#### **Independent Auditor's Report**

State Land Board
Oregon Department of State Lands
Salem, Oregon

#### **Report on the Financial Statements**

We have audited the accompanying financial statements of the Common School Fund, a major governmental fund of the State of Oregon, which comprise the balance sheet as of June 30, 2021, and the related statement of revenues, expenditures, and changes in fund balances for the year then ended, and the related notes to the financial statements.

#### **Management's Responsibility for the Financial Statements**

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

#### **Auditor's Responsibility**

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

#### **Opinion**

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the Common School Fund, as of June 30, 2021, and the changes in its financial position for the year then ended in accordance with accounting principles generally accepted in the United States of America.

#### **Emphasis of Matter**

As discussed in Note 1, the financial statements of the Common School Fund are intended to present the financial position, and the changes in financial position, of only the position of the Oregon Department of State Lands that is attributable to the transactions of the Common School Fund. They do not purport to, and do not, present fairly the financial position of the State of Oregon or Department of State Lands as of June 30, 2021, and the changes in their financial position for the year then ended in accordance with accounting principles generally accepted in the Unites States of America. Our opinion is not modified with respect to this matter.

#### Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued a report dated November 10, 2021 on our consideration of the Common School Fund's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, grant agreements, and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the Common School Fund's internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the Common School Fund's internal control over financial reporting and compliance.

The notes to the financial statements are an integral part of this statement.

#### NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accompanying financial statements of the Oregon Department of State Lands' Common School Fund have been prepared in conformity with generally accepted accounting principles as prescribed by the Governmental Accounting Standards Board (GASB), and the American Institute of Certified Public Accountants (AICPA).

#### A - THE REPORTING ENTITY

The Department of State Lands (Department) is the administrative agency of the State Land Board handling the day-to-day work of the board in managing the land and other resources dedicated to the Common School Fund. The State Land Board, which consists of the Governor, the Secretary of State, and the State Treasurer, is the trustee of the fund as outlined in the Oregon Constitution.

The Common School Fund, a governmental fund, was established at statehood and is intended to generate earnings to distribute to public schools. The Common School Fund accounts for programs that manage state-owned land, including a leasing program that generates annual revenues, for the benefit of the public school system. Estate funds that become the property of the state, unclaimed property, and income derived from unclaimed property are also accounted for in this fund. Statutory and constitutional provisions stipulate that the assets of the fund, including investment income, must be used for common school purposes. The primary funding sources for these programs include investment income, leasing revenues, forest management, unclaimed property receipts, and transfers from other funds.

#### **B - FUND FINANCIAL STATEMENTS**

The fund financial statements consist of a balance sheet and a statement of revenues, expenditures, and changes in fund balances. The statement of revenues, expenditures, and changes in fund balances reports revenues by type and expenditures by natural classification. Other financing sources and other financing uses are reported in the last section of the statement.

#### C - MEASUREMENT FOCUS, BASIS OF ACCOUNTING, AND FINANCIAL STATEMENT PRESENTATION

The Common School Fund financial statements are reported using the current financial resources measurement focus and the modified accrual basis of accounting. Revenues are recognized when they are both measurable and available. Revenues are considered to be available when they are collectible within the current year or soon enough thereafter to pay liabilities existing at the end of the year. For this purpose, revenues are considered available if they are collected within 90 days of the end of the current fiscal year. Expenditures generally are recognized when a liability is incurred, as under accrual accounting. Information for receivables not expected to be collected within one year of the date of the financial statements and payables reported in the financial statements is discussed in Note 4.

#### **D – DEPOSITS AND INVESTMENTS**

#### **Deposits**

Cash deposits not held in a cash management or investment pool are classified as cash and cash equivalents. Cash deposits that are held in a cash management or investment pool are classified as cash and cash equivalents when the pool has the general characteristics of a demand deposit account. Cash and cash equivalents include: cash on hand, cash and investments held by the Office of the State Treasurer in the Oregon Short-Term Fund (OSTF), cash deposits held in demand deposit accounts with custodial banks, and cash deposits of debt proceeds in investment funds held by a trustee.

June 30, 2021

#### Investments

Investments are reported at fair value except for investments in the OSTF with remaining maturities of up to 90 days are carried at amortized cost, which approximates fair value. The Department reports these investments as cash and cash equivalents on the balance sheet.

Changes in the fair value of investments are recognized as investment income (loss) in the current year.

The fair value of publicly traded debt and equity securities in active markets is determined by the custodian's pricing agent using nationally recognized pricing services. The custodian's pricing agent values equity securities traded on a national or international exchange at the last reported sales price and generally values debt securities by using evaluated bid prices. The fair value of publicly traded real estate investment trust (REIT) securities is determined by the custodian's pricing agent using recognized pricing services and generally reflects the last reported sales price. For investments that do not have an active market, such as private placements or comingled investment vehicles, the value is stated at the net asset value (NAV) of units held, or its equivalent, as reported by the fund manager or general partner.

