STANDARDS FOR REGISTRY ENROLLMENT, QUALIFICATION AND CERTIFICATION OF HEALTH CARE INTERPRETERS

333-002-0000
Purpose

(1) These rules establish the Health Care Interpreter (HCI) program, a central registry, and a process for certification and qualification of health care interpreters for persons with limited English proficiency.

(2) These rules help the Oregon Health Authority comply with Title VI of the Civil Rights Act of 1964 which mandates that no person in the United States shall, on grounds of race, color or national origin, be excluded from participation in, denied the benefits of, or subjected to discrimination under any program or activity receiving federal financial assistance.

(3) Any individual providing health care interpreting services, either on-site or remotely may elect to participate in the Health Care Interpreter program.

Stat. Auth.: ORS 413.558
Stats. Implemented: ORS 413.556 & 419.558
Hist.: PH 18-2006, f. & cert. ef. 8-2-06; PH 2-2011, f. & cert. ef. 3-1-11; PH 18-2016, f. 6-9-16, cert. ef. 7-1-16

333-002-0010
Definitions

As used in chapter 333, division 2 the following definitions apply:

(1) "Applicant" means any individual who applies for qualification or certification as a health care interpreter under OAR 333-002-0050.

(2) "Authority" means the Oregon Health Authority.

(3) "Central registry" means the record maintained by the Authority of enrolled individuals recognized as approved certified or qualified health care interpreters.

(4) "Certified health care interpreter" means an individual who has been issued a valid letter of certification by the Authority under these rules to perform health care interpreting services.

(5)"Formal training" means instruction obtained in an academic setting, seminars, in-service instruction, or by other means of substantive distance learning.

(6)"Health care interpreting services" means the provision of services to limited English proficient individuals through the process of fully understanding and analyzing a spoken or signed message, then faithfully rendering the message into another spoken or signed language in order to ensure access to any medical, surgical or hospital intervention including physical, oral or behavioral health treatment.

(7) "Interpreting knowledge" means an entry-level range of interpreting knowledge and skills that includes but is not limited to: language fluency, ethics, cultural competency, terminology, integrated interpreting skills and translation of simple instructions.

(8)"Interpreting skills and ability" means the demonstrated capacity to perform interpreting modes and apply medical interpreting ethics, cultural competency, terminology, integrated interpreting skills, and translation of simple instructions.

(9)"Limited English proficient" means the legal concept referring to a level of English proficiency that is insufficient to ensure equal access to public services without an interpreter.

(10) "Person with limited English proficiency" means a person who, by reason of place of birth or culture, speaks a language other than English and does not speak English with adequate ability to communicate effectively with a health care provider.

(11) "Qualified health care interpreter" means an individual who has been issued a valid letter of qualification by the Authority under these rules.

(12)"Translation" means the conversion of written text into a corresponding written text in a different language.

(13)"Written verification" means providing proof in a way that establishes the authenticity of submitted documents in a reasonably reliable manner and may include official transcripts, a certificate of completion, or an endorsement from an agency or institution whose training curriculum is approved by the Authority.

Stat. Auth.: ORS 413.558
Stats. Implemented: ORS 413.556 & 413.558
Hist.: PH 18-2006, f. & cert. ef. 8-2-06; PH 26-2006, f. & cert. ef. 11-16-06; PH 2-2011, f. & cert. ef. 3-1-11; PH 18-2016, f. 6-9-16, cert. ef. 7-1-16

333-002-0020
Health Care Interpreter Services

Any individual providing health care interpreting services as defined in this division may voluntarily meet the eligibility standards established in OAR 333-002-0040 and be:

(1) Added to the central registry; and

(2) Issued a valid letter of certification or qualification by the Authority.

Stat. Auth.: ORS 413.558
Stats. Implemented: ORS 413.556 & 413.558
Hist.: PH 18-2006, f. & cert. ef. 8-2-06; PH 2-2011, f. & cert. ef. 3-1-11; PH 18-2016, f. 6-9-16, cert. ef. 7-1-16

333-002-0030
Central Registry

(1) The Authority shall maintain a central registry of individuals who are certified or qualified to provide health care interpreting services as provided in OAR 333-002-0020.

(2) The Oregon Health Authority shall maintain a list of languages for which health care interpreter certification or qualification is available.

(3) The Authority shall maintain and publish a list of Authority approved training centers where applicants may receive the education required for certification or qualification.

(4) Certified or qualified health care interpreters may withdraw from the registry by providing written notification to the Authority.

Stat. Auth.: ORS 413.558
Stats. Implemented: ORS 413.556 & 413.558
Hist.: PH 18-2006, f. & cert. ef. 8-2-06; PH 2-2011, f. & cert. ef. 3-1-11; PH 18-2016, f. 6-9-16, cert. ef. 7-1-16

333-002-0035
Fees

Applicants for enrollment or renewal shall submit a processing fee in the amount of $25 with the required application or renewal materials.

Stat. Auth.: ORS 413.558
Stats. Implemented: ORS 413.556 & 413.558
Hist.: PH 18-2006, f. & cert. ef. 8-2-06; PH 26-2006, f. & cert. ef. 11-16-06; PH 2-2011, f. & cert. ef. 3-1-11; PH 18-2016, f. 6-9-16, cert. ef. 7-1-16

333-002-0040
Eligibility Standards for Registry Enrollment, Qualification and Certification

(1) Individuals enrolled in the Health Care Interpreter (HCI) registry shall:

(a) Be at least 18 years of age.

(b) Have a high school diploma or a GED from an accredited school in the United States of America or an equivalent education from another country.

(A) Individuals from other countries may apply to the Authority for an exception to this requirement when documentation to prove education is not available.

(B) Exceptions are at the sole discretion of the Authority.

(c) Not be on the Medicaid Exclusion list.

(d) Pass a background check in accordance with ORS 181A.200, OAR chapter 125-divison 7 and OAR chapter 943 Division 007.

(e) Abide by the National Code of Ethics and National Standards of Practice for Interpreters in Health Care.

(f) Abide by the Registry of Interpreters for the Deaf Code of Professional Conduct, if applicable.

(g) Submit the required forms and documentation to become a certified or qualified health care interpreter as defined by these rules.

(2) Applicants seeking to become a qualified health care interpreter for a spoken language or languages shall:

(a) Comply with the requirements set out in section (1) of this rule;

(b) Provide written verification of at least 60 hours of formal training as defined in OAR 333-002-0060, unless they meet the requirements outlined in section 3 of this rule; and

(c) Demonstrate health care interpreting knowledge by passing a skill evaluation offered by an Authority approved language proficiency testing center on the Authority maintained list provided for in OAR 333-002-0070, or meet equivalent language proficiency requirements set by the Authority.

(3) Educators and trainers of health care interpreters who have worked in the field for two consecutive years at any time from January 2, 2010 to the present may receive credit for 40 hours of the 60 hour requirement by providing valid documentation from an established registry or institution for time spent training health care interpreters.

(4) Applicants seeking to become a qualified healthcare interpreter for American Sign Language shall:

(a) Comply with the requirements set out in section (1) of this rule;

(b) Provide written verification of certification in American Sign Language interpreting from the Registry of Interpreters for the Deaf;

(5) Applicants seeking to become a certified healthcare interpreter in a spoken language or languages shall:

(a) Comply with the requirements set out in section (1) and (2) of this rule; and

(b) Pass an approved certification test at a medical interpreter certification testing center on the Authority maintained list provided for in OAR 333-002-0070.

(6) Applicants seeking to become a certified healthcare interpreter in American Sign Language shall:

(a) Comply with the requirements set out in section (1) and (4) of this rule;

(b) Provide written verification of at least 60 hours of formal training from an Authority approved training center as defined in OAR 333-002-0060.

(7) The Authority may accept formal training from entities outside of Oregon that demonstrate their criteria are equal to or exceed Oregon's criteria as established by these rules.

Stat. Auth.: ORS 413.558
Stats. Implemented: ORS 413.556 & 413.558
Hist.: PH 18-2006, f. & cert. ef. 8-2-06; PH 26-2006, f. & cert. ef. 11-16-06; PH 15, 2010(Temp), f. 7-13-10, cert. ef. 7-15-10 thru 1-10-11; Administrative correction 1-25-11; PH 2-2011, f. & cert. ef. 3-1-11; PH 18-2016, f. 6-9-16, cert. ef. 7-1-16

333-002-0050
Application Procedure

(1) Upon request, the Authority shall provide an application packet or a link to the Health Care Interpreter (HCI) application to any individual seeking certification or qualification as an HCI.

(2) Applicants shall submit required forms and supplemental materials, including proof of formal training, and any required fees to the Authority.

(3) To meet testing requirements, applicants shall authorize an Authority approved testing center to provide the Authority with a copy of their test results.

(a) Requests for language proficiency testing or certification testing shall be made directly to the approved testing center.

(b) Required testing fees shall be paid directly to the approved testing center.

(c) Test results shall become part of the applicant's permanent record.

(4) Supplemental materials in languages other than English shall be accompanied by:

(a) An accurate translation of those documents into English; and

(b) A translator's certificate, from a translator other than the applicant and not related to the applicant by blood or marriage, stating that the documents provided are a true and accurate translation.

(c) The applicant shall pay for any translation costs for documents required by the Authority.

(5) If the Authority determines that the application is not complete or that the required documentation is not acceptable, the Authority shall notify the applicant within 30 days of receipt.

(6) Applicants may withdraw from the process at any time by providing written notification to the Authority.

Stat. Auth.: ORS 413.558

Stats. Implemented: ORS 413.556 & 413.558
Hist.: PH 18-2006, f. & cert. ef. 8-2-06; PH 26-2006, f. & cert. ef. 11-16-06; PH 2-2011, f. & cert. ef. 3-1-11; PH 18-2016, f. 6-9-16, cert. ef. 7-1-16

333-002-0060
Formal Training and Work Experience Requirements

(1) Applicants seeking Health Care Interpreter (HCI) certification or qualification shall provide written verification of the successful completion of at least 60 hours of Authority approved formal training, including a minimum of:

(a) Fifty-two hours of integrated medical terminology, anatomy and physiology, introductory health care interpreting concepts and modes; and

(b) Eight hours of Health Care Interpreting Ethics.

(2) HCI applicants shall provide written verification of work experience as an interpreter:

(a) 15 hours for qualification; or

(b) 30 hours for certification.

Stat. Auth.: ORS 413.558
Stats. Implemented: ORS 413.556 & 413.558
Hist.: PH 18-2006, f. & cert. ef. 8-2-06; PH 15, 2010(Temp), f. 7-13-10, cert. ef. 7-15-10 thru 1-10-11; Administrative correction 1-25-11; PH 2-2011, f. & cert. ef. 3-1-11; PH 18-2016, f. 6-9-16, cert. ef. 7-1-16

333-002-0070
Approval of Testing Centers, Skill Evaluation and Assessment

(1) The Authority shall enter into a memorandum of agreement with medical interpreter certification testing centers and language proficiency testing centers establishing the manner and means for testing Oregon applicants for health care interpreter certification and qualification, and including a process for sharing testing information with the Authority and the applicant.

(2) Authority approved medical interpreter testing centers shall test interpreting skills and ability.

(3) The Authority shall maintain and make readily available to the public a list of approved medical interpreter certification testing centers and language proficiency testing centers.

(4) The Authority may proctor testing and determine testing locations if the approved testing centers do not have their own testing centers and the ability to verify the applicant's identity before testing.

(5) Government issued photo identification showing the name and address of the applicant such as a valid driver's license, state identification card, military identification, current passport, or immigration or naturalization documents shall be presented before an individual enters an evaluation or assessment.

(6) An applicant whose conduct interferes with or disrupts the testing process may be dismissed and disqualified from future evaluations and assessments. Such conduct includes but is not limited to the following behaviors:

(a) Giving or receiving evaluation or assessment data, either directly or indirectly, during the testing process.

(b) Failing to follow written or oral instructions related to conducting the evaluation or assessment, including termination times and procedures.

(c) Introducing unauthorized materials during any portion of the evaluation or assessment.

(d) Attempting to remove evaluation or assessment materials or notations from the testing site.

(e) Falsifying or misrepresenting educational credentials or other information required for admission to the evaluation or assessment.

(7) Applicants needing accommodation because of a disability may apply to the testing center for accommodations to complete an evaluation or assessment.

(8) Test questions, scoring keys, and other data used to administer evaluations and assessments are exempt from disclosure under ORS 192.410 through 192.505.

(9) The Authority may release statistical information regarding evaluation or assessment pass or fail rates by group, evaluation or assessment type, and subject area to any interested party.

Stat. Auth.: ORS 413.558
Stats. Implemented: ORS 413.556 & 413.558
Hist.: PH 18-2006, f. & cert. ef. 8-2-06; PH 26-2006, f. & cert. ef. 11-16-06; PH 2-2011, f. & cert. ef. 3-1-11; PH 18-2016, f. 6-9-16, cert. ef. 7-1-16

333-002-0080
Skill Evaluation or Assessment Appeal

(1) Applicants who fail to pass a test at an Authority approved testing center may appeal the results with the testing center directly and pay any fees associated with the appeal.

(2) The testing center's determination is final.

(3) Applicants have no appeal rights with the Authority.

Stat. Auth.: ORS 413.558
Stats. Implemented: ORS 413.556 & 413.558
Hist.: PH 18-2006, f. & cert. ef. 8-2-06; PH 26-2006, f. & cert. ef. 11-16-06; PH 2-2011, f. & cert. ef. 3-1-11; PH 18-2016, f. 6-9-16, cert. ef. 7-1-16

333-002-0120
Continuing Education

(1) To qualify for registry renewal, certified and qualified health care interpreters shall sign and submit to the Authority the designated forms and verification showing the individual has completed the required continuing education.

(2) To maintain eligibility for registry renewal, certified and qualified health care interpreters shall complete 24 hours of Authority approved continuing education during the 36 month registry period, including:

(a) Six hours of continuing education on health care interpreter ethics.

(b) Six hours of continuing education on interpretation skills.

(c) An additional 12 hours that cover any topics accepted for continuing education by interpreter certification testing centers on the Authority maintained list provided for in OAR 333-002-0070.

(3) Continuing education records shall be maintained by registered health care interpreters for a minimum of three years.

(4) Continuing education hours taken in excess of the required number in a renewal period may not be carried over to the next renewal period.

Stat. Auth.: ORS 413.558
Stats. Implemented: ORS 413.556 & 413.558
Hist.: PH 18-2006, f. & cert. ef. 8-2-06; PH 26-2006, f. & cert. ef. 11-16-06; PH 2-2011, f. & cert. ef. 3-1-11; PH 18-2016, f. 6-9-16, cert. ef. 7-1-16

333-002-0140
Letter of Qualification

(1) If the Authority determines that the qualification requirements in OAR 333-002-0040, 333-002-0050, and 333-002-0060 and any applicable renewal requirements have been met, a letter of qualification shall be issued.

(2) Letters of qualification are valid for 36 months from the date of issue and are not renewable for languages for which certification is available.

Stat. Auth.: ORS 413.558
Stats. Implemented: ORS 413.556 & 413.558
Hist.: PH 18-2006, f. & cert. ef. 8-2-06; PH 26-2006, f. & cert. ef. 11-16-06; PH 2-2011, f. & cert. ef. 3-1-11; PH 18-2016, f. 6-9-16, cert. ef. 7-1-16

333-002-0150
Letter of Certification

(1) If the Authority determines that the certification requirements in OAR 333-002-0040, 333-002-0050 and 333-002-0060 and any applicable renewal requirements have been met a letter of certification shall be issued.

(2) Letters of certification are valid for 36 months from the date of issue and are renewable.

Stat. Auth.: ORS 413.558
Stats. Implemented: ORS 413.556 & 413.558
Hist.: PH 18-2006, f. & cert. ef. 8-2-06; PH 26-2006, f. & cert. ef. 11-16-06; PH 2-2011, f. & cert. ef. 3-1-11; PH 18-2016, f. 6-9-16, cert. ef. 7-1-16

333-002-0170
Certification and Qualification Renewal

(1) Certified or qualified health care interpreters who intend to maintain enrollment in the registry shall renew their certification or qualification every 36 months.

(2) To continue participating in the registry, qualified interpreters may not apply for renewal of their qualification if

certification is available in the qualified language or languages, they must become certified instead.

(3) At least 45 days before the expiration of certification or qualification, an applicant for renewal shall submit:

(a) A completed Authority renewal form and background check application.

(b) Any applicable fees.

(c) A signed copy of the Authority provided commitment form acknowledging that the applicant has read and agrees to abide by the National Code of Ethics for Interpreters in Health Care or the Registry of Interpreters for the Deaf Code of Professional Conduct, as applicable.

(d) Written verification showing the individual has maintained eligibility for registry renewal by completing the continuing education required:

(A) For qualification, the continuing education required by OAR 333-002-0120.

(B) For certification, the continuing education required by OAR 333-002-0120 and any additional hours required by the applicant's national certifying body during the preceding three years. Actual recertification by the national body is not required.

(4) The date of submission shall be considered to be the date materials are received by the Authority by fax, mail, email or hand delivery.

Stat. Auth.: ORS 413.558
Stats. Implemented: ORS 413.556 & 413.558
Hist.: PH 18-2006, f. & cert. ef. 8-2-06; PH 26-2006, f. & cert. ef. 11-16-06; PH 2-2011, f. & cert. ef. 3-1-11; PH 18-2016, f. 6-9-16, cert. ef. 7-1-16

333-002-0190
Denial, Revocation, Suspension or Refusal to Renew Status for Certification and Qualification

(1) The Authority shall deny, revoke, suspend or refuse to renew a letter of certification or qualification if:

(a) An applicant for an initial certification or qualification fails to meet the eligibility standards of OAR 333-002-0040.

(b) An applicant for certification or qualification renewal fails to comply with the requirements of OAR 333-002-0170.

(c) An applicant submits information that cannot be verified.

(d) An applicant engages in conduct or practices found by the Authority to be in violation of the National Code of Ethics for Interpreters in Health Care, the National Standards of Practice for Interpreters in Health Care, or the Registry of Interpreters for the Deaf Code of Professional Conduct, as applicable.

(2) The Authority may deny, revoke, suspend, or refuse to renew a certification or qualification, or impose remedial education or corrective actions on an applicant or registry enrollee, if the individual engages in any of the following conduct:

(a) Representing that the applicant or enrollee is an Oregon certified or qualified health care interpreter without having been issued a valid letter of certification or qualification by the Authority.

(b) Knowingly giving false information to the Authority.

(c) Violating the credentialing process by:

(A) Falsifying or misrepresenting education credentials or other information required for admission to an evaluation or assessment.

(B) Having an impersonator take an evaluation or assessment on the applicant or enrollee's behalf.

(C) Impersonating an applicant or enrollee.

(d) Having a credential to provide health care interpreting services in another state, territory or country, or issued by another certifying entity denied, revoked or suspended based on behavior by the individual similar to acts described in this rule.

(e) Being convicted of a state or federal crime which demonstrably relates to the provision of health care interpreting services in this or any other state, territory or country.

(f) Allowing the use of an Authority issued credential by a non-credentialed person.

(g) Presenting another person's credential as the applicant or enrollee's own credential.

(h) Impersonating another Oregon certified or qualified HCI.

(i) Practicing health care interpreting services under a false or assumed name.

(j) Using or attempting to use a credential that has been revoked, suspended, or lapsed.

(k) Practicing or offering to practice beyond the scope of the National Code of Ethics or National Standards of Practice for Interpreters in Health Care, or the Registry of Interpreters for the Deaf Code of Professional Conduct, as applicable.

(l) Engaging in false, deceptive or misleading advertising of the applicant or enrollee's certification or qualification credentials.

(A) False, deceptive or misleading advertising includes but is not limited to advertising health care interpreting services using the terms "Oregon qualified" or "Oregon certified" health care interpreter in any private or public communication or publication when not credentialed by the Authority.

(B) Advertising includes telephone directory listings, business cards, social media networking, or any other source of public communication.

(m) Failing to comply or cooperate with an Authority request in any way, including but not limited to a credentialing action or disciplinary proceeding, including:

(A) Failing to submit requested papers or documents.

(B) Failing to submit a written response to complaints filed with the Authority.

(C) Failing to respond to requests for information issued by the Authority whether or not the applicant or enrollee is accused in the proceeding.

(n) Failing to comply with an "assurance to desist" the applicant or enrollee entered into with the Authority.

333-002-0210
Complaints

(1) Any affected individual or their representative may submit a complaint against a certified or qualified health care interpreter (HCI).

(2) The Authority shall accept a complaint in writing, in a verbal report or in any other format that contains enough information to allow the Authority to investigate the report.

(3) The Authority shall ask the complainant or affected individual to sign a release of information indicating authorization for the Authority to access information to assist the investigation.

(4) If the complaint justifies an investigation, the Authority shall notify the respondent of the allegations and allow for response within a reasonable time with the required deadline for response provided in the notification.

(5) A summary of the complaint allegations shall be made available to the accused HCI.

(6) The Authority shall evaluate the complaint using available evidence.

(7) The complainant, the affected individual and the respondent shall be notified of the outcome in writing.

(8) The Authority may revoke, suspend, or refuse to renew a certification or qualification, or impose remedial education or corrective actions for substantiated complaints that meet the criteria in OAR 333-002-0190.

(9) Reports of discrimination based on protected class shall be submitted and investigated under the requirements of OAR 943 Section 5.

Hearings

An individual who wishes to contest the denial, non-renewal, suspension or revocation of their registry enrollment, qualification or certification may request a contested case hearing. The contested case hearing process is conducted in accordance with ORS 183.441

through 183.497 and the Attorney General's Uniform and Model Rules of Procedure for the Office of Administrative Hearings, OAR 137-003-0501 through 137-003-0700.

DIVISION 3

PUBLIC HEALTH PREPAREDNESS

333-003-0010
Definitions

For purposes of OAR 333-003-0020 through 333-003-0080, the following definitions apply:

(1) "Authority" means the Oregon Health Authority.

(2) "Bioterrorism" has the meaning given that term in ORS 433.442.

(3) "Communicable disease" has the meaning given that term in ORS 431.260.

(4) "Condition of public health importance" has the meaning given that term in ORS 431.260.

(5) "Health care provider" has the meaning given that term in ORS 433.443.

(6) "HIPAA" means the Health Insurance Portability and Accountability Act of 1996 and regulations adopted there under by the United States Department of Health and Human Services.

(7) "Individually identifiable health information" has the meaning given that term in ORS 433.443.

(8) "Local public health administrator" has the meaning given that term in ORS 431.260.

(9) "Local public health authority" has the meaning given that term in ORS 431.260.

(10) "Public health emergency" has the meaning given that term in ORS 433.442.

(11) "Public health law" has the meaning given that term in ORS 431.260.

(12) "Reportable disease" has the meaning given that term in ORS 431.260.

(13) "State Public Health Director" is the person appointed by the Director of the Oregon Health Authority under ORS 431.035(3) or his or her designee.

(14) "Strategic National Stockpile (SNS)" means the national repository of antibiotics, chemical antidotes, antitoxins, life-support medications, IV administration, airway maintenance supplies, and medical/surgical items, designed to supplement and re-supply state and local public health agencies in the event of a national emergency anywhere and at anytime within the U.S. or its territories.

333-003-0020
Authority of the Public Health Director During a Public Health Emergency

(1) If the Governor declares a Public Health Emergency under ORS 433.441 the Public Health Director may take any action authorized in 433.443 or 431.264.

(2) If the Governor has not declared a public health emergency but the Public Health Director determines that public health actions in addition to those routinely taken by the Authority, the Public Health Director, the local public health authority or local public health administrator are necessary to respond to a public health threat, the Public Health Director may, with approval from the Governor, take any action authorized in ORS 431.264

Stat. Auth.: ORS 413.042
Stats. Implemented: ORS 431.262, 431.264 & 433.441 - 433.452

333-003-0040
Diagnostic and Treatment Protocols

(1) If the Public Health Director creates diagnostic and treatment guidelines or protocols in response to an emergency under ORS 431.264 or a declared public health emergency under 433.441, the Director shall consult with appropriate medical experts.

(2) Appropriate medical experts may include but are not limited to staff at the Centers for Disease Control and Prevention, a medical advisory group, and Public Health Division staff.

(3) To the extent feasible the Public Health Director shall make every effort to consult with local practicing health care providers regarding the development of diagnostic and treatment guidelines or protocols.

(4) Required diagnostic and treatment guidelines or protocols issued by the Public Health Director shall be in writing, and shall be provided to health care providers, institutions and facilities by one or more of the following means:

(a) Releases through print, radio or television media outlets;

(b) Releases in health care provider publications when timely; or

(c) Mailings, faxes, and/or e-mail or other electronic notification to affected health care providers, facilities and institutions.

(5) If the Governor or Public Health Director requests Strategic National Stockpile (SNS) materials and such a request has been approved, the State Public Health Director may:

(a) Distribute SNS materials to any local health department, hospital, point of dispensing, medical care point, or other health care facility; and

(b) Provide the local public health administrator with permission to dispense SNS materials as needed.

333-003-0050
Access to Individually Identifiable Health Information

(1) During a declared public health emergency the Public Health Director and local public health administrators shall be given immediate access to individually identifiable health information.

(2) If the Public Health Director has been authorized to take a public health action under ORS 431.264, the Public Health Director may adopt reporting requirements for health care providers, institutions and facilities for the purpose of obtaining information directly related to the public health threat presented, including the reporting of individually identifiable health information for individuals with or exposed to:

(a) A communicable disease;

(b) A reportable disease; or

(c) A condition of public health importance.

(3) To the extent possible, whenever access to individually identifiable health information is needed under subsections (1) or (2) of this rule the Public Health Director or local public health administrator will provide the request for information in writing.

(4) A written request for information, when provided, shall include, but is not limited to:

(a) The legal authority for requiring the information;

(b) An explanation of why the access to individually identifiable health information is necessary;

(c) A description of the information needed; and

(d) An explanation of how the information must be provided or made available to public health officials.

(5) To the extent possible, the Public Health Director and local public health authority will coordinate requests for information to avoid duplicate requests to the same facility or provider.

333-003-0065
Civil Penalties

(1) Any person or entity that fails to comply with a protocol, order, other requirement imposed by the Public Health Director

under ORS 431.262, 431.264, or 433.443 or these rules is subject to the imposition of civil penalties not to exceed $500 per day per violation.

(2) In determining the amount of a civil penalty the Authority shall consider whether:

(a) The Authority made repeated attempts to obtain compliance;

(b) The person or entity has a history of noncompliance with public health laws; and

(c) The violation poses a serious risk to the public's health.

(3) Each day a violation continues will be considered an additional violation.

(4) A notice of imposition of civil penalties shall comply with ORS 183.745.

Stat. Auth.: ORS 413.042, 433.441 - 433.452
Stats. Implemented: ORS 433.441 - 433.452

333-003-0070
Temporary Restriction of Movement

(1) If the Public Health Director or the local public health administrator reasonably believes a person within his or her jurisdiction may have been exposed to a communicable reportable disease or a condition that is the basis for a declaration of a Public Health Emergency under ORS 433.441, the person may be detained for as long as necessary in order to obtain personal contact information and to convey information about the disease or condition.

(2) An individual subject to temporary restriction of movement will be provided with information including but is not limited to:

(a) Information on the disease or other hazard that the person may have been exposed to;

(b) Symptoms of the disease or resulting from exposure to the hazard and what to do in the event such symptoms occur; and

(c) How the person will be notified if it is determined that the individual was exposed to the disease or hazard.

(3) Restriction of movement shall be limited to the shortest duration of time reasonably required to provide health information to the individual and for the individual to provide contact information.

(4) The Authority or the local health public health administrator restricting movement shall use reasonable resources to deliver and collect information in a timely manner.

(5) Any individual failing to comply with the provisions of this section may be subject to the imposition of a public health measure as described in ORS 433.121 or 433.123.

(6) Individually identifiable contact information shall be held in a secure location and destroyed in accordance with applicable record retention schedules when no longer needed.

Emergency Health Care Services

333-003-0100
Scope

The rules in OAR 333-003-0100 to 333-003-0210 pertain to the registration and deployment of health care providers to perform emergency health care services during a declared emergency and to the designation of emergency health care centers under ORS 401.651 to 401.670 during a declared emergency.

Stat. Auth.: ORS 401.651 - 401.670
Stats. Implemented: ORS 401.651 - 401.670
Hist.: PH 26-2004, f. & cert. ef. 7-30-04; PH 17-2010, f. & cert. ef. 8-12-10

333-003-0105
Definitions

For purposes of OAR 333-003-0100 through 333-003-0140, the following definitions apply:

(1) "Cooperative Agreement" means an agreement between the Division and a local public health authority under ORS 401.657.

(2) "Credentialing" means granting privileges or permission, including any limitations or limits on the privileges or permission, authorizing a health care provider to provide health care services at a health care facility.

(3) "Credentialing plan" means the procedures established by an emergency health care center for credentialing registrants and volunteers, including but not limited to a plan for verifying that a health care provider is in good standing.

(4) "Declaration" or "declared emergency" means the Governor has declared a state of emergency to exist under ORS 401.055 or 433.441

(5) "Division" means Oregon Health Authority, Public Health Division.

(6) "Emergency health care center" means a health care facility, or any portion thereof designated by the Division or by a local public health authority or any other location designated by the Division or by a local public health authority in accordance with OAR 333-003-0130.

(7) "Emergency health care services" means health care services rendered by a registrant or volunteer during a declared emergency.

(8) "Emergency Support Function 8 (ESF-8)" means the Public Health and Medical Services response for the State of Oregon during a declared emergency.

(9) "Health care facility" means a health care facility as defined in ORS 442.015 that has been licensed under ORS Chapter 441.

(10) "Health care provider" means:

(a) An individual licensed, certified or otherwise authorized or permitted by the laws of this state or another state to administer health care services in the ordinary course of business or practice of a profession; and

(b) A person entered in the emergency health care provider registry under Oregon Laws 2011, chapter 89 and OAR 333-003-0117.

(11) "Health professional regulatory board" has the meaning given that term in ORS 676.160.

(12) "Incident Command System (ICS)" means a standardized on-scene emergency management system that enables multiple agencies and jurisdictions to respond to single or multiple incidents using an integrated organizational structure.

(13)(a) "In good standing" means that:

(A) A health care provider is currently certified, registered or licensed, does not have any disciplinary restrictions placed on any certificate, registration or license, and who is not suspended or on probation with any certifying, registering or licensing agency that issued a certificate, registration or license for any reason; or

(B) At the time the health care provider was last certified, registered or licensed the health care provider:

(i) Did not have any disciplinary restrictions placed on a certificate, registration or license; and

(ii) Was not on probation or did not have a certificate, registration or license revoked or suspended by the certifying, registering or licensing agency that issued the certificate, registration or license, for any reason.

(b) An individual is not in good standing if he or she voluntarily surrendered a certificate, registration or license while under investigation by a certifying, registering, or licensing board or surrendered a certificate, registration or license in lieu of discipline.

(14) "Local public health authority" has the meaning provided in ORS 431.260.

(15) "Registrant" means a health care provider listed on the Registry.

(16) "Registry" means the Health Care Provider Registry established by the Division.

(17) "Volunteer" means a health care provider who is not a registrant or is a registrant but is not deployed by the Registry, who provides emergency health care services at an emergency health care center.

Stat. Auth.: ORS 401.651 - 401.670
Stats. Implemented: ORS 401.651 - 401.670
Hist.: PH 26-2004, f. & cert. ef. 7-30-04; PH 8-2008, f. & cert. ef. 5-5-08; PH 17-2010, f. & cert. ef. 8-12-10; PH 6-2012, f. 3-30-12, cert. ef. 4-1-12

333-003-0110
The Health Care Provider Registry

(1) Under ORS 431.654 the Division is authorized to maintain a registry of health care providers who may, during a declared emergency, be deployed by the Division to provide emergency health care services. The Division shall include the following minimum information in the Registry concerning each registrant:

(a) Name;

(b) Contact information;

(c) Current license, registration or other certification, or previous license, registration or certification; and

(d) Information about the registrant's usual or former practice or specialty, if that information is available and the Division determines it is necessary to include in the Registry.

(2) Health care providers that may be registered include but are not limited to individuals currently or previously within the last 10 years licensed, registered or certified by the:

(a) State Board of Examiners for Speech-Language Pathology and Audiology;

(b) State Board of Chiropractic Examiners;

(c) State Board of Licensed Social Workers;

(d) Oregon Board of Licensed Professional Counselors and Therapists;

(e) Oregon Board of Dentistry;

(f) Board of Examiners of Licensed Dietitians;

(g) State Board of Massage Therapists;

(h) Oregon Board of Naturopathic Medicine;

(i) Oregon State Board of Nursing;

(j) Oregon Board of Optometry;

(k) State Board of Pharmacy;

(l) Oregon Medical Board;

(m) Occupational Therapy Licensing Board;

(n) Physical Therapist Licensing Board;

(o) State Board of Psychologist Examiners;

(p) Board of Medical Imaging;

(q) State Board of Direct Entry Midwifery;

(r) State Board of Denture Technology;

(s) Respiratory Therapist Licensing Board; or

(t) Oregon Health Authority, to the extent that the Authority certifies emergency medical technicians.

(3) The Division may share information about registrants with state and local emergency management departments, local public health authorities, and other state or federal agencies and health care facilities as necessary, for emergency response purposes. Nothing in this section prohibits the Division from sharing registry information for any lawful purpose.

Stat. Auth.: ORS 401.651 - 401.670
Stats. Implemented: ORS 401.651 - 401.670

333-003-0115
Registration of Currently Licensed Health Care Providers; Renewal

(1) A health care provider who is currently licensed, registered or certified may apply to the Division to be registered as a health care provider to provide emergency health care services during an emergency.

(2) A health care provider shall apply by completing a form prescribed by the Division and submitting the form in the manner prescribed by the Division.

(3) The Division shall verify that an applicant is in good standing.

(4) The Division may request additional information from an applicant if the application is incomplete or questions arise about the applicant during the Division's verification process.

(5) The Division may require that an applicant undergo a criminal background check if during the application process the Division learns of issues related to the applicant's history that reasonably raises questions about the ability of the applicant to safely provide emergency health care services. If the Division does require a criminal background check an applicant must sign any necessary authorizations for the criminal background check, provide fingerprints if requested and pay any necessary fees to cover the costs for the background check.

(6) The Division shall notify an applicant, in writing, if he or she has been accepted as a registrant and if not, why not.

(7) If an applicant has been accepted, the Division shall also provide the registrant information described in OAR 333-003-0118.

(8) The Division shall issue a registrant a registry identification card once the registrant has completed the orientation and training required in OAR 333-018-0118. The identification card shall:

(a) Identify the registrant;

(b) Indicate that the registrant is registered as an emergency health care provider;

(c) Identify the license or certification held by the registrant; and

(d) Identify the registrant's usual area of practice if that information is available and the authority determines that it is appropriate to provide that information.

(9) The Division shall require each registrant to update his or her registration information every two years, or when changes occur, and a registrant shall be required to sign a form, prescribed by the Division, that indicates the registrant is willing and able to remain on the Registry.

(10) A registrant identification card shall be renewed and provided to a registrant who fulfills the requirements in section (9) of this rule.

(11) The Division may remove a registrant from the Registry if the Division:

(a) Is notified or learns that a registrant is not in good standing with his or her licensing board or certifying agency;

(b) Determines that a registrant is not capable of providing emergency health care services;

(c) Determines that a registrant has a personal or criminal history that calls into question the ability of the registrant to safely provide emergency health care services; or

(d) Determines that a registrant is not complying with these rules.

(12) A registrant removed from the Registry may reapply at any time but must include with his or her application an explanation that describes how the issue that led to removal has been addressed.

(13) The Division may require a registrant to undergo a criminal background check if at any time the Division learns of issues related to the registrant's history that reasonably raises questions about the ability of the applicant to safely provide emergency health care services. If the Division does require a criminal background check a registrant must sign any necessary authorizations for the criminal background check, provide fingerprints if requested and pay any necessary fees to cover the costs for the background check.

333-003-0116
Out-of-State Health Care Providers

(1) The Division may enter into agreements with other states to facilitate the registry of out-of-state health care providers in the Registry established under these rules.

(2) During a state of emergency declared under ORS 401.165 or a state of public health emergency proclaimed under 433.441, a health care provider who is licensed, certified or otherwise authorized or permitted by the laws of another state to administer health care services and who is registered under these rules may administer health care services in this state as if the health care provider were licensed in this state.

Stat. Auth.: ORS 401.670
Stats. Implemented: ORS 401.655
Hist.: PH 17-2010, f. & cert. ef. 8-12-10

333-003-0117
Registration of Formerly Licensed Health Care Providers; Renewal

(1) A person who was licensed, certified or otherwise authorized to provide health care services not more than 10 years prior to the date of application, may apply to the Division to be registered as a health care provider to provide emergency health care services during an emergency.

(2) A person described in section (1) of this rule shall apply by completing a form prescribed by the Division and submitting the form in the manner prescribed by the Division.

(3) An applicant shall provide evidence from the entity that licensed, certified, or otherwise authorized the applicant to previously provide health care services that verifies that the applicant was in good standing at the time the applicant surrendered his or her license, certification or authorization to provide health care services.

(4) The Division may request additional information from an applicant if the application is incomplete or questions arise about the applicant during the Division's verification process.

(5) An applicant shall undergo a criminal background check and shall sign any necessary authorizations and pay any necessary fees for the criminal background check.

(6) The Division shall notify an applicant, in writing, if he or she has been accepted as a registrant and if not, why not.

(7) If an applicant has been accepted, the Division shall also provide the registrant information described in OAR 333-003-0118.

(8) The Division shall issue a registrant a registry identification card once the registrant has completed the orientation and training required in OAR 333-018-0118. The identification card shall:

(a) Identify the registrant;

(b) Indicate that the registrant is registered as an emergency health care provider;

(c) Identify the license or certification previously held by the registrant; and

(d) Identify the registrant's former area of practice if that information is available and the Division determines that it is appropriate to provide that information.

(9) The Division shall require each registrant to update his or her registration information every two years, or when changes occur, and a registrant shall be required to sign a form, prescribed by the Division, that indicates the registrant is willing and able to remain on the Registry. A registrant shall provide documentation of completed continuing education credits with the renewal form.

(10) The Division shall conduct a criminal background check on registrants registered under this rule every five years. A registrant is responsible for signing any necessary authorizations and paying any necessary fees.

(11) A registrant identification card shall be renewed and provided to a registrant who fulfills the requirements in section (9) and (10) of this rule.

(12) The Division may remove a registrant from the Registry if the Division:

(a) Is notified or learns that a registrant is not in good standing with his or her licensing board or certifying agency;

(b) Determines that a registrant is not capable of providing emergency health care services;

(c) Determines that a registrant has a personal or criminal history that calls into question the ability of the registrant to safely provide emergency health care services; or

(d) Determines that a registrant is not complying with these rules.

(13) A registrant removed from the Registry may reapply at any time if the registrant meets the criteria in section (1) of this rule but must include with his or her application an explanation that describes how the issue that led to removal has been addressed.

Stat. Auth.: ORS 401.651 - 401.670

333-003-0118
Duties of Registrants

(1) A registrant is required to complete an orientation session offered or approved by the Division and complete mandatory training offered or approved by the Division including but not limited to ICS training, prior to receiving an identification card.

(2) A registrant has one year from the date the registrant is notified of acceptance into the Registry to complete the orientation and required training or the Division shall remove the registrant's name from the Registry.

(3) If the Division notifies a registrant of an activation, the registrant shall respond to the Division within 24 hours whether or not the registrant is willing to be activated and deployed in accordance with OAR 333-003-0125.

(4) A registrant is required to notify the Division, as soon as practicable, but within 30 days, of the following:

(a) A change in mailing address, phone number, or electronic mail address;

(b) A change in licensure status, certification or registration status; and

(c) A change in mental or physical health that renders a registrant unable to perform emergency health care services.

(5) A registrant shall immediately notify the Division if a registrant's identification card is lost or stolen. The Division shall replace a lost or stolen identification card and may charge a fee for the replacement card.

(6) A registrant may request removal from the Registry at any time by notifying the Division, in writing, of the request, and by returning the identification card described in OAR 333-003-0115. Upon receipt of such request and verification that it came from the registrant, the Division shall remove the registrant from the Registry.

(7) If at any time a registrant is notified by the Division that the registrant has been removed from the Registry, the registrant shall return the identification card described in OAR 333-003-0115 to the Division within 10 days of the date the notification was mailed or electronically mailed. Removed registrants may re-apply at a later date subject to Division approval.

(8) A registrant may only provide health care services during an emergency that the registrant is competent to perform.

333-003-0125
Activation of Registrants

(1) The Division may activate the Registry in the event of a declaration and direct registrants willing to provide emergency health care services to proceed to any place in Oregon where emergency health care services are required by reason of the emergency or crisis.

(2) The Division may also activate the Registry pursuant to the Emergency Management Assistance Compact and the Pacific Northwest Emergency Management Arrangement and direct registrants willing to provide emergency health care services to proceed to another state where emergency health care services are required by reason of the emergency or crisis in that state.

(3) The activation of the Registry may be used to support the state Emergency Coordination Center, the State Emergency Management Plan and to implement ESF 8 plans, protocols, and procedures to integrate registrants into the state and local emergency response.

(4) The Division shall notify registrants of activation by phone, electronic mail, or any other means of communications.

(5) The Division shall provide, at a minimum, the following to a registrant willing to be deployed:

(a) A mission order;

(b) A description of items needed during the deployment; and

(c) If applicable, items that will be provided to a registrant.

(6) A registrant willing to be deployed shall bring his or her registry identification card and driver's license to the deployment site.

(7) A registrant may decline to be deployed at the time the registrant is notified of the activation. A registrant shall remain on the Registry whether or not the registrant agrees to be deployed unless the registrant notifies the Division in accordance with OAR 333-003-0118 that he or she wants to be removed from the Registry.

(8) If a registrant deployed under these rules provides emergency health care services at a designated emergency health care center the registrant must provide those services in accordance with the emergency operations plan and credentialing plan adopted by the designated emergency health care center.

(9) In anticipation of a declaration of emergency or during a declared emergency the Division may register health care providers without complying with OAR 333-003-0115 and provide just-in-time orientation and training. Under this section the Division shall verify licensure status as quickly as possible and shall issue the health care provider a temporary identification card.

333-003-0130
Designation of Emergency Health Care Centers

(1) The Division may designate a health care facility, a portion thereof, or any location as an emergency health care center.

(2) During a declared emergency a designated emergency health care center may be used for:

(a) Evaluation and referral of individuals affected by the emergency;

(b) Provision of health care services; and

(c) Preparation of patients for transportation.

(3) A local public health authority may designate a health care facility, a portion thereof, or any location as an emergency health care center if authorized to do so in a cooperative agreement executed by the Division and the local public health authority.

(4) In order to be designated as an emergency health care center a health care facility is required to have an emergency operations plan that includes but is not limited to:

(a) An ICS structure;

(b) Procedures for increasing staff during an emergency;

(c) A credentialing plan that:

(A) Governs the use of registrants and volunteers;

(B) Provides for emergency privileges to be granted upon presentation of any of the following:

(i) A current picture hospital ID card;

(ii) A current license to practice and a valid picture ID; issued by a state, federal or regulatory agency;

(iii) Identification indicating that the individual is a member of Oregon Disaster Medical Assistance Team (ODMT);

(iv) Identification indicating that the individual has been granted authority to render patient care in emergency circumstances, such authority having been granted by federal, state, or municipal entity; or

(v) Presentation by current hospital or medical staff members(s) with personal knowledge regarding practitioner's identity.

(d) A description of individual(s) responsible for granting emergency privileges;

(e) A process for making decisions about whether to grant privileges to registrants or volunteers on a case-by-case basis and at the discretion of the individual(s) responsible for granting emergency privileges;

(f) A mechanism to readily identify the emergency-privileged individuals; and

(g) A process, to begin as soon as the situation that gave rise to the declaration allows, for verifying the license and any other information relevant to a registrant or volunteer who is granted emergency privileges under the credentialing plan.

(5) If the Division designates a location other than a health care facility as an emergency health care center the Division shall utilize its own emergency operations plan or ensure that the location is operated using a plan that includes the provisions described in section (4) of this rule.

(6) The Division shall consider the following in making a decision to designate a facility or another location as an emergency health care center:

(a) Whether the existing health care system is overwhelmed or incapacitated;

(b) Whether patients with a particular communicable disease need to be concentrated at particular locations or one location;

(c) Whether registrants are being activated to provide care at particular health care facilities or whether registrants or volunteers are needed to provide emergency health care services;

(d) Whether it is necessary for the state to direct activities at a health care facility or other location where emergency health care services are to be provided; or

(e) Whether a health care facility is being asked to perform services outside of the general scope of services it customarily provides.

(7) In order to facilitate the designation process during a declared emergency, the Division shall make every effort to pre-designate health care facilities, a portion thereof, or any location as an emergency health care center. Pre-designation shall include review and approval of the facility's emergency operations plan. For a location that is not a health care facility, the Division shall review the operations plan that would be utilized at that location.

(8) A facility or location that has been pre-designated does not automatically become a designated emergency health center upon a declaration. Designation shall be made in accordance with section (9) of this rule.

(9) If a facility or location is designated as an emergency health care center the Division shall notify the person in charge of a facility or location in writing and shall issue orders to the emergency health care center that identify the emergency response required by the Division and the time period that the designation is in effect. The liability protection described in OAR 333-003-0210 only extends to activities undertaken by a designated emergency health care center that are directed by the Division.

(10) To the extent practicable, the Division shall request that a facility accept the designation as an emergency health care center.

However, acceptance of a designation is not required for the Division to exercise its authority under ORS 401.657.

(11) If the Division pre-designates a facility, portion thereof, or another location in accordance with section (7) of this rule, the Division shall review the applicable emergency operations plan every two years to ensure it remains acceptable.

(12) A designated emergency health care center may determine the services to be provided by a registrant or volunteer deployed under these rules.

333-003-0140
Training

(1) The Division may require or otherwise make available to registrants training that the Division determines necessary or beneficial to the provision of emergency health care services that may be rendered by registrants pursuant to ORS 401.651 through 401.670 and these rules, including but not limited to training in the emergency response system structure, operations, emergency preparedness and table top or other emergency response exercises. The Division shall not require training that is related to a registrant's professional license.

(2) A person who is registered in accordance with OAR 333-003-0117 shall:

(a) Prior to being eligible for activation, and thereafter every three years, complete the following training and provide documentation of completion to the Division.

(A) First Aid that includes CPR and AED use;

(B) Basic Disaster Life Support;

(C) Triage; and

(D) Psychological First Aid.

(b) Complete at least a total of six hours of continuing education credits every two years on the following subjects or substantially similar subjects:

(A) Disaster medicine;

(B) Psychological first aid;

(C) Disaster life support; and

(D) Wilderness first aid or medicine.

333-003-0210
Liability Protection; Workers' Compensation

(1) Registrants and volunteers who perform emergency health care services in accordance with ORS 401.651 through 401.670 and these rules are agents of the state under 30.260 through 30.300 for the purposes of any claims arising out of services that are provided under 401.651 through 401.670 and these rules pursuant to directions from a public body and that are within the course and scope of the registrant's or volunteer's duties, without regard to whether the registrant or volunteer is compensated for the services.

(2) If the Governor declares an emergency a designated emergency health care center and persons operating a designated emergency health care center are agents of the state under ORS 30.260 through 30.300 for the purposes of any claims arising out of services that are provided through the designated emergency health care center pursuant to directions from a public body and that are within the course and scope of the duties of the health care facility or other person, without regard to whether the health care facility or other person is compensated for the services.

(3) A registrant participating in training authorized by Oregon Health Authority under ORS 401.651 through 401.670 and OAR 333-003-0140 is an agent of the state under ORS 30.260 through 30.300 for the purposes of any claims arising out of that training.

(4) The provisions of section (2) of this rule apply only to a designated emergency health care center that has adopted an emergency operations plan and credentialing plan that governs the use of registrants and volunteers. An emergency operations plan and a credentialing plan must comply with these rules.

(5) A registrant shall also be considered a qualified emergency services volunteer under ORS 401.358 through 401.368 for the purpose of receiving workers' compensation coverage if injured in the course and scope of providing emergency health care services.

(6) A volunteer must meet the definition of a qualified emergency services volunteer under ORS 401.358 in order to receive workers' compensation coverage under 401.358 through 401.368.

DIVISION 4

OREGON CONTRACEPTIVE CARE

333-004-0000
Description of OregonContraceptiveCare

OregonContraceptiveCare (CCare) is a Medicaid waiver demonstration project approved by the Centers for Medicare and Medicaid Services (CMS) to provide comprehensive contraceptive management services to eligible low-income Oregon residents statewide. OregonContraceptiveCare extends Medicaid coverage for contraceptive management services to Oregon residents with family incomes at or below 250 percent of the Federal Poverty Level (FPL) through a contract network of qualified agencies. The administrative rules set forth for this project apply only to agencies with an approved medical services agreement (MSA) to provide contraceptive management services through this project. Other reproductive health services and reimbursement covered by Medicaid are governed by Oregon Health Authority, Division of Medical Assistance Program's administrative rules and federal guidelines.

333-004-0010
Definitions

(1) "Acquisition cost" means the net amount paid per invoice line item to a pharmaceutical manufacturer, supplier or distributor for a contraceptive supply, plus any shipping and handling that is supported by the invoice.

(2) "Agency" means an entity enrolled by the Reproductive Health Program (RH) to provide CCare covered services at clinic site(s) to clients.

(3) "Authority" means the Oregon Health Authority.

(4) "CCare Eligibility Database" means the web-based database designed and managed by the Center for Prevention and Health Promotion (Center) for the statewide collection, tracking and storage of CCare client eligibility information.

(5) "Center" means the Center for Prevention and Health Promotion, within Public Health Division, Oregon Health Authority.

(6) "Citizenship verification" means confirming a client's claim of U.S. citizenship through documentation of a certified birth record, passport or other document(s) deemed acceptable proof of U.S. citizenship verification by the federal government.

(7) "CLIA" means the Clinical Laboratory Improvement Amendments of 1988, which establishes quality standards for all laboratory testing to ensure the accuracy, reliability and timeliness of patient test results, and allows for certification of clinical laboratories operating in accordance with these federal amendments.

(8) "Client" means a person of any age or gender who is enrolled in and receives contraceptive management services from CCare.

(9) "Clinic" means a site within an agency that provides CCare billable services to eligible clients.

(10) "Clinic Visit Record" or "CVR" means the form or set of information that is completed for each client visit, and that is used as a data collection instrument and a billing claim form for CCare.

(11) "CMS" means the Centers for Medicare and Medicaid Services, located within the federal Department of Health and Human Services.

(12) "Contraceptive management" means a limited scope of reproductive health services as described in OAR 333-004-0040.

(13) "Established client," for the purpose of mail ordered supplies, means a person who has been obtaining contraceptive services/supplies from the prescribing clinic for a minimum of three consecutive months.

(14) "FPL" means the federal poverty level guidelines established each year by the Department of Health and Human Services, used to determine eligibility for CCare other federally funded programs.

(15) "Individual" means a person who has applied for CCare, but has not yet been verified as eligible for services.

(16) "Lawful Permanent Resident" or "LPR" means a person who, notwithstanding other eligibility requirements, is a qualified non-citizen as described in OAR 461-120-0125(14).

(17) "Medical Services Agreement" or "MSA" means an agreement that sets forth the relationship between the Center and the enrolling agency regarding payment by the Center for contraceptive management services, supplies, or devices.

(18) "Nationally-recognized standard of care" means a diagnostic, screening, or treatment process recognized by a national organization, including but not limited to the American Cancer Society (ACS), American College of Obstetrics and Gynecologists (ACOG), U.S. Preventative Services Task Force (USPSTF), or the U.S. Medical Eligibility Criteria (USMEC).

(19) "OregonContraceptiveCare" or "CCare" means the Medicaid waiver program that provides statewide reproductive health services to eligible clients that is administered by the Reproductive Health Program within the Authority.

(20) "Project number" means the administrative number assigned by the RH to an agency.

(21) "Provider" means a licensed health care professional operating within a scope of practice, who works for an agency that is authorized by the Authority to bill for contraceptive management services for eligible CCare clients.

(22) "Refugee/Asylee" means a person admitted to the United States because of a well-founded fear of persecution in their homeland due to race, religion or political opinion, as determined by the United States Citizenship and Immigration Services.

(23) "Reproductive Health Program" or "RH" means the program within the Center for Prevention and Health Promotion that administers CCare.

(24) "Reproductive health services" means comprehensive family planning and related preventive health services provided to clients, including but not limited to:

(a) Patient education and counseling;

(b) Breast and pelvic examinations;

(c) Breast and cervical cancer screening;

(d) Sexually transmitted disease (STD) prevention education, counseling, testing and referral; and

(e) Pregnancy diagnosis and counseling.

(25) "RH program manual" means the reference guide provided by RH to agencies, outlining the scope and policies of the CCare program. This manual is available online by selecting "Program Manuals" at www.healthoregon.org/rhmaterials.

(26) "School-Based Health Center" means a health center certified by the School-Based Health Center Program located within the Center for Prevention and Health Promotion.

(27) "Site number" means the administrative number assigned by RH to each clinic within a participating CCare agency.

333-004-0020
Client Eligibility

(1) In order to be eligible for CCare, an individual must:

(a) Have a household income and size at or below 250 percent of the FPL;

(b) Reside in Oregon;

(c) Not be sterile, have an unconfirmed sterilization status, or have been sterilized less than six months prior to eligibility determination;

(d) If female, be less than 60 years of age;

(e) Provide a valid Social Security Number (SSN) as required by 42 USC 1320b-7; and

(f) Be a citizen of the United States, with acceptable proof of citizenship verification and identity; or

(g) Meet the definition of Lawful Permanent Resident as described in OAR 333-004-0010; or

(h) Meet the definition of refugee/asylee as described in OAR 333-004-0010 and provide acceptable proof of refugee/asylee status.

(2) An individual who is in the custody of a law enforcement agency or is an inmate of a public institution, including a juvenile detention facility, is not eligible for CCare.

(3) An individual who receives or who is eligible for the Citizen/Alien-Waived Emergency Medical benefit package under Title XIX is not eligible for CCare.

(4) An individual enrolled in another Medicaid program that provides family planning benefits is not eligible for CCare.

(5) Eligibility for CCare does not constitute eligibility for any other medical assistance program. Eligibility for reproductive health services, including contraceptive management, as part of any other medical program is determined by the eligibility requirements for that specific program.

333-004-0030
Client Enrollment

(1) An individual is considered eligible for CCare upon submission of the following items to the CCare agency:

(a) A signed, completed, and dated CCare enrollment form that includes SSN and appropriate residency and income information; applicants under age 20 can be enrolled based on their own income, whether living at home or on their own; and

(b) If the individual claims U.S. citizenship, acceptable proof of U.S. citizenship verification and identity.

(2) All CCare client eligibility information must be recorded in the CCare Eligibility Database by the enrolling CCare agency.

(3) Final determination of eligibility and enrollment into CCare is made by RH based on the information recorded in the CCare Eligibility Database.

(a) An individual's enrollment in CCare shall be suspended by RH if it determines that the individual's SSN is invalid or income is above the eligibility threshold.

(b) An individual shall have 45 days to submit a valid SSN and income information to the CCare agency or the individual's enrollment in CCare shall be terminated by RH.

(4) An enrolling CCare agency must retain a current, signed enrollment form and a copy of any citizenship and identity documents provided by the client as described in OAR 333-004-0120(3).

(5) If a CCare agency enrolls an individual who is deemed ineligible by RH, the individual's eligibility shall be terminated by RH.

(6) A client's eligibility is effective for one year from the date of enrollment. The date of enrollment must be on or before the first date of service.

(7) CCare enrollment forms may not be backdated. An individual or enrolling agency that backdates a form shall be considered by RH to have committed fraud.

(8) An individual who meets all eligibility criteria apart from acceptable proof of U.S. citizenship verification may be granted by RH a reasonable opportunity period (ROP) of 45 days during which time the individual may receive services. An individual must have U.S. citizenship verified before he or she can be enrolled in CCare.

333-004-0040

Covered Services

(1) CCare covers contraceptive management services that are a limited scope of reproductive health services directly related to initiating or obtaining a contraceptive method and maintaining effective use of that method. CCare agencies shall only be reimbursed for visits at which the primary service is contraceptive initiation or management, and not for excluded services described in OAR 333-004-0050.

(2) Contraceptive management services based on a nationally-recognized standard of care include:

(a) An annual exam payable once each year;

(b) Clinically indicated follow-up visits to evaluate effectiveness of a contraceptive method;

(c) Management of side effects related to a contraceptive method;

(d) Changing a contraceptive method if medically necessary or requested by the client;

(e) Reproductive health counseling and education; and

(f) Laboratory tests, medical procedures (including vasectomy), and pharmaceutical supplies and devices directly related to contraceptive management as documented in clinic protocol.

(3) Each client may receive up to a one-year supply of contraceptives from the CCare agency.

333-004-0050

Excluded Services

(1) Services and laboratory tests not described in OAR 333-004-0040 are not covered by CCare for any eligible client. If a client accepts financial responsibility for a non-covered service that is received during a visit, payment arrangements are between the agency and the client.

(2) RH shall not pay for any expense incurred for any of the following services or items:

(a) Sterilizations for female clients;

(b) Treatment for infections;

(c) Prenatal care, including pregnancy confirmations;

(d) Repeat pap smears not associated with contraceptive management services;

(e) Hysterectomies or abortions;

(f) Transportation to or from a clinic appointment;

(g) Procedures performed for medical reasons, whether or not the procedure results in preventing or delaying pregnancy or restoring fertility;

(h) Any other medical service or laboratory test that is not described in OAR 333-004-0060(6) and whose primary purpose is other than contraceptive management; and

(i) A clinic visit that has the purpose of ensuring or reinforcing the client's effective use of a contraceptive method and where no medical decision-making is required (behavior modification visit).

333-004-0060

Standards of Care for Contraceptive Management Services

Participating CCare agencies shall provide contraceptive management services according to the following standards.

(1) Informed Consent. The client's decision to participate in and consent to receive contraceptive management services must be voluntary and without bias or coercion.

(a) The informed consent process, provided verbally and supplemented with written materials, must be presented in a language the client understands.

(b) A signed consent must be obtained from the client receiving contraceptive management services.

(c) A separate, signed contraceptive method-specific consent must be obtained from the client for each prescription contraceptive method received.

(2) Confidentiality. Services must be provided in a manner that respects the client's privacy and dignity in accordance with OAR 333-004-0060(7)(b).

(a) Clients must be assured of the confidentiality of services and of their medical and legal records.

(b) Records cannot be released without written client consent, except as may be required by law, or otherwise permitted by the Health Insurance Portability and Accountability Act (HIPAA).

(3) Availability of Contraceptive Services. A broad range of Federal Drug Administration (FDA)-approved contraceptive methods and their applications, consistent with recognized medical practice standards, as well as fertility awareness methods must be available on-site at the clinic for dispensing to the client at the time of the visit.

(a) If the agency's clinical staff lack the specialized skills to provide vasectomies, intra-uterine devices (IUDs) or subdermal contraceptives, or if there is insufficient volume to ensure and maintain high skill level for these procedures, clients must be referred to another qualified provider for these procedures.

(b) Clients shall be able to get their first choice of contraceptive method during their visits unless there are specific contraindications.

(c) Contraceptive methods, including emergency contraception, must be available at the clinic site and available to the client at the time of service, except as provided in OAR 333-004-0060(8)(a).

(4) Linguistic and Cultural Competence. All services, support and other assistance must be provided in a manner that is responsive to the beliefs, interpersonal styles, attitudes, language

and behaviors of the client receiving services, and in a manner that has the greatest likelihood of ensuring maximum program participation.

(a) The agency shall employ bilingual or bicultural staff, personnel or volunteers skilled or certified in the provision of medical and clinical interpretation during all clinic encounters for clients with limited English proficiency or who otherwise need this level of assistance. All persons providing interpretation services must adhere to confidentiality guidelines.

(b) The agency must assure the competency of language assistance provided to limited English proficiency clients by interpreters and bilingual staff. Family and friends shall not be used to provide interpretation services, unless requested by the client.

(c) The agency must make interpretation services available to all clients needing or requesting such assistance at no cost to the client. The agency must notify clients in need of interpretation services of the availability of such services in accordance with the Civil Rights Act of 1964.

(d) The agency shall make easily understandable print materials available to clients and post signage in the languages of groups represented or commonly encountered in the service area.

(e) All print, electronic and audiovisual materials shall be appropriate in terms of the client's language and literacy level. A client's need for alternate formats must be accommodated.

(5) Access to Care. Services covered by CCare must be provided without cost to eligible clients. Clients must be informed of the scope of services available through the program.

(a) Appointments for established clients shall be available within a reasonable time period, generally less than two weeks. New clients who cannot be seen within this time period shall be referred to other qualified provider agencies in the area.

(b) Clinics with the appropriate license from the Oregon Board of Pharmacy may offer established clients the option of receiving their contraceptive methods by mail.

(A) Use of this option is at the discretion of the client; it cannot be offered as the only way in which to receive contraceptive methods.

(B) Contraceptive methods that require a written prescription may only be mailed to established clients who have been using the method(s) for at least three months, with no problems or contraindications.

(C) Non-prescription methods may be mailed to any established client, regardless of the client's previous use of the method(s).

(D) Clients must not incur any cost for the option of receiving contraceptive methods through the mail.

(E) Clinics must package and mail supplies in a manner that ensures the integrity of contraceptive packaging and effectiveness of the method upon delivery.

(c) Although not covered by CCare, treatment and supplies for sexually transmitted infections must be available at the clinic site, or by referral.

(d) Clients in need of additional medical or psychosocial services beyond the scope of the agency must be provided with information about available local resources, including domestic violence and substance abuse related services. Clients must also be given a brochure listing locations of free or low-cost primary care services in the area.

(e) All services must be provided to eligible clients without regard to age, marital status, race, parity, disability, gender identity, or sexual orientation.

(f) All counseling and referral-to-care options appropriate to a positive or negative pregnancy test result during authorized contraceptive services must be provided in an unbiased manner, allowing the client full freedom of choice between prenatal care, adoption counseling or pregnancy termination services.

(6) Clinical and Preventive Services.

(a) The scope of contraceptive management services offered to women and female-bodied clients at each CCare clinic site must include:

(A) A comprehensive health history, including health risk behaviors and a complete obstetrical, gynecological, contraceptive, personal and family medical history; and a sexual health history, in conjunction with contraceptive counseling;

(B) An initial physical examination including cervical cancer screening as indicated, that follows a nationally-recognized standard of care.

(C) Routine laboratory tests related to the decision-making process for contraceptive choices;

(D) Provision of a broad range of FDA-approved contraceptive methods, devices, supplies, and procedures, including emergency contraception;

(E) Follow-up care for maintenance of a client's contraceptive method or for change of method;

(F) Information about providers available for meeting primary care needs and direct referral for needed medical services not covered by CCare, including management of high-risk conditions and specialty consultation if needed; and

(G) Preventive and control services for communicable diseases, provided within the context of a contraceptive management visit, including:

(i) Testing and diagnosis for sexually transmitted infections (STIs) as indicated; and

(ii) Reporting of STIs, as required, to appropriate public health agencies for contact management, prevention, and control.

(b) The scope of contraceptive management and clinical preventative services offered to men and male-bodied clients must include:

(A) A health history, including health risk behaviors and a sexual health history, in conjunction with contraceptive counseling and provision of contraceptive barrier methods;

(B) Vasectomy or referral for vasectomy, as appropriate;

(C) Vasectomy counseling, including a comprehensive health history that includes health risk behaviors and a complete contraceptive, personal and family medical history; and a sexual health history;

(D) Physical examination if indicated within the context of a contraceptive management visit;

(E) Information about providers available for meeting primary care needs and direct referral for needed medical services not covered by CCare, including management of high-risk conditions and specialty consultation if needed; and

(F) Preventive and control services for communicable diseases, provided within the context of a contraceptive management visit, including:

(i) Testing and diagnosis for sexually transmitted infections (STIs) as indicated; and

(ii) Reporting of sexually transmitted infections (STI), as required, to appropriate public health agencies for contact management, prevention, and control.

(c) All services must be documented in the client's medical record.

(7) Education and Counseling Services. The following elements comprise the required education and counseling services that must be provided to all contraceptive management clients:

(a) Initial clinical assessment and re-assessment as needed, of the client's contraceptive management educational needs and knowledge about reproductive health, including:

(A) Counseling and education about a broad range of FDA-approved contraceptive methods, devices, supplies, and procedures, including emergency contraception;

(B) A description of services and clinic procedures;

(C) Relevant reproductive anatomy and physiology;

(D) Preventive health care, nutrition, preconception health maintenance, pregnancy plans, and STI and Human Immunodeficiency Virus (HIV) prevention;

(E) Psychosocial issues, such as partner relationship and communication, risk-taking, and decision-making; and

(F) An explanation of how to locate and access primary care services not covered by CCare.

(b) Initial and all subsequent education and counseling sessions must be provided in a way that is understandable to the client and conducted in a manner that respects the dignity and

privacy of the client and facilitates the client's ability to make informed decisions about reproductive health behaviors and goals, and must include:

(A) An explanation of the results of the physical examination and the laboratory tests;

(B) Information on where to obtain 24-hour emergency care services;

(C) The option of including a client's partner in the education/counseling session, and other services at the client's discretion; and

(D) Effective educational information that takes into account diverse cultural and socioeconomic factors of the client and the psychosocial aspects of reproductive health.

(c) Each client must be provided with adequate information to make an informed choice about contraceptive management methods, including:

(A) A general verbal or written review of all FDA-approved contraceptive methods, including sterilizations and emergency contraception, along with the opportunity for the client to ask questions. Documentation of this method education must be maintained in the client record;

(B) A description of the implications and consequences of sterilization procedures, if provided;

(C) Specific instructions for care, use, and possible danger signs for the selected method. Documentation of method-specific information must be maintained in the client record;

(D) The opportunity for questions concerning procedures or methods; and

(E) Written information about how to obtain services for contraceptive management related complications or emergencies.

(d) Clinicians and other agency staff persons providing education and counseling must be knowledgeable about the psychosocial and medical aspects of reproductive health, and trained in client-centered counseling techniques. Agency staff must make referrals for more intensive counseling as indicated.

(8) Exceptions:

(a) School-Based Health Centers are exempt from the requirement to make contraceptive methods available for on-site dispensing described in section (3) and subsection (5)(b) of this rule. Because some school boards prohibit dispensing contraceptives on school grounds, School-Based Health Centers may offer contraceptive methods to clients either on-site or by referral. When offered by referral, School-Based Health Centers must have an established referral agreement in place, preferably with another CCare clinic. RH must be notified of the parties involved in order to ensure proper billing and audit practices. When the referral clinic participates in CCare, that clinic may submit claims directly to CCare for reimbursement of the dispensed supplies. When referral clinics do not participate in CCare, payment arrangements must be made between the referring and receiving clinics. Dispensing by any provider must not result in a charge to the client.

(b) Non-School-Based Health Center sites:

(A) Agencies may bill CCare for client counseling and education services conducted at a school site, grade 12 and under, if the site meets the following criteria:

(i) The school site must have no established School-Based Health Center;

(ii) The school site must be within a RH-approved distance from the enrolled CCare agency to ensure adequate access to client contraceptive method of choice; and

(iii) The school site must have a dedicated, private room(s) for services to be conducted.

(B) Agencies that wish to bill CCare for client counseling and education services conducted at secondary school sites must adhere to the following standards:

(i) The agency must notify RH of the school site to be enrolled and must request from RH a unique site number for the school site;

(ii) The agency must receive written approval from the school site to conduct services;

(iii) For newly enrolling clients, the agency must ensure that clients meet all eligibility criteria described in OAR 333-004-0020 and are enrolled according to 333-004-0030 at the school site;

(iv) For clients already enrolled in CCare, the agency must ensure that clients have active eligibility;

(v) The agency must follow all standards of care for contraceptive management services described in OAR 333-004-0060 with the exception of 333-004-0060(3) (supplies dispensed on-site) and 333-004-0060(6) (clinical and preventive services);

(vi) The agency must offer clients a written referral to the enrolled CCare clinic for supply pick-up and full array of clinical services; and

(vii) The agency must submit claims for services conducted at the school site using the assigned project and site number of the school site.

333-004-0070
Provider Enrollment

(1) An agency and its providers must meet applicable licensing or regulatory requirements set forth by federal and state statutes, regulations, and rules to be enrolled and to bill as an agency. In addition, all agencies and its providers within the state of Oregon must have a valid Oregon business license if such a license is a requirement of the state, federal, county or city government to operate a business or to provide services.

(2) Signing a MSA constitutes agreement by agencies to comply with all applicable rules of RH, the Division of Medical Assistance Programs, and federal and state laws and regulations.

(3) Signing a MSA constitutes agreement by agencies to serve both CCare and Oregon Health Plan covered clients.

(4) An agency or any of its providers that are currently subject to sanctions by the Authority or the federal government is not eligible for enrollment as a CCare agency.

(5) A CCare project number and site number shall be issued to an agency and any applicable clinics upon:

(a) Completion of the MSA and submission of the required documents;

(b) The signing of the MSA and related forms by the person authorized by the agency to bind the agency and its providers to compliance with these rules;

(c) Verification of licensing or certification; and

(d) Approval of the application by RH and the Division of Medical Assistance Programs.

(6) An agency must notify RH within 30 days of a change in address, business affiliation, licensure, ownership, certification, billing agents or Federal Tax Identification Number (TIN). Failure to notify RH of a change of Federal Tax Identification Number may result in a sanction. Changes in business affiliation, ownership, and Federal Tax Identification Number may require the submission of a new application. In the event of bankruptcy proceedings, the agency must immediately notify RH in writing. RH may recover payments made to agencies who have not notified RH of changes as required by this section.

(7) Agencies outside the state of Oregon may be enrolled under the following conditions:

(a) The agency is appropriately licensed or certified and meets standards established within the provider's state for participation in Medicaid; and

(b) The agency is located in a state contiguous to Oregon, and is within 75 miles of the Oregon border.

(8) Agency termination:

(a) An agency may terminate enrollment at any time. The notice must be made to RH in writing, via certified mail, return-receipt requested. The notice shall specify the provider number to be terminated and the effective date of termination. Termination of agency enrollment does not terminate any obligations of the

agency for dates of services during which the enrollment was in effect.

(b) RH may terminate CCare agency enrollment due to inactivity. After 12 months of no claims activity, agencies may be contacted by RH with a written notice by certified mail, return-receipt requested, regarding inactivity and pending termination of agency enrollment. The notice shall specify the effective date of termination unless the agency notifies RH within 30 days upon receipt of notice of intention to resume claims activity.

(9) Agency responsibilities:

(a) An agency performs all services, or provides all items, as an independent contractor. The agency is not an officer, employee, or agent of RH.

(b) The agency is responsible for its employees, and for providing employment-related benefits and deductions that are required by law. The agency is solely responsible for its acts or omissions, including the acts or omissions of its own officers, employees or agents. RH's responsibility is limited to its authorization and payment obligations for covered services or items provided in accordance with OAR 333-004-0000 through 333-004-0230.

333-004-0080
Billing and Claims

(1) Only clinics providing contraceptive management services pursuant to an approved MSA, and who have been assigned a project number and site number may submit claims for CCare services.

(2) An agency may bill for contraceptive management services by submitting CVR data or by submitting the CVR form to RH. A claim is considered valid only if all required data are submitted.

(3) An agency may bill RH for supplies through the CVR at actual acquisition cost; that is, the amount or unit cost of the contraceptive supply the agency actually pays to the pharmaceutical manufacturer, supplier or distributor for the contraceptive supplies, after applying any discounts, promotions or other reductions. Shipping and handling may be included in the acquisition cost only if supported by an invoice.

(4) An agency shall include a primary diagnosis code on all claims. All billings must be coded with the most recent and appropriate International Classification of Diseases. All billings must be coded with the diagnosis codes in the Z30 Contraceptive Management series to the highest level of specificity. No other primary diagnosis code can be billed.

(5) An agency may bill RH for laboratory services related to contraceptive management through a fixed rate that includes clinical and laboratory services. The exception to this is the combined gonorrhea/Chlamydia (GC/CT) test occurring in the context of a CCare contraceptive initiation management visit. The combined GC/CT test shall be reimbursed separately from the fixed rate only if the appropriate medical service is indicated on the CVR.

(6) Birth control supplies billable to CCare must be approved by the Authority, be FDA approved, and may include intrauterine devices, cervical caps, oral contraceptives, subdermal implants, condoms, diaphragms, spermicides, patches, rings, injectibles, and emergency contraception.

(7) An agency must ensure that all laboratory tests done at the clinic site or by an outside clinic are conducted by CLIA certified laboratories.

(8) An agency enrolled with CCare must not seek payment from an eligible client, or from a financially responsible relative or representative of that client, for any services covered by CCare. The agency shall accept RH reimbursement for any CCare-covered services, pharmaceuticals, devices, or supplies as payment in full.

(a) If an agency has misrepresented client eligibility for services, the agency must assume responsibility for the full cost of services provided.

(b) A client may be billed for services that are not covered by CCare as outlined in the CCare enrollment form.

(9) Upon submission of a claim to RH for payment, the agency attests that it has complied with all rules of CCare.

(a) Except for services performed by a CLIA certified laboratory outside of the clinic, all billings must be for services provided within the agency and its provider's licensure or certification.

(b) It is the responsibility of an agency to submit true and accurate information when billing CCare.

(c) A claim may not be submitted prior to providing services.

(10) No agency shall submit to RH:

(a) Any false claim for payment;

(b) Any claim altered in such a way as to result in a payment for a service that has already been paid; or

(c) Any claim upon which payment has been made by another source unless the amount paid is clearly entered on the claim form.

(11) An agency is required to correct the billing error or to refund the amount of the overpayment, on any claim where the agency identifies an overpayment made by RH.

(12) An agency that, after having been previously warned in writing by the Authority or the Department of Justice regarding findings of improper billing practices as described in OAR 333-004-0140, is found to have continued such improper billing practices and has had an opportunity for a contested case hearing, shall be liable to RH for up to triple the amount of the established overpayment received as a result of such violation.

(13) Third Party Resources. The following subsections apply only to clients with private insurance coverage.

(a) Federal law requires that all reasonable efforts be taken to ensure that CCare is the payor of last resort, unless a client requests special confidentiality which must be documented on the CCare enrollment form. A client's request for special confidentiality ensures that the agency must not bill third party resources, but instead must bill CCare directly.

(b) An agency must make reasonable efforts to obtain payment from other resources before billing CCare. For the purposes of this rule "reasonable efforts" include:

(A) Determining the existence of insurance or other resource by asking the client.

(B) When third party coverage is known to the agency, prior to billing CCare:

(i) The agency must bill the third party resource; and

(ii) Resubmit a denied claim when the service is payable in whole or in part by an insurer.

(c) If the client has private insurance that has been billed for CCare services and the reimbursement from the insurance does not cover the entire cost of the services, the balance may be billed to CCare.

(d) An agency must report the reimbursement received from insurance, including both services and supplies, on box 17A, 2 of the CVR. The exact amount received from the insurance company must be reported in total.

(e) The CCare payment to the agency after the agency has received third party payment may not exceed the total of what CCare would pay for both services and supplies. The total amount of service and supply minus the amount paid by the primary insurance is the amount the agency shall be reimbursed.

(f) If third-party payment is received after CCare has been billed, agencies are required to submit a billing correction showing the amount of the third party payment or to refund the amount received from another source within 30 days of the date the payment is received. Failure to submit a billing correction within 30 days of receipt of the third party payment or to refund the appropriate amount within this time frame is considered concealment of material facts and grounds for recovery or sanction.

333-004-0100
Timely Submission of Claims

(1) CCare claims are processed once a month, on or near the 15th of the month. To be included in a given month's processing, an agency must submit a claim to RH and RH must receive the claim by the Thursday before the 15th of each month.

(2) RH shall pay CCare claims within 12 months of the date of service. Claims submitted more than 12 months after the date of service shall be rejected.

(3) Errors causing rejection of any claim must be resolved by the agency within 12 months of the date of service. Claims older than 12 months submitted by the agency to RH shall not be paid, except when RH has made an error that caused the agency not to be able to bill within 12 months of the date of service. The error must be confirmed by RH before the claim shall be paid.

(4) Client data not related to payment of the claim may be corrected by the agency at any time after the date of service.

333-004-0110
Payment

(1) RH shall make payment only to an enrolled agency that actually performs the services for eligible clients.

(2) The reimbursement rates for CCare visits are set by RH and are available online at www.healthoregon.org/rhmaterials by selecting "Program Manuals," and then selecting "Section C, Exhibit 8." Claims are reimbursed at the rates in effect on the date of service.

(3) Contraceptive pharmaceuticals, devices and supplies are separately reimbursed at acquisition cost as described in OAR 333-004-0080(3), up to a set maximum amount, and are available online at www.healthoregon.org/rhmaterials by selecting "Program Manuals," and then selecting "Section C, Exhibit 8."

(4) The combined gonorrhea/Chlamydia test is reimbursed separately from the visit.

(5) RH may not make payment on claims that have been assigned, sold, or otherwise transferred, or on which an agency of billing services receives a percentage of the amount billed or payment authorized. This includes, but is not limited to, transfer to a collection agency or party who advances money to an agency for accounts receivable.

(6) RH shall only pay for services that are adequately documented and for contraceptive supply costs that are supported by invoice.

333-004-0120
Requirements for Financial, Clinical and Other Records

(1) RH is responsible for analyzing and monitoring the operation of CCare and for auditing and verifying the accuracy and appropriateness of payment, utilization of services, the quality of care, and access to care. An agency shall:

(a) Develop and maintain adequate financial and clinical records and other documentation that supports the services for which payment has been requested.

(b) Document the service provided, primary diagnosis code for the services, the date on which the service was provided, and the agency staff who provided the services in every medical record. Client account and financial records must also include documentation of charges, identification of other payment resources pursued, the date and amount of all debit or credit billing actions, and support the appropriateness of the amount billed and paid. The records must be accurate and in sufficient detail to substantiate the data reported.

(c) Sufficiently document that the client's purpose of visit was primarily for contraceptive management services. The client's record must be annotated each time a service is provided and signed or initialed by the agency staff that provided the service or must clearly indicate the agency staff that provided the service. Information contained in the record must meet the standards of care for contraceptive management services as described in OAR 333-004-0060, and must be appropriate in quality and quantity to meet the professional standards applicable to the provider and any additional standards for documentation found in this rule.

(2) An agency must have policies and procedures to ensure the maintenance of the confidentiality of medical record information. These procedures must ensure that the agency may release such information in accordance with federal and state statutes, including but not limited to ORS 179.505 through 179.507, 413.175, 42 CFR part 2, if applicable, 42 CFR subpart F, and ORS 433.045 with respect to HIV test information.

(3) An agency must retain clinical records for seven years and financial and other records described in this rule for at least five years from the date of service. Original enrollment records must be retained for seven years.

(4) Upon written request from RH, the Division of Medical Assistance Programs, the Authority, the Oregon Department of Justice Medicaid Fraud Unit, the Oregon Secretary of State or their authorized representatives (requestor), an agency must furnish requested documentation, without charge, immediately or within the time-frame specified in the written request.

(5) If an agency fails to comply with requests for records within the specified timeframes it may result in the Authority deeming those records not to exist for purposes of verifying appropriateness of payment, medical appropriateness, the quality of care, and the access to care in an audit or overpayment determination, and accordingly subjects the agency to possible denial or recovery of payments made by the Authority, or to sanctions.

(6) The agency, and any officers, employees, agents, and subcontractors of the agency shall comply with the following requirements for the CCare Eligibility Database:

(a) Implement security measures that reasonably and appropriately provide administrative, physical and technical safeguards that protect the confidentiality, integrity and availability of the CCare Eligibility Database. The agency's security measures must be documented in writing and be available for review by RH upon request. RH review of the reasonableness of security measures, as well as the agency's compliance with RH assigned access control or security requirements, shall take into account the agency's physical, administrative, and technical capabilities related to security measures and the potential risk of unauthorized use or disclosure of the CCare Eligibility Database by the agency, its officers, employees, agents or subcontractors;

(b) Prevent any unauthorized access to or disclosure of information from the CCare Eligibility Database;

(c) Take necessary actions to comply with RH determinations of the level of access that may be granted, as well as changes in level of access, or suspension or termination of access as determined by RH;

(d) Keep any RH-assigned access control requirements such as identification of authorized user(s) and access-control information in a secure location until access is terminated; monitor and securely maintain access by the agency and its agents or subcontractors in accordance with security requirements or access controls assigned by RH; and make available to RH upon request all information about the agency's use or application of the CCare Eligibility Database.

(e) Report any privacy or security incidents by the agency, its officers, employees, agents or subcontractors that compromise, damage, or cause a loss of protection to the CCare Eligibility Database, as follows:

(A) Report to RH in writing within five business days of the date on which the agency becomes aware of such incident; and

(B) Provide RH the results of the incident assessment findings and resolution strategies.

(7) The agency must comply with RH requests for corrective action concerning a privacy or security incident, and with laws

requiring mitigation of harm caused by the unauthorized use or disclosure of confidential information, if any.

(8) If RH determines that the agency's security measures or actions required under section (7) of this rule are inadequate to address the security requirements, RH shall notify the agency. RH and the agency may meet to discuss appropriate security measures or action. If security measures or corrective actions acceptable to RH cannot be agreed upon, RH reserves the right to take such actions as it determines appropriate under the circumstances. Actions may include, but are not limited to, restricting access, or amending or terminating the agency agreement.

(9) RH reserves the right to request additional information from the agency related to security measures, and to change, suspend or terminate access to or use of the CCare Eligibility Database by the agency, its officers, employees, agents or subcontractors.

(10) Wrongful use or disclosure of the CCare Eligibility Database by the agency, officers, its employees, agents or its subcontractors may cause the immediate suspension or revocation of any access granted, in the sole discretion of RH. RH may also pursue any other legal remedies provided under the law.

333-004-0130
Compliance with Federal and State Statutes

(1) Submission of a claim for medical services or supplies provided to a CCare client shall be deemed a representation by the agency to RH of the agency's compliance with the applicable sections of the federal and state statutes referenced in this rule:

(a) 45 CFR Part 84 that implements Title V, Section 504 of the Rehabilitation Act of 1973;

(b) Title II and Title III of the Americans with Disabilities Act of 1991;

(c) Title VI of the Civil Rights Act of 1964; and

(d) 42 CFR Part 493 Laboratory Requirements and ORS Chapter 438 (Clinical Laboratories).

(2) Agencies are required to comply with the "Health Insurance Portability and Accountability Act" (HIPAA) regarding the confidentiality of client records.

(3) Providers described in ORS Chapter 419B are required to report suspected child abuse to their local child welfare office of the Department of Human Services or police, in the manner described in ORS Chapter 419B.

(4) The Clinical Laboratory Improvement Act (CLIA), requires all entities that perform even one laboratory test, including waived tests on, "materials derived from the human body for the purpose of providing information for the diagnosis, prevention or treatment of any disease or impairment of, or the assessment of the health of, human beings" to meet certain federal requirements. If an entity performs tests for these purposes, it is considered under CLIA to be a laboratory.

(5) Clinics that dispense contraceptive methods on-site must be licensed by the Oregon Board of Pharmacy as described in OAR 855-043-0001 through 855-043-0310.

333-004-0140
Review or Audit of Claims

(1) RH staff, contractor or auditor may review a claim for assurance that the specific medical service or contraceptive device or supply was provided by an agency in accordance with OAR 333-004-0000 through 333-004-0230 and the Standards of Care for Contraceptive Management Services set forth in 333-004-0060.

(2) To determine the number of inappropriate claims, and subsequently the overpayment amount, RH may review a statistically valid random sample of claims with sufficient sample size for a confidence interval of 95 percent.

(3) RH may deny payment or seek recovery or payment if a review or audit determines the service does not meet RH rules or the Standards of Care for Contraceptive Management Services set forth in OAR 333-004-0060.

(4) RH shall notify the agency, in writing, of the improper billing findings and subsequent actions to be taken by the agency to correct the identified findings and any sanctions that may be imposed by RH.

333-004-0150
Recovery of Overpayments to Agencies Resulting from Review or Audit

(1) When RH determines that an overpayment has been made to an agency, the amount of overpayment is subject to recovery.

(a) If RH determines an overpayment amount by the random sampling method set forth in OAR 333-004-0140(2), an agency may request a 100 percent audit of all billings submitted to CCare for contraceptive management services provided during the period in question.

(b) If an agency requests a 100 percent audit:

(A) The agency is responsible for payment and arrangement; and

(B) The audit must be conducted by a certified public accountant who is knowledgeable with the Oregon Administrative Rules covering the payments in question, and must be conducted within 120 calendar days of the request to use such audit in lieu of RH's random sample.

(2) The amount of the review or audit overpayment to be recovered:

(a) Is the entire amount determined by RH or the amount agreed to by RH and the agency;

(b) Is not limited to amounts determined by criminal or civil proceedings; and

(c) Includes interest charged at allowable state rates.

(3) RH shall deliver to an agency by registered or certified mail or in person a request for repayment of the overpayment and the documentation to support the overpayment amount.

(4) The overpayment is due and payable 30 calendar days from the date of the decision by RH:

(a) An agency may request an additional 30-day grace period from RH.

(b) A request for a hearing does not change the date the repayment of the overpayment is due.

(5) RH may extend the reimbursement period for an agency or accept an offer of repayment terms from an agency. Any change in reimbursement period or terms must be made in writing by the RH.

(6) If the agency refuses to reimburse the overpayment or does not adhere to an agreed upon payment schedule, RH may:

(a) Recoup future agency payments up to the amount of the overpayment;

(b) Suspend or terminate the agency's enrollment in CCare; or

(c) Pursue civil action to recover the overpayment.

(7) RH may, at any time, change the amount of the overpayment upon receipt of additional information. RH shall notify an agency in writing of any changes. Any monies paid to RH by an agency that exceed an overpayment shall be refunded to the agency.

(8) If an agency is terminated or sanctioned for any reason, RH may pursue civil action to recover any amounts due and payable to CCare.

333-004-0160
Provider Sanctions

The following are conditions that may result in the imposition of a sanction on an agency.

(1) Basis for sanction:

(a) Conviction of a provider of a felony or misdemeanor related to a crime or violation of Title XVIII, XIX, or XX of the Social Security Act or related state laws (or entered a plea of nolo contendere);

(b) Conviction of fraud related to any federal, state, or locally financed health care program or commission of an act that is subject to criminal or civil penalties under Medicaid statutes;

(c) Conviction of interference with the investigation of health care fraud;

(d) Conviction of unlawfully manufacturing, distributing, prescribing, or dispensing a controlled substance;

(e) Failure to comply with the state and federal statutory requirements set forth in OAR 333-004-0130;

(f) An action by a state licensing authority relating to a provider's professional competence, professional conduct, or financial integrity, that results in the provider either:

(A) Having his or her license suspended or revoked; or

(B) Surrendering the license while a formal disciplinary proceeding was pending before a licensing authority.

(g) Suspension or exclusion from participation in a federal or state-administered health care program for reasons related to professional competence, professional performance, or other reason;

(h) Improper billing practices, including billing for excessive charges or visits, furnishing items or services substantially in excess of the patient's contraceptive management needs, or of a quality that fails to meet professionally recognized standards;

(i) Failure to furnish services as required by law or contract with the RH;

(j) Failure to supply requested information on subcontractors and suppliers of goods or services;

(k) Failure to supply requested payment information;

(l) Failure to grant access or to furnish as requested, records, or to grant access to facilities upon request of RH or a designated requestor;

(m) Receiving payments for services provided to persons who were not eligible;

(n) Establishing multiple claims using procedure codes that overstate or misrepresent the level, amount or type of health care provided;

(o) Failure to develop, maintain, and retain in accordance with relevant rules and standards adequate clinical or other records that document the medical appropriateness, nature, and extent of the health care provided;

(p) Failure to develop, maintain, and retain in accordance with relevant rules and standards adequate financial records that document charges incurred by a client and payments received from any source;

(q) Failure to follow generally accepted accounting principles or accounting standards or cost principles required by federal or state laws, rule, or regulation;

(r) Submission of claims or written orders contrary to generally accepted standards of medical practice;

(s) Submission of claims for services that exceed that requested or agreed to by the client or the responsible relative or guardian or requested by another medical practitioner;

(t) Breach of the terms of the medical services agreement;

(u) Failure to correct deficiencies in operations after receiving written notice of the deficiencies from RH;

(v) Submission of any claim for payment for which payment has already been made by RH;

(w) Provision of or billing for services provided by ineligible or unsupervised staff; or

(x) Alteration of clinical or billing records that have been requested by RH or a designated requestor.

(2) An agency or any of its providers who have been suspended, terminated, or excluded from participation in a federal or state-administered medical program, such as Medicare or Medicaid, or whose license to practice has been suspended or revoked by a state licensing board, shall not submit claims for payment, either personally or through claims submitted by any billing agency or other agency, for any services or supplies provided under CCare, except those services or supplies provided prior to the date of suspension or termination.

(3) No agency shall submit claims for payment to RH for any services or supplies provided by a person or agency that has been suspended or terminated from participation in a federal or state-administered medical program, such as Medicare or Medicaid, or whose license to practice has been suspended or revoked by a state licensing board, except for those services or supplies provided prior to the date of suspension or termination.

(4) When the provisions of sections (2) or (3) of this rule are violated, RH may suspend or terminate the agency who is responsible for the violation.

(5) Agency sanctions shall be imposed at the discretion of RH or the director of the office whose budget includes payment for the services involved. RH shall notify an agency in writing of any sanction proposed to be imposed that shall explain the agency's appeal rights in accordance with OAR 333-004-0200 through 333-004-0230.

(6) RH shall consider the following factors in determining the sanction(s) to be imposed (this list includes but is not limited to these factors):

(a) Seriousness of the offenses(s);

(b) Extent of violations by the agency;

(c) History of prior violations by the agency;

(d) Prior imposition of sanctions;

(e) Prior agency education; and

(f) Agency willingness to comply with RH rules.

(7) The Division of Medical Assistance Programs shall be notified whenever a sanction is imposed on an agency.

333-004-0200
Agency Appeals

(1) An agency may appeal a RH decision in which the agency is directly adversely affected such as the following:

(a) A denial or limitation of payment allowed for services or items provided;

(b) A denial of an application for new or continued participation in CCare;

(c) Sanctions imposed, or intended to be imposed, by RH on an agency; or

(d) RH overpayment determinations made under OAR 333-004-0150.

(2) An agency appeal is initiated by filing a timely request in writing for review with RH.

(a) An agency appeal request is not required to follow a specific format as long as it provides a clear written expression from an agency expressing disagreement with a RH decision.

(b) The request must identify the decision made by RH that is being appealed and the reason the agency disagrees with that decision.

(c) An agency appeal request is timely if it is received by RH within 60 calendar days of the date of RH's decision.

(3) Types and methods for agency appeals are as follows:

(a) A RH denial of or limitation of payment allowed, RH claim decision, or RH overpayment determination for services or items provided to a client must be appealed as claim re-determinations under OAR 333-004-0210.

(b) A notice of sanctions imposed, or intended to be imposed, the effect of the notice of sanction is, or will be, to deny, suspend or revoke an agency's project number necessary to participate in CCare is entitled to appeal under OAR 333-004-0230. An agency that is entitled to appeal a notice of sanction as a contested case may request administrative review instead of a contested case hearing if the agency submits a written request for administrative review of the notice of sanction and agrees in writing to waive the right to a contested case hearing, and RH agrees to review the appeal of the notice of sanction as an administrative review.

(c) All agency appeals of RH decisions not described in subsections (3)(a) or (b) of this rule are handled as administrative reviews in accordance with OAR 333-004-0220 unless RH issues an order granting a contested case hearing.

(4) In the event an agency's request for appeal is not timely, RH shall determine whether the failure to file the request was caused by circumstances beyond the control of the agency. In determining whether to accept a late request for review, RH requires the request to be supported by a written statement that explains why the request for review is late. RH may conduct such further inquiry as RH deems appropriate. In determining timeliness of filing a request for review, the amount of time RH determines accounts for circumstances beyond the control of the provider is not counted.

(5) The burden of presenting evidence to support an agency appeal is on the agency.

(a) Consistent with OAR 333-004-0110, payment on a claim shall only be made for services that are adequately documented and billed in accordance with 333-004-0080 and all applicable administrative rules related to covered services for clients and establishing the conditions under which services, supplies or items are covered.

(b) Eligibility for enrollment and for continued enrollment is based on compliance with applicable rules, the information submitted or required to be submitted with the application for enrollment and the enrollment agreement, and the documentation required to be produced or maintained in accordance with OAR 333-004-0120.

(6) Agency appeal proceedings, if any, shall be held in Portland, unless otherwise stipulated to by all parties and agreed to by RH.

333-004-0210
Claim Re-Determination

(1) If an agency disagrees with an initial claim determination, it may request a review for re-determination of the denied claim payment. The request to open an initial claim determination for a re-determination review must be made through RH in writing, within 60 days from the date of the RH original claim adjudication date.

(2) All requests must contain a detailed letter of explanation identifying the specific re-determination denial issue and alleged error. This information must be submitted to RH at the time of the request.

(3) At the time the request for re-determination is made an agency is responsible for providing the information needed to adjudicate its claim, including relevant medical records and evidence-based practice data to support the position being asserted on review. RH may request additional information that it finds relevant to the review. An agency requesting a re-determination review must include the following:

(a) The specific service, supply or item being denied, and include all relevant codes and a detailed justification for the re-determination of the denied service;

(b) A copy of the original claim and a copy of the original denial notice or remittance advice that describes the basis for the claim denial under re-determination; and

(c) Any information or medical documentation pertinent to support the request and to obtain a resolution of the re-determination review dispute.

(4) A re-determination review is based on RH review of documentation and applicable law. RH does not provide a face-to-face meeting with an agency as part of the re-determination process.

(a) The agency is responsible for the timely submission of review request and all information pertinent to conducting the review and consistent with the requirements of this rule.

(b) RH shall notify an agency requesting review that the re-determination request has been denied if:

(A) The agency did not submit a timely request;

(B) The required information is not provided at the same time the request is submitted; or

(C) The agency fails to submit any additional requested information within 14 business days of request.

(5) RH's final decision under this rule is the final decision on appeal. Under ORS 183.484, this decision is an order in other than a contested case. ORS 183.484 and the procedures in OAR 137-004-0080 through 137-004-0092 apply to RH's final decision under this rule.

333-004-0220
Agency Appeals — Administrative Review

(1) An administrative review is an agency appeal process that allows an opportunity for the Center administrator or designee to review a RH decision affecting the agency, where administrative review is appropriate and consistent with OAR 333-004-0200, Agency Appeals.

(2) Administrative review is an appeal process under OAR 333-004-0200 that addresses primarily legal or policy issues that may arise in the context of a RH decision that adversely affects the agency and that is not otherwise reviewed as a claim re-determination, a contested case, or client appeal.

(a) If RH finds that the appeal shall be handled as a different form of agency appeal the Center administrator or designee shall notify the agency of this determination.

(b) Within the time limits established by RH in the administrative review, the agency must provide RH with a copy of all relevant records, the RH decision, and other materials relevant to the appeal.

(3) If the Center administrator or designee decides that a meeting between the agency and RH staff shall assist the review, the Center administrator or designee shall notify the agency requesting the review of the date, time, and place the meeting is scheduled.

(4) The review meeting shall be conducted in the following manner:

(a) It shall be conducted by the Center administrator or designee;

(b) No minutes or transcript of the review shall be made;

(c) The agency requesting the review does not have to be represented by counsel during an administrative review meeting and shall be given ample opportunity to present relevant information;

(d) RH staff shall not be available for cross-examination but RH staff may attend and participate in the review meeting;

(e) Failure to appear without good cause constitutes acceptance of RH's determination;

(f) The Center administrator may combine similar administrative review proceedings, including the meeting, if the Center administrator determines that joint proceedings may facilitate the review; and

(g) The Center administrator or designee may request the agency making the appeal to submit, in writing, new information that has been presented orally. In such an instance, a specific date for receiving such information shall be established.

(5) The results of the administrative review shall be sent to the agency, in writing, within 30 calendar days of the conclusion of the administrative review proceeding, or such time as may be agreed to by the agency and RH.

(6) RH's final decision on administrative review is the final decision on appeal and binding on the parties. Under ORS 183.484, this decision is an order in other than a contested case. ORS 183.484 and the procedures in OAR 137-004-0080 through 137-004-0092 apply to the Authority's final decision on administrative review.

333-004-0230
Agency Appeals — Contested Case Hearings

(1) A contested case procedure is a hearing that is conducted by the Office of Administrative Hearings where a contested case is

appropriate and consistent with OAR 333-004-0200, Agency Appeals. If the request for contested case hearing was timely filed but should have been filed as a claim re-determination, administrative review, or client appeal, RH shall refer the request to the proper appeal procedure and notify the agency.

(2) Contested case hearings are conducted in accordance with the Attorney General's Model Rules, OAR 137-003-0501 through 137-003-0700.

(3) The party to an agency contested case hearing is the agency who requested the appeal. An agency that is a corporation may be represented by any of the persons identified in ORS 413.041.

(4) Informal conference. RH may notify the agency of the time and place of an informal conference, without the presence of the Administrative Law Judge (ALJ). The purposes of the informal conference are:

(a) To provide an opportunity to settle the matter;

(b) To make sure the agency and RH understand the specific reason for the action of the hearing request;

(c) To give the agency and RH an opportunity to review the information that is the basis for action; and

(d) To give the agency and RH the chance to correct any misunderstanding of the facts.

(5) The agency may, at any time prior to the hearing date, request an additional informal conference with RH that may be granted if RH finds, at its sole discretion, the additional informal conference shall facilitate the contested case hearing process or resolution of disputed issues.

(6) Contested case hearing. The ALJ shall conduct the contested case hearing using the Attorney General's Model Rules, OAR 137-003-0501 through 137-003-0700.

(a) The burden of presenting evidence to support an agency appeal is on the agency that requested the appeal. Consistent with OAR 333-004-0110, payment on a claim shall only be made for services that are adequately documented and billed in accordance with OAR 333-004-0080 and all applicable administrative rules related to covered services for the client.

(b) Subject to RH approval under OAR 137-003-0525, the ALJ shall determine the location of the contested case hearings.

(7) Proposed and final orders. The ALJ is authorized to serve a proposed order on all parties and the RH unless, prior to the hearing, RH notifies the ALJ that a final order may be served by the ALJ.

(a) If the ALJ issues a proposed order, and the proposed order is adverse to a party, the party may file written exceptions to the proposed order to be considered by RH, or the ALJ when the ALJ is authorized to issue the final order. The exceptions must be in writing and received by RH or the ALJ, when the ALJ is authorized to issue the final order, not later than 10 calendar days after the date the proposed order is issued by the ALJ. No additional evidence may be submitted without prior approval of RH.

(b) The proposed order issued by the ALJ shall become a final order if no exceptions are filed within the time specified in subsection (a) of this section, unless RH notifies the parties and the ALJ that RH shall issue the final order. After receiving the exceptions or argument, if any, RH may adopt the proposed order as the final order or may prepare a new order. Prior to issuing the final order, RH may issue an amended proposed order.

(c) Procedures applicable to default orders for withdrawal of a hearing request, failure to timely request a hearing, failure to appear at a hearing, or other default, are governed by the Attorney General's Model Rules, OAR 137-003-0670 through 137-003-0672.

(d) The final order is effective immediately upon being signed or as otherwise provided in the order.

(8) All contested case hearing decisions are subject to the procedures established in OAR 137-003-0675 through 137-003-0700 and to judicial review under ORS 183.482 in the Court of Appeals.

DIVISION 7

MARIJUANA LABELING, CONCENTRATION LIMITS, AND TESTING

Labeling

333-007-0010
Purpose, Scope and Effective Date

(1) The purpose of OAR 333-007-0010 through 333-007-0100 is to set the minimum standards for the labeling of marijuana items that are sold to a consumer, patient or designated primary caregiver. These minimum standards are applicable to:

(a) A Commission licensee as that is defined in OAR 845-025-1015; and

(b) A person registered with the Authority under ORS 475B.400 to 475B.525 who is not exempt from the labeling requirements as described in section (2) of this rule.

(2) The labeling requirements in these rules do not apply to:

(a) A grower if the grower is transferring usable marijuana or an immature marijuana plant to:

(A) A patient who designated the grower to grow marijuana for the patient; or

(B) A designated primary caregiver of the patient who designated the grower to grow marijuana for the patient.

(b) A designated primary caregiver of a patient if the caregiver is transferring a marijuana item to a patient of the designated primary caregiver.

(3) Nothing in these rules prohibits the Commission or the Authority from:

(a) Imposing additional labeling requirements in their respective rules governing licensees and registrants as long as those additional labeling requirements are not inconsistent with these rules; or

(b) Requiring licensees or registrants to provide informational material to a consumer, patient or designated primary caregiver at the point of sale.

(4) A person licensed by the Commission must comply with these rules at all times.

(5) On and after October 1, 2016:

(a) A marijuana item received or transferred by a dispensary must meet the labeling requirements in these rules; and

(b) A dispensary may not transfer a marijuana item that does not meet the labeling requirements in these rules.

(6) By October 1, 2016, a dispensary must:

(a) Transfer marijuana items that do not meet the labeling requirements in these rules to a patient or caregiver;

(b) Return any marijuana item that does not meet labeling requirements in these rules to the individual who transferred the item to the dispensary, and document who the item was returned to, what was returned and the date of the return; or

(c) Dispose of any marijuana item that does not meet labeling requirements and that cannot be returned in accordance with subsection (b) of this section, in a manner specified by the Authority.

(7) A marijuana item that was transferred to a registered dispensary prior to October 1, 2016 is not required to:

(a) Have a label with a harvest date, harvest lot number, date the product was made or the process lot number if that information is not known by the dispensary.

(b) Have gone through the Commission's pre-approval process for packaging and labeling, but still must meet the labeling requirements in OAR 333-007-0010 to 333-007-0100 and the packaging requirements in OAR 845-025-7000 to 845-025-7020 and 845-025-7060.

333-007-0020
Definitions

For the purposes of OAR 333-007-0100 through 333-007-0100, unless otherwise specified:

(1) "Activation time" means the amount of time it is likely to take for an individual to begin to feel the effects of ingesting or inhaling a marijuana item.

(2) "Authority" means the Oregon Health Authority.

(3) "Cannabinoid concentrate or extract" means a substance obtained by separating cannabinoids from marijuana by a mechanical, chemical or other process.

(4)(a) "Cannabinoid edible" means:

(A) Food or potable liquid into which a cannabinoid concentrate or extract or the dried leaves or flowers of marijuana have been incorporated; or

(B) For purposes of labeling, includes any cannabinoid concentrate, extract or cannabinoid product that is intended for human consumption or marketed in a manner that implies the item is for human consumption.

(b) For purposes of labeling "cannabinoid edible" does not include a cannabinoid tincture.

(5)(a) "Cannabinoid product" means a cannabinoid edible or any other product intended for human consumption or use, including a product intended to be applied to a person's skin or hair, that contains cannabinoids or the dried leaves or flowers of marijuana.

(b) "Cannabinoid product" does not include:

(A) Usable marijuana by itself;

(B) A cannabinoid concentrate or extract by itself; or

(C) Industrial hemp, as defined in ORS 571.300.

(6) "Cannabinoid tincture" means a solution of alcohol, cannabinoid concentrate or extract, and perhaps other ingredients intended for human consumption or ingestion, and that is exempt from the Liquor Control Act under ORS 471.035.

(7) "Cannabinoid topical" means a cannabinoid product intended to be applied to skin or hair.

(8) "CBD" means cannabidiol.

(9) "Commission" means the Oregon Liquor Control Commission.

(10) "Consumer" has the meaning given that term in ORS 475B.015 and does not include a patient or designated primary caregiver.

(11) "Container"

(a) Means a sealed, hard or soft-bodied receptacle in which a marijuana item is placed.

(b) Does not mean inner wrapping or packaging that is not intended to display the marijuana item for sale to a consumer.

(12) "Date of harvest" means the date the mature marijuana plants in a harvest lot were removed from the soil or other growing media. If the harvest occurred on more than one day, the "date of harvest" is the day the last mature marijuana plant in the harvest lot was removed from the soil or other growing media.

(13) "Delta-9 THC" is the principal psychoactive constituent (the principal cannabinoid) of cannabis.

(14)(a) "Designated primary caregiver" means an individual:

(A) Who is 18 years of age or older;

(B) Who has significant responsibility for managing the well-being of a person who has been diagnosed with a debilitating medical condition; and

(C) Who is designated as the person responsible for managing the well-being of a person who has been diagnosed with a debilitating medical condition on that person's application for a registry identification card or in other written notification submitted to the Authority.

(b) "Designated primary caregiver" does not include a person's attending physician.

(15) "Food" means a raw, cooked, or processed edible substance, or ingredient used or intended for use or for sale in whole or in part for human consumption, or chewing gum.

(16) "Grower" has the same meaning as "person responsible for a marijuana grow site."

(17) "Harvest lot" means marijuana that is uniform in strain, cultivated utilizing the same growing practices and harvested at the same time.

(18) "Human consumption" means to ingest, generally through the mouth, food, drink or other substances such that the substance enters the human body but does not include inhalation.

(19) "Licensee" has the meaning given that term in ORS 475B.015.

(20) "Major food allergen" means an ingredient that is one of the five foods listed in subsections (a) to (e) of this section, or from one of the three food groups listed in subsections (f) to (h) of this section, or is an ingredient that contains protein derived from one of the following:

(a) Milk;

(b) Egg;

(c) Fish;

(d) Crustacean shellfish;

(e) Tree nuts;

(f) Wheat;

(g) Peanuts; and

(h) Soybeans.

(21)(a) "Marijuana" means the plant Cannabis family Cannabaceae, any part of the plant Cannabis family Cannabaceae and the seeds of the plant Cannabis family Cannabaceae.

(b) "Marijuana" does not include industrial hemp, as defined in ORS 571.300.

(22) "Marijuana item" means marijuana, usable marijuana, a cannabinoid product, or a cannabinoid concentrate or extract.

(23) "Medical grade cannabinoid product, cannabinoid concentrate or cannabinoid extract" means a cannabinoid product, cannabinoid concentrate or cannabinoid extract that has a concentration of THC that is permitted under ORS 475B.625 in a single serving of the cannabinoid product, cannabinoid concentrate or cannabinoid extract for a patient.

(24) "Medical grade symbol" means the image established by the Authority and made available to licensees indicating the cannabinoid product, concentrate or extract may only be sold or transferred to a designated primary caregiver or patient, for use only by a patient.

(25) "Medical marijuana dispensary" means a facility registered under ORS 475B.450.

(26) "Net weight" means the gross weight minus the tare weight of the packaging.

(27) "Package unique identification number" mean the unique identification number that was generated by the Commission's seed to sale tracking system at the time the marijuana item was packaged and labeled for sale to the consumer, patient, or designated primary caregiver.

(28) "Patient" has the same meaning as "registry identification cardholder."

(29) "Person responsible for a marijuana grow site" means a person who has been selected by a patient to produce medical marijuana for the patient, and who has been registered by the Authority for this purpose and has the same meaning as "grower."

(30) "Place of address" means the name, mailing address, city, state and zip code of the processor who made the cannabinoid edible.

(31) "Principal display panel" means the part of a label on a package or container that is most likely to be displayed, presented, shown or seen under customary conditions of display for sale or transfer.

(32) "Processor" means a person:

(a) Licensed by the Commission to process marijuana under ORS 475B.090; or

(b) Registered with the Authority under ORS 475B.435 as a processing site and who is not exempt from labeling requirements under ORS 475B.605

(33) "Process lot" means:

(a) Any amount of cannabinoid concentrate or extract of the same type and processed at the same time using the same extraction methods, standard operating procedures and batches from the same or different harvest lots; or

(b) Any amount of cannabinoid products of the same type and processed at the same time using the same ingredients, standard

operating procedures and batches from the same or different harvest lots or process lots of cannabinoid concentrate or extract.

(34) "Producer" means a person:

(a) Licensed by the Commission to produce marijuana under ORS 475B.070; and

(b) Registered with the Authority under ORS 475B.420 as a grower and who is not exempt from labeling requirements under ORS 475B.605.

(35) "Product identity" means a truthful or common name of the product that is contained in the package.

(36) "Registrant" means a person registered with the Authority under ORS 475B.400 to 475B.525.

(37) "Registry identification cardholder" means a person to whom a registration card has been issued under ORS 475B.415.

(38)(a) "Test batch" means a group of test samples that are collectively submitted to a laboratory for testing purposes.

(b) "Test batch" does not mean a combination of marijuana flowers, marijuana leaves, cannabinoid products, or cannabinoid concentrate or extract.

(39) "Test sample" means anything collected by an individual authorized by the Authority to collect a sample from a licensee or registrant that is provided to a laboratory for testing, including but not limited to marijuana items, soil, growing medium, water, solvent or swab of a counter or equipment.

(40) "THC" means tetrahydrocannabinol and has the same meaning as delta-9 THC.

(41) "These rules" means OAR 333-007-0010 through 333-007-0100.

(42) "Universal symbol" means the image, established by the Authority and made available to licensees and registrants, indicating the marijuana item contains marijuana.

(43)(a) "Usable marijuana" means the dried leaves and flowers of marijuana.

(b) "Usable marijuana" does not include:

(A) The seeds, stalks and roots of marijuana; or

(B) Waste material that is a by-product of producing or processing marijuana.

Marijuana Plant Labeling Requirements

Prior to a marijuana plant being sold or transferred to a consumer, patient or designated primary caregiver a tag or label must be affixed to the plant or plant container that has the following information:

(1) Producer's business or trade name and licensee or registrant number;

(2) Business or trade name of licensee or registrant that packaged or distributed the product, if different from the producer;

(3) Name of the strain; and

(4) Universal symbol.

Marijuana Seed Labeling Requirements

Prior to marijuana seeds being sold or transferred to a consumer, patient or designated primary caregiver the container holding the seeds must have a label that has the following information:

(1) Producer's business or trade name and licensee or registrant number;

(2) Business or trade name of licensee or registrant that packaged or distributed the product, if different from the producer;

(3) Name of the strain of seed;

(4) Date of harvest;

(5) Number of seeds or net weight in U.S. customary and metric units as appropriate; and

(6) Universal symbol.

333-007-0050
Usable Marijuana Labeling Requirements

Prior to usable marijuana being sold or transferred to a consumer, patient or designated primary caregiver the container holding the usable marijuana must have a label that has the following information:

(1) Producer's business or trade name and licensee or registrant number;

(2) Business or trade name of licensee or registrant that packaged or distributed the product, if different from the producer;

(3) For licensees, package unique identification number and for registrants, harvest lot number;

(4) Date of harvest;

(5) Name of strain;

(6) Net weight in U.S. customary and metric units;

(7) Concentration of THC and CBD, as calculated under OAR 333-064-0100;

(8) Activation time expressed in words or through a pictogram;

(9) Name of the lab that performed any test, any associated test batch number and any test analysis date;

(10) Universal symbol;

(11) For usable marijuana for sale to a consumer warnings that state:

(a) "For use by adults 21 and older. Keep out of reach of children."

(b) "It is illegal to drive a motor vehicle while under the influence of marijuana."

(12) For usable marijuana for use by a patient warnings that state:

(a) "For use by OMMP patients only. Keep out of reach of children."

(b) "It is illegal to drive a motor vehicle while under the influence of marijuana."

Cannabinoid Topical Labeling Requirements

Prior to a cannabinoid topical product being sold or transferred to a consumer, patient or designated primary caregiver the container holding the cannabinoid product must have a label that has the following information:

(1) Processor's business or trade name and licensee or registrant number;

(2) Business or trade name of licensee or registrant that packaged or distributed the product, if different from the processor;

(3) For licensees, package unique identification number and for registrants, process lot number;

(4) Product identity (common or usual name);

(5) Date the product was made;

(6) Net weight or volume in U.S. customary and metric units;

(7) Amount suggested for use by the consumer or patient at any one time;

(8) Concentration or amount by weight or volume of THC and CBD in the container;

(9) List of ingredients in descending order or predominance by weight or volume used to process the cannabinoid topical;

(10) Activation time, expressed in words or through a pictogram;

(11) Name of the lab that performed any test, any associated test batch number and any test analysis date;

(12) Universal symbol;

(13) For licensees, a medical grade symbol if applicable;

(14) A statement that reads: "This product is not approved by the FDA to treat, cure, or prevent any disease";

(15) For cannabinoid topicals for sale to a consumer warnings that state:

(a) "For use only by adults 21 and older. Keep out of reach of children."

(b) "DO NOT EAT" in bold, capital letters.

(16) For cannabinoid topicals for use by a patient warnings that state:

(a) "For use by OMMP patients only. Keep out of reach of children."

(b) "DO NOT EAT" in bold, capital letters.

333-007-0070
Cannabinoid Edible Labeling Requirements

Prior to a cannabinoid edible being sold or transferred to a consumer, patient or designated primary caregiver the container holding the edible must have a label that has the following information:

(1) Processor's business or trade name, place of address, and licensee or registrant number;

(2) Business or trade name and place of address of licensee or registrant that packaged or distributed the product, if different from the processor;

(3) Product identity (common or usual name);

(4) For licensees, package unique identification number and for registrants, process lot number;

(5) Date the edible was made;

(6) Net weight or volume in U.S. customary and metric units;

(7) Serving size and number of servings per container;

(8) Concentration or amount by weight or volume of THC and CBD in each serving and in each container;

(9) List of all ingredients in descending order of predominance by weight or volume used to process the cannabinoid edible;

(10) List of potential major food allergens:

(a) Using a "contains" statement to summarize the major food allergen information at the end of or immediately adjacent to the ingredient list; or

(b) Placing the term for the appropriate major food allergen in parenthesis within the ingredient list after the common or usual name of the ingredient derived from that major food allergen;

(11) The amount, in grams, of sodium, sugar, carbohydrates and total fat per serving;

(12) If the edible is perishable, a statement that the edible must be refrigerated or kept frozen;

(13) Name of the lab that performed any test, any associated test batch number and any test analysis date;

(14) Activation time, expressed in words or through a pictogram;

(15) Universal symbol;

(16) For licensees, a medical grade symbol if applicable;

(17) A statement that reads: "This product is not approved by the FDA to treat, cure, or prevent any disease";

(18) For cannabinoid edibles for sale to a consumer warnings that state:

(a) "For use only by adults 21 and older. Keep out of reach of children."

(b) "It is illegal to drive a motor vehicle while under the influence of marijuana."

(c) "BE CAUTIOUS" in bold, capital letters, followed by "Cannabinoid edibles can take up to 2 hours or more to take effect."

(19) For cannabinoid edibles for use by a patient warnings that state:

(a) "For use by OMMP patients only. Keep out of reach of children."

(b) "It is illegal to drive a motor vehicle while under the influence of marijuana."

(c) "BE CAUTIOUS" in bold, capital letters, followed by "Cannabinoid edibles can take up to 2 hours or more to take effect."

333-007-0080
Labeling Requirements for Cannabinoid Concentrates and Extracts

Prior to a cannabinoid concentrate or extract being sold or transferred to a consumer, patient or designated primary caregiver the container holding the concentrate or extract must have a label that has the following information:

(1) Processor's business or trade name and licensee or registrant number;

(2) Business or trade name of licensee or registrant that packaged or distributed the product, if different from the processor;

(3) For licensees, package unique identification number and for registrants, process lot number;

(4) Product identity (concentrate or extract);

(5) Date the concentrate or extract was made;

(6) Net weight or volume in U.S. customary and metric units;

(7) If applicable, serving size and number of servings per container or amount suggested for use by the consumer or patient at any one time;

(8) Concentration or amount by weight or volume of THC and CBD in each amount suggested for use and in the container;

(9) Activation time, expressed in words or through a pictogram;

(10) Name of the lab that performed any test, any associated test batch number and any test analysis date;

(11) Universal symbol;

(12) For licensees, a medical grade symbol if applicable;

(13) A statement that reads: "This product is not approved by the FDA to treat, cure, or prevent any disease";

(14) For cannabinoid concentrates and extracts for sale to a consumer warnings that state:

(a) "For use only by adults 21 and older. Keep out of reach of children."

(b) "It is illegal to drive a motor vehicle while under the influence of marijuana."

(c) "DO NOT EAT" in bold, capital letters.

(15) For cannabinoid concentrates and extracts for use by a patient warnings that state:

(a) "For use by OMMP patients only. Keep out of reach of children."

(b) "It is illegal to drive a motor vehicle while under the influence of marijuana."

(c) "DO NOT EAT" in bold, capital letters.

333-007-0083
Cannabinoid Tincture Labeling Requirements

Prior to a cannabinoid tincture being sold or transferred to a consumer, patient or designated primary caregiver the container holding the tincture must have a label that has the following information:

(1) Processor's business or trade name, place of address and licensee or registrant number;

(2) Business or trade name and place of address of licensee or registrant that packaged or distributed the product, if different from the processor;

(3) Product identity (common or usual name);

(4) For licensees, package unique identification number and for registrants, process lot number;

(5) Date the tincture was made;

(6) Net weight or volume in U.S. customary and metric units;

(7) Serving size and number of servings per container;

(8) Concentration or amount by weight or volume of THC and CBD in each serving and in each container;

(9) List of all ingredients in descending order of predominance by weight or volume used to process the cannabinoid tincture;

(10) Name of the lab that performed any test, any associated test batch number and any test analysis date;

(11) Universal symbol;

(12) For licensees, a medical grade symbol if applicable;

(13) Activation time expressed in words or through a pictogram;

(14) A statement that reads: "This product is not approved by the FDA to treat, cure, or prevent any disease";

(15) For cannabinoid tinctures for sale to a consumer warnings that state:

(a) "For use only by adults 21 and older. Keep out of reach of children."

(b) "It is illegal to drive a motor vehicle while under the influence of marijuana."

(16) For cannabinoid tinctures for use by a patient warnings that state:

(a) "For use by OMMP patients only. Keep out of reach of children."

(b) "It is illegal to drive a motor vehicle while under the influence of marijuana."

333-007-0085
Cannabinoid Products Other than Cannabinoid Edibles, Topicals, or Tinctures

Prior to a cannabinoid product other than a cannabinoid edible, topical or tincture being sold or transferred to a consumer, patient or designated primary caregiver the container holding the product must have a label that has the following information:

(1) Processor's business or trade name and licensee or registrant number;

(2) Business or trade name of licensee or registrant that packaged or distributed the product, if different from the processor;

(3) Place of address for the processor and packager, if applicable;

(4) Product identity (common or usual name);

(5) For licensees, package unique identification number and for registrants, process lot number;

(6) Date the product was made;

(7) Net weight or volume in U.S. customary and metric units;

(8) Serving size and number of servings per container;

(9) Concentration or amount by weight or volume of THC and CBD in each serving and in each container;

(10) List of all ingredients in descending order of predominance by weight or volume used to process the cannabinoid product;

(11) Name of the lab that performed any test, any associated test batch number and any test analysis date;

(12) Universal symbol;

(13) For licensees, a medical grade symbol if applicable;

(14) Activation time expressed in words or through a pictogram;

(15) A statement that reads: "This product is not approved by the FDA to treat, cure, or prevent any disease";

(16) For cannabinoid products for sale to a consumer warnings that state:

(a) "For use only by adults 21 and older. Keep out of reach of children."

(b) "It is illegal to drive a motor vehicle while under the influence of marijuana."

(17) For cannabinoid products for use by a patient warnings that state:

(a) "For use by OMMP patients only. Keep out of reach of children."

(b) "It is illegal to drive a motor vehicle while under the influence of marijuana."

333-007-0090
General Label Requirements; Prohibitions; Exceptions

(1) Principal Display Panel.

(a) Every container that contains a marijuana item for sale or transfer to a consumer, patient or designated primary caregiver must have a principal display panel, as that term is defined in OAR 333-007-0020.

(b) If a container is placed within packaging for purposes of displaying the marijuana item for sale or transfer to a consumer, patient or designated primary caregiver, the packaging must have a principal display panel as that term is defined in OAR 333-007-0020.

(c) The principal display panel must contain the product identity, net weight, and universal symbol, if applicable.

(d) If the product is a medical grade cannabinoid product, concentrate or extract processed by a licensee the principal display panel must include the medical grade symbol.

(2) A label required by these rules must:

(a) Be placed on the container and on any packaging that is used to display the marijuana item for sale or transfer to a consumer, patient or designated primary caregiver.

(b) Comply with the National Institute of Standards and Technology (NIST) Handbook 130 (2016), Uniform Packaging and Labeling Regulation, incorporated by reference.

(c) Be in no smaller than 8 point Times New Roman, Helvetica or Arial font;

(d) Be in English, though it can be in other languages; and

(e) Be unobstructed and conspicuous.

(3) A marijuana item may have one or more labels affixed to the container or packaging.

(4) A marijuana item that is in a container that because of its size does not have sufficient space for a label that contains all the information required for compliance with these rules:

(a) May have a label on the container that contains a marijuana item and on any packaging that is used to display the marijuana item for sale or transfer to a consumer, patient or designated primary caregiver that includes at least the following:

(A) Information required on a principal display panel, if applicable for the type of marijuana item;

(B) Licensee or registrant business or trade name and licensee or registrant number;

(C) For licensees, package unique identification number and for registrants, batch or process lot number;

(D) Concentration of THC and CBD; and

(E) Required warnings; and

(b) Must include all other required label information not listed in subsection (4)(a) of this rule on an outer container or package, or on a leaflet that accompanies the marijuana item.

(5) A marijuana item in a container that is placed in packaging that is used to display the marijuana item for sale or transfer to a consumer, patient, or designated primary caregiver must comply with the labeling requirements in these rules, even if the container qualifies for the exception under section (4) of this rule.

(6) The universal symbol:

(a) Must be at least 0.48 inches wide by 0.35 inches high.

(b) May only be used by licensees or registrants.

(c) May be downloaded at www.healthoregon.org/marijuana.

(7) Medical grade symbol. The medical grade symbol must be at least 0.35 inches in diameter.

(8) A label may not:

(a) Contain any untruthful or misleading statements including, but not limited to, a health claim that is not supported by the totality of publicly available scientific evidence (including evidence from well-designed studies conducted in a manner which is consistent with generally recognized scientific procedures and principles), and for which there is significant scientific agreement, among

experts qualified by scientific training and experience to evaluate such claims; or

(b) Be attractive to minors, as that is defined in OAR 845-025-7000.

(9) A marijuana item that falls within more than one category, for example a product that is both a cannabinoid concentrate and cannabinoid edible, must comply with the labeling requirements that apply to both categories, with the exception of the "DO NOT EAT" warning if the product is intended for human consumption or the "BE CAUTIOUS" warning if the effects of the product are customarily felt immediately.

(10) The THC and CBD amount required to be on a label must be the value calculated by the laboratory that did the testing in accordance with OAR 333-064-0100.

(11) If a marijuana item has more than one test batch number, laboratory, or test analysis date associated with the marijuana item that is being sold or transferred, each test batch number, laboratory and test analysis date must be included on a label.

(12) If a marijuana item is placed in a package that is being reused, the old label or labels must be removed and it must have a new label or labels.

(13) A licensee or registrant must have documentation that demonstrates the validity of the calculation of the amount of sodium, sugar, carbohydrates and total fat in a cannabinoid edible and must make that documentation available to the Commission or the Authority upon request.

(14) Exit packaging must contain a label that reads: "Keep out of the reach of children."

Stat. Auth.: ORS 475B.605
Stats. Implemented: ORS 475B.605
Hist.: PH 22-2015(Temp), f. 11-13-15, cert. ef. 1-1-16 thru 6-28-16; PH 21-2016, f. 6-24-16, cert. ef. 6-28-16

333-007-0100
Pre-Approval of Labels

(1) A registrant must submit labels for pre-approval in accordance with OAR 845-025-7060 and must keep all records related to the pre-approval process and provide those records at the request of the Authority.

(2) On and after October 1, 2016, a registrant may not transfer a marijuana item unless the label has been pre-approved in accordance with OAR 845-025-7060, unless pre-approval is not required under OAR 845-025-7060(9) to (12).

(3) A marijuana item that was transferred to a registered dispensary prior to October 1, 2016 is not required to have a label that was pre-approved by the Commission, but must meet the labeling requirements in these rules.

Stat. Auth.: ORS 475B.610
Stats. Implemented: ORS 475B.610

Concentration and Serving Size Limits

333-007-0200
Definitions, Purpose, Scope, Effective Date

(1) In accordance with ORS 475B.625, the Authority must establish, for marijuana items sold or transferred to a consumer, patient or designated primary caregiver through a Commission licensed marijuana retailer or medical marijuana dispensary:

(a) The maximum concentration of THC permitted in a single serving of a cannabinoid product or cannabinoid concentrate or extract; and

(b) The number of servings permitted in a cannabinoid product container or cannabinoid concentrate or extract container.

(2) The concentration of THC permitted under OAR 333-007-0210 through 333-007-0220 must take into account both the amount of Delta-9 THC in the cannabinoid product or cannabinoid concentrate or extract and the amount of tetrahydrocannabinolic acid (THCA) in the cannabinoid product or cannabinoid concentrate or extract that if heated would convert THCA to THC. A cannabinoid product or cannabinoid concentrate or extract that contains a high amount of THCA must meet the concentration limits established in OAR 333-007-0200 through 333-007-0220 even if heated.

(3) The amounts of THC listed on a label are based on an average from samples taken from a harvest or process lot and may not represent the exact amount of THC in a marijuana item purchased by a consumer, patient or designated primary caregiver.

(4) On and after October 1, 2016:

(a) A marijuana item received or transferred by a dispensary must meet the concentration and serving size limits in OAR 333-007-0210 or 333-007-0220, depending on whether the marijuana is available for sale or transfer to a consumer, patient or designated primary caregiver; and

(b) A dispensary may not receive or transfer a marijuana item that does not meet the concentration and serving size limits in OAR 333-007-0210 or 333-007-0220, as applicable.

(5) By October 1, 2016, a dispensary must have either transferred marijuana items that do not meet the concentration and serving size limits in OAR 333-007-0210 or 333-007-0220 to a patient or caregiver or must have returned any marijuana item that does not meet the requirements to the individual who transferred the item to the dispensary, and must document who the item was returned to, what was returned and the amount, and the date of the return.

(6) For purposes of OAR 333-007-0200 through 333-007-0220:

(a) The definitions in OAR 333-007-0020 apply unless otherwise specified.

(b) "Cannabinoid capsule" means a small soluble container, usually made of gelatin, that encloses a dose of a cannabinoid product, concentrate or extract intended for human ingestion.

(c) "Cannabinoid edible" means a food or potable liquid into which a cannabinoid concentrate or extract or the dried leaves or flowers of marijuana have been incorporated.

(d) "Cannabinoid suppository" means a small soluble container designed to melt at body temperature within a body cavity other than the mouth, especially the rectum or vagina containing a cannabinoid product, concentrate or extract.

(e) "Cannabinoid transdermal patch" means an adhesive substance applied to human skin that contains a cannabinoid product, concentrate or extract for absorption into the bloodstream.

(f) "Medical marijuana item" is a marijuana item for sale or transfer to a patient or designated primary caregiver and includes medical grade cannabinoid products, cannabinoid concentrates and cannabinoid extracts.

(g) "Retail adult use marijuana item" is a marijuana item for sale to a consumer.

(h) "Scored" means to physically demark a cannabinoid edible in a way that enables a reasonable person to:

(A) Intuitively determine how much of the product constitutes a single serving; and

(B) Easily physically separate the edible into single servings either by hand or with a common utensil, such as a knife.

333-007-0210
Retail Marijuana Item Concentration and Serving Size Limits

(1) The maximum concentration or amount of THC permitted in a container and the maximum concentration or amount of THC permitted in a serving of a retail adult use marijuana item is listed in Table 1. [Table not included. See ED. NOTE.]

(2) A cannabinoid edible must be scored unless it is not capable of being scored because it is not solid at room temperature in which case the cannabinoid edible must be:

(a) Sold and packaged with a measuring device that measures single servings; or

(b) Placed in packaging that clearly enables a consumer to determine when a single serving has been consumed.

(3) Serving size is as determined by the processor.

(4) A retail adult use marijuana item that does not fall within a category in Table 1 such as cannabinoid suppositories and transdermal patches must meet the concentration and serving size limits applicable to a cannabinoid edible in Table 1.

[ED. NOTE: Tables referenced are available from the agency.]

Stats. Implemented: Sec. 105, ch. 614, OL 2015

Hist.: PH 22-2015(Temp), f. 11-13-15, cert. ef. 1-1-16 thru 6-28-16; PH 21-2016, f. 6-24-16, cert. ef. 6-28-16

333-007-0220
Medical Marijuana Item Concentration Limits

(1) The maximum concentration or amount of THC permitted in a container and the maximum concentration or amount of THC permitted in a serving of a medical marijuana item is listed in Table 2. [Table not included. See ED. NOTE.]

(2) A cannabinoid edible must be scored unless it is not capable of being scored because of its form or because it is not solid at room temperature in which case the cannabinoid edible must be:

(a) Sold and packaged with a measuring device that measures single servings; or

(b) Placed in packaging that clearly enables a patient to determine when a single serving has been consumed, as that serving size is determined by the processor.

(3) Serving size is as determined by the processor.

(4) A medical marijuana item that does not fall within a category in Table 2 must meet the concentration and serving size limits applicable to a cannabinoid edible in Table 2.

[ED. NOTE: Tables referenced are available from the agency.]

Hist.: PH 22-2015(Temp), f. 11-13-15, cert. ef. 1-1-16 thru 6-28-16; PH 21-2016, f. 6-24-16, cert. ef. 6-28-16

Marijuana Testing

333-007-0300
Purpose and Effective Date

(1) The purpose of these rules is to establish the minimum testing standards for marijuana items. These rules are applicable to:

(a) A licensee; and

(b) A registrant who is not exempt from the testing requirements.

(2) The testing requirements do not apply to:

(a) A grower if the person is transferring usable marijuana or an immature marijuana plant to:

(A) A patient who designated the grower to grow marijuana for the patient; or

(B) A designated primary caregiver of the patient who designated the grower to grow marijuana for the patient; or

(b) A designated primary caregiver of a patient if the caregiver is transferring a marijuana item to a patient of the designated primary caregiver.

(3) A person registered with the Authority under ORS 475B.400 to 475B.525 who is subject to these rules may not:

(a) Transfer a marijuana item on or after October 1, 2016, that is not sampled and tested in accordance with these rules; or

(b) Accept the transfer of a marijuana item on or after October 1, 2016, that is not sampled and tested in accordance with these rules.

(4) A person licensed by the Commission must comply with these rules at all times.

(5) Notwithstanding section (3)(a) of this rule, until January 1, 2017, a dispensary may transfer a marijuana item to a patient or caregiver that was transferred to the dispensary before October 1, 2016, and that was not sampled and tested in accordance with these rules if the item contains a label placed on the package where it can easily be seen by the patient or caregiver that reads "DOES NOT MEET NEW TESTING REQUIREMENTS" in 12 point font, and in bold, capital letters.

(6) Nothing in these rules prevents a registrant from having marijuana items sampled and tested in accordance with these rules by an accredited and licensed laboratory prior to October 1, 2016.

(7) Prior to October 1, 2016, an accredited laboratory performing sampling or testing for a registrant may comply with this rule or OAR 333-008-1190 but the laboratory must identify on the test result which rule the results are compliant with.

333-007-0310
Definitions

For purposes of OAR 333-007-0300 through 333-007-0490:

(1) "Authority" means the Oregon Health Authority.

(2) "Batch" means:

(a) A quantity of usable marijuana from a harvest lot; or

(b) A quantity of cannabinoid concentrate or extract or cannabinoid product from a process lot.

(3) "Cannabinoid" means any of the chemical compounds that are the active constituents of marijuana.

(4) "Cannabinoid concentrate or extract" means a substance obtained by separating cannabinoids from marijuana by a mechanical, chemical or other process.

(5) "Cannabinoid edible" means food or potable liquid into which a cannabinoid concentrate or extract or the dried leaves or flowers of marijuana have been incorporated.

(6)(a) "Cannabinoid product" means a cannabinoid edible or any other product intended for human consumption or use, including a product intended to be applied to a person's skin or hair, that contains cannabinoids or the dried leaves or flowers of marijuana.

(b) "Cannabinoid product" does not include:

(A) Usable marijuana by itself;

(B) A cannabinoid concentrate or extract by itself; or

(C) Industrial hemp, as defined in ORS 571.300.

(7) "Cannabinoid capsule":

(a) Means a small soluble container, usually made of gelatin that encloses a dose of a cannabinoid product, concentrate or extract intended for human ingestion.

(b) Does not mean a cannabinoid suppository.

(8) "Cannabinoid suppository" means a small soluble container designed to melt at body temperature within a body cavity other than the mouth, especially the rectum or vagina containing a cannabinoid product, concentrate or extract.

(9) "Cannabinoid tincture" means a solution of alcohol, cannabinoid concentrate or extract, and perhaps other ingredients intended for human consumption or ingestion, and that is exempt from the Liquor Control Act under ORS 471.035.

(10) "Cannabinoid topical" means a cannabinoid product intended to be applied to skin or hair and for purposes of testing includes transdermal patches.

(11) Cannabinoid Transdermal patch" means an adhesive substance applied to human skin that contains a cannabinoid product, concentrate or extract for absorption into the bloodstream.

(12) "CBD" means cannabidiol, Chemical Abstracts Service Number 13956-29-1.

(13) "CBDA" means cannabidiolic acid, Chemical Abstracts Service Number 1244-58-2.

(14) "Chain of custody procedures" means procedures employed by laboratory personnel using a chain of custody form to record the possession of samples from the time of sampling through the retention time specified by the Authority or Commission.

(15) "Chain of custody form" means a form completed by laboratory personnel that documents the collection, transport, and receipt of samples by the laboratory.

(16) "Commission" means the Oregon Liquor Control Commission.

(17) "Consumer" has the meaning given that term in ORS 475B.015 and does not include a patient or designated primary caregiver.

(18) "Delta-9 THC" is the principal psychoactive constituent (the principal cannabinoid) of cannabis, Chemical Abstracts Service Number 1972-08-3.

(19)(a) "Designated primary caregiver" means an individual 18 years of age or older who has significant responsibility for managing the well-being of a person who has been diagnosed with a debilitating medical condition, who is designated as such on that person's application for a registry identification card or in other written notification to the Authority, and who has been issued an identification card by the Authority under ORS 475B.415(5)(b).

(b) "Designated primary caregiver" does not include the person's attending physician.

(20) "Field duplicate sample" means a sample taken in an identical manner from and representative of the same marijuana item being sampled that is analyzed separately, that is used for quality control only.

(21) "Food" means a raw, cooked, or processed edible substance, or ingredient used or intended for use or for sale in whole or in part for human consumption, or chewing gum.

(22) "Grower" has the same meaning as "person responsible for a marijuana grow site."

(23) "Grow site" means a specific location registered by the Authority and used by the grower to produce marijuana for medical use by a specific patient under ORS 475B.420.

(24) "Harvest lot " means a specifically identified quantity of marijuana that is uniform in strain, cultivated utilizing the same growing practices, harvested at the same time at the same location and cured under uniform conditions.

(25) "Homogeneous" means a cannabinoid product, concentrate or extract has uniform composition and properties throughout each process lot.

(26) "Human consumption or human ingestion" means to ingest, generally through the mouth, food, drink or other substances such that the substance enters the human body but does not include inhalation.

(27) "Laboratory" means a laboratory that is accredited under ORS 438.605 to 438.620 to sample or conduct tests on marijuana items and licensed by the Oregon Liquor Control Commission under ORS 475B.560.

(28) "Licensee" has the meaning given that term in ORS 475B.015.

(29)(a) "Marijuana" means the plant Cannabis family Cannabaceae, any part of the plant Cannabis family Cannabaceae and the seeds of the plant Cannabis family Cannabaceae.

(b) "Marijuana" does not include industrial hemp, as defined in ORS 571.300.

(30) "Marijuana item" means marijuana, usable marijuana, a cannabinoid product or a cannabinoid concentrate or extract.

(31) "Marijuana processing site" means a marijuana processing site registered under ORS 475B.435.

(32) "Medical marijuana dispensary" or "dispensary" means a medical marijuana dispensary registered under ORS 475B.450.

(33) "ORELAP" means the Oregon Environmental Laboratory Accreditation Program administered by the Authority pursuant to ORS 438.605 to 438.620.

(34) "Patient" has the same meaning as "registry identification cardholder."

(35) "Person responsible for a marijuana grow site" has the same meaning as "grower" and means a person who has been selected by a patient to produce medical marijuana for the patient and who has been registered by the Authority for this purpose under ORS 475B.420.

(36) "Process lot" means:

(a) Any amount of cannabinoid concentrate or extract of the same type and processed using the same extraction methods, standard operating procedures and batches from the same or a different harvest lot; or

(b) Any amount of a cannabinoid product of the same type and processed using the same ingredients, standard operating procedures and batches from the same or a different harvest lot or process lot of cannabinoid concentrate or extract as defined in subsection (a) of this section.

(37) "Process validation" means a study performed on products or matrices of unknown homogeneity to assure required uniformity of product accomplished through a series of sampling and testing from three consecutive process lots as described in OAR 333-007-0440.

(38) "Processing" means the compounding or conversion of marijuana into cannabinoid products or cannabinoid concentrates or extracts.

(39) "Processing site" means a processor registered with Authority under ORS 475B.435.

(40) "Processor" has the meaning given that term in OAR 845-025-1015.

(41) "Producer" has the meaning given that term in OAR 845-025-1015.

(42) "Producing" means:

(a) Planting, cultivating, growing, trimming or harvesting marijuana; or

(b) Drying marijuana leaves and flowers.

(43) "Registrant" means a grower, marijuana processing site, or a medical marijuana dispensary registered with the Authority under ORS 475B.420, 475B.435 or 475B.450.

(44) "Registry identification cardholder" means a person who has been diagnosed by an attending physician with a debilitating medical condition and for whom the use of medical marijuana may mitigate the symptoms or effects of the person's debilitating medical condition, and who has been issued a registry identification card by the Authority under ORS 475B.415(5)(a).

(45) "Relative percentage difference" or "RPD" means the comparison of two quantities while taking into account the size of what is being compared as calculated under OAR 333-064-0100.

(46) "Relative standard deviation" or "RSD" means the standard deviation expressed as a percentage of the mean recovery as calculated under OAR 333-064-0100.

(47) "Sample" means an amount of a marijuana item collected by laboratory personnel from a registrant or licensee and provided to a laboratory for testing.

(48) "Sterilization" means the removal of all microorganisms and other pathogens from a marijuana item by treating it with approved chemicals or subjecting it to high heat.

(49) "Test batch" means a group of samples from a batch submitted collectively to a laboratory for testing purposes.

(50) "THC" means tetrahydrocannabinol and has the same Chemical Abstracts Service Number as delta-9 THC.

(51) "THCA" means tetrahydrocannabinolic acid, Chemical Abstracts Service Number 23978-85-0.

(52) "These rules" means OAR 333-007-0300 through 333-007-0490.

(53) "TNI" means The NELAC (National Environmental Laboratory Accreditation Conference) Institute, a voluntary organization of state and federal environmental officials and interest groups purposed primarily to establish consensus standards for accrediting environmental laboratories.

(54) "TNI EL Standards" means the adopted 2009 TNI Environmental Lab Standards (© 2009 The NELAC Institute), which describe the elements of laboratory accreditation developed and established by the consensus principles of TNI and that meet the approval requirements of TNI procedures and policies.

(55) "Total THC" means the molar sum of THC and THCA.

(56)(a) "Usable marijuana" means the dried leaves and flowers of marijuana.

(b) "Usable marijuana" does not include:

(A) The seeds, stalks and roots of marijuana; or

(B) Waste material that is a by-product of producing or processing marijuana.

333-007-0315
Ordering Tests

A registrant or licensee must provide a laboratory, prior to laboratory taking samples, with the following:

(1) A written request of analysis for each test the laboratory is being requested to conduct.

(2) Notification of whether the batch is being re-sampled because of a failed test and the failed test results.

(3) Certification of successful process validation, if applicable, on a form prescribed by the Authority.

(4) Proof of a waiver under OAR 333-007-0490, if applicable.

333-007-0320
Testing Requirements for Marijuana or Usable Marijuana

(1) A producer or grower must test every harvest lot of marijuana or usable marijuana intended for use by a consumer or patient prior to selling or transferring the marijuana or usable marijuana for the following:

(a) Pesticides in accordance with OAR 333-007-0400.

(b) Water activity and moisture content in accordance with OAR 333-007-0420.

(c) THC and CBD concentration in accordance with OAR 333-007-0430.

(2) A producer or grower must test every harvest lot of marijuana or usable marijuana intended for use by a processor or processing site for water activity and moisture content in accordance with OAR 333-007-0420 unless the processor or processing site uses a method of processing that results in effective sterilization.

(3) A producer or grower must test a harvest lot of marijuana or usable marijuana for microbiological contaminants in accordance with OAR 333-007-0390, upon written request by the Authority or the Commission.

(4) In lieu of ordering and arranging for the sampling and testing required in this rule a producer may transport batches of marijuana or usable marijuana to a wholesaler licensed by the Commission under ORS 475B.100 and the wholesaler may order and arrange for the sampling and testing of the batches, in accordance with rules established by the Commission.

333-007-0330
Testing Requirements for Cannabinoid Concentrates and Extracts

(1) A processor or processing site must test every process lot of cannabinoid concentrate or extract for use by a consumer or patient prior to selling or transferring the cannabinoid concentrate or extract for the following:

(a) Pesticides in accordance with OAR 333-007-0400.

(b) Solvents in accordance with OAR 333-007-0410.

(c) THC and CBD concentration in accordance with OAR 333-007-0430.

(2) A processor or processing site must test every process lot of a cannabinoid concentrate or extract intended for use by a processor or processing site to make a cannabinoid product for the following:

(a) Pesticides in accordance with OAR 333-007-0400.

(b) Solvents in accordance with OAR 333-007-0410.

(3) A processor or processing site is exempt from testing for solvents under this rule if the processor or processing site:

(a) Did not use any solvent listed in OAR 333-007-0410, Table 4; and

(b) Only used a mechanical extraction process to separate cannabinoids from the marijuana; or

(c) Used only water, animal fat or vegetable oil as a solvent to separate the cannabinoids from the marijuana.

(4) A processor or processing site must test a process lot of a cannabinoid concentrate or extract for microbiological contaminants in accordance with OAR 333-007-0390, upon written request by the Authority or the Commission.

(5) In lieu of ordering and arranging for the sampling and testing required in this rule a processor may transport batches of cannabinoid concentrates or extracts to a wholesaler licensed by the Commission under ORS 475B.100 and the wholesaler may order and arrange for the sampling and testing of the batches, in accordance with rules established by the Commission.

333-007-0340
Testing Requirements for Cannabinoid Products Intended for Human Consumption or Ingestion and Cannabinoid Suppositories

(1) A processor or processing site must test every process lot of a cannabinoid product intended for human consumption or ingestion, including cannabinoid edibles, capsules, and tinctures, and cannabinoid suppositories for use by a consumer or patient prior to selling or transferring the cannabinoid product for THC and CBD concentration in accordance with OAR 333-007-0430.

(2) A processor or processing site must test a process lot for microbiological contaminants in accordance with OAR 333-007-0390, upon written request by the Authority or the Commission.

(3) In lieu of ordering and arranging for the sampling and testing required in this rule a processor may transport batches of cannabinoid products references in section (1) of this rule to a wholesaler licensed by the Commission under ORS 475B.100 and the wholesaler may order and arrange for the sampling and testing of the batches, in accordance with rules established by the Commission.

Stat. Auth.: ORS 475B.555

333-007-0345
Testing Requirements for Cannabinoid Topicals and Cannabinoid Transdermal Patches

(1) A processor or processing site must test every process lot of a cannabinoid topical or transdermal patch for use by a consumer or patient prior to selling or transferring the cannabinoid product for THC and CBD concentration in accordance with OAR 333-007-0430.

(2) A processor or processing site must test a process lot of a cannabinoid topical or transdermal patch for microbiological contaminants in accordance with OAR 333-007-0390, upon written request by the Authority or the Commission.

(3) In lieu of ordering and arranging for the sampling and testing required in this rule a processor may transport batches of cannabinoid products references in section (1) of this rule to a wholesaler licensed by the Commission under ORS 475B.100 and the wholesaler may order and arrange for the sampling and testing of the batches, in accordance with rules established by the Commission.

333-007-0350
Batch Requirements

(1) Usable marijuana.

(a) A producer or grower must separate each harvest lot into no larger than 10 pound batches.

(b) Notwithstanding subsection (1)(a) of this rule, a producer or grower may combine harvest lots together for purposes of having a batch sampled if each batch is intended for use by a pro-

cessor or processing site to make a cannabinoid concentrate or extract and each harvest lot was:

(A) Cultivated utilizing the same growing practices and grown in close proximity on the licensed or registered premises;

(B) Harvested at the same time; and

(C) If cured prior to sampling, cured under uniform conditions.

(c) A producer or grower may not combine harvest lots into a batch for purposes of sampling and testing for THC or CBD.

(d) If harvest lots are combined in accordance with subsection (1)(b) of this rule the batch must be labeled so that it identifies the different harvest lots that were combined.

(2) Cannabinoid concentrates and extracts and cannabinoid products. A process lot is considered a batch.

(3) A grower and processing site must assign each batch a unique batch number and that unique batch number must be:

(a) Documented and maintained in the grower and processing site records for at least two years and available to the Authority upon request;

(b) Provided to the individual responsible for taking samples; and

(c) Included on the batch label as required in OAR 333-007-0380.

(4) A grower and processing site may not reuse a unique batch number.

Stat. Auth.: ORS 475B.555
Stats. Implemented: ORS 475B.555
Hist.: PH 22-2015(Temp), f. 11-13-15, cert. ef. 1-1-16 thru 6-28-16; PH 21-2016, f. 6-24-16, cert. ef. 6-28-16

333-007-0360
Sampling and Sample Size

(1) Usable marijuana.

(a) Usable marijuana may only be sampled after it is cured, unless the usable marijuana is intended for sale or transfer to a processor or processing site to make a cannabinoid concentrate or extract.

(b) Samples taken must in total represent a minimum of 0.5 percent of the batch, consistent with the laboratory's accredited sampling policies and procedures, described in OAR 333-064-0100(2).

(2) Cannabinoid concentrates, extracts and products.

(a) Unless a cannabinoid concentrate, extract or product has successfully passed process validation, enough samples from a batch must be taken to ensure that the required attributes in the batch to be tested are homogenous and consistent with the laboratory's accredited sampling policies and procedures described in OR 333-064-0100(2).

(b) If a cannabinoid concentrate, extract or product has successfully passed process validation only a primary sample and field duplicate sample must be taken from a batch in accordance with the laboratory's accredited sampling policies and procedures described in OAR 333-064-0100(2).

Stat. Auth.: ORS 475B.555

333-007-0370
Sampling Personnel Requirements; Sampling Recordkeeping

(1) Only individuals employed by a laboratory with an ORELAP accredited scope item for sampling under these rules may take samples.

(2) Sampling may be conducted at a licensee's or registrant's premises or the licensee or registrant may transport the batch to a laboratory with an ORELAP accredited scope item for sampling under these rules.

(3) Laboratory personnel that perform sampling must:

(a) Follow the laboratory's accredited sampling policies and procedures;

(b) Follow chain of custody procedures consistent with TNI EL Standard V1M2 5.7 and 5.8; and

(c) After taking samples document the samples in accordance with OAR 333-064-0100(2) and if sampling for a licensee record the sampling and transfer information in the Commission's seed to sale system, as required by the Commission.

(4) A laboratory must maintain the documentation required in these rules for at least two years and must provide that information to the Authority upon request.

333-007-0380
Grower and Processing Site Requirements for Labeling, Storing, and Securing Pre-Tested Marijuana Items; Recordkeeping

(1) Following samples being taken from a harvest or process lot batch a grower or processing site must:

(a) Label the batch with the following information:

(A) The registrant's registration number;

(B) The harvest or process lot unique identification number;

(C) The name and accreditation number of the laboratory that took samples and the name and accreditation number of the laboratory responsible for the testing, if different;

(D) The test batch or sample unique identification numbers supplied by the laboratory personnel;

(E) The date the samples were taken; and

(F) In bold, capital letters, no smaller than 12 point font, "PRODUCT NOT TESTED."

(b) Store and secure the batch in a manner that prevents the product from being tampered with or transferred prior to test results being reported.

(c) Be able to easily locate a batch stored and secured under section (1)(b) of this rule and provide that location to the Authority or a laboratory upon request.

(2) If the samples pass testing the product may be sold or transferred in accordance with the applicable Authority rules.

(3) If the samples do not pass testing the grower or processing site must comply with OAR 333-007-0450.

Stat. Auth.: ORS 475B.555

333-007-0390
Standards for Testing Microbiological Contaminants

(1) A marijuana item required to be tested for microbiological contaminants must be sampled using appropriate aseptic technique and tested by a laboratory for total coliform count.

(2) If a laboratory detects the presence of any coliforms the sample must be assessed for Escherichia coli (E. coli).

(3) A batch fails microbiological contaminant testing if the laboratory detects the presence of E. coli at more than 100 colony forming units per gram in a sample:

(a) During an initial test where no reanalysis is requested; or

(b) Upon reanalysis as described in OAR 333-007-0450(1).

333-007-0400
Standards for Testing Pesticides

(1) A marijuana item required to be tested for pesticides must be tested by a laboratory for the analytes listed in Exhibit A, Table 3, incorporated by reference. [Table not included. See ED. NOTE.]

(2) A batch fails pesticide testing if a laboratory detects the presence of a pesticide above the action levels listed in Exhibit A, Table 3 in a sample:

(a) During an initial test where no reanalysis is requested; or

(b) Upon reanalysis as described in OAR 333-007-0450(1). [Table not included. See ED. NOTE.]

(3) The Authority will review and update, if necessary, the analytes listed in Exhibit A, Table 3, at least every two years.

333-007-0410

Standards for Testing Solvents

(1) A marijuana item required to be tested for solvents must be tested by a laboratory for the analytes listed in Exhibit A, Table 4 incorporated by reference. [Table not included. See ED. NOTE.]

(2) A batch fails solvent testing if a laboratory, during an initial test where no reanalysis is requested or upon reanalysis as described in OAR 333-007-0450(1):

(a) Detects the presence of a solvent above the action level listed in Exhibit A, Table 4 in a sample; or [Table not included. See ED. NOTE.]

(b) Calculates a RPD of more than 20 percent between the field primary result of the sample and the field duplicate result.

(3) The Authority will review and update, if necessary, the analytes listed in Exhibit A, Table 4, at least every two years. [Table not included. See ED. NOTE.]

333-007-0420

Standards for Testing Water Activity and Moisture Content

(1) Usable marijuana must be tested by a laboratory for:

(a) Water activity; and

(b) Moisture content.

(2) If a sample has a water activity rate of more than 0.65 Aw the sample fails.

(3) If a sample has a moisture content of more than 15 percent the result must be reported to the licensee but the sample does not fail.

333-007-0430

Standards for THC and CBD Testing

(1) A laboratory must test for the following when testing a marijuana item for potency:

(a) THC.

(b) THCA.

(c) CBD.

(d) CBDA.

(2) A process lot of a cannabinoid concentrate, extract or product that has not successfully completed process validation fails potency testing if, based on an initial test where no reanalysis is requested or upon reanalysis as described in OAR 333-007-0450(1):

(a) The amount of THC, as calculated pursuant to OAR 333-064-0100, between samples taken from the batch exceeds 30 percent RSD; or

(b) The amount or percentage of THC, as calculated pursuant to OAR 333-064-0100, exceeds the maximum concentration limits permitted in package as specified in OAR 333-007-0200 to 333-007-0220, as applicable.

(3) A process lot of a cannabinoid concentrate, extract or product that has successfully completed process validation fails potency testing if, based on an initial test where no reanalysis is requested or upon reanalysis as described in OAR 333-007-0450(1):

(a) The amount of THC, as calculated pursuant to OAR 333-064-0100, between the sample and the field duplicate exceeds 20 percent RPD; or

(b) The amount or percentage of THC, as calculated pursuant to OAR 333-064-0100, exceeds the maximum concentration limits permitted in a package as specified in OAR 333-007-0200 to 333-007-0220, as applicable.

(4) A sample cannot fail CBD testing.

(5) Notwithstanding section (2)(a) and (3)(a) of this rule, a sample that has less than 5 mg of THC as calculated pursuant to OAR 333-064-0100 does not fail potency testing based on exceedance of the RSD or RPD as described in section (2)(a) or (3)(a) of this rule.

333-007-0440

Process Validation

(1) A laboratory may perform process validation tests on three consecutive process lots of cannabinoid concentrates, extracts or products for a processor or processing site if the processor or processing site informs the laboratory, in writing:

(a) That sampling and testing is for the purposes of process validation; and

(b) For cannabinoid products, the expected THC range for the product.

(2) Samples taken for purposes of process validation testing may not be combined.

(3) Samples of cannabinoid concentrate and extracts must be tested for:

(a) Pesticides in accordance with OAR 333-007-0400,

(b) Solvents in accordance with OAR 333-007-0410.

(4) Samples of cannabinoid products must be tested for THC concentration in accordance with OAR 333-007-0430, as calculated pursuant to OAR 333-064-0100.

(5) During process validation a batch passes:

(a) Pesticide testing if each sample is below the action limit established in OAR 333-007-0400.

(b) Solvent testing if:

(A) Each sample is below the action limit established in OAR 333-007-0410; and

(B) The results above the LOQ are not greater than 30 percent RSD between samples.

(c) THC concentration testing if:

(A) The amount of THC, as calculated pursuant to OAR 333-064-0100, between samples taken from the batch does not exceed 30 percent RSD; and

(B) The amount or percentage of THC as calculated pursuant to OAR 333-064-0100, does not exceed the maximum concentration limit permitted in a package as specified in OAR 333-007-0200 to 333-007-0220, as applicable.

(6) A laboratory must identify on a form prescribed by the Authority if a batch undergoing process validation has passed for any of the following:

(a) Pesticides, if applicable.

(b) Solvents, if applicable.

(c) THC concentration as calculated pursuant to OAR 333-064-0100, if applicable.

(7) A process lot sampled and tested for purposes of process validation may be sold or transferred if the samples pass all the required tests.

(8) A processor or processing site must undergo process validation for a product again or must have batches sampled and tested as if the product had not undergone process validation if:

(a) There are any changes to the standard operating procedures for that product.

(b) There are any changes in the type of ingredient in the product, except for a difference in the strain of usable marijuana, or the purity of an ingredient.

(9) Process validation is only valid for two years.

333-007-0450

Failed Test Samples

(1) If a sample fails any initial test the laboratory that did the testing may reanalyze the sample. If the sample passes, another laboratory must resample the batch and confirm that result in order for the batch to pass testing.

(2) If a sample fails a test or a reanalysis under section (1) of this rule the batch:

(a) May be remediated or sterilized in accordance with this rule; or

(b) If it is not or cannot be remediated or sterilized under this rule, must be destroyed in a manner specified by the Authority or the Commission.

(3) If a licensee or registrant is permitted under this rule to sell or transfer a batch that has failed a test, the licensee or registrant must notify the licensee or registrant to whom the batch is sold or transferred of the failed test.

(4) Failed microbiological contaminant testing.

(a) If a sample from a batch of usable marijuana fails microbiological contaminant testing the batch may be used to make a cannabinoid concentrate or extract if the processing method effectively sterilizes the batch, such as a method using a hydrocarbon based solvent or a CO2 closed loop system.

(b) If a sample from a batch of a cannabinoid concentrate or extract fails microbiological contaminant testing the batch may be further processed if the processing method effectively sterilizes the batch, such as a method using a hydrocarbon based solvent or a CO2 closed loop system.

(c) A batch that is sterilized in accordance with subsection (a) or (b) of this section must be sampled and tested in accordance with these rules and must be tested if not otherwise required for that product, for microbiological contaminants, solvents and pesticides.

(d) A batch that fails microbiological contaminant testing after undergoing a sterilization process in accordance with subsection (a) or (b) of this section must be destroyed in a manner specified by the Authority or the Commission.

(5) Failed solvent testing.

(a) If a sample from a batch fails solvent testing the batch may be remediated using procedures that would reduce the concentration of solvents to less than the action level.

(b) A batch that is remediated in accordance with subsection (a) of this section must be sampled and tested in accordance with these rules and must be tested if not otherwise required for that product under these rules, for solvents and pesticides.

(c) A batch that fails solvent testing that is not remediated or that if remediated fails testing must be destroyed in a manner specified by the Authority or the Commission.

(6) Failed water activity testing.

(a) If a sample from a batch of usable marijuana fails for water activity the batch from which the sample was taken may:

(A) Be used to make a cannabinoid concentrate or extract; or

(B) Continue to dry or cure.

(b) A batch that undergoes additional drying or curing as described in paragraph (a)(B) of this section must be sampled and tested in accordance with these rules.

(7) Failed pesticide testing.

(a) If a sample from a batch fails pesticide testing the batch may not be remediated and must be destroyed in a manner approved by the Authority or the Commission.

(b) The Authority must report to the Oregon Department of Agriculture all test results that show that a sample failed a pesticide test.

(8) Failed potency testing.

(a) A marijuana item that fails potency testing under OAR 333-007-0430(2)(a) or (3)(a) may be repackaged in a manner that enables the item to meet the standard in OAR 333-007-0430(2)(a) or (3)(a).

(b) A marijuana item that is repackaged in accordance with this section must be sampled and tested in accordance with these rules.

(9) If a sample fails a test after undergoing remediation or sterilization as permitted under this rule the batch must be destroyed in a manner approved by the Authority or the Commission.

(10) An Authority representative must witness the destruction of a batch if destruction is required by this rule.

(11) A registrant must inform a laboratory prior to samples being taken that the batch has failed a test and is being retested after undergoing remediation or sterilization.

(12) A registrant must, as applicable:

(a) Have detailed procedures for sterilization processes to remove microbiological contaminants and for reducing the concentration of solvents.

(b) Document all sampling, testing, sterilization, remediation and destruction that are a result of failing a test under these rules.

Stat. Auth.: ORS 475B.555

Stats. Implemented: ORS 475B.555

Hist.: PH 22-2015(Temp), f. 11-13-15, cert. ef. 1-1-16 thru 6-28-16; PH 21-2016, f. 6-24-16, cert. ef. 6-28-16

333-007-0470

Tentative Identification of Compounds

(1) Tentatively Identified Compounds (TICs) are compounds detected in a sample using gas chromatography mass spectrometry that are not among the target analytes for the residual solvent analysis.

(2) The Authority may initiate an investigation of a registrant upon receipt of a TICS report from a laboratory and may require a registrant to submit samples for additional testing, including testing for analytes that are not required by these rules, at the registrant's expense.

Stat. Auth.: ORS 475B.555

Stats. Implemented: ORS 475B.555

Hist.: PH 22-2015(Temp), f. 11-13-15, cert. ef. 1-1-16 thru 6-28-16; PH 21-2016, f. 6-24-16, cert. ef. 6-28-16

333-007-0480
Audit and Random Testing

(1) The Authority may require a registrant to submit samples identified by the Authority to a laboratory of the registrant's choosing to be tested in order to determine whether a registrant is in compliance with OAR 333-007-0300 through 333-007-0490, and may require additional testing that is not required by these rules.

(2) A laboratory doing audit testing must comply with these rules, to the extent they are applicable, and if conducting testing not required by these rules, may only use Authority approved methods.

(3) The Authority must establish a process for the random testing of marijuana items for microbiological contaminants that ensures each registrant tests every product for microbiological contaminants at least once a year.

Stat. Auth.: ORS 475B.555
Stats. Implemented: ORS 475B.555

333-007-0490
Waiver of Sampling and Testing Requirements

(1) Solvent testing.

(a) The Commission or the Authority may, upon receipt of a written request from a licensee or registrant, waive a requirement that every batch of a process lot be tested for solvents, if the licensee or registrant can demonstrate that none of the batches from any of the previous four process lots tested failed a solvent test.

(b) In order to qualify for a waiver under this section the fourth process lot must be processed at least 30 days after the first.

(c) If the waiver is granted the Commission or Authority must provide notice, in writing, to the registrant or licensee of the waiver and how long the waiver will be in effect.

(d) If the Commission or the Authority waives the testing requirement the licensee or registrant is subject to random testing and the Commission or the Authority shall notify the licensee or registrant when a process lot must be tested in accordance with these rules.

(2) Sampling.

(a) The Commission or the Authority may, upon receipt of a written request from a processor or processing site waive the sampling requirements in OAR 333-007-0360(2)(a) for a particular product if the processor processing site:

(A) Can demonstrate that none of the batches from any of the previous four process lots tested failed any test;

(B) Submits to the Commission or the Authority detailed processing standard operating procedures that demonstrate the product is uniform and uniform from process lot to process lot;

(C) Can demonstrate that it has and follows quality control measures; and

(D) Can demonstrate that subjecting a product to process validation under OAR 333-007-0440 is cost prohibitive.

(b) In order to qualify for a waiver under this section the fourth process lot must be processed at least 30 days after the first.

(c) If the waiver is granted the Commission or Authority must provide notice, in writing, to the registrant or licensee of the waiver, how long the waiver will be in effect, and the sampling that is required of the product for which the waiver was approved.

333-007-1000
Temporary OLCC Licensee Pesticide Testing Requirements

(1) Notwithstanding OAR 333-007-0300 to 333-007-0490 and 333-064-0100, until March 1, 2017, if the Commission finds there is insufficient laboratory capacity for the testing of pesticides, the Commission may permit randomly chosen samples from batches of usable marijuana to be tested for pesticides by a licensed laboratory rather than requiring every batch of usable marijuana from a harvest lot to be tested for pesticides.

(2) The Commission must ensure that samples from at least one batch of every harvest lot are tested for pesticides.

(3) If any one of the randomly chosen samples from a batch of a producer licensee's harvest lot fails a pesticide test every batch from the harvest lot must be tested for pesticides.

(4) If the randomly chosen samples from batches of usable marijuana that are tested for pesticides all pass, the entire harvest lot is considered to have passed pesticide testing and may be transferred or sold.

DIVISION 8

MEDICAL MARIJUANA

333-008-0010
Definitions

For the purposes of OAR chapter 333, division 8 the following definitions apply unless otherwise indicated:

(1) "Advertising" means publicizing the trade name of a PRMG, registered processing site or dispensary together with words or symbols referring to marijuana or publicizing the brand name of marijuana or a medical cannabinoid product, concentrate or extract in any medium.

(2) "Applicant" means, as applicable to the registration being applied for:

(a) An individual applying for a registry identification card under ORS 475B.415.

(b) An individual applying for a grow site registration under ORS 475B.420.

(c) A person applying for a marijuana processing site registration under ORS 475B.435.

(d) A person applying for a medical marijuana dispensary registration under ORS 475B.450.

(3) "Attending physician" means a Doctor of Medicine (MD) or Doctor of Osteopathy (DO), licensed under ORS chapter 677, who has primary responsibility for the care and treatment of a person diagnosed with a debilitating medical condition.

(4) "Attending physician statement" or "APS" means the form, prescribed by the Authority and signed by an attending physician, that states the individual has been diagnosed with a debilitating medical condition and that the medical use of marijuana may mitigate the symptoms or effects of the individual's debilitating medical condition.

(5) "Authority" means the Oregon Health Authority.

(6) "Business day" means Monday through Friday excluding legal holidays.

(7) "CBD" means cannabidiol.

(8) "Cannabinoid" means any of the chemical compounds that are the active constituents of marijuana.

(9) "Cannabinoid concentrate" means a substance obtained by separating cannabinoids from marijuana by:

(a) A mechanical extraction process;

(b) A chemical extraction process using a nonhydrocarbon-based solvent, such as vegetable glycerin, vegetable oils, animal fats, isopropyl alcohol or ethanol;

(c) A chemical extraction process using the hydrocarbon-based solvent carbon dioxide, provided that the process does not involve the use of high heat or pressure; or

(d) Any other process authorized in these rules.

(10) "Cannabinoid edible" means food or potable liquid into which a cannabinoid concentrate, cannabinoid extract or dried leaves or flowers of marijuana have been incorporated.

(11) "Cannabinoid extract" means a substance obtained by separating cannabinoids from marijuana by:

(a) A chemical extraction process using a hydrocarbon-based solvent, such as butane, hexane or propane; or

(b) A chemical extraction process using the hydrocarbon-based solvent carbon dioxide, if the process uses high heat or pressure.

(12) "Cartoon" means any drawing or other depiction of an object, person, animal, creature or any similar caricature that satisfies any of the following criteria:

(a) The use of comically exaggerated features;

(b) The attribution of human characteristics to animals, plants or other objects, or the similar use of anthropomorphic technique; or

(c) The attribution of unnatural or extra-human abilities, such as imperviousness to pain or injury, X-ray vision, tunneling at very high speeds or transformation.

(13) "Commission" means the Oregon Liquor Control Commission.

(14) "Conviction" means an adjudication of guilt upon a verdict or finding entered in a criminal proceeding in a court of competent jurisdiction.

(15) "Database" means the electronic system established pursuant to ORS 475B.458, in which the Authority stores the information PRMGs, registered processing sites and dispensaries are required to submit under these rules.

(16) "Debilitating medical condition" means:

(a) Cancer, glaucoma, a degenerative or pervasive neurological condition, positive status for human immunodeficiency virus or acquired immune deficiency syndrome, or a side effect related to the treatment of those medical conditions;

(b) A medical condition or treatment for a medical condition that produces, for a specific patient, one or more of the following:

(A) Cachexia;

(B) Severe pain;

(C) Severe nausea;

(D) Seizures, including but not limited to seizures caused by epilepsy; or

(E) Persistent muscle spasms, including but not limited to spasms caused by multiple sclerosis;

(c) Post-traumatic stress disorder; or

(d) Any other medical condition or side effect related to the treatment of a medical condition adopted by the Authority by rule or approved by the Authority pursuant to a petition filed under OAR 333-008-0090.

(17) "Delivery" has the meaning given that term in ORS 475B.410.

(18)(a) "Designated primary caregiver" means an individual who:

(A) Is 18 years of age or older;

(B) Has significant responsibility for managing the well-being of a person who has been diagnosed with a debilitating medical condition; and

(C) Is designated as the person responsible for managing the well-being of a person who has been diagnosed with a debilitating medical condition on that person's application for a registry identification card or in other written notification submitted to the Authority.

(b) "Designated primary caregiver" does not include a person's attending physician.

(19) "Direct interest" means an interest that is held in the name of the individual.

(20) "Domicile" means the place an individual intends as his or her fixed place of abode or habitation where he or she intends to remain and to which, if absent, the individual intends to return.

(21) "Elementary school" means a learning institution containing any combination of grades Kindergarten through 8.

(22) "Employee":

(a) Means any individual, including an alien, employed for remuneration or under a contract of hire, written or oral, express or implied, by an employer.

(b) Does not mean an individual who volunteers or donates services performed for no remuneration or without expectation or contemplation of remuneration as adequate consideration for the services performed for a religious or charitable institution or a governmental entity.

(23) "Food stamps" means the Supplemental Nutrition Assistance Program as defined and governed by ORS 411.806 through 411.845.

(24) "Grandfathered grow site" means a grow site registered by the Authority that has been approved by the Authority under OAR 333-008-0520 that can have up to:

(a) 24 mature marijuana plants if the location is within city limits and zoned residential; or

(b) 96 mature marijuana plants if the location is within city limits but not zoned residential or not within city limits.

(25) "Grow site" means a location registered under ORS 475B.420 where marijuana is produced for use by a patient or, with permission from a patient, for transfer to a registered processing site or dispensary.

(26) "Grow site registration card" means a card issued by the Authority that identifies the address of a marijuana grow site and the PRMG.

(27) "Immature marijuana plant" means a marijuana plant that is not flowering.

(28) "Indirect interest" means:

(a) An interest that is owned by a business entity that is owned, in whole or in part and either directly or indirectly, through one or more other intermediate business entities, by the individual; or

(b) An interest held in the name of another but the benefits of ownership of which, the individual is entitled to receive.

(29) "Individual who has a financial interest" in a business entity that owns a processing site or dispensary means:

(a) If the business entity is a corporation:

(A) Stockholders: Any individual who owns, directly or indirectly, 10 percent or more of the outstanding stock of such corporation.

(B) Directors: Any director of the corporation who receives compensation for acting in that capacity or who owns, directly or indirectly, 5 percent or more of the outstanding stock of such corporation.

(C) Officers: Any officer of the corporation who receives compensation for acting in that capacity or who owns, directly or indirectly, 5 percent or more of the outstanding stock of such corporation.

(b) If the business entity is a trust:

(A) Trustees: Any individual who is a trustee of the trust and who receives compensation for acting in that capacity and any individual who owns, directly or indirectly, 10 percent or more of the ownership interests of a business entity that is a trustee of the trust and that receives compensation for acting in that capacity.

(B) Beneficiaries: Any individual who is entitled to receive, directly or indirectly, income or benefit from the trust.

(c) If the business entity is a partnership:

(A) General Partners: Any individual who is a general partner of the partnership and who receives compensation for acting in that capacity or who owns 5 percent or more of the ownership interests of the partnership and any individual who owns, directly or indirectly, 10 percent or more of the ownership interests of a business entity that is a general partner of the partnership and that receives compensation for acting in that capacity or owns 5 percent or more of the ownership interests of the partnership.

(B) Limited Partners: Any individual who is a limited partner of the partnership and who owns 10 percent or more of the ownership interests of the partnership and any individual who owns, directly or indirectly, 10 percent or more of the ownership interests of a business entity that is a limited partner of the partnership and that owns 10 percent or more the ownership interests of the partnership.

(d) If the business entity is a joint venture: Any individual who is entitled to receive, directly or indirectly, income or benefit from the joint venture.

(e) If the business entity is a limited liability company:

(A) Managers: Any individual who is a manager of the limited liability company and who receives compensation for acting in that capacity or who owns 5 percent or more of the ownership interests of the limited liability company and any individual who owns, directly or indirectly, 10 percent or more of the ownership interests of a business entity that is a manager of the limited liability company and that receives compensation for acting in that capacity or owns 5 percent or more of the ownership interests of the limited liability company.

(B) Members: Any individual who is a member of the limited liability company and who owns 10 percent or more of the ownership interests of the limited liability company and any individual who owns, directly or indirectly, 10 percent or more of the ownership interests of a business entity that is a member of the limited liability company and that owns 10 percent or more of the ownership interests of the limited liability company.

(f) Immediate family members: Any person, 18 years of age or older, involved in a marijuana processing site or dispensary, in any capacity, who is a member of the immediate family of any individual who otherwise has a financial interest in the business entity that owns the marijuana processing site or dispensary. A person is a member of the immediate family of the individual if the person receives more than 50 percent of his or her financial support from that individual.

(g) Landlord: Any individual who is a landlord of a processing site or dispensary and who is entitled to receive 40 percent or more of the proceeds from the marijuana processing site or dispensary as a part of lease payments or rent, any individual who owns, directly or indirectly, 10 percent or more of the ownership interests of a business entity that is a landlord of a processing site or dispensary and that is entitled to receive 40 percent or more of the proceeds from the marijuana processing site or dispensary as part of lease payments or rent, and any individual who the Authority finds, based on reasonably reliable information, exerts influence over the operation of the marijuana processing site or dispensary through a landlord-tenant relationship and receives a portion of the proceeds from that marijuana processing site or dispensary.

(h) Other forms of business organization: If the form of business entity is not expressly addressed in subsections (a) to (g) of this section, the Authority will, in determining individuals who have a financial interest in the business entity, apply the portions of this definition applicable to the business entity that are most similar to the subject business entity, interpreting the terminology and concepts of this definition in the context of the subject business entity as necessary or appropriate.

(30) "Indoor production" for purposes of OAR 333-008-0580 means producing marijuana in any manner:

(a) Utilizing artificial lighting on mature marijuana plants; or

(b) Other than "outdoor production" as that is defined in this rule.

(31) "Limited access area" means:

(a) For a dispensary a building, room, or other contiguous area on a dispensary premises where a marijuana item is present but does not include the area where marijuana items are transferred to a patient or designated primary caregiver.

(b) For a processing site a building, room, or other contiguous area on a processing site premises where a marijuana item is present.

(32)(a) "Marijuana" means the plant Cannabis family Cannabaceae, any part of the plant Cannabis family Cannabaceae and the seeds of the plant Cannabis family Cannabaceae.

(b) "Marijuana" does not include industrial hemp, as defined in ORS 571.300.

(33) "Marijuana item" means marijuana, cannabinoid concentrates, cannabinoid extracts, medical cannabinoid products, and immature marijuana plants.

(34) "Marijuana processing site" or "processing site" means a marijuana processing site registered under ORS 475B.435 or a site for which an applicant has submitted an application for registration under ORS 475B.435.

(35) "Mature marijuana plant" means a marijuana plant that is not an immature marijuana plant.

(36)(a) "Medical cannabinoid product" means a cannabinoid edible and any other product intended for human consumption or use, including a product intended to be applied to a person's skin or hair, that contains cannabinoids or dried leaves or flowers of marijuana.

(b) "Medical cannabinoid product" does not include:

(A) Usable marijuana by itself;

(B) A cannabinoid concentrate by itself;

(C) A cannabinoid extract by itself; or

(D) Industrial hemp, as defined in ORS 571.300.

(37) "Medical marijuana dispensary" means a medical marijuana dispensary registered under ORS 475B.450 or a site for which an applicant has submitted an application for registration under ORS 475B.450.

(38) "Medical use of marijuana" means the production, processing, possession, delivery, or administration of marijuana, or use of paraphernalia used to administer marijuana to mitigate the symptoms or effects of a debilitating medical condition.

(39) "Minor" means an individual under the age of 18.

(40) "Oregon Health Plan (OHP)" means the medical assistance program administered by the Authority under ORS chapter 414.

(41) "OMMP" means the section within the Authority that administers the provisions of ORS 475B.400 to 475B.525, the applicable provisions of 475B.550 to 475B.590, 475B.600 to 475B.655, and the rules in OAR chapter 333, divisions 7 and 8.

(42) "Outdoor production" for purposes of OAR 333-008-0580 means producing marijuana:

(a) In an expanse of open or cleared ground open to the air; or

(b) In a greenhouse, hoop house or similar non-rigid structure that does not utilize any artificial lighting on mature marijuana plants, including but not limited to electrical lighting sources.

(43) "Parent or legal guardian" means the custodial parent or legal guardian with responsibility for health care decisions for the person under 18 years of age.

(44) "Patient" has the same meaning as "registry identification cardholder."

(45) "Person designated to produce marijuana by a registry identification cardholder" or "person designated to produce marijuana by a patient" mean a person designated to produce marijuana by a patient under ORS 475B.420 who produces marijuana for that patient at an address:

(a) Other than the address where the patient resides; or

(b) Where more than 12 mature marijuana plants are produced.

(46) "Person responsible for a marijuana grow site," or "PRMG" mean any individual designated by a patient to produce marijuana for the patient, including a patient who identifies him or herself as a person responsible for the marijuana grow site.

(47) "Personal agreement" means a document, as described in ORS 475B.425 signed and dated by a patient, assigning a patient's right to possess seeds, immature marijuana plants and usable marijuana to a PRMG.

(48) "Point of sale" means a specific location within a point of sale area at which the transfer of a marijuana item occurs.

(49) "Point of sale area" means a secure area where a registered dispensary transfers a marijuana item to a patient or caregiver.

(50) "Premises" means a location registered by the Authority as a processing site or dispensary under these rules and includes all areas at the location that are used in the business operated at the location, including offices, kitchens, rest rooms and storerooms, including all public and private areas where individuals are permitted to be present.

(51) "Primary responsibility" as that term is used in relation to an attending physician means that the physician:

(a) Provides primary health care to the patient; or

(b) Provides medical specialty care and treatment to the patient as recognized by the American Board of Medical Specialties; or

(c) Is a consultant who has been asked to examine and treat the patient by the patient's primary care physician licensed under ORS chapter 677, the patient's physician assistant licensed under ORS chapter 677, or the patient's nurse practitioner licensed under ORS chapter 678; and

(d) Has reviewed a patient's medical records at the patient's request and has conducted a thorough physical examination of the patient, has provided or planned follow-up care, and has documented these activities in the patient's medical record.

(52) "Process" means the compounding or conversion of marijuana into medical cannabinoid products, cannabinoid concentrates or cannabinoid extracts.

(53) "Production" or "growing" means:

(a) Planting, cultivating, growing, trimming or harvesting marijuana; or

(b) Drying marijuana leaves or flowers.

(54) "Registry identification card" means a document issued by the Authority under ORS 475B.415 that identifies a person authorized to engage in the medical use of marijuana, and, if the person has a designated primary caregiver under ORS 475B.418, the person's designated primary caregiver.

(55) "Registry identification cardholder" means a person to whom a registry identification

card has been issued under ORS 475B.415(5)(a) and has the same meaning as patient.

(56) "Remuneration" means compensation resulting from the employer-employee relationship, including wages, salaries, incentive pay, sick pay, compensatory pay, bonuses, commissions, stand-by pay, and tips.

(57) "Replacement card" means a new card issued in the event that:

(a) A patient's registry identification card, a designated primary caregiver's or a PRMG's identification card, or grow site registration card is lost or stolen; or

(b) A patient's designation of primary caregiver, PRMG or grow site has changed.

