Subject: SB 1538 - Work Session Recommendations

SB 1538 relates to information security for the State of Oregon. The bill requires state agencies to notify the Legislative Fiscal Office promptly concerning information security incidents and provide the Legislative Fiscal Office with copies of and report results of information security assessments. This bill also requires heads of certain state agencies to provide annual report concerning information security to Joint Legislative Committee on Information Management and Technology.

Materials related to SB 1538 are posted on OLIS.

The -1 Amendment modifies definitions of key terms and clarifies the conditions under which state agencies must provide information security assessment and incident notifications to the Legislative Fiscal Office. The amendment removes the requirement that state agencies provide the Legislative Fiscal Office with copies of and report results of information security assessments. Information security assessment and incident notifications, and associated information may instead be shared via a method and at a level of detail to which the state agency and the Legislative Fiscal Office agree. In addition, the amendment removes a provision that would allow the Joint Legislative Committee on Information Management and Technology to hold executive sessions regarding information security matters under ORS 192.660 as the Oregon Constitution requires all deliberations of the Legislature and its committees to be open. Finally, the amendment clarifies that annual report information may not include information security information or other materials that are exempt from disclosure under ORS 192.410 to 192.505.

Amendment