#### **Derivatives**

In accordance with State investment policies, the Office of the State Treasurer participates in contracts that have derivative characteristics. Derivative instruments are used to hedge against fluctuations in foreign currency rates, and to manage the overall risk of investment portfolios. The fair value of all derivative instruments within the Common School Fund are reported on the balance sheet as investments, accounts and interest receivable, and accounts payable. The change in fair value for all Common School Fund derivative instruments is reported with investment income on the statement of revenues, expenditures, and changes in fund balances.

#### E - RECEIVABLES AND PAYABLES

Activities between funds that are representative of lending/borrowing arrangements outstanding at the end of the fiscal year are referred to as "advances to other funds." Receivables consist of revenues earned or accrued in the current period and are shown net of estimated uncollectable accounts. Payables consist of amounts owed to vendors for operational expenditures, other state agencies for services received and investment liabilities outstanding.

#### F - INTERFUND TRANSACTIONS

Inter-fund transactions are transactions between the Common School Fund and other funds included in the Oregon Annual Comprehensive Financial Report. Inter-fund balances (due to/from other funds and advances to/from other funds) result from the time lag between the dates that (1) inter-fund goods and services are provided or reimbursable expenditures/expenses occur, (2) transactions are recorded in the accounting system, and (3) payments between funds are made. Advances to/from other funds are not expected to be repaid within one year. See Note 7 for more in inter-fund transactions.

#### **G - RESTRICTED ASSETS**

Restricted cash and cash equivalents and restricted investments are held in trust for third parties in the Unclaimed Property Program.

#### **H - FUND EQUITY**

The difference between assets and liabilities plus deferred inflows of resources is labeled "Fund Balance" on the fund financial statements. Fund balance is reported in five components: (1) Non-spendable, (2) Restricted, (3) Committed, (4) Assigned, and (5) Unassigned.

Restricted fund balances are the result of constraints imposed by the law through constitutional provisions or enabling legislation or by parties outside the State, such as creditors, grantors, contributors, or laws or regulations of other governments. Common School Fund balances are all restricted.

For fund balance classification purposes, the Department determines the appropriate classification of each of their detail-level funds based on the resources accounted for in those funds and the constraints on spending those resources. The Department expends resources from the appropriate fund based on each fund's specific spending constraints. Ending fund balances, therefore, are the result of that spending.

#### **NOTE 2 - DEPOSITS AND INVESTMENTS**

#### Common School Fund Investment Portfolio held at Treasury

Investments of the Common School Fund held by the State Treasurer (Treasurer) require the exercise of prudent and reasonable care in the context of the Common School Fund's investment portfolio and as part of an overall investment strategy. The Treasurer is required to diversify investments unless it is not prudent to do so. In addition, the Treasurer must exercise reasonable care to incorporate risk and return objectives suitable to the particular investment fund. The Treasurer has a policy and procedure that addresses objectives and strategies for investments of the Common School Fund.

The Common School Fund's investment policies are governed by statute and the Oregon Investment Council (Council). The Treasurer is the investment officer for the Council and is responsible for the funds on deposit with the Oregon State Treasury (Treasury). The Treasurer works with the State Land Board to ensure implementation of the asset allocation policy that meets the business needs of the Common School Fund. The Council does not make asset allocation changes without considering input from the State Land Board. In accordance with Oregon statutes, the investment funds are invested, and the investments of those funds managed, as a prudent investor would do, exercising reasonable care, skill and caution. The Treasurer is authorized to use demand deposit accounts, fixed income investments, and direct equity investment transactions, although the majority of equity investments are directed by external investment managers under contract with the Council. Investments are managed around a 55 percent equity, 25 percent fixed income, 10% real estate, and 10% diversifying strategies (alternative) target with a range of plus or minus 5 percent, as detailed below. The Common School Fund's actual asset allocation is monitored monthly relative to established asset allocation policy targets and ranges. A deviation outside of any of the ranges triggers a review and rebalancing back toward the target asset allocation with due consideration given to the liquidity of the investments and transaction costs. Whenever possible, cash flows into and out of the fund are used to rebalance between asset classes. Cash is held only for business operating purposes.

		Target	
Asset Class	Benchmark	Allocation	Range
Domestic Equities	Russell 3000 Index	22%	20% - 25%

June 30, 2021

#### Common School Fund Participation in the Oregon Short Term Fund Held at Treasury

The Treasurer maintains the Oregon Short-Term Fund (OSTF), a cash and investment pool that is available for use by the Common School Fund. Because the pool operates as a demand deposit account, the Common School Fund portion of the OSTF is classified on the financial statements as cash and cash equivalents. Additional information about the OSTF can be found in the OSTF financial statements at:

http://www.oregon.gov/treasury/Divisions/Investment/Pages/Oregon-Short-Term-Fund-(OSTF).aspx

#### Common School Fund Investments Held Outside Treasury

Statutes govern the placement of investments of the Common School Fund held outside Treasury as part of trust agreements or mandatory asset holdings by regulatory agencies. The Common School Fund investment portfolio includes \$82,931,555 held outside Treasury and is reported as restricted investments on the balance sheet.