(58) "Resident" means an individual who has primary domicile within this state.

(59) "Safe" means:

(a) A metal receptacle with a locking mechanism capable of storing all usable marijuana at a registered premises that:

(A) Is rendered immobile by being securely anchored to a permanent structure of the building; or

(B) Weighs more than 750 pounds.

(b) A vault; or

(c) A refrigerator or freezer capable of being locked for storing edibles or other finished products that require cold storage that:

(A) Is rendered immobile by being securely anchored to a permanent structure of the building; or

(B) Weighs more than 750 pounds; and

(C) If it has a glass that makes up part or all of the door or exterior walls, the glass is rated unbreakable.

(60) "Secondary school" means a learning institution containing any combination of grades 9 through 12 and includes those institutions that provide junior high schools which include 9th grade.

(61) "Secure area" means a room:

(a) With doors that are kept locked and closed at all times except when the doors are in use;

(b) Where access is only permitted as authorized in these rules; and

(c) Not visible from outside the room or within public view.

(62) "Supplemental Security Income (SSI)" means the monthly benefit assistance program administered by the federal government for persons who are age 65 or older, or blind, or disabled and who have limited income and financial resources.

(63) "These rules" means OAR 333-008-0010 to 333-008-0750.

(64) "THC" means tetrahydrocannabinol.

(65)(a) "Usable marijuana" means the dried leaves and flowers of marijuana.

(b) "Usable marijuana" does not include:

(A) The seeds, stalks and roots of marijuana; or

(B) Waste material that is a by-product of producing marijuana.

(66) "Vault" means an enclosed area that is constructed of steel-reinforced or block concrete and has a door that contains a multiple-position combination lock or the equivalent, a relocking device or equivalent, and a steel plate with a thickness of at least one-half inch.

(67) "Written documentation" means a statement signed and dated by the attending physician of a person diagnosed with a debilitating medical condition or copies of the person's relevant medical records, maintained in accordance with standard medical record practices.

(68) "Zoned for residential use" means the only primary use allowed outright in the designated zone is residential.

Patient, Designated Primary Caregiver, PRMG and Grow Site Registration

333-008-0020
New Registry Identification Card Application Process

(1) To apply for a registry identification card an individual must submit the following:

(a) An application form, prescribed by the Authority, signed and dated by the applicant.

(b) A legible copy of the individual's valid government issued photographic identification that includes the applicant's last name, first name, and date of birth.

(c) An APS or written documentation that may consist of relevant portions of the applicant's medical record, signed by the applicant's attending physician within 90 days of the date of receipt by the Authority, which describes the applicant's debilitating medical condition and states that the use of marijuana may mitigate the symptoms or effects of the applicant's debilitating medical condition.

(d) Proof of residency in accordance with OAR 333-008-0022.

(e) If applicable, a completed and notarized "Declaration of Person Responsible for Minor" form for a person under 18 years of age, signed and dated by the minor's parent or legal guardian.

(f) An application fee as specified in OAR 333-008-0021.

(g) If applicable, documentation required in OAR 333-008-0021 to qualify for a reduced fee.

(2) If the applicant is designating a primary caregiver, the applicant must complete the caregiver portion of the application and submit a legible copy of the designated primary caregiver's valid government issued photographic identification that includes the caregiver's last name, first name, and date of birth. The applicant may also designate an organization that provides hospice, palliative or home health care services, or a residential facility as defined in ORS 443.400, under ORS 475B.419, as an additional caregiver.

(3) If an applicant intends to produce marijuana for him or herself or designate another person to produce marijuana for him or

her, the applicant or the individual designated to be the PRMG must complete the grow site registration portion of the application and submit:

(a) A legible copy of the designated PRMG's valid government issued photographic identification that includes the last name, first name, and date of birth.

(b) The grow site address.

(c) If the grow site is within city limits, documentation that shows the zoning designation for the grow site address.

(d) Except for a patient producing marijuana for him or herself at his or her residence, the grow site registration fee as specified in OAR 333-008-0021(4), unless the Authority has established an online payment system for grow site registration in which case the fee must be paid online in accordance with instructions from the Authority.

(4) If the Authority establishes an online payment system for payment of a grow site registration fee the Authority must notify the person designated on the application as the PRMG with instructions for how to pay the fee online and the deadline by which the fee must be paid.

(5) Applications must be mailed to the address listed in section (6) of this rule or hand-delivered to the OMMP dropbox at 800 N.E. Oregon St., Portland, Oregon 97232, unless the Authority has established an electronic application process at which time applications and accompanying documentation must be submitted electronically.

(6) The application forms referenced in this rule may be downloaded at www.healthoregon.org/ommp or obtained by contacting OMMP at PO Box 14450, Portland, OR 97293-0450 or by calling 971-673-1234.

(7) Acceptable forms of current government issued photographic identification include but are not limited to:

(a) Driver's license;

(b) State identification card;

(c) Passport; or

(d) Military identification card.

333-008-0021
Patient and PRMG New and Renewal Fees

(1) All fees referenced in this rule are non-refundable.

(2) New and Renewal Application Fee. A patient must pay a $200 application fee unless the applicant qualifies for a reduced fee under section (3) of this rule.

(3) Reduced Fees.

(a) An applicant receiving SSI benefits: $20. In order to qualify for the reduced fee the applicant must submit at the time of application a copy of a current monthly SSI benefit statement showing dates of coverage.

(b) An applicant enrolled in OHP: $50. In order to qualify for the reduced fee the applicant must submit a copy of the applicant's current eligibility statement or card.

(c) An applicant receiving food stamp benefits through the Oregon SNAP: $60. In order to qualify for the reduced fee the applicant must submit at the time of application current proof of his or her food stamp benefits.

(d) An applicant who has served in the Armed Forces of the United States: $20. In order to qualify for the reduced fee the applicant must provide proof of having served in the Armed Forces, such as but not limited to, submitting a Veteran's Administration form DD-214.

(4) Grow Site Registration Fee: $200.

(5) Replacement Card Fees. If a patient, designated primary caregiver or PRMG needs to obtain a replacement card the fee is $100. If the patient qualifies for a reduced application fee of $20, the fee to receive any of the replacement cards is $20.

(6) All fees must be paid at the time a new or renewal application is submitted, or when an application to add or change a PRMG is submitted under OAR 333-008-0047 and may be paid in the form of bank check, money order, or personal check, unless the Authority has established an online payment system in which case payments must be made online. The Authority does not accept responsibility for payments that are lost in the mail or stolen in transit.

(7) The Authority shall notify an applicant who submits a reduced application fee if the applicant is not eligible for the reduced fee and will allow the applicant 14 calendar days from the date of notice to pay the correct application fee or submit current valid proof of eligibility for a reduced fee.

Stat. Auth.: ORS 475B.415, 475B.420, 475B.525

333-008-0022

Proof of Residency

(1) If an applicant for a registry identification card does not have a valid Oregon driver license or Oregon identification card, the applicant must submit documentation that shows the applicant is a resident of Oregon, such as but not limited to a current lease agreement or current utility bill that has the applicant's name and address.

(2) Residency must be maintained by patients while registered with the Authority.

333-008-0023
Patient Application Review Process

(1) The Authority must review a patient application to determine if it is complete.

(a) If an applicant does not provide all the information required in OAR 333-008-0020 or pay the applicable fee the Authority must notify the applicant of the information that is missing or the fee that was not paid, and allow the applicant 14 calendar days to submit the missing information.

(b) If an applicant does not provide the information requested in subsection (1)(a) of this rule the application must be denied in accordance with OAR 333-008-0035.

(2) The Authority may verify the information on each application, verify any accompanying documentation submitted with an application, or request additional information from the applicant or other individuals named on the application.

(3) If the Authority is unable to verify that the applicant's attending physician meets the definition under OAR 333-008-0010 the applicant will be allowed 30 days to submit a new APS or written documentation from a physician meeting the requirements of these rules. Failure to submit the required attending physician documentation is grounds for denial under ORS 475B.415(8) and OAR 333-008-0035.

(4) If an applicant fails to submit information necessary for the Authority to verify information on the application, fails to submit information necessary to verify any accompanying documentation submitted with an application, or fails to cooperate with the Authority in obtaining information, such as but not limited to refusing to sign an authorization for disclosure of medical records within timeframes established by the Authority, the Authority will reject the application as incomplete.

(5) An applicant whose application is rejected as incomplete may reapply at any time. If the individual reapplies within a year the application fee may be applied toward a new application.

(6) Upon receipt of a complete application, including payment of the required application fee, the Authority must issue a receipt to the applicant verifying that a complete application has been received. A receipt issued under this section has the same legal effect as a registry identification card for 30 days following the date on which the receipt was issued to the applicant.

(7) The Authority shall approve or deny an application within 30 days after receiving a complete application.

333-008-0025
Person Responsible for a Marijuana Grow Site Criteria; Grow Site Registration Application Review Process

(1) In order to be a PRMG an individual must:

(a) Be 21 years of age or older.

(b) Not have been convicted of a Class A or Class B felony under ORS 475.752 to 475.920 for the manufacture or delivery of a controlled substance in Schedule I or Schedule II:

(A) Within the previous two years; or

(B) More than once.

(2) In addition to the application review required in OAR 333-008-0023 the Authority must:

(a) Conduct a criminal background check on any PRMG.

(b) Verify the PRMG's age.

(c) Verify the zoning of the grow site address if the grow site is within city limits.

(d) Determine the number of plants that are permitted at the grow site address.

(3) Unless the Authority has received a request for a grandfathered grow site address under OAR 333-008-0500, the grow site plant limits, on and after March 1, 2016, are as follows:

(a) A maximum of 12 mature marijuana plants if the grow site location is within city limits and zoned residential; or

(b) A maximum of 48 mature marijuana plants if the grow site location is within city limits but not zoned residential or outside city limits.

(4) The Authority must notify a patient if a PRMG or a grow site address is ineligible for registration and the patient will be allowed 14 calendar days to identify another PRMG or grow site address in accordance with OAR 333-008-0047.

333-008-0030
Approval of New and Renewal Patient Applications

(1) If the Authority approves a patient application, the Authority shall issue a serially numbered registry identification card to the patient within five business days.

(2) The registry identification card must include, but is not limited to:

(a) The patient's name, address, and date of birth;

(b) The effective date, date of issuance, and expiration date of the registry identification card; and

(c) The designated primary caregiver's name, address, and date of birth, if applicable.

(3) If a patient has specified a designated primary caregiver the Authority shall issue an OMMP identification card for the designated primary caregiver.

333-008-0033
Approval of New or Renewal PRMG and Grow Site Application; Change of PRMG

(1) The Authority must register a PRMG and a grow site address listed on an application if:

(a) The PRMG:

(A) Meets the age requirements;

(B) Passes the criminal background check;

(C) Has not violated a provision of ORS 475B.400 to 475B.525, ORS 475B.580, ORS 475B.650, OAR chapter 333, division 7, these rules, or an ordinance adopted pursuant to ORS 475B.500; and

(D) Pays the applicable fee.

(b) The grow site address does not exceed the plant limits in ORS 475B.428(3) or (4).

(2) If the Authority registers a marijuana grow site it will issue an identification card and a grow site registration card that contains at least the following information:

(a) The PRMG's name, address, date of birth, and identification card number.

(b) The effective date, date of issuance, and expiration date of the identification card.

(c) The grow site address.

(d) The patient's registry identification card number.

(3) A PRMG, except for a patient growing only for him or herself at his or her residence who is not transferring usable marijuana, seeds or immature plants to a registered processing site or dispensary, must create an online account with the Authority through which the individual must at a minimum submit the information required in OAR 333-008-0630.

(4) The Authority must notify a PRMG at the time the grow site is registered the current number of mature marijuana plants permitted at the grow site address.

(5) The Authority shall also notify a patient if the PRMG and grow site address has been approved.

(6) The Authority may only register one grow site per patient, and may only register grow sites in Oregon.

333-008-0040
Annual Renewal

(1) A patient shall register on an annual basis to maintain active registration status by submitting:

(a) A renewal application prescribed by the Authority;

(b) An APS signed by the patient's attending physician within 90 days prior to the expiration date of the patient's current card, reconfirming the patient's debilitating medical condition and that the medical use of marijuana mitigates the symptoms of the patient's debilitating medical condition; and

(c) The additional information and fees required in OAR 333-008-0020.

(2) A renewal application may be submitted by mail at PO Box 14450, Portland, OR 97293-0450 or in person at the OMMP drop box located at 800 N.E. Oregon St., Portland, OR 97232.

(3) Between 60 to 90 calendar days prior to expiration, the Authority shall notify the patient of the upcoming expiration date.

(4) If a renewal application and accompanying information is not received by the expiration date on the patient's card, the patient's card and all other associated OMMP identification cards, if any, are expired. The expiration date may be extended, due to personal hardship, at the discretion of the Authority.

(5) Upon receipt of a complete renewal application, including payment of the required application fee, the Authority must issue a receipt to the applicant verifying that a complete renewal application has been received. A receipt issued under this section has the same legal effect as a registry identification card for 30 days following the date on which the receipt was issued to the applicant.

(6) The Authority shall review and verify the renewal application information in the same manner as specified in OAR 333-008-0023 and 333-008-0025 and shall approve or deny the application in accordance with OAR 333-008-0030 to 333-008-0037, as applicable.

333-008-0045
Notification of Changes

(1) Patient notification responsibilities.

(a) A patient must notify the Authority within 10 calendar days of any change in the patient's name, mailing address, electronic mail address, telephone number, attending physician, designated primary caregiver, PRMG, grow site address or residency, on a form prescribed by the Authority.

(b) If the patient is designating a caregiver for the first time or designating a different caregiver, the patient must include all the information and documentation specified in the form and required under OAR 333-008-0020.

(c) If a patient is adding or changing a PRMG or grow site address the patient must comply with OAR 333-008-0047.

(2) Caregiver notification responsibilities. A designated primary caregiver must notify the Authority within 10 calendar days of any change in the caregiver name, mailing address, electronic mail address, or telephone number.

(3) Person responsible for a marijuana grow site notification responsibilities. A PRMG must notify the Authority within 10 calendar days of:

(a) Any change in the person's name, mailing address, electronic mail address, or telephone number.

(b) A conviction of a Class A or Class B felony under ORS 475.752 to 475.920 for the manufacture or delivery of a controlled substance in Schedule I or Schedule II.

(4) If the Authority is notified by the patient that the patient has terminated the designation of a primary caregiver or a PRMG the Authority must notify the individuals confirming the termination, informing the individual that his or her card is no longer valid, and requesting that the card be returned to the Authority within seven calendar days. In addition the Authority must notify the PRMG whether the termination affects the person's ability to produce marijuana for other patients at the grow site address, in accordance with ORS 475B.428(6).

(5) Change in Medical Condition.

(a) If an attending physician notifies the Authority that a patient no longer has a debilitating medical condition or that that the medical use of marijuana is contraindicated for the patient's debilitating medical condition, the Authority must notify the patient that the patient's registry identification card will be invalid 30 days from the date of the notification unless the patient submits within 30 calendar days an APS or written documentation that may consist of relevant portions of the individual's medical record, signed by the individual's attending physician within the previous 90 days, which states the individual has been diagnosed with a debilitating medical condition and that the use of marijuana may mitigate the symptoms or effects of the individual's debilitating medical condition.

(b) If, due to circumstances beyond the patient's control he or she is unable to submit the documentation in subsection (a) of this section, the Authority may, upon receiving a written request from the patient, grant the patient additional time to obtain a second

opinion. The Authority must notify the patient how much additional time the patient has to submit the documentation.

(6) If a patient does not intend to submit the information or does not submit the information required in section (5) of this rule within the timeframes established by the Authority, the Authority must notify:

(a) The patient that the patient's card must be returned within seven calendar days; and

(b) If applicable, the patient's designated primary caregiver and PRMG that those identification cards must be returned within seven calendar days.

(7) The Authority will review and deny a caregiver designation or register a caregiver in accordance with OAR 333-008-0023 to 333-008-0037, as applicable.

(8) Change forms may only be submitted to the Authority via mail at PO Box 14450, Portland, OR 97293-0450 or in person at the OMMP drop box located at 800 N.E. Oregon St., Portland, OR 97232 and must be accompanied by any applicable fee as specified in OAR 333-008-0021.

Interim Addition or Change of Person Responsible for a Marijuana Grow Site or Grow Site Address

(1) If a patient is adding a PRMG and grow site address at any time other than when applying for a new or renewal registry identification card, or if a patient is changing a PRMG or grow site address at any time other than when submitting a renewal application for a patient identification card, the patient must:

(a) Submit a PRMG and grow site registration change application, on a form prescribed by the Authority, that includes all the information and documentation specified in the form and required under OAR 333-008-0020(3); and

(b) Pay the fee required in OAR 333-008-0021 unless the PRMG is a patient growing only for him or herself.

(2) A PRMG and grow site registration change application shall be reviewed in accordance with OAR 333-008-0025 and approved or denied in accordance with OAR 333-008-0033 or 333-008-0037.

Permissible Amounts of Medical Marijuana for Patients and Caregivers

(1) A patient or the patient's designated primary caregiver may jointly possess up to six mature marijuana plants and 24 ounces of usable marijuana.

(2) A patient or the patient's designated primary caregiver may only possess cannabinoid products, concentrates or extracts in the amounts described in ORS 475B.245.

(3) A patient and designated primary caregiver must have, in his or her possession, his or her registry identification card or OMMP identification card when transporting marijuana.

(4) A patient must have, in his or her possession, his or her registry identification card when using marijuana in a location other than the residence of the cardholder.

333-008-0090
Addition of Qualifying Diseases or Medical Conditions

(1) For the purposes of this rule, the following definitions apply:

(a) DSM means the latest published edition of Diagnostic and Statistical Manual of Mental Disorders.

(b) ICD means the most recent revision of the International Classification of Diseases published by the United Nations-sponsored World Health Organization that provides codes, up to six characters long, to classify diseases and a variety of signs, symptoms, abnormal findings, complaints, social circumstances, and external causes of injury or disease.

(c) Peer-reviewed published scientific study means that a study has been cited by the Cochrane Review, the Institute of Medicine, or PubMed Central.

(d) Petitioner means an individual who has filed a petition in accordance with ORS 475B.517 and this rule.

(e) State Public Health Officer (SPHO) means the individual appointed by the Director of the Authority in accordance with ORS 431.045, or his or her designee.

(2) The Authority shall accept a written petition from any person requesting that a particular disease or condition be included among the diseases and conditions that qualify as a debilitating medical condition under ORS 475B.410.

(a) A petition may only request a single disease or condition be added as a debilitating medical condition. A separate petition must be submitted for each disease or condition proposed to be added as a debilitating medical condition.

(b) A petition must be submitted by mail using a form prescribed by the Authority and must include, along with the form, the following in an electronic format (e.g. compact disc (CD) or thumb drive):

(A) A specific description of the disease or condition proposed to be added and its characteristics, including the applicable ICD code or the specific diagnosis as described in the DSM;

(B) A general explanation of how or why the petitioner believes marijuana would mitigate the symptoms or effects of the disease or condition that is the subject of the petition; and

(C) At least one peer-reviewed published scientific study showing the efficacy in humans for use of medical marijuana for the disease or condition that is the subject of the petition.

(c) A petitioner may also include with the information required to be submitted in subsection (2)(b) of this rule letters of support from physicians or other licensed health care professionals knowledgeable about the disease or condition proposed to be added, and any other information the petitioner believes the SPHO should review in considering the petition.

(d) If a petitioner submits a petition to add the same or a substantially equivalent disease or condition that was the subject of a petition that was denied by the SPHO within the last five years from the date a new petition is submitted, a petitioner must submit at least one peer-reviewed published scientific study that was published since the date the SPHO denied the previous petition for the same or substantially equivalent disease or condition.

(e) A petition may not contain individually identifiable health information as that is defined in ORS 433.443 unless any individual identified in relation to health information submits an Authorization for Use and Disclosure of Information on a form prescribed by the Authority. A petition that contains individually identifiable health information that is submitted without the required authorization must be returned to the petitioner as incomplete.

(f) A petition that does not contain all the information required by section (2) of this rule shall be returned to the petitioner as incomplete. A petition returned as incomplete is not considered a denial for purposes of subsection (2)(d) of this rule.

(3) If the petitioner has submitted a petition with all the information required in section (2) of this rule, the SPHO must:

(a) Assign a petition number to the petition;

(b) Notify the petitioner by certified mail that the petition has been accepted;

(c) Post a notice, a copy of the petition and materials submitted by the petitioner on the Authority's website announcing that the petition has been accepted and is under consideration, and solicit information from individuals or organizations concerning experts in cannabis therapeutics and scientific studies, including but not limited to peer-reviewed published scientific studies;

(d) Notify the Advisory Committee on Medical Marijuana (ACMM) by electronic mail that the petition is under consideration, and request from the ACMM recommendations regarding relevant experts and information pertinent to the petition;

(e) Conduct an investigation that may, as the SPHO determines necessary, include:

(A) Consulting with one or more experts in cannabis therapeutics and one or more experts on the disease or condition that is the subject of the petition;

(B) Requesting a literature review and a summary of peer-reviewed published scientific studies related to the use of marijuana for the disease or condition that is the subject of the petition, from neutral persons knowledgeable about conducting such reviews; and

(C) Gathering any other information the SPHO believes relevant to making a decision on the petition.

(f) Hold a public hearing at a time and place determined by the SPHO. At the public hearing the petitioner shall have the opportunity to address the SPHO in person or by telephone. Written comments shall be accepted by the SPHO for one week following the close of the public hearing.

(4) Following the investigation identified in subsection (3)(e) of this rule and the close of the public comment period specified in subsection (3)(f) of this rule, the SPHO must issue a Notice of Intent to either approve or deny the petition.

(a) The SPHO must issue a Notice of Intent to Approve the petition if, based on the evidence presented to and considered by the SPHO, the SPHO finds that:

(A) Marijuana is efficacious for the disease or condition that is the subject of the petition or marijuana may mitigate the symptoms or effects of the disease or condition that is the subject of the petition; and

(B) Any risk of physical or mental harm from using marijuana for the disease or condition that is the subject of the petition is outweighed by the physical or mental benefit of using marijuana for that disease or condition.

(b) The SPHO must issue a Notice of Intent to Deny the petition if the SPHO determines that the evidence presented to and considered by the SPHO does not meet the standards established in subsection (4)(a) of this rule.

(c) The Notice of Intent must be in writing and must describe all evidence and information upon which the decision of the SPHO is based, including the identity and credentials of all experts relied upon.

(d) If the Authority issues a Notice of Intent to Deny the petitioner is entitled to a contested case hearing as provided under ORS Chapter 183. The petitioner has 30 days to request a hearing.

(5) At a contested case hearing, the petitioner has the burden of proving the decision of the SPHO was without a reasonable basis in fact.

(6) The SPHO must issue a final order within 180 days of receipt of a complete petition.

(7) A petitioner may withdraw his or her petition without prejudice at any time prior to the public hearing specified in subsection (3)(f) of this rule. A petition withdrawn after the public hearing specified in subsection (3)(f) of this rule shall be deemed denied for purposes of this rule.

Advisory Committee on Medical Marijuana

(1) The Advisory Committee on Medical Marijuana (ACMM) shall advise the Director of the Authority on the administrative aspects of ORS 475B.400 to 475B.525, including rules and fees adopted and proposed for adoption under ORS 475B.400 to 475B.525.

(2) The Authority will provide staff support to the ACMM by assisting with the scheduling of meetings, recording of minutes, and dissemination of meeting-related materials.

(3) The ACMM will adopt a Charter and By-Laws that detail:

(a) How meetings will be conducted;

(b) The election of presiding officers; and

(c) The scheduling of at least four public meetings per year.

Persons Responsible for a Marijuana Grow Site

333-008-0500
Request for Grandfathered Grow Site

(1) An individual or group of individuals may submit a petition, on a form prescribed by the Authority, requesting that a grow site address be approved as a grandfathered grow site.

(2) A petition submitted under section (1) of this rule must include:

(a) For all individuals currently growing at the grow site address:

(A) Names and contact information.

(B) Copies of legible and valid government issued photographic identification that includes last name, first name, and date of birth.

(C) Copies of all current grow site registration cards issued to the PRMG for the grow site address.

(D) An attestation that the PRMG was registered at the grow site address on December 31, 2014, and has continuously been registered at the grow site address since that date.

(b) The physical address of the grow site where marijuana is being produced or intending to be produced.

(c) Documentation from a local government that indicates whether the address is within city limits and if so, the zoning designation for the address.

(d) The names and registry identification card numbers for all patients for whom each PRMG is producing at the grow site address.

(e) How many patients each PRMG was growing for on December 31, 2014.

(3) A petition that does not contain all the required information or is not accompanied by all of the documentation required to be submitted in section (2) of this rule is incomplete and will be returned to the applicant.

(4) A petition that does not include all the PRMGs currently growing at the grow site address may be considered by the Authority to be incomplete and may be returned to the applicant.

(5) Acceptable forms of current government issued photographic identification include but are not limited to:

(a) Driver's license;

(b) State identification card;

(c) Passport; or

(d) Military identification card.

333-008-0510
Review of Petition For Grandfathered Grow Site

(1) Once the Authority has determined that a petition is complete it must:

(a) Conduct a criminal background check on all PRMGs listed on the application;

(b) Verify that:

(A) Each person listed on the application is 21 years of age or older;

(B) Each person has a current valid registration card and is currently registered at the grow site address;

(C) All the patients listed on the application have valid cards; and

(D) All persons were registered with the Authority on December 31, 2014, at the grow site address listed on the application and have been continuously registered at the grow site since the petition was submitted; and

(c) Verify the number of patients each PRMG was producing marijuana for, at that address on December 31, 2014.

(2) If a PRMG listed on a petition does not meet the age requirements or is disqualified to be a PRMG based on criminal convictions, the Authority must notify:

(a) The PRMG that his or her designation is revoked; and

(b) The patient that the patient's PRMG is ineligible and that the patient may submit a change form, in accordance with OAR 333-008-0047 designating a new PRMG and grow site address.

333-008-0520
Approval of Petition for Grandfathered Grow Site

(1) The Authority will grant a petition for a grandfathered grow site if, based on the information in the petition and the Authority's review of the petition:

(a) The grow site address is currently registered with the Authority;

(b) The petition includes all PRMGs currently growing at the grow site address;

(c) With the exception of any PRMG whose designation was revoked under OAR 333-008-0510(2), the PRMGs listed in the petition are qualified to be a PRMG;

(d) All qualified PRMGs listed in the petition were registered at the grow site address on December 31, 2014, and were all continuously registered there at the time the petition was submitted; and

(e) The number of patients registered at the grow site address would not result in the grow site address exceeding:

(A) 24 mature marijuana plants if the location is within city limits and zoned residential; or

(B) 96 mature marijuana plants if the location is within city limits but not zoned residential or not within city limits.

(2) The actual grow site address plant limit is based on the number of patients registered at the grow site address on December 31, 2014, assuming six mature plants per patient.

(3) If a grow site address is approved under this rule the Authority may not register any additional PRMG at that address unless the grandfathered grow site approval has been terminated.

Stat. Auth.: ORS 475B.525
Stats. Implemented: ORS 475B.428

333-008-0530
Denial of Petition for Grandfathered Grow Site

(1) The Authority must deny a petition for a grandfathered grow site if based on the information in the petition and the Authority's review of the petition:

(a) The grow site address is not currently registered with the Authority;

(b) The petition does not include all PRMGs currently producing marijuana at the grow site address;

(c) None of the PRMGs listed in the petition are qualified or the number of PRMGs eligible to produce marijuana at the grow site address would result in the grow site address exceeding the maximum plant limits, depending on the location of the grow site address;

(d) Not all of the qualified PRMGs listed in the petition were registered at the grow site address on December 31, 2014, or were not all continuously registered there at the time the petition was submitted; or

(e) The number of patients registered at the grow site address exceed the plant limits in ORS 475B.428(3)(b) or 475B.428(4)(b).

(2) An individual or group of individuals whose petition is denied may resubmit a petition at any time.

(3) If a petition is denied the maximum plant limits at the grow site address for which the petition was filed are:

(a) 12 mature marijuana plants if the location is within city limits and zoned residential; or

(b) 48 mature marijuana plants if the location is within city limits but not zoned residential or not within city limits.

333-008-0540
Requirements for Grandfathered Grow Sites; Termination of PRMG Designation; Suspension or Revocation of PRMG Registration

(1) A grandfathered grow site may only have the number of plants authorized by the Authority, based on the number of patients designating the address as a grow site on December 31, 2014. A PRMG producing marijuana at a grandfathered grow site may replace an existing patient with a new patient unless the person's designation has been terminated under ORS 475B.428(6).

(2) If the Authority suspends or revokes the registration of a PRMG that is producing marijuana at a grandfathered grow site the PRMG may not continue to grow at that address or any other grow site address that has more than:

(a) 12 mature marijuana plants if the location is within city limits and zoned residential; or

(b) 48 mature marijuana plants if the location is within city limits but not zoned residential or not within city limits.

(3) If a patient terminates the designation of a PRMG that person may not be designated to produce marijuana by another patient at the grandfathered grow site address and may not produce marijuana at any other grow site address that is authorized to have more than 48 mature marijuana plants.

(4) Approval of a grandfathered grow site is terminated once the number of mature marijuana plants, based on number of PRMGs who have been authorized to produce medical marijuana at the grow site address and the number of patients each person is producing for is less than:

(a) 12 mature marijuana plants if the location is within city limits and zoned residential; or

(b) 48 mature marijuana plants if the location is within city limits but not zoned residential or not within city limits.

333-008-0550
General Person Responsible for a Marijuana Grow Site Requirements

(1) A PRMG may not grow marijuana for more than four patients at any one time.

(2) A PRMG must display a marijuana grow site registration card at the marijuana grow site at all times for each patient for whom marijuana is being produced.

(3) All seeds, immature marijuana plants, mature marijuana plants and usable marijuana associated with the production of marijuana for a patient by a PRMG are the property of the patient and must be provided to the patient upon request, unless the patient has assigned a portion of the right to possess the seeds, immature plants and usable marijuana to the PRMG in accordance with ORS 475B.425.

(4) All marijuana produced for a patient must be provided to the patient or designated primary caregiver when the PRMG ceases producing marijuana for the patient, unless the patient has assigned a portion of the right to possess the seeds, immature plants and usable marijuana to the PRMG in accordance with ORS 475B.425.

(5) All usable marijuana associated with the production of marijuana for a patient must be transferred to a marijuana processing site upon the patient's request.

(6) All seeds, immature marijuana plants and usable marijuana associated with the production of marijuana for a patient must be transferred to a medical marijuana dispensary upon the patient's request.

(7) If a patient terminates the designation of a PRMG that PRMG may not be designated to produce marijuana by another patient unless the grow site address is authorized to have no more than 48 mature marijuana plants.

(8) A PRMG must return the grow site registration card to the Authority when the person's designation has been terminated by a patient or the person ceases producing marijuana for him or herself or another patient.

(9) A PRMG registered with the Authority, except for a patient growing only for him or herself at his or her own residence and not transferring usable marijuana, seeds or immature plants to a registered processing site or dispensary, must create an online account with the Authority through which the individual must at a minimum submit the information required in OAR 333-008-0630.

(10) A PRMG must comply with the advertising restrictions in OAR 333-008-2070 and must remove any sign, display or advertisement if the Authority determines the PRMG has violated OAR 333-008-2070.

333-008-0560
Grow Site Plant Limits

(1) A PRMG may not produce more than six mature marijuana plants per patient.

(2) Unless a petition has been granted under OAR 333-008-0520 or except as authorized under Oregon Laws 2016, chapter 83, section 2, a grow site address may not have more than:

(a) 12 mature marijuana plants if the location is within city limits and zoned residential; or

(b) 48 mature marijuana plants if the location is within city limits but not zoned residential or not within city limits.

(3) For purposes of determining plant limits the Authority presumes that a PRMG grows six mature plants for each patient.

333-008-0570
Designation of Plants at Grow Site Address

(1) A PRMG producing marijuana at a grow site where multiple PRMGs are registered must physically identify the marijuana plants at a grow site address that are being grown by that PRMG by either:

(a) Tagging each marijuana plant with the PRMG's name, identification card number and patient identification number; or

(b) Fencing or cordoning off the PRMG's marijuana plants and posting all grow site registration cards at the location where the plants are located.

(2) If during an investigation the Authority determines that marijuana plants have not been designated by a PRMG in accordance with section (1) of this rule or there are marijuana plants at the grow site designated by an individual who is not authorized to produce marijuana at that grow site the Authority may suspend or revoke the registration of the grow site address for all PRMGs at that grow site and all the PRMG's identification cards.

(3) If during an investigation the Authority determines that a PRMG is producing marijuana plants in excess of the number of plants allowed in ORS 475B.428 the Authority may suspend or revoke the registration of the PRMG for each patient who has designated the PRMG.

333-008-0580
Usable Marijuana Possession Limits for a Person Designated to Produce Marijuana by a Patient

(1) Subject to section (2) of this rule, a person designated to produce marijuana by a patient may possess the amount of usable marijuana that the person harvests from his or her mature marijuana plants, provided that the person may not possess usable marijuana in excess of the amount of usable marijuana in the person's possession as reported to the Authority under OAR 333-008-0630.

(2) A person designated to produce marijuana by a patient may not possess usable marijuana in excess of:

(a) For a marijuana grow site located outdoors, 12 pounds of usable marijuana per mature marijuana plant; or

(b) For a marijuana grow site located indoors, six pounds of usable marijuana per mature marijuana plant.

(3) Unless a PRMG falls within the definition of a person designated to produce marijuana by a patient the PRMG may only possess the amount of usable marijuana that is permitted under ORS 475B.245.

(4) A PRMG producing marijuana at a grow site where there are multiple PRMGs registered must physically segregate the usable marijuana at the grow site address that is the property of the PRMG or the PRMG's patients by placing the usable marijuana in a receptacle or multiple receptacles and attaching a label to the receptacle that includes the PRMG's name, identification card number and patient identification number.

(5) If during an investigation the Authority determines that usable marijuana has not been segregated in accordance with section (4) of this rule or that usable marijuana at the grow site is identified as belonging to an individual who is not registered at the grow site, the Authority may suspend or revoke the registration of the grow site address for all PRMGs producing at that grow site and the PRMG's cards.

333-008-0630
PRMG Documentation Requirements

(1) The reporting requirements in this rule do not apply to a patient growing only for him or herself at his or her residence, unless the patient is transferring usable marijuana to a registered processing site or dispensary.

(2) Beginning in June 2016, and on a monthly basis thereafter, no later than the 10th day of each month, a PRMG, who is not a person designated to produce marijuana by a patient, as that is defined in OAR 333-008-0010, must submit the following information to the Authority:

(a) The number of immature and mature marijuana plants and amount of usable marijuana transferred to each patient for whom the PRMG is producing marijuana;

(b) The amount of usable marijuana transferred to each registered marijuana processing site through an agreement with the patient; and

(c) The number of seeds or immature plants and the amount of usable marijuana transferred to each registered dispensary through an agreement with the patient.

(3) Beginning in June 2016, and on a monthly basis thereafter, no later than the 10th day of each month, a person designated to produce marijuana by a patient as that term is defined in OAR 333-008-0010, must submit the following information to the Authority:

(a) The number of mature marijuana plants and immature marijuana plants, the amount of marijuana leaves and flowers being dried, and the amount of usable marijuana, in the person's possession;

(b) The number of mature marijuana plants and immature marijuana plants, and the amount of usable marijuana transferred to each patient for whom the person produces marijuana, or that patient's designated primary caregiver during the previous month;

(c) The amount of usable marijuana transferred to each marijuana processing site during the previous month; and

(d) The number of immature marijuana plants, and the amount of usable marijuana transferred to each medical marijuana dispensary during the previous month.

(4) The information required to be submitted under this rule must be submitted electronically in a manner prescribed by the Authority.

(5) In addition to submitting the information as required in section (3) of this rule a person designated to produce marijuana by a patient must keep a record of the information described in section (3) of this rule for two years after the date on which the person submits the information to the Authority.

(6) A person designated to produce marijuana by a patient, as that term is defined in OAR 333-008-0010, may delegate his or her duty to report information under section (3) of this rule to another person designated to produce marijuana by a patient if the marijuana grow site addresses are the same.

(a) The person to whom the duty is delegated must submit a notice, on a form prescribed by the Authority, of the delegation.

(b) A delegation under this section does not relieve a person designated to produce marijuana by a patient, who delegates the duty to report, from complying with any of these rules, except for the duty to report.

(c) If a person to whom the reporting duty has been delegated fails to report in accordance with section (3) of this rule the Authority may suspend or revoke the registration of the person to whom the reporting duty was delegated.

(d) If the person to whom the reporting duty has been delegated fails to report in accordance with section (3) of this rule for any person designated to produce marijuana by a patient the delegation is void and the person who delegated the reporting duty must report the information to the Authority within 10 business days of being informed by the Authority of the failure to report.

Pesticides

(1) A PRMG may only use pesticides in accordance with ORS Chapter 634 and OAR chapter 603, division 57.

(2) The Authority may investigate any violation of this rule based on:

(a) A failed pesticide test received on or after October 1, 2016;

(b) Information provided by any other state agency;

(c) A grow site inspection; or

(d) The receipt of a complaint alleging unlawful pesticide use.

(3) If the Authority determines that a violation of this rule has occurred, it may provide information obtained by the Authority to the Oregon Department of Agriculture.

OMMP Monitoring, Investigation, and Enforcement

333-008-0700
Monitoring and Investigations

(1) The Authority may, at any time, contact a patient, designated primary caregiver, PRMG, or a patient's attending physician by telephone, mail or in person to verify the current accuracy of information included in the registration system.

(2) The Authority may, when it has reasonable basis for believing a violation of ORS 475B.400 through 475B.525, 475B.555, 475B.605, 475B.615, OAR chapter 333, division 7 or these rules has occurred, either conduct an investigation or arrange for this responsibility to be assumed by the proper state or local authorities.

(3) A patient, designated primary caregiver or PRMG must cooperate with the Authority during an investigation.

(4) If the Authority records show that any one physician is the attending physician of record for more than 450 patients at any point in time, the Authority shall request, in writing, that the physician do one of the following:

(a) Provide information for each new patient over the 450 threshold, including:

(A) Documentation that the patient's medical records have been reviewed;

(B) Patient chart notes documenting the patient was examined by the physician and the date of the examination; and

(C) Documentation showing provided or planned follow-up care;

(b) Provide a letter from a clinic at which the physician provides care requesting that the physician be exempted from this section and provide documentation from the clinic that it:

(A) Has clear systems for ensuring medical records are reviewed and that each patient is examined by a physician;

(B) Provides follow-up care for patients;

(C) Maintains a record system documenting the review of medical records, physician examination, and follow-up care; and

(D) Will allow on-site inspections by the Authority to confirm compliance; or

(c) Provide a written statement explaining why the physician should be released from the requirements in this section, for example, an explanation that the physician:

(A) Has a practice that includes a disproportionately high percentage of patients with qualifying conditions;

(B) Serves as a consultant for other health care providers who refer patients requesting medical marijuana; or

(C) Has multiple practice sites and at one of the practice sites the physician clearly meets the attending physician definition.

(5) If the Authority receives a request from a physician to be exempted from the requirement in section (4) of this rule, the Authority shall provide the physician a decision, in writing, explaining whether the physician is or is not exempted from the requirement in section (4) of this rule. The Authority's written decision shall explain the basis for the Authority's decision.

(6) The Authority shall refer criminal complaints against a patient, designated primary caregiver, or PRMG; or medical practice complaints against an attending physician to the appropriate state or local authorities.

Violations

In addition to failure to comply with any applicable provision of ORS 475B.400 to 475B.525, 475B.555, 475B.605, 475B.615, OAR chapter 333, division 7 or these rules, it is a violation:

(1) For a PRMG to transfer seeds, immature plants or usable marijuana to a registered processing site or dispensary without a valid patient authorization or personal agreement.

(2) To fail to cooperate with the Authority during an inspection or investigation.

(3) To fail to pay a civil penalty.

333-008-0730
Suspension and Revocation

(1) Patient Suspension or Revocation.

(a) The Authority may suspend or revoke a patient's card if the Authority determines that the patient:

(A) Provided false information; or

(B) Violated a provision of ORS 475B.400 to 475B.525, 475B.555, 475B.605, 475B.615, OAR chapter 333, division 7 or these rules.

(b) If a patient's card is revoked, any designated primary caregiver issued under ORS 475B.415(5)(b) or PRMG identification card or grow site registration card issued under ORS 475B.420 shall also be revoked.

(c) An individual whose registry identification card is revoked under this rule may not reapply for a registry identification card for six months from the date of the revocation unless otherwise authorized by the Authority.

(2) Designated Primary Caregiver Suspension or Revocation.

(a) The Authority may suspend or revoke a caregiver's identification card issued under ORS 475B.415(5)(b) if the Authority determines that the designated primary caregiver violated a provision of ORS 475B.400 to 475B.525, 475B.555, 475B.605, 475B.615, OAR chapter 333, division 7 or these rules.

(b) An individual whose designated primary caregiver identification card has been revoked under this rule may not be designated as a primary caregiver under ORS 475B.418 for six months from the date of the revocation unless otherwise authorized by the Authority.

(3) Person Responsible for a Marijuana Grow Site Suspension or Revocation.

(a) The Authority may suspend or revoke the registration of a PRMG if the Authority determines that a PRMG violated a provision of ORS 475B.400 to 475B.525, 475B.555, 475B.605, 475B.615, OAR chapter 333, division 7, these rules or an ordinance adopted pursuant to ORS 475B.500.

(b) If the Authority suspends or revokes the registration of a PRMG the person's registration is suspended or revoked for all patients the person is producing marijuana for and the person must:

(A) Return all marijuana that is the property of the person's patients, to the patients; or

(B) If the patient agrees, transfer usable marijuana to a marijuana registered processing site or transfer seeds, immature plants or usable marijuana to a registered dispensary.

(c) A PRMG must document the information, including how much was transferred, the date of transfer, and to whom the transfer was made, and provide that documentation to the Authority upon request.

(d) Failure to comply with the return, transfer, or documentation requirements is a violation and may result in further enforcement action.

Medical Marijuana Dispensaries

333-008-1000
Applicability

(1) A person may not establish, conduct, maintain, manage or operate an establishment for the purpose of providing the services in ORS 475B.450(1)(a) unless the person is registered by the Authority under these rules.

(2) Nothing in these rules exempts a dispensary registrant or dispensary representative from complying with any other applicable state or local laws.

(3) Registration of a dispensary does not protect a dispensary registrant or dispensary representative from possible criminal prosecution under federal law.

(4) Registration by the Authority is not a guarantee that a dispensary is permitted to operate under applicable land use or other local government laws where the dispensary is located.

(5) These rules apply to any initial or renewal application filed on or after June 24, 2016, and to any application filed prior to June 24, 2016 that the Authority has not approved or denied.

333-008-1010
Definitions

For the purposes of OAR 333-008-1000 through 333-008-2200 the following definitions apply:

(1) "Dispensary representative" means an owner, director, officer, PRD, manager, employee, agent or other representative of a registered medical marijuana dispensary, to the extent that the person acts in a representative capacity.

(2) "Dispensary registrant" means:

(a) An individual who owns a registered medical marijuana dispensary or, if a business entity owns the registered medical marijuana dispensary, each individual who has a financial interest in the registered medical marijuana dispensary; and

(b) Any PRD.

(3) "Person responsible for a medical marijuana dispensary" or "PRD" means an individual who is directly involved in the day-

to-day operations of a dispensary and is identified as a PRD on an application.

(4) "Primary PRD" means a PRD designated by the owner of the dispensary as the primary point of contact for the Authority and who is authorized to receive any and all communications and legal notices from the Authority.

(5) "These rules" means OAR 333-008-1000 to 333-008-1248 and 333-008-2000 to 333-008-2200.

333-008-1020
Application for Medical Marijuana Dispensary Registration

(1) To register a medical marijuana dispensary a person must:

(a) Submit an initial application on a form prescribed by the Authority that includes but is not limited to:

(A) The name of the individual who owns the dispensary or, if a business entity owns the dispensary, the name of each individual who has a financial interest in the dispensary;

(B) The name of the individual or individuals responsible for the dispensary, if different from the name of the individual who owns the dispensary, with one of the individuals responsible for the dispensary identified as the primary PRD;

(C) The physical and mailing address of the medical marijuana dispensary; and

(b) Application and registration fee.

(2) An initial application for the registration of a dispensary must be submitted electronically via the Authority's website, www.healthoregon.org/ommp.

(3) If an initial application is submitted along with the required fees the Authority will notify the applicant in writing that the application has been received and that within 30 calendar days of the date the written notice is mailed the following information must be received by the Authority:

(a) For each individual named in the application:

(A) A legible copy of the individual's valid government issued photographic identification that includes last name, first name and date of birth;

(B) Information, fingerprints and fees required for a criminal background check in accordance with OAR 333-008-2020; and

(C) An Individual History Form and any information identified in the form that is required to be submitted;

(b) A written statement from an authorized official of the local government that the proposed location of the dispensary is not located in an area that is zoned for residential use as that term is defined in OAR 333-008-0010;

(c) Proof that the business is registered or has filed an application to register as a business with the Oregon Office of the Secretary of State, including proof of registration for any DBA (doing business as) registration;

(d) Documentation, in a format prescribed by the Authority that the proposed location of the dispensary is not within 1,000 feet of:

(A) The real property comprising a public or private elementary or secondary school, except as provided in Oregon Laws 2016, chapter 83, section 29; or

(B) A registered dispensary.

(e) A scaled site plan of the parcel on which the premises proposed for registration is located, including:

(A) Cardinal directional references;

(B) Bordering streets and the names of the streets;

(C) Identification of the building or buildings in which the proposed dispensary is to be located;

(D) The dimensions of the proposed premises of the dispensary;

(E) Identification of other buildings or property owned by or under the control of the applicant on the same parcel or tax lot as the premises proposed for registration that will be used in the business; and

(F) Identification of any residences on the parcel or tax lot.

(f) A scaled floor plan of all enclosed areas of the premises at the proposed location that will be used in the business with clear identification of walls, partitions, counters, windows, all areas of ingress and egress, intended uses of all spaces and all limited access areas; and

(g) Documentation that shows the applicant has lawful possession of the proposed location of the dispensary.

(4) The documentation required in section (3) of this rule may be submitted electronically to the Authority or may be mailed to the Oregon Medical Marijuana Program, Oregon Health Authority, PO Box 14116, Portland, OR 97293.

(a) If documentation is mailed it must be received by the Authority within 30 calendar days of the date the Authority mailed the notice to the applicant that the initial application was received or the application will be considered incomplete.

(b) If documentation is submitted electronically it must be received by the Authority by 5 p.m. Pacific Time within 30 calendar days of the date the Authority mailed the notice to the applicant that the initial application was received or the application will be considered incomplete.

(5) Application and registration fees must be paid online at the time of application.

(6) Criminal background check fees must be paid by check or money order and must be mailed to the Oregon Medical Marijuana Program, PO Box 14116, Portland, OR 97293, and must be received by the Authority in accordance with provisions in section (4) of this rule.

(7) If the Authority does not receive a complete application, including all documentation required in sections (1) and (3) of this rule, and all required fees within the time frames established in this rule, the application will be considered incomplete.

(8) If an applicant provides the documentation required in section (3) of this rule the Authority will review the information to determine if it is complete.

(a) If the documentation is not complete or is insufficient the Authority must notify the applicant in writing and the applicant will have 10 calendar days from the date such written notice is mailed by the Authority to provide the additional documentation.

(b) If the applicant does not provide the additional documentation within 10 calendar days or if any responsive documents are incomplete, insufficient or otherwise do not demonstrate compliance with ORS 475B.450 and these rules the application will be declared incomplete.

(9) A person who wishes to register more than one location must submit a separate application, registration fees, and all documentation described in sections (1) and (3) of this rule for each location.

(10) An application that is incomplete is treated by the Authority as if it was never received.

333-008-1030
Dispensary Fees

(1) The initial fees for the registration of a dispensary are:

(a) A non-refundable application fee of $500; and

(b) A $3,500 registration fee.

(2) The annual renewal fees for the registration of a dispensary are:

(a) A $500 non-refundable renewal fee; and

(b) A $3,500 registration fee.

(3) The criminal background check fee is $35 per individual.

(4) The Authority must return the registration fee if:

(a) An application is incomplete; or

(b) An applicant withdraws an application.

(5) The Authority may return the registration fee if an application is denied.

333-008-1040
Dispensary Application Review

(1) Applications will be reviewed in the order they are received by the Authority. An application is considered received as of the date and time that payment of application and registration fees is authorized by the entity that issued the credit or debit card used to pay the fees.

(2) Once the Authority has determined that an application is complete it will review an application to the extent necessary to determine compliance with ORS 475B.450 and these rules.

(3) The Authority may, in its discretion, prior to acting on an application:

(a) Contact any individual listed on the application and request additional documentation or information;

(b) Inspect the premises of the proposed dispensary; or

(c) Verify any information submitted by the applicant.

(4) Prior to making a decision whether to approve or deny an application the Authority must:

(a) Review the criminal background check results for each individual named on the application;

(b) Determine whether the proposed location of the dispensary is the same location as a registered grow site under OAR 333-008-0025;

(c) Review documentation submitted by the applicant to determine, based on the information provided by the applicant, whether the proposed location of the dispensary is located within 1,000 feet of:

(A) The real property comprising a public or private elementary or secondary school, except as provided in Oregon Laws 2016, chapter 83, section 29; or

(B) Another registered dispensary;

(d) Verify that the applicant is registered as a business with the Office of the Secretary of State; and

(e) Verify that the proposed location of the dispensary is not:

(A) Located in an area that is zoned for residential use; or

(B) In a city or county that has adopted an ordinance under ORS 475B.800 or section 133 chapter 614, Oregon Laws 2015, prohibiting dispensaries.

(5) If during the review process the Authority determines that the application or supporting documentation contains intentionally false or misleading information the Authority may declare the application incomplete or issue a notice of denial under OAR 333-008-1060.

(6) The Authority will notify the applicant in writing that the applicant has 60 calendar days from the date of the written notice to submit a Readiness Form, prescribed by the Authority, indicating that the applicant is prepared for an inspection and is in compliance with these rules if:

(a) There is no basis for denial under OAR 333-008-1060;

(b) The proposed dispensary is in compliance with ORS 475B.450(3)(a) through (e);

(c) Each individual named in the application passes the criminal background check; and

(d) Each individual named as a PRD in the application meets age requirements.

(7) If the Authority does not receive the Readiness Form in accordance with section (6) of this rule the applicant's application will be declared incomplete, unless an extension has been granted under section (8) of this rule.

(8) An applicant may request one extension of the 60-day deadline in section (6) of this rule if the applicant can demonstrate to the Authority that the deadline cannot be met for reasons outside of the applicant's control, such as but not limited to the applicant's inability to obtain local government building permits.

(a) A request for an extension must be in writing, must be received within 60 calendar days of the notice described in section (6) of this rule and must explain and provide documentation that shows the applicant cannot, for reasons outside of the applicant's control, meet the 60-day deadline, and must specify when the applicant believes it can submit the Readiness Form.

(b) A request for an extension tolls the 60-day deadline.

(c) The Authority will review the request and provide, in writing to the applicant, its decision and the reason for the decision.

(d) If an extension is granted the Authority must inform the applicant of the new deadline for submission of the Readiness Form, but in any case an extension may not exceed 60 calendar days.

333-008-1050
Dispensary Pre-Approval Inspection; Approval of Application

(1) The Authority must perform a site visit within 30 days of receiving a timely Readiness Form, as that is described in OAR 333-008-1040 to determine whether the applicant and dispensary are in compliance with these rules.

(2) If, after the site visit the Authority determines that the applicant and dispensary are in compliance with these rules the Authority must provide the primary PRD with proof of registration that includes a unique registration number, and notify the primary PRD in writing that the dispensary may operate.

(3) If, after the site visit the Authority determines that the dispensary is not in compliance with these rules the Authority may:

(a) Give the applicant 10 business days to come into compliance;

(b) Propose to deny the application in accordance with OAR 333-008-1060; or

(c) Consider the application to be incomplete.

(4) A registered dispensary must at all times display proof of registration in a prominent place inside the dispensary so that proof of registration is easily visible to individuals authorized to transfer marijuana items to the dispensary and individuals who are authorized to receive a transfer of marijuana items from the dispensary.

(5) A registered dispensary may not use the Authority or the OMMP name or logo except to the extent that information is contained on the proof of registration on any signs at the dispensary, on its website, or in any advertising or social media.

(6) A dispensary's registration:

(a) Is only valid for the location indicated on the proof of registration.

(b) May not be transferred to another location.

333-008-1060
Denial of Dispensary Application

(1) The Authority must deny an application if:

(a) An application, supporting documentation provided by the applicant, or other information obtained by the Authority shows that the qualifications for a dispensary in ORS 475B.450 or these rules have not been met; or

(b) An individual named in an application has been:

(A) Convicted for the manufacture or delivery of a controlled substance in Schedule I or Schedule II within two years from the date the application was received by the Authority; or

(B) Convicted more than once for the manufacture or delivery of a controlled substance in Schedule I or Schedule II; or

(c) The city or county in which the facility is located has prohibited dispensaries in accordance with sections 133 chapter 614, Oregon Laws 2015, or ORS 475B.800, unless the dispensary meets the criteria in sections 133(6), chapter 614, Oregon Laws 2015 or ORS 475B.800(6).

(2) The Authority may deny an applicant if it determines that the applicant, the owner of the dispensary, a PRD, or an employee of the medical marijuana dispensary:

(a) Submitted intentionally false or misleading information to the Authority; or

(b) Violated at any time a provision of ORS 475B.400 to 475B.525, 475B.555, 475B.605, 475B.615, OAR chapter 333, division 7, these rules or an ordinance adopted pursuant to ORS 475B.500.

(3) If an individual named in an application is not qualified based on age or the criminal background check, the Authority will permit a change form to be submitted in accordance with OAR 333-008-1078 or 333-008-2030, along with the applicable criminal background check fee. If the individual named in the change form is not qualified the Authority must deny the application in accordance with section (1) of this rule.

(4) If the Authority intends to deny an application for registration it must issue a Notice of Proposed Denial in accordance with ORS 183.411 through 183.470.

333-008-1063
Withdrawal of Dispensary Application

An applicant may withdraw an initial or renewal application at any time prior to the Authority acting on the application unless the Authority has determined that the applicant submitted false or misleading information or there is a pending investigation or enforcement action in which case the Authority may refuse to accept the withdrawal and may issue a notice of proposed denial in accordance with OAR 333-008-1060.

333-008-1070
Expiration and Renewal of Dispensary Registration

(1) A dispensary's registration expires one year following the date of application approval.

(2) A dispensary registrant must submit not more than 90 but at least 30 calendar days before the registration expires:

(a) A renewal application on a form prescribed by the Authority;

(b) Renewal fees;

(c) For each individual named in the renewal application:

(A) A legible copy of the individual's valid government issued photographic identification that includes last name, first name and date of birth;

(B) Information, fingerprints and fees required for a criminal background check in accordance with OAR 333-008-2020;

(C) An Individual History Form and any information identified in the form that is required to be submitted;

(d) Current proof of business registration with the Secretary of State, including all DBA (doing business as) registrations;

(e) Documentation that shows the applicant has lawful possession of the location of the registered dispensary;

(f) Any information required during an initial application; and

(g) A current scaled floor plan of all enclosed areas at the registered dispensary that are used in the business with clear identification of walls, partitions, counters, windows, all areas of ingress and egress, and all limited access areas.

(3) A registrant who files a completed renewal application with the Authority prior to the expiration date of the registration may continue to operate, even after the registration expiration date, pending a decision on the renewal application by the Authority.

(4) A dispensary registrant that does not submit timely renewal documentation in accordance with sections (1) and (2) of this rule may be subject to the imposition of civil penalties.

(5) If a dispensary registrant does not submit all the forms, fees and information required in section (2) of this rule prior to the registration's expiration, the registration is expired and is no longer valid.

(6) Renewals will be processed in accordance with OAR 333-008-1040 to 333-008-1060, as applicable.

(7) A renewal applicant may be required to submit a Readiness Form, as described in OAR 333-008-1040 and may be subject to inspection prior to the Authority acting on a renewal application.

(8) For purposes of this rule a completed application shall be deemed submitted upon receipt by the Authority of all application forms, supporting documents and renewal fees described in section (2) of this rule.

333-008-1075
PRD Criteria and Responsibilities

(1) A PRD must:

(a) Be 21 years or age or older;

(b) Have legal authority to act on behalf of the dispensary; and

(c) Be responsible for ensuring the registered dispensary complies with applicable laws.

(2) A PRD may not:

(a) Have been convicted in any state for the manufacture or delivery of a controlled substance in Schedule I or Schedule II within two years from the date of application; or

(b) Have been convicted more than once in any state for the manufacture or delivery of a controlled substance in Schedule I or Schedule II.

(3) At least one PRD must be on site at a dispensary during Authority inspections or investigations at the time of the inspection or investigation or within one hour of being notified that an inspection or investigation is taking place.

(4) A PRD is accountable for any intentional or unintentional action of registrant representatives, with or without the knowledge of the PRD, who violate ORS 475B.450, 475B.453 or these rules, and is responsible for any unlawful conduct that occurs on the premises of the dispensary or any property outside the registered dispensary that is owned by or under the control of the dispensary registrant.

Stats. Implemented: ORS 475B.450
Hist.: PH 9-2016, f. 2-26-16, cert. ef. 3-1-16; PH 21-2016, f. 6-24-16, cert. ef. 6-28-16

333-008-1078
Removal, Addition, Change, Designation or Assignment of PRD

(1) If an owner of a registered dispensary is adding or changing a PRD or primary PRD, an individual with legal authority to act on behalf of the registered dispensary must submit:

(a) A form, prescribed by the Authority;

(b) A legible copy of the individual's valid government issued photographic identification that includes last name, first name and date of birth;

(c) Information and fingerprints required for a criminal background check in accordance with OAR 333-008-2020; and

(d) A criminal background check fee of $35.

(2) A PRD who is designating or assigning the responsibilities of a PRD to another individual must submit the information and fees required in section (1) of this rule. The responsibilities of a primary PRD may not be designated or assigned.

(3) The Authority will review and approve the addition or change of a PRD or primary PRD if the individual meets the requirements in OAR 333-008-1075.

(4) The Authority will review and approve the designation or assignment of the responsibilities of a PRD to another individual if that individual meets the requirements in OAR 333-008-1075. An

individual to whom a designation or assignment is made, and who is approved by the Authority, has the same legal obligations as a PRD.

(5) An individual may not act in the capacity of a PRD without approval from the Authority.

(6) If the Authority denies the request to add or change a PRD or primary PRD, or denies the request to designate or assign the responsibilities of a PRD to another individual, the Authority must notify the individual that submitted the request of the denial and the current primary PRD, and describe the reason for the denial.

(7) A registered dispensary may not be open for business or receive or transfer any marijuana items without at least one Authority approved PRD and a primary PRD.

333-008-1110
Locations of Medical Marijuana Dispensaries; Dispensary Premises Restrictions and Requirements

(1) A dispensary may not be located:

(a) In an area that is zoned for residential use.

(b) At the same address as a registered marijuana grow site;

(c) Within 1,000 feet of the real property comprising a public or private elementary or secondary school, except as provided in Oregon Laws 2016, chapter 83, section 29; or

(d) Within 1,000 feet of another medical marijuana dispensary.

(2) For purposes of implementing ORS 475B.450(3)(d), the Authority will consider a location to be a school if it has at least the following characteristics:

(a) Is a public or private elementary or secondary school as those terms are defined OAR 333-008-0010;

(b) There is a building or physical space where students gather together for education purposes on a regular basis;

(c) A curriculum is provided;

(d) Attendance is compulsory under ORS 339.020 or children are being taught as described in ORS 339.030(1)(a); and

(e) Individuals are present to teach or guide student education.

(3) For purposes of determining the distance between a dispensary and a school "within 1,000 feet" means a straight line measurement in a radius extending for 1,000 feet or less in any direction from the closest point anywhere on the boundary line of the real property comprising an existing public or private elementary or secondary school to the closest point of the premises of a dispensary. If any portion of the premises of a proposed or registered dispensary is within 1,000 feet of a public or private elementary or secondary school it may not be registered.

(4) For purposes of determining the distance between a dispensary and another registered dispensary "within 1,000 feet" means a straight line measurement in a radius extending for 1,000 feet or less in every direction from the closest point anywhere on the premises of a registered dispensary to the closest point anywhere on the premises of a proposed dispensary. If any portion of the premises of a proposed dispensary is within 1,000 feet of a registered dispensary it may not be registered.

(5) In order to be registered a dispensary must operate at a particular location as specified in the application and may not be mobile.

(6) Minors on Premises. A dispensary registrant may not permit a minor to be present in any limited access or point of sale area of a registered dispensary.

(7) On Premises Consumption.

(a) A dispensary registrant may not permit the ingestion, inhalation or topical application of a marijuana item anywhere on the premises of the registered dispensary, except as described in subsection (b) of this section.

(b) An employee of a registered dispensary who is a patient may consume a marijuana item during his or her work shift on the premises of the registered dispensary as necessary for his or her medical condition, if the employee is:

(A) Alone and in a closed room where no dispensary marijuana items are present;

(B) Not visible to patients or caregivers on the premises of the registered dispensary to receive a transfer of a marijuana item; and

(C) Not visible to the public outside the dispensary.

(c) For purposes of this section consume does not include smoking, combusting, inhaling, vaporizing, or aerosolizing a marijuana item.

(8) General Public and Visitor Access. The general public is not permitted on the premises of a registered dispensary, except as permitted by OAR 333-008-1500 and in accordance with this rule.

(a) In addition to registrant representatives, the following visitors are permitted on the premises of a dispensary, including limited access areas, subject to the requirements in section (9) of this rule:

(A) Laboratory personnel, if the laboratory is accredited by the Authority;

(B) A contractor authorized by a registrant representative to be on the premises; or

(C) Individuals authorized to transfer marijuana items to a registered dispensary.

(b) A registered dispensary may permit up to seven invited guests 21 years of age and older, per week, on the premises of a registered dispensary, including limited access areas, subject to the requirements in section (9) of this rule.

(9) Visitor Escort, Log and Badges.

(a) Prior to entering the premises of a registered dispensary all visitors permitted by section (8) of this rule must be documented and issued a visitor identification badge from a registrant representative that must remain visible while on the premises. All visitors described in section (8) of this rule must be accompanied by a registrant representative at all times.

(b) A dispensary registrant must maintain a log of all visitor activity and the log must contain the first and last name and date of birth of every visitor, and the date they visited.

(10) Government Access. Nothing in this rule is intended to prevent or prohibit Authority employees or contractors, or other state or local government officials that have jurisdiction over some aspect of the premises or a dispensary registrant to be on the premises.

(a) A visitor badge is not required for government officials.

(b) A dispensary must log every government official that enters the premises but the dispensary may not request that the government official provide a date of birth for the log.

(11) Limited Access Areas.

(a) All limited access areas must be physically separated from any area where the general public is permitted, by a floor to ceiling wall that prevents physical access between a point of sale area and an area that is open to the general public except through a door that is kept locked by a dispensary when the door is not immediately in use.

(b) An applicant or registered dispensary may request, in writing, an exception from the Authority from the requirement to have a floor to ceiling wall. The request must include the reason the exception is being sought, pictures of the area in question, and a description of an alternative barrier that accomplishes the goal of providing a significant physical barrier between the general public and any marijuana items on the premises of the dispensary.

(12) A dispensary must have:

(a) A designated limited access area or areas where transfers of marijuana items are received and such an area may not be accessible to patients or designated primary caregivers on the premises to receive the transfer of a marijuana item or the general public; and

(b) A designated area within the premises where patients and designated primary caregivers and other visitors enter the dispensary and are checked in.

(13) The areas described in section (12) of this rule must be clearly marked on the floor or plot plan sketch required in OAR 333-008-1040.

(14) Point of Sale Areas.

(a) All point of sale areas must be physically separated from any area where the general public is permitted by a floor to ceiling wall that prevents physical access between a point of sale area and an area that is open to the general public except through a door that is kept locked by a dispensary when the door is not immediately in use.

(b) All areas where marijuana items are available for transfer to a patient or designated primary caregiver must be supervised by a dispensary representative at all times when a patient or designated primary caregiver is present.

(c) A dispensary may not transfer a marijuana item to a patient or designated primary caregiver through a drive-through window.

(15) A dispensary may not sublet or share with any other business any portion of the dispensary premises.

333-008-1190
Testing

(1) This rule is in effect until October 1, 2016.

(a) Nothing in this rule prohibits a dispensary or an accredited laboratory from complying with the testing rules in OAR 333-007-0300 to 333-007-0490 and providing or accepting a test result that is in compliance with OAR 333-064-0100 and 333-064-0110 in lieu of a test result required in this rule.

(b) Nothing in this rule prohibits an accredited laboratory from performing sampling and testing for a registrant in accordance with this rule, prior to October 1, 2016.

(2) For purposes of this rule:

(a) "Batch" has the same meaning given that term in OAR 333-007-0310.

(b) "TNI" has the same meaning given that term in OAR 333-007-0310.

(c) "TNI standards" has the same meaning given that term in OAR 333-007-0310.

(3) Prior to being registered a PRD must have documentation that identifies at least one laboratory that will do the testing in accordance with this rule.

(4) A registered dispensary may only accept laboratory test results from a laboratory on the Authority's list posted on the Authority's website, www.healthoregon.org/ommp.

(5) A PRD must have a test report that complies with section (11) of this rule that can be linked to the batch from which each sample was taken and to each marijuana item available for transfer, before the marijuana item is available for transfer to a patient or a designated primary caregiver.

(6) A registered dispensary may submit samples for testing in accordance with section (7) of this rule or a PRD may accept test results if:

(a) A copy of the test results is obtained at the time of transfer that clearly links the test results to the marijuana item being transferred;

(b) The PRD can demonstrate to the Authority that random samples from the batch were taken and submitted for testing; and

(c) The PRD can demonstrate to the Authority that the batch from where samples were taken was sealed and not tampered with from the time samples for testing were taken and when they were delivered to the dispensary.

(7) Prior to October 1, 2016, if a dispensary accepts the transfer of a marijuana item that has not been tested in accordance with this rule a dispensary representative must:

(a) Segregate each untested batch and place the batch in an individual container or bag with a label attached to the container or bag that includes at least the following information:

(A) A unique identifier;

(B) The name of the product;

(C) The name of the person who transferred the marijuana item;

(D) The date the marijuana item was received; and

(E) "PRODUCT NOT TESTED" in bold, capital letters, no smaller than 12 point font.

(b) Take random samples from each batch in an amount necessary to conduct the applicable test, label each sample with the batch's unique identifier, and submit the samples for testing.

(c) Once samples have been taken for the purpose of testing, store and secure the untested item in a manner that prevents the item from being tampered with or transferred prior to test results being reported.

(8) Pesticide Testing. A marijuana item, except for seeds and immature plants, must be tested for pesticides by testing for individual pesticides (analytes) in the following categories, using valid testing methodologies:

(a) Chlorinated Hydrocarbons;

(b) Organophosphates;

(c) Carbamates; and

(d) Pyrethroid.

(9) THC and CBD Testing. A marijuana item, except for seeds and immature plants, must be tested to determine the levels of THC and CBD using valid testing methodologies.

(10) Laboratory Requirements. A PRD must be able to show that the laboratory that conducted the testing required in this rule:

(a) Uses valid testing methodologies; and

(b) Has a Quality System for testing of pesticides that is compliant with the:

(A) 2005 International Organization for Standardization 17025 Standard; or

(B) 2009 National Environmental Laboratory Accreditation Conference Institute TNI Standards.

(11) Testing Results. A laboratory test result must:

(a) Comply with the standards in TNI 2009, Volume 1, Module 2, Section 5.10, incorporated by reference.

(b) Include the following information:

(A) The name of each specific analyte tested;

(B) The limit of quantitation (LOQ) as that is defined in TNI 2009, Volume 1, Module 2, Section 3.1 and TNI 2009, Volume 1, Module 4, Section 1.5, incorporated by reference;

(C) The pesticide results as a numerical value in units of either parts per million or parts per billion if the analyte was detected or a statement that the level detected was less than the LOQ;

(D) The levels of THC and CBD calculated in accordance with OAR 333-064-0100; and

(E) The quality control results from the blank and quality control samples associated with the sample testing.

(c) Be signed by an official of the laboratory with an attestation that the results are accurate and that testing was done using valid testing methodologies and a quality system as required in this rule.

(12) A sample of a marijuana item shall be deemed to test positive for pesticides with a detection of more than 0.1 parts per million of any pesticide.

(13) If a marijuana item tests positive for pesticides based on the standards in this rule the PRD must:

(a) Return the entire batch from which the sample was taken to the individual who transferred the marijuana item to the dispensary and document how many or how much was returned, to whom, and the date it was returned; or

(b) Dispose of the entire batch in a manner specified by the Authority.

(14) The PRD may permit laboratory personnel or other persons authorized to do testing access to secure or restricted access areas of the dispensary where marijuana items are stored. A dispensary representative must log the date and time in and out of all such persons.

(15) If the Authority determines that a laboratory is not using valid testing methodologies, does not have a quality system, or is not producing test result reports in accordance with this rule the Authority may remove the name of the laboratory from the list on the Authority's website.

(16) The Authority may do audit testing of a marijuana item in order to determine whether a dispensary is in compliance with this rule.

333-008-1200
Operation of Registered Dispensaries

(1) Policies and Procedures. In order to obtain a registration and to retain registration a dispensary registrant must have written detailed policies and procedures and training for employees on the policies and procedures that, at a minimum, cover the following:

(a) Security;

(b) Transfers of marijuana items to and from the dispensary;

(c) Operation of a registered dispensary;

(d) Required record keeping;

(e) Testing requirements;

(f) Packaging and labeling requirements;

(g) Employee training;

(h) Compliance with these rules, including but not limited to violations and enforcement; and

(i) Roles and responsibilities for employees and PRDs in assisting the Authority during inspections or investigations.

(2) Employees. A registered dispensary may employ an individual between the ages of 18 and 20 if the individual is a patient. Otherwise, dispensary employees must be 21 years of age or older.

(3) Standardized Scales. In order to obtain a registration and to retain registration a dispensary registrant must own, maintain on the premises and use a weighing device that is licensed by the Oregon Department of Agriculture. Licensed weighing devices must be used by a registered dispensary whenever marijuana items are:

(a) Transferred to or from the dispensary and the transfer is by weight;

(b) Packaged for transfer by weight; or

(c) Weighed for purposes of documenting information required in OAR 333-008-1230, 333-008- 1245, 333-008-1247 and 333-008-1248.

(4) Inventory Tracking and Point of Sale System: In order to obtain a registration and to retain registration a registered dispensary must have an installed and fully operational integrated inventory tracking and point of sale system that can and does, at a minimum:

(a) Produce bar codes or similar unique identification numbers for each marijuana item lot transferred to a registered dispensary;

(b) Trace back or link each transfer of a marijuana item to a patient or caregiver to the marijuana item lot;

(c) Capture all information electronically that is required to be documented in OAR 333-008- 1230 and 333-008-1245;

(d) Generate inventory, transaction, and transfer reports viewable in excel format; and

(e) Produce all the information required to be submitted to the Authority pursuant to OAR 333- 0080-1248.

(5) Online Verification of Registration Status. A dispensary must verify an individual's registration status with the Authority when receiving or making the transfer of a marijuana item if the Authority has available an online system for such verification.

(6) Inventory On-Site. Marijuana items must be kept on-site at the dispensary. The Authority may take enforcement action against a dispensary registrant if during an inspection a dispensary registrant cannot account for its inventory or if the amount of usable marijuana at the registered dispensary is not within five percent of the documented inventory.

(7) Testing. A dispensary registrant may not:

(a) Accept a transfer of a marijuana item that has not been tested in accordance with OAR 333- 007-0300 to 333-007-0490.

(b) Transfer a marijuana item that has not been tested in accordance with OAR 333-007-0300 to 333-007-0490 unless it was transferred to the dispensary prior to October 1, 2016 and is labeled in accordance with OAR 333-007-0300(5).

(c) Transfer a marijuana item that was received prior to October 1, 2016, that has not been tested in accordance with OAR 333-007-0300 to 333-007-0490, after December 31, 2016.

(8) Packaging and Labeling.

(a) A dispensary may not accept a transfer of a marijuana item or transfer a marijuana item that does not comply with the labeling requirements in OAR 333-007-0010 to 333-007-0100, or that does not comply with the packaging requirements in OAR 845-025-7000 to 845-025-7020 and 845-025-7060.

(b) A marijuana item that was transferred to a dispensary prior to October 1, 2016 is not required to have gone through the Commission's pre-approval process for packaging and labeling but still must meet the labeling requirements in OAR 333-007-0010 to 333-007-0100 and the packaging requirements in OAR 845-025-7000 to 845-025-7020 and 845-025-7060.

(c) On and after October 1, 2016, a dispensary may not accept a transfer of a marijuana item unless the item has a label and package that has been pre-approved by the Commission, unless pre-approval is not required under OAR 845-025-7060(9) to (12).

(9) Oregon Department of Agriculture Licensure. On and after January 1, 2017, a registered dispensary that sells or handles food, as that term is defined in ORS 616.695, or cannabinoid edibles, must be licensed by the Oregon Department of Agriculture under ORS 616.706.

(10) Industrial Hemp Products.

(a) A dispensary may only accept the transfer of and may only transfer a product that contains THC or CBD that is derived from marijuana.

(b) Nothing in this section prohibits a dispensary from buying or selling hemp products not intended for human application, consumption, inhalation, ingestion, or absorption, such as hemp clothing.

(11) Tobacco. A dispensary may not offer or sell tobacco products in any form including, but not limited to, loose tobacco, pipe tobacco, cigarettes as defined in ORS 323.010 and cigarillos as that is defined in OAR 333-015-0030.

(12) For purposes of this rule "marijuana item lot" means a quantity of seeds, immature plants, usable marijuana, medical cannabinoid products, concentrates or extracts transferred to a registered dispensary at one time and that is from the same harvest lot or process lot as those terms are defined in OAR 333-007-0020.

333-008-1205
Registered Dispensary Signage

(1) In order to obtain a registration and to retain registration a dispensary registrant must post:

(a) At every entrance to the dispensary:

(A) If a dispensary does not participate in limited marijuana retail sales a sign that reads "Medical Marijuana Patients Only";

(B) If a dispensary is permitted to sell limited marijuana retail products in accordance with OAR 333-008-1500, signs that comply with OAR 333-008-1500 and 333-008-1501(1)(b); and

(C) "No On-Site Consumption of Marijuana".

(b) At all areas of ingress to a limited access area signs that reads:

(A) "Restricted Access Area — Authorized Personnel Only".

(B) "No Minors Allowed".

(c) At all areas of ingress to a point of sale area a sign that reads: "Restricted Access Area — No Minors Allowed".

(d) At the point of sale, the following posters prescribed by the Authority, measuring 22 inches high by 17 inches wide that can be downloaded at www.healthoregon.org/ommp:

(A) A Pregnancy Warning Poster; and

(B) A Poisoning Prevention Poster.

(2) All signs required by this rule must be:

(a) Legible, not less than 8 1/2 inches by and 11 inches, composed of letters not less than one-half inch in height;

(b) In English and Spanish, if a Spanish version is available through the Authority; and

(c) Posted in a conspicuous location where the signs can be easily read by individuals entering or on the dispensary premises.

(3) All signs may be downloaded at www.healthoregon.org/ommp.

333-008-1220
Labeling

(1) This rule is in effect from March 1, 2016, until October 1, 2016. Nothing in this rule prohibits a dispensary from complying with the labeling rules in OAR 333-007-0010 to 333-007-0100 prior to October 1, 2016.

(2) Prior to transferring a marijuana item a PRD must ensure that a label is affixed to the marijuana item that includes but is not limited to:

(a) Usable marijuana:

(A) Percentage of THC and CBD;

(B) Weight in grams;

(C) Testing batch number and date tested;

(D) Who performed the testing; and

(E) Description of the product (strain).

(b) Seeds:

(A) Weight in grams; and

(B) Description of the product (strain).

(c) Immature plants: Description of the product (strain).

(d) Marijuana items other than usable marijuana, seeds or immature plants:

(A) THC and CBD potency expressed as a percentage of weight or volume;

(B) The weight or volume of usable marijuana in the product in grams, milligrams, or milliliters, as applicable;

(C) Testing batch number and date tested;

(D) Who performed the testing; and

(E) Warning label in accordance with section (3) of this rule.

(3) If the registered facility transfers a cannabinoid product, concentrate or extract the PRD must ensure it has a warning label on the outside of the packaging that includes the following: "WARNING: MEDICINAL PRODUCT — KEEP OUT OF REACH OF CHILDREN" in bold capital letters, in a font size that is larger than the type-size of the other printing on the label such that it is easy to read and prominently displayed on the product.

333-008-1225
Packaging

(1) This rule is in effect from March 1, 2016 until October 1, 2016. Nothing in this rule prohibits a dispensary from complying with the packaging rules in OAR 845-025-7000 to 845-025-7060 prior to October 1, 2016.

(2) For purposes of this rule:

(a) "Child-resistant safety packaging" means:

(A) Containers designed and constructed to be significantly difficult for children under five years of age to open and not difficult for adults to use properly;

(B) Closable for any product intended for more than a single use or containing multiple servings; and

(C) Labeled in accordance with OAR 333-008-1220.

(b) "Container" means a sealed, hard or soft-bodied receptacle in which a tetrahydrocannabinol-infused product is placed prior to being transferred to a patient or caregiver.

(c) "Packaged in a manner not attractive to minors" means the tetrahydrocannabinol-infused product is not in a container that is brightly colored, depicts cartoons or images other than the logo of the facility, unless the logo of the facility depicts cartoons, in which case only the name of the facility is permitted.

(3) A dispensary may not transfer a medical cannabinoid product, extract or concentrate to a patient or caregiver unless the product, extract or concentrate is in child-resistant safety packaging.

333-008-1230
Transfers to a Registered Dispensary

(1) Transfer of Usable Marijuana, Seeds and Immature Plants. A patient, caregiver, or PRMG may transfer usable marijuana, seeds and immature plants produced by a PRMG to a registered dispensary, subject to the requirements in this rule.

(a) A registered dispensary may only accept a transfer of usable marijuana, seeds or immature marijuana plants from a caregiver or PRMG if the individual transferring the usable marijuana, seeds or immature plants provides the original or a copy of a valid:

(A) Authorization to Transfer form prescribed by the Authority; or

(B) Personal agreement as that is defined in OAR 333-008-0010.

(b) Authorization to Transfer Forms. In order to be valid an Authorization to Transfer form must include at least:

(A) The patient's name, OMMP card number or receipt number and expiration date and contact information;

(B) The name and contact information of the individual who is authorized to transfer the usable marijuana, seeds or immature marijuana plants to the registered dispensary and that individual's OMMP card number and expiration date;

(C) The name and address of the registered dispensary that is authorized to receive the usable marijuana, seeds or immature marijuana plants; and

(D) The date the authorization expires, if earlier than the expiration date of the patient's OMMP card.

(c) Personal Agreements. In order to be valid a personal agreement must include at least:

(A) The patient's name, OMMP card number and expiration date and contact information;

(B) The name and contact information of the PRMG to whom the patient's property rights have been assigned and the producer's OMMP card number and expiration date, and the grow site address;

(C) The portion of the patient's rights to possess seeds, immature plants and usable marijuana that is being assigned to the producer.

(2) Transfer of medical cannabinoid products, concentrates, and extracts.

(a) Beginning October 1, 2016, until January 1, 2017, a registered dispensary may accept the transfer of a cannabinoid product or concentrate from an applicant that has submitted a complete application for registration of a marijuana processing site.

(b) On and after January 1, 2017, a registered dispensary may only accept a transfer of a medical cannabinoid product, concentrate or extract from a registered medical marijuana processing site.

(c) Beginning October 1, 2016, until January 1, 2017, a registered dispensary may accept the transfer of a medical cannabinoid extract from an applicant that has submitted a complete application for registration of a marijuana processing site.

(3) A registered dispensary may only accept a transfer of cannabinoid products, concentrates or extracts from registered processing site if the individual transferring the products, concentrates or extracts provides the dispensary with a Processing Site Authorization to Transfer form prescribed by the Authority. In addition to retaining a copy of the Processing Site Authorization to Transfer form the dispensary must obtain a copy of the photo identification

of the individual transferring the cannabinoid product, concentrate or extract as required in section (4)(b)(B) of this rule.

(4) Transfer Records. At the time a marijuana item is transferred to a dispensary the dispensary registrant must:

(a) Document, as applicable:

(A) The weight in metric units of all usable marijuana received by the registered dispensary;

(B) The number of seeds and immature plants received by the registered dispensary;

(C) The amount of a medical cannabinoid product, concentrate, or extract received by the registered dispensary, including, as applicable, the weight in metric units, or the number of units;

(D) The name of the marijuana item;

(E) The date the marijuana item was received; and

(F) The amount of reimbursement paid by the registered dispensary.

(b) Obtain and maintain a copy of, as applicable:

(A) Documents required in section (1) of this rule including the date it was received;

(B) The photo identification of the individual transferring the marijuana item to the dispensary, if such a copy is not already on file;

(C) The OMMP card of the individual transferring usable marijuana, seeds or immature plants;

(D) The medical marijuana processing site registration; and

(E) Test results for marijuana items transferred to the dispensary unless the dispensary plans to arrange for the testing of the marijuana item.

(5) Prior to October 1, 2016, if a dispensary accepts the transfer of a marijuana item that has not been tested in accordance with OAR 333-007-0300 to 333-007-0490 the dispensary must comply with OAR 333-008-1190(7).

(6) Once a marijuana item has been sampled in accordance with OAR 333-007-0360 the marijuana item must be labeled and stored in accordance with OAR 333-007-0380.

(7) Nothing in these rules requires a dispensary registrant to accept a transfer of a marijuana item.

(8) All documentation required in this rule must be maintained electronically in an integrated inventory tracking and point of sale system or the electronic data management system described in OAR 333-008-1247.

333-008-1245
Transfers From a Registered Dispensary to a Patient or Designated Primary Caregiver

(1) A dispensary registrant must, prior to permitting an individual to enter a point of sale area on the dispensary premises, except as permitted under OAR 333-008-1500, verify that the individual is a current patient or designated primary caregiver.

(2) A registered dispensary must, prior to transferring a marijuana item to a patient or a designated primary caregiver:

(a) Verify the individual is currently registered with the Authority by viewing the individual's government issued photo identification and Authority issued patient or caregiver card, or the patient's receipt, as described in OAR 333-008-0023(6) or OAR 333-008-0040(5) and making sure the identities match.

(b) Obtain and retain, if not already on file, a copy of the patient's or caregiver's:

(A) OMMP identification card or receipt; and

(B) Government issued photo identification.

(c) Document:

(A) The name, OMMP card number and expiration date of the card of each person to whom the registered facility transfers a marijuana item;

(B) If the marijuana item was transferred to a designated primary caregiver, the patient's name and registration number for whom the caregiver was receiving the transfer;

(C) The amount of usable marijuana transferred in metric units, if applicable;

(D) The number of seeds or immature plants transferred, if applicable;

(E) The amount of a medical cannabinoid product concentrate, or extract, if applicable;

(F) The brand name of the marijuana item and a description of what was transferred;

(G) The date of the transfer; and

(H) The amount of money paid by the patient or designated primary caregiver for the transfer.

(3) A dispensary registrant may not transfer at any one time to a patient or designated primary caregiver, within one day, more than:

(a) 24 ounces of usable marijuana;

(b) 16 ounces of a medical cannabinoid product in solid form;

(c) 72 ounces of a medical cannabinoid product in liquid form;

(d) 16 ounces of a cannabinoid concentrate whether sold alone or contained in an inhalant delivery system;

(e) Five grams of a cannabinoid extract whether sold alone or contained in an inhalant delivery system;

(f) Four immature marijuana plants; and

(g) 50 seeds.

(4) All documentation required in this rule must be maintained electronically in an integrated inventory tracking and point of sale system or the electronic data management system described in OAR 333-008-1247.

333-008-1247
Registered Dispensary Record Keeping

(1) In order to obtain a registration and to retain registration a PRD must have an installed and fully operational electronic data management system that is either the same as or different than the integrated inventory tracking and point of sale system required in OAR 333-008-1200 capable of maintaining:

(a) All copies of documents required to be obtained and retained in OAR 333-008-1230 and 333-008-1245;

(b) Any revocation of an Authorization to Transfer form or personal agreement; and

(c) All other information required to be documented and retained by these rules if such information is not contained in the inventory tracking and point of sale system required in OAR 333-008-1200.

(2) A dispensary registrant must maintain all information required to be documented in these rules in a safe and secure manner that protects the information from unauthorized access, theft, fire, or other destructive forces, and is easily accessed and retrievable by the Authority upon request, either at the registered dispensary or online.

(3) The electronic data management system described in section (1) of this rule must:

(a) Provide for an off-site or secondary backup system; and

(b) Provide security measures to ensure patient records are kept confidential.

(4) Documents and information required to be maintained in these rules must be retained by a PRD for at least two years.

(5) A dispensary registrant must provide the Authority with any documentation required to be maintained in these rules upon request, in the format requested by the Authority, or permit the Authority access to such documentation on-site.

Registered Dispensary Reporting to the Authority

(1) On and after June 1, 2016, a PRD must submit to the Authority electronically in a manner specified by the Authority, by the 10th of each month, the following information:

(a) The amount of usable marijuana transferred to and by the medical marijuana dispensary during the previous month.

(b) The amount and type of medical cannabinoid products transferred to and by the medical marijuana dispensary during the previous month. For purposes of this section "type" means:

(A) Cannabinoid edibles;

(B) Cannabinoid topicals;

(C) Cannabinoid tinctures;

(D) Cannabinoid capsules;

(E) Cannabinoid suppositories;

(F) Cannabinoid transdermal patches and

(G) Cannabinoid product other than products listed in paragraphs (A) to (F) of this subsection.

(c) The amount and type of cannabinoid concentrates transferred to and by the medical marijuana dispensary during the previous month. For purposes of this section "type" means:

(A) Cannabinoid concentrate in solid form; and

(B) Cannabinoid concentrate in liquid form.

(d) The amount and type of cannabinoid extracts transferred to and by the medical marijuana dispensary during the previous month. For purposes of this section "type" means:

(A) Cannabinoid extract in solid form; and

(B) Cannabinoid extract in liquid form.

(e) The quantity of immature marijuana plants transferred to and by the medical marijuana dispensary during the previous month.

(f) The quantity of seeds transferred to and by the medical marijuana dispensary during the previous month.

(2) Information submitted to the Authority under this rule must:

(a) List each type of marijuana item separately;

(b) Provide the total aggregate amount of a type of marijuana item transferred to a dispensary by each patient, designated primary caregiver, PRMG or processing site during the previous month; and

(c) Provide the total aggregate amount of a type of marijuana item transferred by a dispensary to each patient or designated primary caregiver during the previous month.

(3) In addition to submitting the information as required by section (1) of this rule, a person responsible for a dispensary must keep a record of the information described in section (1) of this rule for two years after the date on which the person submits the information to the Authority.

333-008-1500
Limited Marijuana Retail Sales

(1) For purposes of OAR 333-008-1500 through 333-008-1505 the following definitions apply:

(a) "Cannabinoid concentrate" means a substance obtained by separating cannabinoids from marijuana by:

(A) A mechanical extraction process;

(B) A chemical extraction process using a nonhydrocarbon-based solvent, such as vegetable glycerin, vegetable oils, animal fats, isopropyl alcohol or ethanol; or

(C) A chemical extraction process using the hydrocarbon-based solvent carbon dioxide, provided that the process does not involve the use of high heat or pressure.

(b) "Cannabinoid edible" means:

(A) A food or potable liquid into which a cannabinoid concentrate, cannabinoid extract or dried marijuana leaves or flowers have been incorporated.

(B) "Cannabinoid edible" does not include a tincture or a cannabinoid product intended to be placed under the tongue or in the mouth using a dropper or spray delivery method, such as but not limited, to a sublingual spray.

(c) "Cannabinoid extract" means a substance obtained by separating cannabinoids from marijuana by:

(A) A chemical extraction process using a hydrocarbon-based solvent, such as butane, hexane or propane; or

(B) A chemical extraction process using the hydrocarbon-based solvent carbon dioxide, if the process uses high heat or pressure.

(d)(A) "Cannabinoid product" means a cannabinoid edible and any other product intended for human consumption or use, including a product intended to be applied to the skin or hair, which contains cannabinoids or dried marijuana leaves or flowers.

(B) "Cannabinoid product" does not include:

(i) Usable marijuana by itself;

(ii) A cannabinoid concentrate by itself;

(iii) A cannabinoid extract by itself; or

(iv) Industrial hemp, as defined in ORS 571.300.

(e) "Cannabinoid tincture" means a solution of alcohol, cannabinoid concentrate or extract, and perhaps other ingredients intended for human consumption or ingestion, and that is exempt from the Liquor Control Act under ORS 471.035.

(f) "Cannabinoid topical" means a cannabinoid product intended to be applied to skin or hair.

(g) "Dried leaves and flowers of marijuana" means the cured and dried leaves and flowers from a mature marijuana plant that have not been chemically altered or had anything added to them.

(h) "Immature marijuana plant" means a marijuana plant that is not flowering.

(i) "Individual" means a person 21 years of age or older who is not a patient or designated primary caregiver.

(j) "Limited marijuana retail product" means:

(A) The seeds of marijuana;

(B) The dried leaves and flowers of marijuana;

(C) An immature marijuana plant;

(D) Cannabinoid edibles;

(E) Nonpsychoactive medical cannabinoid products intended to be applied to a person's skin or hair; and

(F) Prefilled receptacles of cannabinoid extracts.

(k) "Low-dose cannabinoid edible" means a cannabinoid edible that has no more than 15 milligrams of THC in a unit.

(l) "Marijuana" means the plant Cannabis family Cannabaceae, any part of the plant Cannabis family Cannabaceae and the seeds of the plant Cannabis family Cannabaceae.

(m) "Medical cannabinoid product" has the meaning given that term in ORS 475B.410.

(n) "Medical marijuana dispensary" or "dispensary" means an entity registered with the Oregon Health Authority under ORS 475B.450.

(o) "Nonpsychoactive medical cannabinoid product intended to be applied to a person's skin or hair":

(A) Means a cannabinoid topical with a THC content of not more than six percent that does not affect the mind or mental processes.

(B) Does not mean a transdermal patch.

(p) "Photographic identification" means valid government issued identification with a photograph of the individual that includes the individual's last name, first name, and date of birth.

(q) "Prefilled receptacle of cannabinoid extract" means a single use cartridge prefilled with a cannabinoid extract by itself.

(r) "Unit" means a package for sale.

(2) Until January 1, 2017, a medical marijuana dispensary may sell limited marijuana retail product to an individual in accordance with this rule if:

(a) The dispensary, five days prior to selling any limited marijuana retail product notifies the Authority, on a form prescribed by the Authority, that the dispensary intends to sell limited marijuana retail product;

(b) The city or county in which the dispensary operates has not adopted an ordinance prohibiting the sale of limited marijuana retail product; and

(c) The Authority has not prohibited the dispensary from selling limited marijuana retail product under section (14) of this rule.

(3) A dispensary that is permitted to sell limited marijuana retail product:

(a) Must examine the photo identification of all individuals before entering the dispensary to ensure the individual is 21 years of age or older.

(b) Must verify at the time of sale that the individual is 21 years of age or older by examining the individual's photographic identification.

(c) May only sell limited marijuana retail product as specified in sections (4) to (6) of this rule.

(4) A dispensary may sell one-quarter ounce of dried leaves and flowers to an individual per day.

(5) Between June 2 and December 31, 2016 a dispensary may sell:

(a) One unit of a single-serving, low-dose cannabinoid edible to an individual per day. A unit of a low-dose cannabinoid edible can contain more than one edible as long as the total THC in the unit does not exceed 15 milligrams.

(b) One prefilled receptacle of a cannabinoid extract that does not contain more than 1,000 milligrams of THC to an individual per day.

(c) Nonpsychoactive medical cannabinoid products intended to be applied to a person's skin or hair.

(6) A dispensary may sell up to four immature marijuana plants to the same individual at any time between October 1, 2015 and December 31, 2016.

(7) A dispensary may not:

(a) Offer, sell or provide a cannabinoid product, extract or concentrate to an individual except as provided in sections (4) through (6) of this rule; or

(b) Give away a limited marijuana retail product to an individual.

(8) For each limited marijuana retail product sale, a dispensary must document:

(a) The limited marijuana retail product that was sold and the amount in metric units or number sold as applicable;

(b) The birth date of the individual who bought the product;

(c) The sale price; and

(d) The date of sale.

(9) A dispensary may sell non-marijuana items to an individual, such as but not limited to branded clothing.

(10) A dispensary is not required to maintain a record of the name of the individual to whom a limited marijuana retail product was sold but the dispensary must have a system in place that is outlined in its policies and procedures for ensuring that an individual is not sold more than the amount or number of a limited retail marijuana product permitted under this rule.

(11) Records of sale transactions and the documentation required in section (8) of this rule shall be maintained in accordance with the Authority's record keeping requirements for dispensaries.

(12) A dispensary that chooses to sell limited marijuana retail product to individuals must:

(a) Post at the point the sale, the following posters prescribed by the Authority, measuring 22 inches high by 17 inches wide that can be downloaded at www.healthoregon.org/marijuana:

(A) A Pregnancy Warning Poster; and

(B) A Poisoning Prevention Poster.

(b) Post at the point of sale a color copy of the "Educate Before You Recreate" flyer measuring 22 inches high by 17 inches wide that can be downloaded at WHATSLEGALOREGON.COM.

(c) Distribute to each individual at the time of sale, a Marijuana Information Card, prescribed by the Authority, measuring 3.5 inches high by 5 inches long that can be downloaded at www.healthoregon.org/marijuana.

(d) Comply with all rules in OAR chapter 333, division 7 and 8 that apply to dispensaries including but not limited to all security, testing, labeling, except as provided in section (13) of this rule, packaging and documentation rules except rules that:

(A) Prohibit individuals from entering or being present in a dispensary; and

(B) Prohibit a dispensary from transferring marijuana to an individual.

(e) On and after January 4, 2016:

(A) Collect a tax of 25 percent of the retail sales price of a limited marijuana retail product in the same manner that a marijuana retailer that holds a license under section 22, chapter 1, Oregon Laws 2015, collects the tax imposed under section 2, chapter 699, Oregon Laws 2015;

(B) Comply with all requirements in sections 1 through 13, chapter 699, Oregon Laws 2015, and any applicable administrative rules adopted by the Department of Revenue; and

(C) If requested by the Authority, sign an authorization to permit the sharing of information between the Authority and the Department of Revenue concerning tax collection required by section 21a, chapter 699, Oregon Laws 2015.

(13) A dispensary:

(a) May substitute a warning that reads "For use by adults 21 and older. Keep out of reach of children" for the warning "For use by OMMP patients only. Keep out of reach of children" on labels for limited marijuana retail products.

(b) Between June 2 and October 1, 2016, may not sell a low-dose cannabinoid edible or a prefilled receptacle of a cannabinoid extract unless it is in child-resistant safety packaging, as that is defined in OAR 333-008-1225.

(c) On and after October 1, 2016, must:

(A) Comply with the packaging requirements in OAR 845-025-7000 to 845-025-7060 for all limited marijuana retail products.

(B) Comply with any labeling requirements in OAR 333-007-0010 to 333-007-0100 for limited marijuana retail products that would be applicable to a similar item sold by an Oregon Liquor Control Commission licensee.

(14) The Authority may, if it determines that a dispensary has violated OAR 333-008-1500 through 333-008-1505:

(a) Prohibit a dispensary from selling limited marijuana retail product; and

(b) Take any action authorized under OAR 333-008-2190.

(15) A dispensary may not sell limited marijuana retail product to individuals if the dispensary is located in a city or county that has adopted an ordinance prohibiting such sales in accordance with section 3, chapter 784, Oregon Laws 2015.

(16) A dispensary that has had its registration suspended may not sell limited marijuana retail product while the registration is suspended.

(17) This rule is only in effect until January 1, 2017.

333-008-1501
Dispensary Signs

(1) Between October 1, 2015 and December 31, 2016, a registered dispensary must post signs at any point of public entry that read:

(a) "Medical Marijuana Patients Only"; or

(b) If a dispensary has properly notified the Authority that it intends to sell limited marijuana retail products:

(A) "Medical Marijuana Patients and Persons 21 and Older Permitted"; and

(B) "NO PERSON UNDER 21 PERMITTED ON THE PREMISES WITHOUT AN OMMP CARD".

(2) The signs described in section (1) of this rule must be:

(a) In bold, 80 point Times New Roman, Helvetica or Arial font; and

(b) Affixed to the exterior of the dispensary in a conspicuous location that can be easily seen by the public from outside the dispensary.

333-008-1505
Reporting Requirements

(1) A dispensary that is selling limited marijuana retail products to individuals must by April 10, 2016, July 10, 2016, October 10, 2016, and January 10, 2017, report to the Authority, in a manner prescribed by the Authority, the information required to be documented in OAR 333-008-1500(8) for the previous quarter.

(2) A dispensary must submit, by April 10, 2016, the information required to be documented in OAR 333-008-1500(8) for October 1, 2015 through December 31, 2015.

(3) A dispensary selling limited marijuana retail products to individuals must provide proof to the Authority by May 10, 2016, August 10, 2016, November 10, 2016, and February 10, 2017. in a manner prescribed by the Authority, that it has paid the tax required by the Department of Revenue for the previous quarter. Documentation may include but is not limited a copy of the marijuana tax returns, reports, payment vouchers, payment receipts or any related documents filed with the Department.

Medical Marijuana Processors

333-008-1600
Applicability

(1) OAR 333-008-1600 to 333-008-2200 applies to any person processing marijuana for transfer to a registered dispensary.

(2) A person may not process marijuana unless the person is registered in accordance with these rules, except for a person:

(a) Processing marijuana under a license issued by the Commission under ORS 475B.090; or

(b) Who has been designated as a primary caregiver under ORS 475B.418 who processes a medical cannabinoid product or a cannabinoid concentrate for the caregiver's patient and who does not transfer medical cannabinoid product or cannabinoid concentrate to a dispensary.

333-008-1610
Definitions

For purposes of OAR 333-008-1600 to 333-008-2200:

(1) "Cannabinoid capsule" means a small soluble container, usually made of gelatin, that encloses a dose of a cannabinoid product, concentrate or extract intended for human ingestion.

(2) "Cannabinoid edible" means a food or potable liquid into which a cannabinoid concentrate or extract or the dried leaves or flowers of marijuana have been incorporated.

(3) "Cannabinoid suppository" means a small soluble container designed to melt at body temperature within a body cavity other than the mouth, especially the rectum or vagina, containing a cannabinoid product, concentrate or extract.

(4) "Cannabinoid tincture" means a solution of alcohol, cannabinoid concentrate or extract, and perhaps other ingredients intended for human consumption or ingestion, and that is exempt from the Liquor Control Act under ORS 471.035.

(5) "Cannabinoid topical" means a cannabinoid product intended to be applied to skin or hair.

(6) "Cannabinoid transdermal patch" means an adhesive substance applied to human skin that contains a cannabinoid product, concentrate or extract for absorption into the bloodstream.

(7) "Food" means a raw, cooked, or processed edible substance, beverage or ingredient used or intended for use or for sale in whole or in part for human consumption, or chewing gum.

(8) "Person responsible for the marijuana processing site" or "PRP" means an individual who is directly involved in the day-to-day operation of a processing site and is identified as a PRP on an application.

(9) "Primary PRP" means a PRP designated by the owner of the processing site as the primary point of contact for the Authority and who is authorized to receive any and all communications and legal notices from the Authority.

(10) "Processing site representative" means an owner, director, officer, PRP, manager, employee, agent or other representative of a registered processing site, to the extent that the person acts in a representative capacity.

(11) "Processing site registrant" means:

(a) An individual who owns a registered processing site or if a business entity owns the registered processing site, each individual who has a financial interest in the registered processing site; and

(b) Any PRP.

(12) "These rules" means OAR 333-008-1600 to 333-008-2200.

333-008-1620
Application for Medical Marijuana Processing Site Registration

(1) This rule applies to any initial application filed on or after June 24, 2016 and to any initial application filed prior to June 24, 2016 that the Authority has not yet approved or denied.

(2) To register a medical marijuana processing site a person must:

(a) Submit an initial application on a form prescribed by the Authority that includes but is not limited to:

(A) The name of the individual who owns the processing site or, if a business entity owns the processing site, the name of each individual who has a financial interest in the processing site;

(B) The name of the individual or individuals responsible for the processing site, if different from the name of the individual who owns the processing site, with one of the individuals responsible for the processing site identified as the primary PRP;

(C) The address of the marijuana processing site; and

(b) Application and registration fees.

(c) An initial application for the registration of a processing site must be submitted electronically via the Authority's website, www.healthoregon.org/ommp.

(3) If an initial application is submitted along with the required fees the Authority will notify the applicant that the initial application has been received and that within 30 calendar days the following information must be received by the Authority:

(a) For each individual named in the application:

(A) A legible copy of the individual's valid government issued photographic identification that includes last name, first name and date of birth;

(B) Information, fingerprints and fees required for a criminal background check in accordance with OAR 333-008-2020; and

(C) An Individual History Form and any information identified in the form that is required to be submitted.

(b) If the applicant intends to process extracts, proof from the local government that the proposed location of the processing site is not located in an area that is zoned for residential use;

(c) Proof that the business is registered or has filed an application to register as a business with the Oregon Office of the Secretary of State, including proof of registration of any DBA (doing business as) registration;

(d) A scaled site plan of the parcel or premises on which the premises proposed for registration, is located, including:

(A) Cardinal directional references;

(B) Bordering streets and the names of the streets;

(C) Identification of the building or buildings in which the proposed processing site is to be located;

(D) The dimensions of the proposed premises of the processing site;

(E) Identification of other buildings or property owned by or under the control of the applicant on the same parcel or tax lot as

the premises proposed for registration that will be used in the business; and

(F) Identification of any residences on the parcel or tax lot;.

(e) A scaled floor plan of all enclosed areas of the premises at the proposed location that will be used in the business with clear identification of walls, partitions, counters, windows, all areas of ingress and egress, intended uses of all spaces;

(f) Documentation that shows the applicant has lawful possession of the proposed location of the processing site;

(g) A description of the type of products to be processed, a description of equipment to be used, including any solvents, gases, chemicals or other compounds used to create extracts or concentrates on a form prescribed by the Authority; and

(h) The proposed endorsements as described in OAR 333-008-1700.

(4) The information and documentation required in section (3) of this rule may be submitted electronically to the Authority or may be mailed to the Oregon Medical Marijuana Program, Oregon Health Authority, PO Box 14116, Portland, OR 97293.

(a) If documentation is mailed, it must be received by the Authority within 30 calendar days of the date the Authority mailed the notice to the applicant that the application was received or the application will be considered incomplete.

(b) If documentation is submitted electronically it must be received by the Authority within 30 calendar days of the date the Authority mailed the notice to the applicant that the application was received or the application will be considered incomplete.

(5) Application and registration fees must be paid online at the time of application.

(6) Criminal background check fees must be paid by check or money order and must be mailed to the Oregon Medical Marijuana Program, Oregon Health Authority, PO Box 14116, Portland, OR 97293 and must be received by the Authority in accordance with provisions in section (4) of this rule.

(7) If the Authority does not receive a complete application, all documentation required in sections (2) and (3) of this rule, and all required fees within the time frames established in this rule, the application will be considered incomplete.

(8) If the applicant provides the documentation required in section (3) of this rule, the Authority will review the information to determine if it is complete.

(a) If the documentation is not complete or is insufficient the Authority must notify the applicant in writing and the applicant will have 10 calendar days from the date such written notice is mailed by the Authority to provide the additional documentation.

(b) If the applicant does not provide the additional documentation within 10 calendar days or if any responsive documents are incomplete, insufficient or otherwise do not demonstrate compliance with ORS 475B.450 and these rules the application will be declared incomplete.

(9) A person who wishes to register more than one location must submit a separate application, registration fees, and all documentation described in sections (2) and (3) of this rule for each location.

(10) An application that is incomplete is treated by the Authority as if it was never received.

Stats. Implemented: ORS 475B.435
Hist.: PH 9-2016, f. 2-26-16, cert. ef. 3-1-16; PH 21-2016, f. 6-24-16, cert. ef. 6-28-16

333-008-1630
Processing Site Fees

(1) The initial fees for the registration of a processing site are:

(a) A non-refundable application fee of $500; and

(b) A $3,500 registration fee.

(2) The annual renewal fees for the registration of a processing site are:

(a) A $500 non-refundable renewal fee; and

(b) A $3,500 registration fee.

(3) The criminal background check fee is $35 per individual.

(4) The Authority must return the registration fee if:

(a) An application is incomplete; or

(b) An applicant withdraws an application.

(5) The Authority may return the registration fee if an application is denied.

Stat. Auth.: ORS 475B.435
Stats. Implemented: ORS 475B.435
Hist.: PH 9-2016, f. 2-26-16, cert. ef. 3-1-16

333-008-1650
Processing Site Application Review

(1) Applications will be reviewed in the order they are received by the Authority. An application is considered received as of the date and time that payment of fees is authorized by the entity that issued the credit or debit card used to pay the fees.

(2) Once the Authority has determined that an application is complete it will review an application to the extent necessary to determine compliance with ORS 475B.435 and these rules.

(3) The Authority may, in its discretion, prior to acting on an application:

(a) Contact any individual listed on the application and request additional documentation or information;

(b) Inspect the premises of the proposed processing site; or

(c) Verify any information submitted by the applicant.

(4) Prior to making a decision whether to approve or deny an application the Authority must:

(a) Review the criminal background check results for each individual named on the application;

(b) Verify that the applicant is registered as a business with the Office of the Secretary of State; and

(c) Verify that the proposed location of the processing site is not located:

(A) In an area that is zoned for residential use if the processor intends to make extracts; and

(B) Is not in a city or county that has adopted an ordinance under ORS 475B.800 or section 133, chapter 614, Oregon Laws 2015, prohibiting processing sites.

(5) If during the review process the Authority determines that the application or supporting documentation contains intentionally false or misleading information the Authority may declare the application incomplete or deny the application in accordance with OAR 333-008-1670.

(6) The Authority will notify the applicant in writing that the applicant has 60 calendar days from the date of the written notice to submit a Readiness Form, prescribed by the Authority, indicating that the applicant is prepared for an inspection and is in compliance with these rules if:

(a) There is no basis for denial under OAR 333-008-1670;

(b) The proposed processing site is in compliance with ORS 475B.435 and these rules;

(c) Each individual named in the application passes the criminal background check; and

(d) Each individual named as a PRP in the application meets the age requirement.

(7) If the Authority does not receive the Readiness Form in accordance with section (6) of this rule the applicant's application will be declared incomplete, unless an extension has been granted under section (8) of this rule.

(8) An applicant may request one extension of the 60-day deadline in section (6) of this rule if the applicant can demonstrate to the Authority that the deadline cannot be met for reasons outside of the applicant's control, such as but not limited to the applicant's inability to obtain local government building permits.

(a) A request for an extension must be in writing, must be received within 60 calendar days of the notice described in section (6) of this rule, and must explain and provide documentation that shows the applicant cannot, for reasons outside of the applicant's control, meet the 60-day deadline.

(b) A request for an extension tolls the 60-day deadline.

(c) The Authority will review the request and provide, in writing to the applicant, its decision and the reason for the decision.

(d) If an extension is granted the Authority must inform the applicant of the new deadline for submission of the Readiness

Form, but in any case an extension may not exceed 60 calendar days.

Stat. Auth.: ORS 475B.435

333-008-1660

Processing Site Pre-Approval Inspection; Approval of Application

(1) The Authority must perform a site visit within 30 days of receiving a timely Readiness Form, as that is described in OAR 333-008-1650 to determine whether the applicant and processing site are in compliance with these rules.

(2) If, after the site visit the Authority determines that the applicant and processing site are in compliance with these rules the Authority must provide the primary PRP with proof of registration that includes a unique registration number, and notify the primary PRP in writing that the processing site may operate, and issue any applicable endorsements.

(3) If, after the site visit the Authority determines that the processing site is not in compliance with these rules the Authority may:

(a) Give the applicant 10 business days to come into compliance;

(b) Propose to deny the application in accordance with OAR 333-008-1670; or

(c) Consider the application to be incomplete.

(4) A processing site must at all times display proof of registration in a prominent place inside the processing site so that proof of registration is easily visible to individuals authorized to be on the premises of the processing site.

(5) A registered processing site may not use the Authority or the OMMP name or logo except to the extent that information is contained on the proof of registration on any signs at the processing site, on its website, or in any advertising or social media.

(6) A processing site's registration:

(a) Is only valid for the location indicated on the proof of registration.

(b) May not be transferred to another location.

Stat. Auth.: ORS 475B.435

Stats. Implemented: ORS 475B.435

Hist.: PH 9-2016, f. 2-26-16, cert. ef. 3-1-16

333-008-1670

Denial of Processing Site Application

(1) The Authority must deny an application for the registration of a processing site if:

(a) An application, supporting documentation provided by the applicant, or other information obtained by the Authority shows that the qualifications for a processing site in ORS 475B.435 or these rules have not been met; or

(b) An individual named in an application has been:

(A) Convicted for the manufacture or delivery of a controlled substance in Schedule I or Schedule II within two years from the date the application was received by the Authority; or

(B) Convicted more than once for the manufacture or delivery of a controlled substance in Schedule I or Schedule II; or

(c) The city or county in which the facility is located has prohibited processing sites in accordance with ORS 475B.800 or section 133, chapter 614, Oregon Laws 2015.

(2) The Authority may deny an applicant if it determines that the applicant, the owner of the processing site, a PRP, or an employee of the processing site:

(a) Submitted false or misleading information to the Authority; or

(b) Violated a provision of ORS 475B.400 to 475.525, 475B.555, 475B.605, 475B.615, OAR chapter 333, division 7, these rules or an ordinance adopted pursuant to ORS 475B.500.

(3) If an individual named in an application is not qualified based on age, or the criminal background check, the Authority will permit a change form to be submitted in accordance with OAR 333-008-1720 or 333-008-2030, along with the applicable criminal background check fee. If the individual named in the change form is not qualified the Authority must deny the application in accordance with section (1) of this rule.

(4) If the Authority intends to deny an application for registration it must issue a Notice of Proposed Denial in accordance with ORS 183.411 through 183.470.

Stat. Auth.: ORS 475B.435

Stats. Implemented: ORS 475B.435

333-008-1680

Withdrawal of Processing Site Application

An applicant for a processing site registration may withdraw an initial or renewal application at any time prior to the Authority acting on the application unless the Authority has determined that the applicant submitted false or misleading information or there is a pending investigation or enforcement action in which case the Authority may refuse to accept the withdrawal and may issue a notice of proposed denial in accordance with OAR 333-008-1670.

333-008-1690

Expiration and Renewal of Registration for Processing Site

(1) A processing site's registration expires one year following the date of application approval.

(2) A processing site registrant must submit not more than 90 but at least 30 calendar days before the registration expires:

(a) A renewal application on a form prescribed by the Authority;

(b) Renewal fees;

(c) For each individual named in the renewal application:

(A) A legible copy of the individual's valid government issued photographic identification that includes last name, first name and date of birth;

(B) Information, fingerprints and fees required for a criminal background check in accordance with OAR 333-008-2020; and

(C) An Individual History Form and any information identified in the form that is required to be submitted.

(d) Current proof of business registration with the Secretary of State, including all DBA (doing business as) registrations;

(e) Documentation that shows the applicant has lawful possession of the location of the registered processing site; and

(f) A current scaled floor plan of all enclosed areas at the proposed location that will be used in the business with clear identification of walls, partitions, counters, windows, all areas of ingress and egress, uses of all spaces and all limited access areas.

(3) A registrant who files a completed renewal application, fees, and all the information required in section (2) of this rule with the Authority prior to the expiration date of the registration may continue to operate, even after the registration expiration date, pending a decision on the renewal application by the Authority.

(4) A processing site registrant that does not submit a timely application, fees and all the information required in section (2) of this rule may be subject to the imposition of civil penalties.

(5) If a processing site registrant does not submit the renewal application, fees and all the information required in section (2) of this rule prior to the registration's expiration, the registration is expired and is no longer valid.

(6) Renewals will be processed in accordance with OAR 333-008-1650 to 333-008-1670, as applicable.

(7) A renewal applicant may be required to submit a Readiness Form, as described in OAR 333-008-1650(9) and may be subject to inspection prior to the Authority acting on a renewal application.

333-008-1700
Processing Site Endorsements

(1) A marijuana processor may only process and transfer medical cannabinoid products, concentrates or extracts if the processor has received an endorsement from the Authority for that type of processing activity. Endorsements types are:

(a) Cannabinoid edible processor;

(b) Cannabinoid topical processor;

(c) Cannabinoid concentrate processor;

(d) Cannabinoid extract processor; and

(e) Cannabinoid tincture, capsule, suppository, or transdermal patch processor.

(2) An applicant must request an endorsement upon submission of an initial application but may also request an endorsement at any time following registration.

(3) In order to apply for an endorsement an applicant or processing site registrant must submit a form prescribed by the Authority that includes a description of the type of products to be processed, a description of equipment to be used, and any solvents, gases, chemicals or other compounds proposed to be used to create extracts or concentrates.

(4) Only one application and registration fee is required regardless of how many endorsements an applicant or registrant requests or at what time the request is made.

(5) A processing site registrant may hold multiple endorsements.

(6) For the purposes of endorsements any cannabinoid product that is intended to be consumed orally is considered a cannabinoid edible.

(7) If a processor is no longer going to process the product for which the processor is endorsed the processor must notify the Authority in writing and provide the date on which the processing of that product will cease.

333-008-1710
PRP Criteria and Responsibilities

(1) A PRP must:

(a) Be 21 years or age or older;

(b) Have legal authority to act on behalf of the registered processing site; and

(c) Be responsible for ensuring the registered processing site complies with applicable laws.

(2) A PRP may not:

(a) Have been convicted in any state for the manufacture or delivery of a controlled substance in Schedule I or Schedule II within two years from the date of application; or

(b) Have been convicted more than once in any state for the manufacture or delivery of a controlled substance in Schedule I or Schedule II.

(3) At least one PRP must be on site at a processing site during Authority inspections or investigations at the time of the inspection or investigation or within one hour of being notified that an inspection or investigation is taking place.

(4) A PRP is accountable for any intentional or unintentional action of a processing site representative, with or without the knowledge of the PRP, who violates ORS 475B.435 to 475B.440 or these rules, and is responsible for any unlawful conduct that occurs on the premises of the processing site or any property outside the registered processing site that is owned by or under the control of the processing site registrant.

Stat. Auth.: ORS 475B.435
Stats. Implemented: ORS 475B.435
Hist.: PH 9-2016, f. 2-26-16, cert. ef. 3-1-16; PH 21-2016, f. 6-24-16, cert. ef. 6-28-16

333-008-1720
Removal, Addition, Change, Designation or Assignment of PRP

(1) If an owner of a registered processing site is adding or changing a PRP or primary PRP, an individual with legal authority to act on behalf of the registered processing site must submit:

(a) A form, prescribed by the Authority;

(b) A legible copy of the individual's valid government issued photographic identification that includes last name, first name and date of birth;

(c) Information and fingerprints required for a criminal background check in accordance with OAR 333-008-2020; and

(d) A criminal background check fee of $35.

(2) A PRP who is designating or assigning the responsibilities of a PRP to another individual must submit the information and fees required in section (1) of this rule. The duties of a primary PRP may not be designated or assigned.

(3) The Authority will review and approve the addition or change of a PRP or primary PRP if the individual meets the requirements in OAR 333-008-1710.

(4) The Authority will review and approve the designation or assignment of the responsibilities of a PRP to another individual if that individual meets the requirements in OAR 333-008-1710. An individual to whom a designation or assignment is made, and who is approved by the Authority, has the same legal obligations as a PRP.

(5) An individual may not act in the capacity of a PRP without approval from the Authority.

(6) If the Authority denies the request to add or change a PRP or primary PRP, or denies the request to designate or assign the responsibilities of a PRP to another individual, the Authority must notify the individual that submitted the request of the denial and the current primary PRP and describe the reason for the denial.

(7) A registered processing site may not process marijuana or receive or transfer any marijuana items without at least one Authority approved PRP and a primary PRP.

Stat. Auth.: ORS 475B.435
Stats. Implemented: ORS 475B.435
Hist.: PH 9-2016, f. 2-26-16, cert. ef. 3-1-16; PH 21-2016, f. 6-24-16, cert. ef. 6-28-16

333-008-1730
Registered Processing Site Premises Restrictions and Requirements

(1) A registered processing site may not be located in an area that is zoned for residential use if the processing site is endorsed to make cannabinoid extracts.

(2) In order to be registered a processing site must operate at a particular location as specified in the application and may not be mobile.

(3) Minors on Premises. A registered processing site may not permit a minor to be present in any limited access area of a registered processing site.

(4) On Premises Consumption.

(a) A registered processing site may not permit the ingestion, inhalation or topical application of a marijuana item anywhere on the premises of the processing site, except as described in subsection (b) of this section.

(b) An employee of a registered processing site who is a patient may consume a marijuana item during his or her work shift on the premises of the registered processing site as necessary for his or her medical condition, if the employee is:

(A) Alone and in a closed room where no processing site marijuana items are present; and

(B) Not visible to the public outside the registered processing site.

(c) For purposes of this section consume does not include smoking, combusting, inhaling, vaporizing, or aerosolizing a marijuana item.

(5) General Public and Visitor Access. The general public is not permitted on the premises of registered processing site, except as permitted by this rule.

(a) In addition to registrant representatives, the following visitors are permitted on the premises of a processing site, including limited access areas, subject to the requirements in section (6) of this rule:

(A) Laboratory personnel, if the laboratory is accredited by the Authority;

(B) A contractor authorized by a registrant representative to be on the premises; or

(C) Individuals authorized to transfer marijuana items to a registered processing site.

(b) A registered processing site may permit up to seven invited guests 21 years of age and older, per week, on the premises of a registered processing site, including limited access areas, subject to the requirements in section (6) of this rule.

(6) Visitor Escort, Log and Badges.

(a) Prior to entering the premises of a registered processing site all visitors permitted by section (5) of this rule must be documented and issued a visitor identification badge from a registrant representative that must remain visible while on the premises. A visitor badge is not required for government officials. All visitors described in section (5) of this rule must be accompanied by a registrant representative at all times.

(b) A processing site registrant must maintain a log of all visitor activity and the log must contain the first and last name and date of birth of every visitor, and the date they visited.

(7) Government Access. Nothing in this rule is intended to prevent or prohibit Authority employees or contractors, or other state or local government officials that have jurisdiction over some aspect of the premises or a registered processing site to be on the premises.

(a) A visitor badge is not required for government officials.

(b) A processing site must log every government official that enters the premises but the processing site may not request that the government official provide a date of birth for the log.

(8) A registered processing site must have:

(a) A designated limited access area or areas where transfers of marijuana items are received; and

(b) A designated area where visitors enter the processing site premises and are checked in.

(9) The areas described in section (8) of this rule must be clearly marked on the floor or plot plan sketch required in OAR 333-008-1650.

(10) Signage. A registered processing site must post:

(a) At every entrance to the processing site a sign that reads: "No On-Site Consumption of Marijuana".

(b) At all areas of ingress to a limited access area signs that reads:

(A) "Restricted Access Area — Authorized Personnel Only".

(B) "No Minors Allowed".

(11) A processing site may not sublet or share with any other business any portion of the processing site premises, except as permitted in OAR 333-008-1790.

333-008-1740

Operation of Registered Processing Site

(1) Policies and Procedures. In order to be registered and remain registered a processing site must create and maintain written, detailed standard policies and procedures that include but are not limited to:

(a) Instructions for making each medical cannabinoid product, concentrate or extract.

(b) The ingredients and the amount of each ingredient for each process lot.

(c) The process for making each product.

(d) The number of servings in a process lot.

(e) The intended amount of THC per serving and in a unit of sale of the product.

(f) The process for ensuring that the amount of THC is consistently distributed throughout each process lot.

(g) If processing a cannabinoid concentrate or extract:

(A) Conducting necessary safety checks prior to commencing processing; and

(B) Purging any solvent or other unwanted components from a cannabinoid concentrate or extract.

(h) Procedures for cleaning all equipment, counters and surfaces thoroughly.

(i) Proper handling and storage of any solvent, gas or other chemical used in processing or on the processing site premises in accordance with material safety data sheets and any other applicable laws.

(j) Proper disposal of any waste produced during processing in accordance with all applicable local, state and federal laws, rules and regulations.

(k) Quality control procedures designed to, at a minimum, ensure that the amount of THC is consistently distributed throughout each process lot and that potential product contamination is minimized.

(l) Appropriate use of any necessary safety or sanitary equipment.

(m) Emergency procedures to be followed in case of a fire, chemical spill or other emergency. (n) Security.

(o) Transfers of marijuana items to and from the processing site.

(p) Testing.

(q) Packaging and labeling if the processor intends to or is packaging and labeling marijuana items after transfer to the processing site.

(r) Employee training.

(s) Compliance with these rules, including but not limited to violations and enforcement.

(t) Roles and responsibilities for employees and PRPs in assisting the Authority during inspections or investigations.

(2) Prohibitions. A registered processing site may not process or transfer a marijuana item:

(a) That by its shape, design or flavor is likely to appeal to minors, including but not limited to: (A) Products that are modeled after non-cannabis products primarily consumed by and marketed to children; or

(B) Products in the shape of an animal, vehicle, person or character.

(b) That is made by applying cannabinoid concentrates or extracts to commercially available candy or snack food items.

(c) That contains dimethyl sulfoxide (DMSO).

(3) Employees. A registered processing site may employ an individual between the ages of 18 and 20 if the individual is a patient. Otherwise, processing site employees must be 21 years of age or older.

(4) Standardized Scales. In order to obtain a registration and to retain registration a processing site registrant must own, maintain on the premises and use a weighing device that is licensed by the Oregon Department of Agriculture. Licensed weighing devices must be used by a processing site whenever marijuana items are:

(a) Transferred to or from the processing site and the transfer is by weight;

(b) Packaged for transfer by weight; or

(c) Weighed for purposes of documenting information required in OAR 333-008-1760, 333-008- 1770, 333-008-1820, and 333-008-1830.

(5) Inventory Tracking and Point of Sale System: A registered processing site must have an integrated inventory tracking and point of sale system that can and does, at a minimum:

(a) Produce bar codes or similar unique identification numbers for each lot of usable marijuana transferred to a registered processing site and for each lot of a medical cannabinoid product, concentrate or extract transferred to a registered dispensary;

(b) Capture all information required to be documented in OAR 333-008-1760 and 333-008-1770; (c) Generate inventory, transaction, transport and transfer reports requested by the Authority viewable in PDF format; and

(d) Produce all the information required to be submitted to the Authority pursuant to OAR 333- 0080-1830.

(6) Online Verification of Registration Status. A registered processing site must verify an individual's or processing site's registration status with the Authority when receiving a transfer of a marijuana item if the Authority has available an online system for such verification.

(7) Transfers from and to patients or designated primary caregivers.

(a) A registered marijuana processing site may transfer a medical cannabinoid product, concentrate or extract to a patient, or a patient's designated primary caregiver if the patient or the patient's designated primary caregiver provides the marijuana processing site with the marijuana to be processed into the medical cannabinoid product, concentrate or extract and the marijuana processing site receives no compensation for the transfer of the marijuana.

(b) A registered processing site must document each transfer of marijuana by a patient or the patient's designated primary caregiver to the processing site in accordance with OAR 333-008- 1760 and 333-008-1770.

(c) A registered processing site must document each transfer of a cannabinoid product, concentrate or extract to a patient or the patient's designated primary caregiver in accordance with OAR 333-008-1760 and 333-008-1770.

(d) A registered processing site may be compensated by the patient or the patient's designated primary caregiver for all costs associated with the processing of marijuana for the patient.

(8) Inventory On-Site. Marijuana items must be kept on-site at the registered processing site. The Authority may take enforcement action against a registered processing site if during an inspection a processing site cannot account for its inventory or if the amount of usable marijuana at the processing site is not within five percent of the documented inventory.

(9) Testing. On and after October 1, 2016, a processing site must comply with the applicable sampling and testing requirements in OAR 333-007-0300 to 333-007-0490 and may not:

(a) Accept a transfer of a marijuana item that has not been tested in accordance with OAR 333- 007-0300 to 333-007-0490.

(b) Transfer a medical cannabinoid product, concentrate or extract that has not been tested in accordance with OAR 333-007-0300 to 333-007-0490.

(10) Packaging and Labeling.

(a) On and after October 1, 2016, a processing site must comply with the labeling requirements in OAR 333-007-0010 to 333-007-0100, and the packaging requirements in OAR 845-025-7000 to 845-025-7020 and 845-025-7060.

(b) On and after October 1, 2016, a processing site must have its packages and labels pre-approved by the Commission, unless pre-approval is not required under OAR 845-025-7060(9) to (12).

(11) Industrial Hemp Products. A processing site may only accept the transfer of and may only transfer a product that contains THC or CBD that is derived from marijuana.

(12) Sampling. A registered processing site may provide a sample of a medical cannabinoid product, concentrate or extract to a dispensary for the purpose of the dispensary determining whether to purchase the product, concentrate or extract but the product, concentrate or extract may not be consumed on the processing site. Any sample provided to a dispensary must be recorded in the database.

(13) For purposes of this rule:

(a) "Lot of usable marijuana" means a quantity of usable marijuana transferred to a registered processing site from the same harvest lot as that term is defined in OAR 333-007-0020; and

(b) "Lot of medical cannabinoid products, concentrates or extracts" means a quantity of a medical cannabinoid product, concentrate or extract transferred to a registered dispensary at one time and that is from the same process lot as that term is defined in OAR 333-007-0020.

333-008-1750
Processor Training Requirements

(1) In order to be registered and remain registered a processing site must have a comprehensive training program that includes, at a minimum, the following topics:

(a) The standard operating policies and procedures.

(b) The hazards presented by all solvents or other chemicals used in processing and on the registered premises as described in the material safety data sheet for each solvent or chemical.

(c) Applicable Authority statutes and rules.

(2) At the time of hire and prior to engaging in any processing, and once yearly thereafter, each employee involved in the processing of a medical cannabinoid product, concentrate or extract must be trained in accordance with the processing site's training program.

Stats. Implemented: ORS 475B.435, 475B.440
Hist.: PH 9-2016, f. 2-26-16, cert. ef. 3-1-16

333-008-1760
Transfers to a Registered Processing Site

(1) Transfers of Marijuana by a Patient or Designated Primary Caregiver to Process for a Patient. A patient or designated primary caregiver may transfer marijuana to a registered processing site for no compensation for the purpose of the registered processing site processing the marijuana into a cannabinoid product, concentrate or extract.

(a) If a designated primary caregiver is transferring the marijuana, a registered processing site may only accept a transfer of marijuana under this section if the caregiver provides the original or a copy of a valid Authorization to Transfer form prescribed by the Authority.

(b) In order to be valid an Authorization to Transfer form must include at least:

(A) The patient's name, OMMP card number, OMMP receipt number if applicable and expiration date and contact information;

(B) The name and contact information of the individual who is authorized to transfer the usable marijuana to the registered processing site and that individual's OMMP card number and expiration date;

(C) The name and address of the registered processing site that is authorized to receive the usable marijuana; and

(D) The date the authorization expires, if earlier than the expiration date of the patient's OMMP card or receipt.

(2) Transfer of Usable Marijuana. A patient, caregiver, or PRMG may transfer usable marijuana to a registered processing site, subject to the requirements in this rule.

(a) A registered processing site may only accept a transfer of usable marijuana if the individual transferring the usable marijuana provides the original or a copy of a valid:

(A) Authorization to Transfer form prescribed by the Authority; or

(B) Personal agreement as that is defined in OAR 333-008-0010.

(b) Authorization to Transfer Forms. In order to be valid an Authorization to Transfer form must include at least:

(A) The patient's name, OMMP card number and expiration date and contact information;

(B) The name and contact information of the individual who is authorized to transfer the usable marijuana to the registered processing site and that individual's OMMP card number and expiration date;

(C) The name and address of the registered processing site that is authorized to receive the usable marijuana; and

(D) The date the authorization expires, if earlier than the expiration date of the patient's OMMP card.

(c) Personal Agreements. In order to be valid a personal agreement must include at least:

(A) The patient's name, OMMP card number and expiration date and contact information;

(B) The name and contact information of the PRMG to whom the patient's property rights have been assigned and the producer's OMMP card number and expiration date;

(C) The portion of the patient's rights to possess usable marijuana that is being assigned to the producer.

(3) Transfer of medical cannabinoid products, concentrates or extracts. A registered processing site may only accept a transfer of a medical cannabinoid product, concentrate or extract from another registered medical marijuana processing site.

(4) A registered processing site may only accept a transfer of a medical cannabinoid product, concentrate or extract from a registered processing site that provides a Processing Site Authorization to Transfer form, prescribed by the Authority. In addition the registered processing site must obtain a copy of the photo identification of the individual transferring the product, concentrate or extract as required in section (5)(b)(B) of this rule.

(5) Transfer Records. At the time marijuana, usable marijuana or a medical cannabinoid product, concentrate or extract is transferred to a registered processing site a processing site representative must:

(a) Document, as applicable:

(A) The weight in metric units of all usable marijuana received by the processing site;

(B) The amount of a medical cannabinoid product, concentrate or extract received by the processing site, including, as applicable, the weight in metric units, or the number of units;

(C) The name of the usable marijuana or medical cannabinoid product, concentrate or extract;

(D) The date the usable marijuana or medical cannabinoid product, concentrate or extract was received; and

(E) The amount of reimbursement paid by the registered processing site.

(b) Obtain and maintain a copy of, as applicable:

(A) Documents required in section (1) of this rule including the date it was received;

(B) The photo identification of the individual transferring the usable marijuana or medical cannabinoid product, concentrate or extract to the registered processing site, if such a copy is not already on file;

(C) The OMMP card of the individual transferring usable marijuana;

(D) The medical marijuana processing site registration; and

(E) Test results for marijuana items transferred to the processing site unless the processing site plans to arrange for the testing of the marijuana item.

(6) Prior to October 1, 2016, if a registered processing site accepts the transfer of usable marijuana or a medical cannabinoid product, concentrate or extract that has not been tested in accordance with OAR 333-008-1190 or OAR 333-007-0300 to 333-007-0490 the processing site must segregate that item in accordance with OAR 333-008-1190(7).

(7) Once samples of the usable marijuana or a medical cannabinoid product, concentrate or extract have been taken for the purpose of testing the item must be stored and secured in a manner that prevents the product from being tampered with or transferred prior to test results being reported.

(8) Nothing in these rules requires a registered processing site to accept a transfer of a marijuana item.

(9) All documentation required in this rule must be maintained electronically in an integrated inventory tracking and point of sale system.

333-008-1770
Transfers From a Registered Processing Site

(1) A registered processing site must, in addition to the completing a Processing Site Authorization to Transfer form, prescribed by the Authority, document the following for transfers to a registered dispensary or registered processing site:

(a) The name, address, and registration number of the dispensary or processing site to which a medical cannabinoid product, concentrate or extract was transferred;

(b) The amount of medical cannabinoid product, concentrate, or extract transferred;

(c) The name of the medical cannabinoid product, concentrate, or extract transferred;

(d) The date of the transfer; and

(e) The amount of money paid by the registered dispensary or processing site for the transfer.

(2) A registered processing site must document the following for the transfer of a medical cannabinoid product, concentrate or extract to a patient or designated primary caregiver pursuant to ORS 475B.443(1)(b) and (c):

(a) The name and registration number or OMMP receipt number of the patient or designated primary caregiver to which a medical cannabinoid product, concentrate or extract was transferred;

(b) If the medical cannabinoid product, concentrate or extract was transferred to a designated primary caregiver, the patient's name and registration number for whom the caregiver was receiving the transfer;

(c) The amount of medical cannabinoid product, concentrate, or extract transferred;

(d) The name of the medical cannabinoid product, concentrate, or extract transferred;

(e) The date of the transfer; and

(f) The amount of money paid by the patient or designated primary caregiver for the transfer.

(3) All documentation required in this rule must be maintained electronically in an integrated inventory tracking and point of sale system.

333-008-1780
General Processing Site Health and Safety Requirements

(1) A processing site must:

(a) Use equipment, counters and surfaces for processing that are food-grade and do not react adversely with any solvent being used.

(b) Have counters and surface areas that are constructed in a manner that reduce the potential for development of microbials, molds and fungi and that can be easily cleaned.

(c) Maintain the processing site in a manner that is free from conditions which may result in contamination and that is suitable to facilitate safe and sanitary operations for product preparation purposes.

(2) A processing site may not treat or otherwise adulterate a medical cannabinoid product, concentrate or extract with any addi-

tives that would increase potency, toxicity, or addictive potential, or that would create an unsafe combination with other psychoactive substances. Prohibited additives include but are not limited to nicotine, alcohol, caffeine, or chemicals that increase carcinogenicity.

333-008-1790
Cannabinoid Edible Processor Requirements

(1) A processing site endorsed to make cannabinoid edibles may only process in a food establishment licensed by the Oregon Department of Agriculture (ODA) and must comply with the applicable provisions of OAR chapter 603, division 21, division 24, division 25, with the exception of OAR 603-025-0020(17), and division 28.

(2) A processing site endorsed to make cannabinoid edibles may not:

(a) Engage in processing in a location that is operating as a restaurant, seasonal temporary restaurant, intermittent temporary restaurant, limited service restaurant or single-event temporary restaurant licensed under ORS chapter 624;

(b) Share a food establishment with a person not registered with the Authority as a cannabinoid edible processor;

(c) Process cannabinoid edibles and food in the same food establishment; or

(d) Use a cannabinoid concentrate or extract in a cannabinoid edible unless that concentrate or extract was processed in a food establishment licensed by ODA under OAR chapter 603, division 21, division 24, division 25, with the exception of OAR 603-025-0020(17), and division 28.

(3) A processing site endorsed to make cannabinoid edibles may share a food establishment with another Authority registered cannabinoid edible processor if:

(a) The schedule, with specific hours and days that each processor will use the food establishment, is prominently posted at the entrance to the food service establishment.

(b) Each registrant designates a separate area to secure, in accordance with OAR 333-008-2080 any marijuana, medical cannabinoid products, concentrates or extracts that a registrant stores at the food establishment. If a cannabinoid edible processor does not store marijuana, medical cannabinoid products, concentrates or extracts at the food establishment those items must be stored on a registered processing site under the processor's control.

(4) A food establishment used by a processing site endorsed to make cannabinoid edibles is considered a registered processing site and must meet the security and other premises requirements in these rules.

(5) A processing site endorsed to make cannabinoid edibles is strictly liable for any violation found at a shared food establishment during that processor's scheduled time, as reflected on the posted schedule or within that processor's designated area in the food establishment.

(6) If the Authority cannot determine by viewing the schedule or video surveillance footage who was responsible for the violation, each processor at the shared food establishment is individually and jointly liable for any documented violations.

(7) A processing site must make cannabinoid edibles in a manner that results in the THC being distributed consistently throughout the edible.

333-008-1800
Cannabinoid Concentrate and Extract Processor Requirements

(1) Cannabinoid Concentrates or Extracts. A processing site endorsed to make cannabinoid concentrates or extracts:

(a) May not use Class I solvents as those are classified in the Federal Drug Administration Guidance, Table I, published in the Federal Register on December 24, 1997 (62 FR 67377).

(b) Must:

(A) Only use a hydrocarbon-based solvent that is at least 99 percent purity.

(B) Only use a non-hydrocarbon-based solvent that is food-grade.

(C) Work in an environment with proper ventilation, controlling all sources of ignition where a flammable atmosphere is or may be present.

(D) Use only potable water and ice made from potable water in processing.

(E) If making a concentrate or extract that will be used in a cannabinoid edible, be endorsed as a cannabinoid edible processor.

(2) Cannabinoid Extracts. A processing site endorsed to make cannabinoid extracts:

(a) May not use pressurized canned flammable fuel, including but not limited to butane and other fuels intended for use in camp stoves, handheld torch devices, refillable cigarette lighters and similar consumer products

(b) Must:

(A) Process in a:

(i) Fully enclosed room clearly designated on the current diagram of the registered premises.

(ii) Room and with equipment, including all electrical installations, that meet the requirements of the Oregon Structural Specialty Code, related Oregon Specialty Codes and the Oregon Fire Code..

(B) Use a commercially manufactured professional grade closed loop extraction system designed to recover the solvents and built to recognized and generally accepted good engineering standards, such as those of:

(i) American National Standards Institute (ANSI);

(ii) Underwriters Laboratories (UL); or

(iii) The American Society for Testing and Materials (ASTM).

(C) If using carbon dioxide in processing, use a professional grade closed loop carbon dioxide gas extraction system where every vessel is rated to a minimum of 600 pounds per square inch.

(D) For extraction system engineering services, including but not limited to consultation on and design of extraction systems or components of extraction systems, use the services of a professional engineer registered with the Oregon State Board of Examiners for Engineering and Land Surveying, unless an exemption under ORS 672.060 applies;

(E) Have an emergency eye-wash station in any room in which cannabinoid extract is being processed.

(F) Have all applicable material safety data sheets readily available to personnel working for the processor.

(3) Cannabinoid Concentrates. A processing site endorsed to make cannabinoid concentrates:

(a) May not:

(A) Use denatured alcohol.

(B) If using carbon dioxide, apply high heat or pressure.

(b) Must only use or store dry ice in a well ventilated room to prevent against the accumulation of dangerous levels of carbon dioxide.

(c) May use:

(A) A mechanical extraction process;

(B) A chemical extraction process using a nonhydrocarbon-based or other solvent, such as water, vegetable glycerin, vegetable oils, animal fats, isopropyl alcohol or ethanol; or

(C) A chemical extraction process using the hydrocarbon-based solvent carbon dioxide, provided that the process does not involve the use heat over 180 degrees or pressure.

333-008-1810
Cannabinoid Topical, Tincture, Capsule, Suppository or Transdermal Patch Processor

(1) A processing site endorsed to make cannabinoid topicals, tinctures, capsules, suppositories or transdermal patches may not

engage in processing in a location that is operating as a restaurant, seasonal temporary restaurant, intermittent temporary restaurant, limited service restaurant or single-event temporary restaurant licensed under ORS chapter 624.

(2) A registered processing site making cannabinoid tinctures may only process in a food establishment licensed by the Oregon Department of Agriculture (ODA) and must comply with the applicable provisions of OAR chapter 603, division 21, division 24, division 25, with the exception of OAR 603-025-0020(17), and division 28.

333-008-1820
Registered Processing Site Recordkeeping

(1) In addition to other record keeping required in these rules a registered processing site must keep records documenting the following:

(a) How much marijuana is in each process lot, as that term is defined in OAR 333-007-0020.

(b) If a product is returned by a registered dispensary, how much product is returned and why.

(c) If a defective product was reprocessed, how the defective product was reprocessed.

(d) Each training provided in accordance with OAR 333-008-1750, the names of employees who participated in the training, and a summary of the information provided in the training.

(e) All testing results.

(2) A processor must obtain a material safety data sheet for each solvent used or stored on the licensed premises and maintain a current copy of the material safety data sheet and a receipt of purchase for all solvents used or to be used in an extraction process on the licensed premises.

(3) If the Authority requires a processor to submit or produce documents to the Authority that the processor believes falls within the definition of a trade secret as defined in ORS 192.501, the processor must mark each document "confidential" or "trade secret".

333-008-1830
Registered Marijuana Processing Site Required Reporting to the Authority

(1) The individual or individuals responsible for a marijuana processing site shall maintain documentation of each transfer of usable marijuana, medical cannabinoid products, cannabinoid concentrates and cannabinoid extracts and on and after June 1, 2016, must submit to the Authority electronically, by the 10th of each month, the following information:

(a) The amount of usable marijuana transferred to the marijuana processing site during the previous month.

(b) The amount and type of a medical cannabinoid concentrate or extract transferred by another registered processing site during the previous month. For purposes of this section "type" means:

(A) Cannabinoid concentrate in solid form; and

(B) Cannabinoid concentrate in liquid form.

(c) The amount and type of medical cannabinoid products transferred by the marijuana processing site to a dispensary. For purposes of this section "type" means:

(A) Cannabinoid edibles;

(B) Cannabinoid topicals;

(C) Cannabinoid tinctures;

(D) Cannabinoid capsules;

(E) Cannabinoid suppositories;

(F) Cannabinoid transdermal patches; and

(G) Cannabinoid product other than products listed in paragraphs (A) to (F) of this subsection.

(d) The amount and type of cannabinoid concentrates transferred by the marijuana processing site during the previous month. For purposes of this section "type" means:

(A) Cannabinoid concentrate in solid form; and

(B) Cannabinoid concentrate in liquid form.

(e) The amount and type of cannabinoid extracts transferred by the marijuana processing site during the previous month. For purposes of this section "type" means:

(A) Cannabinoid extract in solid form; and

(B) Cannabinoid extract in liquid form.

(f) The amount and type of medical cannabinoid products transferred by the marijuana processing site to a patient or the patient's designated primary caregiver during the previous month. For purposes of this section "type" means:

(A) Cannabinoid edibles;

(B) Cannabinoid topicals;

(C) Cannabinoid tinctures;

(D) Cannabinoid capsules;

(E) Cannabinoid suppositories;

(F) Cannabinoid transdermal patches; and

(G) Cannabinoid product other than products listed in paragraphs (A) to (F) of this subsection.

(g) The amount and type of cannabinoid concentrates or extracts transferred by the marijuana processing site to a patient or the patient's designated primary caregiver during the previous month. For purposes of this section "type" means;

(A) Cannabinoid concentrate or extract in liquid form; and

(B) Cannabinoid concentrate or extract in solid form.

(2) Information submitted to the Authority under this rule must:

(a) List each type of marijuana item separately;

(b) Provide the total aggregate amount of a type of marijuana item transferred to a processing site by a patient, designated primary caregiver, PRMG or other registered processing site during the previous month; and

(c) Provide the total aggregate amount of a type of marijuana item transferred from a processing site to a registered dispensary, patient, designated primary caregiver, or other registered processing site during the previous month.

(3) In addition to submitting the information as required by section (1) of this rule, a person responsible for a processing site must keep a record of the information described in section (1) of this rule for two years after the date on which the person submits the information to the Authority.

General Requirements for Medical Marijuana Processing Sites and Dispensaries

333-008-2000
Definitions

For purposes of OAR 333-008-2000 to 333-008-2200:

(1) "Applicant" means a person applying for a new or renewal registration for a dispensary or processing site.

(2) "Registrant" means a registered dispensary or registered processing site.

(3) "Registrant representative" means an owner, director, officer, PRD, PRP manager, employee, agent or other representative of a registrant to the extent that the person acts in a representative capacity.

(4) "These rules" means OAR 333-008-2000 to 333-008-2200.

Stat. Auth.: ORS 475B.435, 475B.450, 475B.525
Stats. Implemented: ORS 475B.435, 475B.450
Hist.: PH 9-2016, f. 2-26-16, cert. ef. 3-1-16

333-008-2010
Communication with the Oregon Health Authority

If an applicant or registrant is required to or elects to submit information or documentation to the Authority by a particular deadline it must be received, regardless of the method used to submit the writing, by 5 p.m. Pacific Time.

Stat. Auth.: ORS 475B.435, 475B.450, 475B.525

Stats. Implemented: ORS 475B.435, 475B.450

333-008-2020
Criminal Background Checks

(1) An individual named in a new or renewal application as required by OAR 333-008-1020 or 333-008-1620, or if otherwise required by these rules, must provide to the Authority:

(a) A criminal background check request form, prescribed by the Authority that includes but is not limited to:

(A) First, middle and last name;

(B) Any aliases;

(C) Date of birth; and

(D) Address and recent residency information.

(b) Fingerprints in accordance with the instructions on the Authority's webpage: www.healthoregon.org/ommp.

(c) A copy of the individual's driver license.

(2) The Authority may request that an individual disclose his or her Social Security Number if notice is provided that:

(a) Indicates the disclosure of the Social Security Number is voluntary; and

(b) That the Authority requests the Social Security Number solely for the purpose of positively identifying the individual during the criminal records check process.

(3) The Authority shall conduct a criminal records check in order to determine whether the individual has been convicted of the manufacture or delivery of a controlled substance in Schedule I or Schedule II in any state.

(4) If an individual wishes to challenge the accuracy or completeness of information provided by the Department of State Police, the Federal Bureau of Investigation and agencies reporting information to the Department of State Police or Federal Bureau of Investigation, those challenges must be made through the Department of State Police, Federal Bureau of Investigation or reporting agency and not through a contested case process.

(5) Any criminal background information received by the Authority during the criminal background check process is confidential and is not subject to disclosure without a court order.

Stat. Auth.: ORS 475B.435, 475B.450, 475B.525

Hist.: PH 9-2016, f. 2-26-16, cert. ef. 3-1-16

333-008-2030
Notification of Changes

(1) A registrant must notify the Authority within 10 calendar days of any of the following:

(a) The conviction for the manufacture or delivery of a controlled substance in Schedule I or Schedule II of any individual named in the application;

(b) A change in any contact information for anyone listed in an application or subsequently identified as an owner, an individual with a financial interest, a PRD or a PRP;

(c) A decision to remove a PRD, PRP, primary PRD or primary PRP;

(d) A decision to permanently close the dispensary or processing site at that location;

(e) For a dispensary, the location of a public or private elementary or secondary school within 1,000 feet of the dispensary; and

(f) The suspected theft of marijuana items.

(2) The notification required in section (1) of this rule must include a description of what has changed or the event and any documentation necessary for the Authority to determine whether the dispensary or processing site or dispensary or processing site registrant is still in compliance with ORS 475B.435, 475B.450 and these rules including but not limited to, as applicable:

(a) A copy of the criminal judgment or order;

(b) The location of the school that has been identified as being within 1,000 feet of the dispensary; or

(c) A copy of the police report documenting that the suspected theft of marijuana items was reported to law enforcement, if it was reported.

(3) Changes in Ownership, Financial Interest or Business Structure. A registrant that proposes to change its corporate structure, ownership structure or change who has a financial

Hist.: PH 9-2016, f. 2-26-16, cert. ef. 3-1-16

interest in the business must submit a form prescribed by the Authority, any information identified in the form to be submitted, and criminal background check fees, if applicable, to the Authority, prior to making such a change.

(a) The Authority must review the form and other information submitted and will approve the change if the change would not result in an initial or renewal application denial under OAR 333-008-1060 or 333-008-1670, or serve as the basis of a registration suspension or revocation.

(b) If the Authority denies the change but the registrant proceeds with the change the registrant must surrender the registration or the Authority will propose to suspend or revoke the registration.

(4) Failure of a registrant to notify the Authority in accordance with this rule may result in the imposition of civil penalties or the suspension or revocation of a dispensary or processing site's registration.

Stat. Auth.: ORS 475B.435, 475B.450, 475B.525
Stats. Implemented: ORS 475B.435, 475B.450
Hist.: PH 9-2016, f. 2-26-16, cert. ef. 3-1-16; PH 21-2016, f. 6-24-16, cert. ef. 6-28-16

333-008-2040
Changing, Altering, or Modifying Licensed Premises

(1) A registrant may not make any physical changes to the premises that materially or substantially alters the premises or the usage of the premises from the plans originally reviewed by the Authority, without the Authority's prior written approval.

(2) A registrant intending to make any material or substantial changes to the premises must submit a form prescribed by the Authority, and submit any information identified in the form to be submitted, to the Authority, prior to making any such changes.

(3) The Authority must review the form and other information submitted under section (2) of this rule, and will approve the changes if the changes would not result in an initial or renewal application denial under OAR 333-008-1060 or OAR 333-008-1670.

(4) If the Authority denies the change but the registrant proceeds with the change the registrant must surrender the registration or the Authority will propose to suspend or revoke the registration.

(5) For purposes of this rule a material or substantial change requiring approval includes, but is not limited to:

(a) Any increase or decrease in the total physical size or capacity of the premises;

(b) The sealing off, creation of or relocation of a common entryway, doorway, passage or other such means of public ingress or egress, when such common entryway, doorway or passage alters or changes limited access areas, such as the areas in which the transfer of marijuana items occurs within the premises; or

(c) Any physical change that would require the installation of additional video surveillance cameras or a change in the security system.

Stats. Implemented: ORS 475B.435, 475B.450
Hist.: PH 9-2016, f. 2-26-16, cert. ef. 3-1-16

333-008-2050
Change in Location

(1) A registrant that wishes to change its location must submit a new application that complies with OAR 333-008-1020 or 333-008-1620.

(2) A registrant may not operate at a new location unless it is registered by the Authority.

(3) If a registrant is applying for a registration at a new location because the registrant wishes to change the location of the currently registered dispensary, and the new location is within 1,000 feet of the currently registered dispensary, the Authority will not deny the application based on the new location being within 1,000 feet of a registered dispensary. The Authority shall condition approval of the registration at the new location on the surrender of the registration at the current location.

(4) A dispensary or processing site that is approved to operate at a new location must comply with any instructions provided by the Authority for transferring marijuana items from the previous location to the new location.

Stat. Auth.: ORS 475B.435, 475B.450, 475B.525

333-008-2060
Secretary of State Registration Required

A registrant must maintain a current registration as a business with the Office of the Secretary of State in order to receive or maintain registration.

Stat. Auth.: ORS 475B.435, 475B.450, 475B.525
Stats. Implemented: ORS 475B.435, 475B.450
Hist.: PH 9-2016, f. 2-26-16, cert. ef. 3-1-16

333-008-2070
Advertising Restrictions

(1) A registrant may not have advertising that:

(a) Contains statements that are deceptive, false, or misleading;

(b) Contains any content that can reasonably be considered to target minors including but not limited to cartoon characters, toys, or similar images and items typically marketed towards minors;

(c) Specifically encourages the transportation of marijuana items across state lines;

(d) Asserts that marijuana items are safe or safer for reasons including but not limited to because they are regulated by the Authority or have been tested by a certified laboratory;

(e) Make claims that a marijuana item has curative or therapeutic effects unless the claim is supported by the totality of publicly available scientific evidence (including evidence from well-designed studies conducted in a manner consistent with generally recognized scientific procedures and principles) and for which there is significant scientific agreement among experts qualified by scientific training and experience to evaluate such claims; or

(f) Display consumption of marijuana items.

(2) A registrant may not make any deceptive, false, or misleading assertions or statements on any product, any sign, or any document provided to a patient, caregiver, or to an individual as that term is defined in OAR 333-008-1500.

(3) A registrant must include the following statement on all advertising:

(a) "Do not operate a vehicle or machinery under the influence of marijuana".

(b) "Keep marijuana out of the reach of children".

(4) A registrant must remove any sign, display, or advertisement if the Authority finds it violates this rule.

(5) The Authority will notify the registrant and specify a reasonable time period for the registrant to remove any sign, display or advertisement that the Authority finds objectionable.

Stat. Auth.: ORS 475B.435, 475B.450 & 475B.525

333-008-2080
Security Requirements

In order to be registered and remain registered a registrant must:

(1) Have an installed and fully operational security alarm system, installed by an alarm installation company, activated at all times when the premises is closed for business on all:

(a) Entry or exit points to and from the premises; and

(b) Perimeter windows, if applicable.

(2) Have a security alarm system that:

(a) Detects movement inside the premises;

(b) Is programmed to notify a security company that will notify a registrant representative or his or her designee in the event of a breach; and

(c) Has at least two operational "panic buttons" located inside the premises that are linked with the alarm system that notifies a security company.

(3) Have commercial grade, non-residential door locks installed on every external door of a registered premises where marijuana items are present.

(4) During all hours when the registrant is not operating:

(a) Securely lock all entrances to and exits from the registered premises and ensure any keys or key codes to the enclosed area remain in the possession of the registrant or registrant representative;

(b) Have a safe or vault as those terms are defined in OAR 333-008-0010 for the purpose of securing all marijuana items as required by these rules.

(5) Have a password protected network infrastructure.

(6) Have an electronic back-up system for all electronic records.

(7) Keep all video recordings and archived required records not stored electronically in a locked storage area. Current records may be kept in a locked cupboard or desk outside the locked storage area during hours when the registered business is open.

Stat. Auth.: ORS 475B.435, 475B.450, 475B.525
Stats. Implemented: ORS 475B.435, 475B.450
Hist.: PH 9-2016, f. 2-26-16, cert. ef. 3-1-16; PH 21-2016, f. 6-24-16, cert. ef. 6-28-16

333-008-2090
Video Surveillance Equipment

In order to be registered and remain registered a registrant must:

(1) Have an installed and fully operational video surveillance recording system with video surveillance equipment that at a minimum:

(a) Consists of:

(A) Digital or network video recorders;

(B) Cameras capable of meeting the requirements of OAR 333-008-2110 and this rule;

(C) Video monitors;

(D) Digital archiving devices;

(E) A minimum of one monitor on premises capable of viewing video; and

(F) A color printer capable of producing still photos.

(b) Is equipped with a failure notification system that immediately notifies a registrant representative of any surveillance interruption or failure that is longer than five minutes; and

(c) Has sufficient battery backup to support a minimum of one hour of recording time in the event of a power outage.

(2) Have a video surveillance system capable of recording all pre-determined surveillance areas in any lighting conditions.

(3) Have, in limited access and point of sale areas, cameras that have minimum resolution of 1280 x 720 pixels (px) and record at 10 fps (frames per second).

(4) Have, in exterior perimeter and non-limited access areas (except for restrooms) cameras that have a minimum resolution of 1280 x 720 px and record at least 5 fps, except where coverage overlaps any limited access areas such as entrances or exits and in those overlap areas cameras must record at 10 fps.

Stat. Auth.: ORS 475B.435, 475B.450, 475B.525
Stats. Implemented: ORS 475B.435, 475B.450

333-008-2100
Required Camera Coverage and Camera Placement

In order to be registered and remain registered a registrant must:

(1) Have security camera coverage for:

(a) All secure and limited access areas;

(b) All areas where marijuana items will be and are transferred to or from a registered premises;

(c) All areas where the general public is permitted (except for restrooms);

(d) All points of entry to and exit from limited access areas and areas where marijuana items will be and are transferred to or from a registered premises; and

(e) All points of entry to and exit from the premises.

(2) Have cameras that are positioned so that they capture clear and certain images of any individual and activity occurring:

(a) Within 15 feet both inside and outside of all points of entry to and exit from the premises;

(b) Anywhere within a secure or limited access area on the premises; and

(c) Anywhere within an area where marijuana items will be and are transferred to or from a registered premises.

Stat. Auth.: ORS 475B.435, 475B.450, 475B.525
Stats. Implemented: ORS 475B.435, 475B.450
Hist.: PH 9-2016, f. 2-26-16, cert. ef. 3-1-16; PH 21-2016, f. 6-24-16, cert. ef. 6-28-16

333-008-2110
Video Recording Requirements

(1) In order to be registered and remain registered a registrant must:

(a) Have cameras that are installed, operational, and continuously record 24 hours a day in all areas where marijuana items will be or are on the premises, including areas where the general public is permitted (except restrooms).

(b) Use cameras that record at a minimum resolution of 1280 x 720 px;

(c) Have an installed and operational surveillance system that:

(A) Can produce a color still photograph from any camera image; and

(B) Embeds the date and time on all surveillance recordings without significantly obscuring the picture;

(2) A registrant must:

(a) Keep all surveillance recordings a minimum of 45 calendar days and in a format that can be easily accessed for viewing;

(b) Archive video recordings in a format that ensures authentication of the recording as a legitimately-captured video and guarantees that no alterations of the recorded image has taken place;

(c) Provide video surveillance records and recordings immediately upon request to the Authority for the purpose of ensuring compliance with ORS 475B.450 and these rules;

(d) Keep surveillance recordings for periods exceeding 45 calendar days upon request of the Authority; and

(e) Immediately notify the Authority of any equipment failure or system outage lasting 30 minutes or more.

Stat. Auth.: ORS 475B.435, 475B.450, 475B.525
Stats. Implemented: ORS 475B.435, 475B.450
Hist.: PH 9-2016, f. 2-26-16, cert. ef. 3-1-16; PH 21-2016, f. 6-24-16, cert. ef. 6-28-16

333-008-2120
Location and Maintenance of Surveillance Equipment

(1) A registrant must:

(a) Have the surveillance room or surveillance area in a limited access area.

(b) Have the surveillance recording equipment housed in a designated, locked, and secured room or other enclosure with access limited to:

(A) The registrant and authorized personnel of the registrant;

(B) Employees of the Authority;

(C) State or local law enforcement agencies for any other state or local law enforcement purpose; and

(D) Service personnel or contractors.

(c) Keep a current list of all authorized personnel and service personnel who have access to the surveillance system and room on the registered premises.

(d) Keep a surveillance equipment maintenance activity log on the registered premises to record all service activity including the identity of any individual performing the service, the service date and time and the reason for service to the surveillance system.

(2) A registrant may store video recordings offsite as long as a PRD or PRP can demonstrate that the recordings are secure and protected, that the recordings are kept for a minimum of 45 calendar days as required in OAR 333-008-2110 and that the Authority can access the video recordings upon request.

Stat. Auth.: ORS 475B.435, 475B.450, 475B.525
Stats. Implemented: ORS 475B.435, 475B.450

Hist.: PH 9-2016, f. 2-26-16, cert. ef. 3-1-16

333-008-2130
Waiver of Security Requirements

(1) A registrant may request that the Authority waive one or more of the security requirements described in OAR 333-008-2080 to 333-008-2120 by submitting a request, in writing to the Authority. The request must include:

(a) The specific rules and subsections of a rule that is requested to be waived;

(b) The reason for the waiver;

(c) A description of an alternative safeguard the registrant can put in place in lieu of the requirement that is the subject of the waiver; and

(d) An explanation of how and why the alternative safeguard accomplishes the goals of the security rules, specifically public safety, prevention of diversion, accountability, and prohibiting access to unauthorized individuals.

(2) The Authority may, in its discretion and on a case by case basis, approve the waiver if it finds:

(a) The reason the registrant is requesting the waiver is because another state or local law prohibits the particular security measure that is required; or

(b) The registrant cannot, for reasons beyond the registrant's control or because the security measure is cost prohibitive, comply with the particular security measure that is required; and

(c) The alternative safeguard that is proposed meets the goals of the security rules.

(3) The Authority must notify the registrant in writing, whether the waiver has been approved. If the waiver is approved the notice must specifically describe the alternate safeguards that are required and, if the waiver is time limited, must state the time period the wavier is in effect.

(4) The Authority may withdraw approval of the waiver at any time upon a finding that the previously-approved alternative measures are not sufficient to accomplish the goals of the security rules. If the Authority withdraws its approval of the waiver, the registrant will be given a reasonable period of time to come into compliance with the security requirement that was waived.

State and Local Safety Inspections

(1) A registered premises may be subject to inspection by state or local government officials to determine compliance with state or local health and safety laws.

(2) A person responsible for a registered marijuana processing site must contact any utility provider to ensure that the registrant complies with any local ordinance or utility requirements such as water use, discharge into the sewer system, or electrical use.

(3) The Authority may require a registered processing site or dispensary to obtain a certificate of occupancy issued by a local building official or the Department of Consumer and Business Services Building Codes Division, if the Authority has concerns about the public health and safety of the registered premises.

General Sanitary Requirements

(1) A registrant must:

(a) Prohibit any individual working on the registered premises who has or appears to have a communicable disease, open or draining skin lesion infected with Staphylococcus aureus or Streptococcus pyogenes or any illness accompanied by diarrhea or vomiting for whom there is a reasonable possibility of contact with marijuana items from having contact with a marijuana item until the condition is corrected;

(b) Require all persons who work in direct contact with marijuana items to conform to hygienic practices while on duty, including but not limited to:

(A) Maintaining adequate personal cleanliness; and

(B) Washing hands thoroughly in an adequate hand-washing area before starting work, prior to having contact with a marijuana item and at any other time when the hands may have become soiled or contaminated;

(c) Provide hand-washing facilities adequate and convenient, furnished with running water at a suitable temperature and provided with effective hand-cleaning and sanitizing preparations and sanitary towel service or suitable drying device;

(d) Properly remove all litter and waste from the registered premises and maintain the operating systems for waste disposal in an adequate manner so that they do not constitute a source of contamination in areas where marijuana items are exposed;

(e) Provide employees with adequate and readily accessible toilet facilities that are maintained in a sanitary condition and good repair; and

(f) Hold marijuana items that can support the rapid growth of undesirable microorganisms in a manner that prevents the growth of these microorganisms.

(2) For purposes of this rule "communicable disease" includes but is not limited to: diphtheria, measles, Salmonella enterica serotype Typhi infection, shigellosis, Shiga-toxigenic Escherichia coli (STEC) infection, hepatitis A, and tuberculosis.

Foreclosure; Cessation of Operations

In the event that a registrant is foreclosed or otherwise ceases operations as described in ORS chapter 79, a secured party, as defined in ORS 79.0102, may continue operations at the marijuana processing site or dispensary upon submitting to the Authority proof, on a form prescribed by the Authority, that the secured party or, if the secured party is a business entity, any individual who has a financial interest in the secured party, meets the requirements and restrictions set forth in:

(1) For marijuana processing sites, ORS 475B.435 (2)(d) and (4); or

(2) For dispensaries, ORS 475B.450 (2)(d) and (4).

333-008-2170
Inspections

(1) The Authority must conduct a routine inspection of every registrant at least every year.

(2) The Authority may conduct a complaint inspection at any time following the receipt of a complaint that alleges a registrant or registrant representative is in violation of ORS 475B.435, ORS 475B.435 to 475B.443, 475B.450 to 475B.453, 475B.555, 475B.605, 475B.615, OAR chapter 333, division 7 or these rules.

(3) The Authority may conduct an inspection at any time if it believes, for any reason, that a registrant or registrant representative is in violation of ORS 475B.435 to 475B.443, 475B.450 to 475B.453, 475B.555, 475B.605, 475B.615, OAR chapter 333, division 7 or these rules.

(4) The Authority may inspect the following to ensure compliance with ORS 475B.435 to 475B.443, 475B.450 to 475B.453, 475B.555, 475B.605, 475B.615, OAR chapter 333, division 7 or these rules:

(a) The premises of a proposed marijuana processing site or dispensary, or registered marijuana processing site or dispensary; and

(b) The records of a registered marijuana processing site or dispensary.

(5) Registrant representatives must cooperate with the Authority during an inspection.

(6) If an individual at a registered dispensary or processing site fails to permit the Authority to conduct an inspection or if the Authority requires access to a dispensary or processing site and cannot obtain permission the Authority may seek an administrative warrant authorizing the inspection pursuant to ORS 431A.010.

(7) The Authority may purchase, possess or seize a marijuana item as necessary for the Authority to determine compliance with ORS 475B.435 to 475B.443, 475B.450 to 475B.453, 475B.555, 475B.605, 475B.615, OAR chapter 333, division 7 or these rules.

333-008-2180
Violations

(1) It is a violation for an applicant for a registration, registrant or registrant representative to:

(a) Fail to cooperate with an inspection;

(b) Submit false or misleading information to the Authority;

(c) If the registrant is a dispensary, transfer a marijuana item to an individual who is not a patient or a designated primary caregiver;

(d) If the registrant is a processing site, transfer a medical cannabinoid product, concentrate or extract to anyone who is not a dispensary representative or a patient;

(e) Accept the transfer of a marijuana item from an individual who is not registered with the Authority;

(f) Accept the transfer of a marijuana item that was produced or processed in another state;

(g) Possess a mature marijuana plant;

(h) Fail to submit a plan of correction in accordance with OAR 333-008-2190;

(i) Fail to comply with an emergency suspension order or final order of the Authority, including failing to pay a civil penalty;

(j) Fail to comply with ORS 475B.435 to 475B.443, 475B.450 to 475B.453, 475B.555, 475B.605, 475B.615, these rules, or OAR chapter 333, division 7; or

(k) Alter or falsify a laboratory test report or result.

(l) Alter or falsify a receipt issued under OAR 333-008-0023 or 333-008-0040

(2) It is a violation of ORS 475B.450 and these rules to operate a dispensary without being registered by the Authority.

(3) It is a violation of ORS 475B.435 and these rules to operate a processing site without being registered by the Authority unless an exemption applies.

Stat. Auth.: ORS 475B.435, 475B.450 & 475B.525
Stats. Implemented: ORS 475B.435 & 475B.450
Hist.: PH 9-2016, f. 2-26-16, cert. ef. 3-1-16; PH 21-2016, f. 6-24-16, cert. ef. 6-28-16

333-008-2190
Enforcement

(1)(a) Informal Enforcement. If, during an inspection the Authority documents violations of ORS 475B.435 to 475B.443, 475B.450 to 475B.453, 475B.555, 475B.605, 475B.615, any of these rules or OAR chapter 333, division 7, the Authority may issue a written Notice of Violation to a registrant that cites the laws alleged to have been violated and the facts supporting the allegations.

(b) A registrant must submit to the Authority a signed plan of correction within 10 business days from the date the Notice of Violation was mailed by the Authority. A signed plan of correction will not be used by the Authority as an admission of the violations alleged in the Notice.

(c) A registrant must correct all deficiencies within 10 business days from the date of the Notice, unless an extension of time is requested from the Authority. A request for such an extension shall be submitted in writing and must accompany the plan of correction.

(d) The Authority must determine if a written plan of correction is acceptable. If the plan of correction is not acceptable to the Authority it must notify the registrant in writing and request that the plan of correction be modified and resubmitted no later than 10 business days from the date the letter of non-acceptance was mailed.

(e) If the registrant does not come into compliance by the date of correction reflected on the plan of correction, the Authority may propose to suspend or revoke the registrant's registration or impose civil penalties.

(f) The Authority may conduct an inspection at any time to determine whether a registrant has corrected the deficiencies in a Notice of Violation.

(2) Formal Enforcement. If, during an inspection or based on other information the Authority determines that a registrant is in violation of ORS 475B.435 to 475B.443, 475B.450 to 475B.453, 475B.555, 475B.605, 475B.615, any of these rules or OAR chapter 333, division 7 the Authority may issue:

(a) A Notice of Proposed Suspension or Revocation in accordance with ORS 183.411 through 183.470.

(b) A Notice of Imposition of Civil Penalties in accordance with OAR 333-008-2200.

(c) An Order of Emergency Suspension pursuant to ORS 183.430.

(3) The Authority must determine whether to use the informal or formal enforcement process based on the nature of the alleged violations, whether there are mitigating or aggravating factors, and whether the registrant has a history of violations.

(4) The Authority must issue a Notice of Proposed Revocation if the registrant no longer meets the criteria in ORS 475B.450(3)(a) to (d) or ORS 475B.435(3)(a) or (b).

(5) The Authority may issue civil penalties or maintain a civil action against an establishment providing the services of a processing site or dispensary but is not registered in accordance with ORS 475B.450, ORS 475B.435 and these rules.

(6) The Authority may revoke the registration of a registrant for failure to comply with an ordinance adopted by a city or county pursuant to ORS 475B.500, if the city or county:

(a) Has provided the registrant with due process substantially similar to the due process provided to a registration holder under the Administrative Procedures Act, ORS 183.413 to 183.470; and

(b) Provides the Authority with a final order that is substantially similar to the requirements for a final order under ORS 183.470 that establishes the registrant is in violation of the local ordinance.

(7) The Authority must post a final order revoking the registration of a registrant on the Authority's website.

(8) To the extent permitted by law, if the Authority discovers violations that may constitute criminal conduct or conduct that is in violation of laws within the jurisdiction of other state or local governmental entities, the Authority may refer the matter to the applicable agency.

(9) If the registration of a registrant is revoked the owner or an authorized representative of the owner must:

(a) Make arrangements to return the marijuana items still possessed at the location to the person who transferred the marijuana item, document the return, and provide this information in writing within one business day of the transfer, to the Authority; or

(b) Dispose of the marijuana items in a manner specified by the Authority.

(10) The Authority is not required to accept the surrender of a registration and may proceed with an enforcement action even if a registrant has surrendered the registration.

(11) Notwithstanding OAR 333-008-3000 if the Authority suspends or revokes a registration or otherwise takes disciplinary action against the registrant the Authority must provide that information to a law enforcement agency.

(12) The Authority may possess, seize or dispose of marijuana, usable marijuana, medical cannabinoid products, cannabinoid concentrates and cannabinoid extracts as is necessary for the Authority to ensure compliance with and enforce the provisions of ORS 475B.435 to 475B.443, 475B.450 to 475B.453, 475B.555, 475B.605, 475B.615, any of these rules or OAR chapter 333, division 7.

Stat. Auth.: ORS 431A.010, 475B.435, 475B.450 & 475B.525

333-008-2200
Civil Penalties

(1) In addition to any other liability or penalty provided by law, the Authority may impose, against any person, a civil penalty that does not exceed $500 per day, for each violation of a provision of:

(a) ORS 475B.450, 475B.453, or any rules adopted thereunder;

(b) ORS 475B.435, 475B.440, 475B.443 or any rules adopted thereunder; or

(c) OAR 333-008-1000 to 333-008-2180 or OAR chapter 333, division 7.

(2) The Authority shall impose civil penalties under this section in the manner provided by ORS 183.745.

Stat. Auth.: ORS 431A.010, 475B.435, 475B.450, 475B.495, 475B.525
Stats. Implemented: ORS 475B.435, 475B.450, 475B.495
Hist.: PH 9-2016, f. 2-26-16, cert. ef. 3-1-16

Medical Marijuana Records

333-008-3000
Medical Marijuana Confidentiality

(1) Patient, Designated Primary Caregiver and Grow Site List.

(a) The Authority shall create and maintain a list of patients, designated primary caregivers, and grow site addresses.

(b) Except as provided in subsection (c) of this section, the list is confidential and not subject to public disclosure under ORS 192.410 to 192.505.

(c) Names, addresses and other identifying information made confidential under subsection (1)(b) of this rule may be released to:

(A) Authorized employees of the Authority as necessary to perform official duties of the Authority, including the production of any reports of aggregate (non-identifying) data or statistics;

(B) Authorized employees of state or local law enforcement agencies who provide to the Authority adequate identification but only as necessary to verify:

(i) That a person is or was a lawful possessor of a registry identification card;

(ii) That a person is or was a designated primary caregiver; or

(iii) That the address is or was a registered grow site; or

(C) Other persons (such as, but not limited to, employers, lawyers, family members) upon receipt of a properly executed release of information signed by the patient, the patient's parent or legal guardian, designated primary caregiver or PRMG. The release of information must specify what information the Authority is authorized to release and to whom.

(d) In addition to releasing information to authorized employees of state or local law enforcement agencies for purposes of verifying information under paragraph (1)(c)(B) of this rule, the Authority may release to authorized employees of state or local law enforcement agencies the minimum amount of information necessary to enable an employee to determine whether an individual or location is in compliance with a provision of ORS 475B.400 to 475B.525 or these rules.

(2) Database.

(a) Subject to subsection (2)(b) of this rule the Authority may provide information that is stored in the database to:

(A) A law enforcement agency.

(B) The regulatory agencies of a city or county.

(b) The Authority may not disclose the following information that may be stored in the database:

(A) Any personally identifiable information, as defined in ORS 432.005, related to a patient or a designated primary caregiver.

(B) Any personally identifiable information, as defined in ORS 432.005, submitted to the Authority under ORS 475B.423, 475B.438 or 475B.453 or pursuant to ORS 475B.458.

(C) Any information related to the amount and type of usable marijuana, medical cannabinoid products, or cannabinoid concentrates and extracts transferred to or by a PRMG, medical marijuana processing site or medical marijuana dispensary.

(3) Personally identifiable information in grow site, medical marijuana processor or medical marijuana dispensary applications. Any personally identifiable information, as defined in ORS 432.005, other than a name of an individual or an address submitted with an application under ORS 475B.435 or ORS 475B.450 that the Authority requires to be submitted and maintains for purposes of registering a marijuana grow site, a marijuana processing site or a medical marijuana dispensary is confidential and not subject to public disclosure under ORS 192.410 to 192.505.

(4) Disclosure to designees. The Authority may provide personally identifiable information to a person registered under ORS 475B.400 to 475B.525 if the registrant requests the information and the information is related to a designation made under ORS 475B.400 to 475B.525.

(5) Medical marijuana dispensary security information. Any record that the Authority keeps or maintains for purposes related to the installation or maintenance of a security system by a medical marijuana processing site or dispensary pursuant to OAR 333-008-2080 to 333-008-2120 is confidential and not subject to public disclosure under ORS 192.410 to 192.505.

(6) Disclosure following investigation. Notwithstanding any of the confidentiality provisions of this rule if the Authority determines, after conducting an investigation or receiving a complaint of an alleged violation of a provision of ORS 475B.400 to 475B.525 or any rule adopted thereunder, that a violation of a provision of ORS 475B.400 to 475B.525 or any rule adopted thereunder has occurred, the Authority may provide any information obtained by the Authority, except for information related to a patient's debilitating condition, to:

(a) Authorized employees of state or local law enforcement agencies; or

(b) Another state or local government agency with jurisdiction over the matter.

(7) Subpoenas. Notwithstanding any of the confidentiality provisions of this rule, the Authority may disclose information requested pursuant to a lawfully issued subpoena from a law enforcement agency.

(8) Disclosure following disciplinary action. Notwithstanding section (3) of this rule, if the Authority suspends or revokes the registration of the marijuana grow site, a PRMG, a marijuana processing site or a medical marijuana dispensary, or otherwise takes disciplinary action concerning a medical marijuana grow site, medical marijuana processing site, or a medical marijuana dispensary, the Authority must provide that information to a law enforcement agency.

333-008-3010
System to Allow Verification of Data at All Times

(1) The Authority shall establish an interactive method to allow authorized employees of state and local law enforcement agencies to use the Oregon State Police Law Enforcement Data System (LEDS) to query an OMMP data file in order to verify at any time whether a particular patient, designated primary caregiver, or grow site location is listed or registered with the Authority.

(2) LEDS access will only allow a yes or no answer to the query and the information obtained may not be used for any other purpose other than verification.

(3) The Authority may allow the release of reports related to verification if it is without identifying data.

(4) The Authority shall have staff available by phone to verify law enforcement agency employee questions during regular business hours in case the electronic verification system is down, and in the event the system is expected to be down for more than two business days, the Authority shall ensure program staff are available by phone for verification purposes.

DIVISION 9

REPORTING REQUIREMENTS OF THE OREGON DEATH WITH DIGNITY ACT

333-009-0000
Definitions

For the purpose of OAR 333-009-0000 through 333-009-0030, the following definitions apply.

(1) "Act" means the "Oregon Death with Dignity Act" or Measure 16 as adopted by the voters on November 8, 1994.

(2) "Adult" means an individual who is 18 years of age or older.

(3) "Attending Physician" means the physician who has primary responsibility for the care of the patient and treatment of the patient's terminal disease.

(4) "Authority" means the Oregon Health Authority.

(5) "Capable" means that in the opinion of a court or in the opinion of the patient's attending physician or consulting physician, psychiatrist or psychologist, a patient has the ability to make and communicate health care decisions to health care providers, including communication through persons familiar with the patient's manner of communicating, if those persons are available.

(6) "Consulting physician" means a physician who is qualified by specialty or experience to make a professional diagnosis and prognosis regarding the patient's disease.

(7) "Counseling" means one or more consultations as necessary between a state licensed psychiatrist or psychologist and a patient for the purpose of determining that the patient is capable and not suffering from a psychiatric or psychological disorder or depression causing impaired judgment.

(8) "Dispensing Record" means a copy of the pharmacy dispensing record form.

(9) "Health Care Facility" shall have the meaning given in ORS 442.015.

(10) "Health Care Provider" means a person licensed, certified or otherwise authorized or permitted by the law of this state to administer health care or dispense medication in the ordinary course of business or practice of a profession and includes a health care facility.

(11) "Patient" means a person who is under the care of a physician.

(12) "Physician" means a doctor of medicine or osteopathy licensed to practice medicine by the Oregon Medical Board.

(13) "Qualified patient" means a capable adult who is a resident of Oregon and has satisfied the requirements of this Act in order to obtain a prescription for medication to end his or her life in a humane and dignified manner.

Stat. Auth.: ORS 127.865
Stats. Implemented: ORS 127.800-127.995
Hist.: HD 15-1997(Temp), f. & cert. ef. 11-6-97; OHD 4-1998, f. & cert. ef. 5-4-98; OHD 12-1999, f. & cert. ef. 12-28-99; PH 24-2006, f. & cert. ef. 10-19-06; PH 5-2011(Temp), f. & cert. ef. 7-1-11 thru 12-27-11; PH 11-2011, f. & cert. ef. 10-27-11

333-009-0010
Reporting

(1) To comply with ORS 127.865(2), within seven calendar days of writing a prescription for medication to end the life of a qualified patient the attending physician shall send the following completed, signed and dated documentation by mail to the State Registrar, Center for Health Statistics, 800 NE Oregon Street, Suite 205, Portland OR 97232, or by facsimile to (971) 673-1201:

(a) The patient's completed written request for medication to end life, either using the "Written Request for Medication to End My Life in a Humane and Dignified Manner" form prescribed by the Authority or in substantially the form described in ORS 127.897;

(b) One of the following reports prescribed by the Authority:

(A) "Attending Physician's Compliance Form"; or

(B) "Attending Physician's Compliance Short Form" accompanied by a copy of the relevant portions of the patient's medical record documenting all actions required by the Act;

(c) "Consulting Physician's Compliance Form" prescribed by the Authority; and

(d) "Psychiatric/Psychological Consultant's Compliance Form" prescribed by the Authority, if an evaluation was performed.

