Current Transportation System Funding

HIGHWAY NEEDS VS REVENUES

Currently, gasoline and weight mile taxes are the primary sources of funds for the transportation system. The gasoline tax, however, is not a road use tax but rather a fuel use tax. People pay the same tax whether they drive at peak traffic hours or during off periods, whether they drive alone or with passengers.

In order to more closely link revenue sources to system use and demand, different methods of funding are needed. Financing the OTI should include a mileage-based user fee which would provide a foundation for future assessments based on facility costs, time of day use, and pollution. Another fee based on transportation access would fund a broader set of alternatives to automobile use.

Working To Craft the Specifics

Governor Kitzhaber is dedicated to implementing the recommendations of the OTI as well as other recommendations to deal with the immediate funding needed to stem the serious deterioration of our existing road system and to address some critical capacity expansion needs. He will work with legislators and affected parties to craft the specifics of the financing proposal.

Human Resources

Oregonians have always extended a hand to those in need helping them get off welfare, get a job and become independent, self-sufficient members of the community. We also believe in keeping our children safe and we understand that stopping crime and insuring the success of our educational system depends on early and effective help with problems such as child abuse, drug and alcohol addiction, and mental illness. Helping our citizens move from dependence to independence makes sense. It is bipartisan. It is effective. It is the Oregon way.

Expanding the Oregon Health Plan

- Expands basic health care services to lower income Oregonians through a sliding scale subsidies based on income.
- Further reduces the cost shifts onto the business community.
- Protects health care benefits for low-income people moving off welfare and into jobs.
- Phases in full outpatient mental health services statewide.
- Adds new smoking prevention and education programs targeted especially to juveniles.

Children and Families

- Distributes state and federal funds to counties for a variety of local programs serving children and families.
- Adds new resources for child protective services.
- Boosts adoption resources to help children find permanent homes sooner.
- Increases in-home services for children with developmental disabilities.
- Consolidates the Portland and Salem offices of the Commission on Children and Families.
- Reduces children's intensive day treatment services (DARTS) by about one-third and requires schools to find alternative services.

Mental Health and Developmental Disability Services

- Replaces current fee-for-service reimbursement rates with a managed care delivery system for mental health providers.
- Develops more community-based resources for medically fragile children and offenders leaving Oregon State Hospital.
- Begins a process to close Fairview Training Center by 2000 and replace it with community-based homes and regional support services.
- Provides wage increases for community-based mental health care providers.

Welfare to Work

- Expands the JOBS programs which has successfully helped reduce welfare caseloads by 35 percent in three years.
- Continues using state and federal block grant funds to provide

education, child care, and transportation services.

Vocational Rehabilitation

- Adds federal funding to determine eligibility for Social Security disability payments.
- Continues services to people who are visually impaired, including vocational rehabilitation services and job experience at the work activity center and the Industries for the Blind.

Alcohol and Drugs

- Maintains current community-based prevention, early intervention and treatment services for more than 60,000 persons.
- Uses state resources to replace lost federal funds at the Office of Alcohol and Drug Abuse Programs.

Pregnancy Prevention

- Adds federal funding for local and statewide pregnancy prevention initiative, including expansion of STARS, a school-based abstinence program.

Natural Resources

Oregon is not ours to spend. We hold it in trust for our children. Their quality of life, and ours, depends on the choices we make for our parks, scenic areas, wildlife, and watersheds. It is Oregon's remarkable natural resources that define the character of our state. We must invest in them if we hope to preserve them.

Oregon Natural Resource Investment Account

This new investment account will be financed by an excise tax on beverage containers collected at the wholesale level. The specifics of the financing proposal will be worked out in consultation with legislators and affected parties. The account will support \$60 million in state programs. Half of this revenue would go to state parks to ensure that parks slated for closure remain open, meet operating revenue deficits, and reduce some of the estimated \$100 million backlog in deferred park maintenance. The other \$30 million in revenue would pay for watershed grants and state services that improve water quality and restore salmon runs.

Below is a summary of how the Oregon Natural Resource Investment Account will help parks, the Healthy Streams Partnership, and the Coastal Salmon Restoration Initiative.

Parks

- Prevents the closure of 60 to 100 state parks.
- Rehabilitates existing facilities.
- Improves Scenic Waterways, Ocean Shores, Recreational Trails, and Historic Preservation programs.

Watershed Grants

- Watershed grants amount to two-thirds of all funds used to support the Healthy Streams Partnership and the Coastal Salmon Restoration Initiative.
- Provides \$20 million in cost-share grants to coastal landowners and organizations to restore streams and watersheds that shelter endangered salmon and trout.
- Uses the existing Governor's Watershed Enhancement Board to distribute grants.

The Healthy Streams Partnership

- Adds 19 staff positions at the Department of Agriculture and 19 staff positions at the Department of Environmental Quality to work with landowners and others in improving water quality.
- Keeps water quality management in state hands rather than in the courts.
- Restores stream health without new laws and regulations.

The Coastal Salmon Restoration Initiative

- Allows the state to monitor management of coastal salmon.
- Uses voluntary and collaborative approaches to recover coastal salmon.
- Adds new resources at state agencies in order to assist landowners and watershed councils, monitor core salmon habitat, and improve education and outreach.
- Provides technical assistance to landowners for good stewardship and monitoring.