#### A - DEPOSITS

#### Custodial Credit Risk for Deposits

The custodial credit risk for deposits is the risk that, in the event of a depository financial institution failure, the Department will not be able to recover deposits or collateral securities that are in the possession of an outside party. The Department does not have a formal policy regarding custodial credit risk for deposits. However, banking regulations and Oregon law establish the insurance and collateral requirements for deposit in the OSTF.

Oregon Revised Statutes (ORS) Chapter 295 governs the collateralization of public funds. Depositories are required to pledge collateral against any public fund deposits in excess of the deposit insurance amounts. This requirement provides additional protection for public funds in the event of a depository loss. ORS Chapter 295 sets the specific value of the collateral, as well as the types of collateral that are acceptable.

ORS Chapter 295 provides the statutory authority for the Public Funds Collateralization Program (PFCP). The Treasury uses an internally developed web application to administer the PFCP and facilitate depository, custodian, and public official compliance with ORS Chapter 295. Under the PFCP, depositories are required to report quarterly to Treasury, providing quarter-end public fund balances in excess of Federal Deposit Insurance Corporation (FDIC) or National Credit Union Administration (NCUA) limits. Depositories are also required to report their net worth and capitalization information. The FDIC or NCUA assigns each bank or credit union a capitalization category quarterly: well capitalized, adequately capitalized, or undercapitalized. Based on this information, the depository's minimum collateral required to be pledged with the custodian and the maximum liability in the pool of all depositories is calculated for the next quarter. The maximum liability is reported to the depository, Treasury, and the custodian.

Barring any exceptions, a depository is required to pledge collateral valued at no less than 10 percent of its last reported uninsured public fund deposits if the depository is well capitalized and as much as 110 percent if the depository is adequately capitalized, undercapitalized, or assigned to pledge 110 percent by Treasury.

There are three exceptions to this calculation, and any exceptions are required to be collateralized at 100 percent

- A depository may not accept public fund deposits from one depositor in excess of the depository's net worth. If the depository has a drop in net worth that takes it out of compliance, the depository is required to post 100 percent collateral on any amount the depositor has in excess of the depository's net worth while working to eliminate that excess.
- A depository may not hold aggregate public funds in excess of a percentage of the depository's net worth based on its capitalization category (100 percent for undercapitalization, 150 percent for adequately capitalized, 200 percent for well capitalized) unless approved for a period of 90 days or less by Treasury.

#### Notes to the Financial Statements

June 30, 2021

 A depository may hold in excess of 30 percent of all aggregate public funds reported by all depositories holding Oregon public funds, only if the excess is collateralized at 100 percent.

Where interest bearing balances within the OSTF exceed the FDIC or NCUA amount of \$250,000 the balances were covered by collateral held in the PFCP.

As of June 30, 2021, \$907,231 in other depository balances of the Common School Fund was held by two investment firms, not covered by the FDIC rules. However, the firms are members of the Securities Investor Protection Corporation (SIPC) which provides protection up to \$500,000, of which \$250,000 applies to cash credit balances. Consequently, \$251,310 was insured by SPIC and \$655,921 was uninsured and held by the counterparty in the Department of State Lands' name.

#### **B - INVESTMENTS**

#### Custodial Credit Risk

Custodial credit risk for investments of the Common School Fund is the risk that, in the event of the failure of the counterparty to a transaction, the State will not be able to recover the value of an investment or collateral securities in the possession of an outside party. The Council has no formal policy regarding the holding of the securities by a custodian or counter party. For the year ended June 30, 2021, no investment holdings of the Common School Fund held at Treasury were exposed to custodial credit risk.

A June 30, 2021, the Common School Fund held \$85,346,555 in investments outside Treasury. Avenu and Wedbush investment firms held investments totaling \$82,581,555. The firms are members of the Securities Investor Protection Corporation (SIPC) which provides protection up to \$500,000 of which a maximum of \$250,000 applies to cash credit balances. Investments outside Treasury also included \$2,415,000 of real estate property and \$350,000 of unclaimed collectibles held for auction. All the investment holdings of the Common School Fund held outside Treasury were registered in the Department of State Lands' name and therefore not exposed to custodial credit risk.

#### Interest Rate Risk

Interest rate risk is the risk (variable in value) borne by an interest-bearing asset such as a loan or a bond, due to variability of interest rates. Approximately 24 percent of the Common School Fund's investment portfolio is invested in fixed income securities. Investment policy for fixed income investments of the Common School Fund is to maintain a well-diversified bond portfolio, managed to maximize total return, that reflects the overall characteristics of the Barclays Capital Universal Index Benchmark and to invest opportunistically, using innovative investment approaches within a controlled and defined portfolio allocation.

#### Credit Risk and Concentration of Credit Risk

Credit risk refers to the risk that a borrower will default on any type of debt by failing to make payments which it is obligated to make. Treasury investment policies for fixed income investments of the Common School Fund maintain an overall portfolio quality of at least "A" or higher, maintain an average bond duration level of plus or minus 20 percent of the Barclays Capital Universal Index. No more than 30 percent of the total fixed income portfolio at market value, may be maintained in securities rated less than Baa3. No more than 10 percent of the total fixed income portfolio, at market value, may be maintained in Rule 144A securities. No more than 25 percent of the fixed income allocation shall be invested in a single industry, or Government Agency. Use of leverage in any fixed income securities is not allowed (excluding use of securities in a securities lending program).