(2) Within 10 calendar days of a patient's ingestion of lethal medication obtained pursuant to the Act, or death from any other cause, whichever comes first, the attending physician shall complete the "Oregon Death with Dignity Act Attending Physician Interview" form prescribed by the Authority.

(3) To comply with ORS 127.865(1)(b), within 10 calendar days of dispensing medication pursuant to the Death with Dignity Act, the dispensing health care provider shall file a copy of the "Pharmacy Dispensing Record Form" prescribed by the Authority with the State Registrar, Center for Health Statistics, 800 NE Oregon St., Suite 205, Portland, OR 97232 or by facsimile to (971) 673-1201. Information to be reported to the Authority shall include:

(a) Patient's name and date of birth;

(b) Prescribing physician's name and phone number;

(c) Dispensing health care provider's name, address and phone number;

(d) Medication dispensed and quantity;

(e) Date the prescription was written; and

(f) Date the medication was dispensed.

333-009-0030
Confidentiality/Liability

(1) All information collected pursuant to ORS 127.800 to 127.897 including, but not limited to, the identity of patients, physicians and other health care providers, and health care facilities shall not be a public record and may not be made available for inspection by the public.

(2) All information collected pursuant to ORS 127.800 to 127.897 and the annual statistical report referred to in 333-009-0020(2) shall be considered a special morbidity and mortality study under ORS 432.060. Summary information released in statistical reports shall be aggregated to prevent identification of individuals, physicians, or health care facilities.

(3) Pursuant to ORS 432.060, providing morbidity and mortality information to the Authority does not subject any physician, hospital, health care facility or other organization or person furnishing such information to an action for damages.

(4) Access to death certificate information shall be in accordance with OAR 333-011-0096 pursuant to ORS 432.121.

DIVISION 10

HEALTH PROMOTION AND CHRONIC DISEASE PREVENTION

Cancer Reporting Regulations

333-010-0000
Definitions

(1) "Active follow-up program" means a program for contacting a caregiver or cancer patient to determine, at least annually, information including but not limited to the vital status of each case.

(2) "Admitted" means a rendering of any service by the reporting facility to a patient under the authority or auspices of the facility's license under ORS 441.015, including but not limited to routine admission to the hospital, admission to the emergency room, or receiving services in an out-patient clinic.

(3) "Authority" means the Oregon Health Authority.

(4) "Cancer reporting facility" means a hospital or other health care facility in which cancer is diagnosed or treated and is also one of the following:

(a) A facility currently licensed as a hospital as defined under the provisions of ORS 442.015(13); or

(b) A facility currently licensed as an ambulatory surgical center as defined under ORS 442.015(3)(a).

(5) "Central cancer registry" means the Oregon Health Authority, Public Health Division program authorized to collect, receive, and maintain cancer data for the entire state and which maintains the system by which the collected information is reported to the Division.

(6) "Central Registry Cancer Notification Form" means the form required for health care providers to report a case of reportable cancer or reportable non-malignant condition.

(7) "Certified tumor registrar" means an individual who passes the certification examination and is currently certified by the Council on Certification of the National Cancer Registrars Association.

(8) "Clinical laboratory" means a facility where microbiological, serological, chemical, hematological, immunohematological, immunological, toxicological, cytogenetical, exfoliative cytological, histological, pathological or other examinations are performed on material derived from the human body, for the purpose of diagnosis, prevention of disease or treatment of patients by physicians, dentists and other persons who are authorized by license to diagnose or treat humans.

(9) "Date of diagnosis" means the date of initial diagnosis by a health care provider for the cancer being reported.

(10) "Division" means the Public Health Division of Oregon Health Authority.

(11) "First course of treatment" means all methods of treatment recorded in the treatment plan and administered to a person with a case of reportable cancer or reportable non-malignant condition before disease progression or recurrence, as defined in the American College of Surgeons Commission on Cancer Facility Oncology Registry Data Standards Manual, 2011.

(12) "Health care provider" means any person whose professional license allows him/her to diagnose or treat cancer patients.

(13) "Health system cancer registry" means a cancer registry that includes all reportable cancer cases occurring in the population served by a health system, whether or not the cases are diagnosed or treated in the cancer reporting facility.

(14) "OSCaR" means the Oregon State Cancer Registry, Oregon's central cancer registry.

(15) "Quality control system" means operational procedures by which the accuracy, completeness, and timeliness of the information reported to OSCaR can be determined and improved.

(16) "Reportable cancer" means all malignant neoplasms including carcinoma in situ, except basal and squamous cell carcinoma of the skin, carcinoma in situ of the cervix uteri, and CIN III (diagnosed on or after January 1, 1996), and PIN III (diagnosed on or after January 1, 2001).

(17) "Reportable Cancer Data Items List" means the list of variables for reportable cancers and reportable non-malignant conditions reported by cancer reporting facilities following the recommendations of the Centers for Disease Control and Prevention National Program of Cancer Registries ("CDC-NPCR") and further defined by the North American Association of Central Cancer Registries ("NAACCR") Data Standards and Data Dictionary, 2011.

(18) "Reportable non-malignant condition" means benign or borderline tumors of the brain (including the meninges and intracranial endocrine structures) and central nervous system, diagnosed on or after January 1, 2004.

(19) "Reportable pre-malignant condition" means all high-grade squamous intraepithelial lesion (CIN 2,3) and adenocarcinoma in situ (AIS) of the uterine cervix, high-grade squamous intraepithelial lesion of the vagina and vulva (VAIN 2,3/VIN 2,3), and high-grade squamous intraepithelial lesion (AIN 2,3) and carcinoma in situ of the anus.

(20) "Special study" means a Division-sponsored project that explores a particular facet of cancer incidence, morbidity, or mortality including, but not limited to, exploring hypotheses of disease risk, treatment options or cancer control authorized under ORS 432.520.

Stat. Auth.: ORS 432.500, 432.510, 432.540

333-010-0010
General Authority

ORS 432.510 directs the Oregon Health Authority to "establish a uniform, statewide, population-based registry system for the collection of information determining the incidence of cancer and benign tumors of the brain and central nervous system and related data. The purpose of the registry shall be to provide information to design, target, monitor, facilitate, and evaluate efforts to reduce the burden of cancer and benign tumors among the residents of Oregon." ORS 432.510, subsections (a) through (e) further specify that such efforts may include but are not limited to:

(1) Targeting populations in need of screening or other cancer control services;

(2) Supporting the operation of hospital registries and upgrading the care of cancer and benign tumors;

(3) Investigating suspected clusters;

(4) Conducting studies to identify cancer hazards; and

(5) Projecting the benefits or costs of alternative policies regarding the prevention or treatment of benign tumors or cancer.

333-010-0020
Reporting Requirements for Cancer Reporting Facilities

This rule describes the specific requirements for cancer reporting facilities. Such facilities include inpatient facilities, outpatient facilities acting under the license of a hospital, ambulatory surgical centers, and privately owned treatment or diagnostic centers contracted to and acting as a department of a cancer reporting facility.

(1) Cancer reporting facilities must report to OSCaR each case of reportable cancer or reportable non-malignant condition, as defined in OAR 333-010-0000(16) and 333-010-0000(18) respectively, in patients admitted for diagnosis and/or any part of the first course of treatment for that cancer. OSCaR will make lists of reportable cancers and reportable non-malignant conditions available

on the Oregon State Cancer Registry website: www.healthoregon.org/oscar.

(2) Cancer reporting facilities must report cases of reportable cancer or reportable non-malignant conditions to OSCaR as stipulated in OAR 333-010-0020(1) within 180 days of the date the case first receives cancer diagnostic or treatment services at the facility.

(3) Cancer reporting facilities with an active follow-up program must annually report vital status, date of last patient contact, and, if available, cancer or tumor status of reportable cancers and reportable non-malignant conditions to OSCaR.

(4) Cancer reporting facilities must report their cases of reportable cancer or reportable non-malignant conditions and any follow-up information to OSCaR in the electronic data exchange format and codes, Record Type A: Case Abstract, as specified by NAACCR, including the variables specified in the Reportable Cancer Data Items List. The OSCaR Reportable Data Items List will be available on the Oregon State Cancer Registry website: www.healthoregon.org/oscar.

(5) OSCaR shall establish a system of confirmation of receipt of cases submitted by each cancer reporting facility.

(6) Cancer reporting facilities reporting cases of reportable cancer or reportable non-malignant conditions to a health system cancer registry have discharged their reporting responsibilities provided that the health system registry reports those cases to OSCaR according to the requirements for cancer reporting facilities.

(7) Cancer reporting facilities may also elect to contract with a private vendor or contractor to report cases of reportable cancer and reportable non-malignant conditions to OSCaR as outlined above in OAR 333-010-0020(1) through (4).

(8) Any cancer reporting facility designated as a Type A or Type B rural hospital by the Oregon Office of Rural Health, may elect to meet the cancer reporting requirements by conducting their own identification of cases of reportable cancer and reportable non-malignant conditions and mailing a copy of the relevant portions of the medical record for each case to the central registry. The central registry staff will abstract and report such cases and bill the hospital for this service at its cost. Type A or Type B rural hospitals which authorize the central registry to abstract and report cases have fulfilled their abstracting and reporting requirements under these rules.

(9) Upon application to OSCaR by a cancer reporting facility, OSCaR may grant to the facility an extension of time, not to exceed two years, in which to meet the reporting requirements. Such requests must be in writing and directed to the Medical Director of OSCaR. On request, the central registry staff shall provide technical assistance to facilities to meet the reporting requirements.

(10)(a) If cancer reports from a reporting facility do not meet reporting requirements, OSCaR shall inform the facility in writing of the disparity between the facility's reports and the reporting standards. OSCaR will then consult with the facility regarding its options for meeting the reporting standards, as defined in OAR 333-010-0020(1) through (4). Options shall include, but are not limited to:

(A) Further consultation and training;

(B) Referral to contractors for reporting services;

(C) Provision, at cost, of reporting services by OSCaR. By selecting this option, cancer reporting facilities will fulfill all reporting requirements.

(b) If, after a minimum of 30 days from the receipt of the written notification, the facility cannot meet the reporting requirements, OSCaR may activate its reporting service for the facility. When activated, OSCaR may enter the facility, obtain the information and report it in conformance with the appropriate format and standards. In these instances, the facility shall reimburse OSCaR or its authorized representative for the cost of obtaining and reporting the information.

Stat. Auth.: ORS 432.510, 432.520

Stats. Implemented: ORS 432.510, 432.520

Hist.: HD 2-1996, f. & cert. ef. 2-29-96; OHD 7-1998, f. 7-14-98, cert. ef. 8-1-98; PH 13-2011, f. 12-28-11, cert. ef. 1-1-12

333-010-0030

Reporting Requirements for Health Care Providers

(1) Any health care provider diagnosing a case of reportable cancer or a reportable non-malignant condition, as defined in OAR 333-001-0000(16) and 333-010-0000(18) respectively, must notify OSCaR of each such case within 180 days of the diagnosis of the case. OSCaR will make lists of reportable cancers and reportable non-malignant conditions available on the Oregon State Cancer Registry website: www.healthoregon.org/oscar.

(2) Data items required for reporting a case of reportable cancer or reportable non-malignant condition shall include, but not be limited to, cancer diagnosis and treatment information, patient demographics, and health care provider contact information, as specified on the Central Registry Cancer Notification Form. Copies of the Central Registry Cancer Notification Form will be available on the Oregon State Cancer Registry website: www.healthoregon.org/oscar.

(3) Health care providers must comply with one of the following optional notification methods as may be directed by OSCaR:

(a) Completion and submission (by mail or facsimile) of the Central Registry Cancer Notification Form; or

(b) An encrypted electronic communication directed to OSCaR containing the information required by the Central Registry Cancer Notification Form.

(4) Health care providers need not report any case admitted to an Oregon reporting facility for:

(a) A diagnosis of a reportable cancer or reportable non-malignant condition; or

(b) All or any part of the first course of treatment for that case, providing that admission to the facility occurs within 180 days of diagnosis.

(5) Health care providers reporting cases of reportable cancer and reportable non-malignant conditions to a health system cancer registry have discharged their reporting responsibilities provided that the health system cancer registry reports those cases to OSCaR according to the requirements for cancer reporting facilities.

(6) If a health care provider fails to notify OSCaR of cases of reportable cancer and reportable non-malignant conditions according to the standards and format prescribed for health care providers, OSCaR may inform the health care provider in writing of the disparity between the health care provider's reporting performance and the reporting standards and consult with the health care provider regarding methods for bringing the health care provider's reporting performance into compliance with the reporting standards.

(7) If OSCaR does not receive information from another source completing the information required for a case of reportable cancer or reportable non-malignant condition submitted by a health care provider, or if OSCaR learns of an unreported case for which the health care provider has reporting responsibility but of which the central registry has not been notified by the health care provider, OSCaR may notify the health care provider of the missing information or case and the health care provider must, within 30 days, submit requested additional information to OSCaR. In the alternative, OSCaR may contact the health care provider and schedule a time to abstract the necessary data from the health care provider's records. The health care provider must provide access to those portions of a patient's medical record which provide data for the items specified in the Reportable Cancer Data Items List. In these instances, the health care provider must reimburse OSCaR or its authorized representative for the cost of obtaining and reporting the information.

(8) OSCaR shall establish a system of confirmation of receipt of cases submitted by health care providers.

333-010-0032
Reporting Requirements for Clinical Laboratories

(1) Clinical laboratories must report to OSCaR all cases with test results indicative of and specific for a reportable cancer or reportable non-malignant condition, as defined in OAR 333-010-0000(16) and 333-010-0000(18) respectively, ("Cancer Pathology Reports") in accordance with the following provisions. Clinical laboratories must submit all Cancer Pathology Reports to OSCaR using the electronic data exchange format and codes set forth in the guidelines for Pathology Laboratory Electronic Reporting issued by the North American Association of Central Cancer Registries ("NAACCR"), unless reported to a health system cancer registry. The NAACCR Guidelines for Pathology Laboratory Electronic Reporting are available from OSCaR.

(2) Clinical laboratories must also report to OSCaR all cases with biopsies (excluding cytologic tests) indicative of and specific for a reportable pre-malignant condition, as defined in OAR 333-010-0000(16), in an electronic format mutually agreed to by OSCaR and the clinical laboratory. These reports must include (if available to the clinical laboratory):

(a) Name, address, and telephone number of the physician listed on the lab order;

(b) Name, address, and telephone number of the reporting laboratory;

(c) Patient name, gender, address (if available), birth date, race/ethnicity;

(d) Primary site and type of cancer-related condition; and

(e) Date of diagnosis.

(3) OSCaR will make lists of reportable cancers, reportable non-malignant conditions, and reportable pre-malignant conditions available on the Oregon State Cancer Registry website: www.healthoregon.org/oscar. If a clinical laboratory fails to submit the required cancer pathology reports or reports of pre-malignant conditions to OSCaR according to the standards and format prescribed, OSCaR may inform the laboratory in writing of the disparity between the laboratory's reporting performance and the reporting standards and consult with the laboratory regarding methods for bringing the clinical laboratory's reporting performance into compliance with the reporting standards.

(4) If a clinical laboratory is not able to submit cancer pathology reports or reports of pre-malignant conditions electronically, OSCaR may authorize the clinical laboratory to report by mail or facsimile for a limited period of time to be specified by OSCaR.

(5) OSCaR shall establish a system of confirmation of receipt of cancer pathology reports and reports of pre-malignant conditions submitted by clinical laboratories.

333-010-0035
Patient Notification Requirement

This rule describes the process for notifying patients that information about a reportable cancer has been reported to OSCaR.

(1) OSCaR may, but is not required to notify patients that information about a diagnosis of reportable cancer has been included in the registry. OSCaR may make a determination, based on budgeting constraints or otherwise, to curtail patient notification activities.

(2) Information to be provided to patients. The notification to the patient shall include the following information about the purposes of the registry and the protection of confidentiality:

(a) That Oregon statute requires that every cancer newly diagnosed in Oregon, or in an Oregon resident, be reported to the Oregon State Cancer Registry maintained by Oregon Health Authority;

(b) That information reported to the Authority includes the type and characteristics of the cancer, details of the diagnosis and treatment given, and patient demographic information;

(c) That the information is used to understand how cancer affects the population in Oregon, to design and implement prevention and control programs, and for research;

(d) That the information is confidential and no identifiable information about the patient can be released to anyone unless very strict requirements, as provided by law, are met;

(e) If those specific requirements, as provided by law, are met, researchers may be allowed to contact patients to offer them the opportunity to participate in research projects. Any invitation to participate in research is always voluntary and may be freely declined; and

(f) That the researcher shall first notify the patient's physician regarding the patient's participation in a research project, unless the patient specifies to OSCaR that their name never be released for any research purpose.

Stat. Auth.: ORS 432.500
Stats. Implemented: ORS 432.500–432.900
Hist.: OHD 7-1998, f. 7-14-98, cert. ef. 8-1-98; PH 13-2011, f. 12-28-11, cert. ef. 1-1-12

333-010-0040
Quality Standards

The usefulness of OSCaR data is directly dependent upon the accuracy, completeness, and timeliness of the data available in its database. ORS 432.510(5) directs the Oregon Health Authority to establish a quality control program for the data reported to the state registry. In order to assess these aspects of quality for cancer reporting, the central registry will institute a program of continuous quality improvement.

(1) The continuous quality improvement system must include, but is not limited to, coding edits, completeness audits or checks, reabstracting audits, and data analysis techniques to estimate data accuracy, validity, and reliability.

(2) For the purpose of assuring the accuracy and completeness of reported data, OSCaR shall have the right to periodically review all records that would identify cases of reportable cancer and reportable non-malignant conditions or would establish characteristics of the cancer, treatment of the cancer or the medical status of any identified cancer patient. OSCaR will provide advance notification of a minimum of 30 days, to allow time for the reporting sources to prepare records for review.

(3) The collection of cancer data from cancer reporting facilities, including data collection performed by OSCaR staff, must be performed either by certified tumor registrars or by staff knowledgeable about the following, as recommended by the American College of Surgeons, Commission on Cancer:

(a) Cancer as a disease process;

(b) General anatomy and physiology;

(c) Cancer epidemiology and statistics;

(d) Casefinding procedures; and

(e) Basic coding and staging schemes.

(4) A cancer reporting facility must report a minimum of 98 percent of the cases reportable by that facility for any calendar year in order to meet the requirement of these rules.

(5) The item-specific agreement rate of reported data from a cancer reporting facility with the information in the facility's medical record must not be less than 95 percent for those data items identified in the OSCaR Reportable Data Items list as quality control items.

(6) A cancer reporting facility must submit 98 percent of reportable cases to the central cancer registry within 180 days of either:

(a) The date of diagnosis; or

(b) The date of admission for receipt of any part of the first course of treatment provided in that facility, whichever is later.

(7) A health care provider must submit a minimum of 95 percent of reportable cases to the central cancer registry within 180 days of the date of diagnosis.

Stat. Auth.: ORS 432.510
Stats. Implemented: ORS 432.510

333-010-0050
Confidentiality and Access to Data

(1) All identifying information regarding individual patients, cancer reporting facilities, clinical laboratories, and health care providers reported pursuant to ORS 432.510 and 432.520, OAR 333-010-0020, 333-010-0030 and 333-010-0032 shall be confidential and privileged. Except as required in connection with the administration or enforcement of public health laws or rules, no public health official, employee, or agent shall be examined in an administrative or judicial proceeding as to the existence or contents of data collected under the cancer registry system.

(2) The information collected and maintained by OSCaR must be stored in secure locations, must be used solely for the purposes stated in ORS 432.510 and 432.520 and must not be further disclosed unless required by law, with the following exceptions:

(a) When OSCaR has entered into reciprocal cooperative agreements with other states to exchange information on resident cases, as provided for in ORS 432.540. Such agreements must provide for obtaining data on Oregon resident cases diagnosed or treated out of state, and for reciprocal rights of other states to receive information on residents of those states diagnosed or treated in Oregon. Before entering into an agreement with any other state, OSCaR must determine that the other state has comparable confidentiality protections;

(b) When disclosure to officers or employees of federal, state, or local government public health agencies is necessary to investigate or avoid a clear and immediate danger to other individuals or to the public generally;

(c) When the Authority elects to contract with another agency for performance of a registry function the Authority will require the contractor to agree to use the information only for the purposes of the central cancer registry, to maintain the information securely, and to protect the information from unauthorized disclosure as referred to in OAR 333-010-0050(1). Before entering into any contract with another agency the Authority must determine the agency has comparable confidentiality protections; and

(d) When the Authority deems that the information is necessary for others to conduct research in conformance with the purposes for which the data are collected.

(3) Cancer reporting facilities shall have access to confidential and privileged data on any case submitted by that facility. When a patient has been seen for care of a case of cancer by multiple cancer reporting facilities, OSCaR may share information on treatment and follow-up among the facilities, provided that all participating facilities have signed agreements with OSCaR to do so.

(4) Health care providers shall have access to confidential and privileged data on any case submitted by that health care provider. When a patient has been seen for care of a case of cancer by multiple health care providers, OSCaR may share information on treatment and follow-up among the health care providers, provided that all participating health care providers have signed agreements with OSCaR to do so.

Stat. Auth.: ORS 432.510, 432.520
Stats. Implemented: ORS 432.530, 432.540
Hist.: HD 2-1996, f. & cert. ef. 2-29-96; OHD 7-1998, f. 7-14-98, cert. ef. 8-1-98; PH 13-2011, f. 12-28-11, cert. ef. 1-1-12

333-010-0055
Research Studies

(1) Requirements for Research Studies. Before any confidential data may be disclosed to a researcher, OSCaR must:

(a) Approve a submitted protocol for the proposed research, which describes how the research will be used to determine the sources of cancer among the residents of Oregon or to reduce the burden of cancer in Oregon, in accordance with ORS 432.510 and OAR 333-010-0010;

(b) Agree that the data requested are necessary for the effective and efficient conduct of the study;

(c) Approve the researcher's submitted protocol and procedures for:

(A) Identifying patients to be contacted;

(B) Protecting against inadvertent disclosure of confidential and privileged data;

(C) Providing secure conditions to use and store the data;

(D) Assuring that the data will only be used for the purposes of the study; and

(E) Assuring that confidential and privileged data will be destroyed upon conclusion of the research;

(d) Determine that the researcher has access to sufficient resources to carry out the proposed research before releasing any confidential data;

(e) Facilitate appropriate review of the research, including peer review for scientific merit, and review by the body used by the Authority as the Committee for the Protection of Human Research Subjects and established in accordance with 45 C.F.R. 46; and

(f) Determine the need for and require the researcher to implement other safeguards which, in the judgment of OSCaR, may be necessary for protecting confidential and privileged data from inadvertent disclosure due to unique or special characteristics of the proposed research.

(2) Contacting Patients for Research. As outlined in OAR 333-010-0035(2)(e) & (f), participation in research is voluntary and patients may choose whether or not they want to participate in research studies.

(a) Before disclosing confidential patient information to a researcher, OSCaR must determine whether any of the patients meeting the criteria for the research study have previously informed OSCaR that they do not wish to participate in research. Such patients will be excluded from the list of patients provided to the researcher or contacted by OSCaR regarding research.

(b) Unless OSCaR determines it to be impracticable, OSCaR and/or the researcher must contact the patient's current treating physician to inform them of the study prior to any contact with a patient. In situations where the treating physician of record is no longer the patient's physician, OSCaR and/or the researcher must make a good faith effort to find the patient's current physician.

(c) When contacted, the patient's physician must be informed of the study and the identity of the eligible patient. Within three weeks the physician must:

(A) Agree that direct contact by the researcher would be appropriate; or

(B) Indicate the presence of a medical, psychological or social situation in the patient's life that would make contact inappropriate at that time. The physician is under no obligation to disclose the specifics of the medical, psychological or social situation.

(d) If a researcher does not receive a response from the physician within one month, the researcher may contact the patient directly.

(e) Researchers are strictly prohibited from redisclosing patient names or other confidential information to other researchers, individuals, or institutions not specifically identified in the approved study protocol as outlined above.

Stat. Auth.: ORS 432.510, 432.530, 432.540

333-010-0060
Special Studies

(1) From time to time, OSCaR may elect to conduct special studies of cancer mortality, morbidity, treatment options and cancer control. OSCaR is specifically authorized to obtain any information which may apply to a patient's reportable cancer or reportable non-malignant condition, and which may be found in the medical record of the patient under ORS 432.510 and 432.520. Upon request, the health care provider or health care facility must provide the requested information to OSCaR or provide OSCaR personnel access to the relevant portions of the medical records. Neither OSCaR nor the record holder shall bill the other for the cost of providing or obtaining this information.

(2) If, in the conduct of a special study, OSCaR identifies a need for access to pathological specimens that have been collected in connection with a case, OSCaR must make a written request to

the clinical laboratory or the cancer reporting facility with which the clinical laboratory is affiliated for the purpose of making arrangements for the procurement of such pathological specimens upon mutually agreeable terms.

333-010-0070
Advisory Committee

The Authority shall appoint an advisory committee to review the operations of the central registry and to make recommendations regarding registry policy, and to review research protocols for which confidential and privileged data are requested. The composition of the advisory committee must generally represent those with a professional or personal interest in cancer.

Stat. Auth.: ORS 432.510, 432.520

333-010-0080
Training and Consultation

The Authority shall provide annual continuing education for interested persons involved in cancer registry reporting. Continuing education content must include, but is not limited to, cancer diagnosis and management, epidemiology and statistics, and hardware and software registry applications. The central registry staff must supplement the continuing education with one-on-one consultations to assist cancer reporting facilities and health care providers as needed in meeting the reporting requirements.

Fees

OSCaR may establish fees, reasonably calculated, to reimburse for its actual cost in making OSCaR records and data available to researchers. Such costs include, but are not limited to, costs for computer programming; consultation; and for summarizing, compiling, analyzing, or tailoring records and data to a researchers' needs.

ScreenWise Breast and Cervical Cancer Program

333-010-0100
Description of the ScreenWise Breast and Cervical Cancer Program

The mission of the Oregon ScreenWise Program is to reduce breast cancer, cervical cancer, cardiovascular disease and other diseases by promoting early detection through screening, risk reduction counseling, behavior modification support, and referral to medical treatment. ScreenWise includes the Breast and Cervical Cancer Program (ScreenWise BCC), a federal screening and early detection program administered by the Oregon Health Authority to provide screening and diagnostic services to eligible Oregonians statewide. ScreenWise BCC provides coverage for screening and diagnostic services to Oregonians with family incomes up to 250 percent of the Federal Poverty Level through a contract network of qualified providers. OAR 333-010-0100 through 333-010-0197 apply only to providers who have an approved medical services agreement to provide screening and diagnostic services through this program. The program is limited to a finite source of funds which may restrict availability of services on an annual basis.

333-010-0105
Definitions

(1) "Agency number" means the administrative number assigned to the service provider by the Center for Prevention and Health Promotion (Center) for identification as a ScreenWise Breast and Cervical Cancer services (ScreenWise BCC) provider.

(2) "Ancillary provider" means a provider that performs services beyond the scope of an enrolling provider. Ancillary providers may include but is not limited to laboratories, imaging centers, surgeons and surgical facilities, and hospitals.

(3) "Approved medical services agreement" means the completed ScreenWise BCC agreement, submitted to and approved by the Center for Prevention and Health Promotion.

(4) "Authority" means the Oregon Health Authority.

(5) "BCCTP" means the Breast and Cervical Cancer Treatment Program. ORS 414.534, 414.536.

(6) "Care coordination or case management" means that a client is provided with services, results, follow-up recommendations, and active tracking of progress towards follow-up recommendations.

(7) "Center" means the Center for Prevention and Health Promotion, the office within the Oregon Health Authority that administers the ScreenWise BCC.

(8) "CLIA" means the federal Clinical Laboratory Improvement Amendments of 1988, establishes quality standards for all laboratory testing to ensure the accuracy, reliability and timeliness of patient test results, and allows for certification of clinical laboratories operating in accordance with these federal amendments.

(9) "Client" means a person of any age or gender who is enrolled in and receives screening or diagnostic services from the ScreenWise BCC.

(10) "Enrolling provider" means a provider that enrolls a client into the ScreenWise BCC, provides care coordination for the client and timely data submission to ScreenWise BCC.

(11) "FPL" means the federal poverty level guidelines established each year by the Department of Health and Human Services, used to determine eligibility for ScreenWise BCC and other federally funded programs.

(12) "HIPAA" means the Health Insurance Portability and Accountability Act.

(13) "ScreenWise BCC" means the ScreenWise program component that provides statewide breast and cervical cancer screening and diagnostic services to eligible clients, that is administered by the Center for Prevention and Health Promotion within the Oregon Health Authority.

(14) "ScreenWise BCC Provider Network" means the combination of all contracted ScreenWise providers, including enrolling and ancillary providers.

(15) "Service provider" or "provider" means a licensed health care provider operating within a scope of practice, who is authorized by the Center to bill for breast and cervical cancer screening and diagnostic services for eligible clients.

(16) "Site number" means the administrative number assigned to the provider by the Center for identification of the geographic location of each ScreenWise BCC provider.

(17) "Underinsured" means that health insurance does not fully cover breast and cervical cancer screening services or that out-of-pocket cost sharing for diagnostic services would pose a financial hardship.

333-010-0110
Client Eligibility

In order to be eligible for the ScreenWise BCC a client must meet the following eligibility criteria:

(1) Have an income based on family size that is at or below 250 percent of the Federal Poverty Level at the time of enrollment; and

(2) Reside or declare an intent to reside in Oregon; and

(3) Have no health insurance or be underinsured; and

(4) Meet one of the following criteria:

(a) Be a woman age 21 or over for clinically recommended breast and cervical cancer screening and diagnostic services; or

(b) Be a man of any age who is displaying signs or symptoms that may indicate breast cancer.

333-010-0115
Client Enrollment

(1)(a) Clients are determined eligible on a self-declared basis, when they submit a completed and signed ScreenWise BCC enrollment form at the clinic site at the time of service.

(b) Prior to enrolling a client in ScreenWise BCC, providers with access to the Medicaid Management Information System (MMIS) shall check MMIS to verify that applicant is not currently receiving Medicaid. Clients enrolled in Medicaid are ineligible for ScreenWise BCC.

(2) Eligibility is effective for one year unless a client justifiably needs to begin a second breast or cervical cycle, as defined in the program manual, before the end of one year. Justifications include:

(a) The presence of new signs or symptoms; or

(b) The necessity of short-term follow-up, as defined in the program manual.

(3) If breast or cervical services are justifiably initiated again before the end of one year, then eligibility will automatically extend through the end of that cycle, even if the cycle lasts into a new year.

(4) ScreenWise BCC providers must keep a signed enrollment form on file at the clinic for a minimum of four years. Clients enrolled into the program who are found ineligible will be disenrolled.

333-010-0120
Covered Services

(1) ScreenWise BCC covers screening and diagnostic services specific to breast and cervical cancer. Contracted providers will only be reimbursed for services related to breast and cervical cancer screening and diagnosis.

(2) Screening and diagnostic services include, but are not limited to:

(a) For breast cancer, both a clinical breast examination and a mammogram;

(b) For cervical cancer, both a pelvic examination and a Pap smear; and

(c) Laboratory tests and medical procedures necessary for detection and diagnosis of breast and cervical cancer.

(3) Information regarding covered services and CPT code lists, including required notice to providers regarding revisions, may be found in the provider's Medical Services Agreement.

333-010-0125
Excluded Services

(1) Services and laboratory tests not directly related to breast and cervical cancer screening and diagnosis are not covered by ScreenWise BCC for any eligible client. If the client accepts financial responsibility for a non-covered service that is received during a visit, payment arrangements are between the provider and the client, per OAR 333-010-0140(5)(a).

(2) No payment will be made for any expense incurred for any of the following services or items:

(a) Treatment for cancer or pre-cancerous conditions; or

(b) Any medical service or laboratory tests whose primary purpose is for a reason other than breast or cervical cancer screening or diagnostic testing.

333-010-0130
Standards of Care for Breast and Cervical Cancer Screening and Diagnostic Services

Participating ScreenWise BCC providers must agree to provide screening and diagnostic services according to the following standards:

(1) Informed Consent. The client's decision to participate in and consent to receive breast and cervical cancer screening and diagnostic services must be voluntary and without bias or coercion.

(a) The informed consent process, provided verbally and supplemented with written materials, must be presented in a language the client understands.

(b) Consent must be obtained from the individual client receiving screening and diagnostic services.

(2) Confidentiality. Services must be provided in a manner that respects the privacy and dignity of the individual.

(a) Providers must inform clients that services and medical records will be kept confidential.

(b) Records cannot be released without written client consent, except as required by law, or otherwise permitted by the Health Insurance Portability and Accountability Act (HIPAA).

(3) Linguistic and Cultural Competence. All services, support and other assistance must be provided in a manner that is responsive to the beliefs, interpersonal styles, attitudes, language, and behaviors of the individuals who are receiving services, and in a manner that has the greatest likelihood of ensuring their maximum participation in the program.

(a) All persons providing interpretation services must adhere to confidentiality guidelines.

(b) The provider must make interpretation services available to all clients needing or requesting such assistance at no cost to the client. The provider must notify clients in need of interpretation services of the availability of such services in accordance with the Civil Rights Act of 1964.

(c) The provider must assure the competency of language assistance provided to limited English proficiency clients by interpreters and bilingual staff. Family and friends should not be used to provide interpretation services, unless requested by the client.

(d) Provider shall make available easily understood client related materials and post signage in the languages of groups commonly encountered in the service area.

(e) All print, electronic, and audiovisual materials must be appropriate according to the client's language and literacy. Providers must accommodate a client's request for alternate formats.

(4) Access to Care. Services covered by ScreenWise BCC must be provided without cost to eligible clients. Providers must inform clients of the scope of services available through the program.

(a) Although not covered by ScreenWise BCC, treatment and supplies for pre-cancerous, cancerous conditions, and sexually transmitted infections must be available at the site, or by referral.

(b) Clients in need of additional medical services beyond the scope of the ScreenWise BCC provider network must be provided with information about available local resources.

(c) Clients with a qualifying breast or cervical cancer diagnosis, including specific pre-cancerous conditions, shall be screened to determine presumptive eligibility for the BCCTP and enrolling providers shall facilitate the application process.

(d) All services must be offered to eligible clients without regard to marital status, race, parity, disability, or sexual orientation.

(5) Clinical and Preventive Services. The scope of breast and cervical cancer screening and diagnostic services offered to clients must include:

(a) A health history, including health risk facts and personal and family medical history as it pertains to breast and cervical cancer screening.

(b) An initial physical examination that includes a breast and pelvic exam with a Pap smear.

(c) Follow-up recommendations.

(d) Care coordination to ensure that appropriate follow-up screening, diagnostic testing and care is provided, including:

(A) An explanation of the results of the physical examination and the laboratory tests; and

(B) The opportunity for questions concerning procedures, methods and results.

333-010-0135
Provider Enrollment

(1) This rule applies only to providers participating in ScreenWise BCC through an approved provider agreement with the Center.

(2) An individual or organization must meet applicable licensing or regulatory requirements set forth by federal and state statutes, regulations, and rules to be enrolled and to bill as a provider. In addition, all providers of services within the State of Oregon must have a valid Oregon business license if such a license is a requirement of the state, federal, county or city government to operate a business or to provide services.

(3) An individual or organization that is currently subject to sanctions by the Authority or the federal government is not eligible for enrollment.

(4) A ScreenWise BCC agency number will be issued to an individual or clinic upon:

(a) Completion of the application and submission of the required documents;

(b) The signing of the provider agreement by the provider or person authorized by the provider to bind the organization or individual to comply with these rules;

(c) Verification of licensing or certification; and

(d) Approval of the application by the Center.

(5) Issuance of an agency number establishes enrollment of an individual or organization as a provider for ScreenWise BCC services.

(6) If a provider changes address, business affiliation, licensure, ownership, certification, billing agents, registered name, or Federal Tax Identification Number (TIN), the Center must be notified in writing within 30 days of the change. Failure to notify the Center of a change of TIN may result in the imposing of a fine. Changes in business affiliation, ownership, registered name, and TIN may require the submission of a new application. Payments made to providers who have not furnished such notification may be recovered.

(7) Providers of services outside the state of Oregon will be enrolled under the following conditions:

(a) The provider is appropriately licensed or certified by the provider's state;

(b) The provider lives in a state contiguous to Oregon, and is within seventy-five miles of the Oregon border.

(8) Provider termination:

(a) The provider may terminate enrollment at any time. The request must be sent to the Center in writing, via certified mail, return receipt requested. The notice shall specify the agency number to be terminated and the effective date of termination. Termination of the provider enrollment does not terminate any obligations of the provider for dates of services during which the enrollment was in effect.

(b) ScreenWise BCC provider terminations or suspensions and subsequent recovery of any payments made by the Center may be for, but are not limited to, the following reasons:

(A) Breaches of the medical services agreement;

(B) Failure to comply with the statutes, regulations and policies of the Authority, and federal or state regulations that are applicable to the provider;

(C) Loss of the appropriate licensure or certification.

(9) The provider is entitled to a contested case hearing to determine whether the provider's agency number will be revoked.

(10) In the event of bankruptcy proceedings, the provider must notify the Center in writing within 15 days.

(11) Providers must receive information about administering the ScreenWise BCC from a ScreenWise BCC representative before services are initiated.

Stat. Auth.: ORS 413.042
Stats. Implemented: ORS 413.042

333-010-0140
Billing

(1) Only clinics providing breast and cervical cancer screening and diagnostic services pursuant to an approved medical services agreement, and who have been assigned an agency number may submit claims for ScreenWise BCC services.

(2) All services must be billed by submitting claim information in the method specified by the ScreenWise BCC.

(3) A primary diagnosis code is required on all claims. All billings must be coded with the most current and appropriate International Classification of Diseases, 10th Revision, Clinical Modification (ICD-10-CM), incorporated by reference and the most appropriate Current Procedural Terminology (CPT) codes. Information regarding CPT code lists, including required notice to providers regarding CPT code list revisions, may be found in the provider's Medical Services Agreement. Claims including primary diagnosis codes that are not listed on the approved CPT code list will not be paid without program approval.

(4) The provider must use CLIA certified laboratories for all tests whether done at the clinic site or by an outside clinic.

(5) Enrolled providers with ScreenWise BCC must not seek payment from an eligible client, or from a financially responsible relative or representative of that individual, for any services covered by ScreenWise BCC.

(a) A client may be billed for services that are not covered by ScreenWise BCC. However, the provider must inform the client in advance of receiving the specific service that it is not covered, the estimated cost of the service, and that the client or client's representative is financially responsible for payment for the specific service. Providers must document in writing that the client was provided this information and the client knowingly and voluntarily agreed to be responsible for payment. The client or client's representative must sign the documentation.

(b) Services not covered by ScreenWise BCC are those outside of the scope of standard breast and cervical cancer screening and diagnosis, or those not included in the ICD-10 list, incorporated by reference and approved CPT code lists.

(6) Prior to submission of a claim to the Center for payment, an approved provider agreement must be in place.

(7) All claims must be submitted with data, as described in the claims section of the rules.

(a) Except for services performed by a CLIA certified laboratory outside of the clinic, all billings must be for services provided within the provider's licensure or certification.

(b) Providers must submit true and accurate information when billing the Center.

(c) A claim may not be submitted prior to providing services.

(8) Diagnosis Code Requirement:

(a) A primary diagnosis code is required on all claims.

(b) Use the highest degree of specificity within the diagnosis codes listed in the ICD-10-CM codes, incorporated by reference, for breast and cervical screening or diagnostic testing.

(9) No provider shall submit to the Center:

(a) Any false claim for payment;

(b) Any claim altered in such a way as to result in a payment for a service that has already been paid;

(c) Any claim upon which payment has been made by another source unless the amount paid is clearly entered on the claim form;

(10) The provider must submit a billing error edit correction, or refund the amount of the overpayment, on any claim where the provider identifies an overpayment made by the Center.

(11) A provider who, after having been previously warned in writing by the Authority or the Department of Justice about improper billing practices, is found to have continued such improper billing practices and has had an opportunity for a contested case hearing, shall be liable to the Center for up to triple the amount of the established overpayment received as a result of such violation.

(12) Third Party Resources:

(a) Providers must make all reasonable efforts to ensure that ScreenWise BCC will be the payor of last resort with the exception of clinic or offices operated by the Indian Health Service (IHS) or individual American Indian tribes;

(b) Providers must make all reasonable efforts to obtain payment first from other resources. For the purposes of this rule reasonable efforts include:

(A) Determining the existence of insurance coverage or other resource by asking the client;

(B) Except in the case of the underinsured, when third party coverage is known to the provider, by any other means available:

(i) The provider must bill the third party resource;

(ii) Comply with the insurer's billing and authorization requirements.

(C) Providers are required to submit a billing error edit correction showing the amount of the third party payment or to refund the amount received from another source within 30 days of the date the payment is received. Failure to submit a billing error edit correction within 30 days of receipt of the third party payment or to refund the appropriate amount within this time frame is considered concealment of material facts and grounds for recovery or sanction.

333-010-0145
Claims and Data Submission

(1) In addition to submitting standard claims information, enrolling providers are required to submit client data in order to receive payment for the claim. The data is used to collect information pertaining to breast and cervical cancer prevention, diagnosis, and treatment and is used by the National Breast and Cervical Cancer Early Detection Program and the ScreenWise BCC primarily to monitor the delivery of services and clinical outcomes of the program.

(2) Although data requirements may require more information than necessary for payment of a specific claim, all related fields must be completed and submitted.

(3) Data requirements for enrolling providers and ancillary providers are as follows:

(a) Enrolling providers must provide required information on client data forms, as defined by the program and posted on the Program website: www.healthoregon.org/screenwise.

(b) Ancillary providers must provide results of services to enrolling providers. Ancillary providers are not required to provide data to the ScreenWise BCC directly.

(4) If a provider terminates the medical services agreement all data must be submitted through the completion of each client's cycle.

Stat. Auth.: ORS 413.042
Stats. Implemented: ORS 413.042
Hist.: PH 9-2008, f. & cert. ef. 6-16-08; PH 20-2015(Temp), f. & cert. ef. 10-12-15 thru 4-8-16; PH 11-2016, f. & cert. ef. 4-1-16

333-010-0150
Timely Submission of Claims and Data

(1) All claims for services must be submitted within 120 days of the date of service. Claims older than 120 days from the date of service will not be paid, except as provided for in section (2) and (3) of this rule.

(2) If a claim is denied, the claim must be resolved within 120 days of the date of the denial. Claims older than 120 days from the date of denial will not be paid, except as provided for in section (3) of this rule.

(3) When the Center has made an error that caused the provider not to be able to bill within 120 days of the date of service, then the claim may be submitted to the Center. The error must be confirmed by the Center.

(4) Client data not related to payment of the claim may be updated or corrected at any time after the date of service.

(5) Ancillary providers must provide results of services to enrolling providers within 14 calendar days from the date of service.

(6) Enrolling providers must provide the ScreenWise BCC with enrollment and eligibility information immediately or within five calendar days from the date of enrollment. All other data must be submitted within 90 days from the date of enrollment. In the event that a case requires additional diagnostic procedures that exceed 90 days from the date of enrollment, the data must be submitted immediately upon receipt.

333-010-0155
Payment

(1) The Center will make payment only to providers that have a medical services agreement with the ScreenWise BCC and are billing for an eligible client.

(2) The ScreenWise BCC reimbursement amount will be up to the Medicare reimbursement rate for the Portland metropolitan area for ScreenWise BCC approved CPT codes, on a fee-for-service basis.

(3) Federally qualified health centers or rural health centers are not paid at their Prospective Payment System (PPS) rate; they will receive up to the Medicare reimbursement rate for ScreenWise BCC approved CPT codes, on a fee-for-service basis.

(4) Center payments for ScreenWise BCC provider services, unless in error, constitute payment in full.

(5) The Center will not make payment on claims that have been assigned, sold, or otherwise transferred, or on which a provider of billing services receives a percentage of the amount billed or payment authorized. This includes, but is not limited to, transfer to a collection agency or individual who advances money to a provider for accounts receivable.

333-010-0160
Requirements for Financial, Clinical and Other Records

(1) The Center is responsible for analyzing and monitoring the operation of ScreenWise BCC and for auditing and verifying the accuracy and appropriateness of payment, utilization of services, the quality of care, and access to care. The provider shall:

(a) Develop and maintain adequate financial and clinical records and other documentation which supports the services for which payment has been requested. Payment will be made only for services that are adequately documented.

(b) All medical records must document the service provided, primary diagnosis code for the services, the date on which the service was provided, and the individual who provided the services. Patient account and financial records must also include documentation of charges, identify other payment resources pursued,

indicate the date and amount of all debit or credit billing actions, and support the appropriateness of the amount billed and paid. The records must be accurate and in sufficient detail to substantiate the data reported.

(2) Clinical records must sufficiently document that the client's services were primarily for breast or cervical cancer screening or diagnosis of breast or cervical cancer. The client's record must be annotated each time a service is provided and signed or initialed by the individual who provided the service or must clearly indicate the individual who provided the service. Information contained in the record must meet the standards of care for breast and cervical cancer screening and diagnosis, and must be appropriate in quality and quantity to meet the professional standards applicable to the provider or practitioner and any additional standards for documentation set forth in this rule.

(3) The provider must have policies and procedures to ensure the maintenance of the confidentiality of medical record information. These procedures ensure that the provider may release such information in accordance with federal and state statutes, ORS 179.505, 411.320, 45 CFR 205.50.

(4) The provider must retain clinical, financial and other records described in this rule for at least four years from the date of last activity.

(5) Upon written request from the Center, the Authority, the Oregon Department of Justice Medicaid Fraud Unit, the Oregon Secretary of State, or their authorized representatives (Requestor), the provider must furnish requested documentation, without charge, immediately or within the time-frame specified in the written request. Copies of the documents may be furnished unless the originals are requested. At their discretion, representatives of the Requestor may review and copy the original documentation in the provider's place of business. Upon the written request of the provider, the Requestor may, at their sole discretion, modify or extend the time for provision of such records if, in the opinion of the Center, good cause for such extension is shown. Factors used in determining whether good cause exists include:

(a) Whether the written request was made in advance of the deadline for production;

(b) If the written request is made after the deadline for production, the amount of time elapsed since that deadline;

(c) The efforts already made to comply with the request;

(d) The reasons the deadline cannot be met;

(e) The degree of control that the provider had over its ability to produce the records prior to the deadline; and

(f) Other extenuating factors.

(6) Access to records, inclusive of medical charts and financial records, does not require authorization or release from the client if the purpose of such access is to:

(a) Perform billing review activities;

(b) Perform utilization review activities;

(c) Review quality, quantity and services provided;

(d) Facilitate payment authorization and related services;

(e) Investigate a client's fair hearing request;

(f) Facilitate investigation by the Authority;

(g) Where review of records is necessary to the operation of the program.

(7) Failure to comply with requests for documents and within the specified time-frames means that the records subject to the request may be deemed by the Authority not to exist for purposes of verifying appropriateness of payment, medical appropriateness, the quality of care, and the access to care in an audit or overpayment determination, and accordingly subjects the provider to possible denial or recovery of payments made by the Authority, or to sanctions.

333-010-0165
Compliance with Federal and State Statutes

(1) Submission of a claim for medical services or supplies provided to a ScreenWise BCC client shall be deemed a representation by the medical provider to the Center of the medical provider's compliance with the applicable sections of the federal and state statutes referenced in this rule:

(a) 45 CFR Part 84 which implements Title V, Section 504 of the Rehabilitation Act of 1973;

(b) Title II and Title III of the Americans with Disabilities Act of 1991;

(c) Title VI of the Civil Rights Act of 1964;

(d) 42 CFR Part 493 Laboratory Requirements and ORS chapter 438 (Clinical Laboratories).

(2) Providers are required to comply with HIPAA regarding the confidentiality of client records.

(3) CLIA requires all entities that perform even one laboratory test, including waived tests on, "materials derived from the human body for the purpose of providing information for the diagnosis, prevention or treatment of any disease or impairment of, or the assessment of the health of, human beings" to meet certain federal requirements. If an entity performs tests for these purposes, it is considered under CLIA to be a laboratory.

333-010-0170
Denial or Recovery of Reimbursement Resulting from Review or Audit

(1) The Center's staff, contractor or auditor may review a claim for assurance that the specific medical service was provided in accordance with the program's policies and rules and the generally accepted standards of a provider's scope of practice or specialty.

(2) Payment may be denied or subject to recovery if review or audit determines the service does not meet the program's policies, rules or the Standards of Care for Breast and Cervical Cancer Screening and Diagnostic Services set forth in OAR 333-010-0130.

333-010-0175
Recovery of Overpayments to Providers Resulting from Review or Audit

(1) When the Center determines that an overpayment has been made to a provider, the amount of overpayment is subject to recovery:

(a) To determine the overpayment amount, the Center may use a statistically valid random sampling, with sufficient sample size allowing a confidence interval of 95 percent.

(b) After the Center determines an overpayment amount by the random sampling method set forth in section (1) of this rule, the provider may request a 100 percent audit of all billings submitted to the Center for breast and cervical cancer screening and diagnostic services provided during the period in question. If a 100 percent audit is requested:

(A) Payment and arrangement for a 100 percent audit is the responsibility of the provider requesting the audit; and

(B) The audit must be conducted by a certified public accountant that is knowledgeable about the Oregon Administrative Rules covering the payments in question, and must be conducted within 120 calendar days of the request to use such audit in lieu of the Center's random sample.

(2) The amount of the review or audit overpayment to be recovered:

(a) Will be the entire amount determined or agreed to by the Center;

(b) Is not limited to amounts determined by criminal or civil proceedings; and

(c) Will include interest to be charged at allowable state rates.

(3) The Center will deliver to the provider by registered or certified mail or in person a request for repayment of the overpayment and the documentation to support the alleged amount.

(4) If the provider disagrees with the Center's determination or the amount of overpayment the provider may appeal the decision by requesting a contested case hearing:

(a) A written request for hearing must be submitted to the Center by the provider within 30 calendar days of the date of the decision affecting the provider. The request must specify the areas of disagreement.

(b) Failure to request a hearing or administrative review in a timely manner constitutes acceptance by the provider of the amount of the overpayment.

(5) The overpayment is due and payable 30 calendar days from the date of the decision by the Center:

(a) An additional 30 day grace period may be granted the provider upon request to the Center;

(b) A request for a hearing does not change the date the repayment of the overpayment is due.

(6) The Center may extend the reimbursement period or accept an offer of repayment terms. Any change in reimbursement period or terms must be made in writing by the Center.

(7) If the provider refuses to reimburse the overpayment or does not adhere to an agreed upon payment schedule, the Center may:

(a) Recoup future provider payments up to the amount of the overpayment; or

(b) Pursue civil action to recover the overpayment.

(8) As the result of a hearing the amount of the overpayment may be reduced in part or in full.

(9) The Center may, at any time, change the amount of the overpayment upon receipt of additional information. Any changes will be verified in writing by the Center. Any monies paid to the Center that exceed an overpayment will be refunded to the provider.

(10) If a provider is terminated or sanctioned for any reason, the Center may pursue civil action to recover any amounts due and payable to ScreenWise BCC.

333-010-0180
Provider Sanctions

The following are conditions that may result in the imposition of a sanction on a provider.

(1) Basis for Sanction:

(a) Conviction of a provider of a felony or misdemeanor related to a crime or violation of Title XVIII, XIX, or XX of the Social Security Act or related state laws (or entered a plea of nolo contendere);

(b) Conviction of fraud related to any federal, state, or locally financed health care program;

(c) Conviction of interference with the investigation of health care fraud;

(d) Conviction of unlawfully manufacturing, distributing, prescribing, or dispensing a controlled substance;

(e) Failure to comply with the state and federal statutory requirements set forth in OAR 333-010-0165;

(f) By actions of any state licensing authority for reasons relating to the provider's professional competence, professional conduct, or financial integrity, the provider either:

(A) Had a health care license suspended or revoked, or has otherwise lost such license; or

(B) Surrendered the license while a formal disciplinary proceeding was pending before a licensing authority.

(g) Suspension or exclusion from participation in a federal or state health care program for reasons related to professional competence, professional performance, or other reason;

(h) Improper billing practices, including billing for excessive charges or visits;

(i) Failure to furnish services as required by law or contract with the Center, if the failure has adversely affected (or has a substantial likelihood of adversely affecting) the client;

(j) Failure to supply requested information on subcontractors and suppliers of goods or services;

(k) Failure to supply requested payment information;

(l) Failure to grant access to facilities or provide records upon request of the Center or a designated Requestor;

(m) Receiving payments for services provided to persons who were not eligible;

(n) Establishing multiple claims using procedure codes that overstate or misrepresent the level, amount or type of health care provided;

(o) Failure to develop, maintain, and retain in accordance with relevant rules and standards adequate clinical or other records that document the medical appropriateness, nature, and extent of the health care provided;

(p) Failure to develop, maintain, and retain in accordance with relevant rules and standards adequate financial records that document charges incurred by a client and payments received from any source;

(q) Failure to follow generally accepted accounting principles or accounting standards or cost principles required by federal or state laws, rule, or regulation;

(r) Submission of claims or written orders contrary to generally accepted standards of medical practice;

(s) Submission of claims for services that exceed that requested or agreed to by the client or the responsible relative or guardian or requested by another medical practitioner;

(t) Breach of the terms of the medical services agreement;

(u) Failure to correct deficiencies in operations after receiving written notice of the deficiencies from the Center;

(v) Submission of any claim for payment for which payment has already been made by the Center; or

(w) Provision of or billing for services provided by ineligible or unsupervised staff.

(2) A provider who has been suspended or terminated from participation in a federal or state medical program, such as Medicare or Medicaid, or whose license to practice has been suspended or revoked by a state licensing board, shall not submit claims for payment, either personally or through claims submitted by any billing provider or other provider, for any services or supplies provided under ScreenWise BCC, except those services provided prior to the date of suspension or termination.

(3) When the provisions of section (2) of this section are violated, the Center may suspend or terminate the provider who is responsible for the violation.

(4) Provider sanctions will be imposed at the discretion of the Authority or the administrator of the office whose budget includes payment for the services involved.

333-010-0190
Provider Appeals (Level 1) — Claims Reconsideration

A provider disputing the Center's claim decision may request reconsideration. The provider must submit the request in writing to the Center. The request must include the reason for the dispute, and any information pertinent to the outcome of the dispute. The Center will complete an additional review and respond back to the provider in writing. If the provider is not satisfied with the review, the provider may request a contested case hearing.

WISEWOMAN Program

333-010-0200
Description of the WISEWOMAN Program

The WISEWOMAN (WW) Program is a federal program, administered by the Oregon Health Authority, that provides heart disease, stroke and diabetes screening support to develop and maintain healthy behaviors, and referral services in an effort to prevent cardiovascular disease to eligible women statewide. The WW Program provides these services through a contract network of qualified providers. These rules (OAR 333-010-0200 through 333-010-0290) apply only to providers who have an approved medical services agreement to provide screening and services through this program. The program is limited to a finite source of funds, which may restrict availability of services on an annual basis.

333-010-0205
Definitions

(1) "Agency number" means the administrative number assigned to the service provider by the Center for Prevention and Health Promotion (Center) for identification as a BCCP/WW provider.

(2) "Ancillary provider" means an individual or entity that has met the eligibility requirements for enrollment in the WW Program, has executed a medical services agreement with the Center, has been assigned a BCCP/WW Program agency number, and performs services beyond the scope of an enrolling provider, such as laboratory, imaging, or surgical services.

(3) "Approved medical services agreement" means the completed WW Program agreement, submitted to and approved by the Center for Prevention and Health Promotion.

(4) "Authority" means the Oregon Health Authority.

(5) "BCCP" means the Oregon Breast and Cervical Cancer Program.

(6) "Care coordination" or "case management" means that a client is provided with services, results, follow-up recommendations, and active tracking of progress towards follow-up recommendations.

(7) "Center" means the Center for Prevention and Health Promotion, within the Oregon Health Authority, Public Health Division.

(8) "CLIA" means the federal Clinical Laboratory Improvement Amendments of 1988 (P.L. 100-578, 42 U.S.C. 201 and 263a)

(9) "Client" means a woman 40 to 64 years of age who is enrolled in and receives screening or services from the WW Program.

(10) "Enrolling provider" means an individual or entity that has met the eligibility requirements for enrollment in the WW Program, has executed a medical services agreement with the Center, has been assigned a BCCP/WW Program agency number, and provides screening, services, or care coordination for WW Program clients.

(11) "FPL" means the federal poverty level guidelines established each year by the United States Department of Health and Human Services, used to determine eligibility for the WW Program and other federally funded programs.

(12) "HIPAA" means the Health Insurance Portability and Accountability Act.

(13) "Site number" means the administrative number assigned to the family planning service provider by the Center for identification of the geographic location of each WW provider.

(14) "WISEWOMAN Program" or "WW Program" means the program that provides statewide heart disease, stroke and diabetes screening and services to eligible clients, that is administered by the Center.

(15) "WW Program provider network" means the combination of all contracted WW Program providers, including enrolling and ancillary providers.

333-010-0220
Provider Enrollment

(1) An individual or organization that wishes to be an enrolling provider or an ancillary provider with the WW Program shall apply to the Center on a form prescribed by the Center.

(2) In order to be eligible for enrollment, an individual or organization shall:

(a) Have a valid Oregon business license if such a license is a requirement of the state, federal, county or city government to operate a business or to provide services; and

(b) Meet applicable licensing or regulatory requirements set forth by federal and state statutes, regulations, and rules to be enrolled and to bill as a health care provider.

(3) A laboratory or any other entity that does laboratory tests must provide evidence that it is CLIA certified in order to be a provider or an ancillary provider.

(4) An individual or organization that is currently subject to sanctions by the Authority or the federal government is not eligible for enrollment.

(5) Upon receipt of an application the Center shall verify the information and determine if the individual or organization is eligible to be an enrolling or ancillary provider.

(6) If the Center approves an application, an individual or organization shall:

(a) Sign a medical services agreement that requires the provider to comply with these rules; and

(b) Be issued a BCCP/WW Program agency number.

(7) An enrolling or ancillary provider may not offer services to a client prior to receiving information from a Center WW Program representative about administering the WW Program.

(8) An enrolling provider or ancillary provider shall notify the Center in writing within 30 days of the change if it changes its address, business affiliation, licensure, ownership, certification, billing agents, registered name, or Federal Tax Identification Number (TIN). Changes in business affiliation, ownership, registered name, and TIN may require the submission of a new application. Payments made to an enrolling provider or an ancillary provider who has not furnished such notification may be recovered by the Center.

(9) An enrolling provider or an ancillary provider shall notify the Center in writing of a bankruptcy proceedings within 15 days.

(10) An individual or organization outside the state of Oregon may be eligible for enrollment if the individual or organization:

(a) Is appropriately licensed or certified in its state; and

(b) Is located in a state contiguous to Oregon, and is within 75 miles of the Oregon border.

(11) An enrolling provider or an ancillary provider may terminate enrollment at any time by sending a written termination notice to the Center, via certified mail, return receipt requested. The notice shall specify the agency number to be terminated and the effective date of termination. Termination of a provider enrollment does not terminate any obligations of the provider for services provided to a client prior to the effective date of the termination.

333-010-0225
Standards of Care for WISEWOMAN Program Screening and Services

An enrolling provider shall:

(1) Inform each client, verbally and with supplementary written materials in a language the client understands, without bias or coercion, that the client's decision to participate in the WW Program screening and services is voluntary;

(2) Inform clients of the scope of services available through the program;

(3) Obtain informed consent from each client receiving WW screening and services;

(4) Provide services within the scope by the WW Program without cost to eligible clients;

(5) Offer clients with abnormal or ALERT values additional medical support even though treatment is not covered by the WW Program. The WW Program Manual, October 2014, incorporated by reference, includes a complete list of abnormal and ALERT values and medical support services approved for reimbursement.

(6) Provide information to clients in need of additional medical services beyond the scope of the WW Program provider network with information about available local resources;

(7) Provide all services to eligible clients without regard to marital status, race, parity, disability, or sexual orientation;

(8) Take a health history for all clients, including health risk facts and personal and family medical history as it pertains to heart disease, stroke and diabetes screening;

(9) Provide follow-up recommendations for each client;

(10) Provide care coordination to ensure that appropriate follow-up screening, diagnostic testing and care is provided, including:

(a) An explanation of the results of the screening and laboratory tests; and

(b) The opportunity for questions concerning procedures, methods and results.

(11) Submit enrollment and eligibility information immediately or within five calendar days from the date of enrollment to the Center;

(12) Submit all client data to the WW Program, including required information about client history and screening results;

(13) Provide services to each client in a manner that respects the privacy and dignity of the individual;

(14) Inform clients that services and medical records will be kept confidential and that records cannot be released without written client consent, except as required by law, or otherwise permitted by HIPAA;

(15) Provide all services, support and other assistance in a manner that is responsive to the beliefs, interpersonal styles, attitudes, language, and behaviors of the clients receiving services, and in a manner that has the greatest likelihood of ensuring a client's maximum participation in the program;

(16) Notify clients of the availability of interpretation services in accordance with the Civil Rights Act of 1964, and make interpretation services available to all clients needing or requesting such assistance at no cost to the client;

(a) A provider shall ensure that all persons providing interpretation services adhere to confidentiality guidelines;

(b) A provider must assure the competency of language assistance provided to clients by interpreters and bilingual staff. Family and friends should not be used to provide interpretation services, unless requested by the client;

(17) Make available easily understood client related materials and post signage in the languages of groups commonly encountered in the service area;

(18) Ensure that all print, electronic, and audiovisual materials are appropriate according to the client's language and literacy level, including accommodating a client's request for alternate formats; and

(19) Use only CLIA certified laboratories for all tests, whether done at the clinic site or by an outside clinic.

333-010-0245
Claims and Billing

(1) Only an enrolling or ancillary provider providing WW Program covered services pursuant to a fully executed medical ser-

vices agreement, and who has been assigned an agency number may submit claims for payment to the Center for providing WW Program covered services.

(2) An enrolling or ancillary provider shall, as applicable:

(a) Submit claim information in the manner specified by the WW Program;

(b) Include a primary diagnosis code on all claims;

(c) Code all claims with the most current and appropriate International Classification of Diseases, 10th Revision, Clinical Modification (ICD-10-CM) diagnosis codes and the most appropriate Current Procedural Terminology (CPT) codes as noted in the WW Program Manual;

(d) Submit to the Center all claims for services within 12 months of the date of service;

(e) Submit a billing error edit correction, or refund the amount of the overpayment, on any claim where a provider identifies an overpayment made by the Center;

(f) Make all reasonable efforts to ensure that the WW Program is the payor of last resort with the exception of clinics or offices operated by the Indian Health Service (IHS) or individual American Indian tribes. For the purposes of this rule "reasonable efforts" include:

(A) Determining the existence of insurance coverage or other resource by asking the client; and

(B) Except in the case of the underinsured, billing any known insurer in compliance with that insurer's billing and authorization requirements.

(g) Submit to the Center a billing error edit correction if it receives a third party payment and refund to the Center the amount received from the other source within 30 days of the date the payment is received.

(3) The Center may not pay a claim older than 12 months, except as provided for in section (4) of this rule. An enrolling or ancillary provider that has a claim rejected because of an error must resolve the error within 12 months of the date of service.

(4) If the Center makes an error that makes it impossible for an enrolling or ancillary provider to bill within 12 months of the date of service, the enrolling or ancillary provider shall notify the Center of the alleged error and submit the claim to the Center. The Center shall confirm that it made an error prior to payment being made.

(5) The Center may not pay a claim that includes a primary diagnosis code that is not in the WW Program Manual.

(6) An enrolling or ancillary provider with the WW Program may not seek payment from a client, or from a financially responsible relative or representative of that client for any services covered by the WW Program.

(7) An enrolling or ancillary provider may bill a client for services that are not covered by the WW Program. However, the provider must inform the client in advance of receiving the specific service that it is not covered, the estimated cost of the service, and that the client or client's representative is financially responsible for payment for the specific service. Providers must document in writing that the client was provided this information and the client knowingly and voluntarily agreed to be responsible for payment. The client or client's representative must sign the documentation.

(8) Except for services performed by a CLIA certified laboratory outside of the clinic, all billings by an enrolling provider must be for services provided within the provider's licensure or certification.

(9) A provider who has been suspended or terminated from participation in a federal or state medical program, such as Medicare or Medicaid, or whose license to practice has been suspended or revoked by a state licensing board, may not submit claims for payment, either personally or through claims submitted by any billing provider or other provider, for any services or supplies provided under the WW Program, except those services provided prior to the date of suspension or termination.

333-010-0250
Payment

(1) The Center shall only pay claims submitted by an enrolling or ancillary provider for a client.

(2) The Center shall reimburse an enrolling or ancillary provider an amount up to the Medicare reimbursement rate for the Portland metropolitan area for WW Program approved CPT codes, on a fee-for-service basis.

(3) A federally qualified health center or rural health center shall not be paid at their Prospective Payment System (PPS) rate, but will be paid at the reimbursement rate described in section (2) of this rule.

(4) The Center payments for WW Program provider services, unless in error, constitute payment in full.

(5) The Center may not make payment on claims that have been assigned, sold, or otherwise transferred, or on which a provider of billing services receives a percentage of the amount billed or payment authorized, including claims that have been transferred to a collection agency or individual who advances money to a provider for accounts receivable.

333-010-0255
Denial or Recovery of Reimbursement Resulting from Review or Audit

(1) The Center's staff, contractor or auditor may review a claim for assurance that the specific medical service was provided in accordance with the WW Program's rules or the generally accepted standards of a provider's scope of practice or specialty.

(2) Payment may be denied or subject to recovery if a review or audit determines the service was not provided in accordance with the WW Program's rules or the generally accepted standards of a provider's scope of practice or specialty.

Stat. Auth.: ORS 413.042

333-010-0260
Recovery of Overpayments to Providers Resulting from Review or Audit

(1) If the Center determines that an overpayment has been made to an enrolling or ancillary provider, the Center shall seek to recover the amount of overpayment. The Center may use a statistically valid random sampling, with sufficient sample size allowing a confidence interval of 95 percent to determine if an overpayment has been made.

(2) The amount of the review or audit overpayment to be recovered:

(a) Will be the entire amount determined by the Center;

(b) Is not limited to amounts determined by criminal or civil proceedings; and

(c) Will include interest to be charged at allowable state rates.

(3) The Center shall provide an enrolling provider in writing, by registered or certified mail or in person, notice of an overpayment and a request for repayment of the overpayment, along with documentation to support the amount owed.

(4) An enrolling or ancillary provider shall pay the overpayment amount within 30 calendar days from the date the Center mails the notice of overpayment. A request for a hearing does not change the date the repayment of the overpayment is due.

(5) The Center may extend the 30-day repayment period or accept an offer of repayment terms. Any change in reimbursement period or terms must be documented in writing by the Center.

(6) If the provider disagrees with the Center's determination or the amount of overpayment the provider may:

(a) Appeal the decision by requesting a contested case hearing; or

(b) Request a 100 percent audit of all billings submitted to the Center for heart disease, stroke, and diabetes screenings and services provided during the period in question.

(7) A written request for hearing must be submitted to the Center by the provider within 30 calendar days of the date of the decision affecting the provider. The request must specify the areas of disagreement. Failure to request a hearing or administrative review in a timely manner constitutes acceptance by the provider of the amount of the overpayment.

(8) If a 100 percent audit is requested:

(a) An enrolling or ancillary provider is responsible for arranging and paying for the audit; and

(b) The audit must be conducted by a certified public accountant that is knowledgeable about the Oregon Administrative Rules covering the payments in question, and must be conducted within 120 calendar days of the request to use such an audit in lieu of the Center's random sample.

(9) If the provider refuses to reimburse the overpayment or does not adhere to an agreed upon payment schedule, the Center may:

(a) Recoup future provider payments up to the amount of the overpayment; or

(b) Pursue civil action to recover the overpayment.

(10) The Center may, at any time, change the amount of the overpayment upon receipt of additional information from an enrolling provider. If the Center changes an overpayment amount it will provide written notice to the enrolling provider. Any monies paid to the Center that exceed an overpayment will be refunded to the provider.

(11) The Center may pursue civil action to recover any amounts due and payable to the WW Program.

333-010-0265
Client Data Submission

(1) In addition to submitting the claim information required in OAR 333-010-0225, in order to receive payment an enrolling provider shall submit client data to the Center. The data shall be used by the WW Program to monitor the delivery of services and clinical outcomes of the program.

(2) An enrolling provider shall submit client data to the Center, in a manner specified by the Center, on the Enrollment Form, Assessment Form and the Screening Form, included in the WW Program Manual within 90 days from the date of enrollment. In the event that a client requires additional diagnostic procedures and the information is not available within 90 days from the date of enrollment, the data shall be submitted to the Center immediately once it is received by the provider.

(3) An ancillary provider shall report data to an enrolling provider and is not required to provide data to the Center directly.

(4) An enrolling provider may update or correct client data not related to payment of the claim at any time after the date of service.

(5) If an enrolling provider or the Center terminates the medical services agreement, data are still required to be submitted for each client that was provided services while the agreement was in effect.

333-010-0270
Requirements for Financial, Clinical and Other Records

(1) An enrolling provider shall:

(a) Develop and maintain adequate financial and clinical records and other documentation that supports the services for which payment has been requested;

(b) Ensure that all medical records document the service provided, primary diagnosis code for the services, the date on which the service was provided, and the individual who provided the services;

(c) Ensure that patient account and financial records include documentation of charges, identify other payment resources pursued, indicate the date and amount of all debit or credit billing actions, and support the appropriateness of the amount billed and paid in accurate and sufficient detail to substantiate the data reported;

(d) Ensure that clinical records sufficiently document that the client's services were primarily for heart disease, stroke and diabetes;

(e) Ensure that each time a service is provided to a client, the client's record is signed or initialed by the individual who provided the service or otherwise clearly indicates who provided the service;

(f) Ensure that the information contained in the record reflects that the standard of care for heart disease, stroke and diabetes screening and services were met;

(g) Have policies and procedures to ensure the confidentiality of medical records and that address the circumstances under which information may be released in accordance with federal and state law; and

(h) Retain client enrollment forms, clinical, financial and other records described in this rule for at least four years from the date of last activity.

(2) The Center, the Authority, the Oregon Department of Justice Medicaid Fraud Unit, the Oregon Secretary of State, or their authorized representatives (requestor) may request, in writing, any records related to an enrolling or ancillary provider's participation in the WW Program, including client medical records. An enrolling or ancillary provider shall furnish requested records, without charge, immediately or within the time frame specified in the written request. Copies of the documents may be furnished unless the originals are requested. At the requestor's discretion, representatives of the requestor may review and copy the original documentation in the provider's place of business. Upon the written request of the provider, the requestor may, at its sole discretion, modify or extend the time for provision of such records for good cause shown.

(3) Failure to comply with requests for documents within the specified time frames means that the records subject to the request may be deemed by the Authority not to exist for purposes of verifying appropriateness of payment, medical appropriateness, the quality of care, and the access to care in an audit or overpayment determination, and accordingly subjects the provider to possible denial or recovery of payments made by the Authority, or to sanctions.

333-010-0275
Compliance with Federal and State Statutes

(1) Submission of a claim for medical services or supplies provided to a client shall be deemed a representation by the enrolling or ancillary provider to the Center of the provider's compliance with the applicable sections of the following federal and state statutes:

(a) 45 CFR Part 84 which implements Title V, Section 504 of the Rehabilitation Act of 1973;

(b) Title II and Title III of the Americans with Disabilities Act of 1991;

(c) Title VI of the Civil Rights Act of 1964; and

(d) 42 CFR Part 493 Laboratory Requirements and ORS Chapter 438 (Clinical Laboratories).

(2) Enrolling and ancillary providers are required to comply with HIPAA regarding the confidentiality of client records.

(3) A provider that performs even one laboratory test, including waived tests on "materials derived from the human body for the purpose of providing information for the diagnosis, preven-

tion or treatment of any disease or impairment of, or the assessment of the health of human beings" is considered a laboratory under CLIA and therefore CLIA certification may be required.

333-010-0280
Provider Sanctions

(1) The Center may sanction an enrolling provider if the provider:

(a) Is convicted of a felony or misdemeanor related to a crime or violation of Title XVIII, XIX, or XX of the Social Security Act or related state laws (or entered a plea of nolo contendere);

(b) Is convicted of fraud related to any federal, state, or locally financed health care program;

(c) Is convicted of interference with the investigation of health care fraud;

(d) Is convicted of unlawfully manufacturing, distributing, prescribing, or dispensing a controlled substance;

(e) Fails to comply with the state and federal statutory requirements set forth in OAR 333-010-0275;

(f) By actions of any state licensing authority for reasons relating to the provider's professional competence, professional conduct, or financial integrity:

(A) Has a health care license suspended or revoked, or has otherwise lost such license; or

(B) Surrenders a health care license during a pending formal disciplinary proceeding;

(g) Is suspended or excluded from participation in a federal or state health care program for reasons related to professional competence, professional performance, or other reason;

(h) Engages in improper billing practices, including:

(A) Billing for excessive charges or visits;

(B) Submitting a false claim for payment;

(C) Altering a claim in such a way as to result in a payment for a service that has already been paid; or

(D) Making a claim upon which payment has been made by another source unless the amount paid is clearly entered on the claim form;

(i) Fails to furnish services as required by law or contract with the Center, if the failure has adversely affected (or has a substantial likelihood of adversely affecting) the client;

(j) Fails to supply requested information on subcontractors and suppliers of goods or services;

(k) Fails to supply requested payment information;

(l) Fails to grant access to facilities or provide records upon request of the Center or a designated requestor;

(m) Receives payments for services provided to persons who were not eligible;

(n) Establishes multiple claims using procedure codes that overstate or misrepresent the level, amount or type of health care provided;

(o) Fails to develop, maintain, and retain, in accordance with relevant rules and standards adequate clinical or other records that document the medical appropriateness, nature, and extent of the health care provided;

(p) Fails to develop, maintain, and retain, in accordance with relevant rules and standards, adequate financial records that document charges incurred by a client and payments received from any source;

(q) Fails to follow generally accepted accounting principles or accounting standards or cost principles required by federal or state laws, rules, or regulation;

(r) Submits claims for services provided that were contrary to generally accepted standards of medical practice;

(s) Submits claims for services that exceed that requested or agreed to by the client or the responsible relative or guardian or requested by another medical practitioner;

(t) Breaches the terms of the medical services agreement;

(u) Fails to correct deficiencies in operations after receiving written notice of the deficiencies from the Center;

(v) Fails to submit a billing error edit correction within 30 days of receipt of the third party payment or to refund the appropriate amount within this time frame;

(w) Provides or bills for services provided by ineligible or unsupervised staff;

(x) Submits claims for payment, either personally or through claims submitted by any billing provider or other provider, for any services or supplies provided under the WW Program for services provided after being suspended or terminated from participation in a federal or state medical program, such as Medicare or Medicaid, or after his or her license to practice has been suspended or revoked by a state licensing board;

(y) Fails to notify the Center of a change of TIN within 30 days; or

(z) Fails to respond to a request for records under OAR 333-010-0270.

(2) Sanctions may include:

(a) Termination from participation in the WW Program;

(b) Suspension from participation in the WW Program for a specified length of time, or until specified conditions for reinstatement are met and approved by the Center;

(c) Withholding payments to an enrolling or ancillary provider;

(d) A requirement to attend provider education sessions at the expense of the sanctioned enrolling or ancillary provider;

(e) A requirement that payment for certain services are made only after the Center has reviewed documentation supporting the services;

(f) The recovery of investigative and legal costs;

(g) Reduction of any amount otherwise due the enrolling or ancillary provider; and the reduction may be up to three times the amount a provider sought to collect from a client;

(h) Any other sanction reasonably designed to remedy or compel future compliances with federal, state or Center regulations.

(3) An enrolling or ancillary provider who has been the subject of repeat sanctions regarding improper billing practices may be liable to the Center for up to triple the amount of the established overpayment received as a result of such violation.

(4) When an enrolling or ancillary provider fails to meet one or more of the requirements identified in this rule the Center, at its sole discretion, may immediately suspend the provider's BCCP/WW Program assigned billing number to prevent public harm or inappropriate expenditure of public funds.

(a) An enrolling or ancillary provider subject to immediate suspension is entitled to a contested case hearing as outlined in OAR 333-010-0290 to determine whether the provider's BCCP/WW Program assigned number will be revoked.

(b) The notice requirements described in section (5) of this rule does not preclude immediate suspension at the Center's sole discretion to prevent public harm or inappropriate expenditure of public funds. Suspension may be invoked immediately while the notice and contested case hearing rights are exercised.

(5) If the Center decides to sanction an enrolling or ancillary provider, the Center shall notify the provider by certified mail or personal delivery service of the intent to sanction. The notice of immediate or proposed sanction will identify:

(a) The factual basis used to determine the alleged deficiencies;

(b) Explanation of actions expected of the provider;

(c) Explanation of subsequent actions the Center intends to take;

(d) The provider's right to dispute the Center's allegations, and submit evidence to support the provider's position; and

(e) The provider's right to appeal the Center's proposed actions pursuant to OAR 333-010-0285 through 333-010-0290.

(6) If the Center makes a final decision to sanction an enrolling or ancillary provider, the Center shall notify the provider in writing at least 15 days before the effective date of action, except

in the case of immediate suspension to avoid public harm or inappropriate expenditure of funds.

(7) An enrolling or ancillary provider must appeal an immediate or proposed sanction separately from any appeal of audit findings and overpayments.

333-010-0285
Provider Appeals (Level 1) — Claims Reconsideration

An enrolling or ancillary provider disputing a claim or sanction decision by the Center may request reconsideration. The provider must submit the request for reconsideration in writing to the Center. The request must include the reason for the dispute, and any information pertinent to the outcome of the dispute. The Center will complete an additional review and respond back to the provider in writing. If the provider is not satisfied with the review, the provider may request a contested case hearing.

Tobacco Prevention and Education Program

333-010-0300
Definitions

(1) "Centers for Disease Control and Prevention" means the federal agency of the Department of Health and Human Services responsible for promoting health and quality of life through the prevention and control of disease, injury and disability.

(2) "Conference of Local Health Officials" means All local health officers and public health administrators, appointed pursuant to ORS 431.418 and such other local health personnel as may be included by the rules of the conference.

(3) "Contractor" means an independent contractor or corporation that performs a service(s) for an Agency, when an Agency has no right to and does not control the means and manner of performing the contract, except as to the delivery schedule, determining compliance with the Statement of Work, and accepting or rejecting the deliverables or results required under the contract.

(4) "Director" means the Assistant Director of the Oregon Public Health Division or his/her designee.

(5) "Environmental Tobacco Smoke" means the mixture of smoke from the burning end of a cigarette, pipe, or cigar, and the smoke exhaled from the lungs of smokers. It is also referred to as "second-hand smoke."

(6) "Governor's Tobacco Reduction Advisory Committee" has the meaning given that term in Executive Order 97-10.

(7) "Local Coalition" means an organization of individuals representing diverse groups, factions, or constituencies from a community who agree to work together to achieve the common goal of reducing tobacco use and its impact on the health and economic well-being of the community.

(8) "Local Health Department" means the county or district public health agency or the provider of public health services authorized by the county or district.

(9) "Local Lead Agency" means a local health department, local governmental, or not-for-profit health-related organization designated by a local health department within a county, that submits a proposal to the Oregon Public Health Division for a grant under the "Local Coalition and Community-Based Programs" section of these rules.

(10) "Proposal" means a written response submitted in application to the Oregon Public Health Division's Tobacco Prevention and Education Program Request for Proposals.

(11) "Request for Proposals (RFP)" means a written document issued by the Public Health Division calling for proposals for ser-

vices or activities to be performed by a grantee or contractor under the terms of these rules.

(12) "School district" means a taxing disctrict within the state that provides public elementary and secondary education K-12, or an education service district (ESD), or a state operated school, or any legally constituted combination of such entities.

(13) "Superintendent" means the State Superintendent of Public Instruction of the Department of Education or his or her designee.

(14) "Tobacco-Free Coalition of Oregon" (TOFCO) means the broad-based alliance of people and organizations that created the Oregon Statewide Tobacco Prevention Plan, and whose goal is to reduce tobacco use and decrease the human and economic costs of tobacco use among Oregonians.

Purpose and Intent

The purpose of this rule is to implement Chapter 2 of Oregon Laws of 1997, approved by the people as Ballot Measure 44, at the November 5, 1996 General Election, which:

(1) Authorizes 5.77% of the money received by the Department of Revenue under the Tobacco Products Tax Act to be credited to the Tobacco Use Reduction Account; and

(2) Requires the Public Health Division to adopt rules for awarding grants to programs for educating the public on the risk of tobacco use, including but not limited to, educating children on the health hazards and consequences of tobacco use, and promoting enrollment in smoking cessation programs.

Stat. Auth.: ORS 431.834

333-010-0320
Framework for Grant Awards

(1) These rules describe provisions for awarding grants and contracts for local, regional, and statewide activities in four program areas. The program areas are:

(a) Local Coalitions and Community-Based Programs;

(b) School-Based Prevention Programs;

(c) Statewide Public Awareness and Education Programs; and

(d) Statewide and Regional Special Programs.

(2) Proposals shall support the following goals of Oregon's Statewide Tobacco Prevention Plan:

(a) Decrease tobacco use by youth;

(b) Treat tobacco dependence;

(c) Protect children from exposure to tobacco; and

(d) Protect workers and the public from second-hand smoke.

(3) Proposals must contain a statement disclosing any and all direct and indirect organizational or business relationships between the applicant or its subcontractors, including its owners, parent company or subsidiaries, and companies involved in any way in the production, processing, distribution, promotion, sale or use of tobacco.

Stat. Auth.: ORS 431.834

333-010-0330
Local Coalitions and Community-Based Programs

The goal of the Oregon Public Health Division under this section is to fulfill the purpose and intent of Chapter 2 of Oregon Laws of 1997, approved by the people as Ballot Measure 44, at the November 5, 1996 General Election, by having a tobacco prevention and education program serving every county.

(1) Eligibility for Grant Awards:

(a) The Oregon Public Health Division shall accept for funding a maximum of one proposal per county or consortium of counties;

(b) For the purposes of this program the local health department shall be considered the Local Lead Agency in each county for submitting a proposal, except as provided under (c) or (d) below;

(c) Any local health department that elects not to submit a proposal under this section may form a consortium with one or more health department(s) and jointly submit one proposal;

(d) Any local health department electing not to submit a proposal by itself or in consortium with another county(s) shall designate an appropriate local governmental or not-for-profit health-related organization and shall send a letter to the Director identifying such organizations as the Local Lead Agency for that county;

(e) Any Local Lead Agency designated under subsection (d) above shall be eligible to submit a proposal for that county directly to the Oregon Public Health Division;

(f) A local health department may revoke the designated Local Lead Agency under subsection (d) upon mutual agreement of both the local health department and the Local Lead Agency. The health department and the Local Lead Agency shall jointly notify the Director of the agreement. If the local health department and the Local Lead Agency do not reach an agreement on the revocation of the designation under subsection (d) above the Director may determine whether the revocation is in the best interest of the public health.

(2) Development of the Request for Proposals (RFP) Document. The RFP document for local coalitions and community-based programs shall be developed by the Director in consultation with representatives from appropriate groups, including but not limited to the Governor's Tobacco Reduction Advisory Committee, the Tobacco-Free Coalition of Oregon, the Conference of Local Health Officials, the Oregon Department of Education, the Oregon Office on Alcohol and Drug Abuse Programs, and the Centers for Disease Control and Prevention.

(3) Grant Application Process. Proposals shall be submitted in a format and within a time frame prescribed by the Director, and shall include, but are not limited to:

(a) A list of local coalition members and a description of their roles;

(b) Specific local program goals, objectives, activities and evaluation plans; and

(c) A detailed budget for use of grant funds.

(4) Review of Proposals:

(a) Proposals shall be evaluated by a review committee appointed by the Director. The Director has the authority to include on the review committee persons not employed by the Oregon Public Health Division, including experts in the field of tobacco use reduction;

(b) The Director may reject any application not in compliance with the RFP's instructions;

(c) Proposals shall be evaluated according to the criteria described in the RFP;

(d) The Director may request additional information from an applicant prior to and during the review of a proposal.

(5) Awarding of Funds:

(a) Funds shall be awarded based on the quality of proposals in addressing the RFP requirements;

(b) The Director may negotiate modifications of the applicant's proposal on the basis of availability of funds, and merit of application. In these cases funds shall be awarded only after such modifications have been agreed upon by both the Director and the Local Lead Agency;

(c) The Director shall determine final funding levels.

Stat. Auth.: ORS 431.834
Stats. Implemented: ORS 431.831 - 431.836
Hist.: HD 11-1997, f. & cert. ef. 9-12-97

333-010-0350
Statewide Public Awareness and Education Programs

The goal of the Oregon Public Health Division under this section is to fulfill the purpose and intent of Chapter 2 of Oregon Laws of 1997, approved by the people as Ballot Measure 44, at the

November 5, 1996 General Election, by developing a statewide tobacco public awareness and education program.

(1) Eligibility for Grant Awards. Under this section the Director may award one or more contracts to providers of public relations, public awareness, public education or communications services.

(2) Development of the Request for Proposals (RFP) Document. The RFP for Statewide Public Awareness and Education Programs shall be developed by the Director in consultation with representatives from appropriate groups, which may include, but are not be limited to, the Governor's Tobacco Reduction Advisory Committee, the Tobacco-Free Coalition of Oregon, the Oregon Department of Education, the Office of Alcohol and Drug Abuse Programs, and the Centers for Disease Control and Prevention.

(3) Grant Application Process:

(a) The Director may award one or more contracts using the RFP process provided for in OAR, chapter 125;

(b) Proposals responding to the RFP must contain, but shall not be limited to:

(A) A plan to develop and utilize educational messages about the dangers of tobacco use, the harm of second-hand smoke and the benefits of cessation;

(B) Detailed budget for proposed use of funds;

(C) Plans for evaluating effectiveness of contract services.

(c) The RFP shall include but is not limited to the following elements:

(A) Minimum standards and qualifications required from the contractor(s) to be eligible to provide the service;

(B) The evaluation process and criteria to be used to select the contractor(s), including weights or points applicable to each criterion;

(C) The manner in which the proposers cost and pricing proposal will be evaluated;

(D) A requirement to provide a list of similar services completed, with references addressing past performance;

(E) The closing date and time and place of delivery for the proposal;

(F) Reservation about the right to seek clarification of each proposal, and the right to negotiate a final contract within the scope of the work described in the RFP;

(G) Reservation of the right to reject any or all proposals, if rejection would be in the public interest;

(H) Reservation of the right to cancel the solicitation, if such cancellation would be in the public interest;

(I) A sample of the standard contract provisions;

(J) The possibility of pre-proposal meetings and post-proposal interviews and presentations; and

(K) Any other information appropriate to, evaluate, rank, and select the best proposal(s).

(4) Review of Proposals:

(a) Proposals shall be evaluated by a review committee appointed by the Director. The Director may include on the review committee persons not employed by the Oregon Public Health Division, including experts in the field of tobacco use reduction;

(b) The Director may reject any application not in compliance with the RFP's instructions;

(c) Evaluation criteria may include, but not be limited to, the following:

(A) Availability and capability to perform the work;

(B) Staff experience on comparable projects and services;

(C) Demonstrated ability to complete similar projects and services on time and within budget;

(D) References from clients, public and private;

(E) Performance history in meeting deadlines, submitting accurate estimates, producing quality work, and meeting financial obligations;

(F) Status and quality of any required licensing or certification;

(G) Knowledge and understanding of the required services as shown through the proposed approach to staffing and scheduling needs;

(H) Fees or costs;

(I) Results from oral interviews, if conducted;

(J) Availability of any required specific resources or equipment;

(K) Geographic proximity to the project or the area where the services will be performed;

(L) Identity of proposed subcontractors and their qualifications; and

(M) Any other criteria deemed relevant to the provision of services.

(5) Awarding of Funds:

(a) Ranking of proposals shall be based on all information obtained by the reviewers during the evaluation process. Budget shall be considered, but shall not necessarily govern selection of the contractor(s);

(b) Contracts entered into under the formal selection procedure may be amended, provided the original contract allows for the particular amendment and the services to be provided under the amendment are included within, or directly related to, the scope of the project or the scope of the services described in the RFP;

(c) The Director may negotiate modifications of the applicant's proposal and award funds only after such modifications have been agreed upon by the Director and the applicant;

(d) The Director shall determine the final contract awards and funding levels.

333-010-0360
Statewide and Regional Projects Programs

The goal of the Oregon Public Health Division under this section is to fulfill the purpose and intent of Chapter 2 of Oregon Laws of 1997, approved by the people as Ballot Measure 44, at the November 5, 1996 General Election, by developing various programs serving special populations through innovative projects for tobacco prevention and education.

(1) Eligibility for Grant Awards:

(a) The Director may award grants under this section to public and/or private agencies using the process specified in OAR, chapter 125;

(b) Agencies eligible to apply for grants under this section shall be those capable of developing and implementing special statewide or regional projects, including but not limited to those:

(A) Serving multi-cultural populations, including, but not limited to, Indian Tribes;

(B) Developing and implementing a toll-free telephone service, which includes counseling, referral to cessation resources, and follow-up;

(C) Developing and implementing regional and statewide training, and technical assistance on the best practices for effective tobacco prevention programs; and

(D) Developing other innovative, demonstration, and research projects to decrease tobacco initiation by youth, promote cessation for youth and adults, and promote smoke-free communities.

(2) Development of the Request for Proposals (RFP) Document. The RFP for Statewide and Regional Special Projects shall be developed by the Director in consultation with representatives from appropriate groups, which may include, but are not limited to, the Governor's Tobacco Reduction Advisory Committee, the Tobacco-Free Coalition of Oregon, the Oregon Department of Education, the Office of Alcohol and Drug Abuse Programs, and the Centers for Disease Control and Prevention.

(3) Grant Application Process:

(a) The Director may award one or more grants using a RFP process provided for in OAR, chapter 125;

(b) Under this section, proposals shall be requested for programs that serve special populations, and for regional or statewide innovative and unique tobacco prevention and education projects;

(c) Grants may be awarded for, but are not limited to, the following: a toll-free telephone service, training and technical assistance, special projects to decrease tobacco initiation by youth, to

promote cessation for youth and adults, and to promote smoke-free communities;

(d) The RFP shall address but not be limited to the following elements:

(A) Minimum standards and qualifications required from the proposer(s) to be eligible to provide the service;

(B) Statement of work, tied to measurable objectives;

(C) Detailed budget;

(D) Plan for evaluating effectiveness and impact of proposed activities;

(E) The evaluation process and criteria to be used to select the contractor(s), including weights or points applicable to each criterion;

(F) The manner in which the proposers cost and pricing proposal will be evaluated;

(G) A requirement to provide a list of similar services completed, with references addressing past performance;

(H) The closing date and time and place of delivery for the proposal;

(I) Reservation about the right to seek clarification of each proposal, and the right to negotiate a final contract within the scope of the work described in the RFP;

(J) Reservation of the right to reject any or all proposals, if rejection would be in the public interest;

(K) Reservation of the right to cancel the solicitation, if such cancellation would be in the public interest;

(L) A sample of the standard contract provisions;

(M) The possibility of pre-proposal meetings and post-proposal interviews and presentations; and

(N) Any other information appropriate to evaluate, rank, and select the best proposal(s).

(4) Review of Proposals:

(a) Proposals shall be evaluated by a review committee appointed by the Director. The Director has the authority to include on the review committee persons not employed by the Oregon Public Health Division, including experts in the field of tobacco use reduction;

(b) Evaluation criteria may include, but not be limited to, the following:

(A) Availability and capability to perform the work;

(B) Staff experience on comparable projects and services;

(C) Demonstrated ability to complete similar projects and services on time and within budget;

(D) References from clients, public and private;

(E) Performance history in meeting deadlines, submitting accurate estimates, producing quality work, and meeting financial obligations;

(F) Status and quality of any required licensing or certification;

(G) Knowledge and understanding of the required services as shown through the proposed approach to staffing and scheduling needs;

(H) Fees or costs;

(I) Results from oral interviews, if conducted;

(J) Availability of any required specific resources or equipment;

(K) Geographic proximity to the project or the area where the services will be performed;

(L) Identity of proposed subcontractors and their qualifications; and

(M) Any other criteria deemed relevant to the provision of services.

(5) Awarding of Funds:

(a) The final ranking of proposals will be based on all information obtained by the reviewers during the evaluation process. Price will be considered, but will not necessarily govern selection of the contractor(s);

(b) Contracts entered into under the formal selection procedure may be amended, provided the original contract allows for the particular amendment and the services to be provided under the amendment are included within, or directly related to, the scope of the project or the scope of the services described in the RFP;

(c) The Director may negotiate a modification of the applicant's proposal, and award funds only after such modification has been agreed upon by the Director and the applicant;

(d) The Director shall determine final grant awards and funding levels.

Stat. Auth.: ORS 431.834
Stats. Implemented: ORS 431.831 - 431.836
Hist.: HD 11-1997, f. & cert. ef. 9-12-97

333-010-0370
Reporting

(1) During each biennium the Director shall prepare a report regarding the awarding of grants from the Tobacco Use Reduction Account and the formation of public-private partnerships in connection with the receipt of funds from the account. The report shall include an evaluation of the effectiveness of the program funded by the Tobacco Use Reduction Account.

(2) The Public Health Division shall present the report to the Governor and to those committees of the Legislative Assembly to which matters of public health are assigned.

Dental Pilot Projects

333-010-0400
Description of Dental Pilot Projects

The Dental Pilot Projects are intended to evaluate the quality of care, access, cost, workforce, and efficacy by teaching new skills to existing categories of dental personnel; developing new categories of dental personnel; accelerating the training of existing categories of dental personnel; or teaching new oral health care roles to previously untrained persons. The oral health status of Oregonians is poor and the most vulnerable are those with the least access to services. OAR 333-010-0400 through 333-010-0470 provides administrative guidance to the required content of Dental Pilot Project applications, process for review, approval and monitoring of Dental Pilot Projects, and steps to terminate or conclude a Dental Pilot Project.

Stat. Auth.: 2011 OL Ch. 716
Stats. Implemented: 2011 OL Ch. 716
Hist.: PH 5-2013, f. & cert. ef. 2-4-13

333-010-0405
Definitions

For purposes of OAR 333-010-0400 through 333-010-0470, the following definitions apply:

(1) "Authority" means the Oregon Health Authority.

(2) "Clinical phase" means instructor supervised experience with a patient during which a trainee applies knowledge presented by an instructor.

(3) "Didactic phase" means an organized body of knowledge presented by an instructor.

(4) "Director" means the Public Health Director within Oregon Health Authority, or his or her designee.

(5) "Employment/Utilization Phase" means ongoing application of didactic and clinical knowledge and skills in an employment setting under the supervision of a supervisor.

(6) "Employment/Utilization Site" means a health facility, any clinical setting where health care services are provided, and the facilities or programs described in ORS 680.205(1).

(7) "Instructor" means a person qualified to practice or teach the knowledge or skills a trainee is to learn.

(a) "Clinical instructor" is a person who is certified or licensed in the field for which clinical instruction is occurring.

(b) "Non-clinical instructor" is a person with specific training or expertise as demonstrated through a degree or years of experience relevant to the content of instruction.

(8) "Program" means the Dental Pilot Projects program administered by the Authority.

(9) "Program staff" means the staff of the Authority with responsibility for the program.

(10) "Project" means a Dental Pilot Project approved by the director or delegate.

(11) "Project director" means the individual designated by the sponsor to have responsibilities for the conduct of the project staff, instructors, supervisors, and trainees.

(12) "Reviewer" means an individual designated by program staff to review and comment on all or portions of a project application.

(13) "Sponsor" means an entity putting forth an application for a dental pilot project.

(14) "Training program" means an organized educational program that includes at least a didactic phase, clinical phase, and usually an employment/utilization phase.

Stat. Auth.: 2011 OL Ch. 716
Stats. Implemented: 2011 OL Ch. 716
Hist.: PH 5-2013, f. & cert. ef. 2-4-13

333-010-0410
Minimum Standards

A dental pilot project shall:

(1) Provide for patient safety as follows:

(a) Provide treatment which does not expose a patient to risk of harm when equivalent or better treatment with less risk to the patient is available;

(b) Seek consultation whenever the welfare of a patient would be safeguarded or advanced by having recourse to those who have special skills, knowledge and experience;

(c) Provide or arrange for emergency treatment for a patient currently receiving treatment;

(d) Comply with ORS 453.605 to 453.755 or rules adopted pursuant thereto relating to the use of x-ray machines;

(e) Not attempt to perform procedures which the trainee is not capable of performing due to physical or mental disability; and

(f) Comply with the infection control procedures in OAR 818-012-0040.

(2) Provide appropriately qualified instructors to prepare trainees;

(3) Assure that trainees have achieved a minimal level of competence before they enter the employment/utilization phase;

(4) Inform trainees in writing that there is no assurance of a future change in law or regulations to legalize their role;

(5) Demonstrate that the project has sufficient staff to monitor trainee performance and to monitor trainee supervision during the employment/utilization phase;

(6) Demonstrate the feasibility of achieving the project objectives;

(7) Comply with the requirements of the Dental Pilot Projects statute, Oregon Laws 2011, chapter 716 and rules adopted thereunder;

(8) Evaluate quality of care, access, cost, workforce, and efficacy;

(9) Achieve at least one of the following:

(a) Teach new skills to existing categories of dental personnel;

(b) Accelerate the training of existing categories of dental personnel;

(c) Teach new oral health care roles to previously untrained personnel; or

(d) Develop new categories of dental personnel.

333-010-0415
Application Procedure

(1) A sponsor may submit an application for a dental pilot project on a form prescribed by the Authority.

(2) The application must demonstrate how the pilot project will comply with the requirements of these rules.

(3) An application must include, but is not limited to the following information:

(a) Sponsors:

(A) A description of the sponsor, including a copy of an organizational chart that identifies how the project relates organizationally to the sponsor;

(B) A copy of a document verifying the sponsor's status as a non-profit educational institution, professional dental organization, or community hospital or clinic;

(C) A description of the functions of the project director, instructors, and other project staff;

(D) The funding sources for the project; and

(E) Documentation of liability insurance relevant to services provided by trainees.

(b) Trainee information:

(A) The criteria that will be used to select trainees; and

(B) The number of proposed trainees.

(c) Instructor/Supervisor information:

(A) The criteria used to select instructors and supervisors;

(B) Instructor-to-trainee ratio;

(C) The background of instructors in training techniques and methodology;

(D) The number of proposed supervisors; and

(E) The criteria used to select an employment/utilization site.

(d) Costs:

(A) The average cost of preparing a trainee, including but not limited to the cost information related to instruction, instructional materials and equipment, space for conducting didactic and clinical phases, and other pertinent costs;

(B) The predicted average cost per patient visit for the care rendered by a trainee; and

(C) A budget narrative that lists costs associated with key project areas, including but not limited to:

(i) Personnel and fringe benefits for project director, instructors, and staff associated with the project;

(ii) Contractors and consultants to the project;

(iii) Materials and supplies used in the clinical, didactic, and employment/utilization phases of the project;

(iv) Equipment and other capital costs associated with the project; and

(v) Travel required for implementing and monitoring the project.

Stat. Auth.: 2011 OL Ch. 716
Stats. Implemented: 2011 OL Ch. 716
Hist.: PH 5-2013, f. & cert. ef. 2-4-13

333-010-0420
Trainees

(1) A dental pilot project must have a plan to inform trainees of their responsibilities and limitations under Oregon Laws 2011, chapter 716 and these rules.

(2) A project must provide notice to program staff within 14 days of a trainee entering the employment/utilization phase. The notice shall include, but is not limited to the following:

(a) Name, work address and telephone number of the trainee; and

(b) Name, work address, telephone number and license number of the supervisor.

Stat. Auth.: 2011 OL Ch. 716
Stats. Implemented: 2011 OL Ch. 716
Hist.: PH 5-2013, f. & cert. ef. 2-4-13

333-010-0425
Instructor and Supervisor Information

A dental pilot project must have:

(1) Instructors:

(a) A number and distribution of instructors sufficient to meet project objectives; and

(b) Instructors with current knowledge and skill in topics they will teach.

(2) A plan to orient supervisors to their roles and responsibilities.

Stat. Auth.: 2011 OL Ch. 716
Stats. Implemented: 2011 OL Ch. 716
Hist.: PH 5-2013, f. & cert. ef. 2-4-13

333-010-0430
Curriculum

A sponsor of a dental pilot project must have a curriculum plan that includes but is not limited to a description of:

(1) The level of competence the trainee shall have before entering the employment/utilization phase of the project;

(2) The instructional content required to meet the level of competence;

(3) The skills trainees are to learn;

(4) The methodology utilized in the didactic and clinical phases;

(5) The evaluation process used to determine when trainees have achieved the level of competence; and

(6) The hours and months of the time required to complete the didactic and clinical phases.

Stat. Auth.: 2011 OL Ch. 716
Stats. Implemented: 2011 OL Ch. 716
Hist.: PH 5-2013, f. & cert. ef. 2-4-13

333-010-0435
Evaluation and Monitoring

(1) Evaluation Plan. A sponsor of a dental pilot project must have an evaluation plan that includes, but is not limited to the following:

(a) A description of the baseline data and information collected about the availability or provision of oral health care delivery, or both, prior to utilization of the trainee;

(b) A description of baseline data and information to be collected about trainee performance, acceptance among patient and community, and cost effectiveness;

(c) A description of methodology to be used in collecting and analyzing the data about trainee performance, acceptance, and cost effectiveness; and

(d) A provision for reviewing and modifying objectives and methodology at least annually.

(2) Monitoring Plan. A sponsor of a dental pilot project must have a monitoring plan that ensures at least quarterly monitoring and describes how the sponsor will monitor and ensure:

(a) Patient safety;

(b) Trainee competency;

(c) Supervisor fulfillment of role and responsibilities; and

(d) Employment/utilization site compliance.

(3) Data. A sponsor's evaluation and monitoring plans must describe:

(a) How data will be collected;

(b) How data will be monitored for completeness; and

(c) How data will be protected and secured.

(4) A sponsor must permit project staff or their designees to visit each employment/utilization site at least monthly during the first six month period and at least quarterly thereafter.

(5) A sponsor must provide a report of information requested by the program in a format and timeframe requested.

(6) A sponsor must report adverse events to the program the day they occur.

Stat. Auth.: 2011 OL Ch. 716
Stats. Implemented: 2011 OL Ch. 716
Hist.: PH 5-2013, f. & cert. ef. 2-4-13

333-010-0440
Informed Consent

(1) A sponsor must ensure that informed consent for treatment is obtained from each patient or a person legally authorized to consent to treatment on behalf of the patient.

(2) A sponsor must submit an informed consent form and any accompanying information to program staff for review. Informed consent must include but is not limited to the following:

(a) An explanation of the role and status of the trainee, including the ready availability of the trainee's supervisor for consultation;

(b) Assurance that the patient can refuse care from a trainee without penalty for such a request; and

(c) Identification that consenting to treatment by a trainee does not constitute assumption of risk by the patient.

(3) Informed consent shall be provided in a language in which the patient is fluent.

(4) Dental pilot project staff or trainees must document informed consent in the patient record prior to providing care to the patient.

(5) Informed consent needs to be obtained specifically for those tasks, services, or functions to be provided by a pilot project trainee.

Stat. Auth.: 2011 OL Ch. 716
Stats. Implemented: 2011 OL Ch. 716
Hist.: PH 5-2013, f. & cert. ef. 2-4-13

333-010-0445
Application Review Process

(1) The program staff shall review an application to determine if it is complete within 45 calendar days from the date the application was received.

(a) If an applicant does not provide all the information required and the application is considered incomplete, the program shall notify the applicant of the information that is missing, and shall allow the applicant 15 days to submit the missing information.

(b) If an applicant does not submit the missing information within the timeframe specified in the notice the application shall be rejected as incomplete. An applicant whose application is rejected as incomplete may reapply at any time.

(2) An application deemed complete will continue through a review process.

(3) The program may have individuals outside the program review applications but no individual who has contributed to or helped prepare an application will be permitted to do a review.

(4) Program staff may request additional information from an applicant during the review process.

(5) Once project staff have completed an application review a Notice of Intent to approve or deny an application will be provided to the applicant and the Notice and application will be posted for public comment for a period of 10 business days. The Notice will be sent to interested parties.

Stat. Auth.: 2011 OL Ch. 716
Stats. Implemented: 2011 OL Ch. 716
Hist.: PH 5-2013, f. & cert. ef. 2-4-13

333-010-0450
Project Approval

(1) Once the public comment period described in OAR 333-010-0445(5) has closed the director or his or her designee shall grant or deny approval of a pilot project applicant within 30 calendar days of receiving the application from the program.

(2) If the director grants approval, he or she will specify the length of time the project can operate.

(3) The director's decision shall be transmitted in writing to the applicant.

(4) A sponsor whose project has been denied may not submit a new application within six months from the date the director denied the application.

(5) The program staff shall notify the Oregon Board of Dentistry when a project is approved.

(6) The director or his or her designee may extend the length of time a project can operate at his or her discretion.

Stat. Auth.: 2011 OL Ch. 716
Stats. Implemented: 2011 OL Ch. 716
Hist.: PH 5-2013, f. & cert. ef. 2-4-13

333-010-0455
Program Responsibilities

(1) Project evaluation. Program staff shall evaluate approved projects and the evaluation shall include but is not limited to:

(a) Periodically requesting written information from the project, at least annually to ascertain the progress of the project in meeting its stated objectives and in complying with program statutes and regulations; and

(b) Periodic, but at least annual, site visits to project offices, locations, or both, where trainees are being prepared or utilized.

(2) Site visits.

(a) Site visits shall include, but are not limited to:

(A) Determination that adequate patient safeguards are being utilized;

(B) Validation that the project is complying with the approved or amended application; and

(C) Interviews with project participants and recipients of care.

(b) An interdisciplinary team composed of representatives of the dental boards, professional organizations, and other state regulatory bodies may be invited to participate in the site visit.

(c) Written notification of the date, purpose, and principal members of the site visit team shall be sent to the project director at least 14 calendar days prior to the date of the site visit.

(d) Plans to interview trainees, supervisors, and patients or to review patient records shall be made in advance through the project director.

(e) An unannounced site visit may be conducted by program staff if program staff have concerns about patient or trainee safety.

(f) A report of findings and an indication of pass or fail for site visits shall be prepared by program staff and provided to the project director in written format within 60 calendar days following a site visit.

Stat. Auth.: 2011 OL Ch. 716
Stats. Implemented: 2011 OL Ch. 716
Hist.: PH 5-2013, f. & cert. ef. 2-4-13

333-010-0460
Modifications

(1) Any modifications or additions to an approved project shall be submitted in writing to program staff. Modifications include, but are not limited to the following:

(a) Changes in the scope or nature of the project. Changes in the scope or nature of the project require program staff approval;

(b) Changes in selection criteria for trainees, supervisors, or employment/utilization sites; and

(c) Changes in project staff or instructors.

(2) Changes in project staff or instructors do not require prior approval by program staff, but shall be reported to the program staff within two weeks after the change occurs along with the curriculum vitae for the new project staff and instructors.

(3) All other modifications require program staff approval prior to implementation.

Stat. Auth.: 2011 OL Ch. 716
Stats. Implemented: 2011 OL Ch. 716
Hist.: PH 5-2013, f. & cert. ef. 2-4-13

333-010-0465
Completion of Project

(1) An approved project must notify the Authority in writing if it intends to discontinue its status as a Dental Pilot Project, at least 60 calendar days prior to discontinuation. Notification must include a closing report that includes but is not limited to:

(a) The reasons for discontinuation as a pilot project;

(b) A summary of pilot project activities including the number of persons who entered the employment/utilization phase; and

(c) A description of the plan to inform trainees of the project's discontinuation, and that they are precluded from performing the skills authorized under the pilot project after discontinuation unless the role has been legalized.

(2) The project must obtain written acknowledgement from trainees regarding notification of the project's discontinuation and preclusion from performing skills authorized under the pilot project after discontinuation unless the role has been legalized and the trainee has met necessary licensure requirements.

(3) The project must inform the Oregon Board of Dentistry that the project is completed and provide a list of trainee names associated with the project at least 14 calendar days prior to discontinuation.

Stat. Auth.: 2011 OL Ch. 716
Stats. Implemented: 2011 OL Ch. 716
Hist.: PH 5-2013, f. & cert. ef. 2-4-13

333-010-0470
Suspension or Termination of Project

(1) A pilot project may be suspended or terminated during the term of approval for violation of 2011 Oregon Laws, chapter 716 or any of these rules.

(2) If the Authority determines that a dental pilot project is in violation of 2011 Oregon Laws, chapter 716 or these rules, the Authority may issue a Notice of Proposed Suspension or Notice of Proposed Termination in accordance with ORS 183.411 through 183.470. A sponsor who receives a Notice may request an informal meeting with the director and program staff. A request for an informal meeting does not toll the time period for requesting a hearing as described in section (3) of this rule.

(3) If the Authority issues a Notice of Proposed Suspension or Notice of Proposed Termination the sponsor is entitled to a contested case hearing as provided under ORS Chapter 183. The sponsor has 30 days to request a hearing.

(4) If the Authority terminates a dental pilot project the order shall specify when, if ever, the sponsor may reapply for approval of a dental pilot project.

Childhood Diabetes Database

333-010-0600
Definitions

(1) "Case" means a reportable case of type 1 or type 2 diabetes in an individual who is 18 years of age or younger, and a resident of Oregon.

(2) "Diabetes Program" means the Oregon Diabetes Prevention and Control Program of Oregon Health Authority, Public Health Division, the program authorized to collect, receive, and maintain a childhood diabetes database under ORS 444.300.

(3) "Date of diagnosis" means the date of initial diagnosis by a practitioner of a case of diabetes being reported to the Diabetes Program.

(4) "Effective Date" means the date after which reporting by schools and physicians shall be required.

(5) "Identifying information" includes, but is not limited to the student's name, address, date of birth, and information that identifies the individual or could be used to identify the individual, and relates to the individual's past, present or future health, and the provision of healthcare to the individual. "Identifying information" also includes "Individually Identifiable Health Information" as that is defined in the 1996 Health Insurance Portability and Accountability Act and "Directory Information" as that is defined in the Federal Family Educational Right to Privacy Act (FERPA) (20 U.S.C. § 1232g; 34 CFR Part 99).

(6) "Practitioner" means any person whose professional license allows him or her to diagnose or treat diabetes patients.

(7) "Reportable childhood diabetes" means a medical condition, occurring in a person aged 18 years or younger, and meeting the criteria for diagnosis of diabetes in a child as outlined by the American Diabetes Association. (Reference: **American Diabetes Association. Standards of Medical Care in Diabetes**. **Diabetes Care 2005**; 28: S4-S36.)

(8) "School" means any public, public charter, or registered private school in Oregon.

[Publications: Publications referenced are available from the agency.]

333-010-0610
General Authority and Purpose

According to ORS 444.300(1), subject to available funding, including gifts, grants or donations, the Diabetes Program shall establish a uniform, statewide database for the collection of information on type 1 and type 2 diabetes occurring in children in Oregon. The purposes of the database shall be to collect and serve as a repository for data about the prevalence and incidence of dia-

betes occurring in the pediatric population of this state and to make the data available for scientific and medical research and for assistance in making decisions about the allocation of public resources.

Stat. Auth.: ORS 444.300

Hist.: PH 6-2007, f. & cert. ef. 4-13-07

333-010-0620
Reporting Requirements for Schools

(1) The Diabetes Program shall conduct an annual survey to collect information about diabetes occurring in students age 18 years or younger. Preferably the survey will be completed and returned to the Diabetes Program within 30 days of the date the survey or electronic survey link is sent out, but in no event, later than June 15 of each year.

(2) Each school surveyed, upon receipt of written consent of the parent, guardian (or of the student if age18 years) shall report to the Diabetes Program for each student enrolled at the school, during the academic year, who has type 1 or type 2 diabetes, the following information:

(a) The name and address of the student;
(b) The sex of the student;
(c) The date of birth of the student;
(d) The type of diabetes diagnosed (if known);
(e) The date of diagnosis; (if known); and
(f) The name of the child's practitioner (if known).

Stat. Auth.: ORS 444.300

333-010-0630
Reporting Requirements for Practitioners

(1) Upon diagnosing or first treating a case of type 1 or type 2 diabetes in an Oregon child, a practitioner shall report the following information to the Diabetes Program:

(a) The name and address of the child;
(b) The sex of the child;
(c) The date of birth of the child;
(d) The type of diabetes diagnosed;
(e) The date of diagnosis or first treatment by the reporting practitioner; and
(f) The measured height and weight of the child.

(2) The practitioner shall report the case to the Diabetes Program within 30 days of diagnosing or first treating the child.

(a) The practitioner shall report the case using the Diabetes Program's Practitioner Childhood Diabetes Report Form. The report may be sent to the Diabetes Program by mail, electronically, or by fax. Copies of the form, and directions for submission may be obtained from the Diabetes Program, 800 NE Oregon Street, Portland, Oregon 97232; or may be downloaded through the Diabetes Program's website.

(b) The Diabetes Program may elect to supplement passive reporting from practitioners with active solicitation of reporting through periodic contacts with certain practitioners.

333-010-0640
Confidentiality and Access to Data

(1) All identifying information regarding individual patients, reporting schools, and practitioners reported pursuant to OAR 333-010-0620 and 333-010-0630 shall be confidential and privileged. Except as required in connection with the administration or enforcement of public health laws or rules, no public health official, employee or agent shall be examined in an administrative or judicial proceeding as to the existence or contents of data collected under the childhood diabetes database.

(2) The information collected and maintained by the diabetes database shall be stored in physically secure locations and in a technologically secure manner, and shall be used solely for the purposes stated in ORS 444.330

Research Studies

(1) Prior to any confidential data from the database being released to a researcher, the researcher must:

(a) Obtain approval from Oregon Health Authority, Public Health Division Institutional Review Board, established in accordance with 45 C.F.R. 46.

(b) Obtain approval from the Diabetes Program.

(2) In reviewing research proposals for approval under section (1)(b) of this rule, the Diabetes Program, with input from its advisory committee, shall consider whether the research will:

(a) Further knowledge of the prevalence and incidence of diabetes occurring in the pediatric population;

(b) Better define causes of and treatment for childhood diabetes; or

(c) Inform decision-making about the allocation of public resources.

(3) The Diabetes Program shall also ensure that the research proposal has been reviewed for scientific excellence by a nationally recognized peer review group.

(4) Prior to confidential information being released to a researcher, the Diabetes Program will contact the family and offer the option to decline contact regarding research opportunities.

ADMINISTRATION

DIVISION 11

VITAL STATISTICS

333-011-0205
County Vital Records Services

(1) A county registrar may only sell certified copies of records with authorization by the state registrar. A county registrar may apply to the state registrar for authorization to sell certified copies of death records or certified copies of birth records and death records. The application shall specify the county need and interests that the sale of certified copies would serve, types of records to be issued, and hours of service available. The state registrar shall review the application and authorize the county registrar to sell certified copies if such action is supported by local needs and resources.

(2) If approved for birth records, the county registrar may issue certified copies of registered birth records from the state vital records system for a period not to exceed six months from the date of birth.

(3) If approved for death records, the county registrar may accept after review paper death records for deaths occurring in the county prior to registration at the state office. The county registrar shall forward death records that have been filed at the county to the state registrar within three business days of the date filed by the county registrar.

(a) County registrars may issue certified copies of a death record from the original record while the original record is in the possession of the county. County registrars may maintain a copy of the completed death record for a period up to 14 calendar days from the date the record is forwarded to the state and within that time period may issue from that copy until the record is registered in the state vital records system.

(b) After the death record is registered in the state vital records system, whether originally a paper record or an electronic record, the county registrar may issue only from the state vital records system for a period not to exceed six months from the date of death.

(4) County registrars shall collect fees in the amounts authorized under OAR 333-011-0340 for services provided at a county vital records office.

333-011-0210
Prenatal Care Information

(1) The physician, institution or other person providing prenatal care shall transfer the prenatal care information including but not limited to pregnancy history, date of first visit, number of visits, pregnancy risk factors, and cigarette use as required in ORS 432.088 to the institution where the delivery is expected to occur not less than 30 calendar days and not more than 45 calendar days prior to the expected delivery date.

(2) If the institution where the delivery is expected to occur has direct access to the prenatal care information, the physician, institution or other person providing prenatal care may authorize direct access to the information.

(3) If the institution where the delivery is expected to occur does not have direct access to the prenatal care information or direct access is not authorized by the physician, institution or other person providing prenatal care, the prenatal care provider shall send by facsimile or otherwise electronically transmit in a secure manner the prenatal care information on a form prescribed by the State Registrar of the Center for Health Statistics.

333-011-0215
Registering Live Births that Occur Outside of a Facility with a Licensed Birth Attendant or Non-licensed Midwife within One Year of the Date of Birth

(1) For purposes of this rule, attendant means:

(a) A physician;

(b) A nurse practitioner as defined in ORS 678.010;

(c) A direct entry midwife licensed under ORS 687.405 to 687.495; or

(d) A person not required by law to be licensed to practice midwifery who is registered with the Center for Health Statistics to submit reports of live birth.

(2) Any individual listed in subsections (1)(a) through (d) of this rule who attends a birth that occurred outside a health care facility must register the birth with the Center for Health Statistics.

(a) Information regarding the birth may be submitted through the state electronic vital records system or through a paper report of live birth. All information required in the report of live birth must be received by the Center for Health Statistics prior to registration.

(b) Reports of live birth submitted within one year from the date of birth shall not be marked "Delayed."

(c) The attendant may submit the report of live birth based on existing medical records.

(A) Personal information, such as the name of the child, can be completed from information provided by the parent at the time of birth.

(B) If the birth cannot be confirmed through other public health sources including but not limited to newborn metabolic screening, first dose immunization records, or early hearing test, the state registrar may require the parents to submit additional documents that support the birth of the child in Oregon or present the child at the county vital records office.

(d) The state registrar may request additional documentation from the attendant or explanation of the delay in submitting the report of live birth for reports submitted more than 10 days after the date of birth.

(e) The state registrar shall review and register reports of live birth submitted within one year from the date of birth using the same process for reviewing and registering reports of births submitted within five days from the date of birth.

(3) An attendant who attends the birth of their own child, grandchild, niece or nephew must submit the application and documentation required under OAR 333-011-0220 if the birth does not occur in a licensed medical facility.

Stat Auth: ORS 432.088

333-011-0220
Registering Live Births that Occur Outside of a Facility and Without a Licensed Attendant within One Year of the Date of Birth

When a birth occurs outside a licensed health care facility, the birth attendant is not an attendant described in OAR 333-011-0215 and a report of live birth has not been submitted to the state registrar, the mother, the father if the father's relationship to the child is legally established, the legal guardian, or a state agency with physical custody shall fill out a form prescribed by the state registrar to report the live birth and provide additional evidence to the state register if the birth occurred within one year of the report being submitted to the Center for Health Statistics.

(1) The individual submitting the report of live birth must also submit evidence to establish the following facts:

(a) The mother was pregnant at the time relevant to the birth. If the birth cannot be confirmed through other public health sources, the parents must submit additional documents that support the birth of the child in Oregon. Evidence of the pregnancy can include but is not limited to:

(A) Prenatal record or a statement from a physician or other health care provider qualified to determine pregnancy who examined the mother during the pregnancy; or

(B) Chart notes from a home visit by a public health nurse or other health care provider that include observation of the pregnancy.

(b) A live birth resulted from the pregnancy. Evidence that the infant was born alive can include but is not limited to:

(A) A statement from a physician, naturopathic doctor, nurse practitioner, or registered nurse who saw or examined the infant within three months of the birth; or

(B) Chart notes of an observation of the infant during a home visit by a public health nurse within three months of the birth; or

(C) Presentation of the child at the state or county vital records office.

(c) The mother was present in Oregon at the time of birth. Evidence of the mother's presence in this state within 30 days of the date of the live birth and inclusive of the date of birth can include but is not limited to:

(A) A rent receipt that includes the mother's name and address; or

(B) A utility, telephone, or other bill that includes the mother's name and address.

(d) Information on the identity of the mother and information on the identity of the father if the father is to be listed on the record of live birth. Evidence of the identity of the mother or the father shall include:

(A) An official identification document from a government agency that includes a photograph of the mother or of the father; and

(B) A certified copy of the mother's or father's birth record; or

(C) Other official documents acceptable to the state registrar.

(2) If a parent's current legal name does not match the name on his or her birth record, evidence of the legal name change

through court order, marriage or other legal process must be provided.

(3) If the father is listed on the record of live birth because the mother and father are married, a certified copy of a marriage record for the mother and the father must be submitted.

(4) After the application is received and evidence has been submitted, the state registrar shall review the documents and application, and verify any documentation at the state registrar's discretion.

(5) The state registrar shall determine if a previously registered record of live birth exists for the registrant. If no previously registered record is identified and the submitted application and evidence appear valid, the record may be registered.

(6) Reports of live birth filed within one year from the date of birth shall not be marked "Delayed."

333-011-0225
Registering Live Births that Occur in a Licensed Medical Facility More Than One Year after the Date of Birth

All reports of live birth for births occurring in licensed medical facilities certified more than one year from the date of live birth are to be submitted by hospital staff through the electronic system and registered on the current form in use.

(1) Births may be matched to newborn screening records for the purpose of confirming the birth occurred.

(2) Reports of live birth submitted more than one year from the date of birth shall be marked "Hospital Delayed" and include a footnote that the record was filed based on the medical facility's record of the live birth.

(3) The facility administrator or designee shall submit the report of live birth based on existing medical or business records related to the birth if all facts of birth appear in the medical or business records. Personal information, such as the name of the child, can be completed from information provided by the parent at the time of birth.

(4) The facility administrator or designee shall include an explanation of the delay in submitting the report of live birth and the facility records on which the report of live birth is based.

(5) The state registrar shall determine if a previously registered record of live birth exists for the registrant and may inspect the medical facility's medical and business records prior to registration. If no previously registered record is identified and the submitted record appears valid, the record may be registered.

333-011-0230
Registering Live Births that Occur Outside a Facility More Than One Year after the Date of Birth

(1) When a live birth that occurred outside a licensed medical facility has not been registered within one year from the date of birth, an application for a delayed registration of live birth may be submitted. The applicant shall complete a delayed report of live birth application form prescribed by the state registrar, pay the delayed filing fee, and shall provide additional documentation described in this rule.

(a) If the proposed registrant is age 18 or older, the proposed registrant must file the application unless the proposed registrant has a legal guardian due to incapacity. If the proposed registrant is age 18 or older and has a legal guardian due to incapacity, the legal guardian may file the application on behalf of the proposed registrant.

(b) If the proposed registrant is less than age 18, the mother, the father if legal relationship is established, the legal guardian, or a state agency with physical custody may file the application.

(c) No delayed report of live birth shall be registered for a deceased person.

(2) A delayed registration of birth application form shall be signed by the person authorized to request a delayed registration of birth as described in subsections (1)(a) and (b) of this rule and sworn to before an official authorized to administer oaths, swearing to the accuracy of the facts stated therein.

(3) In addition to completing the delayed registration of live birth application, the applicant must submit documents to establish the facts of birth including:

(a) The full name of the proposed registrant at the time of birth;

(b) The date of birth;

(c) The place of birth within Oregon;

(d) The mother's full name at birth and current full legal name; and

(e) Proof that a record does not currently exist in Oregon.

(4) If the mother was not married either at the time of conception or birth or within 300 days prior to the birth, the state registrar shall not enter the name of the father on the delayed record of live birth for a minor child except upon receipt of a voluntary acknowledgment of paternity as provided in OAR 333-011-0270 or upon receipt of a court order establishing paternity.

(5) A delayed registration of birth application completed and submitted to the state registrar within 10 years of the birth of the proposed registrant must include three pieces of documentary evidence that support the facts of birth.

(a) One of the three documents must establish the mother's residence address in Oregon within 30 days of the date of the live birth and inclusive of the date of birth. A personal affidavit cannot be used to establish residence.

(b) One document other than a personal affidavit must have the full name at birth of the proposed registrant, the date of birth, and the full legal name or the full name at birth of the mother. This document must be dated either:

(A) Before the first birthday of the proposed registrant; or

(B) At least one year prior to the date of the application.

(c) One of the documents may be a personal affidavit. To be accepted, a personal affidavit must be signed by a person who is at least 18 years of age and is at least 10 years older than the proposed registrant. That person must have personal knowledge of the facts of birth and not be a family member of either parent.

(d) In addition to the facts of birth, information on the identity of the mother and father is required.

(A) Evidence of the identity of the mother shall include:

(i) An official identification document from a government agency that includes a photograph of the mother; and

(ii) A certified copy of the mother's record of birth; or

(iii) Other official documents acceptable to the state registrar.

(B) Evidence of the identity of the father if the father is to be listed on the record of live birth shall include:

(i) An official identification document from a government agency that includes a photograph of the father; and

(ii) A certified copy of the father's record of birth; or

(iii) Other official documents acceptable to the state registrar.

(C) If a parent's current legal name does not match the name on his or her record of birth, evidence of the legal name change through court order, marriage or other legal process must be provided.

(e) If the father is listed on the birth report because the mother and father are married, a certified copy of a marriage record for the mother and the father must be submitted.

(6) If a delayed registration of live birth application is completed and submitted to the state registrar 10 years or later after the date of birth of the proposed registrant, at least three pieces of documentary evidence shall be submitted with the application for delayed record of live birth.

(a) All documents must have been established:

(A) Prior to the proposed registrant's 10th birthday and at least one year prior to the date of application; or

(B) At least 10 years prior to the date of application.

(b) One document must have the full name at birth of the proposed registrant, the date of birth or age, the place of birth within Oregon, and the mother's first and last name prior to marriage.

(c) The remaining two documents must have the name of the proposed registrant, the date of birth or age, and place of birth. One document of the three must include the registrant's first and last name, date of birth and place of birth within Oregon.

(d) The father will be included on the record of live birth if the proposed registrant is age 18 or older and the evidence submitted documents the identity and relationship.

(e) Documents in addition to the three required may include first and last names only and do not need to include the date of birth and place of birth if sufficient information appears in the document to clearly identify the proposed registrant as the subject of the document. These documents may be used to correct the spelling of a name or to add information missing from the three documents required, such as a parent's place of birth.

Documentation in Support of an Application to Register a Delayed Report of Live Birth

(1) The following documents shall be considered by the state registrar to meet the documentation requirements for delayed registration of live birth described in OAR 333-011-0230 if the documents contain sufficient information to identify the proposed registrant as the subject of the document and support the facts of birth as reported by the applicant. Documents may include:

(a) Licensed medical facility records of the proposed registrant;

(b) A certified copy of an accepted application for a Social Security card for the proposed registrant;

(c) The proposed registrant's mother's medical record if the proposed registrant's name, date of birth and place of birth are included in the record;

(d) A certified copy of school records of the proposed registrant;

(e) A certified copy of census records;

(f) Military records of the proposed registrant;

(g) A certified copy of marriage record;

(h) A certified copy of birth record of the proposed registrant's child;

(i) Voter registration records for the proposed registrant; or

(j) Other official documents acceptable to the state registrar.

(2) All documents submitted in support of an application for delayed registration of live birth must be original documents or certified copies of original documents. Certified copies must be authenticated by the official custodian of the record.

Review and Filing of Delayed Registration of Live Birth

(1) The state registrar shall review the application for delayed registration of birth and documents in support of the application for authenticity, relevance and content required by OAR 333-011-0230. If the application cannot be approved as submitted, the applicant will be notified by correspondence or electronic mail of the deficiencies and provided an opportunity to submit additional documentation.

(2) The state registrar shall review the delayed registration of live birth application and the documents submitted, and shall search to confirm there is no existing birth record for the proposed registrant in Oregon. If the state registrar finds no such records and finds that the documents submitted are adequate to establish that the proposed registrant was born in Oregon on the date specified, the state registrar or the state registrar's designated representative shall register the record and include on the record of delayed registration of live birth an abstract of the evidence supporting the delayed report of live birth.

(3) If the application and evidence is accepted, the state registrar shall send the delayed report of live birth, including the abstract of evidence, to the applicant for notarized signature.

(4) When the notarized delayed report of live birth with the applicant's notarized signature is received, the state registrar shall create the delayed record of live birth. The record of live birth shall be marked 'Delayed' and shall include a description of each document submitted to support the facts shown on the delayed birth record. This description shall include:

(a) The title or description of the document;

(b) The name of the affiant, if the document is an affidavit of personal knowledge, or of the custodian, if the document is an original or certified copy of a record or a signed statement from the custodian;

(c) The date of the original filing of the document being abstracted; and

(d) The information regarding the birth facts contained in the document.

(5) The state registrar shall return all original documents other than personal affidavits submitted in support of the application for delayed registration of live birth and received directly from the applicant to the applicant after review. A copy of the personal affidavit shall be provided to the applicant. Copies of documents and application will be maintained for delayed registrations of live birth that are accepted for registration.

Denial of Application for Delayed Registration of Live Birth after Two Years

(1) An application for an out of facility record of live birth or delayed record of live birth which is not completed through the submission of required evidence of all facts to be established as identified in rule within two years of application shall be denied. The applicant shall be notified of the right to appeal the decision of the state registrar under ORS 183.484. The applicant may request denial for the purpose of seeking a court order prior to two years.

(2) Any applicant that has had a previous application denied must file a new application for the proposed registrant including the fee if choosing to submit a new application for delayed registration of birth.

(3) Copies of the application and submitted documentation will be maintained according to the agency's retention schedule and may be used if a subsequent application indicates contradictory information.

Infants of Unknown Parentage

(1) A report for a minor child of unknown parentage found in Oregon shall be registered in the current format for births.

(2) If the minor child is less than one year of age, the hospital where the child is examined shall submit the report of live birth in the state's electronic reporting system.

(3) If the minor child is more than one year of age, the agency who has assumed custody of the child shall submit a request to locate birth record to the state registrar. The request shall include:

(a) A statement that the child is a possible foundling;

(b) All information available on the identity of the child and parents for the purpose of identifying the birth record;

(c) Whether the agency will be able to locate evidence to support a delayed record of birth if a birth record is not identified;

(d) Whether an expedited denial is requested for the purpose of obtaining a court order to register the birth.

(4) If the agency requests expedited denial, the state registrar shall review the information available and determine whether a birth record can be identified. If no birth record can be identified based on the information provided by the agency and the agency cannot provide additional documentation to support a delayed record of birth, the state registrar shall issue a denial of the request.

(5) If the agency later identifies the child's parents, the agency shall notify the state registrar within 10 days of the additional information. If a previously registered record is identified with the child's information, the record registered under this rule shall be voided. If no registered record with the parent information is found, the agency shall amend the court order to register the birth to include the names, dates of birth and places of birth of the parents.

333-011-0265
Amending Birth Records

(1) All amendments. Unless otherwise provided in these rules or in statute, all amendments to vital records shall be supported by:

(a) An affidavit setting forth:

(A) Information to identify the record;

(B) The incorrect data as it is listed on the record; and

(C) The correct data as it should appear.

(b) One or more original items of documentary evidence which support the alleged facts and which were established at least five years prior to the date of application for amendment or within seven years of the date of the event and one year prior to the date of the requested amendment.

(2) The state registrar shall evaluate the evidence submitted in support of any amendment, and when the state registrar finds reason to doubt its validity or adequacy the amendment may be rejected and the applicant advised of the reasons for this action.

(3) Who may apply:

(a) To change the date of birth, time of birth or sex of the registrant, only the facility where the birth occurred or the individual who submitted the report of birth may apply to amend unless the medical record is no longer available at the facility. If the medical record is no longer available, other individuals, including the parents and the registrant, shall submit an application for amendment under section (1) of this rule. If the evidence is not sufficient, the applicant must present a certified copy of a court order ordering such amendment.

(b) To amend a record of live birth for items other than date of birth, time of birth or sex, application may be made by one of the parents, the legal guardian, the registrant if 18 years of age or over, or the individual responsible for filing the report of live birth.

(c) To amend the sex of a registrant on a record of live birth following the completion of sexual reassignment, an individual must submit documentation under OAR 333-011-0275.

(4) Amendment of registrant's first, middle or last names on records of live birth within the first year. Until the registrant reaches the age of one year, first, middle, or last names of the registrant may be amended upon written request of:

(a) Both parents; or

(b) The mother if no father or second parent appears on the record or if the father or second parent is deceased or incapacitated; or

(c) The father or second parent if the mother is deceased or incapacitated; or

(d) The legal guardian or agency having legal custody of the registrant.

(5) Amendment of registrant's first, middle or last names on records of live birth after the first year:

(a) After one year from the date of birth the provisions of section (1) of this rule must be followed to amend a first, middle or last name if the name was misspelled on the birth record.

(b) A legal change of name order must be submitted from a court of competent jurisdiction to change a first, middle or last name that appears on the birth record after one year from date of birth.

(6) Addition of first, middle or last name of a registrant on a record of live birth:

(a) Until the registrant's seventh birthday, first, middle and last names, for a child whose birth was registered without such names, may be added to the record of live birth upon written request of:

(A) Both parents; or

(B) The mother if no father appears on the record or if the father is deceased or incapacitated; or

(C) The father if the mother is deceased or incapacitated; or

(D) The legal guardian or agency having legal custody of the registrant.

(b) After seven years the provisions of section (1) of this rule must be followed to add a first, middle or last name.

(7) Amendment of parents' information on birth records. When a requested amendment to an item, in combination with previous amendments or concurrent requests for amendment, would appear to change the identity of the parent through cumulative changes to name, date of birth, or place of birth, the state registrar shall only make such an amendment upon receipt of a court order from a court of competent jurisdiction.

(8) Original evidence documents submitted to correct errors in the spelling of a parent name, parent date of birth, or parent place of birth must be dated prior to the birth of the child.

(9) Birthing facilities may correct typographical errors on birth records within the first year. After one year, only errors in the child's date of birth, time of birth or sex will be accepted directly from the birthing facility. The birthing facility must have access to the medical record when submitting the correction.

(10) For births occurring outside a birthing facility, medical certifiers may only correct typographical errors within the first year with evidence from the medical record or the birth worksheet.

(11) Amendment of minor errors on birth records. Amendment of obvious errors, transposition of letters in words of common knowledge, or omissions may be made by the state registrar either upon the state registrar's observation or upon request of one of the parents, the legal guardian, or the birthing facility or by the individual responsible for filing the report of live birth. The record shall not be marked "Amended". Corrections to names will not be considered minor errors.

(12) In all cases where the record is amended, there shall be inserted on the record a statement identifying the affidavit or documentary evidence used as proof of the correct facts, the date the amendment was made, and the initials of the person making the change. As required by statute or rule, the record shall be marked "Amended".

Voluntary Acknowledgment of Paternity

(1) Any voluntary acknowledgment paternity form establishes paternity, and the establishment of paternity shall be a rebuttable presumption. Forms must contain all information necessary to comply with existing federal and state laws and regulations for determination and recording of paternity including but not limited to:

(a) The current full names of mother, father and child;

(b) The social security numbers of mother and father if available;

(c) The dates of birth for mother, father and child;

(d) The address(es) of the mother and of the father;

(e) The birthplace of the child;

(f) A brief explanation of the legal significance of signing a voluntary paternity affidavit and a statement that both parents have 60 days to rescind the paternity acknowledgment affidavit;

(g) A statement signed by both parents indicating they understand that signing the paternity acknowledgment is voluntary and that they understand the rights, responsibilities, alternatives to signing, and consequences of signing;

(h) Signature lines for the mother and the father; and

(i) Signature lines for witnesses or notaries.

(2) The witnessed voluntary acknowledgment of paternity form is established for completion in a health care facility where births occur. This form can be used by unwed biological parents if:

(a) The mother was not married at conception, at birth, or within 300 days prior to the birth;

(b) The form is completed:

(A) After the birth; and

(B) While the mother is admitted for this birth; and

(c) The form is witnessed by a member of the hospital staff; and

(d) The form is submitted to the Center for Health Statistics within five days after the birth.

(e) This form will not be accepted and the father's information will not be placed on this record of live birth if any of these conditions are not met.

(3) Completion of a voluntary acknowledgment of paternity form and returning the form to the hospital staff for submission is the responsibility of the biological parents.

(4) The notarized voluntary acknowledgment of paternity form can be used by unwed biological parents if:

(a) The mother was not married at conception, at birth, or within 300 days prior to the birth;

(b) The form is completed after the birth; and

(c) Signatures of each biological parent are notarized.

(d) This form will not be accepted and the father's information will not be placed on this record of live birth if any of these conditions are not met.

(5) The State Registrar of the Center for Health Statistics shall consult the Division of Child Support on the language in the rights and responsibility statement for voluntary acknowledgment of paternity forms to ensure compliance with state and federal law and regulations.

(6) All questions regarding acceptability of a completed form are determined by the State Registrar for the Center for Health Statistics. Appeals of decisions of determination of the state registrar will be made under ORS 183.484.

New Record of Birth Following Adoption, Legitimation, Paternity Determination, and Paternity Acknowledgement or Sexual Reassignment

(1) The state registrar shall amend a record of live birth and establish a replacement record of live birth for a person born in this state upon receipt of the following:

(a) Legitimation. If the mother is unmarried at the time of birth and the biological parents marry after the birth of a child, a new record of live birth shall be prepared by the state registrar for a child born in this state upon receipt of a sworn acknowledgement of paternity signed by the biological parents of said child together with a certified copy of the parents' marriage record. The mother's legal name can be amended to the name taken at marriage on the child's record of live birth if requested.

(b) Determination of paternity. A new record of live birth shall be prepared by the State Registrar for a child born in this state upon receipt of a certified copy of a court determination of paternity. If the mother's marital status was not unmarried at the time of birth or if another man is listed as the father, the court order must disestablish paternity as well as establish the new father. If the surname of the child is not decreed by the court, the request for the new record received with the certified copy of the court determination shall specify the surname requested by both parents to be placed on the record.

(c) Acknowledgement of paternity. A new record of live birth shall be prepared by the state registrar for a child born to an unmarried mother in this state upon acceptance of a notarized voluntary acknowledgement of paternity signed by both parents if no father appears on the record. The child's surname may be changed through the voluntary acknowledgment of paternity.

(d) Adoption. A certified copy of a report of adoption as provided in ORS 432.223 or a certified copy of the decree of adoption, together with the information necessary to identify the original record of live birth and to establish a replacement record of live birth, except that a replacement record of live birth shall not be established if so requested by the court decreeing the adoption.

(e) Sexual reassignment. A certified copy of an order of a court of competent jurisdiction indicating that an individual born in this state has completed sexual reassignment and that the sex on the record of live birth shall be changed.

(2) The mother's marital status is unmarried at the time of birth if she was not married at conception, at birth, or within 300 days prior to the birth.

(3) New record:

(a) The new record of live birth prepared after adoption, legitimation, determination of paternity, or acknowledgment of paternity, or sexual reassignment shall be on the form in use at the time of its preparation and shall include the following items and such other information necessary to complete the certification:

(A) The name of the child;

(B) The date and place of birth as transcribed from the original record;

(C) The full names, dates of birth and places of birth of the adoptive parents or the biological parents whichever is appropriate;

(D) The name of the attendant;

(E) The state file number assigned to the original birth record; and

(F) The original filing date.

(b) The information necessary to locate the existing record and to complete the new record shall be submitted to the state registrar on forms prescribed or approved by the state registrar.

(4) Existing record to be placed in a special file. After preparation of the new record, the existing record and the evidence upon which the new record was based are to be placed in a special file. Such file shall not be subject to inspection except upon order of a court of competent jurisdiction or by the state registrar for purposes of properly administering the vital statistics program. A court order is not required before the release of a Voluntary Acknowledgment of Paternity form to any government agency responsible for the administration of child support enforcement programs created under Title IV-D of the Social Security Act, to a parent who signed the form or to the registrant if age 18 or older.

Extension of Time for Submission of Report of Death or Fetal Death

(1) Upon written request by the funeral service practitioner, person acting as a funeral service practitioner, or Medical Examiner, the state registrar may extend the period to file a report of death, not to exceed 60 days.

(2) Upon written request by the facility administrator or the Medical Examiner, the state registrar may extend the period to file a report of fetal death, not to exceed 60 days.

(3) The request shall include the date of event, name of the decedent if a report of death or name of the mother if a report of fetal death, and an explanation of why the extension of time is required.

(4) The state registrar shall respond to such request within two business days of receipt. The request may be faxed or otherwise transmitted electronically, but must include a signature of the person requesting the extension.

Authorization for Final Disposition

(1) Removal of body. Before removing a dead body or fetus from the place of death, the funeral director or person acting as such shall:

(a) Obtain assurance from the attending physician that death is from natural causes and that the physician will assume responsibility for certifying to the cause of death or fetal death and receive permission to remove the body from the place of death; or

(b) Notify the medical examiner, if the case comes within the medical examiner's jurisdiction and obtain authorization to remove the body.

(2) Authorization for disinterment and reinterment. An authorization for disinterment and reinterment of human remains shall be issued by the state registrar upon receipt of a written application signed by the next of kin and the person who is in charge of the disinterment or upon receipt of an order of a court of competent jurisdiction directing such disinterment:

(a) Upon receipt of such a court order or signed permission of the next of kin, the state registrar may issue one authorization to permit disinterment and reinterment of all human remains in a mass disinterment provided that, insofar as possible, the remains of each body be identified and the place of disinterment and reinterment specified. The authorization shall be permission for disinterment, transportation, and reinterment;

(b) Human remains properly prepared by an embalmer and deposited in a receiving vault shall not be considered a disinterment when removed from the vault for final reinterment within the same cemetery.

Amendments to Death Records

(1) To amend a death record, application may be made by the informant, the next of kin of the decedent, person acting as the funeral service practitioner who signed the report of death, or a funeral service practitioner employed by the licensed funeral establishment that submitted the report of death.

(a) Next of kin is, in order of preference:

(A) Spouse of the decedent;

(B) A son or daughter age 18 or older of the decedent;

(C) The mother or the father of the decedent;

(D) A brother or sister age 18 or older of the decedent;

(E) The guardian of the decedent at the time of death;

(F) The personal representative of the estate of the decedent; or

(G) The person nominated as the personal representative of the decedent in the decedent's will.

(b) Applications to amend the medical certification of cause of death shall be made only by the physician who signed the medical certification or the medical examiner.

(c) A completed and signed affidavit in a format prescribed by the state registrar is required for all amendments.

(2) When the marital/partnership status is shown as married/partnered and a surviving spouse/partner is listed on the death record of the decedent then the marital/partnership status shall be changed to:

(a) Widowed and the spouse/partner removed if a certified copy of a death record for the spouse/partner documenting that the spouse/partner died prior to the death of the decedent is submitted by the informant.

(b) Divorced or never married and the spouse/partner removed if a certification of divorce/dissolution/annulment documenting that the event occurred prior to the death of the decedent is submitted by the informant.

(3) If the marital/partnership status is shown as married/partnered and surviving spouse/partner is listed as unknown or is blank on the death record, then a certified copy of the record of marriage/partnership must be provided to add the name of the surviving spouse/partner.

(4) If the marital/partnership status is shown as married/partnered and the surviving spouse/partner is listed on the death record then an order from a court of competent jurisdiction will be needed to change that spouse/partner to a different person.

(5) When the marital/partnership status is shown as divorced, widowed, or never married and no surviving spouse/partner is listed on the death record of the decedent then the marital/partnership status shall be amended to married/partnered and the surviving spouse/partner added upon receipt of notarized affidavits from both the informant and from the alleged surviving spouse/partner stating that an error was made and stating the correct information, and either:

(a) A certified copy of the marriage/partnership record showing that the person to be listed as the surviving spouse/partner was married to/partnered with the decedent prior to death is submitted by the informant; or

(b) An order from a court of competent jurisdiction issued in a legal action indicating that the person was in a common-law marriage with the decedent at the time of the decedent's death.

(6) Other changes to marital/partnership status and surviving spouse/partner will be made only upon the finding of a court of

competent jurisdiction in an order that determined the marital/partnership status of the decedent and identifies the surviving spouse/partner, if appropriate.

(7) For sections (2) through (5) of this rule, in addition to documentation required, the informant listed on the death record shall be notified of the requested change and given the opportunity to respond prior to the state registrar amending the death record. If the informant disagrees with the change, marital status and surviving spouse can only be changed upon receipt of an order from a court of competent jurisdiction.

(8) Amendment to other items on the death record:

(a) Signatures may not be amended.

(b) Other personal and statistical items on the death record may be amended by the funeral services practitioner based on a correction affidavit.

(c) Other personal and statistical items on the death record shall be amended by the informant or next of kin only if supported by an affidavit and documentary evidence that is acceptable to the state registrar.

(d) An order from a court of competent jurisdiction may be used to amend any item except signatures, the date of registration, or to amend the date of death to a date that is after the date of registration.

(9) Notwithstanding sections (2) through (7) of this rule, any item may be amended except signatures if the amendment is required because of clerical error by the facility, institution or individual responsible for submitting the report. The request for amendment shall be supported by a written statement explaining the error.

Marriage and Oregon Registered Domestic Partnership Records

(1) The state registrar shall register Declaration of Oregon Registered Domestic Partnership forms that have been completed, notarized, and filed with an Oregon county clerk.

(a) The form shall be considered complete when all items not identified as optional or statistical have been completed.

(b) If the item "legal name taken after domestic partnership" is not completed, the form may be accepted for registration. A partner not completing the item will retain the legal name prior to the declaration as their sole legal name.

(2) The state registrar shall register the Application, License, and Record of Marriage forms that have been completed by the officiant and filed with the Oregon county clerk who issued the license.

(a) The form shall be considered complete when all items not identified as statistical have been completed. Affidavit of age may be blank if not required by the county clerk under ORS 109.050.

(b) If the item "legal name taken after marriage" is not completed, the form may be accepted for registration. A party not completing the item will retain the legal name prior to the marriage as their sole legal name.

Record of Dissolution

(1) The state registrar shall register Record of Dissolution of Marriage, Annulment or Domestic Partnership forms that have been completed and certified by an Oregon clerk of the court. The form shall be considered complete when the following minimal information has been completed:

(a) Husband/Partner A legal name, date of birth and birthplace;

(b) Wife/Partner B legal name, date of birth and birthplace;

(c) Date of marriage or filing of registered domestic partnership, place of marriage or registered domestic partnership;

(d) Date marriage or registered domestic partnership was dissolved, date judgment becomes effective, county of decree; and

(e) Signature, either physical or electronic, of court official, title of official and date signed.

(2) The clerk of the court shall complete and submit reports of dissolution of marriage or dissolution of domestic partnership for cases where final judgment has been entered on the 5th working day and the 15th working day of each month.

Disposition of Reports of Induced Termination of Pregnancy

(1) Reports of induced termination of pregnancy are statistical reports only and are not to be incorporated into the official records of the Vital Statistics Section. The state registrar is authorized to dispose of such reports when all statistical processing of the records has been accomplished. However, the state registrar may establish a file of such records so they will be available for future statistical and research projects provided such file is not made a part of the official records and the reports are not made available for the issuance of certified copies. Such file shall be retained for as long as the state registrar deems necessary and it shall then be destroyed. The file may be maintained by photographic, electronic, or other means as determined by the state registrar, in which case the original report from which the photographic, electronic, or other file was made shall be destroyed.

(2) The provisions of this regulation shall also apply to all records of induced termination of pregnancy filed prior to the adoption of this regulation.

Preservation of Vital Records

(1) When an authorized reproduction of a vital record has been properly prepared by the state registrar and when all steps have been taken to provide for the continued preservation of the information, the record from which such authorized reproduction was made may be disposed of by the state registrar. Such record may not be disposed of until:

(a) The quality of the authorized reproduction has been tested to ensure that acceptable certifications can be issued;

(b) A permanent copy of such record has been placed in a secure location removed from the building where the authorized reproduction is housed; and

(c) The original records have been offered to the State Archives.

(2) Such permanent copy described in section (1) shall be maintained in such a manner to ensure that it can replace the authorized reproduction should the authorized reproduction be lost or destroyed.

(3) The state registrar shall offer the original documents from which the authorized reproductions are made to the State Archives. The State Archives shall retain permanently such records and shall adhere to the restrictions in the vital statistics law related to access to such records. If the State Archives declines to place such records in its files the state registrar shall be authorized to destroy the documents. Such destruction shall be in accordance with generally accepted methods for disposition of confidential or sensitive documents.

(4) Microfilm used for preservation shall be manufactured and stored in accordance with the standards established by the State Archives by rule. Redundant copies shall be stored at one or more sites distant from the master copies. Mechanisms for retrieving copies from distant sites shall be documented and periodically tested.

(5) Electronic images of vital record documents shall be indexed for ease of retrieval. Long-term archiving of electronic documents shall follow standards established by the State Archives by rule. The index shall allow for linking of amended or corrected images to the original image. The images shall be stored in a

tamper resistant manner and media. The preservation management program shall include the refreshment of storage media to assure integrity and prevent obsolescence on a periodic basis into new formats as they become accepted.

(6) Vital event information stored as electronic data shall be stored in a manner that is both tamper resistant and tamper evident. All changes to information shall be tracked, including the item changed, the user who made the change, the date of the change, and the justification for the change. Back-ups of electronic data shall be made at regular intervals, and copies shall be stored at one or more sites distant from the master copy. Mechanisms and procedures for retrieving copies from distant sites shall be documented and periodically tested.

(7) The preservation management program shall provide for the periodic refreshment of electronic data, to include hardware, software, and coding standards. The program must include documentation of changes in coding structures, provide for testing of converted files to assure data quality, and address associated costs.

Confidentiality and Disclosure of Information from Vital Records or Vital Reports

To protect the confidentiality and security of vital records and vital reports:

(1) The state registrar shall not permit access to or disclosure of personally identifiable information contained in vital records, or issue a copy of all or part of any such record unless the applicant is authorized to obtain such record for a proper purpose under ORS 432.350, or is authorized to obtain such record under 432.380.

(a) Access to or disclosure of information contained in vital records for sale or release to the public, for direct or indirect marketing of goods or services, for other non-research solicitation of registrants or families of registrants, or for other commercial or speculative purposes shall not be deemed a proper purpose.

(b) The state registrar may impose reasonable conditions as to the use and re-disclosure of information, and may limit access to the minimum necessary to fulfill the purpose for which information is requested.

(2) Requests for personally identifiable information contained in vital records for health research purposes shall be submitted in writing to the state registrar.

(a) Each request shall contain at a minimum:

(A) Name, title, organizational affiliation and contact information (mailing address, telephone number, and electronic mail address) of the requestor and the organizational official authorized to execute agreements;

(B) Title, objectives and description of the proposed research study;

(C) Institutional Review Board approval of study protocol if any contact with study subjects including children or parents listed on live birth records or next-of-kin or informants of decedents is proposed;

(D) Physical and electronic storage and security measures to be taken to assure confidentiality and security of identifying information, and provision for return or destruction of the information at the conclusion of the research study;

(E) Time frame of the research study;

(F) Names of all persons on the research study team who will have access to the personally identifiable information;

(G) Plan for dissemination of the results.

(b) Each request for personally identifiable information from vital records to be used for health research purposes shall be reviewed to determine compliance with at least the following:

(A) Contains all elements required by this rule;

(B) Adequately justifies the need for the requested information;

(C) Compliance with past data use agreements;

(D) The requested information can be provided within the time frame set forth in the request; and

(E) The state registrar has adequate resources with which to comply with the request.

(3) Requests by government agencies for any identifiable information contained in the state's vital records maintained pursuant to ORS Chapter 432, or for verifications thereof, shall specify in writing the official use to which the requested information will be put and why the information is necessary in accordance with ORS 432.350. The request may be granted only if the state registrar agrees that the requested information is necessary for a proper purpose.

(a) Each request shall contain at a minimum:

(A) Name, title, agency, and contact information (mailing address, telephone number, and electronic mail address) of the requestor and the agency official authorized to execute agreements;

(B) Purpose or intended use of the data or vital records being requested;

(C) Physical and electronic storage and security measures to be taken to assure confidentiality and security of identifying information, and provision for return or destruction of the information at the conclusion of the intended use;

(D) Time frame of intended use; and

(E) Names of all persons who will have access to the personally identifiable information being requested.

(b) Each request from a government agency for personally identifiable information from vital records shall be reviewed to determine compliance with at least the following:

(A) Contains all elements required by this rule;

(B) Adequately justifies the need for the requested information;

(C) Compliance with past data use agreements;

(D) The requested information can be provided within the time frame set forth in the request; and

(E) The state registrar has adequate resources with which to comply with the request.

(4) The state registrar shall enter into data use agreements for all approved health research and government agency requests for personally identifiable information from vital records. Each data use agreement shall include but not be limited to:

(a) Specification of exactly what information will be disclosed to the requestor, the purpose for which it is provided, and the manner in which the data will be used;

(b) The charges or fees, if any, to be paid by the requestor to the state registrar for use of the data;

(c) A prohibition of re-release by the requestor of any information that may identify any person or any individual case record, whether identifiable or not, without the prior written approval of the state registrar;

(d) The requestor's acknowledgment and agreement that ownership of all information provided by the state registrar shall remain exclusively that of the state registrar and that the data use agreement constitutes a license to use the data provided only for the purpose and in the manner set forth in the agreement;

(e) The requestor's agreement neither to attempt to link nor to permit others to attempt to link the data set with individually identifiable records from any other data set without the prior written approval of the state registrar;

(f) The requestor's agreement neither to use nor to allow anyone else to use the information to attempt to learn the identity of any person included from the information provided without the prior written approval of the state registrar;

(g) Agreement that if the identity of any person is discovered inadvertently, the recipient:

(A) Will not make use of this knowledge;

(B) Will immediately notify the state registrar; and

(C) Will safeguard or destroy the information which led to the identification of the individual as requested by the state registrar;

(h) Acknowledgment and agreement that the requestor shall be responsible for any breach of security, including but not limited to any notifications to affected persons required by law or by the state registrar, and any fines, penalties or other sanctions that may be imposed pursuant to applicable law.

(i) Agreement to prohibit the use of data provided for any purpose not explicitly identified and approved in the signed data use agreement.

Authentication of Applicant

(1) An authentication quiz shall be used for each application received by telephone, Internet, or through a kiosk. The authentication quiz shall be based on publicly available information and must be information requiring personal knowledge not available from reviewing current information typically found in a wallet.

(a) For applications received by telephone or Internet, successful completion of the authentication quiz shall serve as identification of the applicant and additional documentation shall not be required.

(b) For applications received by telephone or Internet and the authentication quiz is not successfully completed, the applicant shall be instructed to send additional identity documentation to support the application.

(c) For applications received by kiosk and the authentication quiz is not successfully completed, the applicant must show identification documents before receiving a certified copy in person or by mail.

(2) All applicants applying in person must show identification regardless of authentication quiz completion.

(3) Applicants for records for events occurring more than 50 years for death, fetal death, marriage, Oregon registered domestic partnerships or dissolution of marriage or registered domestic partnerships or 100 years for birth, shall be submitted on the same form and in the same manner, including the authentication quiz, as records for current events.

Copies of Vital Records

(1) Full or short form certified copies of vital records may be made by mechanical, electronic, or other reproductive processes, except that the information contained in the "Information for Medical and Health Use Only" section of the record of live birth shall not be included.

(2) When a certified copy is issued, it shall be certified as a true representation of the facts of the event by an authorized agent and shall include the date issued, the name of the state registrar, the state registrar's signature or an authorized facsimile thereof, and the seal of the state and agency authorized under ORS 432.010.

(3) Confidential verification of the facts contained in a vital record may be furnished by the state registrar to any federal, state, county, or municipal government agency or to any other agency representing the interest of the registrant, subject to the limitations as indicated in section (1) of this rule. Such confidential verifications shall be on forms prescribed and furnished by the state registrar or on forms furnished by the requesting agency and acceptable to the state registrar; or, the state registrar may authorize the verification in other ways when it shall prove in the best interests of his or her office.

(4) The state registrar may authorize certification or verification of fact of death to an institution when the institution has demonstrated to the satisfaction of the state registrar that such information is necessary for a determination of or protection of a personal or property right of the institution.

(5) When the state registrar finds evidence that a record was registered through misrepresentation or fraud, he or she shall have authority to withhold the issuance of a certified copy of such record until a court determination of the facts has been made.

(6) The state registrar shall determine the minimum information needed to locate and identify a particular record within the files.

(7) Subject to the penalties of ORS 432.993, no person is authorized to photograph, photostat, duplicate, or issue what purports to be a certified copy, certification, or record of birth, death, or fetal death except authorized employees of the Public Health Division, county registrars, or their deputies, acting in accordance with directives, regulations, or law governing their official duties.

(8) Certified copies of records of death or records of fetal death issued to an employee or agent of a funeral home or a person acting as a funeral service practitioner shall be transferred only to persons eligible to receive certified copies if applying individually.

(9) The county registrar shall forward any completed original birth records received to the state registrar immediately for registration at the state.

(10) Certified copies of death records used to record the transfer of property in Oregon must not include cause of death information if:

(a) The death occurred after 1977;

(b) The death occurred in Oregon; and

(c) The certified copy is issued after January 1, 2014.

333-011-0340
Fees

(1) The fee for any search of the files and vital statistics records is $25.

(a) The $25 search fee includes the issuance of one certified copy if the record is located and matched to the request. If no matching record is found, a statement to this effect will be issued in lieu of a record.

(b) The $25 fee covers the cost of a five year search for death, fetal death, marriage, divorce, domestic partnership and dissolution of domestic partnership records. If more than a five year search is requested, an additional fee of $1 per year shall be charged.

(2) The fee for the first certified copy of a death, fetal death, marriage, divorce, domestic partnership, or dissolution of domestic partnership vital statistics record is $25. Additional certified copies of the same record ordered at the same time is $20 for each certified copy through December 31, 2017. Effective January 1, 2018, additional certified copies of the same record ordered at the same time shall be $25 for each certified copy.

(3) The fee for a certified copy of a birth vital statistics record is:

(a) $25 when a computerized version of the record is issued. Additional certified copies of the same record ordered at the same time shall be $20 for each certified copy through December 31, 2017. Effective January 1, 2018, additional certified copies of the same record ordered at the same time shall be $25 for each certified copy.

(b) $30 for each certified copy when an image of the original record is requested by the applicant.

(4) The fee for a certified copy of a recorded court order registering an unrecorded birth under ORS 432.118 is $25.

(5) The fee for a Commemorative Certificate of Stillbirth is $25.

(6) A fee of $35 shall be paid to the state registrar for the preparation of a new or updated record of live birth for amendment, correction, adding the father's name to the birth record or filing of adoption orders and delayed and court registered birth records. This fee does not include a certified copy of the amended record.

(a) The $35 fee may be waived to correct an error or omission by a reporting source if a birth record is corrected within the first year from the date of the event.

(b) The $35 fee may be waived at any future time to correct an error on a record of live birth by a reporting source for date of birth, time of birth or sex of registrant.

(c) An additional service to expedite an amendment within three business days may be available for an additional fee of $30 if the request is matched to a registered record and all required documentation under ORS 432.223 & 432.245, OAR 333-011-0260

through 0275, or OAR 333-011-0300 has been received and approved. This fee does not include a certified copy of the amended record and is in addition to the amendment fee.

(7) A fee of $35 shall be paid to the state registrar for the preparation of an amended death record, if amendments are filed more than one year after the date of death. However, no fee shall be paid for amendments to the cause of death filed by the physician or medical examiner that signed the report of death. This fee does not include a certified copy of the amended record.

(8) A fee of $5 for each certified copy shall be paid for the replacement of certified copies of a death record when the original documents are returned within a year of issuance with an acceptable correction document and appropriate amendment fee. This fee may be waived when the replacement of certified copies is required solely due to an amendment or correction by the medical certifier on the record or a Medical Examiner.

(9) A fee of $5 for each certified copy shall be paid for the replacement of certified copies of a birth record when the original documents are returned within a year of issuance and an acceptable correction document and appropriate amendment fee has been received. The $5 fee may be waived for the replacement of one certified copy of the record of live birth when an amendment is made.

(10) A fee of $7 shall be paid to expedite the search and filling of an order for a certified copy when the order is placed by telephone or the Internet, billed to a credit card and processed within three working days upon receipt of the order. This fee is in addition to the fee charged by a subcontractor providing computer, prepayment, billing and collection services for orders processed using the subcontractor's services.

(11) A fee of $45 shall be paid for heirloom birth certificates under ORS 432.445.

(12) A fee of $30 shall be paid for a certified copy of a person's original record of live birth prior to adoption under ORS 432.228(1).

(13) A fee of $25 shall be paid when submitting a Contact Preference Form to match with an adopted person's record of live birth.

(14) Persons requesting special services or specific data sets shall be charged actual time and material costs of producing the data.

(15) The fee for copies of vital statistics records issued for research approved by the state registrar under ORS 432.350 is $25 for each record. Records for research purposes are issued as uncertified copies.

(16) A fee of $24 shall be paid for making certified copies of documents from sealed files, special files and affidavits and supplemental reports authorized by statute or rule.

(17) A fee of $4 per page shall be charged for uncertified copies of documents from sealed files, special files and affidavits or supplemental reports authorized by statute or rule.

(18) A fee of $10 shall be paid for each manual verification of a vital event for each government agency or subdivision of a government agency requesting over 5 verifications per month.

(19) A fee not to exceed $4 shall be paid for each electronic verification of a vital event. This fee is in addition to the fee charged by a subcontractor providing computer system, billing and collection services for verifications processed using the subcontractor's services.

(20) Overpayment of a required fee received in the office of the state registrar shall be refunded if in excess of $6 and any overpayment less than $6 shall be refunded upon written request of the applicant within one year.

DIVISION 12

PROCEDURAL RULES

County Performance of the Authority, Responsibilities, and Functions of the Administrator of the Health Division Relating to Traveler's Accommodations, Recreation Parks, Organizational Camps, Swimming Pools, Bath Houses, Food Service Facilities, Mobile Units, and Vending Machines

333-012-0050
General Rules Applicable to All Programs

(1) The purpose of these rules is to establish standards under which local public health authorities shall provide environmental health services to establishments and facilities licensed under ORS Chapters 446, 448 and 624.

(2) Definitions:

(a) "Administrative Costs" means those costs that are over the direct costs of providing delegated program services. These include actual departmental, agency or central government charges such as, but not limited to, accounting, purchasing, human resources, data management, legal council and central mail functions;

(b) "Administrator" means the assistant director for the Public Health Division of the Authority or an authorized representative;

(c) "Authority" means the Oregon Health Authority.

(d) "Complete Inspection" means the evaluation of a licensed establishment or facility conducted at the election of the local public health authority for compliance with all applicable regulations;

(e) "Consultation Services Remittance" means the biennial assessment of the Authority for consultation services and maintenance of the Foodborne Illness Prevention, Public Swimming Pool and Tourist Facility Programs;

(f) "Direct Costs" mean those costs for salaries and benefits of field and support staff and their associated costs including, but not limited to, rent, vehicles and travel, equipment, data management, training, phone, office supplies and the pro-rated portion of direct costs relating to supervision;

(g) "Fiscal Audit" means a comprehensive audit using standard audit procedures of the financial records of the local public health authority related to licenses and fees;

(h) "Local Public Health Authority" means county governments or health districts established under ORS 431.414 that are responsible for management of local public health services;

(i) "Recheck Inspection" means an inspection to determine whether specified corrections have been made or alternative procedures maintained for violations identified in previous inspections. In food service establishments, a recheck inspection also means an inspection to determine whether specific corrections have been maintained for violations creating a significantly increased risk for foodborne illness. Recheck inspections may be conducted either on pre-announced dates or unannounced.

Stat. Auth.: ORS 446.425, 448.100 & 624.510
Stats. Implemented: ORS 446.425, 448.100 & 624.510
Hist.: HD 105, f. & ef. 2-5-76; HD 1-1979, f. & ef. 1-18-79; HD 9-1994, f. & cert. ef. 4-1-94; HD 16-1995, f. 12-28-95, cert. ef. 1-1-96; HD 4-1996, f. & cert. ef. 9-17-96; PH 13-2004, f. & cert. ef. 4-9-04; PH 5-2011(Temp), f. & cert. ef. 7-1-11 thru 12-27-11; PH 11-2011, f. & cert. ef. 10-27-11; PH 12-2012, f. 8-30-12, cert. ef. 9-4-12

333-012-0053
Licensing and Fees

(1) License applications and licenses issued must be on forms provided or approved by the Authority.

(2) The Local Public Health Authority must establish a single license fee per establishment or facility type. There may not be added fees based on local determination of unique features of an establishment or facility.

(3) Licensing categories must be based upon those specified in ORS 446.310, 448.035 and 624.490. The Local Public Health Authority may not create additional licensing categories.

(4)(a) Annual work hours available for a dedicated full time equivalent (FTE) for field staff in the food service program based

on a 40-hour week is 1640 hours, of which 25 percent is allocated for office and administrative duties and consultation, and 75 percent is for field inspection activities;

(b) Standards for complete inspection functions, on average, including travel time, relative to facility size are as follows:

(A) 0–15 seats, 1-1/2 hours;

(B) 16–50 seats, 1-3/4 hours;

(C) 51–150 seats, 2 hours;

(D) Over 150 seats, 2-1/2 hours.

(c) An average recheck inspection rate of 40 percent with an average priority or priority foundation item recheck inspection taking 45 minutes including travel.

(5) The following standards are established to reflect the levels of effort and resources needed to carry out the delegated functions and provisions of ORS Chapter 624:

(a) Workload indicators established in section (4) of this rule must be used to determine staffing levels budgeted for field inspection activities;

(b) Administrative costs must be limited to 15 percent of direct costs;

(c) A ratio of up to 0.35 FTE for clerical support and up to 0.25 FTE for supervision to field staff FTE respectively, must be observed;

(d) Charges for services and supplies may not exceed a ratio of 0.25 of personnel salary for direct program costs;

(e) In lieu of the administrative standards outlined in this rule, the Local Public Health Authority may determine staffing standards and actual costs of providing program services. The Local Public Health Authority must document and report to the Authority actual time spent and expenses incurred and may be subject to a fiscal audit as specified in OAR 333-012-0070(3).

(6) The Local Public Health Authority may:

(a) Adopt a fee schedule for facilities that require more than two recheck inspections per year;

(b) Adopt a fee schedule for seasonal temporary restaurants and intermittent temporary restaurants that require a recheck inspection;

(c) Set a fee for costs associated with conducting an operational review in accordance with guidelines established by the Authority.

(d) Set a fee for costs associated with plan review conducted under guidelines established by the Authority;

(e) Set a reinstatement fee for late license reinstatement;

(f) Recover the cost of the extra inspections required under OAR 333-157-0027, Increased Inspection Schedule, by charging a fee of up to one-half of the annual licensing fee otherwise assessable to the restaurant for each additional inspection; and

(g) Pro-rate fees for partial year operation as follows:

(A) From January 1 through September 30, a full license fee is required;

(B) From October through December 31, one-half the annual fee must be assessed.

(7) A license may be issued only after the Local Public Health Authority has received the fee and determined that the facility meets the requirements of the statutes and rules.

(8) If license fees assessed by the Local Public Health Authority are more than 20 percent above or below the fees established in ORS 624.490, the Local Public Health Authority must document and report to the Authority actual time spent and expenses incurred on program services and may be subject to a fiscal audit as specified in OAR 333-012-0070(3).

(9) All license fees collected by the Local Public Health Authority pursuant to ORS 446.425, 448.100 and 624.510 must be paid into the county treasury and placed in a special revenue fund or the general fund of the county treasury and placed to the credit of the Local Public Health Authority. Such monies must be used only for program services pursuant to ORS 446.425, 448.100 and 624.510. The Local Public Health Authority must assure on an annual basis that all fees collected are used solely for the purposes of administering the programs as described in this section.

(10) If the Local Public Health Authority requests a fiscal audit required in OAR 333-012-0070(3) be conducted by a private auditing agency, the Local Public Health Authority must pay the costs and a copy of audit report must be provided to the Authority.

Stat. Auth.: ORS 446.425, 448.100 & 624.510

333-012-0055
Inspection Standards

(1) All licensed establishments and facilities, except bed and breakfast facilities, travelers' accommodations, hostels and temporary restaurants, must receive a minimum of one complete inspection for every six months of operation or fraction thereof by the Local Public Health Authority. For vending machines, the Local Public Health Authority shall evaluate at least 10 percent of each licensee's machines during each inspection:

(a) Bed and breakfast facilities must be inspected once per year;

(b) Travelers' accommodations and hostels must be inspected on a schedule in accordance with local public health priorities and with consideration of the following criteria:

(A) Complaints received from a guest at a particular facility;

(B) A history of rule violations;

(C) A request for inspection or consultation from a licensee;

(D) Reports of illness or accidents associated with the facility;

(E) Change of owner or operator;

(F) The facility's method of sewage disposal, source of water and availability of local fire protection services;

(G) Length of time since the last inspection of the facility;

(H) A minimum of one inspection every two years is recommended.

(c)(A) Single-event, seasonal and intermittent temporary restaurants must receive a minimum of one inspection during operation for each license issued;

(B) Notwithstanding paragraph (1)(c)(A) of this rule benevolent single-event temporary restaurants may receive an inspection or a consultation in lieu of an inspection, as determined by the Local Public Health Authority.

(2) The Local Public Health Authority may substitute an alternative inspection procedure or intervention once per year in place of an inspection using alternative criteria approved by the Authority.

(3) The Local Public Health Authority must:

(a) Implement an increased inspection schedule for restaurants as described in OAR 333-157-0027. Up to two of the quarterly inspections may be based upon a menu review consultation, an announced inspection, a risk control plan or other method approved by the Authority;

(b) Conduct a pre-operational or construction inspection after plan review and prior to operation of a new, remodeled, converted, renovated or altered establishment or facility. The pre-operational inspection is in addition to the requirement for a complete inspection in section (1) of this rule;

(c) Conduct a complete inspection to assign a public notice of sanitation within 45 days after opening for a restaurant or bed and breakfast facility. This inspection counts toward one of the inspections required in section (1) of this rule;

(d) Completely fill out inspection reports and include at least the following information:

(A) Specific problem and correction statements for all violations, including Oregon Administrative Rule references;

(B) Except in the food service programs, specify time limits for all corrections stated;

(C) Food Service — Document inspections as specified in OAR chapter 333, division 157, Inspection and Licensing Procedures. In addition, the Local Public Health Authority must indicate on the inspection report how a priority and priority foundation item violation has been corrected during complete and recheck inspections; and

(D) Public Swimming Pools — Document pH, free residual chlorine, total chlorine, total alkalinity, total hardness, cyanuric acid (if used), water clarity (recorded as acceptable or unacceptable),

water temperature, pressure and vacuum gauge readings and flow rate as measured by flow meter.

(e) Conduct recheck inspections of establishments and facilities to determine if timely corrective action has been taken on noted priority or priority foundation item violations or public health hazards;

(f) At a minimum, furnish each environmental health specialist with the following equipment or materials to conduct inspections:

(A) Temperature measuring devices, flashlight, inspection forms and computer inspection equipment, identification and business cards, rules, stickers and forms;

(B) Food Service — Sanitizing swabs, test strips for chlorine and quaternary ammonium;

(C) Public Swimming Pools — Current state-approved pool test kit and a 25-foot tape measure or equivalent device with the ability to accurately measure distance and depth; and

(D) Food and waterborne illness investigation materials, specified in guidelines provided by the Authority, and a light meter for staff to share.

(g) Maintain and update the Food Program Policy Manual as well as other information required by the Authority; and

(h) Upon request, provide technical information and consultation to the public and those holding permits and licenses.

Stat. Auth.: ORS 446.425, 448.100 & 624.510
Stats. Implemented: ORS 446.425, 448.100 & 624.510

333-012-0057
Consultation Services Remittance

(1) Food Service — On behalf of the Authority, the Local Public Health Authority must collect fees from food service establishments and remit to the Authority the monies necessary to maintain the Foodborne Illness Prevention Program. The Local Public Health Authority must keep the remainder to cover administration and enforcement costs.

(a) The Authority must consult with representatives of local health officials in determining the amount to be remitted by each Local Public Health Authority to support the state Foodborne Illness Prevention Program;

(b) The consultation must occur no later than April of each legislative year in order to determine the amount required to be remitted to the Authority in the following biennium;

(c) The consultation must consider program expenditures, the program workplan and other activities, and current food service establishment inventories to determine the amount of the remittance;

(d) For the purposes of this rule, food service establishments are considered to be full and limited service restaurants, bed and breakfast facilities, mobile food units, commissaries and warehouses;

(e) The remittance amount must be determined by first projecting statewide food service license revenue for the biennium using state marker fees. Then, the biennial budget of the Foodborne Illness Prevention Program is divided by the revenue projection to yield a percentage factor. Each Local Public Health Authority's revenue projection for food service facilities, using state marker fees, is then multiplied by that factor to yield the remittance amount;

(f) The Foodborne Illness Prevention Program budget must be developed after consultation with groups representing local health officials pursuant to ORS 624.510. The cost to the Local Public Health Authority of the Foodborne Illness Prevention Program shall be represented in the annual Intergovernmental Agreement.

(g) The Local Public Health Authority must provide to the Authority a quarterly remittance based on the total biennial assessment. Fifty percent of the assessment is payable each year unless otherwise negotiated with the Authority. The annual amount remitted by the Local Public Health Authority in the first year of the biennium may not be less than 35 percent of the total biennial amount. Each Local Public Health Authority must provide a statement identifying the proposed timetable and schedule for remittance;

(h) In April of even-numbered years, the Authority must recalculate the assigned assessment for the second year of the biennium, based on updated facility counts and program expenditures and provide the Local Public Health Authority with a revised assessment for the second year of the biennium;

(i) All assessments may not be represented as a surcharge or added charge.

(2) Public Swimming Pools — The Authority must consult with representatives of local health officials and industry in determining the amount to be remitted by each Local Public Health Authority that has accepted delegation for the Public Swimming, Spa and Wading Pool Programs for the purposes of supporting the statewide consultation and program services costs:

(a) The consultation must occur no later than April of each legislative year in order to determine the amount required to be remitted to the Authority in the following biennium;

(b) The consultation must consider program expenditures and current public swimming pool, public spa pool and public wading pool facility inventories while determining the amount of the remittance;

(c) The county shall remit, on a quarterly basis, a portion of the fee for each license issued in that quarter;

(d) All assessments may not be represented as a surcharge or added charge.

(3) Tourist Facilities — Each quarter, the Local Public Health Authority must remit 15 percent of the state licensing fee or 15 percent of the Local Public Health Authority license fee, whichever is less, to the Authority for consultation services and maintenance of the statewide program for facilities licensed under ORS 446.425. All assessments may not be represented as a surcharge or added charge

333-012-0060
Staffing and Training

(1) The Local Public Health Authority must provide the staff, facilities, materials and equipment necessary to comply with these rules.

(2) Inspections must be conducted by staff that are registered as required by ORS Chapter 700.

(3) Each Local Public Health Authority must:

(a) Require at least one environmental health specialist engaged in the food, tourist facility and public swimming pool programs to attend annual Authority sponsored or approved training in all three program areas;

(b) Within one year of hiring, send all environmental health specialists to an orientation provided by the Authority. This requirement does not apply to staff that have previously attended the training while employed in another jurisdiction;

(c) Maintain at least one environmental health specialist on staff or through contract that has a current certification from the Authority as a food service standardization officer.

(A) New employees must be certified within 18 months of employment or within 18 months after becoming registered as an environmental health specialist as required in section (2) of this rule;

(B) Notwithstanding the time limits specified in paragraph (3)(c)(A) of this rule, the Local Public Health Authority may develop a training plan approved by the Authority that allows for a longer time limit to comply with the certification requirement in subsection (c) of this section.

(d) Maintain at least one environmental health specialist on staff or through contract that has successfully completed a NSPF Certified Pool Operator course or equivalent approved by the Authority within 24 months of employment. The Authority may waive this requirement upon request.

333-012-0061
Food Handler Training

The Local Public Health Authority must ensure the provision of a food handler training program using minimum criteria developed by the Authority. The Local Public Health Authority must secure Authority approval before deviating from the criteria of the training program for food handlers, and must document in a manner satisfactory to the Authority the training methods used for food handler training.

Stat. Auth.: ORS 446.425, 448.100 & 624.510

333-012-0063
Record Keeping and Reporting

The Local Public Health Authority must:

(1) Maintain records of all administrative matters delegated under ORS 446.425, 448.100 or 624.510, including a record of the hearing, the time, date, place and copies of the complaint, all intended actions, orders, and final disposition of the proceedings and retained for at least three years.

(2) At a minimum, maintain records according to the Secretary of State, Archives Division rules, OAR chapter 166, of the following:

(a) Inspection reports;

(b) Complaints and their disposition;

(c) Communicable disease or suspected foodborne illness investigations;

(d) Public swimming pool accidents;

(e) License applications and licenses issued;

(f) Food service inspection scores;

(g) Changes in public notice placards;

(h) Food handler training materials;

(i) Plan review records;

(j) Records of all license denials, revocations, suspensions or other temporary closures; and

(k) Failed to Comply notices posted or any other enforcement actions taken.