Other Natural Resource Programs

Air and Water Quality

- Adds new resources to keep waiting times at current levels in new vehicle testing sites.
- Restores resources to keep processing times at current levels for air and water quality permits.
- Starts program to promote commuting and reduce single occupant commuting into downtown Portland.
- Establishes a fee-funded system to evaluate 94 hydroelectric license renewal requests.

Forest Stewardship

- Increases investments in Oregon's forests that benefit the Common School Fund and local government.
- Reallocates current revenues in order to improve forest fire prevention and control.

Agriculture

- Maintains basic food safety, consumer protection, and agricultural development services.
- Expands outreach in order to encourage natural resource stewardship.

Land Conservation and Development

- Expands the Transportation Growth Management program that provides grants for projects.

Economic Development

For the last several years, most of Oregon's economy has done well. Average incomes are up. Statewide unemployment is very low. We are realizing excellent returns on our past investments of economic development dollars and have experienced a remarkable economic diversification and expansion. In the present economy we need our investment portfolio to build upon our past achievements, to ensure that all parts of Oregon share in our economic prosperity, and to acquire durable assets for the future.

New Directions in Economic Development

- Reduces total funding for the Oregon Economic Development Department by 15 percent to reflect decline in revenues from the Oregon Lottery.
- Centralizes workforce and education planning functions in the Office of Community College Services.
- Cuts funds for several major programs by about one-quarter in order to preserve or increase flexible funding for rural communities and small businesses.
- Reduces industry development services to fund higher priority ventures.

New Strategies in Economic Development

- The Department will now emphasize:
 - Assisting rural and distressed urban areas.
 - Investing in existing small businesses.
 - Investing more than half of all funds in durable, local infrastructure.
 - Capturing new jobs in areas where they are needed now.
 - Investing two out of three dollars in long-term projects that will sustain us through economic downturns.
- Maintains full funding for the Arts Commission and Progress Board.
- Continues to invest about three-fourths of all funds in local ports, cities, counties, and special districts and one-fourth in private businesses.

Investments in Rural Oregon

- Maintains 20 small business centers across the state.
- Maintains Water/Wastewater Fund to help local communities with construction of water and sewer systems.
- Maintains tourism investment to preserve local room tax revenues.

Public Safety

Oregon has recently made a number of significant choices about public safety. We are now building prisons to house, clothe, feed, treat, and employ more inmates than ever before. Public safety agencies (primarily the Department of Corrections) are now the third largest consumer of state taxes. Soon, they will be number two. It is imperative that we focus our efforts on preventing crime, not just punishing criminals.

If we do not prevent crime, we are left with no choice but to pay for it. And we do pay for it in the losses and injuries of victims and in housing thousands upon thousands of criminals. Prisons are necessary, but they are also expensive. This budget is a choice to intervene early to put our young people on the right track. It is far cheaper to prevent a life of crime than it is to house a criminal for a lifetime.

Juvenile Crime Prevention

- Establishes prevention of juvenile crime as a priority for all state agencies with missions and programs that affect children's lives.
- Creates an inter-agency juvenile crime prevention team charged with coordinating planning and resource allocation for programs and services that serve at-risk youth.
- Defines measures of success in reducing juvenile crime for which agencies, programs, and providers will be held accountable.
- Coordinates and assists county juvenile crime prevention planning by Commissions on Children and Families, Public Safety Coordinating Councils, and other partners.
- Adds \$2 million to coordinated juvenile crime prevention grants for counties.
- Seeks coordination of juvenile case information in order to track program success.

JUVENILE ARRESTS CLIMB

Our future depends on keeping our young people from getting involved in crime.

Law Enforcement

- Doubles the amount of training for city and county police recruits.
- Adds 65 State Police sergeants and troopers.
- Adds 12 positions to increase State Police forensics lab and fingerprint identification services to city and county law enforcement and criminal justice agencies.
- Expands Indian Gaming enforcement within the Oregon State Police through charges to the tribes, vendors, and employees.

Corrections

- Expends \$168 million to expand four existing prisons, build a second 1,500-bed men's complex, and design two more prisons.
- Completes construction of five new regional custody facilities for juveniles.
- Provides \$15 million in state funds for the Inmate Work Program.
- Meets state funding commitment for funds to operate new county jail

beds.

- Sets \$7.5 million aside for unexpected operational costs in county jails caused by fluctuations in numbers of inmates.

Military

- Constructs an armory in Ontario and Armed Forces Reserve centers in Marion and Clackamas counties.

Judiciary and Other

- Establishes a new Magistrate Division of the Tax Court.
- Funds new services by the Dispute Resolution Commission.
- Creates 11 new judgeships and supporting staff.

Managing Government

Payment To SAIF Corporation

- Pays an \$80 million installment to SAIF Corporation against a legal claim, created when trust funds were expropriated by the state in the 1980s.

Central Government Efficiencies

- Provides for pay increases to make state salaries more competitive, thus allowing the state to recruit and retain good workers.
 - Merges the State Employees' Benefit Board and the Bargaining Unit Benefit Board.
 - Begins final implementation of the accounting functions of the statewide financial management system.
 - Modernizes a central personnel database for 44,000 employees and more than 100 agencies.
 - Consolidates communications and information networks and mail, print, copying, and motor pool services.
-