#### Interest Rate Sensitive Investments

The Common School Fund held approximately \$58.8 million in debt instruments backed by pooled mortgages, TBAs (to-be-announced federal agency-issued mortgage pools), collateralized mortgage obligations (CMOs), or fixed rate mortgages. These securities represent a stream of principal and interest payments from underlying

mortgages and consequently, the value of these securities can be volatile as interest rates fluctuate. Assets with these characteristics may also be susceptible to prepayment by mortgage holders which may result in a decrease in total interest realized. Additionally, the risk of default exits and collateral held may potentially be insufficient to cover the principal due. The Common School Fund also held approximately \$10.0 million of asset-backed securities backed primarily by student loan and manufactured housing loan receivables.

The credit rating of the Common School Fund's investments held at Treasury and using the segmented time distribution method as of June 30, 2021, follows.

		Investment Maturities (in years)

#### Foreign Currency Risk

Foreign currency risk is the risk that changes in exchange rates will adversely affect the fair value of an investment or a deposit. State agencies are required to deposit moneys in state-qualified depositories under Oregon law. Exceptions due to foreign field offices and related circumstances are approved by the Treasurer. International debt securities denominated in U.S. dollars are not subject to currency risk if the investment's obligations will be paid in U.S. dollars. Investment policies for fixed income investments under the management of the Treasurer provides for investments of the Common School Fund in non-dollar denominated securities within a target allocation range of 20 to 30 percent of their portfolio. For investments not under the management of the Treasurer there are no formal policies on foreign currency risk. Deposits and investments exposed to foreign currency risk for the Common School Fund as of June 30, 2021, follow:

	Deposits and Investments (U.S. Dollars)

#### **Notes to the Financial Statements**

June 30, 2021

#### C - FAIR VALUE MEASUREMENTS

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Observable inputs are developed based on market data obtained from sources independent of the reporting entity. Unobservable inputs are developed based on the best information available about the assumptions market participants would use in pricing the asset. The classification of investments within the fair value hierarchy is based upon the activity level in the market for the security type and the inputs used to determine their fair value, as follows:

Investments held by Treasury:

- Level 1 Unadjusted quoted prices for identical instruments in active markets.
  - Investments managed by Treasury: investments in equity securities, including exchange-traded derivatives, when their value is based on quoted prices from an active market; and real estate, which consist of investments in real estate investment trusts, when their valued based on an active market price.
  - Investments not managed by Treasury: funds priced using a fair value per share that is
    published daily and validated with a sufficient level of observable activity; and equity securities,
    including exchange-traded derivatives, when their value is based on quoted prices from an
    active market.
- Level 2 Quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and model-derived valuations in which all significant inputs are observable.
  - Investments managed by Treasury: investments with remaining maturities of fewer than 90 days are carried at amortized cost, which approximates fair value; investments with maturities of greater than 90 days, debt securities, and investments not valued at fair value per share are valued using the latest bid prices or evaluated quotes from independent pricing vendors, which use a variety of methods when pricing these securities that incorporate relevant observable market data to arrive at an estimate of what a buyer in the marketplace would pay for a security under current market conditions; certain non-U.S. government commercial paper is reported at amortized cost as independent vendor pricing was not available; and where observable activity is limited, yet supports that the fair value per share represents an exit value of the security at the measurement date.
  - o <u>Investments not managed by Treasury</u>: debt securities are valued using the latest bid prices or evaluated quotes from independent pricing vendors, which use a variety of methods when pricing these securities that incorporate relevant observable market data to arrive at an estimate of what a buyer in the marketplace would pay for a security under current market conditions; and where observable activity is limited, yet supports that the fair value per share represents an exit value of the security at the measurement date.
- Level 3 Valuations derived from valuation techniques in which significant inputs are unobservable.
  - o <u>Investments not managed by Treasury</u>: in the absence of quoted market prices, such as equity securities that trade infrequently or not at all, valuations are based on the last traded price or prices provided by investment managers; and funds that do not meet the criteria to be measured at fair value because the fair value per share (or its equivalent) was not calculated in a manner consistent with the Financial Accounting Standards Board's measurement principles for investment companies.

Investments that are measured at net asset value (NAV) as a practical expedient, such as private equity, real estate open ended funds, and alternative equities, are excluded from the fair value hierarchy if the NAV (or its equivalent) was calculated in a manner consistent with the Financial Accounting Standards Board's measurement principles for investment companies.

Private equity consists of 15 funds, organized as limited partnerships and limited liability companies, participating in diversified strategies including leveraged-buyouts, venture capital, growth equity, fund of funds, co-investments

and special situations. The fair values of the private equity investments have been determined using the NAV per share (or its equivalent) as provided by the general partner or managing member. These funds have a finite term. Distributions will be received as the underlying investments of the funds are liquidated, which is expected to occur over the next 12-14 years.

Investments in real estate open ended funds have been valued based on the NAV per share (or its equivalent) as provided by the fund manager and consist of investments in two open ended funds that permit quarterly redemption of shares, subject to certain requirements being met.