(3) Provide to the Authority program information such as inspections conducted, workload indicators, fee schedules and violation summaries on request.

(4) Respond to surveys conducted by the Authority. Program information and surveys must be submitted on forms or in a format as required by the Authority.

Epidemiology and Accident Investigation and Reporting

The Local Public Health Authority must:

(1) Investigate all suspected illnesses connected with food service facilities, public swimming pools and tourist facilities;

(2) Submit reports of all investigations of confirmed illnesses to the Authority as required by OAR chapter 333, division 018;

(3) Notify the Authority of investigations expected to result in confirmed foodborne illness; and

(4) Investigate all reportable accidents and report the results of investigations in writing, including copies of accident reports, to the Authority.

Stat. Auth.: ORS 446.425, 448.100 & 624.510
Stats. Implemented: ORS 446.425, 448.100 & 624.510

Enforcement Procedures

The Local Public Health Authority must:

(1) Adopt and comply with rules for conducting administrative hearings for permit and license denial, suspension or revocation in accordance with the requirements of ORS Chapter 183.

(2) Utilize all administrative and legal means necessary to enforce the applicable statutes and rules and implement policies relating to the programs and to eliminate conditions endangering public health or safety.

Stat. Auth.: ORS 446.425, 448.100 & 624.510

333-012-0070
Minimum Standards, Program Review and Penalties

(1)(a) The Local Public Health Authority may request approval from the Authority to implement alternative inspection or enforcement procedures by submitting a plan that includes expected performance measures and outcomes. If approved, the alternative inspection or enforcement procedures must be included in the annual Intergovernmental Agreement.

(b) The Local Public Health Authority may adopt ordinances on applicable matters provided they are not less stringent than the Oregon Administrative Rules adopted pursuant to ORS Chapters 183, 446, 448 and 624. Any ordinance proposed for adoption on matters applicable to food service operators more stringent than those set forth in ORS Chapter 624 and rules adopted thereunder must be approved by the Authority and the cost of implementing any ordinance so adopted may not be charged to license fees adopted pursuant to ORS 624.510(2). Notwithstanding the provisions of this subsection, when an emergency exists and delay may result in an immediate danger to public health, Local Public Health Authorities may adopt ordinances without prior Authority approval. This subsection does not affect ordinances that are required to be adopted as specified in these rules.

(2) The Local Public Health Authority is subject to a performance review by the Authority of both office and field activities to determine compliance with these rules. A review of each Local Public Health Authority shall be conducted at least once every three years by the Authority. The Authority shall submit the results of the review to the Local Public Health Authority. The field review may be conducted using an inspection protocol approved by the Authority. The Authority may waive the requirement for a field review.

(3) The Authority shall conduct a triennial fiscal audit of the Local Public Health Authority and the Authority may conduct additional fiscal audits of the Local Public Health Authority if deemed necessary.

(4) The Local Public Health Authority shall be surveyed by the Authority at least annually to determine accomplishments and needs. The survey results shall guide the Authority in providing assistance, guidance, training, consultation and support as needed.

(5) If a performance review reveals that the Local Public Health Authority is not complying with the provisions of these rules or the Intergovernmental Agreement, the Local Public Health Authority shall be notified by the Authority of the areas of noncompliance. The Local Public Health Authority must correct the deficiencies within the time frames required and report the corrections to the Authority.

(a) If the Authority determines that the deficiencies result in a serious human health hazard, compliance shall be required immediately. If the Authority determines that the deficiencies do not result in a serious human health hazard, a longer period of time may be allowed for compliance. However, the maximum time allowed for compliance, after notice is issued by the Authority, is as follows:

(A) Up to 90 days to correct administrative deficiencies such as, but not limited to, accounting reports and records;

(B) Up to 180 days to correct program deficiencies such as, but not limited to, inadequate frequency of inspections, scoring, staffing and lack of enforcement action.

(b) Notwithstanding subsection (5)(a) of this rule, the Authority may allow a longer time frame for compliance if deemed necessary;

(c) If the Authority determines that the Local Public Health Authority did not use the proper cost elements in determining the fee or that the amount of the fee is not justified, the Authority may order the Local Public Health Authority to adjust any fee, as soon as is possible, to a level supported by the Authority's analysis of the fee.

(6) When a Local Public Health Authority has been notified of an emergency health hazard and is either unwilling or unable to administer or enforce delegated standards, the Authority may, pursuant to ORS 431.170, immediately take responsibility of the functions and collect the monies necessary to protect public health. When the health hazard has been resolved or is no longer an emergency, the Authority may return authority to the Local Public Health Authority and may initiate a review to determine if delegation is to be continued.

(7) The Authority may deny or revoke the delegation of a program if the Local Public Health Authority:

(a) Does not have sufficient qualified personnel to conduct the program;

(b) Has failed to perform its delegated duties satisfactorily;

(c) Has engaged in deceit or fraud in the conduct of the program or maintenance of its associated records.

(8) Suspension or rescission of a delegation must be in accordance with ORS Chapter 183 relating to contested cases.

(9) The Authority shall immediately respond to a request by the Local Public Health Authority for personnel or equipment during an emergency. If the Authority is unable to assist as requested, the Authority shall immediately notify the Local Public Health Authority and provide any possible assistance.

DIVISION 13

CHEMICAL ANALYSIS FOR ALCOHOLIC CONTENT OF BLOOD

Laboratory Methods

333-013-0004
Definitions

The term "Blood" as used in ORS 813.010 and 813.160 means any of the following:

(1) "Plasma" means the liquid portion of blood including the clotting factors, prepared by mechanical separation of the liquid from cellular components after the inhibition of the clotting process.

(2) "Serum" means the liquid portion of blood minus the clotting factors, prepared by separation of the liquid from the clot upon completion of the clotting process.

(3) "Whole Blood" means the fluid that circulates through the heart, arteries and veins; composed of cellular and liquid components.

Stat. Auth.: ORS 813.160

DIVISION 14

CONFERENCE OF LOCAL HEALTH OFFICIALS

Standards for County and District Health Departments

333-014-0040
Purpose

The purpose of these rules is to establish minimum standards and administrative rules to:

(1) Define the organization, operation, and extent of activities required or expected of county and district health departments to carry out their responsibilities in implementing the public health laws of this state, and the rules and regulations of the State Public Health Division.

(2) Assist in the development, improvement, and support of local health departments in their efforts to promote and protect the health of Oregon citizens.

(3) Govern the process if a county or health district makes a decision to relinquish local public health authority and the actions that the Public Health Division must take following a relinquishment of local public health authority.

Stat. Auth.: ORS 431.350
Stats. Implemented: ORS 431.345 & 431.375
Hist.: HB 269, f. 4-19-71, ef. 5-11-71; HD 5-1990, f. & cert. ef. 1-24-90; PH 19-2014(Temp), f. & cert. ef. 6-20-14 thru 12-17-14; PH 31-2014, f. & cert. ef. 12-17-14

333-014-0042
Definitions

As used in OAR chapter 333, division 14:

(1) "Enforcement" means an action taken to compel the requirements of the law.

(2) "Local public health administrator" has the meaning given that term in ORS 431.260.

(3) "Local public health authority" has the meaning given that term in ORS 431.260.

(4) "Public Health Division" means the public health division within the Oregon Health Authority.

(5) "Public health law" has the meaning given that term in ORS 431.260.

Stat. Auth.: ORS 413.042, 431.350

Hist.: Hist.: PH 19-2014(Temp), f. & cert. ef. 6-20-14 thru 12-17-14; PH 31-2014, f. & cert. ef. 12-17-14

333-014-0050
Health Department Services

(1) Each county and district health department shall perform (or cause to be performed) all of the duties and functions imposed upon it by Oregon Revised Statutes, and by official administrative rules adopted by the Public Health Division and filed with the Secretary of State. These duties and functions shall be performed in a manner consistent with Minimum Standards for Local Health Departments, adopted by the Conference of Local Health Officials (CLHO).

(2) The following program areas shall be considered essential, and be specifically included in the overall annual plan of each county and district health department who shall assure programs are available:

(a) Control of reportable communicable disease which includes providing epidemiologic investigations which report, monitor, and control communicable disease and other health hazards; providing diagnostic and consultative communicable disease services; assuring early detection, education, and prevention activities which reduce the morbidity and mortality of reportable communicable disease; assuring the availability of immunizations for human and animal target populations; and collecting and analyzing of communicable disease and other health hazard data for program planning and management to assure the health of the public;

(b) Parent and child health which includes education, screening and follow up, counseling, referral, or health services for family planning, perinatal care, infants, and children;

(c) Health statistics which includes birth and death reporting, recording, and registration; analysis of health indicators related to morbidity and mortality; and analysis of services provided with technical assistance from the Public Health Division;

(d) Information and referral services to the public regarding local health and human services;

(e) Environmental health services which includes inspection, licensure, consultation and complaint investigation of food services, tourist facilities, institutions, public swimming and spa pools, and regulation of water supplies, solid waste and on site sewage disposal systems.

(3) In addition, each county and district health department should include or provide for programs in the following areas (according to the community's health needs):

(a) Dental health, including preventive education, promotion of fluoride use and procedures for early detection and treatment of dental problems;

(b) Emergency preparedness including participation in the development of the county's emergency response plans and internal procedures necessary to carry out the health department's role in the plans;

(c) Health education/health promotion including activities and programs to promote health and assist individuals and groups to achieve and maintain healthy behaviors;

(d) Laboratory services including providing diagnostic and screening tests to support public health services which are in compliance with quality assurance guidelines established by the Public Health Division;

(e) Medical examiner services to coordinate the epidemiological investigation of deaths of public health significance with the county medical examiner;

(f) Nutrition services including identification and intervention with clients at nutritional risk, and education and consultation for the promotion of good dietary habits;

(g) Older adult health including services to reduce morbidity and premature death; detect conditions which impair functioning; strengthen the ability to remain independent; and to promote physical, social and emotional well-being;

(h) Primary health care services including participation in community efforts to promote necessary services and/or provide health services;

(i) Shellfish Sanitation (in coastal counties) to monitor harvesting and provide public information to harvesters of shellfish.

(4) Each county and district health department, given the specific needs of their local communities, may decide to implement additional programs.

Stat. Auth.: ORS 431.350
Stats. Implemented: ORS 431.345, 431.385 & 431.416

333-014-0060
Program Plans

(1) Each county and district health department shall submit an annual plan by May 1 of each year to the Public Health Division.

(2) The Public Health Division shall develop the format of the plan in consultation with the Conference of Local Health officials.

(3) The plan should address all program areas identified in section (2) of this rule and any that are applicable in OAR 333-014-0050(3) including:

(a) Program indicators as defined by CLHO standards and agreed upon by the local health department and the Public Health Division; and/or

(b) A statement describing why services defined in OAR 333-014-0050(2) are not being provided.

(4) The annual plan shall become a key element of the county review done by the Public Health Division.

(5) The Public Health Division shall provide technical assistance on request to local health departments in developing the annual plan.

Stat. Auth.: ORS 431.350
Stats. Implemented: ORS 431.385
Hist.: HB 269, f. 4-19-71, ef. 5-11-71; HD 5-1990, f. & cert. ef. 1-24-90

333-014-0070
Organization

Each county and district health department shall:

(1) Employ a qualified administrator who is responsible for the operation of the health department;

(2) Employ registered nurses licensed by the Board of Nursing, sanitarians registered by the Sanitarians Registration Board, and such other administrative professional, technical, and clerical staff sufficient to carry out the responsibilities of the department;

(3) Employ or contract with a physician licensed by the Oregon Medical Board as health officer;

(4) Use as guidelines for employment the minimum personnel qualifications as defined in the CLHO standards;

(5) Adhere to state or county civil service, merit system, or personnel rule requirements in the selection, promotion, or termination of all health department staff;

(6) Maintain an office open to the public during the normal work week of the local government.

333-014-0080
Relinquishment of Local Public Health Authority

(1) If a county or health district chooses to relinquish its local public health authority under ORS 431.375(2) it must submit a written notice to the Public Health Division that it intends to relinquish its local public health authority, at least 365 days prior to the date of relinquishment. The notice must include an explanation of why the county or health district intends to relinquish public health authority and must include the date of relinquishment. The date of relinquishment must not be less than 365 days from the date of the notice.

(2) Within 30 days of receipt of the notice described in section (1) of this rule the Public Health Division will schedule a public hearing in the affected county or health district to inform the public on the process of relinquishment and solicit input from the community. The Public Health Division shall conduct as many public meetings in the affected county or health district as it deems necessary to obtain public input.

(3) Within 45 days of receipt of the notice described in section (1) of this rule the Public Health Division must attempt to schedule a meeting with the governing body of the county, county board of health or district board of health, as applicable to determine what steps might be taken to reverse or mitigate the county's or health district's proposed action to relinquish public health authority.

(4) A county or health district that has relinquished its public health authority:

(a) Is not eligible for funds under ORS 431.380 or funds that are customarily distributed through an agreement delegating state public health authority to the county or health district; and

(b) May not be delegated any authority under ORS 433.855, 446.425, 448.100, 448.170, and 624.510 because in relinquishing its public health authority it has refused to provide environmental health services under 431.416(2)(d), or is no longer the local public health authority.

(5) On the date of relinquishment the county or health district must return any unexpended funds that were distributed under ORS 431.380, or through any other agreement through which state public health authority was delegated to a county or health district.

(6) A county or health district must continue to comply with any contract or agreement with the Public Health Division that concerns any of the services or activities required by a local public health authority under OAR 333-014-0050(2), including but not limited to the financial assistance agreement for local public health services, until the date of relinquishment. The county or health district must provide notice to the Public Health Division, in accordance with the termination provisions of the contract or agreement, that the contract or agreement is terminated as of the date of relinquishment.

(7) The Public Health Division will reasonably act to take actions necessary to ensure that basic public health services are provided in the affected county or health district in accordance with OAR 333-014-0090. Such actions by the Public Health Division do not:

(a) Relieve the county or health district of its obligations arising during the period of its authority;

(b) Constitute a release or waiver by the Public Health Division with respect to such obligations; or

(c) Relieve the county or health district of obligations it may have under state law notwithstanding the relinquishment of its local public health authority.

(8) A county or health district that relinquishes its local public health authority remains responsible for fulfilling the responsibilities of the county or health district, local public health administrator or local public health department as follows:

(a) Enforce public health laws under ORS 431.150.

(b) Appoint a local public health administrator and health officer under ORS 431.418.

(c) Receive reports of reportable diseases under ORS 433.004.

(d) Investigate reports of reportable diseases, in coordination with the Public Health Division, under ORS 433.006.

(e) Disease control in schools, including but not limited to review of administrative records for required vaccinations and related school exclusions under ORS 433.235 to 433.284 and OAR chapter 333, division 50.

(f) Receive reports of animal bites under ORS 433.345.

(g) Permit mass gatherings under ORS 433.745.

(9) A county or health district that has relinquished its public health authority may, at any time, request that its authority be restored. Such a request must be made to the State Public Health Director in writing and shall include an annual plan, a detailed explanation about how the issues that led to relinquishment have been addressed, and a plan to transition authority from the Public Health Division to the county or health district. The State Public Health Director shall consider the request and respond, in writing, either granting or denying the request within 90 days of the receipt of the request.

(a) If the request is approved, the Public Health Division shall identify the date that authority shall be transferred back to the county or health district.

(b) If the request is denied the State Public Health Director shall explain the basis for rejecting the request and shall include information about how the county or health district can address its deficiencies.

Stat. Auth.: ORS 413.042 & 431.375
Stats. Implemented: ORS 431.375
Hist.: PH 19-2014(Temp), f. & cert. ef. 6-20-14 thru 12-17-14; PH 31-2014, f. & cert. ef. 12-17-14

333-014-0090
Public Health Division as Local Public Health Authority

(1) If the local public health authority has relinquished its public health authority the Public Health Division shall perform the services or activities necessary to provide basic local public health services under ORS 431.380 to the extent funds are available, and may contract with a private person or entity; an agency; or another county or health district to perform all or part of the necessary public health services or activities. The services that are considered basic local public health services are those required to fulfill statutory obligations as follows:

(a) Investigation of reportable diseases, disease outbreaks, or epidemics under ORS 433.004;

(b) Isolation and quarantine under ORS 433.121 to 433.142;

(c) Investigation and control of tuberculosis (TB) under ORS 433.332;

(d) Order the destruction of animals with rabies under ORS 433.350;

(e) Indoor Clean Air Act enforcement under ORS 433.875;

(f) Family planning and birth control services under ORS 435.205;

(g) Initiate and conduct discussions of family planning under ORS 435.205;

(h) Women, Infants and Children (WIC) services under ORS 413.500;

(i) Licensure of tourist accommodations, including hostels, picnic parks, recreation parks and organizational camps under ORS 446.310 to 446.350;

(j) Licensure of pools and spas under ORS 448.005 to 448.100;

(k) Restaurant licensure, including commissaries, mobile units, vending machines and bed and breakfasts under ORS 624.310 to 624.430; and

(l) Regulation of public water systems under ORS 448.115 to 448.285

(2) A county or health district shall be financially responsible for the costs incurred by the Public Health Division or its contractor in taking enforcement actions as a result of a county or health district's relinquishment of local public health authority. Enforcement actions include but are not limited to:

(a) Any action taken by the Public Health Division necessary to fulfill a county, health district, local public health administrator or local public health department obligation described in OAR 333-014-0080(8);

(b) Any action taken by the Public Health Division under ORS 431.170;

(c) Isolation or quarantine under ORS 433.121 to 433.142;

(d) Inspections, investigations, and legally required activities under:

(A) ORS 433.004 and 433.006 (control of communicable disease);

(B) ORS 433.267 (immunization of school children); or

(C) ORS 433.235 to 433.284 (disease control in schools).

(e) Court actions to ensure compliance with state public health laws; and

(f) The defense of any Public Health Division action in court.

(3) Notwithstanding section (2) of this rule, a county or health district shall not be financially responsible for an enforcement action as described in section (2) of this rule if the action was commenced by the Public Health Division under its own authority and not as a result of the relinquishment of local authority.

(e) The defense of any agency action in court.

Stat. Author: ORS 413.042, 431.262 & 431.375
Stats. Implemented: ORS 431.170 & 431.375

333-014-0100
Applicability

(1) OAR 333-014-0080 and 333-014-0090 apply to any county or health district that provides notice of its intent to relinquish its local public health authority or has relinquished its public health authority on or after June 20, 2014.

(2) For purposes of these rules the date of relinquishment is the date the county or health district identifies in its notice as the date it will no longer be the local public health authority.

DIVISION 15

IMPLEMENTATION OF REQUIREMENTS FOR OREGON'S INDOOR CLEAN AIR ACT, NUTRITIONAL INFORMATION AT CHAIN RESTAURANTS AND

STANDARDS FOR REDUCING THE SALE OF TOBACCO AND INHALANT DELIVERY SYSTEMS TO MINORS

Oregon Indoor Clean Air Act

333-015-0025
Authority and Purpose

(1) These rules are adopted pursuant to the authority granted to Oregon Health Authority, Public Health Division, in ORS 433.835 through 433.875 and 433.990(5) concerning smokefree places of employment and public places.

(2) The purpose of the Oregon Indoor Clean Air Act is to reduce the health hazard caused to persons by inhaling smoke from tobacco products.

Stat. Auth.: ORS 433.855
Stats. Implemented: ORS 433.835 -433.875, 433.990(5)

333-015-0030
Definitions

For purposes of OAR chapter 333, division 15, the following definitions shall apply:

(1) "Accessibility ramp" means a ramp intended to provide access for people with disabilities to and from an entrance or exit.

(2) "Act" means the Oregon Indoor Clean Air Act as it appears in ORS 433.835 through 433.875 and 433.990(5).

(3) "Authority" means the Oregon Health Authority.

(4) "Certificate holder" means the individual or entity on record with the Oregon Health Authority as the owner of a certified cigar bar or smoke shop.

(5) "Cigar bar" means a business that:

(a) Has on-site sales of cigars as defined in ORS 323.500;

(b) Has a humidor on the premises;

(c) Allows the smoking of cigars on the premises but prohibits the smoking, aerosolizing or vaporizing of other inhalants on the premises;

(d) Has been issued and operates under a full on-premises sales license issued under ORS 471.175;

(e) Prohibits persons under 21 years of age from entering the premises and posts notice of the prohibition;

(f) Does not offer video lottery games as authorized under ORS 461.217;

(g) Has a maximum seating capacity of 40 persons;

(h) Has a ventilation system that exhausts smoke from the business, and is designed and terminated in accordance with the state building code standards for the occupancy classification in use; and

(i) Requires all employees to read and sign a form approved and published by the Public Health Division that explains the dangers of exposure to secondhand smoke.

(6) "Cigarillos" means a smoking device wrapped in tobacco leaf, rather than paper, that contains less than three grams of tobacco and measures less than 100 mm in length.

(7) "Employer" means any entity or individual who engages an individual to perform work or services in an area where smoking is prohibited under the employer's control.

(8) "Enclosed area" means all space between a floor and a ceiling that is enclosed on two or more sides by permanent or temporary walls or windows, exclusive of doors, passageways or gaps. If no ceiling is present, "enclosed area" means all space that is included by three or more sides by permanent or temporary walls or windows, exclusive of doors, passageways or gaps.

(9) "Entity in charge of a public place" means any person or organization that has responsibility because of ownership, proprietorship, management, or oversight over a place that is open to the public. Entity in charge of a public place is used to refer only to a person or organization in charge that is not also an employer.

(10) "Entrance" means any point of ingress, including an accessibility ramp, to an enclosed area from a non-enclosed area.

(11) "Exit" means any point of egress, including an accessibility ramp, from an enclosed area to a non-enclosed area.

(12) "Extended period of time" means more than 365 consecutive days.

(13) "Gross revenue" means all receipts from the sale of product(s) less the amount of any rebates, refunds, or credits.

(14) "Humidor" means a storage container designed to allow controlled airflow and equipped with a device that maintains the internal humidity in the range of 68 percent to 75 percent and an internal temperature in the range of 68 degrees to 70 degrees Fahrenheit.

(15) "Inhalant" means nicotine, a cannabinoid or any other substance that:

(a) Is in a form that allows the nicotine, cannabinoid or substance to be delivered into a person's respiratory system;

(b) Is inhaled for the purpose of delivering the nicotine, cannabinoid or other substance into a person's respiratory system; and

(c)(A) Is not approved by, or emitted by a device approved by, the United States Food and Drug Administration for a therapeutic purpose; or

(B) If approved by, or emitted by a device approved by, the United States Food and Drug Administration for a therapeutic purpose, is not marketed and sold solely for that purpose.

(16)(a) "Inhalant delivery system" means:

(A) A device that can be used to deliver nicotine or cannabinoids in the form of a vapor or aerosol to a person inhaling from the device; or

(B) A component of a device described in this subsection or a substance in any form sold for the purpose of being vaporized or aerosolized by a device described in this subsection, whether the component or substance is sold separately or is not sold separately.

(b) Inhalant delivery system does not include:

(A) Any product that has been approved by the United States Food and Drug Administration for sale as a tobacco cessation product or for any other therapeutic purpose, if the product is marketed and sold solely for the approved purpose; and

(B) Tobacco products.

(17) "Local Public Health Authority" or "LPHA" means the county government, unless a health district has been formed under ORS 431.414, the county has contracted with a person or agency to act as the public health authority, or the county has relinquished its authority to the state.

(18) "Maximum seating capacity" means the total number of seats available to patrons, including, but not limited to, bar stools, seating at cocktail tables, seats at buddy-bar tables, banquette seating, dining seating, couch space, and floor pillows intended as seating; as well as the total number of patrons a business permits inside the business at the same time.

(19) "Noncommercial tobacco products" means unprocessed tobacco plants or tobacco by-products used for ceremonial or spiritual purposes by American Indians.

(20) "Place of employment" means an enclosed area under the control of a public or private employer, including work areas, employee lounges, vehicles that are operated in the course of an employer's business and that are not operated exclusively by one employee, rest rooms, conference rooms, classrooms, cafeterias, hallways, meeting rooms, elevators and stairways. Place of employment does not include a private residence unless it is used as a child care facility as defined in ORS 657A.250 or a facility providing adult day care as defined in 410.490.

(21) "Private residence" means a residence or part of a residence that is not operated as a place of business where clients or customers use the premises. A residence that is considered a place of employment or public place is subject to ORS 433.835 through 433.875 during its hours of operation. Only that part of a residence used as a place of business is subject to ORS 433.835 through 433.875.

(22) "Public Health Director" means the director of the Public Health Division of the Oregon Health Authority.

(23) "Public Health Division" means the Public Health Division of the Oregon Health Authority.

(24) "Public place" means an enclosed area open to the public.

(25) "Rooms designated by the owner or entity in charge of a hotel or motel as rooms in which smoking is permitted" means sleeping rooms or suites in that hotel or motel.

(26) "Smoking instrument" means any cigar, cigarette, pipe, or other instrument used to smoke tobacco, marijuana or any other inhalant.

(27) "Smoke shop" means a business that is certified with the Oregon Health Authority as a smoke shop under OAR 333-015-0068.

(28) "Stand-alone business" means a business that is not attached to, does not use or occupy the same space as, is not located within, and does not share a common entryway or area with another business, another place of employment, or residential property.

(29) "Tobacco Prevention and Education Program" means the Tobacco Prevention and Education Program in the Public Health Division of the Oregon Health Authority.

(30) "Wall" means any architectural partition, permanent or temporary, with a height and length greater than its thickness, used to divide or enclose an area or to support another structure. Walls include, but are not limited to, partitions constructed of plastic, mesh or other screening materials, slats, louvered blinds, fabric, or blankets, and partitions with latticing or other open frameworks.

(31) "10 feet" means 10 linear feet, measured in a straight line between the points in question.

333-015-0035
General Provision

(1) No person shall smoke, aerosolize or vaporize an inhalant or carry a lighted smoking instrument in a public place except in those areas that are not required to be smoke, aerosol or vapor free under ORS 433.850(2) and OAR 333-015-0035(5) and (6).

(2) Employers shall provide for employees a place of employment that is free of all smoke, aerosols and vapors containing inhalants; and may not allow employees to smoke, aerosolize or vaporize inhalants at the place of employment, except in those areas listed in ORS 433.850(2) and in OAR 333-015-0035(4) through (7). In providing a smoke, aerosol, or vapor free place of employment, an employer is responsible for taking steps to ensure that no person smokes, aerosolizes or vaporizes an inhalant within 10 feet of the following parts of a place of employment:

(a) Entrances;

(b) Exits;

(c) Windows that open;

(d) Ventilation intakes that serve an enclosed area; and

(e) Accessibility ramps.

(3) No person shall smoke, aerosolize or vaporize an inhalant or carry a lighted smoking instrument within 10 feet of the following parts of public places or places of employment:

(a) Entrances;

(b) Exits;

(c) Windows that open;

(d) Ventilation intakes that serve an enclosed area; and

(e) Accessibility ramps.

(4) The owner or entity in charge of a hotel or motel may designate up to 25 percent of the sleeping rooms of the hotel or motel as rooms in which smoking, aerosolizing or vaporizing is permitted.

(a) If the owner or entity in charge of a hotel or motel chooses to designate up to 25 percent of sleeping rooms as smoking, aerosolizing or vaporizing permitted, all smoking, aerosolizing or vaporizing rooms on the same floor must be contiguous. The status of the rooms may not be changed, except to add more non-smoking, non-aerosolizing or non-vaporizing rooms.

(b) The owner or entity in charge of a hotel or motel shall provide written notice to patrons upon check-in as to the smoking, aerosolizing or vaporizing status of the sleeping rooms.

(c) The owner or entity in charge of a hotel or motel shall post signs at each entrance and exit in accordance with OAR 333-015-0040, with the exception of sleeping room entrances and exits. Signs shall notify all patrons that smoking, aerosolizing or vaporizing is limited to certain sleeping rooms.

(d) The owner or entity in charge of a hotel or motel shall provide written information to patrons upon check-in, describing how patrons may notify management of smoking, aerosolizing or vaporizing occurring in non-smoking, non-aerosolizing or non-vaporizing areas or rooms.

(e) Nothing in these rules shall prevent the owner or entity in charge of a hotel or motel from prohibiting smoking, aerosolizing or vaporizing on the entire premises.

(5) Smoking of noncommercial tobacco products for ceremonial purposes is permitted in spaces designated for traditional ceremonies in accordance with the American Indian Religious Freedom Act, 42 U.S.C. 1996.

(6) The following areas are not required to be smokefree:

(a) Smoke shops that are certified by the Authority under OAR 333-015-0068;

(b) Cigar bars if:

(A) The cigar bar generated on-site retail sales of cigars of at least $5,000 for the calendar year ending December 31, 2006; and

(B) The cigar bar has provided the Public Health Division with proper documentation as required by OAR 333-015-0066.

(c) Up to 25 percent of the sleeping rooms of a hotel or motel, as designated by the owner or entity in charge. The hotel or motel must be in compliance with the rules set forth in OAR 333-015-0035(4).

(7) The medical use of marijuana is permitted in the place of employment of a licensee of a professional licensing board as described in ORS 475.328.

(8) Nothing in these rules shall prevent an employer in charge of a place of employment or an entity in charge of a public place from designating the entire place of employment or public place as smoke, aerosol or vapor free.

333-015-0040
Signs

(1) An employer or entity in charge, except in those places described in OAR 333-015-0035(5) and (6), shall post signs prohibiting smoking, aerosolizing or vaporizing of inhalants. Nothing in these rules shall prevent an employer from increasing the amount of property where smoking, aerosolizing or vaporizing of inhalants is prohibited beyond the 10-foot requirement or from designating the entire premises as smoke, aerosol or vapor free. Signs may be used without specifically including the words "within 10 feet" if the signs specify a restriction greater than 10 feet or designate the entire premises as smoke, aerosol or vapor free. Signs shall be posted prominently at each entrance and exit to the place of employment or public place.

(2) In addition to requirements under this rule, an owner or entity in charge of a hotel or motel shall comply with signage requirements as described in OAR 333-015-0035(4).

(3) An owner or entity in charge of tables or outdoor seating or dining areas within 10 feet of entrances, exits, windows that open, ventilation intakes that serve an enclosed area of a public place or place of employment, or any portion of an accessibility

ramp shall clearly mark the tables or outdoor seating or dining areas as non-smoking, non-vaporizing and non-aerosolizing.

(4) In a cigar bar where smoking is allowed under OAR 333-015-0035(6), the employer or entity in charge shall post signs at each entrance and exit clearly stating that:

(a) Smoking is allowed on all or part of the premises;

(b) Smoking, aerosolizing or vaporizing of inhalants that are not cigars is prohibited; and

(c) Anyone under the age of 21 is prohibited from entering the premises.

(5) In a smoke shop where smoking is allowed under OAR 333-015-0035(6), the employer or entity in charge shall post signs at each entrance and exit clearly stating that:

(a) Smoking is allowed on all or part of the premises;

(b) Anyone under the age of 18 is prohibited from entering the premises; and

(c) Cigarette smoking is prohibited on the premises, in smoke shops where cigarette smoking is not allowed under OAR 333-015-0068(7)(e).

(d) Smoking, aerosolizing or vaporizing of inhalants that are not tobacco products is prohibited. (6) All signs used to describe whether smoking is prohibited or allowed in a place of employment or public place shall be placed at a height and location easily seen by a person entering the establishment and shall not be obscured in any way.

333-015-0045
Ashtrays

(1) Ashtrays and any receptacles to be used for smoking, aerosolizing or vaporizing or depositing cigarette or inhalant delivery system debris are prohibited within 10 feet of entrances, exits, windows that open, ventilation intakes that serve an enclosed area of a public place or place of employment, and any portion of an accessibility ramp.

(2) Except for those areas described in OAR 333-015-0035(6), ashtrays and any receptacles to be used for smoking or depositing cigarette or inhalant delivery system debris are prohibited inside public places and places of employment.

333-015-0062
Vehicles

(1) An employer may allow smoking in vehicles only when the vehicle is permanently assigned to a single employee and no other employees, clients, or members of the public are required or compelled to operate or otherwise occupy the vehicle.

(2) Nothing in these rules shall prevent an employer from designating all vehicles as smokefree.

333-015-0064
Outdoor Smoking Areas

(1) The owner or entity in charge of a place of business may establish an outdoor smoking, aerosolizing or vaporizing of inhalants area if that area is:

(a) Not within 10 feet of entrances, exits, windows that open, ventilation intakes that serve an enclosed area of any public place or place of employment, or any portion of an accessibility ramp;

(b) Not, at any time, an enclosed area as defined in OAR 333-015-0030(8); and

(c) In compliance with all other state, city, and county codes.

(2) Nothing in these rules shall prevent an employer from increasing the amount of property where smoking, aerosolizing or vaporizing is prohibited beyond the 10-foot requirement or from designating the entire premises as smokefree.

333-015-0066
Cigar Bars

(1) A business must apply to the Authority for certification before allowing cigar smoking on its premises.

(2) A business must apply for certification on a form prescribed by the Authority and include the following information or documentation:

(a) A copy of the business's full on-premises liquor sales license issued by the Oregon Liquor Control Commission under ORS 471.175;

(b) A site map of the premises that denotes maximum seating capacity and includes a detailed seating chart;

(c) A copy of the business's certificate of occupancy and official documentation from the building authority with jurisdiction that the business was approved as a smoking lounge;

(d) Using the official form provided by the Public Health Division, Tobacco Prevention and Education Program, proof that all employees have read and signed a document explaining the dangers of exposure to secondhand smoke (this form is available at www.healthoregon.org/smokefree or by calling the Tobacco Prevention and Education Program); and

(e) Documentation demonstrating to the satisfaction of the Public Health Director that the cigar bar generated on-site retail sales of cigars of at least $5,000 in the calendar year 2006.

(3) Application Review:

(a) The Authority shall review application materials within 30 days of receipt and determine whether the application is complete.

(b) Within 10 days of declaring an application complete, the Authority shall deny or grant the application. The Authority shall grant a business certification if, upon review of the application materials, the Authority finds that sufficient documentation has been provided to demonstrate compliance with section (2) of this rule. In lieu of denying an application, the Authority may request additional information from the applicant to determine compliance with section (2) of this rule.

(c) The Authority may deny an application for cigar bar certification if the Authority issued a civil penalty against an applicant for any violation of the Act or these rules within 12 months prior to application.

(d) The Authority may deny an application for cigar bar certification and prohibit an applicant from reapplying for up to two years if the applicant provides information that is false or deliberately misleading.

(4) Ongoing Requirements for Certification:

(a) If a cigar bar was certified before February 1, 2012, and has not provided the information or documentation required under section (2) of this rule, the cigar bar must furnish the missing information or documentation upon request by the Authority to remain certified.

(b) A certified cigar bar must meet the definition of a cigar bar, as defined in ORS 433.835(1) and OAR 333-015-0030(5), at all times. The Authority may revoke certification if the business no longer meets the definition of a cigar bar.

(c) A cigar bar must submit a completed form, as described in subsection (2)(d) of this rule, to the Authority by December 31 of each calendar year for every new employee hired during that year.

(5) Cigar bar certification is only valid for the business location authorized by the Authority.

(6) Certification may be revoked if a cigar bar ceases operation because it has gone out of business. The certificate

holder must notify the Authority that the cigar bar is no longer in operation within 30 days of closing the business.

333-015-0068
Smoke Shops

(1) A business must apply to the Authority for certification prior to allowing smoking on the premises.

(2) A business must apply for smoke shop certification on a form prescribed by the Authority (this form is available at www.healthoregon.org/smokefree or by calling the Tobacco Prevention and Education Program at 971-673-0984).

(3) To obtain certification as a smoke shop under any part of this rule, a business must agree to allow the Authority or LPHA to make unannounced inspections of the business to determine compliance with the Act.

(4) Smoke shop certification is only valid for the business location authorized by the Authority.

(5) Certification Criteria:

(a) A business may apply for smoke shop certification by submitting the following documentation to the Authority, along with a completed application form:

(A) A notarized, sworn statement attesting that the business:

(i) Is primarily engaged in the sale of tobacco products and smoking instruments intended for off-premises consumption or use, and derives at least 75 percent of its gross revenue from such sales;

(ii) Prohibits persons under 18 years of age from entering the premises;

(iii) Does not offer video lottery games as authorized under ORS 461.217, social gaming, or betting on the premises;

(iv) Does not sell or offer food, beverages or alcoholic beverages. On-premises consumption of food or beverages, excluding alcoholic beverages is permitted;

(v) Has a maximum seating capacity of no more than four persons;

(vi) Allows the smoking of tobacco product samples only for the purpose of making retail purchase decisions, in a manner that complies with ORS 180.486 and 431.840; and

(vii) Does not allow the smoking, aerosolizing or vaporizing of inhalants that are not tobacco products.

(B) Documentation of the business's sales, broken down by category of product;

(C) Evidence, such as photographs, of signs prohibiting:

(i) Persons under 18 years of age from entering the premises, and

(ii) On premises consumption of alcohol.

(D) A building map and photographs of the premises demonstrating that the business is a stand-alone business;

(E) A site map of the premises that denotes maximum seating capacity and includes a detailed seating chart; and

(F) Any other documentation, as specified in the application form, necessary to demonstrate compliance with the Act or these rules.

(b) A business existing on December 31, 2008, may apply for certification as a smoke shop by submitting the following documentation to the Authority, along with a completed application form:

(A) Proof of registration with the Oregon Secretary of State, Corporation Division, since 2008 or, if not required to be registered, tax documentation proving that the business has been in operation since 2008;

(B) A notarized, sworn statement attesting that:

(i) On December 31, 2008, the business:

(I) Was primarily engaged in the sale of tobacco products and smoking instruments intended for off-premises consumption or use, and derived at least 75 percent of its gross revenue from such sales;

(II) Prohibited persons under 18 years of age from entering the premises;

(III) Did not offer video lottery games as authorized under ORS 461.217, social gaming, or betting on the premises; and

(IV) Did not sell or offer food or beverages, including alcoholic beverages. On premises consumption of food and beverages, excluding alcohol, is permitted.

(ii) Presently, the business meets the criteria listed under subparagraph (5)(b)(B)(i) of this rule;

(C) Documentation of the business's sales, broken down by category of product;

(D) Either of the following:

(i) Documentation, such as a building map or photographs, demonstrating that on December 31, 2008, the business was a stand-alone business with no other businesses or residential property attached; or

(ii) Documentation demonstrating that on December 31, 2008, it had a ventilation system that exhausted smoke from the business and was designed and terminated in accordance with the state building code standards for the occupancy classification in use. Such documentation must include either:

(I) A certificate of occupancy that was current on December 31, 2008, and official documentation from the building authority with jurisdiction of the occupancy classification for which the business was approved; or

(II) If the documentation described in (5)(b)(D)(ii)(I) of this rule is unavailable, a current certificate of occupancy, proof that the business's ventilation system was installed in 2008 or earlier, and official documentation from the building authority with jurisdiction that the business was approved as a smoking lounge;

(E) Either of the following:

(i) Documentation, such as a building map or photographs, demonstrating that the business presently is a stand-alone business with no other businesses or residential property attached; or

(ii) A current certificate of occupancy and official documentation from the building authority with jurisdiction that the business was approved as a smoking lounge;

(F) Evidence, such as photographs, of signs prohibiting persons under 18 years of age from entering the premises; and

(G) Any other documentation, as specified in the application form, necessary to demonstrate compliance with the Act or these rules.

(c) A business that filed an application with the Authority for certification as a smoke shop prior to June 30, 2011, may be certified by the Authority on or before December 31, 2012, according to the requirements of the Act as it was in effect on June 29, 2011. To achieve certification under these criteria, the business must submit the following documentation to the Authority:

(A) A notarized, sworn statement attesting that:

(i) At the time of application, the business:

(I) Was primarily engaged in the sale of tobacco products and smoking instruments, and derived at least 75 percent of its gross revenue from such sales;

(II) Prohibited persons under 18 years of age from entering the premises;

(III) Did not offer video lottery games as authorized under ORS 461.217, social gaming, or betting on the premises;

(IV) Did not sell or offer on-premises consumption of alcoholic beverages; and

(V) Was a stand-alone business with no other businesses or residential property attached to the premises; and

(ii) Presently, the business meets the criteria listed under subparagraph (5)(c)(A)(i) of this rule;

(B) Documentation of the business's sales, broken down by category of product, including cigarette sales; and

(C) Any other documentation, as specified in the application form, necessary to demonstrate compliance with the Act or these rules.

(6) Application Review:

(a) The Authority shall review application materials within 45 days of receipt and determine whether the application is complete.

(b) Within 15 days of declaring an application complete, the Authority shall deny or grant the application. The Authority shall

grant a business certification if, upon review of the application materials, the Authority finds that sufficient documentation has been provided to demonstrate the business's compliance with this rule. In lieu of denying an application, the Authority may request additional information from the business for the purpose of assessing compliance with this rule.

(c) The Authority may deny an application for smoke shop certification if the Authority issued a civil penalty against an applicant for any violation of the Act or these rules within 12 months prior to application.

(d) The Authority may deny an application for smoke shop certification and prohibit an applicant from reapplying for up to two years if the applicant provides information that is false or deliberately misleading.

(7) Ongoing Requirements for Certification:

(a) A smoke shop certified under this rule must continue to meet the criteria for certification once certified. The Authority may revoke certification if the smoke shop ceases to meet the criteria for certification.

(b) Every year, within 30 days of the calendar date on which certification was originally granted, a smoke shop must provide the Authority with documentation demonstrating that at least 75 percent of the smoke shop's gross revenue is derived from the sale of tobacco products or smoking instruments. Such documentation must include:

(A) A notarized, sworn statement attesting that at least 75 percent of the smoke shop's gross revenue is derived from the sale of tobacco products or smoking instruments; and

(B) Documentation of the smoke shop's sales broken down by category of product, including cigarette sales if the business is certified under subsection (5)(b) or (5)(c) of this rule and permits cigarette smoking on the premises.

(c) The Authority may inspect a business's financial records to determine compliance with the Act and these rules. The Authority shall attempt to contact the business and provide at least 48 hours' notice prior to conducting such an inspection.

(d) A smoke shop must maintain up-to-date contact information with the Authority. If the Authority is unable, despite a good-faith effort, to contact the smoke shop because the smoke shop's mailing address, phone number, and other contact information are out of date, then the Authority may suspend the smoke shop's certification until up-to-date contact information is provided.

(e) A smoke shop certified under subsection (5)(b) or (5)(c) of this rule may not allow the smoking of cigarettes unless at least 75 percent of its gross revenue, as reflected in the documentation described in paragraph (7)(b)(B) of this rule, is derived from the sale of cigarettes.

(f) A smoke shop that is closed for an extended period of time or otherwise ceases to operate at the location that is certified is considered by the Authority to not meet certification requirements.

(8) Renewal of Certification:

(a) A smoke shop certified under subsection (5)(b) or (5)(c) of this rule must renew its certification every five years within 30 days of the calendar date on which certification was originally granted.

(b) To renew certification, a smoke shop certified under subsection (5)(b) or (5)(c) of this rule must submit:

(A) Updated versions of the documentation required for initial certification under subsection (5)(b) or (5)(c) of this rule, respectively; and

(B) If the smoke shop allows the smoking of cigarettes, documentation demonstrating that the smoke shop derives at least 75 percent of its gross revenue from the sale of cigarettes.

(9) Transfer of Certification with Ownership:

(a) Smoking is not permitted on the premises of a smoke shop operating under new ownership until certification is effectively transferred from the certificate holder to the new owner in accordance with this section.

(b) If a smoke shop certified under subsection (5)(a) of this rule changes ownership, the following steps must be completed before the Authority shall transfer certification to the new owner:

(A) The certificate holder must notify the Authority of the intent to transfer ownership and certification;

(B) The new owner must submit a notarized, sworn statement to the Authority attesting that the smoke shop will continue to meet the certification requirements under the new ownership; and

(C) The certificate holder or the new owner must update the business's certification documentation with the Authority.

(c) If a smoke shop certified under subsection (5)(b) or (5)(c) of this rule changes ownership, the certificate holder or new owner of the smoke shop must submit the following documentation to the Authority to transfer certification to the new owner:

(A) Proof of transfer of ownership of the smoke shop, including, where applicable, updated registration with the Oregon Secretary of State, Corporation Division;

(B) A notarized, sworn statement attesting that the business will continue to meet the requirements for certification under the new ownership; and

(C) A completed application for transfer of certification (available on the Internet at www.healthoregon.org/smokefree or by calling the Tobacco Prevention and Education Program at 971-673-0984).

(d) After certification is transferred, the new certificate holder must submit financial documentation, including, but not limited to, sales receipts, demonstrating that at least 75 percent of the smoke shop's gross revenue during the first 90 days of operation under new ownership was derived from the sale of tobacco products or smoking instruments.

(10) Change of Location:

(a) A smoke shop certified under subsection (5)(a) of this rule that seeks to operate the business at a different location must reapply for certification in the new location.

(b) A smoke shop certified under subsection (5)(b) or (5)(c) of this rule that seeks to operate the business at a different location must submit the following documentation to the Authority, along with a completed application for transfer of certification, at least 30 days prior to permitting smoking at the new location:

(A) A copy of the deed or rental lease for the new location, indicating that the business does not occupy more than 3,500 square feet unless the original location exceeded 3,500 square feet;

(B) If the new location occupies more than 3,500 square feet, documentation demonstrating that the square footage of the new location is no more than 110 percent of the square footage of the location at which the smoke shop was originally certified;

(C) A notarized, sworn statement attesting that the smoke shop will cease to operate in the old location; and

(D) Documentation demonstrating that the smoke shop, as operated in the new location:

(i) Meets the original requirements for certification set forth in subsection (5)(b) or (5)(c), respectively;

(ii) Does not allow the smoking of cigarettes unless at least 75 percent of the gross revenue of the business is derived from the sale of cigarettes.

(c) Smoking is not permitted on the premises of the new location until the Authority certifies the new location pursuant to subsection (10)(a) or (10)(b) of this rule.

(11) Certification may be revoked if a smoke shop is closed for an extended period of time or ceases operating at the location that is certified. The certificate holder must notify the Authority immediately if the smoke shop is closing for an extended period of time or will no longer be operating.

(12) Certification may be revoked if a smoke shop fails to meet certification requirements or fails to submit required documentation in accordance with subsection (7)(b) of this rule.

333-015-0070
Oregon Health Authority Responsibilities

(1) The Authority shall maintain a system for receiving complaints, providing educational materials, conducting site visits, and issuing notices of violation.

(2) The Authority shall:

(a) Upon request and satisfactory review, provide certification to cigar bars and smoke shops verifying that they have met the definitions and standards for allowing smoking as set forth in ORS 433.835(1) and 433.850(2)(d) and these rules;

(b) Provide education and assistance to employers and entities in charge of public places to help them comply with the Act;

(c) Receive, respond to, and investigate complaints of non-compliance with the Act and these rules;

(d) Prepare and follow up on remediation plans with sites found to be out of compliance with the Act or these rules; and

(e) Issue citations to violators of the Act or these rules, and conduct contested cases under ORS Chapter 183 as necessary.

(3) Upon request of the LPHA that assumes authority for any or all of the responsibilities pursuant to ORS 433.855(4), provide consultation and technical assistance to the LPHA.

Stat. Auth.: ORS 433.855
Stats. Implemented: ORS 433.835 - 433.870
Hist.: OHD 8-2002(Temp), f. & cert. ef. 5-28-02 thru 11-22-02; OHD 12-2002, f. & cert. ef. 8-27-02; OHD 12-2002, f. & cert. ef. 8-27-02; PH 18-2004(Temp), f. & cert. ef. 5-7-04 thru 10-27-04; PH 27-2004, f. & cert. ef. 8-19-04; PH 12-2008, f. 8-15-08, cert. ef. 1-1-09; PH 2-2012, f. & cert. ef. 2-1-12; PH 26-2014, f. & cert. ef. 10-8-14; PH 30-2015, f. 12-29-15, cert. ef. 1-1-16

333-015-0075
Complaint Response

The Authority or the LPHA shall respond to complaints as follows:

(1) Initial Complaint:

(a) The Authority or the LPHA shall assess whether the site in question is required to be smoke, aerosol or vapor free under the provisions of ORS 433.835 through 433.850.

(b) If the Authority or the LPHA determines that the place of employment, or public place (or any portion thereof), is required to be smoke, aerosol or vapor free, the Authority or the LPHA shall send a letter ("initial response letter") to the place of employment, or public place named in the complaint within 10 business days after receipt of the complaint of violation. The letter shall contain notification that the employer, or public place was reported as being in violation of the Act or these rules, and information on whom to contact for further information and assistance with compliance.

(c) The Authority or the LPHA shall send a form letter to the complainant, if the complainant has supplied his or her name and contact information, notifying the complainant that the complaint has been received and is being investigated or that the place of employment is not required to be smokefree under ORS 433.835 through 433.850.

(2) Second or Subsequent Complaint:

(a) If the Authority or the LPHA receives additional complaint(s) about the site within five business days after the "initial response letter" was sent, the Authority or the LPHA shall send a form letter to the complainant if the complainant has supplied his or her name and contact information, notifying the complainant that the complaint has been received and the investigation process begun.

(b) If the Authority or the LPHA receives a second or subsequent complaint about the site more than five business days after the "initial response letter" was sent, a representative of the Authority or the LPHA shall make an unannounced site visit within 30 days of complaint receipt to determine whether the employer or public place is in violation of the Act or these rules.

(c) An employer, entity in charge of a public place, smoke shop or cigar bar must permit the Authority or the LPHA access to the place of employment, public place (or any portion thereof), or smoke shop or cigar bar, in order to determine compliance with the ICAA. Failure to permit the Authority or LPHA access is a violation and may result in the imposition of civil penalties under OAR 333-015-0085(1).

(3) Remediation Plan:

(a) If, after a site visit, the Authority or LPHA finds violations of the ICAA an employer or entity in charge of a public place, certified smoke shop or cigar bar, or his or her designee, must cooperate with the Authority or LPHA to develop a remediation plan. All remediation plans must be completed within 15 days of the site visit.

(b) In special circumstances, an employer or entity in charge may request in writing an extension of time in which to complete the remediation plan. An extension may be granted only by the Public Health Director or designee.

(4) Post-remediation plan follow-up site visit:

(a) The Authority or the LPHA shall make a follow-up visit within 30 days of the remediation plan completion date to confirm completion.

(b) If a violation of the ICAA is found during the follow-up site visit the Authority may impose civil penalties.

(5) Post-remediation plan complaints:

(a) If an additional complaint is received within three years of the date the remediation plan was entered into, the Authority or the LPHA shall make an unannounced site visit within 21 days of complaint receipt. If a violation is found the Authority may impose a civil penalty.

(b) If an additional complaint is received more than three years of the date the remediation plan was entered into and there is no evidence of other violations in that three-year period, the Authority or the LPHA shall make an unannounced site visit and must follow the procedures in sections (3) and (4) of this rule.

333-015-0078
Violations

(1) The following are violations of the ICAA:

(a) Smoking, aerosolizing, vaporizing or carrying a lighted smoking instrument or inhalant delivery systems in an area where smoking, aerosolizing, or vaporizing of inhalants is prohibited.

(b) Cigar or cigarette butts in an area where smoking is prohibited.

(c) Ashtrays intended for use in an area where smoking is prohibited.

(d) Absence or insufficiency of signs that are required under these rules.

(e) Operating a cigar bar without proper certification from the Authority.

(f) Operating as a smoke shop without proper certification from the Authority.

(g) Smoking of non-cigar tobacco products in a cigar bar.

(h) Smoking, aerosolizing or vaporizing instruments intended for use in an area where smoking, aerosolizing or vaporizing of inhalants is prohibited.

(i) Non-compliance with any of the cigar bar or smoke shop certification requirements set forth in the Act or these rules.

(j) Smoking, aerosolizing or vaporizing of inhalants or carrying a lighted smoking instrument or inhalant delivery system within 10 feet of entrances, exits, windows that open, ventilation

intakes that serve an enclosed area of any public place or place of employment, or any portion of an accessibility ramp.

(k) Ashtrays intended to be used for smoking within 10 feet of entrances, exits, windows that open, ventilation intakes that serve an enclosed area of any public place or place of employment, or any portion of an accessibility ramp.

(l) Tables or outdoor seating or dining areas not clearly marked as non-smoking, non-aerosolizing or non-vaporizing, within 10 feet of entrances, exits, windows that open, ventilation intakes that serve an enclosed area of any public place or place of employment, or any portion of an accessibility ramp.

(m) Failure of an employer or entity in charge to cooperate in developing a remediation plan.

(n) Failure of an employer or entity in charge of a public place, a cigar bar or smoke shop to permit the Authority or the LPHA to inspect all or any part of the premises.

(o) Failure of an employer to provide a smoke, aerosol, or vapor free place of employment by permitting smoking, aerosolizing or vaporizing of inhalants within 10 feet of the entrances, exits, windows that open, ventilation intakes that serve an enclosed area, and accessibility ramps.

(2) Notice of Violation:

(a) If the Authority has evidence of violations of the ICAA or these rules the Authority may impose civil penalties against an individual, an employer, an entity in charge of a public place, a cigar bar or smoke shop, in accordance with OAR 333-015-0085.

(b) A Notice of Violation must be issued in compliance with the notice and civil penalty provision in ORS Chapter 183 and OAR 333-015-0085.

(c) Payment of civil penalties shall be made by mail to the Public Health Director and credited to the Tobacco Use Reduction Account, as required by ORS 433.855(1)(c).

(3) Failure to Cooperate: In addition to imposing civil penalties under OAR 333-015-0085 the Authority may initiate further legal action against an employer or entity in charge of a public place, a cigar bar or smoke shop including, but not limited to, requesting a court to enjoin operation of the business or public place if the employer or entity in charge of a public for violations of the ICAA or these rules.

(4) Revocations: The Authority may revoke a smoke shop certification for a substantial violation of any of the prohibitions of OAR 333-015-0078.

Penalties

The Authority may impose a civil penalty of up to $500 per day for each violation according to the following schedule:

(1) $500 for violations of OAR 333-015-0078(1)(a) (c), (e), (f), (g), (i) and (n).

(2) $300 for the first violation of OAR 333-015-0078(1)(b), (d), (h), (j), (k), (l), (m) and (o).

(3) $500 for the second violation of OAR 333-015-0078(1)(a), (c), (e), (f), (g), (i) and (n).

(4) $400 for the second violation of OAR 333-015-0078(1)(b), (d), (h), (j), (k), (l), (m) and (o).

(5) $500 for the third and any subsequent violations of OAR 333-015-0078(1)(a) through (o).

Oregon Menu Labeling Act

333-015-0100
Authority and Purpose

(1) These rules are adopted pursuant to the authority granted Oregon Health Authority, Public Health Division in ORS 616.575.

(2) The purpose of the Oregon Menu Labeling Act is to provide consumers with basic nutrition information about prepared food sold at chain restaurants.

Stat. Auth.: ORS 616.575
Stats. Implemented: ORS 616.555 – 616.570
Hist.: PH 17-2009, f. 12-29-09, cert. ef. 1-1-10; PH 5-2011(Temp), f. & cert. ef. 7-1-11 thru 12-27-11; PH 11-2011, f. & cert. ef. 10-27-11

333-015-0105
Definitions

For purposes of OAR 333-015-0100 through 333-015-0165, the following definitions shall apply:

(1) "Act" means the Oregon Menu Labeling Act as it appears in 2009 Oregon Laws, chapter 314 (House Bill 2726).

(2) "Alcoholic beverage" means any liquid or solid containing more than one-half of one percent alcohol by volume and capable of being consumed by a human being.

(3) "Calorie and nutrient database" means a commercial computer application or a raw nutrient database that is based on United States Department of Agriculture's (USDA) National Nutrient Database for Standard Reference.

(4)(a) "Chain restaurant" means a restaurant that is located in Oregon that:

(A) Is a part of an affiliation of 15 or more restaurants within the United States;

(B) Sells standardized menu items that constitute 80 percent or more of the menu items served in the restaurant and at least 14 of the other affiliated restaurants; and

(C) Operates under a trade name or service mark, both as defined in ORS 647.005, which is identical or substantially similar to the trade names or service marks of the affiliated restaurants.

(b) "Chain restaurant" does not mean:

(A) A restaurant located inside a facility that is subject to Oregon Department of Agriculture inspection under an interagency agreement described in ORS 624.530, unless the trade name or service mark for the restaurant differs from the trade name or service mark of the facility containing the restaurant;

(B) A cafeteria of a public or private educational institution;

(C) A health care facility as defined in ORS 422.015; or

(D) A motion picture theater.

(5) "Combination meal menu item" means a group of two or more food products or menu items that is offered on a menu, menu board or food tag as a distinct item for sale and that is offered for sale for more than 90 days during a calendar year and which may or may not give the consumer a choice of food items to be included in the meal.

(6) "Condiment" means a sauce, seasoning or dressing including but not limited to butter, jellies or jams, ketchup, mustard, hot sauce, tartar sauce, and similar items offered for general use without charge and not a part of a standard recipe.

(7) "Food product" means a discrete unit serving of a ready-to-eat food or beverage.

(8)(a) "Food tag" means an informational label placed near a menu item, combination meal menu item, or food product that is identified or indicated by the label.

(b) "Food tag" does not mean a menu or menu board.

(9) "Government standards" means nutrient values defined by the USDA National Nutrient Database for Standard Reference.

(10) "Laboratory testing" means the chemical analysis of food products to determine nutrient content.

(11) "Menu" means a pictorial display or written description of menu items, combination meal menu items, or food products that does not have a fixed location and is not intended for joint viewing by multiple patrons.

(12)(a) "Menu board" means a pictorial or written description of menu items, combination meal menu items, or food products that:

(A) Is located where the customer places an order for a menu item; and

(B) Is not a menu or a food tag.

(b) "Menu board" does not mean a pictorial display used solely for the purpose of marketing.

(13)(a) "Menu item" means a prepared food product that is offered on a menu, menu board or food tag as a distinct article for sale.

(b) "Menu item" does not mean the following:

(A) Condiments that are made available on tables or counters for general use without charge;

(B) Food products that are offered for sale for less than 90 days during a calendar year;

(C) Alcoholic beverages, except as provided for under OAR 333-015-0160; or

(D) Food products in sealed manufacturer packaging.

(14) "Restaurant" means any establishment where food or drink is prepared for consumption by the public or any establishment where the public obtains food or drink so prepared in form or quantity consumable then and there, whether or not it is consumed within the confines of the premises where prepared, and also includes establishments that prepare food or drink in consumable form for service outside the premises where prepared, but does not include railroad dining cars, bed and breakfast facilities or temporary restaurants.

(15) "Self-service item" means any menu item that restaurant customers are permitted to obtain without assistance of a restaurant employee or agent.

(16) "Sealed manufacture packaging" means any food product sold in a sealed package subject to the nutrition labeling requirements for the Federal Nutrition Labeling and Education Act of 1990 (21USC 301) (21CFR101) (PL101-535) (NLEA).

(17) "Serving" means the discrete amount or portion of food as determined by the chain restaurant. Serving does not have the same definition given by the USDA and cited in the NLEA.

(18) "Standardized menu item" means any food product that is prepared with a standard recipe or formula within a chain restaurant, regardless of its name as a menu item.

(19) "Variable menu item" means a menu item that is available in different flavors and varieties at the same price point.

(20) "Verifiable reference values" means nutrient values based on the USDA National Nutrient Database for Standard Reference.

Stat. Auth.: 2009 OL Ch. 314
Stats. Implemented: 2009 OL Ch. 314
Hist.: PH 17-2009, f. 12-29-09, cert. ef. 1-1-10

333-015-0110
General Provisions

(1) Each chain restaurant shall accurately ascertain and make available on site, and in written format, the typical nutrient values for each menu item and combination meal menu item, as the item is usually prepared and offered for sale on menus, menu boards and food tags, including condiments routinely added to a menu item as part of a standard recipe:

(a) Total calories;

(b) Total grams of saturated fat;

(c) Total grams of trans fat;

(d) Total grams of carbohydrates; and

(e) Total milligrams of sodium.

(2) OAR 333-015-0110(1) does not apply to:

(a) Food products that are offered for sale for less than 90 days in a calendar year;

(b) Condiments;

(c) Alcoholic beverages not listed as menu items; or

(d) Unopened food products sold in sealed manufacturer packaging that are not intended to be part of the menu item or combination meal menu item.

Stat. Auth.: 2009 OL Ch. 314
Stats. Implemented: 2009 OL Ch. 314
Hist.: PH 17-2009, f. 12-29-09, cert. ef. 1-1-10

333-015-0115
Written Formats for Nutrition Information

(1) Chain restaurants must provide nutrition information in one or more of the following formats:

(a) A printed menu;

(b) A printed menu insert; or

(c) A brochure or printed handout.

(2) A copy of nutrition information shall be made available to each customer who requests it. Customers must not be required to return copies of nutrition information to the chain restaurant.

(3) Nutrition information for menu items must be labeled and organized in a manner that is readable, consistent with the organization and naming conventions of menu items on menus, menu boards or food tags and must be in a font size of not less than nine point.

(4) Nutrition information for menu items and food products in a combination meal menu item must be clearly labeled in a manner that is consistent with the name of the item as it is sold in the combination meal menu item.

(5) Nutrition information for menu items that are also sold as a part of a combination meal menu item under a different name must be listed under both names.

Stat. Auth.: 2009 OL Ch. 314
Stats. Implemented: 2009 OL Ch. 314
Hist.: PH 17-2009, f. 12-29-09, cert. ef. 1-1-10

333-015-0120
Nutrition Labeling of Variable Menu Items

For variable menu items, the chain restaurant shall provide required nutrition information as follows:

(1) If both the highest and lowest value of the variable menu item is within 0 to 10 percent of the median value, the median value alone of the required nutrition information may be listed.

(2) If both the highest and lowest value of the variable menu item is within 11 to 20 percent of the median value, the range of values of the required nutrition information must be listed.

(3) If neither section (1) or (2) of this rule applies, each flavor or variety of the menu item must be listed as a separate menu item and accompanied by required nutrition information.

(4) In lieu of sections (1) through (3) of this rule, each flavor or variety of a menu item may be listed as a separate menu item and accompanied by required nutrition information.

Stat. Auth.: 2009 OL Ch. 314
Stats. Implemented: 2009 OL Ch. 314
Hist.: PH 17-2009, f. 12-29-09, cert. ef. 1-1-10

333-015-0125
Nutrition Labeling of Combination Meal Menu Items

Labeling of combination meal menu items is not required as long as typical nutrient values are provided for the individual food products or menu items that comprise the combination meal menu item.

Stat. Auth.: 2009 OL Ch. 314
Stats. Implemented: 2009 OL Ch. 314

Nutrition Information for Shared Menu Items or Shared Combination Meal Menu Items

Nutrition information for menu items or combination meal menu items intended to serve multiple individuals must state the number of individuals intended to be served by the menu items or combination meal menu items and the total typical nutrient values per individual serving.

Stat. Auth.: 2009 OL Ch. 314
Stats. Implemented: 2009 OL Ch. 314
Hist.: PH 17-2009, f. 12-29-09, cert. ef. 1-1-10

333-015-0135
Acceptable Methods for Determining Typical Nutrient Values for Required Nutrition Information

A chain restaurant must utilize one of the following methods for determining typical nutrient values for menu items and combination meal menu items:

(1) Calorie and nutrient databases as that term is defined in OAR 333-015-0105;

(2) Verifiable reference values as that term is defined in OAR 333-015-0105;

(3) Laboratory testing as that term is defined in OAR 333-015-0105; and

(4) Government standards as that term is defined in OAR 333-015-0105.

Stat. Auth.: 2009 OL Ch. 314
Stats. Implemented: 2009 OL Ch. 314
Hist.: PH 17-2009, f. 12-29-09, cert. ef. 1-1-10

333-015-0140
Verifiable and Accurate Information

(1) A chain restaurant may not make available to customers any typical nutrient values that are substantially inaccurate or that the restaurant knows or should know to be false or misleading.

(2) A chain restaurant may be found by the Oregon Public Health Division to have substantially inaccurate nutrient values if the chain restaurant failed to use one (or more) of the acceptable methods for determining nutrient values described in these rules.

Stat. Auth.: 2009 OL Ch. 314
Stats. Implemented: 2009 OL Ch. 314
Hist.: PH 17-2009, f. 12-29-09, cert. ef. 1-1-10

333-015-0145
Nutrition Information for Self-Service Items

For menu items offered in a buffet, salad bar or other self-service area, nutrition information within a chain restaurant must specify — The typical nutrient values for an individual serving including:

(1) The size of an individual serving expressed in standard weights and measures; and

(2) The size of an individual serving expressed in relation to the utensil provided by the chain restaurant for serving that item or the individual servings as prepared or displayed by the chain restaurant.

Stat. Auth.: 2009 OL Ch. 314

Hist.: PH 17-2009, f. 12-29-09, cert. ef. 1-1-10

333-015-0150
Trans Fat

A restaurant shall follow U.S. Food and Drug Administration (FDA) guidelines for labeling trans fat. This means that trans fat does not have be listed if the total trans fat in the food is less than 0.5 grams per labeled serving, and the chain restaurant makes no claims regarding fat, fatty acids or cholesterol content.

Stat. Auth.: 2009 OL Ch. 314

Hist.: PH 17-2009, f. 12-29-09, cert. ef. 1-1-10

333-015-0155
Rounding Rules

Chain restaurants may round numerical values as follows, except for typical nutrient values for alcoholic beverages:

(1) Total calories values:

(a) For values above 50 calories, the disclosed value shall be rounded to the nearest value evenly divisible by 10.

(b) For values equal to or less than 50 calories, the disclosed value shall be rounded to the nearest value evenly divisible by five.

(2) Total grams of saturated fat values:

(a) For values above five grams of saturated fat, the disclosed value shall be rounded to the nearest gram.

(b) For values equal to or less than five grams of saturated fat, the disclosed value shall be rounded to the nearest 0.5 gram.

(c) For values below 0.5 grams of saturated fat, the disclosed value shall be rounded down to zero.

(3) Total grams of carbohydrates values:

(a) For values equal to or greater than one gram of carbohydrate, the disclosed value shall be rounded to the nearest gram.

(b) For values less than one gram of carbohydrate, the disclosed value shall be expressed as "contains less than one gram" or "less than one gram."

(c) For values below 0.5 grams of carbohydrate, the disclosed value shall be rounded down to zero.

(4) Total milligrams of sodium values:

(a) For values above 140 milligrams of sodium, the disclosed value shall be rounded to the nearest value evenly divisible by 10.

(b) For values between 5 and 140 milligrams of sodium, the disclosed value shall be rounded to the nearest value evenly divisible by five.

(c) For values below five milligrams of sodium, the disclosed value shall be rounded down to zero.

Hist.: PH 17-2009, f. 12-29-09, cert. ef. 1-1-10

333-015-0160
Alcoholic Beverages

(1) Chain restaurants must provide nutrition information for alcoholic beverages offered on a menu, menu board or food tag for more than 90 days. Nutrition information for alcoholic beverages must be based on the following typical nutrient values for alcohol:

(a) For wine, 122 calories, 4 grams of carbohydrate and 7 milligrams of sodium per 5-ounces;

(b) For beer, other than light beer, 153 calories, 13 grams of carbohydrates and 14 milligrams of sodium per 12-ounces;

(c) For light beer, 103 calories, 6 grams of carbohydrates and 14 milligrams of sodium per 12-ounces;

(d) For distilled spirits, 96 calories per 1.5 ounces; and

(e) For mixed drinks or drinks that are a combination of wine, beer, or distilled spirits and one or more additional ingredients, chain restaurants must provide the total typical nutrient value for the mixed drink using the values for alcohol in OAR 333-015-0160(1), combined with the typical nutrient values for other ingredients based on acceptable methods for determining typical nutrient values under 333-015-0135(1).

Stat. Auth.: 2009 OL Ch. 314
Stats. Implemented: 2009 OL Ch. 314
Hist.: PH 17-2009, f. 12-29-09, cert. ef. 1-1-10

333-015-0165
Disclaimers and Additional Nutrition Information

(1) Chain restaurants may publish truthful disclaimers, notifying customers that there may be variations in nutrient content across servings, due to differences in preparation, inconsistent service sizes, ingredients, or custom orders.

(2) Chain restaurants may publish truthful additional nutrition information for menu items including but not limited to cholesterol, fiber, sugar, protein, calcium, iron, vitamin C, vitamin A, and allergens.

(3)(a) Chain restaurants may publish a statement providing information about the recommended daily intake amounts for calories, saturated fat and sodium as follows:

(b) "Recommended limits for a 2,000 calorie daily diet are 20 grams of saturated fat and 1,700 milligrams of sodium."

Tobacco and Inhalant Delivery Systems Sales to Minors

333-015-0200
Definitions

(1) "Authority" means the Oregon Health Authority.

(2) "Block grant" means the Substance Abuse Prevention and Treatment Block Grant pursuant to 42 USC 300x21e et seq.

(3)(a) "Inhalant delivery system" means:

(A) A device that can be used to deliver nicotine or cannabinoids in the form of a vapor or aerosol to a person inhaling from the device; or

(B) A component of a device described in this subsection or a substance in any form sold for the purpose of being vaporized or aerosolized by a device described in this subsection, whether the component or substance is sold separately or is not sold separately.

(b) Inhalant delivery system does not include:

(A) Any product that has been approved by the United States Food and Drug Administration for sale as a tobacco cessation product or for any other therapeutic purpose, if the product is marketed and sold solely for the approved purpose; and

(B) Tobacco products.

(4) "Minor" means an individual under 18 years of age.

(5) "Outlet" means any location which sells at retail or otherwise distributes tobacco products or inhalant delivery systems to consumers including, but not limited to, locations that sell such products over the counter or through vending machines.

(6) "Secretary" means the Secretary of the United States Department of Health and Human Services.

(7) "Smoking instrument" means any cigar, cigarette, pipe or other instrument used to smoke tobacco, marijuana, cocaine or other inhalant as defined in ORS 433.835 and ORS 163.575.

(8) "Tobacco product" means bidis, cigars, cheroots, stogies, periques, granulated, plug cut, crimp cut, ready rubbed and other smoking tobacco, snuff, snuff flour, cavendish, shisha, hookah tobacco, plug and twist tobacco, fine-cut and other chewing tobaccos, shorts, refuse scraps, clippings, cutting and sweepings of tobacco prepared in such a manner as to be suitable for chewing or smoking in a pipe or otherwise, or both for chewing and smoking, and cigarettes as defined in ORS 431A.175.

(9) "Vending machine" means a mechanical, electronic or similar device that, upon the insertion of tokens, money or another form of payment, dispense tobacco products or inhalant delivery systems as defined in ORS 167.402.

333-015-0205
Notice Posting Requirement

(1) An outlet must post a notice substantially similar to the notice described in section (2) of this rule in a location that is clearly visible to the seller and the purchaser.

(2) Content of the Notice: NOTICE: The sale of tobacco products, smoking instruments and inhalant delivery systems to persons under 18 years of age is prohibited by law. Any person who sells, or allows to be sold, a tobacco product, smoking instrument or inhalant delivery system to a person under 18 years of age is in violation of Oregon law.

(3) The Authority may impose a civil penalty for each violation of this rule that is not less than $250 or more than $1,000.

Stat. Auth.: ORS 431.840, 431.845
Stats. Implemented: 431.840, 431.845

333-015-0210
Location of Tobacco Products Within a Retail Store

(1) A person having authority over the location of tobacco products or inhalant delivery systems in a retail store may not locate the tobacco products or inhalant delivery systems in a location where the tobacco products or inhalant delivery systems are accessible by store customers without assistance by a store employee.

(2) This rule does not apply to a person if the location at which the tobacco products or inhalant delivery systems are sold is a store or other establishment at which persons under 18 years of age are prohibited.

Stat. Auth.: ORS 163.575, 167.400, 167.402, 167.407, 431.840, 431.853
Stats. Implemented: ORS 431.853
Hist.: PH 32-2015(Temp), f. 12-29-15, cert. ef. 1-1-16 thru 6-28-16; PH 19-2016, f. & cert. ef. 6-24-16

333-015-0215
Enforcement

(1) The Authority shall coordinate with law enforcement agencies to conduct random, unannounced inspections of wholesalers and retailers of tobacco products, smoking instruments or inhalant delivery systems to ensure compliance with, and to enforce, the laws of this state designed to discourage the sale of tobacco products, smoking instruments and inhalant delivery systems to minors. Nothing in these rules shall preempt local jurisdictions from passing ordinances to conduct unannounced inspections.

(2) Random Sample Procedures: Random, unannounced inspections will be based on the following methodological procedures

(a) Cover a range of outlets, not to be preselected on the basis of prior violations, to measure overall levels of compliance as well as to identify violations;

(b) Be conducted in such a way as to provide a probability sample of outlets in order to estimate the success of enforcement actions being taken throughout the state;

(c) Use reliable methodological design and adequate sample design to reflect:

(A) Distribution of the population of those under 18 throughout the state; and

(B) Distribution of outlets throughout the state that are accessible to minors; and

(d) Be conducted at times when minors are likely to purchase tobacco products, smoking instruments or inhalant delivery systems.

(3) Targeted Inspections: The Authority may conduct targeted inspections of outlets where a compliance problem exists or is suspected. Information gained in targeted inspection will not be included in data used to determine rate of offense in random inspections.

(4) Conducting Inspections: Inspections may take place:

(a) Only in areas open to the public;

(b) Only during the hours that tobacco products, smoking instruments or inhalant delivery systems are sold; and

(c) No more frequently than once a month in any single outlet unless a compliance problem exists or is suspected. For purposes of this rule, a "single outlet" refers to a specific address location of an outlet, regardless of ownership.

(5) The Authority may use minors to complete inspections to determine compliance with these rules.

Stat. Auth.: ORS 431.853
Stats. Implemented: ORS 431.853
Hist.: PH 32-2015(Temp), f. 12-29-15, cert. ef. 1-1-16 thru 6-28-16; PH 19-2016, f. & cert. ef. 6-24-16

333-015-0220
Annual Report

(1) Contents of Report: The Authority shall annually submit a report to the Oregon Legislature and to the Secretary, along with the state's application for block grant funding. The report shall include:

(a) A description of the state's activities to enforce the laws described in OAR 333-015-0200 through OAR 333-015-0215 during the fiscal year preceding the fiscal year for which the state is seeking the grant;

(b) A description outlining the overall success the state has achieved during the previous fiscal year in reducing the availability of tobacco products, smoking instruments and inhalant delivery systems to individuals under the age of 18, showing:

(A) Results of the random and targeted unannounced inspections;

(B) Results of over-the-counter and vending machine outlet inspections reported separately;

(c) A description of how the unannounced inspections were conducted and the methods used to identify outlets; and

(d) Strategies to be utilized by the state for enforcing such laws during the fiscal year for which the grant is sought.

(2) Public Comment Required: The annual report shall be made public and public comment shall be obtained and considered before submitting the report to the Secretary.

Stat. Auth.: ORS 431.853
Stats. Implemented: ORS 431.853
Hist.: PH 32-2015(Temp), f. 12-29-15, cert. ef. 1-1-16 thru 6-28-16; PH 19-2016, f. & cert. ef. 6-24-16

Packaging and Labeling

333-015-0300
Purpose, Scope and Effective Date

(1) The purpose of OAR 333-015-0305 to 333-015-0375 is to set the minimum standards for the labeling and packaging of inhalant delivery systems that are sold to a consumer.

(2) These minimum standards are applicable on and after July 1, 2016.

(3) These rules do not apply to an inhalant delivery system or prefilled inhalant delivery system that contains cannabinoids if that inhalant delivery system or prefilled inhalant delivery system complies with the packaging requirements in OAR 845-025-7000 to 845-025-7060 and the labeling requirements in OAR 333-007-0010 to 333-007-0100.

333-015-0305
Definitions

For the purposes of OAR 333-015-0300 to 333-015-0375:

(1) "Authority" means the Oregon Health Authority.

(2) "Cannabinoid" means any of the chemical compounds that are the active constituents of marijuana.

(3) "Cartoon" means any drawing or other depiction of an object, person, animal or creature or any similar caricature that satisfies any of the following criteria:

(a) The use of exaggerated features;

(b) The attribution of human characteristics to animals, plants or other objects, or the similar use of anthropomorphic technique; or

(c) The attribution of unnatural or extra-human abilities, such as imperviousness to pain or injury, X-ray vision, tunneling at very high speeds or transformation.

(4) "Child-resistant" means packaging that is:

(a) Intended to protect children from nicotine exposure in the household environment or other environment where the product is used;

(b) Designed or constructed to be significantly difficult for children under five years of age to open and not difficult for adults to use properly, as defined by 16 CFR 1700.20 (1995); and

(c) Re-sealable for any product intended for more than a single use, such as a fillable inhalant delivery system.

(5) "Consumer product" means any article, or component part thereof, produced or distributed for sale to a consumer for use in or around a permanent or temporary household or residence, a school, in recreation, or otherwise, or for the personal use, consumption or enjoyment of a consumer in or around a permanent or temporary household or residence, a school, in recreation, or otherwise.

(6) "Distributor" means a person or company that supplies stores or businesses with goods.

(7) "Fillable inhalant delivery system" means a product that is sold without nicotine or non-nicotine inhalants, not permanently sealed and can be opened and filled with any inhalant.

(8) "Inhalant" means nicotine, or any other substance that:

(a) Is in a form that allows the nicotine, cannabinoid or substance to be delivered into a person's respiratory system;

(b) Is inhaled for the purpose of delivering the nicotine, cannabinoid or other substance into a person's respiratory system; and

(c)(A) Is not approved by, or emitted by a device approved by, the United States Food and Drug Administration (FDA) for a therapeutic purpose; or

(B) If approved by, or emitted by a device approved by, the United States Food and Drug Administration for a therapeutic purpose, is not marketed and sold solely for that purpose.

(9)(a) "Inhalant delivery system" means:

(A) A device that can be used to deliver nicotine or cannabinoids in the form of a vapor or aerosol to a person inhaling from the device; or

(B) A component of a device described in this section or a substance in any form sold for the purpose of being vaporized or aerosolized by a device described in this section, whether the component or substance is sold separately or is not sold separately.

(b)(A) Inhalant delivery system does not include any product that has been approved by the United States Food and Drug Administration for sale as a tobacco cessation product or for any other therapeutic purpose, if the product is marketed and sold solely for the approved purpose; and

(B) Tobacco products.

(10) "Inner package" means the package that must be opened by a consumer in order to have access to the product and that may also be but is not required to be the outer package.

(11) "Liquid nicotine container" means a consumer product that consists of a container that:

(a) Has an opening from which nicotine in a solution or other form is accessible and can flow freely through normal and foreseeable use by a consumer; and

(b) Is used to hold soluble nicotine in any concentration.

(12) "Manufacturer or distributor contact information" means the name, city, state and country of the manufacturer who made the inhalant delivery system.

(13) "Minor" means an individual under 18 years of age.

(14) "Nicotine" means any form of the chemical nicotine, including any salt or complex, regardless of whether the chemical is naturally or synthetically derived.

(15) "Non-nicotine liquid container" means a container that:

(a) Has an opening from which liquid non-nicotine or liquid non-cannabinoid substances can flow freely through normal and foreseeable use by a consumer; and

(b) Is not used to hold liquid nicotine or cannabinoids.

(16) "Outer package" means the external package visible to a consumer in the retail setting such as, but not limited to, a box or container.

(17) "Outlet" means any location in Oregon which sells at retail or otherwise distributes tobacco products or inhalant delivery systems to consumers including, but not limited to, locations that sell such products over the counter or through vending machines.

(18) "Packaged in a manner attractive to minors" means an inhalant delivery system product where any package, including the outer package or label on the outer package, or the inner package or label on the inner package:

(a) Depicts cartoons;

(b) Depicts celebrities or fictitious characters played by people;

(c) Depicts people using the product;

(d) Depicts food or beverage;

(e) Resembles any product of the type that is typically marketed to minors; or

(f) Resembles the shape of any animal, commercially recognizable toy or candy.

(19) "Prefilled inhalant delivery system" means an inhalant delivery system that is permanently sealed, prefilled, disposable and not intended to be disassembled by the consumer.

(20) "Retail setting" means a place of business in which merchandise is primarily sold directly to an ultimate consumer.

(21) "These rules" means OAR 333-015-0300 to 333-015-0375.

Violations

333-015-0370
Violations

It is a violation for a manufacturer, retailer or distributor to:

(1) Distribute, sell or allow to be sold an inhalant delivery device that does not comply with a labeling requirement in OAR 333-015-0310 to 333-015-0030.

(2) Distribute, sell or allow to be sold an inhalant delivery device that does not comply with a packaging requirement in OAR 333-015-0340 to 333-015-0360.

Stat. Auth.: ORS 431A.175, 431A.178

Penalties

333-015-0375
Civil Penalties

(1) The Authority may impose a civil penalty for each violation of 333-015-0340 to 333-015-0360 against a manufacturer, retailer or distributor according to the following schedule:

(a) $0 together with the issuance of a warning letter to the retailer for the first violation

(b) Minimum of $500 for the second violation within a 24-month period of the first violation.

(c) Minimum of $800 for the third violation within a 24-month period of the second violation.

(d) Minimum of $2000 for the fourth violation within a 24-month period of the third violation.

(e) Minimum of $8000 for the fifth violation within a 36-month period of the fourth violation.

(f) Minimum of $15,000 for the sixth or subsequent violation within a 48-month period of the fifth violation.

(2) A civil penalty may not to exceed $15,000 for each violation or $1,050,000 for all violations found in a single inspection.

(3) Each product that does not comply with these rules or that is distributed, sold, or allowed to be sold in violation of these rules

is a separate violation. For example, if 10 liquid nicotine containers are distributed, sold, or allowed to be sold without child-resistant packaging the civil penalty could be $5000 (10 x $500).

DIVISION 16

HAZARDOUS SUBSTANCES

Definitions and Interpretations

333-016-0005
Definitions

(1) "Act" as used in these rules means ORS 453.005 to 453.135 relating to hazardous substances.

(2) "Administrator" means the Administrator of the Public Health Division of Oregon Health Authority.

(3) "Hazardous Substances Intended or Packaged in a Form Suitable for Use in the Household" or "Hazardous Household Substances" means any hazardous substances as defined in the Act, whether or not packaged, that under any customary or reasonably forseeable condition of purchase, storage, or use may be brought into or around a house, apartment, or other place where people dwell, or in or around any related building or shed, including, but not limited to, a garage, carport, barn, or storage shed. The term includes such articles as polishes or cleaners designed primarily for professional use but that are available in retail stores such as hobby shops for nonprofessional use. Also included are such items as antifreeze and radiator cleaners that although principally for car use may be stored in or around dwelling places. The term does not include industrial supplies that might be taken into a home by a serviceman. An article labeled and marketed solely for industrial use does not become subject to this Act because of the possibility that an industrial worker may misappropriate a supply for his own use. Size of unit or container is not the only index of whether the article is suitable for use in or around the household. The test shall be whether under any reasonably foreseeable condition of purchase, storage, or use, the article may be likely to be found in or around a dwelling.

(4) "Prominently" and "Conspicuously" means that under customary conditions of purchase, storage, and use, the required information shall be visible, noticeable, and in clear and legible English. Some factors affecting a warning's prominence or conspicuousness are: location, size of type, and contrast of printing against background. Also bearing on the effectiveness of a warning might be the effect of the package contents if spilled on the label. Unless impracticable because of the nature of the substance, the label shall be of such construction and finish as to withstand reasonably foreseeable spillage through foreseeable use.

(5) "Highly Toxic Substance" is any substance falling within any of the following categories:

(a) Any substance that produces death within 14 days in half or more than half of a group of ten or more laboratory white rats each weighing between 200 grams and 300 grams, at a single dose of 50 milligrams or less per kilogram of body weight, when orally administered;

(b) Any substance that produces death within 14 days in half or more than half of a group of ten or more laboratory white rats each weighing between 200 grams and 300 grams when inhaled continuously for a period of one hour or less in an atmospheric concentration of 200 parts per million by volume or less of gas or vapor or two milligrams per liter by volume or less of mist or dust, provided that such concentration is likely to be encountered by humans when the substance is used in any reasonably foreseeable manner;

(c) Any substance that produces death within 14 days in half or more than half of a group of ten or more rabbits weighing between 2.3 kilograms and 3.0 kilograms each, tested in a dosage of 200 milligrams or less per kilogram of body weight when administered by continuous contact with the bare skin for 24 hours or less by the method described in OAR 333-016-0020. The number of animals tested shall be sufficient to give a statistically significant result and be in conformity with good pharmacological practices;

(d) Any substance determined by the Administrator to be "highly toxic" on the basis of human experience.

(6) "Toxic Substance" means any substance other than radioactive substance falling within any of the following categories:

(a) Any substance that produces death within 14 days in one-half or a group of ten or more white rats each weighing between 200 grams and 300 grams, at a single dose of more than 50 milligrams per kilogram but not more that five grams per kilogram of body weight, when orally administered. Substances falling in the toxicity range between 500 milligrams and five grams per kilogram of body weight will be considered for exemption from some or all of the labeling requirements of ORS 453.035 upon showing that, because of the physical form of the substances (solid, a thick plastic, emulsion, etc.) the size or closure of the container, human experience with the article, or any other relevant factors, such labeling is not needed;

(b) Any substance that produces death within 14 days in one-half of a group of ten or more white rats each weighing between 200 grams and 300 grams, when inhaled continuously for a period of one hour or less at an atmospheric concentration of more than 200 parts per million, but not more than 20,000 parts per million by volume of gas or vapor or more than two milligrams but not more than 200 milligrams per liter by volume of mist or dust, provided such concentration is likely to be encountered by man when the substance is used in any reasonably foreseeable manner;

(c) Any substance that produces death within 14 days in one-half of a group of ten or more rabbits weighing between 2.3 kilograms and 3.0 kilograms each tested at a dosage of more than 200 milligrams per kilogram of body weight but not more than 2 grams per kilogram of body weight when administered by continuous contact with the bare skin for 24 hours in the method described in rule 333-016-0020. The number of animals tested shall be sufficient to give statistically significant results and be in conformity with good pharmacological practice;

(d) Any substance that is "toxic" (but not "highly toxic") on the basis of human experience.

(7) "Irritant" includes primary irritant to the skin as well as substances irritant to the eye or mucous membranes:

(a) The term "primary irritant" means a substance that is not corrosive and that the available data of human experience indicate is a primary irritant; or which results in an empirical score of five or more when tested by the method described in OAR 333-016-0025;

(b) "Eye irritants" means a substance is an irritant to the eye if the available data or human experience indicate it is an irritant to the eye, or if a positive test result is obtained when the substance is tested by the method described in OAR 333-016-0030.

(8) "Corrosive substance" is one that causes visible destruction or irreversible alterations in the tissue at the site of contact. A test for a corrosive substance is whether, by human experience, such tissue destruction occurs at the site of application. A substance would be considered corrosive to the skin if, when tested on the intact skin of the albino rabbit by the technique described in OAR 333-016-0025, the structure of the tissue at the site of contact is destroyed or changed irreversibly in 24 hours or less. Other appropriate tests should be applied when contact of the substance with other than skin tissue is being considered.

(9) A "Strong Allergic Sensitizer" is a substance that produces an allergenic sensitization in a substantial number of persons who come into contact with it. An allergic sensitization develops by means of an "antibody mechanism" in contradistinction to a primary irritant reaction which does not arise because of the participation of an "antibody mechanism." An allergic reaction ordinarily does not develop on first contact because of necessity of prior exposure to the substance in question. The sensitized tissue exhibits a greatly increased capacity to react to subsequent exposures of the offending agent. Thus, subsequent exposures may

produce severe reactions with little correlation to the amounts of excitant involved. A "photodynamic sensitizer" is a substance that causes an alteration in the skin or mucous membranes, in general, or to the skin or mucous membrane at the site to which it has been applied, so that when these areas are subsequently exposed to ordinary sunlight or equivalent radiant energy an inflammatory reaction will develop.

(10) "Extremely Flammable" or "Flammable" substances:

(a) "Extremely flammable" means any substance that has a flashpoint at or below 20°F, as determined by the method described in OAR 333-016-0035;

(b) "Flammable" means any substance that has a flashpoint of above 20°F, to and including 80°F, as determined by the method described in OAR 333-016-0035.

(11) "Extremely Flammable" and "Flammable" solids:

(a) A solid substance is "extremely flammable" if it ignites and burns at an ambient temperature of 80°F or less when subjected to friction, or to percussion or to an electrical spark;

(b) A solid substance is "flammable" if, when tested by the method described in OAR 333-016-0040, it ignites and burns with a self-sustained flame at a rate greater than one-tenth of an inch per second along its major axis.

(12) "Extremely Flammable" and "Flammable" contents of self-pressurized containers:

(a) Contents of self-pressurized containers are "extremely flammable" if, when tested by the method described in OAR 333-016-0045, flashback (a flame extending back to the dispenser) is obtained at any degree of valve opening and the flashpoint, when tested by the method described in OAR 333-016-0050, is less than 20°F;

(b) Contents of self-pressurized containers are "flammable" if, when tested by the method described in rule 333-016-0045, a flame projection exceeding 18 inches is obtained a full valve opening or a flashback (a flame extending back to the dispenser) is obtained at any degree of valve opening.

(13) "Substances that generate pressure." A substance is hazardous because it generates pressure through decomposition, heat, or other means:

(a) If it explodes when subjected to an electrical spark, or to percussion, or to the flame of a burning paraffin candle for five seconds or less;

(b) If it expels the closure of its container or bursts its container when held at or below 130°F for two days or less;

(c) If it erupts from its opened container at a temperature of 130°F or less after having been held in the closed container at 130°F for two days;

(d) If it comprises the contents of a self-pressurized container.

(14) "Radioactive Substance" means a substance which, because of nuclear instability, emits electromagnetic and/or particulate radiation that is capable of producing ions in its passage through matter. Source materials, special nuclear material, and by-product materials described in ORS 453.605 et seq. are exempt.

(15) As used in ORS 453.005(11) "accompanying literature" means any placard, pamphlet, booklet, book, sign, or other written, printed, or graphic matter or visual device that provides directions for use, written or otherwise, and is used in connection with the display, sale, demonstration, or merchandising of a hazardous substance intended for or packaged in a form suitable for use in the household or by children.

(16) A "Substantial Personal Injury" or "Substantial Illness" means any illness or injury sufficiently significant to cause one or more days of restricted activity. A day of restricted activity is one on which a person cuts down on his usual activities for the whole of that day because of an illness or an injury. The term "usual activities" for any day means the things that the person would ordinarily do on that day. For children under school age, usual activities depend on whatever the usual pattern is for the child's day, which will in turn be affected by the age of the child, weather conditions, and so forth. For retired or elderly persons, usual activities might consist of almost no activity, but cutting down on even a small amount for as much as a day would constitute restricted activity. On Sundays or holidays "usual activities" are taken to be the things the person usually does on such days — going to church, playing golf, visiting friends or relatives, or staying at home and listening to the radio, reading, looking at television, and so forth. Restricted activity does not imply complete inactivity, but it does imply only the minimum of usual activities. A special nap for an hour after lunch does not constitute cutting down on usual activities, nor does the elimination of a heavy chore as cleaning ashes out of the furnace or hanging out the wash. If a farmer or housewife carries on only the minimum of the day's chores, however, this is a day of restricted activity. A day spent in bed or a day home from work or school because of illness or injury is, of course, a restricted activity day.

(17) A "Proximate Result" is one that follows in the course of events without an unforeseeable, intervening, independent cause.

(18) "Reasonably Foreseeable Handling or Use" includes the reasonably foreseeable accidental handling or use, not only by the purchaser or intended user of the product, but by all others in a household, especially children.

333-016-0010
Human Experience with Hazardous Substances

Reliable data on human experience with any substance shall be taken into account in determining whether an article is a "hazardous substance" within the meaning of the Act, and when such data give reliable results different from results with animal data, the human experience takes precedence. Experience may show that an article is more or less toxic, irritant, or corrosive to man than to test animals. Experience may also show other factors that are important in determining the degree of hazard to humans represented by the substance; for example, that radiator antifreeze is likely to be stored in the household or garage and likely to be ingested in significant quantities by some persons. Experience also indicates that a particular substance in liquid form is more likely to be ingested than is the same substance in a paste or solid, and that an aerosol is more likely to get into the eyes and the nasal passages than is a liquid.

333-016-0015
Hazardous Mixtures

For a mixture of substances, the determination of whether such mixture is "hazardous" as defined in ORS 453.005(7) should be based on the physical, chemical, and pharmacological characteristics of the mixture. A mixture of substances may therefore be less hazardous or more hazardous than its components because of synergistic or antagonistic reactions. It may not be possible to reach a fully satisfactory decision concerning the toxic, irritant, corrosive, flammable, sensitizing, or pressure-generating properties of a substance from what is known about its components or ingredients. It is prudent to test the mixture itself.

333-016-0020
Testing Procedures for Hazardous Substances

Method of testing toxic substances. The method of testing the toxic substances defined in OAR 333-016-0005(5)(c) and (6)(c) is as follows:

(1) Acute dermal toxicity (single exposure). In the acute exposures the agent is held in contact with the skin by means of a sleeve for periods varying up to 24 hours. The sleeve, made of rubber dam or other impervious material, is so constructed that the ends are reinforced with additional strips and should fit snugly around the trunk of the animal. The ends of the sleeve are tucked, permitting the central portion to "balloon" and furnish a reservoir for the dose. The reservoir must have sufficient capacity to contain the dose

without pressure. In the following table are given the dimensions of sleeves and the approximate body surface exposed to the test substance. The sleeves may vary in size to accommodate smaller or larger subjects. In the testing of unctuous materials that adhere readily to the skin, mesh wire screen may be employed instead of the sleeve. The screen is padded and raised approximately two centimeters from the exposed skin. In the case of dry powder preparations, the skin and substance are moistened with physiological saline prior to exposure. The sleeve is then slipped over the gauze which holds the dose applied to the skin. In the case of finely divided powders, the measured dose is evenly distributed on cotton gauze, which is then secured to the area of exposure. (See **Table 1**.)

(2) Preparation of test animals. The animals are prepared by clipping the skin of the trunk free of hair. Approximately one-half of the animals are further prepared by making epidermal abrasions every 2 centimeters or 3 centimeters longitudinally over the area of exposure. The abrasions are sufficiently deep to penetrate the stratum corneum (horny layer of the epidermis), but not to disturb the derma — that is, not to obtain bleeding.

(3) Procedures for testing. The sleeve is slipped onto the animal which is then placed in a comfortable but immobilized position in a multiple animal holder. Selected doses of liquids and solutions are introduced under the sleeve. If there is slight leakage from the sleeve which may occur during the first few hours of exposure, it is collected and reapplied. Dosage levels are adjusted in subsequent exposures (if necessary) to enable a calculation of a dose that would be fatal to 50 percent of the animals. This can be determined from mortality ratios obtained at various doses employed. At the end of 24 hours the sleeves or screens are removed, the volume of unabsorbed material, if any, is measured, and the skin reactions are noted. The subjects are cleaned by thorough wiping, observed for gross symptoms of poisoning, and then observed for two weeks.

[ED. NOTE: Tables referenced are available from the agency.]

333-016-0025

Method of Testing Primary Irritant Substances

(1) Primary irritation to the skin is measured by a patch test technique on the abraded and intact skin of the albino rabbit, clipped free of hair. A minimum of six subjects are used in abraded and intact skin tests. Introduce under a square patch such as surgical gauze measuring 1" X 1" two single layers thick, 0.5 milliliter (in the case of liquids) or 0.5 gram (in the case of solids and semi-solids) of the test substance. Dissolve solids in an appropriate solvent and apply the solution as for liquids. The animals are immobilized with patches secured in place by adhesive tape. The entire trunk of the animal is then wrapped with an impervious material such as rubberized cloth, for the 24-hour period of exposure. This material aids in maintaining the test patches in position and retards the evaporation of volatile substances. After 24 hours of exposure, the patches are removed and the resulting reactions are evaluated on the basis of the designated values in the following evaluation of skin reactions:

(a) Erythema and eschar formation:

(A) No erythema — Value of 0;

(B) Very slight erythema (barely perceptible) — Value of 1;

(C) Well-defined erythema — Value of 2;

(D) Moderate to severe erythema — Value of 3;

(E) Severe erythema (beet redness) to slight eschar (injuries in depth) — Value of 4.

(b) Edema formation:

(A) No edema — Value of 0;

(B) Very slight edema (barely perceptible) — Value of 1;

(C) Slight edema (edges of area well defined by definite raising) — Value of 2;

(D) Moderate edema (raised approximately 1 millimeter) — Value of 3;

(E) Severe edema (raised more than 1 millimeter and extending beyond the area of exposure) — Value of 4.

NOTE: The "value" recorded for each reading is the average value of the six or more animals subject to the test.

(2) Readings are again made at the end of a total of 72 hours (48 hours after the first reading). An equal number of exposures are made on areas of skin that have been previously abraded. The abrasions are minor incisions through the stratum corneum, but not sufficiently deep to disturb the derma or to produce bleeding. Evaluate the reactions of the abraded skin at 24 hours and 72 hours, as described in this paragraph. Add the values for erythema and eschar formation at 24 hours and at 72 hours for intact skin to the values on abraded skin at 24 hours and at 72 hours (four values). Similarly, add the values for edema formation at 24 hours and at 72 hours for intact and abraded skin (four values). The total of the eight values is divided by four to give the primary irritation score. Exposure times and units:

(a) Erythema and eschar formation:

(A) Intact skin:

(i) 24 hours — Value of 2;

(ii) 72 hours — Value of 1.

(B) Abraded skin:

(i) 24 hours — Value of 3;

(ii) 72 hours — Value of 2.

(C) Subtotal of exposure unit values = 8.

(b) Edema formation:

(A) Intact skin:

(i) 24 hours — Value of 0;

(ii) 12 hours — Value of 1.

(B) Abraded skin:

(i) 24 hours — Value of 1;

(ii) 72 hours — Value of 2.

(C) Subtotal of exposure unit values = 8.

(c) Total exposure unit values = 12.

NOTE: Primary irritation score is 12 divided by 4 = 3.

333-016-0030

Test for Eye Irritants

(1)(a) Six albino rabbits are used for each test substance. Animal facilities for such procedures shall be so designed and maintained as to exclude sawdust, wood chips, or other extraneous material that might produce eye irritation. Both eyes of each animal in the test group shall be examined before testing, and only those animals without eye defect or irritation shall be used. The animal is held firmly but gently until quiet. The test material is placed on one eye of each animal by gently pulling the lower lid away from the eyeball to form a cup into which the test substance is dropped. The lids are then gently held together for one second and the animal is released. The other eye, remaining untreated, serves as a control. For testing liquids, 0.1 milliliter is used. For solids or pastes, 100 milligrams of the test substance is used, except that for substances in flake, granule, powder, or other particulate form the amount that has a volume of 0.1 milliliter (after compacting as much as possible without crushing or altering the individual particles, such as by tapping the measuring container) shall be used whenever this volume weighs less than 100 milligrams. In such a case, the weight of the 0.1 milliliter test dose should be recorded. The eyes are not washed following instillation of test material except as noted below;

(b) The eyes are examined and the grade of ocular reaction is recorded at 24, 48, and 72 hours. Reading of reactions is facilitated by use of a binocular loupe, hand slit-lamp, or other expert means. After the recording of observations at 24 hours, any or all eyes may be further examined after applying fluorescein. For this optional test, one drop of fluorescein sodium ophthalmic solution, U.S.P., or equivalent is dropped directly on the cornea. After flushing out the excess fluorescein with sodium chloride solution, U.S.P., or equivalent, injured areas of the cornea appear yellow; this best visualized in a darkened room under ultraviolet illumination. Any or all eyes may be washed with sodium chloride solution, U.S.P., or equivalent after the 24-hour reading.

(2)(a) An animal shall be considered as exhibiting a positive reaction if the test substance produces at any of the readings ulceration of the cornea (other than a fine stipplin), or opacity of the cornea (other than a slight dulling of the normal luster), or inflammation of the iris (other than a slight deepening of the folds (or rugae) or a slight circumcorneal injection of the blood vessels), or if such substance produces in the conjunctive (excluding the cornea and iris) an obvious swelling with partial eversion of the lids or a diffuse crimson-red with individual vessels not easily discernible;

(b) The test shall be considered positive if four or more of the animals in the test group exhibit a positive reaction. If only one animal exhibits a positive reaction, the test shall be regarded as negative. If two or three animals exhibit a positive reaction, the test is repeated using a different group of six animals. The second test shall be considered positive if three or more of the animals exhibit a positive reaction. If only one or two animals in the second test exhibit a positive reaction, the test shall be repeated with a different group of six animals. Should a third test be needed, the substance will be regarded as an irritant if any animal exhibits a positive response.

(3) To assist testing laboratories and other interested persons in interpreting the results obtained when a substance is tested in accordance with the method described in section (1) of this rule, an "**Illustrated Guide for Grading Eye Irritation by Hazardous Substances**" will be sold by the Superintendent of Documents, Government Printing Office, Washington, D.C. The guide will contain color plates depicting responses of varying intensity to specific test solutions. The grade of response and the substance used to produce the response will be indicated.

333-016-0035
Tentative Method of Test for Flashpoint of Volatile Flammable Materials by Tagliabue Open-Cup Apparatus

(1) Scope:

(a) This method describes a test procedure for the determination of open-cup flashpoints of volatile flammable materials having flashpoints below 175°F;

(b) This method, when applied to paints and resin solutions which tend to skin over or which are very viscous, gives less reproducible results than when applied to solvents.

***NOTE:** The Public Health Division has obtained permission from the American Society for Testing Materials, Philadelphia, Pennsylvania, to reprint this method in their regulations. The test has been slightly modified for practical reasons.

****NOTE:** ASTM Designation: D 1310-59T, issued 1954, revised 1955, 1956, and 1959. This tentative method has been approved by the sponsoring committee and accepted by the American Society for Testing Materials in accordance with established procedures for use pending adoption as standard. Suggestions for revisions should be addressed to the Society at 1916 Race Street, Philadelphia, Pennsylvania.

(2) Outline of Method. The sample is placed in the cup of a Tag Open Tester, and heated at a slow but constant rate. A small test flame is passed at a uniform rate across the cup at specified intervals. The flashpoint is taken as the lowest temperature at which application of the test flame causes the vapor at the surface of the liquid to flash; that is, ignite but not continue to burn.

(3) Apparatus. The Tag Open-Cup Tester is illustrated in **Figure 1**. It consists of the following parts which must conform to the dimensions shown and have the additional characteristics as noted:

(a) Copper bath, preferably equipped with a constant level overflow so placed as to maintain the bath liquid level one-eighth inch below the rim of the glass cup;

(b) Thermometer holder. Support firmly with ringstand and clamp;

(c) Thermometer. For flashpoints above 40 °F, use the ASTM Tag Closed Tester Thermometer, range of plus 20 to plus 230 °F, in one degree Fahrenheit divisions and conforming to thermometer 9F of ASTM Standard E1. For flashpoints from 20°F to 40°F, use ASTM Tag Closed Tester, Low Range Thermometer 57F. For flashpoints below 20°F, use ASTM Thermometer 33F.;

(d) Glass test cup. Glass test cup (**Figure 2**) of molded clear glass, annealed, heat-resistant, and free from surface defects;

(e) Leveling device. Leveling device or guide, for proper adjustment of the liquid level in the cup (**Figure 3**). This shall be made of No. 18-gauge polished aluminum with a projection for adjusting the liquid level when the sample is added to exactly one-eighth inch below the level of the edge or rim of the cup;

(f) "Micro" or small gas burner of suitable dimensions for heating the bath. A screw clamp may be used to help regulate the gas. A small electric heater may be used;

(g) Ignition taper, which is a small, straight, blow-pipe type gas burner. The test flame torch prescribed in the method of test for flash and fire points by Cleveland Open Cup (ASTM designation: D 92) is satisfactory;

(h) Alternative methods for maintaining the ignition taper in a fixed horizontal plane above the liquid may be used, as follows:

(A) Guide wire, 3/32 inch in diameter and 3-1/2 inches in length, with a right-angle bend one-half inch from each end. This wire is placed snugly in holes drilled in the rim of the bath, so that the guide wire is 5/8 inch from the center of the cup and resting on the rim of the cup;

(B)(i) Swivel-type taper holder, such as is used in ASTM Method D 92. The height and position of the taper are fixed by adjusting the holder on a suitable ringstand support adjacent to the flash cup.

(ii) Draft shield, consisting of two rectangular sheets of noncombustible material, 24 inches x 28 inches, are fastened together along the 28 inch side, preferably by hinges. A triangular sheet, 24 inches x 24 inches x 34 inches is fastened by hinges to one of the lateral sheets (to form a top when shield is open). The interior of the draft shield shall be painted a flat black.

(4) Procedure:

(a) Place the tester on a solid table free of vibration, in a location free of perceptible draft, and in a dim light;

(b) Run water, brine, or water-glycol solution into the bath to a predetermined level, which will fill the bath to one-eighth inch below the top when the cup is in place. An overflow is permissible for water level control;

(c) Firmly support the thermometer vertically halfway between the center and the edge of the cup on a diameter at right angles to the guide wire, or on a diameter passing through the center of the cup and the pivot of the taper. Place so that the bottom of the bulb is one-fourth inch from the inner bottom surface of the cup. If the old Tagliabue thermometer is used, immerse to well cover the mercury bulb, but not the wide body of the thermometer;

(d) Fill the glass cup with the sample liquid to a depth just one-eighth inch below the edge, as determined by the leveling device;

(e) Place the guide wire or swivel device in position, and set the draft shield around the tester so that the sides form right angles with each other and the tester is well toward the back of the shield;

(f) If a guide wire is used, the taper, when passed, should rest lightly on the wire, with the end of the jet burner just clear of the edge of the guide wire. If the swivel-type holder is used, the horizontal and vertical positions of the jet are so adjusted that the jet passes on the circumference of a circle, having a radius of at least six inches across the center of the cup at right angles to the diameter passing through the thermometer, and in a plane one-eighth inch above the upper edge of the cup. The taper should be kept in the "off" position, at one end or the other of the swing, except when the flame is applied;

(g) Light the ignition flame and adjust it to form a flame of spherical form matching in size the 5/32-inch sphere on the apparatus;

(h) Adjust heater source under bath so that the temperature of the sample increases at a rate of two plus or minus 0.5°F per minute. With viscous materials, this rate of heating cannot always be obtained.

(5) Initial Test. Determine an approximate flashpoint by passing the taper flame across the sample at intervals of 2°F. Each pass must be in one direction only. The time required to pass the ignition flame across the surface of the sample should be one second. Remove bubbles from the surface of the sample liquid

before starting a determination. Meticulous attention to all details relating to the taper, size of taper flame, and rate of passing the taper is necessary for good results. When determining the flashpoint of viscous liquids and those liquids that tend to form a film of polymer, etc., on the surface, the surface film should be disturbed mechanically each time before the taper flame is passed.

(6) Recorded Tests. Repeat the procedure by cooling a fresh portion of the sample, the glass cup, the bath solution, and the thermometer at least 20°F below the approximate flashpoint. Resume heating and pass the taper flame across the sample at two intervals of 5°F, and then at intervals of 2°F until the flashpoint occurs.

(7) Reporting Data. The average of not less than three recorded tests, other than the initial test, shall be used in determining the flashpoint and flammability of the substance.

(8) Standardization:

(a) Make determinations in triplicate on the flashpoint of standard paraxylene and of standard isopropyl alcohol which meet the following specifications:

(A) Specifications of p-xylene, flashpoint check grade. P-xylene shall conform to the following requirements:

(i) Specific Gravity: 15.56°C/15.56°C, 0.860 minimum, 0.866 maximum;

(ii) Boiling Range: 2°C maximum from start to dry point when tested in accordance with the method of test for distillation of industrial aromatic hydrocarbons (ASTM designation: D 850), or the method of test for distillation range of lacquer solvents and effluents (ASTM designation: D 1078). The range shall include the boiling point of pur-xylene, which is 138.35°C (281.03°F);

(iii) Purity: 95 percent minimum, calculated in accordance with the method of test for determination of purity from freezing points of high-purity compounds (ASTM designation: D 1016), from the experimentally determined freezing point, measured by the method of test for measurement of freezing points of high purity compounds for evaluation of purity (ASTM designation: D 1015).

(B) Specifications for isopropanol, flashpoint check grade. Isopropanol shall conform to the following requirements:

(i) Specific Gravity: 0.8175 to 0.8185 at 20°C/20°C, as determined by means of a calibrated pycnometer;

(ii) Distillation Range: Shall entirely distill within a 1.0 degree Centigrade range which shall include the temperature 80.4°C as determined by ASTM method D 1078. Average these values for each compound. If the difference between the values for these two compounds is less than 15°F (8.5°C) or more than 27°F (16°C), repeat the determinations or obtain fresh standards.

(b) Calculate a correction factor as follows:

X = 92 - A

Y = 71 - B

Correction:

$$\frac{X + Y}{Z}$$

Where:

A = Observed flash of p-xylene

B = Observed flash of isopropyl alcohol

Apply this correction to all determinations. Half units in correction shall be discarded.

(9) Precision:

(a) For hydrocarbon solvents having flashpoints between 60°F and 110°F, repeatability is plus or minus 2°F and the reproducibility is plus or minus 5°F;

(b) If results from two tests differ by more than 10°F, they shall be considered uncertain and should be checked. The calibration procedure provided in this method will cancel out the effect of barometric pressure if calibration and tests are run at the same pressure. (Data supporting the precision are given in Appendix III of the **1956 Report of Committee D-1 on Paint, Varnish, Lacquers, and Related Products**, **Proceedings**, **American Soc. Testing Mats., Volume 56 (1956)**.)

Method for Determining Extremely Flammable and Flammable Solids

(1) Preparation of sample:

(a) Granules, powders, and pastes. Pack the sample into a flat, rectangular metal boat with inner dimensions of 6 inches long x 1 inch wide x 1/4 inch deep;

(b) Rigid and pliable solids. Measure the dimensions of the sample and support it by means of metal ringstands, clamps, rings, or other suitable devices as needed, so that the major axis is oriented horizontally and the maximum surface is freely exposed to the atmosphere.

(2) Procedure. Place the prepared sample in a draft-free area that can be ventilated and cleaned after each test. The temperature of the sample at the time of testing shall be between 68°F and 86°F. Hold a burning paraffin candle whose diameter is at least one inch so that the flame is in contact with the surface of the sample at the end of the major axis for five seconds or until the sample ignites, whichever is less. Remove the candle. By means of a stopwatch, determine the time of combustion with self-sustained flame. Do not exceed 60 seconds. Extinguish flame with a CO_2 or similar nondestructive type extinguisher. Measure the dimensions of the burnt area and calculate the rate of burning along the major axis of the sample.

333-016-0045

Method for Determining Extremely Flammable and Flammable Contents of Self-Pressurized Containers

(1) Equipment required. The test equipment consists of a base eight inches wide, two feet long, marked in six-inch intervals. A rule two feet long and marked in inches is supported horizontally on the side of the base and about six inches above it. A paraffin candle one inch or more in diameter and of such height that the top third of the flame is at the height of the horizontal rule, is placed at the zero point in the base.

(2) Procedure. The test is conducted in a draft-free area that can be ventilated and cleared after each test. Place the self-pressurized container at a distance of six inches from the flame source. Spray for periods of 15 seconds to 20 seconds (one observer noting the extension of the flame and the other operating the container) through the top third of the flame and at a right angle to the flame. The height of the flame should be approximately two inches. Take three readings for each test, and average. As a precaution, do not spray large quantities in a small, confined space. Free space of previously discharged material.

333-016-0050

Method for Determining Flashpoint of Extremely Flammable Contents of Self-Pressurized Containers

The apparatus used in the Tagliabue Open-Cup Flashpoint Apparatus as described in OAR 333-016-0035. Some means such as dry ice in an open container is used to chill the pressurized container. The container, the flash cup, and the bath solution of the apparatus (brine or glycol may be used) are chilled to a temperature of about 25°F below zero. The chilled container is punctured to exhaust the propellant. The chilled formulation is transferred to the test apparatus and tested in accordance with the method described in OAR 333-016-0035.

333-016-0055

Method for Determining the Sound Pressure Level Produced by Toy Caps

(1) Equipment required. The equipment for the test includes a microphone, a preamplifier (if required), and an oscilloscope:

(a) The microphone-preamplifier system shall have a free-field response uniform to within plus or minus two decibels from 50 hertz to 70 kilohertz or beyond, and a dynamic range covering the interval 70 to 160 decibels relative to 20 micronewtons per square meter. Depending on the model, the microphone shall be used at normal or grazing incidence, whichever gives the most uniform free-field response. The microphone shall be calibrated both before and after the test of a model of cap. The calibration shall be accurate to within plus or minus one decibel. If the calibration is of the pressure type or of the piston-phone plus electro-static actuator type, it shall be corrected to free-field conditions in accordance with the manufacturer's instructions;

(b) The oscilloscope shall be the storage type or one equipped with a camera. It shall have a response uniform to within plus or minus one decibel from 50 hertz to 250 kilohertz or higher. It shall be calibrated to within plus or minus one decibel against an external voltage source periodically during the tests.

(2) Procedure:

(a) Place the sound source and testing equipment so that neither the sound source nor the microphone is closer than one meter from any wall, floor, ceiling, or other large obstruction. Locate the sound source and the microphone in the same horizontal plane with a distance of 25 centimeters between the diaphragm of the microphone and the position of the sound producing component of the sound source, e.g., explosive or diaphragm. Measure the peak sound pressure level at each of the six designated orientations of the sound source with respect to the measuring microphone. When caps are tested use the type of pistol that would ordinarily be used with the caps being tested. The zero degree orientation corresponds to an unobstructed and direct line from the sound source to the microphone, e.g., the muzzle of a pistol pointing at the microphone. The 90, 180 , and 270 degree orientations are measured in a clockwise direction when looking down on the sound source and correspond to looking down on a pistol with its barrel horizontal as illustrated by the following figure:

0°
270° 90°
180°

(b) Testing Caps With a Pistol and Testing Gun. The hammer and trigger orientations are obtained by rotating the pistol about the axis of the barrel, when the pistol is in the 90-degree of 270-degree orientation, so that the hammer and the trigger are each respectively closest to and in the same horizontal plane with the microphone. Fire ten shots at each of the six orientations, obtaining readings on the oscilloscope of the maximum peak voltage for each shot. Average the results of the ten firings for each of the six orientations;

(c) Sound Sources Other Than Caps and Guns. Rotate the sound source about its axis to the four degrees of orientation. Produce ten sound emissions at each of the orientations obtaining readings on the oscilloscope of the maximum peak voltage for each emission. Average the results of the ten firings for each of the four orientations;

(d) Computation. Using the orientation that yields the highest average value, convert the value to sound pressure levels in decibels relative to 20 micronewtons per square meter using the response to the calibrated measuring microphone.

333-016-0056
Test Methods for Simulating Use and Abuse, Toys, Games, and Other Articles Intended for Use by Children

(1) Objective. This rule and OAR 333-016-0057, 333-016-0058, and 333-016-0059 describe specific test methods for simulating normal use of toys and other articles intended for children as well as the reasonably foreseeable damage or abuse to which the articles may be subjected. The test methods are for use in exposing potential hazards that would result from the normal use or the reasonably foreseeable damage or abuse of such articles intended for children.

(2) Application:

(a) Toys intended for children 96 months of age or less must satisfy all tests in this section and shall also satisfy tests which have been established for articles intended for the specified age groups of children: 18 months of age and less, over 18 months but not over 36 months of age, and over 36 months but not over 96 months of age, which are set forth in OAR 333-016-0057, 333-016-0058, and 333-016-0059. If an article is marked, labeled, advertised, or otherwise intended for children of an age spanning more than one of such age groups, the article will be subjected to those tests providing the most stringent requirements. If an article is not age-labeled or is unreasonably age-labeled and is intended for children 96 months of age or less, it will also be subjected to the most stringent test requirements;

(b) Each of the test methods described in this rule and in OAR 333-016-0057, 333-016-0058, and 333-016-0059 shall be applied to a previously untested sample, except the tension test which shall be conducted with the test sample used in the torque test if no failure occurred during that test;

(c) Normal use testing:

(A) (Known herein as Requirement No. 1) These tests are intended to simulate normal use conditions so as to assure that hazards are not generated through normal wear and deterioration. The object of these tests shall be to simulate the normal play mode of the toy, and the tests in Requirement No. 2, are therefore unrelated. The tests are intended to uncover hazards, rather than to demonstrate the reliability of the toy. The fact that a mechanism or material of a toy fails during testing is only relevant if the failure creates a potential hazard. Toys shall be subjected to appropriate tests to repeatedly simulate the normal use of the particular toy. For example, levers, wheels, catches, triggers, strings, wires, chains, and so on, that are intended to be actuated by a child shall be repeatedly operated. Spring or power-operated devices shall be similarly tested. The tests shall be carried out in a normal use environment. For example, toys intended for use in the bathtub shall be tested in soapy water, and toys intended for use in the sandbox shall be exposed to sand during testing. The toy should be inspected after such tests, and hazards such as points, sharp edges, and release of small parts shall be evaluated according to the relevant requirements under OAR 333-016-0080;

(B) Abuse testing and impact testing. Tests in (A,i) through (A,iii); (B,i) through (B,v); (E,i) through (E,v); (F,i) through (F,v); and (G,i) through (G,v); (known herein as Requirement No. 2) are to simulate the exposure of a toy to mechanical damage through dropping, throwing, and other actions likely to be performed by a child, and to simulate situations in which possible damage can occur to a toy by reason of it falling from a crib, a table or counter top, or other impact situation which may occur as a result of reasonably foreseeable abuse. After testing, the toy shall be examined for mechanical hazards, such as hazardous sharp edges and points, and ingesting hazards, such as small liberate components, chips, or fragments according to the particular age grading requirement for each hazard, as described in OAR 333-016-0080.

(d) Special impact tests for certain classes of toys exempted from drop tests:

(A) Tip over test for large floor-standing toys. Toys intended for use on the floor, such as refrigerators and ovens, that have a volume of greater than 3 cubic feet, calculated without regard to minor appendages, or a projected base area of 400 square inches or more, shall be tipped over onto an impact area of the construction described in Test (E,i). The impact area shall be sufficiently large to accommodate the toy in whatever attitude it falls. The toy shall be placed on the floor in intended use position and tipped over 3 times by pushing on the floor in intended use position and tipped over 3 times by pushing it slowly past its center of balance, and allowed to fall without restraint. For toys with legs, projected base area is determined by calculation area enclosed by straight lines connecting outermost edge of each leg of the perimeter (Known herein as Test (A,i));

(B) Impact test for projectiles. Projectiles shall be propelled by their discharge mechanism three times into a concrete block wall (or equivalent surface) located at a distance twice the length of

the projectile from the front end of the launcher. The discharge mechanism shall be aimed perpendicular to the wall. (Known herein as Test (A,ii)) The discharge mechanisms shall be drop tested according to another test, (F,i);

(C) Tumble test for wheeled toys. Wheeled toys weighing more than 3.0 pounds shall be tumbled down a flight of six steps with risers not less than seven inches high (see **Figure 4**). The treads may be wood, cement, or metal. The toy shall be caused to fall down the steps two times in each of four attitudes: Tumbling forwardly, tumbling rearwardly end-over-end, and tumbling from each side. The toy shall be pushed slowly over the edge of the top step in the appropriate attitude, and released as soon as it begins to fall of its own weight. The test shall be considered complete for an attitude even if the toy does not reach the bottom of the flight of steps (Known herein as Test (A,iii));

(D) Exemptions from impact tests. The following categories are exempted from test (A,i) through test (A,iii):

(i) Toys or assembled toys having nonwheeled bases, such as gas stations and farm sets in which the base has an area greater than 175 square inches and which do not tip over when placed on a 45 degree incline in any direction. If the toy tips, then it shall be tested according to test (A,i). However, accessories, or components of these toys that are not affixed to the base structure shall conform to test (E,i) or test (F,i) or test (G,i);

(ii) Toys weighing more than ten pounds; and

(iii) Paints, chalks, and crayons. However, the containers provided for these articles shall conform to test (E,i), test (F,i), or test (G,i).

(E) Impact test for toys that cover the face. The toy shall be held firmly in a suitable clamp with that portion covering the eyes in a horizontal plane. Drop a 5/8-inch diameter steel ball weighing 0.56 ounce (tolerance plus 0.03 ounce, minus zero ounce) from a height of 50 inches upon the horizontal upper surface of the toy in the area that would cover the eyes in normal use. The ball may be guided, but not restricted, in its fall by being dropped through a perforated tube extending to within approximately 4-inches of the toy. The toy will be considered to have failed if the material cracks through its entire thickness or if any material visible to the naked eye becomes detached. (Known herein as Test (A,iv).)

(e) Special tests for certain classes of toys exempted from drop and impact tests. These tests relate to the requirements of OAR 333-016-0080:

(A) Tires, wheels, axles:

(i) The toy shall be clamped so that the wheel axle is vertical. A wire hook shaped as shown in **Figure 5** shall be positioned on the lower tire and attached to a dead weight of ten pounds if the tire is on a toy intended for children aged up to 18 months, or to a dead weight of 15 pounds if the tire is on a toy intended for children aged from 18 months to 36 months and if the tire falls within the limits of ingestion hazards as defined in OAR 333-016-0080. The load shall be applied gradually and maintained for ten seconds. Test (E,iii) and (E,iv) shall also be applied (Known as Test (B,i).);

(ii) Pull test for wheels on hubs free to rotate. The toy shall be supported or clamped with the axle in a vertical position. If the lower wheel is accessible so that all of the claws of a three-pronged claw hook can be engaged around the wheel hub or tire, then a load of 10, 15, or 20 pounds shall be applied. The load shall be 10 pounds in the case of wheels 3/4-inch or less in diameter on toys intended for children aged less than 18 months, 15 pounds in the case of wheels 3/4-inch or less in diameter on toys intended for children from 18 months but not over 96 months, and 20 pounds in the case of wheels greater than 3/4-inch in diameter. The three-pronged claw hook shall be equivalent in type to that shown in **Figure 6** and described in **British Standard No. 3443**, **Code of Safety Requirements for Children's Toys and Playthings**, **1968**, **p. 12**. The load shall be applied gradually over a five-second period and shall be maintained for ten seconds. If the wheel hub or tire is inaccessible to the three-pronged claw, then a suitable test hook shall be substituted for the three-pronged device. The hook shall be applied to the periphery, and the test shall be carried out as described above. Tests (E,iii) and E,iv) shall also be applied (Known herein as Test (B,ii));

(iii) Pull test for wheels fixed onto axles. A schematic diagram of a device for applying torque is shown in **Figure 7**. A load of 20 pounds is applied. The procedure is that used in Test (B,ii) (Known herein as Test (B,iii));

(iv) Toys assembled with "snap-in" axles. A 15 pound dead weight shall be applied to the axle, adjacent to a bearing, for ten seconds, using a hook and string for attachment to the toy. The toy shall be held horizontally in a test-convenient fixture, and the load shall be applied gradually over a five second period and then shall be maintained for ten seconds. If the axle cannot be hooked as described above, the toys shall be held horizontally, and a ten pound dead weight shall be attached to one wheel by means of a hook or clamp. The load shall be applied gradually over a five-second period and then shall be maintained for ten seconds (Known herein as Test (B,iv));

(v) Compression test for "snap-on" wheel and axle assemblies. This test is for compliance with OAR 333-016-0080(3)(b)(A)(iii) if the axle and wheel are removed by the procedure described in test (B,iv). The wheel and axle assembly shall be positioned with the axle vertical over a hole in a rigid plate as shown in **Figure 8**. The hole shall be large enough in diameter to permit the axle to pass through. A load of 20 pounds is applied to the upper wheel, using a suitable adaptor to prevent interference with the axle. The load shall be applied gradually over a five-second period and then shall be maintained for ten seconds. When applying the load, the upper wheel shall be guided, if necessary, in order to maintain the axle vertical, but shall not be restrained from moving downward. In those cases where the axle is forced through either wheel, the axle shall not form a hazardous point or projection. (Known herein as Test (B,v))

(B) Bending test for wires and rods. Any toy that is intended to be bent or formed and that is equipped with metal wire(s) or other metal material(s) for retention of form shall be subject to this test. The toy shall be suitably secured in a vise equipped with vise shields of 3/8-inch inside diameter as shown in **Figure 9**. The component containing the wire or rod shall be held not less than three inches from the clamping point. The component shall then be bent through a 60 degree arc. The component shall then be bent in the reverse direction through a 120 degree arc. A back and forth bending through the 120 degree arc shall be repeated for 30 cycles. One back and forth bending (two 120 degree arc bends) shall constitute one cycle. The test shall be conducted at the rate of one-half cycle or 120 degrees per second with a 60 second rest period occurring after each ten cycles. Apply a maximum force of 10 pounds plus or minus 0.5 pound when testing toys covered by OAR 333-016-0057 and 15 pounds plus or minus 0.5 pound when testing toys covered by OAR 333-016-0058 or 333-016-0059. Apply the force perpendicularly to the major axis of the component at a point two inches (5 centimeters) from the intersection of the component with the main body of the toy or at the end of the component if the component is less than 2 inches plus or minus 0.05 inch (5 centimeters) long (Known herein as Test C,i));

(C) Test for removal of components from toys. The toy shall be restrained in a test-convenient clamp, and the component connected to an extensometer by a 3-pronged claw hook or other suitable means of attachment. Care shall be taken to ensure that the hook or attachment device does not compress the protective components of OAR 333-016-0080(3)(a)(C)(i) and (3)(b)(A)(iii) so that it hinders possible removal. The extensometer shall be pulled perpendicular to the joint between the component and the body of the toy. The load shall be applied gradually over a five second period and then shall be maintained for ten seconds. With regard to the push force requirement in OAR 333-016-0080, the projection, or the toy, shall be held in a test-convenient clamp. A push force of ten pounds shall be applied using an extensometer or dead weight gradually over a period of five seconds and then shall be maintained for ten seconds (Known herein as Test (D,i));

(D) Test for mouth-actuated toys. A piston pump, such as bicycle pump, capable of discharging and taking in more than 18

cubic inches of air in less than three seconds shall be connected to the mouthpiece of the toy, and to the air outlet if applicable. The toy shall be subjected to ten alternation blowing and sucking cycles of 18 cubic inches of air. Any objects released as a result of this test shall be inspected for conformance with OAR 333-016-0080(4)(a) (Known herein as Test D,ii));

(E) Tests for thermal and fire features:

(i) Electrical toy. When tested under the conditions described in test (T,i) an electrical toy shall not attain a temperature at any point sufficiently high to constitute a fire hazard or to adversely affect any materials employed and shall not show a maximum temperature higher than those established by subparagraphs (2)(e)(E)(v) and (vi) of this rule. These maximum surface temperature requirements are not applicable to educational or hobby-type products such as lead-casting sets and wood-burning tools which are appropriately labeled on the shelf pack or package as being intended only for children over twelve years provided that the maximum surface temperature of any such toy does not exceed that reasonably required to accomplish the intended technical effect. Such toys shall be provided with specific instructions and the warning statements required by and in accordance with 333-016-0080, and shall be appropriately labeled as educational or hobby-type products;

(ii) Test conditions (Known herein as Test (T,i)):

(I) General. Tests shall be conducted while the toy is connected to a circuit of 60-cycle-per-second (60 Hertz) current using the materials supplied with the toy or using materials otherwise intended to be used with the toy. Following such tests, the toy shall be energized for a 6-hour period to determine that no hazardous conditions would result from unattended use of the toy;

(II) Voltage. The toy shall be tested at the voltage indicated in the manufacturer's rating or at 120 volts, whichever is greater.

(iii) Temperature measurements:

(I) General. (Known herein as Test (T,ii)) Temperatures shall be measured by means of instruments utilizing thermocouples of No. 30 AWG (American Wire Gage) wire (either copper and constantan or iron and constantan) and potentiometer-type instruments that are accurate and are calibrated in accordance with current good laboratory practices. The thermocouple wire shall conform with the requirements for "special" thermocouples as listed in the table of limits of error of thermocouples **(Table VIII)** in "**American Standard for Temperature Measurement Thermocouples, C96.1-1964**," approved June 9, 1964, by American National Standards Institute, Inc. The Standard was sponsored and published by the Instrument Society of America;

(II) Test procedures. The thermocouple junction and adjacent thermocouple lead wire shall be securely held in good thermal contact with the surface of the material whose temperature thermal contact will result from securely taping or cementing the thermocouple in place. If a metal surface is involved, brazing or soldering the thermocouple to the metal may be necessary. The surface temperatures of a toy shall be measured with the toy operating in any unattended condition (e.g., with and without opening and closing doors or covers) for a sufficient period of time to allow temperatures to become constant, or, in the case of a toy with a thermostatically controlled heating element, for a sufficient period of time to determine the maximum surface temperature attained. A temperature shall be considered to be constant when three successive readings taken at 15 minute intervals indicate no change.

(iv) Heating devices. Toy ovens, casting toys, popcorn, and candy makers, and other toys requiring the insertion of any materials or substances shall be additionally tested by feeding crumpled strips of newspaper and tissue paper into or onto the toy in place of the intended materials or substances. The test strips shall be conditioned for at least 48 hours in air at a temperature of 25 °C plus or minus 4°C. (77°F plus or minus 7°F) and a relative humidity of 50 percent plus or minus five percent. The test strips shall be two inches wide by eight inches long before crumpling. The crumpled paper shall occupy not more than 25 percent of the accessible volume. The performance of the toy shall be considered unacceptable if flaming occurs within a 60 minute period following the attainment of normal operating temperatures. If a light bulb is used for heating purposes, the test shall be conducted using the largest wattage bulb that can be easily inserted into the socket;

(v) Maximum acceptable surface temperatures. The maximum acceptable surface temperatures for electrically operated toys is set out in **Table 1**;

(vi) Maximum acceptable material temperatures. The maximum acceptable material temperatures for electrically operated toys is set out in **Table 2**. (Classes 105, 130, A and B are from "**Motors and Generators**," Standard MG-1-1967 published by the National Electrical Manufacturer's Association.)

(3) Definitions. As used in this rule and in OAR 333-016-0057, 333-016-0058, and 333-016-0059:

(a) "Accessible" — Accessible refers to any portion of a toy that can be contacted by a probe of the approximate shape and size of a child's finger. The insertion length and diameter of the probe shall be as specified below: Dimensions of probes for defining accessibility:

(A) Age 0–24 months (inclusive): Insertion length of probe — 2 inches; Diameter of probe — 1/4 inch;

(B) Age 25–60 months (inclusive): Insertion length of probe — 2-1/2 inches; Diameter of probe — 1/4 inch;

(C) Age 61–168 months (inclusive): Insertion length of probe — 3 inches; Diameter of probe — 1/4 inch.

NOTE: Age — Refers to the whole time of a beings existence since birth and may be expressed in either months or in years. When years are indicated, it means that the attained age in months is at least 12 times the numerical value indicated.

(b) "Curled Edge" — A curled edge is one in which the portion of the sheet adjacent to the edge is bent into an arc and forms an angle of less than 90 degrees with the base sheet as shown in **Figure 10**;

(c) "Discharge Mechanism" — A discharge mechanism is a system for releasing and propelling a projectile in a direction determined by the operator of the toy;

(d) "Edge, Hazardous" — A hazardous edge is defined as an edge that can cut a child's skin during normal use or reasonably foreseeable abuse of a toy. Such an edge is subjectively judged as hazardous if it appears sharp to the casual observer;

(e) "Elastic" — An elastic material is defined as one which will not break and will, essentially, instantaneously recover its former size and shape after being elongated at least ten percent at a testing speed of not less than 20 inches per minute;

(f) "Fabric" — Any material, woven, knitted, fitted, or otherwise produced from or in combination with any natural or synthetic fiber;

(g) "Feathering" — Feathering is a beveling of an edge (or decrease in thickness moving toward the edge) caused during shearing or cutting of sheet metal;

(h) "Flash" — Flash is excess material which escapes between the mating parts of a mold assembly;

(i) "Folding Mechanisms" — Folding mechanisms are those have an assembly of hinged, pivoted, or sliding members that can produce a scissor or shear action during the operation of the mechanisms;

(j) "Hazard" — A hazard is defined as any characteristic of a toy that presents an unreasonable risk of injury or illness during normal use or as a result of reasonably foreseeable abuse;

(k) "Hemmed Edge" — A hemmed edge is one in which the portion of the sheet adjacent to the edge is folded back on the sheet itself through an angle of approximately parallel to the main sheet, as shown in **Figure 11**;

(l) "Hinge Line Clearance" — The hinge line clearance is the clearance between the stationary portion of the toy and the movable portion along, or adjacent to, a line projected through the axis of rotation. **Figure 12** illustrates the hinge line clearance, using a box with a lid as an example;

(m) "Impulsive Noise" — An impulsive noise is one in which the variations in noise level involve maxima at intervals of greater than one second;

(n) "Lap Joint" — A lap joint is one in which an edge overlaps a parallel surface but is not necessarily mechanically attached to it

at all points along the length. Typical lap joints are shown in **Figure 13**;

(o) "Normal Use" — Normal use of a toy is defined as those play modes which conform to the instructions that accompany the toy, or which have been established by tradition or custom;

(p) "Point, Hazardous" — A hazardous point is one that can puncture or lacerate a child's skin during normal use or reasonably foreseeable abuse. Such a point is subjectively judged as hazardous if it appears sharp to the casual observer;

(q) "Projectile" — A projectile is an unrestrained object propelled by means of a discharge mechanism that is capable of storing and releasing energy under the control of the operator;

(r) "Projection, Hazardous" — A hazardous projection is one that, because of its material and configuration, appears to the casual observer to present a puncture hazard if a child should fall onto it;

(s) "Protective Cap or Cover" — A protective cap or cover is a component that is attached to a potentially hazardous edge or projection to reduce the possibility of injury;

(t) "Protective Tip" — A protective tip is a component that is attached to the impacting end of a projectile to minimize injury if it should impact on the body. A protective tip may perform other functions such as the prevention of damage to the projectile on striking a target, providing a means of attaching the projectile to the target as in the case of suction cups, or the prevention of damage to inanimate objects;

(u) "Reasonably Foreseeable Abuse" — Reasonably foreseeable abuse is defined as conditions to which a child may subject a toy that is not normal use conditions. Examples of abuse would result from:

(A) Curiosity, such as deliberate disassembly;

(B) Lack of physical coordination or manual dexterity, such as dropping; and

(C) Use for a purpose for which the toy is not intended, such as use of a toy football helmet as if it were a real protective device.

(v) "Rigid" — Rigid refers to any material that has a Young's modulus in tension of greater than 100,000 psi;

(w) "Rolled Edge" — Rolled edge is one in which the portion of the sheet adjacent to the edge is bent into an arc and forms an angle between 90 degrees and 120 degrees with the main sheet, as shown in **Figure 14**;

(x) "Toy":

(A) "Toy" means any toy, game, pacifier, or other article designed, labeled, advertised, or otherwise intended for use by children;

(B) "Mouth toy" means any toy reasonably intended to be placed into or in contact with a child's mouth.

(4) Prior to testing, each sample shall be subjected to a temperature of 73°F plus or minus 3°F (23°C plus or minus 2°C.) at a relative humidity of 20–70 percent for a period of at least four hours. The toy testing shall commence within five minutes after the toy has been removed from the preconditioning atmosphere.

(5) Toys reasonably intended to be assembled by an adult and not intended to be taken apart by a child shall be tested only in the assembled state if the shelf package and the assembly instruction prominently indicate that the article is to be assembled only by an adult.

(6) Toys intended to be repeatedly assembled and taken apart shall have the individual pieces as well as the completed article subjected to these test procedures.

(7) In situations where a test procedure may be applied in more than one way to a toy test component, the point (or direction) of force (or torque) application which results in the most severe conditions shall be used.

333-016-0057

Test Methods for Simulating Use and Abuse of Toys and Other Articles Intended for Children 18 Months of Age or Less

(1) Application. The test methods described in this section shall be used in determining compliance, in addition to other requirements of toys intended for use by children 18 months of age or less.

(2) Impact test. (Drop Test) Known as Test (E,i). Toys subject to special impact test in OAR 333-016-0056(2)(d) excepted.

(a) Application. Toys having a weight of less than three pounds shall be subjected to this test;

(b) Impact medium. The impact medium shall consist of a 0.125-inch nominal thickness of Type IV vinyl-asbestos tile, as specified in Federal specification SS-T-31-2A, over at least 2.5-inch thickness of concrete. The impact area shall be at least three square feet;

(c) Testing procedure. The toy shall be dropped ten times from a height of 4.5 feet plus or minus 0.5-inch. The toy shall be dropped in random orientation. After each drop the test sample shall be allowed to come to rest and examined and evaluated before continuing.

(3) Bite test. Known as Test (E,ii).

(a) Application. A toy (or component or any accessible portion thereof) that has an external dimension of 1-1/4 inches plus or minus .05-inch or less and a design configuration that would permit a child to insert a portion into the mouth in any orientation up to a biting thickness of 1-1/4 inches plus or minus .05-inch, for a penetration of at least one-fourth inch, shall be subject to this test;

(b) Test equipment:

(A) Contact mechanism. The contact mechanism shall be two metal strips, each one thirty-second inch thick. The strips shall be circular or semicircular in shape with a 1-1/2 inch diameter and a one-half inch height. The edges thereof shall be rounded to a radius of one sixty-fourth inch measuring 0.25-inch plus or minus 0.002-inch (0.635 centimeter), high and each having a contact edge radius of 0.020-inch plus or minus 0.002-inch (0.05 centimeter), for at least a 150-degree cross-sectional arc. A suggested contact mechanism appears in **Figure 15**;

(B) Loading device. The loading device shall be a scale or force gauge having an accuracy of plus or minus .05 pound;

(C) Testing procedure. The toy shall be placed in the loading device in any reasonable position for a restriction of 0.25-inch to 0.5-inch utilizing not more than 180 degrees of the arc and a test load increasing to 25 pounds plus or minus .05 pound over five seconds shall be evenly applied. This load shall be maintained for an additional ten seconds.

(4) Torque test. Known herein as Test (E,iii):

(a) Application:

(A) General. A toy with a projection, part, or assembly that the child can grasp by at least the thumb and forefinger or the teeth shall be subject to this test;

(B) Toys with rotating components. Projections, parts, or assemblies that are rigidly mounted on a rod or shaft designed to rotate shall be tested with the rod or shaft clamped to prevent rotation.

(b) Test equipment:

(A) Loading device. The loading device shall be a torque gauge, torque wrench, or other appropriate device having an accuracy of -2 inch-pound (-0.23 kilogram-centimeter);

(B) Clamp. The clamp shall be capable of holding the test component firmly and transmitting a torsional force (see **Figure 16**);

(C) Test procedure. With the sample rigidly fastened in any reasonable test position, the clamp is fastened to the test object or component. A torque of two inch-pounds plus or minus 0.2 pound shall be applied clockwise over a period of five seconds or until a rotation of 180 degrees from the original position has been attained, or two inch-pounds exceeded. The torque or maximum rotation shall be maintained for an additional ten seconds. The torque shall then be removed and the test component permitted to

return to relaxed condition. This procedure shall then be repeated in a counter-clockwise direction.

(5) Tension test. Known herein as Test (E,iv):

(a) Application:

(A) General. With the exception of tires, wheels, and axles, which are tested by 333-016-0065(2)(e)(A) and test (E,iii) and test (E,iv). Any projection of a toy that the child can grasp by at least the thumb and forefinger or the teeth shall be subject to this test. This test is to be conducted on the toy after it has been subjected to test (E,iii);

(B) Mouth toy. A mouth toy shall be tested immediately after being subjected to the procedure described in paragraph (4)(b)(C) of this rule;

(C) Stuffed toys and beanbags. A stuffed toy or beanbag constructed of pliable materials having seams (such as fabrics) shall have the seams subjected to 10 pounds plus or minus 0.5 pound (4.55 kilograms) of force applied in any direction.

(b) Test equipment:

(A) Clamps. One clamp capable of applying a tension load to the test component is required. A second clamp suitable for applying a tension load perpendicularly to the major axis of the test component is also required;

(B) Loading device. The loading device is a self-indicating gauge or other appropriate means having an accuracy of -0.5 pound (-225 grams);

(c) Test procedure. With the test sample fastened in a convenient position, an appropriate clamp shall be attached to the test object or component. A 10 pound plus or minus 0.5 pound direct force shall be evenly applied parallel to the major axis of the test component over a period of five seconds and then maintained for an additional ten seconds. The tension clamp shall then be removed and a second clamp appropriate for pulling at 90 degrees shall be attached to the test object or component. A ten pound plus or minus 0.5 pound tensile force shall be evenly applied perpendicular to the major axis of the test component over a period of five seconds and then maintained for an additional ten seconds.

(6) Compression test. Known herein as Test (E,v):

(a) Application. This test is required in addition to any other test which may be required in these rules. Any area on the surface of a toy that is accessible to a child and inaccessible to flat-surface contact during the impact test shall be subject to this test;

(b) Test apparatus. The loading device shall be a rigid metal disk of 1-1/2 inches plus or minus 0.15-inch in diameter and three-eighths inch in thickness. The perimeter of the disk shall be rounded to a radius of one thirty-second inch to eliminate irregular edges. The disk shall be attached to a self-indicating gauge scale having an accuracy of plus or minus 0.5 pound;

(c) Test procedure. The shaft shall be positioned so that it is generally perpendicular to the surface under test. A direct force increasing to 20 pounds plus or minus 0.5 pound over a period of five seconds shall be applied through the disk. This load shall be maintained for an additional ten seconds. During the test the toy is to rest on a flat, hard surface in any convenient position.

[ED. NOTE: Figures referenced are available from the agency.]

Test Methods for Simulating Use and Abuse of Toys and Other Articles Intended for Children Over 18 But not Over 36 Months of Age

(1) Application. The test methods described in this section shall be used in addition to other requirements in determining compliance of toys intended for use by children over 18 but not over 36 months of age.

(2) Impact test. (Drop test.) Known herein as Test (F,i):

(a) Application. Toys subject to special impact tests in OAR 333-016-0056(2)(d) excepted. Toys having a weight of less than four pounds plus or minus .01 pound shall be subject to this test;

(b) Impact medium. The impact medium shall consist of a 0.125-inch nominal thickness of Type IV vinyl-asbestos tile, as specified in federal specification SS-T-312A, over at least a 2.5-inch thickness of concrete. The impact area shall be at least three square feet;

(c) Testing procedure. The toy shall be dropped four times from a height of three feet plus or minus 0.5-inch. The toy shall be dropped in random orientation. After each drop the test sample shall be allowed to come to rest and examined and evaluated before continuing.

(3) Bite test. Known herein as Test (F,ii):

(a) Application. A toy (or component or any accessible portion thereof) that has an external dimension of 1-1/4 inches plus or minus 0.05-inch or less and a design configuration that would permit a child to insert a portion into the mouth in any orientation up to a biting thickness of 1-1/4 inches plus or minus 0.05 inch for a penetration of at least one-fourth inch, shall be subject to this test;

(b) Test equipment:

(A) Contact mechanism. The contact mechanism shall be two metal strips each measuring 0.25 inch plus or minus 0.002 inch (0.635 centimeter) high and each having a contact edge radius of 0.020 inch plus or minus 0.002 inch (0.05 centimeter) for at least a 150 degree cross-sectional arc. A suggested contact mechanism appears in **Figure 15**.

(B) Loading device. The loading device shall be a seal or force gauge having an accuracy of -0.5 pound.

(C) Testing procedure. The toy shall be placed in a loading device in any reasonable position for a penetration of 0.25 inch to 0.5 inch utilizing not more than 180 degrees of the arc and a test load increasing to 50 pound plus or minus 0.5 pound over five seconds shall be evenly applied. This load shall be maintained for an additional ten seconds.

(4) Torque test. Known herein as Test (F,iii):

(a) Application:

(A) General. A toy with a projection, part, or assembly that the child can grasp by at least the thumb and forefinger or the teeth shall be subject to this test;

(B) Toys with rotating components. Projections, parts, or assemblies that are rigidly mounted on a rod or shaft designed to rotate shall be tested with the rod or shaft clamped to prevent rotation.

(b) Test equipment:

(A) Loading device. The loading device shall be a torque gauge, torque wrench, or other appropriate device having an accuracy of -0.2 inch-pound (-0.23 kilogram-centimeter);

(B) Clamp. The clamp shall be capable of holding the test component firmly and transmitting a torsional force (see **Figure 16**);

(C) Test procedure. With the sample rigidly fastened in any reasonable test position, the clamp is fastened to the test object or component. A torque of three inch-pounds plus or minus 0.2 inch-pounds shall be evenly applied clockwise over a period of five seconds or until a rotation of 180 degrees from the original position has been attained, or 3 inch-pounds plus or minus 0.2 inch-pounds exceeded. The torque or maximum rotation shall be maintained for an additional ten seconds. The torque shall then be removed and the test component permitted to return to relaxed condition. This procedure shall then be repeated in a counterclockwise direction.

(5) Tension test. Known herein as Test (F,iv):

(a) Application:

(A) General. With the exception of tires, wheels, and axles which are tested by 333-016-0056(2)(e)(A) and test (E,iii) and test (E,iv). Any projection of a toy that the child can grasp by at least the thumb and forefinger, or the teeth, shall be subject to this test. This test is to be conducted on the toy after it has been subjected to test (E,iii);

(B) Stuffed toys and beanbags. A stuffed toy or beanbag constructed of pliable materials having seams (such as fabrics) shall have the seams subjected to 15 pounds plus or minus 0.5 pound (6.80 kilograms) of force applied in any direction.

(b) Test equipment:

(A) Clamps. One clamp capable of applying a tension load to the test component is required. A second clamp suitable for

applying a tension load perpendicularly to the major axis of the test component is also required.

(B) Loading device. The loading device is to be a self-indicating gauge or other appropriate means having an accuracy of plus or minus 0.5 pound (255 grams).

(c) Test procedure. With the test sample fastened in a convenient position, an appropriate clamp shall be attached to the test object or component. A 15 pound plus or minus 0.5 pound direct force shall be evenly applied parallel to the major axis of the test component over a period of five seconds and then maintained for an additional ten seconds. The tension clamp shall then be removed and a second clamp appropriate for pulling at 90 degrees shall be attached to the test object or component. A 15 pound plus or minus 0.5 pound tensile force shall be evenly applied perpendicular to the major axis of the test component over a period of five seconds and then maintained for an additional ten seconds.

(6) Compression test:

(a) Application. This test is required in addition to any other test which may be required in these rules. Any area on the surface of a toy that is accessible to a child and inaccessible to flat-surface contact during the impact test shall be subject to this test;

(b) Test apparatus. The loading device shall be a rigid metal disk 1-1/8 inches plus or minus 0.015-inch in diameter and three-eighths inch in thickness. The perimeter of the disk shall be rounded to a radius of one 30-second inch to eliminate irregular edges. The disk shall be attached to a self-indicating gauge scale having an accuracy of plus or minus .05 pound;

(c) Test procedure. The shaft shall be positioned so that it is generally perpendicular to the surface under test. A direct force increasing to 25 pounds plus or minus .05 pound over a period of five seconds shall be evenly applied through the disk. This load shall be maintained for an additional ten seconds. During the test the toy is to rest on a flat, hard surface in any convenient position.

333-016-0059

Test Methods for Simulating Use and Abuse of Toys and Other Articles Intended for Children Over 36 But Not Over 96 Months of Age

(1) Application. The test methods described in this section shall be used in addition to other requirements in determining compliance of toys intended for use by children over 36 but not over 96 months of age.

(2) Impact test. Known herein as Test (G,i):

(a) Application. Toys subject to special impact tests in 333-016-0056(2)(d) are exempted. Toys having a weight of less than ten pounds plus or minus 0.1 pound shall be subject to this test;

(b) Impact medium. The impact medium shall consist of a 0.125-inch nominal thickness of Type IV vinyl-asbestos tile, as specified in federal specification SS-T-312A, over at least a 2.5-inch thickness of concrete. The impact area shall be at least three square feet;

(c) Testing procedure. The toy shall be dropped four times from a height of three feet plus or minus 0.5-inch. The toy shall be dropped in random orientation. After each drop the test sample shall be allowed to come to rest and examined and evaluated before continuing.

(3) Bite test. Known herein as Test (G,ii):

(a) Application. A toy (or component) that is a mouth toy shall be subject to this test;

(b) Test equipment:

(A) Contact mechanism. The contact mechanism shall be two metal strips each measuring 0.25-inch plus or minus 0.002-inch (0.635 centimeter) high and each having a contact edge radius of 0.020-inch plus or minus 0.002-inch (0.5 centimeter) for at least a 150 degree cross-sectional arc. A suggested contact mechanism appears in **Figure 15**;

(B) Loading device; The loading device shall be a scale or force gauge having an accuracy of plus or minus 0.5 pound.

(c) Testing procedure. The toy shall be placed in the loading device in any reasonable position for a penetration of 0.25 to 0.5-inch utilizing not more than 180 degrees of the arc and a test load increasing to 100 pounds plus or minus 0.5 pound over five seconds shall be evenly applied. This load shall be maintained for an additional ten seconds.

(4) Torque test. Known herein as Test (G,iii):

(a) Application:

(A) General. A toy with a projection, part, or assembly that the child can grasp by at least the thumb and forefinger or the teeth shall be subject to this test;

(B) Toys with rotating components. Projections, parts, or assemblies that are rigidly mounted on a rod or shaft designed to rotate shall be tested with the rod or shaft clamped to prevent rotation.

(b) Test equipment:

(A) Loading device. The loading device shall be a torque gauge, torque wrench, or other appropriate device having an accuracy of plus or minus 0.2 inch-pound;

(B) Clamp. The clamp shall be capable of holding the test component firmly and transmitting a torsional force (see **Figure 16**);

(C) Test procedure. With the sample rigidly fastened in any reasonable test position, the clamp is fastened to the test object or component. A torque of four inch-pounds plus or minus 0.2 inch-pound shall be evenly applied clockwise over a period of five seconds or until a rotation of 180 degrees from the original position has been attained, or four inch-pounds plus or minus 0.2 inch-pound exceeded. The torque or maximum rotation shall be maintained for an additional ten seconds. The torque shall then be removed and the test component permitted to return to a relaxed condition. This procedure shall then be repeated in a counterclockwise direction.

(5) Tension test. Known herein as Test (G,iv):

(a) Application:

(A) General. Any projection of a toy that the child can grasp by at least the thumb and forefinger or the teeth shall be subject to this test. The test is to be conducted on the toy after it has been subjected to test (E, iii);

(B) Stuffed toys and beanbags. A stuffed toy or beanbag constructed of pliable materials having seams (such as fabrics) shall have the seams subjected to 15 pound plus or minus 0.5 pound (6.80 kilograms) of force applied in any direction.

(b) Test equipment:

(A) Clamps. One clamp capable of applying a tension load to the test component is required. A second clamp suitable for applying a tension load perpendicularly to the major axis of the test component is also required;

(B) Loading device. The loading device is to be a self-indicating gauge or other appropriate means having an accuracy of plus or minus 0.5 pound (plus or minus 225 grams).

(c) Test procedure. With the test sample fastened in a convenient position, an appropriate clamp shall be attached to the test object or component. A 15 pound plus or minus 0.5 pound direct force shall be evenly applied parallel to the major axis of the test component over a period of five seconds and then maintained for an additional ten seconds. The tension clamp shall then be removed and a second clamp appropriate for pulling at 90 degrees shall be attached to the test object or component. A 15 pound plus or minus 0.5 pound tensile force shall be evenly applied perpendicular to the major axis of the test component over a period of five seconds and then maintained for an additional ten seconds.

(6) Compression test. Known herein as Test (G,v):

(a) Application. This test is required in addition to any other test which may be required in these rules. Any area on the surface of a toy that is accessible to a child and inaccessible to flat-surface contact during the impact test shall be subject to this test;

(b) Test apparatus. The loading device shall be a rigid metal disk 1-1/8 inches plus or minus 0.15-inch in diameter and three-eighths of an inch in thickness. The perimeter of the disk shall be rounded to a radius of one thirty-second of an inch to eliminate

irregular edges. This disk shall be attached to the self-indicating gauge scale having an accuracy of plus or minus 0.5 pound;

(c) Test procedure. The shaft shall be positioned so that it is generally perpendicular to the surface under test. A direct force increasing to 30 pounds plus or minus 0.5 pound over a period of five seconds shall be evenly applied through the disk. This load shall be maintained for an additional ten seconds. During the test the toy is to rest on a flat, hard surface in any convenient position.

333-016-0060

Products Declared to be Hazardous Substances Under ORS 453.055(1)

The Administrator finds that the following articles are hazardous substances within the meaning of ORS 453.055(1) and 453.005 because they are capable of causing substantial person injury or illness during or as approximate result of any customary or reasonably foreseeable handling or use:

(1) Charcoal Briquettes and other forms of charcoal in containers for retail sale that may be used for cooking or heating indoors with inadequate ventilation.

(2) Paraphenylenediamine and products containing it.

(3) Powdered orris root and products containing it.

(4) Epoxy resins systems containing in any concentration ethylenediamine, diethylenetriamine, and diglycidyl ethers of molecular weight of less than 200.

(5) Formaldehyde and products containing one percent or more of formaldehyde.

(6) Oil of bergamot products containing two percent or more of oil of bergamot.

(7) Fluorocarbons when used as propellants for self-pressurized products.

Stat. Auth.: ORS 453.095

Stats. Implemented: ORS 453.005 & 453.055

Hist.: HD 40, f. 8-2-73, ef. 8-15-73

333-016-0065

Products Requiring Special Labeling Under ORS 453.055(2)

(1) Based on human experience as reported in the scientific literature or to the Poison Control Centers or the National Clearing House for Poison Control Centers, together with opinions of informed medical experts, the Administrator finds that the following substances are hazardous:

(a) Diethylene glycol including mixtures containing ten percent or more by weight of diethylene glycol;

(b) Ethylene glycol, including mixtures containing ten percent or more by weight of ethylene glycol;

(c) Products containing five percent or more, by weight, of benzene (also known as benzol) and products containing ten percent or more, by weight, of toluene (also known as toluol), exylene (also known as xylol), or petroleum distillates such as kerosene, mineral seal oil, naptha, gasoline, mineral spirits, stoddard solvent, and related petroleum distillates;

(d) Methyl alcohol including mixtures containing four percent or more by weight of methyl alcohol;

(e) Turpentine, including gum turpentine, gum spirits of turpentine, steam-distilled wood turpentine, sulfate wood turpentine, and destructively distilled wood turpentine and mixtures containing ten percent or more by weight of such turpentine.

(2) The Administrator also finds that these substances present special hazards and that the labeling required by ORS 453.035 is not adequate for the protection of the public health. The following specific label statements are deemed necessary to supplement the labeling required by ORS 453.035:

(a) Methyl alcohol. Because death and blindness might result from the ingestion of methyl alcohol, the label for this substance (including mixtures) within the percentages specified in subsection (1)(d) of this rule shall include the word "**danger**," and the additional word "**poison**," and the skull and crossbones symbol. The statement of hazard shall include "**vapor harmful**" and "**May be fatal or cause blindness if swallowed**." The label shall also bear the statement "**Cannot be made nonpoisonous**";

(b) Benzene, toluene, xylene, petroleum distillates:

(A) Because inhalation of the vapors of products containing five percent or more by weight, of benzene may cause blood dyscrasias, such products shall be labeled with the signal word "**danger**," the statement of hazard "**vapor harmful**," and the word "**poison**," and the skull and crossbones symbol. If the product contains ten percent or more, by weight, of benzene, it shall bear the additional statement of hazard "**Harmful or fatal if swallowed**" and the additional statements, "**If swallowed, do not induce vomiting. Call physician immediately**";

(B) Because products containing ten percent or more, by weight, of toluene, xylene, or any of the other substances listed in subsection (1)(c) of this rule may be aspirated into the lungs, with resulting chemical pneumonitis, pneumonia, and pulmonary edema, such products shall be labeled with the signal word "**danger**," the statement of hazard "**Harmful or fatal if swallowed**," and the statements, "**If swallowed, do not induce vomiting. Call physician immediately**";

(C) Because inhalation of the vapor of products containing ten percent or more, by weight, of toluene or xylene may cause systemic injury, such products shall bear the statement of hazard "**vapor harmful**" in addition to the statements prescribed in paragraph (B) of this subsection.

(c) Ethylene glycol and diethylene glycol. Because these substances (including mixtures) within the percentages specified above are commonly marketed, stored, and used in a manner increasing the possibility of accidental ingestion, the signal word "**warning**" is specified. In addition, for ethylene glycol the statement "**Harmful or fatal if swallowed**" and for diethylene glycol the statement "**Harmful if swallowed**" are required;

(d) Turpentine. Because products containing ten percent or more, by weight, of turpentine, in addition to oral toxicity resulting in systemic poisoning, may be aspirated into the lungs, with resulting chemical pneumonitis, pneumonia, and pulmonary edema, such products shall be labeled with the signal word "**danger**" and the statement of hazard "**Harmful or fatal if swallowed**";

(e) Charcoal briquettes and other forms of charcoal in containers for retail sale and intended for cooking or heating:

(A) Because inhalation of the carbon monoxide produced by burning charcoal indoors or in confined areas may cause serious injury or death, containers of such products shall bear the following borderlined statement: **WARNING: Do Not Use for Indoor Heating or Cooking Unless Ventilation is Provided for Exhausting Fumes to Outside. Toxic Fumes May Accumulate and Cause Death**;

(B) For bags of charcoal the statement specified in paragraph (A) of this subsection shall appear within a heavy borderline in a color sharply contrasting to that of the background, on both front and back panels in the upper 25 percent of the panels of the bag at least two inches below the seam, and at least one inch above any reading material or design elements in type size as follows: The signal word "**WARNING**" shall appear in capital letters at least three-eights inch in height; the remaining text of the aforementioned warning statement shall be printed in letters at least 3/16-inch in height.

(f) Fluorocarbon propellants. Because sudden death may follow deliberate misuse by inhalation of self-pressurized products containing fluorocarbon propellants, containers of such products shall bear the statement: "**WARNING — USE ONLY AS DIRECTED; intentional misuse by deliberately concentrating and inhaling the contents can be harmful or fatal**." This statement shall be in addition to any other required under the Act or these rules.

Stat. Auth.: ORS 453.095

Stats. Implemented: ORS 453.005 & 453.055

333-016-0070
Labeling of Fire Extinguishers

(1) When a substance or mixture of substances labeled for use in or as a fire extinguisher produces substances that are toxic within the meaning of OAR 333-016-0005(5) and (6) when used according to label directions to extinguish a fire, the containers for such substances shall bear the following labeling:

(a) When substances are produced which meet the definition of highly toxic within the meaning of OAR 333-016-0005(5), the signal word "**danger**" and the statement of hazard "**Poisonous gases formed when used to extinguish flame or on contact with heat**" are specified;

(b) When substances are produced which meet the definition of toxic within the meaning of OAR 333-016-0005(6), the signal word "**caution**" or "**warning**," and the statement of hazard "**Dangerous gas formed when used to extinguish flame or on contact with heat**" are specified;

(c) Regardless of whether subsection (a) or (b) of this section apply, any substance or mixture of substances labeled for use as a fire extinguisher that if applied to an electrical fire would subject the user to the likelihood of electrical shock shall be conspicuously labeled, "**Caution: Do not use on electrical fires**."

(2) These statements shall be in addition to any other that may be required under the Act or this section. All such substances or mixture of substances shall also bear the additional statements: "**Use in an enclosed place may be fatal**," and "**Do not enter area until well ventilated and all odor of chemical has disappeared**."

333-016-0075
Banned Hazardous Substances

Under the authority of ORS 453.055(4), the Administrator declares as banned hazardous substances the following articles because they possess such a degree of hazard that adequate cautionary labeling cannot be written and the public health and safety can be served only by keeping such articles out of commerce:

(1) Mixtures that are intended primarily for application to interior masonry walls, floors, etc., as a water repellent treatment and that are "extremely flammable" within the meaning of ORS 453.005(5).

(2) Carbon tetrachloride and mixtures containing it (including carbon tetrachloride and mixtures containing it used in fire extinguishers), excluding unavoidable manufacturing residues carbon tetrachloride in other chemicals that under reasonably foreseeable conditions of use do not result in an atmospheric concentration of carbon tetrachloride greater than ten parts per million.

(3) Liquid drain cleaners containing ten percent or more by weight of sodium and/or potassium hydroxide; except that this subparagraph shall not apply to such liquid drain cleaners if packed in accordance with a standard for special packaging of such articles promulgated under the Federal Poison Prevention Packaging Act of 1970 (Public Law 91-601).

(4) Any full-size baby crib that is not designed and constructed in accordance with paragraphs (4)(a)(A) through (E) of this rule:

(a) The rules in this section set forth the conditions, requirements, and specifications whereby full-size baby cribs are not banned articles intended for use by children under OAR 333-016-0080:

(A) Dimensions. Full-size cribs shall have dimensions as follows:

(i) Interior. The interior dimensions shall be 28-3/8 inches wide as measured between the innermost surfaces of the crib sides and 52-3/8 inches long as measured between the innermost surfaces of the crib end panels, slats, rods, or spindles. Both measurements are to be made at the level of the mattress support spring in each of its adjustable positions and no more than two inches from the crib corner posts;

(ii) Rail height. The rail height dimensions shall be as follows:

(I) The height of the rail or end panel as measured from the top of the dropside rail or panel in its lowest position to the top of the mattress support in its highest position shall be at least nine inches;

(II) The height of the dropside rail or end panel as measured from the top of the dropside rail or end panel in its highest position to the top of the mattress support in its lowest position shall be at least 26 inches.

(B) Spacing of full-size crib components:

(i) The distance between components (such as slats, spindles, crib rods, and corner posts), except those which are more than 20 inches above the mattress support in its lowest position shall not be greater than 2-3/8 inches at any point. Measurement of distance between contoured or irregular slats or spindles shall be done by a 2-3/8 inch wide x 4 inch high x 4 inch long rectangular block which shall not pass through the space;

(ii) The distance between such components shall not exceed 2-1/2 inches when a 20 pound direct force is applied in accordance with the test method in paragraph (C) below. For contoured or irregular slats or spindles the spacing shall not permit passage of a 2-1/2 inch wide x 2-3/4 inch high x 2-3/4 inch long rectangular block above and below the loading wedge when a 20 pound direct force is applied in accordance with said test method.

(C) Component spacing test method:

(i) Construct a right triangular prism (2-1/2 inches high x 5 inches wide x 1-1/2 inches deep) from a rigid material (steel, wood, aluminum, or equivalent). Drill a one-fourth inch diameter hole from the center of the apex to the center of the base and secure a 4 inch eyebolt in the hole;

(ii) Place the wedge midway between two vertical components. Attach a dial push-pull gauge (Chatillon Model DPP-50 or equivalent spring scale) to the eyebolt and exert a 20 pound direct pull on the wedge. The test may be performed by suspending a 20 pound weight from the eyebolt with the crib component placed in a horizontal position.

(D) Hardware:

(i) The full-size crib shall be designed and constructed in a manner that eliminates from any hardware accessible to a child the possibility of the hardware's presenting a mechanical hazard through pinching, bruising, lacerating, crushing, breaking, amputating, or otherwise injuring portions of the human body when the crib is in normal use or when subjected to reasonably foreseeable damage or abuse;

(ii) Locking or latching devices used to secure dropside rails shall not be accessible to a child from inside the crib. Such devices shall require a minimum force of ten pounds to activate the release mechanism or shall consist of a double-action device requiring two distinct actions to release;

(iii) Wood screws shall not be used in the assembly of stationary sides, dropside rails, or stabilizing bars to crib ends or other components that must be removed in the normal assembly or disassembly of a crib.

(E) Construction and finishing:

(i) All wood surfaces shall be smooth and free from splinters;

(ii) All wood parts shall be free from splits or cracks;

(iii) Crib ends and sides shall have no horizontal bar or other surface accessible to the child inside the crib capable of being used as a toehold located less than 20 inches above the mattress support in its lowest position when the side rail is in its highest position, except the lower horizontal bar of the crib rail may have a vertical dimension that extends no higher than three inches above the mattress support in its lowest position. (A toehold is defined as any ledge projection accessible to the child inside the crib with a dimension greater than three-eighths of an inch.) Spacing between components above the 20 inch level in the crib end panels and crib sides shall not allow the passage of a 4 inch square block;

(iv) Attachments accessible to the child while in the crib, including but not limited to, "built-in" toys, decorations, teething rails, or design components, must be tested in accordance with the test methods of OAR 333-016-0057 and 333-016-0058 of this chapter specifying test methods for simulating use and abuse for toys, games, and other articles intended for use by children. The test methods shall include those for pull, torque, impact, and bite,

which would result in a potential for causing laceration, puncture wound, aspiration, ingestion, or other injury. For determining if any small parts present choking, aspiration, and/or ingestion hazards, see OAR 333-016-0057;

(v) The crib's design shall not incorporate any features accessible to the child inside the crib, such as cutout shapes, scroll designs, wedge configurations, etc., which could trap fingers, hands, or clothing, or that present a potential for laceration or puncture or other injury.

(F) Assembly instructions:

(i) Full-size cribs, when shipped other than completely assembled, shall be accompanied by detailed instructions that include an assembly drawing, a list, and description of all parts and tools required for assembly, and a full-size diagram of the required bolts and other fasteners;

(ii) The instructions:

(I) Shall be so written that an unskilled layman can correctly assemble the crib without making errors that would result in improper and unsafe assembly;

(II) Shall include cautionary statements concerning the secure tightening of bolts and other fasteners;

(III) Shall contain a cautionary statement that when child's height reaches 35 inches, the child should be placed in a youth or regular bed.

(iii) The warning relative to mattress size for full-size cribs in subparagraph (4)(a)(G)(ii) of this rule may be included in the instructions as an optional measure.

(G) Identifying marks and warning statement. All cribs and retail cartons thereof shall be suitably marked or labeled in accordance with this section:

(i) The crib shall be clearly marked to indicate:

(I) The name and place of business (city and state) of the manufacturer, importer, distributor, and/or seller; and

(II) A model number, stock number, catalogue number, item number, or other symbol expressed numerically, in code, or otherwise, such that only cribs of identical construction, composition, and dimensions shall bear identical markings.

(ii) In the case of full-size cribs, the following warning shall appear on the inside of the head end in a type size of at least one-fourth inch: "Any mattress used in this crib must be at least 27-1/4 inches x 51-5/8 inches with a thickness not exceeding 6 inches." The marking shall appear in block letters, shall contrast sharply with the background (by color, projection, and/or indentation), and shall be clearly visible and legible;

(iii) Markings on the crib shall be of a permanent nature whether paint-stenciled, die-stamped, molded, or indelibly stamped directly thereon or permanently affixed, fastened, or attached thereto by means of a tag, token, or other suitable medium. The markings shall not be readily removable or subject to obliteration during normal use of the article or when the article is subjected to reasonably foreseeable damage or abuse;

(iv) The retail carton of a crib, under customary conditions of display, shall clearly indicate: The name and place of business (mailing address, including ZIP code) of the manufacturer, importer, distributor, and/or seller; and the model number, stock number, catalogue number, item number, or other symbol described in paragraph (4)(a)(G)(i)(II) of this rule. The information required by this paragraph need not be placed on the retail carton if it appears on the crib in such a manner as to be visible under customary conditions of retail display.

(H) Recordkeeping. The manufacturer or importer shall keep and maintain for three years after production or importation of each lot of full-size cribs records of sale, distribution, and results of all inspections and tests conducted in accordance with this section. These records shall be made available upon request at reasonable times to any officer or employee acting on behalf of the Public Health Division. The manufacturer or importer shall permit such officer or employee to inspect and copy such records, to make such inventories of stock as he deems necessary, and to otherwise verify the accuracy of such records;

(I) Compliance with the foregoing paragraphs (4)(a)(A) through (H) of this rule is required by December 31, 1974.

333-016-0077
Pointed Objects in Food Items of Particular Appeal to Children

(1) Under the authority of ORS 453.005(7)(c) and pursuant to provisions of ORS 453.055(3), the Administrator has determined that the following types of articles intended for use by children present a mechanical hazard within the meaning of ORS 453.005(12) because in normal use or when subjected to reasonably foreseeable abuse, they present an unreasonable risk of personal injury by their design and such articles are therefore banned and shall be removed from commerce:

(a) Pointed objects used or intended to be used as handles when contained in food items having particular appeal to children;

(b) A pointed object shall mean an object made of wood, plastic, metal, or other rigid material, any end of which has been sharpened, molded, or otherwise shaped in such a way that:

(A) If the longitudinal axis of the object is round and the tip is flat, the cross section of the tip or the end surface is less than 0.0123 square inches in area (approximately 1/8 of an inch in diameter), or if the tip is rounded, the radius of the arc of the rounded sphere at the tip is less than 1/16 of an inch; or

(B) If the longitude axis is flat, or shaped other than round, the thickness of the cross section at the end is less than 1/16 of an inch and if the dimensions of the end are such that the surface area of the tip is less than 0.0123 square inches, or if such tip is rounded, the arc of this roundness is less than 1/16 inch in radius.

(2) The pointed objects defined in paragraphs (1)(b)(A) and (B) of this rule are illustrated in **Figure 17**.

[ED. NOTE: Figures referenced are available from the agency.]

333-016-0080
Toys and Other Articles Intended for Use by Children

Under the authority of ORS 453.005 and pursuant to provisions of ORS 453.055 the Administrator has determined that the following types of toys, including their packaging, and pacifiers and other articles intended for use by children, are banned hazardous substances:

(1) Any toy or material intended for use by children which the customer must assemble, and which after assembly presents a hazardous edge. Hazardous edges shall not be produced when the toy is tested in accordance with Requirements No. 1 and No. 2 (see **Appendix 2**).

(2) Any toy or article intended for use by children not constructed of new material or reprocessed material that has been so refined that the level of contamination from foreign matter does not exceed that found in new material:

(a) Reprocessed plastic, foam scrap, textile producers fibrous scrap, and fabric trimmings from garment manufacture are acceptable, provided that they are clean and have been sanitized;

(b) Loose fillers for toys shall be free of objectionable matter originating from insect, bird, rodent, man, or other animal infestation and of contaminants such as splinters and metal chips to the extend possible in good manufacturing practice.

(3) Any toy or article intended for use by children which does not comply with the following provisions and the labeling provisions of OAR 333-016-0110:

(a) General:

(A) Sharp edges. Known herein as Requirement No. 4:

(i) Toys in which a potentially hazardous sharp edge is a necessary part of the function of the toy shall carry cautionary labeling as specified in OAR 333-016-0110, if the toy is intended for use by children from 48 months to 120 months. Toys intended for children aged less than 48 months shall not have accessible hazardous functional sharp edges;

(ii) Protection of sheet metal edges. Accessible edges of sheet metal less than 0.020 inch thick except those covered by subparagraph (3)(a)(A)(iii) of this rule, shall be protected by hemming, rolling, curling, or shall be covered with a protective cap or sleeve. If caps or sleeves are used, they shall withstand a pull force of ten pounds, applied in accordance with Test (D,i). Hemmed edges shall be closed to a gap of 0.030 inch or less and the cut edge shall not present hazards from feathering. Gaps of rolled or curled edges shall not exceed 0.060 inch between the bare edge and the base sheet. The gap restriction shall not apply to curled edges if the curled portion of the sheet describes an arc of greater than 360 degrees, as shown in **Figure 18**. However, the gap at the point at which the curled edge has established a 360 degree arc shall not admit a 1/4 inch diameter probe. If accessible holes or slots in sheet metal of less than 0.020 inch thickness admit a rod of 1/2 inch diameter, to a depth of greater than 0.030 inch, then the edges shall be protected in accordance with this requirement (Additional size requirements for holes are given in Requirement No. 11.);

(iii) Exemptions for sharp metal edges. The edges at the ends of tubes, or the edges at the ends of formed sheet metal profiles, such as those at the ends of a curled edge as shown in **Figure 19(a)**, shall be exempt if the aperture will not admit a 1/4 inch diameter rod and is free of burrs and feathering. Also exempted are unprotected edges less than 3/8 inch in length at the end of a formed profile similar to that shown in **Figure 19(b)**, provided that the unprotected edge is free of burrs and feathering.

(B) Lap joints. Known herein as Requirement No. 5. If the gap between the sheet metal edge and the underlying surface in a lap joint exceeds 0.030 inch, the exposed sheet metal edge shall be protected as described in subparagraph (3)(a)(A)(i) of this rule. The accessible surfaces shall be free of burrs and feathering;

(C) Sharp points. Known herein as Requirement No. 6:

(i) If the ends of bolts or threaded rods are accessible, then the thread shall be finished or covered at the end by cap nuts so as to avoid hazardous sharp edges and burrs. The cap nut shall resist a pull of ten pounds for toys intended for children aged up to 18 months, or 15 pounds for toys intended for children aged from 18 months to and including 168 months of age, applied parallel to the axis of the bolt or threaded rod when tested according to Test (D,i);

(ii) Hazardous points. These requirements are intended to eliminate unexpected hazards from sharp points that may occur because of assembly devices and fasteners such as wires, pins, nails, and staples that are improperly fastened; poorly sheared sheet metal; burrs on screws; splintery wood, etc. Hazardous sharp points may be produced or revealed in use or reasonably foreseeable abuse by the exposure of parts which were designed to be structurally protected. Examples would include the exposure of wire ends and pins or of fasteners through fracture of plastics or deterioration of wood;

(iii) Nails and fasteners. Nails and fasteners that could present a point, edge, ingestion, or projection hazard, except for those used as axles (in which case, see Requirement No. 9) shall not pull out under a force of 20 pounds, applied perpendicular to the joint between the two components, when tested in accordance with Test (D,i). The points of nails or fasteners shall not protrude so as to be accessible. Hazardous points shall not be developed or become accessible after the toy has been tested in accordance with Requirements No. 1 and 2;

(iv) Toys in which an accessible potentially hazardous point is a necessary part of the function of the toy, such as a needle in a sewing kit, or phonograph needle, or darts, shall carry cautionary labeling as specified in OAR 333-016-0110 if the toy is intended for children from 48 to 120 months old. Toys intended for children less than 48 months old shall not have accessible hazardous functional points;

(v) Darts and similar sharp-pointed articles marketed solely for adults shall not be sold by toy stores or in store departments dealing predominately in toys or childrens' articles. Labels shall bear the following statement on the front of the panel of the carton and on any accompanying literature: **WARNING: Not a toy for use by children**. **May cause serious or fatal injury**. **Read instructions carefully**. **Keep out of the reach of children**. Such statement shall be printed in sharply contrasting color within a borderline and in letters at least one-quarter inch high on the main panel of the container and at least one-eighth inch high on all accompany literature. Labels shall include in the instructions and rules clear and adequate directions and warning for safe use, including a warning against use when any person or animal is in the vicinity of the intended play or target area;

(vi) Toy bow and arrow sets providing arrow tips shall be protected with rubber or similarly soft, blunt coverings that are firmly glued or affixed in such a manner that they cannot be removed by Test (D,i).

(D) Wires or rods. Known herein as Requirement No. 7. Wires or rods used in the interior of dolls or stuffed toys shall have their ends turned back or covered with protective caps or covers as described in subparagraph (3)(a)(E)(ii) of this rule, if they can become accessible after use or reasonably foreseeable abuse. Wires or rods used as stiffeners or skeletons in toys intended to be bent or formed shall not fracture to produce an accessible point, edge, or projection hazard when tested according to Test (C,i);

(E) Projections. Known herein as Requirement No. 8. This requirement is intended to minimize possible puncture hazards that might be caused by rigid projections such as unprotected ends of axles, actuating levers, and decorative features. This requirement relates to potentially hazardous projections in toys intended for use by children aged 60 months or less. Hazardous projections shall not be exposed after the toy has been tested according to Requirements No. 1 and 2:

(i) Protection of rigid projections. The toy shall be examined in all natural (unsupported) angles of repose. If the toy has a flat, unwheeled base greater than 175 square inches in area, it shall be examined in the normal play position; if however, the toy tips when placed on an incline of 45 degrees in any direction, it shall also be examined in the position that it assumes when it comes to rest. If a projection appears to constitute a potential puncture hazard, then the projection shall be protected by suitable means, such as by turning back the end of a wire, or by affixing a protective cap or cover as described in Protective caps and covers, subparagraph (3)(a)(E)(ii) of this rule, which effectively increases the surface area for potential contact with the body;

(ii) Protective caps or covers. Protective caps or covers shall be smoothly finished, and shall support the weight of the toy when the toy is suspended from the cap or cover, or shall resist a pull of ten pounds parallel to the axis of the projection when tested according to Test (D,i), whichever is greater. Caps or covers shall also resist a push load of ten pounds when tested according to Test (D,i), so as to prevent the cap or cover from being punctured or split during use or abuse.

(b) Wheels, tires, and axles. Known herein as Requirement No. 9. These requirements are intended to eliminate the possibility of ingestion hazards that might be caused by small wheels or tires that separate during normal use or reasonably foreseeable abuse, and puncture hazards from projecting axles, either on the toy or on wheel assemblies that may be removed from the toy during abuse. The requirements in subparagraphs (3)(b)(A)(i), (ii), and (iii) of this rule, apply to transportation wheels on both preassembled and knocked-down toys intended for children aged 96 months or less. In the case of knocked-down toys, the toy shall be tested in the form that it would be assembled by the purchaser, using simple household tools and/or special tools provided by the manufacturer, if any. The requirements do not apply to toys that are designed to be repeatedly assembled and taken apart and are so described on the package, so that the purchaser expects to find removable wheel systems as part of the function of the toy (however, in no case shall the size requirements of Requirements No. 21 and 22 be disregarded). The tests shall be carried out in accordance with methods described in Test (B,i) and the performance levels shall be maintained after testing as described in Requirements No. 1 and 2:

(A) Tire Removal. Tires which are not an ingestion hazard as defined in Requirement 21, shall be tested in accordance with Test (B,i), tires affixed to toys shall withstand a pull force of not less

than 10 pounds, if intended for children aged up to 18 months, or 15 pounds, if intended for children aged from 18 months to 36 months. If tires which are not an ingestion hazard pull off under the above conditions, then the remaining hub shall be tested according to subparagraphs (3)(b)(A)(i) and (ii) of this rule:

(i) Wheels 3/4 inch or less in diameter. Wheels 3/4 inch or less in diameter shall withstand a pull force of ten pounds in the case of toys intended for children aged less than 18 months, and 15 pounds for toys intended for children from 18 months but not over 96 months, applied in line with, or parallel to, the axle for 19 seconds if the wheel or axle constitutes an ingestion hazard, as described in Requirements No. 21 and 22, or if the axle presents a laceration or puncture hazard, as described in OAR 333-016-0056(3). The pull test described in Test (B,ii) shall be applied to the wheels while they are on the toy;

(ii) Wheels greater than 3/4 inch diameter. Wheels with a diameter greater than 3/4 inch that are free to rotate on their axles shall withstand a pull force of 20 pounds applied in line with or parallel to the axle, for a period of ten seconds, if when the wheel is removed or displaced, the wheel or axle presents a laceration, puncture, or ingestion hazard, as defined in OAR 333-016-0056(3), Requirements No. 21 and 22, respectively. The parallel pulling force shall be applied to the wheels while they are on the toy, in accordance with Test (B,ii). Wheels with a diameter greater than 3/4 inch that are not free to rotate on their axles shall, in addition, be subjected to a torsional force of four inch-pounds at the same time that the parallel pulling force is applied, in accordance with Test (B,iii);

(iii) "Snap-in" assemblies. If the axle and wheel assembly of a toy is of the "snap-in" type and if there is a clearance between the axle and the body of the toy of 1/2 inch or greater so that fingers can be hooked behind the axle, then a 15 pound pull shall be applied perpendicular to the axle, as described in Test (B,iv). If the wheel assembly is removed by either of these tests, then the wheel assembly shall be examined for possible puncture hazards, as described in Requirement No. 8 that might be caused by the axle if a wheel slides along the axle. A compressive load of 20 pounds shall be applied according to the test specified in Test (B,v).

(c) Folding mechanisms and hinges. Known herein as Requirement No. 10. These requirements are intended to eliminate possible crushing or laceration hazards that might occur in folding mechanisms and hinges. Examples are the sudden collapse or unexpected motion of a folding mechanism or hinge that produces a scissor action; and the changing clearances at the hinge line between two hinged portions, such that the gap will admit fingers at one position of the hinge but not at all positions. These requirements do not relate to the recognized and familiar hazards associated with the changing clearances around the edges of doors or pivoted or hinged sections in toy truck bodies, toy earth moving machinery, and similar toys. The requirements specified in paragraphs (3)(c)(A) and (B) of this rule shall be maintained after testing according to Requirements No. 1 and 2:

(A) Folding mechanisms. Toy furniture and other toys in which a folding mechanism, arm, or bracing is intended to support a weight of greater than five; pounds in normal use or reasonably foreseeable abuse shall have a safety stop, locking device, or adequate clearance to give protection for the fingers, hands, and toes against crushing or laceration by preventing unexpected or sudden movement or collapse of the article;

(B) Hinge line clearances. Toys having a gap or clearance along the hinge line between a stationary portion and a moveable portion that weighs more than 1/2 pound, shall be so constructed that, if the accessible gap at the hinge line will admit a 3/16 inch diameter rod, it will also admit a 1/2 inch diameter rod at all positions of the hinge.

(d) Slots, holes, clearances, and protection of mechanisms. Known herein as Requirement No. 11. These requirements are intended to eliminate possible hazards that may be caused by changing clearances. These requirements shall be maintained after testing according to Requirements No. 1 and 2. The different pinch clearance requirements in paragraphs (3)(d)(A) through (H) of this rule reflect the different modes of entrapment or pinching that may be encountered:

(A) Wheel clearances. This requirement concerns clearance between wheels and rigid wheel wells or fenders of ride-on toys, or the driven wheel(s) of toys powered by electrical, spring, or inertial energy. If such clearances admit a 3/16 inch diameter rod, they shall also admit a 1/2 inch diameter rod in order to prevent the trapping of fingers;

(B) Holes and slots in rigid materials. This requirement is intended to avoid finger entrapment (which may cut off blood circulation). Inaccessible holes and slots in sheet metal and other rigid materials in toys intended for children aged 60 months or less. If an accessible circular hole in any rigid material less than 0.062 inch in thickness can admit a 1/4 inch diameter rod to a depth of 3/8 inch or greater, it shall also admit a 1/2 inch diameter rod;

(C) Chains and belts. These requirements are to prevent finger crushing through entrapment between links of supporting chains or between chains and sprockets, or pulleys and belts;

(D) Supporting chains. Chains that support the weight of a child in toys, such as hanging seats or similar devices, intended for children up to 36 months old shall be shielded if the chain is accessible and if a 3/16 inch diameter rod can be inserted between two links, as in **Figure 20**, with the chain in slack configuration;

(E) Chains or belts for ride-on toys. Power transmission chains and belts in ride-on toys intended for children through the age of 120 months shall be shielded;

(F) Shielding of mechanisms. Clockwork, battery operated, inertial, or other power driven mechanisms in toys intended for children through the age of 60 months shall be enclosed or shielded so that a 1/4 inch diameter rod three inches long cannot contact parts that could present pinch or laceration hazards;

(G) Winding keys. This requirement is to avoid pinching or laceration of fingers by entrapment between the key and the body of the toy. It applies to toys intended for children aged 24 months or less that use winding keys which rotate as the mechanism unwinds. This requirement applies to keys with flat plates attached to the stem, as distinct from those that have circular knobs to which to apply the torque, and which protrude from a rigid surface. If the clearance between the flukes of the key and the body of the toy will admit a 1/4 inch diameter rod, it shall also admit a 1/2 inch diameter rod at all positions of the key. For keys covered by this requirement, there shall be no opening in the key which can admit a 3/16 inch diameter rod;

(H) Coil springs. This requirement applies to toys containing springs so as to avoid pinching of fingers or toes:

(i) Coil extension springs. Coil extension springs that form part of a component that carries the weight of a child shall be shielded so as to prevent access during use or reasonably foreseeable abuse if a 1/8 inch diameter rod cannot be freely inserted between coils when the spring is at rest, and if a weight of between 3 and 50 pounds can separate adjacent coils so as to admit a 1/8 inch diameter rod;

(ii) Coil compression springs. Accessible coil compression springs that are subjected to a compressive load of 3 to 50 pounds during normal use or reasonably foreseeable abuse of the toy shall be shielded if a 1/4 inch diameter rod can be inserted between the adjacent coils at any point in the action cycle, or when the spring is at rest.

(e) Strings and elastics. Known herein as Requirement No. 12. These requirements are intended to minimize hazards that might be caused by flexible strings and elastics. The term "string" shall include monofilaments, plastic and textile tapes, and chains, as well as those fibrous materials commonly called string:

(A) Crib and playpen toys. Flexible strings attached at one end to a toy intended for use in cribs or playpens shall be less than 12 inches in length. If a string is attached to form a loop, then the perimeter of the loop shall be less than 14 inches;

(B) Pull toys. Flexible strings greater than 12 inches long for pull toys intended for children less than 36 months old shall not be provided with loops or beads or other attachments that could tangle to form a loop;

(C) Self-retracting pull strings. Strings used in string-actuated mechanisms for toys intended for use by children under age 18 months, except monofilament-type strings 1/16 inch or less in diameter, shall not retract when a weight of two pounds is attached to the fully extended string, with the string vertical and the toy held firmly in the most favorable position for retraction. Monofilament-type strings 1/16 inch or less in diameter shall not retract under a load of one pound, when tested in the manner described above;

(D) Elastics. The unaffixed portion of elastic in toys intended for children less than 36 months old shall not extend to more than 12 inches under a load of 5 pounds;

(E) Strings and lines for flying devices. Kite strings and hand-held lines over six feet long attached to flying devices intended for use as playthings shall have an electric resistance of more than 108 ohm/cm when tested at a relative humidity of 50 plus or minus five percent and a temperature of 70 plus or minus 5°F when measured by a high voltage, resistance breakdown meter.

(f) Projectiles. Known herein as Requirement No. 13. These requirements relate to certain, but not all, potential unexpected hazards that might be caused by projectiles and by the firing of improvised projectiles. Certain well-recognized hazards, inherent in such traditional toys as slingshots and darts, are not covered by this requirement. The requirements in paragraphs (3)(f)(A) and (B) of this rule shall apply to toys that discharge projectiles intended for use by children under age of 120 months:

(A) The integrity of protective tips. Protective tips of projectiles shall withstand a pulling force of 15 pounds, when tested according to the procedure of Test (D,i), and shall not produce or reveal hazardous points or edges when fired into a solid object, according to the test procedures described in Test (A,ii);

(B) Discharge mechanisms. Discharge mechanisms shall be unable to discharge hazardous improvised projectiles such as pencils or rocks without modification by the user.

(g) Protection devices. Known herein as Requirement No. 14. Toy protection devices and simulated protective devices such as football helmet and pads which are not the real protective device but which may be worn as a real protective device:

(A) Simulated protective devices, such as helmets, hats, and goggles. This requirement is intended to minimize hazards that might be caused, for example, by goggles or space helmets if the material from which they are constructed readily shatters; or by toys that simulate protective devices, such as football helmets and pads, if the wearer uses the article as a real protective device rather than as a toy. The toy shall conform to the following requirements after testing according to Requirements No. 1 and 2:

(i) Eye protection. Toys that cover the face, such as goggles, space helmets, or face shields, shall be constructed of impact resistant material that will not fail under normal use or reasonably foreseeable abuse so as to generate sharp edges, points, or small pieces that could enter the eye. Toys shall be tested for compliance according to Test (A,iv). Toys that enclose the head are discussed in subsection (3)(m) of this rule;

(ii) Interior finish. The interiors of toys that cover the face shall be smoothly finished so as to be free of hazardous edges, points, and projections.

(B)(i) Simulated protective devices. Toys that simulate safety protective devices, such as football helmets and pads and baseball caps, shall be clearly marked warning the purchaser that they are not safety protective devices. Also, the packages in which these toys come shall be marked in accordance with OAR 333-016-0110;

(ii) The marking on the toy shall withstand normal use, and reasonably foreseeable abuse, and shall be of the same size as required for the package.

(h) Flotation devices. Known herein as Requirement No. 15. This term means toys designed for recreational use but does not include toys used in bathtubs or boats designed for children to ride in. A hazard that needs to be considered is the possible erroneous assumption that flotation toys are life saving devices. This requirement applies to toys designed for water recreational use, as distinct from flotation toys used in the bathtub, but excludes boats designed for children to ride in. Flotation toys designed for recreational use and their packages shall be clearly labeled in accordance with OAR 333-016-0110 so that the purchaser is informed that they are not life saving devices and that they should be used in water only under parental supervision. (The labeling or marking on the toy shall resist normal use and reasonably forseeable abuse, and shall conform to the same size requirements as that for the package.) No advertising copy or graphics shall imply that the child will be safe with such a toy if left unsupervised;

(i) Toxicology. Known herein as Requirement No. 16:

(A) Food and cosmetics. Toys which are intended to be used in conjunction with food or in the preparation of food, or are intended to simulate cosmetics, shall conform to the Federal Food, Drug, and Cosmetic Act;

(B) Handling and packaging of food. All food products supplied with toys shall be handled and packaged incompliance with **Title 21**, **CFR Section 128**, which is concerned with sanitation practices in the manufacture, processing, packaging, or holding of human foods;

(C) Crayons, paints, chalks, and other similar material. All crayons, paints, chalks, and other similar material shall conform to the safety requirements of the Act. (These are the same as appear in the Federal Hazardous Substances Act.);

(D) Paint or other similar surface coating material. Surface coatings shall not contain compounds and impurities of antimony, arsenic, cadmium, mercury, lead, or selenium of which the metal content individually or in total (calculated as Sb, As, Cd, Hg, Pb, Se, respectively) is in excess of 0.06 percent by dry weight of the contained solids (including pigments, film solids, and driers). In preparing the coating sample for testing the above metals other than lead, the paint film shall be ground into a fine powder and extracted with five percent hydrochloric acid for one hour at a temperature of 45° to 50°C. also, the surface coatings shall not contain barium compounds or impurities of which the water soluble barium (calculated as Ba) is in excess of 1 percent of the total barium in such coatings. For the purpose of these rules, "paint" includes lacquer, varnish, and similar substances;

(E) Liquids. Liquids contained in toys shall conform to the requirement of the Federal Hazardous Substances Act and Shall conform to State of Oregon requirements for potable water. Liquids shall be tested for coliform bacteria and total plate count according to the rules of the Oregon Public Health Division. (These are "**Standard Methods for Examination of Water and Wastewater**" **published by the American Public Health Association, 13th edition**, **1971**, **Part 405**, **pages 657**, **658**, **659**, and **660**.)

(j) Flammability. Known herein as Requirement No. 17. Fabric used in toys or as components of toys shall comply with the requirements of the Flammable Fabrics Act. Materials other than textile materials shall comply with OAR 333-016-0005(11)(b) and 333-016-0040. These are the same as **Title 16**, **Section 1500.3(c)(6)(iv)** and **Section 1500.44**, **CFR**;

(k) Plastic, wood, and other components used to make the toy or article. Known herein as Requirement No. 18:

(A) Plastic toys or components made from plastics having a Young's modulus in tension of greater than 100,000 psi shall be free of accessible hazardous flash, points, and burrs. Accessible portions of plastic toys shall be deburred or deflashed so that their edges are not hazardous. Sections should be designed so as to avoid generation of sharp edges during reasonably foreseeable use or misuse;

(B) Wood. The accessible surfaces and edges of wood used in toys shall be smoothly finished to avoid splinters and sharp edges and free from splinters;

(C)(i) Metal toys. The accessible edges, corner, or mold parting areas of metal parts of 0.020 inch or greater in thickness shall be free of burrs and flash, or covered by durable coatings such as baked enamel. Baked enamel coating or equivalent shall be not less than 0.001 inch thick on the edge, and hazardous edges shall not be exposed after testing according to Requirements No. 1 and 2;

(ii) Sheet metal toys. Sheet metal parts less than 0.020 inch thick shall have the edges protected as described in subparagraph (3)(a)(A)(i) of this rule, if the edges are accessible in use or become accessible as a result of reasonably foreseeable abuse. If a sheet metal edge of less than 0.020 inch in thickness is unprotected on a toy designed for consumer assembly, the outside of the package shall carry a label cautioning the purchaser to exercise care in unpackaging and assembly, according to the requirements of OAR 333-016-0110.

(D) Cellulose Nitrate. A toy shall not, whether wholly or in part, be made of or impregnated with cellulose nitrate. This rule shall not apply to a ball of the kind used for ping-pong or table tennis;

(E) Glass mirrors, vanity sets, or china sets that are either:

(i) Made of shatter resistant, tempered, or laminated glass, plastic, or other material which would not, under normal conditions of use or reasonably foreseeable abuse, break, forming sharp or piercing edges; or

(ii) Labeled as intended for children age six and older.

(l) Stability. Known herein as Requirement No. 19:

(A) Stability of ride-on toys and seats. Any toy intended for use by children age 60 months or less: i.e., ride-on toys with three or more load bearing wheels, such as tricycles and wagon; ride-on action type toys such as hobby horses, stationary toys with seats, such as play furniture and ride-on toys of spherical, cylindrical, or other shapes which do not normally have a stable base shall satisfy subparagraphs (3)(l)(A)(i) through (3)(l)(C) of this rule:

(i) Sideways stability requirement. These requirements recognize two types of possible stability hazards: Those associated with ride-on toys or seats where the feet can provide stabilization, and those situations where the feet are restricted by an enclosing structure. There shall be no sideways stability requirement for ride-on toys if a child at the lowest age of the age range for which the toy is intended can touch the ground flat-footed when sitting on, or straddling, the seat;

(ii) Sideways stability, feet available for stabilization. If a child at the lowest age of the age range for which the ride-on toy or seat is intended cannot place both feet on the ground when seated on or when straddling the seat of a ride-on toy or seat, and his legs are unrestricted in their sideways motion and are thus available for stabilizing, then the toy shall not tip when placed across the slope of a smooth surface inclined ten degrees to the horizontal. A load simulating a child's weight such as a bag of sand or shot, shall be applied to the seat, and the steering mechanism, if any, shall be in the position where the toy is most likely to tip. The load shall be equal to the upper 97 percentile weight of a child at the highest age of the age range for which the toy is intended, according to the anthropometric charts given in **Appendix 1**. The load shall be applied so that its center of gravity lies in the true vertical six inches above the center of the seat. In the case of wagons, the load is to be applied on the rearmost one third of the wagon bed. Wheels shall be chocked during the test to restrict rolling, but castors shall be allowed to assume their natural position before chocks are applied;

(iii) Sideways stability, feet unavoidable for stabilization. If the sideways motion of the feet and/or legs is restricted, such as by the enclosed sides of a toy automobile, then the ride-on toy or seat shall not tip when placed across the slope of a smooth surface inclined 15 degrees to the horizontal. Requirements for steering, loading, chocks, and castors, shall be as for sideways stability, feet available subparagraph (3)(l)(A)(ii) of this rule;

(iv) Fore and aft stability. This requirement relates to the stability of the ride-on toy or seat in the front and back direction with respect to the rider, so that the rider cannot easily use the legs for stabilization. All ride-on toys or seats falling within the scope of paragraph (3)(l)(A) of this rule shall not tip forward or backward when the toy, which shall be loaded with a simulated child's weight, is placed both facing down and up the slope of a smooth surface inclined 15 degrees to the horizontal. Requirements for steering, loading, chocks, and castors shall be as for subparagraph (3)(l)(A)(ii) of this rule. The load shall be applied in the least favorable position on the seat for each direction;

(B) Tipping of stationary floor toys. This requirement is intended to minimize hazards that might be caused by a toy that tips when a door, drawer, or other movable portion is extended to its fullest travel. Stationary floor toys of greater than 30 inches in height and weighing more than ten pounds shall not tip when placed on a ten degree incline in any direction;

(C) Overload requirement for ride-on toys and seats. This requirement is intended to minimize unexpected hazards that could be caused by a toy that is not capable of accepting an overload. All ride-on toys, toys intended for use as seats, or toys designed to support all or part of the weight of a child shall support an overload applied to the seat, or other load-bearing component, without collapsing to produce a hazardous condition. This overload shall be three times the upper 97 percentile weight of a child at the highest age of the age range for which the toy is intended, according to the anthropometric charts given in **Appendix 1**.

(m) Confined spaces. Known herein as Requirement No. 20. Toys that form enclosures, such as toy storage chests or toy refrigerators, and head-enclosing toys such as space helmets. Paragraphs (3)(m)(A), (B), and (C) of this rule shall be maintained after testing according to Requirements No. 1 and 2:

(A) Ventilation. Any toy having a door or lid, which encloses a continuous volume greater that 1.1 cubic feet, and in which all internal dimensions are greater than six inches, shall provide an unobstructed ventilation area of greater than a total of two square inches when placed on the floor in any configuration and adjacent to two vertical plane surfaces meeting at a 90 degree angle, so as to simulate the corner of a room. If a permanent partition or bars (two or more) which effectively limit the continuous space by making the smallest internal dimension six inches, or less, are used to subdivide a continuous space, the ventilation area shall not be required;

(B) Doors. Doors to enclosures falling within the scope of paragraph (3)(m)(A) of this rule shall be fitted with closures that cannot mechanically latch (examples of acceptable closures are magnetic or friction types);

(C) Toys that enclose the head. Toys that enclose the head, wholly or partially, such as space helmets, which are made of impermeable materials shall provide means for breathing by the incorporation of four ventilation holes, each of which is at least 1/2 square inch, situated at least six inches apart. The requirements of OAR 333-016-0056(2)(d)(E) shall be maintained. Simulated protection toys are in paragraph (3)(g)(B) of this rule.

(4) Any toy or article or packaging intended for use by children which contains the following type of hazard and does not comply with the following provisions, and the provisions of OAR 333-016-0110:

(a) Small toys and small parts of toys. Known herein as Requirement No. 21:

(A)(i) Any toy intended for children under three years of age and such toy or other article or any of its components which are accessible, or parts of the toy or other article which become accessible under conditions of normal use or reasonably foreseeable damage or abuse, will not completely fit, in a noncompressed state, into the truncated right cylinder shown in **Figure 21** is banned. Chalk, crayons, and books made entirely of paper are excluded;

(ii) For determining whether or not parts of such toy or other article may become accessible under conditions of normal use or reasonably foreseeable damage or abuse, the applicable tests prescribed in 333-016-0057 shall be utilized in conjunction with Tests (B,i) through (B,v), (C,i), (D,i) and (D,ii). Performance levels after testing in Requirements No. 1 and 2 and of Tests (A,i), (A,ii), and (A,iii) shall be satisfied. Highly porous materials, such as cheesecloth, string, and pom-poms, and any toy or other children's article that is not generally recognized as being suitable for use only by children three years of age or older will be subject to the provisions of subsection (4)(a) of this rule unless it meets the requirements of subparagraphs (4)(a)(A)(i)and (ii) of this rule:

(I) The shelf package of the article is prominently and clearly marked in the upper right-hand quarter of the principal display panel with the statement: "**Contains Small Pieces — Easily Swallowed — Therefore Intended for Children Over 3 Years of Age**";

(II) If the article is unpackaged, the required statement shall appear on the article itself or on a tag securely attached to the article, and the applicable labeling requirement in OAR 333-016-0110 and 333-016-0155.

(B) Known herein as Requirement No. 22. Any mouth-actuated toy or other mouth-actuated article intended for use by children under eight years of age is banned, if such toy or other such article or any of its components which are accessible, or parts of such toy or other such article which becomes accessible under conditions of normal use or reasonably foreseeable damage or abuse, will not completely fit, in a noncompressed state, into the truncated right cylinder shown in **Figure 21**. For determining whether or not parts of such toy or other such article may become accessible under conditions of normal use or reasonably foreseeable damage or abuse, the applicable tests in OAR 333-016-0058 shall be utilized in conjunction with Test (D,ii) and applicable tests in OAR 333-016-0059. If the air outlet is capable of being inserted into or covered by mouth, then the procedure of Test (D,ii) shall also be applied to the outlet;

(C)(i) Any mouth-actuated toy or other mouth-actuated children's article that is not generally recognized as being suitable for use only by children eight years of age or older will be subject to the provisions of paragraph (4)(a)(B) of this rule unless it meets the following requirements;

(ii) The shelf package of the article is prominently and clearly marked in the upper right-hand quarter of the principal display panel with the statement: "**Contains Small Pieces — Easily Swallowed — Therefore Intended for Children Over 8 Years of Age**." If the article is unpackaged, the required statement shall appear on the article itself or on a tag securely attached to the article and the applicable labeling requirements of OAR 333-016-0110(5) and 333-016-0115.

(b) Toys which induce sound levels:

(A) Impulse sound. Known herein as Requirement No. 23:

(i) Articles which produce impulse sound shall not produce peak sound pressure levels greater than 158 decibels when tested in accordance with OAR 333-016-0055;

(ii) Any article producing peak sound pressure levels greater than 138 decibels but not greater than 158 decibels when tested in accordance with OAR 333-016-0055 shall bear the following statement on the carton and in the accompanying literature in accordance with OAR 333-016-0115: "**Warning: Do not fire closer than one foot to the ear**. **Do not use indoors**." Labeling requirements of OAR 333-016-0110 shall also be satisfied;

(iii) Caps (paper or plastic) intended for use with toy guns and toy guns not intended for use with caps if such caps when so used or such toy guns produce impulse-type sound at a peak pressure level at or above 138 decibels, referred to 0.0002 dyne per square centimeter when measured in an anechoic chamber at a distance of 24 centimeters (or the distance at which the sound source would ordinarily be from the ear of the child using it if such distance is less than 25 centimeters) in any direction from the source of the sound.

(B) Continuous sound levels. Known herein as Requirement No. 24. Continuous sound levels which exceed the following intensity and duration limits when measured on the scale of a standard sound level meter at a slow response. When noise levels are determined by octave band analysis, the equivalent A-weighted sound level may be determined by octave band analysis, the equivalent A-weighted sound level may be determined as follows: Equivalent sound level contours. Octave band sound pressure levels may be converted to the equivalent A-weighted sound level by plotting them on the graph as set out in **Exhibit 1** and noting the A-weighted sound level corresponding to the point of highest penetration into the sound level contours. This equivalent A-weighted sound level, which may differ from the actual A-weighted sound level of the noise, is used to determine exposure limits from the table in **Exhibit 1**.

*If the variations in noise levels involve maxima at intervals of 1 second or less, it is to be considered continuous.

(c) An electrical toy. This term means any electrically operated toy or other electrically operated article intended for use by children which is intended to be operated by electrical current from nominal 120 volt (110–120 v.) branch circuits. If the package (including packaging materials) of the toy is intended to be used with the product, it is considered to be part of the toy:

(A) General labeling requirements. Known herein as Requirement No. 25:

(i) Any electrical toy shall conform to the general labeling requirements of this section, i.e., paragraphs (4)(c)(A) and (B) of this rule and to the specific requirements relating to hot surfaces, i.e., paragraph (4)(c)(B) of this rule;

(ii) The markings required on an electrical toy by this section shall be of a permanent nature, such as paint-stenciled, die-stamped, molded, or indelibly stamped. The markings shall not be permanently obliterable by spillage of any material intended for use with the toy and shall not be readily removable by cleaning substances. All markings on the toy and labeling of the shelf pack or package required by this section shall contrast sharply with the background (whether by color, projection, or indentation) and shall be readily visible and legible. Such markings and labeling shall appear in lettering of a height not less than that specified in OAR 333-016-0110(2), except that those words shown in capital letters in this section shall appear in capital lettering of a height not less than twice that specified in OAR 333-016-0110(2). Electrically operated toys shall bear the statement: "**CAUTION — ELECTRIC TOY**." The shelf pack or package and the instructions of such toys shall bear the statement in the upper right-hand quarter of the principal display panel: "**CAUTION — ELECTRIC TOY: Not Recommended For Children _____Years of Age**. **As with all electric products, precautions should be observed during handling and use to prevent electric shock**." The blank in the preceding statement shall be filled in by the manufacturer, but in no instance shall the manufacturer indicate that the article is recommended for children under eight years of age if it contains a heating element. In the case of other electrically operated products which may not be considered to be "toys" but are intended for use by children, the term "**ELECTRICALLY OPERATED PRODUCT**" may be substituted for the term "**ELECTRIC TOY**."

(B) Hot surfaces. Known herein as Requirement No. 26:

(i) Labeling. Electrical toys having Type "C" or "D" surfaces described in this paragraph as Type "C" or "B" which reach temperatures greater than those shown in Table 3 shall be defined as hot and shall be marked where readily noticeable when the hot surface is in view with the statement: "**HOT — Do Not Touch**." When the marking is on other than the hot surface, the word "**HOT**" shall be followed by appropriate descriptive words such as "**Molten Material**," "**Sole Plate**," or "**Heating Element**," and the statement "**Do Not Touch**." An alternative statement for a surface intended to be handheld as a functional part of the toy shall be "**HOT — Handle Carefully**," the blank being filled in by the manufacturer with a description of the potential hazard such as "**Curier**" or "**Cooking Surface**." Surfaces requiring precautionary statements of thermal hazards are those exceeding the following temperatures when measured by the test described in Test (T,i) and (T,ii);

(ii) Surface types:

(I) Type A. A part or surface of a toy (such as a handle) likely to be grasped by the hand or fingers for the purpose of carrying the toy or lifting a separable lid;

(II) Type B. A part or surface of a toy that part of a handle, knob, or similar component, but which is not normally grasped or contacted by the hand or fingers for carrying (including parts of a handle within seven-sixteenths of an inch of the surface to which the handle is attached and parts of a knob within 1/4 inch of the surface to which the knob is attached, if the remainder of the knob is large enough to be grasped), or a handle, knob, or part that may

be touched but which need not be grasped for carrying the toy or lifting a lid, door, or cover (e.g., support part of a handle or knob);

(III) Type C. A part or surface that can be touched by casual contact or that can be touched without employing the aid of a common household tool (screwdriver, pliers, or other similar household tool) and that is either a surface that performs an intended heating function (e.g., the sole plate of a flatiron, a cooking surface, or a heating element surface), or a material heated by the element and intended to be used as the product of the toy, excluding pans, dishes, or other containers used to hold the material to be cooked or baked if a common utensil or other device is supplied with the toy and specific instruction are established for using such a device to remove the container from the heated area;

(IV) Type C Marked. A Type C surface which has been marked with a precautionary statement of thermal hazards in accordance with subparagraph (4)(c)(B)(i) of this rule;

(V) Type D. An accessible part or surface of a toy other than Types A, B, C, or E, of this paragraph;

(VI) Type D Marked. A Type D surface which has been marked with a precautionary statement of thermal hazards in accordance with subparagraph (4)(c)(B)(i) of this rule;

(VII) Type E. A heated surface in an oven or other article that is inaccessible or protected by an electrical-thermal safety interlock.

(d) Any article known as a "baby-bouncer," "walker-jumper," or "baby-walker" and any other similar article which is intended to be used by very young children (usually from about four months to 18 months old) while sitting, walking, bouncing, jumping, and/or reclining for napping shall comply with the following provisions:

(A) Frames are designed and constructed in such a manner as to prevent injury from any scissoring or pinching which may occur when the members of the frame or other components rotate about a common axis or fastening point;

(B) Coil springs which expand sufficiently to allow space for insertion of a finger, toe, or another part of a child's anatomy are covered or otherwise designed to prevent injuries;

(C) Holes, slots, cracks, or hinged components in any portion of the article through which a child could insert a finger, toe, or another part of the anatomy are guarded or otherwise designed to prevent injuries;

(D) The articles are designed and constructed so as to eliminate from any portion of the article the possibility of presenting a mechanical hazard through pinching, bruising, lacerating, crushing, breaking, amputating, or otherwise injuring normal use or when subjected to reasonably foreseeable damage or abuse;

(E) The article is labeled:

(i) With a conspicuous statement of the name and address of the manufacturer, packer, distributor, or seller; and

(ii) To bear on the article itself and/or the package containing the article and/or shipping container in addition to the invoice(s) and shipping document(s), a code or mark in a form or manner that will permit future identification of any given batch, lot, or shipment by the manufacturer; and

(F) A company manufacturing the article shall make, keep, and maintain for three years records of sale, distribution, and the results of the inspections and tests conducted in accordance with these rules and shall make such records available upon request at all reasonable hours of any officer or employee of the Public Health Division, or any other employee acting on behalf of the Administrator, and shall permit such officer or employee to inspect and copy such records and to make such inventories of stock as he deems necessary and otherwise to check the correctness of such records.

(e) "Clacker balls." Toys usually known as "clacker balls" and consisting of two balls of plastic or other material connected by a length of line or cord or similar connector intended to be operated in a rhythmic manner by a upward and downward motion of the hand so that the balls will meet forcefully at the top and bottom of two semicircles, thus causing a "clacking" sound shall comply with the following conditions: "Clacker balls" shall have been designed, manufactured, assembled, labeled, and tested in accordance with the following requirements, and when tested at the point of production or while in interstate commerce or while held for sale after shipment in interstate commerce do not exceed the failure rate requirements as set out in **Table 4**:

(A) The toy shall be so designed and fabricated that:

(i) Each ball weighs less than 50 grams; will not shatter, crack, or chip; is free of cracks, flash (ridges due to imperfect moldings), totally enclosed internal voids (holes, cavities, or air bubbles), and crazing (tiny surface cracks); and is free of rough or sharp edges around any hole where the cord enters or over any surface with which the cord may make contact;

(ii) The cord is of high tensile strength, synthetic fibers that are braided or woven, having a breaking strength in excess of 100 pounds; is free of fraying or any other defect that might tend to reduce its strength in use; is not molded in balls made of casting resins which tend to wick or run up into the cord; and is affixed to a ball at the center of the horizontal plane of the ball when it is suspended by the cord;

(iii) When the cord is attached to the ball by means of a knot, the end beneath the knot is chemically fused or otherwise treated to prevent the knot from slipping out or untying in use.

(B) The toy shall be tested at the time of production:

(i) By using a sampling procedure described in Table 4 to determine the number of units to be tested;

(ii) By subjecting each ball tested to ten drops of a five-pound steel impact rod or weight (2-1/2 inches in diameter with a flat head) dropped 48 inches in a vented steel or aluminum tube (2-3/8 inches in diameter) when the ball is placed on a steel or cast iron mount. Any ball showing any chipping, cracking, or shattering shall be counted as a failure within the meaning of the third column in **Table 4**;

(iii) By inspecting each ball tested for smoothness of finish in any holes, on outer surfaces, and on any other portion with which the cord is intended to come into contact. A cotton swab shall be rubbed vigorously over each such surface or area; if any cotton fibers are removed, the ball shall be counted as a failure within the meaning of the fourth column of **Table 4**;

(iv) By fully assembling the toy and testing the cord in such a manner as to test both the strength of the cord and the adequacy with which the cord is attached to the ball and any holding device such as a tab or ring included in the assembly. The fully assembled article shall be vertically suspended by one ball and a 100-pound test applied to the bottom ball. Any breaking, fraying, or unraveling of the cord or any sign of slipping, loosening, or unfastening shall be counted as a failure within the meaning of the fourth column in **Table 4**;

(v) By additionally subjecting any ring or other holding device to a 50-pound test load applied to both cords. The holding device is to be securely fixed horizontally in a suitable clamp in such a manner as to support 50 percent of the area of such holding device and the balls are suspended freely. Any breaking, cracking, or crazing of the ring or other holding device shall be counted as a failure within the meaning of the fourth column in **Table 4**;

(vi) By cutting each ball tested in half and then cutting each half perpendicularly to the first cut into three or more pieces of approximately equal thickness. Each portion is to be inspected before and after cutting, and any ball showing any flash, crack, crazing, or internal voids on such inspection is to be counted as a failure within the meaning of the fourth column in **Table 4**. A transparent ball shall be subjected to the same requirements except that it may be visually inspected without cutting.

(C) The toy shall be fully assembled for use at the time of sale, including the proper attachments of balls, cords, knots, loops, or other holding devices;

(D) The toy shall be labeled:

(i) With a conspicuous statement of the name and address of the manufacturer, packer, distributor, or seller;

(ii) To bear on the toy itself and/or the package containing the toy and/or the shipping container, in addition to the invoice(s) and shipping document(s), a code or mark in a form and manner that

will permit future identification of any given batch, lot, or shipment by the manufacturer;

(iii) To bear a conspicuous warning statement on the front panel of the retail and display carton and on any accompanying literature: That if cracks develop in a ball or if the cord becomes frayed or loose or unfastened, use of the toy should be discontinued; and if a ring or loop or other holding device is present, the statement, "**In use, the ring or loop must be placed around the middle finger and the two cords positioned over the forefinger and held securely between the thumb and forefinger**" or words to that effect which will provide adequate instructions and warnings to prevent the holding device from accidentally slipping out of the hand. Such statements shall be printed in sharply contrasting color within a borderline and in letters at least one-quarter inch high on the main panel of the container and at least 1-1/8 inch high on all accompanying literature.

(E) The manufacturer of the toy shall make, keep, and maintain for three years records of sale, distribution, and results of inspections and tests conducted in accordance with this subparagraph and shall make such records available upon request at all reasonable hours by any officer or employee of the Public Health Division, or any other employee acting on behalf of the Administrator; and shall permit such officer or employee to inspect and copy such records, and to make such inventories of stock as he deems necessary and otherwise to check the correctness of such records;

(F) The lot size, sample size, and failure rate for testing clacker balls are set out in **Table 4**;

(G) Applicability of the exemption provided by this subparagraph shall be determined through use of Table 4. A random sample of the number of articles as specified in the second column of the table shall be selected according to the number of articles in a particular batch, shipment, deliver, lot, or retail stock per the first column. A failure rate as shown in either the third or fourth column shall indicate that the entire batch, shipment, delivery, lot, or retail stock has failed and thus is not exempted under this subparagraph from classification as a banned hazardous substance.

(f) Packaging. Known herein as Requirement No. 27. This requirement is intended to minimize the possibility of asphyxiation hazards that might be caused by thin packaging plastic. Flexible plastic sheets used as packaging materials for shelf packages or used with toys shall be at least 0.00150 inch in nominal thickness but the actual thickness shall ever be less than 0.00125 inch, except for flexible film bags having a combined length and fully extended opening perimeter of less than 23 inches, or bags having an opening perimeter of less than 14 inches, measured after the perimeter has been stretched to its fullest extent. Shrink plastic of less than 0.00150 inch nominal thickness shall be exempt from this requirement, if it is in the form of an overwrap that would normally be destroyed when the package is opened by a consumer. Thickness shall be determined in accordance with **Method C of American Society for Testing and Materials (ASTM) D 374-68, Standard Methods of Test for Thickness of Solid Electrical Insulation**.

(5) Any toy or article intended for use by children which, even though labeled in accordance with these rules, reliable data on human experience shows the toy or article to be hazardous within the meaning of the Act.

(6) Any toy or article intended for use by children which does not satisfy any applicable requirement or test of these rules. All applicable requirements and tests shall be satisfied.

Exemptions for Foods, Drugs, Cosmetics, and Fuels

(1) Foods and drugs otherwise regulated by this state are exempted by ORS 453.015(5); but where a food, drug, or cosmetic offers a substantial risk of injury or illness from any handling or use that is customary or usual, it may be regarded as misbranded under the laws of this state because its label fails to reveal material facts with respect to consequences that may result from use of the article when its label fails to bear information to alert the householder to this hazard.

(2) Fuels. A substance intended to be used as a fuel is exempt from the requirements of the Act when in containers that are intended to be or are installed as part of the heating, cooking, or refrigeration system of a house. A portable container used for delivery or temporary or additional storage, and containing a substance that is a hazardous substance as defined in ORS 453.005(7)(a), is not exempt from the labeling prescribed in ORS 453.015(2) even though it contains a fuel to be used in the heating, cooking, or refrigeration system of a house.

333-016-0090

Exemption from Full Labeling and Other Requirements

(1) Any person who believes a particular hazardous substance intended or packaged in a form suitable for use in the household or by children should be exempted from full label compliance otherwise applicable under the Act, because of the size of the package or because of the minor hazard presented by the substance, or for other good and sufficient reason, may submit to the Administrator a request for exemption under ORS 453.035(4), presenting facts in support of the view that full compliance is impracticable or is not necessary for the protection of the public health. The Administrator shall determine on the basis of the facts submitted and all other available information whether the requested exemption is consistent with the adequate protection of the public health and safety. If he so finds, he shall detail the exemption granted and the reasons therefore by an appropriate means.

(2) The Administrator may on his own initiative determine on the basis of facts available to him that a particular hazardous substance intended or packaged in a form suitable for use in the household or by children should be exempted from full labeling compliance otherwise applicable under the Act because of the size of the package or because of minor hazard presented by the substance or for other good and sufficient reason. If he so finds, he shall detail the exemption granted and the reasons therefore by an appropriate means.

(3) Any person who believes a particular article should be exempted from being classified as a "banned hazardous substance" as provided by ORS 453.055 because it falls within the provisions of ORS 453.035(4) may submit to the Administrator a request for exemption presenting facts in support of his contention. The Administrator shall determine on the basis of the facts submitted, and all other available information, whether the requested exemption is consistent with the purposes of the Act. If he so finds, he shall detail the exemption granted and the reasons therefore by an appropriate means.

(4) On his own initiative the Administrator may determine on the basis of available facts that a particular banned hazardous substance should be exempted from ORS 453.055, because it falls within the provisions of ORS 453.035(4). If he so finds, he shall detail the exemption granted and the reasons therefore by an appropriate means.

(5) Any person who believes that a particular toy should be temporarily exempted from the labeling provisions of these rules promulgated in 1975 because of the minor hazard presented by the toy or for other good and sufficient reason may submit to the Administrator a request for such temporary exemption from the 1975 labeling requirements until March 30, 1976, provided that the labeling requirements of the rules in effect between August 15,

1973, and the 1975 rules will apply during the temporary exemption.

333-016-0095
Exemptions for Small Packages, Minor Hazards, and Special Circumstances

The following exemptions are granted for the labeling of hazardous substances under the provisions of OAR 333-016-0090:

(1) When the sole hazard from a substance in a self-pressurized container is that it generates pressure or when the sole hazard from a substance is that it is flammable or extremely flammable, the name of the component which contributes the hazard need not be stated.

(2) Common matches, including book matches, wooden matches, and so-called "safety" matches are exempted from the labeling requirements of ORS 453.035(2) insofar as they apply to the product being considered hazardous because of being "flammable" or "extremely flammable" as defined in OAR 333-016-0005.

(3) Paper items such as newspapers, wrapping papers, toilet and cleansing tissues, and paper writing supplies are exempted from the labeling requirements of ORS 453.005 to 453.135 insofar as they apply to the products being considered hazardous because of being "flammable" or "extremely flammable" as defined in OAR 333-016-0005.

(4) Thread, string, twine, rope, cord, and similar materials are exempted from the labeling requirements of ORS 453.035(2) insofar as they apply to the products being considered hazardous because of being "flammable" or "extremely flammable" as defined in OAR 333-016-0005.

(5) Laboratory chemicals intended only for research or investigational and other laboratory uses (except those in home chemistry sets) shall be exempt from the requirements of placement provided in OAR 333-016-0115 if all information required by this section and the Act are placed with the required prominence on the label panel adjacent to the main panel.

(6) Small-arms ammunition packaged in retail containers is exempted from the labeling requirements of ORS 453.035(2), provided that such containers bear the following label statements:

(a) The common or usual name of the ammunition in the container;

(b) The statement: "**Warning — Keep out of the reach of children**" or its practical equivalent;

(c) The name and place of business of the manufacturer, packer, seller, or distributor;

(d) The term "ammunition" as used in this paragraph includes small-arms ammunition and loads for powder-actuated tools in a form ready for use in a pistol, revolver, rifle, shotgun, or powder-actuated tool, including blank cartridges and shells.

(7) Rigid or semi-rigid ball-point ink cartridges are exempt from the labeling requirements of ORS 453.035(2) insofar as such requirements would be necessary because the ink contained therein is a "toxic" substance as defined in OAR 333-016-0005, provided that:

(a) The ball-point ink cartridge is of such construction that the ink will, under any reasonably foreseeable conditions of manipulation or use, emerge only from the ball-point end;

(b) When tested by the method described in OAR 333-016-0005, the ink does not have an LD 50 single oral dose of less than 500 milligrams per kilogram of body weight of the test animal;

(c) The cartridge does not have a capacity of more than two grams of ink.

(8) Containers of paste shoe waxes, paste auto waxes, and paste furniture and floor waxes containing toluene (also known as toluol), xylene (also known as xylol), petroleum distillates, and/or turpentine in the concentrations described in OAR 333-016-0065 are exempt from the labeling requirements of OAR 333-016-0065 if the viscosity of such products is sufficiently high that they will not flow from their opened containers when inverted for five minutes at a temperature of 80°F and are exempt from bearing a flammability warning statement if the flammability of such waxes is due solely to the presence of solvents which have flashpoints above 80°F when tested by the method described in OAR 333-016-0035.

(9) Porous-tip ink marking devices are exempt from the labeling requirements of ORS 453.035(2) and OAR 333-016-0065 insofar as such requirements would be necessary because the ink contained therein is a toxic substance as defined in OAR 333-016-0005 and/or because the ink contains ten percent or more by weight of toluene (also known as toluol), xylene (also known as xylol), or petroleum distillates as defined in 333-016-0065 and/or because the ink contains ten percent or more by weight of ethylene glycol, provided that:

(a) The porous-tip ink marking devices are of such construction that the ink is held within the device by an absorbent material so that there is no free liquid within the device, and under any reasonably foreseeable conditions of manipulation and use including reasonably foreseeable abuse by children, the ink will emerge only through the porous writing nib of the device; and

(b)(A) The device has a capacity of not more than 10 grams of ink, and the ink, when tested by methods described in OAR 333-016-0005 has an LD 50 single oral dose of not less than 2.5 grams per kilogram of body weight of the test animal; or

(B) The device has a capacity of not more than 12 grams of ink, and the ink, when tested by methods described in OAR 333-016-0005 has an LD 50 single oral dose of not less than 3.0 grams per kilogram of body weight of the test animal.

(10) Viscous nitrocellulose-base adhesives containing more than four percent methyl alcohol by weight are exempted from the label statement: "**Cannot be made nonpoisonous**" required by OAR 333-016-0065, provided that:

(a) The total amount of methyl alcohol by weight in the product does not exceed 15 percent; and

(b) The contents of any container does not exceed two fluid ounces.

(11) Packages containing polishing or cleaning products which consist of a carrier of solid particulate or fibrous composition and which contain toluene (also known as toluol), xylene (also known as xylol), petroleum distillates in the concentrations described in OAR 333-016-0065 are exempt from the labeling requirements of OAR 333-016-0065 provided that such toluene, xylene, or petroleum distillates are fully absorbed by the solid, semi-solid, or fibrous carrier and cannot be expressed therefrom with any reasonably foreseeable conditions of manipulation.

(12) Containers of dry ink intended to be used as a liquid ink after the addition of water are exempt from the labeling requirements of ORS 453.035(2) and OAR 333-016-0065, insofar as such requirements would be necessary because the dried ink contained therein is a toxic substance as defined in OAR 333-016-0005 and/or because the ink contains ten percent or more by weight of ethylene glycol as defined in OAR 333-016-0065, provided that:

(a) When tested by the method described in OAR 333-016-0005, the dry ink concentrate does not have an LD 50 single oral dose of less than one gram per kilogram of body weight of the test animal;

(b) The dry ink concentrate enclosed in a single container does not weigh more than 75 milligrams;

(c) The dry ink concentrate does not contain over 15 percent by weight of ethylene glycol.

(13) Containers of liquid and semi-solid substances such as viscous-type paints, varnishes, lacquers, roof coating, rubber-vulcanizing preparations, floorcovering adhesives, glazing compounds, and other viscous products containing toluene (also known as toluol), xylene (also known as xylol), or petroleum distillates in concentrations described in OAR 333-016-0065 are exempt from the labeling requirements of OAR 333-016-0065 insofar as that paragraph applies to such toluene, xylene, or petroleum distillates, provided that the viscosity of the substances, or any liquid that may separate or be present in the container, is not less than 150 Saybolt Universal seconds at 100°F.

(14) Customer-owned portable containers that are filled by retail vendors with gasoline, kerosene (kerosene), or other petroleum distillates are exempt from the provision of ORS 453.035(2)(i) which requires that the name and place of business of the manufacturer, distributor, packer, or seller appear on the label of such containers, provided that all the other label statements required by ORS 453.035(2) and OAR 333-016-0065 appear on the labels of containers of the substances named in this paragraph.

(15) Cellulose sponges are exempt from the labeling requirements of ORS 453.035(2) and OAR 333-016-0065 insofar as such requirements would be necessary because they contain ten percent or more of diethylene glycol as defined in OAR 333-016-0065, provided that:

(a) The cellulose sponge does not contain over 15 percent by weight of diethylene glycol;

(b) The diethylene glycol content is completely held by the absorbent cellulose material so that there is no free liquid within the sponge as marketed.

(16) Containers of substances which include salt (sodium chloride) as a component are exempt from the labeling requirements of ORS 453.035(2) insofar as such requirements would be necessary because the salt contained therein is present in a quantity sufficient to render the article "toxic" as defined in OAR 333-016-0005, provided that the labels of such containers bear a conspicuous statement that the product contains salt.

(17) The labeling of substances containing ten percent or more of ferrous oxalite is exempt from the requirement of OAR 333-016-0145 provided that it bears the word "poison" which would otherwise be required for such concentration of a salt of oxalic acid.

(18) Packages containing articles intended as single-use spot removers, and which consist of a cotton pad or other absorbent material saturated with a mixture of dry-cleaning solvents, are exempt from the labeling requirements of ORS 453.035(2) insofar as they apply to the "flammable" hazard as defined in OAR 333-016-0005, provided that:

(a) The article is packaged in a sealed foil envelope;

(b) The total amount of solvent in each package does not exceed 4.5 milliliters;

(c) The article will ignite only when in contact with an open flame, and when so ignited, the article burns with a sooty flame.

(19) Packages containing article intended as single-use spot removers and which consist of a cotton pad or other absorbent material containing methyl alcohol, are exempted from the labeling requirements of OAR 333-016-0065, provided that:

(a) The total amount of cleaning solvent in each package does not exceed 4.5 milliliters, of which not more than 25 percent is methyl alcohol;

(b) The liquid is completely held by the absorbent materials so that there is no free liquid within the packages marketed.

(20) Cigarette lighters containing petroleum distillate fuel are exempt from the labeling requirements of ORS 453.035(2) and OAR 333-016-0065, insofar as such requirements would be necessary because the petroleum distillate contained therein is "flammable" and because the substance is named in 333-016-0065 of the rules as requiring special labeling, provided:

(a) That such lighters contain not more than ten cubic centimeters of fuel at the time of sale; and

(b) That such fuel is contained in a sealed compartment that cannot be opened without the deliberate removal of the flush-set, screw-type refill plug of the lighter.

(21) Containers of dry granular fertilizers and dry granular plant foods are exempt from the labeling requirements of ORS 453.035(2) insofar as such requirements would be necessary because the fertilizer or plant food contained therein is a toxic substance as defined in OAR 333-016-0005, provided that:

(a) When tested by the method described in 333-016-0005, the product has an LD 50 single dose of not less than 3.0 grams per kilogram of body weight of the test animal;

(b) The label of any such exempt dry granular fertilizers discloses the identity of each of the hazardous ingredients;

(c) The label bears the name and address of the manufacturer, packer, distributor, or seller; and

(d) The label bears the statement "**Keep out of the reach of children**" or its practical equivalent.

(22) Small, plastic capsules containing a paste composed of powdered metal solder mixed with a liquid flux are exempt from the requirements of ORS 453.035(2), provided that:

(a) The capsule holds not more than one-half milliliter of the solder mixture;

(b) The capsule is sold only as a component of a kit; and

(c) Adequate caution statements appear on the carton of the kit and on any accompanying labeling which bears directions for use.

(23) Chemistry sets and other science education sets intended primarily for use by juveniles, and replacement containers of chemicals for such sets, are exempt from the requirements of ORS 453.035(2), provided that:

(a) The immediate container of each chemical that is hazardous as defined in the Act and rules bears on its main panel the name of such chemicals, the appropriate signal word for that chemical, and the additional statement, "**Read back panel before using**" (or "**Read side panel before using**" if appropriate) and bears on the back (or side) panel of the immediate container the remainder of the appropriate cautionary statement for the specific chemical in the container;

(b) The experiment manual or other instruction booklet accompanying such set bears on the front page of the leaflet as a preface to any written matter in the leaflet (or on the cover, if there is any) the following caution statement within the borders of a rectangle and in the type size specified in OAR 333-016-0115: **WARNING: This set contains chemicals that may be harmful if misused. Read cautions on individual containers carefully**. **Not to be used by children except under adult supervision**.

(c) The outer carton of such set bears on the main display panel within the borders of a rectangle and in the type size specified in OAR 333-016-0115 the caution statement specified in subsection (b) of this subparagraph.

(24) Fire extinguishers containing fire extinguishing agents which are stored under pressure or which develop pressure under normal conditions of use are exempt from the labeling requirements of ORS 453.035(2) insofar as such requirements apply to the pressure hazard as defined in OAR 333-016-0005(13), provided that:

(a) If the container is under pressure both during storage and under conditions of use, it shall be designed to withstand a pressure of at least six times the charging pressure at 70°F, except that carbon dioxide extinguishers shall be constructed and tested in accordance with applicable Interstate Commerce Commission specifications; or

(b) If the container is under pressure only during conditions of use, it shall be designed to withstand a pressure of not less than five times the maximum pressure developed under closed-nozzle conditions at 70°F or one and one-half times the maximum pressure developed under closed-nozzle conditions at 120°F, whichever is greater.

(25) Cleaning and spot removing kits intended for use in cleaning carpets, furniture, and other household objects; kits intended for use in coating, painting, antiquing, and similarly processing furniture, furnishings, equipment, sidings, and various other surfaces; and kits intended for use in photographic color processing are exempt from the requirements of ORS 453.035(2) and OAR 333-016-0065, provided that:

(a) The immediate container of each hazardous substance in the kit is fully labeled and in conformance with the requirements of the Act and rules issued thereunder;

(b) The carton of the kit bears on the main display panel (or panels) within a borderline, and in the type size specified in OAR 333-016-0115, the following caution statement: "**(Insert proper signal word as specified in subsection (c) of this rule). This kit contains the following chemicals that may be harmful if misused: (List hazardous chemical components by name).**

Read cautions on individual containers carefully. Keep out of the reach of children"; and

(c) If either the word "**POISON**" or "**DANGER**" is required in the labeling of any component or components in the kit, the word "**POISON**" shall be used. In all other cases, the word "**WARNING**" or "**CAUTION**" shall be used.

(26) Packages containing articles intended as single use spot removers and containing methyl alcohol are exempt from the labeling specified in OAR 333-016-0065, provided that:

(a) The total amount of cleaning solvent in each unit does not exceed one milliliter, of which not more than 40 percent is methyl alcohol;

(b) The liquid is contained in a sealed glass ampoule enclosed in a plastic container with a firmly attached absorbent wick at one end through which the liquid from the crushed ampoule must pass, under the contemplated conditions of use;

(c) The labeling of each package of the cleaner bears the statement, "**Warning: Keep out of the reach of children**." **or its practical equivalent, and the name and place of business of the manufacturer**, **packer**, **distributor**, **or seller**.

(27) Packaged fireworks assortments intended for retail distribution are exempt from ORS 453.035(2), provided that:

(a) The package contains only fireworks devices exempted under ORS 480.110 to 480.165;

(b) Each individual article in the assortment is fully labeled and in conformance with the requirements of the Act and rules issued thereunder; and

(c) The outer package bears on the main display panel (or panels) within the borders of a rectangle and in the type size specified in 333-016-0115 the following caution statement: "**Warning: This assortment contains items that may be hazardous if misused and should be used only under adult supervision. Important: Read cautions on individual items carefully**."

(28) Packages containing felt pads impregnated with ethylene glycol are exempt from the labeling requirements of 333-016-0065, provided that:

(a) The total amount of ethylene glycol in each pad does not exceed one gram; and

(b) The liquid is held by the felt pad so that there is no free ethylene glycol within the package.

(29) Cigarette lighters containing butane and/or isobutane fuel are exempt from the labeling requirements of ORS 453.035(2) insofar as such requirements would otherwise be necessary because the fuel therein is extremely flammable under pressure, provided that:

(a) The lighters contain not more than 12 grams of fuel at the time of sale;

(b) The fuel reservoir is designed to withstand a pressure of at least one and one-half times the maximum pressure which will be developed in the container at 120°F.

(30) The outer retail containers of solder kits each consisting of a small tube of flux partially surrounded by a winding of wire-type cadmium-free silver solder are exempt from the labeling requirements of ORS 453.035(2), provided that:

(a) The metal solder contains no cadmium and is not otherwise hazardous under the provisions of the Act;

(b) The tube of flux in the kit is fully labeled and in conformance with the Act and rules thereunder, and any accompanying literature which bears directions for use also bears all the information required by ORS 453.035(2);

(c) The main panel of the outer container bears in type size specified in OAR 333-016-0115 the following: The signal word, the statement of principal hazard or hazards, the statement, "**Keep out of the reach of children**" or its practical equivalent, and instructions to read other cautionary instructions on the tube of flux within.

(31) Visual novelty devices consisting of sealed units, each of which unit is a steel or glass cell containing perchloroethylene, among other things, are exempted from the requirements of OAR 333-016-0115 that would otherwise require a portion of the warning statement to appear on the glass face of the device, provided that:

(a) The device contains not more than 105 milliliters of perchloroethylene and contains no other component that contributes substantially to the hazard;

(b) The following cautionary statement appears on the device (other than on the bottom) in the type size specified in OAR 333-016-0115: "**Caution: If broken, resultant vapors may be harmful. Contains perchloroethylene. Do not expose to extreme heat. If broken indoors, open windows and doors until all odor of chemical is gone. Keep out of the reach of children.**" **A practical equivalent may be substituted for the statement** "**Keep out of the reach of children**."

(32) Hollow plastic toys containing mineral oil are exempt from the labeling specified in OAR 333-016-0065 under the following conditions:

(a) The article contains no other ingredient that would cause it to possess the aspiration hazard specified in OAR 333-016-0065;

(b) The article contains not more than six fluid ounces of mineral oil;

(c) The mineral oil has a viscosity of at least 70 S.U.S. at 100°F;

(d) The mineral oil meets the specifications in the N.F. for light liquid petrolatum;

(e) The container bears the statement "**Caution: Contains light liquid petrolatum N.F. Discard if broken or leak develops**."

(33) Containers of mineral oil having a capacity of not more than one fluid ounce and intended for use in producing a smoke effect for toy trains are exempt from the labeling specified in 333-016-0065 under the following conditions:

(a) The mineral oil meets the specifications in the N.F. for light liquid petrolatum;

(b) The mineral oil has a viscosity of at least 130 S.U.S. at 100°F;

(c) The article contains no other ingredient that contributes to the hazard;

(d) The label declares the presence of light liquid petrolatum and the name and place of business of the manufacturer, packer, distributor, or seller.

(34) Viscous products containing more than four percent by weight of methyl alcohol, such as adhesives, asphalt-base roof and tank coatings, and similar products are exempt from bearing the special labeling that would otherwise be required by OAR 333-016-0065, provided that:

(a) The product contains not more than 15 percent by weight of methyl alcohol;

(b) The methyl alcohol does not separate from the other ingredients upon standing or through any foreseeable use or manipulation;

(c) The viscosity of the product is not less than 7,000 centipoises at 77°F, unless the product is packaged in a pressurized container and is dispensed as a liquid unsuitable for drinking;

(d) Labeling bears the statement, "**Contains methyl alcohol — Use only in well-ventilated area — Keep out of the reach of children**."

(35) Individual blasting caps are exempt from bearing the statement, "**Keep out of the reach of children**" or its practical equivalent, provided that:

(a) Each cap bears conspicuously in the largest type size practicable the statement, "**DANGEROUS — BLASTING CAPS — EXPLOSIVE**";

(b) The outer carton and any accompanying printed matter bear appropriate complete cautionary labeling.

(36) Individual toy rocket propellant devices and separate delay train and/or recovery system activation devices intended for use with premanufactured model rocket engines are exempted from bearing the full labeling required by ORS 453.035(2) insofar as such requirements would otherwise be necessary because the articles are flammable or generate pressure, provided that:

(a) The devices are designed and constructed in accordance with the specifications in OAR 333-016-0105(6);

(b) Each individual device or retail package of devices bears the following:

(A) The statement, "**Warning — Flammable. Read instructions before use**";

(B) The common or usual name of the article;

(C) A statement of the type of engine and use classification;

(D) Instructions for safe disposal;

(E) Name and place of business of manufacturer or distributor.

(c) Each individual rocket engine or retail package of rocket engines distributed to users is accompanied by an instruction sheet bearing complete cautionary labeling and instructions for safe use and handling of the individual rocket engines.

333-016-0100
Exemption for Unlabeled Containers

(1) Except as provided by sections (2) and (3) of this rule, a shipment or other delivery of a hazardous substance that, in accordance with the practice of the trade is to be labeled in substantial quantity at an establishment other than that where originally manufactured or packed, shall be exempt during the time of introduction into the movement in commerce within this state during the time of holding in that establishment from compliance with the labeling requirement of ORS 453.035(2) if:

(a) The person who introduced the shipment or delivery into commerce within this state is the operator of the establishment where the hazardous substance is to be received and labeled; or

(b) The person who introduced the shipment or delivery is not the operator, and the shipment or delivery is made to the establishment under a written agreement, signed by and containing the post office address of the person and the operator, and containing whatever specifications for the labeling of the hazardous substance that are necessary to insure, if such specifications are followed, that the hazardous substance will not be misbranded within the meaning of the Act upon completion of the labeling. The person and the operator shall each keep a copy of the agreement until two years after the final shipment or delivery under the agreement has been completed and shall make copies of the agreement available for inspection upon request of any properly authorized officer or employee of the Public Health Division.

(2) An exemption of a shipment or delivery of a hazardous substance under subsection (1)(a) of this rule shall, at the beginning of the act of removing the shipment or delivery or any part thereof from the establishment, become void ab initio if the hazardous substance comprising the shipment, delivery, or part is misbranded within the meaning of the Act when so removed.

(3) An exemption of a shipment or delivery of a hazardous substance under subsection (1)(b) of this rule shall become void ab initio with respect to the person who introduced the shipment or delivery into commerce within this state upon refusal by that person to make available for inspection a copy of the agreement as required by subsection (1)(b) of this rule.

(4) An exemption of a shipment or other delivery of a hazardous substance under subsection (1)(b) of this rule shall expire:

(a) At the beginning of the act of removing the shipment or delivery, or any part thereof, from the establishment if the hazardous substance comprising the shipment, delivery, or part is misbranded within the meaning of the Act when so removed; or

(b) Upon refusal by the operator of the establishment where the hazardous substance is to be labeled, to make available for inspection a copy of the agreement required by subsection (1)(b) of this rule.

333-016-0105
Exemptions from Classification as Banned Hazardous Substances

The term "banned hazardous substances" as used in ORS 453.055 shall not apply to the following articles, provided that these articles bear labeling giving adequate directions and warnings for safe use:

(1) Chemistry sets and other science education sets intended primarily for juveniles, and replacement components for such sets when labeled in accordance with ORS 453.015 and 453.035 and OAR 333-016-0095(23).

(2) Educational materials such as art materials, preserved biological specimens, laboratory chemicals, and other articles intended and used for educational purposes.

(3) Liquid fuels containing more than four percent by weight of methyl alcohol that are intended and used for operation of miniature engines for model airplanes, boats, cars, etc.

(4) Novelties consisting of a mixture of polyvinyl acetate, U.S. certified colors, and not more than 25 percent by weight of acetone, and intended for blowing plastic balloons.

(5) Games containing, as the sole hazardous component, a self-pressurized container of soap solution or similar foam-generating mixture, provided that the foam-generating component has no hazards other than being in a self-pressurized container.

(6) Model rocket propellant devices designed for use in lightweight, recoverable, and reflyable model rockets, provided such devices:

(a) Are designed to be ignited by electrical means;

(b) Contain no more than 62.5 grams (2.2 ounces) of propellant material and produce less than 80 newton-seconds (17.92 pound-seconds) of total impulse with thrust duration not less than 0.050 second;

(c) Are constructed such that all chemical ingredients are preloaded into a cylindrical paper or similarly constructed nonmetallic tube that will not fragment into sharp, hard pieces;

(d) Are designed so that they will not burst under normal conditions of use, are incapable of spontaneous ignition, and do not contain any type of explosive or pyrotechnic warhead other than a small parachute or recovery-system activation charge.

(7) Separate delay train and/or recovery system activation devices intended for use with premanufactured model rocket engines wherein all of the chemical ingredients are preloaded so the user does not handle any chemical ingredient and are so designed that the main casing or container does not rupture during operation.

(8) Self-pressurized products containing fluorocarbon propellants, provided that the product has no hazards other than being self-pressurized and containing a fluorocarbon propellant and is labeled in accordance with OAR 333-016-0150.

333-016-0110
Labeling of Toys, Including Games

(1)(a) Labeling, literature, and marking. Known herein as Requirement No. 28. References in these rules to OAR 333-016-0110 shall include all subparagraphs of OAR 333-016-0110. Labeling requirements of OAR 333-016-0115 which are applicable to the product and which are in addition to or more demanding of the manufacturers shall apply in addition to the requirements of this section.

(b) General labeling requirements:

(A) Age grading. Toy packages shall be labeled to indicate the minimum recommended age (by months or by years) of children for whom the toy is intended;

(B) Instructional literature. Information and instructions provided with the toy, whether on the package or in leaflet form, shall be easy to read and understand;

(C) Producers markings. The principal components of toys or containers shall be marked with the name and address of the producer or distributor. This marking shall be legible and so posi-

tioned as to be easily seen by the customer and shall resist normal use conditions. Toys shall carry a code which will enable the producer to identify model changes, except for toys comprising many loose components, in which case, the code shall be placed on the permanent storage container.

(2) Protective labeling. Known herein as Requirement No. 29:

(a) Certain toys or packages are required to carry protective labeling in order to comply with OAR 333-016-0080(3)(a)(A)(i) (sharp edges); 333-016-0080(3)(a)(C)(iv); 333-016-0080(3)(g)(A) and (B); 333-016-0080(3)(h); and 333-016-0080(4)(b)(A), (B), and (C). They shall be labeled with the word "**CAUTION**" and a statement of the hazard on the principal display panel. In addition, the toys falling under the requirements of OAR 333-016-0080(3)(g)(A) and 333-016-0080(3)(h) shall themselves be labeled with the word "**CAUTION**" and a statement of the hazard. The principal display panel is defined as that part of a package which is most likely to be displayed, presented, shown, or examined under normal and customary conditions of display for retail sale;

(b) Additional and special cautionary labeling requirements are provided in OAR 333-016-0080(3)(a)(C)(v); 333-016-0080(4)(a)(A), (B), and (C); 333-016-0080(4)(b)(A)(i); 333-016-0080(4)(c)(A)(i), (ii), and (iii); 333-016-0080(4)(d)(E); and 333-016-0080(4)(e)(D).

(3) Printing size. Known herein as Requirement No. 30. All markings required by rules OAR 333-016-0080 and 333-016-0110 shall be of a permanent nature, whether paint-stenciled, die-stamped, molded, or indelibly stamped. All required markings shall appear in block lettering. Markings shall contrast sharply with their background (whether by color, projection, or indentation), and shall be readily visible and legible. Minimum lettering heights shall be as follows: Surface Area Displayed Marking (square inches) — Minimum Height of Lettering (inches):

(a) Under 5 — 1/16;

(b) 5 or more and under 25 — 1/8;

(c) 25 or more and under 100 — 3/16;

(d) 100 or more and under 400 — 1/4;

(e) 400 or more — 1/2.

(4) The term "toy" as used in this rule includes games.

333-016-0115

Labeling Requirements, Placement, Conspicuousness, Contrast

(1) The signal word, the statement of the principal hazard or hazards, and instructions to read carefully any cautionary information that may be placed elsewhere on the label shall appear together on the main panel of the label. Such information shall be placed together and distinctively apart from other wording or designs. The necessary prominence shall be achieved by placement within the borders of a square or rectangle with or without a borderline, and by the use of suitable contrasts with the background achieved by distinctive typography or color, and by both color and typography when needed. For hazardous substances that contain toxic or highly toxic chemicals, the label shall include in addition to all other requirements of these rules the generic name of the chemical or chemicals which present the most significant hazards.

(2) If the product is "highly toxic" as defined in OAR 333-016-0005 and ORS 453.005(a), (B), or (C), the labeling shall also include in conjunction with the word "poison," the skull and crossbones symbol. The word "poison" is not considered a signal word as that term is used in section (1) of this rule.

(3) The signal word and statement of hazard shall be in capital letters. The size of the signal word (and the word "poison" if required) shall be of a size bearing a reasonable relationship to the other type on the main panel, but shall not be less than 18 point type, and the size of the statement of hazard shall not be less than 12 point type, unless the label space on the container is too small to accommodate such type size. When the size of the label space requires a reduction in type size, the reduction shall be made to a size no smaller than is necessary and in no event to a size smaller than six point type.

(4) All the items of label information required by ORS 453.035(2)(a) through (i) may appear on the main panel; but if they do not, all such items not required by section (1) of this rule to appear on the main panel shall be placed together in a distinctive place elsewhere on the label with adequate contrast, achieved by typography, color, or layout except that the name and place of business of the manufacturer, packer, distributor, or seller may appear separately on the same or on a different panel. The type size used shall bear a reasonable relationship to the printing on the panel involved and shall be no smaller than ten point unless the available label space requires reduction, in which event it shall be reduced no smaller than 6 point type unless because of small label space an exception has been granted under ORS 453.035(4) and 333-016-0095.

(5) Collapsible metal tubes containing hazardous substances shall be labeled so that all items of label information required by ORS 453.035(2)(a) through (i) shall appear as close to the dispensing end of the container as possible. The size, placement, and conspicuousness of these statements shall conform with sections (1), (3), and (4) of this rule.

(6) Unpackaged hazardous substances intended or in a form suitable for use in or around a household or by children shall be labeled so that all items of information required by the Act or by rules in this part shall appear upon the article itself. In instances where such labeling is impracticable because of the size or nature of the article, the required cautionary labeling must be displayed by means of a tag or other suitable material that is securely affixed to the article so that the labeling will remain attached throughout conditions of merchandising and distribution to the ultimate consumer. The size, placement, and conspicuousness of these statements shall conform with sections (1), (3), and (4) of this rule.

Deceptive Use of Disclaimers

A hazardous substance shall not be deemed to have met the requirements of ORS 453.035(2)(a) through (i) if there appears in or on the label or in accompanying literature, words, statements, designs, or other graphic material that in any manner negates or disclaims any of the label statements required by the Act; for example, a statement on a toxic or irritant substance, such as "harmless" or "safe around pets."

Condensation of Label Information

Whenever the statement of the principal hazard or hazards itself provides the precautionary measures to be followed or avoided, a clear statement of the principal hazard will satisfy both the provisions of ORS 453.035(2)(c) and (d). When the statement of precautionary measures in effect provides instruction for first-aid treatment the statement of the precautionary measures will satisfy both ORS 453.035(2)(d) and (e).

Substances Determined to be "Special Hazards" (e.g., to children)

Whenever the Administrator determines that for a particular hazardous substance intended or packaged in a form suitable for use in the household or by children, the requirements of ORS 453.035(2) are not adequate for the protection of the public health and safety because of some special hazard, he shall issue an order by an appropriate means, which specifies such reasonable variations or additional label requirements that he finds are necessary for the protection of the public health and safety. Such order shall specify a date that is not less than 90 days after the order is published (unless emergency conditions stated in the order specify an earlier date) after which any such hazardous substance intended, or packaged in a form suitable for use in the household or by children, that fails to bear a label in accordance with such order shall be deemed as a misbranded hazardous substance.

Substances with Multiple Hazards or Other Special Hazards

(1) Any article that presents more than one type of hazard (for example, if the article is both "toxic" and "flammable") must be labeled with an affirmative statement of each such hazard; precautionary measures describing the action to be followed or avoided for each such hazard; instructions, when necessary or appropriate, for first-aid treatment of persons suffering from the ill effects that may result from each such hazard; instructions for handling and storage of articles that require special care in handling and storage because of more than one type of hazard presented by the article, or for any other reason, as well as the common or usual name (or the chemical name if there is no common or usual name) for each hazardous component present in the article.

(2) Label information referring to the possibility of one hazard may be combined with parallel information concerning any additional hazards presented by the article, provided that the resulting condensed label statement shall contain all of the information needed for dealing with each type of hazard presented by the article.

For the Following Substances and at the Following Concentrations, the Word "Poison" Is Necessary Instead of Any Signal Word

(1) Hydrochloric acid and any preparation containing free or chemicallyunneutralized hydrochloric acid ($HC_{1)}$ in a concentration of ten percent or more.

(2) Sulfuric acid and any preparation containing free or chemically unneutralized sulfuric acid (HSO_4) in a concentration of ten percent or more.

(3) Nitric acid or any preparation containing free or chemically unneutralized nitric acid (HNO_3) in a concentration of five percent or more.

(4) Carbolic acid (C_6H_5OH), also known as phenol, and any preparation containing carbolic acid in a concentration of five percent or more.

(5) Oxalic acid and any preparation containing free or chemically unneutralized oxalic acid ($COOH_22H_2O$) in a concentration of ten percent or more.

(6) Any salt of oxalic acid and any preparation containing any such salt in a concentration of ten percent or more.

(7) Acetic acid or any preparation containing free or chemically unneutralized acetic acid (CH_3COOH) in a concentration of 20 percent or more.

(8) Hypochlorous acid, either free or combined and any preparation containing the same in a concentration that will yield ten percent or more by weight of available chlorine.

(9) Potassium hydroxide and any preparation containing free or chemically unneutralized potassium hydroxide (KOH) including caustic potash and vienna paste (vienna caustic) in a concentration of ten percent or more.

(10) Sodium hydroxide and any preparation containing free or chemically unneutralized sodium hydroxide (NaOH) including caustic soda and lye in a concentration of ten percent or more.

(11) Silver nitrate, sometimes known as lunar caustic and any preparation containing silver nitrate ($AgNO_3$) in a concentration of five percent or more.

(12) Ammonia water and any preparation containing free or chemically uncombined ammonia (NH_3) including ammonium hydroxide and "hartshorn" in a concentration of five percent or more.

(13) Arsenic and its preparations, in concentrations that fall within the definition of toxic substance described in OAR 333-016-0005(6)(a).

(14) Corrosive sublimate (mercuric-chloride), in concentrations that fall within the definition of toxic substance described in OAR 333-016-0005(6)(a).

(15) Cyanides and preparations of cyanides, including hydrocyanic acid, in concentrations that fall within the definition toxic substance described in OAR 333-016-0005(6)(a).

(16) Strychnine ($C_2H_22N_2O_2$) in concentrations that fall within the definition of toxic substance described in OAR 333-016-0005(6)(a).

Self-Pressurized Containers; Labeling

(1) Self-pressurized containers that fail to bear a warning statement adequate for the protection of the public health and safety may be misbranded under the Act, except as otherwise provided pursuant to ORS 453.035.

(2) The following warning statement will be considered as meeting the requirements of ORS 453.035 if the only hazard associated with an article is that the contents are under pressure:

"WARNING — CONTENTS UNDER PRESSURE. Do not puncture or incinerate container. Do not expose to heat or store at temperatures above 120 degrees Fahrenheit. Keep out of the reach of children."

The word "**CAUTION**" may be substituted for the word "**WARNING**." A practical equivalent may be substituted for the statement "Keep out of the reach of children."

(3) That portion of the warning statement set forth in section (2) of this rule in capital letters should be printed on the main (front) panel of the container in capital letters of the type size specified in OAR 333-016-0115. The balance of the cautionary statements may appear together on another panel, provided that the front panel also bears a statement such as, "**Read carefully other cautions on _____ panel**."

(4) If an article has additional hazards, such as skin or eye irritancy, toxicity, or flammability, appropriate additional front and rear panel precautionary labeling is required.

(5) If the article contains a fluorocarbon propellant, it shall bear on its label the additional statement,

"WARNING — Use only as directed; intentional misuse by deliberately concentrating and inhaling the contents can be harmful or fatal," and "contains fluorocarbons."

333-016-0155
Methyl Alcohol-Base Radiator Antifreeze; Labeling

(1) Methyl alcohol-base (methanol-base) radiator antifreeze distributed in containers intended or suitable for household use may be misbranded under the Act if the containers fail to bear a warning statement adequate to the protection of the public health and safety, except as otherwise provided pursuant to ORS 453.025.

(2) The following warning statement will be considered as meeting the requirements of ORS 453.005 to 453.135 with respect to methyl alcohol-base radiator antifreeze when the only hazard

foreseeable is that caused by the methyl alcohol content and when the article has a flashpoint in the "flammable" range as that term is defined in ORS 453.005:

"DANGER — POISON (Skull and Crossbones Symbol) MAY BE FATAL OR CAUSE BLINDNESS IF SWALLOWED FLAMMABLE — VAPOR HARMFUL

Contains methyl alcohol (methanol). Cannot be made nonpoisonous. Avoid contact with eyes. Use only in a well-ventilated area. Keep away from heat and open flame. Do not store in open or unlabeled containers. First-aid: In case of contact with eyes, flush thoroughly with water. If swallowed, induce vomiting (give a tablespoonful of salt in a glass of warm water). Repeat until vomit fluid is clear. Call a physician immediately. Keep out of reach of children."

(3) The words that are in capital letters in the warning statement set forth in section (2) of this rule shall be printed on the main (front) panel or panels of the container in capital letters of the type size specified in OAR 333-016-0115, except that the word "**POISON**" and the skull and crossbones symbol may appear on another panel with the balance of the cautionary information. The balance of the cautionary statements may appear together on another panel, provided the front panel bears a statement such as, "**Read carefully other cautions on _____ panel**."

333-016-0160
Ethylene Glycol-Base Radiator Antifreeze; Labeling

(1) Ethylene glycol-base radiator antifreeze distributed in containers intended or suitable for household use may be misbranded under the Act if the containers fail to bear the following warning statements which the Administrator considers necessary for the protection of the public health and safety, and which will be considered as meeting the requirements of ORS 453.005 to 453.135 with respect to ethylene glycol-base radiator antifreeze, with and without added sodium arsenite of over 0.01 percent by weight, when the only hazard foreseeable is by the ethylene glycol and (if present) the added sodium arsenite:

(a) Ethylene glycol antifreeze containing less than 0.01 percent by weight of sodium arsenite:

"WARNING — HARMFUL OR FATAL IF SWALLOWED

Do not drink antifreeze or solution. If swallowed, induce vomiting immediately. Call a physician. Ethylene glycol base. Do not store in open or unlabeled containers. Keep out of reach of children."

(b) Ethylene glycol antifreeze containing 0.01 percent but no more than one percent by weight of sodium arsenite:

"WARNING — HARMFUL OR FATAL IF SWALLOWED

"Do not drink antifreeze or solution. If swallowed, induce vomiting immediately. Call a physician. Ethylene glycol base containing sodium arsenite (less than one percent).
Antidote for sodium arsenite: Dimercaprol (BAL) to be administered only by a physician.
Do not store in open or unlabeled containers. Keep out of reach of children."

(2) The words that are in capital letters in the warning statements set forth in subsection (b) of this section shall be printed on the main (front) panel or panels of the container in capital letters of the type size specified in OAR 333-016-0115. The balance of the cautionary statements may appear together on another panel, provided the front panel bears a statement such as, "**Read carefully other cautions on _____ panel**."

Extremely Flammable Contact Adhesives; Labeling

(1) Extremely flammable contact adhesives, also known as contact bonding cements, when distributed in containers intended or suitable for household use may be misbranded under the Act if the containers fail to bear a warning statement adequate for the protection of the public health and safety.

(2) The following warning statement is considered as a minimum cautionary labeling adequate to meet the requirements of ORS 453.005 to 453.135 of the Act with respect to containers of more than one-half pint of contact adhesive and similar liquid or semiliquid articles having a flashpoint at or below 20°F as determined by the method in 333-016-0035 when the only hazard foreseeable is that caused by the extreme flammability of the mixture:

"DANGER EXTREMELY FLAMMABLE VAPORS MAY CAUSE FLASH FIRE

Vapors may ignite explosively. Prevent build-up of vapors — open all windows and doors — use only with cross ventilation. Keep away from heat, sparks, and open flame. Do not smoke, extinguish all flames and pilot lights, and turn off stoves, heaters, electric motors, and other sources of ignition during use and until all vapors are gone. Close container after use.
Keep out of the reach of children."

(3) The words that are in capital letters in the warning statement set forth in section (2) of this rule shall be printed on the main (front) panel or panels of the container in capital letters of the type size specified in OAR 333-016-0115. The balance of the cautionary information may appear together on another panel, provided the front panel bears a statement such as, "**Read carefully other cautions on _____ panel**," the blank being filled in with the identification of the specific label panel bearing the balance of the cautionary labeling. It is recommended that a borderline be used in conjunction with the cautionary labeling.

(4) If an article has additional hazards, or contains ingredients listed in OAR 333-016-0065 as requiring special labeling, appropriate additional front and rear panel precautionary labeling is required.

Examinations and Investigations; Samples

When any officer or employee of the Public Health Division collects a sample of a hazardous substance for analysis under the Act, the sample shall be designated as an official sample if records

or other evidence is obtained by him or any other officer or employee of the Public Health Division, indicating that the shipment or other lot of the article from which such sample was collected was introduced or delivered for introduction into this state or was in or was received in this state. Only samples so designated by an employee of the Public Health Division shall be considered to be official samples. All employees shall pay or offer to pay the owner, operator, or agent in charge, their cost for any such sample and give a receipt describing the sample obtained. For the purpose of determining whether or not a sample is collected for analysis, the term "analysis" includes examinations and tests. The owner of a hazardous substance of which an official sample is collected is the person who owns the shipment or other lot of the article from which the sample is collected.

"Administrator" Intended to Include "State Public Health Officer"

Wherever in the foregoing rules OAR 333-016-0005 through 333-016-0185 the term "Administrator" is used, it is intended to also include and shall be deemed to additionally refer to the "State Public Health Officer" as defined in ORS 431.045.

List of High Priority Chemicals of Concern for Children's Health When Used In Children's Products

333-016-2000
Purpose, Scope, and Effective Date

(1) These rules establish the initial list of high priority chemicals of concern for children's health when used in children's products. The presence of a high priority chemical of concern in a children's product does not necessarily mean that the product is harmful to human health or that there is any violation of existing safety standards or laws. The information required to be reported in these rules will help fill a data gap that exists for both consumers and agencies.

(2) A manufacturer of children's products sold or offered for sale in this state must provide biennial notice to the Oregon Health Authority, of all children's products that contain a high priority chemical listed in OAR 333-016-2020.

(3) A manufacturer's first report is due no later than January 1, 2018.

Stat. Auth.: OL 2015, ch. 786, sec. 3
Stats. Implemented: OL 2015, ch. 786, sec. 3
Hist.: PH 29-2015, f. 12-29-15, cert, ef. 1-1-16

333-016-2010
Definitions

(1) "Chemical" means:

(a) A substance with a distinct molecular composition and the breakdown products of the substance that form through decomposition, degradation or metabolism.

(b) A group of structurally related substances and the breakdown products of the substances that form through decomposition, degradation or metabolism.

(2) "Children's cosmetics" means products that are intended to be rubbed, poured, sprinkled or sprayed on, introduced into or otherwise applied to the human body or any part thereof for cleansing, moisturizing, beautifying, promoting attractiveness or altering the appearance. "Children's cosmetics" does not mean soap, dietary supplements or food and drugs approved by the United States Food and Drug Administration.

(3)(a) "Children's product" means:

(A) Any of the following products that are made for, marketed for use by or marketed to children under 12 years of age:

(i) A product designed or intended by the manufacturer to facilitate sucking, teething, sleep, relaxation, feeding or drinking.

(ii) Children's clothing and footwear.

(iii) Car seats.

(iv) Children's cosmetics.

(v) Children's jewelry.

(vi) Toys.

(B) Any component part of a product specified in paragraph (A) of this subsection.

(b) "Children's product" does not mean:

(A) Athletic shoes with cleats or spikes.

(B) Batteries.

(C) BB guns, pellet guns and air rifles.

(D) Bicycles and tricycles.

(E) Chemistry sets.

(F) Consumer electronic products, including personal computers, audio and video equipment, calculators, wireless telephones and game consoles, handheld devices that incorporate a video screen and are used to access interactive software, and the associated peripherals.

(G) Interactive software intended for leisure and entertainment, such as computer games, and their storage media, such as compact discs.

(H) Model rockets.

(I) Pocketknives and multitools.

(J) Roller skates.

(K) Scooters.

(L) Sets of darts with metallic points.

(M) Slings and catapults.

(N) Snow sporting equipment, including skis, poles, boots, snowboards, sleds and bindings.

(O) Sporting equipment and accessories, including but not limited to bats, balls, gloves, sticks, pucks, pads, helmets and other protective equipment, weight training and exercise aids, protective eyewear, backpacks and tents, raingear, sport bags and luggage, and golf equipment.

(P) Video toys that can be connected to a video screen and are operated at a nominal voltage exceeding 24 volts.

(Q) Food and beverages and food and beverage packaging regulated by the United States Food and Drug Administration or the United States Department of Agriculture.

(4) "These rules" mean OAR 333-016-2000 through 333-016-2030.

Stat. Auth.: OL 2015, ch. 786, sec. 3
Stats. Implemented: OL 2015, ch. 786, sec. 3

333-016-2020
Chemicals of High Concern to Children

The following chemicals are designated as high priority chemicals of concern for children's health when used in children's products:

(1) Formaldehyde (50-00-0).
(2) Aniline (62-53-3).
(3) N-Nitrosodimethylamine (62-75-9).
(4) Benzene (71-43-2).
(5) Vinyl chloride (75-01-4).
(6) Acetaldehyde (75-07-0).
(7) Methylene chloride (75-09-2).
(8) Carbon disulfide (75-15-0).
(9) Methyl ethyl ketone (78-93-3).
(10) 1,1,2,2-Tetrachloroethane (79-34-5).
(11) Tetrabromobisphenol A (79-94-7).
(12) Bisphenol A (80-05-7).
(13) Diethyl phthalate (84-66-2).
(14) Dibutyl phthalate (84-74-2).
(15) Di-n-hexyl phthalate (84-75-3).
(16) Phthalic anhydride (85-44-9).
(17) Butyl benzyl phthalate (BBP) (85-68-7).
(18) N-Nitrosodiphenylamine (86-30-6).
(19) Hexachlorobutadiene (87-68-3).
(20) Propyl paraben (94-13-3).
(21) Butyl paraben (94-26-8).
(22) 2-Aminotoluene (95-53-4).

(23) 2,4-Diaminotoluene (95-80-7).
(24) Methyl paraben (99-76-3).
(25) p-Hydroxybenzoic acid (99-96-7).
(26) Ethylbenzene (100-41-4).
(27) Styrene (100-42-5).
(28) 4-Nonylphenol (104-40-5); 4-NP and its isomer mixtures including CAS 84852-15-3 and CAS 25154-52-3.
(29) para-Chloroaniline (106-47-8).
(30) Acrylonitrile (107-13-1).
(31) Ethylene glycol (107-21-1).
(32) Toluene (108-88-3).
(33) Phenol (108-95-2).
(34) 2-Methoxyethanol (109-86-4).
(35) Ethylene glycol monoethyl ester (110-80-5).
(36) Tris(2-chloroethyl) phosphate (115-96-8).
(37) Di-2-ethylhexyl phthalate (117-81-7).
(38) Di-n-octyl phthalate (DnOP) (117-84-0).
(39) Hexachlorobenzene (118-74-1).
(40) 3,3'-Dimethylbenzidine and Dyes Metabolized to 3,3'-Dimethylbenzidine (119-93-7).
(41) Ethyl paraben (120-47-8).
(42) 1,4-Dioxane (123-91-1).
(43) Perchloroethylene (127-18-4).
(44) Benzophenone-2 (Bp-2); 2,2',4,4'-Tetrahydroxybenzophenone (131-55-5).
(45) 4-tert-Octylphenol; 4(1,1,3,3-Tetramethylbutyl) phenol (140-66-9).
(46) Estragole (140-67-0).
(47) 2-Ethylhexanoic acid (149-57-5).
(48) Octamethylcyclotetrasiloxane (556-67-2).
(49) Benzene, Pentachloro (608-93-5).
(50) C.I. Solvent yellow 14 (842-07-9).
(51) N-Methylpyrrolidone (872-50-4).
(52) 2,2',3,3',4,4',5,5',6,6'-Decabromodiphenyl ether; BDE-209 (1163-19-5).
(53) Perfluorooctanyl sulphonic acid and its salts; PFOS (1763-23-1).
(54) Phenol, 4-octyl (1806-26-4).
(55) 2-Ethyl-hexyl-4-methoxycinnamate (5466-77-3).
(56) Mercury (7439-97-6) and mercury compounds including methyl mercury (22967-92-6).
(57) Molybdenum and molybdenum compounds (7439-98-7).
(58) Antimony and Antimony compounds (7440-36-0).
(59) Arsenic and Arsenic compounds (7440-38-2), including arsenic trioxide (1327-53-3) and dimethyl arsenic (75-60-5).
(60) Cadmium and cadmium compounds (7440-43-9).
(61) Cobalt and cobalt compounds (7440-48-4).
(62) Tris(1,3-dichloro-2-propyl)phosphate (13674-87-8).
(63) Butylated hydroxyanisole; BHA (25013-16-5).
(64) Hexabromocyclododecane (25637-99-4).
(65) Diisodecyl phthalate (DIDP) (26761-40-0).
(66) Diisononyl phthalate (DINP) (28553-12-0).

333-016-2030
Modifications to the List of High Priority Chemicals of Concern for Children's Health

(1) The Oregon Health Authority shall consider adding a chemical to the list of high priority chemicals of concern for children's health in OAR 333-016-2020 if that the chemical, on or after the effective date of these rules:
(a) Has been added to any of the following:
(A) Washington's list of Chemicals of High Concern to Children (WAC 173-334-130);
(B) Maine's list of Chemicals of High Concern (Maine law 38 § 1693-A(2));
(C) Minnesota's list of Chemicals of High Concern (Minn. Stat. 2010 116.9401 – 116.9407);
(D) Vermont's list of Chemicals of high concern to children (18 V.S.A. chapter 38A § 1773);
(b) Is currently or subsequently identified by the United States Environmental Protection Agency (USEPA) as being "carcinogenic to humans", or "likely to be carcinogenic to humans" through USEPA's Integrated Risk Information System;
(c) Has been or is subsequently found to have a reference dose or reference concentration based on neurotoxicity through USEPA's Integrated Risk Information System;
(d) Is currently or subsequently identified in monographs on the Potential Human Reproductive and Developmental Effects, United States Office of Health and Human Services National Toxicology Program, Office of Health Assessment and Translation as a reproductive or developmental toxicant; or
(e) Is currently or subsequently identified by the Centers for Disease Control and Prevention in its National Report on Human Exposure to Environmental Chemicals.
(2) The Authority shall also consider adding a chemical to the list of high priority chemicals of concern for children's health in OAR 333-016-2020 if that the chemical, on or after the effective date of these rules:
(a) Is found to have the potential, as demonstrated by credible, peer-reviewed scientific evidence to:
(A) Harm the normal development of a fetus or child or cause other developmental toxicity;
(B) Act as a carcinogen;
(C) Cause genetic damage or reproductive harm;
(D) Disrupt the endocrine system;
(E) Damage the nervous system, immune system or organs;
(F) Cause other systemic toxicity;
(G) Be a very persistent toxic substance by having a half-life greater than or equal to one of the following:
(i) A half-life in soil or sediment of greater than one hundred eighty days.
(ii) A half-life greater than or equal to sixty days in water or evidence of long-range transport; or
(H) Be a very bioaccumulative toxic substance by having a bioconcentration factor or bioaccumulation factor greater than or equal to five thousand, or if neither are available, having a log Kow greater than 5.0; and
(b) Has been found through:
(A) Biomonitoring to be present in human blood, umbilical cord blood, breast milk, urine or other bodily tissues or fluids;
(B) Sampling and analysis to be present in household dust, indoor air, drinking water or elsewhere in the home environment; or
(C) Monitoring to be present in fish, wildlife or the natural environment.
(3) The Oregon Health Authority may remove a chemical from the list if the Authority determines that:
(a) The chemical is no longer being used in children's products; or
(b) The chemical has been removed from any of the lists identified in subsection (1)(a) through (e) of this rule.
(4) The list of high priority chemicals of concern for children's health in OAR 333-016-2020 may only be modified by following the Administrative Procedures Act rulemaking process.

DIVISION 17

DISEASE CONTROL (DEFINITIONS AND REFERENCES)

333-017-0000
Definitions

For purposes of OAR chapter 333, divisions 17, 18 and 19, unless the context requires otherwise or a rule contains a more specific definition, the following definitions shall apply.
(1) "AIDS": AIDS is an acronym for acquired immunodeficiency syndrome. An individual is considered to have AIDS when their illness meets criteria published in Morbidity and Mortality

Weekly Report, Volume 41, Number RR-17, pages 1–4, December 18, 1992.

(2) "Animal Suspected of Having Rabies": An animal is suspected of having rabies when:

(a) It is a dog, cat, or ferret not known to be satisfactorily vaccinated against rabies (as defined in OAR 333-019-0017), or it is any other mammal; and

(b) It exhibits one or more of the following aberrant behaviors or clinical signs: unprovoked biting of persons or other animals, paralysis or partial paralysis of limbs, marked excitation, muscle spasms, difficulty swallowing, apprehensiveness, delirium, or convulsions; and it has no other diagnosed illness that could explain the neurological signs.

(3) "Approved Fecal Specimen" means a specimen of feces from a person who has not taken any antibiotic orally or parenterally for at least 48 hours prior to the collection of the specimen. Improper storage or transportation of a specimen, or inadequate growth of the culture suggestive of recent antibiotic usage can, at the discretion of public health microbiologists, result in specimen rejection.

(4) "Authority" means the Oregon Health Authority.

(5) "Bite, Biting, Bitten": The words bite, biting, and bitten refer to breaking of the skin by the teeth of an animal, or mouthing a fresh abrasion of the skin by an animal.

(6) "Case" means a person who has been diagnosed by a health care provider as having a particular disease, infection, or condition, or whose illness meets defining criteria published in the Authority's Investigative Guidelines.

(7) "Children's facility" means:

(a) A certified child care facility as described in ORS 329A.030 and 329A.250 to 329A.450, except an "exempted children's facility" as defined in OAR 333-050-0010;

(b) A program operated by, or sharing the premises with, a certified child care facility, school or post-secondary institution where care is provided to children, six weeks of age to kindergarten entry, except an "exempted children's facility" as defined in OAR 333-050-0010; or

(c) A program providing child care or educational services to children, six weeks of age to kindergarten entry, in a residential or nonresidential setting, except an "exempted children's facility" as defined in OAR 333-050-0010.

(8) "Control" has the meaning given that term in ORS 433.001.

(9) "Disease outbreak" has the meaning given that term in ORS 431A.005.

(10) "Enterobacteriaceae family" means the family of bacteria that includes but is not limited to the following genera and taxonomic groups:

(a) Budvicia;
(b) Buttiauxella;
(c) Cedecea;
(d) Citrobacter;
(e) Edwardsiella;
(f) Enteric Group 58;
(g) Enteric Group 59;
(h) Enteric Group 60;
(i) Enteric Group 63;
(j) Enteric Group 64;
(k) Enteric Group 68;
(l) Enteric Group 69;
(m) Enteric Group 137;
(n) Enterobacter;
(o) Escherichia;
(p) Ewingella;
(q) Hafnia;
(r) Klebsiella;
(s) Kluyvera;
(t) Leclercia;
(u) Leminorella;
(v) Moellerella;
(w) Morganella;
(x) Obesumbacterium;
(y) Pantoea;
(z) Photorhabdus;
(aa) Plesiomonas;
(bb) Pragia;
(cc) Proteus;
(dd) Providencia;
(ee) Rahnella;
(ff) Salmonella;
(gg) Serratia;
(hh) Shigella;
(ii) Tatumella;
(jj) Trabulsiella;
(kk) Xenorhabdus;
(ll) Yersinia;
(mm) Yokenella.

(11) "Food Handler" means any business owner or employee who handles food utensils or who prepares, processes, handles or serves food for people other than members of their immediate household, for example restaurant, delicatessen, and cafeteria workers, caterers, and concession stand operators.

(12) "Food Service Facility" means an establishment that processes or serves food for sale.

(13) "Health Care Facility" has the meaning given that term in ORS 442.015.

(14) "Health Care Provider" has the meaning given that term in ORS 433.443.

(15) "HIV" means the human immunodeficiency virus, the causative agent of AIDS.

(16) "HIV Test" means a Food and Drug Administration (FDA)-approved test for the presence of HIV (including RNA testing), or for antibodies or antigens that result from HIV infection, or for any other substance specifically associated with HIV infection and not with other diseases or conditions.

(17) "HIV Positive Test" means a positive result on the most definitive HIV test procedure used to test a particular individual. In the absence of the recommended confirmation tests, this means the results of the initial test done.

(18) "Lead Poisoning" means:

(a) A confirmed blood lead level of at least 5 micrograms per deciliter for children under 18 years of age; or

(b) A confirmed blood lead level of at least 10 micrograms per deciliter for people 18 years of age and older.

(19) "Licensed Laboratory" means a medical diagnostic laboratory that is inspected and licensed by the Authority or otherwise licensed according to the provisions of the federal Clinical Laboratory Improvement Amendments of 1988 (42 U.S.C. § 263a). Any laboratory operated by the U.S. Centers for Disease Control and Prevention shall also be considered a Licensed Laboratory.

(20) "Licensed Physician" means any physician who is licensed by the Oregon Medical Board or the Board of Naturopathic Medicine.

(21) "Licensed Veterinarian" means a veterinarian licensed by the Oregon Veterinary Medical Examining Board.

(22) "Local Public Health Administrator" has the meaning given that term in ORS 431.260.

(23) "Local Public Health Authority" has the meaning given that term in ORS 431.260.

(24) "Non-Susceptible to any Carbapenem Antibiotic" means the finding of any of the following:

(a) Gene sequence specific for carbapenemase;

(b) Phenotypic test (for example, Carba NP) positive for production of carbapenemase; or

(c) Resistance to any carbapenem antibiotic with elevated minimum inhibitory concentration (MIC):

(A) MIC for imipenem greater than or equal to 4 mcg/ml; or

(B) MIC for meropenem greater than or equal to 4 mcg/ml; or

(C) MIC for ertapenem greater than or equal to 2 mcg/ml.

(25) "Novel Influenza" means influenza A virus that cannot be subtyped by commercially distributed assays.

(26) "Onset": Unless otherwise qualified, onset refers to the earliest time of appearance of signs or symptoms of an illness.

(27) "Pesticide Poisoning" means illness in a human that is caused by acute or chronic exposure to:

(a) Any substance or mixture of substances intended for preventing, destroying, repelling, or mitigating any pest; or

(b) Any substance or mixture of substances intended for use as a plant regulator, defoliant, or desiccant as defined in ORS 634.006.

(28) "Public Health Division (Division)" means the Public Health Division within the Oregon Health Authority.

(29) "School" means a public, private, parochial, charter or alternative educational program offering kindergarten through grade 12 or any part thereof.

(30) "School Administrator" means the principal or other person having general control and supervision of a school or children's facility and has the same meaning as "administrator" in ORS 433.235.

(31) "Specimen Source Site" means the source from which the specimen was obtained.

(a) For environmental samples, "specimen source site" means the location of the source of the specimen.

(b) For biological samples, "specimen source site" means the anatomical site from which the specimen was collected.

(32) "Specimen Type" means the description of the source material of the specimen.

(33) "Suspected Case" means a person whose illness is thought by a health care provider to have a significant likelihood of being due to a reportable disease, infection, or condition, based on facts such as but not limited to the patient's signs and symptoms, possible exposure to a reportable disease, laboratory findings, or the presence or absence of an alternate explanation for the illness.

(34) "Uncommon Illness of Potential Public Health Significance": These illnesses include:

(a) Any infectious disease with potentially life-threatening consequences that is exotic to or uncommon in Oregon, for example, variola (smallpox) or viral hemorrhagic disease;

(b) Any illness related to a contaminated medical device or product; or

(c) Any acute illness suspected to be related to environmental exposure to any infectious or toxic agent or to any household product.

(35) "Veterinary Laboratory" means a laboratory whose primary function is handling and testing diagnostic specimens of animal origin.

DIVISION 18

DISEASE REPORTING

333-018-0000
Who Is Responsible for Reporting

(1) Each health care provider knowing of or attending a human case or suspected human case of any of the diseases, infections, or conditions listed in OAR 333-018-0015 shall report such cases as specified. Where no health care provider is in attendance, any individual knowing of such a case shall report in a similar manner. An individual required to report reportable diseases who is unsure whether a case meets the definition of a suspect case as that is defined in OAR 333-017-0000 should err on the side of reporting if the suspected disease, infection, or condition is one that:

(a) Is required to be reported immediately or within 24 hours under OAR 333-018-0015;

(b) Is highly transmissible; or

(c) Results in serious or severe health consequences.

(2) Each health care facility, where more than one health care provider may know or attend a human case or suspected human case, may establish administrative procedures to ensure that every case is reported.

(3) Each licensed laboratory shall report human test results as specified in OAR 333-018-0015(5). When more than one licensed laboratory is involved in testing a specimen, the laboratory that is responsible for reporting the test result directly to the health care provider that ordered the test shall be responsible for reporting.

(4) Each veterinary laboratory or licensed laboratory shall report animal test results as specified in OAR 333-018-0017. When more than one laboratory is involved in testing a specimen, the laboratory that is responsible for reporting the test result directly to the licensed veterinarian or client of record caring for the animal shall be responsible for reporting.

Stats. Implemented: ORS 433.004 & 437.030
Hist.: HD 15-1981, f. 8-13-81, ef. 8-15-81; HD 4-1987, f. 6-12-87, ef. 6-19-87; HD 29-1994, f. & cert. ef. 12-2-94; OHD 3-2002, f. & cert. ef. 3-4-02; PH 5-2010, f. & cert. ef. 3-11-10; PH 7-2011, f. & cert. ef. 8-19-11

333-018-0005
To Whom Reports Shall Be Made

(1) In general, if the patient is an Oregon resident, reports shall be made to the local public health administrator for the patient's place of residence.

(2) In lieu of reporting to the local public health administrator, with the consent of the local public health administrator and the Authority, reports may be made directly to the Authority (for example, via electronic reporting).

(3) In urgent situations when local public health staff are unavailable, case reports shall be made directly to the Authority.

(4) Where the case is not an Oregon resident, reports shall be made either to the patient's local public health authority (if the patient resides in the United States) or directly to the Authority.

(5) In lieu of reporting to the local public health administrator, with the consent of the local public health administrator, licensed laboratories shall report directly to the Authority's HIV Program:

(a) All tests indicative of and specific for HIV infection as required by OAR 333-018-0015;

(b) All CD4+ T-lymphocyte counts; and

(c) All HIV viral load tests.

333-018-0010
Form of the Report

(1) A health care provider required to report reportable diseases under ORS 433.004 and these rules shall submit to the local public health administrator a report that includes but is not limited to:

(a) The identity, address, and telephone number of the person reporting;

(b) The identity, address, and telephone number of the attending health care provider, or other treating health care provider if any;

(c) The name of the person affected or ill, that person's current address, telephone number, and date of birth;

(d) The diagnosed or suspected disease, infection, or condition; and

(e) The date of illness onset.

(2) A licensed laboratory required to report reportable diseases under ORS 433.004 and these rules shall submit to the local public health administrator a report that includes but is not limited to:

(a) The name and telephone number of the reporting laboratory;

(b) The name, gender, age or date of birth, the address and county of residence of the person from whom the laboratory specimen was obtained, if known;

(c) The date the specimen was obtained;

(d) The specimen source site and the specimen type; for example, the specimen source site | specimen type pairings could be (knee | fluid, synovial) (cervix | tissue), (venous | blood).

(e) The name, address and telephone number of the health care provider of the person from whom the laboratory specimen was obtained;

(f) The name or description of the test;

(g) The test result; and

(h) Information required by the Authority's Manual for Mandatory Electronic Laboratory Reporting, if electronic reporting is required under OAR 333-018-0013.

(3) Reportable disease reports shall be made in the following manner:

(a) Reports for diseases or suspected diseases that are immediately reportable under OAR 333-018-0015 shall be submitted orally, by telephone, with a follow-up written report via facsimile.

(b) Reports for diseases or suspected diseases that are required to be reported within one to seven days under OAR 333-018-0013 shall be submitted in writing via facsimile or by other means approved by the local public health administrator, consistent with the need for timely reporting as provided in OAR 333-018-0015.

(c) Electronically, if required by OAR 333-018-0013.

(4) If requested by a local public health administrator or the Oregon Public Health Division, health care providers and licensed laboratories shall provide additional information of relevance to the investigation or control of reportable diseases or conditions (for example, reported signs and symptoms, laboratory test results (including negative results), potential exposures, contacts, and clinical outcomes).

333-018-0013
Electronic Laboratory Reporting

(1) A licensed laboratory that, pursuant to ORS 433.004 and OAR chapter 333, division 18, sends an average of greater than 30 records per month to the local public health administrator shall electronically send all reportable disease data to the Authority in accordance with the standards set forth in the Authority's Manual for Mandatory Electronic Laboratory Reporting, dated February 2009, and incorporated by reference.

(2) Prior to reporting data electronically, a licensed laboratory shall seek and obtain approval from the Authority for its electronic reporting, in accordance with the Authority's Manual for Mandatory Electronic Laboratory Reporting.

(3) A licensed laboratory that fails to seek approval from the Authority for electronic reporting or fails to obtain approval within one year from seeking approval from the Authority may be subject to civil penalties in accordance OAR 333-026-0030.

(4) A licensed laboratory that is required to report data electronically shall have a state-approved continuity of operations plan for reporting continuity in the event of emergency situations disrupting electronic communications. At least two alternative methodologies should be incorporated, such as facsimile, mail, or courier service.

(5) A licensed laboratory required to report data electronically shall participate fully in Oregon's Data Quality Control program, as specified in the Authority's Manual for Mandatory Electronic Laboratory Reporting.

(6) Electronic reports shall meet the reporting timelines in OAR chapter 333, division 18.

333-018-0015
What Is to Be Reported and When

(1) Health care providers shall report all human cases or suspected human cases of the diseases, infections, microorganisms, and conditions specified below. The timing of health care provider reports is specified to reflect the severity of the illness or condition and the potential value of rapid intervention by public health agencies.

(2) When local public health administrators cannot be reached within the specified time limits, reports shall be made directly to the Authority, which shall maintain an around-the-clock public health consultation service.

(3) Licensed laboratories shall report all test results indicative of and specific for the diseases, infections, microorganisms, and conditions specified below for humans. Such tests include but are not limited to: microbiological culture, isolation, or identification; assays for specific antibodies; and identification of specific antigens, toxins, or nucleic acid sequences.

(4) Human reportable diseases, infections, microorganisms, intoxications, and conditions, and the time frames within which they must be reported are as follows:

(a) Immediately, day or night:

(A) Select biological agents and toxins: Avian influenza virus; Bacillus anthracis (anthrax); Botulinum neurotoxins; Botulinum neurotoxin-producing species of Clostridium; Brucella (brucellosis); Burkholderia mallei (glanders); Burkholderia pseudomallei (melioidosis); Conotoxins; Clostridium botulinum (botulism); Coxiella burnetii (Q fever); Crimean-Congo hemorrhagic fever virus; Diacetoxyscirpenol; Eastern Equine Encephalitis virus; Ebola virus; Francisella tularensis (tularemia); Hendra virus; Lassa fever virus; Lujo virus; Marburg virus; Monkeypox virus; Newcastle disease virus; Nipah virus; Reconstructed replication-competent forms of the 1918 pandemic influenza virus containing any portion of the coding regions of all eight gene segments (Reconstructed 1918 Influenza virus); Ruminants virus, Ricin; Rickettsia prowazekii (louse-borne typhus); Rift Valley fever virus; Severe Acute Respiratory Syndrome (SARS) and infection by SARS coronavirus; Saxitoxin (paralytic shellfish poisoning); South American Hemorrhagic Fever viruses (Chapare, Guanarito, Junin, Machupo, Sabia); Staphylococcal enterotoxins A,B,C,D,E subtypes; T-2 toxin; Tetrodotoxin (puffer fish poisoning); Tick-borne encephalitis complex (flavi) viruses (Far Eastern subtype, Siberian subtype); Kyasanur Forest disease virus; Omsk hemorrhagic fever virus, Variola major (Smallpox virus); Variola minor virus (Alastrim);

(B) The following other infections, microorganisms, and conditions: Corynebacterium diphtheriae (diphtheria); novel influenza; poliomyelitis; rabies (human); measles (rubeola); rubella; Vibrio cholerae O1, O139, or toxigenic (cholera); yellow fever; intoxication caused by marine microorganisms or their byproducts (for example, domoic acid intoxication, ciguatera, scombroid);

(C) Any known or suspected disease outbreak, including any outbreak associated with health care, regardless of whether the disease, infection, microorganism, or condition is specified in this rule; and

(D) Any uncommon illness of potential public health significance.

(b) Within 24 hours (including weekends and holidays): Haemophilus influenzae (any invasive disease; for laboratories, any isolation or identification from a normally sterile site); Neisseria meningitidis (any invasive disease; for laboratories, any isolation or identification from a normally sterile site); and pesticide poisoning.

(c) Within one local public health authority working day: amebic infection of the central nervous system (for example, by Naegleria or Balamuthia), Bordetella pertussis (pertussis); Borrelia (relapsing fever, Lyme disease); cadmium demonstrated by laboratory testing of urine; Campylobacter (campylobacteriosis); Chlamydophila (Chlamydia) psittaci (psittacosis); Chlamydia trachomatis (chlamydiosis; lymphogranuloma venereum); Clostridium tetani (tetanus); Coccidioides (coccidioidomycosis), Creutzfeldt-Jakob disease and other transmissible spongiform encephalopathies; Cryptococcus (cryptococcosis), Cryptosporidium (cryptosporidiosis); Cyclospora cayetanensis (cyclosporosis); bacteria of the Enterobacteriaceae family found to be resistant to any carbapenem antibiotic ; Escherichia coli (Shiga-toxigenic, including E. coli O157 and other serogroups); Giardia (giardiasis); Grimontia; Haemophilus ducreyi (chancroid); hantavirus; hepatitis A; hepatitis B (acute or chronic infection); hepatitis C; hepatitis D (delta); hepatitis E; HIV infection (does not apply to anonymous testing) and AIDS; death of a person <18 years of age with laboratory-confirmed influenza; lead poisoning; Legionella (legionellosis); Leptospira (leptospirosis); Listeria monocytogenes (listeriosis); mumps; Mycobacterium tuberculosis and M. bovis (tuberculosis); nonrespiratory infection with nontuberculous mycobacteria; Neisseria gonorrhoeae (gonococcal infections); Plasmodium (malaria); Rickettsia (other than prowazekii: Rocky Mountain spotted fever, typhus, others); Salmonella (salmonellosis, including typhoid); Shigella (shigellosis); Taenia solium (including cysticercosis and undifferentiated Taenia infections); Treponema pallidum (syphilis); Trichinella (trichinosis); Vibrio (other than Vibrio cholerae O1, O139, or toxigenic; vibriosis); Yersinia (other than pestis; yersiniosis); any infection that is typically arthropod vector-borne (for example: babesiosis, California encephalitis, Colorado tick fever, dengue, Eastern equine encephalitis, ehrlichiosis, Heartland virus infection, St. Louis encephalitis, West Nile fever, Western equine encephalitis, Zika, etc.); a human bitten by any other mammal; and hemolytic uremic syndrome.

(d) Within seven days: Any blood lead level tests including the result.

(5) Licensed laboratories shall report, within seven days, the results of all tests of CD4+ T-lymphocyte absolute counts and the percent of total lymphocytes that are CD4 positive, and HIV nucleic acid (viral load) tests.

333-018-0017
Reporting of Veterinary Diseases

(1) Laboratories shall report to the Oregon Public Health Division all test results indicative of and specific for the following diseases, infections, microorganisms, and conditions, within the following time frames, as follows:

(a) Immediately, day or night: anthrax, rabies, and plague;

(b) Within one day: psittacosis, leptospirosis, Q fever, and tularemia; and

(c) Within one week: *Baylisascaris*, *Borrelia burgdorferii*, *campylobacteriosis*, *Cryptococcus*, *Cryptosporidium*, *Escherichia* coli O157:H7, giardiasis, lymphocytic choriomeningitis, methicillin-resistant *Staphylococcus aureus*, Rocky Mountain spotted fever, salmonellosis, toxoplasmosis, West Nile virus, yersiniosis; and any other disease that could potentially be a zoonotic illness.

(2) "Test" as used in this rule, includes but is not limited to:

(a) Microbiological culture, isolation, or identification;

(b) Assays for specific antibodies; and

(c) Identification of specific antigens, toxins, or nucleic acid sequences.

333-018-0018
Submission of Organisms or Specimens to the Public Health Laboratory

Licensed laboratories are required to forward aliquots, specimens or cultures of the following organisms to the Oregon State Public Health Laboratory:

(1) Select biological agents and toxins: Avian influenza virus; Bacillus anthracis; Botulinum neurotoxins; Botulinum neurotoxin producing species of Clostridium; Brucella abortus; Brucella melitensis; Brucella suis; Burkholderia mallei; Burkholderia pseudomallei; Conotoxin; Coxiella burnetii; Crimean-Congo hemorrhagic fever virus; Diacetoxyscirpenol; Eastern Equine Encephalitis virus; Ebola virus; Francisella tularensis; Hendra virus; Lassa fever virus; Lujo virus; Marburg virus; Monkeypox virus; Newcastle disease virus; Nipah virus; Reconstructed replication competent forms of the 1918 pandemic influenza virus containing any portion of the coding regions of all eight gene segments (Reconstructed 1918 Influenza virus); Ruminants virus; Ricin; Rickettsia prowazekii; Rift Valley fever virus; SARS-associated coronavirus (SARS-CoV), Saxitoxin; Sheep pox virus; South American Hemorrhagic Fever viruses (Chapare, Guanarito, Junin, Machupo, Sabia); Staphylococcal enterotoxins A,B,C,D,E subtypes; T-2 toxin, Tetrodotoxin; Tick-borne encephalitis complex (flavi) viruses (Far Eastern subtype; Siberian subtype); Kyasanur Forest disease virus; Omsk hemorrhagic fever virus; Variola major virus (Smallpox virus); Variola minor virus (Alastrim); Venezuelan equine encephalitis virus; and Yersinia pestis.(2) Other organisms or specimens including:

(a) From persons of any age:

(A) All isolates of Corynebacterium diphtheriae, Grimontia spp., Listeria spp., Mycobacterium tuberculosis and M. bovis, Salmonella spp., Shigella spp., Vibrio spp., Yersinia spp. and suspected Shiga-toxigenic Escherichia coli (STEC), including E. coli O157;

(B) Isolates of the Enterobacteriaceae family resistant to any carbapenem antibiotic;

(C) Suspected Neisseria meningitidis and Haemophilus influenzae isolated from normally sterile sites;

(D) All novel and highly pathogenic avian influenza isolates, Measles (rubeola), poliomyelitis, rabies (human), rubella, and yellow fever; and

(E) All Coccidioides spp. and Cryptococcus spp. isolates.

(b) From persons under the age of 18 years who died with laboratory-confirmed influenza: respiratory specimens or viral isolates, any Staphylococcus aureus isolates, and, after consulting with the Oregon Public Health Division, autopsy specimens.

Reports from Local Public Health Administrators

(1) The local public health administrator shall notify the Authority immediately of any reported cases of the following diseases and conditions: anthrax, botulism (foodborne), cholera, diphtheria, marine intoxications, measles, pesticide poisoning, plague, poliomyelitis, rabies; any uncommon illness of potential public health significance; any outbreak of disease.

(2) Animal bites that have been investigated by the local public health administrator and for which testing of the biting animal for rabies has been deemed unnecessary need not be reported to the Authority.

(3) For other reportable diseases and conditions, the local public health administrator shall notify the Authority no later than the end of each business week of all cases reported during that week. Reports shall be made by means approved by the Authority and in a format approved by the Authority.

333-018-0035
Procedures Involving Emergency Response Employees

(1) Each person or local government employing persons to render emergency care shall designate a contact person or "designated officer" to receive reports from the local public health administrator made under ORS 433.006. The employer shall assure that the designated officer has sufficient training to carry out the duties as described below, which shall include appropriate procedures for follow-up after occupational exposures to specific diseases as specified below in section (2) and section (6).

(2) Sections (3) through (5) apply only to the following subset of reportable diseases: meningococcal disease, infectious pulmonary or laryngeal tuberculosis, diphtheria, plague (Yersinia pestis), rabies, hemorrhagic fevers (for example, Lassa, Marburg, and Ebola).

(3) Health care providers and health care facilities shall, when reporting this subset of diseases, determine and include as part of their report whether or not an emergency care provider was involved in pre-hospital care for this disease.

(4) Health care providers and facilities shall report to the local public health administrator and may relay the diagnosis of these diseases directly to the emergency care providers or the designated officer specified below in section (5), but shall not disclose the identity or addresses of the person having the disease or otherwise refer specifically to the person.

(5) Upon receiving a report of a reportable disease as defined in section (2) above, the designated officer shall notify all out-of-hospital caregivers, including but not limited to: first responders, emergency medical technicians, paramedics, firefighters, law enforcement officers, corrections officers, probation officers, or other current or former personnel of the employer who may have been exposed to the reportable disease. The designated officer shall inform the personnel only of the reportable disease and the fact of possible exposure and the appropriate follow-up procedures. The designated officer shall not inform the personnel of the identity or addresses of the individual having the reportable disease or otherwise refer specifically to the individual having the reportable disease.

(6) In the event of an occupational exposure to a bloodborne pathogen as defined by ORS 433.060, the designated officer shall also assist the exposed worker as defined in ORS 433.060 in implementing the provisions of ORS 433.065 through ORS 433.080 and associated Authority rules (chapter 333, division 22). These rules include provisions for determining HIV, hepatitis B and hepatitis C status of the source patient and soliciting HIV testing after an occupational exposure.

Health Care Acquired Infection Reporting and Public Disclosure

333-018-0100
Definitions

The following definitions apply to OAR 333-018-0100 through 333-018-0145:

(1) "Adult ICU" means all specialty and non-specialty intensive care units that care for adults as defined in the NHSN Manual.

(2) "ASC" means an ambulatory surgical center as defined in ORS 442.015 and that is licensed pursuant to ORS 441.015.

(3) "Authority" means the Oregon Health Authority.

(4) "CBGB" means coronary bypass graft surgery with both chest and graft incisions, as defined in the NHSN Manual.

(5) "CAUTI" means catheter-associated urinary tract infection as defined in the NHSN Manual.

(6) "CDC" means the federal Centers for Disease Control and Prevention.

(7) "CDI" means Clostridium difficile infection as defined in the NHSN Manual.

(8) "CLABSI" means central line associated bloodstream infection as defined in the NHSN Manual.

(9) "CMS" means the federal Centers for Medicare and Medicaid Services.

(10) "Collection Month" means the month in which an infection was identified.

(11) "COLO" means colon procedures as defined in the NHSN Manual.

(12) "Committee" means the Health Care Acquired Infections Advisory Committee established in section 4, chapter 838, Oregon Laws 2007.

(13) "Dialysis facility" means outpatient renal dialysis facility as defined in ORS 442.015.

(14) "Dialysis Event" means an event that occurs in individuals who receive dialysis as defined by the NHSN Manual.

(15) "Follow-up" means post-discharge surveillance intended to detect CBGB, COLO, HPRO, HYST, KRPO, and LAM surgical site infection (SSI) cases occurring after a procedure.

(16) "HAI" means health care acquired infection as defined in section 2, chapter 838, Oregon Laws 2007.

(17) "Health care facility" means a facility as defined in ORS 442.015.

(18) "Hospital" means a facility as defined in ORS 442.015 and that is licensed pursuant to ORS 441.015.

(19) "Hospital Inpatient Quality Reporting Program (HIQRP)" means the initiative administered by CMS that provides a financial incentive to hospitals to report designated quality measures, mandated by section 501(b) of the Medicare Prescription Drug, Improvement, and Modernization Act (MMA) of 2003.

(20) "HPRO" means hip prosthesis procedure as defined in the NHSN Manual.

(21) "HYST" means abdominal hysterectomy procedure as defined in the NHSN Manual.

(22) "Inpatient rehabilitation ward" means an area within a hospital used for evaluation, treatment, and restoration of function to patients who have lost function due to acute or chronic pain, musculoskeletal problems, stroke, brain or spinal cord dysfunction, or catastrophic events resulting in complete or partial paralysis.

(23) "ICU" means an intensive care unit as defined in the NHSN Manual.

(24) "KPRO" means knee prosthesis procedure as defined in the NHSN Manual.

(25) "Lab ID" means laboratory-identified event as defined in the NHSN Manual.

(26) "LAM" means laminectomy procedure as defined in the NHSN Manual.

(27) "Licensed satellite" has the meaning given that term in OAR 333-500-0010.

(28) "LTCF" means a long term care facility as defined in ORS 442.015.

(29) "MDS" means the CMS minimum data set nursing home resident assessment and screening tool.

(30) "Medical ICU" means a non-specialty intensive care unit in which at least 80 percent of patients served are adult medical patients.

(31) "Medical/Surgical ICU" means a non-specialty intensive care unit in which less than 80 percent of patients served are adult medical, adult surgical, or specialty patients.

(32) "Medical ward" means an area within a hospital used for the evaluation and treatment of patients with medical conditions or disorders.

(33) "Medical/surgical ward" means an area within a hospital used for the evaluation of patients with medical or surgical conditions.

(34) "MRSA" means methicillin-resistant Staphylococcus aureus as defined in the NHSN Manual.

(35) "NHSN" means the CDC's National Healthcare Safety Network.

(36) "NHSN Inpatient" means a patient whose date of admission to the healthcare facility and the date of discharge are different days as defined in the NHSN Manual.

(37) "NHSN Manual" means the 2014 patient safety component protocols, established by the CDC's NHSN, which govern the HAIs and other information required by CMS to be reported by health care facilities, found at http://www.cdc.gov/nhsn/Training/patient-safety-component/, and incorporated by reference.

(38) "NICU" means a specialty intensive care unit that cares for neonatal patients.

(39) "Non-specialty ICU" means an intensive care unit in which patients are medical, surgical, or medical/surgical patients.

(40) "Oregon HAI group" means the NHSN group administered by the Authority.

(41) "Overall-facility wide" means data are collected for the entire facility as defined in the NHSN Manual.

(42) "Patient information" means individually identifiable health information as defined in ORS 179.505.

(43) "Pediatric inpatient rehabilitation ward" means an area within a hospital used for evaluation, treatment, and restoration of function to patients under 18 years of age who have lost function due to acute or chronic pain, musculoskeletal problems, stroke, brain or spinal cord dysfunction, or catastrophic events resulting in complete or partial paralysis

(44) "Pediatric ICU" means a specialty intensive care unit that cares for pediatric patients.

(45) "Pediatric medical ward" means an area within a hospital used for the evaluation and treatment of patients under 18 years of age with medical conditions or disorders.

(46) "Pediatric medical/surgical ward" means a hospital area where patients under 18 years of age with medical or surgical conditions are managed.

(47) "Pediatric surgical ward" means an area within a hospital used for the evaluation and treatment of patients under 18 years of age who have undergone a surgical procedure.

(48) "Person" has the meaning given that term in ORS 442.015.

(49) "Procedure" means an operative procedure as defined in the NHSN Manual.

(50) "Provider" means health care services provider as defined in ORS 179.505.

(51) "QIO" means the quality improvement organization designated by CMS for Oregon.

(52) "SCIP" means the Surgical Care Improvement Project, established through collaborative efforts of the Joint Commission and CMS.

(53) "SCIP-Inf-1" means the HAI process measure defined as prophylactic antibiotic received within one hour prior to surgical incision, published by SCIP effective July 1, 2006.

(54) "SCIP-Inf-2" means the HAI process measure defined as prophylactic antibiotic selection for surgical patients, published by SCIP effective July 1, 2006.

(55) "SCIP-Inf-3" means the HAI process measure defined as prophylactic antibiotics discontinued within 24 hours after surgery end time (48 hours for cardiac patients), published by SCIP effective July 1, 2006.

(56) "SCIP-Inf-4" means the HAI process measure defined as cardiac surgery patients with controlled 6 a.m. postoperative serum glucose, published by SCIP effective July 1, 2006.

(57) "SCIP-Inf-6" means the HAI process measure defined as surgery patients with appropriate hair removal, published by SCIP effective July 1, 2006.

(58) "SCIP-Inf-9" means the HAI process measure defined as urinary catheter removed on postoperative day one or postoperative day two with day of surgery being day zero, published by SCIP effective July 1, 2006.

(59) "SCIP-Inf-10" means the HAI process measure defined as surgery patients with perioperative temperature management, published by SCIP effective July 1, 2006.

(60) "Specialty ICU" means an intensive care unit in which at least 80 percent of adult patients served are specialty patients, including but not limited to oncology, trauma, and neurology.

(61) "SSI" means a surgical site infection event as defined in the NHSN manual.

(62) "Staff" means any employee of a health care facility or any person contracted to work within a health care facility.

(63) "State agency" has the meaning given that term in ORS 192.410.

(64) "Surgical ICU" means a non-specialty intensive care unit in which at least 80 percent of patients served are adult surgical patients.

(65) "Surgical ward" means an area within a hospital used for the evaluation and treatment of patients who have undergone a surgical procedure.

Review

Unless otherwise directed by the Authority, the committee shall review these rules (OAR 333-018-0100 through 333-018-0145) at least biennially.

Stat. Auth.: ORS 442.420 & 2007 OL Ch. 838 § 1–6 & 12
Stats. Implemented: 2007 OL Ch. 838 § 1–6 & 12
Hist.: OHP 1-2008, f. & cert. ef. 7-1-08; Renumbered from 409-023-0005 by PH 13-2013, f. 12-26-13, cert. ef. 1-1-14

333-018-0110
HAI Reporting for Hospitals

(1) Hospitals must report to the Authority the following HAIs:

(a) CLABSI in:

(A) Adult, pediatric, and neonatal ICUs; and

(B) Adult and pediatric, medical, surgical, and medical/surgical wards.

(b) SSIs for inpatient CBGB, COLO, HPRO, HYST, KPRO and LAM procedures.

(c) CAUTI in:

(A) Adult and pediatric ICUs; and

(B) Adult and pediatric medical, surgical, medical/surgical wards, and inpatient rehabilitation wards.

(d) Inpatient CDI facility-wide lab ID events, excluding neonatal and well-baby units.

(e) Inpatient MRSA bacteremia lab ID events.

(2) Hospitals must report to the Authority all fields required to be reported by NHSN in accordance with the NHSN manual, including discharge dates.

(3) A hospital must report the information required in section (1) of this rule to the Authority no later than 30 days after the end of the collection month.

(4) A hospital must have an infection preventionist (IP) who actively seeks out HAIs required to be reported under this rule by screening a variety of data from various sources that may include but are not limited to:

(a) Laboratory;

(b) Pharmacy;

(c) Admission;

(d) Discharge;

(e) Transfer;

(f) Radiology;

(g) Imaging;

(h) Pathology; and

(i) Patient charts, including history and physical notes, nurses' and physicians' notes, and temperature charts.

(5) An IP shall use follow-up surveillance methods to detect SSIs for procedures listed in section (1) of this rule using at least one of the following:

(a) Direct examination of patients' wounds during follow-up visits to either surgery clinics or physicians' offices;

(b) Review of medical records, subsequent hospitalization records, or surgery clinic records;

(c) Surgeon surveys by mail or telephone;

(d) Patient surveys by mail or telephone; or

(e) Other facility surveys by mail or telephone.

(6) A hospital may train others employed by the facility to screen data sources for these infections required to be reported in section (1) of this rule but the IP must determine that the infection meets the criteria established by these rules.

(7) Hospitals that report the information in subsection (1)(a) to (e) of this rule through NHSN in order to meet CMS reporting requirements, may, in lieu of reporting this information directly to the Authority, permit the Authority to access the information through NHSN. A hospital that permits the Authority to access the information through NHSN must:

(a) Join the Oregon HAI group in NHSN;

(b) Authorize disclosure of NHSN data to the Authority as necessary for compliance with these rules, including but not limited to summary data and denominator data for all SSIs, the annual hospital survey and data analysis components for all SSIs, and summary data and denominator data for all adult, pediatric and neonatal ICUs; and

(c) Permit the Authority to access data reported through NHSN dating back to when reporting was first required by CMS for the different HAIs.

(8) All hospitals must report to the Authority on a quarterly basis the following HAI process measures, including but not limited to definitions, data collection, data reporting and training requirements:

(a) SCIP-Inf-1;

(b) SCIP-Inf-2;

(c) SCIP-Inf-3;

(d) SCIP-Inf-4;

(e) SCIP-Inf-6;

(f) SCIP-Inf-9; and

(g) SCIP-Inf-10.

(9) Hospitals that report the information in section (8) of this rule to CMS or the Joint Commission do not have to provide the information directly to the Authority; the Authority will access the information through CMS or the Joint Commission. If a hospital is not reporting the information in section (8) of this rule to CMS or the Joint Commission, in accordance with CMS or Joint Commission reporting requirements, it must provide the information to the Authority no later than on the 15th calendar day, four months after the end of the quarter. As CMS reporting requirements for SCIP measures are removed, reporting requirements for the Authority will change accordingly.

333-018-0120
HAI Reporting for Long Term Care Facilities

(1) All LTCFs must report urinary tract infections to the Authority except as provided in subsection (b) of this section.

(a) A LTCF must report infections to the Authority in the same manner established by MDS, including but not limited to reporting definitions, data collection, data submission, and administrative and training requirements.

(b) If a LTCF reports infections in accordance with MDS to CMS, the LTCF is not required to report that information directly to the Authority; the Authority will access the information through CMS.

(2) All LTCFs must submit the Evidence-Based Elements of Patient Safety Performance Survey to the Authority annually, no later than 30 days after receipt of the survey.

(3) All LTCFs must submit the Infection Prevention Program Survey to the Authority annually, no later than 30 days after receipt of the survey.

333-018-0125
HAI Reporting for Other Health Care Facilities

(1) All dialysis facilities shall report dialysis events to the Authority.

(2) A dialysis facility that reports dialysis events to NHSN may, in lieu of reporting the information directly to the Authority, permit the Authority access to NHSN.

(3) All Inpatient Rehabilitation Facilities (IRF) shall report to the Authority CAUTIs for adult and pediatric wards.

(4) The reporting system for IRFs shall be NHSN.

(5) IRFs that report information in order to meet CMS reporting requirements, may, in lieu of reporting information directly to the Authority, permit the Authority to access the information through NHSN. An IRF that permits the Authority to access the information through NHSN must:

(a) Join the Oregon HAI group in NHSN;

(b) Authorize disclosure of NHSN data to the Authority as necessary for compliance with these rules, including but not limited to summary data and denominator data for all SSIs, the annual hospital survey and data analysis components for all SSIs, and summary data and denominator data for all adult, pediatric and neonatal ICUs; and

(c) Permit the Authority to access data reported through NHSN dating back to when reporting was first required by CMS for the different HAIs.

333-018-0127
Annual Influenza Summary

Each hospital, including licensed satellites, ASC, Dialysis facility, LTCF, and IRF must submit an annual survey to the Authority, no later than May 31, on a form prescribed by the Authority, regarding influenza vaccination of staff. Facilities must report at least the following information:

(1) Number of staff with a documented influenza vaccination during the previous influenza season;

(2) Number of staff with a documented medical contraindication to influenza vaccination during the previous influenza season;

(3) Number of staff with a documented refusal of influenza vaccination during the previous influenza season; and

(4) Facility assessment of influenza vaccine coverage of facility staff during the previous influenza season and plans to improve vaccine coverage of facility staff during the upcoming influenza season.

333-018-0130
HAI Public Disclosure

(1) The Authority shall disclose to the public facility-level and state-level HAI outcomes quarterly.

(2) The Authority may disclose state-level and facility-level HAI data, including but not limited to observed frequencies, expected frequencies, proportions, and ratios.

(3) The Authority shall summarize HAI data by facilities subject to this reporting in an annual report. The Authority shall publish the annual report no later than April 30 of each calendar year.

(4) The Authority shall disclose data and accompanying explanatory documentation to facilities and the general public.

(5) The Authority may use statistically valid methods to make comparisons by facility, and to state, regional, and national statistics.

(6) The Authority shall provide a maximum of 30 calendar days for facilities to review facility-reported data prior to public release of data.

(7) The Authority shall provide facilities the opportunity to submit written comments and may include any submitted information in the annual report.

(8) Pending recommendations from the committee, the Authority may publish additional reports intended to serve the public's interest.

333-018-0135
HAI Data Security

The Authority shall undertake precautions to prevent unauthorized disclosure of the raw data files. These precautions include but are not limited to:

(1) Storing the raw data files on the internal storage hardware of a password-protected personal computer that is physically located within the Authority;

(2) Restricting staff access to the raw data files;

(3) Restricting network access to the raw data files; and

(4) If applicable, storing patient information within a strongly-encrypted and password-protected virtual drive or using other methods to reliably achieve the same level of security.

Prohibited Activities

Unless specifically required by state or federal rules, regulations, or statutes, the Authority is prohibited from:

(1) Disclosing individually identifiable patient, health care professional, or health care facility employee information;

(2) Intentionally linking or attempting to link individual providers to individual HAI events; and

(3) Providing patient-level or provider-level reportable HAI data to any state agency for enforcement or regulatory actions.

DIVISION 19

INVESTIGATION AND CONTROL OF DISEASES: GENERAL POWERS AND RESPONSIBILITIES

333-019-0000
Responsibility of Public Health Authorities to Investigate Reportable Diseases

(1) The local public health administrator shall use all reasonable means to investigate in a timely manner all reports of reportable diseases, infections, or conditions. To identify possible sources of infection and to carry out appropriate control measures, the local public health administrator shall investigate each report following procedures outlined in the Authority's Investigative Guidelines or other procedures approved by the Authority. The Authority may provide assistance in these investigations.

(2) Investigations of outbreaks involving residents of multiple states or counties or exposures in multiple states of counties may be supervised by the Authority.

(3) Investigations by the Authority or local public health administrator shall be conducted in accordance with ORS 433.004 and these rules.

[Publications: Publications referenced are available from the agency.]

333-019-0002
Cooperation with Public Health Authorities

(1) Health care providers, health care facilities, and licensed laboratories shall cooperate with local public health administrators and the Authority in the investigation and control of reportable diseases and conditions.

(2) Every health care provider attending a person with a reportable disease, infection, or condition shall instruct the person in measures appropriate to controlling the spread of the disease.

333-019-0003
Providing Information to the Oregon Health Authority or Local Public Health Administrator

(1) The Authority or local public health administrator (LPHA) may, as necessary to investigate a case of a reportable disease, disease outbreak or epidemic, require a health care provider, public or private entity, or an individual to permit the inspection or provide copies of information necessary to the investigation.

(2) Information that may be inspected or provided to the Authority or LPHA includes but is not limited to:

(a) Individually identifiable health information and contact information related to:

(A) The case;

(B) An individual who may be the potential source of exposure or infection;

(C) An individual who has been or may have been exposed to or affected by the disease; or

(D) A control.

(b) Policies, practices, systems or structures that may have affected the likelihood of disease transmission.

(c) Factors that may influence an individual's susceptibility to the disease or likelihood of being diagnosed with the disease.

(3) In addition to requesting information the Authority or LPHA may inspect, sample or test real or personal property. The Authority or LPHA will request permission to inspect, sample or test real or personal property prior to taking any action. If an individual or entity refuses to allow access to real or personal property for this purpose, the Authority or LPHA may seek an administrative warrant in order to obtain access.

(4) The Authority or LPHA shall request the information required to be submitted orally or in writing and shall inform the individual or entity from whom the information is sought when the information is required to be submitted. In lieu of requesting that information be provided to the Authority or LPHA, the Authority or LPHA may request access to the information at the location where the information is located.

(5) A person who provides information in accordance with these rules is immune from civil or criminal liability that might otherwise be incurred or imposed with respect to providing information under this section.

(6) Pursuant to ORS 433.008, all information obtained by the Authority or LPHA in the course of an investigation is confidential, may only be released in accordance with ORS 433.008(2) through (6), and except as required for the administration of public health laws or rules, a state or local public health official or employee may not be examined in any administrative or judicial proceeding about the existence or contents of a reportable disease report or other information received by the Authority or LPHA in the course of an investigation of a reportable disease or disease outbreak.

333-019-0005
Conduct of Special Studies by Oregon Health Authority

The Authority may conduct special studies concerning the causes and prevention of diseases and other significant health conditions. Special studies include any collection of information about the health status or potential health risk factors of individuals or groups of individuals, other than the routine collection of birth, death, and marriage information, and are not restricted to reportable diseases, infections, or conditions. The Authority may collaborate with local public health authorities, other institutions, or other individuals in the conduct of these studies.

Disease-Related School, Child Care, and Worksite Restrictions

333-019-0010
Imposition of Restrictions

(1) For purposes of this rule:

(a) "Restrictable disease":

(A) As applied to food service facilities includes but is not limited to diphtheria, hepatitis A, measles, Salmonella enterica serotype Typhi infection, Shiga-toxigenic Escherichia coli (STEC) infection, shigellosis, tuberculosis disease, open or draining skin lesions infected with Staphylococcus aureus or Streptococcus pyogenes, and any illness accompanied by diarrhea or vomiting.

(B) As applied to schools, children's facilities, and health care facilities, includes but is not limited to chickenpox, diphtheria, hepatitis A, measles, mumps, pertussis, rubella, Salmonella enterica serotype Typhi infection, scabies, Shiga-toxigenic Escherichia coli (STEC) infection, shigellosis, and tuberculosis disease and may include a communicable stage of hepatitis B infection if, in the opinion of the local health officer, the child poses an unusually high risk to other children (for example, exhibits uncontrollable biting or spitting).

(C) Includes any other communicable disease identified in an order issued by the Authority or a local public health administrator as posing a danger to the public's health.

(b) "Susceptible" means being at risk of contracting a restrictable disease by virtue of being in one or more of the following categories:

(A) Not being complete on the immunizations required by OAR chapter 333, division 50;

(B) Possessing a medical exemption from any of the vaccines required by OAR chapter 333, division 50 due to a specific medical diagnosis based on a specific medical contraindication; or

(C) Possessing a nonmedical exemption for any of the vaccines required by OAR chapter 333, division 50.

(c) "Reportable disease" means a human reportable disease, infection, microorganism, or condition specified by OAR chapter 333, division 18.

(2) To protect the public health, an individual who attends or works at a school or child care facility, or who works at a health care facility or food service facility may not attend or work at a school or facility while in a communicable stage of a restrictable disease, unless otherwise authorized to do so under these rules.

(3) A susceptible child or employee in a school or children's facility who has been exposed to a restrictable disease that is also a reportable disease for which an immunization is required under OAR 333-050-0050 must be excluded by the school administrator, unless the local health officer determines, in accordance with section (4) of this rule, that exclusion is not necessary to protect the public's health.

(4) A school administrator may request that the local health officer determine whether an exclusion under section (3) of this rule is necessary. In making such a determination the local health officer may, in consultation as needed with the Authority, consider factors including but not limited to the following:

(a) The severity of the disease;

(b) The means of transmission of the disease;

(c) The intensity of the child's or employee's exposure; and

(d) The exposed child's or employee's susceptibility to the disease, as indicated by:

(A) A previous occurrence of the disease;

(B) Vaccination records;

(C) Evidence of immunity as indicated by laboratory testing;

(D) Year of birth; or

(E) History of geographic residence and the prevalence of the disease in those areas.

(5) The length of exclusion under section (3) of this rule is one incubation period following the child or employee's most recent exposure to the disease.

(6) A susceptible child or employee may be excluded under this rule notwithstanding any claim of exemption under ORS 433.267(1).

(7) Nothing in these rules prohibits a school or children's facility from adopting more stringent exclusion standards under ORS 433.284.

(8) The infection control committee at all health care facilities shall adopt policies to restrict the work of employees with restrictable diseases in accordance with recognized principles of infection control. Nothing in these rules prohibits health care facilities or the local public health authority from adopting additional or more stringent rules for exclusion from these facilities.

Stat. Auth.: ORS 413.042, 431.110, 433.004, 433.255, 433.260, 433.284, 433.329, 433.332, 616.750 & 624.005

333-019-0014
Removal of Restrictions

(1) Worksite, child care, and school restrictions can be removed by statement of the local public health administrator that the disease is no longer communicable to others or that adequate precautions have been taken to minimize the risk of transmission.

(2) School or child care restrictions for chickenpox, scabies, staphylococcal skin infections, streptococcal infections, diarrhea, or vomiting may also be removed by a school nurse or health care provider.

(3) Restrictions at health care facilities for chickenpox, scabies, staphylococcal skin infections, streptococcal infections, diarrhea, or vomiting may also be removed by the facility's infection control committee when sufficient measures have been taken to prevent or minimize the transmission of disease, in accordance with written procedures approved by the committee.

(4) In general, restrictions on persons diagnosed with shigellosis or Shiga-toxigenic Escherichia coli (STEC) infection, including E. coli O157 infection, shall not be lifted until no pathogens are identified by a licensed laboratory in two consecutive approved fecal specimens collected not less than 24 hours apart. Such restrictions may be waived or modified at the discretion of the local public health administrator.

(5) Individuals infected with Salmonella enterica serotype Typhi (with or without symptoms), hereinafter referred to as "typhoid cases," must, before having a restriction removed, submit fecal specimens and one urine specimen to a licensed laboratory for testing on a schedule specified by the local public health administrator.

(6) A restriction on a typhoid case who is not a chronic carrier must be lifted by the local public health administrator when Salmonella enterica serotype Typhi is not identified by a licensed laboratory in any of four successive approved fecal specimens, collected at least 24 hours apart and not earlier than one month after illness onset, and one urine specimen.

(7) A "chronic carrier" is an individual who has fecal specimens test positive for Salmonella enterica serotype Typhi more than one year after onset or first diagnosis or on two occasions at least one year apart. A restriction on a chronic carrier may only be removed when Salmonella enterica serotype Typhi is not identified by a licensed laboratory in any of six successive approved fecal specimens, collected at least 72 hours apart, and one urine specimen.

Pet Licensing, Animal Bites, and Rabies

333-019-0017
Rabies Vaccination for Animals

(1) Except where specifically exempt, all dogs at least three months old shall be immunized against rabies by the age of six months. The following are exempt:

(a) Dogs brought temporarily into the state for periods of less than 30 days and kept under strict supervision by their owners;

(b) Dogs for which rabies immunization is contraindicated for health reasons, as determined by a licensed veterinarian subsequent to an examination. The reasons for the exemption and a specific description of the dog, including name, age, sex, breed, and color, shall be recorded by the examining veterinarian on a Rabies Vaccination Certificate, which shall bear the owner's name and address. The veterinarian shall also record whether the exemption is permanent, and if it is not, the date the exemption ends;

(c) Dogs that are owned by dealers, breeders, or exhibitors exclusively for sale or exhibition purposes and that are confined to kennels except for transportation under strict supervision to and from dog shows or fairs.

(2) Vaccination of an animal against rabies is valid only when performed:

(a) By a licensed veterinarian as specified by ORS 686.350 through 686.370 and OAR 875-010-0006;

(b) By a veterinary technician (certified according to OAR 875-030-0010) under the direct supervision of a licensed veterinarian; or

(c) In the case of a need to vaccinate and the lack of an available veterinarian, by another person approved for this purpose by the State Public Health Veterinarian.

(3) To be considered immunized against rabies, dogs and cats must be vaccinated according to guidelines published by the U.S. Centers for Disease Control and Prevention in the Compendium of animal rabies prevention and control, 2016 from the National Association of State Public Health Veterinarians.

(4) A Rabies Vaccination Certificate shall be completed and signed by a licensed veterinarian; electronic signatures are acceptable. That individual shall give the original and one copy to the dog's owner and retain one copy for the period for which the vaccination is in force. The Certificate must include at least the following information: owner's name and address; dog description by age, sex, color, breed; date of vaccination; due date for revaccination; type and lot number of vaccine used; and name and address of vaccinator.

333-019-0019
Dog Licensing

(1) Each dog shall be licensed by the local animal control agency in whose jurisdiction its owner resides.

(2) No dog shall be licensed until the owner of a vaccinated dog presents, in person or by mail, the original Rabies Vaccination Certificate to the County Clerk or designated animal control officer serving that jurisdiction.

(3) Upon receipt of applicable fees (if any, pursuant to ORS 433.380), the local animal control agency shall issue a serially numbered tag legibly identifying an expiration date that may not exceed the vaccine coverage expiration date by more than two months. The tag shall be attached to a collar or harness that shall be worn by the dog at all times when off the premises of the owner.

(4) The local animal control agency may request and file the Rabies Vaccination Certificate, cross-referenced to the tag number.

(5) An unexpired tag shall be honored throughout Oregon.

(6) A dog's rabies vaccination tag may, at the discretion of the local animal control agency, serve as the dog license, but not for more than two months beyond the immunity expiration date.

(7) Nothing in these rules shall be construed to limit the power of any jurisdiction to enact more stringent requirements to regulate and control dogs.

333-019-0022
Wolf-Dog Hybrids

For the purposes of dog licensing, immunization, and response to bites, wolf-dog hybrids shall be considered wild animals and not dogs. The status of an animal as a dog or as a wolf-dog hybrid shall be determined by a Licensed Veterinarian. Such determinations may consider descriptions of the animal in medical records and prior claims made by the owner, and shall be subject to review by the State Public Health Veterinarian or designee.

333-019-0024
Management of Animal Bites

(1) The circumstances surrounding bites of humans by mammals shall be investigated by the local public health administrator in accordance with the Investigative Guidelines published by the Authority.

(2) Except as provided in section (3) of this rule, any dog, cat, or ferret that has bitten a person shall be held for observation until the 10th day following the bite. This observation shall be under the supervision of a licensed veterinarian or other person designated by the local public health administrator. Animals shall be held within an enclosure or with restraints deemed adequate by the local public health administrator to prevent contact with any person or other animals. At the discretion of the local public health administrator, properly vaccinated dogs used by public law enforcement agencies may be exempted from the observation period requirement; however, any law enforcement agency shall notify the local public health administrator immediately should any exempted dog develop abnormal behavior within 10 days of biting a person.

(3) The local public health administrator may order the euthanasia and rabies testing of animals that have bitten humans when these animals are:

(a) Inadequately vaccinated dogs, cats, or ferrets that have inflicted an unprovoked bite to the face, head, or neck of a person; or

(b) Any other mammal suspected of having rabies or that has been in contact with an animal suspected of having rabies.

(4) Because it is preferable to hold such animals for observation, no person shall either euthanize any dog, cat, or ferret that has bitten a human or destroy the head of any mammal that has bitten a person without authorization by the local public health administrator.

333-019-0027
Management of Possibly Rabid Animals

(1) An animal is considered to have been in close contact with an animal suspected of having rabies when, within the past 180 days, it has been bitten, mouthed, mauled by, or closely confined with a rabid animal or any mammal suspected of having rabies.

(2) The disposition of such animals and of animals suspected of having rabies that have not bitten humans shall be determined by the local public health authority as follows:

(a) Inadequately vaccinated dogs, cats, and ferrets shall be destroyed immediately, if the owner permits. If the owner does not agree to this, the animal shall be confined as prescribed by the local public health authority for a period of four months for dogs and cats and six months for ferrets under the observation of a licensed veterinarian or a person designated by the local public health authority. A rabies vaccine must be administered at the time of entry into quarantine to bring the animal up to current rabies vaccination status.

(b) Dogs, cats, and ferrets that are adequately vaccinated shall be revaccinated immediately and observed in confinement for 45 days by a person designated by the local public health authority. If the owner prefers, such animals can be destroyed (in lieu of confinement) with the concurrence of the local public health authority.

(c) Unless the owner prefers to hold any unvaccinated livestock or wild animals born and raised in captivity in confinement for six months, such animals shall be destroyed. Livestock that are current on rabies vaccination with a USDA-licensed vaccine approved for that species should be given a booster vaccination immediately and observed for 45 days.

(d) Unless otherwise specified, all other mammals shall be destroyed.

(e) For the purposes of this rule, confinement shall be within an enclosure or with restraints deemed adequate by the local public health authority to prevent contact with any member of the public or any other animal. Nothing in these rules or in OAR 333-019-0024 shall be interpreted to require any public authority to bear the costs of such confinement.

(3) Nothing in these rules is intended or shall be construed to limit the power of any city, city and county, county or district in its authority to enact more stringent requirements to regulate and control animals within its jurisdiction.

333-019-0036
Special Precautions Relating to Pregnancy and Childbirth

(1)(a) Blood samples drawn from women during pregnancy or at delivery pursuant to ORS 433.017 shall be submitted for standard tests for reportable infectious diseases or conditions which may affect a pregnant woman or fetus. Routine tests submitted shall include syphilis, hepatitis B, and HIV. Tests using bodily fluids other than blood that have equal or better sensitivity and specificity may be substituted for the blood test.

(b) "Consent of the patient to take a sample of blood" (as stated in ORS 433.017, section 3) or other bodily fluid, is defined as notifying the patient or her authorized representative of the tests which will be conducted on that specimen. The patient or her authorized representative shall be informed that she may decline any or all of the tests.

(c) If a patient declines any of the offered tests, documentation shall be included in the medical record.

(2) Any health care provider attending the birth of an infant shall evaluate whether the newborn is at risk for gonococcal oph-

thalmia neonatorum. The primary means of assessing risk shall be review of results of prenatal testing and maternal history of risk factors for gonococcal. If the infant is determined to be at risk, or risk cannot be adequately assessed, the person attending the birth shall ensure that the newborn receives erythromycin or tetracycline ophthalmic ointment or silver nitrate 1 percent aqueous solution into each eye within two hours after delivery.

333-019-0039
Sudden Infant Death Syndrome

(1) In compliance with ORS 431.120(4), the Authority will conduct an epidemiologic investigation of each instance of sudden infant death syndrome.

(2) In order to promote support of this effort, the Authority will reimburse any county health department (or other agency providing public health services in lieu of a county health department for this purpose) to the extent of $25 to help defray the cost of one home visit by a public health nurse to any family who has lost a member of the family to SIDS.

(3) In order for the home visit to be reimbursed the following procedure will be required:

(a) On receiving the death investigation report in which the cause of death is SIDS, the administrator of the local public health authority receiving the report will, if possible, assure the arrangement of a home visit to the affected family by a public health nurse at an appropriate time;

(b) The home visit will include:

(A) A nursing assessment of family needs related to the SIDS event;

(B) Grief counseling;

(C) Education regarding the state of knowledge regarding the cause of SIDS;

(D) Discussion of other support resources available to help meet family needs;

(E) Information alerting the family to expect to receive in the mail an epidemiologic investigation questionnaire, including an explanation of its purpose, of its confidentiality, and assurance of assistance in completing the form if necessary.

(4) After the home visit has been completed, the local agency will notify the Authority in writing, including the name and birth date of the deceased infant, and the family name and address, and the date of the visit. This notice should be addressed to the Public Health Division, Center for Public Health Practice, 800 NE Oregon Street, Portland, OR 97232.

(5) On receipt of this written notice, the Authority will reimburse the agency in the amount of $25. Reimbursement for repeat visits to the same family will not be available.

(6) An epidemiologic questionnaire will be mailed by the Authority to the parent(s) (guardian) of the deceased infant, with instructions as to its purpose and means of completing and a request that it be completed and returned.

(7) In the event that the completed questionnaire has not been returned in a reasonable length of time, the Authority will notify the county health department (or agency acting in lieu of the county health department) with a request for a follow-up contact with the family to ensure the highest possible rate of return and of accuracy.

(8) Completed questionnaires will be collected and tabulated and the information analyzed by the Authority. A report of the findings will be published biennially beginning in 1985.

333-019-0041
Tuberculosis

(1) Each health care facility shall formally assess the risk of tuberculosis transmission among staff (professional and volunteer), residents, and patients at least annually and shall follow tuberculosis screening recommendations outlined in "Guidelines for preventing the transmission of Mycobacterium tuberculosis in Health-Care Settings," published by the Centers for Disease Control and Prevention (Morbidity and Mortality Weekly Report, Vol. 54, Number RR-17: 1-141; December 30, 2005) or otherwise approved by the Authority. For the purposes of this rule "health care facility" has the meaning given that term in ORS 442.015.

(2) Each facility specified below shall formally assess the risk of tuberculosis transmission among staff (professional and volunteer), residents, and patients at least annually and shall follow appropriate tuberculosis screening recommendations as outlined in the relevant publication or as otherwise approved by the Authority:

(a) Long Term Care Facilities for the Elderly: "Prevention and control of tuberculosis in facilities providing long-term care to the elderly. Recommendations of the Advisory Committee for Elimination of Tuberculosis," published by the Centers for Disease Control and Prevention (Morbidity and Mortality Weekly Report, Vol. 39, RR-10, pp. 7-20; July 13, 1990) and "Guidelines for preventing the transmission of Mycobacterium tuberculosis in Health-Care Settings," published by the Centers for Disease Control and Prevention (Morbidity and Mortality Weekly Report, Vol. 54, Number RR-17: 1-141; December 30, 2005).

(b) Homeless Shelters: "Prevention and control of tuberculosis among homeless persons," published by the Centers for Disease Control and Prevention (Morbidity and Mortality Weekly Report, Vol. 41, RR-5, pp. 13-23; April 17, 1992)

333-019-0042
Tuberculosis Screening in Correctional Facilities

(1) For purposes of this rule:

(a) "Correctional facility" means a facility operated by the Oregon Department of Corrections or a local correctional facility as that is defined in ORS 169.005; and

(b) "Symptoms of TB disease" means a cough longer than 3 weeks and/or coughing up blood in conjunction with fever, fatigue, night sweats or weight loss.

(2) A correctional facility shall screen all inmates upon admission for symptoms of tuberculosis (TB) disease. This screening and any follow-up shall be documented.

(3) Any inmate suspected of having TB disease or who has TB disease shall be isolated as appropriate and provided medical care and treatment that meets accepted standards of practice.

(4) Inmates detained or confined for 15 consecutive days or more in a correctional facility shall be screened for the following TB risk factors:

(a) HIV/AIDS;

(b) Immigration within the past five years from a country that has a high incidence of TB, including but not limited to immigration from Africa, Asia, Middle East, Latin America, Eastern Europe and South Pacific regions;

(c) Close contact to a person with infectious TB disease;

(d) History of injection drug use;

(e) History of homelessness; and

(f) Taking immunosuppressive medication.

(5) Inmates screened under section (4) of this rule who have TB risk factors and no documented history of prior positive screening tests for TB shall be screened with either a TB skin test or interferon gamma release assay (IGRA). Inmates with a documented previously positive TB skin test or IGRA, or a new positive result upon testing, shall receive a chest X-ray.

(6) Exceptions:

(a) A correctional facility is not required to retest an inmate at each admission under section (5) of this rule if:

(A) There is a documented record of a negative TB skin test or negative IGRA or normal chest X-ray within the past year; or

(B) There is a documented record of adequate TB treatment or compliance with a currently prescribed TB treatment.

(b) This exception does not apply if the inmate has symptoms of TB, evidence of new exposure to a person with infectious TB disease or a diagnosis of HIV/AIDS.

(7) Nothing in these rules prohibit any correctional facility from having more stringent TB screening requirements.

Stat. Auth.: ORS 431.110, 432.060, 433.001–433.035, 433.110–433.220 & 437.030

333-019-0052
Communication during Patient Transfer of Multidrug-Resistant Organisms

(1) As used in this rule:

(a) "Facility" means:

(A) A healthcare facility as that term is defined in ORS 442.015;

(B) An infirmary (for example, in a jail or prison);

(C) A residential facility or assisted living facility as those terms are defined in ORS 443.400;

(D) An adult foster home as that term is defined in ORS 443.705;

(E) A hospice program as that term is defined in ORS 443.850; and

(F) Any other facility that provides 24-hour patient care.

(b) "Multidrug-resistant organism" (MDRO) means an organism causing human disease which has acquired antibiotic resistance, as listed and defined in the Centers for Disease Control and Prevention's Antibiotic Resistance Threats in the United States, 2013 (Atlanta, GA; 2013). MDROs include but are not limited to:

(A) Methicillin-resistant Staphylococcus aureus (MRSA);

(B) Vancomycin-resistant Enterococcus (VRE);

(C) Carbapenem-resistant Enterobacteriaceae (CRE), as that term is defined in OAR 333-017-0000 sections (10) and (24);

(D) Multidrug-resistant Acinetobacter baumannii;

(E) Multidrug-resistant Pseudomonas aeruginosa;

(F) Drug-resistant Streptococcus pneumoniae;

(G) Other Gram-negative bacteria producing extended-spectrum beta-lactamases (ESBL); and

(H) Toxin-producing Clostridium difficile.

(c) "Receiving facility" means the facility receiving or admitting the case patient into their care from another facility's care.

(d) "Referring facility" means the facility transferring or discharging the case patient out of its care and into another facility's care.

(e) "Standard Precautions" means the minimum infection prevention measures that apply to all patient care, regardless of suspected or confirmed infection status of the patient, in any setting where healthcare is delivered. Standard Precautions include:

(A) Hand hygiene;

(B) Use of personal protective equipment (for example, gloves, gowns, facemasks), depending on the anticipated exposure;

(C) Respiratory hygiene and cough etiquette;

(D) Safe injection practices; and

(E) Safe handling of potentially contaminated equipment or surfaces in the patient environment.

(f) "Transmission Based Precautions" means infection control practices that are implemented in addition to Standard Precautions in patients with known or suspected colonization or infection of highly transmissible or epidemiologically important infectious pathogens (for example, CRE, norovirus, Neisseria meningitidis) or syndromes (for example, diarrhea) when there is strong evidence that the pathogen or syndrome may be transmitted from person to person via droplet, contact, or airborne routes in healthcare or non-healthcare settings (Siegel JD, Rhinehart E, Jackson M, Chiarello L, and the Healthcare Infection Control Practices Advisory Committee. Guideline for Isolation Precautions: Preventing Transmission of Infectious Agents in Healthcare Settings, 2007).

(2) When a referring facility transfers or discharges a patient who is infected or colonized with a multidrug-resistant organism (MDRO) or pathogen which warrants Transmission Based Precautions, it must include written notification of the infection or colonization to the receiving facility in transfer documents. The referring facility must ensure that the documentation is readily accessible to all parties involved in patient transfer (for example, referring facility, medical transport, emergency department, receiving facility).

(3) When a facility becomes aware that it received in transfer one or more patients with an MDRO or pathogen that warrants Transmission Based Precautions, and that was isolated from a patient specimen collected within 48 hours after transfer, it must notify the referring facility.

(4) When a facility becomes aware that it transferred or discharged one or more patients who have an MDRO or pathogen that warrants Transmission Based Precautions, the referring facility must notify the receiving facility.

(5) If a facility transfers or discharges a patient with laboratory-confirmed, carbapenemase-producing Enterobacteriaceae, the facility must notify the local health department communicable disease staff within one working day of the date and destination of the transfer or discharge.

DIVISION 20

NEWBORN HEARING SCREENING TESTS

333-020-0125
Definitions

As used in these rules:

(1) "Advisory Committee" means the Newborn Hearing Advisory Committee appointed by the Director of the Oregon Health Authority to advise the Authority and the legislature on the implementation and evaluation of universal newborn hearing screening in Oregon and the state newborn hearing screening test registry, tracking and recall system.

(2) "Authority" means the Oregon Health Authority.

(3) "Automated auditory brainstem response" means a specific test method that elicits an objective electro-physiological measurement of the brainstem's response to acoustic stimulation of the ear, obtained with equipment that automatically provides a pass/refer outcome.

(4) "Birthing Center" means any health facility licensed by the State of Oregon for the primary purpose of performing low risk deliveries, as defined in ORS 442.015(14)(f).

(5) "Birthing Facility" means the location of a child's birth, including hospital, birthing center (or) in the case of a home or out-of-facility birth, the child's birthing attendant.

(6) "Child" (or plural "children") means any individual (or individuals) who is (are) less than 36 months of age.

(7) "Diagnostic Facility" means any facility or person, including hospitals, private audiology practices, licenses health care providers and educational facilities that conduct newborn hearing diagnostic testing.

(8) "Diagnostic Testing" means the performance of physiologically-based testing on children to determine the presence or absence and extent of a hearing loss, using procedures specified by the Authority, for the purposes of establishing a diagnosis and serving as a basis for initiating therapy and/or intervention.

(9) "Director" means the Assistant Director of Oregon Health Authority, Public Health Division.

(10) "Early intervention services" means services for children with disabilities from birth until three years of age that are

designed to meet the developmental needs of children with disabilities and the needs of the family related to enhancing the child's development, and that are selected in collaboration with the parents and caregivers.

(11) "Early intervention facility" is any public or private educational institution providing early intervention services.

(12) "EI" (or, alternately, "EI/ECSE") means the Early Intervention/Early Childhood Special Education Program of the Office of Special Education of the Oregon Department of Education. EI/ECSE provides early intervention services under public supervision by personnel qualified in accordance with criteria established by rules of the State Board of Education and in conformity with an individualized family service plan, as defined in ORS 343.035(6).

(13) "Follow-up Hearing Test" means any hearing screening or diagnostic test procedure that is conducted on a child who is enrolled in the Tracking and Recall System.

(14) "Hospital" means any health care facility licensed by the State of Oregon and meeting the definition of "hospital" in ORS 442.015(14)(a).

(15) "Newborn" means a child less than one month of age.

(16) "Newborn Hearing Screening Test" means a physiologically-based test procedure utilizing either otoacoustic emissions or automated auditory brainstem response technologies, or other technologies as approved by the Authority. If a newborn achieves a 'pass' on the first screening test, screening is completed. If a newborn does not pass, a second screening test is carried out immediately using a different technology or, after an interval of 12 hours, using the same technology.

(17) "Newborn hearing screening test registry" means a listing of newborn children and information related to their newborn hearing screening tests.

(18) "Otoacoustic emissions" means a specific test method that elicits a physiologic response from the cochlea, and may include Transient Evoked Otoacoustic Emissions and Distortion Product Otoacoustic Emissions.

(19) "Pass" means a newborn hearing screening result that indicates that a child's hearing is most likely within normal limits.

(20) "Private educational institution" means any private institution providing early intervention services as defined in ORS 343.035(6) or the equivalent and which have been accepted for the Office of Special Education of the Oregon Department of Education's "Approved Private Schools" list.

(21) "Public educational institution" means any public educational institution providing early intervention services, as defined in ORS 343.035(6).

(22) "Refer" means a newborn hearing screening test result that indicates that a child needs a follow-up hearing test.

(23) "Regional Program" means any one of the Low Incidence Regional Programs for the Deaf and Hard-of-Hearing.

(24) "Screening Facility" means any facility or person, including hospitals, birthing centers, private audiology practices, licensed health care providers and educational facilities that conduct newborn hearing screening tests.

(25) "Tracking and recall system" means a system attached to the newborn hearing test registry designed to identify and contact the parent or guardian of a newborn child listed in the newborn hearing screening test registry for the purposes of assisting in testing and in enrollment of the child in early intervention services in a timely manner.

333-020-0127
Purpose and Intent

(1) The purpose of these rules is to implement ORS 433.321 et.seq., which:

(a) Authorizes the Authority to develop a newborn hearing screening test registry and tracking and recall system for all newborns in Oregon; and

(b) Requires the Authority to adopt rules to develop and implement the registry and recall system.

(2) In order to identify children with hearing loss as early as possible and assure timely entry into early intervention services, it is the intent that all Oregon newborns will be enrolled in the newborn hearing screening test registry using information derived from birth records and from screening facility reports to the Authority.

(3) It is the intent that all children who are identified in the newborn hearing screening test registry as not having completed a newborn hearing screening test (and) all children who received a result of "REFER" on the newborn hearing screening test shall be enrolled in the Tracking and Recall system. In addition, it is the intent that all children in the Newborn Hearing Screening Test Registry who are diagnosed with a hearing loss regardless of their initial newborn hearing screening test result shall be enrolled in the Tracking and Recall System.

(4) It is the intent that all screening facilities and diagnostic facilities that are conducting follow-up hearing tests on children enrolled in the tracking and recall system shall report child-specific information to the Authority for the purposes of assuring that children are receiving needed services in a timely manner.

333-020-0130
Requirement for Hearing Loss Screening in Newborn Children

(1) In all hospitals or birthing centers with more than 200 live births per year, each newborn child shall receive a Newborn Hearing Screening Test within one month of the child's date of birth.

(2) The hospital or birthing center shall attempt to conduct the Newborn Hearing Screening Test prior to discharge of the child from the facility.

(3) No newborn child may be refused the Newborn Hearing Screening Testing because of an inability of the parent or guardian to pay for the testing.

(4) For hospitalized children, the timing of the Newborn Hearing Screening Test may be deferred if medically indicated.

(5) The hospital or birthing center shall notify the parent or guardian and the health care provider of the newborn child of the Newborn Hearing Screening Test results within 10 days of the test. This notification shall include a description of the meaning of a Pass result and a Refer result.

(6) The hospital or birthing center shall, with the results of the Newborn Hearing Screening Test, provide the parent or guardian of a child who needs follow-up testing and the health care provider with the names and contact information for diagnostic facilities and a description of the importance of timely diagnosis and intervention.

(7) The Authority will determine the number of live births per year by information provided by the Center for Health Statistics of the Authority.

(8) Hospitals or birthing centers which in the past have not had more than 200 births per year and which then report to the Authority more than 200 live births in a calendar year, shall be required to begin providing Newborn Hearing Screening Testing by July first of the following calendar year.

(9) Hospitals or birthing centers which in the past have had more than 200 live births per year and which then report to the Authority fewer than 200 live births in a calendar year may choose to discontinue providing Newborn Hearing Screening Testing on or after April first of the following calendar year.

(10) Hospitals or birthing centers with fewer than 200 live births per year, and which are not providing the Newborn Hearing Screening Test, shall provide the parent or guardian of a newborn child born in their facility with information furnished by the Authority including, but not limited to, a list of Authority recommended screening facility locations and contact information, and a statement indicating that newborn hearing screening is considered standard of care.

333-020-0135
Facility Responsible for Performing the Newborn Hearing Screening Test

(1) Should a newborn child be discharged from a hospital or birthing center with more than 200 live births in a calendar year before the Newborn Hearing Screening Test is performed or completed, it shall be the responsibility of the hospital to arrange for the provision of screening.

(2)(a) In all hospitals and birthing centers with more than 200 live births in a calendar year, the hospital or birthing center where a baby is born is responsible for assuring that the Newborn Hearing Screening Test is performed on that newborn child within one month of the child's date of birth, except that, for hospitalized children, the timing of the testing may be deferred past the one month time line, if medically indicated. If testing is deferred, the hospital shall be responsible for performing the Newborn Hearing Screening Test prior to the child's discharge to home.

(b) For purposes of this section, in the case of a newborn child admitted to a hospital as a result of transfer from another hospital or birthing center, the hospital from which the child is discharged to home shall be responsible for the performance of the Newborn Hearing Screening Test, if not done prior to transfer.

333-020-0140
Maintaining a List of Facilities Able to Perform Follow-up Diagnostic Testing

(1) The Authority shall maintain a list of licensed clinical audiologists or licensed physicians able to perform Diagnostic Testing, as follows:

(a) The Authority shall establish written criteria for placement on the list, including testing and reporting requirements.

(b) Individual audiologists or physicians may choose to be identified solely by the facility with which they are affiliated or by whom they are employed, if that facility accepts the testing requirements of 333-020-0145(1)(a).

(c) Audiologists or physicians who meet the criteria for inclusion on the list may notify the Authority that they wish to be included on the list, and upon verification of eligibility, the Authority shall immediately update the list.

(2) The list, and the criteria, shall be available at the Authority, upon request.

(3) The Authority shall provide the list, on at least an annual basis, no later than April first, to all hospitals or birthing centers.

333-020-0145
Maintaining and Distributing a List of Early Intervention Facilities

(1) The Authority shall maintain a list of early intervention facilities that provide early intervention services to infants who are deaf or hard-of-hearing, as follows:

(a) Each Regional Program.

(b) Each county office of the EI/ECSE program.

(c) Each private educational institution.

(d) The Authority may list the Regional Program in lieu of the EI county office(s) in that region, at the discretion of the Office of Special Education of the Oregon Department of Education, for the purpose of simplifying and facilitating the early intervention enrollment process for parents and guardians.

(2) The Authority shall provide this list of early intervention facilities to all individuals or facilities that are on the list of diagnostic facilities, as defined in OAR 333-020-0145, annually, no later than September first, to facilitate referrals.

333-020-0149
Tracking and Recall System

(1) In consultation with the Advisory Committee, the Authority shall establish and implement a tracking and follow-up protocol for newborns in the Newborn Hearing Screening Test Registry identified with hearing loss or at-risk of hearing loss, including, but not limited to:

(a) Newborns who have no recorded newborn hearing screening test results and/or no recorded newborn hearing screening status in the Newborn Hearing Screening Test Registry;

(b) Newborns who have newborn hearing screening test results or status of:

(A) "REFER";

(B) Unable to complete initial screen;

(C) Screening deferred for medical reasons.

(c) Newborns or children who have been diagnosed with hearing loss.

(2) At a minimum, the tracking and follow-up protocol shall include:

(a) Responsibilities of Authority staff for identifying children in need of follow-up testing and for contacting parents/guardians, health care providers and local public health staff regarding needed follow-up services;

(b) Recommended methods and time frames for contacting parents/guardians, health care providers and local public health agencies regarding needed follow-up services;

(c) Procedures to document contacts made and outcomes of contacts;

(d) Procedures to identify, document and comply with parent/family desire to opt-out of continued follow-up;

(e) Procedures to document and address barriers to timely follow-up services, including financial and geographic barriers;

(f) Procedures to document "Loss to follow-up" after reasonable attempts are made to contact family and/or health care provider;

(g) Procedures to assure child-specific and family information is used only for the purposes for which it is intended and is not disclosed for other unrelated purposes.

333-020-0150
Collecting and Submitting Information Related to Newborn Hearing Screening

(1) By November 1, 2003, the Authority shall develop confidential reporting mechanisms and protocols for reporting newborn hearing screening test results to the Newborn Hearing Screening Test Registry. The reporting mechanisms and protocols shall be reviewed at least annually and modified as necessary.

(2) By November first of each year, or as necessary due to modifications, the Authority shall provide a written description of the reporting mechanisms and protocols, including reporting form templates if appropriate, to all screening facilities.

(3) Prior to the January 1, 2004 effective date of the law and as requested, the Authority shall offer training and technical assistance for screening facility staff to assure effective implementation of the newborn hearing screening reporting requirements.

(4) Beginning January 1, 2004, within 10 days of testing, each screening facility conducting newborn hearing screening tests shall report to the Authority, at a minimum, the following information about each newborn child receiving hearing screening in that facility.

(a) Name of the child;

(b) Child's date of birth;

(c) Birthing facility identifier;

(d) Screening facility identifier, if different than birthing facility;

(e) Newborn blood spot screening kit unique identification number, for matching purposes;

(f) Result of the newborn hearing screening test (or) status of the newborn hearing screening test, if not completed.

(5) The Authority may request that screening facilities report additional information deemed necessary to:

(a) Match the newborn hearing screening test result or status with the appropriate child in the Newborn Hearing Screening Test Registry;

(b) Identify children with risk factors for hearing loss.

Stat. Auth.: ORS 433.323
Stats. Implemented: ORS 433.321–433.327

333-020-0151
Collecting and Submitting Information Related to Diagnostic Testing for Hearing Loss in Newborns

(1) By November 1, 2003, the Authority shall develop and maintain confidential reporting mechanism (s) for child-specific diagnostic hearing test information.

(2) In consultation with the Advisory Committee, the Authority shall develop and distribute reporting form templates and protocols to approved diagnostic facilities, clinical audiologists and physicians conducting diagnostic hearing tests or other follow-up hearing testing on children.

(3) Prior to the January 1, 2004 effective date of the law and as requested, the Authority shall develop and offer training sessions for diagnostic facility staff to assure effective implementation of the reporting forms and protocols.

(4) The Authority shall review reporting forms and protocols at least annually, and as necessary, for effective management of the program. In the event of a modified form or protocol, the Authority shall give the diagnostic facility at least one full calendar month to incorporate the new form or protocol into practice.

(5) Within 10 days of testing of a child who has a "REFER" result on the newborn hearing screening test (or) who presents for an initial or completion of a newborn hearing screening test (or) who is diagnosed with a hearing loss, the diagnostic facility conducting the testing shall report, at a minimum, the following information to the Authority via the confidential reporting mechanism(s) established by the Authority:

(a) Name of the child;

(b) Child's date of birth;

(c) Birthing facility identifier, if known;

(d) Parent or guardian's name, address, and contact information;

(e) Child's primary health care provider;

(f) Newborn hearing screening results, if known;

(g) Diagnostic facility identifier;

(h) Diagnostic testing results, including type and degree of hearing loss and affected ear(s), if applicable;

(i) Disposition, including referrals made to early intervention services;

(j) Name and contact information for person completing diagnostic hearing test;

(k) Name and contact information for person completing form, if different than (j).

(6) The Authority may request that diagnostic facilities report additional information deemed necessary to:

(a) Match the follow-up test result or status with the appropriate child in the Newborn Hearing Screening Test Registry and Tracking and Recall System;

(b) Provide or offer follow-up services to children identified with hearing loss or at-risk of hearing loss and their families.

Stat. Auth.: ORS 433.323

333-020-0155
Responsibility for Issuing Reports

(1)(a) The Authority shall analyze the information collected under OAR 333-020-0160 through 333-020-0175:

(b) The Authority shall provide an individualized monthly report to each screening, diagnostic and early intervention facility detailing submissions from that facility from the previous month. Monthly reports to each facility shall include information about the follow-up status of individual children from that facility who are enrolled in the tracking and recall system as allowed by law.

(2) The Authority shall issue an annual report and analysis of aggregated data submitted by all screening, diagnostic and early intervention facilities, by July first of each year for the previous year's data.

(3) In consultation with the Advisory Committee, the Authority shall include in the annual report recommendations for improvement of the Early Hearing Detection and Intervention Program, including but not limited to improvement in the Newborn Hearing Screening Test Registry and Tracking and Follow-up System.

Stat. Auth.: ORS 433.323
Stats. Implemented: ORS 433.321–433.327

333-020-0160
Appointment of a Newborn Hearing Advisory Committee

(1) The Director shall appoint an Advisory Committee to:

(a) Provide policy level guidance and advice to the Authority on the implementation of the Newborn Hearing Screening Test Registry and Tracking and Recall system as defined by OAR 333-020-125 through 333-025-0180.

(b) Provide assistance in the preparation of a report to the biennial Legislative Assembly on the status of early hearing detection and intervention efforts in Oregon and the implementation and evaluation of the Newborn Hearing Screening Test Registry and Tracking and Recall System. The report will include but not be limited to strategies to increase the rate of early screening for children born in hospitals and birthing centers with less than 200 live births per year or born outside of hospitals and birthing centers.

(2) At a minimum, the Advisory Committee shall include at least one representative from each of the following categories:

(a) Parent of a child with hearing loss;

(b) Adult with hearing loss;

(c) Pediatric health care provider;

(d) Clinical audiologist;

(e) Hospital newborn hearing screening program representative;

(f) Diagnostic facility representative;

(g) Early intervention facility representative;

(h) Local public health agency representative;

(i) Speech-language pathologist.

(3) The Director shall establish by-laws of the Advisory Committee, including additional committee membership categories, committee duties and terms.

Stat. Auth.: ORS 433.323
Stats. Implemented: ORS 433.321–433.327

333-020-0165
Religious Exemption from Testing

(1) A hospital or birthing center directed to provide Newborn Hearing Screening Tests under these Administrative Rules is exempt from providing such services if the parent or guardian of the newborn child objects to the testing procedure on the grounds that the procedure conflicts with the religious tenets and practices of the parent or guardian.

(2) The parent or guardian must sign a statement that the newborn child is being so reared, using the following language: [Form not included. See ED. NOTE.]

[ED. NOTE: Forms referenced are available from the agency.]

Stat. Auth.: ORS 433.323

Newborns

333-021-0800
Administration of Vitamin K to Newborns

(1) The purpose of ORS 433.303 to 433.314 is to protect newborn infants against hemorrhagic disease of the newborn.

(2) The Vitamin K forms suitable for use are forms of Vitamin K_1 (Phytonadione), available in injectable or oral forms: as Mephyton for oral use, or as aquamephyton or konakion for injectable use. Menadione (Vitamin K_3) is not recommended for prophylaxis and treatment of hemorrhagic disease of the newborn:

(a) The dose of any of the Vitamin K_1 forms to be administered is one dose of 0.5 to 1.0 mg., if given by injection, or one dose of 1.0 to 2.0 mg. if given orally. Additional or larger doses may be administered on an individual basis as judged medically necessary;

(b) The Vitamin K dose is to be administered within the first 24 hours of delivery. If for any reason this is not done, the administration of Vitamin K_1 to the newborn at a later date is recommended.

(3) The forms of Vitamin K listed in section (2) of this rule are prescription drugs, and because no forms of Vitamin K_1 appropriate for oral administration to newborn infants which are not prescription drugs have been identified, Vitamin K may be administered only by persons authorized by law to administer prescription drugs.

(4) Physicians licensed under ORS Chapters 677, 684 and 685 (medical, osteopathic, naturopathic and chiropractic physicians) or midwives attending the mother at the birth of the child are responsible for ensuring that Vitamin K is administered to the newborn. This may be accomplished by a person legally authorized to administer Vitamin K, or by directing another person who is legally authorized and in a position to administer Vitamin K, or by referring the infant's family to the local health department, hospital, or practitioner legally authorized to obtain and administer Vitamin K.

(5) The person administering the Vitamin K to the newborn shall keep a record of the administration for a minimum of six months.

(6) A parent may, after being provided a full and clear explanation, decline to permit the administration of Vitamin K. In this event, the parent shall sign a form acknowledging his/her understanding of the reason or administration of Vitamin K and possible adverse consequences in the presence of a person who witnessed the instruction of the parent, and who will also sign the form. The form shall become a part of the medical record of the newborn infant.