Alternative equity funds seek to provide diversification and inflation hedging characteristics to the Common School Fund and consist of four investments in commingled funds which permit monthly redemption of shares, subject to certain requirements being met. The fair values of the investments have been determined using NAV per share (or its equivalent) as provided by the fund manager.

Real estate property investments held outside of the Oregon State Treasury are valued by appraisals using market sales approach and income approach. Collectibles held outside Treasury are valued using comparative sales.

The following table shows the fair value classification hierarchy for investments as of June 30, 2021:

Investments by Fair Value Level	Fair Value	Total		
	Level 1	Level 2	Level 3	Investments
Investments Held at Treasury				
U.S. Treasury	\$ -	\$ 58,759,310	\$ -	\$ 58,759,310

#### **D - SECURITIES LENDING**

CSF participates in securities lending transactions in accordance with State investment policies. The Oregon State Treasury has, through a Securities Lending Agreement, authorized State Street Bank and Trust Company (State Street) to lend the CSF securities pursuant to a form of loan agreement. Both the State and borrowers maintain the right to terminate all securities lending transactions on demand. There were no significant violations of the provisions of securities lending agreements during the year ended June 30, 2021.

During the year State Street had the authority to loan short-term, fixed income, and equity securities and to receive as collateral U.S. dollar and foreign currency cash, U.S. government and agency securities, and foreign sovereign debt of Organization of Economic Cooperation and Development countries. Borrowers were required to deliver collateral for each loan equal to not less than 102 percent of the market value of the loaned U.S. securities, international fixed income securities, or 105 percent in the case of international equity. The custodian did not have the ability to pledge or sell collateral securities absent a borrower default, and during the fiscal year the State did impose restrictions on the amount of loans the custodian made on its behalf. The State is fully indemnified against losses due to borrower default by its custodian. There were no losses during the year from the failure of borrowers to return loaned securities and no recoveries of amounts from prior losses.

As of June 30, 2021, the fair value of cash and non-cash collateral received was \$15.9 million and invested cash collateral was \$5.4 million for CSF. There were no significant violations of the provisions of securities lending agreements during the period of these financial statements.

State Street, as a lending agent, has created a fund to reinvest cash collateral received on behalf of the OSTF. CSF receives an allocated portion of this activity based on its deposits in OSTF. As of June 30, 2021, CSF's allocated portion of cash collateral received and invested cash collateral were \$145.0 thousand and \$145.0 thousand respectively. Securities on loan from OSTF in total included U.S. Treasury securities (63.17%), U.S. Agency securities (17.62%), and domestic fixed income securities (19.20%).

As permitted under the fund's Declaration of Trust (Declaration), participant purchases and redemptions are transacted at \$1 per unit ("constant value") based on the amortized cost of the fund's investments. Accordingly, the securities lending collateral held and the obligation to the lending agent are both stated at constant value on the balance sheet and statement of net position.

The maturities of investments made with cash collateral did not generally match the maturities of the securities loaned. Since the securities loaned are callable on demand by either the lender of borrower, the life of the loans at June 30, 2021, is effectively one day. On June 30, 2021, the CSF had no credit risk exposure to borrowers because the amounts the State owes to borrowers exceed the amounts borrowers owe the State. The following table shows the combined balances of the securities on loan, cash and securities collateral received, and investments of cash collateral held.

Securities Lending as of June 30, 2021						
Investment Type		Cash and Securities Collateral Received		Securities on Loan at Fair Value		estments of sh Collateral Fair Value
U.S. Treasury securities	\$	3,281,894	\$	3,230,971	\$	_
U.S. Agency securities		7,311,000		7,172,433		139,656
Domestic equity securities		2,220,813		2,186,713		1,303,413
Domestic debt securities		1,283,250		1,258,241		2,684,235
International equity securities		1,777,952		1,693,120		1,265,814
		15,874,909		15,541,478		5,393,118
Allocation from Oregon Short Term Fund		663,121		649,852		145,003
Total	\$	16,538,030	\$	16,191,330	\$	5,538,121

#### **NOTE 3 – DERIVATIVES**

Derivatives are financial instruments whose value is derived from underlying assets, reference rates, or indexes. They generally take the form of contracts in which two parties agree to make payments at a later date based on the value of the underlying assets, reference rates, or indexes. The main types of derivatives are futures, forwards, options and swaps. In the Common School Fund portfolio, forward currency exchange contracts may be used to gain exposure or hedge against the effects of fluctuations of foreign currency exchange rates. A foreign currency exchange contract is a forward contract that is a commitment to purchase or sell a foreign currency at the future date at a negotiated forward rate. Foreign currency forward contracts are privately negotiated contracts with customized terms and are transacted in over-the-counter markets. Risk associated with such contracts includes movement in the value of foreign currencies and the failure of the counter party to perform.