DIVISION 22

HUMAN IMMUNODEFICIENCY VIRUS HIV TESTING AND CONFIDENTIALITY

333-022-0200
Definitions

For purposes of OAR 333-022-0205 through 333-022-0210, unless otherwise specified the following definitions shall apply:

(1) "Division" means the Public Health Division within Oregon Health Authority.

(2) "Health care provider" has the meaning given that term in ORS 433.045.

(3) "HIV test" has the meaning given that term in ORS 433.045.

(4) "HIV-positive test" means a positive result on the most definitive HIV test procedure used to test a particular individual. In the absence of any recommended confirming tests, this means the positive result of the initial test done.

(5) "Insurance producer" has the meaning given that term in ORS 746.600.

(6) "Insurance-support organization" has the meaning given that term in ORS 746.600.

(7) "Insurer" has the meaning given that term in ORS 731.106.

(8) "Licensed health care facility" means a health care facility as defined in ORS 442.015 and a mental health facility, alcohol treatment facility or drug treatment facility licensed or operated under ORS Chapters 426 or 430.

(9) "Local public health administrator" has the meaning given that term in ORS 433.060.

(10) "Local public health authority" has the meaning given that term in ORS 431.260.

(11) "Next of kin" means an individual within the first applicable class of the following listed classes:

(a) The spouse of the decedent;

(b) A son or daughter of the decedent 18 years of age or older;

(c) Either parent of the decedent;

(d) A brother or sister of the decedent 18 years of age or older;

(e) A guardian of the decedent at the time of death;

(f) A person in the next degree of kindred to the decedent;

(g) The personal representative of the estate of the decedent; or

(h) The person nominated as the personal representative of the decedent in the decedent's last will.

(12) "Personal representative" means a person who has authority to act on behalf of an individual in making decisions related to health care.

(13) "Substantial exposure" means an exposure to blood or certain body fluids that have a potential for transmitting the human immunodeficiency virus based upon current scientific information and may include but is not limited to contact with blood or blood components, semen, or vaginal/cervical secretions through percutaneous inoculation or contact with an open wound, non-intact skin, or mucous membrane of the exposed person.

333-022-0205
HIV Testing, Notification, Right to Decline

(1) Pursuant to ORS 433.045, a health care provider or the provider's designee shall, before subjecting an individual to an HIV test:

(a) Notify the individual being tested; and

(b) Allow the individual being tested the opportunity to decline the test.

(2) A health care provider or the provider's designee may provide an individual notice and the opportunity to decline testing verbally or in writing, including providing the notice and the opportunity to decline in a general medical consent form.

(3) Whenever an insurer, insurance producer or insurance-support organization asks an applicant for insurance to take an HIV test in connection with an application for insurance, the insurer, insurance producer or insurance-support organization must reveal the use of the test to the applicant and obtain the written consent of the applicant. The consent form must disclose the purpose of the test and to whom the results may be disclosed.

(4) Anyone other than those listed in sections (1) through (3) of this rule who wishes to subject an individual to an HIV test must reveal the use of the test to the individual and obtain written consent of the individual for the HIV test.

(5) If an individual is deceased, next of kin may consent to an HIV test pursuant to ORS 433.075.

(6) If an individual is incapable of consenting to an HIV test, the individual's personal representative may consent on the individual's behalf.

Stat. Auth.: ORS 433.045 – 433.080
Stats. Implemented: ORS 433.045, 433.055(3), 433.065 & 433.075
Hist.: PH 6-2013, f. & cert. ef 2-4-13

333-022-0210
Confidentiality

(1) General. Pursuant to ORS 433.045, a person may not disclose or be compelled to disclose the identity of any individual upon whom an HIV test is performed or the results of such a test in a manner that permits identification of the subject of the test, except as required or permitted by federal law, the law of this state, or these rules, or as authorized by the individual who is tested. The prohibitions on disclosure do not apply to an individual acting in a private capacity and not in an employment, occupational or professional capacity.

(2) Disclosure to or for a tested individual. The results of an HIV test may be disclosed to:

(a) The tested individual;

(b) The health care provider or licensed health care facility or person ordering the test; and

(c) Any individual to whom the tested individual has authorized disclosure.

(3) Medical records. When a health care provider or licensed health care facility obtains HIV test results of an individual, the test results may be entered into the routine medical record of that individual maintained by that health care provider or licensed health care facility. The information in the record may be disclosed in a manner consistent with ORS 192.553 to 192.581 and the Health Information Portability and Accountability Act (HIPAA) regulations, 45 CFR 160 to 164.

(4) Public health purposes.

(a) Anyone may report the identity and HIV-related test result of an individual to the local public health authority or Division for public health purposes.

(b) The Division or local public health authority may inform an individual who has had a substantial exposure to HIV of that exposure if the Division or local public health authority determines that there is clear and convincing evidence that disclosure is necessary to avoid an immediate danger to the individual or to the public.

(c) The Division or local public health authority may disclose the identity of an individual with an HIV-positive test to a health care provider for the purpose of referring or facilitating treatment for HIV infection.

(d) The Division or local public health authority may only disclose the minimum amount of information necessary to carry out the purposes of the disclosure.

(5) Anatomical donations. The identity of a HIV tested individual and that individual's HIV test results may be released to a health care provider or licensed health care facility to the minimum extent necessary to make medical decisions concerning organ or tissue transplants.

(6) Nothing in this rule is intended to limit the extent to which a licensed health care facility or health care provider can use or disclose HIV related health information in accordance with other state and federal laws.

Occupational and Health Care Setting Exposures

333-022-0300
Procedures for Requesting a Source Person Consent to an HIV Test Following an Occupational Exposure

(1) For purposes of this rule the following definitions apply:

(a) "Exposure" means contact with a source person's body fluids.

(b) "Licensed health care provider" has the meaning given that term in ORS 433.060.

(c) "Local public health administrator (LPHA)" means the public health administrator of the county or district health department for the jurisdiction in which the reported substantial exposure occurred.

(d) "Next of kin" means an individual within the first applicable class of the following listed classes:

(A) The spouse of the decedent;

(B) A son or daughter of the decedent 18 years of age or older;

(C) Either parent of the decedent;

(D) A brother or sister of the decedent 18 years of age or older;

(E) A guardian of the decedent at the time of death;

(F) A person in the next degree of kindred to the decedent;

(G) The personal representative of the estate of the decedent; or

(H) The person nominated as the personal representative of the decedent in the decedent's last will.

(e) "Occupational exposure" means a substantial exposure of a worker in the course of the worker's occupation.

(f) "Qualified person" means an individual, such as a licensed health care provider, who has the necessary training and knowledge about infectious disease to make a determination about whether an exposure was substantial.

(g) "Source person" means a person whose body fluids may be the source of a substantial exposure.

(h) "Substantial exposure" means an exposure to blood or certain body fluids that have a potential for transmitting the human immunodeficiency virus based upon current scientific information and may include but is not limited to contact with blood or blood components, semen, or vaginal/cervical secretions through percutaneous inoculation or contact with an open wound, non-intact skin, or mucous membrane of the exposed person.

(i) "Worker" means a person who is licensed or certified to provide health care under ORS Chapters 677, 678, 679, 680, 684 or 685, or ORS 682.216, an employee of a health care facility, of a licensed health care provider or of a clinical laboratory, as defined in ORS 438.010, a firefighter, a law enforcement officer, as defined in ORS 414.805, a corrections officer or a parole and probation officer.

(2) The Division has determined that a worker who experiences an occupational exposure may benefit from requesting the mandatory testing of a source person because such testing may assist a worker in obtaining necessary prophylaxis or treatment for HIV.

(3) Pursuant to ORS 433.065, a worker who experiences an exposure may request that a determination be made as to whether the exposure was a substantial exposure.

(a) A worker may make a request for a determination to:

(A) If the source person is being treated at a licensed health care facility:

(i) The facility's infection control officer or other designated qualified person; or

(ii) The source person's treating health care provider;

(B) The worker's health care provider; or

(C) The LPHA.

(b) A request for a determination must include but is not limited to:

(A) The worker's name and contact information;

(B) Whether the worker has been tested for HIV and if so, when;

(C) The details of the exposure;

(D) The name, contact information, and current location of the source, if known;

(E) Information about the source person's HIV status, if known; and

(F) A citation to ORS 433.065 and these rules as authority for the request for a determination.

(4) The health care provider, infection control practitioner, designated qualified person or local public health administrator to whom the request is made must determine whether an exposure was a substantial exposure and an occupational exposure and provide that determination in writing to the worker within 24 hours of receiving the request. The individual making the determination may rely on the most recent guidance on this topic issued by the federal Centers for Disease Control and Prevention. The individual to whom the request is made may contact the worker to request additional information and may require the release of records related to the exposure from the worker, a licensed health care facility or a licensed health care provider in order to make his or her determination.

(5) If the health care provider, infection control officer, designated qualified person or LPHA to whom the request was made determines the worker experienced a substantial exposure and an occupational exposure the worker may request that the source person be tested for HIV.

(a) If the worker knows that the source person is under the care of a licensed health care facility or a licensed health care provider the worker may request that the health care facility or licensed health care provider ask the source person to consent to an HIV test. A health care facility or licensed health care provider who receives a request from a worker as described in section (5) of this rule is required to ask the source person to consent to an HIV test within 24 hours of receiving the request and to report to the worker immediately whether the source person has consented to an HIV test.

(b) If the worker does not know whether the source person is under the care of a licensed health care facility or a licensed health care provider the worker may contact the LPHA and ask for assistance in locating the source person. If the source person is located with assistance from the LPHA, the LPHA must request that the source person consent to an HIV test.

(c) In accordance with ORS 433.075(5) if the source person consents to the HIV test, the results of an HIV test shall be reported to the worker by the health care provider or licensed health care facility that ordered the test but the results may not identify the source person and the worker is prohibited from redisclosing any information about the test if the source person is known to the worker.

(d) A worker, or the exposed person's employer in the case of an occupational exposure, is responsible for the costs of the source person's HIV test in accordance with ORS 433.075.

(6) If the worker disagrees with a determination that an alleged occupational exposure was not a substantial exposure, the worker may request a second determination from the LPHA. If the LPHA determines that the exposure was substantial, the worker may request that the source person be tested for HIV according to the procedures detailed in subsections (5)(a) through (d).

(7) If the source person refuses to consent, the health care provider or licensed health care facility that requested that the source person be tested must document, in writing, the source person's refusal to consent to an HIV test and provide that documentation to the worker. The LPHA must also be notified by the health care provider, licensed health care facility, or the worker of the documentation of the refusal along with the determination that the exposure was substantial.

(8) If a source person refuses to consent to an HIV test or fails to obtain a test within 24 hours of his or her consent to the HIV test the worker may petition the circuit court in the county in which the occupational exposure occurred in accordance with ORS 433.080 and OAR 333-022-0305 to request mandatory testing of the source person. Before a worker may petition the court for mandatory testing the worker must agree to an HIV test and submit a specimen to a laboratory certified to perform testing on human specimens under the Clinical Laboratory Improvement Amendments of 1988 (P.L. 100-578,42 U.S.C. 201 and 263(a))(CLIA) and must notify the LPHA of the failure to obtain a test along with along with the determination that the exposure was substantial.

(9) If a source person is deceased or is unable to consent to an HIV test, consent shall be sought from the source person's next of kin.

(10) If a worker has an employer, the worker's employer shall be required to provide the worker with information about HIV infection, methods of preventing HIV infection, HIV tests and treatment and assistance in following the procedures outlined above. A worker who is self-employed may obtain this information and assistance from the LPHA.

333-022-0305
Petition for Mandatory Testing of Source Persons

(1) If a worker has complied with the process established in OAR 333-022-0300 and a source person has refused to consent to an HIV test or has failed to obtain a test within the time period established in that rule, the worker may petition the circuit court for the county in which the exposure occurred and seek a court order for mandatory testing in accordance with ORS 433.080.

(2) The form for the petition shall be as prescribed by the Division and shall be obtained from the LPHA.

(3) The petition shall name the source person as the respondent and shall include a short and plain statement of facts alleging:

(a) The petitioner is a worker subjected to an occupational exposure and the respondent is the source person;

(b) The petitioner meets the definition of worker in ORS 433.060;

(c) All procedures for obtaining the respondent's consent to an HIV test as described in OAR 333-022-0300 have been exhausted by the petitioner and the respondent has refused to consent to the test, or within the time period prescribed in OAR 333-022-0300 has failed to submit to the test;

(d) The petitioner has no knowledge that he or she has a history of a positive HIV test and has since the occupational exposure submitted a specimen for an HIV test to a laboratory certified to perform testing on human specimens under the Clinical Laboratory Improvement Amendments of 1988 (P.L. 100-578,42 U.S.C. 201 and 263(a))(CLIA).; and

(e) The injury that petitioner is suffering or will suffer if the source person is not ordered to submit to an HIV test.

(4) The petition shall be accompanied by the certificate of the LPHA declaring that, based upon information in the possession of the administrator, the facts stated in the allegations under subsections (3)(a), (b) and (c) of this rule are true.

(5) A LPHA must provide the petitioner a certificate as described in section (4) of this rule and must appear at any court hearing on the petition in accordance with ORS 433.080(7).

(6) The court is required to hold a hearing on the petition in accordance with ORS 433.080.

333-022-0310
Substantial Exposure While Being Administered Health Care

(1) For purposes of this rule the following definitions apply:

(a) "Exposure" means contact with a worker's body fluids.

(b) "Local public health administrator (LPHA)" means the public health administrator of the county or district health department for the jurisdiction in which the reported substantial exposure occurred.

(c) "Health care" has the meaning given that term in ORS 192.556.

(d) "Licensed health care provider" has the meaning given that term in ORS 433.060.

(e) "Patient" means an individual who has experienced an exposure or substantial exposure while being administered health care.

(f) "Qualified person" means an individual, such as a licensed health care provider, who has the necessary training and knowledge about infectious disease to make a determination about whether an exposure was substantial.

(g) "Substantial exposure" means an exposure to blood or certain body fluids that have a potential for transmitting the human immunodeficiency virus based upon current scientific information and may include but is not limited to contact with blood or blood components, semen, or vaginal/cervical secretions through percutaneous inoculation or contact with an open wound, non-intact skin, or mucous membrane of the exposed person.

(h) "Worker" means a person who is licensed or certified to provide health care under ORS Chapters 677, 678, 679, 680, 684 or 685, or ORS 682.216, an employee of a health care facility, of a licensed health care provider or of a clinical laboratory, as defined in ORS 438.010, a firefighter, a law enforcement officer, as defined in ORS 414.805, a corrections officer or a parole and probation officer

(2) If a patient has experienced an exposure by a worker the worker shall report that exposure immediately to one of the following:

(a) The worker's supervisor or employer, if applicable;

(b) The licensed health care facility's infection control officer or other designated qualified person if the exposure occurred in a licensed health care facility as that term is defined in ORS 442.015; or

(c) The LPHA if the worker does not have a supervisor or employer and the exposure did not occur in a licensed health care facility.

(3) If a witness to the incident has reason to believe the incident was not reported, the witness shall notify one of the individuals or entities listed in section (2) of this rule and provide details of the incident.

(4) The individual to whom a report was made under section (2) or (3) of this rule shall immediately make a determination whether the exposure was substantial and shall provide that determination to the worker in writing. The individual making the determination may rely on the most recent guidance on this topic issued by the federal Centers for Disease Control and Prevention. If the individual to whom the report was made is not qualified to make such a determination the individual must consult with a designated qualified person and that qualified person must then make the determination. The individual making a determination may require the release of records related to the exposure from the worker, a health care facility or a licensed health care provider in order to make his or her determination.

(5) If a determination is made that the exposure was substantial, the worker who was the source of the substantial exposure to a patient shall notify the patient in writing within 24 hours of the determination. The worker may request that his or employer, the health care facility if the exposure occurred in a health care facility, or the LPHA provide assistance in making the notification. The notice must include but is not limited to:

(a) Details of the exposure;

(b) Why it was determined to be substantial;

(c) Whether the worker is willing to consent to an HIV test;

(d) The worker's HIV status if the worker consents to that information being included in the notice;

(e) Information about how the patient may request the worker be tested for HIV and to whom the patient should make such a request; and

(f) A statement that the patient will be responsible for the costs of the worker's HIV test in accordance with ORS 433.075.

(6) If the patient disagrees with a determination that an alleged occupational exposure was not a substantial exposure, the patient may request a second determination from the LPHA. If the LPHA determines that the exposure was substantial, the patient may request that the source person be tested for HIV according to the procedures detailed in subsections (5)(a) through (f).

(7) A patient who has received notification in accordance with section (5) of this rule may make a written request for the worker to be tested for HIV to the individual or entity listed in the notice.

(8) The individual or entity to whom a request has been made under section (6) of this rule must:

(a) Immediately ask the worker to consent to an HIV test; and

(b) Inform the patient immediately whether the worker consented to the testing.

(9) If the worker consents to an HIV test the worker must submit to a test within 24 hours of being asked to consent.

(10) In accordance with ORS 433.075(5) if the worker consents to the HIV test the results of a HIV test shall be reported to the patient by the individual who ordered the test but the results may not identify the worker and the patient is prohibited from redisclosing any information about the results of the test if the worker is known to the patient.

(11) Pursuant to ORS 433.065, a patient who has experienced a substantial exposure by a worker shall be offered information about HIV infection, methods of preventing HIV infection, and HIV tests. This information must be provided by the patient's licensed health care provider. Upon request by the patient's health care provider, the LPHA must provide assistance in providing this information to the patient.

333-022-0315
Employer Program for Prevention, Education and Testing

(1) Pursuant to ORS 433.075(4), where an employer provides a program of prevention, education and testing for HIV exposures for its employees, the program will be considered to be approved by the Division if employees receive counseling regarding HIV infection control, uniform body fluids precautions, sexual/needle-sharing abstinence and safer sex practices including advice about precautionary measures to be taken with partners at risk of exposure to HIV while test results are pending.

(2) The Division may make the educational materials needed for such a program available to an employer who requests such materials in writing.

(3) An employer that provides HIV testing to employees must use a laboratory certified to perform testing on human specimens under the Clinical Laboratory Improvement Amendments of 1988 (P.L. 100-578,42 U.S.C. 201 and 263(a))(CLIA).

(4) If an employer does not have a testing program in place, the employer shall notify the exposed worker of a health care provider who will perform testing, or an exposed worker may seek medical treatment from a health care provider of his or her choice.

Infected Health Care Providers

333-022-0400
Definitions

For the purpose of OAR 333-022-0400 through 333-022-0460, the following definitions apply. Other definitions pertaining to these rules are listed in OAR 333-022-0200:

(1) "Health Care Provider" as defined in OAR 333-017-0000(25) means a person who has direct or supervisory responsibility for the delivery of health care or medical services. This shall include, but not be limited to: Licensed physicians, nurse practitioners, physician assistants, nurses, dentists, medical examiners, and administrators, superintendents and managers of clinics, health care facilities as defined in ORS 442.015(13) and licensed laboratories.

(2) "Reviewable Health Care Provider" means a health care provider who routinely performs or participates in the performance of surgical, obstetric, or dental procedures that:

(a) Pose a significant risk of a bleeding injury to the arm or hand of the health care provider; and

(b) Are of a nature that reasonably could result in the patient having an exposure to the health care provider's blood in a manner capable of effectively transmitting HIV or hepatitis B virus (HBV), for example, due to the inability of the health care provider to withdraw the injured limb. Examples of procedures that do not carry this significant risk include, but are not limited to: oral, rectal, or vaginal examinations; phlebotomy; administering intramuscular, intradermal, or subcutaneous injections; needle biopsies, needle aspirations, and lumbar punctures; cutdown and angiographic procedures; excision of epidermal or dermal lesions; suturing of superficial lacerations; endoscopy; placing and maintaining peripheral and central intravascular lines, nasogastric tubes, rectal tubes, and urinary catheters; or acupuncture.

(3) "HBsAg" means the surface antigen of the hepatitis B virus.

(4) "HBeAg" means the "e" antigen of the hepatitis B virus.

(5) "OR-OSHA" means the Oregon Occupational Safety and Health Division of the Oregon Department of Consumer and Business Services.

333-022-0405
Preamble

(1) The purpose of OAR 333-022-0400 through 333-022-0460 is to prevent the transmission of hepatitis B virus and human immunodeficiency virus to patients from infected health care providers. The Division declares that strict adherence to proper infection control procedures by all health care providers is the primary way to prevent such transmission. The Division recognizes that when proper infection control procedures are used, the risk of transmission of HIV or hepatitis B virus from reviewable health care providers to their patients is negligible.

(2) In the event that an HIV-infected health care provider demonstrates symptoms of cognitive, emotional, behavioral or neurologic impairment, he or she should be treated like any other distressed and/or impaired health care provider, following the standards of the appropriate professional licensing board.

Stat. Auth.: ORS 431.110(1) & 433.004
Stats. Implemented: ORS 431.110(1) & 433.004

333-022-0410
Infection Control

(1) All health care providers and health care facilities shall strictly adhere to the infection control requirements of OAR 333-017-0005(1) and applicable sections of the OSHA rules, "Occupational Exposure to Bloodborne Pathogens" (OAR 437-002 - 1910.1030). This includes the proper use of hand washing, protective barriers, and care in the use and sterilization or disposal of needles and other sharp instruments as described in the U.S. Public Health Service's Centers for Disease Control and Prevention recommendations found in "Recommendations for Prevention of HIV Transmission in Health Care Settings", Morbidity and Mortality Weekly Report 1987; 36 (supplement number 2S); 1-18S and "Update: Universal Precautions for Prevention of Transmission of Human Immunodeficiency Virus, Hepatitis B Virus, and Other Bloodborne Pathogens in Health Care Settings", Morbidity and Mortality Weekly Report 1988; 37:377-82, 387-88.

(2) Any health care provider who observes that another health care provider or health care facility is not practicing current infection control standards shall seek correction of that problem through procedures appropriate to the setting. Such procedures may include, for example, discussing the needed corrective actions directly with the health care provider, reporting the breaches of infection control practice to the health care facility's infection control committee, or other actions/reporting as recommended by the infection control committee or required by other regulations.

333-022-0415
Infection Control Training

(1) All health care providers and health care facilities shall adhere to the infection control training requirements of the OSHA rules, "Occupational Exposure to Bloodborne Pathogens" (OAR 437-002 – 1910.1030). These include employers ensuring that all employees with potential occupational exposures to bloodborne pathogens participate in a training program at the time of initial assignment to the tasks where occupational exposure may take place and at least annually thereafter.

(2) Any institution in Oregon providing professional training leading to a degree or certificate as a health care provider shall provide formal training in infection control procedures as a prerequisite for graduation.

333-022-0420
HIV and Hepatitis B Testing of Health Care Providers

(1) HIV testing and hepatitis B testing of health care providers is not required by the Division.

(2) All reviewable health care providers are encouraged to voluntarily undergo testing for HIV infection. Any reviewable health care provider is encouraged to either:

(a) Demonstrate serologic evidence of immunity to the hepatitis B virus from vaccination; or

(b) To know his or her HBsAg status and, if that status is positive, is encouraged to know his or her HBeAg status.

(3) The provisions of section (2) of this rule shall not be deemed to authorize any health care provider, health care facility, clinical laboratory, blood or sperm bank, insurer, insurance agent, insurance-support organization as defined in ORS 746.600, government agency, employer, research organization or agent of any of them to require HIV testing of any health care provider as a condition of practice. Nor shall such provisions be deemed to create a legal standard of care for reviewable health care providers.

333-022-0430
Process for Initiating Review of the Professional Practice of a Reviewable Health Care Provider with a HIV-Positive Test or a Positive Test for HBsAg and HBeAg

(1) Any reviewable health care provider who learns that he or she has a HIV-positive test or a positive test for both HBsAg and HBeAg is encouraged to refrain from participating in the performance of procedures outlined in OAR 333-022-0400(2) until he or she ensures that his or her HIV and/or HBsAg/HBeAg infection status is reported to either:

(a) The Division for the purpose of undergoing a review of his or her professional practice as described in OAR 333-022-0435; or

(b) His or her own institution of employment for the purpose of undergoing a review of his or her professional practice, if such a process exists.

(2) Reports to the Division should be made directly to the State Epidemiologist, the Deputy State Epidemiologist, or the State Health Officer.

(3) Health care providers who are uncertain as to whether or not they are reviewable may seek anonymous guidance from the Division.

333-022-0435
Division Response to the Report of a Reviewable Health Care Provider with a HIV-Positive Test or Positive Tests for HBsAg and HBeAg

The following procedures shall be undertaken by the Division at the request of a reviewable health care provider with a positive test for HIV or positive tests for HBsAg and HBeAg:

(1) The Division shall interview the reviewable health care provider and his or her personal licensed physician or primary health care provider within two weeks of receipt of the report to determine:

(a) The date of the initial positive test result;

(b) An estimated date of initial infection, if available from clinical and exposure history information;

(c) The reviewable health care provider's current medical status with special emphasis on presence or absence of exudative lesions or weeping dermatitis, pulmonary tuberculosis, and cognitive, emotional, behavioral or neurologic impairment; and

(d) Whether the reviewable health care provider complies with standard infection control procedures and whether he or she has a history of incidents in which there was a substantial likelihood that a patient received a substantial exposure to the reviewable health care provider's blood;

(e) Pursuant to ORS 433.008 and 433.045, confidentiality of the reviewable health care provider's HIV or HBsAg/HBeAg status shall be maintained during this investigation.

(2) The Division shall convene an expert panel within two weeks of completion of the investigation to make recommendations regarding the reviewable health care provider's continued practice.

(3) The identity of the reviewable health care provider will not be revealed to the expert panel, unless the reviewable health care provider consents to this disclosure.

Stat. Auth.: ORS 431.110(1) & 433.004(1)
Stats. Implemented: ORS 431.110(1) & 433.004(1)

333-022-0440
Composition of the Expert Panel and Its Responsibilities

(1) The expert panel shall include: An infectious disease specialist, with expertise in the epidemiology of HIV and hepatitis B infections, who is not involved in the care of the reviewable health care provider; a health professional with expertise in the procedures performed by the reviewable health care provider; a representative of the Division; and others at the discretion of the Division. With the consent of the reviewable health care provider, the reviewable health care provider's personal licensed physician or primary health care provider shall also be offered a position on the panel. The reviewable health care provider shall have the right to review the composition of the panel.

(2) The expert panel shall consider all information obtained by the Division's investigation and may request further information of the Division or the reviewable health care provider as needed.

(3) The expert panel shall make recommendations to the Division regarding the reviewable health care provider's further practice. The panel will focus on the reviewable health care provider's ability to comply with infection control procedures and his or her ability to provide competent care. Restrictions in future practice will be recommended only if there are medical impairments, infection control breaches, or scientific evidence to indicate that, in the Division's judgment, the reviewable health care provider's current practice activities pose a significant risk of transmission to the patient. Job modifications, limitations, or other restrictions are warranted only if there is clear evidence that the reviewable health care provider's current practice activities pose a significant risk of transmitting infection to patients. If restrictions are recommended, the panel will recommend the least restrictive alternative. If warranted, the panel may recommend one or more of the following:

(a) Additional infection control procedures;

(b) Restrictions on specific procedures;

(c) Monitoring of the reviewable health care provider's practice for compliance with the recommendations of the expert panel;

(d) Medical monitoring (both content and frequency) of the reviewable health care provider; and

(e) Frequency with which the panel should reconvene to reconsider its recommendations in light of the changing medical condition of the reviewable health care provider.

(4) The expert panel shall furnish the reviewable health care provider with a draft of its recommendations and an opportunity for comment. Before finalizing its recommendations to the Division, the expert panel shall take into account any comments received from the reviewable health care provider or the provider's representative.

Division Recommendations to Reviewable Health Care Provider

The Division shall consider the specific recommendations of the expert panel and comments, if any, of the reviewable health care provider or the provider's representative, and shall prepare written recommendations to the reviewable health care provider. These written recommendations shall be presented to the reviewable health care provider within one week after completion of the panel's recommendations.

333-022-0450
Notification of the Appropriate Licensing Board

If the Division has reason to believe that the reviewable health care provider poses a significant risk of transmission of HIV or hepatitis B virus to the patient, whether or not an HIV-infected or HBsAg/HBeAg-positive reviewable health care provider has been reported to the Division and has consented to voluntary review as outlined above, the Division may notify the appropriate licensing board, and shall inform the reviewable health care provider, in writing, of this notification.

333-022-0455
Notification and Counseling of Some or All Past or Present Patients of the Reviewable Health Care Provider

Notification of patients as to their possible exposure to HIV or hepatitis B shall not occur except in any of the following circumstances:

(1) HIV or hepatitis B transmission from reviewable health care provider to at least one of his or her patients has occurred;

(2) The patient to be notified has had a substantial exposure to the reviewable health care provider's blood or body fluids; or

(3) The reviewable health care provider has had significant violations of infection control practices that were standard at the time of the patient contact and which resulted in a significant risk of a substantial exposure to the patient being notified;

(4) The identity of the HIV-infected health care provider shall not be explicitly disclosed during the notification process.

CAREAssist

333-022-1000
Purpose and Description of Program

(1) The CAREAssist program is Oregon's AIDS Drug Assistance Program (ADAP). The core purpose of CAREAssist is to ensure access to HIV-related prescription drugs to underinsured and uninsured individuals living with HIV/AIDS. CAREAssist also helps people living with HIV or AIDS pay for medical care expenses, including but not limited to medication, insurance premiums and medical services. The program is funded through Part B of the Ryan White HIV/AIDS Treatment Extension Act of 2009 (Public Law 111-87), which provides grants to states and territories.

(2) The Oregon Health Authority (Authority) shall make funds available for the CAREAssist program as long as it continues to receive grant funds from the federal government.

(3) If insufficient funds are available for the CAREAssist program the Authority may:

(a) Modify group benefits for approved clients; and

(b) Institute a waiting list in lieu of accepting applications.

(4) Ryan White funds may not be used for any item or service if payment has been made, or can reasonably be expected to be made by another payment source. ADAP is a last-resort payment source. As such, the Authority may require the applicant or client to enroll in the most cost-effective insurance available, as determined by the Authority. If the client or applicant refuses to enroll in health insurance that the Authority has identified as the most cost-effective plan for which he or she is eligible, the Authority shall only provide assistance with the cost of HIV antiretroviral, Hepatitis antiviral and opportunistic infection-related medications as identified in the formulary.

333-022-1010
Definitions

(1) "AIDS" means acquired immunodeficiency syndrome.

(2) "Authority" means the CAREAssist program, administered by the Oregon Health Authority.

(3) "CAREAssist" includes benefits provided to clients under Bridge, UPP, Group 1 or Group 2 as those terms are used in OAR 333-022-1000 through 333-022-1170.

(4) "CAREAssist formulary" or "formulary" means a list of medications available to enrolled clients of CAREAssist when the same drug or a therapeutically comparable medication is not available through the client's primary health insurance.

(5) "Federal Poverty Level" or "FPL" means the annual poverty income guidelines, published by the United States Department of Health and Human Services.

(6) "Family" means all individuals counted by the Authority in determining the applicant's or client's family size.

(7) "Monthly income" means the monthly average of any and all monies received on a periodic or predictable basis, which the family relies on to meet personal needs.

(8) "Gross monthly income" means income before taxes or other withholdings.

(9) "HIV" means the human immunodeficiency virus, the causative agent of AIDS.

(10) "OHP" means the Oregon Health Plan.

(11) "Oregon residency" means that an individual:

(a) Has a physical location to reside in Oregon; and

(b) Is in Oregon at least six months out of the year; and

(c) Is not absent from Oregon more than three consecutive months; or

(d) Is living out of state for more than three months due to temporary or seasonal employment outside of Oregon; or

(e) Is living out of state for more than three months while attending an education institution full time.

(12) "Refuses" means a client or applicant actively declines enrollment in the insurance identified by the Authority.

(13) "Seasonal worker" means the applicant performs work cyclically during the year and most often the work is defined by seasons and typically defined by the calendar year.

(14) "Special enrollment period" means a time period outside of open enrollment in which a client is eligible to apply for private insurance because they experienced a qualifying event as defined by the Affordable Care Act.

(15) "UPP" means the CAREAssist Uninsured Persons Program.

333-022-1020
Eligibility

To qualify for the CAREAssist program an individual must:

(1) Be HIV positive or have AIDS; and

(2) Reside in Oregon; and

(3) Have a monthly income based on family size which is at or below 500 percent of the FPL.

Stat. Auth.: ORS 413.042, 431.250, 431.830
Stats. Implemented: ORS 431.250, 431.830
Hist.: PH 30-2014, f. 11-10-14, cert. ef. 12-1-14; PH 23-2016, f. & cert. ef. 8-2-16

333-022-1030
Application Process

(1) An individual may apply for CAREAssist benefits by completing a form prescribed by the Authority and providing the documentation as instructed in the application so that the Authority can verify that the applicant:

(a) Has tested positive for HIV or has AIDS; and

(b) Has a monthly income based on family size at or below 500 percent of the FPL; and

(c) Is a resident of Oregon.

(2) An applicant must sign an authorization that permits the Authority to contact and exchange information with the applicant's health care providers, insurers, and any other individual or entity necessary to determine the applicant's eligibility for CAREAssist, process payments and facilitate care coordination for the client.

Stat. Auth.: ORS 413.042, 431.250, 431.830
Stats. Implemented: ORS 431.250, 431.830
Hist.: PH 30-2014, f. 11-10-14, cert. ef. 12-1-14; PH 23-2016, f. & cert. ef. 8-2-16

333-022-1040
Review of Applications

(1) The Authority must review an application to determine if it is complete.

(a) An applicant or the applicant's case manager shall be notified by the Authority if the application is incomplete. Notifications shall identify what information is missing and the deadline for submitting the missing information.

(b) If the applicant does not provide the requested information before the deadline the Authority must notify the applicant in writing that the application is incomplete, shall no longer be reviewed, and that the applicant may reapply at any time.

(2) Once an application is deemed complete the Authority must verify the information submitted and make a determination within 10 business days as to whether the applicant is eligible for CAREAssist benefits.

(3) Verification of Oregon residency.

(a) An applicant must provide documentation verifying Oregon residency, as outlined in the application.

(b) An applicant may be asked to appear at an Authority office or a local case management provider's office in person if the applicant's residency status is in question.

(c) If an applicant is a seasonal worker who must be out of state for more than three consecutive months for employment, the applicant may be considered to reside in Oregon but must receive prior authorization, in writing, from the program before leaving the state for work.

(4) Verification of HIV/AIDS status. The applicant must ensure that a form prescribed by the Authority that verifies an applicant's HIV/AIDS status is signed and submitted to the Authority by:

(a) The applicant's health care provider; or

(b) The applicant's HIV case manager, if the case manager has received documentation of HIV/AIDS status directly from a health care provider.

(5) Determination of family size. The Authority shall determine an applicant's family size by counting the individuals related by birth, marriage, adoption, or legally defined dependent relationships who either live in the same household as the applicant and for whom the applicant is financially responsible, or whom do not live in the same household as the applicant but fall within the categories listed in subsections (b), (c) or (d) of this section, including but not limited to:

(a) A legal spouse; or

(b) A child 18 years of age or younger who qualifies as a dependent for tax filing purposes; or

(c) A child age 19 to 26 who takes 12 or more credit hours in a school term, or its equivalent; or

(d) An adult for whom the applicant has legal guardianship.

(6) Determination of monthly income.

(a) An applicant must submit to the Authority income documentation for all family members and from all sources. The Authority shall use the documentation to calculate the total monthly income for a family. Income after taxes or other withholdings may only be used when:

(A) A self-employed applicant or the applicant's family member provides a copy of the most recent year's IRS Form 1040 (Schedule C) in which case the Authority may allow a 50 percent deduction from gross receipts or sales; or

(B) An applicant or applicant's family member has income from rental real estate and provides a copy of the most recent year's IRS Form 1040 (Schedule E). In this case the Authority may use the total rental real estate income, as reported on the Schedule E. If the Schedule E shows a loss, the applicant or applicant's family member shall be considered to have no income from this source.

(b) The Authority must determine an applicant's income by adding together all sources of family income, and dividing that number by the applicable FPL. The resultant sum is the applicant's percentage of the FPL. For example, if total annual income for a family of two is $31,460 and 100 percent FPL for a family of two is $15,730 for the current year: $31,460 divided by $15,730 equals two or 200 percent FPL.

Stat. Auth.: ORS 413.042, 431.250, 431.830
Stats. Implemented: ORS 431.250, 431.830
Hist.: PH 30-2014, f. 11-10-14, cert. ef. 12-1-14

333-022-1050
Approval or Denial of Application

(1) If the Authority determines that an applicant is eligible for CAREAssist benefits the applicant shall be notified in writing within 14 calendar days of the Authority's determination and be assigned to a benefit group as follows:

(a) Group 1: Clients who are enrolled in a private, group or individual insurance policy.

(b) Group 2: Clients whose primary prescription benefits are provided by OHP or the Department of Veterans Affairs (VA).

(2) A client's notification must describe:

(a) The eligibility effective date and end date;

(b) Group number and benefits associated with that group;

(c) A list of CAREAssist in-network pharmacies;

(d) Recertification date and process; and

(e) The repercussions of not recertifying.

(3) CAREAssist eligibility is for six months.

(4) If the Authority determines that an applicant is not eligible for CAREAssist benefits an applicant shall be notified in writing in accordance with ORS 183.415.

(5) An applicant who has been denied may reapply at any time.

Stat. Auth.: ORS 413.042, 431.250, 431.830

333-022-1060
Group 1 and 2 Benefits

(1) Group 1 and 2 clients are eligible for assistance with:

(a) The cost of health insurance premiums if applicable, provided the coverage, at a minimum includes pharmaceutical benefits equivalent to the HIV antiretroviral and opportunistic infection-related medications on the CAREAssist formulary as well as coverage for other essential medical benefits as defined by the Affordable Care Act.

(b) Copays, coinsurance and deductibles on prescription drugs covered by the client's primary health insurance, with the exception of medications prescribed to treat erectile dysfunction.

(c) Copays, coinsurance and deductibles on medical services covered by the client's primary health insurance, up to a maximum amount set by the program each calendar year. Eligible medical services include but are not limited to laboratory tests, office visits, emergency room visits, X-rays, and hospital stays.

(d) The full cost of CAREAssist formulary prescriptions, filled at an in-network pharmacy when:

(A) The client has successfully enrolled in insurance but coverage is not yet active; or

(B) The client's insurance policy does not cover the cost of the prescription; and

(C) The prescribing provider submitted a Prior Authorization Request to the client's primary insurance, the request was denied and there is no acceptable therapeutic substitution.

(e) Prescription drugs if the required copay exceeds the cost of the prescription medication and the insurance policy therefore does not pay.

(f) Medication therapy management.

(2) CAREAssist clients who smoke or chew tobacco may be eligible to receive additional and enhanced services from the Oregon Tobacco Quit Line (1-800-QUIT-NOW), if funding is available.

(3) A client on restricted status may not be entitled to some of the benefits described in section (1) and (2) of this rule.

(4) The Authority shall only make payments directly to a service provider or benefits administrator. No reimbursements or direct payments may be made to a client or an individual who pays on behalf of a client.

Stat. Auth.: ORS 413.042, 431.250, 431.830
Stats. Implemented: ORS 431.250, 431.830
Hist.: PH 30-2014, f. 11-10-14, cert. ef. 12-1-14

333-022-1070
Prescriptions

(1) Unless an exception applies under subsections (3)(a) or (b) of this rule, CAREAssist clients must use an Authority-approved CAREAssist in-network pharmacy for all:

(a) Medications not designated as acute on the CAREAssist formulary;

(b) Chronic care medications; and

(c) Medications paid for in full by the Authority

(2) The Authority must provide to each client a list of approved pharmacies and post the information on the CAREAssist website.

(3) A CAREAssist client may use a non-CAREAssist in-network pharmacy if:

(a) His or her insurance carrier requires use of a pharmacy that is not a CAREAssist in-network pharmacy; and

(b) He or she has provided the Authority with a copy of the insurance summary of benefits for that insurance plan and the requirement to use a non-CAREAssist in-network pharmacy is explicitly stated in that insurance summary.

Stat. Auth.: ORS 413.042, 431.250, 431.830
Stats. Implemented: ORS 431.250, 431.830
Hist.: PH 30-2014, f. 11-10-14, cert. ef. 12-1-14

333-022-1080
Payments and Cost Coverage

(1) The Authority may only make insurance premium payments directly to the insurance carrier or benefits administrator. No direct payments may be made to a client.

(2) When no other payer for health coverage (public assistance or private) is available, CAREAssist may pay insurance premiums for a limited time for a client's insurance plan that covers his or her family members if the monthly premium cannot by divided, until the Authority determines that the client's family members can obtain their own policies.

(3) The Authority may not use CAREAssist funds to pay for any administrative costs, which are in addition to the premium payment.

(4) Authority payments for prescriptions follow the health insurance pharmacy benefits defined within the policy and may not pay for the cost to dispense a brand-name drug when a generic equivalent is the preferred option of the health insurance.

(5) The Authority shall only cover the costs of medications that are covered by the client's health insurance or those specifically listed on the CAREAssist formulary as additional benefits to the client, and prior to any payments being made by the Authority must receive a determination by the prescriber that no acceptable therapeutic equivalent is available through the primary insurance.

(6) The Authority may only pay for HIV medications or a combination of HIV drugs as approved in the federal Department of Health and Human Services (DHHS) Treatment Guidelines, which can be found at http://aidsinfo.nih.gov/guidelines.

(a) The CAREAssist Pharmacy Benefits Manager (PBM) clinical pharmacist team (team) assesses each client's medication regimen to ensure that it conforms to current DHHS guidelines. In the event that a treatment recommendation or guideline is not followed, the clinical pharmacist at the PBM shall notify the Authority that payment may not be made until the prescriber submits a prior authorization form to the PBM's clinical pharmacist.

(b) The Authority may deny payment for medications that are determined to be clinically inappropriate pursuant to the DHHS Treatment Guidelines.

(7) Medical Services.

(a) The Authority shall identify and inform clients of an amount to be provided within the calendar year for medical service copays and deductible. The annual financial amount shall be posted on the CAREAssist website at the beginning of each calendar year. All costs exceeding the published amount are the client's responsibility.

(b) The Authority may pay for a client's out-of-pocket medical service expense for an insurance-covered medical service or durable medical equipment, up to an annual maximum amount. The client's primary insurance must cover the service or device before CAREAssist assumes any financial cost unless the client is pre-approved for limited full-cost coverage under UPP or Bridge, as allowed under OARs 333-022-1140 and 333-022-1145.

(8) When the Authority acts as primary payer:

(a) Reimbursement to providers shall be 125 percent of the current Oregon Medicaid Fee for Service rate for the allowable Current Procedural Terminology (CPT) Code unless the provider bills for less. A list of allowable CPT Codes is posted on the CAREAssist website.

(b) Payments made by the Authority on behalf of clients must be accepted by the provider as payment in-full. Balance billing is prohibited.

(9) Clients who receive refunds for services paid by the Authority on the client's behalf must reimburse the program or develop a repayment plan within 60-days of receiving the refund. This includes but is not limited to refunds issued by pharmacies, medical providers, insurance carriers and the Internal Revenue Service.

333-022-1090
Client Eligibility Review

(1) The Authority must verify a client's eligibility every six months, but may conduct an eligibility review at any time and as many times as necessary within an eligibility period.

(2) The Authority must provide CAREAssist clients with a Client Eligibility Review (CER) form and instructions within 60 days of the expiration of their current eligibility period.

(3) A client must submit the CER and any other required documentation within the timeframe established by the Authority in the instructions. A deadline for submitting the CER or requested documentation may be extended at the discretion of the Authority.

(4) The Authority shall review a client's application and supporting documentation and verify the information in accordance with OAR 333-022-1040.

(5) The Authority must notify a client in writing whether his or her benefits continue and whether there are any changes. Notification shall include the effective date for the client's new enrollment status. If a client is not found eligible for continued benefits the client shall have a right to a hearing in accordance with ORS 183.415.

(6) A CAREAssist client who fails to submit the required renewal documents by the requested deadline shall be placed on a restricted status in accordance with OAR 333-022-1120. If the Authority has not received a complete CER at the end of three months, the client is no longer eligible to receive benefits. The Authority must inform the client that he or she is no longer eligible for benefits because the required information was not submitted, eligibility could not be verified and explain that benefits shall end effective the first day of the following month. An individual may reapply for benefits at any time under OAR 333-022-1030.

333-022-1100
Client Reporting Requirements

(1) A CAREAssist client is required to notify the Authority within 15 calendar days of any of the following:

(a) Receiving notification of changes to premium payments or benefits from his or her insurance company or a benefits administrator;

(b) Changes in contact information including address and phone number; or

(c) Changes in eligibility for group or individual insurance coverage, whether private or publicly funded.

(2) A client's failure to notify the Authority in accordance with section (1) of this rule may result in a client being terminated from the program in accordance with OAR 333-022-1160. A client who is terminated under this section because the client failed to notify the Authority that his or her insurance plan was cancelled may not be eligible to reapply until the client is enrolled in an insurance plan.

Hist.: PH 30-2014, f. 11-10-14, cert. ef. 12-1-14

333-022-1120
Restricted Status

(1) The Authority may place a client on restriction if the client fails to return a complete Client Eligibility Review (CER) by the requested deadline.

(2) The effective date and duration of the restriction shall be as follows:

(a) Restriction takes effect on the first day of the client's new eligibility period.

(b) The restricted period shall not exceed three consecutive months. If the Authority has not received a complete CER at the end of three months, the client is no longer eligible for benefits and the client will be notified in accordance with OAR 333-022-1090.

(3) Ending restriction:

(a) Six full months of unrestricted benefits shall be approved if the Authority receives a complete CER before the end of the restricted period and determines the client eligible.

(b) The effective date for full benefits shall be the date of receipt of the complete CER.

(4) The Authority shall notify a client of the restricted status. The notice must comply with ORS 183.415 and explain:

(a) How long the restriction is in effect;

(b) How the client can come into compliance and have the restriction lifted; and

(c) The consequences of not coming into compliance within the specified time period.

(5) If a client is placed on restricted status the Authority may only provide the following benefits to the client:

(a) Payment of insurance premiums; and

(b) Payment of medications that treat HIV, viral hepatitis and opportunistic infections, as those are described in the CAREAssist restricted formulary, available on the CAREAssist website.

(6) Restricted clients are ineligible for assistance with the cost of:

(a) Prescriptions not listed on the Restricted Formulary; and

(b) All medical services, even when that service continues to be paid by the client's primary insurance.

(7) Restricted clients are required to recertify, as indicated in OAR 333-022-1090.

333-022-1130
Incarcerated Applicants or Clients

(1) A CAREAssist client who is incarcerated in a state or federal correctional institution is ineligible for CAREAssist and shall be terminated from the program in accordance with OAR 333-022-1160.

(2) A CAREAssist client who is incarcerated in a city or county correctional facility may remain enrolled in the program for up to 60 days from the first day of incarceration as long as:

(a) The client's primary insurance coverage is maintained and active; and

(b) The client completes recertification in accordance with OAR 333-022-1090 as scheduled.

(3) At the Authority's discretion, incarcerated clients, as described in section (2) may continue to receive CAREAssist benefits for an additional 30 days if the client is expected to be released within those additional 30 days.

(4) Pre-release application to CAREAssist. The Authority may accept an application and determine eligibility for an individual who is incarcerated but is expected to be released within 30 days of submitting the application.

333-022-1140
Bridge Program

(1) The Bridge Program provides limited benefits to an individual whose medical provider has applied for the program on the patient's behalf. The program provides payment for basic services and medications for an individual who is in the process of applying for CAREAssist and insurance.

(2) Bridge Program eligibility. In order to be eligible for the Bridge Program an individual must:

(a) Be HIV positive or have AIDS;

(b) Reside in Oregon;

(c) Have income at or below 500 percent of the FPL;

(d) Be in the process of applying for long-term medication assistance programs such as Medicaid, Medicare, or applying to CAREAssist; and

(e) Have not previously received Bridge Program benefits or have not been terminated from the CAREAssist program within the past 365 days.

(3) To apply for Bridge Program benefits a patient's medical provider must, on behalf of the patient, submit a form prescribed by the Authority and sign the form attesting that the individual is HIV positive or has AIDS. If the health care provider is licensed outside of Oregon, the Authority may request a copy of the applicant's most current laboratory results.

(4) The Authority must notify an applicant whether the patient's application has been approved or denied, in accordance with ORS 183.415.

(5) An individual enrolled in the Bridge Program is not guaranteed to be determined eligible for CAREAssist benefits.

(6) The Bridge Program benefits include:

(a) Assistance with the cost of a 30-day supply of prescription drugs listed on the CAREAssist formulary and designated as available to Bridge Program participants, only if dispensed by a CAREAssist contract in-network pharmacy.

(b) Payment of the costs of medical services and laboratory tests as defined by the list of approved Current Procedural Terminology (CPT) codes noted on the Bridge Program instructions and application forms.

(7) The Authority may only pay for an individual's medical visits or laboratory tests for dates of service that are on or after the individual's enrollment in the Bridge Program.

(8) Individuals enrolled in the Bridge Program must actively participate with an assigned CAREAssist caseworker to assure progress toward a sustainable means of medication access. Failure to do so may result in cancellation of enrollment. At a minimum, the client is expected to submit a full application for ongoing assistance with CAREAssist within the 30 days of Bridge Program enrollment.

(9) The Bridge Program is not available to an individual who has primary health insurance coverage.

333-022-1145
Uninsured Persons Program

(1) The Uninsured Persons Program (UPP) provides full-cost coverage for a limited number of medications and medical services for clients who are ineligible for insurance.

(2) In order to be eligible for UPP an individual must:

(a) Meet all eligibility requirements outlined in OAR 333-022-1020; and

(b) Be ineligible for public and private insurance that meets minimum essential coverage under the federal Affordable Care Act, Public Law 111–148; and

(c) Be enrolled in Ryan White community-based HIV Case Management Services.

(3) To apply for UPP an individual must comply with OAR 333-022-1030 and an application shall be reviewed by the Authority in accordance with OAR 333-022-1040, as applicable.

(4) If the Authority determines that an applicant is eligible for CAREAssist benefits the applicant shall be notified in writing within 10 business days of the Authority's determination. A client's notification must describe:

(a) The eligibility effective date and end date;

(b) Group number and benefits associated with that group;

(c) A list of CAREAssist in-network pharmacies;

(d) Recertification date and process; and

(e) The repercussions of not recertifying.

(5) UPP eligibility is for six months.

(6) If the Authority determines that an applicant is not eligible for UPP benefits an applicant will be notified in writing in accordance with ORS 183.415.

(7) An applicant who is denied may reapply at any time.

(8) UPP benefits include:

(a) Assistance with the cost of prescription drugs listed on the CAREAssist formulary, when dispensed by a CAREAssist contract in-network pharmacy;

(b) Full-cost laboratory and medical visits performed in an out-patient setting. Coverage is limited to allowable CPT codes, as designated by the program. The program may cover the cost of each allowable CPT code up to four times a year. Any additional coverage requires prior authorization initiated by the client's prescribing physician.

(c) Medication therapy management; and

(d) Tobacco cessation services.

(9) An UPP client must notify the Authority immediately if he or she becomes eligible for insurance or obtains insurance.

333-022-1147
Dental Benefits

(1) The CAREAssist Dental Program provides assistance with out-of-pocket dental expenses related to a specific dental plan or plans identified by the Authority.

(2) Clients are eligible for the CAREAssist Dental Program as long as their primary prescription coverage is not provided by the Oregon Health Plan at the time of application.

(3) The Dental Program provides assistance with the cost of:

(a) The monthly premium on a dental plan identified by the Authority, paid directly to the insurance carrier or benefits administrator.

(b) Out-of-pocket dental expenses for services approved by the identified plan. The plan must cover a portion of the specific procedure before CAREAssist assumes any financial cost.

(4) The Dental Program cannot provide assistance with the cost of:

(a) Out-of-pocket dental expenses related to any dental plan other than the plan or plans specified by the Authority.

(b) Dental services for which the CAREAssist-sponsored dental plan will not pay, either because the service is disallowed or the client has maximized the annual dental benefit, as determined by the dental plan administrator.

Client Rights

Applicants and clients have the following rights:

(1) To receive CAREAssist services free of discrimination based on race, color, sex, gender, ethnicity, national origin, religion, age, class, sexual orientation, physical or mental ability.

(2) To be informed about services and options available in the CAREAssist programs for which they may be eligible.

(3) To have their CAREAssist records be treated confidentially in accordance with OAR chapter 943, division 14.

(4) To have access to a written grievance process posted on the CAREAssist website.

(5) To receive language assistance services, including access to translation and interpreter services at no cost if the individual has limited English proficiency.

Termination from CAREAssist

(1) The Authority may terminate a client or restrict benefits for any of the following:

(a) Failure to continue to meet eligibility requirements;

(b) Submitting false, fraudulent or misleading information to the Authority in order to obtain or retain benefits;

(c) Placement in a custodial institution, such as a state or federal prison, that is legally obligated to provide medical services; or

(d) Failure to notify the Authority of changes in accordance with OAR 333-022-1100.

(2) The Authority must provide a notice of termination to a client in writing in accordance with ORS 183.415.

(3) An individual who is found to have provided false, fraudulent or misleading information to the Authority may not reapply for CAREAssist benefits for six months following the issuance of a final order of termination and may be required to repay the Authority for benefits provided.

HIV Case Management

333-022-2000
Purpose

(1) The Oregon HIV Case Management Program provides case management and supportive services, through Ryan White Part B case management agencies, that include but are not limited to client-centered services that ensure timely and coordinated access to primary medical care, medications, treatment adherence counseling and other support services for HIV-positive individuals.

(2) Case management and supportive services will be available as long as the Oregon Health Authority (Authority) continues to receive Ryan White Program, Part B funds for this purpose.

(3) If insufficient funds are available for case management and supportive services, the Authority may reduce case management services or reduce funding for supportive services.

Stat. Auth.: ORS 413.042, 431.250, 431.830
Stats. Implemented: ORS 431.250, 431.830

333-022-2010
Definitions

(1) "Agency" refers to a contracted provider delivering Ryan White funded services.

(2) "AIDS" means acquired immunodeficiency syndrome.

(3) "Authority" means the Oregon Health Authority.

(4) "Family" means all individuals counted by an agency in determining the individual or client's family size.

(5) "Federal Poverty Level" or "FPL" means the annual poverty income guidelines, published by the United States Department of Health and Human Services.

(6) "Gross monthly income" means income before taxes or other withholdings.

(7) "HIV" means the human immunodeficiency virus, the causative agent of AIDS.

(8) "HIV case management service area" means all Oregon counties except Multnomah, Washington, Clackamas, Columbia and Yamhill.

(9) "Ryan White Program, Part B" means The Ryan White HIV/AIDS Program authorized and funded under Title XXVI of the Public Health Services Act, as amended by the Ryan White HIV/AIDS Treatment Extension Act of 2009 (Public Law 111-87, October 30, 2009).

(10) "Ryan White Part B case management services agency" or "agency" means a contractor of the Authority that is responsible for providing case management services and administering supportive services to individuals living with HIV/AIDS in a specific jurisdiction.

(11) "Supportive services" means financial assistance that can be authorized on behalf of an individual enrolled in Ryan White Part B case management services.

Stat. Auth.: ORS 413.042, 431.250, 431.830

333-022-2020
Eligibility

To be eligible for the HIV Case Management Program an individual must:

(1) Be HIV positive or have AIDS; and

(2) Reside in an agency's jurisdiction within the HIV case management service area, unless another agency agrees to provide services and the Authority authorizes the provision of services by that other agency

Stat. Auth.: ORS 413.042, 431.250, 431.830

Hist.: PH 29-2014, f. 11-10-14, cert. ef. 12-1-14

333-022-2030
Enrollment Process

(1) To enroll in the HIV Case Management Program an individual must go through an intake process with a local Ryan White Part B case management services agency. A list of the agencies may be obtained on the Authority's website at www.healthoregon.org/hiv.

(2) During the intake process an individual must provide information to an agency that enables the agency to verify at least the following:

(a) Identity;

(b) HIV status;

(c) Residency in the HIV case management service area;

(d) Income;

(e) Household member information; and

(f) Health insurance information, if applicable.

(3) Identity may be verified for an individual by providing one of the following:

(a) Oregon Driver License;

(b) Tribal identification (ID);

(c) State of Oregon ID card;

(d) Military ID;

(e) Passport;

(f) Student ID;

(g) Social Security Card;

(h) Citizenship/Naturalization documents;

(i) Student visa;

(j) Oregon Learner's Permit or Temporary License;

(k) Birth certificate; or

(l) Other form of verification determined appropriate by an agency.

(4) HIV/AIDS status must be verified within 30 days of intake by a physician or lab result.

(5) Documents that verify that an individual resides in the HIV case management service area include but are not limited to documents with the client's full legal name and an address, within the service area, that matches the residential address provided during the intake.

(6) Determination and verification of income:

(a) Family size will be determined by counting the individuals related by birth, marriage, adoption, or legally defined dependent relationships who either live in the same household as the individual seeking to enroll in the HIV Case Management Program and for whom that individual is financially responsible, or whom do not live in the same household as the individual but fall within the categories listed in subsections (b), (c) or (d) of this section, including but not limited to:

(A) A legal spouse; or

(B) A child 18 years of age or younger who qualifies as a dependent for tax filing purposes; or

(C) A child age 19 to 26 years of age who takes 12 or more credit hours in a school term, or its equivalent; or

(D) An adult for whom the individual has legal guardianship.

(b) Gross monthly income:

(A) An individual must submit documentation for all family members and from all sources to determine total monthly gross income for a family. Income after taxes or other withholdings may only be used when:

(i) A self-employed individual or the individual's family member files an Internal Revenue Service, Form 1040, Schedule C in which case the agency will allow a 50 percent deduction from gross receipts or sales; or

(ii) An individual or individual's family member has income from rental real estate and provides a copy of the most recent year's IRS Form 1040 (Schedule E). In this case the agency may use the total rental real estate income, as reported on the Schedule E. If the Schedule E shows a loss, the applicant or applicant's family member shall be considered to have no income from this source.

(B) The agency must determine an applicant's income by adding together all sources of family income, and dividing that number by the applicable FPL. The resultant sum is the applicant's percentage of the FPL.

(7) An individual must sign any authorization necessary to permit the agency to exchange information with the individual's health care providers, and any other individual or entity necessary to coordinate care and services.

333-022-2040
Approval or Denial of Enrollment

(1) The agency will make a determination as to whether the individual is eligible for case management services within 30 days of receiving all documentation in accordance with OAR 333-022-2030.

(2) If the agency determines that an individual cannot be enrolled in the HIV Case Management Program an individual will be notified in accordance with ORS 183.415.

(3) An individual who has been denied may reapply at any time.

333-022-2050
Determination of Service Needs

Once enrolled in the HIV Case Management Program, a client must participate in a screening and assessment process with an agency to review his or her needs and resources, for the purpose of developing a plan to address the needs identified. The purpose of this assessment is to identify actions to remove barriers to HIV care and treatment.

Stat. Auth.: ORS 413.042, 431.250, 431.830

Client Rights

Individuals applying for or clients enrolled in the HIV Case Management Program have the following rights:

(1) To receive HIV case management services free of discrimination based on race, color, sex, gender, ethnicity, national origin, religion, age, class, sexual orientation, physical or mental ability.

(2) To be informed about services and options available in the HIV Case Management Program.

(3) To have HIV case management services and other program records maintained confidentially in accordance with OAR chapter 943, division 14.

(4) To have access to a written grievance process provided by the agency.

(5) To receive language assistance services including access to translation and interpretation services, at no cost if the individual or client has limited English proficiency, in order to access HIV case management services.

333-022-2070
Client Responsibilities

A client enrolled in the HIV Case Management Program is expected to:

(1) Participate in screening, assessment, care plan development and implementation activities;

(2) Provide accurate eligibility information at all times;

(3) Inform the case manager of changes in address, phone number, income, family size, legal name change, or health insurance coverage within 15 days;

(4) Make and keep appointments, or cancel or change an appointment within 24 hours of the scheduled time; and

(5) Other responsibilities as designated by the agency.

333-022-2080
Supportive Services

(1) A client enrolled in the HIV Case Management Program may be eligible for supportive services if income is at or below 250 percent of the FPL.

(2) Authorization by an agency of supportive services is discretionary and a decision to provide such services will be based on the following factors:

(a) The agency is funded to provide the services;

(b) The funds are available in the agency budget;

(c) The services are allowable per the contract with the Authority;

(d) No other payer exists to provide the needed services, with the exception of those that qualify for Veteran's Administration or Indian Health Services who may still qualify to receive Ryan White services;

(e) The client is eligible and currently active in the HIV Case Management Program; and

(f) The client's need for the service has been determined by the agency and documented in the client's file.

(3) An agency may authorize supportive services for any of the following:

(a) Emergency financial assistance, per agency budget, including but not limited to assistance with short-term medical costs, food, utilities or housing;

(b) Housing assistance, including but not limited to short-term assistance to support emergency, temporary or transitional housing;

(c) Linguistics services, meaning interpretation and translation services;

(d) Medical nutritional therapy provided by a licensed registered dietitian outside of a primary care visit, including the provision of nutritional supplements;

(e) Oral health care, including but not limited to diagnostic, preventive, and therapeutic services provided by general dental practitioners, dental specialists, dental hygienists and auxiliaries, and other trained primary care providers;

(f) Outpatient substance abuse services, meaning the provision of medical or other treatment or counseling to address substance abuse problems in an outpatient setting, provided by a physician or under the supervision of a physician or other qualified/licensed personnel;

(g) Residential substance abuse services, meaning treatment to address substance abuse problems in a residential health service setting, provided by a physician or under the supervision of a physician or other qualified/licensed personnel;

(h) Home health care services provided in the home by licensed health care workers such as nurses, and the administration of intravenous and aerosolized treatment, parenteral feeding, diagnostic testing, and other medical therapies;

(i) Mental health services meaning psychological and psychiatric treatment and counseling services offered to individuals with a mental illness, conducted in a group or individual setting, and provided by a mental health professional licensed or authorized within the state to render such services;

(j) Medical transportation services necessary to access health care services; or

(k) Other services funded by the Authority.

333-022-2090
Client Enrollment Review

(1) A client must participate with the agency at least every six months in reviewing the client's eligibility and enrollment information for HIV case management services, and at any time the agency deems it necessary within an eligibility period.

(2) An individual who does not provide an agency with the information necessary to verify continued eligibility may not receive supportive services until continued eligibility is documented.

333-022-2100
Incarcerated Applicants or Clients

(1) An individual who is incarcerated may not be enrolled in the HIV Case Management Program and may not continue to be enrolled in the program except as described in section (2) of this rule.

(2) An agency may enroll or continue to provide services to an individual who is incarcerated in order to facilitate an HIV positive inmate's transition from a correctional facility to the community under the following circumstances:

(a) The incarcerated person will be released within 180 days; and

(b) There are no other transitional case management or discharge planning services provided by the correctional facility.

333-022-2110
Termination

(1) A client enrolled in the HIV Case Management Program may be terminated from the program for any of the following:

(a) Failure to continue to meet eligibility requirements;

(b) Placement in a custodial institution for more than 180 days, such as a state or federal prison that is legally obligated to provide medical services;

(c) Cannot be located or is unresponsive to program requests for more than 60 days;

(d) Submitting false, fraudulent or misleading information in order to obtain or retain benefits;

(e) Fraudulent use of supportive services; or

(f) Consistent documented violations of the responsibilities outlined in OAR 333-022-2070.

(2) If an agency proposes to terminate an individual from the program it must notify the individual in writing, and the individual must be informed of their hearing rights per ORS 183.415. An

appeal must be submitted to the local or state authority to arrange t h e hearing.

Oregon Housing Opportunity in Partnership Program

(1) The Oregon Housing Opportunities in Partnership (OHOP) program provides housing services to eligible applicants who have received a medical diagnosis of HIV or AIDS. OHOP assists clients in achieving and maintaining housing stability so as to avoid or reduce homelessness and improve their access to, and engagement in, HIV care and treatment. OHOP is designed to promote client housing stability and act as a bridge to long-term assistance programs, such as Section 8, or to self-sufficiency. Participation in OHOP is voluntary and conditional.

(2) The OHOP program is funded through grants from the U.S. Department of Housing and Urban Development and other funds. OHOP is a needs-based program and not an entitlement program.

(3) The OHOP program is administered and operated in accordance with the OHOP Program Policy and Procedures manual, dated July 1, 2015, adopted and incorporated by reference. The manual may be obtained by visiting www.healthoregon.org/hiv.

DIVISION 23

PRESCRIPTION DRUG MONITORING PROGRAM

333-023-0800
Purpose

The purpose of the Prescription Drug Monitoring Program rules (OAR 333-023-0800 through 333-023-0820) is to define operational processes of a prescription drug monitoring program.

Stat. Auth.: ORS 431.962
Stats. Implemented: ORS 431.962
Hist,: DMAP 6-2011, f. & cert. ef. 5-5-11; Renumbered from 410-121-4000, PH 28-2015, f. 12-29-15, cert. ef. 1-1-16

333-023-0805
Definitions

Unless otherwise stated in OAR 333-023-0800 through 333-023-0820, or the context of OAR 333-023-0800 through 333-023-0820 requires otherwise, the following definitions apply to OAR 333-023-0800 through 333-023-0820:

(1) "Authority" means the Oregon Health Authority.

(2) "Controlled substance" means a prescription drug classified in Schedules II through IV under the Federal Controlled Substances Act, 21 U.S.C. 811 and 812, as modified under ORS 475.035.

(3) "Delegate" means a member of staff of a practitioner or pharmacist who is authorized by the practitioner or pharmacist to access the system on his or her behalf.

(4) "Dispense" and "dispensing" have the meaning given those terms in ORS 689.005.

(5) "Health professional regulatory board" has the meaning given that term in ORS 676.160.

(6) "Pharmacy" has the meaning given that term in ORS 689.005 but does not include a pharmacy in an institution as defined in ORS 179.010.

(7) "Practitioner" has the meaning given that term in ORS 431.960.

(8) "Prescription drug" has the meaning given that term in ORS 689.005.

(9) "System" means the secure electronic system used to monitor reported prescription drug information.

(10) "Unsecure data" means data that is electronic and is not encrypted at the level established by the National Institute of Standards and Technology.

(11) "Vendor" means the private entity under contract with the Authority to operate the system.

Stat. Auth.: ORS 431.962
Stats. Implemented: ORS 431.962 - 431.978 & 431.992
Hist,: DMAP 6-2011, f. & cert. ef. 5-5-11; DMAP 64-2013, f. & cert. ef. 11-19-13; Renumbered from 410-121-4005, PH 28-2015, f. 12-29-15, cert. ef. 1-1-16

333-023-0810
Reporting Requirements

(1) Not later than 72 hours after dispensing a controlled substance a pharmacy shall electronically report to the Authority the following information for prescription drugs dispensed that are classified in schedules II through IV under the federal Controlled Substances Act, 21 U.S.C. 811 and 812, as modified by the State Board of Pharmacy by rule under ORS 475.035:

(a) Patient's full name, address, date of birth, and sex;

(b) Pharmacy Drug Enforcement Administration Registration Number (or other identifying number in lieu of such registration number);

(c) Prescriber name and Drug Enforcement Administration Registration Number (or other identifying number in lieu of such registration number);

(d) Identification of the controlled substance using a national drug code number;

(e) Prescription number;

(f) Date the prescription was written;

(g) Date the drug was dispensed;

(h) Number of metric units dispensed;

(i) Number of days supplied; and

(j) Number of refills authorized by the prescriber and the number of the fill of the prescription.

(2) A pharmacy located outside of the state and licensed by the Oregon Board of Pharmacy shall electronically report the required information for controlled substances dispensed to residents of Oregon.

(3) A pharmacy shall submit data formatted in the American Society for Automation in Pharmacy (ASAP) 2007 version 4 release 1 specification standard.

(4) Data submitted by a pharmacy shall meet criteria prescribed by the Authority before it is uploaded into the system.

(5) A pharmacy shall be responsible for the correction of errors in the submitted data. Corrections shall be submitted no later than one week after the data was submitted.

(6) A pharmacy that has not dispensed any controlled substances during a seven-day reporting period must submit a zero report to the Authority at the end of the reporting period.

(7) A pharmacy that does not dispense any controlled substances or any controlled substances directly to a patient may request a waiver from the Authority for exemption from the reporting requirement. A pharmacy requesting a no reporting waiver shall submit to the Authority a written waiver request form provided by the Authority.

(8) If the Authority approves or denies the no reporting waiver request, the Authority shall provide written notification of approval or denial to the pharmacy. The duration of the waiver shall be two years at which time the pharmacy must reapply.

(9) A pharmacy may request a waiver from the Authority for exemption from the electronic reporting method. A pharmacy requesting an electronic reporting waiver shall submit to the Authority a written waiver request form provided by the Authority that contains the reason for the requested waiver.

(10) The Authority may grant a waiver of the electronic reporting requirement for good cause as determined by the

Authority. Good cause includes financial hardship and not having an automated recordkeeping system.

(a) If the Authority approves the electronic reporting waiver, the Authority shall provide written notification to the pharmacy. The Authority shall determine an alternative reporting method for the pharmacy granted a waiver. The duration of the waiver shall be two years at which time the pharmacy must reapply.

(b) If the Authority denies the electronic reporting waiver, the Authority shall provide written notification to the pharmacy explaining why the request was denied. The Authority may offer alternative suggestions for reporting to facilitate participation in the program.

333-023-0815
Notification to Patients

Using language provided by the Authority, a pharmacy shall notify each patient receiving a controlled substance about the Prescription Drug Monitoring Program before or when the controlled substance is dispensed to the patient. The notification shall include that the prescription will be entered into the system.

Stat. Auth.: ORS 431.962
Stats. Implemented: ORS 431.962

333-023-0820
Information Access

(1) System Access. Only the following individuals or entities may access the system:

(a) Practitioners and pharmacists authorized to prescribe or dispense controlled substances;

(b) Delegates;

(c) Designated representatives of the Authority and any vendor contracted to establish or maintain the system; and

(d) State Medical Examiner and designees of the State Medical Examiner.

(2) All entities or individuals who request access from the Authority for the creation of user accounts shall agree to terms and conditions of use of the system.

(3) All delegates must be authorized by a practitioner or pharmacist with an active system account.

(4) The Authority shall monitor the system for unusual and potentially unauthorized use. When such use is detected, the user account shall be immediately deactivated.

(5) The vendor, a practitioner, a pharmacist or a pharmacy shall report to the Authority within 24 hours any suspected breach of the system or unauthorized access.

(6) When the Authority is informed of any suspected breach of the system or unauthorized access, the Authority shall notify the Authority's Information Security Office and investigate.

(7) If patient data is determined to have been breached or accessed without proper authorization, the Authority shall notify all affected patients, the Attorney General, and the applicable health professional regulatory board as soon as possible but no later than 30 days from the date of the final determination that a breach or unauthorized access occurred. Notice shall be made by first class mail to a patient or a patient's next of kin if the patient is deceased. The notice shall include:

(a) The date the breach or unauthorized access was discovered and the date the Authority believes the breach or unauthorized access occurred;

(b) The data that was breached or accessed without proper authorization;

(c) Steps the individual can take to protect him or herself from identity or medical identity theft;

(d) Mitigation steps taken by the Authority; and

(e) Steps the Authority will take to reasonably ensure such a breach does not occur in the future.

(8) Practitioner, Pharmacist, and Delegate Access. A practitioner, pharmacist, or delegate who chooses to request access to the system shall apply for a user account as follows:

(a) Complete and submit an application provided by the Authority that includes identifying information and credentials;

(b) Agree to terms and conditions of use of the system that defines the limits of access, allowable use of patient information, and penalties for misuse of the system; and

(c) Mail to the Authority a notarized application.

(9) State Medical Examiner Access. The State Medical Examiner or his or her designee shall apply for a user account as required in section (8) of this rule and indicate their license type as Medical Examiner.

(10) The Authority shall compare the licensure requirements between Oregon practitioners and similarly licensed professionals in California, Idaho, and Washington. The Authority's determination of similar licensure requirements shall be based upon scope of practice and formulary.

(11) The Authority shall review each application to authenticate before granting approval of a new account.

(12) If the Authority learns that an applicant has provided inaccurate or false information on an application, the Authority shall deny access to the system or terminate access to the system if access has already been established. The Authority may send written notification to the appropriate health professional regulatory board or oversight entity.

(13) A practitioner or pharmacist who is an authorized system user shall notify the Authority when his or her license or DEA registration has been limited, revoked, or voluntarily retired. A practitioner or pharmacist who changes or terminates employment shall notify the Authority of that change.

(14) When the Authority learns that a practitioner or pharmacist's license has been limited or revoked, the Authority shall deny further access to the system.

(15) When a delegate for any reason is no longer authorized as a delegate by a practitioner or pharmacist, the practitioner or pharmacist shall revoke the delegation and notify the Authority.

(16) When the account of a delegate is inactive for more than six months, the account shall be deactivated by the Authority.

(17) When for any reason access of a designee of the State Medical Examiner must be revoked, the State Medical Examiner shall notify the Authority.

(18) Each time a practitioner or pharmacist makes a patient query he or she shall certify that requests are in connection with the treatment of a patient in his or her care and agree to terms and conditions of use of the system.

(19) Each time the State Medical Examiner or designee of the State Medical Examiner makes a patient query he or she shall certify that requests are for the purpose of conducting a specific medicolegal investigation or autopsy where there is reason to believe controlled substances contributed to the death and agree to terms and conditions of use of the system.

(20) Each time a delegate makes a patient query he or she shall certify that requests are in connection with the treatment of a patient of the practitioner or pharmacist for whom the delegate is conducting the query, agree to terms and conditions of use, and indicate the authorizing practitioner or pharmacist for whom the delegate is conducting the query.

(21) Practitioners and pharmacists with delegates must conduct monthly audits of delegate use to monitor for potential misuse of the system.

(22) When a practitioner or pharmacist learns of any potential unauthorized use of the system or system data by a delegate, the practitioner or pharmacist shall:

(a) Revoke the delegation; and

(b) Notify the Authority of the potential unauthorized use.

(23) When the State Medical Examiner learns of any potential unauthorized use of the system or system data by a designee, the State Medical Examiner shall notify the Authority.

(24) When the Authority learns of any potential unauthorized use of the system or system data, the Authority shall revoke the

user's access to the system, notify the Authority's Information Security Office, and investigate.

(a) If the Authority determines unauthorized use occurred, the Authority shall send written notification to the appropriate health professional regulatory board, the Attorney General and all affected individuals.

(b) If the Authority determines unauthorized use did not occur, the Authority shall reinstate access to the system.

(25) The Authority shall send written notification to a user or a potential user when an account has been deactivated or access has been denied.

(26) Patient Access. A patient may request a report of the patient's own controlled substance record. The patient shall mail to the Authority a request that contains the following documents:

(a) A signed and dated patient request form provided by the Authority; and

(b) A copy of the patient's current valid U.S. driver's license or other valid government issued photo identification.

(27) The Authority shall review the personal information submitted and verify that the patient's identification and request match before taking further action.

(28) If the Authority cannot verify the information, the Authority shall send written notification to the patient explaining why the request cannot be processed.

(29) After the Authority has verified the request, the Authority shall query the system based upon the patient information provided in the request and securely send the report to the patient at no cost to the patient. The report shall include:

(a) A list of controlled substances dispensed to the patient including the dates of dispensation, the practitioners who prescribed the controlled substances, and the pharmacies that dispensed them; and

(b) A list of users who accessed the system for information on that specific patient with the date of each instance of access.

(30) If no data is found that matches the patient identified in the request, the Authority shall send written notification to the patient explaining possible reasons why no patient data was identified.

(31) A patient may send written notification to the Authority if he or she believes unauthorized access to his or her information has occurred. The notification shall include the patient's name, who is suspected to have gained unauthorized access to the patient's information, what information is suspected to have been accessed by unauthorized use, when the suspected unauthorized access occurred, and why the patient suspects the access was unauthorized. The Authority shall treat such patient notifications as potential unauthorized use of the system.

(32) A patient may request that the Authority correct information in a patient record report as follows:

(a) The patient shall specify in writing to the Authority what information in the report the patient considers incorrect.

(b) When the Authority receives a request to correct a patient's information in the system, the Authority shall make a note in the system that the information is contested and verify the accuracy of the system data with the vendor. The vendor shall verify that the data obtained from the query is the same data received from the pharmacy.

(c) If the data is verified incorrect, the Authority shall correct the errors in consultation with the vendor and document the correction. The Authority shall send to the patient the corrected report.

(d) If the vendor verifies the data is correct, the Authority shall send written notification informing the patient that the request for correction is denied. The notice shall inform the patient of his or her rights as are applicable to the prescription drug monitoring program, the process for filing an appeal, and if there are no appeal rights, how to otherwise address or resolve the issue.

(33) The Authority shall respond to all patient requests within 10 business days after the Authority receives a request. Each response shall include information that informs the patient of his or her rights as are applicable to the prescription drug monitoring program.

(34) If the Authority denies a patient's request to correct information, or fails to grant a patient's request within 10 business days after the Authority receives the request, a patient may appeal the denial or failure by requesting a contested case hearing. The appeal shall be filed within 30 days after the request to correct information is denied. The appeal process is conducted pursuant to ORS Chapter 183 and the Attorney General's Uniform and Model Rules of Procedure for the Office of Administrative Hearings (OAH), OAR 137-003-0501 through 137-003-0700.

(35) Law Enforcement Access. A federal, state, or local law enforcement agency engaged in an authorized drug-related investigation of an individual may request from the Authority controlled substance information pertaining to the individual to whom the information pertains. The request shall be pursuant to a valid court order based on probable cause.

(36) A law enforcement agency shall submit to the Authority a request that contains the following:

(a) A form provided by the Authority specifying the information requested; and

(b) A copy of the court order documents.

(37) The Authority shall review the law enforcement request.

(a) If the form is complete and the court order is valid, the Authority shall query the system for the requested information and securely provide a report to the law enforcement agency.

(b) If the request or court order is not valid, the Authority shall respond to the law enforcement agency providing an explanation for the denial.

(38) Health Professional Regulatory Board Access. A health professional regulatory board investigating an individual regulated by the board may request from the Authority controlled substance information pertaining to the member.

(a) A health professional regulatory board shall submit to the Authority a form provided by the Authority specifying the information requested. The board's executive director shall certify that the requested information is necessary for an investigation related to licensure, renewal, or disciplinary action involving the applicant, licensee, or registrant to whom the requested information pertains.

(b) The Authority shall review the regulatory board request.

(A) If a request is valid, the Authority shall query the system for the requested information and securely provide a report to the health professional regulatory board.

(B) If a request is not valid, the Authority shall respond to the health professional regulatory board providing an explanation for the denial.

(39) Researcher Access. The Authority may provide de-identified data for research purposes to a researcher. A researcher shall submit a research data request form provided by the Authority.

(a) The request shall include but is not limited to a thorough description of the study aims, data use, data storage, data destruction, and publishing guidelines.

(b) The Authority shall approve or deny research data requests based on application merit.

(c) If a request is approved, the requestor shall sign a data use agreement provided by the Authority.

(d) The Authority shall provide the minimum data set necessary that does not identify individuals.

(e) The Authority may charge researchers a reasonable fee for services involved in data access.

DIVISION 24

CLINICAL LABORATORIES

333-024-0005
Purpose

These rules (OAR 333-024-0005 through 333-024-0055 and 333-024-0260 and 333-024-0265) are for the purpose of carrying out ORS Chapter 438, the declarative purpose of which is to insure

the quality of medical laboratory work in order to protect the health and welfare of the people of the State of Oregon by establishing a regulatory program for clinical laboratories.

Stat. Auth.: ORS 438.450
Stats. Implemented: ORS 438.030 & 438.450
Hist.: HB 248, f. 6-30-70, ef. 7-25-70; HD 28-1988, f. & cert. ef. 12-7-88

333-024-0010
Definitions

(1) "Accredited college or university" as used in the Act and OAR 333-024-0021 means the accreditation by a nationally recognized accrediting agency or association as determined by the U.S. Commissioner of Education.

(2) "Approved accreditation organization" for laboratories means a private, nonprofit association that has formally received the Health Care Financing Administration's approval.

(3) "Accreditation" means a certificate obtained from a nonprofit organization that has met the standards as established by the Health Care Financing Administration and approved by the Division.

(4) "Clinical laboratory" or "laboratory" means a facility where the microbiological, serological, toxicological, chemical, hematological, immunological, immunohematological, cytological, pathological, histological, cytogenetical, or other examinations are performed on materials derived from the human body, for the purpose of diagnosis, prevention of disease or treatment of patients by physicians, dentists and other persons who are authorized by license to diagnose or treat humans.

(5) "CLIA 88" means the **Clinical Laboratory Improvement Amendments of 1988** including the rules that implement the law as published in **Section 42 Code of Federal Regulations**, **Part 493**, **Laboratory Requirements**, February 28, 1992 and January 19, 1993 as amended and revised.

(6) "Clinical laboratory specialty" or "laboratory specialty" means the examination of materials derived from the human body for the purpose of diagnosis and treatment of patients, or assessment of health, employing one of the following sciences: microbiology, chemistry, diagnostic immunology, toxicology, cytogenetics, hematology, immunohematology, histocompatibility, cytology, histopathology, or oral pathology.

(7) "Clinician" means a nurse practitioner licensed and certified by the Oregon State Board of Nursing, or a physician assistant licensed by the Board of Medical Examiners for the State of Oregon.

(8) "Dentist" means a person licensed to practice dentistry by the Oregon Board of Dentistry.

(9) "Director of clinical laboratory" or "Director" means the person who plans, organizes, directs and participates in any or all of the technical operations of a clinical laboratory, including but not limited to reviewing laboratory procedures and their results, training and supervising laboratory personnel, and evaluating the technical competency of such personnel.

(10) "Division" means the Public Health Division of the Oregon Health Authority.

(11) "Health Screen Testing" means tests performed for the purpose of identifying health risks, providing health information and referring the person being tested to medical care.

(12) "High complexity laboratory" means a facility that performs testing classified as highly complex in the specialties of microbiology, chemistry, hematology, diagnostic immunology, immunohematology, clinical cytogenetics, cytology, histopathology, oral pathology, radiobioassay and histocompatibility and may also perform moderate complexity tests, physician performed microscopy procedures and waived tests.

(13) "High complexity test" means a procedure performed on materials derived from the human body that meet the criteria for this category of testing in the specialties of microbiology, chemistry, hematology, immunohematology, diagnostic immunology, clinical cytogenetics, cytology, histopathology, oral pathology, radiobioassay and histocompatibility as established by the Health Care Financing Administration and the Centers for Disease Control and Prevention.

(14) "Laboratory evaluation system" means a system of testing clinical laboratory methods, procedures and proficiency by periodic performance and reporting on test specimens submitted for examination.

(15) "Moderate complexity laboratory" means a facility that performs testing classified as moderately complex in the specialties of microbiology, hematology, chemistry, immunohematology or diagnostic immunology and may also perform any physician performed microscopy procedure and waived test.

(16) "Moderate complexity test" means a procedure performed on materials derived from the human body that meet the criteria for this category of testing in the specialties of microbiology, hematology, chemistry, immunohematology or diagnostic immunology as established by the Health Care Financing Administration and the Centers for Disease Control and Prevention.

(17) "Owner of a clinical laboratory" means the individual(s), corporation, association, firm, partnership, joint stock companies, or a county, state or municipality owning and operating a clinical laboratory.

(18) "Pertinent clinical laboratory experience" or "pertinent experience" as used in the Act and OAR 333-024-0021 and 333-024-0022 means laboratory experience gained in a clinical laboratory performing or supervising the same types of laboratory tests as those in common use for the specific specialty involved.

(19) "Physician" means a person licensed to practice medicine by the Board of Medical Examiners for the State of Oregon.

(20) "Physician performed microscopy procedure" means a test as defined in OAR 333-024-0016(1)(b) which is personally performed by a physician or other clinician during a patient's visit on a specimen obtained during the examination of the patient.

(21) "Specimen" means materials derived from a human being or body.

(22) "The Act" as used in OAR 333-024-0005 through 333-024-0055 and 333-024-0260 and 333-024-0265 means Oregon Revised Statutes, Chapter 438.

(23) "Waived laboratory" means a facility that performs only tests as defined in OAR 333-024-0016(1)(a) that are so simple and accurate as to render the likelihood of erroneous results negligible.

(24) "Waived test" means tests that are so simple and accurate as to render the likelihood of erroneous results negligible, or tests which are categorized as waived for CLIA laboratories, by the Health Care Financing Administration and Centers for Disease Control and Prevention.

333-024-0012
Licensure

(1) It shall be unlawful:

(a) For any Owner or Director of a clinical laboratory to operate or maintain a clinical laboratory without a license or without a temporary permit issued under this rule or to perform or permit the performance of any laboratory specialty for which the laboratory is not licensed, unless the laboratory has been issued a valid certificate from the federal government under the **Clinical Laboratory Improvement Amendments of 1988**, **Public Law 100-578**, **42.U.S.C. 201** and **263a**, except as specified herein;

(b) For any person to serve in the capacity of Director of a high complexity clinical laboratory without being qualified as a Clinical Laboratory Director under OAR 333-024-0021;

(c) For any person to serve in the capacity of Director of a moderate complexity clinical laboratory without being qualified as a Clinical Laboratory Director under OAR 333-024-0022; and

(d) For any person other than a physician or clinician to direct or perform microscopic procedures listed in OAR 333-024-0016(1)(b) in a Physician Performed Microscopy Laboratory.

(2) OAR 333-024-0005 through 333-024-0055 and 333-024-0260 and 333-024-0265 apply to all clinical laboratories and laboratory personnel within the State of Oregon, except:

(a) Clinical laboratories operated by the United States Government;

(b) Clinical laboratories operated and maintained purely for research or teaching purposes, and that involve no patient or public health services.

(3) It shall be unlawful for an out-of-state laboratory to perform health screen testing in Oregon without a permit issued as provided in OAR 333-024-0380.

(4) The Division shall issue and renew waived, physician performed microscopy, moderate and high complexity licenses for any or all clinical laboratory specialties to the Owners of clinical laboratories who demonstrate to the satisfaction of the Division that:

(a) The clinical laboratory is in compliance with OAR 333-024-0005 through 333-024-0055, 333-024-0260, 333-024-0265, 333-024-0305 through 333-024-0360 and 333-024-0370 through 333-024-0400;

(b) The laboratory is equipped to perform within the scope of its license;

(c) The clinical laboratory retains complete laboratory records as stated in OAR 333-024-0050;

(d) The clinical laboratory meets the standards of the Division for safety, disposal of hazardous and infectious waste, ventilation, handling of specimens, and maintenance of equipment to ensure protection of the public health.

(5) Requirements for license application, fees, exemptions, expiration, and renewal are as follows:

(a) The application for a license for a clinical laboratory shall be made on forms provided by the Division and shall be executed by the Owner or one of the Owners or by an officer of the firm or corporation owning the clinical laboratory, or in the case of a county or municipality, by the public official responsible for operation of the laboratory, or in the case of an institution, by the administrator of the institution. The application shall contain the names of the Owner, the Director or Directors of the clinical laboratory, the location and physical description of the clinical laboratory, the laboratory specialties for which a license is requested, and such other information as the Division may require:

(A) Not-for-profit, or state, or local government laboratories that engage in limited public health testing may file a single application, provided they have the same owner and director. They may perform a combined total of fifteen test methods listed in the waived, physician performed microscopy and moderate complexity category.

(B) Laboratories that are located at the same site and are under the same director may file a single application.

(b) Laboratories must pay an annual or biennial, nonrefundable license fee prior to issuance of a license or permit. Numbers in the fee category indicate the number of tests performed annually; count tests on patient/client specimens only. Count the number of tests in each profile. Do not count waived tests, physician-performed microscopy by physicians and clinicians, standards, controls, calculated tests, or proficiency testing samples. Effective July 1, 1999, the annual fees are:

(A) Waived — Accredited and Non-Accredited — $71;

(B) Physician Performed Microscopy (PPM) — Accredited and Non-Accredited — $95;

(C) Non-Accredited Moderate and High Complexity:

(i) Low Volume A (LVA) 1–2,000 tests — $261;

(ii) A — 2,001 to 10,000 tests; ≤ 3 specialties — $517;

(iii) B — 2,001 to 10,000 tests; ≥ 4 specialties — $650;

(iv) C — 10,001 to 25,000 tests; ≤ 3 specialties — $916;

(v) D — 10,001 to 25,000 tests; ≥ 4 specialties — $1,037;

(vi) E — 25,001 to 50,000 tests — $1,254;

(vii) F — 50,001 to 75,000 tests — $1,584;

(viii) G — 75,001 to 100,000 tests — $1,914;

(ix) H — 100,001 to 500,000 tests — $2,263;

(x) I — 500,001 to 1,000,000 tests — $4,365;

(xi) J — > 1,000,000 tests — $5,298.

(D) Accredited Moderate and High Complexity:

(i) Low Volume A (LVA) 1–2,000 tests — $118;

(ii) A — 2,001 to 10,000 tests; ≤ 3 specialties — $138;

(iii) B — 2,001 to 10,000 tests; ≥ 4 specialties — $145;

(iv) C — 10,001 to 25,000 tests; ≤ 3 specialties — $285;

(v) D — 10,001 to 25,000 tests; ≥ 4 specialties — $295;

(vi) E — 25,001 to 50,000 tests — $401;

(vii) F — 50,001 to 75,000 tests — $620;

(viii) G — 75,001 to 100,000 tests — $840;

(ix) H — 100,001 to 500,000 tests — $1,078;

(x) I — 500,001 to 1,000,000 tests — $3,070;

(xi) J — > 1,000,000 tests — $3,893.

(c) Laboratories must pay an annual or biennial, nonrefundable license fee prior to issuance of a license or permit. Numbers in the fee category indicate the number of tests performed annually; count tests on patient/client specimens only. Count the number of tests in each profile. Do not count waived tests, physician-performed microscopy by physicians and clinicians, standards, controls, calculated tests, or proficiency testing samples. Effective July 1, 2000, the annual fees are:

(A) Waived — Accredited and Non-Accredited — $75;

(B) Physician Performed Microscopy (PPM) — Accredited and Non-Accredited — $100;

(C) Non-Accredited Moderate and High Complexity:

(i) Low Volume A (LVA) 1–2,000 tests — $275;

(ii) A — 2,001 to 10,000 tests; ≤ 3 specialties — $545;

(iii) B — 2,001 to 10,000 tests; ≥ 4 specialties — $685;

(iv) C — 10,001 to 25,000 tests; ≤ 3 specialties — $965;

(v) D — 10,001 to 25,000 tests; ≥ 4 specialties — $1,092;

(vi) E — 25,001 to 50,000 tests — $1,320;

(vii) F — 50,001 to 75,000 tests — $1,667;

(viii) G — 75,001 to 100,000 tests — $2,015;

(ix) H — 100,001 to 500,000 tests — $2,382;

(x) I — 500,001 to 1,000,000 tests — $4,595;

(xi) J — > 1,000,000 tests — $5,577.

(D) Accredited Moderate and High Complexity:

(i) Low Volume A (LVA) 1–2,000 tests — $125;

(ii) A — 2,001 to 10,000 tests; ≤ 3 specialties — $146;

(iii) B — 2,001 to 10,000 tests; ≥ 4 specialties — $153;

(iv) C — 10,001 to 25,000 tests; ≤ 3 specialties — $300;

(v) D — 10,001 to 25,000 tests; ≥ 4 specialties — $311;

(vi) E — 25,001 to 50,000 tests — $422;

(vii) F — 50,001 to 75,000 tests — $653;

(viii) G — 75,001 to 100,000 tests — $884;

(ix) H — 100,001 to 500,000 tests — $1,136;

(x) I — 500,001 to 1,000,000 tests — $3,232;

(xi) J — > 1,000,000 tests — $4,098.

(d) A prorated fee may be assessed for a license that will be in effect for a year or less;

(e) Unless sooner voided, suspended or revoked, all licenses issued under this section expire on June 30 of the one or two year cycle following the date of issuance and shall be renewable in the manner prescribed by the Division;

(f) All monies received by the Division for the licensure of clinical laboratories shall be credited to the Division account and shall be used for payment of the expenses of the Division in administering OAR 333-024-0005 through 333-024-0055 and 333-024-0260 and 333-024-0265.

(6) A license issued to the Owner of a clinical laboratory shall show on its face the names of the Owners and Directors, the location of the laboratory and the clinical laboratory specialties authorized under the license. The license shall be displayed at all times in a prominent place in the laboratory.

(7) A license issued to the Owner of a clinical laboratory is not transferable. The license of the laboratory is voided 30 days after a change of its Director if it has only one Director or if all Directors change or a change in the ownership or in the location of the laboratory. Upon the death of a laboratory's Director and the immediate notification to the Division, the Division shall be empowered to issue, after the payment of the proper fee, a special temporary permit. This permit shall be of 30 days' duration and issued to an approved substitute Director. If a license is voided or a special temporary permit is issued under this rule, a new license application,

accompanied by the non-refundable license fee prescribed in subsection (4)(b) of this rule shall be filed with the Division.

(8) Temporary permit requirements are as follow:

(a) In addition to the license of a clinical laboratory required by this rule, the Division may issue a temporary permit, valid for 45 days from the date of issuance, in any or all clinical laboratory specialties upon payment of the respective required fees as prescribed in subsection (5)(b) or (5)(c) of this rule;

(b) In issuing the temporary permit, the Division may require that:

(A) Plans for compliance with applicable laws and rules be submitted with the application for temporary permit;

(B) During the period in which the temporary permit is in effect, periodic reports be submitted on the progress of the plans for compliance; and

(C) Temporary provisions specified by the Division upon application of the temporary permit be maintained for the protection of the public.

(c) If at any time the Division determines that the clinical laboratory can no longer operate in a manner which protects the public health and safety or that the requirements imposed under paragraphs (7)(b)(A), (B) and (C) of this rule are not being maintained, the Division shall cancel the temporary permit;

(d) One renewal of the temporary permit may be granted if deemed to be in the best interest of public health by the Division. The fee for renewal is the respective required fee as prescribed in subsection (4)(b) of this rule.

(9) Subject to ORS 183.310 to 183.550, the Division may refuse to issue or renew the license or may suspend or revoke the license of any clinical laboratory, if it finds that the Owner or Director has:

(a) Intentionally made false statements on an application for a clinical laboratory license or any other documents required by the Division, or made any misrepresentation in seeking to obtain or retain a license;

(b) Demonstrated incompetence as defined in OAR 333-024-0055;

(c) Intentionally falsified any report;

(d) Referred a specimen for examination to an unlicensed clinical laboratory in this State unless the laboratory is exempt from the application of this rule, or a clinical laboratory not certified or accredited under the provisions of CLIA 88, or other authorized CLIA exempt state laboratory certification program;

(e) Misrepresented the scope of laboratory service offered by the clinical laboratory or the clinical laboratory specialties authorized by the license;

(f) Rendered a report on clinical laboratory work actually performed in another clinical laboratory without designating the name and address of the clinical laboratory in which the test was performed;

(g) Knowingly had professional connection with or permitted the use of the name of the licensed clinical laboratory or its Director by a clinical laboratory that is required to but has not obtained a license;

(h) Failed to perform or cause to be performed within the time specified analysis of test samples as stated in OAR 333-024-0040(1) or failed to report on the results of such analysis within the specified time;

(i) Failed to permit within a reasonable time the entry or inspection as stated in OAR 333-024-0040(4), (6), (7), (9), (10), (11) and (12);

(j) Failed to continue to meet requirements of this rule, inclusive;

(k) Violated any provision of OAR 333-024-0005 through 333-024-0055 and 333-024-0260 and 333-024-0265.

(10) The owner or director must notify the Division within 30 days of a change of laboratory name and technical supervisor.

333-024-0016
Licensure Categories

(1) The four categories of clinical laboratories are:

(a) A waived laboratory which may perform only the following; dipstick or tablet reagent urinalysis (nonautomated), fecal occult blood, ovulation test-visual color comparison tests for human luteinizing hormone, urine pregnancy test-visual color comparison tests, erythrocyte sedimentation rate (nonautomated), hemoglobin-copper sulfate (nonautomated), blood glucose (by glucose monitoring devices cleared by the Food and Drug Administration specifically for home use), spun microhematocrit, and hemoglobin and glucose by Hemocue, Chemtrak Accumeter cholesterol, body fluid occult blood, nitrazine pH paper for all body fluids except blood or any other tests which are categorized as waived for CLIA laboratories, by the Health Care Financing Administration and Centers for Disease Control and Prevention:

(A) A waived laboratory is exempt from personnel requirements, proficiency testing and routine on-site inspections;

(B) A waived laboratory shall follow manufacturer's instructions for test performance:

(b) A physician performed microscopy procedure laboratory which may perform only tests in the waived category and the following: wet mounts (for presence or absence of bacteria, fungi, parasites and human cellular elements), all potassium hydroxide (KOH) preparations, pinworm examinations, fern tests, post-coital direct examinations of vaginal or cervical mucus, nasal smears for granulocytes, qualitative post-vasectomy semen analysis limited to presence or absence of sperm and motility, fecal leukocyte examinations, and urine sediment examinations, or any other tests which are categorized as provider-performed microscopy procedures for CLIA laboratories, by the Health Care Financing Administration and Centers for Disease Control and Prevention:

(A) A physician performed microscopy laboratory is exempt from routine on-site inspections;

(B) A physician performed microscopy laboratory shall follow manufacturer's instructions for test performance;

(C) A physician performed microscopy laboratory shall meet the applicable requirements for quality control, proficiency testing, quality assurance, records and reports.

(c) A moderate complexity laboratory which may perform waived, physician performed microscopy procedures, and tests identified as moderate complexity by the Health Care Financing Administration and the Centers for Disease Control and Prevention;

(d) A high complexity laboratory which may perform all categories of testing including the specialties of cytogenetics, cytology, pathology, histocompatibility and radiobioassay.

(2) Any test not listed in the waived, physician performed microscopy procedures or moderate complexity category is high complexity.

(3) The category of any test may be obtained from the Division.

333-024-0020
Licensure for Performance of Laboratory Specialties

(1) Licensure for the performance of surgical pathology, autopsy pathology, exfoliative cytology, and immunohematology (except as provided in section (4) of this rule) shall be granted only to a laboratory whose Director is a physician or dentist specifically qualified in these fields.

(2) A clinical laboratory testing for substances of abuse shall be licensed under ORS 438.435(4) and comply with OAR 333-024-0305 through 333-024-0350, except when performing tests for the purpose of diagnosis, prevention of disease or treatment of patients by physicians, dentists and other persons who are authorized by license to diagnose or treat humans.

(3) Licensure for the performance of substances of abuse testing in clinical laboratories shall be granted only to a laboratory whose Director qualifies under OAR 333-024-0320(1).

333-024-0021
Qualifications and Responsibilities of Directors for High Complexity Laboratories

(1) The Director shall meet at least one of the qualifications defined by the following:

(a) Is a pathologist certified in clinical or anatomical pathology by the American Board of Pathology, the American Osteopathic Board of Pathology, or is eligible for such certification (Board eligible);

(b) Is certified or board eligible by the American Board of Oral Pathology. An oral pathologist shall only direct an oral pathology laboratory;

(c) Is a physician who:

(A) Is eligible for certification by the American Board of Medical Microbiology, the American Board of Clinical Chemistry, the American Society of Cytology, the American Board of Dermatology, or other national accrediting board related to a laboratory specialty as may be approved by the Division; and

(B) Has had two or more years of general laboratory training and experience.

(d) Has an earned degree of Doctor of Science, Doctor of Public Health, or Doctor of Philosophy or an acceptable degree, as determined by the Division, from an accredited college or university with a major in the chemical, physical, or biological sciences and possesses special qualifications as follows: is certified or is eligible for certification by the American Board of Medical Microbiology, American Board of Bioanalysis, the American Board of Clinical Chemistry, or other national accrediting board related to a laboratory specialty or possesses other special qualifications as approved by the Division; and has one or more years experience supervising high complexity testing;

(e) Was responsible for the direction of a clinical laboratory for at least 12 months within the five years preceding January 1, 1970, and has had at least two years of pertinent clinical laboratory experience as determined by the Division;

(f) Was serving as a laboratory director in Oregon and either previously qualified or could have qualified as a laboratory director in Oregon on or before February 28, 1992, and is a doctor of medicine, doctor of osteopathy or doctor of podiatric medicine, and has two or more years of general laboratory training or experience;

(g) Was qualified as a clinical laboratory director under federal regulations prior to February 28, 1992.

(2) A person is qualified to act as the laboratory Director of the clinical laboratory only at any accredited chiropractic college in this State for the benefit of chiropractic patients if that person is a chiropractic physician licensed by the State Board of Chiropractic Examiners, and possesses special qualifications, as determined by the State Board of Chiropractic Examiners, which enable that person to perform as a laboratory Director.

(3) The Director shall supervise or perform only in those specialties for which qualified.

(4) The Director is responsible for the overall operation and administration of the laboratory, including the employment of competent personnel, equipment, safety, quality assurance, all testing (including proficiency testing) and test reports.

(a) The laboratory director may, if qualified, perform the duties of the technical supervisor, clinical consultant, general supervisor, and testing personnel, or delegate these responsibilities in writing to other qualified individuals; and ensure that all duties are properly performed; and must be accessible to provide on site, telephone or electronic consultation;

(b) The laboratory director may direct no more than five laboratories;

(c) The laboratory director must ensure:

(A) Quality services for all aspects of test performance;

(B) Environmental conditions provide a safe testing site;

(C) Test methodologies provide accurate results;

(D) Verification procedures are used to determine the accuracy, precision, and other pertinent performance characteristics of the method;

(E) Laboratory personnel perform only director approved methods;

(F) The laboratory is enrolled in an approved proficiency testing program if required;

(G) The proficiency test samples shall be tested in the same manner as patient specimens, results returned within established time frames, reviewed by the director or designate, and corrective action taken, if necessary.

(H) Quality control and quality assurance programs are established and maintained;

(I) Acceptable levels of analytical performance for each test are established and maintained;

(J) That all necessary remedial actions are taken and documented whenever necessary and patient test results are reported only when the system is functioning properly;

(K) That test results include pertinent information required for interpretation;

(L) That consultation is available to the laboratory's clients, if applicable;

(M) That a general supervisor provides on-site supervision of high complexity test performance by qualified testing personnel;

(N) The employment of a sufficient number of qualified personnel to provide consultation, supervision and accurate test performance and report test results in accordance with their personnel responsibilities;

(O) That policies and procedures are established to monitor the competency of the individuals performing the testing and provide remedial training or education as needed;

(P) That an approved procedure manual is available to all testing personnel; and

(Q) The duties and responsibilities of each consultant, supervisor and each testing personnel are specified in writing; and

(R) All personnel have appropriate training.

333-024-0022
Qualifications and Responsibilities for Director of Moderate Complexity Laboratories

(1) The director shall meet at least one of the qualifications in 333-024-0021 or one of the following:

(a) Is a doctor of medicine, doctor of osteopathy or doctor of podiatric medicine; and

(A) Has one or more years of directing or supervising non-waived laboratory testing; or

(B) Has at least 20 continuing medical education credit hours in laboratory practice; or

(C) Has 1 year of laboratory training in non-waived testing during a residency.

(b) Has earned a master's degree in a chemical, physical, biological or clinical laboratory science or medical technology from an accredited institution; and

(A) Has at least one year of pertinent laboratory training or experience; and

(B) Has at least one year of supervisory laboratory experience in non-waived testing.

(c) Has earned a bachelor's degree in a chemical, physical, or biological science or medical technology from an accredited institution; and

(A) Has at least 2 years of laboratory training or experience, or both in non-waived testing; and

(B) Has at least 2 years of supervisory laboratory experience in non-waived testing.

(2) The laboratory director is responsible for the overall operation and administration of the laboratory, including the employment of competent personnel, equipment, safety, quality assurance, all testing including proficiency testing, and test reports:

(a) The laboratory director may, if qualified, perform the duties of the technical consultant, clinical consultant, and testing personnel or delegate these responsibilities in writing to other qualified individuals; and must ensure that all duties are properly performed, and must be accessible to provide on site, telephone or electronic consultation;

(b) The laboratory director may direct no more than five laboratories;

(c) The director must ensure:

(A) Quality services for aspects of test performance;

(B) Environmental conditions provide a safe testing site;

(C) Test methodologies provide accurate results;

(D) Verification procedures are used to determine the accuracy, precision, and other pertinent performance characteristics of the method;

(E) Laboratory personnel perform only director approved methods;

(F) The laboratory is enrolled in an approved proficiency testing program if required;

(G) The proficiency test samples shall be tested in the same manner as patient specimens, results returned within established time frames, reviewed by the director or designate, and corrective action taken, if necessary;

(H) Quality control and quality assurance programs are established and maintained;

(I) Acceptable levels of analytical performance for each test are established and maintained;

(J) That all necessary remedial actions are taken and documented whenever necessary and patient test results are reported only when the system is functioning properly;

(K) That test results include pertinent information required for interpretation;

(L) That consultation is available to the laboratory's clients, if applicable;

(M) The employment of a sufficient number of qualified personnel to provide consultation, supervision and accurate test performance and report test results in accordance with their personnel responsibilities;

(N) That policies and procedures are established to monitor the competency of the individuals performing the testing and provide remedial training, or education as needed;

(O) That an approved procedure manual is available to all testing personnel;

(P) The duties and responsibilities of each consultant and each testing personnel are specified in writing; and

(Q) All personnel have appropriate training.

333-024-0023
Qualifications and Responsibilities of Consultants, Supervisors and Testing Personnel for Moderate and High Complexity Laboratories

(1) Moderate complexity laboratory technical and clinical consultants shall meet the minimal qualifications and fulfill the responsibilities described in the **Clinical Laboratory Improvement Amendments of 1988, 42 CFR, Part 493, Subpart M**.

(2) High complexity laboratory clinical consultants, general and technical supervisors, and cytology general supervisors shall meet the minimal qualifications and fulfill the responsibilities as described in the **Clinical Laboratory Improvement Amendments of 1988, 42 CFR, Part 493, Subpart M**.

(3) All testing personnel shall meet the minimal qualifications and fulfill the responsibilities as described in the **Clinical Laboratory Improvement Amendments of 1988, 42 CFR, Part 493, Subpart M**.

333-024-0026
Equipment and Facilities

(1) All equipment shall be maintained in good working order, checked routinely, and precisely calibrated according to manufacturer's requirements or a minimum of every six months.

(2) Work bench space shall be ample, clean, well-organized, well-lighted, and convenient to sink, water and electrical outlets.

(3) The laboratory shall be ventilated to protect the health of the personnel and patients against accidental release of hazardous vapors or aerosols.

(4) Laboratory procedure manuals and policies shall be available for the use of the personnel in the laboratory and shall be reviewed by the Director initially and when there is a change in methods or policy.

(5) The premises shall be free from unnecessary physical, chemical, and biological hazards. All materials containing pathogenic organisms shall be:

(a) Autoclaved at 121°C for 30 minutes to ensure nonviability prior to being discarded; or

(b) Incinerated in a State-approved incinerator; or

(c) Disposed using another Division approved method.

(6) Safety precautions must be posted and observed.

(7) Glassware shall be free from excessive scratches and cloudiness and graduations must be legible. "To contain" and "to deliver" pipettes are to be kept separated. Cleanliness of glassware must be adequate for the purpose for which it is used.

(8) Blood-letting lancets, needles, and syringes, if not sterile and disposable, shall be sterilized prior to each use by standard and accepted methods. Each sterilizing cycle shall contain a satisfactory indicating device to assure proper sterilization.

(9) Electrical equipment shall be maintained in a safe condition with regards to shock and fire hazards. All electrical equipment, except battery operated, shall be grounded. Protective fuses shall not be bypassed.

(10) Caustic, explosive, and flammable materials shall carry labels to indicate their nature and shall be placed in containers and stored in locations which are suitable to ensure stability, purity, and safety as is necessary regarding the material involved.

(11) The laboratory shall define, establish and document a function check and maintenance protocol that ensures equipment, instrument, and test system performance necessary for accurate and reliable test results and result reporting.

(12) Requirements for calibration and calibration verification for unmodified moderate complexity test procedures that are performed using instruments, kits, or test systems that have been cleared by the Food and Drug Administration (FDA) through the 510(k) or Premarket Approval (PMA) process:

(a) Until September 1, 1996, the laboratory must meet the requirements in OAR 333-024-0035(1)(e) and (f);

(b) After September 1, 1996, the laboratory must meet the requirements in OAR 333-024-0026(13).

(13) Requirements for calibration and calibration verification for laboratories performing high complexity testing procedures, tests not cleared by the FDA through the 510(k) or PMA process, modified moderate complexity testing:

(a) The laboratory must:

(A) Establish the number, type, and concentration of calibration materials required to assure accurate and reliable test results;

(B) Establish the frequency and acceptable limits for calibration and calibration verification, if not provided by the manufacturer;

(C) Use calibration materials appropriate for the methodology, and if possible, traceable to a reference method or reference material of known value; and

(b) The laboratory must perform and document calibration:

(A) At the frequency required by the manufacturer;

(B) In accordance with criteria established by the laboratory, if more frequent than manufacturer's requirements; and

(C) When calibration verification fails to meet the laboratory's acceptable limits for calibration verification.

(c) The laboratory must perform calibration verification to verify the laboratory's established reportable range for patient test values using calibration or control materials, including at least a minimal value (zero), a mid-point value, and a maximum value at the upper limit of that range:

(A) When a complete change of reagents is introduced;

(B) When there is a major preventative maintenance or replacement of critical parts that may influence test performance;

(C) When controls reflect an unusual trend or shift or are outside the laboratory's acceptable limits and other means of assessing and correcting unacceptable control values have failed to identify and correct the problem;

(D) At least once every six months, unless the laboratory's established schedule for verifying the reportable range for patient test results requires more frequent calibration verification.

(d) Calibration and calibration verification must meet the laboratory's acceptable ranges prior to patient test reporting;

(e) Calibration and calibration verification documentation must be maintained for a minimum of two years.

333-024-0035
Internal Quality Control for Moderate and High Complexity Laboratories

(1) Laboratories that perform testing using unmodified, moderate complexity test systems, cleared by the Food and Drug Administration (FDA) through the 510(k) or Premarket Approval (PMA) process must, until September 1, 1996:

(a) Follow the manufacturer's instructions for test system operation and test performance;

(b) Have a procedure manual as defined in OAR 333-024-0035(4);

(c) Perform and document control procedures using at least two levels of control materials each day of testing;

(d) Perform and document applicable specialty and subspecialty control procedures as specified in OAR 333-024-0037;

(e) Follow the manufacturer's instructions for calibration:

(A) Calibration must be performed at least once every six months, or more frequently if required by manufacturers;

(B) Use calibration materials specified by the manufacturer;

(C) Maintain documentation of all calibration and calibration verification for a minimum of two years. Documentation must define the number, type, concentration of calibration materials, and frequency required;

(f) Perform calibration verification at least every 6 months to verify the laboratory's established reportable range for patient test values using calibration or control materials, including at least a minimal value (zero), a mid-point value, and a maximum value at the upper limit of that range;

(g) Perform and document that remedial action has been taken when problems or errors are identified as specified in OAR 333-024-0035(19); and

(h) Comply with requirements as specified in OAR 333-024-0035(4)–(8), (11)–(13) and (16).

(2) After September 1, 1996, unmodified moderate complexity test systems cleared by the Food and Drug Administration (FDA) through the 510(k) or Premarket Approval (PMA) process, must comply with quality control requirements in OAR 333-024-0035(2)–(22) and 333-024-0037.

(3) After final rule adoption, high complexity testing, methods developed in house, devices not subject to clearance by the FDA through the 510(k) or PMA process, or modified test systems must comply with quality control requirements in OAR 333-024-0035(4) through 333-024-0035(22) and 333-024-0037.

(4) The procedure manual must include, when applicable to the test procedure:

(a) Requirements for specimen collection and processing, and criteria for specimen rejection;

(b) Procedures for microscopic examinations, including the detection of inadequately prepared slides;

(c) Step-by-step performance of the procedure, including test calculations and interpretation of results;

(d) Preparation of slides, solutions, calibrators, controls, reagents, stains and other materials used in testing;

(e) Calibration and calibration verification procedures;

(f) The reportable range for patient test results;

(g) Control procedures;

(h) Remedial action to be taken when calibration or control results fail to meet the laboratory's criteria for acceptability;

(i) Limitations in methodologies, including interfering substances;

(j) Reference range (normal values);

(k) Imminent life-threatening laboratory results or "panic values";

(l) Pertinent literature references;

(m) Appropriate criteria for specimen storage and preservation to ensure specimen integrity until testing is completed;

(n) The laboratory's system for reporting patient results including, when appropriate, the protocol for reporting panic values;

(o) Description of the course of action to be taken in the event that a test system becomes inoperable;

(p) Criteria for the referral of specimens including procedures for specimen submission and handling;

(q) Manufacturers' package inserts or operator manuals may be used. Any of the required items for procedure manuals not provided by the manufacturer must be written by the laboratory;

(r) The laboratory must maintain a copy of each procedure with the dates of initial use and discontinuance. These records must be retained for two years after a procedure has been discontinued; and

(s) Textbooks may be used as a supplement to these written descriptions but may not be used in lieu of the laboratory's written procedures for testing or examining specimens.

(5) Laboratory procedure manuals and relevant texts shall be reviewed, approved and signed by the Director, initially and whenever there is a change in method or policy.

(6) The laboratory must define and document criteria for those conditions that are essential for proper storage of reagents and specimens, accurate and reliable test system operation to include water quality, temperature, humidity, protection of test equipment, test result reporting and remedial action taken to correct any conditions that fail to meet the laboratory's criteria.

(7) Reagents, solutions, culture media, control materials, calibration materials and other supplies, as appropriate, must be labeled to indicate:

(a) Identity and, when significant, titer, strength or concentration;

(b) Recommended storage requirements;

(c) Preparation and expiration date; and

(d) Other pertinent information required for proper use.

(8) Reagents, solutions, culture media, control materials, calibration materials and other supplies must be prepared, stored, and handled in a manner to ensure that:

(a) They are not used when they have exceeded their expiration date, have deteriorated or are of substandard quality; and

(b) Components of reagent kits of different lot numbers are not interchanged unless otherwise specified by the manufacturer.

(9) Prior to reporting patient test results, the laboratory must verify or establish, for each method; accuracy, precision, analytical sensitivity and specificity, the reportable range of patient test results, the reference range (normal values) and any other applicable performance characteristic.

(a) The provisions of this section are not retroactive. Laboratories are not required to verify or establish performance specifications for any test method of moderate or high complexity in use prior to date of final rule adoption;

(b) Each laboratory that introduces a new procedure for patient testing using a device (instrument, kit, or test system) must assure that it meets the requirements for quality control;

(c) The laboratory must have documentation of the verification or establishment of all applicable test performance specifications;

(d) Perform function checks including background or baseline, verifying that they are within established limits and document results;

(e) The manufacturer's reference range for each test is appropriate for the laboratory's patient population.

(10) A laboratory that introduces a new procedure must, prior to reporting patient test results:

(a) Verify or establish for each method the performance specifications for the following performance characteristics:

(A) Accuracy;

(B) Precision;

(C) Analytical sensitivity;

(D) Analytical specificity to include interfering substances;

(E) Reportable range of patient test results;

(F) Reference ranges; and

(G) Any other performance characteristic required for test performance.

(b) Establish calibration and control procedures for the tests as required in OAR 333-024-0026;

(c) Document the verification or establishment of all applicable test performance specifications.

(11) The laboratory must have available written policies and procedures for the preparation of patients, specimen collection, specimen labeling, specimen preservation, conditions for specimen transportation, specimen processing and rejection of unacceptable specimens.

(12) The laboratory must assure the identification and integrity of the patient specimen(s) from collection until testing has been completed and the results reported.

(13) The laboratory must have written instructions for the handling of referral specimens.

(14) For qualitative tests, the laboratory must include a positive and negative control each day of testing, unless the manufacturer's instructions, or the laboratory's method validation indicates the need for more frequent control checks to assure accurate testing.

(15) For quantitative tests, the laboratory must include at least two samples of different concentrations of either calibration materials, control materials, or a combination thereof at least each day of testing, unless the manufacturer's instructions, or the laboratory's method validation indicates the need for more frequent control checks to assure accurate testing.

(16) Limits for controls shall be clearly stated and recorded. The course of action taken when analyses are outside these control limits shall be clearly stated and recorded. The control limits shall be set so that clinically reliable results are assured. Values for standards shall be clearly stated and recorded.

(17) The manufacturer's instructions shall be followed unless there is documentation available showing the changes made, and proof these changes do not adversely affect the reliability of the test result.

(18) All test methods shall meet the following quality control requirements:

(a) The laboratory must follow the manufacturer's instructions for control procedures;

(b) Each day of use, the laboratory must evaluate the detection phase of direct antigen systems using an appropriate positive and negative control material (organism or antigen extract). When direct antigen systems include an extraction phase, the system must be checked each day of use using a positive organism;

(c) If calibration or control materials are not available, the laboratory must have an alternative mechanism to assure the validity of patient test results;

(d) Control samples must be tested in the same manner as patient specimens;

(e) When calibration or control materials are used, statistical parameters (e.g., mean and standard deviation) for each lot number of calibration material and each lot of control material must be determined through repetitive testing:

(A) The stated values of an assayed control material may be used as the target values provided the stated values correspond to the methodology and instrumentation employed by the laboratory and are verified by the laboratory;

(B) Statistical parameters for unassayed materials must be established over time by the laboratory through concurrent testing with calibration materials or control materials having previously determined statistical parameters.

(f) Control results must meet the laboratory's criteria for acceptability prior to reporting patient test results;

(g) Reagent and supply checks.

(A) The laboratory must check each batch or shipment of reagents, discs, stains, antisera and identification systems (systems using two or more substrates) when prepared or opened for positive and negative reactivity, as well as graded reactivity if applicable;

(B) Each day of use (unless otherwise specified in OAR 333-024-0037), the laboratory must test staining materials for intended reactivity to ensure predictable staining characteristics;

(C) The laboratory must check fluorescent stains for positive and negative reactivity each time of use (unless otherwise specified);

(D) The laboratory must document that the physical characteristics of the media are not compromised and report any deterioration in the media to the manufacturer;

(E) The laboratory must follow the manufacturer's specifications for using the media and be responsible for the test results;

(F) The laboratory must check each batch or shipment of media for sterility, ability to support growth, and as appropriate, selectivity/inhibition and/or biochemical response;

(G) The laboratory may use manufacturer's control checks of media provided the manufacturer's product insert specifies that the manufacturer's quality control checks meet the National Committee for Clinical Laboratory Standards (NCCLS) for media quality control, except for the following media:

(i) Campylobacter agar;

(ii) Chocolate agar;

(iii) Pathogenic Neisseria selective isolation media;

(iv) Media used for the isolation of parasites, viruses, mycoplasmas, chlamydia;

(v) Mueller Hinton media used for susceptibility tests; and

(vi) Commercially prepared media packaged as a unit or system consisting of two or more different substrates.

(19) Remedial action policies and procedures must be established, implemented and documented when:

(a) The test systems do not meet the laboratory's established performance specifications;

(b) Patient test values are outside of the laboratory's reportable range of patient test results;

(c) The laboratory's reference range for a test procedure is inappropriate for the laboratory's patient population;

(d) Results of control, calibration or calibration verification materials fail to meet the laboratory's established criteria;

(e) The laboratory cannot report patient test results within its established time frames; and must notify the appropriate individual of the delayed testing;

(f) Errors are detected in the reported patient test results:

(A) The laboratory must promptly notify the authorized person ordering or individual utilizing the test results of the reporting error;

(B) Issue a corrected report to the authorized person ordering or individual utilizing the test report; and

(C) Maintain exact duplicates of the original and the corrected report for two years.

(20) For electrophoretic determinations:

(a) At least one control sample must be used in each electrophoretic cell; and

(b) The control sample must contain fractions representative of those routinely reported in patient specimens.

(21) If an initial screen for Substances of Abuse is positive and confirmatory testing is required as directed under OAR 333-024-0345(1), it must be confirmed by a principle stated in OAR 333-024-0345(3).

(22) Additional Quality Control practices may be required by the Division for specialized categories of testing.

333-024-0037

Specialty and Subspecialty Quality Control

(1) *Bacteriology* quality control requirements are:

(a) The laboratory must check positive and negative reactivity with control organisms:

(A) Each day of use for catalase, coagulase, betalactamase, oxidase reagents and DNA probes;

(B) Each week of use for Gram and acid-fast stains, bacitracin, optochin, ONPG, X and V discs or strips; and

(C) Each month of use for antisera.

(b) Each week of use, the laboratory must check XV discs or strips with a positive control organism;

(c) For antimicrobial susceptibility tests, the laboratory must check each new lot shipment of media and each lot of antimicrobial discs before, or with initial use, using approved reference organisms, following the **National Committee for Clinical Laboratory Standards (NCCLS)** approved procedures for antimicrobial susceptibility quality control:

(A) The laboratory's zone sizes or minimum inhibitory concentration for reference organisms must be within established quality control limits before reporting patient results;

(B) Each day tests are performed, the laboratory must use the appropriate control organism(s) to check the procedure.

(d) The laboratory must check each batch or lot shipment of media for sterility. Media must also be checked for its ability to support growth, and as appropriate, selectivity/inhibition and/or biochemical response.

(2) *Mycobacteriology* quality control requirements are:

(a) Each day of use, the laboratory must check the iron uptake test with at least one acid-fast organism that produces a positive reaction and with an organism that produces a negative reaction and check all other reagents or test procedures used for mycobacteria identification with at least one acid-fast organism that produces a positive reaction;

(b) The laboratory must check fluorochrome acid-fast stains for positive and negative reactivity each week of use;

(c) The laboratory must check acid-fast stains each week of use with an acid-fast organism that produces a positive reaction; and

(d) For susceptibility tests performed on *Mycobacterium tuberculosis* isolates, the laboratory must check the procedure each week of use with a strain of *Mycobacterium tuberculosis* susceptible to all antimycobacterial agents tested.

(3) *Mycology* quality control requirements are:

(a) Each day of use, the laboratory using the auxanographic medium for nitrate assimilation must check the nitrate reagent with a peptone control;

(b) Each week of use, the laboratory must check all reagents used with biochemical tests and other test procedures for mycological identification with an organism that produces a positive reaction;

(c) Each week of use, the laboratory must check acid-fast stains for positive and negative reactivity; and

(d) For susceptibility tests, the laboratory must test each drug each day of use with at least one control strain that is susceptible to the drug. The laboratory must establish control limits. Criteria for acceptable control results must be met prior to reporting patient results.

(4) *Parasitology* quality control requirements are:

(a) The laboratory must have available a reference collection of slides or photographs, and, if available, gross specimens for identification of parasites;

(b) The laboratory must calibrate the ocular micrometer for determining the size of ova and parasites; and

(c) Each month of use, the laboratory must check permanent stains using a fecal sample control that will demonstrate staining characteristics.

(5) *Virology* quality control requirements are:

(a) The laboratory must have available host systems for the isolation of viruses and test methods for the identification of viruses that cover the entire range of viruses that are etiologically related to clinical diseases for which services are offered;

(b) The laboratory must maintain records that reflect the systems used and the reactions observed; and

(c) In tests for the identification of viruses, the laboratory must simultaneously culture uninoculated cells or cell substrate controls as a negative control to detect erroneous identification results.

(6) *Syphilis Serology* quality control requirements are:

(a) The equipment, glassware, reagents, controls, and techniques for tests for syphilis must conform to manufacturers' specifications;

(b) The laboratory must run serologic tests on patient specimens concurrently with a positive serum control of known titer or controls of graded reactivity plus a negative control;

(c) The laboratory must employ positive and negative controls that evaluate all phases of the test system to ensure reactivity and uniform dosages; and

(d) The laboratory must not report test results unless the predetermined reactivity pattern of the controls is observed.

(7) *General Immunology* quality control requirements are:

(a) The laboratory must run serologic tests on patient specimens concurrently with a positive serum control of known titer or controls of graded reactivity, if applicable, plus a negative control;

(b) The laboratory must employ controls that evaluate all phases of the test system (antigens, complement, erythrocyte indicator systems, etc.) to ensure reactivity and uniform dosages when positive and negative controls alone are not sufficient; and

(c) The laboratory must not report test results unless the predetermined reactivity pattern of the controls is verified.

(8) *Routine Chemistry and Endocrinology* quality control requirements are:

(a) A minimum of two different levels of controls covering the full range of expected results shall be tested with each run of patient specimens, each change of reagents or major maintenance performed;

(b) Control samples must be tested in the same manner, if applicable, as a patient specimen; and

(c) The laboratory must not report test results unless the control results are within the laboratory's acceptable limits.

(9) *Blood Gas Analysis* quality control requirements are:

(a) Calibrate or verify calibration according to the manufacturer's specifications and with at least the frequency recommended by the manufacturer;

(b) Test one sample of control material each eight hours of testing;

(c) Use a combination of calibrators and control materials that include both low and high values on each day of testing; and

(d) Include one sample of calibration material or control material each time patients are tested unless automated instrumentation internally verifies calibration at least every thirty minutes.

(10) *Toxicology* quality control requirements are those listed in general chemistry, in addition, for drug abuse screening using thin layer chromatography:

(a) Each plate must be spotted with at least one sample of calibration material containing all drug groups identified by thin layer chromatography which the laboratory reports; and

(b) At least one control sample must be included in each chamber, and the control sample must be processed through each step of patient testing, including extraction procedures.

(11) *Urinalysis* quality control requirements are those listed in general chemistry, except for those tests categorized as waived.

(12) *Hematology* quality control requirements are:

(a) Cell counts performed manually using a hemocytometer must be tested in duplicate. One control is required for each eight hours of operation;

(b) For non-manual hematology testing systems, excluding coagulation, the laboratory must include two levels of controls each eight hours of operation;

(c) For all non-manual coagulation testing systems, the laboratory must include two levels of control each eight hours of operation and each time a change in reagents occurs;

(d) For manual coagulation tests:

(A) Each individual performing tests must test two levels of controls before testing patient samples and each time a change in reagents occurs; and

(B) Patient and control specimens must be tested in duplicate.

(13) *Cytology* quality control requirements are:

(a) All gynecologic smears are stained using a Papanicolaou or modified Papanicolaou staining method;

(b) Effective measures are taken to prevent cross-contamination between gynecologic and nongynecologic specimens during the staining process;

(c) Nongynecologic specimens that have a high potential for cross-contamination must be stained separately from other nongynecologic specimens, and the stains are filtered or changed following staining;

(d) Diagnostic interpretations must not be reported on unsatisfactory smears; and

(e) All cytology slide preparations must be evaluated on the premises of a laboratory certified to conduct testing in the subspecialty of cytology.

(14) A cytology laboratory is responsible for ensuring that:

(a) Each individual engaged in the evaluation of cytology preparations by nonautomated microscopic technique examines no more than 100 slides (one patient per slide, gynecologic or nongynecologic, or both) in a 24 hour period, irrespective of the site or laboratory. Previously examined gynecologic and nongynecologic cytology preparations, and tissue pathology slides examined by a technical supervisor are not included in the 100 slide limit;

(b) For purposes of workload calculations, each slide preparation (nongynecologic) made using automated, semi-automated, or other liquid-based slide preparatory techniques which result in cell dispersion over one-half or less of the total available slide area and which is examined by nonautomated microscopic technique counts as one-half slide; and

(c) Records are maintained of the total number of slides examined by each individual during each 24 hour period, irrespective of the site or laboratory, and the number of hours each individual spends examining slides in the 24 hour period:

(A) The maximum number of 100 slides described in this section is examined in no less than an 8 hour workday;

(B) For the purposes of establishing workload limits for individuals examining slides by nonautomated microscopic technique on other than an 8 hour workday basis (includes full-time employees with duties other than slide examination and part-time employees), a period of 8 hours must be used to prorate the number of slides that may be examined.

(15) The individual who provides technical supervision of cytology must ensure that:

(a) All gynecologic smears interpreted to be showing reactive or reparative changes, atypical squamous or glandular cells of undetermined significance, or to be in the premalignant (dysplasia, cervical intraepithelial neoplasia or all squamous intraepithelial lesions including human papillomavirus-associated changes) or malignant category are confirmed and signed by a technical supervisor in cytology;

(b) All nongynecologic cytologic preparations are reviewed and signed by the technical supervisor in cytology;

(c) The slide examination performance of each cytotechnologist is evaluated and documented, including performance evaluation through the re-examination of normal and negative cases and feedback on the reactive, reparative, atypical, malignant or premalignant cases; and

(d) A maximum number of slides, not to exceed the maximum workload limit, is established by the technical supervisor for each individual examining slide preparations by nonautomated microscopic technique.

(A) The actual workload limit must be documented for each individual;

(B) Records are available to document that each individual's workload limit is reassessed at least every 6 months and adjusted when necessary.

(16) The laboratory must establish and follow a program designed to detect errors in the performance of cytologic examinations and the reporting of results:

(a) The laboratory must establish a program that includes a review of slides from at least 10 percent of the gynecologic cases interpreted to be negative for reactive, reparative, atypical, premalignant or malignant conditions. This review must be done by a technical supervisor in cytology, a cytology general supervisor, or a qualified cytotechnologist:

(A) The review must include negative cases selected at random from the total caseload and from patients or groups of patients that are identified as having a high probability of developing cervical cancer, based on available patient information;

(B) Records of initial examinations and rescreening results must be available; and

(C) The review must be completed before reporting patient results on those cases selected.

(b) The laboratory must compare clinical information, when available, with cytology reports and must compare all malignant and premalignant gynecology reports with the histopathology report, if available in the laboratory (either on-site or in storage), and determine the causes of any discrepancies;

(c) For each patient with a current high grade intraepithelial lesion or above (moderate dysplasia or CIN-2 or above), the laboratory must review all normal or negative gynecologic specimens received within the previous five years, if available in the laboratory (either on-site or in storage). If significant discrepancies are found that would affect patient care, the laboratory must notify the patient's physician and issue an amended report;

(d) The laboratory must establish and document an annual statistical evaluation of the number of cytology cases examined, number of specimens processed by specimen type, volume of patient cases reported by diagnosis (including the number reported as unsatisfactory for diagnostic interpretation), number of gynecologic cases where cytology and available histology are discrepant, the number of gynecologic cases where any rescreen of a normal or negative specimen results in reclassification as malignant or premalignant, and the number of gynecologic cases for which histology results were unavailable to compare with malignant or premalignant cytology cases;

(e) The laboratory must evaluate the case reviews of each individual examining slides against the laboratory's overall statistical values, document any discrepancies, including reasons for the deviation, and document corrective action, if appropriate;

(f) The laboratory report must:

(A) Clearly distinguish specimens or smears, or both, that are unsatisfactory for diagnostic interpretation; and

(B) Contain narrative descriptive nomenclature for all results.

(g) Corrected reports issued by the laboratory must indicate the basis for correction;

(h) The laboratory must retain all slide preparations for five years from the date of examination, or slides may be loaned to proficiency testing programs, in lieu of maintaining them for this time

period, provided the laboratory receives written acknowledgement of the receipt of slides by the proficiency testing program and maintains the acknowledgement to document the loan of such slides. Documentation for slides loaned or referred for purposes other than proficiency testing must also be maintained. All slides must be retrievable upon request;

(i) The technical supervisor must ensure that reports are signed, or if a computer report is generated with signature, it must reflect an electronic signature authorized by the technical supervisor in cytology.

(17) *Histopathology* quality control requirements are:

(a) A control slide of known reactivity must be included with each slide or group of slides for differential or special stains;

(b) The laboratory must retain stained slides, and test reports at least ten years from the date of examination and retain specimen blocks at least two years from the date of examination;

(c) The laboratory must retain remnants of tissue specimens in a manner that assures proper preservation of the tissue specimens until the portions submitted for microscopic exam ination have been examined and a diagnosis made by a qualified individual;

(d) Only those individuals who meet the specific requirements in OAR 333-024-0023 for histology, dermatopathology, opthalmic pathology or oral pathology may examine and provide reports in these subspecialties;

(e) All tissue pathology reports must be signed by a qualified individual. If a computer report is generated with an electronic signature, it must be authorized by a qualified individual; and

(f) The laboratory must utilize acceptable terminology of a recognized system of disease nomenclature in reporting results.

(18) *Oral Pathology* quality control requirements are the same as those for histopathology.

(19) *Radiobioassay* quality control requirements are: the laboratory must comply with the applicable requirements of OAR 333-024-0035 and 333-024-0037.

(20) *Histocompatibility* quality control for renal allotransplantation includes the requirements for OAR 333-024-0035, 333-024-0037(7) and (23); and

(a) The laboratory must have available and follow criteria for:

(A) Selecting appropriate patient serum samples for crossmatching;

(B) The technique used in crossmatching;

(C) Preparation of donor lymphocytes for crossmatching; and

(D) Reporting crossmatch results.

(b) The laboratory must:

(A) Have available results of final crossmatches before an organ or tissue is transplanted; and

(B) Make a reasonable attempt and document efforts to have available serum specimens for all potential transplant recipients at initial typing, for periodic screening, for pre-transplantation crossmatch and following sensitizing events, such as transfusion and transplant loss.

(c) The laboratory's storage and maintenance of both recipient sera and reagents must:

(A) Be at an acceptable temperature range for sera and components;

(B) Use a temperature alarm system and have an emergency plan for alternate storage; and

(C) Ensure that all specimens are properly identified and easily retrievable.

(d) The laboratory's reagent typing sera inventory (applicable only to locally constructed trays) must indicate source, bleeding date and identification number, and volume remaining.

(e) The laboratory must properly label and store cells, complement, buffer and dyes.

(f) The laboratory must:

(A) HLA type all potential transplant recipients;

(B) Type cells from organ donors referred to the laboratory; and

(C) Have available and follow a policy that establishes when antigen redefinition and retyping are required.

(g) The laboratory must have available and follow criteria for:

(A) The preparation of lymphocytes for HLA-A, B and DR typing;

(B) Selecting typing reagents, whether locally or commercially prepared;

(C) The assignment of HLA antigens; and

(D) Assuring that reagents used for typing recipients and donors are adequate to define all major and International Workshop HLA-A, B and DR specificities for which reagents are readily available.

(h) The laboratory must:

(A) Screen potential transplant recipient sera for preformed HLA-A and B antibodies with a suitable lymphocyte panel on sera collected:

(i) At the time of the recipient's initial HLA typing; and

(ii) Thereafter, following sensitizing events and upon request.

(B) Use a suitable cell panel for screening patient sera (antibody screen), a screen that contains all the major HLA specificities and common splits.

(i) If the laboratory does not use commercial panels, it must maintain a list of individuals for fresh panel bleeding;

(j) If the laboratory uses frozen panels, it must have a suitable storage system;

(k) The laboratory must check:

(A) Each typing tray using positive and negative control sera;

(B) Positive controls for specific cell types when applicable (i.e., T cells, B cells, and monocytes); and

(C) Each compatibility test (i.e. mixed lymphocyte cultures, homozygous typing cells or DNA analysis) and typing for disease-associated antigens using controls to monitor the test components and each phase of the test system to ensure an acceptable performance level.

(l) Compatibility testing for cellularly-defined antigens must utilize techniques such as the mixed lymphocyte culture test, homozygous typing cells or DNA analysis;

(m) If the laboratory reports the recipient's or donor's, or both, ABO blood group and D(Rho) typing, the testing must be performed in accordance with the applicable requirements of OAR 333-024-0035, and 333-024-0037(23);

(n) If the laboratory utilizes immunologic reagents (such as antibodies or complement) to remove contaminating cells during the isolation of lymphocytes or lymphocyte subsets, the efficacy of the methods must be verified with appropriate quality control procedures;

(o) At least once each month, the laboratory must have each individual performing tests evaluate a previously tested specimen as an unknown to verify his or her ability to reproduce test results. Records of the results for each individual must be maintained;

(p) The laboratory must participate in at least one national or regional cell exchange program, if available, or develop an exchange system with another laboratory in order to validate interlaboratory reproducibility.

(21) *Histocompatibility*, other testing for:

(a) Transfusions and other non-renal transplantation, excluding bone marrow and living transplants, all the requirements specified in this section and OAR 333-024-0035 and 333-024-0037(20), as applicable, except for the performance of mixed lymphocyte cultures, must be met;

(b) Bone marrow transplantation, all the requirements specified in this section and OAR 333-025-0035 and 333-024-0037(20), including the performance of mixed lymphocyte cultures or other augmented testing to evaluate class II compatibility, must be met;

(c) Non-renal solid organ transplantation, the results of final crossmatches must be available before transplantation when the recipient has demonstrated presensitization by prior serum screening except for emergency situations. The laboratory must document the circumstances, if known, under which emergency transplants are performed, and records must reflect any information concerning the transplant provided to the laboratory by the patient's physician;

(d) HLA typing for disease-associated studies must meet all the requirements specified in this section and OAR 333-024-0035

and 333-024-0037(20), except for the performance of mixed lymphocyte cultures, antibody screening and crossmatching;

(e) Organ donor HIV testing, the requirements of general immunology in OAR 333-024-0035 and 333-024-0037(7) must be met.

(22) Clinical Cytogenetics quality control requirements are:

(a) When determination of sex is performed by X and Y chromatin counts, these counts must be based on an examination of an adequate number of cells. Confirmatory testing such as full chromosome analysis must be performed for all atypical results;

(b) The laboratory must have records that reflect the media used and document the reactions observed, number of cells counted, the number of cells karyotyped, the number of chromosomes counted for each metaphase spread, and the quality of the banding; that the resolution is sufficient to support the reported results; and that an adequate number of karyotypes are prepared for each patient;

(c) The laboratory also must have policies and procedures for assuring an accurate and reliable patient sample identification during the process of accessioning, cell preparation, photographing or other image reproduction technique, and photographic printing, and storage and reporting of results or photographs;

(d) The laboratory report must include the summary and interpretation of the observations, number of cells counted and analyzed, and the use of appropriate nomenclature.

(23) Immunohematology quality control requirements are:

(a) The laboratory must perform ABO group and D(Rho) typing, unexpected antibody detection, antibody identification and compatibility testing in accordance with manufacturer's instructions;

(b) The laboratory must perform ABO group by concurrently testing unknown red cells with anti-A and anti-B grouping reagents. For confirmation of ABO group, the unknown serum must be tested with known A1 and B red cells;

(c) The laboratory must determine the D(Rho) type by testing unknown red cells with anti-D (anti-Rho) blood typing reagent;

(d) If required in the manufacturer's package insert for anti-D reagents, the laboratory must employ a control system capable of detecting false positive D(Rho) test results;

(e) If a facility provides services for the transfusion of blood and blood products, the facility must be under the adequate control and technical supervision of a pathologist or other qualified doctor of medicine or osteopathy. The facility must ensure that there are facilities for procurement, safekeeping and transfusion of blood and blood products and that blood and blood products must be available to meet the needs of the physicians responsible for the diagnosis, management, and treatment of patients;

(f) The requirements for blood and blood products storage facilities are:

(A) The blood and blood products must be stored under appropriate conditions, which include an adequate temperature alarm system that is regularly inspected:

(i) An audible alarm system must monitor proper blood and blood product storage temperature over a 24-hour period; and

(ii) Inspections of the alarm system must be documented.

(B) If blood is stored or maintained for transfusion outside of a monitored refrigerator, the facility must ensure and document that storage conditions, including temperature, are appropriate to prevent deterioration of the blood or blood product.

(g) In the case of services provided outside the blood bank, the facility must have an agreement reviewed and approved by the director that governs the procurement, transfer and availability of blood and blood products;

(h) There must be provision for prompt ABO blood group, D(Rho) type, unexpected antibody detection and compatibility testing in accordance with the requirements in immunohematology and for laboratory investigation of transfusion reactions, either through the facility or under arrangement with an approved facility on a continuous basis, under the supervision of a pathologist or other qualified doctor of medicine or osteopathy;

(i) According to the facility's established procedures, samples of each unit of transfused blood must be retained for further testing in the event of reactions. The facility must promptly dispose of blood not retained for further testing that has passed its expiration date;

(j) The facility, according to its established procedures, must promptly investigate all transfusion reactions occurring in all facilities for which it has investigational responsibility and make recommendations to the medical staff regarding improvements in transfusion procedures. The facility must document that all necessary remedial actions are taken to prevent future recurrences of transfusion reactions and that all policies and procedures are reviewed to assure that they are adequate to ensure the safety of individuals being transfused within the facility;

(k) Policies to ensure positive identification of a blood or blood product recipient must be established, documnented and followed.

333-024-0040
External Quality Control (Proficiency Testing Programs and On-Site Inspections)

(1) Physician performed microscopy, moderate and high complexity laboratories shall:

(a) At the laboratory's own expense, be required to participate successfully in a proficiency testing program approved by the Health Care Financing Administration. Lists of currently approved programs are available from the Division. Continued or consistent failure, two out of three testing events, may result in the laboratory's license for that specialty, subspecialty or test being suspended or revoked by the Division;

(b) Authorize release of proficiency test results and provide documentation of corrective action to the Division;

(c) Assure proficiency testing is performed on each physician performed microscopy, moderate and high complexity regulated analyte listed in the **Clinical Laboratory Improvement Amendments of 1988, 42 CFR, Part 493, subpart I**, available on request from the Division;

(d) Meet the proficiency testing requirements as described in the **Clinical Laboratory Improvement Amendments of 1988, 42 CFR, Part 493, subpart H**, available on request from the Division;

(e) Notify the Division within six months if the analysis of a specialty, subspecialty or test has been discontinued or added to patient testing;

(f) Assure that individuals performing gynecologic cytology participate successfully in a proficiency testing program approved by the Health Care Financing Administration;

(g) Be required to participate successfully in the proficiency testing programs conducted by the Division involving the laboratory specialty, subspecialty or tests in which the laboratory performs tests;

(h) Analyze test samples submitted by the Division prior to, during, or subsequent to inspection.

(2) A laboratory shall have their license suspended or revoked for one year, pursuant to ORS 438.160, if it submits a proficiency testing sample to another laboratory for analysis prior to reporting to the proficiency testing program.

(3) Any laboratory that knowingly receives proficiency testing samples from another laboratory prior to the reporting deadline must notify the Division.

(4) On-site inspections and testing may be conducted by representatives of the Division or Federal Government at reasonable times during the laboratory's normal business hours without advance notice. The representative shall inspect the facilities, personnel policies, procedures, materials, staff qualifications, equipment, and records:

(a) Routine inspections of moderate and high complexity laboratories shall occur at a minimum of every two years.

(b) Laboratories accredited by a Health Care Financing Administration approved accreditation organization are exempt from routine, on site inspection provided the laboratory submits a copy of their accreditation certificate and authorizes its accreditation organization to release inspection data to the Division. The accreditation organization shall make available, upon request, a copy of the laboratory's statement of deficiencies, plan of correction and proof of accreditation to the Division.

(5) The Owner or Director may be required to submit reports on the operations and procedures of the laboratory to the Division or the Federal Government.

(6) Additional inspections may be performed without notice to verify correction of deficiencies, investigate complaints, validation of accrediting organizations' inspections, review unsatisfactory proficiency testing and verify personnel qualifications or other monitoring of compliance with OAR 333-024-0005 through 333-024-0050 and 333-024-0260 and 333-024-0265.

(7) Inspection of waived and physician performed microscopic procedures laboratories:

(a) The Division shall conduct inspections of any laboratory during routine hours of operation only to assess validation, complaint, and compliance with the applicable requirements of these rules;

(b) The laboratory is required to:

(A) Allow the Division or Federal Government to interview all employees of the laboratory concerning compliance with these rules;

(B) Allow the Division or Federal Government access to all areas of the facility including specimen procurement and processing areas, storage facilities for specimens, reagents, supplies, records and reports, testing and reporting areas;

(C) Permit employees to be observed performing tests, data analysis and reporting;

(D) Allow the Division to review all information and data necessary to evaluate complaints, determine immediate and serious risk to public health, and confirm that the laboratory is only performing tests within the scope of their license;

(E) Provide copies of all records and data that the Division or Federal Government requires under these rules; and

(F) Provide all information and data needed by the Division or Federal Government to make a determination of compliance with these rules.

(8) Failure to permit an inspection under these rules will result in the suspension of the laboratory's license.

(9) A waived laboratory conducting moderate and/or high complexity tests shall be considered a moderate or high complexity laboratory and the Division shall:

(a) Conduct an on-site survey;

(A) Examine the records of the laboratory;

(B) Give written notice of any deficiencies;

(C) Require the laboratory to return a written plan of correction, and verify that the corrections have occurred; and

(D) The time frames for the plan of correction and verification are the same as a moderate or high complexity laboratory.

(b) Require compliance with Division directives when there is an immediate threat to life, health, or safety.

(c) Charge the laboratory the appropriate fee.

(10) A physician performed microscopy procedure laboratory conducting additional moderate complexity or high complexity tests shall be considered a moderate or high complexity laboratory and the Division shall:

(a) Conduct an on-site survey:

(A) Examine the records of the laboratory;

(B) Give written notice of any deficiencies;

(C) Require the laboratory to return a written plan of correction, and verify that the corrections have occurred; and

(D) The time frames for the plan of correction and verification are the same as a moderate or high complexity laboratory.

(b) Require compliance with Division directives when there is an immediate threat to life, health, or safety.

(11) Inspection of non-accredited, moderate and high complexity laboratories:

(a) The Division will conduct inspections on at least a biennial basis of any laboratory at any time during routine hours of operation;

(b) The Division will conduct an on-site inspection prior to the issuance of a license;

(c) The laboratory may be required to:

(A) Test samples or perform procedures as the Division or Federal Government requires;

(B) Allow the Division or Federal Government to interview all employees of the laboratory concerning the laboratory's compliance with these rules;

(C) Permit employees to be observed performing tests, data analysis and reporting;

(D) Allow the Division or Federal Government access to all areas of the facility including: specimen procurement and processing areas, storage facilities for specimens, reagents, supplies, records and reports, testing and reporting areas;

(E) Provide copies to the Division or Federal Government of all records and data it requires.

(d) The laboratory must have all records and data accessible and retrievable within a reasonable time frame during the course of the inspection;

(e) The laboratory must provide, upon request, all information and data needed by the Division or Federal Government to make a determination of the laboratory's compliance with these rules;

(f) The Division or Federal Government may reinspect a laboratory at any time necessary to evaluate the ability of the laboratory to provide accurate and reliable test results;

(g) The laboratory must retain records as specified in OAR 333-024-0050.

(12) Inspection of accredited laboratories:

(a) The Division and the Federal government may conduct random validation inspections of any accredited laboratory at any time during its hours of operation;

(b) The Division and the Federal government may conduct complaint inspections of an accredited laboratory at any time during its hours of operation upon receiving a complaint about that laboratory;

(c) The laboratory may be required to comply with OAR 333-024-0040(11)(c)–(f).

333-024-0043
Quality Assurance

(1) Each laboratory performing physician performed microscopy, moderate or high complexity testing must establish and follow written policies and procedures for a comprehensive quality assurance program which is designed to monitor and evaluate the ongoing and overall quality of the total testing process (pre-analytic, analytic, post-analytic).

(2) The laboratory's quality assurance program must evaluate the effectiveness of its policies and procedures; identify and correct problems; assure the accurate, reliable and prompt reporting of test results; and assure the adequacy and competency of the staff.

(3) The laboratory must meet the requirements of this rule as they apply to the services offered, complexity of testing performed, test results reported, and the unique practices of each testing entity.

(4) The laboratory must monitor, evaluate, and revise, if necessary, based on the results of its evaluations, the following:

(a) The criteria established for patient preparation, specimen collection, labeling, preservation and transportation;

(b) The information solicited and obtained on the laboratory's test requisition for its completeness, relevance, and necessity for the testing of patient specimens;

(c) The use and appropriateness of the criteria established for specimen rejection;

(d) The completeness, usefulness, and accuracy of the test report information necessary for the interpretation or utilization of test results;

(e) The timely reporting of test results based on testing priorities (STAT, routine, etc.); and

(f) The accuracy and reliability of test reporting systems, appropriate storage of records and retrieval of test results.

(5) The laboratory must have an ongoing mechanism to evaluate the corrective actions taken under remedial action.

(6) Ineffective policies and procedures must be revised based on the outcome of the evaluation. The mechanism must evaluate and review the effectiveness of corrective actions taken for:

(a) Problems identified during the evaluation of calibration and control data for each test method;

(b) Problems identified during the evaluation of patient test values for the purpose of verifying the reference range of a test method; and

(c) Errors detected in reported results.

(7) The corrective actions taken for any unacceptable, unsatisfactory, or unsuccessful proficiency testing result(s) must be evaluated for effectiveness.

(8) If a laboratory performs the same test using different methodologies or instruments, or performs the same test at multiple testing sites, the laboratory must have a system that twice a year evaluates and defines the relationship between test results using the different methodologies, instruments, or testing sites.

(9) If a laboratory performs tests that are not included in an approved proficiency testing program, the laboratory must have a system for verifying the accuracy of its test results at least twice a year.

(10) The laboratory must have a mechanism to identify and evaluate patient test results that appear inconsistent with relevant criteria including:

(a) Patient age;

(b) Sex;

(c) Diagnosis or pertinent clinical data, when provided;

(d) Distribution of patient test results, when available; and

(e) Relationship with other test parameters, when available within the laboratory.

(11) The laboratory must have an ongoing mechanism to evaluate the effectiveness of its policies and procedures for assuring employee competence and, if applicable, consultant competence:

(a) The assessment of employee competence must be biannually the first year of employment; and

(b) Annually thereafter.

(12) The laboratory must have a system in place to document problems that occur as a result of breakdowns in communication between the laboratory and the authorized individual who orders or receives the results of test procedures or examinations; Corrective actions must be taken and documented, as necessary, to resolve the problems and minimize communications breakdowns.

(13) The laboratory must have a system in place to assure that all complaints and problems are documented. Investigations of complaints must be made and appropriate corrective actions instituted.

(14) The laboratory must have a mechanism for documenting and assessing problems identified during quality assurance reviews and discussing them with the staff. The laboratory must take corrective actions necessary to prevent recurrences.

(15) The laboratory must maintain documentation of all quality assurance activities including problems identified and corrective actions taken.

(16) All quality assurance records must be available to the Division and maintained for a period of 2 years.

Venereal Disease Testing

Tests for syphilis approved by the Division are as follow:

(1) Venereal Disease Research Laboratory (VDRL) slide tests;

(2) Fluorescent Treponemal Antibody — Absorption (FTA-ABS) test;

(3) Rapid Plasma Reagin (RPR) and Reagin Screen Test (RST) macroscopic flocculation card tests;

(4) Hemagglutination-Treponemal Test for Syphilis (HATTS);

(5) Microhemagglutination Assay for Antibodies to *Treponema pallidum* (MHA-TP) test;

(6) Unheated Serum Reagin (USR) test;

(7) Toluidine Red Unheated Serum Test (TRUST).

333-024-0050
Records and Reports

(1) Personnel policies, practices, and procedures that support sound laboratory practice shall be available in written form. A current record shall be maintained on each employee and shall include a resume of training and experience.

(2) Complete records for each specimen examined, including quality control, shall be kept for not less than two years, immunohematology records not less than five years, cytology and pathology records not less than ten years. Such records shall contain:

(a) Laboratory number or other identification of the specimen;

(b) The name or other identifier of the person from whom the specimen was taken, if available;

(c) The name of the physician or other authorized person or clinical laboratory submitting the specimen;

(d) The date and time the specimen was collected or date and time it was received in the laboratory;

(e) The type of test performed;

(f) The results of the tests in units of measurement where applicable;

(g) The signature, initials, or identification of the examiner;

(h) The date and time the test results were reported; and

(i) Other information as needed to aid in the interpretation of laboratory results.

(3) Cytology slides must be maintained for a minimum of 5 years, histology slides 10 years, and tissue blocks 2 years.

(4) The Owner or Director of each clinical laboratory licensed under the Act shall report communicable disease according to OAR 333-018-0000 through 333-018-0015, and shall maintain a separate log of such reporting:

(a) Reports shall not be interpreted as constituting a diagnosis nor shall any laboratory making such report be held liable under the laws of this State for having violated a trust or confidential relationship;

(b) Information contained in such reports may be used in compiling statistical and other data in which persons are not identified by name or otherwise.

(5) Requests for examinations of specimens and reporting of test results shall be as follows:

(a) The clinical laboratory shall examine specimens only at the oral, written or electronic request of a physician, dentist or other person authorized by law to use the findings of laboratory examinations;

(b) Oral requests for laboratory tests are permitted only if the laboratory subsequently requests written authorization for testing within 30 days;

(c) No person shall report the result of any test, examination, or analysis of a specimen submitted for evidence of human disease except to a physician, dentist, their agents, or other person authorized by law to employ the results thereof in the conduct of their practice or in the fulfillment of their official duties. Reports shall not be issued to the patient concerned except with the written consent of the physician or other authorized person;

(d) The clinical laboratory may examine specimens for substance of abuse submitted by persons other than medical personnel

authorized by law and shall report the result of any test to the person who submitted the specimen.

(6) The laboratory must maintain the written test authorization or documentation of efforts made to obtain a written authorization for a minimum of two years.

(7) The laboratory must assure that the requisition or test authorization includes:

(a) The name and address or other identifiers of the authorized person requesting the test or the name and address of the laboratory submitting the specimen;

(b) For Pap smears, the patient's last menstrual period, age or date of birth, and indication of whether the patient had a previous abnormal report, treatment or biopsy; and

(c) Any additional information relevant and necessary to a specific test to assure accurate and timely testing and reporting of results.

(8) The laboratory must have adequate systems in place to report results in a timely, accurate, reliable and confidential manner.

(9) The test report must indicate the name and address of the laboratory location at which the test was performed, the test performed, the test result, and if applicable, the units of measurement.

(10) The laboratory must indicate on the test report any information regarding the condition and disposition of specimens that do not meet the laboratory's criteria for acceptability.

(11) Pertinent "reference" or "normal" ranges, as determined by the laboratory performing the tests, must be available to the authorized person who ordered the tests or the individual responsible for utilizing the test results.

(12) The laboratory must develop and follow written procedures for reporting imminent life-threatening laboratory results or panic values.

(13) The original report or exact duplicates of test reports must be maintained by the laboratory.

(14) The referring laboratory must not revise results or information directly related to the interpretation of results provided by the testing laboratory.

(15) The referring laboratory may permit each testing laboratory to send an additional test result directly to the authorized person who initially requested the test.

(16) The authorized person who orders a test or procedure must be notified by the referring laboratory of the name and address of each laboratory location at which a test was performed.

(17) The test records of the laboratory must include:

(a) The patient identification number, accession number, or other unique identification of the specimen;

(b) The condition and disposition of specimens that do not meet the laboratory's criteria for specimen acceptability;

(c) The records and dates of all specimen testing, including the identity of the personnel who performed the tests.

(18) The laboratory must, upon request, make available to clients:

(a) A list of test methods employed by the laboratory;

(b) If applicable, the performance specifications of each method used;

(c) Information that affect the interpretation of test results such as interferences;

(d) Pertinent updates on testing information whenever changes occur that affect the test results or its interpretation.

(19) A laboratory must refer specimens only to a Division licensed laboratory authorized to perform testing in that specialty or subspecialty at that complexity level; except referral specimens may be sent to laboratories outside the state of Oregon to a laboratory operating in compliance with the provisions of CLIA 88.

Accreditation Organizations and Accredited Laboratories

(1) Accreditation organizations shall:

(a) Provide the Division with;

(A) Documentation of current deemed status from the Health Care Financing Administration;

(B) A list of all laboratories and accreditation expiration dates;

(C) A list of scheduled surveys and proposed survey dates;

(D) Copies of routine survey findings, upon request;

(E) Copies of all complaint investigations performed.

(b) Allow the Division to investigate complaints, conduct complaint or random on-site validation surveys and take disciplinary action;

(c) Provide a detailed description of the organization's survey process, including:

(A) Frequency of surveys performed;

(B) Copies of survey forms and guidelines;

(C) Accreditation survey review process;

(D) Deficiency writing and monitoring process;

(E) Policy on facility notification prior to survey;

(F) Surveyor qualifications;

(G) Policy for the investigation of complaints on accredited laboratories;

(H) Description of all types and categories of accreditation offered; and

(I) Procedure for proficiency testing monitoring including;

(i) Frequency of monitoring;

(ii) Correlation of proficiency testing with subspecialties, specialties, and analytes performed by the laboratory;

(iii) Definition of unsuccessful performance; and

(iv) Action to be taken regarding unsuccessful performance.

(d) Notify all of their accredited laboratories within 10 days of the loss of accreditation authority in Oregon;

(e) Notify the Division:

(A) Within 30 days of any changes in accreditation requirements;

(B) Verbally, within 5 days of identifying any deficiency posing an immediate and serious risk to patient or staff safety or health in an accredited laboratory, to be followed by a written notification within 14 days of the verbal notification;

(C) Of actions taken due to unsuccessful proficiency testing performance;

(D) Within 30 days of enforcement or sanction actions taken against their accredited laboratories;

(E) Within 30 days if a laboratory terminates its accreditation; and

(F) Within 30 days if the organization revokes a laboratory's accreditation.

(2) Accredited laboratories shall:

(a) Notify the Division of accreditation or changes in accreditation status within 30 days of occurrence;

(b) Authorize proficiency testing providers to submit copies of all proficiency testing results to the Division;

(c) Allow the Division to investigate complaints, conduct complaint or random on-site validation surveys, and take disciplinary action;

(d) Have a valid State License;

(e) Reapply for licensure within 60 days after the accrediting organization's deeming authority has been withdrawn:

(A) Pay applicable fees;

(B) Submit to survey by the Division; and

(C) Meet all applicable requirements for non-accredited laboratories in the appropriate licensure categorization.

(f) Reapply for licensure within 30 days after the withdrawal or revocation of the laboratory's accreditation by the accrediting organization:

(A) Pay applicable fees;

(B) Submit to survey by the Division; and

(C) Meet all applicable requirements for non-accredited laboratories in the appropriate licensure categorization.

(3) The Division may deny or terminate the license of a laboratory if the owner fails to authorize the accrediting organization to notify the Division of the laboratory's compliance with the accrediting organization requirements.

333-024-0055
Incompetence

A clinical laboratory Owner or Director has "demonstrated incompetence" if there is:

(1) Repeated error demonstrated in the performance of laboratory tests or procedures or the results thereof;

(2) Failure to comply with the requirements of these rules relating to internal and external quality control;

(3) Failure to comply with the ORS 438 or OAR 333-024-0005 through 333-024-0055 and 333-024-0260 and 333-024-0265;

(4) Work assigned to personnel not qualified to perform in that specialty;

(5) Repeated erroneous reporting of test results.

Laboratory Testing

333-024-0205
Definitions

As used in these rules:

(1) "Colorimetric assay" means a qualitative laboratory procedure to detect the presence of the enzyme biotinidase which, when present, produces a color change.

(2) "Congenital disorder" means a condition that is present at birth. This includes but is not limited to cystic fibrosis, endocrine, hemoglobinopathy, metabolic, and immunodeficiency disorders.

(3) "County health department" means those county and district health departments formed under ORS 431.416.

(4) "Cystic fibrosis" means a disorder, usually due to a single enzyme deficiency of genetic origin, in which the individual is completely or partially unable to produce a functioning transmembrane conductance regulator protein that results in progressive multi-organ dysfunction and the accumulation of trypsinogen in the blood during the newborn period.

(5) "Diagnostic laboratory" means a laboratory approved to perform testing for the congenital disorders listed herein to rule out a specific disorder suspected by newborn screening or for screening infants older than six months of age.

(6) "Division" means the Public Health Division of the Oregon Health Authority.

(7) "Dried blood specimen" means a blood specimen obtained from an infant by means of capillary-puncture or skin-puncture (heel stick), not by means of venipuncture or any other method, which is placed on special filter paper kits and allowed to air dry.

(8) "Endocrine disorders" means disorders related to hormone production or utilization resulting in abnormal growth and development, fluid and electrolyte imbalance or other disturbance, including hypothyroidism and congenital adrenal hyperplasia.

(9) "Fluorescent immunoassay" means a competitive binding or direct assay creating specific antibody-antigen reactions to detect thyroxin, thyroid stimulating hormone, 17-alpha-hydroxyprogesterone and immunoreactive trypsinogen.

(10) "Fluorescent spot test" means a biochemical laboratory test procedure utilizing certain naturally occurring enzymes in erythrocytes and added chemicals used to detect galactose in blood specimens as a screening test for galactosemia. It is described occasionally in the scientific literature as a "Hill test."

(11) "Hemoglobinopathy" means one of a group of disorders which results in abnormal structure and function of hemoglobin that leads to variable degrees of anemia, hemolysis and other complications. These include sickle cell disease and other clinically significant hemoglobinopathies.

(12) "High performance liquid chromatography" means the utilization of a separation column to detect various hemoglobin proteins based on their retention time.

(13) "Immunodeficiency disorders" means a group of disorders in which the immune system is not functioning properly. This includes severe combined immunodeficiency (SCID), a primary immune disorder characterized by a defect in T-cell production and function. SCID is also described as the "bubble boy disease".

(14) "Isoelectric focusing" means a laboratory procedure in which protein, hemoglobin in blood, is subjected to an electric field in a gel medium with a gradient pH causing it to migrate to its pH and isoelectric point, revealing specific patterns for each type of hemoglobin.

(15) "Kit" means any or all parts of the combined materials, laboratory slips, tubes, mailing containers, or other components provided by the state public health laboratory for the purposes of collection or submission of specimens for laboratory tests.

(16) "Metabolic disorders" means those disorders of intermediary metabolism and hormone production, regulation, or utilization in which the individual is completely or partially incapable of normal metabolism of biotin, single amino acids, galactose, or fatty acids resulting in the abnormal accumulation of those and other metabolites in the blood. These include phenylketonuria and medium-chain acyl-CoA dehydrogenase deficiency.

(17) "Newborn screening panel" means those disorders identified by the Oregon Health Authority in these rules for which all infants shall be tested, except if the infant is being reared as an adherent to a religion the teachings of which are opposed to such testing.

(18) "Practitioner" means a person duly and regularly licensed by the proper authority to practice medicine, naturopathy or chiropractic or to be a nurse practitioner. For purposes of OAR 333-024-0215(1) only, this definition is extended to include the licensed or unlicensed person who takes responsibility for delivery or the health care of the baby; or being none, the person responsible for the health care of the mother prior to birth of the baby.

(19) "Precision" of an assay means a quantitative measure of reproducibility of a laboratory procedure in assaying a particular chemical under defined conditions. Examples include, but are not limited to, statistically determined values of standard deviations from the mean and coefficients of variation.

(20) "Sensitivity" of an assay means the lowest concentration or quantity of a particular chemical that can be reliably detected or measured by a laboratory assay procedure under defined conditions.

(21) "Specificity" of an assay means the accuracy with which a laboratory assay procedure can reliably identify or measure the quantity of a particular chemical to distinguish it from other related or unrelated chemicals under defined conditions.

(22) "Specimen for newborn screening" means a dried blood specimen from an infant submitted to the state public health laboratory to detect congenital disorders included on the newborn screening test panel.

(23) "State public health laboratory" means the Oregon State Public Health Laboratory of the Public Health Division, 3150 NW 229th Avenue, Hillsboro, Oregon 97124.

(24) "Tandem mass spectrometry" means a laboratory procedure in which amino acids and acylcarnitines are detected and quantified in a sample taken from a dried blood spot.

(25) "These rules" means OAR 333-024-0205 through 333-024-0240.

(26) "TREC assay" means a DNA polymerase chain reaction method to detect T-cell receptor excision circles. An absence or reduction in TRECs can be used as an indicator for severe combined immunodeficiency or other primary immune deficiencies.

333-024-0210
Infants Tested for Metabolic Diseases

Every infant born in Oregon on or after May 1, 2014, shall be tested for at least the following congenital disorders by the state public health laboratory:

(1) Cystic fibrosis (CF).
(2) Endocrine disorders:
(a) Congenital hypothyroidism (CH); and
(b) Congenital adrenal hyperplasia (CAH).
(3) Galactosemia (GALT).
(4) Hemoglobin disorders:
(a) Sickle cell disease (Hb S/S);
(b) Sickle cell/beta thalassemia (Hb S/A); and
(c) Sickle cell/hemoglobin C disease (Hb S/C).
(5) Metabolic disorders:
(a) Amino acid disorders:
(A) Homocystinuria (HCY);
(B) Phenylketonuria (PKU); and
(C) Tyrosinemia (TYR).
(b) Biotinidase deficiency;
(c) Fatty acid oxidation disorders:
(A) Carnitine uptake defect (CUD);
(B) Carnitine/acylcarnitine translocase deficiency (CT);
(C) Carnitine palmitoyl transferase deficiency (CPT), Types I and II;
(D) Glutaric acidemia, Type II (GA-II);
(E) Long-chain L-3 hydroxyacyl-CoA dehydrogenase deficiency (LCHAD);
(F) Medium-chain acyl-CoA dehydrogenase deficiency (MCAD);
(G) Short-chain acyl-CoA dehydrogenase deficiency (SCAD);
(H) Trifunctional protein deficiency (TFP); and
(I) Very long-chain acyl-CoA dehydrogenase deficiency (VLCAD).
(d) Organic acid disorders:
(A) Beta-ketothiolase deficiency (BKT);
(B) Glutaric acidemia, Type I (GA-I);
(C) Isobutryl-CoA dehydrogenase deficiency (IBG);
(D) Isovaleric acidemia (IVA);
(E) Malonic aciduria (MAL);
(F) Maple syrup urine disease (MSUD);
(G) Methylmalonic acidemia (MMA);
(H) Propionic acidemia (PA);
(I) 2-Methyl-3-hydroxybutyryl CoA dehydrogenase deficiency (2M3HBA);
(J) 2-Methylbutyryl CoA dehydrogenase deficiency (2MBG);
(K) 3-hydroxy-3-methylglutaryl-CoA lyase deficiency (HMG);
(L) 3-methylcrotonyl-CoA carboxylase deficiency (3-MCC);
(M) 3-methylglutaconyl-CoA hydratase deficiency (3MGA); and
(N) Multiple carboxylase deficiency (MCD).
(e) Urea Cycle Disorders:
(A) Arginase deficiency (ARG);
(B) Argininosuccinate lyase deficiency (ASA); and
(C) Citrullinemia, Type I (CIT I).
(6) Other disorders as defined by Oregon Health Authority.
(7) Severe combined immunodeficiencies (SCID).

333-024-0215
Person Responsible for Submitting Specimens for Newborn Screening Testing

(1)(a) The person responsible for assuring that specimens are submitted for testing the infant for congenital disorders shall be in order of responsibility:

(A) The hospital, freestanding birthing center, or other health care facility licensed under ORS Chapter 441, or if the infant is not in such a facility;
(B) The practitioner, or if no practitioner is in attendance;
(C) The parent or legal guardian.

(b) For purposes of this section and OAR 333-024-0225, in the case of infants entering a health care facility before 48 hours of age as a result of transfer from another health care facility or from out-of-hospital birth, the receiving health care facility shall be responsible for the timely collection of specimens.

(2) The state public health laboratory may perform tests for certain congenital disorders for patients from outside Oregon.

Stats. Implemented: ORS 433.285
Hist.: HD 18-1981(Temp), f. & ef. 9-11-81; HD 3-1982, f. & ef. 2-25-82; HD 17-1983, f. & ef. 10-12-83; HD 10-1986, f. & ef. 6-11-86; OHD 15-2002, f. & cert. ef. 10-4-02; PH 30-2004(Temp), f. & cert. ef. 9-17-04 thru 3-13-05; PH 37-2004, f. & cert. ef. 12-7-04; PH 11-2014, f. 4-15-14, cert. ef. 5-1-14

333-024-0220
Manner of Submitting Specimens

(1) All specimens submitted to the state public health laboratory for testing for congenital disorders shall be collected using kits available from the state public health laboratory according to procedures, protocols, and shipping instructions specified in the Newborn Screening Practitioner's Manual or on the website maintained by the state public health laboratory.

(2) Specimens collected for newborn screening testing shall be sent to the state public health laboratory within 24 hours of collection.

(3) Specimens shall be transmitted to the state public health laboratory in such a manner that they are received by the laboratory no later than five days after collection, preferably within 24 to 48 hours.

333-024-0225
Time of Collecting Specimens for Testing Infants

A specimen for newborn screening testing shall be collected within five days after birth from every infant surviving more than two days, as follows:

(1) In the case of infants born outside a hospital or other health care facility and of infants who will remain in the hospital or health care facility for 24 hours or more, a specimen shall be collected after 24 hours but before five days after birth, preferably between 24 and 48 hours after birth. A second specimen shall be collected between 10 and 14 days but before one month of age.

(2) In the case of infants discharged from a hospital or other health care facility before 24 hours of age, a specimen shall be collected just prior to discharge from the facility, and a second specimen shall be collected from such infants 10 to 14 days after birth.

(3) In the case of infants who are preterm, low birth weight or ill and are admitted to a special care baby unit or neonatal intensive care unit, a specimen shall be collected at admission, a second specimen collected between 48 and 72 hours of age and a third specimen collected at discharge or 28 days of life, whichever comes first.

(4) In the case of infants up to six months of age entering the care of a practitioner and for whom the screening status is unknown or cannot be determined, a specimen shall be collected within two weeks of the first visit to the practitioner and sent to the state public health laboratory for screening.

(5) In the case of infants over six months of age entering the care of a practitioner and for whom the screening status is unknown or cannot be determined, a specimen shall be collected within two weeks of the first visit and sent to a diagnostic laboratory providing screening services for older infants.

333-024-0230
Methods of Testing

(1) Infants shall be tested for congenital disorders on the newborn screening test panel by methods approved by rule of the Oregon Health Authority. The following laboratory procedures are approved. No other method shall be approved unless it meets or exceeds these methods in respect to specificity, sensitivity, and precision of the assay. Persons wanting amendment of this rule to include another method must provide technical data to the state public health laboratory showing to the satisfaction of the state public health laboratory that the proposed method meets or exceeds the approved methods in these respects.

(2) Laboratory methods for detecting congenital disorders shall be performed upon dried blood specimens and be as follows:

(a) Amino acid and urea cycle disorders: Quantitative measurement of amino acids by tandem mass spectrometry.

(b) Biotinidase deficiency: Colorimetric assay for biotinidase activity.

(c) Congenital adrenal hyperplasia: Fluorescent immunoassay of 17-alpha hydroxyprogesterone (17-OHP).

(d) Congenital hypothyroidism: Fluorescent immunoassay of thyroxine (T4) with secondary assay of thyroid stimulating hormone (thyrotropin or TSH).

(e) Cystic fibrosis: Fluorescent immunoassay for the presence or absence of immunoreactive trypsinogen (IRT).

(f) Fatty acid oxidation disorders: Quantitative measurement of acylcarnitines by tandem mass spectrometry.

(g) Galactosemia: Fluorescent immunoassay for the presence or absence of detectable galactose uridyl transferase in erythrocytes and galactose.

(h) Hemoglobinopathies: Primary screening by isoelectric focusing and confirmation by high performance liquid chromatography to detect hemoglobin variants.

(i) Severe combined immunodeficiencies: DNA polymerase chain reaction (PCR) to detect the absence or presence of T-cell receptor excision circles (TREC assay).

333-024-0231
Procedures for Follow-Up of Specimens Administered Too Early, Improperly Collected, and Those That Show Abnormal Results

(1) Improperly collected specimens. Where specimens contain insufficient blood, are contaminated or are found to be otherwise unsuitable for testing (refer to Newborn Screening Specimen Collection in the state public health laboratory's Practitioner's Manual or website), a repeat specimen will be requested. A letter will be mailed or faxed by the state public health laboratory to the practitioner who submitted the original specimen within two to four working days after receiving the sample. If there is no response after 10 working days, the state public health laboratory will send a follow-up letter. If there is no response within 21 working days after the second letter, a certified letter will be sent indicating that the state public health laboratory will no longer be tracking that infant and that the responsibility for further screening rests with the practitioner and the parents.

(2) Specimens that show anomalous results. The state public health laboratory will refer anomalous results to the screening program's medical consultants. Reports of anomalous findings will be made by the medical consultants to individual practitioners. Requests for repeat or diagnostic specimens will be made through the medical consultants by letter or telephone call, depending upon the urgency of the situation. The practitioner will inform the state public health laboratory of the final resolution or confirmation of each case to ensure timely and complete follow-up.

333-024-0232
Demographic Data

The state public health laboratory will maintain demographic data records on infants to be used for the purposes of monitoring statistical trends and screening practices in hospitals, birthing facilities, and individual practices. This monitoring will enable the state public health laboratory to:

(1) Identify facilities and health care providers that submit inadequate specimens;

(2) Evaluate the overall effectiveness of the screening program;

(3) Monitor and ensure timely and complete follow-up; and

(4) Ensure that the most effective newborn screening program for the State of Oregon will be maintained.

333-024-0235
Religious Exemption from Newborn Screening Testing

(1) A religious exemption from testing for congenital disorders may be claimed if the infant is being reared as an adherent to a religion the teachings of which are opposed to such testing.

(2)(a) In the event a religious exemption is claimed from the requirements for testing for congenital disorders, the person otherwise responsible for submitting the specimen for testing shall be responsible for submitting a completed statement to the state public health laboratory signed by the infant's parent or legal guardian using the following language:

STATEMENT OF RELIGIOUS EXEMPTION

The undersigned parent or legal guardian of_____, born on_____, states that this child is exempt from newborn screening testing for detection of congenital disorders in that the child is being reared as an adherent to a religion the teachings of which are opposed to such testing. _____
(Signature of parent or legal guardian)

_____
(Date)

(b) The completed statement in subsection (a) of this section may be made on the reverse side of the original specimen identification form which otherwise accompanies the dried blood specimen used to test the infant for congenital disorders.

Fees for Tests Performed in the State Laboratory

333-024-0240
Fees

(1)(a) The person responsible for submitting specimens for those tests performed on specimens received in the state public health laboratory on or after March 1, 2014, shall pay a test fee upon billing by the Authority, in accordance with the August 2013 Division of Medical Assistance Programs Fee for Service Fee Schedule.

(b) Public and private non-profit agencies may apply for a reduction or waiver of the test fees stated in subsection (2)(a) of this rule. Reduction or waiver requests must be sent to the director

of the state public health laboratory and be accompanied by proof of non-profit status. Requests should include the estimated number and type of tests anticipated per year. The decision to reduce or waive fees is discretionary with the state public health laboratory.

(3) For Oregon practitioners, newborn screening test kits purchased by prepayment on or after May 1, 2014:

(a) $32 per one-specimen kit; or

(b) $64 per two-specimen kit; or

(c) $64 per three-specimen kit (neonatal intensive care unit (NICU) and special baby care unit (SBCU) use only).

(4) Specimens which are submitted in an inadequate quantity or any unsatisfactory condition shall be subject to the fee of $5 per repeat specimen except for newborn screening specimens, which may be subject to a charge of $32 per specimen. Additional specimens from the same infant or patient specifically required or requested by the state public health laboratory, but not because the original specimen was inadequate or unsatisfactory, shall be exempt from additional fees.

(5) Kits requested for testing for congenital disorders shall be prepaid by the requestor in the amount as specified in section (3) of this rule. Kit requests must be accompanied by payment for the full amount of the order.

(6) No Oregon infant shall be denied testing for congenital disorders because of inability of the infant's parent or legal guardian to pay the fee for a test or kit:

(a) A practitioner or parent or legal guardian requesting exemption from fees shall complete a statement indicating the following:

STATEMENT OF FEE EXEMPTION

The undersigned parent or legal guardian of_____, born on_____, attests that they are unable to pay the fee/charge for labor and delivery services and for testing for congenital disorders because of lack of sufficient funds, insurance or Medicaid coverage.

_____

(Signature of parent or legal guardian)

_____

(Date)

(b) The above completed statement shall be completed by the parent or legal guardian on the original specimen identification form which accompanies the dried blood specimen used to test the infant for congenital disorders.

(c) Exemption statements must be received by the state public health laboratory within 90 days of the first newborn screening.

(d) Upon receipt of the statement in subsection (6)(a) of this rule, and confirmation of Oregon Health Authority records, the Oregon Health Authority will issue a refund check. The state public health laboratory will issue a refund check to the payer of record. The state public health laboratory will replace kits, damaged or unused, which are returned to the laboratory.

(7) For tests performed for or on behalf of Oregon state or local government agencies, as determined by the administrator to have a significant public health impact, a lesser fee, calculated to recover costs, may be charged.

(8) All specimens submitted to the state public health laboratory shall be collected according to procedures, protocols, and shipping instructions specified on the Oregon State Public Health Laboratory's website.

Alpha-Fetoprotein Testing and Other Serum and Amniotic Fluid Based Markers for Congenital/Genetic Defects

333-024-0260
Purpose

(1) OAR 333-024-0260 through 333-024-0265 shall apply to the assay of Maternal Serum Alpha-Fetoprotein (MSAFP), Amniotic Fluid Alpha-Fetoprotein (AFAFP), Serum Human Chorionic Gonadotropin, Unconjugated Estriol, Amniotic Fluid Acetylcholinesterase or other related markers for the purposes of congenital/genetic screening.

(2) All sections of Clinical Laboratory OAR 333-024-0005 through 333-024-0055 shall apply.