The following table shows the foreign currency exchange contracts subject to foreign currency risk within the Common School Fund as of June 30, 2021:

	Currency Forward Contracts						
Opti	ons	Net Re	eceivables	Net	Payables	Tota	l Exposure
\$	-	\$	-	\$	(5,269)	\$	(5,269)
	-		2,434		(17,392)		(14,958)
	-		-		(70,307)		(70,307)
\$	-	\$	2,434	\$	(92,968)	\$	(90,534)
		-	Options Net Res	Options Net Receivables  \$ - \$ 2,434	Options         Net Receivables         Net           \$         -         \$           -         2,434           -         -	Options         Net Receivables         Net Payables           \$         -         \$ (5,269)           -         2,434         (17,392)           -         -         (70,307)	Options         Net Receivables         Net Payables         Total           \$         -         \$ (5,269)         \$           -         2,434         (17,392)         (70,307)

In the Common School Fund portfolio, rights and warrants are often obtained and held due to existing investments. Rights are the right, but not the obligation, to purchase newly issued equity shares, often in proportion to the number of shares currently owned, in a specific company, at a pre-established price on or within a predetermined date. A warrant provides the holder the right, but not the obligation, to purchase securities from the issuing entity at a specific price and within a certain period. Rights and warrants are privately transacted in over-the-counter markets. Both are subject to general market risk and liquidity risk.

The following table shows the related net appreciation in fair value amounts and the notional amounts of derivative instruments outstanding within the Common School Fund as of June 30, 2021:

N	Net Appre	eciation/			
	(Deprecia	ation) in		Fair	Notional
Investment Derivatives	Fair Va	lue <sup>1,4</sup>	Classification	Value <sup>2</sup>	Value 3
Foreign Exchange Forwards	\$	3,895	Long Term Instruments	\$ (90,533)	\$ 5,282,540
Rights		1,499	Common Stock	-	-
Warrants		(2,988)	Common Stock	-	-
Total	\$	2,406		\$ (90,533)	\$ 5,282,540

<sup>&</sup>lt;sup>1</sup> Negative values (in brackets) refer to losses

The fair value of derivative instruments is reported on the balance sheet as investments, accounts and interest receivables, and accounts payable. Changes in fair value of derivative instruments during the fiscal year are reported on the statement of revenues, expenditures, and changes in fund balance as investment income.

<sup>&</sup>lt;sup>2</sup> Negative values refer to liabilities

<sup>&</sup>lt;sup>3</sup> Notional may be a dollar amount or size of underlying for futures and options

<sup>&</sup>lt;sup>4</sup> Excludes futures margin payments

June 30, 2021

#### **NOTE 4 - RECEIVABLES AND PAYABLES**

#### A - RECEIVABLES

The following table disaggregates receivable balances reported in the financial statements as accounts and interest receivable (net). Receivable reported for governmental activities as of June 30, 2021:

Governmental activities	Total
General accounts	\$ 145,636
Interest	1,891,939
Investment broker receivable	5,162,156
Other Noncurrent Receivables	791,292
Gross receivables	7,991,023
Allowance for doubtful accounts	 (688,424)
Total receivables, net	\$ 7,302,599

#### **B-PAYABLES**

The following table disaggregates accounts payable reported in the financial statements as general accounts payable and broker payable. Payables reported for governmental activities as of June 30, 2021:

Governmental activities	Total
General accounts payable	\$ 1,816,307
Investment broker payable	10,588,748
Total payables	\$ 12,405,055

#### **C – DEPOSIT LIABILITIES**

Deposit liabilities consist of unclaimed property held in custody by the Department in perpetuity for the rightful owner as required by ORS 98.302-98.436 and 98.991-98.992. The unclaimed property liability is reported at approximately 46% of the total unclaimed property being held. An annual adjustment is made to this account to reduce the amount reported to the amount actually expected to be paid out based on a history of the account. The total legal liability for the unclaimed property program as of June 30, 2021, was \$866,949,075. The accumulated annual adjustment as of June 30, 2021, was \$420,064,540.

#### **NOTE 5 - LEASES**

#### A - OPERATING LEASES

The Department has entered into various non-cancelable rental agreements that are accounted for as operating leases because the agreements do not meet the criteria to be classified as capital leases. Operating lease payments are chargeable as rent expense and reported in services and supplies. Rental costs for operating leases for the year ended June 30, 2021, were \$108,489. The following table shows future minimum rental payments for operating leases in effect as of June 30, 2021.

Year ending June 30,	Payments		
2022	\$	60,250	
2023		78,853	
2024		89,413	
2025		100,453	
2026		107,651	
2027-2031		255,608	
Total future minimum			
rental payments	\$	692,228	

#### **B – LEASE RECEIVABLES**

The Department receives rental income from land and property leased to non-state entities. For the year ended June 30, 2021, the Department received rental income of \$57,836 on leased assets with a fair market value of \$2,415,000. The leased assets are considered investments of the Department of which the fair market value includes net appreciation of \$513,947 over the cost of the leased assets. Future minimum lease revenues for non-cancelable operating leases as of June 30, 2021:

Year ending June 30,	A	mount
2022	\$	59,572
2023		61,359
2024		63,200
2025		65,095
2026		67,048
2027-2031		194,731
Total future minimum rental revenues	\$	511,005

#### **NOTE 6 – POLLUTION REMEDIATION OBLIGATION**

Pollution remediation obligations address the current or potential detrimental effects of existing pollution by participating in pollution remediation activities. This includes pre-cleanup activities, cleanup activities, government oversight and enforcement-related activities and post remediation monitoring. Excluded from pollution remediation obligations are obligations for pollution prevention and control activities, fines and penalties, landfill closure and post closure care, and other future remediation activities required upon retirement of an asset. The Common School Fund recognizes a pollution remediation obligation when it can reasonably estimate the range of expected cash outlays.

The Department is involved in negotiations related to a confidential, non-judicial mediation process that will result in an allocation of costs associated with investigation and cleanup of contamination of the in-river portions of the Portland Harbor Superfund site. There are over 100 parties, private and public, that may eventually bear a share of the costs. The Environmental Protection Agency (EPA) issued a Record of Decision estimating the cleanup to cost \$1.1 billion and take approximately 13 years to complete. It is too early to estimate the total cleanup costs that may be shared by the liable parties and what portion of that will be assessed against the Common School Fund. The Portland Harbor Superfund site is discussed in greater detail in Note 12.

On May 31, 2019, the Department entered into a settlement agreement for funding remedial design with the EPA, Oregon Department of Transportation, and the City of Portland for the Portland Harbor Superfund site cleanup. The EPA settlement agreement for funding remedial design requires the State to pay \$6 million to EPA in July 2019 and up to \$6 million by June 2021, not to exceed \$12 million in total. As of June 30, 2021, the EPA informed the Department that the second payment of \$6 million for remedial design was not necessary.

The Department is entering contracts for Portland Harbor cleanup activities estimated at \$3.7 million. The pollution remediation obligation of \$3.7 million for the Portland Harbor Superfund site is recorded in the State of Oregon Comprehensive Annual Financial Report for the year ended June 30, 2021, Statement of Net Position.

#### **NOTE 7 - INTERFUND TRANSACTIONS**

Inter-fund balances reported in the financial statements as of June 30, 2021:

	Due from Other Funds					
Due to Other Funds	General			ironmental nagement	Common School	
Environmental Management	\$	-	\$	-	\$	181,330
Common School		268		108,727		-
Total	\$	268	\$	108,727	\$	181,330

	 Advances to Other Funds				
Advances from Other Funds				_	Common School
Environmental Management	\$ -	\$	-	\$	300,000

Inter-fund balances result from the time lag between the date a transaction for inter-fund goods and services or reimbursable expenditures is recorded and the date the payment between funds is made. Advances to other funds are not expected to be repaid within one year.

#### **NOTE 8 – RELATED PARTY TRANSACTIONS**

The Oregon State Treasurer (Treasurer) is a constitutional officer within the executive branch of the state of Oregon, elected by statewide vote. As chief financial officer for the state, the Treasurer heads the Oregon State Treasury (Treasury). Treasury acts as the central bank for all state agencies and is the largest financial institution in the state. Treasury manages the portfolio of investments for the state's funds, including the Common School Fund.

The State Land Board, which consists of the Governor, Secretary of State and Treasurer, is the trustee of the Common School Fund as outlined in the Oregon Constitution. The Common School Fund's investment policies are governed by statute and the Oregon Investment Council. The Treasurer is the investment officer for the Investment Council. During the year ended June 30, 2021, the Common School Fund paid Treasury \$590,576 in fees for the management of the Common School Fund investment portfolio.

June 30, 2021

#### **NOTE 9 – RISK FINANCING**

The State of Oregon administers property and casualty programs covering State government through its Insurance Fund. The Insurance Fund services claims for: direct physical loss or damage to state property; tort liability claims brought against the State, its officers, employees or agents, workers' compensation; employee dishonesty; and faithful performance coverage for certain positions by law to be covered and other key positions.

As a state agency, the Department participates in the Insurance Fund. The cost of servicing insurance claims and payments is covered by charging an assessment to each entity based on its share of services provided in a prior period. The total statewide coverage assessment is based on independent biennial actuarial forecasts and administrative expenses, less carry-forward or equity in the insurance fund. For the Common School Fund, the amount of claim settlements did not exceed insurance coverage for each of the past three years.

#### **NOTE 10 – FUND EQUITY**

As of the June 30, 2021, the beginning fund balance was restated by \$13,175 as follows:

Beginning Balance	\$ 1,415,139,611
Prior Period Adjustments	13,175
Beginning Balance - Restated	\$ 1,415,152,786

The adjustment of \$13,175 was made to correct revenue that was recognized in the incorrect period.

Restricted fund balances result from constraints imposed by law through constitutional provisions or enabling legislation or by parties outside the State, such as creditors, grantors, contributors, or laws or regulations of other governments. Enabling legislation authorizes the Department to levy, access, charge, or otherwise mandated payment from external resource providers and includes a legally enforceable requirement that those resources be used only for specific purposes stipulated by the legislation. As of June 30, 2021, the Common School fund balance of \$1,881,038,302 is restricted for K-12 Education.