Stat. Auth.: ORS 438.320

Stats. Implemented: ORS 438.320

Hist.: HD 28-1988, f. & cert. ef. 12-7-88; HD 6-1995, f. & cert. ef. 9-13-95

333-024-0265
Procedure

(1) Prior to performing patient screening, the laboratory shall have available documentation of its expertise with the assays of MSAFP, AFAFP, Serum Human Chorionic Gonadotropin, Unconjugated Estriol, Amniotic Fluid Acetylcholinesterase or other related markers for the purposes of congenital/genetic screening.

(2) Each laboratory shall establish reference data based on the laboratory's own test results for normal MSAFP, AFAFP, Serum Human Chorionic Gonadotropin, Unconjugated Estriol, Amniotic Fluid Acetylcholinesterase or other related markers for medically applicable times throughout the pregnancy.

(3) When required for calculation or interpretation of results, protocols shall be developed and implemented for adjusting test values for variables such as: gestational age, maternal weight, diabetic status, race or other factors.

(4) At least annually, the laboratory shall:

(a) Review the most recent patient test results;

(b) Compare current patient test data to previous results to ascertain changes in the median and dispersion of values;

(c) Investigate the causes of variation;

(d) Make corrections as needed; and

(e) Calculate and review percentages of abnormal results.

(5) Laboratories shall obtain and use in the calculation and interpretation, where applicable, at least the following information on each patient:

(a) Date of birth;

(b) An accurate estimation of gestational age, and method used for this determination;

(c) Patient's weight at the time the sample was obtained;

(d) Whether the patient is an insulin-dependent diabetic (IDDM);

(e) Patient's racial extraction;

(f) Date sample was collected;

(g) Patient history of multiple gestations; and

(h) Other pertinent medical information.

(6) The multiples of the median (MOM) shall be calculated using the laboratory's own reference data for each medically applicable time during gestation.

(7) Patient reports shall include information as indicated in section (5) of this rule. Additional information shall include:

(a) Defects screened for;

(b) Risk or cutoff used for determination of abnormal results;

(c) Interpretation of results; and

(d) Any other medically relevant information necessary for the interpretation of results.

(8) Policies shall be established for timely reporting of all results to the individual authorized to receive the patient's results.

Testing for Substances of Abuse

333-024-0305
Purpose and Scope

OAR 333-024-0305 through 333-024-0365 are for the purpose of carrying out ORS 438.435 regarding substance of abuse testing in order to protect the people of the State of Oregon. OAR 333-024-0315 through 333-024-0350 establishes a regulatory program for laboratories performing medical testing or non-medical testing by automated methods to ensure the quality of testing. OAR 333-024-0360 sets standards for substance of abuse testing in correctional institutions or programs. OAR 333-024-0365 establishes a registry for entities performing non-medical substance of abuse screening using easily portable screening tests.

Stat. Auth.: ORS 438.050, 438.130, 438.435(2), (4), (5) & (6)

333-024-0310
Definitions

(1) "Benefit" means, but is not limited to, eligibility for insurance or employment, access to or participation in a drug rehabilitation or mental health program, parole or probation, school attendance or attendance in school activities.

(2) "Chain of custody" or "custody chain" means the handling of specimens in a way which supports legal testimony to prove that the sample integrity and identification of the sample have not been violated, as well as the documentation describing these procedures from specimen collection to final report.

(3) "Confirmatory test" means a highly specific test to identify a substance of abuse or metabolite after a positive screening, based on a different analytical method than that of the initial screening test, at or below the cutoff concentration used for the screening test.

(4) "Control" means a material, the expected testing results of which are known, which is analyzed to ensure that the expected results are obtained.

(5) "Cutoff concentration" means the mass of a substance of abuse per unit volume of specimen, at or above which a test result is considered positive.

(6) "Director of a substances of abuse screening laboratory" or "Director" means the person who plans, organizes, directs and participates in any or all of the technical and administrative operations of a substances of abuse laboratory, including but not limited to reviewing laboratory procedures and their results, and the training and supervising of laboratory personnel.

(7) "Drug control manager" means the individual who works for the inspector general of the Department of Corrections, and oversees drug interdiction efforts of the Oregon Department of Corrections. This includes supervision of urine drug screening.

(8) "Easily portable screening test" means manual, non-automated, substance of abuse methods\kits.

(9) "Entity" means an individual, partnerships, corporation, company, district, local\county\state agency. An entity may be multiple sites under common ownership.

(10) "Local correctional facility" means any institution or facility used specifically for the confinement of inmates operated by a city or county.

(11) "Medical testing" means any test performed at the request of a physician, dentist, or other licensed health care professional for diagnosis and treatment or assessment of health, including testing for rehabilitation or placement into a rehabilitation or mental health program.

(12) "Non-medical testing" means substance of abuse (SOA) screening not for diagnosis and treatment or assessment of health, with or without an order from a physician, dentist or other licensed health care professional, including but not limited to, employment, pre-employment, on the job accident or injury, screening of students in schools, testing for insurance eligibility or eligibility for plasmapheresis.

(13) "Operator of a substance of abuse on-site screening facility" or "operator" means the person who plans, organizes, directs and participates in any or all of the technical and administrative operations.

(14) "Owner of a substances of abuse screening laboratory" or "Owner" means a person who owns the laboratory, or the State, county or municipality operating the laboratory, or the owner of any institution operating the laboratory or any non-profit organization operating the laboratory.

(15) "Parole, probation and post-prison supervision" means any program operated for offenders by the Department of Corrections or local correctional agencies.

(16) "Proficiency testing" means performance of tests on specimens whose expected results are unknown to anyone in the laboratory, known only to an external agency, and later revealed to the laboratory as an aid to laboratory improvement and/or a condition of licensure.

(17) "Quality control" means methods used to monitor the performance of laboratory tests to detect errors and prevent the reporting of incorrect results.

(18) "Screening" means performing initial tests designed to separate substances of abuse at a particular minimum concentration from those below that minimum concentration (positive versus negative).

(19) "Special category laboratory" means a laboratory that initially screens urine, blood, or other body fluids for substance of abuse, but does not perform confirmation testing by any method.

(20) "Specimen" means body fluids obtained from a live person.

(21) "Standard" means an authentic sample of the analyte of known purity, or a solution of the analyte of a known concentration.

(22) "State correctional facility" means any institution operated by the Oregon Department of Corrections.

(23) "Substances of abuse" or "SOA" means ethanol and controlled substances, except those used as allowed by law and as defined in ORS Chapter 475 or as used in ORS 689.005.

(24) "Substances of abuse on-site screening facility" or "on-site facility" means a location where on-site tests are performed on specimens for the purpose of screening for the detection of substances of abuse.

(25) "Substances of abuse on-site screening test" or "on-site test" means a substance of abuse test that is easily portable and is approved by the Food and Drug Administration for commercial distribution or an alcohol screening test that meets the requirements of the conforming products list found in the **United States Department of Transportation National Highway Traffic Safety Administration Docket No. 94-004** and meets the standards of the **United States Department of Transportation Alcohol Testing Procedure**, **49 C.F.R. part 40**, in effect on October 23, 1999.

(26) "Substances of abuse screening laboratory" or "SOA laboratory" means a facility where initial biochemical examinations are performed on a specimen for the purpose of screening for the detection of substances of abuse for medical purposes or non-medical purposes by automated methods. This includes licensed clinical laboratories screening for substances of abuse.

(27) "Substance of abuse testing program manager" means an individual who is responsible for all aspects of SOA testing in the facility including the quality control, proficiency testing, method selection, equipment maintenance, training, record keeping, and qualifications of individuals performing substance of abuse testing at each state or local correctional facility or parole, probation office site.

333-024-0315
Licensure

(1) It shall be unlawful:

(a) For any owner or director of a SOA or a clinical laboratory to perform medical or automated non-medical SOA screening tests without a license issued under this rule unless they have been certified for that testing under the Clinical Laboratory Improvement Amendments of 1988, Public Law 100-578, 42.U.S.C. 201 and 263a;

(b) For any person to serve in the capacity of director of an SOA screening laboratory without being qualified as a laboratory director under OAR 333-024-0320(1).

(2) OAR 333-024-0305 through 333-024-0350 apply to all SOA screening laboratories and laboratory personnel within the State of Oregon, except:

(a) Laboratories screening for SOA operated by the United States Government;

(b) Laboratories screening for SOA operated and maintained solely for research or teaching purposes, and that involve no direct patient or public health services;

(c) State Police laboratories screening for SOA as a part of the criminal justice system;

(d) Special category laboratories operated by state or local correctional agencies to monitor inmates and offenders on parole, probation, or post-prison supervision. These special category laboratories must follow the provisions of OAR 333-024-0360.

(3) The Division shall issue and renew licenses to the owners of laboratories screening for SOA who demonstrate to the satisfaction of the Division that:

(a) The SOA laboratory is in compliance with ORS 438.435;

(b) The SOA laboratory is equipped to perform within the scope of its license;

(c) The SOA laboratory meets the standards of the Division for safety, sanitary conditions, plumbing, ventilation, handling of specimens, maintenance of equipment and requirements of general hygiene to ensure protection of the public health.

(4) Requirements for license application; fees, exemptions, expiration; and renewal are as follows:

(a) The application for a license for an SOA screening laboratory shall be made on forms provided by the Division and shall be executed by the owner or one of the owners or by an officer of the firm or corporation owning the laboratory, or in the case of a county or municipality, by the public official responsible for operation of the SOA laboratory, or in the case of an institution, by the administrator of the institution. The application shall contain the names of the owner, the director or directors of the laboratory, the location and physical description of the SOA laboratory, and such other information as the Division may require;

(b) Laboratories must pay an annual or biennial, nonrefundable license fee, prior to issuance of a license, as described in OAR 333-024-0012(5)(c);

(c) A laboratory certified in toxicology for medical substance of abuse testing under the **Clinical Laboratory Improvement Amendments of 1988, Code of Federal Regulations, Part 493 — Laboratory Requirements**, may also perform that testing for non-medical purposes. No separate substance of abuse screening license or registry is required;

(d) Unless sooner voided, suspended or revoked, all licenses issued under this section expire on June 30 of the one or two year cycle following the date of issuance and shall be renewable in the manner prescribed by the Division;

(e) All monies received by the Division for the licensure of SOA screening laboratories shall be credited to the Division account and shall be used for payment of the expenses of the Division in administering OAR 333-024-0005 through 333-024-0350.

(5) A license issued to the owner of an SOA screening laboratory shall show on its face the names of the owners and directors, the location of the laboratory and the laboratory specialty authorized under the license. The license shall be displayed at all times in a prominent place in the laboratory.

(6) A license issued to the owner of an SOA screening laboratory is not transferable. The license of the SOA laboratory is voided 30 days after a change of its director if it has only one director or if all directors change or a change in the ownership or in the location of the laboratory. In the case of death of a director, the Division shall be notified within five working days. The laboratory shall have 30 days to obtain another qualified director.

(7) Subject to ORS 183.310 to 183.550, the Division may refuse to issue or renew the license or may suspend or revoke the license of any SOA laboratory, if it finds that the owner or director has:

(a) Intentionally made false statements on an application for an SOA laboratory license or any other documents required by the Division, or made any misrepresentation in seeking to obtain or retain a license;

(b) Demonstrated incompetence as defined in OAR 333-024-0325;

(c) Intentionally falsified any report;

(d) Referred a specimen, for examination, to an unlicenced clinical or SOA laboratory in this state, or a laboratory out of state not certified by the **Clinical Laboratory Improvement Amendments of 1988, Code of Federal Regulations, Part 493 — Laboratory Requirements**, or an equivalent out of state laboratory, unless the laboratory is exempt under section (2) of this rule;

(e) Misrepresented the scope of laboratory service offered by the SOA laboratory or the laboratory specialty authorized by the license;

(f) Rendered a substances of abuse report performed in another laboratory without designating the name and address of the laboratory in which the test was performed;

(g) Knowingly had professional connection with or permitted the use of the name of the licensed laboratory or its director by a laboratory which is required to but has not obtained a license;

(h) Failed to perform or cause to be performed within the time specified, analysis of test samples as stated in OAR 333-024-0340 or failed to report on the results of such analysis within the specified time;

(i) Failed to permit within a reasonable time the entry or inspection as stated in OAR 333-024-0340(2) and (4);

(j) Failed to continue to meet the requirements of this rule, inclusive; and

(k) Violated any provision of OAR 333-024-0305 through 333-024-0350.

(8) Owner shall be responsible for all aspects of the laboratory.

(9) The substance of abuse screening laboratory must be in compliance with requirements of the **Clinical Laboratory Improvement Amendments of 1988, Code of Federal Regulations, Part 493 — Laboratory Requirements**, if medical testing for substances of abuse is performed.

(10) Entities performing only manual, non-automated SOA screens using easily portable screening tests must register with the Division and meet the requirements at OAR 333-024-0365.

(11) Licensed clinical laboratories or SOA screening laboratories performing a combination of medical and manual, non-medical SOA screens are not required to register with the Division and must meet the requirements of OAR 333-024-0365(5)(e) when performing tests which qualify for SOA registration.

(12) Licensed clinical laboratories performing only manual, non-medical SOA screens using easily portable screening tests must register with the Division and meet the requirements of OAR 333-024-0365.

(13) Laboratories certified under the **Clinical Laboratory Improvement Amendments of 1988, Code of Federal Regulations, Part 493 — Laboratory Requirements**, that perform medical and non-medical substance of abuse screening, must comply with 333-024-0305 through 333-024-0350 and 333-024-0365(5)(e).

333-024-0320
Qualifications and Responsibilities of Directors

(1) The director of a substances of abuse screening laboratory shall meet one of the following qualifications:

(a) Is a pathologist certified in clinical pathology by the American Board of Pathology, the American Osteopathic Board of Pathology, or is eligible for such certification;

(b) Is a physician with two or more years of clinical chemistry experience, with one year in toxicology;

(c) Has an earned degree of Doctor of Science (ScD), Doctor of Public Health (DrPH) or Doctor of Philosophy (PhD) in chemistry or biochemistry and has two or more years of clinical chemistry training or experience with one year in toxicology;

(d) Is certified or is eligible for certification by the American Board of Clinical Chemistry or by the American Board of Forensic Toxicology;

(e) Has an earned master of science degree in medical technology, chemistry, or biochemistry and has three or more years of clinical chemistry training or experience, with one year of pertinent experience in toxicology;

(f) Has a bachelor of science, bachelor of technology or bachelor of arts degree in medical technology, chemistry or biochemistry, and has four or more years of clinical chemistry training or experience, with one year experience in toxicology;

(g) Has directed substance of abuse screening for at least 12 months within the four years preceding January 1, 1987, and has at least two years of pertinent experience in toxicology.

(2) The director of an SOA screening laboratory shall be responsible for the quality of the work. This shall include, but not be limited to, the following:

(a) Monthly review and documentation of quality control data;

(b) Review and documentation of external proficiency testing within 30 days of receipt of the final report;

(c) Review and documentation of procedure manuals and relevant texts initially and also whenever there is a change in method or policy;

(d) Validation of new procedures prior to reporting test results;

(e) Review and documentation of preventive maintenance of equipment;

(f) Review of additional quality assurance items;

(g) Assure that qualified technical personnel perform the tests; and

(h) Assure the competency of all testing personnel annually.

(3) The director of an SOA screening laboratory shall require the submitter to indicate the need for confirmatory testing as described in ORS 438.435(6).

(4) A person shall not serve individually as director of more than five substances of abuse screening laboratories.

(5) Those individuals qualifying under 333-024-0320(1)(g) must have applied to the Division by January 1, 1989.

Stat. Auth.: ORS 438.050, 438.130, 438.435(4), 438.435(5) & 438.435(6)

333-024-0325
Incompetence

An SOA laboratory owner or director has "demonstrated incompetence" if there is:

(1) Repeated error demonstrated in the performance of laboratory tests or procedures or the results thereof;

(2) Failure to comply with the requirements of OAR 333-024-0335 and 333-024-0340 relating to internal and external quality control;

(3) Failure to comply with ORS 438.435 or any regulations pertaining to the laboratory;

(4) Work assigned to personnel not qualified to perform in that specialty;

(5) Repeated erroneous reporting of test results.

333-024-0330
Specimen Collection, Chain of Custody, Records, and Reports

(1) The specimen container shall be clean, tightly sealed and free of any interfering substance. It shall be transported and stored in such a manner as to preserve the integrity and security of the specimen.

(2) The specimen container shall be permanently labeled with time and date of collection and atleast one of the following:

(a) The name of the person from whom the specimen was taken, if available;

(b) Social security number;

(c) Employee number;

(d) Unique identifying number.

(3) The initial request form, used by the person requesting the test, must have a statement indicating whether, if positive, the test results are to be confirmed as required under ORS 438.435(7).

(4) For those specimens requiring a confirmatory test, a record shall be made of the following:

(a) Time and date of collection;

(b) Identity of the individual receiving the specimen; and

(c) Manner by which the specimen was sent to the laboratory, including the name of the commoncourier or the individual delivering the specimen.

(5) Any laboratory receiving or referring the specimen shall keep for a minimum of two years a record of the following:

(a) The condition under which the specimen was collected or received and results of tests or information to rule out adulteration of the specimen;

(b) The date, time and one of the unique identifications from the specimen label;

(c) Time and date received and referred;

(d) Laboratory accession number;

(e) Condition of the specimen;

(f) The name of the company or individual requesting the test; and if positive, whether the specimen requires confirmatory testing as described in OAR 333-024-0345(1);

(g) The type of test performed;

(h) The results of the tests and controls in units of measurement where applicable; and the type and concentration of standard(s) used in testing;

(i) Storage of specimen before and after screening;

(j) The signature, initials, or identification of the testing personnel;

(k) Date and time the tests were completed; and

(l) The name of the clinical laboratory performing the confirmatory testing if required under OAR 333-024-0345(1).

(6) Clinical and substance of abuse screening laboratories may examine specimens submitted by persons other than medical personnel authorized by law and shall report the result of any test to the person or company who requested the test except as indicated in number (7) of this rule.

(7) A copy of the SOA test results must be provided to the employee or pre-employee from whom the specimen was collected, after the employee or pre-employee submits a written request and proof of identity to the laboratory.

(a) When a written request is given to the laboratory in person:

(A) The employee or pre-employee must present two proofs of identity to the laboratory, which must include one of the following picture identification cards: state driver's license, state identification card, passport or a resident alien card from the U.S. Department of Immigration and Naturalization Service.

(B) The employee or pre-employee must sign and date a form for release of laboratory records.

(b) When a written request for SOA test results is received by mail:

(A) The request must be accompanied by a signed and dated form for release of laboratory test results and a notarized statement of the employee's or pre-employee's identity and mailing address.

(B) The laboratory will make a copy of the pertinent SOA test results and send this copy by registered or certified mail, or other bonded courier that would assure the confidentiality of the results, to the address requested by the notarized statement.

(c) A copy of the signed release form and picture identification, or the notarized statement, shall be maintained by the laboratory for two years.

Stat. Auth.: ORS 438.435

333-024-0335
Internal Quality Assurance

(1) Laboratory procedure manuals and relevant texts of appropriate current laboratory methods shall be available for the use of the personnel in the laboratory.

(2) Each instrument system shall be calibrated according to the manufacturer's specifications and the calibrations shall be checked and recorded at intervals compatible with the proper operation of that instrument.

(3) Quality control requirements:

(a) Automated: At least one positive and one negative standard or control shall be included with the frequency recommended by the manufacturer; or at a frequency documented to assure the stability of the analytical method; but no less than once per day of testing.

(b) Manual:

(A) Test kits without positive and negative procedural controls, the laboratory must run at least one positive and one negative standard or control each day of testing for each analyte;

(B) Test kits with positive and negative procedural controls, the laboratory must run at least one positive and one negative standard or control with each lot/shipment and at least once per month for each analyte tested. Results of internal procedural controls must be documented with each sample tested.

(4) A permanent logbook or computer printout shall be kept and include patient/client name or unique identifier, date of test performance, quality control, reagent lot number, temperature, testing analyst, screening result and evidence for referral for confirmation, if applicable.

(5) Each analyst must annually demonstrate testing proficiency and interpretive competency for each analyte tested by proficiency testing internal blind samples.

(6) For each method, the minimum detectable limit for each substance tested must be on the report or in a letter of agreement between the laboratory and the client.

(7) Cutoffs at the minimal detectable range must be verified with a control when there is a lot change or major instrument maintenance.

(8) For each method, whether automated or manual, data shall be recorded and available to document the results on routine precision.

(9) Limits for controls shall be clearly stated and recorded. The corrective action taken when analyses are outside these control limits shall be clearly stated and recorded. The control limits shall be set so that reliable results are assured. Values for standards shall be clearly stated and recorded.

(10) Quality control results shall be recorded and retained in the laboratory for 2 years.

(11) Solid and liquid reagents, reagent solutions, standards and controls, if prepared in the laboratory, shall be calibrated and dispensed in a manner so as to ensure accuracy of results.

(12) All reagents and solutions shall be labeled to indicate identity, preparation date, expiration date, lot number, and storage conditions. No reagents or solutions may be used beyond their expiration date.

(13) The laboratory shall have a written procedure for chain of custody.

Stat. Auth.: ORS 438.435
Stats. Implemented: ORS 438.320 & 438.435
Hist.: HD 28-1988, f. & cert. ef. 12-7-88; HD 20-1994, f. & cert. ef. 7-20-95; HD 6-1995, f. & cert. ef. 9-13-95; HD 13-1997, f. & cert. ef. 10-16-97; OHD 9-2000, f. & cert. ef. 11-3-00

333-024-0340
External Quality Control (Proficiency Testing Program and On-Site Inspections)

(1) Licensed SOA laboratories shall:

(a) At the laboratory's own expense, be required to participate satisfactorily in the proficiency testing programs of the College of American Pathologists, or the American Association of Bioanalysts, or such other substantially equivalent testing program as may be approved by the Division involving substances of abuse testing and make available to the Division all test results;

(b) Be required to participate satisfactorily if required in the proficiency testing programs conducted by the Division involving substances of abuse testing;

(c) Analyze test samples submitted by the Division prior to, during, or subsequent to inspection if requested to the Division;

(d) Achieve satisfactory results on test samples in agreement with reference laboratories or within stated acceptable limits and which results shall be reviewed by the Division. Continued or consistent failure two out of three periods may result in the laboratory's license being withdrawn by the Division until satisfactory performance is demonstrated; and

(e) Ensure that proficiency samples are tested by regularly assigned personnel using routine methods. A specified time shall be allowed for such testing and reporting of results.

(2) Biennial on-site inspections may be conducted by representatives of the Division at reasonable times during the laboratory's normal business hours without advance notice. The representative shall inspect the facilities, personnel policies, procedures, materials, staff qualifications, equipment and records.

(3) The owner or director of an SOA laboratory may be required to submit reports on the operations and procedures of the laboratory.

(4) Additional inspections may be performed without notice to verify correction of deficiencies, investigate complaints, review unsatisfactory proficiency testing and verify personnel qualifications or other monitoring of compliance with OAR 333-024-0305 through 333-024-0350.

333-024-0345
Confirmatory Testing

(1) When the substances of abuse screening laboratory obtains a positive test result and the submitter indicates the result is to be used to deprive or deny any person any employment or any benefit, that same specimen must be submitted and confirmed prior to the release of the screening results. When performed within the State of Oregon, the confirmatory testing shall be by a clinical laboratory licensed under ORS 438.110 and 438.150 or certified under the **Clinical Laboratory Improvement Amendments of 1988**, **Public Law 100-578**, **42 U.S.C. 201 and 263a** for that testing. The confirmatory testing shall be as described in section (4) of this rule.

(2) The administrator of the Division shall appoint a substances of abuse methods panel to recommend approval of methods used to confirm the presence of substances of abuse. The panel shall be composed of individuals from laboratories performing substances of abuse testing and shall include, but not be limited to, representatives from the Oregon State Police Crime Laboratory, laboratories

licensed under ORS Chapter 438, and the Oregon Health Sciences University.

(3) Any scientifically tested method for substances of abuse analysis may be submitted to the Division, for approval, by written request from a manufacturer, laboratory, or other party. Each candidate method shall be evaluated as to its capacity for accuracy by the panel, with recommendation based thereon, by one or more of the following means:

(a) Government or independent studies of the method's accuracy;

(b) Comparative data on proficiency test performance of various methods;

(c) Application of the method by panel members in performance of analysis; or

(d) Other means as determined by the Division.

(4) The following methods of chemical analysis to determine substances of abuse have been approved:

(a) Chromatography;

(b) Immunoassay;

(c) Spectroscopy;

(d) Mass spectroscopy.

(5) The confirmatory test shall be performed by a different analytical method from that used for the initial screening test.

333-024-0350
Equipment and Facilities

(1) All equipment shall be maintained in good working order, checked routinely, and precisely calibrated.

(2) Work bench space shall be ample, clean, well-organized, well-lighted, and convenient to sink, water and electrical outlets.

(3) The SOA laboratory shall be ventilated to protect the health of the personnel and patients against accidental release of hazardous vapors or aerosols.

(4) The premises shall be free from unnecessary physical, chemical, and biological hazards.

(5) Electrical equipment shall be maintained in a safe condition with regards to shock and fire hazards. All electrical equipment, except battery operated, shall be grounded. Protective fuses shall not be bypassed.

(6) Caustic, explosive and flammable materials shall carry labels to indicate their nature and shall be placed in containers and stored in locations which are suitable to ensure stability, purity, and safety as is necessary regarding the material involved.

Stat. Auth.: ORS 438.110, 438.320 & 438.435

333-024-0360
Special Category Laboratories

(1) The rules in this section set standards for special category screening laboratories, as authorized in ORS 438.435(4), (6) and (7). These rules apply to the testing of inmates within state and local correctional facilities and to the testing of offenders on parole, probation, or under post-prison supervision.

(2) Special category laboratories as defined in this rule must use only manual or automated substance of abuse screening methods approved by the U.S. Food and Drug Administration. Any alcohol screening test must meet the requirements of the conforming products list found in the **United States Department of Transportation National Highway Traffic Safety Administration Docket No. 94-004** and meets the standards of the **United States Department of Transportation Alcohol Testing Procedure**, **49 C.F.R. part 40**, in effect on October 23,1999.

(3) Individuals who perform screening tests for substances of abuse must complete a training course offered by the manufacturer or provider of the test, an educational facility, or training provided by the Department of Corrections Drug Control Unit with curriculum acceptable to the Public Health Division. No testing is to be performed prior to the completion of this training. A certificate of satisfactory completion, including the dates and hours of training completed, shall be kept by the SOA testing program manager at each facility and parole office. A copy shall also be on file with the Drug Control Manager at the Department of Corrections.

(4) Protocols, procedures, and records of all testing shall be maintained as described in this section and shall be followed:

(a) Each local and state correctional facility or parole office shall have a designated substance of abuse program manager who shall assure that:

(A) Written policies established by the Department of Corrections are followed regarding specimen collection, specimen identification, and chain of custody, as defined in OAR 333-024-0310(2);

(B) Written procedure manuals are available to testing individuals, and that the written procedures require following the manufacturer's testing protocol. The written procedures must describe the test limitations and the use of approved standards and quality control, as defined in OAR 333-024-0310(4) and (21).

(C) There is a written record of the:

(i) Date and time the specimen was obtained;

(ii) Date and time the test was performed;

(iii) Lot number of the test kit used, test results, including the results of controls;

(iv) Signature or initials of the analyst.

(b) Quality control procedures as described in this subsection shall be followed:

(A) Each instrument shall be calibrated according to the manufacturer's specifications, with each new lot or shipment of reagents, and after major maintenance;

(B) For manual methods, known positive and negative controls, as defined in OAR 333-024-0310(4), shall be included with each batch of tests or with every ten samples for each analyte of each kit. Known positive and negative controls must be run with each lot shipment, and at least once per month, if internal procedural controls are included with each test;

(C) For automated instruments, a positive and negative control, as defined in OAR 333-024-0310(4) shall be included at least once per day of use, or following each tenth sample analyzed;

(D) All calibration and control data shall be recorded;

(E) The minimum detectable limit of the analytical method for each substance tested shall be available;

(F) Limits for controls shall be clearly stated and recorded. The corrective action taken when analyses are outside these control limits shall be clearly stated and recorded;

(G) No reagent shall be used beyond its expiration date;

(H) A record shall be kept of each testing individuals' quality control performance. This record will be reviewed by the SOA program manager at least every six months;

(I) Each local and state correctional facility, parole, probation, and post prison program shall be required to participate satisfactorily in a proficiency testing program, as defined in OAR 333-024-0310(16). The proficiency testing programs available from the College of American Pathologists, or the American Association of Bioanalysts, or other proficiency testing program acceptable to the Public Health Division may be used;

(J) Proficiency testing results and control data shall be reviewed every six months by the SOA program testing manager, and corrective action shall be taken and documented when appropriate. A copy of the report and corrective action must be sent to the Drug Control Manager of the Department of Corrections for review.

(c) If an initial test shows a result indicating the presence of a substance of abuse in the body, a confirmatory test shall be conducted in a licensed clinical laboratory, or a laboratory certified for that testing under the **Clinical Laboratory Improvement Amendments of 1988**, **Code of Federal Regulations Part 493 — Laboratory Requirements**, or an equivalent out of state laboratory, if the results are to be used to deprive or deny any person of any benefit, probation, or parole except as described in ORS 438.435(7).

(d) If any test for substances of abuse is performed outside this state the results of which are used to deprive or deny any person any benefit, the person desiring to use the test shall have the burden to show that the testing procedure used meets or exceeds the testing standards of this state.

Stat. Auth.: ORS 438.050, 438.130, 438.435(4), 438.435(5) & 438.435(6)

333-024-0365
Substance of Abuse Registration

(1) It shall be unlawful for any entity to perform any on-site test for non-medical substance of abuse screening tests prior to filing a registration form with the Division and payment of the registration fee, except laboratories:

(a) Owned and operated by the U.S. Government;

(b) Performing pure research;

(c) Performing substance of abuse tests for forensic purposes only;

(d) Performing substance of abuse tests from autopsy specimens;

(e) Identified as teaching facilities only training students in test performance;

(f) Owned and operated by the Oregon State Police performing substance of abuse screens for forensic purposes.

(2) SOA registration is not transferable to another entity.

(3) It shall be unlawful for a registered substance of abuse entity to perform medical testing.

(4) Clinical and SOA screening laboratories must meet the requirements under (5)(e) of this rule when performing tests which qualify for SOA registration.

(5) Registration shall be on a form provided by the Division and shall contain:

(a) The entity name and address;

(b) Name of legal owner and tax identification number;

(c) Telephone number;

(d) Name of individual contact at each on-site facility operated by the entity; and

(e) Signature of the operator certifying that:

(A) Only SOA kits approved by the Food and Drug Administration (FDA) or alcohol screening tests that meet the requirements of the conforming products list found in the **United States Department of Transportation National Highway Traffic Safety Administration Docket No. 94-004** and meet the standards of the **United States Department of Transportation Alcohol Testing Procedure**, **49 C.F.R. part 40**, in effect on October 23, 1999, are used;

(B) Tests are administered according to the manufacturer's package insert;

(C) Custody chain procedures are written and followed;

(D) Operators of the SOA on-site screening facility are trained in the use of the SOA screening tests by the manufacturer; and

(E) When the SOA on-site facility obtains a positive result on a specimen and the entity indicates that the test result is to be used to deny or deprive any person of employment or any benefit, or may otherwise result in adverse employment action, the same specimen shall be submitted to a clinical laboratory licensed under ORS 438.110 or 438.150, or certified under the **Clinical Laboratory Improvement Amendments of 1988, Public Law 100-578**, **42 .U.S.C. 201 and 263a** for that testing, or an equivalent out of state laboratory and the presence of a substance of abuse confirmed, using a different analytical method, prior to the release of the on-site test result.

(6) Evidence of registration with the Division shall be posted at the entity location shown on the registration form and at each on-site facility.

(7) The annual fee for filing a registration form with the Division is $50 for each entity. The fee cycle shall be January 1 through December 31, beginning 1998.

(8) All monies received by the Division for the registration of SOA entities shall be credited to the Division account and shall be used for payment of the expenses of the Division in administering OAR 333-024-0365.

(9) A list of registered entities is available, upon request, from the Division.

(10) SOA entities may examine specimens submitted by persons other than medical personnel and shall report the result of any SOA test to the person or company who requested the test except as indicated in number (11) of this rule.

(11) A copy of the SOA test results must be provided to the employee or pre-employee from whom the specimen was collected, after the employee or pre-employee submits a written request and proof of identity to the registered SOA entity.

(a) When a written request is given to the SOA entity in person:

(A) The employee or pre-employee must present two proofs of identity to the registered SOA entity, which must include one of the following picture identification cards: state driver's license, state identification card, passport or a resident alien card from the U.S. Department of Immigration and Naturalization Service.

(B) The employee or pre-employee must sign and date a form for release of laboratory records.

(b) When a written request for SOA test results is received by mail:

(A) The request must be accompanied by a signed and dated form for release of laboratory test results and a notarized statement of the employee's or pre-employee's identity and mailing address.

(B) The laboratory will make a copy of the pertinent SOA test results and send this copy by registered or certified mail, or other bonded courier that would assure the confidentiality of the results, to the address requested by the notarized statement.

(C) A copy of the signed release form and picture identification or the notarized statement, shall be maintained by the registered SOA entity for two years.

Health Screen Testing

333-024-0370
Purpose

OAR 333-024-0370 through 333-024-0400 are for the purpose of carrying out ORS 438.010(8); 438.060; 438.130(2); 438.150(5), (6) and (7). The purpose of the rules is to regulate the quality of health screen testing and to govern the issuance of permits to perform this type of testing.

Stat. Auth.: ORS 438.010(10), 438.060, 438.130(2), 438.150(5), (6) & (7)
Stats. Implemented: ORS 438.060, 438.130, 438.150 & 438.310

333-024-0375
Definitions

Except as provided in this section, definitions in OAR 333-024-0010 are applicable to OAR 333-024-0370 through 333-024-0400. Additionally:

(1) "Clinician" means a nurse practitioner licensed and certified by the Oregon State Board of Nursing, or a physician assistant licensed by the Board of Medical Examiners for the State of Oregon.

(2) "Health Screen Testing" means tests performed without a physician's or clinicians's order for the purpose of identifying health risks, providing health information, and referring the person being tested to medical care.

(3) "Health Screen Testing Service" means a service providing health screen testing.

(4) "Health Screen Testing Site" means the permanent location, temporary site or mobile vehicle where health screen testing is performed.

(5) "Human Chorionic Gonadotropin (HCG)" means a hormone produced by the placenta which appears in serum and urine and may be an indication of pregnancy.

(6) "Operator" means the person (e.g., individual, corporation, political subdivision, etc.) which operates the health screen testing service.

(7) "Person" includes individuals, corporations, associations, firms, partnerships and joint stock companies.

(8) "Pertinent Laboratory Experience" means the activity of performing laboratory testing or directing the performance of testing in human clinical chemistry.

(9) "Site Day" means the 24-hour period during which, either all or part of the time, testing is performed at a specific location.

Stat. Auth.: ORS 438.010(10), 438.060, 438.130(2), 438.150(5), (6) & (7)
Stats. Implemented: ORS 438.010, 438.060, 438.130 & 438.150
Hist.: HD 16-1990, f. & cert. ef. 6-15-90; HD 6-1995, f. & cert. ef. 9-13-95; OHD 9-2000, f. & cert. ef. 11-3-00

333-024-0380
Permits

(1) Any person who operates a health screen testing service must obtain a permit from the Division.

(2) OAR 333-024-0370 through 333-024-0400 apply to all health screen testing services and their personnel within the State of Oregon except:

(a) Health screen testing services operated by the United States Government;

(b) Health screen testing performed in a physician's, or clinician's office for the purpose of diagnosis and treatment of their own patients;

(c) Health screen testing provided by an employer to employees if such employer contracts for the testingthrough a licensed physician, a clinical laboratory or a hospital, which is a health screen testing permittee of the Division;

(d) Screening provided by blood banks solely for assuring blood donor suitability;

(e) Health screen testing provided by local health departments; and

(f) Testing by grantee agencies for the purpose of establishing eligibility for programs administered by Oregon Health Authority, Public Health Division.

(3) All out-of-state laboratories performing health screen testing services in Oregon must obtain a permit and meet requirements of OAR 333-024-0370 through 333-024-0400.

(4) The Division will, upon application and payment of the required fee, issue and renew permits to the operators of health screen testing services who demonstrate to the satisfaction of the Division that:

(a) The health screen testing service is equipped to perform within the scope of its permit; and

(b) The health screen testing service meets the rules of the Division for quality assurance procedures, proficiency testing, personnel qualification and standards of counseling and referral of persons being served, as more particularly set out in OAR 333-024-0370 through 333-024-0400.

(5) The permit authorizes the operation of the health screen testing service at those health screen testing sites identified in the application and at those sites identified in compliance with OAR 333-024-0385.

(6) The health screen testing service must have a permanent location in Oregon where the Division may review records, policies and testing procedures. The permit shall be kept at the permanent location. A copy of the permit shall be displayed at each testing site.

(7) A clinical laboratory certified under the **Clinical Laboratory Improvement Amendments of 1988 Code of Federal Regulations**, **Part 493 — Laboratory Requirements**, must meet the requirements of 333-024-0370 through 333-024-0400 for health screen testing, and pay the fee as required in (10)(c) of this rule, in order to perform testing in Oregon without a physician's or clinician's order.

(8) All health screen testing performed outside of a licensed clinical laboratory must have a permit, with the exception of those who qualify for exemption under section (2) of this rule.

(9) Unless sooner suspended or revoked, all permit(s) issued under this section expire on June 30 of even numbered years.

(10) Requirements for permit application and renewal are as follows:

(a) Beginning on and after January 1, 2000, the application for a permit to operate a health screen testing service shall be received by the Division at least 45 days prior to initial testing;

(b) The application for a permit shall be made on forms provided by the Division and shall be executed by the operator or authorized representative of the operator of the health screen testing service. The application shall contain the name(s) of the operator, and officers if applicable, of the health screen testing service, the director, the permanent location, health screen testing sites then known and other information as the Division may require;

(c) Health screen testing services must pay a biennial, nonrefundable permit fee of $150; and

(d) The health screen testing service must notify the Division of a change in owner, name or address of the permanent location within 30 days of the change.

(11) Permits may be suspended or revoked if the Division finds after hearing in accordance with ORS Chapter 183 for contested cases that:

(a) The facts represented to and relied upon by the Division in issuing the permit are other than represented and relied on;

(b) The required fee has not been paid; or

(c) The operator or director of the health screen testing service has violated any provision of OAR 333-024-0375 through 333-024-0400.

(12) The health screen testing service must also be in compliance with requirements of the **Clinical Laboratory Improvement Amendments of 1988**, **42 Code of Federal Regulations**, **Part 493 — Laboratory Requirements**.

333-024-0385
Testing Site Schedule

The health screen testing service shall, in writing, notify the Oregon Health Authority, Oregon State Public Health Laboratory (OSPHL) of the proposed testing site schedule. The schedule must be received at the OSPHL, at least 15 days prior to testing at each site. All changes and cancellations regarding this schedule must be reported to the OSPHL prior to testing date.

333-024-0390
Personnel Qualifications and Responsibilities

(1) Each health screen testing service shall have a director who shall meet at least one of the following qualifications:

(a) Is a Medical Doctor (MD) or a Doctor of Osteopathy (DO) licensed to practice in Oregon and has one or more years of pertinent clinical laboratory experience;

(b) Has an earned Doctor of Science (ScD) or Doctor of Public Health (DrPH) or Doctor of Philosophy (PhD) degree in chemistry, biochemistry, or other closely related science from an accredited institution, and has one or more years of pertinent clinical laboratory experience;

(c) Has an earned Master of Science degree in medical technology, chemistry, biochemistry, or other closely related science from an accredited institution, and has two or more years of pertinent clinical laboratory experience;

(d) Has a Bachelor of Science, Bachelor of Technology, or Bachelor of Arts degree in Medical Technology, Chemistry, or Biochemistry, from an accredited institution, or is a licensed phar-

macist, and has four or more years of pertinent clinical laboratory experience; or

(e) Has performed the duties of Director of a health screen testing service for at least six site days during the 12 months prior to January 1, 1990.

(2) The Director of a health screen testing service shall be responsible for the quality of the work. This shall include, but not be limited to:

(a) Monthly review and documentation of quality control data and instrument maintenance;

(b) The review and documentation of all external proficiency testing, if applicable;

(c) Review and sign procedure manuals and relevant texts initially, and also whenever there is a new procedure, change in method or policy;

(d) Validation of new procedures prior to reporting test results;

(e) Assurance that personnel have received the training in the tests they perform. This shall include documentation of:

(A) Procedure Manual review;

(B) Collection techniques;

(C) Observation and performance of test procedures;

(D) Calibration, quality control, and routine maintenance of equipment;

(E) Waste disposal;

(F) Infection control;

(G) Emergency procedures;

(H) Methods to maintain patient confidentiality;

(I) Patient counseling; and

(J) Proficiency testing.

(f) Assurance that each person tested receives counseling and referral.

(3) Persons wishing to qualify as Director under subsection (1)(e) of this rule must apply to the Division by December 31, 1990.

(4) The laboratory director may direct no more than a total of five laboratories.

(5) Moderate complexity testing requires a technical and clinical consultant as defined in OAR 333-024-0023(1).

(a) A director qualifying under OAR 333-024-0022(1)(a), (b), or (c) may act as the technical consultant.

(b) A director qualifying under OAR 333-024-0022(1)(a) may act as the clinical consultant.

(6) Technical and clinical consultants must fulfill the responsibilities listed in OAR 333-024-0023(1).

(7) All testing personnel must have at least an academic high school diploma or equivalent.

Stat. Auth.: ORS 438.010(10), 438.060, 438.130(2), 438.150(5), (6) & (7)

333-024-0395
Tests Performed

(1) The health screening testing service may perform only test procedures of waived or moderate complexity, as defined in OAR 333-024-010(24) and (16), from the following list of allowed tests.

(a) Blood hemoglobin;

(b) Packed red cell volume;

(c) Total cholesterol;

(d) Blood glucose;

(e) Blood in feces;

(f) Human chorionic gonadotropin;

(g) High density lipoprotein cholesterol. If the test is performed outside of a licensed clinical laboratory, only procedures not requiring a pre-precipitation step may be used;

(h) Triglyceride, only after an individual has fasted for 12 to 16 hours;

(i) Low density lipoprotein cholesterol by automated calculation using the Friedenwald equation.

(2) Permitted or licensed health screen testing services may perform testing defined in OAR 333-024-0395(1) at the patient's request, without an order from a physician or clinician.

Stat. Auth.: ORS 438.010(10), 438.060, 438.130(2), 438.150(5), (6) & (7)

333-024-0400
Quality Assurance

Quality Assurance shall be comprised of Internal Quality Control, Tests Reports and Records, Quality Assurance Activities, Safety, External Quality Control, Counseling and Referral:

(1) Internal Quality Control:

(a) Documentation of training of testing personnel as specified in OAR 333-024-0390(2)(e) shall be kept on file at the permanent location and made available to the Authority at the health screen testing site;

(b) Laboratory procedure manuals and relevant reference materials for current screening methods shall be available for the use of the personnel at the health screen testing site and permanent location and include:

(A) Specimen collection requirements;

(B) Specimen labeling requirements;

(C) Specimen preservation requirements;

(D) Principle and instructions for test performance;

(E) Quality control requirements, including criteria for reporting tests;

(F) Equipment calibration and maintenance procedures;

(G) Normal ranges and test limitations.

(c) Procedure manuals shall be reviewed by the Director;

(d) Performance of each instrument shall be validated according to the manufacturer's specification at each new site;

(e) At each site, standards or controls shall be run which cover the range of expected results and be included at least once per day of use per instrument, per each reagent lot in use, unless the instrument is not moved, in which case it may qualify for external controls with each lot shipment of reagent cartridges per manufacturer's instructions;

(f) When control values are outside the established acceptable range, patient test results shall not be reported;

(g) The following shall be clearly stated and recorded: limits for controls; correction action taken when analyses are outside control limits, and the values for the standards;

(h) For each screening test, data shall be recorded and available to document confirmation of accuracy and precision at least once every six months for each instrument;

(i) Instrument maintenance, reagent storage, and test performance shall be performed according to manufacturer's instructions and recommendations;

(j) Records shall be recorded and retained at each site, with each instrument, for six site days, then transferred to the permanent location for a period of at least two years for:

(A) Client results;

(B) Instrument performance and calibration if applicable;

(C) Quality control; and

(D) Preventive maintenance.

(k) If an instrument is borrowed, the testing permittee shall have the following information (for the past six site days) on each instrument:

(A) Instrument performance to include, but not be limited to, wavelength verification, linearity, and calibration, if applicable;

(B) Quality control; and

(C) Preventive maintenance.

(l) All reagents and solutions shall be labeled to indicate identity, preparation date, lot number, expiration date, and storage conditions as appropriate. No reagents or solutions may be used beyond their expiration date;

(m) All quality control and equipment maintenance records shall be reviewed by the Director each month of operation;

(2) Test reports and records shall include:

(a) Name and address of health screen testing service;

(b) Patient name and results of tests performed;
(c) Date test performed;
(d) Expected ranges;
(e) Initials of individual performing tests;
(f) If indicated, fasting or non-fasting;
(g) Documentation of referral to a licensed physician or clinician for counseling per section (6) of this rule if results are outside expected normal ranges;
(h) Health Screen Testing services must maintain records of patient name, address and test values for at least 2 years;
(i) Health Screen Testing laboratories performing moderate complexity testing must comply with the rules in OAR 333-024-0026(12) & (13) and 333-024-0035(1) and (2).
(3) Quality assurance activities:
(a) If the laboratory performs the same test using different methodologies or instruments, or performs the same test at multiple testing sites, the laboratory must have a system that twice a year evaluates and defines the relationship between test results using the different methodologies, instruments, or testing sites.
(b) If a laboratory performs tests that are not included in an approved proficiency testing program, the laboratory must have a system for verifying the accuracy of its test results at least twice a year.
(c) The health screen testing service shall establish a quality assurance plan and monitors; and document quality assurance activities for test reporting and referral, quality control assessment and annual personnel competency.
(d) Any health screen testing service which tests for triglycerides must clearly display at the testing site a notice that triglyceride testing can only be performed after an individual has fasted for 12 to 16 hours.
(4) Safety: Permitted health screen testing services shall assure that:
(a) Eating, drinking, smoking, or applying cosmetics are prohibited at the bench where specimen collection and sample testing is performed;
(b) Laboratory coats or other protective clothing are worn by health screen testing personnel;
(c) Skin puncture sites are cleansed with an appropriate disinfectant;
(d) Gloves designed for medical use for bloodborne pathogen protection are worn during the skin puncture and changed between clients;
(e) Gloves designed for medical use for bloodborne pathogen protection are worn during specimen handling and testing;
(f) Used lancets, needles and blood tubes are disposed of in impervious biohazard labeled containers;
(g) Other potentially infectious materials are disposed of in a biohazard labeled container; refer to the infectious waste rules under 333-018-0040 through 333-018-0070;
(h) Electrical equipment is maintained in a safe condition with regards to shock and fire hazards;
(i) Work surfaces are disinfected with a virucidal reagent after each blood spill, and prior to and after each day of testing.
(5) External Quality Control:
(a) Permitted health screen testing services shall:
(A) Assure proficiency testing is performed on each moderate or high complexity regulated analyte listed in the **Clinical Laboratory Improvement Amendments of 1988 (CLIA)**, **Subpart I**, available on request from the Authority.
(B) Meet the proficiency testing requirements as described in **CLIA 88**, **42 CFR**, **Part 493**, **Subpart H,** available on request from the Authority.
(C) Analyze test samples submitted by the Authority prior to, during, or subsequent to inspection if requested by the Authority and achieve a score of at least 80 percent.
(D) Notify the Authority within six months if the analysis of a test has been discontinued or added to patient testing.
(E) Notify the Authority of change of director, owner, name, and address of the permanent location within 30 days of the change.
(b) Surveys for compliance will be performed either onsite or as paper surveys and the entity will be required to submit documentation to the Authority that quality control and quality assurance activities and test records meet this rule. Onsite inspections may be conducted by representatives of the Authority at reasonable times during the health screen testing service's normal business hours without advance notice. The representative shall review the personnel policies, procedures, staff qualifications/training, equipment records, quality control, reports, specimen handling and waste disposal, as related to health screen testing activities.
(c) Additional inspections may be performed by the Authority or HCFA without notice to verify correction of deficiencies, investigate complaints, review unsatisfactory proficiency testing, perform validation surveys, verify personnel qualifications or other monitoring of compliance with OAR 333-024-0370 through 333-024-0400.
(6) Counseling and Referral: The health screen testing service shall provide or contract for counseling and medical referral policies for each person tested and shall include:
(a) The ranges of results expected for that test;
(b) The value or test range that is recommended nationally for each test performed;
(c) A list of possible health risks associated with abnormal results;
(d) The recommended action which a person should follow if the test results are outside the expected value or range; and
(e) Procedures and follow-up for critical values.

DIVISION 25

GENETIC INFORMATION AND PRIVACY

333-025-0100
Definitions

As used in these rules:
(1) "Anonymous research" means scientific or medical genetic research conducted in such a manner that any DNA sample or genetic information used in the research is unidentified. "Anonymous research" does not include research conducted in such a manner that the identity of such an individual, or the identity of the individual's blood relatives, can be determined by use of a code, encryption key or other means of linking the information to a specific individual.
(2) "Biological sample" means any human biological specimen that may be used as a DNA sample.
(3) "Blanket informed consent" means that the individual has consented to the use of that individual's DNA sample or health information for any future research, but has not been provided with a description of or consented to the use of the sample in genetic research or any specific genetic research project.
(4) "Blood relative" means a person who is:
(a) Related by blood to an individual; and
(b) A parent, sibling, son, daughter, grandparent, grandchild, aunt, uncle, first cousin, niece or nephew of the individual.
(5) "Clinical" means relating to or obtained through the actual observation, diagnosis, or treatment of patients and not through research.
(6) "Coded" means identifiable only through the use of a system of encryption that links a DNA sample or genetic information to an individual or the individual's blood relative. A coded DNA sample or genetic information is supplied by a repository to an investigator with a system of encryption.
(7) "Covered entity," as applied to a health care provider, means a health care provider that transmits any health information in electronic form to carry out financial or administrative activities in connection with a transaction covered by ORS 192.518 to 192.524.

(8) "Deidentified" means lacking, or having had removed, the identifiers or system of encryption that would make it possible for a person to link a biological sample or health information to an individual or the individual's blood relative, and neither the investigator nor the repository can reconstruct the identity of the individual from whom the sample or information was obtained. DNA samples and genetic information will be considered deidentified only if they meet the following standards provided in the Federal Privacy Rule:

(a) A person with appropriate knowledge of and experience with generally accepted statistical and scientific principles and methods for rendering information not individually identifiable:

(A) Applying such principles and methods, determines that the risk is very small that the information could be used, alone or in combination with other reasonably available information, by an anticipated recipient to identify an individual who is a subject of the information; and

(B) Documents the methods and results of the analysis that justify such determination; or

(b) The following identifiers of the individual or of relatives, employers, or household members of the individual, are removed:

(A) Names;

(B) All geographic subdivisions smaller than a state, including street address, city, county, precinct, zip code, and their equivalent geocodes, except for the initial three digits of a zip code if, according to the current publicly available data from the Bureau of the Census:

(i) The geographic unit formed by combining all zip codes with the same three initial digits contains more than 20,000 people; and

(ii) The initial three digits of a zip code for all such geographic units containing 20,000 or fewer people is changed to 000.

(C) All elements of dates (except year) for dates directly related to an individual, including birth date, admission date, discharge date, date of death; and all ages over 89 and all elements of dates (including year) indicative of such age, except that such ages and elements may be aggregated into a single category of age 90 or older;

(D) Telephone numbers;

(E) Fax numbers;

(F) Electronic mail addresses;

(G) Social security numbers;

(H) Medical record numbers;

(I) Health plan beneficiary numbers;

(J) Account numbers;

(K) Certificate/license numbers;

(L) Vehicle identifiers and serial numbers, including license plate numbers;

(M) Device identifiers and serial numbers;

(N) Web Universal Resource Locators (URLs);

(O) Internet Protocol (IP) address numbers;

(P) Biometric identifiers, including finger and voice prints;

(Q) Full face photographic images and any comparable images; and

(R) Any other unique identifying number, characteristic, or code; and

(c) The investigator and repository do not have actual knowledge that the information could be used alone or in combination with other information to identify an individual who is a subject of the information.

(9) "Direct provider" means a health care provider that is not an indirect treatment provider.

(10) "Disclose" means to release, publish, or otherwise make known to a third party a biological sample or health information.

(11) "DNA" means deoxyribonucleic acid.

(12) "DNA sample" means any human biological specimen that is obtained or retained for the purpose of extracting and analyzing the individual's DNA to perform a genetic test. "DNA sample" includes DNA extracted from the specimen.

(13) "Federal Common Rule" means the Federal Policy for the Protection of Human Subjects, as adopted by the following federal agencies and as revised through November 13, 2001: 7 CFR Part 1c, Department of Agriculture; 10 CFR Part 745, Department of Energy; 14 CFR Part 1230, National Aeronautics and Space Administration; 15 CFR Part 27, Department of Commerce; 16 CFR Part 1028, Consumer Product Safety Commission; 21 CFR Parts 50 and 56, Food and Drug Administration; 22 CFR Part 225, International Development Cooperation Agency, Agency for International Development; 24 CFR Part 60, Department of Housing and Urban Development; 28 CFR Part 46, Department of Justice; 32 CFR Part 219, Department of Defense; 34 CFR Part 97, Department of Education; 38 CFR Part 16, Department of Veterans Affairs; 40 CFR Part 26, Environmental Protection Agency; 45 CFR Part 690, National Science Foundation; 45 CFR Part 46, Department of Health and Human Services; 49 CFR Part 11, Department of Transportation. In the case of research not subject to federal regulation under one of these provisions, "Federal Common Rule" means 45 CFR Part 46.

(14) "Federal Privacy Rule" means the federal regulations under the Health Insurance Portability and Accountability Act, 45 CFR parts 160 and 164.

(15) "Genetic characteristic" includes a gene, chromosome or alteration thereof that may be tested to determine the existence or risk of a disease, disorder, trait, propensity or syndrome or to identify an individual or a blood relative. "Genetic characteristic" does not include family history or a genetically transmitted characteristic whose existence or identity is determined other than through a genetic test.

(16) "Genetic information" means information about an individual or the individual's blood relatives obtained from a genetic test.

(17) "Genetic research" means research using human DNA samples, genetic testing or genetic information.

(18) "Genetic test" means a test for determining the presence or absence of genetic characteristics in a human individual or the individual's blood relatives, including tests of nucleic acids such as DNA, RNA, and mitochondrial DNA, chromosomes or proteins in order to diagnose or determine a genetic characteristic.

(19) "Health care facility" means a hospital, long term care facility, an ambulatory surgical center, a freestanding birthing center or an outpatient dialysis center. "Health care facility" does not mean:

(a) An establishment furnishing residential care or treatment not meeting federal intermediate care standards, not following a primarily medical model of treatment, prohibited from admitting persons requiring 24-hour nursing care and licensed or approved under the rules of Oregon Health Authority, Department of Human Services or the Department of Corrections; or

(b) An establishment furnishing primarily domiciliary care.

(20) "Health care provider" has the meaning given in ORS 192.519(5).

(21) "Health information" means any information in any form or medium that:

(a) Is created or received by a health care provider, a state health plan, a health insurer, a healthcare clearinghouse, a public health authority, an employer, a life insurer, a school, or a university; and

(b) Relates to:

(A) The past, present or future physical or mental health or condition of an individual;

(B) The provision of health care to an individual; or

(C) The past, present or future payment for the provision of health care to an individual.

(22) "Human biological specimen" means any material derived from human subjects, such as blood, urine, tissues, organs, hair, nail clippings, or any other cells or fluids, whether collected for research purposes or as residual specimens from diagnostic, therapeutic, or surgical procedures.

(23) "Identifiable" or "Individually identifiable" means capable of being linked to the individual or a blood relative of the

individual from whom the biological sample or health information was obtained, including demographic information that identifies the individual, or for which there is a reasonable basis to believe the information can be used to identify an individual.

(24) "Identified" means having an identifier that links, or that could readily allow the recipient to link, a DNA sample or genetic information directly to the individual or a blood relative of the individual from whom the sample or information was obtained.

(25) "Identifier" means data elements that directly link a DNA sample or genetic information to the individual or a blood relative of the individual from whom the sample or information was obtained. Identifiers include, but are not limited to, names, telephone numbers, electronic mail addresses, Social Security numbers, driver license numbers and fingerprints.

(26) "Indirect provider" means a health care provider having a relationship with an individual in which:

(a) The health care provider delivers health care to the individual based on the orders of another health care provider; and

(b) The health care provider typically provides services or products, or reports the diagnosis or results associated with the health care, directly to another health care provider, who provides the services or products or reports to the individual.

(27) "Institutional Review Board" or "IRB" means an Institutional Review Board established in accord with and for the purposes expressed in the Federal Common Rule.

(28) "IRB approval" means the determination of the IRB that the research has been reviewed and may be conducted within the constraints set forth by the IRB and by other institutional and Federal and State requirements.

(29) "Limited data set" means protected health information that, in accordance with the Federal Privacy Rule, excludes the following direct identifiers of the individual or of relatives, employers, or household members of the individual:

(a) Names;

(b) Postal address information, other than town or city, state, and zip code;

(c) Telephone numbers;

(d) Fax numbers;

(e) Electronic mail addresses;

(f) Social security numbers;

(g) Medical record numbers;

(h) Health plan beneficiary numbers;

(i) Account numbers;

(j) Certificate/license numbers;

(k) Vehicle identifiers and serial numbers, including license plate numbers;

(l) Device identifiers and serial numbers;

(m) Web Universal Resource Locators (URLs);

(n) Internet Protocol (IP) address numbers;

(o) Biometric identifiers, including finger and voice prints; and

(p) Full face photographic images and any comparable images.

(30) "Obtain genetic information" means performing or getting the results of a genetic test.

(31) "Opt-out statement" means a written expression of an individual's desire to withhold his or her own biological specimen or clinical individually identifiable health information from use and disclosure for the purpose of anonymous research or coded research.

(32) "Person" includes but is not limited to any health care provider, health care facility, clinical laboratory, blood or sperm bank, insurer, insurance agent, insurance-support organization, as defined in ORS 746.600, government agency, employer, research organization or agent of any of them.

(33) "Personal representative" includes but is not limited to:

(a) A person appointed as a guardian under ORS 125.305, 419B.370, 419C.481 or 419C.555 with authority to make medical and health care decisions;

(b) A person appointed as a health care representative under ORS 127.505 to 127.660 or a representative under ORS 127.700 to 127.737 to make health care decisions or mental health treatment decisions; and

(c) A person appointed as a personal representative under ORS Chapter 113.

(34) "Recontact" means disclosure of genetic research findings to a research subject or the subject's physician through use of personal identifiers.

(35) "Research" means a systematic investigation, including research development, testing and evaluation, designed to develop or contribute to generalized knowledge.

(36) "Retain a DNA sample" means the act of storing the DNA sample.

(37) "Retain genetic information" means making a record of the genetic information.

(38) "Specific informed consent for genetic research" means the individual or the individual's representative has consented to the use of that individual's DNA sample or genetic information for genetic research or for a specified genetic research project.

(39) "Unidentified" means deidentified or not identifiable.

Research Involving Human Genetic Materials

333-025-0105
Scope

(1) OAR 333-025-0100 to 0165 apply to all genetic research subject to the law of the State of Oregon.

(2) All genetic research must comply with the applicable standards set forth in the Federal Common Rule. Additional protections for subjects of research are authorized by ORS 192.531 et seq. and these rules. These rules set state standards that are in addition to, and not intended to alter, any requirements under the Federal Common Rule or the Federal Privacy Rule.

333-025-0110
Institutional Review Boards (IRBs) and Approval for Research

(1) An IRB must conform to the organizational and operational standards contained in the Federal Common Rule.

(2) All proposed genetic research, including anonymous research, or research otherwise exempt from IRB approval, must first be submitted to an IRB for explicit prior approval or an explicit determination that the research is anonymous or otherwise exempt.

(3) A researcher must disclose to the IRB the intended use of human DNA samples, genetic tests or other genetic information for every proposed research project, including anonymous or otherwise exempt research.

(4) A researcher must follow the requirements of OAR 333-025-0115 and 333-025-0120 and provide assurances to the IRB that these requirements have been met.

333-025-0115
Informed Consent for Non-Exempt Genetic Research

(1) Except as provided in OAR 333-025-0120, a researcher may use an identified human biological sample or genetic information obtained on or after June 25, 2001, for genetic research only with specific informed consent for genetic research.

(2) Except as provided in OAR 333-025-0120, a researcher may use an identified human biological sample or genetic informa-

tion obtained prior to June 25, 2001, for genetic research with blanket informed consent or specific informed consent for genetic research.

Stat. Auth.: ORS 192.535 & 192.547
Stats. Implemented: ORS 192.535 & 192.547
Hist.: OHD 14-2002, f. & cert. ef. 9-27-02; PH 16-2003(Temp), f. & cert. ef. 10-27-03 thru 4-16-04; PH 9-2004, f. & cert. ef 3-23-04; PH 21-2005, f. 12-30-05, cert. ef. 1-1-06

333-025-0120
Anonymous, Coded, or Exempt Genetic Research

(1) Any person proposing to conduct genetic research that is thought to be anonymous shall obtain from an IRB, prior to conducting such research, a determination that the research is anonymous. The person shall furnish the IRB with assurances that the criteria in (3) below are met.

(2) Any person proposing to conduct research that is thought to be exempt from review shall obtain an IRB determination that the research is exempt from review under 45 CFR 46.101(b) or other applicable exemption from the Federal Common Rule.

(3) A human biological sample or clinical individually identifiable health information may be used in anonymous or coded genetic research only if prior to the time the research is conducted:

(a) The subject has granted informed consent for the specific anonymous or coded research project; or

(b) The subject has granted consent for genetic research generally; or

(c) The subject was notified in accordance with OAR 333-025-0165 that the individual's sample or information may be used for anonymous or coded research, and before the sample or information was obtained, the subject did not request that the sample or information be withheld from anonymous or coded research; or

(d) The subject was not notified, due to emergency circumstances, in accordance with OAR 333-025-0165, that the individual's sample or information may be used for anonymous research or coded research, and the individual died before receiving the notice; or

(e) The subject has granted blanket informed consent and the sample or information was obtained before June 25, 2001; or

(f) The subject was deceased when the sample or information was obtained; or

(g) An Institutional Review Board:

(A) Waives or alters the consent requirements pursuant to the Federal Common Rule; and

(B) Waives authorization pursuant to the Federal Privacy Rule.

(4) In addition to the requirements of section (3) of this rule, genetic research in which the DNA sample or genetic information is coded shall satisfy the following requirements:

(a) The research has been approved by an Institutional Review Board after disclosure by the investigator to the board of risks associated with the coding;

(b) The code is:

(A) Not derived from individual identifiers;

(B) Kept securely and separately from the DNA samples and genetic information; and

(C) Not accessible to the investigator unless specifically approved by the Institutional Review Board.

(c) Data is stored securely in password protected electronic files or by other means with access limited to necessary personnel;

(d) The data is limited to elements required for analysis and is a limited data set; and

(e) The investigator is a party to a data use agreement with any limited data set recipient. The data use agreement must:

(A) Establish the permitted uses and disclosures of such information by the limited data set recipient, limited to research uses. The data use agreement may not authorize the limited data set recipient to use or further disclose the information in a manner that would violate the requirements of the Federal Privacy Rule, if done by the investigator;

(B) Establish who is permitted to use or receive the limited data set; and

(C) Provide that the limited data set recipient will:

(i) Not use or further disclose the information other than as permitted by the data use agreement or as otherwise required by law;

(ii) Use appropriate safeguards to prevent use or disclosure of the information other than as provided for by the data use agreement;

(iii) Report to the investigator any use or disclosure of the information not provided for by its data use agreement of which it becomes aware;

(iv) Ensure that any agents, including a subcontractor, to whom it provides the limited data set agrees to the same restrictions and conditions that apply to the limited data set recipient with respect to such information; and

(v) Not identify the information or contact the individuals.

333-025-0125
IRB Registry

(1) The Oregon Health Authority, Public Health Division shall establish and maintain a registry of IRBs that review research conducted in Oregon or that involves research subjects living in Oregon.

(2) By October 1, 2002, each existing IRB must register with Oregon Health Authority, Public Health Division on registration forms provided by the Authority.

(3) The Authority will update its registry annually. Each IRB will be required to renew its registration each year, or sooner if there exists material changes in the terms of registration.

333-025-0130
Recontact

(1) Recontact of a research subject should not occur unless the subject was informed during the initial consent process that recontact may occur under specified circumstances and with this understanding, the research subject consented to participate in the study.

(2) If recontact of subjects is contemplated, the researcher must provide research protocols to the IRB describing the circumstances that might lead to recontact, as well as a plan for managing the process. If a subject declines the possibility of recontact, the researcher may not recontact the subject.

(3) Notwithstanding (1) above, in order to consider recontact in a situation where recontact was not contemplated and therefore not addressed in research protocols a researcher must seek approval from the IRB for re-contact and must assure the following conditions exist:

(a) The findings are scientifically valid and confirmed;

(b) The findings have significant implications for the subject's or the public's health; and

(c) A course of action to ameliorate or treat the subject's or the public's health concerns is readily available.

(4) Under conditions described in (3), the researcher shall determine and adhere to the expressed wishes and desires of the research subject in relation to disclosure of genetic information to that individual.

(5) When research results are disclosed to a subject, appropriate medical advice and referral must be provided.

(6) In all cases, a decision to recontact research subjects must have prior approval of the IRB.

Obtaining Genetic Information for Identification of Deceased Individuals

333-025-0135
Information Concerning Deceased Individuals

(1) Anyone permitted by Oregon law to dispose of the body of a deceased individual or who is authorized by ORS 146.113 to 146.117 to submit the DNA sample of an unidentified deceased individual to a DNA diagnostic laboratory may obtain or retain genetic information for the purpose of identification of the deceased. After identification, relevant information concerning the death shall be submitted into the permanent medical record of the deceased.

(2) A DNA sample of or genetic information about a deceased individual may be used for medical diagnosis of blood relatives of the individual and for no other purpose except as otherwise authorized by law. A request to use a sample or information for such purpose may be made by:

(a) A representative designated by the decedent to act on the individual's behalf after death;

(b) The closest surviving blood relative of the decedent; or

(c) If there is more than one surviving blood relative of the same degree of relationship to the decedent, by the majority of the surviving closest blood relatives of the decedent.

(3) A DNA sample sent to a diagnostic laboratory for testing under Section (1) or (2) of this rule must be accompanied by an affidavit stating that the specific purpose for obtaining the DNA sample is to identify the deceased individual or is for medical diagnosis of blood relatives of the decedent, and for no other purpose.

(4) A person may use an individual's DNA sample or genetic information that is derived from a biological specimen or clinical individually identifiable health information for anonymous research or coded research, if the individual was deceased when the individual's biological specimen or clinical individually identifiable health information was obtained (OAR 333-025-0120).

Informed Consent for Obtaining Genetic Information

333-025-0140
Informed Consent Procedures

(1) Unless exempted by ORS 192.535(1)(a)–(f), all persons collecting genetic information must conform to standards of informed consent as follows:

(a) Physicians licensed under ORS Chapter 677, and any other licensed health care providers or facilities, shall obtain informed consent according to ORS 677.097;

(b) Except as provided in OAR 333-025-0120, a person conducting research shall obtain informed consent according to the procedure given in OAR 333-025-0115; and

(c) If genetic information is collected in connection with an insurance transaction governed by ORS 746.135, informed consent will be conducted in the manner described by the Department of Consumer and Business Services under authority of ORS 746.135(1).

(2) For persons not described in (1) above, informed consent must be obtained using the form and process contained in Appendix 1 of these rules or a form which is substantively similar.

(3) Elements to be contained in a consent form for obtaining genetic information include:

(a) The name of the individual whose DNA sample is to be tested;

(b) The name of the individual, company, or organization requesting the genetic test for the purpose of obtaining genetic information;

(c) A statement signed by the individual whose DNA sample is to be tested indicating that he/she authorizes the genetic test; and

(d) A statement that specifies the purpose of the test and the genetic characteristic for which the DNA sample will be tested.

(4) Process for obtaining informed consent using the form contained in **Appendix 1** or a form that is substantively similar:

(a) Explain that the genetic test is voluntary;

(b) Inform the individual that he/she may choose not to have his/her DNA sample tested;

(c) Inform the individual that he/she has the option of withdrawing consent at any time;

(d) Explain the risks and benefits of having the genetic test, including:

(A) A description of the provisions of Oregon law pertaining to individual rights with regard to genetic information and the confidential nature of the genetic information;

(B) A statement of potential consequences with regard to insurability, employability, and social discrimination if the genetic test results or genetic information become known to others;

(C) The implications of both positive and negative test results; and

(D) The availability of support services, including genetic counseling.

(e) Inform the individual that it may be in his/her best interest to retain his/her DNA sample for future diagnostic testing, but that he/she has the right to have his/her DNA sample promptly destroyed after completion of the specific genetic test which was authorized;

(f) Inform the individual about the implications, including potential insurability, of authorizing disclosure to a third party payer that the genetic test was performed, and that he/she has the option of paying the cost of the genetic test out of pocket rather than filing an insurance claim;

(g) Ask the individual whether he/she has any further questions, and if so, provide the individual with the opportunity to ask questions and receive answers from either a genetic counselor or another person who is sufficiently knowledgeable to give accurate, understandable and complete answers to his/her questions;

(h) Request that the individual read, complete, sign and date the consent form; and

(i) Provide the individual with a copy of the completed form for his/her personal records.

Retention of Genetic Information

333-025-0145
Retention for the Purpose of Identification of Deceased Individuals

(1) Any person who is permitted by Oregon law to dispose of the body of a deceased individual, or anyone who is authorized by ORS 146.113–117 may retain the genetic information obtained from an unidentified deceased individual's DNA sample without specific authorization for the purpose of identification of the deceased individual.

(2) Upon identification of the deceased individual, persons so authorized in Section (1) shall convey the deceased individual's genetic information to his/her permanent medical record.

Disclosure of Genetic Information

333-025-0160
Procedure for Authorization of Disclosure by the Tested Individual or the Tested Individual's Representative

Except as provided in ORS 192.539, and except for research disclosures authorized by an Institutional Review Board in accordance with these rules, any person shall be required to obtain specific authorization from the individual on whose sample a genetic test was conducted, or an individual's representative, to disclose genetic information, by completing the consent form specified in ORS 192.522, or a form that is substantively similar and by using the following procedure:

(1) Request that the tested individual, or his/her representative, read, sign and date the prescribed consent form; and

(2) Read, sign, and date the prescribed consent form on behalf of the individual or organization requesting the release of genetic information; and

(3) Provide the tested individual, or his/her representative, with a copy of the completed consent form for his/her personal records.

333-025-0165
Provider Notification and Opt Out

(1) A direct provider that is a covered entity and who obtains a biological specimen or clinical individually identifiable health information from an individual must:

(a) Notify the individual or his/her personal representative, in accordance with this rule, that the individual's biological specimen or clinical individually identifiable health information may be used or disclosed for anonymous or coded research; and

(b) Give the individual the opportunity to make an opt-out statement.

(2) Any health care provider that is not described in Section (1) of this rule may, but is not required to, furnish the notification and opportunity for an opt-out statement described in Section (1) of this rule.

(3) A health care provider described in Section (1) of this rule must provide notification no later than the time required for federal privacy notices by the Federal Privacy Rule for services rendered on or after July 1, 2006 (see 45 CFR 164.520).

(4) If a health care provider is required to provide notification pursuant to Section (1) of this rule, the health care provider must provide notification at least once per individual, regardless of how many times the provider obtains the individual's biological specimen or clinical individually identifiable health information.

(5) If a health care facility provides the notice pursuant to Section (1) of this rule, a health care provider providing care to patients in the health care facility is not required to provide an additional notice with respect to services provided in the facility.

(6) Notification may be delivered in a manner determined by the health care provider within the requirements of this rule, including but not limited to any manner permitted for the provision of the notice of privacy practices required under the Federal Privacy Rule.

(7) Notification must include:

(a) A place where the individual may mark to indicate the individual's opt-out statement;

(b) A general explanation of the meaning of anonymous and coded research;

(c) A statement describing that the biological specimen or clinical individually identifiable health information may be used at some undetermined point in the future without further notice to the individual;

(d) A statement that a refusal to allow use of biological specimens or clinical individually identifiable health information will not affect access to or provision of health care by the provider originally providing notice;

(e) A statement specifying that the individual retains the right to make or revoke an opt-out statement by submitting in writing such a request to the health care provider originally providing notice;

(f) A statement indicating that an opt-out statement will be valid from the date received by the health care provider;

(g) A prominent heading indicating the purpose of the notice; and

(h) The name, or title, and telephone number or other contact information of a person or office to contact for further information.

(8) If a health care provider is required to provide notification pursuant to Section (1) of this rule, notification may be, but is not required to be, provided using the form contained in Appendix 2 of these rules.

(9) Any health care provider described by Section (1) of this rule that receives an opt-out statement of an individual must, at the time of disclosure of a biological specimen or clinical individually identifiable health information, inform the indirect provider that is the intended recipient that the individual's biological specimen or clinical individually identifiable health information is subject to an opt out statement.

(a) Methods to inform the indirect provider may include, but shall not be limited to, marking or noting the biological specimen container or clinical individually identifiable health information as subject to an opt-out statement. The mark or notation may be in any form that can be understood by the intended recipient.

(b) If an opt-out statement is received after the completion of the first service delivery and within the first fourteen (14) days from the completion of the first service delivery, a health care provider is encouraged, but is not required, to make a good faith effort to inform the indirect health care provider of the opt-out statement.

(c) Any recipient of an individual's biological specimen or clinical individually identifiable health information from a health care provider described by Section (1) of this rule that is not informed of the individual's opt-out statement within fourteen (14) calendar days of receipt may presume that the individual has not made an opt-out statement.

(10) Any health care provider subject to Section (1) of this rule must have a process in place to demonstrate compliance with this rule.

[ED. NOTE: Forms and appendices referenced are available from the agency.]

DIVISION 26

ENFORCEMENT OF PUBLIC HEALTH RULES

333-026-0030
Civil Penalties for Violations of OAR Chapter 333, Divisions 18 and 19

(1) A civil penalty may be imposed against a person or entity for a violation of any provision in OAR chapter 333, division 18 or 19, including but not limited to:

(a) Failing to report a reportable disease in accordance with OAR chapter 333, division 18;

(b) Reporting to work in a communicable stage of any restrictable disease in violation of OAR 333-019-0010 or 333-019-0046;

(c) Permitting a child to attend school in violation of OAR 333-019-0010;

(d) Failing to immunize an animal against rabies in accordance with OAR 333-019-0017;

(e) Failing to license a dog in accordance with OAR 333-019-0019;

(f) Failing to euthanize an animal in accordance with OAR 333-019-0024 or 333-019-0027;

(g) Euthanizing an animal or destroying the head of a mammal that has bitten a person without authorization under OAR 333-019-0024 from the local public health authority; and

(h) Failing to confine an animal in accordance with OAR 333-019-0027.

(2) Prior to issuing a notice of imposition of civil penalty, the Oregon Health Authority or the local public health authority shall send a written warning letter advising the person or entity that they are not in compliance with a rule in OAR chapter 333, division 18 or 19 and that continued noncompliance may result in the issuance of a notice of imposition of civil penalty. A person or entity's assertion that they did not receive the warning letter is not a defense to a notice of imposition of civil penalty.

(3) Civil penalties shall be imposed as follows:

(a) First violation: $100;

(b) Second violation: $200;

(c) Third or subsequent violation: $500.

(4) Each day a person or entity is out of compliance with a provision of OAR chapter 333, division 18 or 19 will be considered a new violation.

(5) A civil penalty may not exceed $500 a day per violation.

(6) A notice of imposition of civil penalty shall comply with ORS 183.745.

DIVISION 27

HOME HEALTH AGENCIES

333-027-0000
Purpose

The purpose of these rules is to establish the standards for licensure of home health agencies.

Stat. Auth.: ORS 443.085
Stats. Implemented: ORS 443.005 - 443.090
Hist.: HD 19-1987, f. 11-10-87, ef. 12-1-87; HD 22-1988, f. & cert. ef. 9-16-88; OHD 13-1998, f. & cert. ef. 11-6-98; PH 7-2012, f. 3-30-12, cert. ef. 4-1-12

333-027-0005
Definitions

The following definitions shall apply in OAR 333-027-0000 through 333-027-0190:

(1) "Admission" means acceptance of a patient for the provision of services by an agency.

(2) "Authority" means the Oregon Health Authority.

(3) "Agency" means Home Health Agency.

(4) "Branch Office" means a location or site from which a home health agency provides services to patients within a portion of the total geographic area served by the parent agency and does not exceed 60 miles from the parent agency.

(5) "Clinical Note" means a dated, written, and signed notation by a member of the home health agency team of a contact with the patient that describes care rendered, signs and symptoms, treatment and/or drugs given, patient's reaction, and any changes in patient's physical or mental condition.

(6) "Clinical Record" means all information and documentation pertaining to the care of a patient.

(7) "Division" means the Public Health Division of the Oregon Health Authority.

(8) "Governing Body" means the designated person(s) having ultimate responsibility for the home health agency.

(9) "Home Health Agency" means a public or private entity providing coordinated home health services on a home visiting basis.

(10) "Home Health Aide" means a person who is certified as a nursing assistant by the Oregon State Board of Nursing in accordance with OAR chapter 851, division 062 and who assists licensed nursing personnel in providing home health services.

(11) "Home Health Service" means items and services furnished to an individual by a home health agency, or by others under arrangement with such agency, on a visiting basis in a place of temporary or permanent residence used as the individual's home for the purpose of maintaining that individual at home.

(12) "Licensed Practical Nurse" means a person licensed as such by the Oregon State Board of Nursing in accordance with ORS Chapter 678.

(13) "Nurse Practitioner" has the meaning given that term in ORS 678.010.

(14) "Occupational Therapist" has the meaning given that term in ORS 675.210.

(15) "Occupational Therapy Assistant" has the meaning given that term in ORS 675.210.

(16) "Parent Home Health Agency" ("Parent Agency") means an agency that has branches or subunits.

(17) "Physical Therapist Assistant" has the meaning given that term in ORS 688.010 and is licensed in accordance with 688.020

(18) "Physical Therapist" has the meaning given that term in ORS 688.010.

(19) "Physician" means a person who is licensed by the Oregon Medical Board and that meets the definition in ORS 677.010(13) and (14).

(20) "Plan of treatment" means a document developed by the treating physician or nurse practitioner in consultation with agency staff after a patient assessment that identifies the patient's medical status and needs, and outlines the services that will be provided to the patient to meet identified needs. The plan of treatment may also be referred to as the plan of care.

(21) "Primary Agency" means the agency that admits the patient for the provision of curative, rehabilitative, and/or preventive services in the patient's home by home health professionals.

(22) "Professional Policy-Making Committee" (Committee) means a group of individuals who are appointed by the governing body of an agency, and who has authority and responsibility for the development and monitoring of all professional policies pertaining to the home health agency.

(23) "Progress Note" means a documented summary of a patient's response to care provided during a specific period of time.

(24) "Registered Nurse" means a person licensed as such by the Oregon State Board of Nursing in accordance with ORS Chapter 678.

(25) "Skilled Nursing" means the patient care services pertaining to the curative, rehabilitative, or preventive aspects of nursing performed by, or under the supervision of, a registered nurse pursuant to the plan of treatment.

(26) "Social Worker" means a person who has a master's degree from a school of social work accredited by the Council on Social Work Education and has one year of social work experience in a health care setting.

(27) "Social Work Assistant" means a person who has a baccalaureate degree in social work, psychology, or another field related to social work and has at least one year of social work experience in a health care setting.

(28) "Speech Pathologist" means a person who is licensed in accordance with ORS 681.250 and has a Certificate of Clinical Competence in speech pathology or audiology from the American-Speech-Language-Hearing Association.

(29) "Stable and predictable condition" means a situation where the patient's clinical or behavioral state is known, not characterized by rapid changes, and does not require continuous reassessment and evaluation.

(30) "Subunit" means an agency that provides services for a parent agency in a geographic area different from that of the parent agency and at a distance that exceeds 60 miles from the parent agency.

(31) "Survey" means an inspection of an applicant for a home health agency license or licensed home health agency to determine the extent to which the applicant or agency is in compliance with ORS Chapter 443 and these rules.

(32) "Therapeutic services" means services provided for curative, rehabilitative, or preventive purposes.

Services and Administration

333-027-0010
Application for Licensure

(1) An agency that establishes, purports to manage or operate as a home health agency must be licensed by the Division and comply with ORS 443.005–443.095 and OAR chapter 333, division 027.

(2) An applicant wishing to apply for a license to operate a home health agency shall submit an application on a form prescribed by the Division and pay the applicable fee as specified in OAR 333-027-0025.

(3) If an owner or administrator will have direct contact with a patient, the owner or administrator must submit background information to the Division, in accordance with OAR 333-027-0064 for the purposes of conducting a criminal records check.

(4) If any of the information delineated in the agency's most recent application changes at a time other than the annual renewal date, the agency shall notify the Division in writing within 30 days.

(5) A subunit must independently comply with all licensure requirements.

(6) A branch office is part of the parent agency and therefore need not independently comply with these licensure requirements. The Division shall determine on a case-by-case basis exceptions to the 60 mile travel distance from the parent agency requirement for a branch office and subunits as defined in OAR 333-027-0005.

Stat. Auth.: ORS 443.085

333-027-0015
Review of License Application

(1) In reviewing an application for a home health agency license, the Division shall verify that the agency:

(a) Is primarily engaged in providing skilled nursing and at least one of the following other services: physical therapy, occupational therapy, speech therapy, medical social services, home health aide, or other therapeutic services;

(b) Has a governing body established pursuant to ORS 443.055 and OAR 333-027-0060;

(c) Has policies established by professional personnel associated with the entity, including one or more physicians and one or more registered nurses, at least two of whom are neither owners or employees of the agency, and two consumers, to govern the services that it provides;

(d) Has a physician, a nurse practitioner or registered nurse supervise all services provided by the agency as described under subsection (1)(a) of this rule;

(e) Maintains clinical and financial records on all patients; and

(f) Has an overall plan and budget in effect.

(2) The Division shall conduct a survey in accordance with OAR 333-027-0035 of the agency, and may include subunits or branch locations, to determine if the agency is in compliance with ORS Chapter 443 and OAR chapter 333, division 027 and has the intent to provide home health services. If an agency is in compliance and has the intent to provide home health services to patients, a license may be issued for the operation of the agency.

333-027-0017
Approval of License Application

(1) The Division shall notify an applicant in writing if a license application is approved.

(2) A license shall be issued only for the agency and person(s) named in the application and may not be transferred or assigned.

(3) The license shall be conspicuously posted in an office that is viewable by the public.

(4) A licensed home health agency that provides personal care services that are necessary to assist an individual's daily needs, but do not include curative or rehabilitative services is not required to be licensed as an in-home care agency. Such agencies shall comply with ORS 443.305 through 443.355 and OAR 333-536-0000 through 333-536-0125 with the exception of the licensing requirements.

Expiration and Renewal of License

(1) Each license shall expire on the 31st day of December of each calendar year.

(2) An agency shall submit a completed application for renewal on a form prescribed by the Division, accompanied by the required fee, to the Division not less than 30 days prior to the license expiration date.

(3) The Division may issue a renewal license contingent upon evidence of the agency's compliance with ORS Chapter 443 and OAR chapter 333, division 027; attestation to the delivery of agency services to patient(s) during the last calendar year; and, if requested, receipt of an annual statistical report containing such information as may be prescribed by the Division.

Organization and Quality of Patient Care

333-027-0025
Fees

(1) The fee for an initial agency license shall be $1,600 plus an additional $1,600 for each subunit of a parent agency.

(2) If the ownership of an agency changes, other than at the time of the annual renewal, the agency's licensure fee shall be $500, plus an additional $500 for each subunit. If the change of ownership of the agency does not involve the majority owner or partner, or the administrator operating the agency, the license fee shall be $100.

(3) The annual license renewal fee for an agency shall be $850 plus an additional $850 for each subunit.

(4) A hospital exempted under ORS 443.025 may provide home health services without maintaining a separate governing body and administrative services so long as the services provided meet the requirements of 443.005 through 443.095 and the hospital pays the home health licensing fee under 443.035.

(5) License fees will not be prorated and are non-refundable.

333-027-0036
Surveys

(1) The Division shall, in addition to any investigations conducted pursuant to OAR 333-027-0038, conduct at least one on-site inspection of each agency prior to licensure and once every three years thereafter as requirement of licensing and at such other times as the Division deems necessary.

(2) In lieu of the on-site inspection required by section (1) of this rule, the Division may accept a certification or accreditation from a federal agency or an accrediting body approved by the Division that the state licensing standards have been met if the agency:

(a) Notifies the Division to participate in any exit interview conducted by the federal agency or accrediting body; and

(b) Provides copies of all documentation concerning the certification or accreditation requested by the Division.

(3) An agency shall permit Division staff access to any location from which it is operating its agency or providing services during a survey.

(4) A survey may include but is not limited to:

(a) Interviews of patients, patient family members, agency management and staff;

(b) On-site observations of patients and staff performance;

(c) Review of documents and records;

(d) Patient audits.

(5) An agency shall make all requested documents and records available to the surveyor for review and copying.

(6) Following a survey, Division staff may conduct an exit conference with the agency owner or his or her designee. During the exit conference, Division staff shall:

(a) Inform the agency representative of the preliminary findings of the inspection; and

(b) Give the person a reasonable opportunity to submit additional facts or other information to the surveyor in response to those findings.

(7) Following the survey, Division staff shall prepare and provide the agency owner or his or her designee specific and timely written notice of the findings.

(8) If the findings result in a referral to another regulator agency, Division staff shall submit the applicable information to that referral agency for its review and determination of appropriate action.

(9) If no deficiencies are found during a survey, the Division shall issue written findings to the agency owner indicating that fact.

(10) If deficiencies are found, the Division shall take informal or formal enforcement action in compliance with OAR 333-027-0180 or 333-027-0185.

Complaints

(1) Any person may make a complaint verbally or in writing to the Division regarding an allegation as to the care or services provided by a home health agency or violations of home health agency laws or regulations.

(2) The identity of a person making a complaint will be kept confidential.

(3) Information obtained by the Division during an investigation of a complaint or reported violation under this section is confidential and not subject to public disclosure under ORS 192.410 through 192.505.

(4) Upon the conclusion of the investigation, the Division may publicly release a report of its findings but may not include information in the report that could be used to identify the complainant or any patient of a home health agency. The Division may use any information obtained during an investigation in an administrative or judicial proceeding concerning the licensing of a home health agency.

(5) An employee or contract provider with knowledge of a violation of ORS Chapter 443 or OAR chapter 333, division 027, shall use the reporting procedures established by the home health agency before notifying the Division or other state agency of the inappropriate care or violation, unless the employee or contract provider:

(a) Believes a patient's health or safety is in immediate jeopardy; or

(b) Files a complaint in accordance with section (1) of this rule.

(6) If the complaint involves an allegation of criminal conduct or an allegation that is within the jurisdiction of another local, state, or federal agency, the Division will refer the matter to that agency.

Investigations

(1) An unannounced complaint investigation will be carried out within 45 calendar days of the receipt of the complaint and may include, but is not limited to:

(a) Interviews of the complainant, caregivers, patients, a patient's representative, a patient's family members, witnesses, and agency management and staff;

(b) On-site observations of the patient(s), staff performance, patient environment; and

(c) Review of documents and records.

(2) Should the complaint allegation represent an immediate threat to the health or safety of a patient, the Division will notify appropriate authorities to ensure a patient's safety, and an investigation will be commenced within two working days.

(3) An agency shall permit Division staff access to the agency during an investigation.

(4) The agency shall cooperate with investigations of allegations of client abuse and neglect conducted by the Department of Human Services, Oregon Health Authority, Adult Protective Services, and other agencies such as law enforcement.

Services and Supplies

If services or supplies are required by law to be prescribed by a physician or a nurse practitioner, the agency shall offer or provide such services and supplies only under an order for treatment and plan of treatment. Services and supplies offered or provided by an agency shall include only the following:

(1) Nursing care provided by or under the supervision of a registered nurse;

(2) Physical, occupational, or speech therapy, or medical social services;

(3) Other therapeutic services conforming to generally accepted and established standards;

(4) Home health aide services; and

(5) Medical supplies, other than drugs and biologicals, and medical appliances. When patient care supplies are stored in the agency, the agency shall store such supplies in a manner that prevents their contamination and ensures that the supplies do not exceed the manufacturer's expiration date.

333-027-0050
Changes in Services Provided

(1) An agency must obtain written approval from the Division prior to the implementation of the provision of additional services. When an agency applies for approval of additional services, the agency must provide evidence of:

(a) Governing body approval of addition of the services and all revisions in agency policies pertaining to the new services;

(b) The agency's professional policy-making committee development and approval of all policies and procedures pertaining to the new services; and

(c) Adherence to agency personnel policies and ORS Chapter 443 and OAR chapter 333, division 027 by all individuals providing services through the agency. If a new service is provided under the designation of "other therapeutic services" and is not in a category of licensure/certification covered by Oregon law, the governing body must designate and approve standards of educational or technical qualifications of personnel providing the services.

(2) An agency must notify the Division if it no longer provides a service listed on its current license.

333-027-0060
Administration of Home Health Agency

An agency shall clearly set forth in writing the organization, services provided, administrative control, and lines of authority for the delegation of responsibility to the patient care level. An agency shall not delegate administrative and supervisory functions to another agency, individual, or organization.

(1) The primary agency shall monitor and control all services provided through contractual agreements between the primary agency and any patient service provider.

(2) An agency shall maintain appropriate administrative records for each of its offices. If an agency has any branch offices, it shall ensure that each branch office is part of the agency and shares administration, supervision, and services on a daily basis.

(3) If an agency chooses to provide professional students with a practicum in home health, the governing body must ensure that:

(a) A contract between the agency and the accredited educational institution is in effect and it includes at a minimum, a description of:

(A) Program objectives;

(B) Program coordination;

(C) Student supervision;

(D) Adherence to agency policy; and

(E) Conformance with applicable professional practice laws, rules, and regulations.

(b) The agency maintains documentation of each practicum and the student's activities, supervision and the evaluation of these activities.

(c) The agency maintains documentation of patient care services provided by the student.

(4) An agency's governing body, or its designee, shall assume full legal and fiscal responsibility for the agency's operation. The agency's governing body shall provide for effective communication with administration of the agency and the owner of the agency.

(5) An agency's governing body shall:

(a) Employ a qualified administrator, unless exempted under ORS 443.025, who may also serve as Director of Professional Services;

(b) Regularly monitor the performance of the administrator;

(c) Appoint a professional policy-making committee;

(d) Adopt and annually review its written by-laws or acceptable equivalent; and

(e) Document all decisions affecting home health services.

(6) The Administrator shall have the following qualifications:

(a) A physician or registered nurse, currently licensed in Oregon, who has education, experience, and knowledge in community health service systems appropriate to the fulfillment of his/her responsibilities; or

(b) An individual who has education, experience, and knowledge in a related community health service systems and at least one year overall administrative experience in home health care or related community health program appropriate to the fulfillment of his/her responsibilities.

(7) The Administrator shall:

(a) Have authority and responsibility for the agency's overall management and operation;

(b) Organize and direct the agency's ongoing functions;

(c) Maintain ongoing communication between agency's governing body, professional policy-making committee, and staff;

(d) Employ qualified personnel and ensure the provision of adequate staff education and the completion of performance evaluations;

(e) Involve the Director of Professional Services in health care decisions;

(f) Ensure the accuracy of information provided to the public regarding the agency and its services;

(g) Implement an effective budgeting and accounting system;

(h) Designate, in writing, an individual qualified to serve as acting administrator in the administrator's absence; and

(i) Ensure that adequate and appropriate staff resources are available and used to meet the care needs of the agency's patients as identified in the plans of treatment.

(8) The agency shall employ a Director of Professional Services who must be a physician or registered nurse. The agency shall ensure that the Director of Professional Services or a similarly

qualified alternate, designated in writing, is available for consultation at all times during operating hours of the agency. The Director of Professional Services or designee shall have written authority, responsibility, and accountability for:

(a) Functions, activities, and evaluations of all health care personnel;

(b) The quality of home health services;

(c) Orientation and in-service education for all agency health care personnel;

(d) Coordination of home health services;

(e) Development and documentation of all written material related to agency services, including policies, procedures, and standards;

(f) Participation and involvement in employment decisions affecting home health care personnel;

(g) Assignment of adequate and appropriate staff resources to meet the home health care needs of the agency's patients; and

(h) Designating, in writing, a person qualified to serve as acting Director of Professional Services in the Director's absence.

(9)(a) The agency shall develop personnel policies which must be appropriate to the agency, be documented, and include:

(A) Hours of work;

(B) Orientation that is appropriate to the classification of the employee. The following portions of the orientation shall be completed within two weeks of employment; and shall include at a minimum: policies and procedures of the agency; job description and responsibility; role as team member providing services in the home setting; and information regarding other community agencies, infection control, ethics and confidentiality.

(C) An inservice program that provides ongoing education to ensure that staff skills are maintained for the responsibilities assigned and ensures that staff are educated in their responsibility in infection control;

(D) Work performance evaluations;

(E) Employee health program;

(F) Provisions for tuberculosis screening in accordance with OAR 333-019-0041; and

(G) Provisions for the completion of criminal records checks in accordance with ORS 443.004 and OAR 333-027-0064.

(b) Personnel records shall include job descriptions, personnel qualifications, evidence of any required licensure or certification, evidence of orientation and performance evaluations, evidence of a completed criminal records check and fitness determination.

(c) An agency may provide services by agency personnel working out of their individual homes within a portion of the geographic area served by an agency. The individual homes are not construed to be a branch. These services must be controlled, supervised, and evaluated by the agency, in accordance with all written agency policies. Such policies shall, at a minimum require documentation of:

(A) A meeting at least every two weeks of the supervisor and the individual to review the plan(s) of treatment;

(B) A telephone conference on at least a weekly basis between meetings;

(C) Supervisor participation in the development of each plan of treatment; and

(D) Procedures for submitting clinical and progress notes, summary reports, schedule of visits and periodic evaluations.

(10) An agency contracting with individual personnel or public or private entities for home health care services shall maintain written contracts and shall clearly designate:

(a) That patients are accepted for care only by the primary agency;

(b) The services to be provided;

(c) The rights and responsibilities of the contracting individual or entity in the coordination, supervision, and evaluation of the care or service provided;

(d) The obligation to comply with all applicable agency policies;

(e) The party with responsibility for development and revisions of the plan of treatment, patient assessment, progress reports, and patient care conferences, scheduling of visits or hours, and discharge planning;

(f) Appropriate documentation of services provided on record forms provided by the agency; and

(g) The terms of the agreement and basis for renewal or termination.

(11) An agency, under the direction of the governing body, shall prepare and document an overall program plan and annual operating budget. The agency's operating budget shall include all anticipated income and expenses related to items that would, under generally accepted accounting principles, be considered income and expense items. The agency's overall program plan and budget shall be reviewed and updated at least annually by a committee consisting of representatives of the governing body, the administrative staff, and the professional staff of the agency.

(12) An agency's governing body shall appoint a professional policy-making committee composed of professional personnel associated with the agency.

(a) The committee shall include one or more physicians and one or more registered nurses, at least two of whom are neither owners nor employees of the agency, and two consumers.

(b) The committee shall establish in writing and review annually, the agency's policies governing scope of services, admission and discharge policies, medical supervision, plans of treatment, emergency care, clinical records, personnel qualifications, and program evaluation.

(c) The committee shall meet as needed to advise the agency on other professional issues.

(d) The committee members shall participate with the agency staff in the annual evaluation of the agency's program.

(e) The agency shall document the committee's systematic involvement and effective communication with the governing body and the management of the agency.

333-027-0064
Criminal Records Check

(1) For the purposes of this rule, the following definitions apply:

(a) "Direct contact with" means to provide home health services and includes meeting in person with a potential or current patient to discuss services offered by an agency or other matters relating to the business relationship between an agency and client;

(b) "Disqualifying condition" means a non-criminal personal history issue that makes an individual unsuitable for employment, contracting or volunteering for an agency, including but not limited to discipline by a licensing or certifying agency, or drug or alcohol dependency;

(c) "Subject Individual" (SI) means an individual on whom an agency may conduct a criminal records check and from whom an agency may require fingerprints for the purpose of conducting a national criminal records check, including:

(A) An employee or prospective employee;

(B) A contractor, temporary worker, volunteer or owner of an agency who has direct contact with an agency client or potential client; and

(C) A prospective contractor, temporary worker, or volunteer or owner who may have direct contact with an agency client.

(d) "Vendor" means a researcher or company hired to provide a criminal records check on a subject individual.

(2) An agency shall conduct a criminal records check before hiring or contracting with an SI and before allowing an SI to volunteer to provide services on behalf of the agency, if the SI will have direct contact with a patient of the agency.

(3) An SI who has or will have direct contact with a recipient of home health services may not be employed, contract with, or volunteer with an agency in any capacity if the criminal records

check conducted reveals the SI has been convicted of a crime as described in ORS 443.004(3).

(4) An agency shall have a policy on criminal records check requirements which shall include weighing test actions should the background check screening indicate that an SI has been convicted for crimes against an individual or property other than those identified in ORS 443.004(3). The policy must include the following provisions for performing a weighing test:

(a) The agency shall consider circumstances regarding the nature of potentially disqualifying convictions and conditions including but not limited to:

(A) The details of incidents leading to the charges of potentially disqualifying convictions or resulting in potentially disqualifying conditions;

(B) Age of the SI at time of the potentially disqualifying convictions or conditions;

(C) Facts that support the convictions or potentially disqualifying conditions; and

(D) Passage of time since commission of the potentially disqualifying convictions or conditions.

(b) Other factors which should be considered when available include but are not limited to:

(A) Other information related to criminal activity including charges, arrests, pending indictments and convictions. Other behavior involving contact with law enforcement may also be reviewed if information is relevant to other criminal records or shows a pattern relevant to criminal history;

(B) Periods of incarceration;

(C) Status of and compliance with parole, post-prison supervision or probation;

(D) Evidence of alcohol or drug issues directly related to criminal activity or potentially disqualifying conditions;

(E) Evidence of other treatment or rehabilitation related to criminal activity or potentially disqualifying conditions;

(F) Likelihood of repetition of criminal behavior or behaviors leading to potentially disqualifying conditions, including but not limited to patterns of criminal activity or behavior;

(G) Changes in circumstances subsequent to the criminal activity or disqualifying conditions including but not limited to:

(i) History of high school, college or other education related accomplishments;

(ii) Work history (employee or volunteer);

(iii) History regarding licensure, certification or training for licensure or certification; or

(iv) Written recommendations from current or past employers;

(H) Indication of the SI's cooperation, honesty or the making of a false statement during the criminal records check process, including acknowledgment and acceptance of responsibility of criminal activity and potentially disqualifying conditions.

(c) An agency shall consider the relevancy of the SI's criminal activity or potentially disqualifying conditions to the paid or volunteer position, or to the environment in which the SI will work, especially, but not exclusively:

(A) Access to medication;

(B) Access to clients' personal information;

(C) Access to vulnerable populations.

(5) An agency shall document the weighing test and place in the employee's file.

(6) A background check shall be performed by:

(a) The Department of Human Services Background Check Unit; or

(b) A vendor that:

(A) Is accredited by the National Association of Professional Background Screeners (NAPBS); or

(B) Meets the following criteria:

(i) Has been in business for at least two years;

(ii) Has a current business license and private investigator license, if required in the company's home state; and

(iii) Maintains an errors and omissions insurance policy in an amount not less than $1 million.

(7) An agency may use the Oregon State Police, Open Records Unit in order to fulfill the state records requirement for a criminal records check, however, an agency would still need to complete a nationwide check through a qualified vendor.

(8) The criminal records check must include the following:

(a) Name and address history trace;

(b) Verification that the SI's records have been correctly identified, via date of birth check and Social Security number trace;

(c) A local criminal records check, including city and county records for SI's places of residence for the last seven years;

(d) A nationwide multijurisdictional criminal database search, including state and federal records;

(e) A nationwide sex offender registry search;

(f) The name and contact information of the vendor who completed the background check;

(g) Arrest, warrant and conviction data, including but not limited to:

(A) Charge(s);

(B) Jurisdiction; and

(C) Date.

(h) Source(s) for data included in the report.

(9) An agency shall perform and document a query of an SI with the National Practitioner Data Bank (NPDB) and the List of Excluded Individuals and Entities (LEIE).

(10) All criminal records checks conducted under this rule shall be documented in writing and made part of the agency's personnel files.

(11) An agency that has a contract with the Department of Human Services (Department) or Oregon Health Authority for the provision of home health services on or after April 1, 2012 and who is subject to the Department's criminal records check rules does not have to comply with section (12) of this rule.

(12) For an SI working or volunteering for an agency on or after July 6, 2011, an agency shall have until July 1, 2012 to ensure that the agency is in compliance with section (3) of this rule.

(13) On or after April 1, 2012 an agency shall ensure that a criminal records check is performed on an SI every three years from the date of the SIs last criminal records check in accordance with these rules.

(14) Notwithstanding sections (12) and (13) of this rule, the Division and not the agency shall conduct a criminal records check on an owner of any agency who is subject to a criminal records check under subsection (1)(c) of this rule. The Division shall conduct a criminal records check:

(a) At the time of application for a person who applies for a license on or after April 1, 2012 and every three years thereafter.

(b) By April 1, 2013 for an agency that is licensed on or before April 1, 2012, and every three years thereafter.

Acceptance of Patients

An agency shall accept patients for treatment on the basis of a reasonable expectation that the patient's needs can adequately be met by the agency in the patient's residence. The agency shall consider the following in relation to acceptance of its patients:

(1) Adequacy and suitability of the agency's staff and resources to provide needed services;

(2) Assessment of the patients' medical, nursing, and social needs as they relate to the benefits of home care;

(3) The services provided by the agency;

(4) Assurance that services can be effectively coordinated with care provided by other organizations and individuals;

(5) Degree of patient and family awareness of their rights and responsibilities;

(6) A plan to meet medical emergencies;

(7) Availability, ability, and willingness of others to participate in the care;

(8) Adequacy of physical facilities and equipment; and

(9) Attitudes of the patient and family.

333-027-0080
Patients' Rights

(1) Bill of Rights: An agency must provide each patient with a written notice of the patient's rights prior to furnishing care to the patient or during the initial evaluation visit prior to the initiation of treatment. This notice shall state that a patient of the agency has the following rights:

(a) The right to have personal property treated with respect;

(b) The right to voice grievances regarding treatment or care, a lack of respect for property by anyone furnishing services on behalf of the agency, or any other issue, without discrimination or reprisal for exercising such rights. The agency must investigate all complaints made by the patient or the patient's family or guardian regarding the above and must document the investigation and the resolution of the complaint;

(c) The right to be informed, in advance, about the care to be furnished, any changes in the care to be furnished, the disciplines that will furnish care, and the frequency of visits proposed to be furnished;

(d) The right to participate in the planning of care;

(e) The right to have clinical records confidentially maintained by the agency;

(f) The right to be advised, before care is initiated, of the extent that payment for the agency services may be expected from Medicare or other sources, and the extent that payment may be required from the patient. The agency must provide this information orally and in writing before care is initiated; and

(g) The right to be advised orally and in writing of any changes in the information provided in accordance with subsection (1)(f) as soon as possible, but no later than 30 working days from the date that the agency becomes aware of a change.

(2) Health Care Directives: An agency shall maintain written policies and procedures, applicable to any person 18 years of age or older, or to any adult as defined under ORS 127.505, who is receiving health care by, or through, the agency, that provide for:

(a) Delivery to the patient or the patient's legal representative of the following information and materials, in written form, without recommendation:

(A) Information on the rights of the individual under Oregon law to make health care decisions;

(B) Information on the policies of the agency with respect to the implementation of the rights of the individual under Oregon law to make health care decisions;

(C) A copy of the advance directive set forth in ORS 127.531 along with a disclaimer attached to each form in at least 16-point bold type stating "You do not have to fill out and sign this form"; and

(D) The name of a resource that can provide additional information concerning the forms for advance directives.

(b) Documentation placed prominently in the patient's record and reflecting whether the patient has executed an advance directive.

(c) Compliance by the agency with Oregon law relating to advance directives; and

(d) Education of agency personnel and the community on issues relating to advance directives.

(3) An agency shall provide the written information described in section (2) to the patient not later than 15 days after the initial provision of care by the agency, but in any event before discharge of the patient;

(4) An agency need not furnish a copy of an advance directive to a patient or the patient's legal representative if it has reason to believe that the patient has received a copy of an advance directive in the form set forth in ORS 127.531 within the preceding 12-month period or has previously executed an advance directive.

333-027-0090
Plan of Treatment

The primary agency is responsible for the patient's plan of treatment signed by the physician or nurse practitioner, including home health services provided to the patient through contractual arrangements with other organizations or individuals. A registered nurse must conduct an initial assessment visit to determine the immediate care and support needs of the patient. When rehabilitation therapy service (speech therapy, physical therapy or occupational therapy) is the only service ordered by the physician, and if the need for that service establishes program eligibility, the initial assessment visit may be made by the appropriate rehabilitation skilled professional.

(1) The agency shall ensure that the plan of treatment is developed in consultation with the agency personnel and established at the time of, or prior to, acceptance of the patient.

(2) The agency shall ensure that the plan of treatment is transmitted to the patient's physician or nurse practitioner for signature within 10 calendar days of admission to service.

(3) The plan of treatment shall cover the following:

(a) All pertinent diagnoses, mental status, types of services and equipment required;

(b) Frequency of visits;

(c) Prognosis;

(d) Rehabilitation potential;

(e) Functional limitations;

(f) Activities permitted;

(g) Nutritional requirements;

(h) Medications and treatments;

(i) Safety measures to protect against injury;

(j) Instructions for timely discharge or referral; and

(k) Any other appropriate items.

(4) If a patient is accepted under a plan of treatment that cannot be completed until after an evaluation visit, the physician or nurse practitioner shall be consulted to approve revisions to the original plan.

(5) Orders for therapy services shall include the specific procedures and modalities to be used and, as appropriate, the amount, frequency, and duration.

(6) The therapist and other agency personnel shall participate in developing the plan of treatment.

(7) The plan of treatment shall be signed by the physician or nurse practitioner and included in the patient's clinical record within the time period specified in the agency's policy but no longer than 30 calendar days after admission.

(8) The agency shall submit all plans of treatment to the primary physician or nurse practitioner and shall send copies to other physicians or nurse practitioners involved in the patient's care.

333-027-0100
Periodic Review of Plan of Treatment

An agency shall ensure that:

(1) The plan of treatment shall be reviewed by the attending physician or nurse practitioner and agency personnel as often as the patient's condition requires, but at least once every two months;

(2) Agency professional personnel promptly alert the physician or nurse practitioner to any changes that suggest a need to alter the plan of treatment;

(3) Information provided to the physician or nurse practitioner is documented in the clinical record; and

(4) The updated plan of treatment is included in the patient's clinical record within 30 calendar days of the revision.

333-027-0110
Conformance with Physician's or Nurse Practitioner's Orders

(1) Agency personnel shall administer drugs and treatments only as ordered by the patient's physician in accordance with 42 CFR 484.18 or by other providers as authorized by Oregon law.

(2) The nurse or therapist who receives a verbal order shall immediately record the order and transmit it to the physician or nurse practitioner within 72 hours.

(3) The physician's or nurse practitioner's countersignature shall be obtained within 30 calendar days of the verbal order.

(4) Agency professional personnel shall check all medicines that a patient may be taking to identify possible ineffective drug therapy, adverse reactions, significant side effects, drug allergies, and contraindicated medication.

(5) Agency professional personnel shall promptly report any problems to the patient's physician or nurse practitioner.

(6) Only medications and treatments that must be administered to the patient by agency personnel need to be on a written order form from the physician or nurse practitioner.

Coordination of Patient Services

(1) All personnel furnishing services shall ensure that their efforts are coordinated effectively and support the objectives outlined in the patient's plan of care.

(2) The clinical record or minutes of case conferences shall reflect that effective communication and coordination of patient care occurs.

(3) A written summary report for each patient shall be sent to the attending physician or nurse practitioner at least every 62 days.

333-027-0130
Nursing Services

The agency shall provide skilled nursing service by or under the supervision of a registered nurse in accordance with agency policies and the plan of treatment. Such services shall comply with applicable laws. For the purposes of this rule, "critical and fluctuating" means a situation where the patient's clinical or behavioral state is of a serious nature, expected to rapidly change, and in need of continuous reassessment and evaluation.

(1) Registered Nurse's Duties: The registered nurse shall make the initial visit, regularly reevaluate the patient's nursing needs, initiate appropriate preventive and rehabilitative nursing procedures, provide those services requiring substantial specialized nursing skills, prepare clinical and progress notes, coordinate services, inform the physician or nurse practitioner and other personnel (including paid caregivers) of changes in the patient's condition and needs, counsel the patient, family or other caregivers (as applicable) in meeting nursing and related needs, participate in inservice programs, and supervise, teach, and assign care tasks to other nursing personnel. The registered nurse may delegate aspects of patient care to unlicensed individuals in accordance with OAR chapter 851, division 047.

(a) Supervision of the licensed practical nurse shall include:

(A) Initial evaluation of the patient to identify appropriate tasks to be performed by the licensed practical nurse. These tasks shall be documented in the patient's clinical record; and

(B) A supervisory visit every 60 days when the patient's condition is stable and predictable, and at least every two weeks when the patient's condition is critical and fluctuating. This visit shall be made either when the licensed practical nurse is present to observe and assist or when the licensed practical nurse is absent, to assess relationships and determine that goals are being met. Documentation of these activities shall be maintained in the patient's clinical record.

(b) Home Health Aide Supervision: The registered nurse is responsible for supervising for quality and appropriateness of care provided by the home health aide service. The registered nurse shall be readily available to the home health aide by telephone at all hours services are provided. Supervisory visits by the registered nurse or therapist shall be documented in the patient's clinical record.

(A) When skilled nursing services and home health aide services are being furnished to the patient, the registered nurse shall make a supervisory visit to the patient's residence at least every two weeks, either when the home health aide is present to observe and assist, or when the home health aide is absent to assess relationships and determine if goals are being met.

(B) If a patient is receiving only skilled therapy services and home health aide services, a skilled therapist may make the supervisory visits at least every two weeks, in lieu of a registered nurse. The therapist must convey information about the performance of the home health aide to the aide's registered nurse supervisor.

(C) When only home health aide services are being furnished to a patient, a registered nurse must make a supervisory visit to the patient's residence at least once every 60 days. Each supervisory visit must occur when the aide is furnishing patient care.

(2) Licensed Practical Nurse:

(a) Duties: The licensed practical nurse shall provide services in accordance with agency policies, prepare clinical and progress notes, assist the physician or nurse practitioner or registered nurse in performing specialized procedures, prepare equipment and materials for treatments, observe aseptic techniques as required, and assist the patient in learning designated self-care techniques.

(b) Supervision of Licensed Practical Nurse: A licensed practical nurse shall provide services only under the supervision of a registered nurse.

(3) Home Health Aide: When an agency provides or arranges for home health aide service, an aide shall be assigned if the plan of treatment, as described in OAR 333-027-0090, specifies that the patient needs personal care. Home health aide services shall be provided under the supervision of the registered nurse and in accordance with the registered nurse's assignment and agency policies.

(a) The duties of a home health aide shall include:

(A) Performance of simple procedures as assigned by the registered nurse;

(B) Personal care;

(C) Ambulation and exercise;

(D) Household services essential to health care at home;

(E) Assistance with medications that are ordinarily self-administered;

(F) Reporting changes in the patient's condition and needs; and

(G) Completing appropriate records.

(b) A home health aide must have the following qualifications:

(A) Oregon Certified Nursing Assistant (CNA) certification and inclusion on the Oregon State Board of Nursing Nurse Aide Registry.

(B) Prior to providing care to a patient, the home health aide must be evaluated by a registered nurse for competency in each of the following areas:

(i) Communication skills;

(ii) Observation of, reporting of, and documentation about the patient and care provided;

(iii) Maintenance of a clean, safe and healthy environment;

(iv) Basic infection control procedures;

(v) Basic nutrition and fluid intake, including food preparation techniques as appropriate;

(vi) Reading and recording temperature, pulse, and respiration;

(vii) Basic elements of body functioning and changes in body function that must be reported to an aide's supervisor;

(viii) Recognizing emergencies and knowledge of emergency procedures;

(ix) The physical, emotional, and developmental needs of, and ways to work with, the populations served by the agency, including the need for respect for the patient, the patient's privacy, and the patient's property;

(x) Appropriate and safe techniques in personal hygiene and grooming that include:

(I) Bed bath;

(II) Sponge, tub, or shower bath;

(III) Shampoo: sink, tub, or bed;

(IV) Nail and skin care;

(V) Oral hygiene; and

(VI) Toileting and elimination.

(xi) Safe transfer techniques and ambulation;

(xii) Normal range of motion and positioning; and

(xiii) Any other task the agency may choose to have the home health aide perform.

(c) Home health aide competency evaluation:

(A) An individual may furnish home health aide services on behalf of an agency only after that individual has successfully completed a competency evaluation program that meets the following requirements:

(i) The competency evaluation program must address each of the subjects listed in subparagraphs (3)(b)(B)(i) through (xiii) of this rule;

(ii) The subject areas listed at subparagraphs (3)(b)(B)(vi), (x), (xi), and (xii) of this rule must be evaluated through observation of the aide's performance of the tasks with a patient; and

(iii) All other subject areas listed in paragraph (3)(b)(B) of this rule may be evaluated through written examination, oral examination, or observation of the aide with a patient.

(B) A home health aide is not considered competent in any task for which the aide's performance is evaluated as unsatisfactory. The aide must not perform that task without direct supervision by a licensed nurse until the aide receives training in the tasks for which the aide's performance was evaluated as unsatisfactory and passes a subsequent evaluation with a satisfactory rating.

(C) A home health aide has not successfully passed a competency evaluation if the aide's performance is unsatisfactory in more than one of the areas delineated in paragraph (3)(b)(B) of this rule.

(D) The agency must maintain documentation that demonstrates that the home health aide has met competency evaluation requirements.

(d) Home Health Aide Orientation: The agency shall complete orientation of the home health aide to the agency's program and document the completion within two weeks of employment. This orientation must include information about:

(A) Policies and objectives of the agency;

(B) The duties of a home health aide;

(C) The functions of other agency personnel and how they relate to each other in caring for the patient;

(D) Other community agencies; and

(E) Ethics and confidentiality.

(e) Training on the Job: In addition to orientation, an agency shall provide the home health aide patient-specific, on-the-job instruction for carrying out procedures that are not transferable to another patient. Such training shall be in accordance with OAR chapter 851, division 061, and shall be documented in the patient's clinical record.

(f) Inservice Training: The agency shall arrange for and document at least 12 hours of inservice training annually. These training sessions shall pertain to the role and responsibilities of the home health aide.

(g) Home Health Aide Assignment: The agency shall provide teaching and supervision of the home health aide in accordance with OAR chapter 851, division 061. All assignments for patient care shall be written, prepared by a registered nurse, and updated on a monthly basis, or more often if the patient's condition requires. Special tasks of nursing care may be delegated by a registered nurse to a home health aide according to the provisions of OAR chapter 851, division 047.

333-027-0140
Therapy Services

(1) Physical Therapy Services: If an agency provides physical therapy services, either directly or under contract, these services shall be provided only by a physical therapist or by a physical therapist assistant. The physical therapist and the physical therapist assistant shall provide physical therapy services in accordance with applicable laws, rules, agency policies and the patient's plan of treatment. Services provided by a physical therapist assistant shall be supervised by a physical therapist.

(a) Duties of a physical therapist include: assisting a physician in evaluating levels of function, helping to develop and revise the plan of treatment, preparing clinical and progress notes, advising and consulting with the family and other agency personnel, participating in inservice programs, and providing services.

(b) Duties of the physical therapist assistant include: performing services that are planned, assigned, delegated, and supervised by the physical therapist; assisting in preparation of clinical notes and progress reports; participating in the education of the patient and family; and participating in inservice programs.

(c) Supervision of the physical therapist assistant shall include at a minimum:

(A) Initial evaluation of the patient by the physical therapist to identify appropriate tasks to be performed by the physical therapist assistant. These tasks shall be documented in each patient's clinical records; and

(B) A visit to the patient's residence by the physical therapist at least once a month when the patient's condition is no longer stable and predictable, or at 60-day intervals when the patient's condition is stable, either when the assistant is present to observe and assist or when the assistant is absent, to assess relationships and determine that goals are being met. Documentation of these visits by the physical therapist shall be maintained in the patient's clinical record.

(2) Occupational Therapy Services: If an agency provides occupational therapy services, either directly or under contract these services shall be provided only by an occupational therapist or by an occupational therapy assistant under the supervision of an occupational therapist. The occupational therapist and occupational therapy assistant shall provide occupational therapy services in accordance with applicable statutes, rules, agency policies and the patient's plan of treatment. The agency shall assure that services provided by an occupational therapy assistant shall be supervised by an occupational therapist.

(a) Duties of the occupational therapist include: assisting the physician in evaluating levels of function, helping to develop and revise the plan of treatment, preparing clinical and progress notes, advising and consulting with the family and other agency personnel, participating in inservice programs, and providing services.

(b) Duties of the occupational therapy assistant include: performing services planned, assigned, delegated, and supervised by the occupational therapist; assisting in the preparation of clinical notes and progress reports; participating in the education of the patient and family; and participating in inservice programs.

(c) Supervision of the occupational therapy assistant shall include at a minimum:

(A) Initial evaluation of the patient by the occupational therapist to identify appropriate tasks to be performed by the occupational therapy assistant. These tasks shall be documented in each patient's clinical record; and

(B) A visit to the patient's residence by the occupational therapist at least once a month when the patient's condition is no longer

stable and predictable, or at 60-day intervals when the patient's condition is stable, either when the assistant is present to observe and assist or when the assistant is absent, to assess relationships and determine that goals are being met. The occupational therapist shall document these visits in each patient's clinical record.

(3)(a) Speech Therapy Services: If an agency provides speech therapy services, either directly or under contract, these services shall be provided only by a speech pathologist. The speech pathologist shall provide speech therapy services in accordance with applicable statutes, rules, agency policies and the patient's plan of treatment.

(b) Duties of the speech pathologist include: assisting the physician in evaluating the patient's level of function; helping to develop and revise the plan of treatment; preparing clinical and progress notes; advising and consulting with the family and other agency personnel; participating in inservice programs; and providing services.

(4) Medical Social Services: If an agency provides medical social services, either directly or under contract these services shall be provided only by a social worker, or by a social work assistant. The social worker or the social work assistant shall provide social work services in accordance with applicable statutes, rules, agency policies and the patient's plan of treatment.

(a) Duties of the social worker include: assisting the physician, other team members, and the family in understanding the significant social and emotional factors related to health problems of the patient; participating in the development of the plan of treatment; preparing clinical and progress notes; working with the family; utilizing appropriate community resources; participating in discharge planning and inservice programs; and acting as a consultant to other agency personnel.

(b) Duties of the social work assistant include: performing services planned, assigned, delegated, and supervised by the qualified social worker, preparing clinical notes and progress reports; and participating in inservice programs.

(c) Supervision of the social work assistant shall include at a minimum:

(A) Initial evaluation of the patient by the social worker to identify appropriate tasks to be performed by the social work assistant. These tasks shall be documented in the individual patient's clinical records; and

(B) After the initial evaluation by the social worker and development of the plan of treatment, documented supervisory conferences with the social work assistant shall be held at least two times monthly to assess adherence to the goals and quality of relationships. In the event the patient's situation changes and requires a change in the treatment plan and goals, the social worker will make a joint visit with the social work assistant to revise the plan of treatment.

333-027-0150
Clinical Records

General Requirements for Clinical Records:

(1) An agency shall maintain, for each patient, a clinical record that covers the service(s) the agency provides directly, or through contract with another agency. All entries in the patient's clinical record must be dated and authenticated. Authentication of an entry requires the use of a unique identifier such as a signature, code thumbprint, voice print, or other means, that provides identification and the title of the individual responsible for the entry. Clinical notes shall be written the day services are rendered and shall be incorporated into the clinical record at least weekly. The agency shall maintain an approved list of standard abbreviations, signs and symbols for use in the clinical record.

(a) The record of each patient receiving home health services shall contain pertinent past and current findings. The findings shall include, but not be limited to, history and physical examination, and hospital discharge summary. The record shall contain other appropriate information such as: patient identifying information; name of physician; signed and dated clinical and progress notes; copies of summary reports that have been sent to the physician; and a discharge summary.

(b) The record shall contain the patient's plan of treatment.

(c) Clinical records shall contain all original or facsimile physician orders and agency caregiver documentation.

(2) Retention and Protection of Records:

(a) The administrator of the agency shall be responsible for proper preparation, adequate content, and preservation of the clinical records. The agency shall permit authorized personnel of the Division to review clinical records as necessary to determine compliance with these rules.

(b) An agency shall have written policies governing access to, and maintenance, retention, utilization, storage, and disposition of all clinical records.

(c) An agency shall complete all clinical records of discharged patients within 30 calendar days of the patient's discharge.

(d) Clinical records are the property of the agency.

(e) Upon a patient's request, the agency shall provide information from the patient's clinical record related to the patient's condition and the care provided.

(f) An agency shall ensure that original clinical records are readily retrievable. Clinical records may be retained on paper, microfilm, electronic, or other media.

(g) An agency shall keep all clinical records for a period of 10 years after the date of the patient's last discharge from the agency.

(h) An agency shall keep clinical records in a safe and secure environment that will protect them from damage and harm.

(i) If an agency changes ownership, the agency shall retain all clinical records in original or microfilmed form and it shall be the responsibility of the successor agency to protect and maintain these records.

(j) In the event of dissolution of an agency, the agency administrator shall notify the Division where the clinical records will be stored.

(k) The agency shall retain non-medical records according to the policy of the individual agency.

(l) An agency shall comply with ORS 192.518 through 192.529, which governs the use and disclosure of patient's protected health information.

333-027-0160
Program Evaluation

An agency shall conduct an overall evaluation of its program at least annually. The Committee and the agency shall conduct the review. The evaluation shall consist of reviews of overall policies, administrative practices, and quality assurance activities. The evaluation shall assess the extent to which the agency's program is appropriate, adequate, effective, and efficient. The Committee shall provide a written report of the evaluation to the governing body of the agency. Evaluation reports shall be maintained in its administrative records. The agency shall take corrective action, if appropriate, on negative findings identified as a result of the program evaluation.

(1) Policy and Administrative Review: As part of the evaluation process, the agency shall review its policies and administrative practices to determine the extent to which they promote patient care that is appropriate, adequate, effective, and efficient.

(2) Quality assurance: The agency shall implement an ongoing quality assurance program designed to objectively and systematically monitor the quality and appropriateness of patient care. The agency shall perform this review at least quarterly. The agency's quality assurance program must include a review of clinical records.

(a) The quality assurance program shall consist of problem identification, implementation of a corrective action plan, and re-monitoring of identified problems.

(b) Quality assurance activities shall be performed by a multi-disciplinary team consisting of health professionals from each of the services the agency provides.

333-027-0170
Waivers

(1) Each agency must comply with ORS Chapter 443 and OAR chapter 333, division 027. However, an agency may request that the Division grant an exception to these rules for the use of alternative concepts, methods, procedures, techniques, equipment, facilities, personnel qualifications or the conducting of pilot projects or research. If an agency seeks an exception to the Division's rules, it must:

(a) Submit the request in writing to the Division;

(b) Identify the specific rule for which an exception is requested;

(c) Explain the special circumstances relied upon to justify the exception;

(d) List any alternatives that were considered and the reasons those alternatives were not selected;

(e) Demonstrate that the proposed exception is desirable to maintain or improve the health and safety of the patients and will not jeopardize patient health and safety; and

(f) State the proposed duration of the exception.

(2) After reviewing the written request, the Division may grant the exception. If the Division grants an exception, it shall issue its decision in writing.

(3) An agency may not implement any exception until it has received the Division's written approval of the exception.

Stats. Implemented: ORS 443.085
Hist.: HD 20-1993, f. & cert. ef. 10-28-93; Renumbered from 333-027-0067, OHD 13-1998, f. & cert. ef. 11-6-98; OHD 9-2002, f. & cert. ef. 7-2-02; PH 7-2012, f. 3-30-12, cert. ef. 4-1-12

333-027-0175
Violations

In addition to non-compliance with any law that governs a home health agency, it is a violation to:

(1) Refuse to cooperate with an investigation or survey, including but not limited to failure to permit Division staff access to the agency, its documents or records;

(2) Fail to implement an approved plan of correction;

(3) Refuse or fail to comply with an order issued by the Division;

(4) Refuse or fail to pay a civil penalty;

(5) Fail to comply with rules governing the storage of records following the closure of an agency;

(6) Fail to report suspected abuse of elderly persons as defined in ORS 124.050;

(7) Fail to return a license as provided in OAR 333-027-0033; or

(8) Operate without a license.

333-027-0180
Informal Enforcement

(1) If during an investigation or survey Division staff document violations of home health licensing rules or laws, the Division may issue a statement of deficiencies that cites the law alleged to have been violated and the facts supporting the allegation.

(2) A signed plan of correction must be mailed to the Division within 10 business days from the date the statement of deficiencies was received by the agency. A signed plan of correction will not be used by the Division as an admission of the violations alleged in the statement of deficiencies.

(3) An agency shall correct all deficiencies within 60 days from the date of the exit conference, unless an extension of time is requested from the Division. A request for such an extension shall be submitted in writing and must accompany the plan of correction.

(4) The Division shall determine if a written plan of correction is acceptable. If the plan of correction is not acceptable to the Division, the Division shall notify the agency owner in writing or by telephone:

(a) Identifying which provisions in the plan the Division finds unacceptable;

(b) Citing the reasons the Division finds them unacceptable; and

(c) Requesting that the plan of correction be modified and resubmitted no later than 10 working days from the date the letter of non-acceptance was received by the owner.

(5) If the agency does not come into compliance by the date of correction reflected on the plan of correction or 60 days from date of the exit conference, whichever is sooner, the Division may propose to deny, suspend, or revoke the agency license, or impose civil penalties.

Stat Auth.: ORS 443.085
Stats. Implemented: ORS 443.045 & 443.085
Hist.: PH 7-2012, f. 3-30-12, cert. ef. 4-1-12

333-027-0185
Formal Enforcement

(1) If during an investigation or survey Division staff document a substantial failure to comply with home health licensing laws or rules, or if an agency fails to pay a civil penalty imposed under ORS 443.045, the Division may issue a Notice of Proposed Suspension or Notice of Proposed Revocation in accordance with 183.411 through 183.470.

(2) The Division may issue a Notice of Imposition of Civil Penalty for violations of home health licensing laws.

(3) At any time the Division may issue a Notice of Emergency License Suspension under ORS 183.430(2).

(4) If the Division revokes an agency license, the order shall specify when, if ever, the agency may reapply for a license.

Stat. Auth.: ORS 443.085
Stats. Implemented: ORS 443.045 & 443.085
Hist.: PH 7-2012, f. 3-30-12, cert. ef. 4-1-12

333-027-0190
Civil Penalties

(1) An agency that violates home health licensing laws or rules, an administrative order, or settlement agreement is subject to the imposition of a civil penalty not to exceed $1,000 per violation and may not total more than $2,000.

(2) In determining the amount of a civil penalty, the Division shall consider whether:

(a) The Division made repeated attempts to obtain compliance;

(b) The licensee has a history of non-compliance with home health licensing laws and rules;

(c) The violation poses a serious risk to the public's health; and

(d) There are mitigating factors, such as a licensee's cooperation with an investigation or actions to come into compliance.

(3) The Division shall document its consideration of the factors in section (2) of this rule.

(4) Each day a violation continues is an additional violation.

(5) A civil penalty imposed under this rule shall comply with ORS 183.746.

DIVISION 28

SCHOOL-BASED HEALTH PROGRAMS

School-Based Health Center Program

333-028-0200
Purpose

The school-based health center (SBHC) program supports communities in promoting the health and well-being of the school-age population through the evidence-based best practice within a public health framework. These rules (OAR 333-028-0200 through 333-028-0250) establish the procedure and criteria the Oregon Health Authority shall use to certify, suspend and decertify SBHCs. Certification of a SBHC by the SBHC state program is voluntary; an operating clinic is free to choose not to participate in certification and still operate. Only certified SBHCs are eligible for funding from Oregon Health Authority.

Stat. Auth.: ORS 413.223
Stats. Implemented: ORS 413.223, 413.225
Hist.: PH 15-2013, f.12-26-13, cert. ef. 1-1-14

333-028-0210
Definitions

(1) "Authority" means the Oregon Health Authority.

(2) "Certification year" means a one-year period beginning on July 1 and ending on June 30.

(3) "Electronic health record (EHR)" means an electronic record of an individual's health-related information that conforms to nationally recognized interoperability standards and that can be created, managed and consulted by authorized clinicians and staff across more than one health care provider.

(4) "Electronic medical record (EMR)" means a digital version of a paper chart that contains all of the patient's medical history from one practice. An EMR is mostly used by providers for diagnosis and treatment.

(5) "Program" means the Oregon Health Authority, Public Health Division, school-based health center program.

(6) "School-based health center" (SBHC) has the meaning given the term in ORS 413.225.

(7) "SBHC system" is one or more SBHCs that operate under the same sponsoring agency.

(8) "Sponsoring agency" is an entity that provides the following services for a SBHC or contracts with another entity to provide one or more of the following:

(a) Funding;
(b) Staffing;
(c) Medical oversight;
(d) Liability insurance; and
(e) Billing support.

333-028-0220
Certification Requirements

In order to be certified as a SBHC, a SBHC must meet all requirements for certification in the following sections of the 2014 SBHC Standards for Certification Manual, incorporated by reference.

(1) Sponsoring agency, section B.1;
(2) Facility, section B.2;
(3) Hours of operation, section C.1;
(4) Staffing, section C.2;
(5) Eligibility for services, section C.3;
(6) Policies and procedures, section C.4;
(7) Laboratory/Diagnostic services, section D;
(8) Comprehensive Services, section E.1;
(9) Equipment, section E.2;
(10) Medication, section E.3;
(11) Data collection/reporting, section F; and
(12) Billing, section G.

333-028-0230
Application and Certification Process

(1) An individual with legal authority to act on behalf of the entity that administers a SBHC may apply for certification of a SBHC by submitting a SBHC Certification Application to the Authority via electronic mail to the program's electronic mail address posted on the program's website or by mail to the mailing address posted on the program's website, www.healthoregon.org/sbhc. Instructions and criteria for submitting a SBHC Certification Application is posted on the program's website.

(2) An individual may submit an application for more than one SBHC provided that each SBHC will be administered by the same entity and each SBHC individually meets the certification requirements.

(3) The program shall review the application within 30 days of receiving the application to determine whether it is complete.

(4) If the program determines that the application is not complete, it will be returned to the applicant for completion and resubmission.

(5) If the program determines that the application is complete it will be reviewed to determine if it meets certification requirements described in OAR 333-028-0210. If the program determines that on the face of the application and in reviewing any other applicable documents that the SBHC meets the certification requirements the program shall:

(a) Inform the applicant in writing that the application has been approved;

(b) Request the applicant complete the program's online Operational Profile forms prior to the on-site verification review; and

(c) Schedule an on-site verification review.

(6) If a SBHC does not meet certification requirements in their certification application, the Authority may choose one of the following actions:

(a) The program may deny SBHC certification if the SBHC does not meet the requirements of these rules. The program will provide the applicant with a clear description of reasons for denial based on the certification requirements in the denial letter. An applicant may request that the program reconsider the denial of SBHC certification. A request for reconsideration must be submitted in writing to the program within 90 days of the date of the denial letter and must include a detailed explanation of why the applicant believes the program's decision is in error along with any supporting documentation. The program shall inform the applicant in writing whether it has reconsidered its decision; or

(b) The program may approve the applicant's SBHC certification based on an agreed upon timeline for a corrective action plan for the non-compliant requirements. The site must submit a waiver to the program that includes an explanation of the non-compliant requirements, a plan for corrective action and date for meeting compliance.

(7) Once a SBHC is certified, the certification status is effective for the following certification year.

(8) A certified SBHC must renew its certification no later than October 1 each year via the program's online Operational Profile forms in order to remain certified.

(9) The program will notify SBHCs of their certification renewal status by November 1 each year.

Stat. Auth.: ORS 413.223

333-028-0240
Verification

(1) The program shall conduct one on-site verification review of each approved SBHC within one year of application approval to determine compliance with SBHC certification requirements.

(2) After the initial on-site verification review, the program shall conduct an on-site verification review every two years for a representative sample of certified SBHCs in each SBHC system.

(3) A SBHC will be notified, in writing, no less than 30 days before its scheduled verification review.

(4) A SBHC must permit program staff access to the site's place of business during the review.

(5) The verification review must include, but is not limited to:

(a) Review of documents, policies and procedures, and records;

(b) Review of electronic medical record systems, review of electronic health records systems, and review of practice management systems;

(c) Review of data reports from electronic systems or other patient registry and tracking systems;

(d) Interviews with practice management, clinical and administrative staff;

(e) On-site observation of practice staff with at a minimum two patients, with the consent of the patient; and

(f) On-site observation of patient environment and physical environment.

(6) Following a review, program staff may conduct an exit interview with SBHC representative(s). During the exit interview the program staff shall:

(a) Inform the SBHC representative(s) of the preliminary findings of the review; and

(b) Give the SBHC representatives(s) a reasonable opportunity to submit additional facts or other information to the program staff in response to the findings.

(7) Within two weeks of the on-site visit program staff must prepare and provide the SBHC with a written report of the findings from the on-site review.

(8) If no certification deficiencies are found during the review, the program shall issue written findings to the SBHC indicating no deficiencies were found.

(9) If certification deficiencies are found during the on-site review, the program may take action in compliance with OAR 333-028-0250.

(10) The program may conduct a review of a certified SBHC without prior notice of any or all selected certification requirements for compliance and perform a verification on-site review of a certified SBHC if the program is made aware of issues of compliance from any source.

(11) At any time, a SBHC may request an administrative review of compliance, which includes one on-site visit. The review will be considered a "no penalty" review with the exception of gross violation or negligence that may require site closure or temporary suspension of services.

333-028-0250
Compliance

(1) A SBHC must notify the program within 20 days of any change that brings the SBHC out of compliance with the certification requirements. A SBHC must submit a waiver to the program that includes an explanation of the non-compliant requirement, a plan for corrective action and date for meeting compliance.

(2) The program will review the waiver request and inform the SBHC of approval or denial of the waiver within two weeks of submission.

(3) If the waiver is approved the SBHC must comply with certification requirements by the proposed date of compliance.

(4) If a waiver is denied; a SBHC does not come into compliance by the date of compliance stated on the waiver; or a SBHC is out of compliance with certification requirements and has not submitted a waiver, based on the program's discretion, the program may:

(a) Require the SBHC to complete an additional waiver with an updated plan for corrective action and updated date for meeting compliance; or

(b) Require the SBHC to complete a waiver to satisfy the requirements in section (1) of this rule; or

(c) Issue a written warning with a timeline for corrective action; or

(d) Issue a letter of non-compliance with the notification of a suspension or decertification status.

(5) A SBHC that had been decertified may be reinstated after reapplying for certification.

(6) A SBHC with its certification status suspended may have its suspension lifted once the program determines that compliance with certification requirements has been achieved satisfactorily.

(7) If there are updates to the current rules that require a SBHC to make any operational changes, the program will allow the SBHC until the beginning of the next certification year or a minimum of 90 days to come into compliance.

333-028-0260
Funding Criteria for Certified SBHCs

(1) The program is required, under ORS 413.225 to provide funds for the expansion and continuation of certified school-based health centers.

(2) A SBHC that is certified by the program is eligible for funding by the program.

(3) Funding for a certified SBHC may be provided, but is not limited to being provided, to:

(a) A local public health authority, as that is defined in ORS 431.260;

(b) A sponsoring agency; or

(c) A coordinated care organization, or governmental entity or person that can demonstrate a significant interest and involvement in assisting and coordinating with SBHCs.

(4) Funding award amounts will be primarily based on the number of certified SBHCs in the county and legislatively approved budget. The program may take into consideration other factors such as the quality of the health care services, clients served, and population needs.

(5) Funding for certified SBHCs shall be awarded for up to two years. Fund awards are renewable based on the certification renewal process per OAR 333-028-0220.

(6) Funding for a certified SBHC may be suspended or discontinued at the program's discretion if a certified SBHC is out of compliance with certification requirements and the program has issued a suspension notice under OAR 333-028-0250(4).

(7) The program must discontinue funding of an SBHC that has been decertified.

333-028-0270
Funding Criteria for SBHC Planning Communities

(1) The program is required to direct funds to communities planning for certified school-based health centers and will do so through a competitive grant proposal process for one or two year planning grants.

(2) Any of the following entities may be eligible to apply for planning grant funds on behalf of their community:

(a) A local public health authority;

(b) A school or school district;

(c) A coordinated care organization as that is defined in ORS 414.025;

(d) Medical, dental or mental health organizations; or

(e) A governmental entity or person that can demonstrate a significant interest and involvement in establishing, assisting or coordinating with SBHCs.

(3) The program will specify in its published request for proposals which entities within a community are eligible for that specific grant award.

(4) Planning grant applicants will be evaluated on elements outlined in the request for proposal, which must include but is not limited to an evaluation of community need and readiness for a SBHC.

(5) The grant amount awarded shall be determined based on number of awarded applicants and legislatively approved budget.

(6) Funding for planning communities shall be awarded for up to two years.

Stat. Auth.: ORS 413.223

333-028-0280
Funding Criteria for Incentive Funds

(1) The program shall award grant funding to communities with certified SBHCs through a competitive grant proposal process in order to incentivize:

(a) Increasing the number of SBHCs as state-recognized patient-centered primary care homes as that is defined in ORS 414.025;

(b) Improve coordination of care of patients served by coordinated care organizations and SBHCs; and

(c) Improve the effectiveness of the delivery of health services through SBHCs to children who qualify for medical assistance.

(2) Any entity or person described in OAR 333-028-0270(2) may apply for funding and the program will specify in its published request for proposals which entities within a community are eligible for that specific grant award.

(3) The program will evaluate applicants based on elements outlined in the request for proposals, which must include but is not limited to an evaluation of whether the person or entity has the qualifications to accomplish one or more of the activities described in subsections (1)(a) through (c) of this rule.

(4) Funding awards shall be determined based on number of awarded applicants and legislatively approved budget.

(5) Funding for the incentive grants shall be awarded for up to two years.

Certification for Local School Dental Sealant Programs

333-028-0300
Purpose

(1) The Oral Health Program supports communities in improving the oral health of the school-age population through evidence-based best practice within a public health framework. The Association of State and Territorial Dental Directors (ASTDD), Centers for Disease Control and Prevention (CDC), and the Community Preventive Services Task Force have all determined that school-based dental sealant programs are evidence-based best practices with strong evidence of effectiveness in preventing tooth decay among children.

(2) These rules (OAR 333-028-0300 through 333-028-0350) establish the procedure and criteria the Oregon Health Authority shall use to certify, train, suspend, decertify, and monitor and collect data from Local School Dental Sealant Programs. Certification of a Local School Dental Sealant Program by the State Oral Health Program is mandatory before dental sealants can be provided in a school setting.

Stat. Auth.: OL 2015, ch. 791
Stats. Implemented: OL 2015, ch. 791
Hist. : PH 2-2016, f. & cert. ef. 1-29-16

333-028-0310
Definitions

(1) "Authority" means the Oregon Health Authority.

(2) "Certification" means the Local School Dental Sealant Program has been authorized by the Oregon Health Authority to operate in an elementary or middle school setting. Certification by the Program is mandatory before dental sealants can be provided in a school setting.

(3) "Certification training" is a mandatory one-time training for Local School Dental Sealant Programs provided by the Program that must be taken before an application for certification is submitted. Training topics shall include:

(a) Research and evidence-based practices;
(b) Utilizing hygienists and dental assistants;
(c) Cultural competency and health literacy;
(d) Recruiting and working with schools;
(e) Providing services in a school setting;
(f) Equipment and supplies needed;
(g) Protocols for quality;
(h) Data collection and reporting; and
(i) Continuous quality improvement.

(4) "Certification year" means a one-year period beginning on August 1 and ending on July 31.

(5) "Clinical training" is an annual training provided by the Local School Dental Sealant Program or Program to update skills in determining the need for and appropriateness of dental sealants, and sealant application techniques.

(6) "Local School Dental Sealant Program" is an entity outside of the Oregon Health Authority where dental sealants are one of the services being provided in a school setting. Only Local School Dental Sealant Programs, and not individual dental hygienists, can be certified.

(7) "Program" means the Oregon Health Authority, Public Health Division, Oral Health Program.

(8) "Recertification" means the Local School Dental Sealant Program has been authorized by the Oregon Health Authority to operate in a school setting for the next certification year.

Hist. : PH 2-2016, f. & cert. ef. 1-29-16

333-028-0320
Certification Requirements

To be certified, a Local School Dental Sealant Program must meet all requirements for certification.

(1) A representative responsible for coordinating and implementing the Local School Dental Sealant Program must attend a one-time certification training provided by the Program. If the Local School Dental Sealant Program experiences personnel changes that impact the representative responsible for coordinating and implementing the Local School Dental Sealant Program, then a new representative must attend the one-time certification training before applying for recertification. Any templates or materials provided by the Program during the certification training that are modified or utilized by the Local School Dental Sealant Program must acknowledge the Program on such templates or materials.

(2) A Local School Dental Sealant Program must provide an annual clinical training to all providers rendering care within their scope of practice in a school setting. This requirement may be met by one of these methods:

(a) A Local School Dental Sealant Program develops and implements its own training.

(b) A Local School Dental Sealant Program sends their providers to an annual training provided by the Program.

(3) Before initially contacting any school to offer services, a Local School Dental Sealant Program must contact the Coordinated Care Organizations (CCOs) operating in the community. In consultation with the Program, the CCO will determine which Local School Dental Sealant Program is best able to provide services. A CCO must contact the Program before any decision is made. This collaboration will ensure access and minimize the duplication of services. Priorities should be given to the most cost-effective dental sealant delivery model that meets certification requirements. Existing relationships with schools and providers should be considered when multiple delivery models meet requirements. The Program will provide the CCOs with a list of school dental sealant

programs and the schools they serve from the Certification Application and Renewal Certification Application forms.

(4) A Local School Dental Sealant Program must ensure all Medicaid encounters are entered into the Medicaid system.

(5) A Local School Dental Sealant Program shall first target elementary and middle schools where 40 percent or greater of all students attending the school are eligible to receive assistance under the United States Department of Agriculture's National School Lunch Program.

(6) A Local School Dental Sealant Program must offer, at a minimum, screening and dental sealant services to students with parental/guardian permission regardless of insurance status, race, ethnicity or socio-economic status in these grade levels:

(a) Elementary school students in first and second grades or second and third grades; and

(b) Middle school students in sixth and seventh grades or seventh and eighth grades.

(7) A Local School Dental Sealant Program must develop and implement a plan to increase parental/guardian permission return rates.

(8) A Local School Dental Sealant Program must adhere to these standards for school dental sealant programs:

(a) Dental equipment must be used on school grounds during school hours;

(b) A medical history is required on the parent/guardian permission form;

(c) Use the four-handed technique to apply sealants in elementary schools;

(d) Use the two-handed technique using an Isolite or equivalent Program approved device or the four-handed technique to apply sealants in middle and high schools; and

(e) Apply resin-based sealants.

(9) A Local School Dental Sealant Program must comply with all scope of practice laws as determined by the Oregon Board of Dentistry.

(10) A Local School Dental Sealant Program must comply with Oregon Board of Dentistry oral health screening guidelines.

(11) A Local School Dental Sealant Program must comply with infection control guidelines established in OAR 818-012-0040.

(12) A Local School Dental Sealant Program must comply with the Health Insurance Portability and Accountability Act (HIPAA) and Federal Educational Rights and Privacy Act (FERPA) requirements.

(13) A Local School Dental Sealant Program must respect classroom time and limit demands on school staff. Services must be delivered efficiently to ensure a child's time out of the classroom is minimal.

(14) A Local School Dental Sealant Program must conduct retention checks at one year for quality assurance.

(15) A Local School Dental Sealant Program must submit a data report to the Program annually. The information required to be included in such data report will be defined by the Program. Aggregate-level data will be required for each school.

(16) A Local School Dental Sealant Program must include the certification logo provided by the Program on all parent/guardian permission forms and written communication to schools, or provide schools with a letter provided by the Program indicating the Local School Dental Sealant Program is certified.

Stat. Auth.: OL 2015, ch. 791
Stats. Implemented: OL 2015, ch. 791
Hist. : PH 2-2016, f. & cert. ef. 1-29-16

333-028-0330
Certification and Recertification Process

(1) Only an individual with legal authority to act on behalf of the Local School Dental Sealant Program can apply for initial certification by submitting a Certification Application to the Authority via electronic mail to the Program's electronic mail address posted on the Program's website or by mail to the mailing address posted on the Program's website, www.healthoregon.org/sealantcert. Instructions and criteria for submitting a Certification Application is posted on the Program's website.

(2) The Program shall review the application within 15 days of receiving the application to determine whether it is complete.

(3) If the Program determines the application is not complete, it will be returned to the applicant for completion and resubmission.

(4) If the Program determines the application is complete, it will be reviewed to determine if it meets certification requirements described in OAR 333-028-0320.

(5) If the Program determines the Local School Dental Sealant Program meets the certification requirements, the Program shall:

(a) Inform the applicant in writing that the application has been approved; and

(b) Schedule on-site verification reviews.

(6) If a Local School Dental Sealant Program does not meet certification requirements in their certification application, the Program shall choose one of the following two actions:

(a) Certification will be denied if the Local School Dental Sealant Program does not meet the requirements of these rules. The Program will provide the applicant with a clear description of reasons for denial based on the certification requirements in the denial letter. An applicant may request that the Program reconsider the denial of certification. A request for reconsideration must be submitted in writing to the Program within 30 days of the date of the denial letter and must include a detailed explanation of why the applicant believes the Program's decision is in error along with any supporting documentation. The Program shall inform the applicant in writing whether it has reconsidered its decision; or

(b) Provisional certification will be provided based on an agreed upon timeline for a corrective action plan for the non-compliant requirements. The Local School Dental Sealant Program must submit a waiver to the Program that includes an explanation of the non-compliant requirements, a plan for corrective action, and date for meeting compliance.

(7) Once a Local School Dental Sealant Program is certified, the certification status is effective for the certification year of August 1 – July 31. A Local School Dental Sealant Program must notify the Program and Coordinated Care Organizations (CCOs) operating in the community if it terminates services for a scheduled school during a certification year.

(8) A certified Local School Dental Sealant Program must renew its certification no later than July 15 each year via the Program's online Renewal Certification Application form in order to remain certified. A Local School Dental Sealant Program must submit the annual data report to the Program before applying for renewal certification.

(9) The Program will notify a Local School Dental Sealant Program of their certification renewal status by August 1 of each year.

(10) The Program will notify Coordinated Care Organizations (CCOs) operating in the community of the certification and recertification status of a Local School Dental Sealant Program.

Stat. Auth.: OL 2015, ch. 791
Stats. Implemented: OL 2015, ch. 791
Hist. : PH 2-2016, f. & cert. ef. 1-29-16

333-028-0340
Verification

(1) The Program shall conduct on-site verification review of each approved Local School Dental Sealant Program. A representative sample of schools being served by the certified program will be reviewed each certification year.

(2) The Program will work with a Local School Dental Sealant Program to schedule a verification review. A Local School Dental Sealant Program will have at least 20 days advance notice before a review will occur.

(3) A Local School Dental Sealant Program must coordinate with the Program to access the school and staff operating the sealant program on the verification review date.

(4) The verification review must include, but is not limited to:

(a) Review of documents, policies and procedures, and records;

(b) Review of techniques used while providing dental sealants;

(c) Review of infection control practices; and

(d) On-site observation of the client environment and physical set-up.

(5) Following a review, Program staff may conduct an exit interview with the Local School Dental Sealant Program representative(s). During the exit interview Program staff shall:

(a) Inform the Local School Dental Sealant Program representative(s) of the preliminary findings of the review; and

(b) Give the Local School Dental Sealant Program representative(s) 10 working days to submit additional facts or other information to the Program staff in response to the findings.

(6) Within four weeks of the on-site visit, Program staff must prepare and provide the Local School Dental Sealant Program with a written report of the findings from the on-site review.

(7) If no certification deficiencies are found during the review, the Program shall issue written findings to the Local School Dental Sealant Program indicating no deficiencies were found.

(8) If certification deficiencies are found during the on-site review, the Program may take action in compliance with OAR 333-028-0350.

(9) At any time, a Local School Dental Sealant Program may request an administrative review of compliance, which includes one on-site visit. The review will be considered a "no penalty" review with the exception of gross violation or negligence that may require temporary suspension of services.

Stat. Auth.: OL 2015, ch. 791
Stats. Implemented: OL 2015, ch. 791
Hist. : PH 2-2016, f. & cert. ef. 1-29-16

333-028-0350
Compliance

(1) A Local School Dental Sealant Program must notify the Program within 10 working days of any change that brings the Local School Dental Sealant Program out of compliance with the certification requirements. A Local School Dental Sealant Program must submit a waiver to the Program that includes:

(a) Explanation of the non-compliant requirement;

(b) Plan for corrective action; and

(c) Date for compliance.

(2) The Program will review the waiver request and inform the Local School Dental Sealant Program of approval or denial of the waiver within 10 working days of submission. Services may be provided until the Local School Dental Sealant Program has been notified of its waiver request.

(3) If the waiver is approved, the Local School Dental Sealant Program will be provided provisional certification and must comply with certification requirements by the proposed date of compliance.

(4) If a waiver is denied; a Local School Dental Sealant Program does not come into compliance by the date of compliance stated on the waiver; or a Local School Dental Sealant Program is out of compliance with certification requirements and has not submitted a waiver, the Program, in its discretion, shall:

(a) Require the Local School Dental Sealant Program to complete an additional waiver with an updated plan for corrective action and updated date for compliance;

(b) Require the Local School Dental Sealant Program to complete a waiver to satisfy the requirements in section (1) of this rule;

(c) Issue a written warning with a timeline for corrective action; or

(d) Issue a letter of non-compliance with the notification of a suspension or decertification status. The Program will notify the CCO operating in the community and Local School Dental Sealant Program schools that a Local School Dental Sealant Program has been suspended or decertified. Dental sealants may not be provided in the school until the Local School Dental Sealant Program is certified.

(5) A Local School Dental Sealant Program that had been decertified may be reinstated after reapplying for certification.

(6) A Local School Dental Sealant Program with suspended certification status may have its suspension lifted once the Program determines that compliance with certification requirements has been satisfactorily achieved. The Program will notify the Coordinated Care Organizations (CCOs) operating in the community and schools that the Local School Dental Sealant Program's suspension has been lifted and that dental sealants may now be provided in the school.

(7) If there are updates to the current rules that require a Local School Dental Sealant Program to make any operational changes, the Program will allow the Local School Dental Sealant Program until the beginning of the next certification year or a minimum of 90 days to come into compliance.

Definitions

As used in these rules unless otherwise required by context:

(1) "Administrator" means the Assistant Director for Oregon Health Authority, Public Health Division.

(2) "Approval or Approved" means approved in writing.

(3) "Division" means Health Services of the Oregon Health Authority, Public Health Division.

(4) "Dormitory" means a room containing beds, cots, or other sleeping places and occupied by unrelated or separate groups and/or other individuals. Every 100 square feet of usable floor space in a dormitory shall constitute a lodging unit.

(5) "Hostel" means any establishment having beds rented or kept for rent on a daily basis to travelers for a charge or fee paid or to be paid for rental or use of facilities and which are operated, managed or maintained under the sponsorship of a nonprofit organization which holds a valid exemption from federal income taxes under 26 USC Sec. 501.

(6) "Issuing Authority" means the Oregon Health Authority, Public Health Division, its delegate, or contract agent.

(7) "Lodging Unit" means one or more self-contained rooms for travelers' occupancy, including those for sleeping, sitting, or cooking purposes, and except where a travelers' accommodation is comprised of a single lodging unit, designated by a number, letter, or other means of identification.

(8) "Person" means individuals, corporations, associations, firms, partnerships, and joint stock companies as well as public entities of any character.

(9) "Tourist Facility" means any traveler's accommodation, hostel, picnic park, recreation park, and organizational camp.

(10) "Travelers' Accommodation" includes any establishment, which is not a hostel, having rooms, apartments or sleeping

facilities rented or kept for rent on a daily or weekly basis to travelers or transients for a charge or fee paid or to be paid for rental or use of facilities.

(11) "Unregulated Small Drinking Water System" means a facility licensed under the authority of these rules that is not regulated under OAR 333-061, Public Water Systems. These systems must comply with the requirements of OAR 333-029-0075.

(12) "Usable Floor Space" means all floor space in a lodging unit not occupied by closets, built-ins, toilet rooms, bathrooms, or shower rooms.

Licensure Required

No person shall operate, manage, or maintain any travelers' accommodation or hostel without first:

(1) Making application for a license;

(2) Paying the license application fee; and

(3) Securing a license from the issuing authority.

(4) All licenses issued under ORS 446.310 to 446.350 terminate and are renewable on December 31 of each year.

Stat. Auth.: ORS 446.315 & 446.321
Stats. Implemented: ORS 446.3320, 446.321 & 446.323

333-029-0025
Plans Required

No person may construct, enlarge, or alter any travelers' accommodation or hostel without first:

(1) Submitting complete plans and specifications of the proposed construction, enlargement, or alteration to the issuing authority; and

(2) Securing plan approval from the issuing authority.

(3) Plan review is made by the Oregon Building Codes Division or by jurisdictions exempt under ORS 476.030. Written evidence of plan review, construction permit issuance, and a signed occupancy permit must be presented to the local public health authority before licensing.

(4) Whenever a food service facility, operating in conjunction with a travelers' accommodation so licensed under these rules, is constructed or extensively remodeled and whenever an existing structure is converted to use as a food service facility, properly prepared plans and specifications for such construction, remodeling or conversion must be submitted to the local public health authority for approval before construction. Plans must be submitted in accordance with Oregon Food Sanitation Rules OAR 333-150-0000 part 8-2.

333-029-0045
Air Volume, Heat, Light, and Ventilation for Hostels

(1) Each dormitory must:

(a) Have a ceiling height of not less than seven feet, six inches; and

(b) Have not less than 375 cubic feet of air volume and 50 square feet of usable floor area for each occupant.

NOTE: If any room used for sleeping purposes has a sloping ceiling, the prescribed ceiling height is required in only one-half the area thereof. Floor area where the ceiling is less than five feet from the finished floor to the finished ceiling may not be considered usable.

(2) Bed arrangements of dormitories must provide not less than 24 inches clear space between each bed, cot, or bunk. No dormitory may contain more than two tiers of beds. When two tiers are used, there must be at least:

(a) Three feet of clear vertical space between tiers of beds and between the top tier and ceiling;

(b) Thirty inches of horizontal space between beds;

(c) One foot of clear space between the floor of the dormitory and the underside of the first tier of beds. In lieu of such space, the first tier of bunks must have a continuous base that must be sealed to the floor; and

(d) A minimum aisle width with access to exits must be provided as follows:

(A) Thirty-six inch aisle width when serving a tributary occupant load of 30 or less persons;

(B) Forty-four inch aisle width when serving a tributary occupant load of more than 30 persons;

(C) If more than three beds are placed end to end in a row, there must be an approved aisleway at each end of the row in compliance with paragraph (A) or (B) of this subsection, whichever is appropriate to the occupant load.

(3) Every dormitory, shower, bath and toilet room used during periods requiring artificial heat must be provided with a safe and adequate source of heat by means of air exchange from other room(s) or by mechanical means capable of maintaining room temperature of not less than 68° F. at a level three feet above the floor during the time of occupancy.

(4) All sleeping rooms must be provided with natural light and ventilation by means of windows or skylights with an area of not less than one-tenth of the floor area of such rooms. The minimum area must be 10 square feet:

(a) Not less than one-half of the required window or skylight area may be openable to provide natural ventilation.

(b) In lieu of natural ventilation, a mechanical ventilation system must be provided. Such system must be capable of providing two air changes per hour and one-fifth of the air supply must be taken from the outside.

(c) In lieu of natural lighting, artificial lighting must be provided. Such lighting must be at least 10 foot candles in intensity three feet from the floor surface.

(5) All bathrooms, toilet rooms, laundry rooms, and similar rooms must be provided with natural light and ventilation by means of windows or skylights with an area equal to one-tenth of the floor area of such rooms. The minimum area must be three square feet:

(a) Not less that one-half of the required window or skylight area must be openable to provide natural ventilation. Openable windows must be screened.

(b) In lieu of natural ventilation, a mechanical ventilation system connected directly to the outside must be capable of providing five air changes per hour.

(c) In lieu of natural lighting, artificial lighting must be provided. Such lighting must be at least 10 foot candles in intensity three feet from the floor surface.

333-029-0050
Toilet, Lavatory, and Bath Facilities

(1) At least one toilet, lavatory, and bath must be provided for each five lodging units or fraction thereof where the individual lodging units are not provided such facilities. The required number of sanitary fixtures must be in accordance with the requirements of the Oregon Department of Consumer and Business Services, Building Codes Division.

(a) Multi-story accommodations constructed after July 1, 1970, must have toilet, lavatory, and bath facilities located on each floor. Toilets, lavatories and bath facilities must be maintained in a clean and sanitary condition.

(b) New toilet, lavatory and bath facilities, or facilities remodeled, enlarged or converted after the effective date of these rules must meet the requirements of the 2008 Oregon Plumbing Specialty Code and the 2007 Oregon Structural Specialty Code.

(2) The location and use of all public toilet and bath facilities must be clearly indicated by appropriate signs.

(3) Toilet, lavatory, and bath facilities for travelers' accommodations and hostels located in private homes must be separate from toilet and bath facilities utilized by the owner or operator of said travelers' accommodations and hostels.

(4) All lavatories, bathtubs, and showers must be provided with hot and cold water except where otherwise specifically exempted by the Division. Hot water must be at least 120° F.

(5) Toilet and bathrooms must:

(a) Have floors which are finished with a material that is smooth, easily cleanable, impervious to water, and coved to a height of four inches;

(b) Have shower compartments with walls which are impervious to water to a height of six feet above the floor. An effective water-tight joint between the wall and the floor must be maintained. (Wooden racks or duck boards over shower floors are prohibited);

(c) Have interior finishes which are smooth, easily cleanable, and impervious to water;

(d) Where rubber or impervious mats are used, have such mats clean and dry between usages;

(e) Have bathtub and shower stall floors that are finished with non-slip, impervious surfaces or provided with non-slip impervious bath mats; and

(f) Where glass bath or glass shower doors are used, have such doors made of safety glass.

(6) Non-water carried sewage disposal may not be used in lieu of water carried sewage disposal unless approved by the issuing authority and the Department of Environmental Quality according to OAR 340-071-0130.

(7) All plumbing installations must be in accordance with the requirements of the Oregon Department of Consumer and Business Services, Building Codes Division, 2008 Oregon Plumbing Specialty Code. New plumbing installations, or systems remodeled, enlarged or converted after the effective date of these rules must meet the requirements of the 2008 Oregon Plumbing Specialty Code.

333-029-0060
Solid Waste

(1) A minimum of one water-tight, non-absorbent and easily washable waste receptacle must be provided in each lodging unit. Such receptacle shall be kept clean and in good repair.

(2) Solid waste must be collected daily from rooms and areas used by guests.

(3) Solid waste must be disposed of in a manner which complies with the rules of the Department of Environmental Quality.

(4) Solid waste must be stored in individual garbage containers, bins, or storage vehicles.

(5) All such containers, bins, or vehicles must:

(a) Have tight fitting lids or covers; and

(b) Be durable, rust resistant, water-tight, rodent proof, readily washable, and kept in good repair.

(6) Solid waste must be collected at regular intervals. Such intervals may not exceed seven days. Collection frequency must be such so as not to create:

(a) Vector production and sustenance;

(b) Objectionable odors; or

(c) Any overflowing of solid waste or other unsanitary condition.

(7) Solid waste must be transported in a manner that complies with Department of Environmental Quality requirements.

333-029-0065
Vector Control

(1) Vector control measures shall be employed to prevent vector infestations in travelers' accommodations and hostels.

(2) Insect and rodent control measures to safeguard public health and to prevent nuisance to the public shall be applied. Developed areas, buildings, and structures shall be maintained free of accumulations of debris.

333-029-0070
Spa and Swimming Pools

Any spa or swimming pool located at or operated in connection with a travelers' accommodation or hostel must comply with the respective Oregon Public Health Division rules:

(1) For Public Spa Pools, OAR 333-062-0005 through 333-062-0185; and

(2) For Public Swimming Pools, OAR 333-060-0005 through 333-060-0515.

333-029-0075
Water Supply Systems

(1) Definitions applicable to this rule:

(a) "Maximum Contaminant Level (MCL)" means the maximum allowable level of a contaminant in water for consumption delivered to the users of a system, except in the case of turbidity where the maximum allowable level is measured at the point of entry to the distribution system.

(b) "Quarterly Sampling" means a sample is taken and submitted according to the following schedule: 1st Quarter is from January 1 through March 31, 2nd Quarter is from April 1 through June 30, 3rd Quarter is from July 1 through September 30 and the 4th Quarter is from October 1 through December 31.

(2) Water supply systems serving travelers' accommodations and hostels shall comply with OAR for Public Water Systems, OAR 333-061-0005 through 333-061-0095, and must be:

(a) Regulated as a Public Drinking Water System under OAR 333-06; or

(b) Water systems serving travelers' accommodations and hostels that are not regulated under OAR 333-061 as a Public

Drinking Water System must meet the requirements in section (3) below.

(3) Unregulated Public Drinking Water Systems:

(a) Plan Review. All new facilities that are not regulated by OAR 333-061 must submit plans to the Authority for review prior to construction or major modification of system. Systems regulated prior to January 1, 2003 by OAR 333-061 are not required to re-submit plans.

(b) Surface Water Sources. New facilities with surface water sources not regulated under OAR 333-061 will not be licensable after January 1, 2005. Facilities existing prior to January 1, 2005 in compliance with OAR 333-061-0032 may continue to operate.

(c) Sampling frequency:

(A) For seasonal facilities, a coliform sample must be taken prior to operational period and each quarterly sampling period while open to public. A minimum of two samples will be required for coliform, regardless of length of operation.

(B) For year round facilities:

(i) Coliform: Monthly for surface water. Quarterly for populations under 1000 on ground water.

(ii) Inorganic Samples: One time sampling required for new facilities before beginning operation.

(d) MCL Violations. An item is not considered a violation until confirmed by second sample taken with 24 hours. Four repeat samples must be taken within 24 hours of the original positive sample for a sample result above the maximum contaminant level (MCL).

(A) Total coliform: Report positive total coliform samples to the Authority within 24 hours of being notified of the positive sample.

(B) Fecal coliform. Any positive fecal coliform sample must be reported to the Authority within 24 hours.

(i) Public notification for this potential acute health risk is required.

(ii) An alternative procedure approved by the Authority must be in place before serving public.

(C) Inorganic Samples. One time sampling is required for new facilities. Additional testing is not required for facilities that were previously regulated under OAR 333-061 and have tested prior to January 1, 2003. Inorganics include: antimony, arsenic, asbestos, barium, beryllium, cadmium, chromium, cyanide, fluoride, mercury, nickel, nitrate, nitrite, selenium and thallium.

(D) Nitrate: Sample must be submitted for testing annually

(i) Any samples exceeding the MCL for nitrate shall be reported to the Authority within at least 24 hours.

(ii) When a test on a sample is reported to exceed the MCL for nitrate, public notification is required. Bottled water must also be provided to public upon request.

(E) The Authority may require more frequent monitoring than specified or may require confirmation samples for positive and negative results. It is the responsibility of the operator to correct any problems and get a laboratory test result that is less than the maximum contaminant level.

(e) Sample collection methods.

(A) For the purpose of determining compliance with the MCL and the sampling requirements of these rules, sampling results may be considered only if they have been analyzed by a laboratory certified by the State Drinking Water Program.

(B) Samples submitted to laboratories for analysis shall be clearly identified with the name of the water system, facility license number, sampling date, time, sample location identifying the sample tap, the name of the person collecting the sample and whether it is a routine or a repeat sample.

(i) Routine: These are samples collected from established sampling locations within a water system at specified frequencies to satisfy monitoring requirements as prescribed in this rule. These samples are also used to calculate compliance with maximum contaminant levels for inorganics prescribed in OAR 333-061-0030 (Table 1);

(ii) Repeat: These are samples collected as a follow-up to a routine sample that has exceeded a maximum contaminant level.

(iii) Test results: Sample results must be submitted to the Local Public Health Authority by the 10th of the month following the sampling period.

(iv) The Authority may take additional samples to determine compliance with applicable requirements of these rules.

(f) Public Notice. All public notification must be posted conspicuously on site and must include:

(A) A description of the violation or situation of concern;

(B) Corrective actions taken to improve water quality;

(C) Any potential adverse health effects;

(D) The population at risk;

(E) The alternative measures in place to provide safe drinking water.

(4) All water distribution systems shall be designed, constructed, approved and maintained in compliance with the requirements of the Oregon Department of Consumer and Business Services, Building Codes Division. New water supply distribution systems, or systems remodeled, enlarged or converted after the effective date of these rules must meet the requirements of the 2000 Oregon Plumbing Specialty Code.

(5) Hot water heaters shall have installed an approved A.S.M.E. pressure relief valve which is accessible for inspection and testing.

(6) Where drinking fountains are provided, they shall be of an angle jet type with adequate water pressure at all times.

333-029-0076
Temporary Water Quality Variance

The Division may grant a temporary variance from requirements of OAR 333-029-0075 by continuing or re-issuing previously issued certificates or licenses where:

(1) Failure to comply with such rule requirements is due to failure of a community, municipal or public utility water supply system to meet Division requirements;

(2) The Assistant Director is satisfied that necessary remedial action is ongoing or reasonably imminent in connection with such water supply system; and

(3) Continuance or re-issuance of the certificate or license is conditioned upon the carrying out of such remedial action and the provision of such other measures by the certificate or license holder which will in the judgment of the Assistant Director afford reasonable interim protection to the public health including, but not limited to, adequate warnings to public and personnel as to the safety of the water delivered to the premises from the distribution system and notice of measures to avoid use or consumption of such water or to render it safe for consumption; adequate warnings as to the need for supervision of children and others needing supervision against use of such water; provision of alternative potable water and adequate notification as to its availability; and measures to avoid the use and the availability of water on the premises.

333-029-0080
Sewage Disposal

(1) Travelers' accommodations and hostels must provide an adequate and safe sewerage system.

(2) Sewage and waste water must be disposed of into a public sewerage system in a manner approved by the Department of Environmental Quality.

(3) All sewerage systems must be designed, constructed, approved and maintained in compliance with the minimum standards set forth in the 2008 Oregon Plumbing Specialty Code

and, where applicable, the additional statutes, rules and standards set forth by the Oregon Department of Environmental Quality.

(4) No untreated or partially-treated sewage, liquid waste, or septic tank effluent may be discharged directly or indirectly onto the surface of the ground or into the public waters.

Bedding and Linen

(1) Conventional mattress covers or pads shall be used for protection of mattresses and shall be kept clean.

(2) All sheets, pillowcases, towels, and washcloths shall be freshly laundered before they are furnished to new guests or occupants of rental units.

(3) All clean linen shall be stored in a clean, dry place.

(4) All soiled laundry shall be handled and stored so as not to contaminate clean laundry.

(5) Containers for transporting or storing clean laundry shall be of impervious materials and shall be smooth and easily cleanable.

(6) All bedding for guest use shall be kept clean and in good repair.

333-029-0095
Fire Safety

(1) Portable fire extinguishers shall be provided in travelers' accommodations and hostels. Such fire extinguishers shall:

(a) Have a minimum rating of 2A:10B:C;

(b) Be located so as to require no more than 75 feet of travel distance to an extinguisher.

(2) Equivalent protection as outlined by NFPA No. 10 shall be accepted.

(3) Every gas water heater, and every other gas fired appliance except gas plates and gas ranges, installed or serviced for use in any rental units, shall be effectively vented as required by the State Fire Marshal.

(4) Liquefied petroleum gas storage tanks shall conform in construction, design, installation, and operation with the rules of the State Fire Marshal.

333-029-0100
Chemical and Physical Hazards

(1) Cleaning equipment and supplies, all insecticides, chemicals, paints, and other toxic substances shall be kept isolated from guests and stored so as to prevent contamination of clothing, toweling, and bedding materials. All applications of chemicals including, but not limited to, cleaners and disinfectants shall be in accordance with the manufacturers' recommendations.

(2) All toxic substances shall be clearly identified and accurately labeled as toxic.

(3) All stairways shall be provided with firmly attached handrails on both sides of the stairway.

(4) Stairways shall be well lighted with at least five foot candles of available light measured three feet from the stair tread.

(5) All boilers and pressure vessels shall be approved and maintained in accordance with the applicable state statutes and rules of the Department of Consumer and Business Services.

Food Services

(1) Eating and drinking facilities, commissaries, mobile units and vending machine operated in conjunction with traveler's accommodations and hostels shall be operated in compliance with the Authority's Food Sanitation Rules OAR 333-150-0000.

(2) All multi-use drinking glasses and cups provided for guests shall be washed, rinsed and sanitized after being used according to OAR 333-150-0000 parts 4-6 and 4-7.

(3) Single service utensils shall be protected from contamination according to OAR 333-150-0000 section 4-904.11.

(4) Ice provided by traveler's accommodations and hostels shall comply with OAR 333-150-0000 sections 3-202.16 and 3-303.12.

Lodging Unit Kitchens

(1) Lodging unit kitchens shall have:

(a) A sink suitable for dishwashing with hot and cold water. Hot water shall be at not less than one hundred forty degrees (140º) F.;

(b) A refrigerator capable of maintaining a temperature of forty-five degrees (45º) F. or less.

(2) Utensil and equipment, if supplied, shall be easily cleanable, kept in good repair, and otherwise comply with OAR 333-150-0000 parts 4-1 and 4-2.

(3) Utensils supplied in lodging units shall be washed, rinsed, and sanitized after each occupancy according to OAR 333-150-0000 parts 4-6 and 4-7, or have a notice stating "For your convenience, dishes and utensils have been washed. If you would like to further sanitize these items, please contact the manager." The sanitizing agent shall be available in the office.

333-029-0115
Fees

License fees are set by local county ordinance. Applicants for a Traveler's Accommodation or Hostel license will pay the license fee set by the LPHA for that county. If the state becomes the agency issuing the license, the applicant for a Traveler's Accommodation or Hostel license (OAR 333-029-0005 through 333-029-0110) must pay to the Oregon Public Health Division a fee of $60.

333-029-0120
Variance

(1) The Division may grant a variance from the requirements of OAR 333-029-0005 through 333-029-0110 (except when in conflict with other Administrative Rules of the Division or other State Agencies) as follows:

(a) Where it is demonstrated to the satisfaction of the Division that strict compliance with the rule would be highly burdensome or impractical due to special conditions or cause;

(b) Where the public or private interest in the granting of the variance is found by the Division to clearly outweigh the interest of the application of uniform rules; and

(c) Where such alternative measures are provided which in the opinion of the Division will provide adequate health and safety protection.

(2) Such variance authority is not conferred upon any county notwithstanding delegated or contractual authority in the administration and enforcement of travelers' accommodation statutes and rules.

333-029-0130
Civil Penalties

In accordance with ORS 446.348, the Assistant Director for Health will use the following schedule to impose civil penalties for violations of rules for travelers' accommodations and hostels:

(1) Violations of any requirement stated within any part of OAR 333-029-0075, 333-029-0076, 333-029-0080, 333-029-0095, and 333-029-0100 are Class I violations subject to a civil penalty in the amount of not less than $75 nor more than $1000 for each and every violation.

(2) Violations of any requirement stated within any part of OAR 333-029-0025, 333-029-0030, 333-029-0050, 333-029-0060, 333-029-0065, 333-029-0105, and 333-029-0110 are Class II violations subject to a civil penalty in the amount of not less than $50 nor more than $750 for each and every violation.

(3) Violations of any requirement stated within any part of OAR 333-029-0020, 333-029-0035, 333-029-0040, 333-029-0045, 333-029-0070, and 333-029-0090 are Class III violations subject to a civil penalty in the amount of not less than $25 nor more than $350 for each and every violation.

DIVISION 30

ORGANIZATIONAL CAMP RULES

333-030-0005
Purpose

These rules prescribe the requirements for the construction, operation and use of organizational camps. They are for the purpose of protecting the health and welfare of persons using these camps. Various types of activities are found in organizational camps and the rules are designed to assure the protection of individuals consistent with those activities.

Stat. Auth.: ORS 446.330
Stats. Implemented: ORS 446.310 - 446.350
Hist.: HD 25-1981, f. & ef. 11-25-81; PH 9-2007, f. & cert. ef. 7-13-07

333-030-0010
Adoption by Reference

Outside standards, listings and publications referred to in these rules are by reference made a part of these rules as if fully set forth.

Stat. Auth.: ORS 446.330
Stats. Implemented: ORS 446.310 - 446.350
Hist.: HD 25-1981, f. & ef. 11-25-81; PH 9-2007, f. & cert. ef. 7-13-07

333-030-0015
Definitions

As used in these rules unless otherwise required by context:

(1) "Administrator" means the Public Health Director of the Oregon Health Authority or designee.

(2) "Ancillary Activity" means an individual or group using the camp facilities in a manner unrelated to the camp's mission or programs. An example might include a wedding party or a business group using a Boy Scout Camp for a reception or meeting. Such activities may require the camp to maintain a food service or traveler's accommodation license in addition to the organization camp license.

(3) "Approved" means approved in writing by the Oregon Health Authority, Public Health Division.

(4) "Aquatic Director" means a person over 18 years of age who is an employee or volunteer within the organizational camp and is a currently certified lifeguard, as defined by OAR 333-060-0015 (see "Program Director" and "Program Supervisor").

(5) "Cabin Cooking" means food preparation in a facility usually equipped with residential grade cooking and cooling equipment, and usually done by campers for themselves.

(6) "Camp" means an organizational camp as defined in section (26) of this rule.

(7) "Camp Commissary" means the central food storage and distribution facility when cabin or wilderness/primitive cooking are regularly practiced.

(8) "Camp Director" means the person on-site who has the overall responsibility for the programs and activities under the direction of the camp operator.

(9) "Camp Health Director" is an adult, 18 years of age or older, who is responsible for routine and emergency health care services at the camp (see "Program Director" and "Program Supervisor").

(10) "Camp Operator" means either the license holder or a contract or rental group the license holder has contracted with to use part or all of the camp facilities and, whichever has overall responsibility for the camp programs and activities.

(11) "Camp Staff" includes paid and unpaid staff and volunteer leaders working directly for the license holder or contract or rental group.

(12) "Contract groups" or "Rental groups" are organized groups that use the camp facilities under contracted arrangement with the license holder or camp owner.

(13) "Day Camp" means an organizational camp facility that campers attend for an established period of time, leaving at the end of the camping day that provides creative and recreational opportunities in the out-of-doors utilizing trained leadership and the resources of the natural surroundings to contribute to the camper's mental, physical and spiritual growth.

(14) "Delegated County" means a county delegated authority to administer the Organizational Camp Program under ORS 446.425. (See also "Local Public Health Authority").

(15) "Division" means the Public Health Division of the Oregon Health Authority.

(16) "Family Camp" means sessions operated or staffed by the license holder or contract group or rental group for parents and children as family groups. Parents and guardians are on-site and have frequent contact with and make decisions on behalf of their children.

(17) "Health Disclosure" means an up-to-date record of the camper's or staff's past and present health status.

(18) "Health Services" means the services provided to campers and staff including first aid, medication management, provision of prescribed medical treatment and health practices.

(19) "High Risk Program Facilities" means areas and equipment, developed by the license holder, that present a higher than normal opportunity for camper injuries. High Risk Program Facilities include but are not limited to rifle and archery ranges, ropes courses, climbing walls, trampolines, waterfront and swimming facilities, skiing and snowboarding.

(20) "Landlord" means a tourist facility owner holding a license issued under ORS 446.310 to 446.350.

(21) "License Holder" means the person to which the organizational camp license has been issued by the Division or local public health authority.

(22) "Lifeguard" means a currently certified lifeguard (with waterfront module where applicable), as determined by the Division.

(23) "Local Public Health Authority (LPHA)" has the meaning given that term in ORS 431.260.

(24) "Off-Site" means outside of the boundaries of the camp facility.

(25) "On-Site" means within the boundaries of the licensed camp facility.

(26) "Organizational Camp" has the meaning given that term in ORS 446.310.

(27) "Outdoor Youth Program" means a program that provides, in an outdoor living setting, treatment services to youth who are enrolled in the program because they have behavioral problems, mental health problems or problems with abuse of alcohol or drugs.