#### **NOTE 11 - COMMITMENTS**

Commitments are defined as existing arrangements to enter into future transactions or events, such as contractual obligations with vendors for future purchases or services at specified prices and sometimes at specified quantities. Commitments may also include agreements to make grants and loans.

As of June 30, 2021, the Department had the following personal services contract commitments in effect:

Funding Source	Total
Other Funds	\$ 24,999,238

The Oregon Investment Council has entered into agreements that commit the investment managers for the Common School Fund (CSF), upon request, to additional investment purchases up to a predetermined amount. As of June 30, 2021, the Common School Fund had approximately \$80 million in commitments to purchase private equity and real estate open ended fund investments. These amounts are unfunded and are not recorded in the financial statements.

#### **NOTE 12 - CONTINGENCIES**

#### PORTLAND HARBOR SUPERFUND SITE

The Department is involved in negotiations related to a confidential, non-judicial mediation process that will result in an allocation of costs associated with the investigation and cleanup of sediment contamination in the Portland Harbor, a ten-mile stretch of the lower Willamette River area that the U.S. Environmental Protection Agency (EPA) has listed as a Superfund site under the federal Superfund law (CERCLA). The Department is one of over 100 parties, private companies, and public entities that may eventually be found liable for a share of the costs related to investigation and cleanup of the site.

The Department has received General Notice Letters from the EPA informing it is a potentially responsible party (PRP) under CERCLA for cleanup costs at the site. The EPA's letter to the Department charges that the State, through the Department and the State Land Board, is a PRP because of releases of hazardous substances by third-parties on submerged and submersible leased lands owned by the state in trust for the public and managed by the Department. Under CERCLA, responsible parties can be held jointly and severally liable for all costs, subject to certain defenses.

On January 6, 2017 EPA issued a Record of Decision (ROD) for the final cleanup remedy which EPA estimates will cost \$1.05 billion and take approximately 13 years to complete. Other parties estimate that it is a \$3 billion remedy that will take 20 years to complete. Liable parties under CERCLA are responsible for funding this remedial action, as well as other preliminary actions required before full implementation of the ROD, such as additional investigation, remedial design, and agency oversight. EPA has asked PRPs to step forward to perform components of the ROD or risk enforcement action. The Portland Harbor Superfund mediation will allocate response costs among all liable parties.

In September 2018, the EPA signed an Administrative Settlement and Order on Consent which obligates four PRP parties to undertake pre-remedial design sampling to investigate the current state of sediment contamination in the site. This sampling investigation and related deliverables were provided to EPA in June 2019. In September 2019, EPA concluded that the data from the sampling was of suitable quality for further use, though EPA and the four PRP parties remain in discussion about how the data may impact future cleanup work.

It is also too early to estimate the proportionate share of the liability for cleanup costs, if any, that may ultimately be assessed against the Common School Fund. It is not known when the mediation process will end.

The Portland Harbor Superfund will also involve a separate allocation of liability for injuries to natural resources caused by contamination at the site, which is an additional type of recovery under the Superfund law known as natural resource damages (NRD). The NRD claim will be asserted against all PRPs, including the Department, by the Portland Harbor natural resource trustees, a group composed of five tribes, two federal agencies, and the State. The trustees have initiated a cooperative injury assessment process funded by thirty parties, the goal of which is to reach settlements of the NRD claim based on readily available information. The state is seeking a settlement of its NRD liabilities. It is too early to evaluate what, if any, share of the liability the Common School Fund may ultimately bear for NRD claim.

The Department is pursuing claims for insurance coverage of its Portland Harbor defense costs and any future liabilities for cleanup costs and natural resource damages. These claims are based on commercial general liability insurance policies the State held from 1968 to 1972 that listed the Department as an additional insured. These insurance carriers have agreed to participate in funding the Department's defense in Portland Harbor proceedings but have reserved their rights to deny indemnity coverage. In June 2019, the State executed a settlement agreement with several insurers regarding their obligation to pay for most of the Department's defense costs through 2024.

### **OTHER REPORTS**

This page intentionally left blank.

Independent Auditor's Report on Internal Control over Financial Reporting and on Compliance and Other Matters Based on an Audit of Financial Statements Performed in Accordance with Government Auditing Standards

State Land Board
Oregon Department of State Lands
Salem, Oregon

We have audited, in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States, the financial statements of the Common School Fund, a major governmental fund of the State of Oregon, which comprise the balance sheet as June 30, 2021, and the related statement of revenues, expenditures, and changes in fund balances for the year ended, and the related notes to the financial statements, which collectively comprise the Common School Fund's basic financial statements and have issued our report thereon dated November 10, 2021.

#### **Internal Control over Financial Reporting**

In planning and performing our audit of the financial statements, we considered the Common School Fund's internal control over financial reporting (internal control) as a basis for designing audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Common School Fund's internal control. Accordingly, we do not express an opinion on the effectiveness of the Common School Fund's internal control.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A material weakness is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

#### **Compliance and Other Matters**

As part of obtaining reasonable assurance about whether the Common School Fund's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the financial statements. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

#### **Purpose of this Report**

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the entity's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

Side Sailly LLP Boise, Idaho

November 10, 2021