(28) "Permanent Sleeping Unit" means cabins, platform tents, huts and other shelters that are used for sleeping and remain stationary for more than six nights in an organizational camp.

(29) "Person" means individuals, corporations, associations, firms, partnerships and joint stock companies as well as public entities such as schools, colleges, public or private educational corporations.

(30) "Potentially Hazardous Food (Time/Temperature Control for Safety Food)" has the meaning given that term in OAR 333-150-0000 1-201.10(B).

(31) "Primitive Camping" means a type of camping, during which the campers use non-permanent sleeping structures such as tents, tarps and ground cloths.

(32) "Outdoor Cooking" means meals are prepared using primitive or outdoor cooking methods.

(33) "Program Assistants" means the staff required to operate a program area or activity, trained in their responsibilities and under the direct supervision of the program director or program supervisor.

(34) "Program Director" means an individual with appropriate training and experience in the program area or activity for which the individual has overall responsibility.

(35) "Program Supervisor" means an individual that supervises the operation of a program area or activity under the direction of a program director who has appropriate training and experience in the program area or activity he or she supervises.

(36) "Public Spa Pool" means any public swimming pool or wading pool designed primarily to direct water, or air-enriched water under pressure, onto the bather's body with the intent of producing a relaxing or therapeutic effect. A public spa pool includes, but is not limited to, spa pools owned or operated by organizational camps.

(37) "Public Swimming Pool" means an artificial structure, and its appurtenances, that contains water more than two feet deep that is used, or intended to be used, for swimming or recreational bathing and is for the use of any segment of the public. A public swimming pool includes, but is not limited to, swimming pools owned or operated by organizational camps.

(38) "Public Wading Pool" means an artificial structure, and its appurtenances, that contains water less than two feet deep that is expressly designated or used with the knowledge and consent of the owner or operator for wading or recreational bathing and is for the use of any segment of the public, whether limited to patrons of a companion facility or not. A public wading pool includes, but is not limited to, wading and spray pools owned or operated by an organizational camp.

(39) "Recreation Park" means any area designated by the person establishing, operating, managing or maintaining the same for picnicking or overnight camping by the general public or any segment of the public. Recreation park includes, but is not limited to, areas open to use free of charge or through payment of a tax or fee or by virtue of rental, lease, license, membership, association or common ownership and further includes, but is not limited to, those areas divided into two or more lots, parcels, units or other interests for purposes of such use.

(40) "Tenant" means a person or public body defined in ORS 174.109 that:

(a) Is not under the common ownership, management or control with the landlord;

(b) Rents or leases all or part of a tourist facility from a landlord for the purpose of operating an organizational camp, conference or other private gathering on one or more days during the term of the rental or lease; and

(c) For the term of the rental or lease enjoys exclusive occupancy of the rented or leased part of the tourist facility.

(41) "These Rules" means OAR 333-030-0005 through 333-030-0130.

(42) "Tourist Facility" means any travelers' accommodation, hostel, picnic park, recreation park and organizational camp.

(43) "Waterfront Activities" means those activities occurring in or on bodies of water other than a licensed public swimming, public wading or public spa pools.

(44) "Variance" means written permission from the Division for an organizational camp to be operated when it does not comply with all the applicable rules for Organizational Camps.

333-030-0020
Licensing Required

(1) No person shall establish, operate, manage or maintain an organizational camp without first securing a license from the Division or the local public health authority. Either the landlord or tenant may be issued a license for an organizational camp operated under contract, rental or leasehold arrangements. The license holder is responsible for compliance with these rules, with the exception of duties delegated to a tenant as specified in OAR 333-030-0023.

(2) All licenses issued under ORS 446.310 to 446.350 terminate and are renewable on December 31 of each year.

(3) Contract and rental groups may be required by the owner of the camp to obtain a license for the operating period.

(4) A contract or rental group that is the license holder is responsible for complying with these rules.

333-030-0023
Delegation of Duties

(1) A landlord may enter into a contract to delegate specific duties to a tenant for the term of the rental or lease of all or part of an organizational camp. The duties that may be delegated to a tenant through contract are:

(a) OAR 333-030-0050(4) relating to bedding;

(b) OAR 333-030-0055(2)(e) relating to toilet tissue;

(c) OAR 333-030-0055(2)(f) relating to non-water-carried waste;

(d) OAR 333-030-0055(3)(a)(C) and (D) relating to soap and paper towels;

(e) OAR 333-030-0060(2) through (4) relating to laundry facilities;

(f) OAR 333-030-0065 relating to solid waste;

(g) OAR 333-030-0070(1), (2), (5) and (6) relating to insect and rodent control;

(h) OAR 333-030-0090(1) and (5) relating to sewage collection and disposal;

(i) OAR 333-030-0095(2) through (6) relating to food service;

(j) OAR 333-030-0100(3) relating to an emergency plan;

(k) OAR 333-030-0103 relating to camp administration;

(l) OAR 333-030-0105 relating to health services;

(m) OAR 333-030-0110(1)(b) and (c), (3) and (4) relating to programs and facilities;

(n) OAR 333-030-0115 relating to transportation;

(o) OAR 333-030-0120(3)(b), (5) and (6)(e) relating to fire safety; and

(p) OAR 333-030-0125 relating to chemical and physical hazards.

(2) The landlord is responsible for compliance with duties specified in section (1) of this rule relating to cleanliness of the facility prior to contracting duties to a tenant. The tenant is responsible for compliance with delegated duties relating to facility cleanliness for the term of the contract.

333-030-0040
Plans

(1) No person shall construct, enlarge or alter any organizational camp or convert the use of an existing structure to an organizational camp without first securing appropriate permits. A copy of a building plan approval or building permits issued by the building department having jurisdiction must accompany the plot plan.

(2) When proposing to make improvements to an organizational camp a plot plan showing the general layout of the organizational camp must be submitted to the local public health authority. The location for each of the following must be clearly shown and identified:

(a) Property lines;

(b) Proposed and existing construction;

(c) Building floor plans that include the location of plumbing fixtures;

(d) The number, size, type and location of all permanent structures and facilities;

(e) Location of all proposed and existing water supply and sewage disposal systems;

(f) Location of water and sewer lines;

(g) Estimated total number of campers and staff to be using the facilities at any given time; and

(h) Location of storage, collection and disposal facilities of solid waste.

(3) Whenever a food service facility at an organizational camp is constructed or extensively remodeled and whenever an existing structure at an organizational camp is converted to use as a food service facility, properly prepared plans and specifications for such construction, remodeling or conversion must be submitted to the local public health authority for approval before construction. Plans must be submitted in accordance with Oregon Food Sanitation Rules OAR 333-150-0000 part 8-2.

Stat. Auth.: ORS 446.330
Stats. Implemented: ORS 446.330
Hist.: HD 25-1981, f. & ef. 11-25-81; HD 18-1983(Temp), f. & ef. 10-18-83; HD 11-1984, f. & ef.6-20-84; HD 7-1996, f. & cert. ef. 12-10-96; PH 1-2005, f. & cert. ef. 1-14-05; PH 9-2007, f. & cert. ef. 7-13-07; PH 2-2013, f. & cert. ef. 1-25-13

333-030-0050
Sleeping Space

(1) Each permanent sleeping unit must have:

(a) For fire safety, at least 30 inches (760 mm) of walking space between beds or sleeping bags placed on the floor.

(b) At least 30 inches (760 mm) separation between the heads of sleepers must be provided for communicable disease prevention. In lieu of such separation, partitions or physical barriers are acceptable.

(c) At least 30 inches (760 mm) vertical separation between tiers of beds or between the top tier and the ceiling.

(d) Where two tiers of beds are provided, there must be at least 10 inches (254 mm) of space between the floor of the sleeping units and the underside of the first tier of beds. In lieu of such spacing, the first tier of bunks must have a continuous base, which must be sealed to the floor.

(e) Upper bunk beds must have a guardrail on each side of the bed, except a guardrail need not be provided on the side of a bed securely attached to a wall. The guardrails must create no spaces wider than 3.5 inches (89 mm) to prevent an entrapment or choking hazard, and must extend at least 5 inches (127 mm) above the top of the mattress. Guardrails are not necessary for campers 15 years or older.

(2) Permanent sleeping units must be provided with cross ventilation or must comply with the ventilation requirements of the Oregon Department of Consumer and Business Services (DCBS), Building Codes Division.

(3) Sleeping units and furnishings must be kept clean and in good repair.

(4) Bedding:

(a) Pillowslips, sheets, towels and washcloths, when provided by the camp operator, must be washed at least once per week and before being assigned to a different camper or staff member.

(b) Blankets, spreads, mattresses and pillows must be kept clean and free of insect infestation. Mattresses must be covered with a non-absorbent cover or other approved protection and must be maintained clean and in good repair.

(c) If sheets are not provided by the camp operator, the cover, pad, or mattress must be cleaned for each incoming camper or staff member, and more often if necessary.

Stats. Implemented: ORS 446.330
Hist.: HD 25-1981, f. & ef. 11-25-81; HD 7-1996, f. & cert. ef. 12-10-96; PH 1-2005, f. & cert. ef. 1-14-05; PH 9-2007, f. & cert. ef. 7-13-07; PH 2-2013, f. & cert. ef. 1-25-13

333-030-0055
Bathing, Handwashing and Toilet Facilities

(1) Facilities for toileting, bathing and handwashing must:

(a) Be illuminated for cleaning;

(b) Be ventilated by mechanical or natural means;

(c) Have floors that are smooth, impervious and easily cleanable;

(d) Have an effective water-tight union where a floor and wall join;

(e) Have smooth, easily cleanable and impervious wall surfaces; and

(f) Be kept clean, sanitary, free of mold and mildew, and in good repair.

(2) Plumbed and unplumbed toilet facilities in all organizational camps must meet the following requirements:

(a) There must be one toilet (plumbed or unplumbed) for every 15 campers or fraction thereof except in day camps in which one toilet for every 50 campers or fraction thereof is required.

(b) Separate toilet rooms for each gender, or locking unisex toilet rooms, must be provided when both genders are to be accommodated simultaneously;

(c) Urinals may be substituted for no more than one-third the required toilets for males;

(d) Toilets or urinals must not be located in sleeping rooms;

(e) Toilet tissue must be provided at each privy or toilet at all times the camp is in operation; and

(f) Unplumbed toilet facilities must comply with OAR 340-071-0320 and the Nonwater-Carried Waste Disposal Facilities, Materials, and Construction requirements of the Department of Environmental Quality (DEQ), OAR 340-073-0065 through 0075 and the DCBS Building Specialty Codes.

(3) Bathing and handwashing facilities in all organizational camps must meet the following requirements:

(a) A minimum of one handwashing sink must be provided for every 30 campers. A handwash set-up must be conveniently provided wherever a toilet facility is located. Where permanently plumbed handwash sinks cannot be provided, hand sanitizer or a water container may be used provided it allows a stream of water without needing to be held open and waste water must be collected in a container and disposed of properly or must flow into an approved waste water drain system. Each handwash set-up must:

(A) Be located in close proximity to privies, toilets or urinals;

(B) Be supplied with a change of clean water for each use;

(C) Be supplied with soap; and

(D) Be provided with single use towels, or if an individual sleeping room has a dedicated toilet room, personal towels may be used.

(b) In any camp where participants are present for four or more nights, there must be one bathing facility (shower or bathtub) provided for every 20 campers or fraction thereof. Bathing facilities must:

(A) Be supplied with a change of clean warm water for each use:

(i) By having a tempering valve capable of providing a water temperature not to exceed 110 degrees Fahrenheit (43 degrees Celsius); or

(ii) In lieu of a tempering valve, a mixing faucet with a hot water supply providing a water temperature of not to exceed 110 degrees Fahrenheit (43 degrees Celsius) may be provided along with a cold water supply.

(B) Separate bathing facilities must be provided for each gender, or locking unisex bathing facilities must be provided when both genders are to be accommodated simultaneously;

(C) Shower walls, ceilings and partitions must be impervious to water;

(D) Bathtub and shower floor areas must be finished with slip-resistant, impervious and easily cleanable surfaces;

(E) Shower floors must be sloped to effectively drain all waste water;

(F) Wooden racks over shower floors are prohibited; and

(G) Where glass bath or glass shower doors are used, such doors must be made of safety glass.

333-030-0060
Laundry Facilities

(1) Laundry facilities, when provided, must be located in areas separate from sleeping units, food preparation areas and perishable food storage areas.

(2) Laundry facilities must be kept clean and well maintained.

(3) All clean linen must be stored in clean storage rooms or cupboards.

(4) Soiled linen and clothing must be stored in an area separate from food preparation and perishable food storage areas prior to laundering.

333-030-0065
Solid Waste

(1) Solid waste must be disposed of in a manner, which complies with the applicable rules of the Department of Environmental Quality, OAR chapter 340, divisions 93, 94, 95 and 96.

(2) Solid waste must be stored in individual garbage containers, storage bins or storage vehicles. All such containers, bins or vehicles must:

(a) Have tight-fitting lids, covers or closable tops;

(b) Be durable, rust-resistant watertight, rodent proof and readily washable; and

(c) During times of food preparation and service, waste containers in food preparation and service areas may be uncovered.

(3) The premises of each organizational camp must be kept orderly and free of litter and refuse.

(4) All solid waste must be collected for disposal or recycling at regular intervals so as not to create:

(a) Vector harborage and sustenance;

(b) Objectionable odors; or

(c) Any overflowing of solid waste or other unsanitary conditions.

(5) Solid waste containing putrescible waste must be collected for disposal at regular intervals not to exceed seven days.

(6) Solid waste must be transported in a manner that complies with the rules of the Department of Environmental Quality OAR 340-093-0220 (Transportation).

333-030-0070
Insect and Rodent Control

(1) The grounds, buildings and structures used or intended for human habitation must be kept clean and maintained to prevent harborage and infestation of insects, rodents and vermin.

(2) The camp health director, or other person knowledgeable in pest identification, must check the sleeping areas and other harborages for bedbugs whenever there are complaints or possible bites.

(3) A license holder may not begin treatment for insects, rodents and vermin without first consulting with a currently certified pest management professional (PMP). A license holder may contract with a certified PMP for pest management services.

(4) During the season when flies, mosquitoes and other insects are prevalent, all openings into the outer air of permanent kitchens and dining room must be effectively screened, unless other effective means are provided to prevent the entrance of insects or rodents. Where screens are used, there must be not less than 16 meshes per lineal inch, and all screen doors must be equipped with a self-closing device.

(5) For insecticide and rodenticide extermination methods, only pesticides registered with the Environmental Protection Agency and the state Department of Agriculture can be used. Pesticides must be applied in accordance with the directions on the labels and must be handled and stored as to avoid health hazards.

(6) Poisons, chemicals, rodenticides, insecticides, pesticides, herbicides and other toxic materials must be properly labeled, or in the original containers, and stored in locked areas not accessible to campers separate from all food service, food storage and food preparation areas, sleeping areas and linens. Except that insecticides, rodenticides and cleaning and sanitizing materials necessary for maintaining the food service facility may be present in the food

service facility, but must be stored separately from cleaning and sanitizing materials. Both must be stored in cabinets or compartments used for no other purpose and must not be stored above or intermingled with food, food equipment and dishes or utensils. Detergents and sanitizers may be conveniently stored at warewashing facilities.

333-030-0075
Recreational Vehicles

Organizational camps that provide accommodations for recreational vehicles as defined in ORS 446.003 must comply with the Division's rules for the Construction, Operation and Maintenance of Recreation Parks, OAR 333-031-0002 through 333-031-0020, and 333-031-0059 through 333-031-0075 and must comply with the DCBS Building Codes Division's rules for the Recreational Parks and Organizational Camps, OAR 918-650-0000 through 918-650-0080. The licensure requirement of ORS 446.320 for a recreation park does not have to be met unless the park is used by individuals not participating in, or working for the organizational camp program.

333-030-0080
Water Quality, Source and Distribution

(1) Definitions applicable to this rule:

(a) "Maximum Contaminant Level (MCL)" means the maximum allowable level of a contaminant in water for consumption delivered to the users of a system, except in the case of turbidity where the maximum allowable level is measured at the point of entry to the distribution system.

(b) "Quarterly Sampling" means a sample is taken and submitted according to the following schedule:

(A) 1st Quarter is from January 1 through March 31;

(B) 2nd Quarter is from April 1 through June 30;

(C) 3rd Quarter is from July 1 through September 30; and the

(D) 4th Quarter is from October 1 through December 31.

(2) Water supply systems serving travelers' accommodations and hostels must comply with Oregon Administrative Rules for Public Water Systems, OAR 333-061-0005 through 333-061-0095, and must be:

(a) Regulated as a Public Drinking Water System under OAR 333-061; or

(b) Water systems serving travelers' accommodations and hostels that are not regulated under OAR 333-061 as a Public Drinking Water System must meet the requirements in section (3) of this rule.

(3) Unregulated Public Drinking Water Systems:

(a) Plan Review. All new facilities that are not regulated by OAR 333-061 must submit plans to the Division for review prior to construction or major modification of system. Systems regulated prior to January 1, 2003 by OAR 333-061 are not required to resubmit plans.

(b) Surface Water Sources. New facilities with surface water sources not regulated under OAR 333-061 will not be licensable after January 1, 2005. Facilities existing prior to January 1, 2005 in compliance with OAR 333-061-0032 may continue to operate.

(c) Sampling frequency:

(A) For seasonal facilities, a coliform sample must be taken prior to the camp's operational period and each quarterly sampling period while open to public. A minimum of two samples will be required for coliform, regardless of length of operation.

(B) For year round facilities:

(i) Coliform: Monthly for surface water. Quarterly for populations under 1000 using ground water.

(ii) Inorganic Samples. One time sampling required for new facilities before beginning operation.

(d) MCL Violations. An item is not considered a violation until confirmed by second sample taken within 24 hours. Four repeat samples must be taken within 24 hours of the original sample for a sample result above the maximum contaminant level (MCL).

(A) Total Coliform. Any positive total coliform samples must be reported to the Division or Local Public Health Authority within 24 hours of being notified of the positive sample.

(B) Fecal Coliform. Any positive fecal coliform sample must be reported to the Division or Local Public Health Authority within 24 hours of being notified of the positive sample.

(i) Public notification for this potential acute health risk is required.

(ii) An alternative procedure approved by the Division must be in place before serving the public.

(C) Inorganic Samples. One time sampling is required for new facilities. Additional testing is not required for facilities that were previously regulated under OAR 333-061 and have tested prior to January 1, 2003. Inorganics include: antimony, arsenic, asbestos, barium, beryllium, cadmium, chromium, cyanide, fluoride, mercury, nickel, nitrate, nitrite, selenium and thallium.

(D) Nitrate. A sample must be submitted for testing annually.

(i) Any samples exceeding the MCL for nitrate must be reported to the Division within 24 hours.

(ii) When a test on a sample is reported to exceed the MCL for nitrate, public notification is required. Bottled water must be provided to public upon request.

(E) The Division may require more frequent monitoring than specified or may require confirmation samples for positive and negative results. It is the responsibility of the operator to correct any problems and get a laboratory test result that is less than the maximum contaminant level.

(e) Sample collection methods.

(A) For the purpose of determining compliance with the MCL and the sampling requirements of these rules, sampling results may be considered only if they have been analyzed by a laboratory certified by the State Drinking Water Program.

(B) Samples submitted to laboratories for analysis must be clearly identified with the name of the water system, facility license number, sampling date, time, sample location identifying the sample tap, the name of the person collecting the sample and whether it is a routine or a repeat sample.

(i) Routine. These are samples collected from established sampling locations within a water system at specified frequencies to satisfy monitoring requirements as prescribed in this rule. These samples are used to calculate compliance with maximum contaminant levels for inorganics prescribed in OAR 333-061-0030 (Table 1);

(ii) Repeat. These are samples collected as a follow-up to a routine sample that has exceeded a maximum contaminant level.

(iii) Test results. Sample results must be submitted to the Local Public Health Authority by the 10th of the month following the sampling period.

(iv) The Division may take additional samples to determine compliance with applicable requirements of these rules.

(f) Public Notice. Public Notice must be posted conspicuously on-site and must include:

(A) A description of the violation or situation of concern;

(B) Corrective actions taken to improve water quality;

(C) Any potential adverse health effects;

(D) The population at risk; and

(E) The alternative measures in place to provide safe drinking water.

333-030-0085
Building Plumbing

All building plumbing must comply with the applicable requirements of the Oregon Department of Consumer and Business Services, Building Codes Division. New water supply distribution systems, or systems remodeled, enlarged or converted after the effective date of these rules must meet the requirements of the 2008 Oregon Plumbing Specialty Code.

333-030-0090
Sewage Collection and Disposal

(1) No untreated or partially treated sewage, liquid waste or septic tank effluent shall be discharged directly or indirectly onto the surface of the ground or into the public waters.

(2) All sewage and waste water plumbing must be designed, constructed and maintained in compliance with the minimum standards set forth in the 2011 Oregon State Plumbing Specialty Code.

(3) Sewage and waste water must be disposed of into an area-wide sewerage system or in a manner approved by the Department of Environmental Quality in accordance with the rules for On-Site Sewage Disposal, OAR 340-071-0100 through 340-071-0600.

(4) Any construction, alteration or repair of an on-site sewage disposal system or any part thereof must comply with the rules of the Department of Environmental Quality, OAR chapter 340, division 71.

(5) If non-water carried waste disposal facilities are provided, such facilities must comply with the rules of the Department of Environmental Quality, OAR 340-071-0330.

333-030-0095
Food Service

(1) FOOD SANITATION RULES. Eating and drinking facilities, commissaries, mobile units and vending machines operated in conjunction with organizational camps must be constructed, operated and maintained in compliance with the Division's Food Sanitation Rules, OAR 333-150-0000 with the following exceptions:

(a) Areas for food storage, preparation and service that are restricted to individual or single-family use;

(b) A food service facility must have toilet and handwashing facilities for use by the kitchen staff and food handlers. Public toilet and handwashing facilities associated with the food service facility are not required for the participants of the camp;

(c) Food service facilities operated for participants of the camp shall not be graded as "Complied" or "Failed to Comply", or given a numerical score; and

(d) Due to the unique nature of some of the food service preparation conditions encountered in primitive cooking and other types of non-dining hall food service found in camps, the Division, or local public health authority in consultation with the Division, may implement alternate requirements to the Division's Food Sanitation Rules, OAR 333-150-0000, as long as the food safety intent of the original rule is preserved.

(2) EMPLOYEE TRAINING. The camp must have trained food preparation staff if the organizational camp prepares food in camp food service facilities.

(a) For camp programs longer than three consecutive nights the camp must:

(A) Provide a food manager, currently certified by one of the Division-approved food manager certifying agencies or organizations, who supervises the food preparation activities; or

(B) Assure that all food preparation staff have a current Oregon food handler certification.

(b) Camp contract or rental groups operating for three nights or more in length must have at least one individual involved with food preparation activities that has, at a minimum, an Oregon food handler certification.

(3) CAMP COMMISSARIES:

(a) A camp commissary must have staff trained as required in section (2) of this rule.

(b) The food service equipment and utensils must be washed, rinsed, sanitized and air-dried between uses. The camp commissary must have a minimum three-compartment sink or commercial mechanical warewashing machine approved by the Division. The sinks or dishwashing equipment must be large enough to immerse the largest dish or utensil to properly wash, rinse and sanitize dishes and utensils (see OAR 333-150-0000 for details).

(c) To the extent possible, the food distributed from the camp commissary to the remote cooking location should be in a form so that handling is minimized (i.e. pre-formed meat patties, pre-prepared salads, etc.).

(4) OUTDOOR COOKING. A camp engaging in wilderness and outdoor cooking must ensure that group leaders are knowledgeable about and practice food service in accordance with the following health and safety guidelines:

(a) A camp should minimize or avoid the serving of high risk (potentially hazardous) foods.

(b) Leftover time and temperature controlled for safety (TCS) foods that have been prepared for service may not be re-served.

(c) Campers and staff doing the food preparation must wash their hands frequently to remove dirt and prevent cross-contamination of foods (see OAR 333-150-0000 2-301.11 through 2-301.16).

(d) The license holder must assure an adequate supply of safe drinking water or provide equipment, methods and procedures for purifying drinking water. Whenever possible, drinking water should be obtained from an approved water system. If that is not possible:

(A) Water must be purified by boiling for one minute followed by the addition of three to four drops of liquid chlorine per quart of water and allowing 30 minutes contact before drinking; or

(B) Water must be purified using a micro-filter filtration system to remove microorganisms and viruses and two drops of liquid chlorine per quart of water must be added to finish treatment, with 30 minutes of contact time allowed before drinking.

(5) CABIN COOKING. A camp engaging in cabin cooking must ensure that group leaders are knowledgeable about and practice food service in accordance with the following health and safety guidelines:

(a) Leftover TCS foods that have been prepared for service may not be re-served.

(b) Campers and staff doing the food preparation must wash their hands frequently to remove dirt and prevent cross-contamination of foods.

(c) The license holder must assure an adequate supply of safe drinking water. Drinking water must be obtained from an approved water system.

(6) DAY CAMP FOOD SERVICE. Full-service meal service must comply with OAR 333-150-0000 and sections (1) and (2) of this rule. Food service limited to beverages, snacks and sack lunches must comply with OAR 333-150-0000 and the additional guidelines below:

(a) Sack lunches must be stored in coolers and refrigerators maintaining a temperature of 41 degrees Fahrenheit or lower, or the attendees' parents or guardians must be advised to only include non-perishable foods in the sack lunch.

(b) Foods or beverages, once served and if opened, may not be collected and re-served.

(c) Persons handling foods must properly wash their hands before handling foods. Where unprotected foods are handled, bare hand contact must be minimized.

333-030-0100
Emergency Procedures

(1) Each organizational camp must retain on-site a written emergency plan outlining procedures to be followed in each of the following situations:

(a) Natural disasters and other emergencies;

(b) Lost camper or lost swimmer, if applicable;

(c) Fires;

(d) Transportation emergencies;

(e) Severe illnesses, injuries or communicable diseases;

(f) Stranger in camp; and

(g) Transition of supervision and release of campers to a designated responsible party.

(2) The emergency plan must contain at least evacuation procedures, procedures for communication with emergency medical services and facilities and the nearest fire station, and procedures for the control of vehicular traffic through the camp.

(3) The camp operator of an organizational camp must:

(a) Designate individuals to be responsible for carrying out the emergency plan;

(b) Instruct all employees and volunteers in the emergency plan and their duties in the event of an emergency situation; and

(c) Retain written documentation that all employees are aware of their responsibilities under the emergency plan and their duties therein.

(4) The following emergency information must be posted conspicuously, near the phone or alternative communication system used by the camp for off-site emergency communication, accessible during all hours of operation and maintained in all organizational camps:

(a) When telephones are provided, the license holder must post by each telephone:

(A) The current telephone numbers for contacting hospitals, poison control, police, ambulances and fire departments in the immediate area;

(B) The telephone number of the organizational camp office; and

(C) The locations of the nearest medical facility and the organizational camp including highway number, street number, rural route and box number or other data (i.e. global positioning system (GPS) coordinates, life flight landing zone locations, etc.) to aid in assuring prompt emergency response.

(b) When an alternative communication system is provided, the license holder must post by each communication location:

(A) The current procedure to contact hospitals, poison control, police, ambulances and fire departments in the immediate area;

(B) The telephone number of the organizational camp office or alternate contact information; and

(C) The locations of the nearest medical facility and the organizational camp including highway number, street number, rural route and box number or other data (i.e. GPS coordinates, life flight landing zone locations, etc.) to aid in assuring prompt emergency response.

333-030-0103
Camp Administration

(1) REGISTER RECORD. A record of all campers and staff attending camp must be kept by the license holder for a period of at least three years from the date attended.

(a) The record must include their name, address, phone number and dates of attendance.

(b) If the camp is contracted or rented out to a group, the license holder may inform the group in writing that they are required to do the following:

(A) Maintain a record of campers; and

(B) The license holder must keep a record of the group with contact information.

(2) VISITOR TRACKING. The camp operator must have a system to track visitors.

(3) CAMPER LOG. The camp operator must have a log of campers and staff under the age of 18 that leave or arrive at camp during the camp session. The record must include the identity of the person taking responsibility for the camper or staff person.

(4) CAMP IDENTIFIED. When the camp is being used by a contract or rental group that is not the license holder, the license holder must inform the group that they are required to include information identifying the license holder in promotional and informational materials distributed to attendees of the contract program.

333-030-0105
Health Services

(1) All camp operators must have health and first aid services available whenever the camp is operating.

(2) A camp director or license holder must ensure that residential camps with 100 or more campers and staff on-site at any one time has on-site at least one automatic external defibrillator (AED) with pediatric and adult capability meeting the local emergency medical services' protocol. The camp director or license holder must comply with the following:

(a) Each AED must have documented maintenance inspections and service records, including the battery and electrodes according to the guidelines set forth by the manufacturer.

(b) The AED must be stored in a central location where the AED is accessible to camp users and can be quickly retrieved.

(c) Signage must be provided that indicates the location of the AED.

(d) A policy must be developed for the use of the AED, including the need to contact 911 as soon as possible. This policy should be made available to camp staff and must be posted with the AED.

(3) The license holder or camp operator must report to the Division and local public health authority any unusual illness outbreaks or fatality that occurs at the camp. If possible, these incidents should be reported within 24 hours of occurrence.

Note: A reporting form is available from the Division, in this rule's appendices depending on the source, or at: http://www.oregon.gov/DHS/ph/pl/docs/campaccident.pdf.

333-030-0110
Special Programs and Facilities

(1) HIGH RISK PROGRAM FACILITIES:

(a) A license holder is responsible for maintenance of a permanent high-risk program facility.

(b) The camp operator must ensure that the program director for each activity has training or experience in the high-risk program areas.

(c) Written procedures for the high risk activity must be communicated by the program supervisor to necessary camp staff and participants. Safety procedures must include:

(A) Eligibility requirements for participation;

(B) Camper/staff supervision ratios;

(C) Safety regulations;

(D) Emergency procedures;

(E) Safety and protective equipment and usage; and

(F) Activity area design or safety features, if applicable.

(2) AQUATIC FACILITIES:

(a) Public swimming pools and wading pools in organizational camps must comply with OAR chapter 333, division 60 (Public Swimming Pools).

(b) Public spa pools in organizational camps must comply with OAR chapter 333, division 62 (Public Spa Pools).

(3) AQUATIC PROGRAMS. The aquatic programs must be under the direction of an aquatic director or supervisor.

(4) WATERFRONT ACTIVITIES:

(a) An aquatic director must supervise any waterfront activity serving a total of 10 or more persons;

(b) There must be at least one lifeguard for each 25 persons in or on the water. An overall ratio of one observer or lifeguard for every 10 persons in or on the water must be maintained;

(c) Waterfront activities serving less than 10 persons in or on the water may operate with only the supervision of a lifeguard;

(d) If waterfront activities take place at more than one location, a lifeguard must be present at each location. Lifesaving, first aid, and safety equipment must be present at each location. Such equipment must be suitable for the users and conditions under which the equipment is expected to be used; and

(e) All watercraft must be equipped with a U.S. Coast Guard approved personal flotation device (PFD) in good, serviceable condition and of appropriate size for each person on board whenever the watercraft is in use.

(f) Subsections (4)(a) through (d) of this rule do not apply to groups comprised of only adults.

333-030-0115
Transportation

(1) EMERGENCY TRANSPORTATION. All camp operators must provide transportation for use in emergency situations. When emergency transportation does not include an on-site vehicle in good running condition, a specific written plan for emergency transportation must be maintained at the camp.

(2) NON-EMERGENCY TRANSPORTATION. Campers must only be transported in areas of vehicles designed for passengers. Drivers must have a current driver's license with proper endorsement for the vehicle being operated and must be a minimum of 18 years of age.

(3) Slow-moving vehicles used for activities that do not exceed five miles-per-hour are allowed to transport campers.

333-030-0120
Fire Safety

(1) The camp licensee that is the camp owner must comply with the 2014 Oregon Fire Code.

(2) WRITTEN NOTIFICATION:

(a) At least once per year, written notification must be provided to the fire department or fire authority serving the camp, concerning the camp's operation period and including a copy of the camp's emergency plan. Any suggestions from the fire department or fire authority should be considered for addition to the emergency plan.

(b) For camps located outside of an established fire district, the camp must have an agreement or contract with a fire protection agency agreeing to provide fire protection services.

(3) EMERGENCY PLAN:

(a) The camp license holder must have a written plan for dealing with fire emergencies. The plan must ensure camper security, notifying emergency fire-fighting resources, and staff duties and responsibilities.

(b) The fire emergency plan must be communicated to campers prior to overnight occupancy.

(4) STAFF TRAINING:

(a) Staff employed by the landlord must be instructed and periodically drilled on the use of the emergency equipment and procedures to follow for notifying emergency personnel.

(b) The camp operator for contract and rental groups must be provided with and oriented to the fire emergency plan.

(5) NON-PERMANENT SLEEPING AREAS. A camp must have firefighting equipment available near sleeping areas that are non-permanent in nature, having no electricity, water, or wood stoves. Such non-permanent sleeping areas are areas using tents, provided camping spaces, and other temporary structures, including open-air structures.

(6) PERMANENT BUILDINGS. Permanent buildings within the organizational camp that are accessible to entry by the campers must meet the requirements of the 2014 Oregon Fire Code..

(a) Buildings with an occupancy of more than 10 persons must be provided with at least two separate and independent means of emergency exit, located as far apart as possible but in no case closer than 50 percent of the longest diagonal dimension of the building.

(b) Where wood burning stoves or other combustible fuel heating devices are used in sleeping quarters, a carbon monoxide detector that is listed by a nationally recognized testing organization as meeting the Underwriter's Laboratories, Inc., UL 2034 or UL 2075 standards for carbon monoxide alarms must be provided, properly located, and maintained in compliance with OAR 837-047-0100 through 837-047-0170.

(c) Smoke detectors in good working order must be provided, properly located, and maintained in compliance with OAR 837-045-0040 through 837-045-0065 in all buildings used for sleeping by camp participants or staff. Smoke detectors must be listed by a nationally recognized testing organization as meeting the Underwriter's Laboratories, Inc., UL 217 or UL 265 standards for smoke detectors and alarms.

(d) Fire extinguishers must be provided and located as required by the 2014 Oregon Fire Code.

(e) Fire escape plans and routes must be communicated to campers prior to overnight occupancy.

333-030-0125
Chemical and Physical Hazards

(1) Cleaning equipment and supplies, all insecticides, chemicals, paints, flammable liquids, and other toxic substances that bear the warning "keep out of reach of children" must be stored isolated from campers and stored so as to prevent contamination of clothing, toweling, bedding materials and food supplies. All applications of chemicals including, but not limited to, cleaners and disinfectants must be in accordance with the manufacturer's recommendations and by appropriately trained personnel.

(2) All toxic substances must be clearly labeled or stored in the original container. When not in use, all toxic materials must be stored according to the applicable requirements specified below:

(a) In a locked storage area or unit;

(b) As required by OAR 333-030-0070(6); or

(c) As required by OAR 333-150-0000, Food Sanitation Rules, for food preparation areas.

(3) Organizational camps must be a safe environment and must minimize or eliminate safety hazards including, but not limited to, debris, open excavations, abandoned wells, unused refrigerators or freezers with latchable doors. The licensee that is the camp owner must take measures to limit unsupervised access to natural hazards such as cliffs or bodies of water. All buildings and equipment must be kept in good repair.

(4) Gasoline and other flammable and combustible liquids must be clearly labeled, stored and dispensed in accordance with OAR 837-020-0025 through 837-020-0085 and the 2010 Oregon Fire Code.

333-030-0130
Variance

(1) A license applicant or licensee may apply to the Division in writing for a variance from a requirement in OAR 333-030-0015 through 333-030-0125. In order to qualify for a variance an applicant or licensee must demonstrate, to the satisfaction of the Division, that:

(a) Strict compliance with the rule would be highly burdensome or impractical due to special conditions or cause;

(b) The public or private interest in granting the variance clearly outweighs the interest of the application of uniform rules; and

(c) Alternative measures, if applicable, provide adequate public health and safety protection for camp participants.

(2) A variance may only be granted by the Division and not by a LPHA.

DIVISION 31

OPERATION AND MAINTENANCE OF RECREATION PARKS

333-031-0001
Adoption by Reference

Outside standards, listings and publications referred to in these rules are by reference made a part of these rules.

Stat. Auth.: ORS 446.330
Stats. Implemented: ORS 183.355
Hist.: HD 7-1985(Temp), f. & ef. 4-30-85; HD 27-1985, f. & ef. 10-28-85

333-031-0002
Definitions

As used in these rules 333-031-0002 to 333-031-0085, unless otherwise required by context:

(1) "Administrator" means the Assistant Director for the Public Health Division.

(2) "Approval or Approved" means approved in writing.

(3) "Camping Space" means an area of ground within a recreation park intended for the accommodation of a recreational vehicle, camping vehicle, tent vehicle, tent or other individual camping unit on a temporary basis.

(4) "Camping Vehicle" means either a vacation trailer or a self-propelled vehicle or structure equipped with wheels for highway use and which is intended for human occupancy and is being used for vacation and recreational purposes, but not for residential purposes, and is equipped with plumbing, sink or toilet.

(5) "Campground" provides facilities and space for tents, tent vehicles, camping vehicles, or recreational vehicles.

(6) "Division" means Oregon Health Authority, Public Health Division.

(7) "Hostel" means an establishment having beds rented or kept for rent on a daily or weekly basis to travelers for a charge or fee paid or to be paid for rental or use of facilities and which are operated, managed or maintained under the sponsorship of a nonprofit organization which holds a valid exemption from federal income taxes under 26 USC Sec. 501.

(8) "Organizational Camp" includes any area designated by the person establishing, operating, managing or maintaining the same for recreational use by groups or organizations which include but are not limited to youth camps, scout camps, summer camps, day camps, nature camps, survival camps, athletic camps, camps which are operated and maintained under the guidance, supervision or auspices of religious, public and private educational systems and community service organizations. Organizational camps are distinguished from recreation parks by the existence of organized group activities comprising the majority of activities by all participants rather than individual and family recreation.

(9) "Overnight Camping" means the activity of using a camping space for overnight accommodation.

(10) "Permanently affixed thereto" as used in these rules includes but is not limited to affixation as evidenced by: permanent water, sewer, and electrical connections; wheels removed; permanent foundations; or towing assembly removed.

(11) "Picnic Park" means any recreation park which is for day use only and provides no recreation vehicle or overnight camping spaces.

(12) "Recreation Park" means any area designated by the person establishing, operating, managing or maintaining the same for picnicking or overnight camping by the general public or any segment of the public. "Recreation park" includes but is not limited to area open to use free of charge or through payment of a tax or fee or by virtue of rental, lease, license, membership, association or common ownership and further includes, but is not limited to those areas divided into two or more lots, parcels, units or other interests for purposes of such use. "Recreation park" excludes sites that have units for human occupancy permanently affixed thereto but includes an area that has camping spaces available to be moved onto for transitory use.

(13) "Recreational Vehicle" means a camping vehicle.

(14) "Tent Vehicle" is any camping vehicle intended for overnight occupancy but not equipped with plumbing, sink, or toilet.

(15) "Tourist Facility" means any travelers' accommodation, hostel, picnic park, recreation park and organizational camp.

(16) "Travelers' Accommodation" includes any establishment, which is not a hostel, having rooms, apartments or sleeping facilities rented or kept for rent on a daily or weekly basis to travelers or transients for a charge or fee paid or to be paid for rental or use of facilities.

(17) "Unregulated Small Drinking Water System" means a facility licensed under the authority of these rules that is not regulated under OAR 333-061, Public Water Systems. These systems must comply with the requirements of OAR 333-031-0004.

General Rules Applicable to All Establishments

333-031-0003
Purpose

These rules adopted pursuant to the provisions of ORS 446.330 prescribe the requirements for the construction and operation of recreation parks. They are for the purpose of protecting the health and welfare of persons using these facilities.

Stat. Auth.: ORS 446.0315
Stats. Implemented:ORS 446.310 - 446.350, 446.435 & 446.990
Hist.: HB 231, f. 12-22-69; HD 7-1985(Temp), f. & ef. 4-30-85; HD 27-1985, f. & ef. 10-28-85

333-031-0004
Water Supply

(1) Definitions applicable to this rule:

(a) "Maximum Contaminant Level (MCL)" means the maximum allowable level of a contaminant in water for consumption delivered to the users of a system, except in the case of turbidity where the maximum allowable level is measured at the point of entry to the distribution system.

(b) "Quarterly Sampling" means a sample is taken and submitted according to the following schedule: 1st Quarter is from January 1 through March 31, 2nd Quarter is from April 1 through June 30, 3rd Quarter is from July 1 through September 30 and the 4th Quarter is from October 1 through December 31.

(2) Water supply systems serving travelers' accommodations and hostels shall comply with OARs for Public Water Systems, OAR 333-061-0005 through 333-061-0095, and must be:

(a) Regulated as a Public Drinking Water System under OAR 333-061; or

(b) Water systems serving travelers' accommodations and hostels that are not regulated under OAR 333-061 as a Public Drinking Water System must meet the requirements in section (3) below.

(3) Unregulated Public Drinking Water Systems:

(a) Plan Review. All new facilities that are not regulated by OAR 333-061 must submit plans to the Authority for review prior to construction or major modification of system. Systems regulated prior to January 1, 2003 by OAR 333-061 are not required to re-submit plans.

(b) Surface Water Sources. New facilities with surface water sources not regulated under OAR 333-061 will not be licensable after January 1, 2005. Facilities existing prior to January 1, 2005 in compliance with OAR 333-061-0032 may continue to operate.

(c) Sampling frequency:

(A) For seasonal facilities, a coliform sample must be taken prior to operational period and each quarterly sampling period while open to public. A minimum of two samples will be required for coliform, regardless of length of operation.

(B) For year round facilities:

(i) Coliform: Monthly for surface water. Quarterly for populations under 1000 on ground water.

(ii) Inorganic Samples: One time sampling required for new facilities before beginning operation.

(d) MCL Violations. An item is not considered a violation until confirmed by second sample taken within 24 hours. Four repeat samples must be taken within 24 hours of the original positive sample for a sample result above the maximum contaminant level (MCL).

(A) Total coliform: Report positive total coliform samples to the Authority within 24 hours of being notified of the positive sample.

(B) Fecal coliform. Any positive fecal coliform sample must be reported to the Authority within 24 hours.

(i) Public notification for this potential acute health risk is required.

(ii) An alternative procedure approved by the Authority must be in place before serving public.

(C) Inorganic Samples. One time sampling is required for new facilities. Additional testing is not required for facilities that were previously regulated under OAR 333-061 and have tested prior to January 1, 2003. Inorganics include: antimony, arsenic, asbestos, barium, beryllium, cadmium, chromium, cyanide, fluoride, mercury, nickel, nitrate, nitrite, selenium and thallium.

(D) Nitrate: Sample must be submitted for testing annually

(i) Any samples exceeding the MCL for nitrate shall be reported to the Authority within at least 24 hours.

(ii) When a test on a sample is reported to exceed the MCL for nitrate, public notification is required. Bottled water must also be provided to public upon request.

(E) The Authority may require more frequent monitoring than specified or may require confirmation samples for positive and negative results. It is the responsibility of the operator to correct any problems and get a laboratory test result that is less than the maximum contaminant level.

(e) Sample collection methods.

(A) For the purpose of determining compliance with the MCL and the sampling requirements of these rules, sampling results may be considered only if they have been analyzed by a laboratory certified by the State Drinking Water Program.

(B) Samples submitted to laboratories for analysis shall be clearly identified with the name of the water system, facility license number, sampling date, time, sample location identifying the sample tap, the name of the person collecting the sample and whether it is a routine or a repeat sample.

(i) Routine: These are samples collected from established sampling locations within a water system at specified frequencies to satisfy monitoring requirements as prescribed in this rule. These samples are also used to calculate compliance with maximum contaminant levels for inorganics prescribed in OAR 333-061-0030(Table 1);

(ii) Repeat: These are samples collected as a follow-up to a routine sample that has exceeded a maximum contaminant level.

(iii) Test results: Sample results must be submitted to the Local Public Health Authority by the 10th of the month following the sampling period.

(iv) The Authority may take additional samples to determine compliance with applicable requirements of these rules.

(f) Public Notice. All public notification must be posted conspicuously on site and must include:

(A) A description of the violation or situation of concern;

(B) Corrective actions taken to improve water quality;

(C) Any potential adverse health effects;

(D) The population at risk;

(E) The alternative measures in place to provide safe drinking water.

(4) The water distribution system shall be designed, constructed, approved and maintained in compliance with the requirements of the Oregon Department of Consumer and Business Services, Building Codes Division. New water supply distribution systems, or systems remodeled, enlarged or converted after the effective date of these rules must meet the requirements of the **2000 Oregon Plumbing Specialty Code.**

(5) No owner or operator of an establishment covered by these regulations shall supply common drinking cups or vessels.

(6) Where drinking fountains are provided, they shall be of an approved angle jet type with adequate water pressure at all times.

333-031-0005

Temporary Water Quality Variance

The Division may grant a temporary variance from requirements of OAR 333-031-0004 by continuing or re-issuing previously issued certificates or licenses where:

(1) Failure to comply with such rule requirements is due to failure of a community, municipal or public utility water supply system to meet Division requirements;

(2) The Assistant Director is satisfied that necessary remedial action is ongoing or reasonably imminent in connection with such water supply system; and

(3) Continuance or re-issuance of the certificate or license is conditioned upon the carrying out of such remedial action and the provision of such other measures by the certificate or license holder which will in the judgment of the Assistant Director afford reasonable interim protection to the public health including, but not limited to, adequate warnings to public and personnel as to the safety of the water delivered to the premises from the distribution system and notice of measures to avoid use or consumption of such water or to render it safe for consumption; adequate warnings as to the need for supervision of children and others needing supervision against use of such water; provision of alternative potable water a n d adequate notification as to its availability; and measures to avoid the use and the availability of water on the premises.

333-031-0006

Sewage and Liquid Waste Disposal

(1) Sewage and waste water shall be disposed of into a public sewerage system or in a manner approved by the Department of Environmental Quality, OAR 340-071-0100 to 340-071-0600.

(2) All sewage collection systems when provided shall be designed, constructed, approved and maintained in compliance with the requirements of the Oregon Department of Consumer and

Business Services, Building Codes Division, and, where applicable, the additional statutes, rules and standards set forth by the Department of Environmental Quality. New sewage collection systems and recreational vehicle waste disposal stations, or systems remodeled, enlarged or converted after the effective date of these rules must meet the requirements of the **2000 Oregon Plumbing Specialty Code**.

(3) No liquid wastes shall be discharged onto the ground or allowed to accumulate on the ground surface.

(4) In lieu of individual sewer connections, at least one kitchen waste water disposal facility shall be provided for the recreation park. A kitchen waste water disposal facility shall:

(a) Discharge into a public sewerage system.

(b) If such a system is not available then liquid wastes shall be disposed of in a manner approved by the Department of Environmental Quality, OAR 340-071-0100 through 340-071-0600.

333-031-0007
Solid Waste

(1) Solid waste shall be disposed of in a manner which complies with the rules of the Department of Environmental Quality, OAR 340-061-0040, 340-061-0045, 340-061-0050 and 340-061-0060, governing solid waste;

(2) Solid waste shall be stored in individual garbage containers, storage bins or storage vehicles. All such containers, bins or vehicles shall:

(a) Have tight-fitting lids, covers or closable tops;

(b) Be durable, rust-resistant, watertight, rodent-proof and readily washable.

(3) The premises of each recreation park shall be kept orderly and free of litter and refuse.

(4) All solid waste shall be collected for disposal at regular intervals so as not to create:

(a) Vector production and sustenance;

(b) Objectionable odors;

(c) Any overflowing of solid waste or other unsanitary conditions.

(5) Solid waste containing putrescible waste shall be collected for disposal at regular intervals not to exceed seven days.

(6) Solid waste shall be transported in a manner which complies with the rules of the Department of Environmental Quality, OAR 340-061-0075(1) and (2).

333-031-0008
Insect and Rodent Control

(1) Insect and rodent control measures to safeguard public health and to prevent nuisance to the public shall be applied. Developed areas, buildings, and structures shall be maintained free of accumulations of debris.

(2) All floors not constructed of solid concrete or other effective rodent-proof and moisture-proof foundation material shall be built so that the minimum clearance between the bottom of floor joists or bottom of floors without joists and the ground beneath shall be 18 inches and so that the minimum clearance under girders shall be 12 inches. The space underneath shall be kept free from obstructions. This rule shall be applied to structures in recreation parks built after January 25, 1970.

333-031-0010
Fire Protection and the Elimination of Accident Factors

(1) Electrical installations shall comply with the requirements of the Oregon Department of Consumer and Business Services, Building Codes Division. New electrical installations or systems remodeled, enlarged or converted after the effective date of these rules must meet the requirements of the **2002 Oregon Electrical Specialty Code**.

(2) Local building ordinances shall be complied with.

(3) Every gas water heater, and every other gas fired appliance except gas plates and gas ranges, installed or serviced for use in any rental unit, shall be effectively vented as required by the State Fire Marshal.

(4) Liquefied petroleum gas storage tanks shall conform in construction, design, installation, and operation with the rules of the State Fire Marshal.

(5) All boilers and pressure vessels shall be approved and maintained in accordance with the applicable state statutes and rules of the Department of Commerce.

(6) An approved ASME pressure relief valve shall be installed on all hot water tanks.

333-031-0012
Bath and Toilet Room

(1) Toilet, handwashing and bathing facilities shall be maintained to meet the following requirements:

(a) Illumination and ventilation shall be provided in accordance with the requirements of the Oregon Department of Consumer and Business Services, Building Codes Division. New Toilet, handwashing, and bathing facilities, or facilities remodeled, enlarged or converted after the effective date of these rules must meet the requirements of the **2004 Oregon Structural Specialty Code** and the **2004 Oregon Mechanical Specialty Code**;

(b) Floors and walls shall be smooth, impervious to water and easily cleanable;

(c) Shower walls, ceilings and/or partitions shall be impervious to water. Where a wall and a floor join, an effective, watertight union shall be maintained;

(d) Bathtub and shower floor areas shall be finished with nonslip, impervious, easily cleaned surfaces and sloped to effectively drain all waste water. Wooden racks or duck boards over shower floors are prohibited;

(e) Where glass bath or shower doors are used, such doors shall be made of safety glass.

(2) All plumbing installations must be designed, constructed, approved and maintained in compliance with the requirements of the Oregon Department of Consumer and Business Services, Building Codes Division. New water supply distribution systems, or systems remodeled, enlarged or converted after the effective date of these rules must meet the requirements of the **2000 Oregon Plumbing Specialty Code**.

333-031-0061

Establishing Compliance with Statewide Planning Goals and Compatibility with Acknowledged Comprehensive Plans and Land Use Regulations Prior to Approval of Construction, Enlargement, or Alteration Plans for Recreation Parks and Organizational Camps

(1) No approval of construction, enlargement, or alteration plans will be given unless the applicant for approval submits to the Division a written determination supported by written findings as required in ORS 215.416(6) or 227.173(2) from the unit of local government having comprehensive planning authority over the proposed construction, enlargement, or alteration site, that the proposed project is compatible with the Land Conservation and Development Commission acknowledged comprehensive plan, as defined in OAR 660-031-0010(1), or where there is no acknowledged local comprehensive plan, or in those instances described in OAR 660-031-0020(3), that the proposed project is in compliance with the Land Conservation and Development Commission's statewide planning goals under ORS Chapter 197. Findings for an activity or use addressed by the acknowledged comprehensive plan in accordance with OAR 660-031-0020, may simply reference the specific plan policies, criteria, or standards which were relied upon in rendering the decision and state why the decision is justified based on the plan polices, criteria or standards. The determination shall be on a form supplied by the Division accompanied by attachments as necessary.

(2) Where more than one unit of local government as comprehensive planning authority over the site of the proposed construction, enlargement or alteration, written determinations statements from each of these jurisdictions (e.g., city, county and regional planning jurisdictions) must be submitted to the Division.

(3) "Acknowledged Comprehensive Plan" as used in this rule has the meaning given in OAR 660-031-0010(1).

Special Rules for Overnight Campgrounds

Camping Spaces:

(1) Each camping space shall be identified by letter, number or name;

(2) Each camping space shall be large enough to accommodate the parked camping vehicle, tent vehicle or tent as the case may be and to maintain at least ten feet separation from any other camping vehicle or tent, ten feet from any building, ten feet from any awning or carport on an adjacent space, ten feet from a boundary line abutting upon a public street or highway, and five feet from any property line;

(3) Only one camping vehicle, tent vehicle or tent shall be located within a designated camping space and shall be maintained ten feet from any other such vehicle or tent. However, more than one such vehicle or tent may locate on a space and each vehicle or tent may be less than ten feet apart if:

(a) The owner of each vehicle or tent consents to such an arrangement;

(b) The park water and sewage disposal systems are not jeopardized by the additional camping load.

(4) No owner or operator shall require or encourage the location of more than one camping vehicle, tent vehicle, or tent on any space;

(5) Camping vehicles, tent vehicles, and tents shall not obstruct any public or private roadway or walkway. Each space shall have access to a park driveway or road.

333-031-0066
All Toilets

(1)(a) Toilets shall be provided in all recreation parks in the following ratios: Number of picnic spaces, camping spaces or car parking spaces — Number of Toilets: [Table not included. See ED. NOTE.]

(b) The location of toilets shall be indicated by appropriate signs.

(2) If flush toilets are provided, the building containing them shall be constructed in accordance with OAR 333-031-0012 and the requirements of the Oregon Department of Consumer and Business Services, Building Codes Division. New flush toilet facilities, or facilities remodeled, enlarged or converted after the effective date of these rules must meet the requirements of the 2000 Oregon Plumbing Specialty Code.

(3) If pit privies or chemical toilets are provided, they shall be constructed, located, and maintained in accordance with the requirements of the Department of Environmental Quality OAR 340-071-0100 through 340-071-0600.

333-031-0074
Rules for Recreation Park Patrons

(1) Patrons shall dispose of all sewage and waste water in the facilities provided by the park owner or operator. No sewage or waste water shall be discharged onto the ground or allowed to accumulate on the ground surface.

(2) Patrons shall dispose of their solid waste in the containers provided for this purpose.

(3) Only one camping vehicle, tent vehicle or tent is permitted in a camping space and a distance of at least ten feet must be maintained from any other such vehicle or tent. However, more than one such vehicle or tent may occupy a camping space and a spacing of less than ten feet is permitted provided the owner of each vehicle and the park owner or operator agree.

(4) No person shall permit his camping vehicle, tent vehicle, or tent to obstruct any public or private roadway or walkway. All vehicular traffic within picnic areas shall remain on the roadways or parking areas.

(5) Camping vehicle rally groups or other groups of camping vehicle owners assembled for the purpose of traveling together must obtain permission from the park owner or operator before entering any recreation park.

333-031-0085
Variance

(1) The Division may grant a variance from the requirements of OAR 333-031-0002 through 333-031-0075 as follows:

(a) Where it is demonstrated to the satisfaction of the Division that strict compliance with the rule would be highly burdensome or impractical due to special conditions or cause;

(b) Where the public or private interest in the granting of the variance is found by the Division to clearly outweigh the interest of the application of uniform rules; and

(c) Where such alternative measures are provided which in the opinion of the Division will provide adequate health and safety protection.

(2) Such variance authority is not conferred upon any county notwithstanding delegated or contractual authority in the administration and enforcement of travelers' accommodation and recreation park statutes and rules.

Civil Penalties

In accordance with ORS 446.348, the Assistant Director for Health will use the following schedule to impose civil penalties for violations of rules for recreation parks and picnic parks:

(1) Violations of any requirements stated in any part of OAR 333-031-0004, 333-031-0005, 333-031-0006 and 333-031-0110 are Class I violations subject to a civil penalty in the amount of not less than $75 nor more than $1,000 for each and every violation.

(2) Violations of any requirements stated in any part of OAR 333-031-0007, 333-031-0008, 333-031-0012, 333-031-0018, 333-

031-0059, and 333-031-0066 are Class II violations subject to a civil penalty in the amount of not less than $50 nor more than $750 for each and every violation.

(3) Violations of any of the requirements stated in any part of OAR 333-031-0014, 333-031-0020, 333-031-0060, 333-031-0062, 333-031-0064 and 333-031-0068 are Class III violations subject to a civil penalty in the amount of not less than $25 nor more than $350 for each and every violation.

DIVISION 35

HOSPICE PROGRAM LICENSURE

333-035-0045
Purpose

These rules establish the authority of the Oregon Health Authority, Public Health Division to license hospice programs in order to ensure the health and safety of individuals who are experiencing the last phases of life.

Stat. Auth.: ORS 443.860
Stats. Implemented: ORS 443.860
Hist.: PH 19-2010, f. 8-30-10, cert. ef. 9-1-10

333-035-0050
Definitions

As used in OAR chapter 333, division 35, the following definitions apply:

(1) "Accreditation" means a designation by an accrediting organization that a hospice program has met standards that have been developed to indicate a quality program.

(2) "Administrator" means a person responsible for the administrative functions and operation of the hospice program.

(3) "CMS" means Centers for Medicare and Medicaid Services.

(4) "Certification" means a state agency's official recommendations and findings to CMS regarding a hospice program's compliance with federal CMS regulations.

(5) "Conditions of Participation" mean the applicable federal regulations that hospice programs are required to comply with in order to participate in the federal Medicare and Medicaid programs.

(6) "Division" means the Oregon Health Authority, Public Health Division.

(7) "Hospice aide" has the same meaning as nurse's aide.

(8) "Hospice program" means a coordinated program of home and inpatient care, available 24 hours a day, that utilizes an interdisciplinary team of personnel trained to provide palliative and supportive services to a patient-family unit experiencing a life threatening disease with a limited medical prognosis. A hospice program is an institution for purposes of ORS 146.100.

(9) "Hospice services" means items and services provided to a patient-family unit by a hospice program or by other individuals or community agencies under a consulting or contractual arrangement with a hospice program. Hospice services include home care, inpatient care for acute pain and symptom management or respite, and bereavement services provided to meet the physical, psychosocial, emotional, spiritual and other special needs of a patient-family unit during the final stages of illness, dying and the bereavement period.

(10) "Interdisciplinary team" means a group of individuals working together in a coordinated manner to provide hospice care. An interdisciplinary team includes, but is not limited to, the patient-family unit, the patient's attending physician or clinician and one or more of the following hospice program personnel:

(a) Physician;
(b) Nurse practitioner;
(c) Nurse;
(d) Nurse's aide;
(e) Occupational therapist;
(f) Physical therapist;
(g) Trained lay volunteer;
(h) Clergy or spiritual counselor; or
(i) Credentialed mental health professional such as psychiatrist, psychologist, psychiatric nurse or social worker.

(11) "Medicare Certification Number" means the unique identification number, also referred to as the Medicare Provider Number, assigned to a qualifying hospice program by CMS.

(12) "Nurse's Aide" means a person certified as a nursing assistant under ORS 678.442 who has received special hospice training in accordance with CMS Conditions of Participation.

(13) "Patient-family unit" includes an individual who has a life threatening disease with a limited prognosis and all others sharing housing, common ancestry or a common personal commitment with the individual.

(14) "Person" includes individuals, organizations and groups of organizations.

(15) "Survey" means an inspection of an applicant for a hospice program license or a hospice program to determine the extent to which the applicant or hospice program is in compliance with state hospice program statutes, these rules and CMS Conditions of Participation.

Stat. Auth.: ORS 443.860
Stats Implemented: ORS 443.850
Hist.: PH 19-2010, f. 8-30-10, cert. ef. 9-1-10

333-035-0055
Licensing and Fees

(1) A person may not establish, conduct or maintain a hospice program providing hospice services, or hold itself out to the public as a hospice program, without obtaining a license from the Division.

(2) A person may apply to operate a hospice program by submitting a complete application on a form prescribed by the Division, accompanied by a fee of $750. An application that is incomplete or that is not accompanied by the correct fee will be returned to the person applying.

(3) In order for a license application to be considered complete, it shall include, but is not limited to:

(a) Business name;
(b) Medicare Certification Number (Medicare Provider Number)(if applicable);
(c) Primary and multiple locations (if any);
(d) Tax status;
(e) Ownership category (e.g. corporation, partnership, sole proprietorship);
(f) Physical and mailing addresses;
(g) Owner information;
(h) Descriptions of services;
(i) Staffing levels; and
(j) Average daily census.

(4) The Division shall conduct an initial survey prior to licensure.

(5) In lieu of an initial survey required under section (4) of this rule, the Division may accept a CMS certification or a survey conducted within the previous three years by an accrediting organization approved by the Division.

(6) A hospice program licensed in Washington, Idaho or California must be licensed in Oregon in order to provide care in Oregon within a 60 mile radius of the parent agency in the other state. A hospice program licensed in these other states shall pay the required fee and the Division:

(a) Shall conduct a licensing survey; or
(b) May accept a CMS certification or a survey conducted within the previous three years by an accrediting organization approved by the Division.

(7) The Division may waive the mileage guideline in section (6) of this rule if the parent hospice program proposes to provide hospice services to an underserved area of the state and adequately demonstrates the ability to manage and control the services.

(8) The Division shall issue a license to an applicant that has the necessary qualifications, meets all requirements established by

the Division, meets the CMS Conditions of Participation for hospice programs found in 42 CFR Part 418, and has paid the fee.

(9) A license issued under this section is valid for one year and is not transferable.

(10) A licensee may apply for renewal of a license by completing a renewal application on a form prescribed by the Division and submission of a $750 renewal fee. The Division shall renew a license if the licensee is in compliance with ORS 443.850 through 443.869, these rules, and CMS Conditions of Participation, 42 CFR Part 418.

(11) The Division may permit a hospice program providing care at multiple locations, to operate under one license for all locations, if:

(a) All locations are operating under the same Medicare Certification Number;

(b) The multiple location provides the same full range of care and services that is required by the hospice program issued the Medicare Certification Number; and

(c) The locations are located within a 60 mile radius of the parent hospice program applying for licensure.

(12) The Division may waive the mileage guideline in subsection (11)(c) of this rule if the parent hospice program proposes to provide hospice services to an underserved area of the state and adequately demonstrates the ability to manage and control the services.

(13) An applicant or licensee may be required by CMS to obtain a survey by a CMS deemed accrediting organization in addition to any survey conducted by the Division under section (4) of this rule or OAR 333-035-0075.

Stat. Auth.: ORS 443.860

333-035-0060
Criminal Background Checks

(1) Except as provided in section (7) of this rule, a hospice program must obtain a criminal background check for the following prior to employment, entering into a contract, or permitting a volunteer to have direct patient contact and every three years thereafter:

(a) Hospice program employees;

(b) Individuals who contract with the hospice program and who have direct patient contact or access to patient records; and

(c) Volunteers who have direct patient contact or access to patient records.

(2) A hospice program must have written policies and procedures for conducting criminal background checks in accordance with section (1) of this rule including a description of criminal convictions that disqualifies an individual from being employed, contracted with or working as a volunteer.

(3) If the criminal background check or other information obtained by a hospice program indicates an employee, contractor or volunteer has been convicted of a crime against a person or property that reasonably raises questions about the ability of that individual to safely provide services or care, the hospice program shall notify the individual in writing that they have been found unfit to be employed, contracted with or to be a volunteer.

(4) If an individual has been found unfit in accordance with section (3) of this rule, the hospice program shall provide that individual with information on how to appeal to the source of the criminal background check if the individual believes the records are in error.

(5) A hospice program shall keep the information obtained from criminal background checks confidential and use it solely to determine an individual's eligibility to be employed, contracted with or to be a volunteer.

(6) A hospice program shall require the individuals described in subsection (1)(a) through (c) of this rule to report within 10 days:

(a) Any criminal conviction;

(b) Any arrest, indictment, or charge for a sexual offense or property crime; and

(c) Any disciplinary action taken by a health professional regulatory board or agency.

(7) An individual licensed by a health professional regulatory board as defined in ORS 676.160 is not subject to the criminal background checks described in section (1) of this rule.

(8) A hospice program shall have policies and procedures that ensure the entities it contracts with have conducted criminal background checks for individuals that will have direct contact with the hospice program's patients or access to hospice program patient records.

Stat. Auth.: ORS 443.860

333-035-0065
Complaints

(1) Any person may make a complaint verbally or in writing to the Division regarding an allegation as to the care or services provided by a hospice program or violations of any hospice program laws or regulations.

(2) The identity of a person making a complaint will be kept confidential.

(3) An investigation will be carried out as soon as practicable after the receipt of a complaint in accordance with OAR 333-035-0070.

(4) If the complaint involves an allegation of criminal conduct or an allegation that is within the jurisdiction of another local, state, or federal agency, the Division will refer the matter to that agency.

Stat. Auth.: ORS 443.860
Stats. Implemented: ORS 443.860
Hist.: PH 19-2010, f. 8-30-10, cert. ef. 9-1-10

333-035-0070
Investigations

(1) As soon as practicable after receiving a complaint, taking into consideration the nature of the complaint, Division staff may begin an investigation.

(2) A hospice program shall permit Division staff access to any location from which it is operating its program or providing services during an investigation.

(3) An investigation may include but is not limited to:

(a) Interviews of the complainant, patients of the hospice program, patient family members, witnesses, hospice program management and staff;

(b) On-site observations of patients and staff performance; and

(c) Review of documents and records.

(4) Except as otherwise specified in 42 CFR § 401, Subpart B, the Division shall draft an investigation report and may make publicly available a copy of that report that does not contain any information that could lead to the identification of the complainant, a patient, or any other information that is confidential under state law.

Stat. Auth.: ORS 443.860
Stats. Implemented: ORS 443.860
Hist.: PH 19-2010, f. 8-30-10, cert. ef. 9-1-10

333-035-0075
Surveys

(1) The Division shall, in addition to any investigations conducted under OAR 333-035-0070, conduct at least one survey of each hospice program every three years and at such other times as the Division deems necessary.

(2) In lieu of a survey required under section (1) of this rule, the Division may:

(a) Accept certification by a federal agency; or

(b) Accept a survey performed by an accrediting organization approved by the Division under OAR 333-035-0100, and conducted within the last three years.

(3) A hospice program shall permit Division staff access to any location from which it is operating its program or providing services during a survey.

(4) A survey may include but is not limited to:

(a) Interviews of patients, patient family members, hospice program management and staff;

(b) On-site observations of patients and staff performance;

(c) Review of documents and records; and

(d) Patient audits.

(5) A hospice program shall make all requested documents and records available to the surveyor for review and copying.

(6) Following a survey, Division staff may conduct an exit conference with the hospice program administrator or his or her designee. During the exit conference Division staff shall:

(a) Inform the hospice program representative of the preliminary findings of the inspection; and

(b) Give the person a reasonable opportunity to submit additional facts or other information to the surveyor in response to those findings.

(7) Following the survey, Division staff shall prepare and provide the hospice program administrator or his or her designee specific and timely written notice of the findings.

(8) If the findings result in a referral to another regulatory agency, Division staff shall submit the applicable information to that referral agency for its review and determination of appropriate action.

(9) If no deficiencies are found during a survey, the Division shall issue written findings to the hospice program administrator indicating that fact.

(10) If the surveyor's written notice of findings indicates that the agency was in compliance with hospice program licensing laws and no deficiencies were cited, the agency administrator or administrator's designee shall sign the written notice and return it to the Division.

(11) If deficiencies are found, the Division shall take informal or formal enforcement action in compliance with OAR 333-035-0085 or 333-035-0090.

Stat. Auth.: ORS 443.860

333-035-0080
Violations

In addition to non-compliance with any hospice program licensing law or CMS Conditions of Participation, it is a violation to:

(1) Refuse to cooperate with an investigation or survey, including but not limited to failure to permit Division staff access to the hospice program, its documents or records;

(2) Fail to implement an approved plan of correction;

(3) Fail to comply with all applicable laws, lawful ordinances and rules relating to safety from fire;

(4) Refuse or fail to comply with an order issued by the Division;

(5) Refuse or fail to pay a civil penalty;

(6) Fail to comply with rules governing the storage of records following the closure of a hospice program; or

(7) Fail to obtain a license.

Stat. Auth.: ORS 443.860
Stats. Implemented: ORS 443.860
Hist.: PH 19-2010, f. 8-30-10, cert. ef. 9-1-10

333-035-0085
Informal Enforcement

(1) If during an investigation or survey Division staff document violations of hospice program licensing laws or conditions of participation, the Division may issue a statement of deficiencies that cites the law alleged to have been violated and the facts supporting the allegation.

(2) A signed plan of correction must be received by the Division within 10 business days from the date the statement of deficiencies was mailed to the hospice program. A signed plan of correction will not be used by the Division as an admission of the violations alleged in the statement of deficiencies.

(3) A hospice program shall correct all deficiencies within 45 days from the date of the exit conference, unless an extension of time is requested from the Division. A request for such an extension shall be submitted in writing and must accompany the plan of correction.

(4) The Division shall determine if a written plan of correction is acceptable. If the plan of correction is not acceptable to the Division, the Division shall notify the hospice program administrator in writing and request that the plan of correction be modified and resubmitted no later than 10 working days from the date the letter of non-acceptance was mailed to the administrator.

(5) If the hospice program does not come into compliance by the date of correction reflected on the plan of correction or 45 days from date of the exit conference, whichever is sooner, the Division may propose to deny, suspend, or revoke the hospice program license, or impose civil penalties.

Stat. Auth.: ORS 443.860
Stats. Implemented: ORS 443.860
Hist.: PH 19-2010, f. 8-30-10, cert. ef. 9-1-10

333-035-0090
Formal Enforcement

(1) If during an investigation or survey Division staff document a substantial failure to comply with hospice program licensing laws or conditions of participation, or if a hospice program fails to pay a civil penalty imposed under ORS 443.869, the Division may issue a Notice of Proposed Suspension or Notice of Proposed Revocation in accordance with ORS 183.411 through 183.470.

(2) The Division may issue a Notice of Imposition of Civil Penalty for violations of hospice program licensing laws.

(3) At any time the Division may issue a Notice of Emergency License Suspension under ORS 183.430(2).

(4) If the Division revokes a hospice program license, the order shall specify when, if ever, the hospice program may reapply for a license.

Stat. Auth.: ORS 443.860
Stats. Implemented: ORS 443.860
Hist.: PH 19-2010, f. 8-30-10, cert. ef. 9-1-10

333-035-0095
Civil Penalties

(1) In addition to any other liability or penalty provided by law, the Division may impose a civil penalty of $1,000 per day, up to $10,000 in any 30-day period, for any of the following:

(a) Violation of any of the terms or conditions of a license issued under these rules;

(b) Violation of any of these rules or an order issued by the Division to a hospice program licensed under these rules;

(c) Violation of any final order of the director that pertains specifically to a hospice program owned or operated by the person incurring the penalty; or

(d) Violation of ORS 443.860 or of rules adopted under ORS 443.860.

(2) In determining the amount of a civil penalty the Division shall consider whether:

(a) The Division made repeated attempts to obtain compliance;

(b) There is a history of noncompliance with hospice program licensing laws;

(c) The violation poses a serious risk to the public's health;

(d) The person or licensee gained financially from the noncompliance; and

(e) There are mitigating factors, such as a person or licensee's cooperation with an investigation or actions to come into compliance.

(3) The Division shall document its consideration of the factors in section (2) of this rule.

(4) Each day a violation continues is an additional violation.

(5) Civil penalties under this section shall be imposed in the manner provided by ORS 183.745.

Approval of Accrediting Organizations

(1) An accrediting organization must request approval by the Division to accredit hospice programs in Oregon.

(2) An accrediting organization shall request approval in writing and shall provide, at a minimum:

(a) Evidence that it is recognized as a deemed accrediting organization by CMS; or

(b) Documentation of program policies and procedures that the accreditation meets standards and conditions established for hospice programs by CMS;

(c) Accreditation history; and

(d) References from a minimum of two hospice programs currently receiving services from the organization.

(3) If the Division finds that an accrediting organization's qualifications are equal to or exceed state licensing requirements in Oregon, the Division will enter into an agreement with the accrediting organization permitting it to accredit hospice programs in Oregon.

(4) CMS will not accept accreditation by an organization that is not a deemed organization by CMS, for purposes of CMS certification.

333-035-0105
Applicability of Rules

(1) A hospice program already in operation on September 1, 2010 shall apply to the Division for a license and pay the applicable fee by October 1, 2010.

(2) The Division shall allow a hospice program already in operation on September 1, 2010, three months from its date of application before an on-site inspection is conducted, in order to allow a hospice program to come into compliance with these rules.

(3) A hospice program already in operation on September 1, 2010 shall conduct criminal background checks in accordance with OAR 333-035-0060 prior to September 1, 2012.

DIVISION 39

REGULATIONS GOVERNING HEALTH AND SAFETY AT OUTDOOR MASS GATHERINGS

333-039-0005
Purpose

These rules govern health and safety at outdoor mass gatherings pursuant to ORS 433.735 through 433.770. Organizers of such gatherings must apply for a permit to the county governing body of the county in which an outdoor mass gathering is to take place. Applications for permits must be accompanied by sufficiently detailed plans, specifications, and reports from which it can be determined by the county governing body and other reviewing public officials and agencies that there is or will be compliance with these rules.

Stat. Auth.: ORS 433.740 & 433.760
Stats. Implemented: ORS 433.740
Hist.: HD 2, f. 9-15-71, ef. 10-1-71; HD 18-1985(Temp), f. & ef. 9-26-85; HD 32-1985, f. & ef. 12-9-85

333-039-0010
Definitions

As used in these rules unless the context requires otherwise:

(1) "Division" means Oregon Health Authority, Public Health Division.

(2) "Outdoor Mass Gathering" means an actual or reasonably anticipated assembly of more than 3,000 persons which continues or can reasonably be expected to continue for more than 24 consecutive hours but less than 120 hours within any three month period and which is held primarily in open spaces and not in any permanent structure.

(3) "Organizer" includes any person who holds, stages, or sponsors an outdoor mass gathering and the owner, lessee, or possessor of the real property upon which the outdoor mass gathering is to take place.

(4) "Oregon Physician" means a person licensed by the Oregon State Board of Medical Examiners or any other physician authorized to practice medicine and surgery in any part of Oregon.

(5) "Nurse" means a licensed professional nurse.

(6) "Ambulance" means any privately or publicly owned motor vehicle, aircraft or marine craft that is regularly provided or offered to be provided for the emergency transportation of persons suffering from illness, injury, or disability and which is equipped, staffed and licensed in accordance with OAR 333-028-0000 to 333-028-0065.

(7) "Temporary Structure" includes tents, trailers, chemical toilet facilities and other structures customarily erected or sited for temporary use.

Stat. Auth.: ORS 433.740 & 433.760
Stats. Implemented: ORS 433.740
Hist.: HD 2, f. 9-15-71, ef. 10-1-71; HD 18-1985(Temp), f. & ef. 9-26-85; HD 32-1985, f. & ef. 12-9-85

333-039-0015
Water Supply

(1) Required Amounts:

(a) A minimum of 12 gallons per person per day shall be available for the anticipated assembly;

(b) Storage facilities equal to one day's total water usage shall be provided, unless a greater or lesser amount, with a minimum of five gallons per person per day, is determined by the Division as sufficient or necessary, based on the availability and quantity of the reserve water supply and the required water demands for toilets, food vendors, camping areas and other facilities;

(c) A Division approved well or water system may be used as a source of water, or in addition to Division approved outside sources, to meet all requirements;

(d) An amount of water equal to one day's total usage shall be kept in reserve at all times.

(2) Bacteriological and Chemical Requirements:

(a) All water provided shall give a negative result for the presence of coliform bacteria when subjected to standard laboratory test procedures for detecting the presence of coliform bacteria and shall be from sources and in containers approved by the Division;

(b) Water provided shall not contain the following substances in excess of amounts listed. The organizer shall provide a laboratory analysis report as evidence of this: Substance Concentration in mg/1:

(A) Arsenic — 0.1;
(B) Cadmium — 1.0;
(C) Chloride — 250.0;
(D) Copper — 1.0;
(E) Cyanide — 0.01;
(F) Fluoride — 1.7;
(G) Iron — 0.3;
(H) Lead — 0.05;
(I) Selenium — 0.01;
(J) Nitrate (NO3) — 45.0;
(K) Total Dissolved Solids — 500.0;
(L) Zinc — 5.0.

(3) Construction, Maintenance, and Design:

(a) All parts of the water supply system shall be constructed of non-toxic materials;

(b) All water distribution lines and fittings shall be constructed of galvanized wrought iron, galvanized steel, copper, or NSF approved plastic pipe. All plastic pipe and fittings must bear the NSF seal;

(c) Pressure tanks and storage tanks shall be constructed of non-toxic materials. Tanks which have previously been used to contain toxic substances shall not be used;

(d) Prior to placing the water supply system into use, all portions of the system including storage tanks and distribution system shall be disinfected by adding a chlorine solution of not less than 50 mg/1 and retaining the mixture within all portions of the system

for at least 24 hours. Following disinfection, the system is to be thoroughly flushed of the chlorine solution;

(e) Hydrants equipped with self-closing faucets shall be provided at a ratio of not less than one for every 250 persons or fraction thereof anticipated;

(f) Each faucet shall be mounted on a minimum 36 inch riser. The riser is to be securely fastened to a supporting structure equal in strength to a four inch by four inch timber which is securely anchored in the ground;

(g) Each faucet and riser shall be accompanied by a seepage pit located directly beneath the faucet which shall have a minimum inside diameter of 12 inches and a minimum depth of three feet and shall be backfilled with clean coarse rock;

(h) All water distribution lines shall be installed at a minimum depth of 12 inches in the soil and shall be covered;

(i) If camping and activity areas are separately designated, 60 percent of the total required faucets shall be located within the area designated for camping, and 40 percent of the total required faucets shall be located in the area designated for activities;

(j) A minimum of one faucet shall be located not more than 25 lineal feet from each food service facility and a minimum of one faucet shall be located not more than 25 lineal feet from any emergency medical facility;

(k) Garden hoses, flexible hoses, pipes, or similar devices shall not be connected to any faucet or any other portion of the water supply system for personal convenience or any other reason;

(l) A minimum pressure of 20 pounds per square inch shall be maintained at all times and at all points within the water distribution system.

333-039-0020
Drainage

(1) The site selected for the outdoor mass gathering shall have good natural drainage. Areas which are swampy, or areas known to be susceptible to flash flooding are not acceptable.

(2) Roads at the outdoor mass gathering site shall be provided with culverts, tiles, and ditching wherever needed to protect such roads from erosion due to precipitation.

Stats. Implemented: ORS 433.763
Hist.: HD 2, f. 9-15-71, ef. 10-1-71

333-039-0025
Sewerage Facilities

(1) Non-Water Carried Sewage Facilities:

(a) The construction and maintenance of earth pit privies shall comply with the following requirements:

(A) They shall be located at least 50 feet from a well, spring, or other source of domestic water supply, and at least 50 feet from any stream, river or lake, and at least ten feet from any property line;

(B) The pit shall have a minimum capacity of 50 cubic feet, and shall be at least five feet deep and shall be lined with lumber, concrete, steel, or other equivalently substantial material to prevent caving. The pit shall be covered by a building of substantial construction located on either a concrete or wood sill to make it as fly-tight and rodent-proof as possible from the outside. The floor and riser shall be built water impervious and fly-tight of wood, concrete, ceramic, stainless steel, or other equivalently substantial material;

(C) The seat opening shall be equipped with a self-closing lid hinged and so constructed that when closed it will exclude flies from the pit. Vents connected to the pit shall be covered with 16 mesh copper, aluminum, or plastic wire screen and shall have a total effective cross section of at least 50 square inches. The building shall be equipped with a tight fitting, self-closing door and shall be weather-proof;

(D) The contents of the pit shall not be permitted to overflow onto the surface of the ground or be exposed to flies or rodents;

(E) A minimum of one-half pound of chlorinated lime shall be deposited in each pit once every 24 hours;

(F) At the conclusion of the outdoor mass gathering, the contents of the pit shall be covered by backfilling with at least a two foot depth of earth.

(b) In areas where high water tables are encountered, concrete vault privies, pail privies, chemical toilets or incinerator toilets shall be used in place of earth pit privies for disposal of human excreta. All vaults and receptacles of such privies shall be water-tight and constructed of reinforced concrete, plastic, fiberglass or metal:

(A) The contents of vault privies, pail privies, and chemical toilets shall be removed by a registered sewage cesspool operator in accordance with state and local laws, ordinances, and regulations;

(B) Chemical toilets shall be serviced daily with respect to sanitation, removal of contents, and recharging of chemical solution;

(C) All earth pit privies, privies with water-tight receptacles, chemical toilets, and incinerator toilets shall be maintained in a sanitary condition at all times.

(2) Water Carried Sewage Disposal Facilities: If water carried subsurface sewage disposal facilities are provided, they shall be governed by OAR 333-041-0001 through 333-041-0040, and by this reference are incorporated herein and made a part hereof.

(3) Number and Location of Toilets and Privies:

(a) Seven privies or toilets or any combination thereof shall be provided for each 800 persons or fraction thereof anticipated;

(b) If camping and planned activity areas are separately designated, sixty percent of the total required toilets or privies shall be located within the designated camping area and forty percent of the total required toilets or privies shall be located in the designated planned activity area. If areas are not designated, location and spacing of toilets and privies shall be in accordance with anticipated crowd clustering or grouping, or spaced uniformly throughout the entire mass gathering site;

(c) All chemical toilets, if provided, shall be located so as to be easily and readily serviced by servicing vehicles.

(4) Liquid Wastes not Containing Human Excreta:

(a) Facilities shall be provided for the disposal of all liquid wastes not containing human excreta such as, but not limited to, kitchen or cooking waste water, grease, dishwater, wash water, and bath water. These facilities shall be specifically identified by means of a sign which states "**Waste Water Disposal**";

(b) Such facilities shall consist of a seepage pit having a minimum depth of three feet and a lateral area of not less than 32 square feet. The pit shall be backfilled with clean, coarse rock and be protected by a one-fourth inch screen which is removable and will effectively trap food particles and prevent other wastes from entering the backfilled rock;

(c) All food particles and other waste material shall be removed from the facilities at least once every 24 hours or at more frequent intervals if necessary to prevent fly and insect attraction;

(d) Such facilities shall be located or spaced so as to uniformly serve the participants of the outdoor mass gathering;

(e) One facility shall be provided for each 3,000 persons or fraction thereof anticipated;

(f) At least one facility shall be located not more than 50 lineal feet from each food service facility.

333-039-0030
Refuse Storage and Disposal

(1) All refuse and solid waste shall be stored in fly-tight containers constructed of impervious material.

(2) Containers for refuse and solid waste storage shall be provided at a minimum ratio of one 30 gallon container for each 16 persons or fraction thereof anticipated or one cubic yard of container capacity for each 125 persons or fraction thereof anticipated.

(3) All refuse and solid waste shall be removed from storage containers at least once every 24 hours and transported and

disposed of in a manner which is authorized and complies with state and local laws, ordinances and regulations.

Stat. Auth.: ORS 433.760
Stats. Implemented: ORS 433.760

333-039-0035
Food and Sanitary Food Service

(1) Food service facilities, if supplied, shall be located in clean surroundings and shall be maintained in a clean and sanitary condition.

(2) Food service facilities, if supplied, shall be so constructed and arranged that food, drink, utensils, and equipment will not be exposed to rodents, insects, dust, dirt, or other contamination. If flies are present, screening shall be required.

(3) The water supply for food service facilities shall be adequate in amount to serve the requirements of the facility and shall be safe for human consumption. Storage tanks or containers, when used, shall be of smooth, easily cleanable material, and shall be cleaned and sanitized each time they are refilled. Water shall not be dipped from a receptacle for drinking or culinary purposes.

(4) Toilet or privy facilities which comply with these rules shall be available within the immediate area for use by the food service facility personnel.

(5) Hand washing facilities shall be made available for the food service facility personnel. In lieu of a handwashing sink, there shall be provided a pan with soap and water for washing of hands, and a pan of water containing a bactericidal solution of 50 mg/1 of available chlorine or its equivalent for rinsing of hands. Sanitary paper towels shall be provided. The use of a common-type towel is prohibited. Utensil washing vats shall not be used for handwashing.

(6)(a) All multi-use utensils and all display cases or windows, counters, shelves, tables, refrigeration equipment, sinks, and other equipment used in connection with the operation of a food service facility shall be constructed as to be easily cleaned and shall be kept in good repair;

(b) Utensils containing or plated with cadmium or lead shall not be used, provided, however, that solder containing lead may be used for jointing;

(c) Food containers with seams which are not sealed flush with the surface shall not be re-used. Single service containers and utensils shall not be re-used.

(7)(a) Single service paper plates, cups, and plastic or wood knives, forks, and spoons are recommended but not required. If multiple use dishes, utensils, or equipment are used, they must be subjected to one of the following methods of bactericidal treatment after cleaning and washing:

(A) Immersion for at least two minutes in clean, hot water at a temperature of at least 170°F If hot water is used, a dependable thermometer shall be available at all times and shall be used. The pouring of scalding water over washed utensils is not acceptable as a satisfactory bactericidal treatment;

(B) Immersion for at least two minutes in a lukewarm chlorine bath. This bath shall be made up at a strength of at least 100 mg/1 of available chlorine. The bath shall not be used after its strength has been reduced to 50 mg/1;

(C) Immersion for at least two minutes in an approved quaternary ammonium bath containing at least 25 mg/1 as determined by a suitable field test.

(b) In machine dishwashing, the hot water rinse shall be at least 170°F and shall be for a minimum of ten seconds;

(c) In hand dishwashing, a three compartment sink shall be required. The first compartment shall be used for washing with a soap or detergent solution. The second compartment shall be used for clear water rinse, and the third compartment shall be used for the bactericidal solution and sanitizing bath.

(8) If ice cream or frozen desserts are dipped and served at the food service facility, all scoops and dippers shall be kept in running water dipper wells.

(9)(a) All refuse and solid waste shall be stored or collected in tightly covered, water impervious containers until removed from the food service facility. Such containers when emptied shall be washed to prevent them from attracting flies and rodents;

(b) All dishwater and liquid wastes not containing human excreta shall be disposed of in accordance with OAR 333-039-0025(4)(a) to (f) of these rules.

(10)(a) All readily perishable food shall be kept at or below 45°F except when being prepared or actually served. Readily perishable foods shall be stored in shallow containers under refrigeration until cooled below 45°F. When such foods have been cooled below 45°F, they may be stored in deep containers. Food shall not be served which has been stored, handled, or otherwise cared for in a manner not in compliance with these rules;

(b) A dependable indicating thermometer shall be provided in each refrigerator;

(c) All ice shall be stored and handled in such a way as to prevent contamination. Ice scoops or tongs shall be used to place ice in glasses or cups. Ice shall be obtained only at sources which are licensed under ORS Chapter 624 or 627.

(11) All food products, raw, cooked, canned, or otherwise, shall be wholesome and free of spoilage during storage, preparation, and serving. All milk and milk products shall come from a source which is licensed and approved by the Oregon State Department of Agriculture. Home canned or home processed foods shall not be stored, prepared, or served by the food service facility.

(12) Pre-cooked foods or meats must be kept at or below 45°F at all times and subjected to continuously applied heat which will sustain the internal temperature of the food item to not less than 140°F until such time as it is served.

(13) Bottled soda or fruit drinks may be cooled in tanks with water and ice provided the tanks contain not less than 50 mg/1 available chlorine. The tops of the containers shall not be submerged. Milk and milk products shall be kept at or below 45°F in dry refrigeration.

(14) Canned soda or fruit drinks may be cooled in tanks of ice and water provided that the water contains not less than 50 mg/1 available chlorine.

(15) All persons within the food service facility shall wear clean outer garments and shall keep their hands clean at all times while engaged in preparing or serving food and drink, or washing and storing utensils and equipment.

(16) All persons while within a food service facility shall refrain from any personal action or conduct which would directly or indirectly harm the quality or wholesomeness of the food.

(17) No live animals or fowl shall be permitted within the confines of any food service facility.

333-039-0040
Emergency Medical Facilities

(1) There shall be present at the outdoor mass gathering site for emergency medical services, physicians and nurses in the following ratios:

(a) Daylight Hours — At least one Oregon physician plus sufficient other physicians (licensed to practice medicine and surgery in any of the 50 states of the United States) to provide a ratio of one for each 10,000 persons attending or fraction thereof and one nurse for each 7,500 persons attending or fraction thereof;

(b) Nighttime Hours — (1 a.m. to 7 a.m.) — At least one Oregon physician plus sufficient other physicians (licensed to practice medicine and surgery in any of the 50 states of the United States) to provide a ratio of one for each 20,000 persons attending or fraction thereof and one nurse for each 15,000 persons attending or fraction thereof.

(2) Facilities shall be provided in which physicians can provide patient care and treatment. The facility shall be enclosed, protected from the elements, and shall have chairs, examining tables with stirrups, and locked cabinets for equipment and medicine. All necessary medicine and instruments for conducting minor surgery and examinations shall be available.

(3) Lighting within the emergency medical facilities shall be provided and shall be not less than 200 foot candles in areas where treatment and minor surgery are conducted.

(4) Attending physicians shall keep accurate records of patients and treatment, and shall notify the local health officer of all cases involving a communicable disease.

(5) Temporary holding facilities shall be provided for the sick and injured while awaiting transport to a hospital. The facility shall be enclosed, protected from the elements, and shall be furnished with one cot or bed for each 1,000 persons anticipated or fraction thereof.

(6) Communication, either telephone or radio-telephone, shall be provided to summon aid or notify the nearest hospital, law enforcement, or fire protection agency, as required.

(7) Ambulances shall be provided at the outdoor mass gathering for emergency evacuation of sick and injured persons at a ratio of one ambulance for each 10,000 persons anticipated or fraction thereof.

333-039-0045
Fire Protection

(1) Each camping space shall be a minimum of 1,000 square feet or large enough to accommodate a parked camping vehicle, tent vehicle or tent, as the case may be, and to maintain at least 15 feet separation from any other camping vehicle, tent vehicle or tent, building, structure, or property line.

(2) The organizer shall secure a written statement from the local fire protection agency having jurisdiction that fire protection complies with state and local laws, ordinances, and regulations, and is satisfactory with respect to anticipated crowds and location of the outdoor mass gathering.

Stat. Auth.: ORS 433.760
Stats. Implemented: ORS 433.760
Hist.: HD 2, f. 9-15-71, ef. 10-1-71

333-039-0050
Security Personnel

(1) The organizer shall maintain an accurate count of persons attending the outdoor mass gathering and shall provide adequate security arrangements to limit further admissions to the outdoor mass gathering when the anticipated number of persons have been admitted.

(2) The organizer shall secure a written statement from the chief law enforcement officer of the county in which the outdoor mass gathering is to take place that arrangements for security and the orderly flow of traffic to and from the outdoor mass gathering complies with state and local laws, ordinances, and regulations, and is satisfactory with respect to anticipated crowds and location of the outdoor mass gathering.

Stat. Auth.: ORS 433.760
Stats. Implemented: ORS 433.760
Hist.: HD 2, f. 9-15-71, ef. 10-1-71

333-039-0055
Traffic

(1) The organizer shall provide easily accessible roads of all-weather construction at the outdoor mass gathering site.

(2) All roads shall be graded so as to be self-draining and shall be maintained in such condition that emergency and other required vehicles can move upon them unencumbered and can carry out their functions at all times.

(3) An ungraveled dirt road shall not be considered as being an all-weather road.

(4) No road or portion of any road constructed shall exceed a maximum grade of 12 percent.

(5) The organizer shall acquire approval from the local agency having jurisdiction for fire safety that the minimum width of all roads complies with state and local laws, ordinances, and regulations, and is satisfactory with respect to anticipated crowds and locations of the outdoor mass gatherings.

(6) The organizer shall provide and designate a suitable area at the outdoor mass gathering for parking of motor vehicles:

(a) The total area provided for motor vehicle parking shall be based on the following ratio: 300 square feet for every four persons anticipated;

(b) Each motor vehicle parking space shall have a minimum width of ten feet and a minimum length of twenty feet and shall be clearly marked with lime;

(c) The motor vehicle parking spaces shall be arranged to eliminate blockage of parked vehicles and allow vehicles free access to exits at all times.

DIVISION 40

DECONTAMINATION OF ILLEGAL DRUG MANUFACTURING SITES

333-040-0010
Purpose and Scope

(1) **Purpose**: The purpose of these rules is to implement ORS 453.855–453.912 and Oregon Laws 1999, Chapter 861 and provide a means whereby property found to be unfit fit for use due to chemical contamination that may result from illegal drug manufacturing can be evaluated, decontaminated and returned to use.

(2) **Scope**: These rules apply to any property as defined in ORS 453.858 and Oregon Laws 1999, Chapter 861 and also includes the following: criteria used by agencies when determining property unfit for use; maintenance of listing of unfit for use properties; property owner responsibilities; assessment, decontamination, sampling and testing procedures; requirements for demolition and disposal of property contents; disclosure requirements for property sale or transfer; qualifications for decontamination and sampling personnel; licensing requirements for decontamination contractors; requirements for inspections and consultations by the Public Health Division; Public Health Division fees and reciprocity requirements; and contractor penalties.

Stat. Auth.: ORS 453.864
Stats. Implemented: ORS 453.855 - 453.912
Hist.: HD 20-1990, f. 6-29-90, cert. ef. 7-1-90 (and corrected 7-13-90); OHD 2-1998, f. & cert. ef. 2-13-98; OHD 1-2000, f. & cert. ef. 1-24-00

333-040-0020
Definitions

(1) "**Agent of the Owner**" — means a current employee of the owner of record who was in the employ of that owner at the time the property was determined to be an illegal drug manufacturing site; or is a current employee of any new owner and who was an employee of that owner at the time the property was sold or transferred to that owner prior to decontamination.

(2) "**Certificate of Fitness**" — means a certificate issued for a particular property by the Public Health Division indicating that the property is fit for use.

(3) "**Contractor**" — means a contractor licensed by the Public Health Division under these rules to perform assessment and decontamination activities at illegal drug manufacturing sites.

(4) "**Decontamination**" **and** "**Contamination Reduction**" — mean reduction in levels of known contaminants to the lowest practical level, as determined by the Public Health Division, using currently available methods and processes.

(5) "**Division**" — means Oregon Health Authority, Public Health Division.

(6) "**Full disclosure**" — means written notice to a prospective buyer or recipient of any illegal drug manufacturing site as set forth in OAR 333-040-0100.

(7) "**Owner**" — means:

(a) For real property, the owner of record as disclosed by the records of the recorder in the county where the property is located; or,

(b) For personal property for which a certificate of title or ownership has been issued, the person shown as owner on such certificate.

(8) "**Reasonable grounds**" — includes, but is not limited to, the presence of chemicals, substances, apparatus and chemical residues commonly associated with an illegal drug manufacturing site.

(9) "**Unfit for Use**" — means a determination made by an agency as listed in ORS 453.876 that a property is an illegal drug manufacturing site and may be contaminated with hazardous chemicals or substances.

(10) "**Unfit for Use listing**" — means a listing of properties in Oregon that have been determined to be illegal drug manufacturing sites, and that have not been issued a Certificate of Fitness. The list is maintained by the Department of Consumer and Business Services-Building Codes Division, pursuant to ORS 453.879.

(11) "**Use**" — means occupancy or entry for any reason including, but not limited to, entry for such things as cleaning, remodeling, repairs, or demolition, except as allowed in ORS 453.873, 453.876, 453.885 and Oregon Laws 1999, Chapter 861.

333-040-0050
Determination of Unfitness for Use

(1) The determination that a property is unfit for use applies to any property that is known to have been used as an illegal drug manufacturing site, or for which there are reasonable grounds to believe that the property has been used as an illegal drug manufacturing site.

(2) Any owner of a property that was an illegal drug manufacturing site prior to August 3, 1989 may obtain a Certificate of Fitness by following all the procedures and meeting all the criteria of these rules.

(3) An agency determining property unfit for use shall proceed as follows:

(a) Notify the owner or agent of the affected property by personal service or by certified mail sent within 3 working days of the determination. Proof of such mailing shall be considered service. Proof of actual delivery is not required. Where the owner of record or the title or certificate holder is not listed in public records or cannot be reasonably notified, service of notice on the registered agent or other designated agent is sufficient;

(b) Mail a copy of the notice to the owner/agent as required in subsection (3)(a) of this rule to the Division. The Division shall notify the State Building Codes Division, the Department of Motor Vehicles, the State Marine Board and/or other affected agencies; and

(c) Post a standard warning notice provided by the Division at all entrances to the contaminated property at the time of the determination. Such notice(s) shall be displayed continuously until a Certificate of Fitness has been issued by the Division.

(4) The notice required in subsection (3)(a) of this rule shall include all of the specific information in the sample notice available from the Division, but need not be identical in form. This notice shall also include a statement that the owner may obtain a hearing by making a written request to the agency making the determination within 30 days.

Unfit for Use Listing by State Department of Consumer and Business Services, Building Codes Division

(1) The Director of the State Department of Consumer and Business Services shall place the property on an official unfit for use listing after it receives a copy of a notice of determination that a property is unfit for use from the Division, or any owner of record. The State Department of Consumer and Business Services — Building Codes Division shall update and distribute the list according to their rules.

(2) To remove a property from the unfit for use list, the owner must provide the Division written proof that:

(a) The determination that the property is unfit for use has been reversed by the agency that made the initial determination; or

(b) The determination by the agency that made the initial determination has been reversed by a court of law; or

(c) A Certificate of Fitness has been issued for the property.

Procedures for Owners of Unfit for Use Properties

(1) The owner of property determined to be unfit for use shall:

(a) Prevent by reasonable means the entry, occupancy or any use whatsoever by anyone of the property in question until the property has been issued a Certificate of Fitness or until the determination that the property is unfit for use has been reversed in writing by the determining agency or by a court of law; except that qualified contractors and regulatory agencies and their authorized agents may enter such properties for purposes of evaluation, sampling, and/or decontamination; and owners or agents of the owner may enter such properties for the purposes of decontamination when approved by the Division as set forth in section (2) of this rule; and

(b) Retain a contractor to supervise the decontamination efforts, including: performing a site assessment; supervising site sampling by an independent third party as required in OAR 333-040-0130(1); submitting a work plan for Division approval; and decontaminating the property or supervising the decontamination of the property. An owner or an agent of the owner may perform the decontamination when the requirements of this subsection and the criteria of section (2) or (3) of this rule are met.

(2) The Division may approve the performance of the decontamination work by the owner or an agent of the owner in accordance with subsection (1)(b) of this rule if all of the following criteria are met:

(a) Methamphetamine was the only drug manufactured at the site; and

(b) The method of manufacturing was the ephedrine-red phosphorus or ephedrine-sodium/lithium metal method; and

(c) The manufacturing occurred after 1994; and

(d) No visual or apparent evidence of manufacturing-related contamination, filth and debris, or biohazards are present; and

(e) No manufacturing-related fire occurred.

(3) When a contractor is proposing a demolition as a method of decontamination as set forth in section (2) of this rule, the Division may waive subsections (2)(a) through (2)(e) if:

(a) Methamphetamine was the only drug manufactured; and

(b) The owner or agent of the owner is prohibited from entering the structure(s) to be demolished.

(4) The Division may disallow the owner or agent of the owner from performing the decontamination work when there is evidence of removal of contents or any other form of decontamination not approved by the Division.

(5) An owner must do one of the following before unfit for use property can be used: provide evidence that the unfit for use property designation has been reversed on appeal; provide evidence that the property has been assessed as set forth in OAR 333-040-0070(1)(a), found not to be contaminated, and a Certificate of Fitness issued; or provide evidence that the property has been decontaminated and a Certificate of Fitness issued.

333-040-0070
Procedures for Assessment, Decontamination, Sampling and Testing

(1) A contractor who has been retained to assess a property shall submit all information, proposals and the appropriate fee to the Division on the form supplied by the Division.

(a) The contractor shall assess the site and characterize the extent of contamination by, but not limited to, the following:

(A) Securing any documentation available from the Division, the determining agency, other appropriate state agencies or other sources regarding the nature and extent of the illegal drug activity and evidence of such activity;

(B) Evaluating the property site to determine the nature and extent of observable damage and contamination;

(C) Providing a written site assessment with an accompanying sampling and analysis plan. The contractor shall submit the assessment and sampling plan, along with the appropriate fee listed in OAR 333-040-0180(4), to the Division for approval prior to commencement of the decontamination work;

(D) Supervising qualified, third-party sampling personnel, as set forth in OAR 333-040-0135, in the collection of site samples;

(E) Arranging for the qualified scientific testing of air, surfaces, and articles and materials on or taken from the site;

(F) Providing a brief written description of the contaminated site and buildings, and a scale drawing of the property including the location and type of all site structures; floor plans drawn to reasonable scale of all affected buildings; location of any surface waters, wells, and/or septic tanks; location of any damage, observable contamination, chemical storage, dump sites, burn piles, or drug lab operations;

(G) Supplying photographs of the site and the interior and exterior of any buildings, vehicles, boats or other potentially contaminated structures or areas. These photographs must show any damage, observable contamination or identified dump sites that may be present;

(H) Providing a list of the sample locations, methods, and laboratory tests to be performed prior to decontamination of the property, and a list of the articles and materials that may need removal from the site during the decontamination process; and

(I) Supplying the name of the company retained to collect the samples, name(s) of the analytical laboratory(ies) performing the analyses on the samples, and the name and qualifications of the sample collector.

(b) The contractor shall submit the assessment along with all tests, findings and conclusions, the name of the owner, mailing and street address, legal description of the property, clear directions for locating the property, and a completed application for a Certificate of Fitness along with the applicable fee to the Division if no contamination is found. If the findings are acceptable to the Division, the Division shall issue a Certificate of Fitness.

(2) If contamination is found, the contractor shall proceed as follows to decontaminate the property, or to supervise the owner or agent of the owner in the decontamination:

(a) Prepare and submit to the Division a written work plan for decontamination along with the applicable fee. The work plan, at a minimum, shall include:

(A) Complete identifying information such as street address, mailing address, owner of record, legal description, and clear directions for locating the property;

(B) A drawing of the contaminated property including floor plans of all affected buildings drawn to reasonable scale showing the location of damage and contamination, chemical storage, and the location of all sampling points used in the initial evaluation;

(C) A summary of the information obtained from the determining agency and/or other sources and a discussion of its relevance to the contamination;

(D) A summary of all tests performed, test results and a discussion of the significance of the test, along with a copy of the laboratory test results;

(E) Specific procedures for decontamination detailing any and all materials or articles to be removed, all procedures to be employed to remove contaminants, any proposed processes to cover or encapsulate contaminants, and any other proposed procedures for decontamination and disposal of contaminated materials;

(F) A complete listing of proposed post-decontamination laboratory tests of the property and the name(s) of the laboratory(ies) doing the testing;

(G) A listing of all personnel who will participate in the on-site decontamination and qualifications of each;

(H) Certification that all workers, except as set forth in OAR 333-040-0065(2), are qualified and trained under applicable OSHA rules, per 29 CFR 1910.120(e) and 437-002-0100(18)(b) through (o), and will use appropriate protective clothing and equipment whenever on the property;

(I) All results of the site assessment; and

(J) Documentation that the site to be decontaminated meets the criteria established in OAR 333-040-0065(2) or (3) when proposing an owner decontamination.

(b) After securing written approval from the Division for the work plan or amended work plan, the contractor shall complete the decontamination work, or supervise the completion of the work, in accordance with the approved work plan;

(c) The contractor shall arrange for, and supervise as necessary as set forth in OAR 333-040-0130(1), all follow-up sampling as specified in the approved work plan;

(d) The contractor shall submit to the Division written and photographic documentation showing that the decontamination has been completed in accordance with the approved work plan, along with all follow-up test results required by the approved work plan, and a completed affidavit on a form supplied by the Division attesting to compliance with the approved work plan; and

(e) If in the course of decontamination, factors are discovered requiring modifications to the work plan, such modifications may be made only upon prior written approval from the Division. The contractor shall provide the Division with written confirmation that the modified work as approved was performed.

(3) The contractor shall insure that all samples collected from the site, including the taking of air, surface and bulk samples prior to and after decontamination of the property are performed by independent, qualified personnel using industry-recognized standards and protocols. The contractor shall insure that the sampling personnel utilize the Division's Drug Lab Field and Sampling Guidelines.

(a) The contractor shall insure that all laboratory tests on the samples collected from the site are performed by a laboratory following standard laboratory practices. The laboratory shall:

(A) Be currently certified or approved under appropriate state, federal, or professional programs;

(B) Use standard methods and procedures when available;

(C) Have implemented a quality assurance program, including use of quality control measures, that is acceptable to the Division; and

(D) Have a US Drug Enforcement Administration registration on file with the Division if analyzing for controlled substances.

(b) The contractor shall insure that the following components of the site sampling and laboratory testing are integrated into the work plan:

(A) The materials, equipment and techniques used, or to be used, for sampling at each location;

(B) All control samples taken, or to be taken, including the location, materials, techniques and results;

(C) The exact location within the property where each test sample was or will be collected. Samples collected after decontamination shall be collected immediately adjacent to the location initially tested, and shall be sampled by identical methods in order to accurately reflect the effectiveness of the decontamination work; and

(D) The amount of area, volume of material or air taken, or to be taken, for each test sample: air sample test results are reported in ppm; liquid and solid sample test are reported in ppm, or in weight/weight; and surface sample test results are reported as total weight of contaminant per appropriate unit of area.

(c) All site assessment reports and test results shall be retained by the contractor for a period of not less than one calendar year from the date of certification of the site.

333-040-0090
Destruction of Unfit for Use Property

Property found to be unfit for use may be demolished all or in part in order to remove the contamination. A contractor shall comply with all state and local requirements, including any permits, for protecting health and the environment in any Division-approved demolition, and shall remove or contain all hazards resulting from the illegal drug manufacturing. A contractor shall submit a written work plan to the Division and receive written approval from the Division prior to the demolition. Where required, permits for demolition shall also be obtained from the Building Codes Division, city or county building authority before demolition begins.

333-040-0100
Disclosure for Sale or Transfer of Illegal Drug Manufacturing Sites

(1) An owner of unfit for use property may transfer or sell the property before a Certificate of Fitness is issued if the owner provides full written disclosure to the buyer or transferee. The owner shall attach the disclosure statement to the earnest money receipt, if any, or otherwise attach the disclosure statement to the sale or transfer document for each transaction, and shall, at a minimum, include each of the following:

(a) A verbatim statement as follows: "The property in this transaction has been determined to be an illegal drug manufacturing site and cannot be rented, leased, entered or used for any reason without first being issued a Certificate of Fitness by the Public Health Division." The statement shall be in 10-point, bold type or equivalent;

(b) A brief description of the property including street address and legal description;

(c) A brief description of the kind and location of all drug manufacturing activities on the property if known;

(d) The name and address of the owner of record, the name and address of the buyer/recipient, and the date of the transfer;

(e) The name of the agency that determined the property was unfit for use;

(f) The address and telephone number of the agency that made the above determination; and

(g) A photocopy of the written notice of determination as issued by the determining agency listed in ORS 453.876.

(2) The owner shall provide a copy of the disclosure statement for each transaction to the Building Codes Division and the Public Health Division within 10 days of the closing of the sale or transfer.

333-040-0110
Qualifications, Training and Licensing of Contractors and Employees

(1) No person or entity shall advertise to undertake, or perform the work necessary to assess or decontaminate properties found to be unfit for use, without first complying with these rules and securing a license to do so pursuant to ORS 453.885(2), 453.888 and Oregon Laws 1999, Chapter 861, section 3, except as set forth in section (2) of this rule or in OAR 333-040-0065(2) and (3).

(2) Before applying for a decontamination contractor license, a contractor must be registered, bonded and insured as a general contractor with the Construction Contractor's Board. Companies and persons providing only sample collection, transportation and testing services for drug laboratory decontamination contractors are not required to be licensed pursuant to these rules; however, a contractor shall supervise anyone providing sample collection as set forth in OAR 333-040-0130(1), and anyone providing sample collection services shall comply with the hazardous materials training required in section (5) of this rule and the qualification and training requirements of 333-040-0135. Laboratories providing sample analysis shall comply with 333-040-0070(3)(a).

(3) The contractor shall provide documentation to the Division that its supervisory personnel seeking training and certification as a drug laboratory decontamination supervisor have successfully completed at least 40 hours of hazardous materials training satisfying the requirements of OAR 437-002-0100(18) and 29 CFR 1910.120(e). The contractor shall insure that only persons so qualifying are admitted for training, examination or on-site work as an illegal drug manufacturing site decontamination supervisor.

(4) Applicants shall demonstrate that all employees who will perform work on illegal drug manufacturing sites have completed a Division-sponsored specialized training course and have successfully passed the course examination with a score of seventy percent or greater.

(5) The contractor shall insure that its employees and agents who have on-site duties or who handle contaminated materials, chemicals or contaminated equipment, shall be trained as required by OAR 437-002-0100(18) and 29 CFR 1910.120(e) before engaging in assessment, testing or decontaminating illegal drug manufacturing sites. Refresher training as required by said rules and regulations shall be kept current.

(6) The contractor's supervisory employees performing on-site drug site decontamination activities shall successfully complete the initial training course required in section (4) of this rule and shall successfully complete refresher training specified by the Division every other year to renew their certification. The Division may also require more frequent training updates.

(7) The contractor's non-supervisory employees who have on-site exposure to properties found unfit for use shall receive specialized drug site decontamination training before having any on-site exposure, and must attend refresher training at least every other year to renew their certification. The contractor shall supply the Division with documentation of such training for each employee who enters an illegal drug manufacturing site. Training referred to in sections (6) and (7) of this rule is required in addition to the training required by State and Federal OSHA regulations referred to in section (5) of this rule.

(8) All contractors and all employees of any contractor shall carry identification provided by the Division attesting to their training credentials and level of training whenever performing duties at an illegal drug manufacturing site.

333-040-0120
Contractor Listing

The Division shall maintain a complete listing of Drug Laboratory Decontamination Contractors and shall provide copies of the list as follows:

(1) To the Director of the Department of Consumer and Business Services who shall supply the list and updates to local building code enforcement agencies;

(2) To the Administrator of each county health department in the state;

(3) Upon request, to any property owner, prospective buyer, licensee or other interested person.

333-040-0130
On-Site Supervision

(1) The contractor shall insure that at all times during site assessment and sampling activities on illegal drug manufacturing sites, a qualified supervisor employed by the contractor shall be on site and responsible for the activities performed. The Division may also require the presence of such a supervisor on these sites during decontamination activities. Supervisors shall at all times while on site carry identification provided by the Division attesting to their training and credentials.

(2) An applicant for a decontamination license must demonstrate that it has one or more qualified supervisors on staff.

(3) A contractor may not perform any illegal drug manufacturing site activities unless the contractor has at least one certified supervisor.

333-040-0135
Qualifications and Training of Sampling Personnel

Persons collecting site samples shall have the following minimum qualifications:

(1) Have completed hazardous materials training, as set forth in OAR 333-040-0110(5); and

(2) Be a certified Industrial Hygienist (CIH); or

(3) Have a Bachelor of Science Degree in Health and Safety, Industrial Hygiene, Environmental Sciences, or Basic Sciences, and six months experience working with or for a professional environmental or industrial hygiene firm, Occupational Safety and Health Administration (OSHA), Environmental Protection Agency (EPA), Department of Environmental Quality (DEQ), or for an environmental laboratory certified under a state, federal, or professional program; or

(4) Have an Associate Degree in Hazardous Materials Management or Environmental Evaluations/Chemistry, and one year experience working under the direct supervision of personnel identified in section (2) or (3) of this rule. Persons who have been collecting samples at drug lab sites consistently since prior to January 1, 2000, are exempt from the requirements in sections (2), (3), and (4) of this rule.

333-040-0140
Entry and Inspection

Properties determined to be unfit for use may be entered and inspected as set forth in ORS 453.873 and Oregon Laws 1999, Chapter 861. Law enforcement officials may accompany such entries for safety or security purposes. The owner, manager, tenant, or occupant of such property shall allow access to all parts of such property for these purposes and for quality control evaluations pursuant to OAR 333-040-0150 from the date of the finding that the property is unfit for use and up to six months after a Certificate of Fitness has been issued.

333-040-0150
Quality Control Checks

(1) The Division or designated agents may inspect, evaluate and perform tests upon any property for which a Certificate of Fitness has been requested or issued. The inspection, evaluation and tests shall determine whether the approved work plan was followed, whether post-cleaning tests submitted meet the requirements of OAR 333-040-0070(3), and whether the property has been decontaminated adequately. The contractor shall be subject to license revocation, suspension, civil penalties or other penalties as set forth in ORS 453.990 if inadequate decontamination is found.

(2) The Division may monitor the work of any contractor at any illegal drug manufacturing site.

333-040-0180
Licenses and Fees

(1) For applicants applying for an initial license, the following fees are payable to the Division:

(a) Drug Site Decontamination Contractors initial training course:

(A) Course Registration and Processing fee: $150.00;

(B) Initial Examination fee (each time taken): $100.00;

(C) Refresher Course fee: $100.00.

(b) Initial License Application fee: $1,000.00 (if made on or before July 1, of even-numbered calendar years) If initial application is made before July 1, of any odd-numbered year: $500.00.

(2) Renewal of License:

(a) Renewal fee (must be made on or before July 1 of even-numbered years): $1,000.00. Licenses expire on June 30 of each even-numbered year and must be renewed on or before July 1 of each even-numbered year.

(b) Penalty for late renewal (if made after July 15): $100.00.

(3) Reciprocity fees:

(a) License Application fee: $1,000.00 (if made on or before July 1 of even-numbered calendar years). If application is made before July 1 of any odd-numbered year: $500.00;

(b) Contractor License Review fee: $200.00;

(c) Worker or Supervisor Certification Review fee: $100.00.

(4) Decontamination fees:

(a) Site Assessment Review fee: $300.00;

(b) Work Plan Review fee — for each real property including all property associated thereto: $900.00. Work Plan Review fee — for vehicles, trailers, and boats not associated with real property: $100.00;

(c) Project Completion Review and Certificate of Fitness fee (for each property): $200.00;

(d) Issuance of additional copies of Certificate of Fitness: $5.00.

(5) No portion of any of the above fees is refundable unless the fee was submitted in error and the application is withdrawn by

written request of the applicant within 10 working days of submission.

Reciprocity

(1) The Division may provide reciprocal licensure for contractors licensed in another state, and reciprocal certification for supervisors and workers trained and certified in another state if standards and training are substantially equivalent to these rules. Applications for a decontamination contractor license or worker/supervisor certification are subject to review and approval by the Division. Applicants for reciprocity shall submit to the Division:

(a) A completed application on a form provided by the Division;

(b) Documentation of specialized training for drug manufacturing site decontamination;

(c) Evidence of successful completion of training as set forth in OAR 437-002-0100(18) and 29 CFR 1910.120(e);

(d) Evidence of registration, bonding, and insurance with the Oregon Construction Contractor's Board; and

(e) A fee as set forth in OAR 333-040-0180.

(2) After reviewing the application, the Division may issue the applicant a certificate/license or require:

(a) Additional information;

(b) A refresher course; or

(c) A Division-administered examination.

333-040-0230
Denial, Suspension, Revocation of License and Civil Penalties

(1) An applicant for an initial license as a Drug Laboratory Decontamination Contractor will be denied if the applicant fails to meet any of the qualifications or requirements of these rules.

(2) The Division may deny, suspend or revoke the license of any contractor pursuant to ORS 453.888, 183.310 to 183.550 and Oregon Laws 1999, Chapter 849.

(3) Denials, suspensions and revocations of licenses are contested cases subject to ORS 183 and Oregon Laws 1999, Chapter 849 and the model procedural rules of the Attorney General.

DIVISION 47

STATE SUPPLIED VACCINE ACCOUNTABILITY

333-047-0010
Definitions Used in the Vaccine Accountability Rules

(1) All definitions of ORS 433.090 and 433.235 apply to these rules.

(2) In addition to the definitions of ORS 433.090 and 433.235, the following definitions apply:

(a) "Authority" means the Oregon Health Authority.

(b) "Certify" means to attest, in writing, on a form prescribed by Oregon Health Authority that at least two employees, owners or partners have completed required vaccine-related trainings as provided or approved by Oregon Health Authority.

(c) "Entity" means a health clinic or provider, pharmacy or pharmacist who receives state-supplied vaccine.

(d) "Oregon Immunization Program" means Oregon Health Authority, Public Health Division, Immunization Program.

(e) "Public Health Division" means the Oregon Health Authority, Public Health Division.

(f) "Receives vaccines" means an entity is supplied with vaccines by the Oregon Immunization Program, including vaccines acquired with federal and state funds, including the Vaccines for Children Program (VFC), the Section 317 Vaccine Program, state Special Project vaccine, and state Billable Project vaccine.

(g) "State supplied vaccine" means vaccine provided by the federal government or the Oregon Immunization Program.

(h) "State-supplied Vaccine User Vaccine Accountability Reporting Requirements and Timelines" means the schedule of reporting timelines found in the Vaccine User Accountability Reporting Table of OAR 333-047-0050.

Stat. Auth.: ORS 433.103
Stats. Implemented: ORS 433.103
Hist.: PH 14-2011, f. 12-28-11, cert. ef. 1-1-12

333-047-0030
Training

(1) Any entity receiving state supplied vaccine shall require that at least two currently employed staff persons, owners or partners complete immunization related training at least once every two years as follows:

(a) Clinical administration of vaccines; and

(b) Storage, handling and inventory management of vaccines.

(2) An entity shall provide Authority staff with written documentation that it has met the requirements of section (1) of this rule or that it is exempt from training upon request or at every official Vaccines for Children site visit.

(3) An entity receiving state-supplied vaccine is responsible for retaining documentation that at least two currently employed staff persons, owners, or partners have completed the required clinical administration and vaccine management training course at least once every two years.

(4) The Authority will make available to entities no-cost internet based training available in on-demand format.

(5) Web-based training will include an official certification receipt for staff meeting competence standards.

(6) The Authority will exempt an entity from the training requirement in section (1) of this rule if an entity demonstrates to the satisfaction of the Authority that it, or that a licensing board with jurisdiction over some employees of the entity, requires training that is substantially similar to the training available from the Authority. An entity may submit a request for an exemption on a form prescribed by the Authority.

(7) The training requirements required by section (1) of this rule are effective January 1, 2013.

DIVISION 48

VACCINE EDUCATION AND PRIORITIZATION PLAN

333-048-0010
Definitions

As used in OAR 333-048-0010 through 333-048-0030:

(1) "Division" means the Public Health Division of the Oregon Health Authority.

(2) "Local Public Health Authority" means the district or county Board of Health, Public Health Officer, Public Health Administrator or health department having jurisdiction within the area.

(3) "Sponsor" means any medical practice, clinic, hospital, local health department, health system, long-term-care facility, home-care agency, occupational health program, pharmacy, or other entity that sponsors the direct provision of vaccination services in Oregon.

(4) "High Risk" means broad categories of people defined by the Advisory Committee on Immunization Practices or the State Public Health Officer as being at increased risk of severe disease or complications from a vaccine-preventable disease for which the State Health Officer has declared a vaccine shortage pursuant to OAR 333-048-0020. Risk categories may be further broken down into prioritized sub-categories.

(5) "Low Risk" means broad categories of people defined by the Advisory Committee on Immunization Practices or the State Public Health Officer as being unlikely to experience severe disease or complications from a vaccine-preventable disease for which the State Health Officer has declared a vaccine shortage pursuant to OAR 333-048-0020. Risk categories may be further broken down into prioritized sub-categories.

(6) "Provider" means any health care practitioner, or other person, who can administer vaccine directly to a patient.

(7) "Vaccine" means any vaccine, any immune product or chemo prophylactic medication.

(8) "Plan" means an Oregon Vaccine Education and Prioritization Plan.

(9) "CD Summary" means the Oregon CD Summary, an Oregon Health Authority publication sent to providers statewide.

[Publications: Publications referenced are available from the agency.]

Stats. Implemented: ORS 433.040
Hist.: OHD 27-2001, f. & cert. ef. 12-4-01; PH 5-2011(Temp), f. & cert. ef. 7-1-11 thru 12-27-11; PH 11-2011, f. & cert. ef. 10-27-11

333-048-0020
Plan Development

(1) When the State Public Health Officer declares a vaccine shortage emergency, the Division will adopt a Vaccine Education and Prioritization Plan specific for that vaccine shortage.

(2) The plan will include, but is not limited to:

(a) A timeline that lists when specific vaccine administration activities can be initiated by providers and/or sponsors;

(b) The risk categories, or sub-categories, that will be covered with the vaccine that is available based on categories developed and/or adopted by the Division;

(c) The role of the local public health authorities in assuring that services are available to those in the designated risk categories.

(3) The plan will be published and distributed to providers within forty-five days of a declared vaccine shortage emergency.

(4) In situations where a vaccine shortage changes after the finalized plan has been distributed, the prioritized risk categories can be redefined by publishing a written supplement to the plan.

(5) In cases of a vaccine shortage emergency as determined by the State Public Health Officer, the local public health authority may facilitate the voluntary sharing of vaccine in their community or delegate that responsibility to a community partner. State-supplied vaccine will be shared only within guidelines provided by the Division.

(6) The Vaccine Education and Prioritization Plan will remain in effect until notification is made by the State Public Health Officer, or unless specified in the plan.

Stats. Implemented: ORS 433.040
Hist.: OHD 27-2001, f. & cert. ef. 12-4-01

333-048-0030
Penalties

(1) Penalties will not be levied unless the State Public Health Officer declares a vaccine shortage.

(2) If a complaint is made to the Division about a provider and/or sponsor not acting in accordance with the timeline of activities and the targeting of risk categories as specified in a Vaccine Education and Prioritization Plan:

(a) An investigation will be initiated by the Division within five working days;

(b) If the Division determines that a person has knowingly violated the timeline of activities and the targeting of risk categories as specified in the Vaccine Education and Prioritization Plan, such violation shall be documented in the Health Service records and the provider and/or sponsor notified of the determination. If the violation is a repeat violation, a civil penalty shall be levied as set forth in the OAR 333-048-0030(2)(c);

(c) If the Division determines that a provider and/or sponsor has committed a repeat violation of the timeline of activities and targeting of risk categories as specified in the Vaccine Education and Prioritization Plan, a fine of no more than $500 per incident shall be levied against the provider and/or sponsor; and

(d) If the Division determines that a provider has committed repeat violations as set forth in the OAR 333-048-0030(2)(c), then the Division will report the provider to the appropriate licensing authorities in addition to any civil penalties assessed by the Division.

DIVISION 49

IMMUNIZATION REGISTRY

333-049-0010
Definitions

(1) All definitions of ORS 433.090 and 433.235 apply to these rules.

(2) In addition to the definitions of ORS 433.090 and 433.235, the following definitions apply:

(a) "Authorized user" has the meaning as defined in ORS 433.090(1).

(b) "Client" has the meaning as defined in ORS 433.090(3).

(c) "Exempt" means the special status of information on certain clients that will limit its disclosure.

(d) "Manager" means the manager of the statewide immunization registry or his/her designee.

(e) "Oregon Immunization Program" means the Oregon Health Authority, Public Health Division, Immunization Program.

(f) "Public Health Division" means the Oregon Health Authority, Public Health Division.

(g) "State Public Health Division Timelines" means the schedule of reporting timelines shown in the Vaccine User Accountability Reporting Table (OAR 333-047-0050), detailing data elements required and when each element must be included for submission.

(h) "State supplied vaccine" means vaccine provided by the federal government or the Oregon Immunization Program.

333-049-0020
Purpose and Intent

(1) The purpose of these rules is to implement ORS 433.090 et seq., which:

(a) Authorizes the Public Health Division to develop a registry for all children and adults born or living in Oregon; and

(b) Requires the Public Health Division to adopt rules to develop and implement the registry, including a process by which a parent or guardian can control the transfer of information from the immunization record when such control is necessary to protect the health or safety of the family.

(2) In order to increase appropriate immunizations among preschool age children, it is the intent that, as soon as practical, all children born in the state will be automatically enrolled in the registry using information derived from birth certificates, and that all children from birth through 35 months of age, who are not enrolled from birth certificates, will receive priority for enrollment in the registry.

333-049-0030
Enrollment

(1) All children born in the state shall be enrolled in the registry.

(2) All children who live with a parent or guardian in the state for any period of time, and who receive an immunization, may be enrolled in the registry.

(3) Any person who receives an immunization in the state may be enrolled in the registry.

(4) The enrollment of clients in the registry shall be in a manner and on such forms as prescribed by the Manager.

(5) Nothing in these rules require the consent of a parent, guardian or client prior to enrollment in the registry.

(6) For the purposes of enrolling children in the registry, the Manager may identify children born in the state from any birth record or abstract.

Stat. Auth.: ORS 433.094, 433.100 & 432.119
Stats. Implemented: ORS 433.094 & 433.100

333-049-0040
Collection and Release of Information

(1) The manager may collect information for a client's immunization record from any authorized user. Such information to be collected shall be determined by the manager and provided to the registry on forms or in a format provided by the manager.

(2) The manager may collect information for a client's tracking and recall record from any authorized user. Information to be collected includes such information necessary to send reminder cards to, place telephone calls to, or personally contact the client or the parent or the guardian of a client. Such information shall be determined by the manager and provided to the tracking and recall system on forms or in a format provided by the manager.

(3) The manager may receive information from other registries and may share information with other such registries, provided that the manager makes a determination that other registries have confidentiality protection at least equivalent to those under ORS 433.090 through 433.102 and these rules. The manager shall prescribe the information that may be shared and the forms for sharing information to and from other registries.

(4) The manager may request information to determine the name of any person and information on contacting the person or such person's parent or guardian in order to notify them about the existence of the registry. The manager may seek information on persons in the state who have not enrolled in the registry through contacting other state agencies, and other appropriate organizations that have access to such information.

(5) The manager may release and publish information in the registry in an aggregate form that does not identify a client.

Stat. Auth.: ORS 433.096, 433.094 & 432.119
Stats. Implemented: ORS 433.096 & 433.094

333-049-0050
Reporting to the Immunization Registry

(1) Any provider who participates in the registry and who administers immunizations identified by the manager shall report such immunization to the registry within 14 calendar days of such immunization.

(2) Any pharmacist who immunizes must report all immunizations administered to the registry.

(3) Reports shall be submitted to the registry in a manner and on such forms as required by the manager. Such forms shall be provided by the manager.

(4) Any authorized user may report immunizations, and other such information, permitted under ORS 433.090(3) and (5), as prescribed by the manager, to the registry without the consent of the client or the parent or guardian of the client. Reporting this information without the consent mentioned above shall not subject a person to liability or civil action.

(5) Any authorized user who administers state-supplied vaccine must report in a manner prescribed by the Authority the following data elements for all administered doses to the Statewide Immunization Registry in accordance with Public Health Division timelines in the Vaccine User Accountability Reporting Table (OAR 333-047-0050):

(a) The name, address, phone number, gender, and date of birth of a client;

(b) The date of administration of the vaccine;

(c) The CPT, CVX, or NDC code of the vaccine administered;

(d) The dose-level vaccine eligibility code;

(e) The organizational identifier of the administering or reporting clinic or site;

(f) The lot number of the vaccine;

(g) The dose amount and manufacturer of the vaccine, when available; and

(h) Other data elements as specified by the Public Health Division.

(6) Any authorized user who administers state-supplied vaccine shall utilize, in accordance with OAR 333-047-0050:

(a) The ordering module for ordering state-supplied vaccines; and

(b) The inventory module for tracking public or public and private vaccine supply.

333-049-0060
Access to Immunization Records

(1) Clients, parents and guardians:

(a) Clients and parents or guardians of children less than 18 years of age may request a copy of their, or their child's, immunization record by submitting a request for the record, as prescribed by the Manager.

(b) The Manager may provide a maximum of four (4) copies of any client's immunization record without charge, within one calendar year, pursuant to the request from a client, parent or guardian. Additional copies of the immunization record may be provided based on a fee established by the Manager that is reasonably calculated to reimburse the registry for the actual cost in making such records available.

(2) Other authorized users: All other authorized users shall access such records in a manner prescribed by the Manager.

Fees

For the purpose of implementing ORS 433.090 through 433.104 fees may be charged in accordance with this rule:

(1) Fees may be charged to authorized users including, but not limited to, the following: health plans, health provider associations, private or non-profit institutions, other state registries, federal health agencies or their contractors.

(2) Fees shall not be charged to the following users: individual health care providers and clinics, Oregon schools, Oregon children's facilities, Oregon hospitals or Oregon Health Authority, Division of Medical Assistance Programs.

(3) Fees may be waived at the discretion of the ALERT Manager or Oregon Health Authority Immunization Program Manager in accordance with Immunization Policy.

(4) Unless waived, or exempt under subsection (2) of this rule, a fee of $10 per client shall be charged to each authorized user for each client specific immunization data request.

(5) A request for client specific data shall be responded to only when made by an authorized user for information about a client under its care or by a public health entity for clients within its jurisdiction. Requests from persons other than authorized users or from authorized users for data beyond that of a specific patient(s) under its care or within the public health entity's jurisdiction will be considered on a case by case basis in the interests of public health practice and may be responded to only with aggregate/de-identified data.

333-049-0070
Limitations on Access to Information in the Immunization Registry and Tracking and Recall System

(1) An authorized user may only access information in the Registry or Tracking and Recall System as follows:

(a) An authorized user may access information on a client who is presently under that authorized user's care, or enrolled in the authorized user's children's facility, school, post-secondary educational institution, program or health plan, except as otherwise provided by law.

(b) An authorized user that is a state or local public health authority may, in addition to accessing information described in subsection (1)(a) of this rule, access information on an individual within a public health entity's jurisdiction for:

(A) Assessment, evaluation, surveillance and outreach related to immunization promotion and vaccine-preventable disease prevention; and

(B) The Pregnancy Risk Assessment Monitoring System (PRAMS).

(2) The manager may monitor and audit all access to a client's record contained in the registry.

(3) The manager may require any person who has accessed a client's record to provide evidence that such client was under the care of the person or enrolled in the person's post-secondary educational institution, school, children's facility, program or health plan at the time the client's record was accessed.

(4) The Public Health Division may report violations of these rules by any authorized user who has accessed a client's record to the appropriate licensing or regulatory authority.

Stat. Auth.: ORS 433.098
Stats. Implemented: ORS 433.098

333-049-0080
Limitations on the Transfer of Information from the Immunization Registry

(1) A parent or guardian may request a limitation on the transfer of information pertaining to a child enrolled in a registry when such child has a disease or condition that precludes administration of some or all immunizations. No information on such children will be disclosed in response to inquiries to the registry.

(a) Any parent or guardian of a child who has a disease or condition that may preclude administration of some or all immunizations may request a limitation on the child's information that may be transferred from the registry by providing a written request to the Manager.

(b) Upon verification of the information in the request, the Manager shall cause the registry to flag the client's record and to limit transfer of the information on the client. The Manager shall also notify the parent or guardian of such action.

(2) Safety. A parent or guardian may request a limitation on the transfer of information pertaining to a child enrolled in a registry when a third party could use the information in the record to locate the child, or other family members who reside with the child, and who the parent or guardian reasonably believes presents a risk of harm to the child or other family members.

(a) Any parent or guardian of a client may request a limitation on the transfer of child's information by providing a written request to the Manager when the parent or guardian reasonably believes there is a risk of harm to the child, or other family members, where such person could be located through information from the registry, and the child or other family members may be harmed if located.

(b) The request for limitation must also include a statement and evidence that supports the request. Such evidence may include any evidence accepted under ORS 192.445(2)(b)(A)–(E).

(c) Upon receipt of acceptable evidence to support the request, the Manager shall cause the registry to flag the child's record and to limit transfer of the information on the child. The Manager shall also notify the parent or guardian of such action.

(3) Upon receipt of any request under this section, the Manager may cause the registry to flag the child's record for a period of 30 days until the request can be approved.

(4) After approval of a request under this section, such request will remain in effect until the Manager receives a written request from the parent or guardian to remove the flag from the child's record.

333-049-0090
Notification of Needed Immunizations, Hearing Screening, or Lead Screening

(1) The manager, authorized user, or public health entity may contact or provide notice to clients or parents and guardians of clients less than 18 years of age when the tracking and recall system indicates that a client has missed:

(a) A scheduled immunization;

(b) Lead screening; or

(c) Hearing screening for clients zero through 12 years of age.

(2) The manager, authorized user, or public health entity may also notify the client's provider of last record of the client's needed immunizations, hearing screening, or lead screening. Notification shall be in such form as prescribed by the manager.

Confidentiality

(1) Personal identifying information from the registry shall only be disclosed to authorized users.

(2) An authorized user shall not disclose information from the registry except to another authorized user.

(3) Any request for the limitations on the transfer of information from the immunization record or the immunization tracking and recall record shall be confidential.

(4) All providers with access to the registry shall provide to the Director an agreement signed by such providers or their authorized agent. The agreement shall be in a form prescribed by the Director, and may include provisions to maintain the confidentiality of the information in the registry, and to only access information on clients under the care of such persons.

333-049-0120
Deletion of Information in the Registry and Tracking and Recall System

A client who is 18 years of age or older may request to have their record sealed or removed from the registry. The election of whether to seal the record or remove the record is at the sole discretion of the client.

(1) Process. A client requesting sealing or removal of their registry record must submit a form approved by the Manager for that purpose. The client may elect to have their record sealed or removed from the registry. If the client does not elect either option then their record will be removed from the registry.

(2) The request for sealing or removal of a client's record must also include a legible photocopy of one piece of photo identification. Acceptable identification includes any of the following: a valid state-issued driver's license or identification card; a passport; or a U.S. military identification card.

(3) If a client elects to have their registry record sealed, the information will remain in the registry but will not be released to authorized users. In the case of a declared public health emergency, the Manager may release the information to public health officials for the sole purpose of responding to the declared emergency. A client may request that their record be unsealed by submitting the form approved by the Manager along with a photocopy of an approved document that verifies the client's identity. A record that is removed from the registry cannot be recovered.

(4) When an immunization record is removed from the registry, certain pieces of demographic information, including a client's name and date of birth, must be kept on file in order to keep the immunization record from being repopulated.

Security

(1) All authorized users shall abide by such security policies and procedures to safeguard information in the registry deemed necessary by the Director. Such policies and procedures may include, but are not limited to, confidentiality agreements, the use of computer passwords, and user identification numbers. The Director shall provide copies of the policies and procedures to all authorized users who participate in either or both the immunization registry or tracking and recall system.

(2) The Director shall develop security standards to safeguard the information in the registry. The standards will address, but not be limited to, the collection, transfer, storage, and processing of information in the registry and tracking and recall system.

(3) The Director shall review the security policies, procedures, and standards at least once each year and shall revise such policies, procedures, and standards as necessary.

DIVISION 50

SCHOOL IMMUNIZATION RULES

333-050-0010
Definitions Used in the Immunization Rules

As used in OAR 333-050-0010 through 333-050-0140:

(1) "Certificate of Immunization Status" means a form provided or approved by the Public Health Division on which to enter the child's immunization record.

(2) "Complete" means a category assigned to any child whose record indicates that the child is fully immunized or has immunity documentation as specified by OAR 333-050-0050(2) or (6).

(3) "Contraindication" means either a child or a household member's physical condition or disease that renders a particular vaccine improper or undesirable in accordance with the current recommendations of the Advisory Committee on Immunization Practices, Department of Health and Human Services, Centers for Disease Control and Prevention, and the American Academy of Pediatrics.

(4) "County Immunization Status Report" means a report submitted by the local health department (or school or facility if there is no local health department) to the Public Health Division to report annually the number of children as specified, in the area served, and the number susceptible to the vaccine preventable diseases covered by these rules.

(5) "Evidence of Immunization" means an appropriately signed and dated statement indicating the month, day and year each dose of each vaccine was received.

(6) "Exclude" or "Exclusion" means not being allowed to attend a school or facility pursuant to an Exclusion Order from the local health department based on non-compliance with the requirements of ORS 433.267(1), and these rules.

(7) "Exclusion Order for Incomplete Immunization or Insufficient Information" means a form provided or approved by the Public Health Division for local health department and Public Health Division use in excluding a child who, based on the child's record, is in non-compliance with the vaccine requirements of OAR 333-050-0050(2) or who has insufficient information on his or her record to determine whether the child is in compliance. Forms submitted for approval must contain the substantive content of the Public Health Division form.

(8) "Exclusion Order for No Record" means a form provided or approved by the Public Health Division for local health department, Public Health Division and school or facility use in excluding a child with no record. Forms submitted for approval must contain the substantive content of the Public Health Division form.

(9) "Exempted Children's Facilities" are those that:

(a) Are primarily for supervised training in a specific subject, including, but not limited to, dancing, drama, or music;

(b) Are primarily an incident of group athletic or social activities sponsored by or under the supervision of an organized club or hobby group;

(c) Are operated at a facility where children may only attend on a limited basis not exceeding four different days per year; or

(d) Are operated on an occasional basis by a person, sponsor, or organization not ordinarily engaged in providing child care.

(10) "Exemption" means either a documented medical or non-medical exemption.

(11) "Health Care Practitioner" means a practitioner of the healing arts who has within the scope of the practitioner's license, the authority to order immunizations, to include: M.D., D.O., N.D., nurse practitioners, and physician assistants, or a registered nurse working under the direction of an M.D., D.O., N.D. or nurse practitioner.

(12) "Immunity Documentation" means a written statement signed by a physician or an authorized representative of the local health department that the child should be exempted from receiving specified immunizations due to a disease history based on a health care practitioner's diagnosis or the results of an immune titer.

(13) "Incomplete" means a category assigned to any child whose record indicates, on or before the date the Primary Review Summary form is due at the local health department, that the child:

(a) Is not fully immunized as required in OAR 333-050-0050(2); and

(b) Does not have a completed exemption or immunity documentation for a vaccine for which the child is not fully immunized.

(14) "Insufficient" means a category assigned to any child whose record does not have enough information to make a proper determination about the child's immunization status, including unsigned records, vaccine dates before day of birth, dates out of sequence, and missing doses in the middle of a vaccine series. This category does not apply to signed but undated records.

(15) "Local Health Department" means the District or County Board of Health, Public Health Officer, Public Health Administrator or local public health agency having jurisdiction within the area.

(16) "Main Office" means a central administrative location at the school or children's facility where immunization rates are made available to parents.

(17) "Medical Exemption" means a document signed by a physician or an authorized representative of the local health department stating that the child should be exempted from receiving specified immunizations based on a medical diagnosis resulting from a specific medical contraindication.

(18) "New Enterer" means a child who meets one of the following criteria:

(a) Infants or preschoolers attending an Oregon facility;

(b) Infants or preschoolers attending a drop-in facility on five or more different days within one year;

(c) Children initially attending a school at the entry level (prekindergarten, kindergarten or the first grade, whichever is the entry level);

(d) Children from a home-school setting initially attending a school or facility at any grade (preschool through 12th grade); or

(e) Children initially attending a school or facility after entering the United States from a foreign country at any grade (preschool through 12th grade).

(19) "Non-Compliance" means failure to comply with any requirement of ORS 433.267(1) or these rules.

(20) "Nonmedical Exemption" means a document, on a form prescribed by the Public Health Division, signed by the parent stating that the parent is declining one or more immunizations on behalf of the child, and including documentation of completion of the vaccine educational module or a signature from a health care practitioner verifying discussion of risks and benefits of immunization.

(21) "Post-Secondary Education Institution" means:

(a) A state institution of higher education under the jurisdiction of the State Board of Higher Education;

(b) A community college operated under ORS Chapter 341;

(c) A school or division of Oregon Health and Science University; or

(d) An Oregon-based, generally accredited, private institution of higher education, where:

(A) Oregon-based, generally accredited includes any post-secondary institution described in OAR 583-030-0005(2) or classified as exempt under ORS 348.604; and

(B) Private institution refers to any non-public post-secondary education institution.

(22) "Primary Review Summary" means a form provided or approved by the Public Health Division to schools and facilities for enclosure with records forwarded to the local health department for secondary review and follow up. Forms submitted for approval must contain the substantive content of the Public Health Division form.

(23) "Primary Review Table" means a document provided by the Public Health Division for the judgment of compliance or non-compliance with the required immunizations.

(24) "Public Health Division" means the Oregon Health Authority, Public Health Division.

(25) "Record" means a statement relating to compliance with the requirements of ORS 433.267(1)(a) through (c) and these rules.

(26) "Restrictable Disease" means a communicable disease for which the local health department or administrator has the authority to exclude a child as described in OAR 333-019-0010 through 333-019-0014.

(27) "School Year" means an academic year as adopted by the school or school district (usually September through June).

(28) "Susceptible" means being at risk of contracting one of the diseases covered by these rules, by virtue of being in one or more of the following categories:

(a) Not being complete on the immunizations required by these rules;

(b) Possessing a medical exemption from any of the vaccines required by these rules due to a specific medical diagnosis based on a specific medical contraindication; or

(c) Possessing a nonmedical exemption for any of the vaccines required by these rules.

(29) "These Rules" means OAR 333-050-0010 through 333-050-0140.

(30) "Transferring Child" means a child moving from:

(a) One facility to another facility, only when records are requested in advance of attendance from a previous facility;

(b) One school in this state to another school in this state when the move is not the result of a normal progression of grade level; or

(c) A school in another state to a school in this state.

(31) "Up-to-Date" means not complete, currently on schedule and not subject to exclusion, based on the immunization schedule for spacing doses, as prescribed in OAR 333-050-0120.

(32) "Vaccine Educational Module" means a resource approved by the Public Health Division to fulfill the requirement of receiving information about the risks and benefits of immunization in order to claim a nonmedical exemption.

333-050-0020
Purpose and Intent

(1) The purpose of these rules is to implement ORS 433.235 through 433.284, which require evidence of immunization, a medical or nonmedical exemption, or immunity documentation for each child as a condition of attendance in any school or facility, and which require exclusion from school or facility attendance until such requirements are met.

(2) The intent of the school and facility immunization statutes and these rules is to require that:

(a) A new enterer provide a signed and dated Certificate of Immunization Status form documenting evidence of immunization, documentation of medical or nonmedical exemption, or immunity documentation.

(b) A transferring child provide evidence of immunization, immunity documentation or an exemption:

(A) Within 30 days of initial attendance if records will be requested from a school in the United States;

(B) Prior to initial attendance, as specified in OAR 333-050-0020(2)(a), if records will not be requested from a school in the United States;

(C) Prior to initial attendance, as specified in OAR 333-050-0020(2)(a), if the child is transferring from one facility to another;

(c) A child currently attending not be allowed to continue in attendance without complete or up-to-date evidence of immunization, immunity documentation, or an exemption.

(3) All children's facilities are required to comply with these rules, including but not limited to certified child care centers, certified family child care homes, child care centers exempt from certification, Head Start programs, preschools and Early Intervention/Early Childhood Special Education child care programs.

(4) The only exception is for family child care homes, either registered or exempt from registration, providing child care, six weeks of age to kindergarten entry, in a residential or nonresidential setting. These programs are exempt from all requirements except an up-to-date Certificate of Immunization Status form on each child in attendance.

(5) All schools are required to comply with these rules, including but not limited to public schools, private schools, charter schools, and alternative education programs. Any program that provides educational instruction designed to lead to a high school diploma or transfer into a regular high school program must also comply with these rules.

(6) Nothing prohibits a school, children's facility, or post-secondary educational institution from adopting additional or more stringent requirements than the statutes or rules as long as:

(a) Medical and nonmedical exemptions and immunity documentation are included;

(b) The requirements are in compliance with the recommendations of the Advisory Committee on Immunization Practices, Department of Health and Human Services, Centers for Disease Control and Prevention; and

(c) Public schools are required to allow transferring students at least 30 days to provide an immunization record.

333-050-0030
Visitors, Part-Time Students, and Residents

(1) Any child visiting or attending a school or facility on five or more different days in a given school year or residing on the premises of a school or facility regardless of whether the child attends classes or receives child care, at any age or grade through grade 12, shall be subject to the requirements of either a new enterer or transferring child as appropriate. Such residents and visitors for the purposes of these rules are in attendance.

(2) Home-schooled, private, or special education students or students in other non-traditional educational settings are subject to these rules if they:

(a) Meet with an instructor in a school building for any amount of time on a regular or irregular basis, but at least five times per school year; or

(b) Participate in sports or other activities through a school-sponsored program at least five times per school year.

(3) Students in residential, correctional, or treatment programs that receive educational instruction are subject to these rules.

(4) For facilities providing drop-in child care, a child may attend on up to four different days without a Certificate of Immunization Status on file. Before allowing attendance on the fifth visit, a Certificate of Immunization Status must be provided showing at least one dose of each required vaccine or an appropriately signed exemption.

333-050-0040
Statements (Records) Required

(1) The statement initially documenting evidence of immunization, immunity or exemption under ORS 433.267(1)(a) through (c) must be on a Certificate of Immunization Status form or a form approved by the Public Health Division and include one or more of the following:

(a) Evidence of immunization signed by the parent, health care practitioner or an authorized representative of the local health department;

(b) A written statement of medical exemption signed by a physician or authorized representative of the local health department and approved by an authorized representative of the local health department;

(c) A written statement of immunity documentation approved by an authorized representative of the local health department;

(d) A written statement of nonmedical exemption signed by the parent, including documentation of completion of a vaccine educational module approved by the Public Health Division or signature of a health care practitioner verifying that the risks and benefits of immunizations have been discussed with the parent; or

(e) A written statement of disease history (immunity documentation) for varicella signed by a parent, physician or authorized representative of the local health department.

(2) If age appropriate, required for the child's grade level, and the child has not claimed an exemption or immunity documentation, a minimum of one dose each of the following vaccines must be received for new enterers prior to attendance: Polio, Measles, Mumps, Rubella, Hepatitis B, Hepatitis A, Varicella, Haemophilus influenzae Type b vaccine and Diphtheria/Tetanus/Pertussis containing vaccine. (See Primary Review Table); [Table not included. See ED. NOTE.]

(3) Evidence of immunization shall include the month, day and year of each dose of each vaccine received and must be appropriately signed and dated to indicate verification by the signer.

(a) If evidence of immunization includes the month and year, but the day of the dose is not provided, the administrator shall attempt to get the day of immunization from the parent, the ALERT Immunization Information System or another source. If no day is obtainable, the administrator may use the last day of the month to assess the immunization status for the child.

(b) Pre-signed Certificate of Immunization Status forms without vaccine dates are not allowed.

(c) If a Certificate of Immunization Status form is signed but not dated, the person who receives the form at the school or facility may date the form with the date it was received.

(4) The school or facility may choose to complete or update a Certificate of Immunization Status form, by transcribing dates from, attaching and referencing on the form, one or more of the following records listed in subsections (a) through (f) of this section.

(a) A health care practitioner documented immunization record;

(b) An unsigned record on health care practitioner or clinic letterhead;

(c) An unsigned record printout from the statewide immunization information system, ALERT IIS. ALERT IIS records may be placed in the student's file without transcription onto a Certificate of Immunization Status as long as the printout represents a complete or up-to-date immunization history. If the ALERT IIS record is an update to the Certificate of Immunization Status, it may be attached to the original certificate without transcription;

(d) An unsigned record printout from a computer system approved by the Public Health Division as specified in OAR 333-050-0060(5). Record printouts for Public Health Division-approved computer systems may be placed in the student's file without transcription onto a Certificate of Immunization Status as long as the

printout represents a complete or up-to-date immunization history, and includes a history of chickenpox disease if present;

(e) A written statement signed and dated by the parent; or

(f) A statement electronically mailed by the parent.

(5) The Certificate of Immunization Status form must be signed and dated by the person transcribing the information.

(6) When a transferring student enters an Oregon school, the receiving school will attempt to obtain immunization records from the previous school. If immunization records are not immediately available, the receiving school may, according to school policy, allow the student to enroll conditionally. If immunization records are not received, the school will include the student on the Primary Review Summary report.

(7) If the student transfers to a new school district, except when the move is due to the normal progression of grade levels, such as to a junior high or senior high from a feeder school, the receiving school shall ensure that the transferred records are on a signed Certificate of Immunization Status form or another Public Health Division-approved form. The original transferred records that are not on an approved form shall be attached to a Certificate of Immunization Status form and the form shall be marked with a reference to the attached records, signed, and dated by the person transcribing the information on the form.

(8) The records relating to the immunization status of children in schools shall be transferred to the receiving schools pursuant to ORS 326.575(2) within 30 days.

(9) When a new enterer is admitted in error to a school or facility without an immunization history, immunity documentation or appropriately signed exemption, the school or facility may contact the local health department to request that an Exclusion Order for No Record be issued, or include the student on the Primary Review Summary report.

(10) When a child is determined by the facility, school or school district to be homeless and does not have a completed Certificate of Immunization Status on file with the school, the student will be allowed to enroll conditionally.

(a) If immunization records are not received the school will include the student on the Primary Review Summary report or contact the local health department to request that an Exclusion Order for No Record be issued with an exclusion date of not less than 30 days after initial attendance.

(b) School staff shall make every effort to help the family compile an immunization record for the student, including requesting a record from a previous school, ALERT IIS or a previous medical provider.

(11) Where a child attends both a facility and a school, the school is responsible for reporting and for enforcing these rules in accordance with the school and facility vaccine requirements. However, because of the need for outbreak control when school is not in session, the facility administrator will be responsible for requesting that the parent also provide an up-to-date Certificate of Immunization Status to the facility. If the parent does not comply, the facility administrator shall inform the parent that in the event of a case of vaccine preventable disease the child may be excluded until it is determined that the child is not susceptible or the local health authority has determined that the risk of exposure within the school or facility has passed.

(12) Evidence of nonmedical exemption must include documentation that the parent has completed a vaccine educational module approved by the Public Health Division or signature from a health care practitioner verifying that risks and benefits of immunization have been discussed with the parent. Information provided must be consistent with information published by the Centers for Disease Control and Prevention, including epidemiology, the prevention of disease through use of vaccination, and the safety and efficacy of vaccines.

(a) The Public Health Division will make available to parents a no-cost internet based vaccine educational module.

(A) Criteria for the vaccine educational module must include:

(i) Information consistent with information published by the Centers for Disease Control and Prevention;

(ii) Information about the benefits and risks of each vaccine for which a parent is claiming a nonmedical exemption;

(iii) Information about the epidemiology, prevention of disease through use of vaccination, and the safety and efficacy of vaccines; and

(B) A person who wishes to have a vaccine educational module approved by the Oregon Health Authority shall submit the module to the medical director of the Public Health Division, Immunization Program. For approval, the vaccine educational module must contain the substantive content of the internet based vaccine educational module made available by the Public Health Division. The medical director must review the module to determine if it meets the criteria in these rules including the requirement that a vaccine educational module present information that is consistent with information published by the Centers for Disease Control and Prevention. Approval or disapproval shall be made in writing. If the module is disapproved the medical director must explain the reasons for disapproval.

(C) An official certification receipt to provide documentation of completion of the vaccine educational module must be in a form approved by the Public Health Division, Immunization Program.

(b) A health care practitioner may discuss with the parent the risks and benefits of immunization and provide documentation for the parent to claim a nonmedical exemption.

(A) The information provided by the health care practitioner must contain the substantive content of Internet based vaccine educational module made available by the Public Health Division. The content may be adjusted to meet individual parents' concerns.

(B) The health care practitioner will provide documentation to parents on a form prescribed by the Public Health Division that the practitioner has provided vaccine information to the parent.

(c) Parents claiming a nonmedical exemption must provide documentation of completion of a vaccine educational module or a signed document from a health care practitioner to the administrator.

(d) The administrator must keep a copy of the documentation of nonmedical exemption with the child's Certificate of Immunization Status.

(13) The evidence of nonmedical exemption from a health care practitioner or the viewing of the educational module must:

(a) Have occurred within 12 months of the parent signing of the nonmedical exemption; and

(b) Specify the vaccines about which information about the benefits and risks has been provided and for which a nonmedical exemption may be claimed for the child.

(14) When a child reaches the age of medical consent in Oregon, 15 years of age, the child may sign his or her own Certificate of Immunization Status and complete the process for obtaining a nonmedical exemption.

333-050-0050
Immunization Requirements

(1) For purposes of this section, immunization against the following diseases means receipt of any vaccine licensed by the United States Food and Drug Administration (or the foreign equivalent) for the prevention of that disease.

(2) For purposes of ORS 433.267(1), immunizations are required as follows (see Primary Review Table to determine the number of required doses for a child's age or grade):

(a) Diphtheria/Tetanus/Pertussis containing vaccine (DTaP) — Five doses must be received unless:

(A) The fourth dose was given at, within four days prior to or after the fourth birthday, in which case the child is complete with four doses; or

(B) The third dose of Diphtheria/Tetanus containing vaccine was received at, within four days prior to or after the seventh birthday, in which case the child is complete with three doses.

(b) Polio — Four doses must be received unless:

(A) The third dose was given at, within four days prior to or after the fourth birthday, in which case the child is complete with three doses of polio vaccine; or

(B) The student is 18 years of age or older. Polio vaccination at or after the 18th birthday is not required.

(c) Measles — Two doses must be received at or after 12 months of age. Vaccine doses given four days or fewer before 12 months of age are acceptable. The second dose must be received at least 24 days after first dose.

(d) Rubella — One dose must be received at or after 12 months of age. Vaccine doses given four days or fewer before 12 months of age are acceptable.

(e) Mumps — One dose must be received at or after 12 months of age. Vaccine doses given four days or fewer before 12 months of age are acceptable.

(f) Haemophilus influenzae Type b (Hib) — Up to four doses depending on the child's current age and when previous doses were administered.

(g) Hepatitis B — Up to three doses must be received. If the first dose was received at or after 11 years of age and the second dose is received at least four months after dose one, the child is complete with two doses. Vaccine doses given four days or fewer before the 11th birthday are acceptable.

(h) Varicella — Up to two doses must be received, depending on the child's age when the first dose was administered. The first dose must be received at or after 12 months of age. Vaccine doses given four days or fewer before 12 months of age are acceptable. Second dose, if required, must be received at least 24 days after first dose.

(i) Hepatitis A — Two doses must be received at or after 12 months of age. Vaccine doses given four days or fewer before 12 months of age are acceptable. Beginning school year 2008–2009, the requirement for Hepatitis A vaccine will be phased in by grade. (See Primary Review Table.) [Table not included. See ED. NOTE.]

(j) Tetanus/Diphtheria/Pertussis booster (Tdap) — One dose must be received at or after seven years of age, unless the last Diphtheria/Tetanus containing vaccine was given less than five years ago.

(3) Interrupted series: If there is a lapse of time between doses longer than that recommended by the standard described in OAR 333-050-0120, the schedule should not be restarted. Immunization may resume with the next dose in the series.

(4) A child shall not be excluded from school for failing to receive a required vaccine if the State Health Officer has determined that there is a vaccine shortage and that is the reason the child has not received the vaccine. Any vaccine that has been waived due to a vaccine shortage will be required at the next review cycle, once the shortage has been lifted. The Public Health Division shall notify local health departments, schools and facilities of any shortages that affect their procedures under these rules.

(5) The local public health officer, after consultation with the Public Health Division, may allow a child to attend a school or facility without meeting the minimum immunization requirements in case of temporary local vaccine shortage.

(a) The local health department shall provide a letter signed by the local health officer to the parent of the affected student detailing which vaccines the student is being exempted from. The letter must state that the student will receive an Exclusion Order if the student's record is not updated with the missing doses prior to the next exclusion cycle.

(b) A copy of the letter must be attached to the student's Certificate of Immunization Status on file at the school or facility.

(c) A photocopied form letter signed by the local health officer may be used by the local health department when the shortage is expected to affect more than one child.

(d) If the vaccine is still unavailable at the next exclusion cycle, the local health department, with the agreement of the Public Health Division, will not issue Exclusion Orders for the unavailable vaccine.

(6) The following immunity documentation satisfies the immunization requirements for the specified vaccines:

(a) Immunity documentation for Measles, Mumps or Rubella vaccination due to a disease history may be certified by a physician or an authorized representative of the local health department for a child who has immunity based on a health care practitioner's diagnosis;

(b) Immunity documentation for Measles, Mumps or Rubella vaccination due to a documented immune titer may be certified by a physician or an authorized representative of the local health department;

(c) Immunity documentation for Hib vaccination may be certified by a physician or authorized representative of the local health department for a child who experienced invasive Haemophilus influenzae Type b disease at 24 months of age or older;

(d) Immunity documentation for Varicella vaccine may be signed by the parent for history of varicella. The date of the disease is not required. This immunity documentation will be automatically authorized by the local health department.

(e) Immunity documentation for Varicella based on laboratory confirmation of immunity may be certified by a physician or authorized representative of the local health department;

(f) Immunity documentation for Hepatitis B vaccination based on laboratory confirmation of immunity or confirmation of carrier status may be certified by a physician or authorized representative of the local health department; and

(g) Immunity documentation for Hepatitis A vaccination based on laboratory confirmation of immunity may be certified by a physician or authorized representative of the local health department.

(7) Children possessing the following medical exemptions are susceptible to the diseases for which they are exempt from vaccination:

(a) Exemption for Measles, Mumps, Rubella or Varicella vaccination may be certified by a physician or an authorized representative of the local health department for a post-pubertal female when she is currently pregnant or there is a significant risk of her becoming pregnant within one month; and

(b) Exemption for one or more immunizations shall be established by a diagnosis based on a specific medical contraindication certified in a letter from the physician or an authorized representative of the local health department. The vaccines, medical diagnosis, practitioner's name, address and phone number must be documented and attached to the record.

(8) Exemptions and immunity documentation submitted to the school or facility must be in English.

(9) A child may attend a school or facility under ORS 433.267(1) if the child is up-to-date and remains up-to-date and in compliance with immunization schedules for spacing between doses presented in OAR 333-050-0120.

(10) If evidence is presented to the local health department that an Exclusion Order was issued in error because a vaccine was given within the four-day grace period recommended by the Advisory Committee on Immunization Practices as published in the General Recommendations on Immunization, the local health department shall rescind the Exclusion Order. The local health department shall notify the child's school or facility when an Exclusion Order is rescinded.

(11) In situations where a child's vaccine history presents an unusual problem not covered by these rules, the local health department may use its judgment to make a final determination of the child's immunization status.

(12) A nonmedical exemption from immunization requirement is allowed for one or more of the vaccines. Parents claiming a non-

medical exemption must select which vaccines a child is being exempted from by checking the appropriate boxes on the Certificate of Immunization Status and submit the Certificate of Immunization status and the documentation specified in OAR 333-050-0040(12)(a)(C) or 333-050-0040(12)(b)(B) to the school or facility.

333-050-0060
Primary Review of Records

(1) At least annually the administrator will conduct a primary review of each child's record to determine the appropriate category of each child. This review shall be completed no later than 35 calendar days prior to the third Wednesday in February unless otherwise approved in writing first by the local health department and then by the Public Health Division.

(2) The administrator shall categorize all children as follows:

(a) "Complete or Up-to-Date";

(b) "Nonmedical Exemption": This category applies to any child whose incomplete immunizations are covered by a nonmedical exemption;

(c) "Permanent Medical Exemption": This category applies to any child who is susceptible as evidenced by a medical exemption statement on file as specified by OAR 333-050-0050(6), whose medical exemption statement has been reviewed by the local health department and has been determined to be based on a contraindication that is permanent;

(d) "Temporary Medical Exemption": This category applies to any child who is susceptible as evidenced by a medical exemption statement on file as specified by OAR 333-050-0050(7), whose medical exemption statement has not been reviewed by the local health department, or whose medical exemption is not permanent;

(e) "Incomplete/Insufficient";

(f) "No Record": This category applies to any child with no record on file at the school or facility. This category also applies to any child with a nonmedical exemption signed on or after August 1, 2008 with no vaccines selected for nonmedical exemption and with no vaccine dates;

(g) "Children not to be counted": School age children also attending a facility should be counted by the school. Children enrolled in a school but physically attending another school should be counted by the school they physically attend. Children attending a preschool or Head Start program and another facility should be counted by the preschool or Head Start program. Children physically attending more than one child care facility or school should be counted by the facility or school where they attend the most hours.

(3) Thirty-five calendar days prior to the third Wednesday in February, unless otherwise approved in writing first by the local health department and then by the Public Health Division, the administrator shall provide to the local health department for secondary review:

(a) Organized alphabetically within category, copies of records or a computer printout of the records for all children with incomplete immunizations or insufficient information;

(b) Copies of records of children with a medical exemption, except those records that have been certified by the local health department as having a permanent medical exemption or immunity documentation and are otherwise complete with no further review required.

(c) A completed Primary Review Summary form that includes an alphabetical list for each category and includes children with no record. The form must include each child's name, current grade level, parent names and current mailing address. A computer-generated list from a system currently approved by the Public Health Division may be submitted in lieu of the Primary Review Summary form.

(4) The administrator shall review the completed Primary Review Summary form for mathematical accuracy and correct any errors before forwarding the completed Primary Review Summary form to the local health department.

(5) All copies of records provided to the local health department for secondary review must contain at least the following: The child's name, date of birth, and evidence of immunization or exemption. A copy of the records or a computer printout of the records must be used in place of the original record.

(a) Computer printouts and the results from computer-generated immunization assessments (computer outputs) must have the prior approval of the Public Health Division. To receive approval to be used for the primary review report in January, computer printouts and computer outputs must be received by the Public Health Division no later than the last working day of November in the year prior to the year in which the primary review reports are due.

(b) The Public Health Division will review computer printouts and computer outputs for essential data elements, the sequence of data elements, and specific test results as calculated by the computerized system.

(c) Provisional approval will be given to a computer tracking system after correct assessment has been confirmed for test data and essential data elements in required reports. Computer tracking systems with provisional approval will be reviewed after use during the annual review and exclusion cycle. Final approval will be given after any programming errors identified during the cycle have been corrected by the tracking system and additional reports have been approved by the Public Health Division.

(d) The Public Health Division also reserves the right to withdraw computer system approval.

(e) When ORS 433.235 through 433.284 or these rules are amended, computer systems must be updated within 120 calendar days. The Public Health Division will then allow 60 calendar days for review, needed changes and final approval. Computer outputs that are not in compliance will not be authorized for use during the annual review and exclusion cycle.

(6) Additional review cycles for incomplete or insufficient records with specific time-frames are allowable if:

(a) Mutually agreed upon by the affected local health department and school or facility.

(b) Additional exclusion cycles may be required at the direction of the local health department or the Public Health Division. Exclusion dates shall be no less than 14 calendar days from the date that the Exclusion Orders are mailed.

(7) It is the responsibility of the administrator to see that primary review of immunization records is accomplished according to these rules. All or part of the actual review may be delegated by mutual agreement of parties affected to a third party subject to this requirement.

Hist.: HD 21-1981, f. & ef. 10-21-81; HD 17-1982, f. & ef. 8-13-82; HD 12-1983, f. & ef. 8-1-83; HD 8-1987, f. & ef. 7-15-87; HD 6-1991, f. & cert. ef. 5-15-91; HD 9-1992, f. & cert. ef. 8-14-92; HD 16-1997, f. & cert. ef. 12-3-97; OHD 14-2001, f. & cert. ef. 7-12-01, Renumbered from 333-019-0040; OHD 26-2001, f. & cert. ef. 12-4-01; OHD 21-2002, f. & cert. ef. 12-13-02; PH 35-2004(Temp), f. & cert. ef. 11-10-04 thru 5-6-05; PH 2-2005, f. & cert. ef. 2-3-05; PH 1-2006, f. & cert. ef. 1-27-06; PH 12-2007, f. & cert .ef. 9-27-07; PH 6-2008, f. & cert. ef. 3-17-08; PH 24-2010, f. & cert. ef. 9-30-10; PH 3-2014, f. 1-30-14, cert. ef. 3-1-14

333-050-0070
Secondary Review of Records

(1) The local health department shall conduct a secondary review of those records received from the administrator. The

review shall begin 35 calendar days prior to the third Wednesday in February, unless otherwise approved by the Public Health Division.

(2) In conducting secondary review of the records, the local health department shall review the Primary Review Summary for mathematical accuracy. Any errors should be corrected by contacting the affected school or facility. The local health department shall review each child's record that was received for appropriate medical or nonmedical exemptions and then use the Primary Review Table to determine each child's current immunization status for each of the required vaccines.

(3) The local health department shall indicate on the Primary Review Summary form those children whose records are judged to be:

(a) Complete/Up-to-date; or

(b) Medically exempt, and whether temporary or permanent.

(4) The local health department shall indicate on the Primary Review Summary form the specific vaccines that the exclusion order will need to be issued for children whose records are judged to be:

(a) Incomplete/Insufficient; or

(b) No record.

(5) In the event that any of the above records are original documents, the local health department shall return such records to the administrator.

(6) The local health department shall submit an updated copy of the Primary Review Summary form to the administrator.

(7) The local health department shall initiate exclusion procedures for those children whose records are judged to have insufficient information or incomplete immunizations, or who have no record, in accordance with OAR 333-050-0080.

(8) Additional secondary review cycles with specific time frames are allowable for incomplete or insufficient records as mutually agreed upon in writing by the affected local health department and school or facility. Exclusion dates shall be no less than 14 calendar days from the date that the Exclusion Orders were mailed.

(9) It is the responsibility of the local health department to see that secondary review of immunization records is accomplished according to these rules. All or part of the actual review may be delegated by mutual agreement of parties affected to a third party subject to this requirement.

333-050-0080
Exclusion

(1) The date of exclusion shall be the third Wednesday in February.

(a) If additional exclusion cycles are conducted, the exclusion dates shall be set at no less than 14 calendar days from the date that the Exclusion Orders are mailed.

(b) Exclusion occurs when records have not been received or updated by the starting time of the school or facility on the specified exclusion day.

(2) The local health department shall use an Exclusion Order for Incomplete Immunization or Insufficient Information or an Exclusion Order for No Record depending upon the reason the child is found to be in non-compliance with ORS 433.267(1) and these rules:

(a) At least 14 days before the exclusion day, the local health department shall mail by first class mail an appropriately completed and signed order of exclusion to the parent of each child determined to be out of compliance with these rules.

(b) If a student is listed by the school as the "person responsible," the Exclusion Order will be sent to the student.

(c) In the event that the local health department has knowledge that the address of the parent provided on the Primary Review Summary form is incorrect, the local health department shall use all reasonable means to notify the parent, including inquiries to the school or facility administrator, to establish the appropriate mailing address and sending home from the school a copy of the Exclusion Order with the child.

(d) For all orders issued, one copy of the Exclusion Order shall be sent to the administrator and the local health department shall retain one copy. The local health department shall also retain copies of the records of children to be excluded until notification from the school or facility that such children are in compliance, or for one year.

(3) On the specified date of exclusion, the administrator shall exclude from school or facility attendance all children so ordered by the local health department until the requirements specified by the local health department are verified by the administrator in accordance with section (9) of this rule.

(4) The local health department shall maintain copies of immunization records of children excluded and shall maintain contact with administrators regarding the status of such children.

(5) If children whose records are not updated on the specified exclusion day arrive at their school or facility, the administrator shall make every effort to contact their parent by phone. The administrator shall place excluded children in a space away from the other children until their parent arrives to pick them up or until they are returned home by regular school district transportation.

(6) If the excluded children do not meet the requirements specified by the local health department in accordance with section (9) of this rule and do not return to school within four school days, it is the responsibility of the public school administrator, as proper authority, to notify the attendance supervisor of the unexcused absence. The attendance supervisor is required to proceed as required in ORS 339.080 and 339.090.

(7) Children who have been issued an Exclusion Order are not entitled to begin or continue in attendance in any school or facility in Oregon while the Exclusion Order is still in effect. Administrators who receive or are otherwise made aware of the records of a child from another school or facility containing an Exclusion Order that has not been cancelled shall notify the parent and immediately exclude the child until the requirements specified on the Exclusion Order are met and verified by the administrator.

(8) Students in treatment facilities or court-mandated residential correctional facilities, including but not limited to Oregon Youth Authority closed custody sites, are not subject to exclusion. The administrator of such treatment or residential correctional facilities must comply with all other provisions of these rules, including submission of the required reports as specified by these rules. The administrator must ensure that students have complete or up-to-date immunization records, a medical or nonmedical exemption or immunity documentation for all vaccines required for the student's grade.

(9) Compliance:

(a) For children excluded for insufficient information or incomplete immunizations, compliance will be achieved by submitting to the administrator one of the statements allowed in OAR 333-050-0040(1);

(b) For children excluded for no record, compliance will be achieved by submitting to the administrator evidence of immunizations that includes at least one dose of each vaccine required for that grade or age, a medical or nonmedical exemption or immunity documentation.

(c) When the administrator verifies that the required information has been provided or that an appropriate immunity documentation or medical or nonmedical exemption has been provided, the child shall be in compliance with ORS 433.267(1) and these rules and qualified for school or facility attendance.

(10) Twelve calendar days after the mandatory exclusion date, the administrator shall ensure that:

(a) The Primary Review Summary form returned from the local health department is updated by appropriately marking the

current status of each child as specified (including children listed as having no record);

(b) The mathematics on the Primary Review Summary form are accurate including the number of children in the full school or children's facility, kindergarten and seventh grade with:

(A) The specified number of doses of each vaccine or all the doses required for the child's grade;

(B) Nonmedical exemptions for each vaccine;

(C) Nonmedical exemptions from each source, whether documentation from a health care practitioner or vaccine educational module;

(D) Nonmedical exemptions;

(E) Medical exemptions; and

(F) No record.

(c) A copy of the revised Primary Review Summary form is submitted to the local health department on that day. The administrator shall maintain a file copy of the updated Primary Review Summary form.

(11) The local health department shall review the updated Primary Review Summary form for mathematical accuracy. Any errors should be corrected by contacting the affected school or facility.

Review of Exclusion Orders

(1) If a parent believes an Exclusion Order is in error, the parent shall contact the local health department and request that the local health department review and re-check the information to determine the accuracy of the Exclusion Order.

(2) A local health department shall review and re-check a child's immunization records upon receipt of a request by a parent.

(3) If the Exclusion Order is found by the local health department to be in error, or if compliance is achieved pursuant to OAR 333-050-0080(9), the Exclusion Order shall be rescinded.

School/Facility Compliance

(1) In the event that a school or facility fails to comply with these rules, the local health department shall make a verbal, documented contact with the non-compliant school or facility that covers:

(a) The specific requirements of the state's immunization law and rules; and

(b) Establishes a four-working-day time frame for the school or facility administrator to comply.

(2) If the school or facility still fails to comply, the local health department shall notify the Public Health Division of the name and address of the school or facility.

(3) The local health department shall send to the Public Health Division, via mail, electronic mail or facsimile, documentation of contacts made with the non-compliant school or facility.

(4) Within five working days of notification by the local health department, the Public Health Division shall send a certified letter to the non-compliant school or facility that:

(a) Notifies the school or facility that it is out of compliance and how it is out of compliance with the immunization law and rules;

(b) Establishes seven calendar days to comply before the matter is referred to the Attorney General's office; and

(c) Notifies the school or facility that a civil penalty may be imposed if the school or facility does not comply within seven calendar days.

(5) The Public Health Division shall send copies of the letter to the Child Care Division of the Employment Department, the Department of Education and/or the school district superintendent as appropriate.

(6) The Public Health Division shall notify the local health department of the new due date for compliance.

(7) If the school or facility does not comply by the new due date, the local health department shall notify the Public Health Division.

(8) The Public Health Division may impose a civil penalty on a school or facility that does not comply with the immunization law or rules after a notification of non-compliance. Civil penalties will be imposed as follows:

(a) One day late in complying: $100;

(b) Two days late in complying: $200;

(c) Three days late in complying: $300;

(d) Four days late in complying: $400;

(e) Five days or more late in complying: $500 per day until there is compliance.

(9) A notice of imposition of civil penalties shall comply with ORS 183.745.

(10) The Public Health Division shall forward all documentation of contacts to the Attorney General's office for action if the school or facility does not comply by the new date.

333-050-0100
Follow Up

(1) In the event that the local health department receives records that are original documents from a school or facility, the local health department shall return such records to the administrator.

(2) The administrator shall be responsible for updating records each time the parents, health care practitioner, or an authorized representative of the local health department provides evidence of immunization or exemption for each child.

(3) Information on disease restrictions for schools and facilities can be found in OAR 333-019-0010 and 333-019-0014. When there is a case of restrictable disease, the parent of a susceptible child must be notified verbally or in writing by the local health department, school or children's facility administrator or designee when the child is to be excluded and for how long the exclusion will occur.

(4) The administrator shall maintain a system to track and report susceptible persons. The local health department may request that the list of persons susceptible to a disease be sorted by classroom, grade, or school. The administrator will provide the list within one calendar day of the local health department's request in order to facilitate appropriate disease control measures.

(5) The local health department or the Public Health Division may conduct school or facility record validation surveys to ensure compliance with ORS 433.235 through 433.280 and these rules.

(6) The local health department may issue Exclusion Orders as needed for compliance with these rules during the validation survey process.

(7) The Public Health Division may issue Exclusion Orders when the Public Health Division is the recognized Public Health Authority in the county.

333-050-0110
Annual Reporting Requirements

(1) The local health department shall submit a County Immunization Status Report to the Public Health Division annually no later than 23 calendar days after the third Wednesday in February.

(2) On or before the last day of April, the Public Health Division shall publicize a summary of the immunization status of children in schools, children's facilities, kindergarten and seventh grade attending schools and facilities for each local public health jurisdiction.

(3) On or before May 15, the local health department shall make available immunization rates to each school and children's facility in the area served by the local health department, by disease, of children in the local area:

(a) Compiled from school reports for kindergarten through 12th grade combined; and

(b) Calculated from ALERT IIS for children 19 months up to kindergarten age.

(4) The local health department may request assistance from the Oregon Health Authority in calculating the rates described in section (3) of this rule.

(5) The administrator of the school or children's facility must make available a summary of the immunization status, for the school or children's facility and local area, by 30 days after the first day of school and by 30 days after the third Wednesday in February.

(a) The summary of immunization status for the school or children's facility must include:

(A) The percentage of children with all the doses required for each child's age or grade, by vaccine, for the school or children's facility and for the local area;

(B) The percentage of children with nonmedical exemptions by vaccine for the school or children's facility;

(C) The percentage of children with no record for the school or children's facility;

(D) The percentage of children with medical exemptions for one or more vaccine for the school or children's facility;

(E) The number of children for whom documentation of immunization status is required at the school or children's facility;

(F) The number of enrolled children for whom documentation of immunization status is not required at the school or children's facility;

(G) The number of children 18 months of age and younger in attendance at the school or children's facility who are not required to have completed the full series of vaccines required before kindergarten because of their age.

(b) Rates must be made available:

(A) In the main office;

(B) On the school or children's facility website, if available. Rates may be posted on a social media website, such as Facebook, if this is the primary website for the school or children's facility. Public school rates must also be made available on the district website. If individual school webpages are linked to a district website, a central district webpage containing the required information for each school may be used to comply with this requirement; and

(C) By sending to a parent of each child for whom documentation of immunization status is required at the school or children's facility, in electronic or paper format, in a clear and easy to understand manner.

(c) Children's facilities shall make rates available based on the school calendar in the local area.

(d) Rates may include immunization data collected in the previous school year.

(6) Schools and children's facilities for which immunization records are required for fewer than 10 children in attendance 18 months of age up to kindergarten are exempt from the requirements of OAR 333-050-0110(5) for these children. These sites must still comply with the reporting requirements specified in OAR 333-050-0060 and 333-050-0080.

(7) Schools and children's facilities for which immunization records for a vaccine are required for fewer than 10 students in attendance in kindergarten grade and older are exempt from the requirements of OAR 333-050-0110(5) for that vaccine for these students. These sites must still comply with the reporting requirements specified in OAR 333-050-0060 and 333-050-0080.

333-050-0130
Second Dose Measles in Post Secondary Educational Institution

(1) Each post-secondary education institution, except a community college and a private, proprietary vocational school, shall require that each entering full-time student born on or after January 1, 1957, has two doses of measles vaccine prior to the student's second quarter or semester of enrollment on an Oregon campus, using procedures developed by the institution.

(2) For students subject to section (1) of this rule who are attending the institution pursuant to a non-immigrant visa, documentation of measles vaccination must be provided prior to the student attending classes. If the student's first dose of measles vaccine was received less than 30 days prior to attendance, the student has until the beginning of the second term or semester to provide documentation of the second dose.

(3) The following records may be accepted as adequate proof of two doses of measles vaccine:

(a) Written documentation by student, health care practitioner, or an authorized representative of the local health department of the month, day and year of each dose, within four days prior to, on or after the first birthday, with a minimum of 24 days between the first and second dose;

(b) For students born prior to 1984, no available date for the first dose but written documentation by student, health care practitioner, or an authorized representative of the local health department of the month, day and year of the second dose in or after December, 1989;

(c) An unsigned record printout from the statewide immunization information system, ALERT IIS; or

(d) An unsigned record printout from a computer system approved by the Public Health Division as specified in OAR 333-050-0060(5).

(4) Each post-secondary education institution under the jurisdiction of the law shall include a medical and nonmedical exemption and immunity documentation. Signing for a nonmedical exemption requires documentation of a signature of a health care practitioner that the practitioner has reviewed with the student the risks and benefits of immunization or a certificate verifying that the student has completed a vaccine educational module approved by the Public Health Division.

(5) Each post-secondary educational institution under the jurisdiction of the law shall develop procedures to implement and maintain this requirement.

(6) The Public Health Division may conduct validation surveys to ensure compliance.
